§ 622.27 At-sea observer coverage.

(a) Required coverage. A vessel for which a Federal commercial vessel permit for Gulf reef fish or a charter vessel/headboat permit for Gulf reef fish has been issued must carry a NMFS-approved observer, if the vessel’s trip is selected by the SRD for observer coverage. Vessel permit renewal is contingent upon compliance with this paragraph (a).

(b) Notification to the SRD. When observer coverage is required, an owner or operator must advise the SRD in writing not less than 5 days in advance of each trip of the following:

(1) Departure information (port, dock, date, and time).

(2) Expected landing information (port, dock, and date).

(c) Observer accommodations and access. An owner or operator of a vessel on which a NMFS-approved observer is embarked must:

(1) Provide accommodations and food that are equivalent to those provided to the crew.

(2) Allow the observer access to and use of the vessel’s communications equipment and personnel upon request for the transmission and receipt of messages related to the observer’s duties.

(3) Allow the observer access to and use of the vessel’s navigation equipment and personnel upon request to determine the vessel’s position.

(4) Allow the observer free and unobstructed access to the vessel’s bridge, working decks, holding bins, weight scales, holds, and any other space used to hold, process, weigh, or store fish.
§ 622.28 Vessel monitoring systems (VMSs).

The VMS requirements of this section apply throughout the Gulf of Mexico and adjacent states.

(a) General VMS requirement. An owner or operator of a vessel that has been issued a commercial vessel permit for Gulf reef fish, including a charter vessel/headboat issued such a permit even when under charter, must ensure that such vessel has an operating VMS approved by NMFS for use in the Gulf reef fish fishery on board at all times whether or not the vessel is underway, unless exempted by NMFS under the power-down exemptions specified in paragraph (d) of this section and in the NOAA Enforcement Vessel Monitoring System Requirements for the Reef Fish Fishery of the Gulf of Mexico. This NOAA Enforcement Vessel Monitoring System Requirements document is available from NMFS Office for Law Enforcement (OLE), Southeast Region, 263 13th Avenue South, St. Petersburg, FL 33701; phone: 800-758-4833. An operating VMS includes an operating mobile transmitting unit on the vessel and a functioning communication link between the unit and NMFS as provided by a NMFS-approved communication service provider. NMFS OLE maintains a current list of approved VMS units and communication providers which is available from the VMS Support Center, NMFS OLE, 8484 Georgia Avenue, Suite 415, Silver Spring, MD 20910 or by calling toll free: 888-219-9228. If a VMS unit approved for the Gulf reef fish fishery is removed from the approved list by NMFS OLE, a vessel owner who purchased and installed such a VMS unit prior to its removal from the approved list will be considered to be in compliance with the requirement to have an approved unit, unless otherwise notified by NMFS OLE. At the end of a VMS unit’s service life, it must be replaced with a currently approved unit for the fishery.

(b) Hourly reporting requirement. An owner or operator of a vessel subject to the requirements of paragraph (a) of this section must ensure that the required VMS unit transmits a signal indicating the vessel’s accurate position at least once an hour, 24 hours a day every day unless exempted under paragraphs (c) or (d) of this section.

(c) In-port exemption. While in port, an owner or operator of a vessel with a type-approved VMS unit configured with the 4-hour reporting feature may utilize the 4-hour reporting feature rather than comply with the hourly reporting requirement specified in paragraph (b) of this section. Once the vessel is no longer in port, the hourly reporting requirement specified in paragraph (b) of this section applies. For the purposes of this section, “in port” means secured at a land-based facility, or moored or anchored after the return to a dock, berth, beach, seawall, or ramp.

(d) Power-down exemptions. An owner or operator of a vessel subject to the requirement to have a VMS operating at all times as specified in paragraph (a) of this section can be exempted from that requirement and may power down the required VMS unit if—

(1) The vessel will be continuously out of the water or in port, as defined in paragraph (c) of this section, for more than 72 consecutive hours;

(2) The owner or operator of the vessel applies for and obtains a valid letter of exemption from NMFS OLE VMS personnel as specified in the NOAA Enforcement Vessel Monitoring System Requirements for the Reef Fish Fishery of the Gulf of Mexico. This is a one-time requirement. The letter of exemption must be maintained on board the vessel and remains valid for all subsequent power-down requests conducted consistent with the provisions of paragraphs (d)(3) and (4) of this section.

(3) Prior to each power-down, the owner or operator of the vessel files a report to NMFS OLE VMS program personnel, using the VMS unit’s email, that includes the name of the person filing the report, vessel name, vessel U.S. Coast Guard documentation number or state registration number, commercial vessel reef fish permit number, vessel port location during VMS power-down, estimated duration of the power
