§ 180.446 Clofentezine; tolerances for residues.

(a) General. (1) Tolerances are established for residues of the insecticide clofentezine, including its metabolites and degradates, in or on the commodities in the table in this paragraph. Compliance with the tolerance levels specified in this paragraph is to be determined by measuring only clofentezine, 3,6-bis(2-chlorophenyl)-1,2,4,5-tetrazine, in or on the commodity:

(b) Section 18 emergency exemptions. Time-limited tolerances specified in the following table are established for residues of sulfur dioxide, including its metabolites and degradates in or on the specified agricultural commodities, resulting from use of the pesticide pursuant to FIFRA section 18 emergency exemptions. Compliance with the tolerance levels specified below is to be determined by measuring only sulfur dioxide (SO₂). The tolerances expire on the date specified in the table.
