§ 400.48 Protection of interests of tenants, landlords or producers.

Any tenant, landlord or producer on the farm separate from the person declared ineligible for crop insurance under the provisions of §400.47 of this part, will remain eligible for crop insurance on their insurable share in the crop, unless such tenant, landlord, or producer on the farm is:

(a) Also convicted of planting, cultivating, growing, producing, or storing a controlled substance;

(b) Otherwise determined by FCIC to be ineligible for crop insurance.

§§ 400.49–400.50 [Reserved]

Subpart G—Actual Production History

SOURCE: 59 FR 47787, Sept. 19, 1994, unless otherwise noted.

§ 400.51 Availability of actual production history program.

An Actual Production History (APH) Coverage Program is offered under the provisions contained in the following regulations:

7 CFR part 457—Common Crop Insurance Regulations; and all special provisions thereto unless specifically excluded by the special provisions.

The APH program operates within limits prescribed by, and in accordance with, the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), only on those crops identified in this section in those areas where the Actuarial Table provides coverage. Except when in conflict with this subpart, all provisions of the applicable crop insurance contract for these crops apply.

§ 400.52 Definitions.

In addition to the definitions contained in the crop insurance contract, the following definitions apply for the purposes of the APH Coverage Program:

(a) APH. Actual Production History.

(b) Actual yield. The yield per acre for a crop year calculated from the production records or claims for indemnities. The actual yield is determined by dividing total production (which includes harvested and appraised production) by planted acres for annual crops or by insurable acres for perennial crops.

(c) Adjusted yield. The transitional or determined yield reduced by the applicable percentage for lack of records. The adjusted yield will equal 65 percent of the transitional or determined yield, if no producer records are submitted; 80 percent, if records for one year are submitted; and 90 percent, if two years of records are submitted.

(d) Appraised production. Production determined by the Agricultural Stabilization and Conservation Service (ASCS), the FCIC, or a company reinsured by the FCIC, that was unharvested but which reflected the crop’s yield potential at the time of the appraisal. For the purpose of APH “appraised production” specifically excludes production lost due to uninsurable causes.

(e) Approved APH yield. A yield, calculated and approved by the verifier, used to determine the production guarantee and determined by the sum of the yearly actual, assigned, and adjusted or unadjusted transitional or determined yields divided by the number of yields contained in the database. The database may contain up to 10 consecutive crop years of actual and or assigned yields. At least four yields will always exist in the database.

(f) Assigned yield. A yield assigned by FCIC in accordance with the crop insurance contract, if the insured does not file production reports as required by the crop insurance contract. Assigned yields are used in the same manner as actual yields when calculating APH yields except for purposes of the Nonstandard Classification System (NCS).

(g) Base period. Ten consecutive crop years (except peaches, which have a
