corrosion removers. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased metal cleaners and corrosion removers.

(78 FR 34872, June 11, 2013)

§ 3201.105 Microbial cleaning products.

(a) Definition. (1) Cleaning agents that use microscopic organisms to treat or eliminate waste materials within drains, plumbing fixtures, sewage systems, wastewater treatment systems, or on a variety of other surfaces. These products typically include organisms that digest protein, starch, fat, and cellulose.

(2) Microbial cleaning products for which Federal preferred procurement applies are:

(i) Drain maintenance products. Products containing microbial agents that are intended for use in plumbing systems such as sinks, showers, and tubs.

(ii) Wastewater maintenance products. Products containing microbial agents that are intended for use in wastewater systems such as sewer lines and septic tanks.

(iii) General cleaners. Products containing microbial agents that are intended for multi-purpose cleaning in locations such as residential and commercial kitchens and bathrooms.

(b) Minimum biobased content. The Federal preferred procurement product must have a minimum biobased content of at least 45 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) Preference compliance date. No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased microbial cleaning products. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased microbial cleaning products.

(78 FR 34872, June 11, 2013)

§ 3201.106 Paint removers.

(a) Definition. Products formulated to loosen and remove paint from painted surfaces.

(b) Minimum biobased content. The Federal preferred procurement product must have a minimum biobased content of at least 41 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) Preference compliance date. No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased paint removers. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased paint removers.

(78 FR 34872, June 11, 2013)

§ 3201.107 Water turbine bearing oils.

(a) Definition. Lubricants that are specifically formulated for use in the bearings found in water turbines for electric power generation. Previously designated turbine drip oils are used to lubricate bearings of shaft driven water well turbine pumps.

(b) Minimum biobased content. The Federal preferred procurement product must have a minimum biobased content of at least 46 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) Preference compliance date. No later than June 11, 2014, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased water turbine bearing oils. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for products to be procured shall ensure
that the relevant specifications require the use of biobased water turbine bearing oils.

PART 3202—VOLUNTARY LABELING PROGRAM FOR BIOBASED PRODUCTS

§ 3202.1 Purpose and scope.

The purpose of this part is to set forth the terms and conditions for voluntary use of the “USDA Certified Biobased Product” certification mark. This part establishes the criteria that biobased products must meet in order to be eligible to become certified biobased products to which the “USDA Certified Biobased Product” mark can be affixed, the process manufacturers and vendors must use to obtain and maintain USDA certification, and the recordkeeping requirements for manufacturers and vendors who obtain certification. In addition, this part establishes specifications for the correct and incorrect uses of the certification mark, which apply to manufacturers, vendors, and other entities. Finally, this part establishes actions that constitute voluntary labeling program violations.

§ 3202.2 Definitions.

Applicable minimum biobased content. The biobased content at or above the level set by USDA to qualify for use of the certification mark.

ASTM International (ASTM). American Society for Testing and Materials is a nonprofit organization that provides an international forum for the development and publication of voluntary consensus standards for materials, products, systems, and services.

Biobased content. The amount of biobased carbon in the material or product expressed as a percent of weight (mass) of the total organic carbon in the material or product. For BioPreferred Products (products that have been identified for Federal preferred procurement), the biobased content shall be defined and determined as specified in the applicable section of subpart B of part 3201. For all other products, the biobased content is to be determined using ASTM Method D6866, Standard Test Methods for Determining the Biobased Content of Solid, Liquid, and Gaseous Samples Using Radiocarbon Analysis.

BioPreferred product. A product determined by the Secretary to be a commercial or industrial product (other than food or feed) that is:

(1) Composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials; or

(2) An intermediate ingredient or feedstock. For the purposes of this subpart, the term ‘biobased product’ does not include motor vehicle fuels, heating oil, electricity produced from biomass, or any mature market products.

BioPreferred Product. A biobased product that meets or exceeds minimum biobased content levels set by USDA, and that is found within any of the product categories that have been identified, in subpart B of 7 CFR part 3201, whose products within are eligible for Federal preferred procurement/purchasing.

Certification mark. A combination of the certification mark artwork (as defined in this subpart); one of three statements identifying whether the USDA certification applies to the product, the package, or both the product and package; and, where applicable, the letters “FP” to indicate that the product is within a designated product category and eligible for Federal preferred procurement. The certification mark is owned, and its use is managed by, USDA (standard trademark law definition applies).
