§ 180.257  Chloroneb; tolerances for residues.

(a) General. Tolerances are established for residues of the fungicide chloroneb, including its metabolites and degradates, in or on the commodity in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only the sum of chloroneb, 1,4-dichloro-2,5-dimethoxybenzene, and its metabolite 2,5-dichloro-4-methoxyphenol (free and conjugated), calculated as the stoichiometric equivalent of chloroneb, in or on the commodity.

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

[39 FR 20697, June 12, 1974]

EDITORIAL NOTE: For Federal Register citations affecting §180.254, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 180.258  Ametryn; tolerances for residues.

(a) General. Tolerances are established for residues of the desiccant and herbicide (2-ethylamino)-4-(isopropylamino)-6-(methylthio)-s-triazine in or on the following raw agricultural commodities:

(b) Section 18 emergency exemptions. [Reserved]

(c) Tolerances with regional registrations. [Reserved]

(d) Indirect or inadvertent residues. [Reserved]

§ 180.259  Propargite; tolerances for residues.

(a) General. Tolerances are established for residues of the pesticide propargite (2-(p-tert-butylyphenoxy) cyclohexyl 2-propynyl sulfite) in or on the following food commodities.

(b) Section 18 emergency exemptions. [Reserved]
