Tennessee Valley Authority

§ 1304.208 Shoreline stabilization on TVA-owned residential access shoreland.

TVA may issue permits allowing adjacent residential landowners to stabilize eroding shorelines on TVA-owned residential access shoreland. TVA will determine if shoreline erosion is sufficient to approve the proposed stabilization treatment.

(a) Biostabilization of eroded shorelines.
(1) Moderate contouring of the bank may be allowed to provide conditions suitable for planting of vegetation.
(2) Tightly bound bundles of coconut fiber, logs, or other natural materials may be placed at the base of the eroded site to deflect waves.
(3) Willow stakes and bundles and live cuttings of suitable native plant materials may be planted along the surface of the eroded area.
(4) Native vegetation may be planted within the shoreline management zone to help minimize further erosion.
(5) Riprap may be allowed along the base of the eroded area to prevent further undercutting of the bank.
(b) Use of gabions and riprap to stabilize eroded shorelines.
(1) The riprap material must be quarry-run stone, natural stone, or other material approved by TVA.
(2) Rubber tires, concrete rubble, or other debris salvaged from construction sites shall not be used to stabilize shorelines.
(3) Gabions (rock wrapped with wire mesh) that are commercially manufactured for erosion control may be used.
(4) Riprap material must be placed so as to follow the existing contour of the bank.
(5) Site preparation must be limited to the work necessary to obtain adequate slope and stability of the riprap material.
(c) Use of retaining walls for shoreline stabilization.
(1) Retaining walls shall be allowed only where the erosion process is severe and TVA determines that a retaining wall is the most effective erosion control option or where the proposed wall would connect to an existing TVA-approved wall on the lot or to an adjacent owner’s TVA-approved wall.
(2) The retaining wall must be constructed of stone, concrete blocks, poured concrete, gabions, or other materials acceptable to TVA. Railroad ties, rubber tires, broken concrete (unless determined by TVA to be of adequate size and integrity), brick, creosote timbers, and asphalt are not allowed.
§ 1304.209 Land-based structures/alterations.
(a) Except for steps, pathways, boat launching ramps, marine railways located in the access corridor, bank stabilization along the shoreline, and other uses described in this subpart, no permanent structures, fills or grading shall be allowed on TVA land.
(b) Portable items such as picnic tables and hammocks may be placed on TVA land; permanent land-based structures and facilities such as picnic pavilions, gazebos, satellite antennas, septic tanks, and septic drainfields shall not be allowed on TVA land.
(c) Utility lines (electric, water-intake lines, etc.) may be placed within the access corridor as follows:
(1) Power lines, poles, electrical panel, and wiring must be installed:
   (i) In a way that would not be hazardous to the public or interfere with TVA operations;
   (ii) Solely to serve water-use facilities, and
   (iii) In compliance with all State and local electrical codes (satisfactory evidence of compliance to be provided to TVA upon request).
(2) Electrical service must be installed with an electrical disconnect that is:
   (i) Located above the 500-year floodplain or the flood risk profile, whichever is higher, and
   (ii) Is accessible during flood events.
(3) TVA’s issuance of a permit does not mean that TVA has determined the facilities are safe for any purpose or that TVA has any duty to make such a determination.
(d) Fences crossing TVA residential access shoreland may be considered only where outstanding agricultural rights or fencing rights exist and the land is used for agricultural purposes. Fences must have a built-in means for easy pedestrian passage by the public and they must be clearly marked.

§ 1304.210 Grandfathering of pre-existing shoreland uses and structures.
In order to provide for a smooth transition to new standards, grandfathering provisions shall apply as follows to pre-existing development and shoreland uses established prior to November 1, 1999, which are located along or adjoin TVA-owned access residential shoreland.
(a) Existing shoreline structures (docks, retaining walls, etc.) previously permitted by TVA are grandfathered.
(b) Grandfathered structures may continue to be maintained in accordance with previous permit requirements, and TVA does not require modification to conform to new standards.
(c) If a permitted structure is destroyed by fire or storms, the permit shall be reissued if the replacement facility is rebuilt to specifications originally permitted by TVA.
(d) Vegetation management at grandfathered developments shall be as follows:
(1) Mowing of lawns established on TVA-owned residential access shoreland prior to November 1, 1999, may be continued without regard to whether the lawn uses are authorized by a TVA permit.
(2) At sites where mowing of lawns established prior to November 1, 1999, is not specifically included as an authorized use in an existing permit, TVA will include mowing as a permitted use in the next permit action at that site.
(3) The SMZ is not required where established lawns existed prior to November 1, 1999.
(4) Any additional removal of trees or other vegetation (except for mowing of lawns established prior to November 1, 1999) requires TVA’s approval in accordance with §1304.203. Removal of trees greater than three inches in diameter at ground level is not allowed.
