cause barley to grade less than U.S. No. 4. For example, if barley grades less than U.S. No. 4 when its test weight falls below 40.0 pounds per bushel, hull-less barley would be eligible for quality adjustment if its test weight falls below 40.0 pounds per bushel. The same quality factors considered for quality adjustment of barley will be applicable to quality adjustment of hull-less barley. Quality adjustment discount factors for U.S. grades specified in the Special Provisions will also apply to hull-less barley at the same levels applicable to barley;

(v) Quality factors for hull-less oats fall below the levels contained in the Official United States Standards for Grain that cause oats to grade less than U.S. No. 4. For example, if oats grade less than U.S. No. 4 when its test weight falls below 27.0 pounds per bushel, hull-less oats would be eligible for quality adjustment if the test weight falls below 27.0 pounds per bushel. The same quality factors considered for quality adjustment of oats will be applicable and determination of deficiencies will be made in accordance with the Federal Grain Inspection Service directive that establishes procedures for quality factor analysis of hull-less barley. Quality adjustment discount factors for U.S. grades specified in the Special Provisions will also apply to hull-less oats at the same levels applicable to oats; or

(vi) Substances or conditions are present, including mycotoxins, that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions;

(ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us;

(iii) With regard to deficiencies in quality (except test weight, which may be determined by our loss adjustor), the samples are analyzed by:

(A) A grain grader licensed under the United States Grain Standards Act or the United States Warehouse Act;

(B) A grain grader licensed under State law and employed by a warehouse operator who has a commodity storage agreement with the Commodity Credit Corporation; or

(C) A grain grader not licensed under State law, but who is employed by a warehouse operator who has a commodity storage agree-

ment with the Commodity Credit Corporation and is in compliance with State law regarding warehouses; and

(iv) With regard to substances or conditions injurious to human or animal health, the samples are analyzed by a laboratory approved by us.

(4) Small grain production that is eligible for quality adjustment, as specified in sections 11(d)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions.

(e) Any production harvested from plants growing in the insured crop may be counted as production of the insured crop on a weight basis.

12. Late Planting

A late planting period is applicable to small grains, except to any barley or wheat acreage covered under the terms of the Wheat or Barley Winter Coverage Endorsement. Barley or wheat covered under the terms of the Winter Coverage Endorsement must be planted on or prior to the applicable final planting date specified in the Special Provisions. In counties having one fall final planting period for acreage covered under the Wheat or Barley Winter Coverage Endorsement and another fall final planting date for acreage not covered under the endorsement, the fall late planting period will begin after the final planting date for acreage not covered under the endorsement.

13. Prevented Planting

(a) In addition to the provisions contained in section 17 of the Basic Provisions, in counties for which the Special Provisions designate a spring final planting date, your prevented planting production guarantee will be based on your approved yield for spring-planted acreage of the insured crop.

(b) Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional coverage and pay an additional premium, you may increase your prevented planting coverage to a level specified in the actuarial documents.

§ 457.102 Wheat or barley winter coverage endorsement.

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Wheat or Barley Winter Coverage Endorsement

(This is a continuous endorsement)
1. In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made part of the Small Grains Crop Provisions, subject to the terms and conditions described herein.

2. This endorsement is available only in counties for which the Special Provisions for the insured crop designate both a fall final planting date and a spring final planting date, and for which the actuarial documents provide a premium rate for this coverage.

3. You must have a Small Grains Crop Insurance Policy in force and elect to insure barley or wheat under that policy.

4. You must select this coverage, by crop, on your application for insurance. Failure to do so means you have rejected this coverage for both wheat and barley and this endorsement is void.

5. In addition to the requirements of section 34(b) of the Basic Provisions and section 2 of the Small Grains Crop Provisions, optional units may be established for barley if each optional unit contains only initially planted winter barley or only initially planted spring barley.

6. If you elect this endorsement for winter barley, the contract change, cancellation, and termination dates applicable to wheat in the county will be applicable to all your spring and winter barley.

7. Coverage under this endorsement begins on the later of the date we accept your application for coverage or on the fall final planting date designated in the Special Provisions. Coverage ends on the spring final planting date designated in the Special Provisions.

8. The provisions of section 14 of the Basic Provisions are amended to require that all notices of damage be provided to us by the spring final planting date designated in the Special Provisions.

9. All eligible acreage of each crop covered by this endorsement must be insured.

10. The amount of any indemnity paid under the terms of this endorsement will be subject to any reduction specified in the Basic Provisions for multiple crop benefits in the same crop year.

11. Whenever any winter wheat or barley is damaged during the insurance period (see section 3, above), and at least 20 acres or 20 percent of the insured planted acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may, at your option, take one of the following actions:

(a) Continue to care for the damaged crop.

(b) Replant the acreage to an appropriate variety of the insured crop, if it is practical, and receive a replanting payment in accordance with the terms of section 9 (Replanting Payments) of the Small Grains Crop Insurance Provisions. By doing so, coverage will continue under the terms of the Basic Provisions, the Small Grains Crop Insurance Provisions and this endorsement, and the production guarantee for winter wheat or barley will remain in effect.

(c) Destroy the remaining crop on such acreage. By doing so, you agree to accept an appraised amount of production determined in accordance with section 11(c)(1) of the Small Grains Crop Insurance Provisions to count against the unit production guarantee. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 11 (Settlement of Claim) of the Small Grains Crop Insurance Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop if such insurance is available. If you elect to plant and then elect to insure a spring type of the same crop (you must elect whether or not you want insurance on the spring type of the same crop at the time we release the winter type acreage), you must pay additional premium for the insurance. Such acreage will be insured in accordance with the policy provisions that are applicable to acreage that is initially planted to a spring type of the insured crop, and you must:

(1) Plant the spring type in a manner which results in a clear and discernable break in the planting pattern at the boundary between it and any remaining acreage of the winter type; and

(2) Store or market the production in a manner which permits us to verify the amount of spring type production separately from any winter type production. In the event you are unable to provide records of production that are acceptable to us, the spring type acreage will be considered to be a part of the original winter type unit.

Option A (30 Percent Coverage and Acreage Release)

Whenever any winter wheat is damaged during the insurance period (see section 3, above), and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may take any one of the following actions:

(a) Destroy the remaining crop on such acreage. By doing so, you agree to accept an amount of production to count against the unit production guarantee equal to 70 percent of the production guarantee for the damaged acreage, or an appraisal determined in accordance with paragraph 11.(c)(1) of the Small Grains Crop Insurance Provisions (457.101) if such an appraisal results in a greater amount of production. This amount...
§ 457.103 Cotton crop insurance provisions.

The cotton crop insurance provisions for the 2011 and succeeding crop years are as follows:

1. Definitions

Cotton. Varieties identified as American Upland Cotton.

Growth area. A geographic area designated by the Secretary of Agriculture for the purpose of reporting cotton prices.
