Federal Crop Insurance Corporation, USDA

§ 457.118 Malting barley price and quality endorsement.

The malting barley price and quality endorsement provisions for the 2011 and succeeding crop years are as follows:

FCIC policies

United States Department of Agriculture

Federal Crop Insurance Corporation.

Reinsured policies:

(Appropriate title for insurance provider).

Both FCIC and reinsured policies:

Small Grains Crop Insurance Malting Barley Price and Quality Endorsement

(This is a continuous endorsement. Refer to section 2 of the Basic Provisions.)

In return for your payment of premium for the coverage contained herein, this endorsement will be attached to and made part of the Basic Provisions and Small Grains Crop Provisions, subject to the terms and conditions described herein.

1. Definitions

Additional value price. The value per bushel determined in accordance with section 3 of Option A or section 3 of Option B, as applicable.

Approved malting variety. A variety of barley specified in the Special Provisions.

Brewery. A facility where malt beverages are commercially produced for human consumption.

Contracted production. A quantity of barley the producer agrees to grow and deliver, and the buyer agrees to accept, under the terms of the malting barley contract.

Crop year. In addition to the definition in the Basic Provisions and only for APH purposes under the terms of this endorsement, the period within which the crop is actually grown and designated by the calendar year in which the insured crop is normally harvested.

Licensed grain grader. A person authorized by the U.S. Department of Agriculture to inspect and grade barley in accordance with the U.S. Standards for malt barley.

Malt. A substance produced by germinating barley under controlled conditions and then drying it.

Malt extract. A substance made by adding warm water to ground malt and separating the liquid from the solid. In some cases, the...
liquid extract may be condensed or evaporated to a syrup or powder.

*Malting barley contract.* An agreement in writing:
(a) Between the producer and a brewery or a business enterprise that produces or sells malt or malt extract to a brewery, or a business enterprise owned by such brewery or business;
(b) That specifies the amount of contracted production, the purchase price or a method to determine such price; and
(c) That establishes the obligations of each party to the agreement.

*Malting barley price agreement.* An agreement that meets all conditions required for a malting barley contract except that it is executed with a business enterprise that is not described in the definition of a malting barley contract, but that normally contracts to purchase malting barley production and has facilities appropriate to handle and store malting barley production.

*Objective test.* A determination made by a qualified person using standardized equipment that is widely used in the malting industry that follows a procedure approved by the:
(a) American Society of Brewing Chemists when determining percent germination;
(b) Federal Grain Inspection Service when determining quality factors other than percent germination;
(c) Food and Drug Administration (FDA) when determining concentrations of mycotoxins or other substances or conditions identified by the FDA as being injurious to human or animal health.

*Subjective test.* A determination:
(a) Made by a person using olfactory, visual, touch or feel, masticatory, or other senses unless performed by a licensed grain grader;
(b) That uses non-standardized equipment;
(c) That does not follow a procedure approved by the American Society of Brewing Chemists, the Federal Grain Inspection Service, or the Food and Drug Administration.

2. This endorsement provides coverage for malting barley production and quality losses at a price per bushel greater than that offered under the Small Grains Crop Provisions.

3. You must have the Basic Provisions and the Small Grains Crop Provisions, all malting barley acreage in the county insured under this endorsement will be considered as one basic unit regardless of whether such acreage is owned, rented for cash, or rented for a share of the crop. Your shares in the malting barley acreage insured under this endorsement must be designated separately on the acreage report. For example, if you have 100 percent share in 50 acres and 75 percent share in 10 acres you must list the 50 acres separately from the 10 acres on your acreage report and include the percent share for each.

4. You must select a percentage of the additional value price on or before the sales closing date (you can select only one percentage even if more than one additional value price is applicable, and this percentage must be 100 percent or less). In the event you choose a percentage less than 100 percent of the additional value price, we will multiply that percentage by the additional value price specified in Option A or Option B, as applicable, to determine the additional value price applicable to this endorsement.

5. All acreage in the county planted to approved malting varieties that is insurable under the Small Grains Crop Provisions for feed barley and your elected Option will be insured under this endorsement, except any acreage on which you produce seed under the terms of the seed contract.

6. In lieu of the definitions and provisions regarding units and unit division in the Basic Provisions and the Small Grains Crop Provisions, all malting barley acreage in the county insured under this endorsement will be considered as one basic unit regardless of whether such acreage is owned, rented for cash, or rented for a share of the crop. Your shares in the malting barley acreage insured under this endorsement must be designated separately on the acreage report. For example, if you have 100 percent share in 50 acres and 75 percent share in 10 acres you must list the 50 acres separately from the 10 acres on your acreage report and include the percent share for each.

