(1) Any felony.

(2) Any offense under chapter 109A of title 18, United States Code, even if not a felony.

(3) Any offense under any of the following sections of the United States Code, even if not a felony:

(i) In title 18, section 111, 112(b) involving intimidation or threat, 113, 115, 245, 247, 248 unless the offense involves only a nonviolent physical obstruction and is not a felony, 351, 594, 1153 involving assault against an individual who has not attained the age of 16 years, 1361, 1368, the second paragraph of 1501, 1509, 1751, 1991, or 2194 involving force or threat.

(ii) In title 16, section 773g if the offense involves a violation of section 773e(a)(3), 1859 if the offense involves a violation of section 1857(1)(E), 3637(c) if the offense involves a violation of section 3637(a)(3), or 5010(b) if the offense involves a violation of section 5009(6).

(iii) In title 26, section 7212.

(iv) In title 30, section 1463 if the offense involves a violation of section 1461(4).

(v) In title 40, section 5109 if the offense involves a violation or attempted violation of section 5104(e)(2)(F).

(vi) In title 42, section 2283, 3631, or 9152(d) if the offense involves a violation of section 9151(3).

(vii) In title 43, section 1063 involving force, threat, or intimidation.

(viii) In title 47, section 606(b).

(ix) In title 49, section 46506(1) unless the offense involves only an act that would violate section 661 or 662 of title 18 and would not be a felony if committed in the special maritime and territorial jurisdiction of the United States.

(4) Any offense that is an attempt or conspiracy to commit any of the foregoing offenses, even if not a felony.

(c) An offense that was or would have been a qualifying Federal offense as defined in this section at the time of conviction, such as an offense under 18 U.S.C. 2031 or 2032, remains a qualifying Federal offense even if the provision or provisions defining the offense or assigning its penalties have subsequently been repealed, superseded, or modified.

[Order No. 2753–2005, 70 FR 4767, Jan. 31, 2005]

Subpart B—DNA Sample Collection, Analysis, and Indexing

§ 28.11 Definitions.

DNA analysis means analysis of the deoxyribonucleic acid (DNA) identification information in a bodily sample.

DNA sample means a tissue, fluid, or other bodily sample of an individual on which a DNA analysis can be carried out.

§ 28.12 Collection of DNA samples.

(a) The Bureau of Prisons shall collect a DNA sample from each individual in the custody of the Bureau of Prisons who is, or has been, convicted of—

(1) A Federal offense (including any offense under the Uniform Code of Military Justice); or

(2) A qualifying District of Columbia offense, as determined under section 4(d) of Public Law 106–546.

(b) Any agency of the United States that arrests or detains individuals or supervises individuals facing charges shall collect DNA samples from individuals who are arrested, facing charges, or convicted, and from non-United States persons who are detained under the authority of the United States. For purposes of this paragraph, ''non-United States persons'' means persons who are not United States citizens and who are not lawfully admitted for permanent residence as defined in 8 CFR 1.1(p). Unless otherwise directed by the Attorney General, the collection of DNA samples under this paragraph may be limited to individuals from whom the agency collects fingerprints and may be subject to other limitations or exceptions approved by the Attorney General. The DNA-sample collection requirements for the Department of Homeland Security in relation to non-arrestees do not include, except to the extent provided by the Secretary of Homeland Security, collecting DNA samples from:

(1) Aliens lawfully in, or being processed for lawful admission to, the United States;

(2) Aliens held at a port of entry during consideration of admissibility and not subject to further detention or proceedings;

(3) Aliens held in connection with maritime interdiction; or

(4) Other aliens with respect to whom the Secretary of Homeland Security, in consultation with the Attorney General, determines that the collection of DNA samples is not feasible because of operational exigencies or resource limitations.

(c) The DNA-sample collection requirements under this section shall be implemented by each agency by January 9, 2009.

(d) Each individual described in paragraph (a) or (b) of this section shall cooperate in the collection of a DNA sample from that individual. Agencies required to collect DNA samples under this section may use or authorize the use of such means as are reasonably necessary to detain, restrain, and collect a DNA sample from an individual described in paragraph (a) or (b) of this section who refuses to cooperate in the collection of the sample.

(e) Agencies required to collect DNA samples under this section may enter into agreements with other agencies described in paragraph (a) or (b) of this section, with units of state or local governments, and with private entities to carry out the collection of DNA samples. An agency may, but need not, collect a DNA sample from an individual if—

(1) Another agency or entity has collected, or will collect, a DNA sample from that individual pursuant to an agreement under this paragraph;

(2) The Combined DNA Index System already contains a DNA analysis with respect to that individual; or

(3) Waiver of DNA-sample collection in favor of collection by another agency is authorized by 42 U.S.C. 14135a(a)(3) or 10 U.S.C. 1565(a)(2).

(f) Each agency required to collect DNA samples under this section shall—

(1) Carry out DNA-sample collection utilizing sample-collection kits provided or other means authorized by the Attorney General, including approved methods of blood draws or buccal swabs;

(2) Furnish each DNA sample collected under this section to the Federal Bureau of Investigation, or to another agency or entity as authorized by the

Attorney General, for purposes of analysis and entry of the results of the analysis into the Combined DNA Index System; and

(3) Repeat DNA-sample collection from an individual who remains or becomes again subject to the agency's jurisdiction or control if informed that a sample collected from the individual does not satisfy the requirements for analysis or for entry of the results of the analysis into the Combined DNA Index System.

(g) The authorization of DNA-sample collection by this section pursuant to Public Law 106–546 does not limit DNA-sample collection by any agency pursuant to any other authority.

[AG Order No. 3023–2008, 73 FR 74942, Dec. 10, 2008]

§ 28.13 Analysis and indexing of DNA samples.

(a) The Federal Bureau of Investigation shall carry out a DNA analysis on each DNA sample furnished to the Federal Bureau of Investigation pursuant to section 3(b) or 4(b) of Public Law 106–54, and shall include the results in the Combined DNA Index System.

(b) The Federal Bureau of Investigation shall include in the Combined DNA Index System the results of each analysis furnished to the Federal Bureau of Investigation pursuant to 10 U.S.C. 1565(b)(2).

Subpart C—Preservation of Biological Evidence

SOURCE: Order No. 2762–2005, 70 FR 21957, Apr. 28, 2005, unless otherwise noted.

§ 28.21 Purpose.

Section 3600A of title 18 of the United States Code (''section 3600A'') requires the Government to preserve biological evidence that was secured in the investigation or prosecution of a Federal offense, if a defendant is under a sentence of imprisonment for such offense, subject to certain limitations and exceptions. The general purpose of this requirement is to preserve biological evidence for possible DNA testing under 18 U.S.C. 3600. Subsection (e) of section 3600A requires the Attorney General to promulgate regulations to implement and enforce section 3600A, including appropriate disciplinary sanctions to ensure that employees comply with such regulations.

§ 28.22 The requirement to preserve biological evidence.

(a) *Applicability in general.* The requirement of section 3600A to preserve biological evidence applies to evidence that has been retained in cases in which the offense or conviction occurred prior to the enactment of section 3600A or the adoption of this subpart, as well as to evidence secured in pending and future cases.

(b) *Limitation to circumstances in which a defendant is under a sentence of imprisonment for the offense.* The requirement of section 3600A to preserve biological evidence secured in the investigation or prosecution of a Federal offense begins to apply when a defendant is convicted and sentenced to imprisonment for the offense, and ceases to apply when the defendant or defendants are released following such imprisonment. The evidence preservation requirement of section 3600A does not apply in the following situations:

(1) *Inapplicability at the investigative stage.* The requirement of section 3600A to preserve biological evidence does not apply at the investigative stage of criminal cases, occurring prior to the conviction and sentencing to imprisonment of a defendant. Biological evidence may be collected and preserved in the investigation of Federal offenses prior to the sentencing of a defendant to imprisonment, reflecting sound investigative practice and the need for evidence in trial proceedings that may result from the investigation, but section 3600A does not govern these activities.

(2) *Inapplicability to cases involving only non-incarcerative sentences.* The requirement of section 3600A to preserve biological evidence does not apply in cases in which defendants receive only nonincarcerative sentences, such as probation, fines, or payment of restitution.

(3) *Inapplicability following release.* The requirement of section 3600A to preserve biological evidence ceases to

apply when the defendant or defendants are released following imprisonment, either unconditionally or under supervision. The requirement does not apply during any period following the release of the defendant or defendants from imprisonment, even if the defendant or defendants remain on supervised release or parole.

(4) *Inapplicability following revocation of release.* The requirement of section 3600A to preserve biological evidence applies during a defendant's imprisonment pursuant to the sentence imposed upon conviction of the offense, as opposed to later imprisonment resulting from a violation of release conditions. The requirement does not apply during any period in which the defendant or defendants are imprisoned based on the revocation of probation, supervised release, or parole.

(c) *Conditions of preservation.* The requirement of section 3600A to preserve biological evidence means that such evidence cannot be destroyed or disposed of under the circumstances in which section 3600A requires its preservation, but does not limit agency discretion concerning the conditions under which biological evidence is maintained or the transfer of biological evidence among different agencies.

§ 28.23 Evidence subject to the preservation requirement.

(a) *Biological evidence generally.* The evidence preservation requirement of section 3600A applies to ''biological evidence,'' which is defined in section 3600A(b). The covered evidence is sexual assault forensic examination kits under section 3600A(b)(1) and semen, blood, saliva, hair, skin tissue, or other identified biological material under section 3600A(b)(2).

(b) *Biological evidence under section 3600A(b)(2).* Biological evidence within the scope of section 3600A(b)(2) is identified biological material that may derive from a perpetrator of the offense, and hence might be capable of shedding light on the question of a defendant's guilt or innocence through DNA testing to determine whether the defendant is the source of the material. In greater detail, evidence within the scope of section 3600A(b)(2) encompasses the following:

(1) *Identified biological material.* Beyond sexual assault forensic examination kits, which are specially referenced in section 3600A(b)(1), section 3600A requires preservation only of evidence that is detected and identified as semen, blood, saliva, hair, skin tissue, or some other type of biological material. Section 3600A's preservation requirement does not apply to an item of evidence merely because it is known on theoretical grounds that physical things that have been in proximity to human beings almost invariably contain unidentified and imperceptible amounts of their organic matter.

(2) *Material that may derive from a perpetrator of the crime.* Biological evidence within the scope of section 3600A(b)(2) must constitute ''biological material.'' In the context of section 3600A, this term does not encompass all possible types of organic matter, but rather refers to organic matter that may derive from the body of a perpetrator of the crime, and hence might be capable of shedding light on a defendant's guilt or innocence by including or excluding the defendant as the source of its DNA.

Example 1. In a murder case in which the victim struggled with the killer, scrapings of skin tissue or blood taken from under the victim's fingernails would constitute biological material in the sense of section 3600A(b)(2), and would be subject to section 3600A's requirement to preserve biological evidence, assuming satisfaction of the statute's other conditions. Such material, which apparently derives from the perpetrator of the crime, could potentially shed light on guilt or innocence through DNA testing under 18 U.S.C. 3600 to determine whether a defendant was the source of this material.

Example 2. Biological material in the sense of section 3600A(b)(2) would not include the body of a murder victim who was shot from a distance, the carcasses of cattle in a meat truck secured in an investigation of the truck's hijacking, a quantity of marijuana seized in a drug trafficking investigation, or articles made from wood or from wool or cotton fiber. While such items of evidence constitute organic matter in a broader sense, they are not biological material within the scope of section 3600A(b)(2), because they do not derive from the body of a perpetrator of the crime, and hence could not shed light on a defendant's guilt or innocence through DNA testing under 18 U.S.C. 3600 to determine whether the defendant is the source of the evidence.

§ 28.24 Exceptions based on the results of judicial proceedings.

Subsection (c) of section 3600A makes the biological evidence preservation requirement inapplicable in two circumstances relating to the results of judicial proceedings:

(a) *Judicial denial of DNA testing.* Section 3600A(c)(1) exempts situations in which a court has denied a motion for DNA testing under 18 U.S.C. 3600 and no appeal is pending.

(b) *Inclusion of defendant as source.* Section 3600A(c)(5) exempts situations in which there has been DNA testing under 18 U.S.C. 3600 and the results included the defendant as the source of the evidence.

§ 28.25 Exceptions based on a defendant's conduct.

Subsection (c) of section 3600A makes the biological evidence preservation requirement inapplicable in two circumstances relating to action (or inaction) by the defendant:

(a) *Waiver by defendant.* Section 3600A(c)(2) makes the biological evidence preservation requirement inapplicable if the defendant knowingly and voluntarily waived DNA testing in a court proceeding conducted after the date of enactment, *i.e.*, after October 30, 2004. Hence, for example, if a defendant waives DNA testing in the context of a plea agreement, in a pretrial colloquy with the court, in the course of discovery in pretrial proceedings, or in a postconviction proceeding, and the proceeding in which the waiver occurs takes place after October 30, 2004, the biological evidence preservation requirement of section 3600A does not apply.

(b) *Notice to defendant.* (1) Section 3600A(c)(3) makes the biological evidence preservation requirement inapplicable if the defendant is notified that the biological evidence may be destroyed ''after a conviction becomes final and the defendant has exhausted all opportunities for direct review of the conviction,'' and ''the defendant does not file a motion under section 3600 within 180 days of receipt of the notice.''

(2) Effective notice concerning the possible destruction of biological evidence for purposes of section 3600A(c)(3) cannot be given if the case is pending on direct review of the conviction before a court of appeals or the Supreme Court, if time remains for the defendant to file a notice of appeal from the judgment of conviction in the court of appeals, or if time remains for the defendant to file a petition for certiorari to the Supreme Court following the court of appeals' determination of an appeal of the conviction.

(3) Once direct review has been completed, or the time for seeking direct review has expired, section 3600A(c)(3) allows notice to the defendant that biological evidence may be destroyed. The biological evidence preservation requirement of section 3600A thereafter does not apply, unless the defendant files a motion under 18 U.S.C. 3600 within 180 days of receipt of the notice. Notice to a defendant that biological evidence may be destroyed may be provided by certified mail, and the Federal Bureau of Prisons shall create a record concerning the delivery of such mail to an inmate. To determine whether a defendant has filed a motion under 18 U.S.C. 3600 within 180 days of receipt of such a notice, the agency providing the notice may obtain confirmation of delivery and the date of delivery by inquiry with the Federal Bureau of Prisons, and may ascertain whether the defendant has filed a motion under 18 U.S.C. 3600 within 180 days of that date by checking the records of the district court which entered the judgment of conviction of the defendant for the offense or asking the United States Attorney's office in that district.

§ 28.26 Exceptions based on the nature of the evidence.

Subsection (c)(4) of section 3600A provides that the section's biological evidence preservation requirement does not apply if ''the evidence must be returned to its rightful owner, or is of such a size, bulk, or physical character as to render retention impracticable.'' This exception is subject to the condition that the Government must ''take[] reasonable measures to remove and preserve portions of the material evidence sufficient to permit future DNA testing.''

(a) *Evidence not retained beyond the investigative stage.* Section 3600A(c)(4) has

no application if items of the sort it describes—*e.g.*, items that must be returned to the rightful owner, or items that are so large that their retention is impracticable—are not kept until the time when a defendant is convicted and sentenced to imprisonment. Investigative agents may take samples from such items during the investigative stage of the case, in accordance with their judgment about what is needed for purposes of DNA testing or other evidentiary use, or may conclude that the nature of the items does not warrant taking such samples, and the items themselves may then be returned to the owners or otherwise disposed of prior to the trial, conviction, or sentencing of any defendant. In such cases, section 3600A is inapplicable, because its evidence preservation requirement does not apply at all until a defendant is sentenced to imprisonment, as noted in § 28.22(b)(1).

(b) *Evidence not constituting biological material.* It is rarely the case that a bulky item of the sort described in section 3600A(c)(4), or a large part of such an item, constitutes biological evidence as defined in section 3600A(b). If such an item is not biological evidence in the relevant sense, it is outside the scope of section 3600A. For example, the evidence secured in the investigation of a bank robbery may include a stolen car that was used in the getaway, and there may be some item in the car containing biological material that derives from a perpetrator of the crime, such as saliva on a discarded cigarette butt. Even if the vehicle is kept until a defendant is sentenced to imprisonment, section 3600A's preservation requirement would not apply to the vehicle as such, because the vehicle is not biological material. It would be sufficient for compliance with section 3600A to preserve the particular items in the vehicle that contain identified biological material or portions of them that contain the biological material.

(c) *Preservation of portions sufficient for DNA testing.* If evidence described in section 3600A(c)(4) is not otherwise exempt from the preservation requirement of section 3600A, and section 3600A(c)(4) is relied on in disposing of such evidence, reasonable measures must be taken to preserve portions of the evidence sufficient to permit future DNA testing. For example, considering a stolen car used in a bank robbery, it may be the case that one of the robbers was shot during the getaway and bled all over the interior of the car. In such a case, if the car is kept until a defendant is sentenced to imprisonment for the crime, there would be extensive biological material in the car that would potentially be subject to section 3600A's requirement to preserve biological evidence. Moreover, the biological material in question could not be fully preserved without retaining the whole car or removing and retaining large amounts of matter from the interior of the car. Section 3600A(c)(4) would be relevant in such a case, given that fully retaining the biological evidence is likely to be impracticable or inconsistent with the rightful owner's entitlement to the return of the vehicle. In such a case, section 3600A(c)(4) could be relied on, and its requirements would be satisfied if samples of the blood were preserved sufficient to permit future DNA testing. Preserving such samples would dispense with any need under section 3600A to retain the vehicle itself or larger portions thereof.

§ 28.27 Non-preemption of other requirements.

Section 3600A's requirement to preserve biological evidence applies cumulatively with other evidence retention requirements. It does not preempt or supersede any statute, regulation, court order, or other provision of law that may require evidence, including biological evidence, to be preserved.

§ 28.28 Sanctions for violations.

(a) *Disciplinary sanctions.* Violations of section 3600A or of this subpart by Government employees shall be subject to the disciplinary sanctions authorized by the rules or policies of their employing agencies for violations of statutory or regulatory requirements.

(b) *Criminal sanctions.* Violations of section 3600A may also be subject to criminal sanctions as prescribed in subsection (f) of that section. Section

3600A(f) makes it a felony offense, punishable by up to five years of imprisonment, for anyone to knowingly and intentionally destroy, alter, or tamper with biological evidence that is required to be preserved under section 3600A with the intent to prevent that evidence from being subjected to DNA testing or prevent the production or use of that evidence in an official proceeding.

(c) *No effect on validity of convictions.* Section 3600A's requirements are enforceable through the disciplinary sanctions and criminal sanctions described in paragraphs (a) and (b) of this section. A failure to preserve biological evidence as required by section 3600A does not provide a basis for relief in any postconviction proceeding.

PART 29—MOTOR VEHICLE THEFT PREVENTION ACT REGULATIONS

Sec.

29.1 Purpose.
29.2 Definitions.
29.3 Administration by the Bureau of Justice Assistance.
29.4 Election to participate by states and localities.
29.5 Notification of law enforcement officials.
29.6 Limited participation by states and localities permitted.
29.7 Withdrawal from the program by states and localities.
29.8 Motor vehicle owner participation.
29.9 Motor vehicles for hire.
29.10 Owner withdrawal from the program.
29.11 Sale or other transfer of an enrolled vehicle.
29.12 Specified conditions under which stops may be authorized.
29.13 No new conditions without consent.

AUTHORITY: 28 U.S.C. 509, 510; 42 U.S.C. 14171.

SOURCE: 61 FR 40725, Aug. 6, 1996, unless otherwise noted.

§ 29.1 Purpose.

(a) The purpose of this part is to implement the Motor Vehicle Theft Prevention Act, 42 U.S.C. 14171, which requires the Attorney General to develop, in cooperation with the states, a national voluntary motor vehicle theft prevention program. The program will be implemented by states and localities, at their sole option.

(b) Under this program, individual motor vehicle owners voluntarily sign a consent form in which the owner

(1) Indicates that the identified vehicle is not normally operated under certain specified conditions and

(2) Agrees to display a program decal or license plate on the vehicle and to permit law enforcement officials in any jurisdiction to stop the motor vehicle if it is being operated under specified conditions and take reasonable steps to determine whether the vehicle is being operated by or with the permission of the owner.

(c) The regulations set forth in this part establish the conditions under which an owner may consent to having his or her vehicle stopped and the manner in which a State or locality may elect to participate.

§ 29.2 Definitions.

For the purposes of this part:

(a) *The Act* or *the MVTPA* means the Motor Vehicle Theft Prevention Act.

(b) *Owner* means the person or persons whose name(s) appear(s) on the certificate of title or to whom the car is registered. In the instance of a new vehicle awaiting sale or lease or in the instance of a used vehicle where the title has been assigned to a dealership, the term ''owner'' shall be construed to mean new and used automobile dealerships.

(c) *The Program* refers to the National Voluntary Motor Vehicle Theft Prevention Program implemented pursuant to the Motor Vehicle Prevention Act.

§ 29.3 Administration by the Bureau of Justice Assistance.

The Director of the Bureau of Justice Assistance shall administer this Program and shall issue guidelines governing the operational aspects of it, including the design and production of a standardized, universally recognizable MVTPA reflective decal, as well as model consent and registration forms.

§ 29.4 Election to participate by states and localities.

(a) Any State or locality that wishes to participate in the program shall register with the BJA and request program enrollment materials. Registration forms will be available upon request. Participation in the program is wholly voluntary on the part of the State or locality.

(b) By electing to participate in the program, a State or locality agrees to do the following:

(1) Make program enrollment materials, including consent forms, available to interested motor vehicle owners;

(2) Collect completed consent forms;

(3) Provide enrolled motor vehicle owners with the decal(s), and license plate(s) applicable to their program condition or conditions and instructions governing program participation;

(4) Take the necessary steps to authorize law enforcement officials to stop motor vehicles enrolled in the program; and

(5) Comply with any other regulation(s) or guideline(s) governing participation in this program.

§ 29.5 Notification of law enforcement officials.

In addition to the actions enumerated in § 29.4(b), as a condition of participating in the program, a State or locality must agree to take reasonable steps to ensure that law enforcement officials under its jurisdiction are familiar with the program and with the conditions under which motor vehicles may be stopped.

§ 29.6 Limited participation by states and localities permitted.

A State or locality need not authorize the stopping of motor vehicles under all sets of conditions specified under the program in order to participate in the program.

§ 29.7 Withdrawal from the program by states and localities.

Any participating State or locality may withdraw from the program at any time by sending written notification to BJA and by notifying participating owners individually by mail of the decision to withdraw.

§ 29.8 Motor vehicle owner participation.

In order to participate in this program, the owner(s) of a motor vehicle must sign a program consent form and register with a participating State or locality. If the vehicle is registered to more than one person, both owners must sign the consent form. By enrolling in the federal program, the owner(s) of the motor vehicle—

(a) State(s) that the vehicle is not normally operated under the specified conditions; and

(b) Agree(s) to:

(1) Display the program decals or devices on the owner's vehicle;

(2) Permit law enforcement officials in any State or locality to stop the motor vehicle if the vehicle is being operated under the specified conditions and take reasonable steps to determine whether the vehicle is being operated by or with the permission of the owner;

(3) Expressly advise any borrower of the vehicle of the existence of this agreement, and that such user will be subject to being stopped by law enforcement officials if the vehicle is being operated under the specified condition(s) even if the officials have no other basis for believing the vehicle is being operated unlawfully; and

(4) Comply with any other regulation(s) or guideline(s) governing participation in this program.

§ 29.9 Motor vehicles for hire.

(a) Any person who is in the business of renting or leasing motor vehicles and who rents or leases a motor vehicle on which a program decal or device is affixed shall notify the person to whom the motor vehicle is rented or leased about the program, prior to transferring possession of the vehicle.

(b) The notice required by this section shall be printed in bold type in the rental or lease agreement, and on the envelope in which the rental agreement is placed. The notice provision in the rental or lease agreement must utilize a larger font than the standard type in the agreement. The notice must state that the motor vehicle may be stopped by law enforcement officials if it is operated under the conditions specified by the program in which the car is enrolled even if the officials have no

other basis for believing that the vehicle is being operated unlawfully.

(c) Failure to provide the notice required by this section to a renter or lessee may result in the assessment of a civil penalty by the Assistant Attorney General, Civil Division, or his or her designee, of an amount not to exceed $5,000. No penalty shall be assessed unless the person charged has been given notice and an opportunity for a hearing of such charge.

§ 29.10 Owner withdrawal from the program.

An owner may withdraw from the program at any time by completely removing the program decal and changing the license plate if necessary. The owner is also encouraged to notify the participating agency in writing of such withdrawal.

§ 29.11 Sale or other transfer of an enrolled vehicle.

Upon the transferral of ownership of an enrolled vehicle, the transferring owner must completely remove the program decals, change the license plate(s) if necessary, and is encouraged to notify the participating agency in writing of the transfer of ownership of the vehicle.

§ 29.12 Specified conditions under which stops may be authorized.

A motor vehicle owner may voluntarily enroll his or her vehicle(s) and give written consent to law enforcement official to stop the vehicle if it is being operated under any or all the conditions set forth in this section. For each condition, the owner(s) must grant consent and affix a separate decal, device, or license plate.

(a) *Time.* A motor vehicle owner may authorize law enforcement officers to stop the enrolled vehicle if it is being operated between the hours of 1:00 AM and 5:00 AM. By enrolling in a program with this condition, the owner must state that the vehicle is not normally operated between the specified hours, and that the owner understands that the operation of the vehicle between those hours provides sufficient grounds for a law enforcement officer to reasonably believe that the vehicle is not being operated by or with the consent of the owner, even if the law enforcement official has no other basis for believing that the vehicle is being operated unlawfully.

(b) *Border crossing or port entry.* A motor vehicle owner may authorize law enforcement officers to stop the enrolled vehicle if it crosses, is about to cross or is about to be transported across a United States land border, or if it enters a United States port. For purposes of this section, the phrase ''about to cross a United States land border'' means the vehicle is operated or transported within one mile of a United States land border. Participating States or localities may implement this provision in accordance with local conditions, provided that a participating State or locality may not extend the applicable geographic area beyond one mile from the United States land border. By enrolling in a program with this condition, the owner must state that the vehicle is not normally driven across a border or into a port, and that the owner understands that the operation or transport of the vehicle within a mile of a United States land border or into a port provides sufficient grounds for a law enforcement officer to believe that the vehicle is not being operated by or with the consent of the owner even if the law enforcement officer has no other basis for believing that the vehicle is being operated unlawfully.

