§ 10.874 Textile or apparel goods.

(a) De minimis—(1) General. Except as provided in paragraph (a)(2) of this section, a textile or apparel good that is not an originating good under the OFTA because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in General Note 31(h), HTSUS, will be considered to be an originating good if the total weight of all such fibers or yarns is not more than seven percent of the total weight of that component.

(2) Exception. A textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good will be considered to be an originating good only if such yarns are wholly formed in the territory of a Party.

(b) Value-content requirement. A good described in paragraph (a)(2) of this section will be considered an originating good under the OFTA only if the sum of the value of materials produced in one or both of the Parties, plus the direct costs of processing operations performed in one or both of the Parties, is not less than 35 percent of the appraised value of the good at the time the good is entered into the territory of the United States.

§ 10.875 Accumulation.

(a) An originating good or material produced in the territory of one or both of the Parties that is incorporated into a good in the territory of the other Party will be considered to originate in the territory of the other Party.

(b) Textile or apparel goods put up in sets. Notwithstanding the specific rules specified in General Note 31(h), HTSUS, textile or apparel goods classifiable as goods put up in sets for retail sale as provided for in General Rule of Interpretation 3, HTSUS, will not be considered to be originating goods under the OFTA unless each of the goods in the set is an originating good or the total value of the non-originating goods in the set does not exceed ten percent of the appraised value of the set.

§ 10.876 Value of materials.

(a) General. For purposes of § 10.873(b) of this subpart and, except as provided in paragraph (b) of this section, the value of a material produced in the territory of one or both of the Parties that is incorporated into a good in the territory of the other Party will be considered to originate in the territory of the other Party.

(b) Combining, packaging, and diluting operations. For purposes of this subpart, a good will not be considered a new or different article of commerce by virtue of having undergone simple combining or packaging operations, or mere dilution with water or another substance that does not materially alter the characteristics of the good. The principles and examples set forth in § 10.195(a)(2) of this part will apply equally for purposes of this paragraph.
(2) The freight, insurance, packing and all other costs incurred in transporting the material to the producer’s plant, if such costs are not included in the price referred to in paragraph (a)(1) of this section;

(3) The cost of waste or spoilage resulting from the use of the material in the growth, production, or manufacture of the good, less the value of recoverable scrap; and

(4) Taxes or customs duties imposed on the material by one or both of the Parties, if the taxes or customs duties are not remitted upon exportation from the territory of a Party.

§ 10.877 Direct costs of processing operations.

(a) Items included. For purposes of §10.873(b) of this subpart, the words “direct costs of processing operations”, with respect to a good, mean those costs either directly incurred in, or that can be reasonably allocated to, the growth, production, or manufacture of the good in the territory of one or both of the Parties. Such costs include, to the extent they are includable in the appraised value of the good when imported into a Party, the following:

(1) All actual labor costs involved in the growth, production, or manufacture of the specific good, including fringe benefits, on-the-job training, and the costs of engineering, supervisory, quality control, and similar personnel;

(2) Tools, dies, molds, and other indirect materials, and depreciation on machinery and equipment that are allocable to the specific good;

(3) Research, development, design, engineering, and blueprint costs, to the extent that they are allocable to the specific good;

(4) Costs of inspecting and testing the specific good; and

(5) Costs of packaging the specific good for export to the territory of the other Party.

(b) Items not included. For purposes of §10.873(b) of this subpart, the words “direct costs of processing operations” do not include items that are not directly attributable to the good or are not costs of growth, production, or manufacture of the good. These include, but are not limited to:

(1) Profit; and

(2) General expenses of doing business that are either not allocable to the good or are not related to the growth, production, or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising, and salesmen’s salaries, commissions, or expenses.

§ 10.878 Packaging and packing materials and containers for retail sale and for shipment.

Packaging materials and containers in which a good is packaged for retail sale and packing materials and containers for shipment are to be disregarded in determining whether a good qualifies as an originating good under §10.873 of this subpart and General Note 31, HTSUS, except that the value of such packaging and packing materials and containers may be included in meeting the value-content requirement specified in §10.873(b) of this subpart.

§ 10.879 Indirect materials.

Indirect materials are to be disregarded in determining whether a good qualifies as an originating good under §10.873 of this subpart and General Note 31, HTSUS, except that the cost of such indirect materials may be included in meeting the value-content requirement specified in §10.873(b) of this subpart.
