§ 556.160 Clopidol.

Tolerances for residues of clopidol (3,5-dichloro-2,6-dimethyl-4-pyridinol) in food are established as follows:

(a) In cereal grains, vegetables, and fruits: 0.2 part per million.
(b) In chickens and turkeys:
   (1) 15 parts per million in uncooked kidney.
   (2) 5 parts per million in uncooked muscle.
(c) In cattle, sheep, and goats:
   (1) 3 parts per million in uncooked kidney.
   (2) 1.5 parts per million in uncooked liver.
   (3) 0.2 part per million in uncooked muscle.
(d) In swine: 0.2 part per million in uncooked edible tissues.
(e) In milk: 0.02 part per million (negligible residue).

§ 556.163 Clorsulon.

(a) Acceptable daily intake (ADI). The ADI for total residues of clorsulon is 8 micrograms per kilogram of body weight per day.
(b) Tolerances—(1) Cattle—(i) Kidney (the target tissue). The tolerance for parent clorsulon (the marker residue) is 1.0 part per million.
   (ii) Muscle. The tolerance for parent clorsulon (the marker residue) is 0.1 part per million.
(2) [Reserved]
[66 FR 35544, July 6, 2001]

§ 556.165 Cloxacinil.

A tolerance of 0.01 part per million is established for negligible residues of cloxacinil in the uncooked edible tissues of cattle and in milk.
[40 FR 28792, July 9, 1975]

§ 556.167 Colistimethate.

A tolerance for residues of colistimethate in the edible tissues of chickens is not required.
[63 FR 13123, Mar. 18, 1998]

§ 556.169 Danofloxacin.

(a) Acceptable daily intake (ADI). The ADI for total residues of danofloxacin is 2.4 micrograms per kilogram of body weight per day.
(b) Tolerances—(1) Cattle—(i) Liver (the target tissue). The tolerance for parent danofloxacin (the marker residue) is 0.2 part per million (ppm).
   (ii) Muscle. The tolerance for parent danofloxacin (the marker residue) is 0.2 ppm.
(2) [Reserved]
[67 FR 78973, Dec. 27, 2002]

§ 556.170 Decoquinate.

(a) Acceptable daily intake (ADI). The ADI for total residues of decoquinate is 75 micrograms per kilogram of body weight per day.
(b) Tolerances. Tolerances are established for residues of decoquinate in the uncooked, edible tissues of chickens, cattle, and goats as follows:
   (1) 1 part per million (ppm) in skeletal muscle.
   (2) 2 ppm in other tissues.
[64 FR 10103, Mar. 2, 1999]

§ 556.180 Dichlorvos.

A tolerance of 0.1 part per million is established for negligible residues of dichlorvos (2,2-dichlorovinyl dimethyl phosphate) in the edible tissues of swine.

§ 556.185 Diclazuril.

(a) Acceptable daily intake (ADI). The ADI for total residues of diclazuril is 25 micrograms per kilogram of body weight per day.
(b) Tolerances—(1) Chickens—(i) Liver. The tolerance for parent diclazuril (the marker residue) is 3 parts per million (ppm).
   (ii) Muscle. The tolerance for parent diclazuril (the marker residue) is 0.5 ppm.
   (iii) Skin/fat. The tolerance for parent diclazuril (the marker residue) is 1 ppm.
