Federal Crop Insurance Corporation, USDA § 457.122

(1) Multiplying the insured acreage for each crop, or variety if applicable, by its respective production guarantee;

(2) Multiplying the results of section 11(b)(1) by the respective price election for each crop, or variety, if applicable;

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to be counted of each variety, if applicable (see section 11(c)), by the respective price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting this result of section 11(b)(5) from the result of section 11(b)(3);

(7) Multiplying the result of section 11(b)(6) by your share;

(c) The total production to count (in cartons) from all insurable acreage on the unit will include:

(1) All appraised production as follows:

   (i) Not less than the production guarantee per acre for acreage:

      (A) That is abandoned;

      (B) For which you fail to provide acceptable production records;

      (C) That is damaged solely by uninsured causes; or

      (D) From which production is sold by direct marketing, if direct marketing is specifically permitted by the Special Provisions or a written agreement, and you fail to meet the requirements contained in section 10;

   (ii) Production lost due to uninsured causes;

   (iii) Unharvested production determined to be marketable as fresh packed fruit; and

   (iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count;

(2) All harvested production marketed as fresh packed fruit from the insurable acreage; and

(3) All citrus that was disposed of or sold without an inspection or written consent.

(d) Any production will be considered marketed or marketable as fresh packed fruit unless, due solely to insured causes, such production was not marketed or marketable as fresh packed fruit.

(1) Multiplying the insured acreage for each crop, or variety if applicable, by its respective production guarantee;

(2) Multiplying the results of section 11(b)(1) by the respective price election for each crop, or variety, if applicable;

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to be counted of each variety, if applicable (see section 11(c)), by the respective price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting this result of section 11(b)(5) from the result of section 11(b)(3);

(7) Multiplying the result of section 11(b)(6) by your share;

12. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.122 Walnut crop insurance provisions.

The Walnut Crop Insurance Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Walnut Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Harvest. Removal of the walnuts from the orchard.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Net delivered weight. Delivered weight (pounds) of dry, hulled, in-shell walnuts, excluding foreign material.

Pound. A unit of weight equal to 16 ounces avoirdupois.

Production guarantee (per acre). The number of pounds (whole in-shell walnuts), determined by multiplying the approved APH yield per acre by the coverage level percentage you elect.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on
non-contiguous land, unless otherwise allowed by written agreement.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions (§ 457.8):

(a) You may select only one price election for all the walnuts in the county insured under this policy unless the Special Provisions provide different price elections by variety or varietal group, in which case you may select one price election for each walnut variety or varietal group designated in the Special Provisions. The price elections you choose for each variety or varietal group must have the same percentage relationship to the maximum price offered by us for each variety or varietal group. For example, if you choose 100 percent of the maximum price election for a specific variety or varietal group, you must also choose 100 percent of the maximum price election for all other varieties or varietal groups.

(b) You must report, by the production reporting date designated in section 3 of the Basic Provisions (§ 457.8), by variety or varietal group if applicable:

1. Any damage, removal of trees, change in practices, or any other circumstance that may reduce the expected yield below the yield upon which the insurance guarantee is based, and the number of affected acres;
2. The number of bearing trees on insurable and uninsurable acreage;
3. The age of the trees and the planting pattern;
4. For the first year of insurance for acreage interplanted with another perennial crop, and anytime the planting pattern of such acreage is changed, the age of the crop that is interplanted with the walnuts, and type if applicable, and the planting pattern; and
5. Any other information that we request in order to establish your approved yield.

We will reduce the yield used to establish your production guarantee as necessary, based on our estimate of the effect of the following: interplanted perennial crop; removal of trees; damage; change in practices and any other circumstance on the yield potential of the insured crop. If you fail to notify us of any circumstance that may reduce your yields from previous levels, we will reduce your production guarantee as necessary at any time we become aware of the circumstances.

(c) You may not increase your elected or assigned coverage level or the ratio of your price election to the maximum price election if a cause of loss that could or would reduce the yield of the insured crop has occurred prior to the time that you request the increase.
Federal Crop Insurance Corporation, USDA  § 457.122

(2) The calendar date for the end of the insurance period for each crop year is November 15 (Exceptions, if any, for specific counties or varieties or varietal group are contained in the Special Provisions).

(3) Notwithstanding paragraph (a)(1) of this section, for each subsequent crop year that the policy remains continuously in force, coverage begins on the day immediately following the end of the insurance period for the prior crop year. Policy cancellation that results solely from transferring to a different insurance provider for a subsequent crop year will not be considered a break in continuous coverage.

