§ 718.205 20 CFR Ch. VI (4–1–14 Edition)

pulmonary impairment as defined in paragraphs (b)(2)(i), (b)(2)(ii), (b)(2)(iv) and (d) of this section shall not, by itself, be sufficient to establish that the miner’s impairment is or was due to pneumoconiosis. Except as provided in paragraph (d), the cause or causes of a miner’s total disability shall be established by means of a physician’s documented and reasoned medical report.

(d) Lay evidence. In establishing total disability, lay evidence may be used in the following cases:

(1) In a case involving a deceased miner in which the claim was filed prior to January 1, 1982, affidavits (or equivalent sworn testimony) from persons knowledgeable of the miner’s physical condition shall be sufficient to establish total (or under §718.306 partial) disability due to pneumoconiosis if no medical or other relevant evidence exists which addresses the miner’s pulmonary or respiratory condition.

(2) In a case involving a survivor’s claim filed on or after January 1, 1982, but prior to June 30, 1982, which is subject to §718.306, affidavits (or equivalent sworn testimony) from persons knowledgeable of the miner’s physical condition shall be sufficient to establish total or partial disability due to pneumoconiosis if no medical or other relevant evidence exists which addresses the miner’s pulmonary or respiratory condition; however, such a determination shall not be based solely upon the affidavits or testimony of the claimant and/or his or her dependents who would be eligible for augmentation of the claimant’s benefits if the claim were approved.

(3) In a case involving a deceased miner whose claim was filed on or after January 1, 1982, affidavits (or equivalent sworn testimony) from persons knowledgeable of the miner’s physical condition shall be sufficient to establish total disability due to pneumoconiosis if no medical or other relevant evidence exists which addresses the miner’s pulmonary or respiratory condition; however, such a determination shall not be based solely upon the affidavits or testimony of any person who would be eligible for benefits (including augmented benefits) if the claim were approved.

(4) Statements made before death by a deceased miner about his or her physical condition are relevant and shall be considered in making a determination as to whether the miner was totally disabled at the time of death.

(5) In the case of a living miner’s claim, a finding of total disability due to pneumoconiosis shall not be made solely on the miner’s statements or testimony.

(e) In determining total disability to perform usual coal mine work, the following shall apply in evaluating the miner’s employment activities:

(1) In the case of a deceased miner, employment in a mine at the time of death shall not be conclusive evidence that the miner was not totally disabled. To disprove total disability, it must be shown that at the time the miner died, there were no changed circumstances of employment indicative of his or her reduced ability to perform his or her usual coal mine work.

(2) In the case of a living miner, proof of current employment in a coal mine shall not be conclusive evidence that the miner is not totally disabled unless it can be shown that there are no changed circumstances of employment indicative of his or her reduced ability to perform his or her usual coal mine work.

(3) Changed circumstances of employment indicative of a miner’s reduced ability to perform his or her usual coal mine work may include but are not limited to:

(i) The miner’s reduced ability to perform his or her customary duties without help; or

(ii) The miner’s reduced ability to perform his or her customary duties at his or her usual levels of rapidity, continuity or efficiency; or

(iii) The miner’s transfer by request or assignment to less vigorous duties or to duties in a less dusty part of the mine.

§ 718.205 Death due to pneumoconiosis.

(a) Benefits are provided to eligible survivors of a miner whose death was due to pneumoconiosis. In order to receive benefits based on a showing of
death due to pneumoconiosis, a claimant must prove that:

(1) The miner had pneumoconiosis (see §718.202);

(2) The miner’s pneumoconiosis arose out of coal mine employment (see §718.203); and

(3) The miner’s death was due to pneumoconiosis as provided by this section.

(b) Death will be considered to be due to pneumoconiosis if any of the following criteria is met:

(1) Where competent medical evidence establishes that pneumoconiosis was the cause of the miner’s death, or

(2) Where pneumoconiosis was a substantially contributing cause or factor leading to the miner’s death or where the death was caused by complications of pneumoconiosis, or

(3) Where the presumption set forth at §718.304 is applicable, or

(4) For survivors' claims filed after January 1, 2005, and pending on or after March 23, 2010, where the presumption at §718.305 is invoked and not rebutted.

(5) However, except where the §718.304 presumption is invoked, survivors are not eligible for benefits where the miner’s death was caused by a traumatic injury (including suicide) or the principal cause of death was a medical condition not related to pneumoconiosis, unless the claimant establishes (by proof or presumption) that pneumoconiosis was a substantially contributing cause of death.

(6) Pneumoconiosis is a “substantially contributing cause” of a miner’s death if it hastens the miner’s death.

[78 FR 59114, Sept. 25, 2013]

§718.304 Irrebuttable presumption of total disability or death due to pneumoconiosis.

There is an irrebuttable presumption that a miner is totally disabled due to pneumoconiosis, that a miner’s death was due to pneumoconiosis or that a miner was totally disabled due to pneumoconiosis at the time of death, if such miner is suffering or suffered from a chronic dust disease of the lung which:

(a) When diagnosed by chest X-ray (see §718.202 concerning the standards for X-rays and the effect of interpretations of X-rays by physicians) yields one or more large opacities (greater than 1 centimeter in diameter) and would be classified in Category A, B, or C in:

(1) The ILO–U/C International Classification of Radiographs of the Pneumoconioses, 1971, or subsequent revisions thereto; or

(2) The International Classification of the Radiographs of the Pneumoconioses of the International Labour Office, Extended Classification

Subpart D—Presumptions Applicable to Eligibility Determinations

§718.301 Establishing length of employment as a miner.

The presumptions set forth in §§718.302 and 718.305 apply only if a miner worked in one or more coal mines for the number of years required to invoke the presumption. The length of the miner’s coal mine work history must be computed as provided by 20 CFR 725.101(a)(32).

[78 FR 59114, Sept. 25, 2013]

§718.302 Relationship of pneumoconiosis to coal mine employment.

If a miner who is suffering or suffered from pneumoconiosis was employed for ten years or more in one or more coal mines, there shall be a rebuttable presumption that the pneumoconiosis arose out of such employment. (See §718.203.)

§718.303 [Reserved]

§718.304 Irrebuttable presumption of total disability or death due to pneumoconiosis.

There is an irrebuttable presumption that a miner is totally disabled due to pneumoconiosis, that a miner’s death was due to pneumoconiosis or that a miner was totally disabled due to pneumoconiosis at the time of death, if such miner is suffering or suffered from a chronic dust disease of the lung which:

(a) When diagnosed by chest X-ray (see §718.202 concerning the standards for X-rays and the effect of interpretations of X-rays by physicians) yields one or more large opacities (greater than 1 centimeter in diameter) and would be classified in Category A, B, or C in:

(1) The ILO–U/C International Classification of Radiographs of the Pneumoconioses, 1971, or subsequent revisions thereto; or

(2) The International Classification of the Radiographs of the Pneumoconioses of the International Labour Office, Extended Classification
