§ 552.10 Purpose and scope.

In order to further the safe, secure, and orderly running of its institutions, the Bureau of Prisons conducts searches of inmates and of inmate housing and work areas to locate contraband and to deter its introduction and movement. Staff shall employ the least intrusive method of search practicable, as indicated by the type of contraband and the method of suspected introduction.

§ 552.11 Searches of inmates.

(a) Electronic devices. Inspection of an inmate using electronic devices (for example, metal detector, or ion spectrometry device) does not require the inmate to remove clothing. The inspection includes a search of the inmate’s clothing and personal effects. Staff may conduct an electronic device search of an inmate on a routine or random basis to control contraband.

(b) Pat Search. Inspection of an inmate using the hands does not require the inmate to remove clothing. The inspection includes a search of the inmate’s clothing and personal effects. Staff may conduct a pat search of an inmate on a routine or random basis to control contraband.

(c) Visual search—a visual inspection of all body surfaces and body cavities. 

(1) Staff may conduct a visual search where there is reasonable belief that contraband may be concealed on the person, or a good opportunity for concealment has occurred. For example, placement in a special housing unit (see 28 CFR part 541, subpart B), leaving the institution, or re-entry into an institution after contact with the public (after a community trip, court transfer, or after a “contact” visit in a visiting room) is sufficient to justify a visual search. The visual search shall be made in a manner designed to assure as much privacy to the inmate as practicable.

(2) Staff of the same sex as the inmate shall make the search, except where circumstances are such that delay would mean the likely loss of contraband. Where staff of the opposite sex makes a visual search, staff shall document the reasons for the opposite sex search in the inmate’s central file.
(d) **Digital or simple instrument search**—inspection for contraband or any other foreign item in a body cavity of an inmate by use of fingers or simple instruments, such as an otoscope, tongue blade, short nasal speculum, and simple forceps. A digital or simple instrument search may be conducted only by designated qualified health personnel (for example, physicians, physician assistants, and nurses) upon approval of the Warden or Acting Warden and only if the Warden or Acting Warden has reasonable belief that an inmate is concealing contraband in or on his person. If located, the contraband or foreign item may be removed immediately by medical staff if such removal can easily be effected by use of fingers or the simple instruments referred to above. Staff shall document all digital and simple instrument searches and the reasons for the searches in the inmate’s central file.

(1) Staff shall solicit the inmate’s written consent prior to conducting a digital or simple instrument search. However, the inmate’s consent is not required.

(2) Staff may not conduct a digital or simple instrument search if it is likely to result in physical injury to the inmate.

§552.12 Close observation.

When there is reasonable belief that an inmate has ingested contraband or concealed contraband in a body cavity and the methods of search specified in §552.11 are inappropriate or likely to result in physical injury to the inmate, the Warden or designee may authorize the placement of an inmate in a room or cell for the purpose of staff’s closely observing that inmate until the inmate has voided the contraband or until sufficient time has elapsed to preclude the possibility that the inmate is concealing contraband.

(a) The length of close observation status will be determined on an individual basis. Ordinarily, the Captain, in consultation with qualified health personnel, shall determine when termination is appropriate. The status of an inmate under close observation for as long as three days must be reviewed by the Segregation Review Official according to the provisions in §541.22(c) of this chapter, and the initial SRO review conducted within three work days shall be a formal hearing. Maintaining an inmate under close observation beyond seven days requires approval of the Warden, who makes this decision in consultation with the Captain and qualified health personnel.

(b) The supervising staff member shall be the same sex as the inmate and shall maintain complete and constant visual supervision of the inmate.

(c) The supervisor responsible for initiating the close observation watch shall advise the inmate of the conditions and of what is expected.

(1) The inmate shall be required to provide a urine sample within two hours of placement under close observation in accordance with the provisions of §550.30 of this chapter on urine surveillance. A second urine sample is required prior to releasing the inmate from close observation.

(2) The light will be kept on at all times.

(3) No inmate under close observation status may be allowed to come into contact with another inmate.

(4) The inmate ordinarily may not be allowed personal property while under close observation status, except legal and personal mail and a reasonable amount of legal materials when requested. Personal hygiene items will be controlled by staff.

(5) When the inmate is lying on a bed, the inmate shall be required to lie on top of the mattress in full view, weather and room temperature permitting. When necessary for the inmate to use cover, hands must remain visible at all times so that staff can observe any attempt to move contraband.

(6) Due to security concerns, the inmate ordinarily may not be permitted recreation outside of the cell.

(7) The inmate is to be served the same meals as those served to the general population, unless medically contraindicated.

(8) No medications may be given to the inmate except for those prescribed and given by hospital personnel. No laxatives may be given except natural laxatives, i.e., coffee, prune juice, etc.
