§ 76.806 Pre-termination access to cable home wiring.

(a) Prior to termination of service, a customer may: install or provide for the installation of their own cable home wiring; or connect additional home wiring, splitters or other equipment within their premises to the wiring owned by the cable operator, so long as no electronic or physical harm is caused to the cable system and the physical integrity of the cable operator’s wiring remains intact.

(b) Cable operators may require that home wiring (including passive splitters, connectors and other equipment used in the installation of home wiring) meets reasonable technical specifications, not to exceed the technical specifications of such equipment installed by the cable operator; provided however, that if electronic or physical harm is caused to the cable system, the cable operator may impose additional technical specifications to eliminate such harm. To the extent a customer’s installations or rearrangements of wiring degrade the signal quality of or interfere with other customers’ signals, or cause electronic or physical harm to the cable system, the cable operator may discontinue service to that subscriber until the degradation or interference is resolved.

(c) Customers shall not physically cut, substantially alter, improperly terminate or otherwise destroy cable operator-owned home wiring.

(d) Section 76.806 shall apply to all MVPDs.

§ 76.901 Definitions.

(a) Basic service. The basic service tier shall, at a minimum, include all signals of domestic television broadcast stations provided to any subscriber (except a signal secondarily transmitted by satellite carrier beyond the local service area of such station, regardless of how such signal is ultimately received by the cable system) any public, educational, and governmental programming required by the franchise to be carried on the basic tier, and any additional video programming signals a service added to the basic tier by the cable operator.

(b) Cable programming service. Cable programming service includes any video programming provided over a cable system, regardless of service tier, including installation or rental of equipment used for the receipt of such video programming, other than:

(1) Video programming carried on the basic service tier as defined in this section;

(2) Video programming offered on a pay-per-channel or pay-per-program basis; or

(3) A combination of multiple channels of pay-per-channel or pay-per-program video programming offered on a multiplexed or time-shifted basis so long as the combined service:

(i) Consists of commonly-identified video programming; and

(ii) Is not bundled with any regulated tier of service.

(c) Small system. A small system is a cable television system that serves 15,000 or fewer subscribers. The service area of a small system shall be determined by the number of subscribers that are served by the system’s principal headend, including any other headends or microwave receive sites that are technically integrated to the principal headend.

(d) New Product Tier. A new product tier (“NPT”) is a cable programming service tier meeting the conditions set forth in § 76.987.