§ 29.13 No new conditions without consent.

After the program has begun, new conditions under which a vehicle may be stopped may only be added to an existing program if the owner consents to the new condition or conditions.

PART 30—INTERGOVERNMENTAL REVIEW OF DEPARTMENT OF JUSTICE PROGRAMS AND ACTIVITIES

Sec.

30.1 What is the purpose of these regulations?
30.2 What definitions apply to these regulations?
30.3 What programs and activities of the Department are subject to these regulations?

30.4 What are the Attorney General's general responsibilities under the Order?
30.5 What is the Attorney General's obligation with respect to Federal interagency coordination?
30.6 What procedures apply to the selection of programs and activities under these regulations?
30.7 How does the Attorney General communicate with state and local officials concerning the Department's programs and activities?
30.8 How does the Attorney General provide an opportunity to comment on proposed Federal financial assistance and direct Federal development?
30.9 How does the Attorney General receive and respond to comments?
30.10 How does the Attorney General make efforts to accommodate intergovernmental concerns?
30.11 What are the Attorney General's obligations in interstate situations?
30.12 How may a state simplify, consolidate, or substitute federally required state plans?
30.13 May the Attorney General waive any provision of these regulations?

AUTHORITY: Executive Order 12372, July 14, 1982 (47 FR 30959), as amended April 8, 1983 (48 FR 15887); Sec. 401 of the Intergovernmental Cooperation Act of 1968 as amended (31 U.S.C. 6506); Sec. 204 of the Demonstration Cities and Metropolitan Development Act of 1966 as amended (42 U.S.C. 3334).

SOURCE: Order No. 1018–83, 48 FR 29246, June 24, 1983, unless otherwise noted.

§ 30.1 What is the purpose of these regulations?

(a) The regulations in this part implement Executive Order 12372, ''Intergovernmental Review of Federal Programs,'' issued July 14, 1982 and amended on April 8, 1983. These regulations also implement applicable provisions of section 401 of the Intergovernmental Cooperation Act of 1968 and section 204 of the Demonstration Cities and Metropolitan Development Act of 1966.

(b) These regulations are intended to foster an intergovernmental partnership and a strengthened Federalism by relying on state processes and on state, areawide, regional, and local coordination for review of proposed federal financial assistance and direct federal development.

(c) These regulations are intended to aid the internal management of the Department, and are not intended to create any right or benefit enforceable at law by a party against the Department or its officers.

§ 30.2 What definitions apply to these regulations?

Department means the U.S. Department of Justice.

Order means Executive Order 12372, issued July 14, 1982, and amended April 8, 1983 and titled ''Intergovernmental Review of Federal Programs.''

Attorney General means the Attorney General or an official or employee of the Department acting for the Attorney General under a delegation of authority.

State means any of the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, Guam, American Samoa, the U.S. Virgin Islands, or the Trust Territory of the Pacific Islands.

§ 30.3 What programs and activities of the Department are subject to these regulations?

The Attorney General publishes in the FEDERAL REGISTER a list of the Department's programs and activities that are subject to these regulations and identifies which of these are subject to the requirements of section 204 of the Demonstration Cities and Metropolitan Development Act.

§ 30.4 What are the Attorney General's general responsibilities under the Order?

(a) The Attorney General provides opportunities for consultation by elected officials of those state and local governments that would provide the non-federal funds for, or that would be directly affected by, proposed federal financial assistance from, or direct federal development by, the Department.

(b) If a state adopts a process under the Order to review and coordinate proposed federal financial assistance and direct federal development, the Attorney General, to the extent permitted by law:

(1) Uses the state process to determine official views of state and local elected officials;

(2) Communicates with state and local elected officials as early in a program planning cycle as is reasonably

feasible to explain specific plans and actions;

(3) Makes efforts to accommodate state and local elected officials' concerns with proposed federal financial assistance and direct federal development that are communicated through the state process;

(4) Allows the states to simplify and consolidate existing federally required state plan submissions;

(5) Where state planning and budgeting systems are sufficient and where permitted by law, encourages the substitution of state plans for federally required state plans;

(6) Seeks the coordination of views of affected state and local elected officials in one state with those of another state when proposed federal financial assistance or direct federal development has an impact on interstate metropolitan urban centers or other interstate areas; and

(7) Support state and local governments by discouraging the reauthorization or creations of any planning organization which is federally-funded, which has a limited purpose, and which is not adequately representative of, or accountable to, state or local elected officials.

(c) In considering comments received under these regulations, the Attorney General considers the objectives set forth in 31 U.S.C. 6506(b).

§ 30.5 What is the Attorney General's obligation with respect to Federal interagency coordination?

The Attorney General, to the extent practicable, consults with and seeks advice from all other substantially affected federal departments and agencies in an effort to assure full coordination between such agencies and the Department regarding programs and activities covered under these regulations.

§ 30.6 What procedures apply to the selection of programs and activities under these regulations?

(a) A state may select any program or activity published in the FEDERAL REGISTER in accordance with § 30.3 of this part for intergovernmental review under these regulations. Each state, before selecting programs and activities, shall consult with local elected officials.

(b) Each state that adopts a process shall notify the Attorney General of the Department's programs and activities selected for that process.

(c) A state may notify the Attorney General of changes in its selections at any time. For each change, the state shall submit to the Attorney General an assurance that the state has consulted with local elected officials regarding the change. The Department may establish deadlines by which states are required to inform the Attorney General of changes in their program selections.

(d) The Attorney General uses a State's process as soon as feasible, depending on individual programs and activities, after the Attorney General is notified of its selections.

§ 30.7 How does the Attorney General communicate with state and local officials concerning the Department's programs and activities?

(a) For those programs and activities covered by a state process under § 30.6, the Attorney General, to the extent permitted by law:

(1) Uses the state process to determine views of state and local elected officials; and

(2) Communicates with state and local elected officials, through the state process, as early in a program planning cycle as is reasonably feasible to explain specific plans and actions.

(b) The Attorney General provides notice to directly affected state, areawide, regional, and local entities in a state or proposed federal financial assistance or direct federal development if:

(1) The state has not adopted a process under the Order; or

(2) The assistance or development involves a program or activity not selected for the state process.

This notice may be made by publication in the FEDERAL REGISTER or other means which the Department in its discretion deems appropriate.

§ 30.8 How does the Attorney General provide an opportunity to comment on proposed Federal financial assistance and direct Federal development?

(a) Except in unusual circumstances, the Attorney General gives state processes or directly affected state, areawide, regional, and local officials and entities:

(1) At least 30 days from the date established by the Attorney General to comment on proposed federal financial assistance in the form of noncompeting continuation awards; and

(2) At least 60 days from the date established by the Attorney General to comment on proposed direct federal development or federal financial assistance other than noncompeting continuation awards.

(b) This section also applies to comments in cases in which the review, coordination, and communication with the Department have been delegated.

(c) Applicants for programs and activities subject to section 204 of the Demonstration Cities and Metropolitan Act shall allow areawide agencies a 60-day opportunity for review and comments.

§ 30.9 How does the Attorney General receive and respond to comments?

(a) The Attorney General follows the procedures in § 30.10 if:

(1) A state office or official is designated to act as a single point of contact between a state process and all federal agencies; and

(2) That office or official transmits a state process recommendation for a program selected under § 30.6.

(b)(1) The single point of contact is not obligated to transmit comments from state, areawide, regional, or local officials and entities where there is no state process recommendation.

(2) If a state process recommendation is transmitted by a single point of contact, all comments from state, areawide, regional, and local officials and entities that differ from it must also be transmitted.

(c) If a state has not established a process, or is unable to submit a state process recommendation, state, areawide, regional, and local officials and entities may submit comments either to the applicant or to the Department.

(d) If a program or activity is not selected for a state process, state, areawide, regional, and local officials and entities may submit comments either to the applicant or to the Department. In addition, if a state process recommendation for a nonselected program or activity is transmitted to the Department by the single point of contact, the Attorney General follows the procedures of § 30.10 of this part.

(e) The Attorney General considers comments which do not constitute a state process recommendation submitted under these regulations and for which the Attorney General is not required to apply the procedures of § 30.10 of this part, when such comments are provided by a single point of contact, by the applicant, or directly to the Department by a commenting party.

§ 30.10 How does the Attorney General make efforts to accommodate intergovernmental concerns?

(a) If a state process provides a state process recommendation to the Department through its single point of contact, the Attorney General either:

(1) Accepts the recommendation;

(2) Reaches a mutually agreeable solution with the state process; or

(3) Provides the single point of contact with a written explanation of the decision, in such form as the Attorney General in his or her discretion deems appropriate. The Attorney General may also supplement the written explanation by providing the explanation to the single point of contact by telephone, other telecommunication, or other means.

(b) In any explanation under paragraph (a)(3) of this section, the Attorney General informs the single point of contact that:

(1) The Department will not implement its decision for at least ten days after the single point of contact receives the explanation; or

(2) The Attorney General has reviewed the decision and determined that, because of unusual circumstances, the waiting period of at least ten days is not feasible.

(c) For purposes of computing the waiting period under paragraph (b)(1)

of this section, a single point of contact is presumed to have received written notification five days after the date of mailing of such notification.

§ 30.11 What are the Attorney General's obligations in interstate situations?

(a) The Attorney General is responsible for:

(1) Identifying proposed federal financial assistance and direct federal development that have an impact on interstate areas;

(2) Notifying appropriate officials and entities in states which have adopted a process and which select the Department's program or activity;

(3) Making efforts to identify and notify the affected state, areawide, regional, and local officials and entities in those states that have not adopted a process under the Order or do not select the Department's program or activity; and

(4) Responding pursuant to §30.10 if the Attorney General receives a recommendation from a designated areawide agency transmitted by a single point of contact in cases in which the review, coordination, and communication with the Department have been delegated.

(b) The Attorney General uses the procedures in §30.10 if a state process provides a state process recommendation to the Department through a single point of contact.

§ 30.12 How may a state simplify, consolidate, or substitute federally required state plans?

(a) As used in this section:

(1) *Simplify* means that a state may develop its own format, choose its own submission date, and select the planning period for a state plan.

(2) *Consolidate* means that a state may meet statutory and regulatory requirements by combining two or more plans into one document and that the state can select the format, submission date, and planning period for the consolidated plan.

(3) *Substitute* means that a state may use a plan or other document that it has developed for its own purposes to meet federal requirements.

(b) If not inconsistent with law, a state may decide to try to simplify, consolidate, or substitute federally required state plans without prior approval by the Attorney General.

(c) The Attorney General reviews each state plan that a state has simplified, consolidated, or substituted and accepts the plan only if its contents meet federal requirements.

§ 30.13 May the Attorney General waive any provision of these regulations?

In an emergency, the Attorney General may waive any provision of these regulations.

PART 31—OJJDP GRANT PROGRAMS

Subpart A—Formula Grants

GENERAL PROVISIONS

Sec.
31.1 General.
31.2 Statutory authority.
31.3 Formula grant plan and applications.

ELIGIBLE APPLICANTS

31.100 Eligibility.
31.101 Designation of State agency.
31.102 State agency structure.
31.103 Membership of supervisory board.

GENERAL REQUIREMENTS

31.200 General.
31.201 Audit.
31.202 Civil rights.
31.203 Open meetings and public access to records.

JUVENILE JUSTICE ACT REQUIREMENTS

31.300 General.
31.301 Funding.
31.302 Applicant State agency.
31.303 Substantive requirements.
31.304 Definitions.

GENERAL CONDITIONS AND ASSURANCES

31.400 Compliance with statute.
31.401 Compliance with other Federal laws, orders, circulars.
31.402 Application on file.
31.403 Civil rights requirements.
31.404 Participation by faith-based organizations.

Subpart B—Juvenile Accountability Incentive Block Grants

31.500 Program purposes
31.501 Eligible applicants
31.502 Assurances and plan information
31.503 Notice of proposed use of funds

AUTHORITY: 42 U.S.C 5601 through 5785; Pub. L. 108–7, 117 Stat. 11; 5 U.S.C. 301.

SOURCE: 60 FR 28440, May 31, 1995, unless otherwise noted.

Subpart A—Formula Grants

GENERAL PROVISIONS

§ 31.1 General.

This subpart defines eligibility and sets forth requirements for application for and administration of formula grants to State governments authorized by part B, subpart I, of the Juvenile Justice and Delinquency Prevention Act.

[60 FR 28440, May 31, 1995, as amended at 64 FR 19676, Apr. 21, 1999]

§ 31.2 Statutory authority.

The Statute establishing the Office of Juvenile Justice and Delinquency Prevention and giving authority to make grants for juvenile justice and delinquency prevention improvement programs is the *Juvenile Justice and Delinquency Prevention Act of 1974*, as amended (42 U.S.C. 5601 *et seq.*).

§ 31.3 Formula grant plan and applications.

Formula Grant Applications for each Fiscal Year should be submitted to OJJDP by August 1st (60 days prior to the beginning of the fiscal year) or within 60 days after the States are officially notified of the fiscal year formula grant allocations. Beginning with FY 1995 and each subsequent fiscal year, all Formula Grant Applications are due no later than March 31 of the fiscal year for which the funds are allocated.

ELIGIBLE APPLICANTS

§ 31.100 Eligibility.

All States as defined by section 103(7) of the JJDP Act.

§ 31.101 Designation of State agency.

The Chief Executive of each State which chooses to apply for a formula grant shall establish or designate a State agency as the sole agency for supervising the preparation and administration of the plan. The plan must demonstrate compliance with administrative and supervisory board membership requirements established by the OJJDP Administrator pursuant to section 299 (c) of the JJDP Act. States must have available for review a copy of the State law or executive order establishing the State agency and its authority.

§ 31.102 State agency structure.

The State agency may be a discrete unit of State government or a division or other component of an existing State crime commission, planning agency or other appropriate unit of State government. Details of organization and structure are matters of State discretion, provided that the agency:

(a) Is a definable entity in the executive branch with the requisite authority to carry out the responsibilities imposed by the JJDP Act;

(b) Has a supervisory board (i.e., a board of directors, commission, committee, council, or other policy board) which has responsibility for supervising the preparation and administration of the plan and its implementation; and

(c) Has sufficient staff and staff capability to carry out the board's policies and the agency's duties and responsibilities to administer the program, develop the plan, process applications, administer grants awarded under the plan, monitor and evaluate programs and projects, provide administration/support services, and perform such accountability functions as are necessary to the administration of Federal funds, such as grant close-out and audit of subgrant and contract funds. At a minimum, one full-time Juvenile Justice Specialist must be assigned to the Formula Grants Program by the State agency. Where the State does not currently provide or maintain a full-time Juvenile Justice Specialist, the plan must clearly establish and document that the program and administrative support staff resources currently assigned to the program will temporarily meet the adequate staff requirement, and provide an assurance that at least one full-time Juvenile Justice Specialist will be assigned to the Formula Grants Program by the end of FY 1995 (September 30, 1995).

§ 31.103 Membership of supervisory board.

The State advisory group appointed under section 223(a)(3) may operate as the supervisory board for the State agency, at the discretion of the Governor. Where, however, a State has continuously maintained a broad-based law enforcement and criminal justice supervisory board (council) meeting all the requirements of section 402(b)(2) of the Justice System Improvement Act of 1979, and wishes to maintain such a board, such composition shall continue to be acceptable provided that the board's membership includes the chairman and at least two additional citizen members of the State advisory group. For purposes of this requirement a citizen member is defined as any person who is not a full-time government employee or elected official. Any executive committee of such a board must include the same proportion of juvenile justice advisory group members as are included in the total board membership. Any other proposed supervisory board membership is subject to case by case review and approval of the OJJDP Administrator and will require, at a minimum, ''balanced representation'' of juvenile justice interests.

GENERAL REQUIREMENTS

§ 31.200 General.

This subpart sets forth general requirements applicable to formula grant recipients under the JJDP Act of 1974, as amended. Applicants must assure compliance or submit necessary information on these requirements.

[60 FR 28440, May 31, 1995, as amended at 64 FR 19676, Apr. 21, 1999]

§ 31.201 Audit.

The State must assure that it adheres to the audit requirements enumerated in the ''Financial and Administrative Guide for Grants, Guide Manual 7100.1 (current edition). Chapter 8 of the Manual contains a comprehensive statement of audit policies and requirements relative to grantees and subgrantees.

§ 31.202 Civil rights.

(a) To carry out the State's Federal civil rights responsibilities the plan must:

(1) Designate a civil rights contact person who has lead responsibility in insuring that all applicable civil rights requirements, assurances, and conditions are met and who shall act as liaison in all civil rights matters with OJJDP and the OJP Office of Civil Rights Compliance (OCRC); and

(2) Provide the Council's Equal Employment Opportunity Program (EEOP), if required to maintain one under 28 CFR 42.301, *et seq.*, where the application is for $500,000 or more.

(b) The application must provide assurance that the State will:

(1) Require that every applicant required to formulate an EEOP in accordance with 28 CFR 42.201 *et seq.*, submit a certification to the State that it has a current EEOP on file, which meets the requirement therein;

(2) Require that every criminal or juvenile justice agency applying for a grant of $500,000 or more submit a copy of its EEOP (if required to maintain one under 28 CFR 42.301, *et seq.*) to OCRC at the time it submits its application to the State;

(3) Inform the public and subgrantees of affected persons' rights to file a complaint of discrimination with OCRC for investigation;

(4) Cooperate with OCRC during compliance reviews of recipients located within the State; and

(5) Comply, and that its subgrantees and contractors will comply with the requirement that, in the event that a Federal or State court or administrative agency makes a finding of discrimination of the basis of race, color, religion, national origin, or sex (after a due process hearing) against a State or a subgrantee or contractor, the affected recipient or contractor will forward a copy of the finding to OCRC.

§ 31.203 Open meetings and public access to records.

The State must assure that the State agency, its supervisory board established pursuant to section 299(c) and the State advisory group established pursuant to section 223(a)(3) will follow

applicable State open meeting and public access laws and regulations in the conduct of meetings and the maintenance of records relating to their functions.

JUVENILE JUSTICE ACT REQUIREMENTS

§ 31.300 General.

This subpart sets forth specific JJDP Act requirements for application and receipt of formula grants.

[60 FR 28440, May 31, 1995, as amended at 64 FR 19676, Apr. 21, 1999]

§ 31.301 Funding.

(a) *Allocation to States.* Funds shall be allocated annually among the States on the basis of relative population of persons under age eighteen. If the amount allocated for Title II (other than parts D and E) of the JJDP Act is less than $75 million, the amount allocated to each State will not be less than $325,000, nor more than $400,000, provided that no State receives less than its allocation for FY 1992. The territories will receive not less than $75,000 or more than $100,000. If the amount appropriated for Title II (other than parts D and E) is $75 million or more, the amount allocated for each State will be not less than $400,000, nor more than $600,000, provided that parts D and E have been funded in the full amounts authorized. For the Territories, the amount is fixed at $100,000. For each of FY's 1994 and 1995, the minimum allocation is established at $600,000 for States and $100,000 for Territories.

(b) *Funds for local use.* At least two-thirds of the formula grant application to the state (other than the section 222(d) State Advisory Group set aside) must be used for programs by local government, local private agencies, and eligible Indian tribes, unless the State applies for and is granted a waiver by the OJJDP. The proportion of pass-through funds to be made available to eligible Indian tribes shall be based upon that proportion of the state youth population under 18 years of age who reside in geographical areas where the tribes perform law enforcement functions. Pursuant to section 223(a)(5)(C) of the JJDP Act, each of the standards set forth in paragraphs (b)(1)(i) through (iii) of this section must be met in order to establish the eligibility of Indian tribes to receive pass through funds:

(1)(i) The tribal entity must be recognized by the Secretary of the Interior as an Indian tribe that performs law enforcement functions as defined in paragraph (b) (2) of this section.

(ii) The tribal entity must agree to attempt to comply with the requirements of section 223(a)(12)(A), (13), and (14) of the JJDP Act; and

(iii) The tribal entity must identify the juvenile justice needs to be served by these funds within the geographical area where the tribe performs law enforcement functions.

(2) *Law enforcement functions* are deemed to include those activities pertaining to the custody of children, including, but not limited to, police efforts to prevent, control, or reduce crime and delinquency or to apprehend criminal and delinquent offenders, and/or activities of adult and juvenile corrections, probation, or parole authorities.

(3) To carry out this requirement, OJJDP will annually provide each state with the most recent Bureau of Census statistics on the number of persons under age 18 living within the state, and the number of persons under age 18 who reside in geographical areas where Indian tribes perform law enforcement functions.

(4) Pass-through funds available to tribal entities under section 223(a)(5)(C) shall be made available within states to Indian tribes, combinations of Indian tribes, or to an organization or organizations designated by such tribe(s), that meet the standards set forth in paragraphs (b)(1)(i)–(iii) of this section. Where the relative number of persons under age 18 within a geographic area where an Indian tribe performs law enforcement functions is too small to warrant an individual subgrant or subgrants, the state may, after consultation with the eligible tribe(s), make pass-through funds available to a combination of eligible tribes within the state, or to an organization or organizations designated by and representing a group of qualifying tribes, or target the funds on the larger tribal jurisdictions within the state.

(5) Consistent with section 223(a)(4) of the JJDP Act, the state must provide for consultation with Indian tribes or a combination of eligible tribes within the state, or an organization or organizations designated by qualifying tribes, in the development of a state plan which adequately takes into account the juvenile justice needs and requests of those Indian tribes within the state.

(c) *Match.* Formula grants under the JJDP Act shall be 100% of approved costs, with the exception of planning and administration funds, which require a 100 percent cash match (dollar for dollar), and construction projects funded under section 299C(a)(2) which also require a 100 percent cash match.

(d) *Funds for administration.* Not more than ten percent of the total annual Formula Grant award may be utilized to develop the annual juvenile justice plan and pay for administrative expenses, including project monitoring. These funds are to be matched on a dollar for dollar basis. The State shall make available needed funds for planning and administration to units of local government on an equitable basis. Each annual application must identify uses of such funds.

(e) *Nonparticipating States.* Pursuant to section 223(d), the OJJDP Administrator shall endeavor to make the fund allotment under section 222(a), of a State which chooses not to participate or loses its eligibility to participate in the formula grant program, directly available to local public and private nonprofit agencies within the nonparticipating State. The funds may be used only for the purpose(s) of achieving deinstitutionalization of status offenders and nonoffenders, separation of juveniles from incarcerated adults, removal of juveniles from adult jails and lockups, and reducing the disproportionate confinement of minority youth in secure facilities. Absent a request for extension which demonstrates compelling circumstances justifying the reallocation of formula grant funds back to the State to which the funds were initially allocated, or the proceedings under section 223(d), formula grant funds allocated to a State which has failed to submit an application, plan, or monitoring data establishing its eligibility for the funds will, beginning with FY 1995 be reallocated to the nonparticipating State program on September 30 of the fiscal year for which the funds were appropriated. Reallocated funds will be competitively awarded to eligible recipients pursuant to program announcements published in the FEDERAL REGISTER.

§ 31.302 Applicant State agency.

(a) Pursuant to section 223(a)(1), section 223(a)(2) and section 299(c) of the JJDP Act, the State must assure that the State agency approved under section 299(c) has been designated as the sole agency for supervising the preparation and administration of the plan and has the authority to implement the plan.

(b) *Advisory group.* Pursuant to section 223(a)(3) of the JJDP Act, the Chief Executive:

(1) Shall establish an advisory group pursuant to section 223(a)(3) of the JJDP Act. The State shall provide a list of all current advisory group members, indicating their respective dates of appointment and how each member meets the membership requirements specified in this section of the Act.

(2) Should consider, in meeting the statutory membership requirements of section 223(A)(3) (A)–(E), appointing at least one member who represents each of the following: A locally elected official representing general purpose local government; a law enforcement officer; representatives of juvenile justice agencies, including a juvenile or family court judge, a probation officer, a prosecutor, and a person who routinely provides legal representation to youth in juvenile court; a public agency representative concerned with delinquency prevention and treatment; a representative from a private, nonprofit organization, such as a parents group, concerned with teenage drug and alcohol abuse; a high school principal; a recreation director; a volunteer who works with delinquent or at risk youth; a person with a special focus on the family; a youth worker experienced with programs that offer alternatives to incarceration; persons with special competence in addressing programs of school violence and vandalism and alternatives to expulsion and suspension; and persons with knowledge concerning

learning disabilities, child abuse, neglect, and youth violence.

(c) The State shall assure that it complies with the Advisory Group financial support requirement of section 222(d) and the composition and function requirements of section 223(a)(3) of the JJDP Act.

§ 31.303 Substantive requirements.

(a) *Assurances.* The State must certify through the provision of assurances that it has complied and will comply (as appropriate) with sections 223(a)(1), (2), (3), (4), (5), (6), (7), (8), (9), (10), (11), (16), (17), (18), (19), (20), (21), (22), and (25), and sections 229 and 261(d), in formulating and implementing the State plan. The Formula Grant Application kit provides a form and guidance for the provision of assurances. OJJDP interprets the section 223(a)(16) assurance as satisfied by an affirmation that State law and/or policy clearly require equitable treatment on the required bases; or by providing in the State plan that the State agency will require an assurance of equitable treatment by all Formula Grant subgrant and contract recipients, and establish as a program goal, in conjunction with the State Advisory Group, the adoption and implementation of a statewide juvenile justice policy that all youth in the juvenile justice system will be treated equitably without regard to gender, race, family income, and mentally, emotionally, or physically handicapping conditions. OJJDP interprets the section 223(a)(25) assurance as satisfied by a provision in the State plan for the State agency and the State Advisory Group to promulgate policies and budget priorities that require the funding of programs that are part of a comprehensive and coordinated community system of services as set forth in section 103(19) of the JJDP Act. This requirement is applicable when a State's formula grant for any fiscal year exceeds 105 percent of the State's formula grant for FY 1992.

