Commodity Credit Corporation, USDA § 1437.102

necessary for the computation of payment, or there was a genuine dispute concerning eligibility for payment.

(67 FR 12448, Mar. 19, 2002, as amended at 78 FR 21019, Apr. 9, 2013)

§ 1437.15 Miscellaneous provisions.

(a) To be eligible for benefits under this part, producers must be in compliance with the highly erodible land and wetlands provisions of part 12 of this title.

(b) The provisions of § 718.11 of this title, providing for ineligibility for benefits for offenses involving controlled substances, shall apply.

(c) A person shall be ineligible to receive assistance under this part for the crop year plus two subsequent crop years if it is determined by the State or county committee or an official of FSA that such person has:

(1) Adopted any scheme or other device that tends to defeat the purpose of a program operated under this part;

(2) Made any fraudulent representation with respect to such program; or

(3) Misrepresented any fact affecting a program determination.

(d) All amounts paid by CCC to any such producer, applicable to the crop year in which a violation of this part occurs, must be refunded to CCC together with interest and other amounts as determined appropriate to the circumstances by CCC.

(e) All persons with a financial interest in the operation receiving benefits under this part shall be jointly and severally liable for any refund, including related charges, which is determined to be due CCC for any reason under this part.

(f) In the event that any request for assistance or payments under this part was established as result of erroneous information or a miscalculation, the assistance or payment shall be recalculated and any excess refunded with applicable interest.

(g) The liability of any person for any penalty under this part or for any refund to CCC or related charge arising in connection therewith shall be in addition to any other liability of such person under any civil or criminal fraud statute or any other provision of law including, but not limited to: 18 U.S.C. 286, 287, 371, 641, 651, 1001 and 1014; 15 U.S.C. 714m; and 31 U.S.C. 3729.

(h) The appeal regulations at parts 11 and 780 of this title apply to decisions made according to this part.

(i) Any payment or portion thereof to any person shall be made without regard to questions of title under State law and without regard to any claim or lien against the crop, or proceeds thereof.

(j) For the purposes of 28 U.S.C. 3301(e), the Secretary hereby waives the restriction on receipt of funds or benefits under this program but only as to beneficiaries who as a condition of such waiver agree to apply the benefits to reduce the amount of the judgement lien.

(k) The provisions of parts 1400, 1403 and 1404 of this chapter apply to NAP.

(l) In the case of death, incompetence or disappearance of any person who is eligible to receive payments under this part, such payments will be disbursed in accordance with part 707 of this title.

Subpart B—Determining Yield Coverage Using Actual Production History

§ 1437.101 Actual production history.

Actual production history (APH) is the unit’s record of crop yield by crop year for the APH base period. The APH base period consists of ten crop years of actual yield, T-yield, assigned yield, and zero credited yield, immediately preceding the crop year for which an approved yield is calculated in accordance with this part. APH will be used, except as otherwise indicated in this part, as the basis for providing non-insured crop disaster assistance.

(71 FR 13744, Mar. 17, 2006)

§ 1437.102 Yield determinations.

(a) An actual yield is the total amount of harvested and appraised production from unit acreage for the crop year on a per-acre, or other basis, as applicable.

(b) A T-yield (county expected yield):

(1) Is the Olympic average (disregarding the high and low yields) of historical yields of the crop in the county for the five consecutive crop
§ 1437.102

7 CFR Ch. XIV (1–1–14 Edition)

years immediately preceding the previous crop year. For example, for the 2005 crop year, the five consecutive crop years immediately preceding the previous crop year would be 1999 through 2003.

(2) Will be the same as the FCIC transitional yield if crop insurance is available for the crop, (but not necessarily for the cause of loss if excluded by policy provisions), in the administrative county.

(3) Will be calculated so as to be comparable to the FCIC transitional yield most reasonable to the area if crop insurance was available for the crop (but not necessarily for the cause of loss) in contiguous counties, but not in the immediate county.

