Commodity Credit Corporation, USDA

§ 1466.10 Conservation practices.

(a) NRCS will determine the conservation practices for which participants may receive program payments. A list of eligible practices will be available to the public.

(b) Payments will not be made to a participant for a conservation practice that either the applicant or another producer has applied prior to application for the program. Payments will not be made for a conservation practice that has been initiated or implemented prior to contract approval, unless a waiver was granted by the State Conservationist or designated conservationist prior to the practice implementation.

(c) A participant will be eligible for payments for water conservation and achieve the conservation and environmental objectives:

(1) A description of the schedule for implementing the conservation practices, including timing, sequence, operation, and maintenance; and

(2) Information that will enable evaluation of the effectiveness of the plan in achieving the environmental objectives.

(d) If an EQIP plan of operation includes an animal waste storage or treatment facility, the participant must agree to develop and implement a CNMP or demonstrate to the satisfaction of the designated conservationist that a CNMP has been implemented.

(e) If an EQIP plan of operations addresses forestland, the participant must develop and implement a forest management plan.

(f) A participant may receive assistance to implement an EQIP plan of operations for water conservation only if the assistance will facilitate a reduction in ground and surface water use on the agricultural operation, unless the producer is participating in a watershed-wide project, as approved by the State Conservationist, which will effectively conserve water in accordance with §1466.20.

Subpart B—Contracts and Payments

§ 1466.10 Conservation practices.

(a) NRCS will determine the conservation practices for which participants may receive program payments. A list of eligible practices will be available to the public.

(b) Payments will not be made to a participant for a conservation practice that either the applicant or another producer has applied prior to application for the program. Payments will not be made for a conservation practice that has been initiated or implemented prior to contract approval, unless a waiver was granted by the State Conservationist or designated conservationist prior to the practice implementation.

(c) A participant will be eligible for payments for water conservation and achieve the conservation and environmental objectives:

(1) A description of the schedule for implementing the conservation practices, including timing, sequence, operation, and maintenance; and

(2) Information that will enable evaluation of the effectiveness of the plan in achieving the environmental objectives.

(d) If an EQIP plan of operation includes an animal waste storage or treatment facility, the participant must agree to develop and implement a CNMP or demonstrate to the satisfaction of the designated conservationist that a CNMP has been implemented.

(e) If an EQIP plan of operations addresses forestland, the participant must develop and implement a forest management plan.

(f) A participant may receive assistance to implement an EQIP plan of operations for water conservation only if the assistance will facilitate a reduction in ground and surface water use on the agricultural operation, unless the producer is participating in a watershed-wide project, as approved by the State Conservationist, which will effectively conserve water in accordance with §1466.20.
§ 1466.11 Technical services provided by qualified personnel not affiliated with USDA.

(a) NRCS may use the services of qualified TSPs in performing its responsibilities for technical assistance.

(b) Participants may use technical services from qualified personnel of other Federal, State, and local agencies, Indian Tribes, or individuals who are certified as TSPs by NRCS.

(c) Technical services provided by qualified personnel not affiliated with USDA may include, but are not limited to: conservation planning; conservation practice survey, layout, design, installation, and certification; and information; education; and training for producers.

(d) NRCS retains approval authority of work done by non-NRCS personnel for the purpose of approving EQIP payments.

[74 FR 2313, Jan. 15, 2009]

§ 1466.20 Application for contracts and selecting applications.

(a) In evaluating EQIP applications, the State Conservationist or designated conservationist, with advice from the State Technical Committee or local working group, takes into account the following guidelines:

(1) Any producer who has eligible land may submit an application for participation in EQIP. Applications are accepted throughout the year. Producers who are members of a joint operation may file a single application for the joint operation.

(2) The State Conservationist, to the greatest extent practicable, will group applications of similar crop, forestry, and livestock operations for evaluation purposes.

(3) The State Conservationist will evaluate applications within each established grouping.

(b) In selecting EQIP applications, the State Conservationist or designated conservationist, with advice from the State Technical Committee or local working group, may establish ranking pools to address a specific resource concern, geographic area, or agricultural operation type or develop a ranking process to prioritize applications for funding that address national, State, and local priority resource concerns, taking into account the following guidelines:

(1) The State Conservationist or designated conservationist will periodically select the highest ranked applications for funding based on applicant eligibility, fund availability, and the NRCS ranking process. The State Conservationist or designated conservationist will rank all applications according to the following factors:

(i) The degree of cost-effectiveness of the proposed conservation practices;

(ii) The magnitude of the expected environmental benefits resulting from the conservation treatment and the priority of the resource concerns that have been identified at the local, State, and national levels;

(iii) How effectively and comprehensively the project addresses the designated resource concern or resource concerns;

(iv) Use of conservation practices that provide long-term environmental enhancements;

(v) Compliance with Federal, State, Tribal, or local regulatory requirements concerning soil, water and air quality; wildlife habitat; and ground and surface water conservation;

(vi) Willingness of the applicant to complete all conservation practices in an expedited manner;

(vii) The ability to improve existing conservation practices or systems, which are in place at the time the application is accepted, or that complete a conservation system;
