§ 267.76 What notifications must I make?

Before transferring ownership or operation of a facility during its operating life, you must notify the new owner or operator in writing of the requirements of this part and 40 CFR part 270, subpart J.

Subpart F—Releases from Solid Waste Management Units

§ 267.90 Who must comply with this section?

This subpart applies to you if you own or operate a facility that treats or stores hazardous waste under a 40 CFR part 270, subpart J standardized permit, except as provided in §267.1(b), or unless your facility already has a permit that imposes requirements for corrective action under 40 CFR 264.101.

§§ 267.91–267.100 [Reserved]

§ 267.101 What must I do to address corrective action for solid waste management units?

(a) You must institute corrective action as necessary to protect human health and the environment for all releases of hazardous waste or constituents from any solid waste management unit at the facility, regardless of the time at which waste was placed in such unit.

(b) The Regional Administrator will specify corrective action in the supplemental portion of your standardized permit in accordance with this section and 40 CFR part 264, subpart S. The Regional Administrator will include in the supplemental portion of your standardized permit schedules of compliance for corrective action (where corrective action cannot be completed prior to issuance of the permit) and assurances of financial responsibility for completing corrective action.

(c) You must implement corrective action beyond the facility property boundary, where necessary to protect human health and the environment, unless you demonstrate to the satisfaction of the Regional Administrator that, despite your best efforts, you were unable to obtain the necessary permission to undertake such actions. You are not relieved of all responsibility to clean up a release that has migrated beyond the facility boundary where off-site access is denied. On-site measures to address such releases will be determined on a case-by-case basis. You must provide assurances of financial responsibility for such corrective action.
(d) You do not have to comply with this section if you are the owner or operator of a remediation waste site unless your site is part of a facility that is subject to a permit for treating, storing, or disposing of hazardous wastes that are not remediation wastes.

Subpart G—Closure

§ 267.110 Does this subpart apply to me?
This subpart applies to you if you own or operate a facility that treats or stores hazardous waste under a 40 CFR part 270, subpart J standardized permit, except as provided in §267.1(b).

§ 267.111 What general standards must I meet when I stop operating the unit?
You must close the storage and treatment units in a manner that:
(a) Minimizes the need for further maintenance; and
(b) Controls, minimizes, or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere; and
(c) Meets the closure requirements of this subpart and the requirements of §§267.176, 267.201, and 267.1108. If you determine that, when applicable, the closure requirements of §267.201(tanks) or §267.1108 (containment buildings) cannot be met, then you must close the unit in accordance with the requirements that apply to landfills (§264.310). In addition, for the purposes of post-closure and financial responsibility, such a tank system or containment building is then considered to be a landfill, and you must apply for a post-closure care permit in accordance with 40 CFR part 270.

§ 267.112 What procedures must I follow?
(a) To close a facility, you must follow your approved closure plan, and follow notification requirements.
(1) Your closure plan must be submitted at the time you submitted your Notice of Intent to operate under a standardized permit. Final issuance of the standardized permit constitutes approval of the closure plan, and the plan becomes a condition of the RCRA standardized permit.
(b) The Director's approval of the plan must ensure that the approved plan is consistent with §§267.111 through 267.115, 267.176, 267.201, and 267.1108.

(b) Satisfy the requirements for content of closure plan. The closure plan must identify steps necessary to perform partial and/or final closure of the facility. The closure plan must include, at least:
(1) A description of how each hazardous waste management unit at the facility subject to this subpart will be closed following §267.111.
(2) A description of how final closure of the facility will be conducted in accordance with §267.111. The description must identify the maximum extent of the operations which will be unclosed during the active life of the facility.
(3) An estimate of the maximum inventory of hazardous wastes ever on site during the active life of the facility and a detailed description of the methods you will use during partial and/or final closure, such as methods for removing, transporting, treating, storing, or disposing of all hazardous wastes, and identification of the type(s) of off-site hazardous waste management units to be used, if applicable.
(4) A detailed description of the steps needed to remove or decontaminate all hazardous waste residues and contaminated containment system components, equipment, structures, and soils during partial or final closure. These might include procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the extent of decontamination required to satisfy the closure performance standard.
(5) A detailed description of other activities necessary during the closure period to ensure that partial or final closure satisfies the closure performance standards.
(6) A schedule for closure of each hazardous waste management unit, and for