(4) Will be based on the most representative available historical information, as determined by CCC, from such sources as, but not limited to, actual acreage and production data of participating producers in the county; or in similar areas; National Agricultural Statistics Service data; National Institute of Food and Agriculture records, Federal Crop Insurance data, and credible non-government studies. Such data is based on the acreage intended for harvest.

(5) May be adjusted on an administrative county-wide basis for:

(i) Yield variations due to different farming practices in the administrative county such as irrigated, non-irrigated, and organic practices; and

(ii) Cultural practices when such practices in the administrative county are different from those used on acreage to establish the yield.

(6) Will, for all land for those producers who have land physically located in multiple counties and administered in one county office, be based on the administrative county’s expected yield for the crop.

(7) May be reduced, on a specific APH basis, when, as determined by CCC, it does not accurately reflect the productive capability of specific crop acreage.

(8) Will be used in the actual production history base period when less than four consecutive crop years of actual, assigned, or zero-credited yields, as applicable, are available.

(c) An assigned yield is:

(1) Equal to 75 percent of the approved yield calculated for the most recent crop year for which the producer did not certify a report of production.

(2) Used, after the first crop year an approved yield for the crop is calculated, in the actual production history base period when the producer reports acreage for the crop but fails to certify a report of production. Producers may have only one assigned yield in the actual production history base period.

(3) May be replaced with an actual yield when the producers provide a certification of production and acceptable production records for the applicable crop year in accordance with §1437.7.

(4) May not be used if the acreage of a crop in the administrative county in which the unit is located for the crop year increases by more than 100 percent over any year in the preceding seven crop years, or significantly from the previous crop years, as determined by CCC, unless producers provide:

(i) Detailed documentation of production costs, acres planted, and yield for the crop year for which the producer is requesting assistance, or

(ii) If CCC determines the documentation is inadequate, proof that the eligible crop, had it been harvested, could have been marketed at a reasonable price.

(5) May be used, notwithstanding paragraph (c)(4) of this section, if:

(i) The planted acreage for the crop has been inspected by a third party acceptable to CCC, or

(ii) The FSA county executive director, with the concurrence of the FSA state executive director, makes a recommendation for an exemption from the requirements and CCC approves such recommendation.

(d) A zero-credited yield:

(1) Will be used in the applicable crop year of the actual production history base period for each crop year following the crop year containing an assigned yield, for which producers do not certify a report of acreage or production, as determined by CCC.

(2) May be replaced with an actual yield when the producer provides a certification of production and acceptable production records for the applicable crop year in accordance with §1437.7.
Commodity Credit Corporation, USDA
§ 1437.102

(e) An approved yield:

(1) Is used in the calculation of the requisite loss and payment.

(2) Is a simple average of a minimum of four base period crop year yields, i.e., actual yield, T-yield, assigned yield, or zero-credited yield. The base period is 10 crop years, except 5 crop years for apples and peaches, immediately preceding the crop year for which an approved yield is calculated, not including any crop year the crop was out of rotation, not planted, or prevented from being planted.

(3) Shall be calculated according to the following criteria when the producer does not have at least four consecutive crop years of actual, assigned, or zero credited yields beginning with the most recent crop year.

(i) If there are no certified acceptable production records of actual production for the most recent crop year, or zero credited or assigned yields in the producer’s APH base period, and no formula provided for the producer under paragraphs (e)(3)(i) through (iv) of this section, then the approved yield for the current crop year will be calculated on the simple average of 65 percent of the applicable T-yield for each of the minimum four APH crop years.

(ii) If certified acceptable production records of actual production are available for only the most recent crop year and there are no zero credited or assigned yields in the producer’s APH base period, the approved yield for the current crop year will be calculated on the simple average of the one actual yield plus 80 percent of the applicable T-yield for the remaining three of the minimum four APH crop years.

(iii) If certified acceptable production records of actual production are available for only the two most recent crop years and there are no zero credited or assigned yields in the producer’s APH base period, the approved yield for the current crop year will be calculated on the simple average of the two actual yields plus 90 percent of the applicable T-yield for the remaining two of the minimum four APH crop years.

