§ 622.414  Gear: Traps, Buoys, Identification Requirements, Prohibited Devices, in effect as of July 1, 2008, IBR approved for §622.402(a) and §622.405(b).

(5) F.A.C., Chapter 68B–38: Shrimping and trapping: Closed areas and seasons, Rule 68B–38.001: Citrus-Hernando Shrimping and Trapping Closed Areas and Seasons, in effect as of March 1, 2005, IBR approved for §622.55(e).

(6) F.A.C., Chapter 68B–55: Trap retrieval and trap debris removal, Rule 68B–55.002: Retrieval of Trap Debris, in effect as of October 15, 2007, IBR approved for §622.402(c), §622.403(b), and §622.450(c).

(7) F.A.C., Chapter 68B–55: Trap retrieval and trap debris removal, Rule 68B–55.004: Retrieval of Derelict and Traps Located in Areas Permanently Closed to Trapping, in effect as of October 15, 2007, IBR approved for §622.402(c), §622.403(b), and §622.450(c).

(c) Florida Statute: Florida Division of Marine Fisheries Management, 620 South Meridian Street, Tallahassee, FL 32399; telephone: 850–488–4676; http://www.leg.state.fl.us/Statutes/index.cfm.

(2) [Reserved]

§ 622.414  [Reserved]

§ 622.415  Limited exemption regarding harvest in waters of a foreign nation.

(a) An owner or operator of a vessel that has legally harvested spiny lobsters in the waters of a foreign nation and possesses spiny lobster, or separated tails, in the EEZ incidental to such foreign harvesting is exempt from the requirements of this subpart, except for §622.409 with which such an owner or operator must comply, provided proof of lawful harvest in the waters of a foreign nation accompanies such lobsters or tails.

§ 622.416  Restrictions on sale/purchase.

(a) Spiny lobster harvested in or from the EEZ or adjoining state waters by a vessel that has a valid Federal commercial vessel permit for spiny lobster, as required under §622.400(a)(1), or a valid Federal tail-separation permit for spiny lobster, as required under §622.400(a)(2), may be sold or transferred only to a dealer who has a valid Gulf and South Atlantic dealer permit, as required under §622.400(a)(5).

(b) Spiny lobster harvested in or from the EEZ may be first received by a dealer who has a valid Gulf and South Atlantic dealer permit, as required under §622.400(a)(5), only from a vessel that has a valid Federal commercial vessel permit for spiny lobster or a valid Federal tail-separation permit for spiny lobster.

[79 FR 19497, Apr. 9, 2014]

Subpart S—Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands

§ 622.430  Gear identification.

(a) Fish traps and associated buoys. A fish trap used or possessed in the Caribbean EEZ must display the official number specified for the vessel by Puerto Rico or the U.S. Virgin Islands so as to be easily identified. Traps used in the Caribbean reef fishery that are fished individually, rather than tied together in a trap line, must have at least one buoy attached that floats on the surface. Traps used in the Caribbean reef fishery that are tied together in a trap line must have at least one buoy that floats at the surface attached at each end of the trap line. Each buoy must display the official number and color code assigned to the vessel by Puerto Rico or the U.S. Virgin Islands, whichever is applicable, so as to be easily distinguished, located, and identified.

(b) Presumption of ownership of fish traps. A fish trap in the EEZ will be presumed to be the property of the most recently documented owner. This presumption will not apply with respect to such traps that are lost or sold if the owner reports the loss or sale within 15 days to the RA.

(c) Disposition of unmarked fish traps or buoys. An unmarked fish trap or a buoy deployed in the EEZ where such trap or buoy is required to be marked is illegal and may be disposed of in any
§ 622.431 Trap construction specifications and tending restrictions.

(a) Construction specifications—(1) Minimum mesh size. A bare-wire fish trap used or possessed in the EEZ that has hexagonal mesh openings must have a minimum mesh size of 1.5 inches (3.8 cm) in the smallest dimension measured between centers of opposite strands. A bare-wire fish trap used or possessed in the EEZ that has other than hexagonal mesh openings or a fish trap of other than bare wire, such as coated wire or plastic, used or possessed in the EEZ, must have a minimum mesh size of 2.0 inches (5.1 cm) in the smallest dimension measured between centers of opposite strands.

(2) Escape mechanisms. A fish trap used or possessed in the Caribbean EEZ must have a panel located on one side of the trap, excluding the top, bottom, and side containing the trap entrance. The opening covered by the panel must measure not less than 8 by 8 inches (20.3 by 20.3 cm). The mesh size of the panel may not be smaller than the mesh size of the trap. The panel must be attached to the trap with untreated jute twine with a diameter not exceeding 1/8 inch (3.2 mm). An access door may serve as the panel, provided it is on an appropriate side, it is hinged only at its bottom, its only other fastening is untreated jute twine with a diameter not exceeding 1/8 inch (3.2 mm), and such fastening is at the top of the door so that the door will fall open when such twine degrades. Jute twine used to secure a panel may not be wrapped or overlapped.

(b) Tending restrictions. A fish trap in the Caribbean EEZ may be pulled or tended only by a person (other than an authorized officer) aboard the fish trap owner’s vessel, or aboard another vessel if such vessel has on board written consent of the trap owner, or if the trap owner is aboard and has documentation verifying his identification number and color code. An owner’s written consent must specify the time period such consent is effective and the trap owner’s gear identification number and color code.

§ 622.432 Anchoring restriction.

(a) The owner or operator of any fishing vessel, recreational or commercial, that fishes for or possesses Caribbean reef fish in or from the Caribbean EEZ must ensure that the vessel uses only an anchor retrieval system that recovers the anchor by its crown, thereby preventing the anchor from dragging along the bottom during recovery. For a grapnel hook, this could include an incorporated anchor rode reversal bar that runs parallel along the shank, which allows the rode to reverse and slip back toward the crown. For a fluke- or plow-type anchor, a trip line consisting of a line from the crown of the anchor to a surface buoy would be required.

(b) [Reserved]

§ 622.433 Prohibited gear and methods.

Also see §622.9 for additional prohibited gear and methods that apply more broadly to multiple fisheries or in some cases all fisheries.

(a) Poisons. A poison, drug, or other chemical may not be used to fish for Caribbean reef fish in the Caribbean EEZ.

(b) Powerheads. A powerhead may not be used in the Caribbean EEZ to harvest Caribbean reef fish. The possession of a mutilated Caribbean reef fish in or from the Caribbean EEZ and a powerhead is prima facie evidence that such fish was harvested by a powerhead.

(c) Gillnets and trammel nets in the Caribbean EEZ. A gillnet or trammel net may not be used in the Caribbean EEZ to fish for Caribbean reef fish. Possession of a gillnet or trammel net and any Caribbean reef fish in or from the Caribbean EEZ is prima facie evidence of violation of this paragraph (c). A gillnet or trammel net used in the Caribbean EEZ to fish for any other species must be tended at all times.

§ 622.434 Prohibited species.

(a) General. The harvest and possession restrictions of this section apply without regard to whether the species is harvested by a vessel operating under a commercial vessel permit. The operator of a vessel that fishes in the EEZ is responsible for the limit applicable to that vessel.