(b) *Serious juvenile offender emphasis.* Pursuant to sections 101(a)(10) and 223(a)(10) of the JJDP Act, OJJDP encourages States that have identified serious and violent juvenile offenders as a priority problem to allocate formula grant funds to programs designed for serious and violent juvenile offenders at a level consistent with the extent of the problem as identified through the State planning process. Particular attention should be given to improving prosecution, sentencing procedures, providing resources necessary for effective rehabilitation, and facilitating the coordination of services between the juvenile justice and criminal justice systems.

(c) *Deinstitutionalization of status offenders and non-offenders.* Pursuant to section 223(a)(12)(A) of the JJDP Act, the State shall:

(1) Describe its plan, procedure, and timetable covering the three-year planning cycle, for assuring that the requirements of this section are met. Refer to § 31.303(f)(3) for the rules related to the valid court order exception to this Act requirement.

(2) Describe the barriers the State faces in achieving full compliance with the provisions of this requirement.

(3) *Federal wards.* Apply this requirement to alien juveniles under Federal jurisdiction who are held in State or local facilities.

(4) *DSO compliance.* Those States which, based upon the most recently submitted monitoring report, have been found to be in full compliance with section 223(a)(12)(A) may, in lieu of addressing paragraphs (c)(1) and (2) of this section, provide an assurance that adequate plans and resources are available to maintain full compliance.

(5) Submit the report required under section 223(a)(12)(B) of the Act as part of the annual monitoring report required by section 223(a)(15) of the Act.

(d) *Contact with incarcerated adults.* (1) Pursuant to section 223(a)(13) of the JJDP Act the State shall:

(i) *Separation.* Describe its plan and procedure, covering the three-year planning cycle, for assuring that the requirements of this section are met. The term *contact* includes any physical or sustained sight or sound contact between juvenile offenders in a secure custody status and incarcerated adults, including inmate trustees. A juvenile offender in a secure custody status is one who is physically detained or confined in a locked room or other area set aside or used for the specific purpose of securely detaining persons who are in

law enforcement custody. Secure detention or confinement may result either from being placed in such a room or area and/or from being physically secured to a cuffing rail or other stationary object. Sight contact is defined as clear visual contact between incarcerated adults and juveniles within close proximity to each other. Sound contact is defined as direct oral communication between incarcerated adults and juvenile offenders. Separation must be accomplished architecturally or through policies and procedures in all secure areas of the facility which include, but are not limited to, such areas as admissions, sleeping, and shower and toilet areas. Brief and inadvertent or accidental contact between juvenile offenders in a secure custody status and incarcerated adults in secure areas of a facility that are not dedicated to use by juvenile offenders and which are nonresidential, which may include dining, recreational, educational, vocational, health care, sally ports or other entry areas, and passageways (hallways), would not require a facility or the State to document or report such contact as a violation. However, any contact in a dedicated juvenile area, including any residential area of a secure facility, between juveniles in a secure custody status and incarcerated adults would be a reportable violation.

(ii) In those instances where accused juvenile criminal-type offenders are authorized to be temporarily detained in facilities where adults are confined, the State must set forth the procedures for assuring no sight or sound contact between such juveniles and confined adults.

(iii) Describe the barriers which may hinder the separation of alleged or adjudicated criminal type offenders, status offenders and non-offenders from incarcerated adults in any particular jail, lockup, detention or correctional facility.

(iv) Those States which, based upon the most recently submitted monitoring report, have been found to be in compliance with section 223(a)(13) may, in lieu of addressing paragraphs (d)(1)(i), (ii), and (iii) of this section, provide an assurance that adequate plans and resources are available to maintain compliance.

(v) Assure that adjudicated delinquents are not reclassified administratively and transferred to an adult (criminal) correctional authority to avoid the intent of separating juveniles from adult criminals in jails or correctional facilities. A State is not prohibited from placing or transferring an alleged or adjudicated delinquent who reaches the State's age of full criminal responsibility to an adult facility when required or authorized by State law. However, the administrative transfer, without statutory direction or authorization, of a juvenile offender to an adult correctional authority, or a transfer within a mixed juvenile and adult facility for placement with adult criminals, either before or after a juvenile reaches the age of full criminal responsibility, is prohibited. A State is also precluded from transferring adult offenders to a juvenile correctional authority for placement in a juvenile facility. This neither prohibits nor restricts the waiver or transfer of a juvenile to criminal court for prosecution, in accordance with State law, for a criminal felony violation, nor the detention or confinement of a waived or transferred criminal felony violator in an adult facility.

(2) *Implementation.* The requirement of this provision is to be planned and implemented immediately by each State.

(e) *Removal of juveniles from adult jails and lockups.* Pursuant to section 223(a)(14)of the JJDP Act, the State shall:

(1) Describe its plan, procedure, and timetable for assuring that requirements of this section will be met beginning after December 8, 1985. Refer to §31.303(f)(4) to determine the regulatory exception to this requirement.

(2) Describe the barriers that a State faces in removing all juveniles from adult jails and lockups. This requirement excepts only those alleged or adjudicated juvenile delinquents placed in a jail or a lockup for up to six hours from the time they enter a secure custody status or immediately before or after a court appearance, those juveniles formally waived or transferred to criminal court and against whom

criminal felony charges have been filed, or juveniles over whom a criminal court has original or concurrent jurisdiction and such court's jurisdiction has been invoked through the filing of criminal felony charges.

(3) *Collocated facilities.* (i) Determine whether or not a facility in which juveniles are detained or confined is an adult jail or lockup. The JJDP Act prohibits the secure custody of juveniles in adult jails and lockups, except as otherwise provided under the Act and implementing OJJDP regulations. Juvenile facilities collocated with adult facilities are considered adult jails or lockups absent compliance with criteria established in paragraphs (e)(3)(i)(C)(*1*) through (*4*) of this section.

(A) A collocated facility is a juvenile facility located in the same building as an adult jail or lockup, or is part of a related complex of buildings located on the same grounds as an adult jail or lockup. A complex of buildings is considered ''related'' when it shares physical features such as walls and fences, or services beyond mechanical services (heating, air conditioning, water and sewer), or the specialized services that are allowable under paragraph (e)(3)(i)(C)(*3*) of this section.

(B) The State must determine whether a collocated facility qualifies as a separate juvenile detention facility under the four criteria set forth in paragraphs (e)(3)(i)(C) (*1*) through (*4*) of this section for the purpose of monitoring compliance with section 223(a)(12)(A), (13) and (14) of the JJDP Act.

(C) Each of the following four criteria must be met in order to ensure the requisite separateness of a juvenile detention facility that is collocated with an adult jail or lockup:

(*1*) Separation between juveniles and adults such that there could be no sustained sight or sound contact between juveniles and incarcerated adults in the facility. Separation can be achieved architecturally or through time-phasing of common use nonresidential areas; and

(*2*) Separate juvenile and adult programs, including recreation, education, vocation, counseling, dining, sleeping, and general living activities. There must be an independent and comprehensive operational plan for the juvenile detention facility which provides for a full range of separate program services. No program activities may be shared by juveniles and incarcerated adults. Time-phasing of common use nonresidential areas is permissible to conduct program activities. Equipment and other resources may be used by both populations subject to security concerns; and

(*3*) Separate staff for the juvenile and adult populations, including management, security, and direct care staff. Staff providing specialized services (medical care, food service, laundry, maintenance and engineering, etc.) who are not normally in contact with detainees, or whose infrequent contacts occur under conditions of separation of juveniles and adults, can serve both populations (subject to State standards or licensing requirements). The day to day management, security and direct care functions of the juvenile detention center must be vested in a totally separate staff, dedicated solely to the juvenile population within the collocated facilities; and

(*4*) In States that have established standards or licensing requirements for juvenile detention facilities, the juvenile facility must meet the standards (on the same basis as a free-standing juvenile detention center) and be licensed as appropriate. If there are no State standards or licensing requirements, OJJDP encourages States to establish administrative requirements that authorize the State to review the facility's physical plant, staffing patterns, and programs in order to approve the collocated facility based on prevailing national juvenile detention standards.

(ii) The State must determine that the four criteria are fully met. It is incumbent upon the State to make the determination through an on-site facility (or full construction and operations plan) review and, through the exercise of its oversight responsibility, to ensure that the separate character of the juvenile detention facility is maintained by continuing to fully meet the four criteria set forth in paragraphs (e)(3)(i)(C) (*1*) through (*4*) of this section.

(iii) Collocated juvenile detention facilities approved by the State and concurred with by OJJDP before December 10, 1996 may be reviewed by the State against the regulatory criteria and OJJDP policies in effect at the time of the initial approval and concurrence or against the regulatory criteria set forth herein, as the State determines. Facilities approved on or after the effective date of this regulation shall be reviewed against the regulatory criteria set forth herein. All collocated facilities are subject to the separate staff requirement established by the 1992 Amendments to the JJDP Act, and set forth in paragraph (e)(3)(i)(C)(*3*) of this section.

(iv) An annual on-site review of the facility must be conducted by the compliance monitoring staff person(s) representing or employed by the State agency administering the JJDP Act Formula Grants Program. The purpose of the annual review is to determine if compliance with the criteria set forth in paragraphs (e)(3)(i)(C) (*1*) through (*4*) of this section is being maintained.

(4) Those States which, based upon the most recently submitted monitoring report, have been found to be in full compliance with section 223(a)(14) may, in lieu of addressing paragraphs (e) (1) and (2) of this section, provide an assurance that adequate plans and resources are available to maintain full compliance.

(f) *Monitoring of jails, detention facilities and correctional facilities.* (1) Pursuant to section 223(a)(15) of the JJDP Act, and except as provided by paragraph (f)(7) of this section, the State shall:

(i) Describe its plan, procedure, and timetable for annually monitoring jails, lockups, detention facilities, correctional facilities and non-secure facilities. The plan must at a minimum describe in detail each of the following tasks including the identification of the specific agency(s) responsible for each task.

(A) *Identification of monitoring universe:* This refers to the identification of all residential facilities which might hold juveniles pursuant to public authority and thus must be classified to determine if it should be included in the monitoring effort. This includes those facilities owned or operated by public and private agencies.

(B) *Classification of the monitoring universe:* This is the classification of all facilities to determine which ones should be considered as a secure detention or correctional facility, adult correctional institution, jail, lockup, or other type of secure or nonsecure facility.

(C) *Inspection of facilities:* Inspection of facilities is necessary to ensure an accurate assessment of each facility's classification and record keeping. The inspection must include:

(*1*) A review of the physical accommodations to determine whether it is a secure or non-secure facility or whether adequate sight and sound separation between juvenile and adult offenders exists and

(*2*) A review of the record keeping system to determine whether sufficient data are maintained to determine compliance with section 223(a) (12), (13) and/or (14).

(D) *Data collection and data verification:* This is the actual collection and reporting of data to determine whether the facility is in compliance with the applicable requirement(s) of section 223(a) (12), (13) and/or (14). The length of the reporting period should be 12 months of data, but in no case less than 6 months. If the data is self-reported by the facility or is collected and reported by an agency other than the State agency designated pursuant to section 223(a)(1) of the JJDP Act, the plan must describe a statistically valid procedure used to verify the reported data.

(ii) Provide a description of the barriers which the State faces in implementing and maintaining a monitoring system to report the level of compliance with section 223(a) (12), (13), and (14) and how it plans to overcome such barriers.

(iii) Describe procedures established for receiving, investigating, and reporting complaints of violation of section 223(a) (12), (13), and (14). This should include both legislative and administrative procedures and sanctions.

(2) For the purpose of monitoring for compliance with section 223(a)(12)(A) of the Act, a secure detention or correctional facility is any secure public or

private facility used for the lawful custody of accused or adjudicated juvenile offenders or nonoffenders, or used for the lawful custody of accused or convicted adult criminal offenders. Accused status offenders or nonoffenders in lawful custody can be held in a secure juvenile detention facility for up to twenty-four hours, exclusive of weekends and holidays, prior to an initial court appearance and for an additional twenty-four hours, exclusive of weekends and holidays, following an initial court appearance.

(3) *Valid court order.* For the purpose of determining whether a valid court order exists and a juvenile has been found to be in violation of that valid order all of the following conditions must be present prior to secure incarceration:

(i) The juvenile must have been brought into a court of competent jurisdiction and made subject to an order issued pursuant to proper authority. The order must be one which regulates future conduct of the juvenile. Prior to issuance of the order, the juvenile must have received the full due process rights guaranteed by the Constitution of the United States.

(ii) The court must have entered a judgment and/or remedy in accord with established legal principles based on the facts after a hearing which observes proper procedures.

(iii) The juvenile in question must have received adequate and fair warning of the consequences of violation of the order at the time it was issued and such warning must be provided to the juvenile and to the juvenile's attorney and/or legal guardian in writing and be reflected In the court record and proceedings.

(iv) All judicial proceedings related to an alleged violation of a valid court order must be held before a court of competent jurisdiction. A juvenile accused of violating a valid court order may be held in secure detention beyond the 24-hour grace period permitted for a noncriminal juvenile offender under OJJDP monitoring policy, for protective purposes as prescribed by State law, or to assure the juvenile's appearance at the violation hearing, as provided by State law, if there has been a judicial determination based on a hearing during the 24-hour grace period that there is probable cause to believe the juvenile violated the court order. In such case the juveniles may be held pending a violation hearing for such period of time as is provided by State law, but in no event should detention prior to a violation hearing exceed 72 hours exclusive of nonjudicial days. A juvenile alleged or found in a violation hearing to have violated a Valid Court Order may be held only in a secure juvenile detention or correctional facility, and not in an adult jail or lockup.

(v) Prior to and during the violation hearing the following full due process rights must be provided:

(A) The right to have the charges against the juvenile in writing served upon him a reasonable time before the hearing;

(B) The right to a hearing before a court;

(C) The right to an explanation of the nature and consequences of the proceeding;

(D) The right to legal counsel, and the right to have such counsel appointed by the court if indigent;

(E) The right to confront witnesses;

(F) The right to present witnesses;

(G) The right to have a transcript or record of the proceedings; and

(H) The right of appeal to an appropriate court.

(vi) In entering any order that directs or authorizes the placement of a status offender in a secure facility, the judge presiding over an initial probable cause hearing or violation hearing must determine that all the elements of a valid court order (paragraphs (f)(3)(i), (ii) and (iii) of this section) and the applicable due process rights (paragraph (f)(3)(v) of this section) were afforded the juvenile and, in the case of a violation hearing, the judge must obtain and review a written report that: reviews the behavior of the juvenile and the circumstances under which the juvenile was brought before the court and made subject to such order; determines the reasons for the juvenile's behavior; and determines whether all dispositions other than secure confinement have been exhausted or are clearly inappropriate. This report must be

prepared and submitted by an appropriate public agency (other than a court or law enforcement agency).

(vii) A non-offender such as a dependent or neglected child cannot be placed in secure detention or correctional facilities for violating a valid court order.

(4) *Removal exception (section 223(a)(14))*. The following conditions must be met in order for an accused juvenile criminal-type offender, awaiting an initial court appearance, to be detained up to 24 hours (excluding weekends and holidays) in an adult jail or lockup:

(i) The State must have an enforceable State law requiring an initial court appearance within 24 hours after being taken into custody (excluding weekends and holidays);

(ii) The geographic area having jurisdiction over the juvenile is outside a metropolitan statistical area pursuant to the Bureau of Census' current designation;

(iii) A determination must be made that there is no existing acceptable alternative placement for the juvenile pursuant to criteria developed by the State and approved by OJJDP;

(iv) The adult jail or lockup must have been certified by the State to provide for the sight and sound separation of juveniles and incarcerated adults;

(v) The State must provide documentation that the conditions in paragraphs(f)(4)(i) through (iv) of this section have been met and received prior approval from OJJDP. OJJDP strongly recommends that jails and lockups that incarcerate juveniles be required to provide youth specific admissions screening and continuous visual supervision of juveniles incarcerated pursuant to this exception; and

(vi) Pursuant to section 223(a)(14) of the JJDP Act, the nonMSA (low population density) exception to the jail and lockup removal requirement as described in paragraphs (f)(4) (i) through (v) of this section shall remain in effect through 1997, and shall allow for secure custody beyond the twenty-four hour period described in paragraph (f)(4)(i) of this section when the facility is located where conditions of distance to be traveled or the lack of highway, road, or other ground transportation do not allow for court appearances within twenty-four hours, so that a brief (not to exceed an additional forty-eight hours) delay is excusable; or the facility is located where conditions of safety exist (such as severely adverse, life-threatening weather conditions that do not allow for reasonably safe travel), in which case the time for an appearance may be delayed until twenty-four hours after the time that such conditions allow for reasonably safe travel. States may use these additional statutory allowances only where the precedent requirements set forth in paragraphs (f)(4) (i) through (v) of this section have been complied with. This may necessitate statutory or judicial (court rule or opinion) relief within the State from the twenty-four hour initial court appearance standard required by paragraph (f)(4)(i) of this section.

(5) *Reporting requirement*. The State shall report annually to the Administrator of OJJDP on the results of monitoring for section 223(a)(12),(13), and (14) of the JJDP Act. The reporting period should provide 12 months of data, but shall not be less than six months. The report shall be submitted to the Administrator of OJJDP by December 31 of each year.

(i) To demonstrate the extent of compliance with section 223(a)(12)(A) of the JJDP Act, the report must include, at a minimum, the following information for the current reporting period:

(A) Dates covered by the current reporting period;

(B) Total number of public and private secure detention and correctional facilities, the total number reporting, and the number inspected on-site;

(C) The total number of accused status offenders and nonoffenders, including out-of-State runaways and Federal wards, held in any secure detention or correctional facility for longer than twenty-four hours (not including weekends or holidays), excluding those held pursuant to the valid court order provision as set forth in paragraph (f)(3) of this section or pursuant to section 922(x) of title 18, United States Code (which prohibits the possession of a handgun by a juvenile), or a similar State law. A juvenile who violates this

statute, or a similar state law, is excepted from the deinstitutionalization of status offenders requirement;

(D) The total number of accused status offenders (including valid court order violators, out of state runaways, and Federal wards, but excluding Title 18 922(x) violators) and nonoffenders securely detained in any adult jail, lockup, or nonapproved collocated facility for any length of time;

(E) The total number of adjudicated status offenders and nonoffenders, including out-of-state runaways and Federal wards, held for any length of time in a secure detention or correctional facility, excluding those held pursuant to the valid court order provision or pursuant to title 18 U.S.C. section 922(x);

(F) The total number of status offenders held in any secure detention or correctional facility pursuant to the valid court order provision set forth in paragraph (f)(3) of this section; and

(G) The total number of juvenile offenders held pursuant to title 18 U.S.C. section 922(x).

(ii) To demonstrate the extent to which the provisions of section 223(a)(12)(B) of the JJDP Act are being met, the report must include the total number of accused and adjudicated status offenders and nonoffenders placed in facilities that are:

(A) Not near their home community;

(B) Not the least restrictive appropriate alternative; and

(C) Not community-based.

(iii) To demonstrate the extent of compliance with section 223(a)(13) of the JJDP Act, the report must include, at a minimum, the following information for the current reporting period:

(A) Dates covered by the current reporting period;

(B) The total number of facilities used to detain or confine both juvenile offenders and adult criminal offenders during the past 12 months and the number inspected on-site;

(C) The total number of facilities used for secure detention and confinement of both juvenile offenders and adult criminal offenders which did not provide sight and sound separation;

(D) The total number of juvenile offenders and nonoffenders not separated from adult criminal offenders in facilities used for the secure detention and confinement of both juveniles and adults;

(E) The total number of State approved juvenile detention centers located within the same building or on the same grounds as an adult jail or lockup, including a list of such facilities;

(F) The total number of juveniles detained in State approved collocated facilities that were not separated from the management, security or direct care staff of the adult jail or lockup;

(G) The total number of juvenile detention centers located within the same building or on the same grounds as an adult jail or lockup that have not been approved by the State, including a list of such facilities; and

(H) The total number of juveniles detained in collocated facilities not approved by the State that were not sight and sound separated from adult criminal offenders.

(iv) To demonstrate the extent of compliance with section 223(a)(14) of the JJDP Act, the report must include, at a minimum, the following information for the current reporting period:

(A) Dates covered by the current reporting period;

(B) The total number of adult jails in the State AND the number inspected on-site;

(C) The total number of adult lockups in the State AND the number inspected on-site;

(D) The total number of adult jails holding juveniles during the past twelve months;

(E) The total number of adult lockups holding juveniles during the past twelve months;

(F) The total number of accused juvenile criminal-type offenders held securely in adult jails, lockups, and unapproved collocated facilities in excess of six hours, including those held pursuant to the ''removal exception'' as set forth in paragraph (f)(4) of this section;

(G) The total number of accused juvenile criminal-type offenders held securely in adult jails, lockups and unapproved collocated facilities for less than six hours for purposes other than identification, investigations, processing, release to parent(s), transfer to

court, or transfer to a juvenile facility following initial custody;

(H) The total number of adjudicated juvenile criminal-type offenders held securely in adult jails or lockups and unapproved collocated facilities in excess of six hours prior to or following a court appearance or for any length of time not related to a court appearance;

(I) The total number of accused and adjudicated status offenders (including valid court order violators) and nonoffenders held securely in adult jails, lockups and unapproved collocated facilities for any length of time;

(J) The total number of adult jails, lockups, and unapproved collocated facilities in areas meeting the ''removal exception'' as noted in paragraph (f)(4) of this section, including a list of such facilities and the county or jurisdiction in which each is located;

(K) The total number of juveniles accused of a criminal-type offense who were held in excess of six hours but less than 24 hours in adult jails, lockups and unapproved collocated facilities pursuant to the ''removal exception'' as set forth in paragraph (f)(4) of this section;

(L) The total number of juveniles accused of a criminal-type offense who were held in excess of 24 hours, but not more than an additional 48 hours, in adult jails, lockups and unapproved collocated facilities pursuant to the ''removal exception'' as noted in paragraph (f)(4) of this section, due to conditions of distance or lack of ground transportation; and

(M) The total number of juveniles accused of a criminal-type offense who were held in excess of 24 hours, but not more than an additional 24 hours after the time such conditions as adverse weather allow for reasonably safe travel, in adult jails, lockups and unapproved collocated facilities, in areas meeting the ''removal exception'' as noted in paragraph (f)(4) of this section.

(6) *Compliance.* The State must demonstrate the extent to which the requirements of sections 223(a)(12)(A), (13), (14), and (23) of the Act are met. If the State fails to demonstrate full compliance with sections 223(a)(12)(A) and (14), and compliance with sections 223(a)(13) and (23) by the end of the fiscal year for any fiscal year beginning with fiscal year 1994, the State's allotment under section 222 will be reduced by twenty five percent for each such failure, provided that the State will lose its eligibility for any allotment unless: the State agrees to expend all remaining funds (except planning and administration, State advisory group set-aside funds and Indian tribe pass-through funds) for the purpose of achieving compliance with the mandate(s) for which the State is in noncompliance; or the Administrator makes discretionary determination that the State has substantially complied with the mandate(s) for which there is noncompliance and that the State has made through appropriate executive or legislative action, an unequivocal commitment to achieving full compliance within a reasonable time. In order for a determination to be made that a State has substantially complied with the mandate(s), the State must demonstrate that it has: Diligently carried out the plan approved by OJJDP; demonstrated significant progress toward full compliance; submitted a plan based on an assessment of current barriers to DMC; and provided an assurance that added resources will be expended, be it formula grants or other funds, to achieve compliance. Where a State's allocation is reduced, the amount available for planning and administration and the required pass-through allocation, other than State advisory group set-aside, will be reduced because they are based on the reduced allocation.

(i) Full compliance with section 223(a)(12)(A) is achieved when a State has removed 100 percent of status offenders and nonoffenders from secure detention and correctional facilities or can demonstrate full compliance with de minimis exceptions pursuant to the policy criteria contained in the FEDERAL REGISTER of January 9, 1981 (copies are available from the Office of General Counsel, Office of Justice Programs, 633 Indiana Ave. NW., Washington, DC 20531).

(ii) Compliance with section 223(a)(13) has been achieved when a State can demonstrate that:

(A) The last submitted monitoring report, covering a full 12 months of

data, demonstrates that no juveniles were incarcerated in circumstances that were in violation of section 223(a)(13); or

(B)(*1*) The instances of noncompliance reported in the last submitted monthly report do not indicate a pattern or practice but rather constitute isolated instances; and

(*2*)(*i*) Where all instances of noncompliance reported were in violation of or departure from State law, rule, or policy that clearly prohibits the incarceration of all juvenile offenders in circumstances that would be in violation of section 223(a)(13), existing enforcement mechanisms are such that the instances of noncompliance are unlikely to recur in the future; or

(*ii*) An acceptable plan has been developed to eliminate the noncompliant incidents.

(iii)(A) Full compliance is achieved when a state demonstrates that the last submitted monitoring report, covering 12 months of actual data, demonstrates that no juveniles were held in adult jails or lockups in circumstances that were in violation of section 223(a)(14).

(B) Full compliance with de minimis exceptions is achieved when a State demonstrates that it has met the standard set forth in either of paragraphs (f)(6)(iii)(B) (*1*) or (*2*) of this section:

(*1*) *Substantive de minimis standard*. To comply with this standard the State must demonstrate that each of the following requirements have been met:

(*i*) State law, court rule, or other statewide executive or judicial policy clearly prohibits the detention or confinement of all juveniles in circumstances that would be in violation of section 223(a)(14);

(*ii*) All instances of noncompliance reported in the last submitted monitoring reported were in violation of or departures from, the State law, rule, or policy referred to in paragraph (f)(6)(iii)(B)(*1*)(*i*) of this section;

(*iii*) The instances of noncompliance do not indicate a pattern or practice but rather constitute isolated instances;

(*iv*) Existing mechanisms for the enforcement of the State law, rule or policy referred to in paragraph (f)(6)(iii)(B)(*1*)(*i*) of this section are such that the instances of noncompliance are unlikely to recur in the future; and

(*v*) An acceptable plan has been developed to eliminate the noncompliant incidents and to monitor the existing mechanism referred to in paragraph (f)(6)(iii)(B)(*1*)(*iv*) of this section.

