§ 648.56 Scallop research.

(a) At least biennially, in association with the biennial framework process, the Council and NMFS shall prepare and issue an announcement of Federal Funding Opportunity (FFO) that identifies research priorities for projects to be conducted by vessels using research set-aside as specified in paragraph (d) of this section and § 648.60(e), provides requirements and instructions for applying for funding of a proposed RSA project, and specifies the date by which applications must be received. The FFO shall be published as soon as possible by NMFS and shall provide the opportunity for applicants to apply for projects to be awarded for 1 or 2 years by allowing applicants to apply for RSA funding for the first year, second year, or both.

(b) Proposals submitted in response to the FFO must include the following information, as well as any other specific information required within the FFO: A project summary that includes the project goals and objectives, the relationship of the proposed research to scallop research priorities and/or management needs, project design, participants other than the applicant, funding needs, breakdown of costs, and the vessel(s) for which authorization is requested to conduct research activities.

(c) NOAA shall make the final determination as to what proposals are approved and which vessels are authorized to take scallops in excess of possession limits, or take additional trips into Open or Access Areas. NMFS shall provide authorization of such activities to specific vessels by letter of acknowledgment, letter of authorization, or Exempted Fishing Permit issued by the Regional Administrator, which must be kept on board the vessel.

(d) Available RSA allocation shall be 1.25 million lb (567 mt) annually, which shall be deducted from the ABC/ACL specified in § 648.53(a)(3) and (a)(4), respectively. Approved RSA projects shall be allocated an amount of scallop pounds that can be harvested in open areas and available access areas. The specific access areas that are open to RSA harvest shall be specified through the framework process as identified in § 648.60(e)(1). In a year in which a framework adjustment is under review by the Council and/or NMFS, NMFS shall make RSA awards prior to approval of the framework, if practicable, based on total scallop pounds needed to fund each research
project. Recipients may begin compensation fishing in open areas prior to approval of the framework, or wait until NMFS approval of the framework to begin compensation fishing within approved access areas.

(e) If all RSA TAC is not allocated in a fishing year, and proceeds from compensation fishing for approved projects fall short of funds needed to cover a project’s budget due to a lower-than-expected scallop price, unused RSA allocation can be provided to that year’s awarded projects to compensate for the funding shortfall, or to expand a project, rather than having that RSA go unused. NMFS shall identify the process for the reallocation of available RSA pounds as part of the FFO for the RSA program. The FPO shall specify the conditions under which a project that has been awarded RSA could be provided additional RSA pounds as supplemental compensation to account for lower-than-expected scallop price or for expansion of the project, timing of reallocation, and information submission requirements.

(f) If all RSA pounds awarded to a project cannot be harvested during the applicable fishing year, RSA TAC awarded to that project may be harvested through May 31 of the fishing year subsequent to the fishing year in which the set-aside is awarded.

(g) Vessels conducting research under an approved RSA project may be exempt from crew restrictions specified in §648.51, seasonal closures of access areas specified in §648.59, and the restriction on fishing in only one access area during a trip specified in §648.60(a)(4). The RSA project proposal must list which of these measures for which an exemption is required. An exemption shall be provided by Letter of Authorization issued by the Regional Administrator. RSA compensation fishing trips and combined compensation and research trips are not eligible for these exemptions.

(h) Upon completion of scallop research projects approved pursuant to this section and the applicable NOAA grants review process, researchers must provide the Council and NMFS with a report of research findings, which must include at least the following: A detailed description of methods of data collection and analysis; a discussion of results and any relevant conclusions presented in a format that is understandable to a non-technical audience; and a detailed final accounting of all funds used to conduct the sea scallop research.

(76 FR 43769, July 21, 2011, as amended at 77 FR 20740, Apr. 6, 2012)

§ 648.57 Sea scallop area rotation program.

An area rotation program is established for the scallop fishery, which may include areas closed to scallop fishing defined in §648.58, and/or Sea Scallop Access Areas defined in §648.59, subject to the Sea Scallop Area Access program requirements specified in §648.60. Areas not defined as Rotational Closed Areas, Sea Scallop Access Areas, EFH Closed Areas, or areas closed to scallop fishing under other FMPs, are open to scallop fishing as governed by the other management measures and restrictions in this part. The Council’s development of area rotation programs is subject to the framework adjustment process specified in §648.55, including the Area Rotation Program factors included in §648.55(a). The percentage of the total allowable catch for each Sea Scallop Access Area that is allocated to limited access scallop vessels and limited access general category scallop vessels shall be through the framework adjustment process specified in §648.55.

(79 FR 34262, June 16, 2014)

§ 648.58 Rotational Closed Areas.

(a) Elephant Trunk Closed Area. No vessel may fish for scallops in, or possess or land scallops from, the area known as the Elephant Trunk Closed Area. No vessel may possess scallops in the Elephant Trunk Closed Area, unless such vessel is only transiting the area as provided in paragraph (c) of this section. The Elephant Trunk Closed Area is defined by straight lines connecting the following points in the order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):
