processing peaches, and you select 100 percent of the price election of $15.50 per bushel for fresh peaches and $6.50 per bushel for processing peaches. You harvest 2,500 bushels of fresh peaches and 500 bushels of processing peaches. Your indemnity will be calculated as follows:

(A) 10 acres x 300 bushels = 3,000-bushel production guarantee of fresh peaches; 5 acres x 300 bushels = 1,500-bushel production guarantee of processing peaches;
(B) 3,000-bushel production guarantee x $15.50 price election = $46,500 value of the production guarantee for fresh peaches; 1,500-bushel production guarantee x $6.50 price election = $9,750 value of the production guarantee for processing peaches;
(C) $46,500 value of the production guarantee for fresh peaches + $9,750 value of the production guarantee for processing peaches = $56,250 total value of the production guarantee;
(D) 2,500 bushels of fresh peach production to count x $15.50 price election = $38,750 value of the fresh peach production to count; 500 bushels of processing peach production to count x $6.50 price election = $3,250 value of the processing peach production to count;
(E) $38,750 value of the fresh peach production to count + $3,250 value of the processing peach production to count = $42,000 total value of the production to count;
(F) $56,250 total value of the production guarantee—$42,000 total value of the production to count = $14,250 value of loss; and
(G) $14,250 value of loss x 100 percent share = $14,250 indemnity payment.

[End of Example]

(c) The total production to count (in bushels) from all insurable acreage on the unit will include:

(i) All appraised production as follows:
(A) That is abandoned;
(B) From which production is sold by direct marketing if you fail to meet the requirements contained in section 11.
(C) That is damaged solely by uninsured causes; or
(D) For which you fail to provide production records that are acceptable to us;

(ii) Production lost due to uninsured causes;

(iii) Unharvested peach production that would be marketable if harvested;

(iv) Potential production on insured acreage that you intend to abandon or no longer care for. If you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end. If you do not agree with our appraisal, we may defer the claim only if you agree to continue to care for the crop. We will then make another appraisal when you notify us of further damage or that harvest is general in the area unless you harvested the crop, in which case we will use the harvested production. If you do not continue to adequately care for the crop, our appraisal made prior to deferring the claim will be used to determine the production to count; and

(v) Any appraised production on insured acreage will be considered production to count unless such production is exceeded by the actual harvested production.

(2) All harvested marketable peach production from the insurable acreage.

(3) Mature marketable peach production may be reduced as a result of a loss in quality due to an insured cause of loss. The amount of production to count for such peaches will be determined as follows:

(i) For fresh peaches by:
(A) Dividing the value of the damaged peaches minus the post production cost specified in the Special Provisions, by the fresh peach price election; and
(B) Multiplying the result of section 12(c)(3)(i)(A) (not to exceed 1.00) by the number of bushels of the damaged fresh peaches.

(ii) For processing peaches by:
(A) Dividing the value of the damaged peaches minus the post production cost specified in the Special Provisions, by the processing peach price election; and
(B) Multiplying the result of section 12(c)(3)(ii)(A) (not to exceed 1.00) by the number of bushels of the damaged processing peaches.

(4) Peaches that cannot be marketed due to uninsured causes will not be considered production to count.

13. Late and Prevented Planting

the late and prevented planting provisions of the Basic Provisions are not applicable.

§ 457.154 Processing sweet corn crop insurance provisions.

The Processing Sweet Corn Crop Insurance Provisions for the 2014 and succeeding crop years are as follows:

FCIC Policies

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Processing Sweet Corn Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1)
3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 of the Basic Provisions:

(a) You may select only one price election percentage for all the processing sweet corn in the county insured under this policy. The percentage of the maximum price election you choose for one type will be applicable to all other types insured under this policy.

(b) The insurance guarantee per acre is expressed as tons of unhusked ear weight. Any
other measured production will be converted to an unhusked ear weight equivalent.

(c) The appraised production from bypassed acreage that could have been accepted by the processor will be included when determining your approved yield.

(d) Acreage that is bypassed because it was damaged by an insurable cause of loss will be considered to have a zero yield when determining your approved yield.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 of the Basic Provisions, the cancellation and termination dates are March 15.

6. Report of Acreage

In addition to the provisions of section 6 of the Basic Provisions, you must provide a copy of all processor contracts to us on or before the acreage reporting date.