7. You must select a percentage of the additional value price on or before the sales closing date (you can select only one percentage even if more than one additional value price is applicable, and this percentage must be 100 percent or less). In the event you choose a percentage less than 100 percent of the additional value price, we will multiply that percentage by the additional value price specified in Option A or Option B, as applicable, to determine the additional value price applicable to this endorsement.

8. The additional premium amount for this coverage will be determined by multiplying your malting barley production guarantee (per acre) by your additional value price, by the premium rate, by the acreage planted to approved malting barley varieties, by your share at the time coverage begins. The premium rate you pay will be adjusted by a malting barley factor contained in the actuarial documents, as applicable.
9. In addition to the reporting requirements contained in section 6 of the Basic Provisions, you must provide all the information required by the Option you elect.

10. In accordance with section 14 of the Basic Provisions:
   (a) We will settle your claim within 30 days if all production:
       (1) Meets the quality criteria specified in section 14(a)(2) of this endorsement; or
       (2) Grades U.S. No. 4 or worse in accordance with the grades and grade requirements for the subclasses six-rowed and two-rowed barley, or for the class barley in accordance with the Official United States Standards for Grain; and
       (3) Is not accepted by a buyer for malting purposes; or
   (b) Whenever any production fails one or more of the quality criteria specified in section 14(a)(2) of this endorsement and grades U.S. No. 3 or better, we will not agree upon the amount of loss until the earlier of:
       (1) The date you sell, feed, donate, or otherwise utilize such production for any purpose; or
       (2) May 31 of the calendar year immediately following the calendar year in which the insured malting barley is normally harvested. If you still retain any insured production on or after this date, we will:
           (i) Defer completion of your claim if you agree to such deferment; or
           (ii) If you do not agree to defer your claim, we will complete your claim; however, no adjustment for quality deficiencies will be made and all remaining unsold insured production will be considered to have met the quality standards specified in this endorsement.

11. This endorsement for malting barley does not provide prevented planting coverage. Such coverage is only provided in accordance with the provisions of the Small Grains Crop Provisions for feed barley.

12. Production from all acreage insured under this endorsement and any production of feed barley varieties must not be commingled prior to our making all determinations under section 14. Failure to keep production separate as required herein will result in denial of your claim for indemnity.

13. In the event of loss or damage covered by this endorsement, we will settle your claim by:
   (a) Multiplying the insured acreage by your malting barley production guarantee (per acre) determined in accordance with section 2 of Option A or Option B, as applicable;
   (b) Multiplying the result in section 13(a) by your respective additional value price per bushel;
   (c) Multiplying the number of bushels of production to count determined in accordance with section 14 by your additional value price per bushel (If more than one additional value price is applicable, the highest additional value price will be used until the number of bushels covered at the higher additional value price is reached and the remainder of the production will be multiplied by the lower additional value price. For example, if variety A is grown under a malting barley price agreement and 1000 bushels of variety A are insured using an additional value price of $0.68 per bushel and only 500 bushels of variety A are produced, the 500 bushels would be valued at $0.68 per bushel and all other production of other varieties will be valued at the lower additional value price unless such production is acceptable under the terms of the malting barley price agreement, in which case 500 bushels of the other varieties would also be valued at $0.68 per bushel);
   (d) Subtracting the result of section 13(c) from the result in section 13(b); and
   (e) Multiplying the result of section 13(d) by your share.

14. The amount of production to be counted against your malting barley production guarantee will be determined as follows:
   (a) Production to count will include all:
       (1) Appraised production determined in accordance with sections 11(c)(1)(i), (ii) and (iv) of the Small Grains Crop Provisions;
       (2) Harvested production and unharvested production that meets, or would meet, if properly handled, either the acceptable percentage or parts per million standard contained in any applicable malting barley contract or malting barley price agreement for protein, plump kernels, thin kernels, germination, blight damaged, injured by mold, mold damaged, injured by sprout, injured by frost, frost damaged, and mycotoxins or other substances or conditions identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human health, or the following quality standards (additional or different quality standards may be specified or made available in the Special Provisions), whichever is less stringent:

<table>
<thead>
<tr>
<th>Protein (dry basis)</th>
<th>14.0% maximum</th>
<th>13.5% maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plump kernels</td>
<td>65.0% minimum</td>
<td>75.0% minimum</td>
</tr>
<tr>
<td>Thin kernels</td>
<td>10.0% maximum</td>
<td>10.0% maximum</td>
</tr>
<tr>
<td>Germination</td>
<td>95.0% minimum</td>
<td>95.0% minimum</td>
</tr>
<tr>
<td>Blight damaged</td>
<td>4.0% maximum</td>
<td>4.0% maximum</td>
</tr>
<tr>
<td>Injured by mold</td>
<td>5.0% maximum</td>
<td>5.0% maximum</td>
</tr>
<tr>
<td>Mold damaged</td>
<td>0.4% maximum</td>
<td>0.4% maximum</td>
</tr>
</tbody>
</table>

Six-rowed Malting Barley | Two-rowed Malting Barley
(3) Harvested production that does not meet the quality standards contained in section 14(a)(2), but is accepted by a buyer. If the price received is less than the total of the additional value price and the feed barley projected price announced by FCIC, the production to count may be reduced or the values used to settle the claim may be adjusted in accordance with sections 14(b), (c), and (d).

(b) For the quantity of production that qualifies under section 14(a)(3), the amount of production to count will be determined by:

(1) Subtracting the projected price for feed barley from the sale price per bushel of the damaged production. If the sale price is less than the market value of the damaged production, the sale price will be the market value;
(2) Subtracting the weighted average cost per bushel for conditioning the production, if any, (not to exceed the discount you would have received had you sold the barley without conditioning, for example, if the price per bushel of the production without conditioning is $2.80 and the price for such production after conditioning is $2.90, the discount is $0.10 and the cost of conditioning can not exceed $0.10 per bushel) from the result of section 14(b)(1);
(3) Dividing the result of section 14(b)(1) or (2), as applicable, by 100 percent of the additional value price (The weighted average additional value price will be used in the event more than one additional value price is applicable, for example, if 1000 bushels of variety A are insured with an additional value price of $0.68 and 500 bushels are insured with an additional value price of $0.40, the weighted average additional value price would be $0.59); and
(4) Multiplying the result of section 14(b)(3) (if less than zero, no production will be counted; or, if more than 1,000, no adjustment will be made) by the number of bushels of damaged production.

(c) No reduction in the amount of production to count will be allowed for:

(1) Moisture content;
(2) Damage due to uninsured causes;
(3) Costs or reduced value associated with drying, handling, processing, or quality factors other than those contained in section 14(a)(2); or
(4) Any other costs associated with normal handling and marketing of malting barley.

(d) All grade and quality determinations must be based on the results of objective tests. No indemnity will be paid for any loss established by subjective tests. We may obtain one or more samples of the insured crop and have tests performed at an official grain inspection location established under the U.S. Grain Standards Act or laboratory of our choice to verify the results of any test. In the event of a conflict in the test results, our results will determine the amount of production to count.

OPTION A (FOR MALTING BARLEY PRODUCTION, REGARDLESS OF WHETHER GROWN UNDER A MALTING BARLEY CONTRACT OR PRICE AGREEMENT)

1. To be eligible for coverage under this option:

(a) You must provide us with acceptable records of your sales of malting barley and the number of acres planted to malting varieties for at least the four crop years in your APH database prior to the crop year immediately preceding the current crop year (for example, to determine your production guarantee for the 2011 crop year, records must be provided for the 2006 through the 2009 crop years, if malting barley varieties were planted in each of those crop years);

(1) Failure to provide acceptable records or reports as required herein will make you ineligible for coverage under this endorsement; and

(2) You must provide these records to us no later than the production reporting date specified in the Basic Provisions; and

(b) If you produce malting barley under a malting barley contract or malting barley price agreement, you must provide us with a copy of your current crop year contract or agreement on or before the acreage reporting date.

2. Your malting barley production guarantee (per acre) will be the lesser of:

(a) The production guarantee (per acre) for feed barley for acreage planted to approved malting varieties calculated in accordance with the Basic Provisions; or

(b) A yield per acre calculated by:

(1) Dividing the number of bushels of malting barley sold each year by the number of acres planted to approved malting barley varieties in each respective year;

(2) Adding the results of section 2(b)(1);
(3) Dividing the result of section 2(b)(2) by the number of years approved malting barley varieties were planted; and

(4) Multiplying the result of section 2(b)(3) by your coverage level.

