§ 80.214

(1)(i) Sample and test the blendstock when received at the transmix processing facility, using the methods specified in §80.330, to determine the volume and sulfur content, and treat each volume of blendstock that is blended into a volume of TGP as a separate batch for purposes of calculating and reporting compliance with the applicable annual average and per-gallon cap sulfur standards in §80.195 or §80.216, as applicable; or

(ii) Use sulfur test results of the blendstock supplier provided that the following requirements are met:

(A) Sampling and testing by the blendstock supplier is performed using the methods specified in §80.330;

(B) Testing for the sulfur content of the blendstock in the supplier’s storage tank must be conducted subsequent to the last receipt of blendstock into the supplier’s storage tank from which the transmix processor is supplied;

(C) The transmix processor must obtain a copy of the blendstock supplier’s test results, at the time of each transfer of blendstock to the transmix processor, that reflect the sulfur content of each load of blendstock supplied to the transmix processor;

(D) The transmix processor must conduct a quality assurance program of sampling and testing for each blendstock supplier. The frequency of blendstock sampling and testing must be one sample for every 500,000 gallons of blendstock received or one sample every 3 months, whichever results in more frequent sampling; and

(E) If any of the requirements of this paragraph (d)(1)(ii) are not met, in whole or in part, for any blendstock blended into TGP, that blendstock is deemed in violation of the gasoline sulfur standards in §80.195.

(2) Sample and test each batch of gasoline produced by blending blendstock into TGP, using the methods specified in §80.330, to determine the sulfur content of the batch.

(3) The sulfur content of each batch of gasoline produced by blending blendstock into TGP must be properly identified on product transfer documents in accordance with the provisions of §80.210 or §80.220, as applicable.

(e) Any transmix blender who produces gasoline by blending transmix, or mixtures of gasoline and distillate fuel described in §80.84(e), into previously certified gasoline under §80.84(d) must meet the applicable downstream sulfur standards under §80.210 or §80.220 for the gasoline produced by blending transmix and previously certified gasoline.

(f) Any transmix processor or transmix blender who adds feedstocks to their transmix other than gasoline, distillate fuel, or gasoline blendstocks from pipeline interface must meet all requirements and standards that apply to a refiner under subpart H of this part, other than §80.213, for all gasoline they produce during a compliance period.

[71 FR 31963, June 2, 2006]

§ 80.214 [Reserved]

§ 80.215 What is the scope of the geographic phase-in program?

(a) Geographic phase-in area. (1) The following states comprise the geographic phase-in area (GPA) subject to the provisions of the geographic phase-in program: North Dakota, Montana, Idaho, Wyoming, Utah, Colorado, New Mexico, and Alaska.

(2) In addition, the following counties within the states identified in paragraph (a)(1) of this section and the following Federal Indian reservations in paragraph (a)(2) of this section are included in the GPA:

(i) The list of counties follows:

Arizona
Apache
Coconino
Gila
Greenlee
Navajo
Nebraska
Banner
Box Butte
Cheyenne
Dawes
Deuel
Garden
Keith
Kimball
Morrill
Scotts Bluff
Sheridan
Sioux
Environmental Protection Agency

§ 80.216

(a) The refinery or importer annual average sulfur standard for gasoline produced or imported for use in the geographic phase-in area under § 80.215, and designated as GPA gasoline under § 80.219(a), shall be 150.00 ppm.

(b) The per-gallon cap standard for gasoline produced or imported for use in the GPA under paragraph (a) of this section shall be 300 ppm, except as specified in § 80.195(d).

§ 80.216 What standards apply to gasoline produced or imported for use in the GPA?

(a) The refinery or importer annual average sulfur standard for gasoline produced or imported for use in the geographic phase-in area under § 80.215, and designated as GPA gasoline under § 80.219(a), shall be 150.00 ppm.

(b) The per-gallon cap standard for gasoline produced or imported for use in the GPA under paragraph (a) of this section shall be 300 ppm, except as specified in § 80.195(d).

(c) The refinery or importer annual average sulfur level is calculated in accordance with the provisions of § 80.205.

