§ 660.720 Interim protection for sea turtles.

(a) Until the effective date of §§660.707 and 660.712 (d) and (e), it is unlawful for any person who is not operating under a Hawaii longline limited access permit under §660.21(b) to do any of the following:

(1) Direct fishing effort toward the harvest of swordfish (Xiphias gladius) using longline gear deployed on the high seas of the Pacific Ocean west of 150° W. long. and north of the equator (0° N. lat.).

(2) Possess a light stick on board a longline vessel on the high seas of the Pacific Ocean west of 150° W. long. north of the equator. A light stick as used in this paragraph is any type of light emitting device, including any fluorescent glow bead, chemical, or electrically powered light that is affixed underwater to the longline gear.

(3) An operator of a longline vessel subject to this section may land or possess no more than 10 swordfish from a fishing trip where any part of the trip included fishing west of 150° W. long. and north of the equator (0° N. lat.).

(4) Fail to employ basket-style longline gear such that the mainline is deployed slack when fishing on the high seas of the Pacific Ocean west of 150° W. long. north of the equator.

(5) When a conventional monofilament longline is deployed by a vessel subject to this section, no fewer than 15 branch lines may be set between any two floats. Vessel operators using basket-style longline gear must set a minimum of 10 branch lines between any 2 floats when fishing in waters west of 150° W. long. north of the equator.

(6) Longline gear deployed by a vessel subject to this section must be deployed such that the deepest point of the main longline between any two floats, i.e., the deepest point in each sag of the main line, is at a depth greater than 100 m (328.1 ft or 54.6 fm) below the sea surface.
