§ 76.61 Disputes concerning carriage.
(a) Complaints regarding carriage of local commercial television stations. (1) Whenever a local commercial television station or a qualified low power television station believes that a cable operator has failed to meet its carriage or channel positioning obligations, pursuant to §§76.56 and 76.57, such station shall notify the operator, in writing, of the alleged failure and identify its reasons for believing that the cable operator is obligated to carry the signal of such station or position such signal on a particular channel.

§ 76.60 Compensation for carriage.
A cable operator is prohibited from accepting or requesting monetary payment or other valuable consideration in exchange either for carriage or channel positioning of any broadcast television station carried in fulfillment of the must-carry requirements, except that
(a) Any such station may be required to bear the costs associated with delivering a good quality signal or a baseband video signal to the principal headend of the cable system; or
(b) A cable operator may accept payments from stations which would be considered distant signals under the cable compulsory copyright license, 17 U.S.C. 111, as indemnification for any increased copyright liability resulting from carriage of such signal.

NOTE: A cable operator may continue to accept monetary payment or other valuable consideration in exchange for carriage or channel positioning of the signal of any local commercial television station carried in fulfillment of the must-carry requirements, through, but not beyond, the date of expiration of an agreement between a cable operator and a local commercial television station entered into prior to June 26, 1990.

(c) A cable operator may accept payments from stations pursuant to a retransmission consent agreement, even if such station will be counted towards the must-carry complement, as long as all other applicable rules are adhered to.

§ 76.61 Disputes concerning carriage.
(a) Complaints regarding carriage of local commercial television stations. (1) Whenever a local commercial television station or a qualified low power television station believes that a cable operator has failed to meet its carriage or channel positioning obligations, pursuant to §§76.56 and 76.57, such station shall notify the operator, in writing, of the alleged failure and identify its reasons for believing that the cable operator is obligated to carry the signal of such station or position such signal on a particular channel.
(2) The cable operator shall, within 30 days of receipt of such written notification, respond in writing to such notification and either commence to carry the signal of such station in accordance with the terms requested or state its reasons for believing that it is not obligated to carry such signal or is in compliance with the channel positioning and repositioning and other requirements of the must-carry rules. If a refusal for carriage is based on the station’s distance from the cable system’s principal headend, the operator’s response shall include the location of such headend. If a cable operator denies carriage on the basis of the station’s failure to deliver a good quality signal at the cable system’s principal headend, the operator must provide a list of equipment used to make the measurements, the point of measurement and a list and detailed description of the reception and over-the-air signal processing equipment used, including sketches such as block diagrams and a description of the methodology used for processing the signal at issue, in its response.

(3) A local commercial television station or qualified low power television station that is denied carriage or channel positioning or repositioning in accordance with the must-carry rules by a cable operator must provide a list of equipment used to make the measurements, the point of measurement and a list and detailed description of the reception and over-the-air signal processing equipment used, including sketches such as block diagrams and a description of the methodology used for processing the signal at issue, in its response.

(4) If the Commission determines that a cable operator has failed to meet its must-carry obligations, the Commission shall order that, within 45 days of such order or such other time period as the Commission may specify, the cable operator reposition the complaining station or, in the case of an obligation to carry a station, commence or resume carriage of the station and continue such carriage for at least 12 months. If the Commission determines that the cable operator has fully met the must-carry requirements, it shall dismiss the complaint.

(5) No must-carry complaint filed pursuant to paragraph (a) of this section will be accepted by the Commission if filed more than sixty (60) days after—

(i) The denial by a cable television system operator of request for carriage or channel position contained in the notice required by paragraph (a)(1) of this section, or

(ii) The failure to respond to such notice within the time period allowed by paragraph (a)(2) of this section.

(b) Complaints regarding carriage of qualified local NCE television stations. (1) Whenever a qualified local NCE television station believes that a cable operator has failed to comply with the signal carriage or channel positioning requirements, pursuant to §§ 76.56 through 76.57 of this part, the station may file a complaint with the Commission in accordance with the procedures set forth in § 76.7 of this part. In addition to the requirements of § 76.7 of this part, such complaint shall specifically:

(i) Allege the manner in which such cable operator has failed to comply with such requirements and state the basis for such allegations.

(ii) Be accompanied by any relevant correspondence between the complainant and the cable television system operator.

(2) If the Commission determines that a cable operator has failed to meet its must-carry obligations, the Commission shall order that, within 45 days of such order or such other period as the Commission may specify, the cable operator reposition the complaining station or, in the case of an obligation to carry a station, commence or resume carriage of the station and continue such carriage for a period of time the Commission deems appropriate for the specific case under consideration. If the Commission determines that the cable operator has fully met the must-carry obligations, it shall dismiss the complaint.
carry requirements, it shall dismiss the complaint.

(3) With respect to must-carry complaints filed pursuant to paragraph (b) of this section, such complaints may be filed at any time the complainant believes that the cable television system operator has failed to comply with the applicable provisions of subpart D of this part.

§ 76.62 Manner of carriage.

(a) Cable operators shall carry the entirety of the program schedule of any television station (including low power television stations) carried by the system unless carriage of specific programming is prohibited, and other programming authorized to be substituted, under §76.67 or subpart F of part 76, or unless carriage is pursuant to a valid retransmission consent agreement for the entire signal or any portion thereof as provided in §76.64.

(b) Each digital television broadcast signal carried shall be carried without material degradation. Each analog television broadcast signal carried shall be carried without material degradation and in compliance with technical standards set forth in subpart K of this part.

(c) Each local commercial television station whose signal is carried shall, to the extent technically feasible and consistent with good engineering practice, be provided no less than the same quality of signal processing and carriage provided for carriage of any other type of standard television signal.

(d) Each qualified local noncommercial educational television station whose signal is carried shall be provided with bandwidth and technical capacity equivalent to that provided to commercial television broadcast stations carried.

(e) Each commercial broadcast television station carried pursuant to §76.56 shall include in its entirety the primary video, accompanying audio, and closed captioning data contained in line 21 of the vertical blanking interval and, to the extent technically feasible, program-related material carried in the vertical blanking interval or on subcarriers. Where appropriate and feasible, operators may delete signal enhancements, such as ghost-canceling, from the broadcast signal and employ such enhancements at the system headend or headends.

(f) Each qualified local NCE television station carried pursuant to §76.56 shall include in its entirety the primary video, accompanying audio, and closed captioning data contained in line 21 of the vertical blanking interval and, to the extent technically feasible, program-related material carried in the vertical blanking interval or on subcarriers, that may be necessary for receipt of programming by handicapped persons or for educational or language purposes.

(g) With respect to carriage of digital signals, operators are not required to carry ancillary or supplementary transmissions or non-program related video material.

(h) If a digital television broadcast signal is carried in accordance with §76.62(b) and either (c) or (d), the carriage of that signal in additional formats does not constitute material degradation.

§ 76.64 Retransmission consent.

(a) After 12:01 a.m. on October 6, 1993, no multichannel video programming distributor shall retransmit the signal of any commercial broadcasting station without the express authority of the originating station, except as provided in paragraph (b) of this section.

(b) A commercial broadcast signal may be retransmitted without express authority of the originating station if—

(1) The distributor is a cable system and the signal is that of a commercial television station (including a low-power television station) that is being carried pursuant to the Commission’s must-carry rules set forth in §76.56;

(2) The multichannel video programming distributor obtains the signal of a superstation that is distributed by a satellite carrier and the originating station was a superstation on May 1, 1991, and the distribution is made only to areas outside the local market of the originating station; or
