would plan for the cost of complying with other federal requirements.

(b) A Federal agency may deviate from full consistency with an approved management program when such deviation is justified because of an emergency or other similar unforeseen circumstance ("exigent circumstance"), which presents the Federal agency with a substantial obstacle that prevents complete adherence to the approved program. Any deviation shall be the minimum necessary to address the exigent circumstance. Federal agencies shall carry out their activities consistent to the maximum extent practicable with the enforceable policies of a management program, to the extent that the exigent circumstance allows. Federal agencies shall consult with State agencies to the extent that an exigent circumstance allows and shall attempt to seek State agency concurrence prior to addressing the exigent circumstance. Once the exigent circumstances have passed, and if the Federal agency is still carrying out an activity with coastal effects, Federal agencies shall comply with all applicable provisions of this subpart to ensure that the activity is consistent to the maximum extent practicable with the enforceable policies of management programs. Once the Federal agency has addressed the exigent circumstance or completed its emergency response activities, it shall provide the State agency with a description of its actions and their coastal effects.

(c) A classified activity that affects any coastal use or resource is not exempt from the requirements of this subpart, unless the activity is exempted by the President under section 307(c)(1)(B) of the Act. Under the consistent to the maximum extent practicable standard, the Federal agency shall provide to the State agency a description of the project and coastal effects that it is legally permitted to release or does not otherwise breach the classified nature of the activity. Even when a Federal agency may not be able to disclose project information, the Federal agency shall conduct the classified activity consistent to the maximum extent practicable with the enforceable policies of management programs. The term classified means to protect from disclosure national security information concerning the national defense or foreign policy, provided that the information has been properly classified in accordance with the substantive and procedural requirements of an executive order. Federal and State agencies are encouraged to agree on a qualified third party(ies) with appropriate security clearance(s) to review classified information and to provide non-classified comments regarding the activity's reasonably foreseeable coastal effects.

§ 930.33 Identifying Federal agency activities affecting any coastal use or resource.

(a) Federal agencies shall determine which of their activities affect any coastal use or resource of States with approved management programs.

(1) Effects are determined by looking at reasonably foreseeable direct and indirect effects on any coastal use or resource. An action which has minimal or no environmental effects may still have effects on a coastal use (e.g., effects on public access and recreational opportunities, protection of historic property) or a coastal resource, if the activity initiates an event or series of events where coastal effects are reasonably foreseeable. Therefore, Federal agencies shall, in making a determination of effects, review relevant management program enforceable policies as part of determining effects on any coastal use or resource.

(2) If the Federal agency determines that a Federal agency activity has no effects on any coastal use or resource, and a negative determination under §930.35 is not required, then the Federal agency is not required to coordinate with State agencies under section 307 of the Act.

(3)(i) De minimis Federal agency activities. Federal agencies are encouraged to review their activities, other than development projects within the coastal zone, to identify de minimis activities, and request State agency concurrence that these de minimis activities should not be subject to further State agency review. De minimis activities shall only be excluded from State agency review if a Federal agency and State agency have agreed. The State...
agency shall provide for public participation under section 306(d)(14) of the Act when reviewing the Federal agency’s de minimis activity request. If the State agency objects to the Federal agency’s de minimis finding then the Federal agency must provide the State agency with either a negative determination or a consistency determination pursuant to this subpart. OCRM is available to facilitate a Federal agency’s request.

(ii) De minimis activities are activities that are expected to have insignificant direct or indirect (cumulative and secondary) coastal effects and which the State agency concurs are de minimis.

(4) Environmentally beneficial activities. The State agency and Federal agencies may agree to exclude environmentally beneficial Federal agency activities (either on a case-by-case basis or for a category of activities) from further State agency consistency review. Environmentally beneficial activity means an activity that protects, preserves, or restores the natural resources of the coastal zone. The State agency shall provide for public participation under section 306(d)(14) of the Act for the State agency’s consideration of whether to exclude environmentally beneficial activities.

(5) General consistency determinations, phased consistency determinations, and national or regional consistency determinations under §930.36 are also available to facilitate Federal-State coordination.

(b) Federal agencies shall consider all development projects within the coastal zone to be activities affecting any coastal use or resource. All other types of activities within the coastal zone are subject to Federal agency review to determine whether they affect any coastal use or resource.

(c) Federal agency activities and development projects outside of the coastal zone, are subject to Federal agency review to determine whether they affect any coastal use or resource.

(d) Federal agencies shall broadly construe the effects test to provide State agencies with a consistency determination under §930.34 and not a negative determination under §930.35 or other determinations of no effects.

Early coordination and cooperation between a Federal agency and the State agency can enable the parties to focus their efforts on particular Federal agency activities of concern to the State agency.

§930.34 Federal and State agency coordination.

(a)(1) Federal agencies shall provide State agencies with consistency determinations for all Federal agency activities affecting any coastal use or resource. To facilitate State agency review, Federal agencies should coordinate with the State agency prior to providing the determination.

(2) Use of existing procedures. Federal agencies are encouraged to coordinate and consult with State agencies through use of existing procedures in order to avoid waste, duplication of effort, and to reduce Federal and State agency administrative burdens. Where necessary, these existing procedures should be modified to facilitate coordination and consultation under the Act.

(b) Listed activities. State agencies are strongly encouraged to list in their management programs Federal agency activities which, in the opinion of the State agency, will have reasonably foreseeable coastal effects and therefore, may require a Federal agency consistency determination. Listed Federal agency activities shall be described in terms of the specific type of activity involved (e.g., federal reclamation projects). In the event the State agency chooses to describe Federal agency activities that occur outside of the coastal zone, which the State agency believes will have reasonably foreseeable coastal effects, it shall also describe the geographic location of such activities (e.g., reclamation projects in coastal floodplains).

(c) Unlisted activities. State agencies should monitor unlisted Federal agency activities (e.g., by use of intergovernmental review process established pursuant to E.O. 12372, review of NEPA documents, and the FEDERAL REGISTER) and should notify Federal agencies of unlisted Federal agency activities which Federal agencies have not subjected to a consistency review but which, in the opinion of the State