(*2*) *Numerical de minimis standard*. To comply with this standard the State must demonstrate that each of the following requirements under paragraphs (f)(6)(iii)(B)(2) (*i*) and (*ii*) of this section have been met:

(*i*) The incidents of noncompliance reported in the State's last submitted monitoring report do not exceed an annual rate of 9 per 100,000 juvenile population of the State; and

(*ii*) An acceptable plan has been developed to eliminate the noncompliant incidents through the enactment or enforcement of State law, rule, or statewide executive or judicial policy, education, the provision of alternatives, or other effective means.

(*iii*) *Exception*. When the annual rate for a State exceeds 9 incidents of noncompliance per 100,000 juvenile population, the State will be considered ineligible for a finding of full compliance with de minimis exceptions under the numerical de minimis standard unless the State has recently enacted changes in State law which have gone into effect and which the State demonstrates can reasonably be expected to have a substantial, significant and positive impact on the state's achieving full (100%) compliance or full compliance with de minimis exceptions by the end of the monitoring period immediately following the monitoring period under consideration.

(*iv*) *Progress*. Beginning with the monitoring report due by December 31, 1990, any State whose prior full compliance status is based on having met the numerical de minimis standard set forth in paragraph (f)(6)(iii)(B)(*2*)(*i*) of this §31.303, must annually demonstrate, in its request for a finding of full compliance with de minimis exceptions, continued and meaningful progress toward achieving full (100%) compliance in order to maintain eligibility for a continued finding of full compliance with de minimis exceptions.

(*v*) *Request submission.* Determinations of full compliance and full compliance with de minimis exceptions are made annually by OJJDP following submission of the monitoring report due by December 31 of each calendar year. Any State reporting less than full (100%) compliance in any annual monitoring report may request a finding of full compliance with de minimis exceptions under paragraph (f)(6)(iii)(B) (*1*) or (*2*) of this section. The request may be submitted in conjunction with the monitoring report, as soon thereafter as all information required for a determination is available, or be included in the annual State plan and application for the State's formula grant award.

(C) *Waiver.* Failure to achieve full compliance as defined in this section shall terminate any State's eligibility for FY 1993 and prior year formula grant funds unless the Administrator of OJJDP waives termination of the State's eligibility. ln order to be eligible for this waiver of termination, a State must request a waiver and demonstrate that it meets the standards set forth in paragraphs (f)(6)(iii)(C) (1)–(7) of this section:

(*1*) Agrees to expend all of its formula grant award except planning and administration, advisory group set-aside, and Indian tribe pass-through funds, to achieve compliance with section 223(a)(14); and

(*2*) Removed all status and nonoffender juveniles from adult jails and lockups. Compliance with this standard requires that the last submitted monitoring report demonstrate that no status offender (including those accused of or adjudicated for violating a valid court order) or nonoffender juveniles were securely detained in adult jails or lock-ups for any length of time; or that all status offenders and nonoffenders securely detained in adult jails and lock-ups for any length of time were held in violation of an enforceable State law and did not constitute a pattern or practice within the State; and

(*3*) Made meaningful progress in removing juvenile criminal-type offenders from adult jails and lockups. Compliance with this standard requires the State to document a significant reduction in the number of jurisdictions securely detaining juvenile criminal-type offenders in violation of section 223 (a)(14) of the JJDP Act; or a significant reduction in the number of facilities securely detaining such juveniles; or a significant reduction in the average length of time each juvenile criminal-type offender is securely detained in an adult jail or lock-up; or State legislation has recently been enacted and taken effect and which the State demonstrates will significantly impact the secure detention of juvenile criminal-type offenders in adult jails and lockups; and

(*4*) Diligently carried out the State's jail and lockup removal plan approved by OJJDP. Compliance with this standard requires that actions have been undertaken to achieve the State's jail and lock-up removal goals and objectives within approved time lines, and that the State Advisory Group, required by section 223 (a)(3) of the JJDP Act, has maintained an appropriate involvement in developing and/or implementing the State's plan; and

(*5*) Submitted an acceptable plan, based on an assessment of current jail and lockup removal barriers within the State, to eliminate noncompliant incidents; and

(*6*) Achieved compliance with section 223(a)(15) of the JJDP Act; and

(*7*) Demonstrates an unequivocal commitment, through appropriate executive or legislative action, to achieving full compliance.

(D) *Waiver maximum.* A State may receive a waiver of termination of eligibility from the Administrator under paragraph (f)(6)(iii)(C) of this section for a combined maximum of four Formula Grant Awards through Fiscal Year 1993. No additional waivers will be granted.

(7) *Monitoring report exemption.* States which have been determined by the OJJDP Administrator to have achieved full compliance with sections 223(a)(12)(A), (a)(14), and compliance with section 223(a)(13) of the JJDP and wish to be exempted from the annual monitoring report requirements must submit a written request to the OJJDP Administrator which demonstrates that:

(i) The State provides for an adequate system of monitoring jails, law

enforcement lockup, detention facilities, to enable an annual determination of State compliance with sections 223(a)(12)(A), (13), and (14) of the JJDP Act;

(ii) State legislation has been enacted which conforms to the requirements of Sections 223(a)(12)(A), (13), and (14) of the JJDP Act; and

(iii) The enforcement of the legislation is statutorily or administratively prescribed, specifically providing that:

(A) Authority for enforcement of the statute is assigned;

(B) Time frames for monitoring compliance with the statute are specified; and

(C) Adequate procedures are set forth for enforcement of the statute and the imposition of sanctions for violations.

(g) *Juvenile crime analysis.* Pursuant to section 223(a)(8), the State must conduct an analysis of juvenile crime problems, including juvenile gangs that commit crimes, and juvenile justice and delinquency prevention needs within the State, including those geographical areas in which an Indian tribe performs law enforcement functions. The analysis and needs assessment must include educational needs, gender specific services, delinquency prevention and treatment services in rural areas, and mental health services available to juveniles in the juvenile justice system. The analysis should discuss barriers to accessing services and provide a plan to provide such services where needed.

(1) *Analysis.* The analysis must be provided in the multiyear application. A suggested format for the analysis is provided in the Formula Grant Application Kit.

(2) *Product.* The product of the analysis is a series of brief written problem statements set forth in the application that define and describe the priority problems.

(3) *Programs.* Applications are to include descriptions of programs to be supported with JJDP Act formula grant funds. A suggested format for these programs is included in the application kit.

(4) *Performance indicators.* A list of performance indicators must be developed and set forth for each program. These indicators show what data will be collected at the program level to measure whether objectives and performance goals have been achieved and should relate to the measures used in the problem statement and statement of program objectives.

(h) *Annual performance report.* Pursuant to section 223(a) and section 223(a)(22) the State plan shall provide for submission of an annual performance report. The State shall report on its progress in the implementation of the approved programs, described in the three-year plan. The performance indicators will serve as the objective criteria for a meaningful assessment of progress toward achievement of measurable goals. The annual performance report shall describe progress made in addressing the problem of serious juvenile crime, as documented in the juvenile crime analysis pursuant to section 223(a)(8)(A). The annual performance report must be submitted to OJJDP no later than June 30 and address all formula grant activities carried out during the previous complete calendar year, federal fiscal year, or State fiscal year for which information is available, regardless of which year's formula grant funds were used to support the activities being reported on, e.g., during a reporting period, activities may have been funded from two or more formula grant awards.

(i) *Technical assistance.* States shall include, within their plan, a description of technical assistance needs. Specific direction regarding the development and inclusion of all technical assistance needs and priorities will be provided in the ''Application Kit for Formula Grants under the JJDPA.''

(j) *Minority detention and confinement.* Pursuant to section 223(a)(23) of the JJDP Act, States must demonstrate specific efforts to reduce the proportion of juveniles detained or confined in secure detention facilities, secure correctional facilities, jails and lockups who are members of minority groups if such proportion exceeds the proportion such groups represent in the general population, viz., in most States, youth between ages ten-seventeen are subject to secure custody. It is essential that States approach this statutory mandate in a comprehensive manner. The purpose of the statute and

the regulation in this part is to encourage States to address, programmatically, any features of its justice system, and related laws and policies, that may account for the disproportionate detention or confinement of minority juveniles in secure detention facilities, secure correctional facilities, jails, and lockups. The disproportionate minority confinement core requirement neither establishes nor requires numerical standards or quotas in order for a State to achieve or maintain compliance. Compliance with this provision is achieved when a State meets the requirements set forth in paragraphs (j)(1) through (3) of this section:

(1) *Identification.* Provide quantifiable documentation (State, county and local level) in the State's FY 1994 Formula Grant Plan (and all subsequent Multi-Year Plans) Juvenile Crime Analysis and Needs Assessment to determine whether minority juveniles are disproportionately detained or confined in secure detention and correctional facilities, jails and lockups in relation to their proportion of the State juvenile population. Guidelines are provided in the OJJDP Disproportionate Minority Confinement Technical Assistance Manual (see Phase I Matrix). Where quantifiable documentation is not available to determine if disproportionate minority confinement exists in secure detention and correctional facilities, jails and lockups, the State must provide a time-limited plan of action, not to exceed six months, for developing and implementing a system for the ongoing collection, analysis and dissemination of information regarding minorities for those facilities where documentation does not exist.

(2) *Assessment.* Each State's FY 1994 Formula Grant Plan must provide a completed assessment of disproportionate minority confinement. Assessments must, at minimum, identify and explain differences in arrest, diversion and adjudication rates, court dispositions other than incarceration, the rates and periods of prehearing detention in and dispositional commitments to secure facilities of minority youth in the juvenile justice system, and transfers to adult court (see Phase II Matrix). If a completed assessment is not available, the State must submit a time-limited plan (not to exceed twelve months from submission of the Formula Grant Application) for completing the assessment.

(3) *Intervention.* Each State's FY 1995 Formula Grant Plan must, where disproportionate confinement has been demonstrated, provide a time-limited plan of action for reducing the disproportionate confinement of minority juveniles in secure facilities. The intervention plan shall be based on the results of the assessment, and must include, but not be limited to the following:

(i) *Diversion.* Increasing the availability and improving the quality of diversion programs for minorities who come in contact with the juvenile justice system, such as police diversion programs;

(ii) *Prevention.* Providing developmental, operational, and assessment assistance (financial and/or technical) for prevention programs in communities with a high percentage of minority residents with emphasis upon support for community-based organizations (including non-traditional organizations) that serve minority youth;

(iii) *Reintegration.* Providing developmental, operational, and assessment assistance (financial and/or technical) for programs designed to reduce recidivism by facilitating the reintegration of minority youth in the community following release from dispositional commitments to reduce recidivism;

(iv) *Policies and procedures.* Providing financial and/or technical assistance that addresses necessary changes in statewide and local, executive, judicial, and legal representation policies and procedures; and

(v) *Staffing and training.* Providing financial and/or technical assistance that addresses staffing and training needs that will positively impact the disproportionate confinement of minority youth in secure facilities.

(4) The time-limited plans of action set forth in paragraphs (j) (1), (2) and (3) of this section must include a clear indication of current and future barriers; which agencies, organizations, or individual(s) will be responsible for taking what specific actions; when; and

what the anticipated outcomes are. The interim and final outcomes from implementation of the time-limited plan of action must be reported in each State's Multi-Year Plans and Annual Plan Updates. Final outcomes for individual project awards are to be included with each State's annual performance report (See paragraph (h) of this section).

(5) Technical assistance is available through the OJJDP Technical Assistance Contract to help guide States with the data collection and analysis, and with programmatic elements of this requirement. Information from the OJJDP Special Emphasis Initiative on Disproportionate Minority Confinement pilot sites will be disseminated as it becomes available.

(6) For purposes of this statutory mandate, minority populations are defined as: African-Americans, American Indians, Asians, Pacific Islanders, and Hispanics.

(k) Pursuant to section 223(a)(24) of the JJDP Act, states shall agree to other terms and conditions as the Administrator may reasonably prescribe to assure the effectiveness of programs assisted under the Formula Grant.

[60 FR 28440, May 31, 1995, as amended at 61 FR 65138, Dec. 10, 1996]

§ 31.304 Definitions.

(a) *Private agency*. A private non-profit agency, organization or institution is:

(1) Any corporation, foundation, trust, association, cooperative, or accredited institution of higher education not under public supervision or control; and

(2) Any other agency, organization or institution which operates primarily for scientific, education, service, charitable, or similar public purposes, but which is not under public supervision or control, and no part of the net earnings of which inures or may lawfully inure to the benefit of any private shareholder or individual, and which has been held by IRS to be tax-exempt under the provisions of section 501(c)(3) of the 1954 Internal Revenue Code.

(b) *Secure*. As used to define a detention or correctional facility this term includes residential facilities which include construction features designed to physically restrict the movements and activities of persons in custody such as locked rooms and buildings, fences, or other physical structures. It does not include facilities where physical restriction of movement or activity is provided solely through facility staff.

(c) *Facility*. A place, an institution, a building or part thereof, set of buildings or an area whether or not enclosing a building or set of buildings which is used for the lawful custody and treatment of juveniles and may be owned and/or operated by public and private agencies.

(d) *Juvenile who is accused of having committed an offense*. A juvenile with respect to whom a petition has been filed In the juvenile court or other action has occurred alleging that such juvenile is a juvenile offender, i.e., a criminal-type offender or a status offender, and no final adjudication has been made by the juvenile court.

(e) *Juvenile who has been adjudicated as having committed an offense*. A juvenile with respect to whom the juvenile court has determined that such juvenile is a juvenile offender, i.e., a criminal-type offender or a status offender.

(f) *Juvenile offender*. An individual subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations by defined as State law, i.e., a criminal-type offender or a status offender.

(g) *Criminal-type offender*. A juvenile offender who has been charged with or adjudicated for conduct which would, under the law of the jurisdiction in which the offense was committed, be a crime if committed by an adult.

(h) *Status offender*. A juvenile offender who has been charged with or adjudicated for conduct which would not, under the law of the jurisdiction in which the offense was committed, be a crime if committed by an adult.

(i) *Non-offender*. A juvenile who is subject to the jurisdiction of the juvenile court, usually under abuse, dependency, or neglect statutes for reasons other than legally prohibited conduct of the juvenile.

(j) *Lawful custody.* The exercise of care, supervision and control over a juvenile offender or non-offender pursuant to the provisions of the law or of a judicial order or decree.

(k) *Other individual accused of having committed a criminal offense.* An individual, adult or juvenile, who has been charged with committing a criminal offense in a court exercising criminal jurisdiction.

(l) *Other individual convicted of a criminal offense.* An individual, adult or juvenile, who has been convicted of a criminal offense in court exercising criminal jurisdiction.

(m) *Adult jail.* A locked facility, administered by State, county or local law enforcement and correctional agencies, the purpose of which is to detain adults charged with violating criminal law, pending trial. Also considered as adult jails are those facilities used to hold convicted adult criminal offenders sentenced for less than one year.

(n) *Adult lockup.* Similar to an adult jail except that an adult lockup is generally a municipal or police facility of a temporary nature which does not hold persons after they have been formally charged.

(o) *Valid court order.* The term means a court order given by a juvenile court judge to a juvenile who has been brought before the court and made subject to a court order. The use of the word ''valid'' permits the incarceration of juveniles for violation of a valid court order only if they received their full due process rights as guaranteed by the Constitution of the United States.

(p) *Local private agency.* For the purposes of the pass-through requirement of section 223(a)(5), a local private agency is defined as a private non-profit agency or organization that provides program services within an identifiable unit or a combination of units of general local government.

GENERAL CONDITIONS AND ASSURANCES

§ 31.400 Compliance with statute.

The applicant State must assure and certify that the State and its subgrantees and contractors will comply with applicable provisions of the Omnibus Crime Control and Safe Streets Act of 1968, Pub. L. 90–351, as amended, and with the provisions of the Juvenile Justice and Delinquency Prevention Act of 1974, Pub. L. 93–415, as amended, and the provisions of the current edition of OJP Financial and Administrative Guide for Grants, M7100.1.

§ 31.401 Compliance with other Federal laws, orders, circulars.

The applicant State must further assure and certify that the State and its subgrantees and contractors will adhere to other applicable Federal laws, orders and OMB circulars. These general Federal laws and regulations are described in greater detail in the Financial and Administrative Guide for Grants, M7100.1, and the Formula Grant Application Kit.

§ 31.402 Application on file.

Any Federal funds awarded pursuant to an application must be distributed and expended pursuant to and in accordance with the programs contained in the applicant State's current approved application. Any departures therefrom, other than to the extent permitted by current program and fiscal regulations and guidelines, must be submitted for advance approval by the Administrator of OJJDP.

§ 31.403 Civil rights requirements.

The State assures that it will comply, and that subgrantees and contractors will comply, with all applicable Federal non-discrimination requirements, including:

(a) Section 809(c) of the Omnibus Crime Control and Safe Streets Act as 1968, as amended, and made applicable by section 299(A) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended;

(b) Title VI of the Civil Rights Act of 1964, as amended;

(c) Section 504 of the Rehabilitation Act of 1973, as amended;

(d) Title IX of the Education Amendments of 1972;

(e) The Age Discrimination Act of 1975;

(f) The Department of Justice Non-Discrimination regulations, 28 CFR part 42, subparts C, D, E, and G;

(g) The Department of Justice regulations on disability discrimination, 28 CFR parts 35 and 39; and

(h) Subtitle A, title II of the Americans with Disabilities Act (ADA) of 1990.

§ 31.404 Participation by faith-based organizations.

The funds provided under this part shall be administered in compliance with the standards set forth in part 38 (Equal Treatment for Faith-based Organizations) of this chapter.

[Order No. 2703–2004, 69 FR 2838, Jan. 21, 2004]

Subpart B—Juvenile Accountability Incentive Block Grants

SOURCE: 64 FR 19676, Apr. 21, 1999, unless otherwise noted.

§ 31.500 Program purposes.

Funds are available under the Juvenile Accountability Incentive Block Grants (JAIBG) in FY 1998, FY 1999, and each subsequent fiscal year as funds are made available, for State and local grants to support the following program purposes:

(a) *Program purpose no. 1:* Building, expanding, renovating, or operating temporary or permanent juvenile correction or detention facilities, including the training of correctional personnel;

(b) *Program purpose no. 2:* Developing and administering accountability-based sanctions for juvenile offenders;

(c) *Program purpose no. 3:* Hiring additional juvenile judges, probation officers, and court-appointed defenders, and funding pre-trial services for juveniles, to ensure the smooth and expeditious administration of the juvenile justice system;

(d) *Program purpose no. 4:* Hiring additional prosecutors, so that more cases involving violent juvenile offenders can be prosecuted and backlogs reduced;

(e) *Program purpose no. 5:* Providing funding to enable prosecutors to address drug, gang, and youth violence more effectively;

(f) *Program purpose no. 6:* Providing funding for technology, equipment, and training to assist prosecutors in identifying and expediting the prosecution of violent juvenile offenders;

(g) *Program purpose no. 7:* Providing funding to enable juvenile courts and juvenile probation offices to be more effective and efficient in holding juvenile offenders accountable and reducing recidivism;

(h) *Program purpose no. 8:* The establishment of court-based juvenile justice programs that target young firearms offenders through the establishment of juvenile gun courts for the adjudication and prosecution of juvenile firearms offenders;

(i) *Program purpose no. 9:* The establishment of drug court programs for juveniles so as to provide continuing judicial supervision over juvenile offenders with substance abuse problems and to provide the integrated administration of other sanctions and services;

(j) *Program purpose no. 10:* Establishing and maintaining interagency information sharing programs that enable the juvenile and criminal justice system, schools, and social services agencies to make more informed decisions regarding the early identification, control, supervision, and treatment of juveniles who repeatedly commit serious delinquent or criminal acts;

(k) *Program purpose no. 11:* Establishing and maintaining accountability-based programs that work with juvenile offenders who are referred by law enforcement agencies, or which are designed, in cooperation with law enforcement officials, to protect students and school personnel from drug, gang, and youth violence; and,

(l) *Program purpose no. 12:* Implementing a policy of controlled substance testing for appropriate categories of juveniles within the juvenile justice system.

§ 31.501 Eligible applicants.

(a) *Eligible applicants.* Eligible applicants in FY 1998, FY 1999, and each subsequent fiscal year as funds are made available, are States whose Governor (or other Chief Executive Officer for the eligible jurisdictions that are not one of the 50 States but defined as such for purposes of this program) certifies, consistent with guidelines established

by the Attorney General in consultation with Congress and incorporated into OJJDP's Program Guidance Manual, that the State is actively considering (or already has in place), or will consider within one year from the date of such certification, legislation, policies, or practices which, if enacted, would qualify the State for a grant. Specific information regarding qualifications can be found in the JAIBG Program Guidance Manual.

(b) *Qualifications.* Each State Chief Executive Officer must designate a state agency to apply for, receive, and administer JAIBG funds.

§ 31.502 Assurances and plan information.

(a) In its application for a Juvenile Accountability Incentive Block Grant (JAIBG), each State must provide assurances to the Office of Juvenile Justice and Delinquency Prevention (OJJDP), absent a waiver as provided in the JAIBG Program Guidance Manual, that:

(1) The State will subgrant at least 75% of the State's allocation of funds to eligible units of local government to implement authorized programs at the local level; and

(2) The State, and each unit of local government applying for a subgrant from the State, will expend not less than 45% of any grant provided to such State or unit of local government, other than funds set aside for administration, for program purposes 3–9 in § 31.500 (c) through (i) of this subpart, and will not spend less than 35% for program purposes 1, 2, and 10 in § 31.500 (a), (b), and (j) of this subpart, unless the State certifies to OJJDP, or the unit of local government certifies to the State, that the interests of public safety and juvenile crime control would be better served by expending the grant award for purposes set forth in the twelve program areas in a different ratio. Such certification shall provide information concerning the availability of existing structures or initiatives within the intended areas of expenditure (or the availability of alternative funding sources for those areas), and the reasons for the State or unit of local government's alternative use.

(3) The funds provided under this part shall be administered in compliance with the standards set forth in part 38 (Equal Treatment for Faith-based Organizations) of this chapter.

(b) Following award of JAIBG funds to a State by OJJDP, but prior to obligation of program funds by the State or of subgrant funds by a unit of local government for any authorized program purpose, a State administering JAIBG funds must provide to OJJDP information that demonstrates that the State, or a unit of local government that receives JAIBG funds, has established a coordinated enforcement plan for reducing juvenile crime, developed by a Juvenile Crime Enforcement Coalition (JCEC).

(c) State coordinated enforcement plans must be developed by a Juvenile Crime Enforcement Coalition consisting of representatives of law enforcement and social service agencies involved in juvenile crime prevention. To assist in developing the State's coordinated enforcement plan, States may choose to utilize members of the State Advisory Group (SAG) established by the State's Chief Executive under section 223(a)(3) of Part B of the Juvenile Justice and Delinquency Prevention (JJDP) Act of 1974, as amended, codified at 42 U.S.C. 5633(a)(3), if appropriate membership exists, or use or establish another planning group that constitutes a coalition of law enforcement and social service agencies.

(d) When establishing a local Juvenile Crime Enforcement Coalition (JCEC), units of local government must include, unless impracticable, individuals representing:

(1) Police,
(2) Sheriff,
(3) Prosecutor,
(4) State or local probation services,
(5) Juvenile court,
(6) Schools,
(7) Business, and
(8) Religious affiliated, fraternal, nonprofit, or social service organizations involved in crime prevention.

(e) Units of local government may utilize members of Prevention Policy Boards established pursuant to section 505(b)(4) of Title V of the JJDP Act, codified at 42 U.S.C. 5784(b)(4), to meet the JCEC requirement, provided that

each JCEC meets the membership requirements listed in paragraph (d) of this section.

[64 FR 19676, Apr. 21, 1999, as amended by Order No. 2703–2004, 69 FR 2838, Jan. 21, 2004]

§ 31.503 Notice of proposed use of funds.

The mechanism for a State to report on the proposed use of funds by the State or by a subgrantee unit of local government is by electronic submission of a ''Follow Up Information Form'' to be provided to each participating State. The purpose of this report is for the State to provide assurances to OJJDP that funds expended by the State and its subgrantee units of local government will be used for authorized program purpose areas. Although no actual program descriptions will be required, information about the distribution of funds among the authorized program purpose areas must be provided. Upon receipt and review of the ''Follow Up Information Form'' by OJJDP, States may obligate program funds retained for expenditure at the State level. Similarly, the State shall require that each recipient unit of local government submit its proposed use of non-administrative funds to the State prior to drawdown of subgrant funds to implement local programs and projects. Upon receipt and review of the local unit of government's proposed fund use, the State shall authorize the local unit of government to obligate local subgrant funds. The State shall electronically submit a copy of the local subgrant information to OJJDP, as provided in the award package, within 30 days of the date that the local unit of government is authorized to obligate program funds under its subgrant award.

PART 32—PUBLIC SAFETY OFFICERS' DEATH, DISABILITY, AND EDUCATIONAL ASSISTANCE BENEFIT CLAIMS

Sec.

32.0 Scope of part.

Subpart A—General Provisions

32.1 Scope of subpart.
32.2 Computation of time; filing.
32.3 Definitions.
32.4 Terms; construction, severability; effect.
32.5 Evidence.
32.6 Payment and repayment.
32.7 Fees for representative services.
32.8 Exhaustion of administrative remedies.

Subpart B—Death Benefit Claims

32.11 Scope of subpart.
32.12 Time for filing claim.
32.13 Definitions.
32.14 PSOB Office determination.
32.15 Prerequisite certification.
32.16 Payment.
32.17 Request for Hearing Officer determination.

Subpart C—Disability Benefit Claims

32.21 Scope of subpart.
32.22 Time for filing claim.
32.23 Definitions.
32.24 PSOB Office determination.
32.25 Prerequisite certification.
32.26 Payment.
32.27 Motion for reconsideration of negative disability finding.
32.28 Reconsideration of negative disability finding.
32.29 Request for Hearing Officer determination.

Subpart D—Educational Assistance Benefit Claims

32.31 Scope of subpart.
32.32 Time for filing claim.
32.33 Definitions.
32.34 PSOB Office determination.
32.35 Disqualification.
32.36 Payment and repayment.
32.37 Request for Hearing Officer determination.

Subpart E—Hearing Officer Determinations

32.41 Scope of subpart.
32.42 Time for filing request for determination.
32.43 Appointment and assignment of Hearing Officers.
32.44 Hearing Officer determination.
32.45 Hearings.
32.46 Director appeal.

