§ 170.227 How does BIA develop and use the IRR Inventory?

The IRR Inventory as defined in § 170.410 identifies the transportation need by providing the data that BIA uses to generate the Cost to Construct (CTC) and Vehicle Miles Traveled (VMT) components of RNDF. The IRR Inventory is developed through the LRTP process, as described in § 170.410 through 170.415. BIA Regional offices
