compromise human safety, prevent the loss of vessels or aircraft, or to prevent environmental damage.

(m) Protected sites. (1) Sites protected by the Antarctic Treaty and regulated under the ACA are listed at 45 CFR part 670 subparts G and H.

(2) The following sites have been identified as CEMP Protected Sites subject to the regulatory authority of the Act:

(i) Seal Islands, South Shetland Islands—The Seal Islands are composed of islands and skerries located approximately 7 km north of the northwest corner of Elephant Island, South Shetland Islands. The Seal Islands CEMP Protected Site includes the entire Seal Islands group, which is defined as Seal Island plus any land or rocks exposed at mean low tide within a distance of 5.5 km of the point of highest elevation on Seal Island. Seal Island is situated at 60°59′14″ S. lat., 55°23′04″ W. long.

(ii) Cape Shirreff and the San Telmo Islands. This designation takes effect on May 1, 1995. Cape Shirreff is a low, ice-free peninsula towards the western end of the north coast of Livingston Island, South Shetland Islands, situated at 62°29′ S. lat., 60°47′ W. long., between Barclay Bay and Hero Bay. San Telmo Island is the largest of a small group of ice-free rock islets, approximately 2 km west of Cape Shirreff. The boundaries of the Cape Shirreff CEMP Protected Site are identical to the boundaries of the Site of Special Scientific Interest No. 32, as specified by ATCM Recommendation XV–7. No manmade boundary markers indicate the limits of the SSSI or protected site. The boundaries are defined by natural features and include the entire area of the Cape Shirreff peninsula north of the glacier ice tongue margin, and most of the San Telmo Island group. For the purposes of the protected site, the entire area of Cape Shirreff and the San Telmo Island group is defined as any land or rocks exposed at mean low tide within the area delimited by the map of SSSI No. 32 and available from the Assistant Administrator.

[61 FR 35550, July 5, 1996, as amended at 68 FR 23227, May 1, 2003]
§ 300.105 Initiating a new fishery.

(a) A new fishery, for purposes of this section, is a fishery on a species using a particular method in a statistical subarea for which:

(1) Information on distribution, abundance, demography, potential yield and stock identity from comprehensive research/surveys or exploratory fishing has not been submitted to CCAMLR;

(2) Catch and effort data have never been submitted to CCAMLR; or

(3) Catch and effort data from the two most recent seasons in which fishing occurred have not been submitted to CCAMLR.

(b) An individual subject to these regulations intending to develop a new fishery shall notify the Assistant Administrator no later than July 1 of the year in which he or she intends to initiate the fishery and shall not initiate the fishery pending CCAMLR review.

(c) The notification shall be accompanied by information on:

(1) The nature of the proposed fishery, including target species, methods of fishing, proposed region and any minimum level of catches that would be required to develop a viable fishery.

(2) Biological information from comprehensive research/survey cruises, such as distribution, abundance, demographic data and information on stock identity.

(3) Details of dependent and associated species and the likelihood of them being affected by the proposed fishery.

(4) Information from other fisheries in the region or similar fisheries elsewhere that may assist in the valuation of potential yield.

§ 300.106 Exploratory fisheries.

(a) An exploratory fishery, for purposes of this section, is a fishery that was previously defined as a new fishery under § 300.105.

(b) A fishery will continue to be classified as an exploratory fishery until sufficient information is available to:

(1) Evaluate the distribution, abundance, and demography of the target species, leading to an estimate of the fishery’s potential yield.

(2) Review the fishery’s potential impacts on dependent and related species.

(3) Allow the CCAMLR Scientific Committee to formulate and provide advice to the Commission on appropriate harvest catch levels and fishing gear.

(c) The operator of any vessel engaging in an exploratory fishery must submit, by the date specified in the operator’s harvesting permit, catch, effort, and related biological, ecological, and environmental data as required by a data collection plan for the fishery formulated by the CCAMLR Scientific Committee.

(d) In addition to the requirements in § 300.112, any individual planning to enter an exploratory fishery must notify the Assistant Administrator no later than 4 months in advance of the annual meeting of CCAMLR. The Assistant Administrator will not issue a permit to enter an exploratory fishery until after the requirements of § 300.112 have been met and the meeting of CCAMLR, which receives and considers the notice made to the Assistant Administrator, has been concluded.

§ 300.107 Reporting and recordkeeping requirements.

(a) Vessels. The operator of any vessel required to have a harvesting permit under this subpart must:

(1) Accurately maintain on board the vessel all CCAMLR reports and records required by its permit.

(2) Make such reports and records available for inspection upon the request of an authorized officer or CCAMLR inspector.