Subpart F—Director Appeals and Reviews

32.51 Scope of subpart.
32.52 Time for filing Director appeal.
32.53 Review.
32.54 Director determination.
32.55 Judicial appeal.

AUTHORITY: 42 U.S.C. ch. 46, subch. XII; 42 U.S.C. 3782(a), 3787, 3788, 3791(a), 3793(a)(4) &(b), 3795a, 3796c–1, 3796c–2; sec. 1601, title XI,

Public Law 90–351, 82 Stat. 239; secs. 4 through 6, Public Law 94–430, 90 Stat. 1348; secs. 1 and 2, Public Law 107–37, 115 Stat. 219.

SOURCE: 71 FR 46037, Aug. 10, 2006, unless otherwise noted.

§ 32.0 Scope of part.

This part implements the Act, which, as a general matter, authorizes the payment of three different legal gratuities:

(a) Death benefits;

(b) Disability benefits; and

(c) Educational assistance benefits.

[73 FR 76528, Dec. 17, 2008]

Subpart A—General Provisions

§ 32.1 Scope of subpart.

This subpart contains provisions generally applicable to this part.

§ 32.2 Computation of time; filing.

(a) In computing any period of time prescribed or allowed, the day of the act, event, or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a federal legal holiday, or, when the act to be done is a filing with the PSOB Office, a day on which weather or other conditions have caused that Office to be closed or inaccessible, in which event the period runs until the end of the next day that is not one of the aforedescribed days.

(b) A filing is deemed filed with the PSOB Office, a Hearing Officer, the Director, or any other OJP office, -officer, -employee, or -agent, only on the day that it actually is received at the office of the same. When a filing is prescribed to be filed with more than one of the foregoing, it shall be deemed filed as of the day the last such one so receives it.

(c) Notice is served by the PSOB Office upon an individual on the day that it is—

(1) Mailed, by U.S. mail, addressed to the individual (or to his representative) at his (or his representative's) last address known to such Office;

(2) Delivered to a courier or other delivery service, addressed to the individual (or to his representative) at his (or his representative's) last address known to such Office; or

(3) Sent by electronic means such as telefacsimile or electronic mail, addressed to the individual (or to his representative) at his (or his representative's) last telefacsimile number or electronic-mail address, or other electronic address, known to such Office.

(d) In the event of withdrawal or abandonment of a filing, the time periods prescribed for the filing thereof shall not be tolled, unless, for good cause shown, the Director grants a waiver.

(e) No claim may be filed (or approved) under the Act, at 42 U.S.C. 3796(a) or (b), with respect to an injury, if a claim under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, has been approved, with respect to the same injury.

(f) No claim may be filed (or approved) under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, with respect to an injury, if a claim under the Act, at 42 U.S.C. 3796(a) or (b), has been approved, with respect to the same injury.

§ 32.3 Definitions.

Act means the Public Safety Officers' Benefits Act of 1976 (generally codified at 42 U.S.C. 3796, *et seq.;* part L of title I of the Omnibus Crime Control and Safe Streets Act of 1968) (including (uncodified) sections 4 through 6 thereof (payment in advance of appropriations, rule of construction and severability, and effective date and applicability)), as applicable (*cf.* § 32.4(d)) according to its effective date and those of its various amendments (*e.g.*, Sept. 29, 1976 (deaths of State and local law enforcement officers and firefighters); Jan. 1, 1978 (educational assistance (officer died)); Oct. 1, 1984 (deaths of federal law enforcement officers and firefighters); Oct. 18, 1986 (deaths of rescue squad and ambulance crew members); Nov. 29, 1990 (disabilities); Oct. 3, 1996 (educational assistance (officer disabled)); Oct. 30, 2000 (disaster relief workers); Sept. 11, 2001 (chaplains and insurance beneficiaries); Dec. 15, 2003 (certain heart attacks and strokes); and Apr. 5, 2006 (designated beneficiaries)); and also includes Public Law 107–37 and section 611 of the USA PATRIOT Act

(both of which relate to payment of benefits, described under subpart 1 of such part L, in connection, respectively, with the terrorist attacks of Sept. 11, 2001, or with such terrorist attacks as may occur after Oct. 26, 2001), as well as the proviso under the Public Safety Officers Benefits heading in title II of division B of section 6 of Public Law 110–161.

Adopted child—An individual is an adopted child of a public safety officer only if—

(1) The individual is legally adopted by the officer; or

(2) As of the injury date, and not being a stepchild, the individual was—

(i) Known by the officer not to be his biological first-generation offspring; and

(ii) After the officer obtained such knowledge, in a parent-child relationship with him.

Authorized commuting means travel (not being described in the Act, at 42 U.S.C. 3796a(1), and not being a frolic or a detour) by a public safety officer—

(1) In the course of actually responding (as authorized) to a fire-, rescue-, or police emergency, or to a particular and extraordinary request (by the public agency he serves) for that specific officer to perform public safety activity (including emergency response activity the agency is authorized to perform), within his line of duty; or

(2) Between home and work (at a situs (for the performance of line of duty activity or action) authorized or required by the public agency he serves), or between any such authorized or required situs and another—

(i) Using a vehicle provided by such agency, pursuant to a requirement or authorization by such agency that he use the same for commuting; or

(ii) Using a vehicle not provided by such agency, pursuant to a requirement by such agency that he use the same for work.

Biological means genetic, but does not include circumstances where the genetic donation (under the laws of the jurisdiction where the offspring is conceived) does not (as of the time of such conception) legally confer parental rights and obligations.

BJA means the Bureau of Justice Assistance, OJP.

Cause—A death, injury, or disability is caused by intentional misconduct if—

(1) The misconduct is a substantial factor in bringing it about; and

(2) It is a reasonably foreseeable result of the misconduct.

Certification means a formal assertion of a fact (or facts), in a writing that is—

(1) Expressly intended to be relied upon by the PSOB determining official in connection with the determination of a claim specifically identified therein;

(2) Expressly directed to the PSOB determining official;

(3) Legally subject to the provisions of 18 U.S.C. 1001 (false statements) and 1621 (perjury), and 28 U.S.C. 1746 (declarations under penalty of perjury), and expressly declares the same to be so;

(4) Executed by a natural person with knowledge of the fact (or facts) asserted and with legal authority to execute the writing (such as to make the assertion legally that of the certifying party), and expressly declares the same (as to knowledge and authority) to be so;

(5) In such form as the Director may prescribe from time to time;

(6) True, complete, and accurate (or, at a minimum, not known or believed by the PSOB determining official to contain any material falsehood, incompleteness, or inaccuracy); and

(7) Unambiguous, precise, and unequivocal, in the judgment of the PSOB determining official, as to any fact asserted, any matter otherwise certified, acknowledged, indicated, or declared, and any provision of this definition.

Certification described in the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, means a certification, acknowledging all the matter specified in § 32.5(f)(1) and (2)—

(1) In which the fact (or facts) asserted is the matter specified in § 32.5(f)(3);

(2) That expressly indicates that all of the terms used in making the assertion described in paragraph (1) of this definition (or used in connection with such assertion) are within the meaning of the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, and of this part; and

(3) That otherwise satisfies the provisions of the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, and of this part.

Chaplain means a clergyman, or other individual trained in pastoral counseling, who meets the definition provided in the Act, at 42 U.S.C. 3796b(2).

Child of a public safety officer means an individual—

(1) Who—

(i) Meets the definition provided in the Act, at 42 U.S.C. 3796b(3), in any claim—

(A) Arising from the public safety officer's death, in which the death was simultaneous (or practically simultaneous) with the injury; or

(B) Filed after the public safety officer's death, in which the claimant is the officer's—

(*1*) Biological child, born after the injury date;

(*2*) Adopted child, adopted by him after the injury date; or

(*3*) Stepchild, pursuant to a marriage entered into by him after the injury date; or

(ii) In any claim not described in paragraph (1)(i) of this definition—

(A) Meets (as of the injury date) the definition provided in the Act, at 42 U.S.C. 3796b(3), *mutatis mutandis* (*i.e.*, with ''deceased'' and ''death'' being substituted, respectively, by ''deceased or disabled'' and ''injury''); or

(B) Having been born after the injury date, is described in paragraph (1)(i)(B)(*1*), (*2*), or (*3*) of this definition; and

(2) With respect to whom the public safety officer's parental rights have not been terminated, as of the injury date.

Commonly accepted means generally agreed upon within the medical profession.

Consequences of an injury that permanently prevent an individual from performing any gainful work means an injury whose consequences permanently prevent an individual from performing any gainful work.

Convincing evidence means clear and convincing evidence.

Crime means an act or omission punishable as a criminal misdemeanor or felony.

Criminal laws means that body of law that declares what acts or omissions are crimes and prescribes the punishment that may be imposed for the same.

Department or agency—An entity is a department or agency within the meaning of the Act, at 42 U.S.C. 3796b(8), and this part, only if the entity is—

(1) A court;

(2) An agency described in the Act, at 42 U.S.C. 3796b(9)(B) or (C); or

(3) Otherwise a public entity—

(i) That is legally an express part of the internal organizational structure of the relevant government;

(ii) That has no legal existence independent of such government; and

(iii) Whose obligations, acts, omissions, officers, and employees are legally those of such government.

Determination means the approval or denial of a claim (including an affirmance or reversal pursuant to a motion for reconsideration under § 32.27), the determination described in the Act, at 42 U.S.C. 3796(c), or any recommendation under § 32.54(c)(3).

Director means the Director of BJA.

Direct and proximate cause—Except as may be provided in the Act, at 42 U.S.C. 3796(k), something directly and proximately causes a wound, condition, or cardiac-event, if it is a substantial factor in bringing the wound, condition, or cardiac-event about.

Direct and proximate result of an injury—Except as may be provided in the Act, at 42 U.S.C. 3796(k), a death or disability results directly and proximately from an injury if the injury is a substantial factor in bringing it about.

Disaster relief activity means activity or an action encompassed within the duties described in the Act, at 42 U.S.C. 3796b(9)(B) or (C).

Disaster relief worker means any individual who meets the definition provided in the Act, at 42 U.S.C. 3796b(9)(B) or (C).

Disturbance includes any significant and negative alteration, any significant negative deviation from the objectively normal, or any significant deterioration.

Divorce means a legally-valid divorce from the bond of wedlock (i.e., the bond

of marriage), except that, otherwise, and notwithstanding any other provision of law, a spouse (or purported spouse) of an individual shall be considered to be divorced from that individual within the meaning of this definition if, subsequent to his marriage (or purported marriage) to that individual (and while that individual is living), the spouse (or purported spouse)—

(1) Holds himself out as being divorced from, or not being married to, the individual;

(2) Holds himself out as being married to another individual; or

(3) Was a party to a ceremony purported by the parties thereto to be a marriage between the spouse (or purported spouse) and another individual.

Drugs or other substances means controlled substances within the meaning of the drug control and enforcement laws, at 21 U.S.C. 802(6).

Educational/academic institution means an institution whose primary purpose is educational or academic learning.

Eligible payee means—

(1) An individual (other than the officer) described in the Act, at 42 U.S.C. 3796(a), with respect to a claim under subpart B of this part; or

(2) An individual described in the Act, at 42 U.S.C. 3796(b), with respect to a claim under subpart C of this part.

Emergency medical services means—

(1) Provision of first-response emergency medical care (other than in a permanent medical-care facility); or

(2) Transportation of persons in medical distress (or under emergency conditions) to medical-care facilities.

Emergency response activity means response to a fire-, rescue-, or police emergency.

Employed by a public agency—A public safety officer is employed, within the meaning of the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, by a public agency, when he—

(1) Is employed by the agency in a civilian capacity; and

(2) Is—

(i) Serving the agency in an official capacity (with respect to officers of any kind but disaster relief workers); or

(ii) Performing official duties as described in the Act, at 42 U.S.C. 3796b(9)(B) or (C) (with respect to disaster relief workers).

Employee does not include—

(1) Any independent contractor; or

(2) Any individual who is not eligible to receive death or disability benefits from the purported employer on the same basis as a regular employee of such employer would.

Employment in a civilian capacity refers to status as a civilian, rather than to the performance of civilian functions.

Filing means any claim, request, motion, election, petition, or appeal, and any item or matter (*e.g.*, evidence, certifications, authorizations, waivers, legal arguments, or lists) that is, or may be, filed with the PSOB Office.

Fire protection means—

(1) Suppression of fire;

(2) Hazardous-material response; or

(3) Emergency medical services or rescue activity of the kind performed by firefighters.

Fire-, rescue-, or police emergency includes disaster-relief emergency.

Firefighter means an individual who—

(1) Is trained in—

(i) Suppression of fire; or

(ii) Hazardous-material response; and

(2) Has the legal authority and responsibility to engage in the suppression of fire, as—

(i) An employee of the public agency he serves, which legally recognizes him to have such (or, at a minimum, does not deny (or has not denied) him to have such); or

(ii) An individual otherwise included within the definition provided in the Act, at 42 U.S.C. 3796b(4).

Functionally within or -part of—No individual shall be understood to be functionally within or -part of a public agency solely by virtue of an independent contractor relationship.

Gross negligence means great, heedless, wanton, indifferent, or reckless departure from ordinary care, prudence, diligence, or safe practice—

(1) In the presence of serious risks that are known or obvious;

(2) Under circumstances where it is highly likely that serious harm will follow; or

(3) In situations where a high degree of danger is apparent.

Hazardous-material response means emergency response to the threatened or actual release of hazardous materials, where life, property, or the environment is at significant risk.

Heart attack means—

(1) A myocardial infarction; or

(2) A cardiac-event (i.e., cessation, interruption, arrest, or other similar disturbance of heart function), not included in paragraph (1) of this definition, that is—

(i) Acute; and

(ii) Directly and proximately caused by a pathology (or pathological condition) of the heart or of the coronary arteries.

Illegitimate child—An individual is an illegitimate child of a public safety officer only if he is a natural child of the officer, and the officer is not married to the other biological parent at (or at any time after) the time of his conception.

Incapable of self-support because of physical or mental disability—An individual is incapable of self-support because of physical or mental disability if he is under a disability within the meaning of the Social Security Act, at 42 U.S.C. 423(d)(1)(A), applicable *mutatis mutandis*.

Independent contractor includes any volunteer, servant, employee, contractor, or agent, of an independent contractor.

Injury means a traumatic physical wound (or a traumatized physical condition of the body) directly and proximately caused by external force (such as bullets, explosives, sharp instruments, blunt objects, or physical blows), chemicals, electricity, climatic conditions, infectious disease, radiation, virii, or bacteria, but does not include—

(1) Any occupational disease; or

(2) Any condition of the body caused or occasioned by stress or strain.

Injury date—Except with respect to claims under the Act, at 42 U.S.C. 3796(k) (where, for purposes of determining beneficiaries under the Act, at 42 U.S.C. 3796(a), it generally means the time of the heart attack or stroke referred to in the Act, at 42 U.S.C. 3796(k)(2)), injury date means the time of the line of duty injury that—

(1) Directly and proximately results in the public safety officer's death, with respect to a claim under—

(i) Subpart B of this part; or

(ii) Subpart D of this part, by virtue of his death; or

(2) Directly (or directly and proximately) results in the public safety officer's total and permanent disability, with respect to a claim under—

(i) Subpart C of this part; or

(ii) Subpart D of this part, by virtue of his disability.

Instrumentality means entity, and does not include any individual, except that no entity shall be considered an instrumentality within the meaning of the Act, at 42 U.S.C. 3796b(8), or this part, unless, as of the injury date,

(1) The entity—

(i) Is legally established, -recognized, or -organized, such that it has legal existence; and

(ii) Is so organized and controlled, and its affairs so conducted, that it operates and acts solely and exclusively as a functional part of the relevant government, which legally recognizes it as such (or, at a minimum, does not deny (or has not denied) it to be such); and

(2) The entity's—

(i) Functions and duties are solely and exclusively of a public character;

(ii) Services are provided generally to the public as such government would provide if acting directly through its public employees (*i.e.*, they are provided without regard to any particular relationship (such as a subscription) a member of the public may have with such entity); and

(iii) Acts and omissions are, and are recognized by such government as (or, at a minimum, not denied by such government to be), legally—

(A) Those of such government, for purposes of sovereign immunity; or

(B) The responsibility of such government, for purposes of tort liability.

Intention—A death, injury, or disability is brought about by a public safety officer's intention if—

(1) An intentional action or activity of his is a substantial factor in bringing it about; and

(2) It is a reasonably foreseeable result of the intentional action or activity.

Intentional action or activity means activity or action (other than line of duty activity or action), including behavior, that is—

(1) A result of conscious volition, or otherwise voluntary;

(2) Not a result of legal insanity or of impulse that is legally and objectively uncontrollable; and

(3) Not performed under legal duress or legal coercion of the will.

Intentional misconduct—A public safety officer's action or activity is intentional misconduct if—

(1) As of the date it is performed,

(i) Such action or activity—

(A) Is in violation of, or otherwise prohibited by, any statute, rule, regulation, condition of employment or service, official mutual-aid agreement, or other law; or

(B) Is contrary to the ordinary, usual, or customary practice of similarly-situated officers within the public agency in which he serves; and

(ii) He knows, or reasonably should know, that it is so in violation, prohibited, or contrary; and

(2) Such action or activity—

(i) Is intentional; and

(ii) Is—

(A) Performed without reasonable excuse; and

(B) Objectively unjustified.

Involvement—An individual is involved in crime and juvenile delinquency control or reduction, or enforcement of the criminal laws (including juvenile delinquency), only if he is an officer of a public agency and, in that capacity, has legal authority and -responsibility to arrest, apprehend, prosecute, adjudicate, correct or detain (in a prison or other detention or confinement facility), or supervise (as a parole or probation officer), persons who are alleged or found to have violated the criminal laws, and is recognized by such agency, or the relevant government (or, at a minimum, not denied by such agency, or the relevant government), to have such authority and responsibility.

Itemized description of representative services provided—A description of representative services provided is itemized only when it includes—

(1) The beginning and end dates of the provision of the services;

(2) An itemization of the services provided and the amount of time spent in providing them; and

(3) An itemization of the expenses incurred in connection with the services provided for which reimbursement is sought.

Kinds of public safety officers—The following are the different kinds of public safety officers:

(1) Law enforcement officers;

(2) Firefighters;

(3) Chaplains;

(4) Members of rescue squads or ambulance crews; and

(5) Disaster relief workers.

Law enforcement means enforcement of the criminal laws, including—

(1) Control or reduction of crime or of juvenile delinquency;

(2) Prosecution or adjudication of individuals who are alleged or found to have violated such laws;

(3) Prison security activity; and

(4) Supervision of individuals on parole or probation for having violated such laws.

Line of duty activity or action—Activity or an action is performed in the line of duty, in the case of a public safety officer who is—

(1) A law enforcement officer, a firefighter, or a member of a rescue squad or ambulance crew—

(i) Whose primary function (as applicable) is public safety activity, only if, not being described in the Act, at 42 U.S.C. 3796a(1), and not being a frolic or detour, it is activity or an action that he is obligated or authorized by statute, rule, regulation, condition of employment or service, official mutual-aid agreement, or other law, to perform (including any social, ceremonial, or athletic functions (or any official training programs of his public agency) to which he is assigned, or for which he is compensated), under the auspices of the public agency he serves, and such agency (or the relevant government) legally recognizes that activity or action to have been so obligated or authorized at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such); or

(ii) Whose primary function is not public safety activity, only if, not being described in the Act, at 42 U.S.C.

3796a(1), and not being a frolic or detour—

(A) It is activity or an action that he is obligated or authorized by statute, rule, regulation, condition of employment or service, official mutual-aid agreement, or other law, to perform, under the auspices of the public agency he serves, and such agency (or the relevant government) legally recognizes that activity or action to have been so obligated or authorized at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such); and

(B) It is performed (as applicable) in the course of public safety activity (including emergency response activity the agency is authorized to perform), or taking part (as a trainer or trainee) in an official training program of his public agency for such activity, and such agency (or the relevant government) legally recognizes it to have been such at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such);

(2) A disaster relief worker, only if, not being described in the Act, at 42 U.S.C. 3796a(1), and not being a frolic or detour, it is disaster relief activity, and the agency he serves (or the relevant government), being described in the Act, at 42 U.S.C. 3796b(9)(B) or (C), legally recognizes it to have been such at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such); or

(3) A chaplain, only if, not being described in the Act, at 42 U.S.C. 3796a(1), and not being a frolic or detour—

(i) It is activity or an action that he is obligated or authorized by statute, rule, regulation, condition of employment or service, official mutual-aid agreement, or other law, to perform, under the auspices of the public agency he serves, and such agency (or the relevant government) legally recognizes it to have been such at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such); and

(ii) It is performed in the course of responding to a fire-, rescue-, or police emergency, and such agency (or the relevant government) legally recognizes it to have been such at the time performed (or, at a minimum, does not deny (or has not denied) it to have been such).

Line of duty injury—An injury is sustained in the line of duty only if—

(1) It is sustained in the course of—

(i) Performance of line of duty activity or a line of duty action; or

(ii) Authorized commuting; or

(2) Convincing evidence demonstrates that such injury resulted from the injured party's status as a public safety officer.

Mental faculties means brain function.

Natural child—An individual is a natural child of a public safety officer only if he is a biological child of the officer, and the officer is alive at the time of his birth.

Occupational disease means a disease (including an ailment or condition of the body) that routinely constitutes a special hazard in, or is commonly regarded as a concomitant of, an individual's occupation.

Official capacity—An individual serves a public agency in an official capacity only if—

(1) He is officially authorized, -recognized, or -designated (by such agency) as functionally within or -part of it; and

(2) His acts and omissions, while so serving, are legally those of such agency, which legally recognizes them as such (or, at a minimum, does not deny (or has not denied) them to be such).

Official duties means duties that are officially authorized, -recognized, or -designated by an employing entity, such that the performance of those duties is legally the action of such entity, which legally recognizes it as such (or, at a minimum, does not deny (or has not denied) it to be such).

Official training program of a public safety officer's public agency means a program—

(1) That is officially sponsored, -conducted, or -authorized by the public agency in which he serves; and

(2) Whose purpose is to train public safety officers of his kind in (or to improve their skills in), specific activity or actions encompassed within their respective lines of duty.

Officially recognized or designated member of a department or agency means a member of a department or agency,

or of an instrumentality, of a government described in the Act, at 42 U.S.C. 3796b(8), who is officially recognized (or officially designated) as such a member by the same.

Officially recognized or designated public employee of a department or agency means a public employee of a department or agency who is officially recognized (or officially designated) as a public safety officer, by the same.

Officially recognized or designated public employee member of a squad or crew means a public employee member of a squad or crew who is officially recognized (or officially designated) as such a public employee member, by the public agency under whose auspices the squad or crew operates.

OJP means the Office of Justice Programs, U.S. Department of Justice.

Parent means a father or a mother.

Parent-child relationship means a relationship between a public safety officer and another individual, in which the officer has the role of parent (other than biological or legally-adoptive), as shown by convincing evidence.

Performance of duties in a grossly negligent manner at the time of death or catastrophic injury means gross negligence, as of or near the injury date, in the course of authorized commuting or performance of line of duty activity or a line of duty action, where such negligence is a substantial contributing factor in bringing such death or injury about.

Posthumous child—An individual is a posthumous child of a public safety officer only if he is a biological child of the officer, and the officer is—

(1) Alive at the time of his conception; and

(2) Deceased at or before the time of his birth.

Prison security activity means correctional or detention activity (in a prison or other detention or confinement facility) of individuals who are alleged or found to have violated the criminal laws.

PSOB determining official means, as applicable, any of the following:

(1) The PSOB Office;

(2) The Hearing Officer; or

(3) The Director.

PSOB Office means the unit of BJA that directly administers the Public Safety Officers' Benefits program.

Public employee means—

(1) An employee of a government described in the Act, at 42 U.S.C. 3796b(8), (or of a department or agency thereof) and whose acts and omissions while so employed are legally those of such government, which legally recognizes them as such (or, at a minimum, does not deny (or has not denied) them to be such); or

(2) An employee of an instrumentality of a government described in the Act, at 42 U.S.C. 3796b(8), who is eligible to receive disability benefits (or whose survivors are eligible to receive death benefits) from such government on the same basis as an employee of that government (within the meaning of paragraph (1) of this definition), or his survivors, would.

Public employee member of a squad or crew means a member of a squad or crew who is a public employee under the auspices of whose public agency employer the squad or crew operates.

Public employee of a department or agency means a public employee whose public agency employer is the department or agency.

Public safety activity means any of the following:

(1) Law enforcement;

(2) Fire protection;

(3) Rescue activity; or

(4) The provision of emergency medical services.

Qualified beneficiary—An individual is a qualified beneficiary under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, only if he is an eligible payee—

(1) Who qualifies as a beneficiary pursuant to a final agency determination that—

(i) The requirements of the Act, at 42 U.S.C. 3796(a) or (b) (excluding the limitations relating to appropriations), as applicable, have been met; and

(ii) The provisions of this part, as applicable, relating to payees otherwise have been met; and

(2) Whose actions were not a substantial contributing factor to the death of the public safety officer (with respect to a claim under subpart B of this part).

Representative services include expenses incurred in connection with such services.

Rescue activity means search or rescue assistance in locating or extracting from danger persons lost, missing, or in imminent danger of serious bodily harm.

Rescue squad or ambulance crew means a squad or crew whose members are rescue workers, ambulance drivers, paramedics, health-care responders, emergency medical technicians, or other similar workers, who—

(1) Are trained in rescue activity or the provision of emergency medical services; and

(2) As such members, have the legal authority and -responsibility to—

(i) Engage in rescue activity; or

(ii) Provide emergency medical services.

Spouse means someone with whom an individual entered into marriage lawfully under the law of the jurisdiction in which it was entered into and from whom the individual is not divorced, and includes a spouse living apart from the individual, other than pursuant to divorce, except that, notwithstanding any other provision of law, to determine whether an individual is a spouse of a public safety officer within the meaning of this definition when more than one individual is purported to be such a spouse, the PSOB Program will apply the law of the jurisdiction that it determines has the most significant interest in the marital status of the public safety officer:

(1) On the date of the officer's death, with respect to a claim under subpart B of this part or by virtue of such death; or

(2) As of the injury date, with respect to a claim not under subpart B of this part or by virtue of the officer's death.

