(e) The following provisions of Rhode Island laws provide, where applicable, for more stringent environmental control and regulation of surface coal mining and reclamation operations than do the provisions of the Act and the regulations in this chapter. Therefore, pursuant to Section 505(b) of the Act, they shall not be construed to be inconsistent with the Act:

(1) R.I. General Laws Sections 23–19.1–1 to 23–19.1–22, regulating treatment, disposal, and transportation of hazardous wastes within the State of Rhode Island.

(2) R.I. General Laws Sections 46–12–1 to 46–12–37, controlling the pollution of any of the State’s waterways.

(f) There are no Rhode Island laws that generally interfere with the achievement of the purposes and requirements of the Act and which must be superseded and preempted pursuant to Section 504(g). Some Rhode Island laws may in an individual situation interfere with the achievement of the purposes and requirements of the Act and may be preempted and superseded with respect to the performance standards of §§939.815 through 939.828 as they affect a particular coal exploration or surface mining operation by publication of a notice to that effect in the Federal Register.

§939.701 General.
Sections 700.5, 700.11, 700.12, 700.13, 700.14, 700.15 and part 701 of this chapter shall apply to surface coal mining and reclamation operations in Rhode Island.

§939.702 Exemption for coal extraction incidental to the extraction of other minerals.
Part 702 of this chapter, Exemption for Coal Extraction Incidental to the Extraction of Other Minerals, shall apply to any person who conducts coal extraction incidental to the extraction of other minerals for purposes of commercial use or sale.

[54 FR 52123, Dec. 20, 1989]
any person who intends to conduct coal exploration shall, prior to conducting the exploration, file with the regulatory authority a written notice of intention to explore including:

(1) The name, address, and telephone number of the person seeking to explore;

(2) The name, address, and telephone number of the representative who will be present at and responsible for conducting the exploration activities;

(3) A precise description and map, at a scale of 1:24,000 or larger, of the exploration area;

(4) A statement of the period of intended exploration;

(5) If the surface is owned by a person other than the person who intends to explore, a description of the basis upon which the person who will explore claims the right to enter such area for the purpose of conducting exploration and reclamation; and

(6) A description of the practices proposed to be followed to protect the environment from adverse impacts as a result of the exploration activities.

(d) The Office shall make every effort to act on an exploration application within 60 days of receipt or such longer time as may be reasonable under the circumstances. If additional time is needed, OSMRE shall notify the applicant that the application is being reviewed, but that more time is necessary to complete such review, setting forth the reasons and the additional time that is needed.

[52 FR 13813, Apr. 24, 1987]

§ 939.773 Requirements for permits and permit processing.

(a) Part 773 of this chapter, Requirements for Permits and Permit Processing, shall apply to any person who applies for a permit for surface coal mining and reclamation operations.

(b) In addition to the requirements of part 773, the following permit application review procedures shall apply:

(1) Any person applying for a permit shall submit five copies of the application to the Office.

(2) The Office shall review an application for administrative completeness and acceptability for further review and shall notify the applicant in writing of the findings. The Office may:

(i) Reject a flagrantly deficient application, notifying the application of the findings;

(ii) Request additional information required for completeness stating specifically what information must be supplied and negotiate the date by which the information must be submitted; or

(iii) Judge the application administratively complete and acceptable for further review.

(3) Should the applicant not submit the information as required by §939.773(b)(2)(ii) by the specified date, the Office may reject the application. When the applicant submits the required information by the specified date, the Office shall review it and advise the applicant concerning its acceptability.

(4) When the application is judged administratively complete, the applicant shall be advised by the Office to file the public notice required by §773.6 of this chapter.

(5) A representative of the Office shall visit the proposed permit area to determine whether the operation and reclamation plans are consistent with actual site conditions. The applicant will be notified in advance of the time of the visit. At the time of the visit, the applicant shall have the locations of the proposed permit boundaries, topsoil storage areas, sediment control structures, roads, and other significant features contained in the application marked by flags.

(c) In addition to the information required by subchapter G of this chapter, the Office may require an applicant to submit supplementary information to ensure compliance with applicable Federal laws and regulations other than the Act.

(d) Where applicable, no person shall conduct surface coal exploration operations which result in the removal of more than 250 tons of coal nor shall any person conduct surface coal mining operations without a permit issued by the Secretary pursuant to 30 CFR part 773 and permits issued pursuant to State law, including: the Wetlands Protection Act (R.I. General Laws Section 2–1–22); Chapter 20 of the Waters and Navigation Act (petitions for ditches and drains) (R.I. General Laws Section