(iv) If certified acceptable production records of actual production are available for only the three most recent crop years and there are no zero credited or assigned yields in the producer’s APH base period, the approved yield for the current crop year will be calculated on the simple average of the three actual yields plus 100 percent of the applicable T-yield for the remaining crop year of the minimum four APH crop years.

(f) If, for one or more actual production history crop years used to establish the approved yield, the actual or appraised yield is less than 65 percent of the current crop year T-yield due to losses incurred in a disaster year, as determined by CCC, producers may request CCC replace the applicable yield with a yield equal to 65 percent of the current crop year T-yield.

(g) If approved yields were calculated for any of the 1995 through 2000 crop years, and subsequently in that period production was not certified, producers may request CCC replace the missing yields for such years with yields equal to the higher of 65 percent of the current crop year T-yield or the missing crop years actual yield.

(h) If producers add land in the farming operation and do not have available production records for the added land CCC will calculate an approved yield for the new unit by utilizing the actual production history yields for the existing unit. In the event the crop suffers a loss greater than 50 percent of the initial approved yield for the crop year and unit acreage has increased by more than 75 percent of the historical average acreage, CCC may adjust the approved yield, as determined by CCC.

(i) If a producer is a new producer, the approved yield may be based on unadjusted T-Yields or a combination of actual yields and unadjusted T-Yields. A new producer is a person who has not been actively engaged in farming for a share of the production of the eligible crop in the administrative county for more than two APH crop years. Formation or dissolution of an entity which includes individuals with more than two APH crop years of production history during the base period does not qualify the new entity as a new producer for APH determination purposes.

(j) A producer who has not shared in the risk of the production of the crop for more than two crop years during the base period, as determined by CCC,

737
§ 1437.103 Late-planted acreage.

(a) Producers planting crop acreage after the final planting date and during the late planting period, as determined by CCC, may be eligible for reduced coverage.

(b) Multiple-planted crops, crops with a growing period of 60 calendar days or less, value-loss crops, and fall season small grain crops intended only for grain are not eligible for reduced coverage under late planting provisions.

(c) For crops with a growing period of:

(1) 61 to 120 calendar days and planted:

(i) One to five calendar days after the final planting date, production will be assigned equal to 5 percent of expected production of the applicable late-planted crop acreage regardless of the day planted.

(ii) Six to twenty calendar days after the final planting date, production will be assigned equal to 5 percent of expected production of the applicable late-planted crop acreage plus an additional one percent of the applicable late-planted crop acreage for each day beyond five days.

(iii) 21 or more calendar days after the final planting date, production will be assigned equal to 50 percent of the producer’s expected production of the applicable late-planted crop acreage.

(2) 121 days and up and planted:

(i) One to five calendar days after the final planting date, production will be assigned equal to 5 percent of expected production of the applicable late-planted crop acreage regardless of the day planted.

(ii) Six to 25 days after the final planting date, production will be assigned equal to 5 percent of expected production of the applicable late-planted crop acreage plus an additional one percent of the applicable late-planted crop acreage for each day beyond five days.

(iii) 26 or more calendar days after the final planting date, production will be assigned equal to 50 percent of the producer’s expected production of the applicable late-planted crop acreage.

§ 1437.104 Assigned production.

(a) When determining losses under this section, assigned production will be used to offset the loss of production when, as determined by CCC, any of the following has occurred:

(1) The loss is a result of an ineligible cause of loss and the loss has not been otherwise accounted for.

(2) The unit acreage was destroyed without consent notwithstanding §1437.10(d).

(3) The producer has a contract to receive a guaranteed payment for all or a portion of the production, as opposed to or regardless of delivery of such production.

(4) The crop is planted after the STC-established final planting date according to §1437.103.

(5) Irrigation equipment is not capable of supplying adequate water to sustain the expected production of a normal irrigated crop.

(6) For normal irrigated annual, biennial, and perennial crops, the irrigation practice is not used.

(7) For normal irrigated annual and biennial crops, the supply of available water at the beginning of the crop year is not adequate.

(8) For normal irrigated perennial crops, the supply of available water at the beginning of the crop year is not adequate as a result of an ineligible cause of loss.
