§ 109–43.304 Reporting requirements.

§ 109–43.304–1 Reporting.

§ 109–43.304–1.50 DOE reutilization screening.

(a) Prior to reporting excess personal property to GSA, reportable personal property shall be screened for reutilization within DOE through the Reportable Excess Automated Property System (REAPS) for a 30-day period. REAPS also provides for a 15-day expedited screening period for certain categories of personal property for economic development and to satisfy urgent conditions.

(b) An additional 30-day screening period shall be allocated for items eligible for screening by educational institutions through ERLE.

(c) Items in FSCG 66 (Instruments and Laboratory Equipment), 70 (General Purpose Information Processing Equipment (including firmware)), and 99 (Miscellaneous) are reportable when the unit acquisition cost is $1,000 or more.

(d) In exceptional or unusual cases when time is critical, screening of excess property may be accomplished by telegram or facsimile with due consideration given to the additional costs involved. Examples of situations when this method of screening would be used are where there is a requirement for quick disposal actions due to unplanned contract terminations or facilities closing; to alleviate the paying of storage costs; when storage space is critical; for process exchange/sale transactions; property dangerous to public health and safety; property determined to be classified or otherwise sensitive for reasons of national security (when classified communications facilities are used); or for hazardous materials which may not be disposed of outside of the Department.

(e) Concurrent DOE and Federal agency screening generally shall not be conducted.

§ 109–43.304–1.51 Transfers within DOE.

Transfers within DOE generally shall be effected by completion of a SF–122, Transfer Order Excess Personal Property. Except for those designated contractors authorized by the DOE contracting office to execute transfer orders, transfers to DOE contractors must be approved by the cognizant DOE property administrator for the contractor receiving the property.

§ 109–43.304–2 Form and distribution of reports.

Reportable property will be electronically reported by REAPS directly to GSA following internal DOE and ERLE screening.

§ 109–43.304–4 Property at installations due to be discontinued.

When closing installations, DOE offices shall work with the appropriate GSA regional offices to develop site utilization and disposal programs:

(a) In developing a disposal program, property shall be determined to be excess to DOE needs before reporting it to GSA.

(b) If a deviation from DOE policy or procedures is required, prior written approval of the Deputy Assistant Secretary for Procurement and Assistance Management shall be obtained.

(c) When deviation from existing GSA regulations is involved, approval by the appropriate GSA regional office will be sufficient to validate the disposition. A copy of the GSA approval should be forwarded for information to the DPMO.

§ 109–43.305 Property not required to be formally reported.

(a) [Reserved]

(b) Equipment, parts, accessories, jigs and components which are of special design, composition, or manufacture and which are intended for use only by specific DOE installations (such as spare parts for equipment used in atomic processes) are not reportable and shall not be formally screened within DOE or reported to GSA.

§ 109–43.305–50 Nuclear-related and proliferation-sensitive personal property.

Nuclear-related and proliferation-sensitive property is not reportable and shall not be formally screened within DOE or reported to GSA.