7. Insured Crop

(a) In accordance with section 8 of the Basic Provisions, the crop insured will be all the processing sweet corn in the county for which a premium rate is provided by the actuarial documents:

(1) In which you have a share;

(2) That is grown under, and in accordance with, the requirements of a processor contract executed on or before the acreage reporting date and not excluded from the processor contract at any time during the crop year; and

(3) That is not (unless allowed by the Special Provisions or by written agreement):

(i) Interplanted with another crop; or

(ii) Planted into an established grass or legume.

(b) You will be considered to have a share in the insured crop if, under the processor contract, you retain control of the acreage on which the sweet corn is grown, you are at risk of loss, and the processor contract provides for delivery of sweet corn under specified conditions and at a stipulated base contract price.

(c) A commercial sweet corn producer who is also a processor may establish an insurable interest if the following requirements are met:

(1) The producer must comply with these Crop Provisions;

(2) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and

(3) Our inspection reveals that the processing facilities comply with the definition of a processor contained in these Crop Provisions.

8. Insurable Acreage

In addition to the provisions of section 9 of the Basic Provisions:

(a) Any acreage of the insured crop that is damaged before the final planting date, to the extent that the majority of producers in the area would normally not further care for the crop, must be replanted unless we agree that it is not practical to replant; and

(b) We will not insure any acreage that does not meet the rotation requirements, if applicable, contained in the Special Provisions.

9. Insurance Period

In lieu of the provisions contained in section 11 of the Basic Provisions, regarding the end of the insurance period, insurance ceases at the earlier of:

(a) The date the sweet corn:

(1) Was destroyed;

(2) Should have been harvested but was not harvested;

(3) Was abandoned; or

(4) Was harvested;

(b) The date you harvest sufficient production to fulfill your processor contract if the processor contract stipulates a specific amount of production to be delivered;

(c) Final adjustment of a loss; or

(d) Unless otherwise agreed to in writing, the calendar date for the end of the insurance period in which the sweet corn would normally be harvested as follows:

(1) September 30 in Malheur County, Oregon, all Idaho counties, and all Iowa counties;

(2) October 20 in all other Oregon counties, and in all Washington counties; or

(3) September 20 in all other states.

10. Causes of Loss

In accordance with the provisions of section 12 of the Basic Provisions:

(a) Insurance is provided only against the following causes of loss that occur during the insurance period:

(1) Adverse weather conditions, including:

(i) Excessive moisture that prevents harvesting equipment from entering the field or that prevents the timely operation of harvesting equipment; and

(ii) Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production is beyond the capacity of the processor, either of which causes the acreage to be bypassed.

(2) Fire;
§ 457.154

(3) Insects, but not damage due to insufficient or improper application of pest control measures;

(4) Plant disease, but not damage due to insufficient or improper application of disease control measures or as otherwise limited by the Special Provisions;

(5) Wildlife;

(6) Earthquake;

(7) Volcanic eruption; or

(8) Failure of the irrigation water supply, if due to a cause of loss listed in section 10(a)(1) through (7) that occurs during the insurance period.

(b) In addition to the causes of loss excluded in section 12 of the Basic Provisions, we will not insure any loss of production due to:

(1) Bypassed acreage because of:

(i) The breakdown or non-operation of equipment or facilities;

(ii) The availability of a crop insurance payment. We may deny any indemnity immediately in such circumstance or, if an indemnity has been paid, require you to repay it to us with interest at any time acreage was bypassed due to the availability of a crop insurance payment; or

(2) Your failure to follow the requirements contained in the processor contract.

11. Duties in the Event of Damage or Loss

In addition to the requirements of section 14 of the Basic Provisions, you must give us notice:

(a) Not later than 48 hours after:

(1) Total destruction of the sweet corn on the unit; or

(2) Discontinuance of harvest on a unit on which unharvested production remains.

(b) Within 3 days after the date harvest should have started on any acreage that will not be harvested unless we have previously released the acreage. You must also provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in our determination that the acreage was bypassed due to an uninsured cause of loss. If the crop will not be harvested and you wish to destroy the crop, you must leave representative samples of the unharvested crop for our inspection. The samples must be at least 10 feet wide and extend the entire length of each field in each unit. The samples must not be destroyed until the earlier of our inspection or 15 days after notice is given to us; and

(c) At least 15 days prior to the beginning of harvest if you intend to claim an indemnity on any unit, or immediately if damage is discovered during the 15 day period or during harvest, so that we may inspect any damaged production. If you fail to notify us and such failure results in our inability to inspect the damaged production, we will consider all such production to be undamaged and include it as production to count. You are not required to delay harvest.

12. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate, acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee, by type if applicable;

(2) Multiplying each result of section 12(b)(1) by the respective price election, by type if applicable;

(3) Totaling the results of section 12(b)(2) if there are more than one type;

(4) Multiplying the total production to count (see section 12(c)), for each type if applicable, by its respective price election;

(5) Totaling the results of section 12(b)(4) if there are more than one type;

(6) Subtracting the results of section 12(b)(4) from the results of section 12(b)(2) if there is only one type or subtracting the results of section 12(b)(5) from the result of section 12(b)(3) if there are more than one type; and

(7) Multiplying the result of section 12(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of type A processing sweet corn in the unit, with a guarantee of 3.0 tons per acre and a price election of $50.00 per ton. You are only able to harvest 200 tons. Your indemnity would be calculated as follows:

(1) 100 acres x 3.0 tons = 300 tons guarantee;

(2) 300 tons x $50.00 price election = $15,000.00 value of guarantee;

(4) 200 tons x $50.00 price election = $10,000.00 value of production to count;

(6) $15,000.00 - $10,000.00 = $5,000.00 loss;

(7) $5,000.00 x 100 percent = $5,000.00 indemnity payment.

You also have a 100 percent share in 100 acres of type B processing sweet corn in the same unit, with a guarantee of 4.0 tons per acre and a price election of $45.00 per ton. You are only able to harvest 350 tons. Your total indemnity for both types A and B would be calculated as follows:

(1) 100 acres x 3.0 tons = 300 tons guarantee for type A, and

100 acres x 4.0 tons = 400 tons guarantee for type B;

(2) 300 tons x $50.00 price election = $15,000.00 value of guarantee for type A, and

400 tons x $45.00 price election = $18,000.00 value of guarantee for type B;
Federal Crop Insurance Corporation, USDA  § 457.155

(3) $15,000.00 + $18,000.00 = $33,000.00 total value of guarantee;

(4) 200 tons x $50.00 price election = $10,000.00 value of production to count for type A, and

350 tons x $45.00 price election = $15,750.00 total value of production to count for type B;

(5) $10,000.00 + $15,750.00 = $25,750.00 total value of production to count;

(6) $33,000.00 - $25,750.00 = $7,250.00 loss;

(7) $7,250.00 loss x 100 percent = $7,250.00 indemnity payment.

(c) The total production to count, specified in tons of unhusked ear weight, from all insurable acreage on the unit will include:

(1) All appraised production as follows:

(A) That is abandoned;

(B) That is put to another use without our consent;

(C) That is damaged solely by uninsured causes; or

(D) For which you fail to provide production records that are acceptable to us.

(ii) Production lost due to uninsured causes.

(ii) Production on acreage that is bypassed unless the acreage was bypassed due to an insured cause of loss which resulted in production which would not be acceptable under the terms of the processor contract.

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested.

(ii) Production lost due to uninsured causes.

(2) All harvested processing sweet corn production from the insurable acreage. The amount of such production will be:

(i) The usable tons of processing sweet corn shown on the processor settlement sheet, if available; or

(ii) Determined by dividing the dollar amount paid, payable, or which should have been paid under the terms of the processor contract for the quantity of the sweet corn delivered to the processor by the base contract price per ton; and

(3) All harvested processing sweet corn production from any other insurable units that have been used to fulfill your processor contract for this unit.

The total production to count will be expressed as an unhusked ear weight. Any other measure of production will be converted to an unhusked ear weight equivalent.

13. Late Planting

A late planting period is not applicable to processing sweet corn unless allowed by the Special Provisions and you provide written approval from the processor by the acreage reporting date that it will accept the production from the late planted acres when it is expected to be ready for harvest.

14. Prevented Planting

Your prevented planting coverage will be 40 percent of your production guarantee for timely planted acreage. If you have limited or additional levels of coverage, as specified in 7 CFR part 400, subpart T, and pay an additional premium, you may increase your prevented planting coverage to the levels specified in the actuarial documents.

§ 457.155 Processing bean crop insurance provisions.

The Processing Bean Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

FCIC Policies

United States Department of Agriculture

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Processing Bean Crop Provisions

If a conflict exists among the policy provisions, the order of priority is as follows: (1) The Catastrophic Risk Protection Endorsement, if applicable; (2) the Special Provisions; (3) these Crop Provisions; and (4) the Basic Provisions with (1) controlling (2), etc.
