``Fairly uniform'' means the size of the fruit within the container does not vary more than $\frac{1}{2}$ inch diameter from the smallest to largest fruit.

Methods of sampling and calculation of percentages.

(a) When the numerical count is marked on the container, containers are packed to weigh ten pounds or less, or in any container where the minimum diameter of the smallest apple does not vary more than $\frac{1}{2}$ inch from the minimum diameter of the largest apple, percentages shall be calculated on the basis of count.

(b) In all other cases except those listed in paragraph (a) of this section, they shall be calculated on the basis of weight.

Condition after storage or transit.

Decay, scald, or any other deterioration which may have developed on apples after they have been in storage or transit shall be considered as affecting condition and not the grade.

Packing requirements.

(a) Apples tray packed or cell packed in cartons shall be arranged according to approved and recognized methods.