(d) The refinery or importer annual average standard under paragraph (a) of this section may be met using sulfur allotments or credits as provided under §§ 80.275 and 80.315.

(e) Gasoline produced by approved small refiners subject to the standards under §§ 80.215 and 80.216 is not subject to the standards under paragraphs (d) and (e) of this section.

(f)(1) A refinery or importer whose gasoline production or volume of imported gasoline in 2004 or 2005 is comprised of more than 50 percent of gasoline designated as GPA gasoline under § 80.219(a) shall not be required to meet the corporate pool average standards under § 80.195 for its gasoline production or imported gasoline during the applicable averaging period.

(f)(2) Subject to the provisions of § 80.540, the geographic phase-in program shall also apply to the 2007 and 2008 annual averaging period for refiners approved for GPA standards in 2007 and 2008 under § 80.540.

§ 80.216 Persons eligible. Any refiner or importer who produces or imports gasoline for use in the geographic area under paragraph (a) of this section is eligible to apply for the geographic phase-in program. The provisions of the geographic phase-in program shall apply to imported gasoline through the importer.

§ 80.216 What standards apply to gasoline produced or imported for use in the GPA?

(a) The refinery or importer annual average sulfur standard for gasoline produced or imported for use in the geographic phase-in area under § 80.215, and designated as GPA gasoline under § 80.219(a), shall be 150.00 ppm.

(b) The per-gallon cap standard for gasoline produced or imported for use in the GPA under paragraph (a) of this section shall be 300 ppm, except as specified in § 80.195(d).

(c) The refinery or importer annual average sulfur level is calculated in accordance with the provisions of § 80.205.

(d) The refinery or importer annual average standard under paragraph (a) of this section may be met using sulfur allotments or credits as provided under §§ 80.275 and 80.315.

(e) Gasoline produced by approved small refiners subject to the standards under §§ 80.215 and 80.216 is not subject to the standards under paragraphs (a) and (b) of this section.

(f)(1) A refinery or importer whose gasoline production or volume of imported gasoline in 2004 or 2005 is comprised of more than 50 percent of gasoline designated as GPA gasoline under § 80.219(a) shall not be required to meet the corporate pool average standards under § 80.195 for its gasoline production or imported gasoline during the applicable averaging period.

(f)(2) Subject to the provisions of § 80.540, the geographic phase-in program shall also apply to the 2007 and 2008 annual averaging period for refiners approved for GPA standards in 2007 and 2008 under § 80.540.

§ 80.216 Persons eligible. Any refiner or importer who produces or imports gasoline for use in the geographic area under paragraph (a) of this section is eligible to apply for the geographic phase-in program. The provisions of the geographic phase-in program shall apply to imported gasoline through the importer.

§ 80.216 What standards apply to gasoline produced or imported for use in the GPA?

(a) The refinery or importer annual average sulfur standard for gasoline produced or imported for use in the geographic phase-in area under § 80.215, and designated as GPA gasoline under § 80.219(a), shall be 150.00 ppm.

(b) The per-gallon cap standard for gasoline produced or imported for use in the GPA under paragraph (a) of this section shall be 300 ppm, except as specified in § 80.195(d).

(c) The refinery or importer annual average sulfur level is calculated in accordance with the provisions of § 80.205.

(d) The refinery or importer annual average standard under paragraph (a) of this section may be met using sulfur allotments or credits as provided under §§ 80.275 and 80.315.

(e) Gasoline produced by approved small refiners subject to the standards under §§ 80.215 and 80.216 is not subject to the standards under paragraphs (a) and (b) of this section.

(f)(1) A refinery or importer whose gasoline production or volume of imported gasoline in 2004 or 2005 is comprised of more than 50 percent of gasoline designated as GPA gasoline under § 80.219(a) shall not be required to meet the corporate pool average standards under § 80.195 for its gasoline production or imported gasoline during the applicable averaging period.

(f)(2) Subject to the provisions of § 80.540, the geographic phase-in program shall also apply to the 2007 and 2008 annual averaging period for refiners approved for GPA standards in 2007 and 2008 under § 80.540.
