Environmental Protection Agency

§ 52.2527 Determination of attainment.

(a) Based upon EPA’s review of the air quality data for the 3-year period 2007–2009, EPA determined that the Huntington-Ashland, West Virginia-Kentucky-Ohio PM_{2.5} nonattainment Area attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has determined that the Huntington-Ashland PM_{2.5} nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA’s review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Steubenville-Weirton fine particle (PM_{2.5}) nonattainment area attained the 1997 annual PM_{2.5} National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has determined that the Steubenville-Weirton PM_{2.5} nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) Based upon EPA’s review of the air quality data for the 3-year period 2007–2009, EPA determined that the Charleston fine particle (PM_{2.5}) nonattainment area attained the 1997 annual PM_{2.5} National Atmospheric Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has determined that the Charleston PM_{2.5} nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(d) Based upon EPA’s review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Wheeling, WV-OH fine particle (PM_{2.5}) nonattainment areas attained the 1997 annual PM_{2.5} National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has determined that the Wheeling, WV-OH fine particle (PM_{2.5}) nonattainment areas are not subject to the consequences of failing to attain pursuant to section 179(d).

(e) Based upon EPA’s review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Martinsburg-Hagerstown, West Virginia-Maryland (WV-MD) fine particle (PM_{2.5}) nonattainment area attained the 1997 annual PM_{2.5} National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has determined that the Martinsburg-Hagerstown, West Virginia-Maryland (WV-MD) fine particle (PM_{2.5}) nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).
Martinsburg-Hagerstown, WV-MD PM$_{2.5}$ nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

§ 52.2528 Significant deterioration of air quality.

(a) The requirements of Sections 160 through 165 of the Clean Air Act are met since the plan includes approvable procedures for the Prevention of Significant Air Quality Deterioration.

(b) [Reserved]

[51 FR 12518, Apr. 11, 1986, as amended at 78 FR 33985, June 6, 2013]

§§ 52.2529–52.2530 [Reserved]

§ 52.2531 Base year emissions inventory.

(a) EPA approves as a revision to the West Virginia State Implementation Plan the 1990 base year emission inventories for the Greenbrier county ozone nonattainment area submitted by the Secretary, West Virginia Department of Commerce, Labor and Environmental Resources on December 22, 1992. These submittals consist of the 1990 base year point, area, non-road mobile, biogenic and on-road mobile source emission inventories in Greenbrier County for the following pollutants: Volatile organic compounds (VOC), carbon monoxide (CO), and oxides of nitrogen (NOx).

(b) EPA approves as a revision to the West Virginia State Implementation Plan the 2002 base year emissions inventory for the Huntington-Ashland, WV-KY-OH fine particulate matter (PM$_{2.5}$) nonattainment area submitted by the West Virginia Department of Environmental Protection on September 9, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NOx), volatile organic compounds (VOCs), PM$_{2.5}$, coarse particles (PM$_{10}$), ammonia (NH$_3$) and sulfur dioxide (SO$_2$).

(c) EPA approves as a revision to the West Virginia State Implementation Plan the 2002 base year emissions inventory for the Parkersburg-Marietta, WV-OH fine particulate matter (PM$_{2.5}$) nonattainment area submitted by the West Virginia Department of Environmental Protection on September 9, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NOx), volatile organic compounds (VOCs), PM$_{2.5}$, coarse particles (PM$_{10}$), ammonia (NH$_3$) and sulfur dioxide (SO$_2$).

(d) EPA approves as a revision to the West Virginia State Implementation Plan the 2002 base year emissions inventory for the Charleston, WV fine particulate matter (PM$_{2.5}$) nonattainment area submitted by the West Virginia Department of Environmental Protection on November 4, 2009. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NOx), volatile organic compounds (VOCs), PM$_{2.5}$, coarse particles (PM$_{10}$), ammonia (NH$_3$) and sulfur dioxide (SO$_2$).

(e) EPA approves as a revision to the West Virginia State Implementation Plan the 2002 base year emissions inventory for the West Virginia portion of the Steubenville-Weirton, OH-WV fine particulate matter (PM$_{2.5}$) nonattainment area submitted by the West Virginia Department of Environmental Protection on June 24, 2009. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NOx), volatile organic compounds (VOCs), PM$_{2.5}$, coarse particles (PM$_{10}$), ammonia (NH$_3$) and sulfur dioxide (SO$_2$).
