Fishery Conservation and Management

§ 648.94 Monkfish possession and landing restrictions.

(a) General. Monkfish may be possessed or landed either as tails only, tails with associated heads possessed separately, or in whole form (head on and gutted), or any combination of the three provided the weight of monkfish heads on board does not exceed 1.91 times the weight of monkfish tails on board. When any combination of tails and whole fish are possessed or landed, the possession or landing limit shall be based on tail weight where all whole monkfish (head on and gutted) are converted to tail weight using the conversion factor of 2.91. For example, whole weight is converted to tail weight by dividing the whole weight by 2.91. Conversely, tail weight is converted to whole weight by multiplying the tail weight by 2.91. If heads only are possessed in combination with tails, the possession or landing limit for monkfish heads may not exceed 1.91 times the tail weight of fish on board, excluding any whole monkfish. The allowed amount of head weight is determined by multiplying the tail weight by 1.91. For example a vessel possessing 100 lb (45 kg) of tail weight may possess an additional 191 lb (87 kg) of monkfish heads (100 × 1.91 = 191). A vessel may not possess heads only without possessing the equivalent weight of tails allowed by using the conversion factor.

(b) Vessels issued limited access monkfish permits—(1) Vessels fishing under the monkfish DAS program in the NFMA—(i) Category A and C vessels. Limited access monkfish Category A and C vessels that fish under a monkfish DAS exclusively in the NFMA may land up to 1,250 lb (567 kg) tail weight or 3,638 lb (1,650 kg) whole weight of monkfish per DAS (or any prorated combination of tail weight and whole weight based on the conversion factor for tail weight to whole weight of 2.91). For every 1 lb (0.45 kg) of tail only weight landed, the vessel may land up to 1.91 lb (0.87 kg) of