Stepchild—An individual is a stepchild of a public safety officer only if the individual is the legally-adoptive or biological first-generation offspring of a public safety officer's current, deceased, or former spouse, which offspring (not having been legally adopted by the officer)—

(1) Was conceived before the marriage of the officer and the spouse; and

(2) As of the injury date—

(i) Was known by the officer not to be his biological first-generation offspring; and

(ii) After the officer obtained such knowledge—

(A) Received over half of his support from the officer;

(B) Had as his principal place of abode the home of the officer and was a member of the officer's household; or

(C) Was in a parent-child relationship with the officer.

Stress or strain includes physical stress or strain, mental stress or strain, post-traumatic stress disorder, and depression.

Stroke means cerebral vascular accident.

Student means an individual who meets the definition provided in the Act, at 42 U.S.C. 3796b(3)(ii), with respect to an educational/academic institution.

Substantial contributing factor—A factor substantially contributes to a death, injury, or disability, if the factor—

(1) Contributed to the death, injury, or disability to a significant degree; or

(2) Is a substantial factor in bringing the death, injury, or disability about.

Substantial factor—A factor substantially brings about a death, injury, disability, wound, condition, cardiac-event, heart attack, or stroke if—

(1) The factor alone was sufficient to have caused the death, injury, disability, wound, condition, cardiac-event, heart attack, or stroke; or

(2) No other factor (or combination of factors) contributed to the death, injury, disability, wound, condition, cardiac-event, heart attack, or stroke to so great a degree as it did.

Suppression of fire means extinguishment, physical prevention, or containment of fire, including on-site hazard evaluation.

Terrorist attack—An event or act is a terrorist attack within the meaning of the Act, at 42 U.S.C. 3796c–1(a), only if the Attorney General determines that—

(1) There is a reasonable indication that the event or act was (or would be or would have been, with respect to *a priori* prevention or investigation efforts) an act of domestic or international terrorism within the meaning

of the criminal terrorism laws, at 18 U.S.C. 2331; and

(2) The event or act (or the circumstances of death or injury) was of such extraordinary or cataclysmic character as to make particularized factual findings impossible, impractical, unnecessary, or unduly burdensome.

Voluntary intoxication at the time of death or catastrophic injury means the following, as shown by any commonly-accepted tissue, -fluid, or -breath test or by other competent evidence:

(1) With respect to alcohol, (i) In any claim arising from a public safety officer's death in which the death was simultaneous (or practically simultaneous) with the injury, it means intoxication as defined in the Act, at 42 U.S.C. 3796b(5), unless convincing evidence demonstrates that the officer did not introduce the alcohol into his body intentionally; and

(ii) In any claim not described in paragraph (1)(i) of this definition, unless convincing evidence demonstrates that the officer did not introduce the alcohol into his body intentionally, it means intoxication—

(A) As defined in the Act, at 42 U.S.C. 3796b(5), *mutatis mutandis* (i.e., with ''post-mortem'' (each place it occurs) and ''death'' being substituted, respectively, by ''post-injury'' and ''injury''); and

(B) As of the injury date; and

(2) With respect to drugs or other substances, it means intoxication as defined in the Act, at 42 U.S.C. 3796b(5), as evidenced by the presence (as of the injury date) in the body of the public safety officer—

(i) Of any controlled substance included on Schedule I of the drug control and enforcement laws (*see* 21 U.S.C. 812(a)), or any controlled substance included on Schedule II, III, IV, or V of such laws (*see* 21 U.S.C. 812(a)) and with respect to which there is no therapeutic range or maximum recommended dosage, unless convincing evidence demonstrates that such introduction was not a culpable act of the officer's under the criminal laws; or

(ii) Of any controlled substance included on Schedule II, III, IV, or V of the drug control and enforcement laws (*see* 21 U.S.C. 812(a)) and with respect to which there is a therapeutic range or maximum recommended dosage—

(A) At levels above or in excess of such range or dosage, unless convincing evidence demonstrates that such introduction was not a culpable act of the officer's under the criminal laws; or

(B) At levels at, below, or within such range or dosage, unless convincing evidence demonstrates that—

(*1*) Such introduction was not a culpable act of the officer's under the criminal laws; or

(*2*) The officer was not acting in an intoxicated manner immediately prior to the injury date.

[71 FR 46037, Aug. 10, 2006, as amended at 73 FR 76528, Dec. 17, 2008; 78 FR 29234, May 20, 2013; 79 FR 35492, June 23, 2014]

§ 32.4 Terms; construction, severability; effect.

(a) In determining the meaning of any provision of this part, unless the context should indicate otherwise, the first three provisions of 1 U.S.C. 1 (rules of construction) shall apply.

(b) If benefits are denied to any individual pursuant to the Act, at 42 U.S.C. 3796a(4), or otherwise because his actions were a substantial contributing factor to the death of the public safety officer, such individual shall be presumed irrebuttably, for all purposes, not to have survived the officer.

(c) Any provision of this part held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to give it the maximum effect permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event such provision shall be deemed severable herefrom and shall not affect the remainder hereof or the application of such provision to other persons not similarly situated or to other, dissimilar circumstances.

(d) Unless the same should expressly provide otherwise (e.g., by use of the word ''hereafter'' in an appropriations proviso), any amendment to the Act (or any statutory enactment otherwise directly referent or -applicable to the program that is the subject of this part), shall apply only with respect to injuries (or, in connection with claims

under the Act, at 42 U.S.C. 3796(k), shall apply only with respect to heart attacks or strokes referred to in the Act, at 42 U.S.C. 3796(k)(2)) occurring on or after the date it takes effect.

[73 FR 76531, Dec. 17, 2008]

§ 32.5 Evidence.

(a) Except as otherwise may be expressly provided in the Act or this part, a claimant has the burden of persuasion as to all material issues of fact, and by the standard of proof of ''more likely than not.''

(b) Except as otherwise may be expressly provided in this part, the PSOB determining official may, at his discretion, consider (but shall not be bound by) the factual findings of a public agency.

(c) Rules 301 (presumptions), 401 (relevant evidence), 402 (admissibility), 602 to 604 (witnesses), 701 to 704 (testimony), 901 to 903 (authentication), and 1001 to 1007 (contents of writings, records, and photographs) of the Federal Rules of Evidence shall apply, *mutatis mutandis*, to all filings, hearings, and other proceedings or matters. No extrinsic evidence of authenticity as a condition precedent to admissibility shall be required with respect to any document purporting to bear the signature of an expert engaged by the BJA.

(d) In determining a claim, the PSOB determining official may, at his discretion, draw an adverse inference if, without reasonable justification or excuse—

(1) A claimant fails or refuses to file with the PSOB Office—

(i) Such material- or relevant evidence or -information within his possession, control, or ken as may reasonably be requested from time to time by such official; or

(ii) Such authorizations or waivers as may reasonably be requested from time to time by such official to enable him (or to assist in enabling him) to obtain access to material- or relevant evidence or -information of a medical, personnel, financial, or other confidential nature;

(2) A claimant under subpart C of this part fails or refuses to appear in person—

(i) At his hearing under subpart E of this part (if there be such a hearing); or

(ii) Before such official (or otherwise permit such official personally to observe his condition), at a time and location reasonably convenient to both, as may reasonably be requested by such official; or

(3) A claimant under subpart B or C of this part fails or refuses to apply for (or to pursue to completion), in timely fashion, the benefits, if any, described in § 32.15(a)(1)(i) or § 32.25(a)(1)(i), respectively.

(e) In determining a claim, the PSOB determining official may, at his discretion, draw an inference of voluntary intoxication at the time of death or catastrophic injury if, without reasonable justification or excuse, appropriate toxicologic analysis (including autopsy, in the event of death) is not performed, and/or the results thereof are not filed with the PSOB Office, where there is credible evidence suggesting that intoxication may have been a factor in the death or injury, or that the public safety officer—

(1) As of or near the injury date, was—

(i) A consumer of alcohol—

(A) In amounts likely to produce a blood-alcohol level of .10 per centum or greater in individuals similar to the officer in weight and sex; or

(B) In any amount, after ever having been treated at an inpatient facility for alcoholism;

(ii) A consumer of controlled substances included on Schedule I of the drug control and enforcement laws (*see* 21 U.S.C. 812(a)); or

(iii) An abuser of controlled substances included on Schedule II, III, IV, or V of the drug control and enforcement laws (see 21 U.S.C. 812(a)); or

(2) Immediately prior to the injury date, was under the influence of alcohol or drugs or other substances or otherwise acting in an intoxicated manner.

(f) In determining a claim under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, the certification described therein shall constitute *prima facie* evidence—

(1) Of the public agency's acknowledgment that the public safety officer, as of the injury date, was—

(i) A public safety officer of the kind described in the certification;

(ii) Employed by the agency (i.e., performing official functions for, or on behalf of, the agency); and

(iii) One of the following:

(A) With respect to a law enforcement officer, an officer of the agency;

(B) With respect to a firefighter,

(*1*) An officially recognized or designated member of the agency (if it is a legally organized volunteer fire department); or

(*2*) An employee of the agency;

(C) With respect to a chaplain,

(*1*) An officially recognized or designated member of the agency (if it is a legally organized police or volunteer fire department); or

(*2*) An officially recognized or designated public employee of the agency (if it is a legally organized police or fire department);

(D) With respect to a member of a rescue squad or ambulance crew, an officially recognized or designated public employee member of one of the agency's rescue squads or ambulance crews; or

(E) With respect to a disaster relief worker, an employee of the agency (if it is described in the Act, at 42 U.S.C. 3796b(9)(B) or (C));

(2) Of the public agency's acknowledgment that there are no eligible payees other than those identified in the certification; and

(3) That the public safety officer—

(i) Sustained a line of duty injury in connection with public safety activity (or, otherwise, with efforts described in the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37) related to a terrorist attack (under the former statute) or to the terrorist attacks of September 11, 2001 (under the latter statute); and

(ii) As a direct and proximate result of such injury, was (as applicable)—

(A) Killed (with respect to a claim under subpart B of this part); or

(B) Totally and permanently disabled (with respect to a claim under subpart C of this part).

(g) In determining a claim, the PSOB determining official shall have, in addition to the hearing-examiner powers specified at 42 U.S.C. 3787 (hearings, subpoenas, oaths, witnesses, evidence), and to the authorities specified at 42 U.S.C. 3788(b)–(d) (experts, consultants, government resources) and in the Act and this part, the authority otherwise and in any reasonable manner to conduct his own inquiries, as appropriate.

(h) Acceptance of payment (by a payee (or on his behalf)) shall constitute *prima facie* evidence that the payee (or the pay agent)—

(1) Endorses as his own (to the best of his knowledge and belief) the statements and representations made, and the evidence and information provided, pursuant to the claim; and

(2) Is aware (in connection with the claim) of no—

(i) Fraud;

(ii) Concealment or withholding of evidence or information;

(iii) False, incomplete, or inaccurate statements or representations;

(iv) Mistake, wrongdoing, or deception; or

(v) Violation of 18 U.S.C. 287 (false, fictitious, or fraudulent claims), 1001 (false statements), or 1621 (perjury), or 42 U.S.C. 3795a (falsification or concealment of facts).

(i) A public safety officer's response to an emergency call from his public agency for him to perform public safety activity (including emergency response activity the agency is authorized to perform) shall constitute prima facie evidence of such response's nonroutine character.

[73 FR 76531, Dec. 17, 2008]

§ 32.6 Payment and repayment.

(a) No payment shall be made to (or on behalf of) more than one individual, on the basis of being a particular public safety officer's spouse. If more than one should qualify, payment shall be made to the one with whom the officer considered himself, as of the injury date, to have the closest relationship, except that the individual (if any) who was a member of the officer's household (as of such date) shall be presumed rebuttably to be such one, unless legal proceedings (by the officer against such member, or vice versa) shall have been pending then in any court.

(b) No payment shall be made, save—

(1) To (or on behalf of) a living beneficiary; and

(2) Pursuant to—

(i) A written claim filed by (or on behalf of) such beneficiary; and

(ii) Except as provided in the Act, at 42 U.S.C. 3796(c), approval of such claim.

(c) Any amounts that would be paid but for the provisions of paragraph (b) of this section shall be retained by the United States and not paid.

(d) With respect to the amount paid to a payee (or on his behalf) pursuant to a claim, the payee shall repay the following, unless, for good cause shown, the Director grants a full or partial waiver pursuant to the Act, at 42 U.S.C. 3796(m):

(1) The entire amount, if approval of the claim was based, in whole or in material part, on the payee's (or any other person's or entity's) fraud, concealment or withholding of evidence or information, false, incomplete, or inaccurate statements or representations, mistake, wrongdoing, or deception; or

(2) The entire amount subject to divestment, if the payee's entitlement to such payment is divested, in whole or in part, such as by the subsequent discovery of individuals entitled to make equal or superior claims.

(e) At the discretion of the Director, repayment of amounts owing or collectible under the Act or this part may, as applicable, be executed through setoffs against future payments on financial claims under subpart D of this part.

[73 FR 76532, Dec. 17, 2008]

§ 32.7 Fees for representative services.

(a) A person seeking to receive any amount from (or with respect to) a claimant for representative services provided in connection with any claim may petition the PSOB Office for authorization under this section. Such petition shall include—

(1) An itemized description of the services;

(2) The total amount sought to be received, from any source, as consideration for the services;

(3) An itemized description of any representative or other services provided to (or on behalf of) the claimant in connection with other claims or causes of action, unrelated to the Act, before any public agency or non-public entity (including any insurer), arising from the public safety officer's death, disability, or injury;

(4) The total amount requested, charged, received, or sought to be received, from any source, as consideration for the services described in paragraph (a)(3) of this section;

(5) A statement of whether the petitioner has legal training or is licensed to practice law, and a description of any special qualifications possessed by the petitioner (other than legal training or a license to practice law) that increased the value of his services to (or on behalf of) the claimant;

(6) A certification that the claimant was provided, simultaneously with the filing of the petition, with—

(i) A copy of the petition; and

(ii) A letter advising the claimant that he could file his comments on the petition, if any, with the PSOB Office, within thirty-three days of the date of that letter; and

(7) A copy of the letter described in paragraph (a)(6)(ii) of this section.

(b) Unless, for good cause shown, the Director extends the time for filing, no petition under paragraph (a) of this section shall be considered if the petition is filed with the PSOB Office later than one year after the date of the final agency determination of the claim.

(c) Subject to paragraph (d) of this section, an authorization under paragraph (a) of this section shall be based on consideration of the following factors:

(1) The nature of the services provided by the petitioner;

(2) The complexity of the claim;

(3) The level of skill and competence required to provide the petitioner's services;

(4) The amount of time spent on the claim by the petitioner;

(5) The results achieved as a function of the petitioner's services;

(6) The level of administrative or judicial review to which the claim was pursued and the point at which the petitioner entered the proceedings;

(7) The ordinary, usual, or customary fee charged by other persons (and by the petitioner) for services of a similar nature; and

(8) The amount authorized by the PSOB Office in similar cases.

(d) No amount shall be authorized under paragraph (a) of this section for—

(1) Any stipulated-, percentage-, or contingency fee;

(2) Services at a rate in excess of that specified in 5 U.S.C. 504(b)(1)(A)(ii) (Equal Access to Justice Act); or

(3) Services provided in connection with—

(i) Obtaining or providing evidence or information previously obtained by the PSOB determining official;

(ii) Preparing the petition; or

(iii) Explaining or delivering an approved claim to the claimant.

(e) Upon a petitioner's failure (without reasonable justification or excuse) to pursue in timely fashion his filed petition under paragraph (a) of this section, the Director may, at his discretion, deem the same to be abandoned, as though never filed. Not less than thirty-three days prior thereto, the PSOB Office shall serve the petitioner and the claimant with notice of the Director's intention to exercise such discretion.

(f) Upon its authorizing or not authorizing the payment of any amount under paragraph (a) of this section, the PSOB Office shall serve notice of the same upon the claimant and the petitioner. Such notice shall specify the amount, if any, the petitioner is authorized to charge the claimant and the basis of the authorization.

(g) No agreement for representative services in connection with a claim shall be valid if the agreement provides for any consideration other than under this section. A person's receipt of consideration for such services other than under this section may, among other things, be the subject of referral by BJA to appropriate professional, administrative, disciplinary, or other legal authorities.

§ 32.8 Exhaustion of administrative remedies.

No determination or negative disability finding that, at the time made, may be subject to a request for a Hearing Officer determination, a motion for reconsideration, or a Director appeal, shall be considered a final agency determination for purposes of judicial review, unless all administrative remedies have been exhausted.

Subpart B—Death Benefit Claims

§ 32.11 Scope of subpart.

Consistent with § 32.1, this subpart contains provisions applicable to claims made under the Act—

(a) At 42 U.S.C. 3796(a); or

(b) At 42 U.S.C. 3796c–1 or Public Law 107–37, with respect to a public safety officer's death.

§ 32.12 Time for filing claim.

(a) Unless, for good cause shown, the Director extends the time for filing, no claim shall be considered if it is filed with the PSOB Office after the later of—

(1) Three years after the public safety officer's death; or

(2) One year after—

(i) A final determination of entitlement to receive, or of denial of, the benefits, if any, described in § 32.15(a)(1)(i); or

(ii) The receipt of the certification described in § 32.15(a)(1)(ii).

(b) A claimant may file with his claim such supporting documentary, electronic, video, or other nonphysical evidence and legal arguments as he may wish to provide.

[73 FR 76532, Dec. 17, 2008]

§ 32.13 Definitions.

Adoptive parent of a public safety officer means any individual who (not being a step-parent), as of the injury date, was the legally-adoptive parent of the public safety officer, or otherwise was in a child-parent relationship with him.

Beneficiary of a life insurance policy of a public safety officer—An individual (living or deceased on the date of death of the public safety officer) is designated as beneficiary of a life insurance policy of such officer as of such date, only if the designation is, as of such date, legal and valid (as a designation of beneficiary of a life insurance policy) and unrevoked (by such officer or by operation of law) or otherwise unterminated, except that—

(1) Any designation of an individual (including any designation of the biological or adoptive offspring of such individual) made in contemplation of such individual's marriage (or purported marriage) to such officer shall be considered to be revoked by such officer as of such date of death if the marriage (or purported marriage) did not take place, unless preponderant evidence demonstrates that—

(i) It did not take place for reasons other than personal differences between the officer and the individual; or

(ii) No such revocation was intended by the officer; and

(2) Any designation of a spouse (or purported spouse) made in contemplation of or during such spouse's (or purported spouse's) marriage (or purported marriage) to such officer (including any designation of the biological or adoptive offspring of such spouse (or purported spouse)) shall be considered to be revoked by such officer as of such date of death if the spouse (or purported spouse) is divorced from such officer after the date of designation and before such date of death, unless preponderant evidence demonstrates that no such revocation was intended by the officer.

Beneficiary under the Act, at 42 U.S.C. 3796(a)(4)(A)—An individual (living or deceased on the date of death of the public safety officer) is designated, by such officer (and as of such date), as beneficiary under the Act, at 42 U.S.C. 3796(a)(4)(A), only if the designation is, as of such date, legal and valid and unrevoked (by such officer or by operation of law) or otherwise unterminated, except that—

(1) Any designation of an individual (including any designation of the biological or adoptive offspring of such individual) made in contemplation of such individual's marriage (or purported marriage) to such officer shall be considered to be revoked by such officer as of such date of death if the marriage (or purported marriage) did not take place, unless preponderant evidence demonstrates that—

(i) It did not take place for reasons other than personal differences between the officer and the individual; or

(ii) No such revocation was intended by the officer; and

(2) Any designation of a spouse (or purported spouse) made in contemplation of or during such spouse's (or purported spouse's) marriage (or purported marriage) to such officer (including any designation of the biological or adoptive offspring of such spouse (or purported spouse)) shall be considered to be revoked by such officer as of such date of death if the spouse (or purported spouse) is divorced from such officer subsequent to the date of designation and before such date of death, unless preponderant evidence demonstrates that no such revocation was intended by the officer.

Cardiovascular disease includes heart attack and stroke.

Child-parent relationship means a relationship between a public safety officer and another individual, in which the individual (other than the officer's biological or legally-adoptive parent) has the role of parent, as shown by convincing evidence.

Competent medical evidence to the contrary—The presumption raised by the Act, at 42 U.S.C. 3796(k), is overcome by competent medical evidence to the contrary, when evidence indicates to a degree of medical probability that extrinsic circumstances, considered in combination (as one circumstance) or alone, were a substantial factor in bringing the heart attack or stroke about.

Designation on file—A designation of beneficiary under the Act, at 42 U.S.C. 3796(a)(4)(A), is on file with a public safety agency, -organization, or -unit, only if it is deposited with the same by the public safety officer making the designation, for it to maintain with its personnel or similar records pertaining to him.

Direct and proximate result of a heart attack or stroke—A death results directly and proximately from a heart attack or stroke if the heart attack or stroke is a substantial factor in bringing it about.

Engagement in a situation involving law enforcement, fire suppression, rescue, hazardous material response, emergency medical services, prison security, disaster relief, or other emergency response activity—A public safety officer is so engaged only when, within his line of duty—

(1) He is in the course of actually—

(i) Engaging in law enforcement;

(ii) Suppressing fire;

(iii) Responding to a hazardous-material emergency;

(iv) Performing rescue activity;

(v) Providing emergency medical services;

(vi) Performing disaster relief activity; or

(vii) Otherwise engaging in emergency response activity; and

(2) The public agency he serves (or the relevant government) legally recognizes him to have been in such course at the time of such engagement (or, at a minimum, does not deny (or has not denied) him so to have been).

Event includes occurrence, but does not include any engagement or participation described in the Act, at 42 U.S.C. 3796(k)(1).

Excessive consumption of alcohol—An individual is an excessive consumer of alcohol if he consumes alcohol in amounts commonly accepted to be associated with substantially-increased risk of cardiovascular disease.

Execution of a designation of beneficiary under the Act, at 42 U.S.C. 3796(a)(4)(A) means the legal and valid execution, by the public safety officer, of a writing that, designating a beneficiary, expressly, specifically, or unmistakably refers to—

(1) The Act (or the program it creates); or

(2) All the death benefits with respect to which such officer lawfully could designate a beneficiary (if there be no writing that satisfies paragraph (1) of this definition).

Execution of a life insurance policy means, with respect to a life insurance policy, the legal and valid execution, by the individual whose life is insured thereunder, of—

(1) The approved application for coverage;

(2) A designation of beneficiary; or

(3) A designation of the mode of benefit.

Extrinsic circumstances means—

(1) An event or events; or

(2) An intentional risky behavior or intentional risky behaviors.

Life insurance policy on file—A life insurance policy is on file with a public safety agency, -organization, or -unit, only if—

(1) It is issued through (or on behalf of) the same; or

(2) The original (or a copy) of one of the following is deposited with the same by the public safety officer whose life is insured under the policy, for it to maintain with its personnel or similar records pertaining to him:

(i) The policy (itself);

(ii) The declarations page or -statement from the policy's issuer;

(iii) A certificate of insurance (for group policies);

(iv) Any instrument whose execution constitutes the execution of a life insurance policy; or

(v) The substantial equivalent of any of the foregoing.

Medical probability—A fact is indicated to a degree of medical probability, when, pursuant to a medical assessment, the fact is indicated by a preponderance of such evidence as may be available.

Most recently executed designation of beneficiary under the Act, at 42 U.S.C. 3796(a)(4)(A) means the most recently executed such designation that, as of the date of death of the public safety officer, designates a beneficiary.

Most recently executed life insurance policy of a public safety officer means the most recently executed policy insuring the life of a public safety officer that, being legal and valid (as a life insurance policy) upon its execution, as of the date of death of such officer—

(1) Designates a beneficiary; and

(2) Remains legally unrevoked (by such officer or by operation of law) or otherwise unterminated.

Nonroutine strenuous physical activity means line of duty activity that—

(1) Is not excluded by the Act, at 42 U.S.C. 3796(l);

(2) Is not performed as a matter of routine; and

(3) Entails an unusually-high level of physical exertion.

Nonroutine stressful or strenuous physical activity means nonroutine stressful physical activity or nonroutine strenuous physical activity.

Nonroutine stressful physical activity means line of duty activity that—

(1) Is not excluded by the Act, at 42 U.S.C. 3796(l);

(2) Is not performed as a matter of routine;

(3) Entails non-negligible physical exertion; and

(4) Occurs—

(i) With respect to a situation in which a public safety officer is engaged, under circumstances that objectively and reasonably—

(A) Pose (or appear to pose) significant dangers, threats, or hazards (or reasonably-foreseeable risks thereof), not faced by similarly-situated members of the public in the ordinary course; and

(B) Provoke, cause, or occasion an unusually-high level of alarm, fear, or anxiety; or

(ii) With respect to a training exercise in which a public safety officer participates, under circumstances that objectively and reasonably—

(A) Simulate in realistic fashion situations that pose significant dangers, threats, or hazards; and

(B) Provoke, cause, or occasion an unusually-high level of alarm, fear, or anxiety.

Parent of a public safety officer means a public safety officer's surviving—

(1) Biological or adoptive parent whose parental rights have not been terminated, as of the injury date; or

(2) Step-parent.

Participation in a training exercise—A public safety officer participates (as a trainer or trainee) in a training exercise only when actually taking formal part in a structured activity that itself is—

(1) Within an official training (or -fitness) program of his public agency; and

(2) Mandatory, rated (i.e., officially tested, -graded, -judged, -timed, etc.), or directly supervised, -proctored, or -monitored.

Public safety agency, -organization, or -unit means a department or agency (or component thereof)—

(1) In which a public safety officer serves in an official capacity, with or without compensation, as such an officer (of any kind but disaster relief worker); or

(2) Of which a public safety officer is an employee, performing official duties as described in the Act, at 42 U.S.C. 3796b(9)(B) or (C), as a disaster relief worker.

