§ 37.1110 What other responsibilities related to payments do I have?

If you are the agreements officer, you have the responsibilities described in 32 CFR 22.810(c), regardless of the payment method. You also must ensure that you do not withhold payments except in one of the circumstances described in 32 CFR 34.12(g).

§ 37.1115 What are my responsibilities related to participants’ single audits?

For audits of for-profit participant’s systems, under §§ 37.640 through 37.660, you are the focal point within the Department of Defense for ensuring that participants submit audit reports and for resolving any findings in those reports. Nonprofit participants send their single audit reports to a Government-wide clearinghouse. For those participants, the Office of the Assistant Inspector General (Auditing) should receive any DoD-specific findings from the clearinghouse and refer them to you for resolution, if you are the appropriate official to do so.

§ 37.1205 Advance.

A payment made to a recipient before the recipient disburses the funds for program purposes. Advance payments may be based upon recipients’ requests or predetermined payment schedules.

§ 37.1210 Advanced research.

Research that creates new technology or demonstrates the viability of applying existing technology to new products and processes in a general way. Advanced research is most closely analogous to precompetitive technology development in the commercial sector (i.e., early phases of research and development on which commercial competitors are willing to collaborate, because the work is not so coupled to specific products and processes that the results of the work must be proprietary). It does not include development of military systems and hardware where specific requirements have been defined. It is typically funded in Research, Development, Test and Evaluation programs within Budget Activity 3, Advanced Technology Development.

§ 37.1215 Agreements officer.

An official with the authority to enter into, administer, and/or terminate TIAs (see § 37.125).

§ 37.1220 Applied research.

Efforts that attempt to determine and exploit the potential of scientific discoveries or improvements in technology such as new materials, devices, methods and processes. It typically is funded in Research, Development, Test and Evaluation programs within Budget Activity 2, Applied Research (also known informally as research category 6.2) programs. Applied research normally follows basic research but may not be fully distinguishable from the related basic research. The term does not include efforts whose principal aim is the design, development, or testing of specific products, systems or processes to be considered for sale or acquisition; these efforts are within the definition of “development.”

§ 37.1230 When and how may I request an award-specific audit?

Guidance on when and how you should request additional audits for expenditure-based TIAs is identical to the guidance for grants officers in 32 CFR 34.16(d). If you require an award-specific examination or audit of a for-profit participant’s records related to a TIA, you must use the auditor specified in the award terms and conditions, which should be the same auditor who performs periodic audits of the participant. The DCAA and the OIG, DoD, are possible sources of advice on audit-related issues, such as appropriate audit objectives and scope.