3. The additional value price per bushel will be determined as follows:

(a) For production grown under a malting barley contract or a malting barley price agreement, the additional value price per bushel will be the following amount, as applicable:

(i) The sale price per bushel established in the malting barley contract or malting barley price agreement (not including discounts or incentives that may apply) minus the projected price for barley;

(ii) The amount per bushel for malting barley (not including discounts or incentives that may apply) above a feed barley price that is determined at a later date, provided the method of determining the price is specified in the malting barley contract or malting barley price agreement; or

(b) The additional value price per bushel designated in the actuarial documents will be used if:

(i) Production is not grown under a malting barley contract or malting barley price agreement; or

(ii) The malting barley contract or malting barley price agreement is not provided to us by the acreage reporting date.

(c) Under no circumstances will the additional value price exceed $1.25 per bushel.

(d) The number of bushels eligible for coverage using an additional value price determined in accordance with section 3(a) will be the lesser of:

(i) 4,290 bushels eligible for coverage using the additional value price from section 2(b)(2) by the number of years approved malting barley varieties were planted; and

(ii) 7,800 bushels grown under a malting barley price agreement;

(e) Dividing the result of section 2(b)(3) by your coverage level;

(f) Multiplying the result of section 2(b)(2) by your coverage level.

4. The additional value price per bushel will be determined as follows:

(a) For production grown under a malting barley contract or a malting barley price agreement, the additional value price per bushel will be the following amount, as applicable:

(i) The sale price per bushel established in the malting barley contract or malting barley price agreement (not including discounts or incentives that may apply) minus the projected price for barley;

(ii) The amount per bushel for malting barley (not including discounts or incentives that may apply) above a feed barley price that is determined at a later date, provided the method of determining the price is specified in the malting barley contract or malting barley price agreement; or

(b) The additional value price per bushel designated in the actuarial documents will be used if:

(i) Production is not grown under a malting barley contract or malting barley price agreement; or

(ii) The malting barley contract or malting barley price agreement is not provided to us by the acreage reporting date.

(c) Under no circumstances will the additional value price exceed $1.25 per bushel.

(d) The number of bushels eligible for coverage using an additional value price determined in accordance with section 3(a) will be the lesser of:

(i) 4,290 bushels eligible for coverage using the additional value price from section 2(b)(2) by the number of years approved malting barley varieties were planted; and

(ii) 7,800 bushels grown under a malting barley price agreement;

(e) Dividing the result of section 2(b)(3) by your coverage level;

(f) Multiplying the result of section 2(b)(2) by your coverage level.

5. The total production from the 200 acres of malting barley is 7,250 bushels, all of which fails to meet the quality standards specified in section 14(a) and in the malting barley price agreement;

(a) A feed barley approved yield of 52 bushels per acre;

(b) A feed barley approved yield of 55 bushels per acre;

(c) A feed barley approved yield of 59 bushels per acre;

(d) A feed barley approved yield of 62 bushels per acre;

(e) A feed barley approved yield of 65 bushels per acre;

(f) A feed barley approved yield of 68 bushels per acre;

(g) A feed barley approved yield of 71 bushels per acre;

(h) A feed barley approved yield of 74 bushels per acre;

(i) A feed barley approved yield of 77 bushels per acre;

(j) A feed barley approved yield of 80 bushels per acre;

(k) A feed barley approved yield of 83 bushels per acre;

(l) A feed barley approved yield of 86 bushels per acre;

(m) A feed barley approved yield of 89 bushels per acre;

(n) A feed barley approved yield of 92 bushels per acre;

(o) A feed barley approved yield of 95 bushels per acre;

(p) A feed barley approved yield of 98 bushels per acre;

(q) A feed barley approved yield of 101 bushels per acre;

(r) A feed barley approved yield of 104 bushels per acre;

(s) A feed barley approved yield of 107 bushels per acre;

(t) A feed barley approved yield of 110 bushels per acre;

(u) A feed barley approved yield of 113 bushels per acre;

(v) A feed barley approved yield of 116 bushels per acre;

(w) A feed barley approved yield of 119 bushels per acre;

(x) A feed barley approved yield of 122 bushels per acre;

(y) A feed barley approved yield of 125 bushels per acre;

(z) A feed barley approved yield of 128 bushels per acre;

(aa) A feed barley approved yield of 131 bushels per acre;

(bb) A feed barley approved yield of 134 bushels per acre;

(cc) A feed barley approved yield of 137 bushels per acre;