Risky behavior means—

(1) Failure (without reasonable justification or excuse) to undertake treatment—

(i) Of any commonly-accepted cardiovascular-disease risk factor associated with clinical values, where such risk factor is—

(A) Known (or should be known) to be present; and

(B) Present to a degree that substantially exceeds the minimum value commonly accepted as indicating high risk;

(ii) Of any disease or condition commonly accepted to be associated with substantially increased risk of cardiovascular disease, where such associated disease or condition is known (or should be known) to be present; or

(iii) Where a biological parent, -sibling, or -first-generation offspring, is known to have (or have a history of) cardiovascular disease;

(2) Smoking an average of more than one-half of a pack of cigarettes (or its equivalent) per day;

(3) Excessive consumption of alcohol;

(4) Consumption of controlled substances included on Schedule I of the drug control and enforcement laws (*see* 21 U.S.C. 812(a)), where such consumption is commonly accepted to be associated with increased risk of cardiovascular disease;

(5) Abuse of controlled substances included on Schedule II, III, IV, or V of the drug control and enforcement laws (*see* 21 U.S.C. 812(a)), where such abuse is commonly accepted to be associated with increased risk of cardiovascular disease; or

(6) Any activity or action, specified in the Act, at 42 U.S.C. 3796a(1), (2), or (3), that is commonly accepted to be associated with substantially increased risk of cardiovascular disease.

Routine—Neither of the following shall be dispositive in determining whether an activity or action shall be understood to have been performed as a matter of routine:

(1) Being generally described by the public agency as routine or ordinary; or

(2) The frequency with which it may be performed.

Step-parent of a public safety officer means a current or former spouse of

the legally-adoptive or biological parent (living or deceased) of a public safety officer conceived (or legally adopted) by that parent before the marriage of the spouse and the parent, which spouse (not being a legally-adoptive parent of the officer), as of the injury date,

(1) Received over half of his support from the officer;

(2) Had as his principal place of abode the home of the officer and was a member of the officer's household; or

(3) Was in a child-parent relationship with the officer.

Undertaking of treatment—An individual undertakes treatment, when he consults with a physician licensed to practice medicine in any jurisdiction described in the Act, at 42 U.S.C. 3796b(8), and complies substantially with his recommendations.

[61 FR 50213, Sept. 24, 1996, as amended at 73 FR 76832, Dec. 17, 2008]

§ 32.14 PSOB Office determination.

(a) Upon its approving or denying a claim, the PSOB Office shall serve notice of the same upon the claimant (and upon any other claimant who may have filed a claim with respect to the same public safety officer). In the event of a denial, such notice shall—

(1) Specify the factual findings and legal conclusions that support it; and

(2) Provide information as to requesting a Hearing Officer determination.

(b) Upon a claimant's failure (without reasonable justification or excuse) to pursue in timely fashion the determination, by the PSOB Office, of his filed claim, the Director may, at his discretion, deem the same to be abandoned. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

(c) In connection with its determination (pursuant to a filed claim) of the existence of competent medical evidence to the contrary, the PSOB Office shall serve the claimant with notice (indicating that he may file such documentary, electronic, video, or other non-physical evidence (such as medical-history records, as appropriate) and legal arguments in support of his claim as he may wish to provide), where there is evidence before it that affirmatively suggests that—

(1) The public safety officer actually knew or should have known that he had cardio-vascular disease risk factors and appears to have worsened or aggravated the same through his own intentional and risky behavior (as opposed to where the evidence affirmatively suggests merely that cardio-vascular disease risk factors were present); or

(2) It is more likely than not that a public safety officer's heart attack or stroke was imminent.

[73 FR 76534, Dec. 17, 2008]

§ 32.15 Prerequisite certification.

(a) Except as provided in the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, and unless, for good cause shown, the Director grants a waiver, no claim shall be approved unless the following (which shall be necessary, but not sufficient, for such approval) are filed with the PSOB Office:

(1) Subject to paragraphs (b) and (d) of this section, a certification from the public agency in which the public safety officer served (as of the injury date) that he died as a direct and proximate result of a line of duty injury, and either—

(i) That his survivors (listed by name, address, relationship to him, and amount received) have received (or legally are entitled to receive) the maximum death benefits legally payable by the agency with respect to deaths of public safety officers of his kind, rank, and tenure; or

(ii) Subject to paragraph (c) of this section, that the agency is not legally authorized to pay—

(A) Any benefits described in paragraph (a)(1)(i) of this section, to any person; or

(B) Any benefits described in paragraph (a)(1)(i) of this section, to public safety officers of the kind, rank, and tenure described in such paragraph;

(2) A copy of any findings or rulings made by any public agency that relate to the officer's death; and

(3) A certification from the claimant listing every individual known to him who is or might be the officer's child, spouse, or parent.

(b) The provisions of paragraphs (a)(1) and (d) of this section shall also

apply with respect to every public agency that legally is authorized to pay death benefits with respect to the agency described in that paragraph.

(c) No certification described in paragraph (a)(1)(ii) of this section shall be deemed complete for purposes of this section unless it—

(1) Lists every public agency (other than BJA) that legally is authorized to pay death benefits with respect to the certifying agency; or

(2) States that no public agency (other than BJA) legally is authorized to pay death benefits with respect to the certifying agency.

(d) Subject to paragraphs (b) and (c) of this section, if the Director finds that the conditions specified in the Act, at 42 U.S.C. 3796(k), are satisfied with respect to a particular public safety officer's death, and that no circumstance specified in the Act, at 42 U.S.C. 3796a(1), (2), or (3), applies with respect thereto—

(1) The certification as to death, described in paragraph (a)(1) of this section, shall not be required; and

(2) The certification as to benefits, described in paragraph (a)(1)(ii) of this section, shall be deemed complete for purposes of this section if it—

(i) Describes the public agency's understanding of the circumstances (including such causes of which it may be aware) of the officer's death; and

(ii) States that, in connection with deaths occurring under the circumstances described in paragraph (d)(2)(i) of this section, the public agency is not legally authorized to pay any benefits described in paragraph (a)(1)(i) of this section.

[73 FR 76534, Dec. 17, 2008]

§ 32.16 Payment.

(a) No payment shall be made to (or on behalf of) more than one individual, on the basis of being a public safety officer's parent as his mother, or on that basis as his father. If more than one parent qualifies as the officer's mother, or as his father, payment shall be made to the one with whom the officer considered himself, as of the injury date, to have the closest relationship, except that any biological or legally adoptive parent whose parental rights have not been terminated as of the injury date shall be presumed rebuttably to be such one.

(b) Any amount payable with respect to a minor or incompetent shall be paid to his legal guardian, to be expended solely for the benefit of such minor or incompetent.

(c) If more than one individual should qualify for payment—

(1) Under the Act, at 42 U.S.C. 3796(a)(4)(i), payment shall be made to each of them in equal shares, except that, if the designation itself should manifest a different distribution, payment shall be made to each of them in shares in accordance with such distribution; or

(2) Under the Act, at 42 U.S.C. 3796(a)(4)(ii), payment shall be made to each of them in equal shares.

[73 FR 76535, Dec. 17, 2008]

§ 32.17 Request for Hearing Officer determination.

In order to exhaust his administrative remedies, a claimant seeking relief from the denial of his claim shall request a Hearing Officer determination under subpart E of this part. Consistent with § 32.8, any denial that is not the subject of such a request shall constitute the final agency determination.

Subpart C—Disability Benefit Claims

§ 32.21 Scope of subpart.

Consistent with § 32.1, this subpart contains provisions applicable to claims made under the Act—

(a) At 42 U.S.C. 3796(b); or

(b) At 42 U.S.C. 3796c–1 or Public Law 107–37, with respect to a public safety officer's disability.

§ 32.22 Time for filing claim.

(a) Unless, for good cause shown, the Director extends the time for filing, no claim shall be considered if it is filed with the PSOB Office after the later of—

(1) Three years after the injury date; or

(2) One year after—

(i) A final determination of entitlement to receive, or of denial of, the

benefits, if any, described in §32.25(a)(1)(i); or

(ii) The receipt of the certification described in §32.25(a)(1)(ii).

(b) A claimant may file with his claim such supporting documentary, electronic, video, or other nonphysical evidence and legal arguments as he may wish to provide.

[73 FR 76535, Dec. 17, 2008]

§32.23 Definitions.

Direct result of an injury—A disability results directly from an injury if the injury is a substantial factor in bringing the disability about.

Gainful work means full-or part-time activity that actually is compensated or commonly is compensated.

Medical certainty—A fact exists to a degree of medical certainty, when, pursuant to a medical assessment, the fact is demonstrated by convincing evidence.

Permanently disabled—An individual is permanently disabled only if there is a degree of medical certainty (given the current state of medicine in the United States) that his disabled condition—

(1) Will progressively deteriorate or remain constant, over his expected lifetime; or

(2) Otherwise has reached maximum medical improvement.

Product of an injury—Permanent and total disability is produced by a catastrophic injury suffered as a direct and proximate result of a personal injury if the disability is a direct result of the personal injury.

Residual functional capacity means that which an individual still is capable of doing, as shown by medical (and, as appropriate, vocational) assessment, despite a disability.

Totally disabled—An individual is totally disabled only if there is a degree of medical certainty (given the current state of medicine in the United States) that his residual functional capacity is such that he cannot perform any gainful work.

§32.24 PSOB Office determination.

(a) Upon its approving or denying a claim, the PSOB Office shall serve notice of the same upon the claimant. In the event of a denial, such notice shall—

(1) Specify the factual findings and legal conclusions that support it; and

(2) Provide information as to—

(i) Requesting a Hearing Officer determination; or

(ii) As applicable, moving to reconsider a negative disability finding.

(b) Upon a claimant's failure (without reasonable justification or excuse) to pursue in timely fashion the determination of his filed claim, the Director may, at his discretion, deem the same to be abandoned. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

§32.25 Prerequisite certification.

(a) Except as provided in the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37, and unless, for good cause shown, the Director grants a waiver, no claim shall be approved unless the following (which shall be necessary, but not sufficient, for such approval) are filed with the PSOB Office:

(1) Subject to paragraph (b) of this section, a certification from the public agency in which the public safety officer served (as of the injury date) that he was permanently and totally disabled as a direct result of a line of duty injury, and either—

(i) That he has received (or legally is entitled to receive) the maximum disability benefits (including workers' compensation) legally payable by the agency with respect to disabled public safety officers of his kind, rank, and tenure; or

(ii) Subject to paragraph (c) of this section, that the agency is not legally authorized to pay—

(A) Any benefits described in paragraph (a)(1)(i) of this section, to any person; or

(B) Any benefits described in paragraph (a)(1)(i) of this section, to public safety officers of the kind, rank, and tenure described in such paragraph; and

(2) A copy of—

(i) Each State, local, and federal income tax return filed by or on behalf of the public safety officer from the year

before the injury date to the date of determination by the PSOB determining official; and

(ii) Any rulings made by any public agency that relate to the claimed disability.

(b) The provisions of paragraph (a)(1) of this section shall also apply with respect to every public agency that legally is authorized to pay disability benefits with respect to the agency described in that paragraph.

(c) No certification described in paragraph (a)(1)(ii) of this section shall be deemed complete unless it—

(1) Lists every public agency (other than BJA) that legally is authorized to pay disability benefits with respect to the certifying agency; or

(2) States that no public agency (other than BJA) legally is authorized to pay disability benefits with respect to the certifying agency.

§ 32.26 Payment.

The amount payable on a claim shall be the amount payable, as of the injury date, pursuant to the Act, at 42 U.S.C. 3796(b).

§ 32.27 Motion for reconsideration of negative disability finding.

A claimant whose claim is denied in whole or in part on the ground that he has not shown that his claimed disability is total and permanent may move for reconsideration, under § 32.28, of the specific finding as to the total and permanent character of the claimed disability (in lieu of his requesting a Hearing Officer determination with respect to the same).

§ 32.28 Reconsideration of negative disability finding.

(a) Unless, for good cause shown, the Director extends the time for filing, no negative disability finding described in § 32.27 shall be reconsidered if the motion under that section is filed with the PSOB Office later than thirty-three days after the service of notice of the denial.

(b) Notwithstanding any other provision of this section, no negative disability finding described in § 32.27 shall be reconsidered—

(1) If or after such reconsideration is rendered moot (*e.g.*, by the final denial of the claim on other grounds, without possibility of further administrative or judicial recourse); or

(2) If a request for a Hearing Officer determination has been filed in timely fashion with respect to such finding.

(c) Unless, for good cause shown, the Director grants a waiver, upon the making of a motion under § 32.27, reconsideration of the negative disability finding described in that section shall be stayed for three years. Upon the conclusion of the stay, the claimant shall have not more than six years to file evidence with the PSOB Office in support of his claimed disability.

(d) Upon a claimant's failure (without reasonable justification or excuse) to file in timely fashion evidence pursuant to paragraph (c) of this section, the Director may, at his discretion, deem the motion for reconsideration to be abandoned, as though never filed. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

(e) No negative disability finding described in § 32.27 shall be reversed unless a copy (which shall be necessary, but not sufficient, for such reversal) of each federal, State, and local income tax return filed by or on behalf of the claimant from the year before the date of the motion for reconsideration under that section to the date of reversal is filed with the PSOB Office.

(f) Upon its affirming or reversing a negative disability finding described in § 32.27, the PSOB Office shall serve notice of the same upon the claimant. In the event of an affirmance, such notice shall—

(1) Specify the factual findings and legal conclusions that support it; and

(2) Provide information as to requesting a Hearing Officer determination of the disability finding.

§ 32.29 Request for Hearing Officer determination.

(a) In order to exhaust his administrative remedies, a claimant seeking relief from the denial of his claim shall request a Hearing Officer determination under subpart E of this part—

(1) Of—

(i) His entire claim, if he has not moved for reconsideration of a negative disability finding under § 32.27; or

(ii) Consistent with § 32.42(c), the grounds (if any) of the denial that are not the subject of such motion, if he has moved for reconsideration of a negative disability finding under § 32.27; and

(2) Of a negative disability finding that is affirmed pursuant to his motion for reconsideration under § 32.27.

(b) Consistent with § 32.8, the following shall constitute the final agency determination:

(1) Any denial not described in § 32.27 that is not the subject of a request for a Hearing Officer determination under paragraph (a)(1)(i) of this section;

(2) Any denial described in § 32.27 that is not the subject of a request for a Hearing Officer determination under paragraph (a)(1)(ii) of this section, unless the negative disability finding is the subject of a motion for reconsideration; and

(3) Any affirmance that is not the subject of a request for a Hearing Officer determination under paragraph (a)(2) of this section.

[73 FR 76535, Dec. 17, 2008]

Subpart D—Educational Assistance Benefit Claims

§ 32.31 Scope of subpart.

Consistent with § 32.1, this subpart contains provisions applicable to claims (*i.e.*, threshold claims and financial claims) made under the Act, at 42 U.S.C. 3796d–1.

§ 32.32 Time for filing claim.

(a) Subject to the Act, at 42 U.S.C. 3796d–1(c), and to paragraph (b) of this section, a claim may be filed with the PSOB Office at any time after the injury date.

(b) Unless, for good cause shown, the Director grants a waiver, no financial claim may be filed with the PSOB Office, with respect to a grading period that commences more than six months after the date of filing.

(c) A claimant may file with his claim such supporting documentary, electronic, video, or other nonphysical evidence and legal arguments as he may wish to provide.

[73 FR 76535, Dec. 17, 2008]

§ 32.33 Definitions.

Application means claim (*i.e.*, a threshold claim or a financial claim).

Assistance means financial assistance.

Child of an eligible public safety officer means the child of a public safety officer, which officer is an eligible public safety officer.

Dependent—An individual is a dependent of an eligible public safety officer, if—

(1) Being a child of the officer, the individual—

(i) Was claimed properly as the officer's dependent (within the meaning of the Internal Revenue Code, at 26 U.S.C. 152) on the officer's federal income-tax return (or could have been claimed if such a return had been required by law)—

(A) For the tax year of (or immediately preceding) either the injury date or the date of the officer's death (with respect to a claim by virtue of such death); or

(B) For the relevant tax year (with respect to a claim by virtue of the officer's disability); or

(ii) Is the officer's posthumous child; or

(2) Being a spouse of the officer at the time of the officer's death or on the date of the officer's totally and permanently disabling injury, the individual received over half of his support from the officer (or had as his principal place of abode the home of the officer and was a member of the officer's household)—

(i) As of either the injury date or the date of the officer's death (with respect to a claim by virtue of such death); or

(ii) In the relevant tax year (with respect to a claim by virtue of the officer's disability).

Educational assistance benefits means benefits specifically to assist in paying educational expenses.

Educational expenses means such of the following as may be in furtherance of the educational, professional, or vocational objective of the program of education that forms the basis of a financial claim:

(1) Tuition and fees, as described in 20 U.S.C. 1087*ll*(1) (higher education assistance);

(2) Reasonable expenses for—

(i) Room and board (if incurred for attendance on at least a half-time basis);

(ii) Books;

(iii) Computer equipment;

(iv) Supplies;

(v) Transportation; and

(3) For attendance on at least a three-quarter-time basis, a standard allowance for miscellaneous personal expenses that is the greater of—

(i) The allowance for such expenses, as established by the eligible educational institution for purposes of financial aid; or

(ii) $200.00 per month.

Eligible dependent means an individual who—

(1) Is a dependent of an eligible public safety officer;

(2) Attends a program of education, as described in the Act, at 42 U.S.C. 3796d–1(a)(1); and

(3) Is otherwise eligible to receive financial assistance pursuant to the Act or this subpart.

Eligible educational expenses means a claimant's educational expenses, reduced by the amount of educational assistance benefits from non-governmental organizations that the claimant has received or will receive.

Eligible public safety officer means a public safety officer—

(1) With respect to whose death, benefits under subpart B of this part properly have been paid; or

(2) With respect to whose disability, benefits under subpart C of this part properly—

(i) Have been paid; or

(ii) Would have been paid, but for the operation of paragraph (b)(1) of § 32.6.

Financial assistance means financial assistance, as described in the Act, at 42 U.S.C. 3796d–1.

Financial claim means a request for financial assistance, with respect to attendance at a program of education, for a particular grading period.

Financial need—An individual is in financial need for a particular grading period to the extent that the amount of his eligible educational expenses for that period exceed the sum of—

(1) The amount of his educational assistance benefits as described in the Act, at 42 U.S.C. 3796d–1(a)(3)(A); and

(2) His expected family contribution calculated pursuant to 20 U.S.C. 1087nn (higher education assistance).

Funds means financial assistance.

Grading period means the period of attendance (*e.g.*, a semester, a trimester, a quarter) in a program of education, after (or with respect to) which period grades are assigned, units of credit are awarded, or courses are considered completed, as determined by the eligible educational institution.

Prospective financial claim means a financial claim with respect to a grading period that ends after the claim is filed.

Public safety agency means a public agency—

(1) In which a public safety officer serves in an official capacity, with or without compensation, as such an officer (of any kind but disaster relief worker); or

(2) Of which a public safety officer is an employee, performing official duties as described in the Act, at 42 U.S.C. 3796b(9)(B) or (C), as a disaster relief worker.

Retroactive financial claim means a financial claim with respect to a grading period that ends before the claim is filed.

Spouse of an eligible public safety officer at the time of the officer's death or on the date of a totally and permanently disabling injury means the spouse of a public safety officer (which officer is an eligible public safety officer) as of—

(1) The date of the officer's death (with respect to a claim by virtue of such death); or

(2) The injury date (with respect to a claim by virtue of the officer's disability).

Tax Year—With respect to a claim by virtue of an eligible public safety officer's disability, the relevant tax year is—

(1) The tax year of (or immediately preceding) the injury date;

(2) Any tax year during which the program of education that forms the basis of the claim is attended or is pursued;

(3) The tax year immediately preceding the date on which the program

of education that forms the basis of the claim commenced (or is to commence); or

(4) The tax year of (or immediately preceding) the officer's death, where the program of education that forms the basis of the claim commenced (or is to commence) after the date of such death.

Threshold claim means a request for determination of general eligibility to receive financial assistance.

§ 32.34 PSOB Office determination.

(a) In the event of the PSOB Office's denying a claim, the notice it serves upon the claimant shall—

(1) Specify the factual findings and legal conclusions that support the denial; and

(2) Provide information as to requesting a Hearing Officer determination.

(b) No financial claim shall be approved, unless the claimant's threshold claim has been approved.

(c) Upon a claimant's failure (without reasonable justification or excuse) to pursue in timely fashion the determination of his filed claim, the Director may, at his discretion, deem the same to be abandoned. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

§ 32.35 Disqualification.

No claim shall be approved if the claimant is—

(a) In default on any student loan obtained under 20 U.S.C. 1091 (higher education assistance), unless, for good cause shown, the Director grants a waiver; or

(b) Subject to a denial of federal benefits under 21 U.S.C. 862 (drug traffickers and possessors).

§ 32.36 Payment and repayment.

(a) The computation described in the Act, at 42 U.S.C. 3796d–1(a)(2), shall be based on a certification from the eligible educational institution as to the claimant's full-, three-quarter-, half-, or less-than-half-time student status, according to such institution's own academic standards and practices.

(b) No payment shall be made with respect to any grading period that ended before the injury date.

(c) With respect to any financial claim, no amount shall be payable that exceeds the amount of the eligible educational expenses that form the basis of the claim.

(d) In the event that appropriations for a fiscal year are insufficient for full payment of all approved or anticipated financial claims, the following payments shall be made—

(1) The amounts payable on approved prospective financial claims from claimants in financial need, to the extent of such need (if sufficient funds be available therefor), in the order the claims are approved;

(2) All other amounts payable on approved prospective financial claims (in the order the claims are approved), if sufficient funds be available therefor—

(i) After payment of all amounts payable pursuant to paragraph (d)(1) of this section; and

(ii) After making allowance for anticipated amounts payable in the fiscal year pursuant to paragraph (d)(1) of this section; and

(3) The amounts payable on approved retroactive financial claims (in the order the claims are approved), if sufficient funds be available therefor—

(i) After payment of all amounts payable pursuant to paragraphs (d)(1) and (2) of this section; and

(ii) After making allowance for anticipated amounts payable in the fiscal year, pursuant to paragraphs (d)(1) and (2) of this section.

(e) In the event that, at the conclusion of a fiscal year, any amounts remain payable on an approved financial claim, such amounts shall remain payable thereafter until paid (when appropriations be sufficient therefor).

(f) In the event that any amounts remain payable on an approved prospective financial claim after the end of the grading period that forms its basis, such claim shall be deemed an approved retroactive financial claim for purposes of paragraph (d) of this section.

(g) No payment shall be made to (or on behalf of) any individual, on the basis of being a particular living public

safety officer's spouse, unless the individual is the officer's spouse on the date of payment.

(h) Unless, for good cause shown, the Director grants a full or partial waiver, a payee shall repay the amount paid to him (or on his behalf) pursuant to a prospective financial claim if, during the grading period that forms its basis—

(1) He fails to maintain satisfactory progress under 20 U.S.C. 1091(c) (higher education assistance);

(2) He fails to maintain the enrollment status described in his claim; or

(3) By his acts or omissions, he is or becomes ineligible for financial assistance.

§ 32.37 Request for Hearing Officer determination.

In order to exhaust his administrative remedies, a claimant seeking relief from the denial of his claim shall request a Hearing Officer determination under subpart E of this part. Consistent with § 32.8, any denial that is not the subject of such a request shall constitute the final agency determination.

Subpart E—Hearing Officer Determinations

§ 32.41 Scope of subpart.

Consistent with § 32.1, this subpart contains provisions applicable to requests for Hearing Officer determination of claims denied under subpart B, C (including affirmances of negative disability findings described in § 32.27), or D of this part, and of claims remanded (or matters referred) under § 32.54(c).

[73 FR 76535, Dec. 17, 2008]

§ 32.42 Time for filing request for determination.

(a) Subject to paragraph (c) of this section, and unless, for good cause shown, the Director extends the time for filing, no claim shall be determined if the request therefor is filed with the PSOB Office later than thirty-three days after the service of notice of—

(1) The denial (under subpart B, C (except as may be provided in paragraph (a)(2) of this section), or D of this part) of a claim; or

(2) The affirmance (under subpart C of this part) of a negative disability finding described in § 32.27.

(b) A claimant may file with his request for a Hearing Officer determination such supporting documentary, electronic, video, or other non-physical evidence and legal arguments as he may wish to provide.

(c) The timely filing of a motion for reconsideration under § 32.28(a) shall be deemed to constitute a timely filing, under paragraph (a) of this section, of a request for determination with respect to any grounds described in § 32.29(a)(1)(ii) that may be applicable.

[73 FR 76535, Dec. 17, 2008]

§ 32.43 Appointment and assignment of Hearing Officers.

(a) Pursuant to 42 U.S.C. 3787 (employment and authority of hearing officers), Hearing Officers may be appointed from time to time by the Director, to remain on the roster of such Officers at his pleasure.

(b) Upon the filing of a request for a Hearing Officer determination (or upon remand or referral), the PSOB Office shall assign the claim to a Hearing Officer on the roster; the PSOB Office may assign a particular claim to a specific Hearing Officer if it judges, in its discretion, that his experience or expertise suit him especially for it.

(c) Upon its making the assignment described in paragraph (b) of this section, the PSOB Office shall serve notice of the same upon the claimant, with an indication that any evidence or legal argument he wishes to provide is to be filed simultaneously with the PSOB Office and the Hearing Officer.

(d) With respect to an assignment described in paragraph (b) of this section, the Hearing Officer's consideration shall be—

(1) *De novo* (unless the Director should expressly prescribe otherwise, with respect to a particular remand or referral), rather than in review of the findings, determinations, affirmances, reversals, assignments, authorizations, decisions, judgments, rulings, or other actions of the PSOB Office; and

(2) Consistent with subpart B, C, or D of this part, as applicable.

[73 FR 76535, Dec. 17, 2008, as amended at 78 FR 29234, May 20, 2013]

§ 32.44 Hearing Officer determination.

(a) Upon his determining a claim, the Hearing Officer shall file a notice of the same simultaneously with the Director (for his review under subpart F of this part in the event of approval) and the PSOB Office, which notice shall specify the factual findings and legal conclusions that support it.

(b) Upon a Hearing Officer's denying a claim, the PSOB Office shall serve notice of the same upon the claimant (and upon any other claimant who may have filed a claim with respect to the same public safety officer), which notice shall—

(1) Specify the Hearing Officer's factual findings and legal conclusions that support it; and

(2) Provide information as to Director appeals.

