§ 72.19 Interstate shipments and use of pine straw, grass, litter from quarantined area; prohibited until disinfected.

Pine straw, grass, or similar litter collected from tick-infested pastures, ranges, or premises may disseminate noninfectious pens shall be shipped in noninfectious cars from points outside of the quarantined area so handled that they may not become infectious.

§ 72.18 Movement interstate; specification by the Deputy Administrator, Veterinary Services of treatment required when dipping facilities unavailable.

(a) Tick-infested cattle. Cattle of the free area which are tick-infested may be moved interstate for any purpose after they have been treated in the same manner as cattle under §72.6: Provided, however, That when dipping equipment is not available at the place where the cattle are, said treatment shall be given at a place and in the manner specified by the Administrator, APHIS.

(b) Tick-exposed cattle. Cattle of the free area which have been exposed to tick infestation may be moved interstate for any purpose after they have been treated in the same manner as cattle under §72.7: Provided, however, That when dipping equipment is not available at the place where the cattle are, said treatment shall be given at a place and in the manner specified by the Administrator, APHIS.

(c) Cattle moved contrary to regulations. Cattle which have been moved from the quarantined area to the free area without first having been treated in the manner provided in either §72.6 or §72.7 or inspected in the manner provided in §72.8 shall not be shipped or moved interstate until they have been treated in the same manner as cattle under §72.6: Provided, however, That when dipping equipment is not available at the place where the cattle are, said treatment shall be given at a place and in the manner specified by the Administrator, APHIS.
