**CATEGORY XVI—NUCLEAR WEAPONS RELATED ARTICLES**

(a) [Reserved]

*(b) Modeling or simulation tools that model or simulate the environments generated by nuclear detonations or the effects of these environments on systems, subsystems, components, structures, or humans.

(c) [Reserved]

(d) Parts, components, accessories, attachments, associated equipment, and production, testing, and inspection equipment and tooling, specially designed for the articles in paragraph (b) of this category.

(e) Technical data (see §120.10 of this subchapter) and defense services (see §120.9 of this subchapter) directly related to the defense articles enumerated in paragraph (b) of this category. (See §121.20 of this subchapter for nuclear related controls.)

(f)–(w) [Reserved]

(x) Commodities, software, and technical data subject to the EAR (see §120.42 of this subchapter) used in or with defense articles controlled in this category.

NOTE TO PARAGRAPH (X): Use of this paragraph is limited to license applications for defense articles controlled in this category where the purchase documentation includes commodities, software, or technical data subject to the EAR (see §121.1(b) of this subchapter).

§ 121.2 Interpreations of the U.S. Munitions List.

The following interpretations explain and amplify the terms used in §121.1 of this subchapter. These interpretations have the same force as if they were a part of the U.S. Munitions List category to which they refer.

§ 121.3 Aircraft.

(a) In USML Category VIII, except as described in paragraph (b) below, “aircraft” means aircraft that:

(1) Are U.S.-origin aircraft that bear an original military designation of A, B, E, F, K, M, P, R, or S;

(2) Are foreign-origin aircraft specially designed to provide functions equivalent to those of the aircraft listed in paragraph (a)(1) of this section;

(3) Are armed or are specially designed to be used as a platform to deliver munitions or otherwise destroy targets (e.g., firing lasers, launching rockets, firing missiles, dropping bombs, or strafing);

(4) Are strategic airlift aircraft with a roll-on/roll-off ramp and capable of airlifting payloads over 35,000 lbs to ranges over 2,000 nm without being refueled in-flight into short or unimproved airfields;

(5) Are capable of being refueled in-flight;

(6) Incorporate any mission system controlled under this subchapter. “Mission system” is defined as a system (see §121.8(g) of this subchapter) that is a defense article that performs specific military functions beyond airworthiness, such as by providing military communication, radar, active missile counter measures, target designation, surveillance, or sensor capabilities; or

(7) Are Optionally Piloted Vehicles (OPV) (i.e., aircraft specially designed to operate with and without a pilot physically located in the aircraft).

(b) Aircraft specially designed for military applications that are not identified in paragraph (a) of this section are subject to the EAR and classified as ECCN 9A610, including any unarmed military aircraft, regardless of origin or designation, manufactured prior to 1956 and unmodified since manufacture. Modifications made to incorporate safety of flight features or other FAA or NTSB modifications such as transponders and air data recorders are considered “unmodified” for the purposes of this paragraph.

§ 121.4 Ground vehicles.

(a) In USML Category VII, “ground vehicles” are those, whether manned or unmanned, that:

(1) Are armed or are specially designed to be used as a platform to deliver munitions or otherwise destroy or incapacitate targets (e.g., firing lasers, launching rockets, firing missiles, firing mortars, firing artillery rounds, or firing other ammunition greater than .50 caliber);