(dd) A feed barley approved yield of 140 bushels per acre;

(ee) A feed barley approved yield of 143 bushels per acre;

(ff) A feed barley approved yield of 146 bushels per acre;

(gg) A feed barley approved yield of 149 bushels per acre;

(hh) A feed barley approved yield of 152 bushels per acre;

(ii) A feed barley approved yield of 155 bushels per acre;

(jj) A feed barley approved yield of 158 bushels per acre;

(kk) A feed barley approved yield of 161 bushels per acre;

(ll) A feed barley approved yield of 164 bushels per acre;

(mm) A feed barley approved yield of 167 bushels per acre;

(nn) A feed barley approved yield of 170 bushels per acre;

(oo) A feed barley approved yield of 173 bushels per acre;

(pp) A feed barley approved yield of 176 bushels per acre;

(qq) A feed barley approved yield of 179 bushels per acre;

(rr) A feed barley approved yield of 182 bushels per acre;

(ss) A feed barley approved yield of 185 bushels per acre;

(tt) A feed barley approved yield of 188 bushels per acre;

(uu) A feed barley approved yield of 191 bushels per acre;

(vv) A feed barley approved yield of 194 bushels per acre;

(ww) A feed barley approved yield of 197 bushels per acre;

(xx) A feed barley approved yield of 200 bushels per acre;

(yy) A feed barley approved yield of 203 bushels per acre;

(zz) A feed barley approved yield of 206 bushels per acre;

(aa) A feed barley approved yield of 209 bushels per acre;

(bb) A feed barley approved yield of 212 bushels per acre;

(cc) A feed barley approved yield of 215 bushels per acre;

(dd) A feed barley approved yield of 218 bushels per acre;

(ee) A feed barley approved yield of 221 bushels per acre;

(ff) A feed barley approved yield of 224 bushels per acre;

(gg) A feed barley approved yield of 227 bushels per acre;

(hh) A feed barley approved yield of 230 bushels per acre;

(ii) A feed barley approved yield of 233 bushels per acre;

(jj) A feed barley approved yield of 236 bushels per acre;

(kk) A feed barley approved yield of 239 bushels per acre;

(ll) A feed barley approved yield of 242 bushels per acre;

(mm) A feed barley approved yield of 245 bushels per acre;

(nn) A feed barley approved yield of 248 bushels per acre;

(oo) A feed barley approved yield of 251 bushels per acre;

(pp) A feed barley approved yield of 254 bushels per acre;

 qq) A feed barley approved yield of 257 bushels per acre;

(rr) A feed barley approved yield of 260 bushels per acre;

(ss) A feed barley approved yield of 263 bushels per acre;

(tt) A feed barley approved yield of 266 bushels per acre;

(uu) A feed barley approved yield of 269 bushels per acre;

(vv) A feed barley approved yield of 272 bushels per acre;

(ww) A feed barley approved yield of 275 bushels per acre;

(xx) A feed barley approved yield of 278 bushels per acre;

(yy) A feed barley approved yield of 281 bushels per acre;

(zz) A feed barley approved yield of 284 bushels per acre;

(aa) A feed barley approved yield of 287 bushels per acre;

(bb) A feed barley approved yield of 290 bushels per acre;

(cc) A feed barley approved yield of 293 bushels per acre;

(dd) A feed barley approved yield of 296 bushels per acre;

(ee) A feed barley approved yield of 299 bushels per acre;

(ff) A feed barley approved yield of 302 bushels per acre;

(gg) A feed barley approved yield of 305 bushels per acre;

(hh) A feed barley approved yield of 308 bushels per acre;

(ii) A feed barley approved yield of 311 bushels per acre;

(jj) A feed barley approved yield of 314 bushels per acre;

(kk) A feed barley approved yield of 317 bushels per acre;

(ll) A feed barley approved yield of 320 bushels per acre;

(mm) A feed barley approved yield of 323 bushels per acre;

(nn) A feed barley approved yield of 326 bushels per acre;

(oo) A feed barley approved yield of 329 bushels per acre;
malting barley price agreement) x $0.40 additional value price = $1,404.00 amount of insurance protection for the bushels not grown under a malting barley price agreement; and

(b) $3,134.00 + $1,404.00 = $4,538.00 total amount of insurance protection for the unit;

(c) In accordance with section 14, the total amount of production to count is determined as follows:

(1) Damaged production that is not reconditioned:
   (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.28;
   (ii) $0.28 - $0.05 reconditioning cost = $0.23;
   (iii) $0.23 / $0.62 weighted average additional value price = 0.37; and
   (iv) 0.37 x 2,500 bushels of damaged production sold at $2.20 = 925 bushels of production to count;

(2) Damaged production that is reconditioned:
   (i) $2.20 price per bushel - $1.92 projected price for feed barley = $0.39;
   (ii) $0.39 / $0.62 weighted average additional value price = 0.63; and
   (iii) 0.63 x 4,750 bushels of damaged production sold at $2.20 = 2,993 bushels of production to count;

(d) The value of production to count is $3,918 bushels (2,993 + 925);

(2) Multiplying the result of section 2(b)(1) by the coverage level percentage you elected:

(3) Only contracted production or acreage is covered by Option B.

§457.118

1. To be eligible for coverage under this option:

(a) On or before the acreage reporting date, for at least one of the three crop years you planted malting barley immediately preceding the previous crop year:

   (i) You must have had a malting barley contract and produced and sold at least 75 percent of the contracted amount for the crop year such contract was applicable, or such other amount specified in the Special Provisions (e.g., if you wish to insure 2011 crop year malting barley and you had a malting barley contract to produce 10,000 bushels in 2009, you must have produced and sold at least 7,500 bushels of 2009 crop year malting barley production); and

   (ii) You must provide us a copy of your prior malting barley contract and acceptable records of sales of malting barley required to establish compliance with section 1(a)(1) of Option B;

   (b) The maximum amount of production that may be insured under Option B will be limited to the lesser of the amount of malting barley contained in the current crop year's malting barley contract or 200 percent of the amount contracted for the crop year used to demonstrate compliance with section 1(a)(1) of Option B; and

   (c) On or before the acreage reporting date, you must provide us with a copy of your malting barley contract for the current crop year:

      (1) All terms and conditions of the contract, including the contract price or method to determine the price, must be specified in the contract and be effective on or before the acreage reporting date;

      (2) If you fail to timely provide the contract, or any terms are omitted, we may elect to determine the relevant information necessary for insurance under Option B, or deny liability; and

      (3) Only contracted production or acreage is covered by Option B.

2. Your malting barley production guarantee (per acre) will be the lesser of:

   (a) The production guarantee (per acre) for feed barley for acreage planted to approved malting barley varieties calculated in accordance with the Basic Provisions; or

   (b) A yield per acre calculated by:

      (1) All terms and conditions of the contract, including the contract price or method to determine the price, must be specified in the contract and be effective on or before the acreage reporting date;

      (2) If you fail to timely provide the contract, or any terms are omitted, we may elect to determine the relevant information necessary for insurance under Option B, or deny liability; and

      (3) Only contracted production or acreage is covered by Option B.

3. The additional value price per bushel will be the following amount, as applicable:

   (a) The sale price per bushel established in the malting barley contract (without regard to discounts or incentives that may apply) minus the projected price for feed barley;

   (b) The amount per bushel for malting barley (not including discounts or incentives that may apply) above a feed barley price that is determined at a later date, provided the method of determining the price is specified in the malting barley contract; or

   (c) If your malting barley contract has a variable premium price option, you must select a price or a method of determining a price that will be treated as the sale price and your additional value price per bushel will be calculated under section 3(a) or (b), as applicable; and

   (d) Under no circumstances will the additional value price per bushel exceed $2.00 per bushel.

4. Loss Example.

   In accordance with section 13, your loss will be calculated as follows:

   (a) Assume the following:
§ 457.119 Texas citrus fruit crop insurance provisions.

The Texas citrus fruit crop insurance provisions for the 2000 and succeeding crop years are as follows:

The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.

1. Definitions

Crop. Specific groups of citrus fruit as listed in the Special Provisions.

Crop year. The period beginning with the date insurance attaches to the citrus crop and extending through the normal harvest time. It is designated by the calendar year following the year in which the bloom is normally set.

Direct marketing. Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer’s market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.

Excess rain. An amount of precipitation that damages the crop.

Excess wind. A natural movement of air that has sustained speeds exceeding 58 miles per hour recorded at the U. S. Weather Service reporting station operating nearest to the grove at the time of damage.

Freeze. The formation of ice in the cells of the tree, its blossoms, or its fruit caused by low air temperatures.

Harvest. The severance of mature citrus fruit from the tree by pulling, picking, or any other means, or by collecting marketable fruit from the ground.
