§ 291.43 Statement of operation for section 41103 operations.

Form 291–A contains the following data elements:

(a) Total operating revenue, categorized as follows:
   (i) Transport revenues from the carriage of property in scheduled and nonscheduled service;
   (ii) Transport revenues from the carriage of mail in scheduled and nonscheduled service; and
   (iii) Transport-related revenues;

(b) Total operating expenses;

(c) Operating profit or loss, computed by subtracting the total operating expenses from the total operating revenues; and

(d) Net income, computed by subtracting the total operating and nonoperating expenses, including interest expenses and income taxes, from the total operating and nonoperating revenues.

§ 291.44 BTS Schedule P–12(a), Fuel Consumption by Type of Service and Entity.

(a) For the purposes of BTS schedule P–12(a), type of service shall be either scheduled service or nonscheduled service as those terms are defined in §291.45(c)(2) and (3).

(b) For the purpose of this schedule, scheduled service shall be reported separately for:
   (1) Intra-Alaskan operations;
   (2) Domestic operations, which shall include all operations within and between the 50 States of the United States (except Intra-Alaska), the District of Columbia, the Commonwealth of Puerto Rico and the United States Virgin Islands, or a U.S. territory or possession to a place in any State of the United States the District of Columbia, the Commonwealth of Puerto Rico and the United States Virgin Islands, or a U.S. territory or possession;
   (3) International operations are flight stages with one or both terminals outside the 50 States of the United States, the District of Columbia, the Commonwealth of Puerto Rico and the United States Virgin Islands, or a U.S. territory or possession.

(c) For the purpose of this schedule, nonscheduled service shall be reported separately for domestic operations and international operations as defined in paragraphs (b)(2) and (b)(3) of this section, except that domestic and international Military Airlift Command (MAC) operations shall be reported on separate lines.

(d) The cost data reported on each line shall represent the average cost of fuel, as determined at the station level, consumed in that geographic entity.

(e)(1) The cost of fuel shall include shrinkage, but excludes:
   (i) “Throughput” and “in to plane” fees, i.e., service charges or gallonage levies assessed by or against the fuel vendor or concessionaire and passed on to the carrier in a separately identifiable form; and
   (ii) Nonrefundable Federal and State excise taxes.

(2) However, “through-put” and “in to plane” charges that cannot be identified or segregated from the cost of fuel shall remain a part of the cost of fuel as reported on this schedule.
(f) Each air carrier shall maintain records for each station showing the computation of fuel inventories and consumption for each fuel type. The periodic average cost method shall be used in computing fuel inventories and consumption. Under this method, an average unit cost for each fuel type shall be computed by dividing the total cost of fuel available (Beginning Inventory plus Purchases) by the total gallons available. The resulting unit cost shall then be used to determine the ending inventory and the total consumption costs to be reported on this schedule.

(g) Where amounts reported for a specific entity include other than Jet A fuel, a footnote shall be added indicating the number of gallons and applicable costs of such other fuel included in amounts reported for that entity.

(h) Where any adjustment(s) recorded on the books of the carrier results in a material distortion of the current month’s schedule, carriers shall file a revised Schedule P-12(a) for the month(s) affected.

[Doc. No. OST 98-4043, 67 FR 49227, July 30, 2002]

§ 291.45 BTS Schedule T-100, U.S. Air Carrier Traffic and Capacity Data by Nonstop Segment and On-Flight Market.

(a) Each section 41103 all-cargo air carrier shall file Schedule T-100, “U.S. Air Carrier Traffic and Capacity Data by Nonstop Segment and On-Flight Market.”

(b) Schedule T-100 shall be filed monthly.

(1) Schedule T-100 collects summarized flight stage data and on-flight market data for revenue flights. All traffic statistics shall be compiled in terms of each flight stage as actually performed. The detail T-100 data shall be maintained in such a manner as to permit monthly summarization and organization into two basic groupings. First, the nonstop segment information which is to be summarized by equipment type, within class of service, within pair-of-points, without regard to individual flight number. The second grouping requires that the enplanement/deplanement information be broken out into separate units called on-flight market records, which shall be summarized by class of service, within pair-of-points, without regard for equipment type or flight number.

(2) Joint-service operations. The Department may authorize joint-service operations between two direct air carriers. Examples of these joint-service operations are: blocked-space agreements; part-charter agreements; code-sharing agreements; wet-lease agreements, and similar arrangements.

(i) Joint-service operations are reported by the carrier in operational control of the flight, i.e., the carrier that uses its flight crews under its own FAA operating authority. The traffic moving under these agreements is reported on Schedule T-100 the same way as any other traffic on the aircraft.

(ii) If there are questions about reporting a joint-service operation, contact the BTS Assistant Director—Airline Information (fax no. 202 366-3383, telephone no. 202 366-4373). Joint-service operations are reported in Schedule T-100 in accordance with this paragraph (b).

(iii) Operational control. The air carrier in operational control of the aircraft (the carrier that uses its flight crews under its own FAA operating authority) must report joint services.

(c) Service classes. (1) The statistical classifications are designed to reflect the operating characteristics attributable to each distinctive type of service offered. The combination of scheduled and nonscheduled operations with passenger, all-cargo, and military services are placed into service classes as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Type of service</th>
</tr>
</thead>
<tbody>
<tr>
<td>F</td>
<td>Scheduled Passenger/Cargo</td>
</tr>
<tr>
<td>G</td>
<td>Scheduled All-Cargo</td>
</tr>
<tr>
<td>L</td>
<td>Nonscheduled Civilian Passenger/Cargo</td>
</tr>
<tr>
<td>P</td>
<td>Nonscheduled Civilian Cargo</td>
</tr>
<tr>
<td>N</td>
<td>Nonscheduled Military Passenger/Cargo</td>
</tr>
<tr>
<td>R</td>
<td>Nonscheduled Military Cargo</td>
</tr>
</tbody>
</table>

(2) Scheduled services include traffic and capacity elements applicable to air transportation provided pursuant to published schedules and extra sections of scheduled flights. Scheduled Passenger/Cargo (Service Class F) is a composite of first-class, coach, and mixed passenger/cargo service.