(4) If your walnut policy is canceled or terminating after any crop year, in accordance with the terms of the policy, after insurance attached for that crop year but on or before the cancellation and termination dates whichever is later, insurance will not be considered to have attached for that crop year and no premium, administrative fee, or indemnity will be due for such crop year.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§ 457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins but on or before the acreage reporting date for the crop year, and after an inspection we consider the acreage acceptable, insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period. Acreage acquired after the acreage reporting date will not be insured.

(2) If you relinquish your insurable share on any insurable acreage of walnuts on or before the acreage reporting date for the crop year, insurance will not be considered to have attached to, and no premium or indemnity will be due for such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

11. Settlement of Claim

(a) In accordance with the provisions of section 12 of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;

(2) Fire, unless weeds and undergrowth have not been controlled or pruning debris has not been removed from the orchard;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against any damage or loss of production due to the inability to market the walnuts for any reason other than actual physical damage to the walnuts from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Duties in the Event of Damage or Loss

(a) In addition to the requirements of section 14 of the Basic Provisions, if you intend to claim an indemnity on any unit:

(1) You must notify us prior to the beginning of harvest so that we may inspect the damaged production;

(2) You must give notice when knowledge is obtained of any mold damage or 15 days prior to harvest so that we may inspect the mold damaged production; and

(3) You must not sell or dispose of the damaged crop until we have given you written consent to do so.

(b) If you fail to meet the requirements of this section, all such production will be considered undamaged and included as production to count.

9. Causes of Loss

(a) In accordance with the provisions of section 12 of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions;

(2) Fire, unless weeds and undergrowth have not been controlled or pruning debris has not been removed from the orchard;

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of irrigation water supply, if caused by an insured peril that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against any damage or loss of production due to the inability to market the walnuts for any reason other than actual physical damage to the walnuts from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by the respective production guarantee;

(2) Multiplying each result in section 11(b)(1) by the respective price election for each variety or varietal group;

(3) Totaling the results in section 11(b)(2);

(4) Multiplying the total production to be counted of each variety or varietal group, if applicable, (see section 11(c)) by the respective price election; and

(5) Totaling the results in section 11(b)(4);
§ 457.123

(6) Subtracting the result in section 11(b)(5) from the result in section 11(b)(3); and

(7) Multiplying the result in section 11(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of walnuts in the unit, with a guarantee of 2,500 pounds per acre and a price election of $0.61 per pound. You are only able to harvest 200,000 pounds. Your indemnity would be calculated as follows:

(1) 100 acres \times 2,500 \text{ pounds} = 250,000 \text{ pound insurance guarantee};

(2 & 3) 250,000 \text{ pounds} \times \$0.61 \text{ price election} = \$152,500 \text{ total value of insurance guarantee};

(4 & 5) 200,000 \text{ pounds production to count} \times \$0.61 \text{ price election} = \$122,000 \text{ total value of production to count};

(6) \$152,500 \text{ total value guarantee} - \$122,000 \text{ total value of production to count} = \$30,500 \text{ loss}; and

(7) \$30,500 \times 100 \text{ percent share} = \$30,500 \text{ indemnity payment}.

(c) The total production to count (whole in-shell pounds) from all insurable acreage on the unit will include:

(1) All appraised production as follows:
   (A) Not less than the production guarantee per acre for acreage:
   (B) That is abandoned;
   (C) That is damaged solely by uninsured causes; or
   (D) For which you fail to provide acceptable production records;
   (ii) Production lost due to uninsured causes;
   (iii) Unharvested production; and
   (iv) Potential production on insured acreage that you intend to abandon or no longer care for, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and
   (2) All harvested production from the insurable acreage.

(d) Mature walnut production damaged due to an uninsured cause of loss which occurs within the insurance period may be adjusted for quality based on an inspection by the Dried Fruit Association or during our loss adjustment process. Walnut production that has mold damage greater than 8 percent, based on the net delivered weight, will be reduced by the quality adjustment factors contained in the Special Provisions. Walnut production that exceeds 30 percent mold damage and will not be sold, the production to count will be zero.

12. Late and Prevented Planting

The late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.123 Almond crop insurance provisions.

The Almond Crop Insurance Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and Reinsured Policies

Almond Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Harvest. The removal of mature almonds from the orchard.

Interplanted. Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Meat pounds. The total pounds of almond meats (whole, chipped and broken, and in-shell meats). In-shell almonds will be converted to meat pounds in accordance with FCIC approved procedures.

Production guarantee (per acre). The quantity of almonds (total meat pounds per acre) determined by multiplying the approved actual production history (APH) yield per acre by the coverage level percentage you elect.

Set out. Transplanting the tree into the orchard.

2. Unit Division

Provisions in the Basic Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable. Optional units may be established only if each optional unit is located on non-contiguous land, unless otherwise allowed by written agreement.