(c) Upon a claimant's failure (without reasonable justification or excuse) to pursue in timely fashion the determination of his claim pursuant to his filed request therefor, the Director may, at his discretion, deem the request to be abandoned, as though never filed. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

[71 FR 46037, Aug. 10, 2006, as amended at 78 FR 29234, May 20, 2013]

§ 32.45 Hearings.

(a) Except with respect to a remand or referral, at the election of a claimant under subpart B or C of this part, the Hearing Officer shall hold a hearing, at a location agreeable to the claimant and the Officer (or, otherwise, at a location ruled by the Hearing Officer to be suitable), for the sole purposes of obtaining, consistent with § 32.5(c),

(1) Evidence from the claimant and his fact or expert witnesses; and

(2) Such other evidence as the Hearing Officer, at his discretion, may rule to be necessary or useful.

(b) Unless, for good cause shown, the Director extends the time for filing, no election under paragraph (a) of this section shall be honored if it is filed with the PSOB Office later than ninety days after service of the notice described in § 32.43(c).

(c) Not less than seven days prior to any hearing, the claimant shall file simultaneously with the PSOB Office and the Hearing Officer a list of all expected fact or expert witnesses and a brief summary of the evidence each witness is expected to provide.

(d) At any hearing, the Hearing Officer—

(1) May exclude any evidence whose probative value is substantially outweighed by considerations of undue delay, waste of time, or needless presentation of cumulative evidence; and

(2) Shall exclude witnesses (other than the claimant, or any person whose presence is shown by the claimant to be essential to the presentation of his claim), so that they cannot hear the testimony of other witnesses.

(e) Each hearing shall be recorded, and the original of the complete record or transcript thereof shall be made a part of the claim file.

(f) Unless, for good cause shown, the Director grants a waiver, a claimant's failure to appear at a hearing (in person or through a representative) shall constitute a withdrawal of his election under paragraph (a) of this section.

(g) Upon a claimant's failure to pursue in timely fashion his filed election under paragraph (a) of this section, the Director may, at his discretion, deem the same to be abandoned. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

[73 FR 76536, Dec. 17, 2008]

§ 32.46 Director appeal.

(a) In order to exhaust his administrative remedies, a claimant seeking relief from the denial of his claim shall appeal to the Director under subpart F of this part.

(b) Consistent with § 32.8, any claim denial that is not appealed to the Director under paragraph (a) of this section shall constitute the final agency

determination, unless the denial is reviewed otherwise under subpart F of this part.

Subpart F—Director Appeals and Reviews

§ 32.51 Scope of subpart.

Consistent with § 32.1, this subpart contains provisions applicable to Director appeals and reviews of claim approvals and denials made under subpart E of this part, and reviews of claim approvals under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37.

§ 32.52 Time for filing Director appeal.

(a) Unless, for good cause shown, the Director extends the time for filing, no Director appeal shall be considered if it is filed with the PSOB Office later than thirty-three days after the service of notice of the denial (under subpart E of this part) of a claim.

(b) A claimant may file with his Director appeal such supporting documentary, electronic, video, or other nonphysical evidence and legal arguments as he may wish to provide.

[73 FR 76536, Dec. 17, 2008]

§ 32.53 Review.

(a) Upon the filing of the approval (under subpart E of this part) of a claim, the Director shall review the same.

(b) The Director may review—

(1) Any claim denial made under subpart E of this part; and

(2) Any claim approval made under the Act, at 42 U.S.C. 3796c–1 or Public Law 107–37.

(c) Unless the Director judges that it would be unnecessary, the PSOB Office shall serve notice upon the claimant (and upon any other claimant who may have filed a claim with respect to the same public safety officer) of the initiation of a review under paragraph (a) or (b) of this section. Unless the Director judges that it would be unnecessary, such notice shall—

(1) Indicate the principal factual findings or legal conclusions at issue; and

(2) Offer a reasonable opportunity for filing of evidence or legal arguments.

§ 32.54 Director determination.

(a) Upon the Director's approving or denying a claim, the PSOB Office shall serve notice of the same simultaneously upon the claimant (and upon any other claimant who may have filed a claim with respect to the same public safety officer), and upon any Hearing Officer who made a determination with respect to the claim. In the event of a denial, such notice shall—

(1) Specify the factual findings and legal conclusions that support it; and

(2) Provide information as to judicial appeals (for the claimant or claimants).

(b) Upon a claimant's failure (without reasonable justification or excuse) to pursue in timely fashion the determination of his claim pursuant to his filed Director appeal, the Director may, at his discretion, deem the same to be abandoned, as though never filed. Not less than thirty-three days prior thereto, the PSOB Office shall serve the claimant with notice of the Director's intention to exercise such discretion.

(c) With respect to any claim before him, the Director, as appropriate, may—

(1) Remand the same to the PSOB Office, or to a Hearing Officer;

(2) Vacate any related determination under this part; or

(3) Refer any related matters to a Hearing Officer (as a special master), to recommend factual findings and dispositions in connection therewith.

[73 FR 76536, Dec. 17, 2008]

§ 32.55 Judicial appeal.

(a) Consistent with § 32.8, any approval or denial described in § 32.54(a) shall constitute the final agency determination.

(b) A claimant seeking relief from the denial of his claim may appeal judicially pursuant to the Act, at 42 U.S.C. 3796c–2.

[73 FR 76536, Dec. 17, 2008]

PART 33—BUREAU OF JUSTICE ASSISTANCE GRANT PROGRAMS

Subpart A—Criminal Justice Block Grants

GENERAL PROVISIONS

Sec.
33.1 General.
33.2 Statutory authority.
33.3 OMB approval of information collection requirements.

ELIGIBLE APPLICANTS

33.10 State government.
33.11 Units of local government.
33.12 Establishment of State Office.

ALLOCATION OF FUNDS

33.20 Fund availability.
33.21 Match.
33.22 Title to personal property.
33.23 Limitations on fund use.

PURPOSES OF BLOCK GRANT FUNDS

33.30 Program criteria.
33.31 Eligible purposes and programs.
33.32 Certified programs.

APPLICATION REQUIREMENTS

33.40 General.
33.41 Application content.

ADDITIONAL REQUIREMENTS

33.50 General financial requirements.
33.51 Audit.
33.52 Civil rights.
33.53 Participation by faith-based organizations.

SUBMISSION AND REVIEW OF APPLICATIONS

33.60 General.
33.61 Review of State applications.

REPORTS

33.70 Annual performance report.
33.71 Initial project report.

SUSPENSION OF FUNDING

33.80 Suspension of funding.

Subpart B—Bulletproof Vest Partnership Grant Program Applying for the Program

33.100 Definitions.
33.101 Standards and requirements.
33.102 Preferences.
33.103 How to apply.

AUTHORITY: 42 U.S.C. 3701 through 3797y–4; 5 U.S.C. 301.

SOURCE: 50 FR 22990, May 30, 1985, unless otherwise noted.

Subpart A—Criminal Justice Block Grants

GENERAL PROVISIONS

§ 33.1 General.

This subpart defines eligibility criteria and sets forth requirements for application for and administration of block grants by state and local governments.

[50 FR 22990, May 30, 1985, as amended at 63 FR 50761, Sept. 23, 1998]

§ 33.2 Statutory authority.

The statutory authority for the regulations is the Omnibus Crime Control and Safe Streets Act of 1968, 42 U.S.C. 3701, *et. seq.*, as amended (Pub. L. 90–351, as amended by Pub. L. 93–83, Pub. L. 93–415, Pub. L. 94–430, Pub. L. 94–503, Pub. L. 95–115, Pub. L. 96–157, and Pub. L. 98–473) (hereinafter referred to as the Justice Assistance Act of 1984 or the Act).

§ 33.3 OMB approval of information collection requirements.

The information collection requirements in this subpart A have been approved by the Office of Management and Budget under control no. 1121–0113.

[50 FR 22990, May 30, 1985, as amended at 63 FR 50761, Sept. 23, 1998]

ELIGIBLE APPLICANTS

§ 33.10 State government.

All states are eligible to apply for and receive block grants. Section 404 of the Act. State, as defined in the statute, means any state of the United States and includes the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands. Section 901(a)(2) of the Act.

§ 33.11 Units of local government.

(a) Units of local government are eligible to receive subgrants from a participating state. Unit of local government means any city, county, township, borough, parish, village, or other general purpose political subdivision of a state and includes Indian tribes which perform law enforcement functions as determined by the Secretary of

the Interior. Section 901(a)(3) of the Act.

(b) If the Bureau determines, during any fiscal year, that a portion of the funds allocated to a state will not be required, or that a state will be unable to qualify and receive funds, or that a state chooses not to participate in the program, then the Bureau shall award the funds allocated to the state directly to urban, rural, and suburban units of local government or combinations thereof within the state, giving priority to those jurisdictions with the greatest need. Section 407(d) of the Act.

§ 33.12 Establishment of State Office.

(a) Section 408(a) of the Act provides that the chief executive of each participating state shall designate a State Office for the purposes of:

(1) Preparing an application to obtain funds; and

(2) Administering funds received from the Bureau of Justice Assistance, including receipt, review, processing, monitoring, progress and financial report review, technical assistance, grant adjustments, accounting, auditing, and fund disbursements.

(b) An office or agency performing other functions within the state's executive branch may be designated as the State Office. Section 408(b) of the Act.

ALLOCATION OF FUNDS

§ 33.20 Fund availability.

Section 407(a) of the Justice Assistance Act provides that 80 percent of the total amount appropriated for part D (block grants) and part E (discretionary grants) shall be allocated for block grants.

(a) *Allocation to States.* Each participating state shall receive a base amount of $250,000 with the remaining funds allocated to each state on the basis of the state's relative share of total U.S. population. Section 407(a) of the Act. If a state does not elect to participate in the Act, the states allocation shall be awarded by the Bureau directly to local units of government and combinations of units of local government within the state. Section 407(d) of the Act.

(b) *Allocation of funds within the State.* (1) Funds granted to the state are further subgranted by the state to state agencies and units of local government to carry out programs and projects contained in an approved application. Each state shall distribute to its local units of government, in the aggregate, a portion of the state's block grant funds equal to the local government share of total state and local criminal justice expenditures. Section 407(b) of the Act. In determining the portion to be distributed to local units, the most recent and complete data available from the Bureau of Justice Statistics of the U.S. Department of Justice shall be used unless the use of other data has been approved in advance by the Bureau of Justice Assistance.

(2) To request approval of a distribution ratio other than that based on data of the Bureau of Justice Statistics, the head of the State Office must certify in writing to the Bureau of Justice Assistance that the ratio it proposes is a correct reflection of the local share of total state and local criminal justice expenditures and that the state has notified its major local governments of the request and informed them of the opportunity to contact the Bureau within 30 days, if they have any objections. The written request must also cite the expenditure data used to substantiate the proposed change.

(c) *Allocation based on greatest need.* In distributing funds among urban, rural, and suburban units of local government, the state shall give priority to those jurisdictions with the greatest need. Section 407(b)(2) of the Act.

§ 33.21 Match.

(a) Funds may be used to pay up to 50 percent of the cost of a program or project. Section 403(b)(1) of the Act. The remaining non-Federal share shall be in cash. Section 403(b)(2) of the Act. Match will be provided on a project by project basis. However, states may request the Bureau to approve exceptions such as match on a program by program basis, state-wide basis, unit-of-government basis, or a combination of the above. States must include any requests for approval of other than project-by-project match in their applications to the Bureau.

(b) Funds subgranted to an Indian tribe which performs law enforcement

functions (as determined by the Secretary of the Interior) shall be used to pay 100 percent of the cost of a program or project. Section 403(b)(1) of the Act.

§ 33.22 Title to personal property.

Section 808 of the Justice Assistance Act provides that notwithstanding any other provision of law, title to all expendable and nonexpendable personal property purchased with funds made available under this title, including property with funds made available under this title as in effect before the effective date of the Justice Assistance Act of 1984, shall vest in the criminal justice agency or nonprofit organization that purchased the property if it certifies to the State Office that it will use the property for criminal justice purposes. If such certification is not made, title to the property shall vest in the State Office, which shall seek to have the property used for criminal justice purposes elsewhere in the state prior to using it or disposing of it in any other manner. If a State Office does not exist, certification will be made directly to the Bureau of Justice Assistance.

§ 33.23 Limitations on fund use.

In order to insure the most efficient and effective use of grant funds, the Justice Assistance Act places restrictions on the award of block monies for routine equipment, personnel costs, construction, supplanting of state and local funds, and land acquisition.

(a) *Equipment and hardware.* The purchase or acquisition of equipment or hardware with grant funds is prohibited unless the purchase or acquisition is an incidental and necessary part of a program. Section 406(c)(1) of the Act.

(b) *General salaries and personnel costs.* Payment of personnel costs with grant funds is prohibited unless the costs are an incidental and necessary part of a program. Section 406(c)(1) of the Act. Programs which have as their primary purpose the payment of usual salaries paid to employees generally, or to specific classes of employees within a jurisdiction, are prohibited. Notwithstanding the above, grant funds may be used to compensate personnel for time engaged in conducting or undergoing training programs or the compensation of personnel engaged in research, development demonstration, or short-term programs. Section 406(c)(2) of the Act.

(c) *Construction.* Construction projects are prohibited. Section 406(c)(3) of the Act.

(d) *Land acquisition.* Acquisition of land with grant funds is prohibited. Section 406(c)(3) of the Act.

(e) *Ineffective programs.* The use of grant funds is prohibited for programs or projects which, based upon evaluations by the National Institute of Justice, Bureau of Justice Assistance, Bureau of Justice Statistics, state or local agencies, and other public or private organizations, have been demonstrated to offer a low probability of improving the functioning of the criminal justice system. The Bureau of Justice Assistance will formally identify ineffective programs by notice in the FEDERAL REGISTER after opportunity for public comment. Section 406(c)(4) of the Act.

(f) *Administrative costs.* The use of grant funds to pay for costs incurred in applying for or administering the block grant is prohibited. Block grant funds may only be used to carry out programs that fall within one of the purposes listed in section 403(a) of the Justice Assistance Act. Section 403(a) of the Act.

(g) *Period of project support.* A grant recipient may receive block grant funds for a specific program or project for a period not to exceed four years. The four-year maximum allowable period of funding includes any period prior to the Justice Assistance Act when the program or project was supported by funds made available under title I of the Omnibus Crime Control and Safe Streets Act. Section 403(c) of the Act.

(h) *Non-supplantation.* Block grant funds shall not be used to supplant state or local funds, but will be used to increase the amounts of such funds that would, in the absence of Federal aid, be made available for criminal justice activities. Section 405(2) of the Act.

PURPOSES OF BLOCK GRANT FUNDS

§ 33.30 Program criteria.

The Justice Assistance Act requires that block grant funds assist states and local governments to carry out specific programs which offer a high probability of improving the functioning of the criminal justice system, with special emphasis on violent crime and serious offenders. Section 403(a) of the Act.

(a) *High probability of improving the criminal justice system. High probability of improving the criminal justice system* means that a prudent assessment of the concepts and implementation plans included in a proposed program, project, approach, or practice, together with an assessment of the problem to which it is addressed and of data and information bearing on the problem, concept, and implementation plan, provides strong evidence that the proposed activities would result in identifiable improvements in the criminal justice system if implemented as proposed. Section 901(a)(21) of the Act.

(b) *Special emphasis on violent crime and serious offenders. Special emphasis on violent crime and serious offenders* means that a relationship exists between the program and violent crime, the victims of violent crime, serious offenders and their acts, and the prevention of violent crime and serious offenses. Violent crime, for the purpose of this program, includes homicide, robbery, assault, arson, residential burglary, child abuse and molestation, sexual assault, kidnapping, and all felonies involving weapons or narcotics trafficking. Serious offenders are those who commit violent crimes.

(c) *Criminal justice. Criminal justice* means activities pertaining to crime prevention, control, or reduction, or the enforcement of the criminal law, including but not limited to, police efforts to prevent, control, or reduce crime or to apprehend criminals, including juveniles, activities of courts having criminal jurisdiction, and related agencies (including but not limited to prosecutorial and defender services, juvenile delinquency agencies, and pretrial service or release agencies), activities of corrections, probation or parole authorities and related agencies assisting in the rehabilitation, supervision, and care of criminal offenders, and programs relating to the prevention, control, or reduction of narcotic addiction and juvenile delinquency. Section 901(a)(1) of the Act.

§ 33.31 Eligible purposes and programs.

(a) *Eligible purposes.* Block grant funds may be used for the following purposes listed in section 403(a) of the Justice Assistance Act:

(1) Providing community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime;

(2) Disrupting illicit commerce in stolen goods and property;

(3) Combating arson;

(4) Effectively investing and bringing to trial white-collar crime, organized crime, public corruption crimes, and fraud against the Government;

(5) Identifying criminal cases involving persons (including juvenile offenders) with a history of serious criminal conduct in order to expedite the processing of such cases and to improve court system management and sentencing practices and procedures in such cases;

(6) Developing and implementing programs which provide assistance to jurors and witnesses, and assistance (other than compensation) to victims of crimes;

(7) Providing alternatives to pretrial detention, jail, and prison for persons who pose no danger to the community;

(8) Providing programs which identify and meet the needs of drug-dependent offenders;

(9) Providing programs which alleviate prison and jail overcrowding and programs which identify existing state and Federal buildings suitable for prison use;

(10) Providing, management, and technical assistance to criminal justice personnel and determining appropriate prosecutorial and judicial personnel needs;

(11) Providing prison industry projects designed to place inmates in a realistic working and training environment in which they will be enabled to acquire marketable skills and to make

financial payments for restitution to their victims, for support of their own families, and for support of themselves in the institution;

(12) Providing for operational information systems and workload management systems which improve the effectiveness of criminal justice agencies;

(13) Not more than 10 percent of the state's block grant funds for providing programs of the same types as described in section 501(a)(4) of the Act which:

(i) The Bureau establishes under section 503(a) of the Act as discretionary programs for financial assistance; or

(ii) Are innovative and have been deemed by the Bureau as likely to prove successful;

(14) Implementing programs which address critical problems of crime, such as drug trafficking, which have been certified by the Director of the Bureau of Justice Assistance as having proved successful, after a process of consultation coordinated by the Assistant Attorney General of the Office of Justice Programs with the Director of the National Institute of Justice, Director of the Bureau of Justice Statistics, and Administrator of the Office of Juvenile Justice and Delinquency Prevention;

(15) Providing programs which address the problem of serious offenses committed by juveniles;

(16) Addressing the problem of crime committed against the elderly;

(17) Providing training, technical assistance, and programs to assist state and local law enforcement authorities in rural areas in combating crime, with particular emphasis on violent crime, juvenile delinquency, and crime prevention; and

(18) Improving the operational effectiveness of law enforcement by integrating and maximizing the effectiveness of police field operations and the use of crime analysis techniques.

(b) *Programs.* The Bureau of Justice Assistance has certified that specific programs meet these purposes, conform with the program criteria, and are eligible for block grant support. (See § 33.32 of the regulations, *Certified Programs).* These programs are described in *Program Briefs* that are available from the Bureau of Justice Assistance. The list of certified programs will be expanded in the future based on the statutory criteria to permit a more complete coverage of each of the purposes. This certification will be done in consultation with state and local governments and published in the FEDERAL REGISTER. States and localities may use block funds to implement one or more of these certified programs, if they agree to comply with the critical elements set forth in § 33.32 of these regulations, and to provide data on the performance indicators listed. States and localities selecting these programs may identify the certified program in their application by name only, without further description. Programs other than those certified by the Bureau of Justice Assistance may be proposed by the state and/or units of local government and approved for funding by the Bureau. To obtain approval to fund a proposed program, the applicant must provide in its application a description of the program and evidence that it meets the statutory program criteria. The application requirements for program approval are contained in Subpart E—Application Requirements.

§ 33.32 Certified programs.

(a) The Act encourages the implementation of programs that have been proven successful. Pursuant to section 403(a)(14) of the Act, the Bureau of Justice Assistance, after a process of consultation coordinated by the Assistant Attorney General of the Office of Justice Programs with the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Juvenile Justice and Delinquency Prevention, certifies that the following programs have been proven successful:

(1)(i) *Purpose:* Providing community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime.

(ii) *Certified program: Community crime prevention.* This program aims to prevent crime and reduce the fear of crime through organized collective citizen action. Community crime prevention programs may be initiated by either law enforcement agencies or existing community groups, but each must have the active support and involvement of the

other. Local programs must be designed to meet the needs and problems of specific neighborhoods or communities and particular population groups, including the elderly. They must make extensive use of volunteers. The specific services or activities to be implemented depend on the local situation and crime problem, but usually have, as a core element, neighborhood (block) watch with additional activities optional. Programs to provide training, technical assistance and other support services are also eligible for funding. Program objectives and elements are described in greater detail in the *Program Brief on Community Crime Prevention*.

(A) *Critical elements:*

(*1*) Pre-program planning to determine needs and problems of community.

(*2*) Targeting of activities and services to meet local situation.

(*3*) Maximum use of volunteers.

(*4*) Cooperation of community organizations and law enforcement.

(B) *Optional activities:* Projects must implement one or more of the following:

(*1*) Neighborhood Watch

(*2*) Operation ID

(*3*) Security Surveys

(*4*) Citizen Patrols

(*5*) Escort or Special Services for the Elderly

(*6*) Block Homes or Safe-Houses

(*7*) Neighborhood Clean-Ups in High Crime Areas

(*8*) Public Education

(*9*) Training

(*10*) Technical Assistance

(C) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Types of services provided.

(*3*) Units of service delivered (e.g., number of block watches organized).

(*4*) Number of volunteers participating.

(2)(i) *Purpose:* Disrupting illicit commerce in stolen goods and property.

(ii) *Certified program: Property Crime (STING) Program.* This program targets the apprehension and prosecution of burglars/thieves as well as those individuals who provide the outlets for receipt of stolen goods and property. The majority of the model programs have established *storefronts* in which law enforcement officers pose as fences who buy stolen goods. In areas where there is a high concentration of organized crime, programs have employed techniques to infiltrate organizations in order to obtain evidence for prosecution of serious crime. Program objectives and elements are described in greater detail in the *Program Brief on Property Crime (STING) Program.*

(A) *Critical elements:*

(*1*) Program planning, which consists of:

(*i*) Analysis of the stolen property redistribution system in the jurisdiction.

(*ii*) Selection of the target criminal population and/or property at which the program will be directed.

(*iii*) Establishment of policies and procedures governing roles of participants, and program implementation.

(*2*) Establishment of records maintenance and management system; security management procedures; and stolen property/contraband/evidence management.

(*3*) Implementation of operations, including undercover activities and ongoing intelligence gathering and analysis.

(*4*) Coordination with prosecutorial personnel in case development and proper use of undercover techniques; and cooperation with victims to assure return of property.

(B) *Performance indicators:*

(*1*) Number of arrest and type of offense.

(*2*) Number of convictions.

(*3*) Dollar value of property received.

(*4*) Dollar value of property returned to victims.

(*5*) Number of fencing operations disrupted.

(3)(i) *Purpose:* Combating arson.

(ii) *Certified program: Arson Prevention and Control Program.* This program employs the task force concept as a strategy to prevent and control the malicious or fraudulent burning of property. It attempts to reduce the incidence of arson and increase arrest, prosecution and conviction rates. The program focuses on arson that is economically motivated. Program objectives and elements are described in greater detail in the *Program Brief on Arson Prevention and Control.*

(A) *Critical elements:*

(*1*) Program planning to establish:

(*i*) An understanding to the area's specific arson problems.

(*ii*) A selection of program priorities, strategies, and the targeting of the criminal population.

(*iii*) An outline of policies and procedures for program participants and program implementation.

(*iv*) Written agreements indicating participation in the program, acceptance of established criteria and procedures, and commitment of resources.

(*2*) Establishment of a system for collecting and analyzing data to target and identify arson patterns, methods and areas of vulnerability.

(*3*) Establishment of investigative and prosecutorial elements directed at the crime of arson.

(*4*) Involvement of community groups and private industry in support of the program.

(B) *Performance indicators:*

(*1*) Number of staff assigned to the project.

(*2*) Number of confirmed arson incidents reported during reporting period.

(*3*) Number of confirmed arson incidents reported during equivalent pre-reporting period.

(*4*) Number of incidents resulting in a prosecution during program period.

(*5*) Number of incidents resulting in a prosecution during equivalent pre-reporting period.

(*6*) Number of prosecutions resulting in conviction.

(*7*) Amount of property damage/loss caused by incendiary/suspicious fires during program period.

(*8*) Amount of property damage/loss by incendiary/suspicious fires during equivalent pre-reporting period.

(4)(i) *Purpose:* Effectively investigating and bringing to trial white-collar crime, organized crime, public corruption crime, and fraud against the Government. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions of § 33.41.)

(5)(i) *Purpose:* Identifying criminal cases involving persons (including juvenile offenders) with a history of serious criminal conduct in order to expedite the processing of such cases and to improve court system management and sentencing practices and procedures in such cases.

(ii) *Certificate program: Career Criminal Prosecution Program.* This program targets the identification and prosecution of violent and repeat offenders. Model efforts include a full time prosecutorial unit devoted to increasing the rate of prosecution of such offenders, special screening criteria, and policies that initiate or enhance vertical prosecution. Program objectives and elements are described in greater detail in the *Program Brief on Career Criminal Prosecution.*

(A) *Critical elements:*

(*1*) Screening and prosecution criteria to identify cases involving violent offenses and repeat offenders.

(*2*) A separate, full-time prosecutorial unit for violent and repeat offenders to enable vertical prosecution of assigned cases.

(*3*) Reduction of caseload to enable thorough case preparation/presentation.

(*4*) A policy requiring limited or no plea negotiations.

(*5*) A policy of opposing pre-trial motions for continuances.

(*6*) A policy to maintain effective communications with victims and witnesses.

(B) *Performance indicators:*

(*1*) Number of full-time prosecutors assigned to unit.

(*2*) Number of cases meeting established criteria.

(*3*) Number of cases prosecuted.

(*4*) Number of and percentage of cases resulting in conviction.

(*5*) Number and percentage of individuals incarcerated.

(iii) *Certified program: Court Delay Reduction Program.* This program expedites the processing of felony cases in trial courts. It emphasizes reduction of backlogs while maintaining equitable treatment and due process. Model programs result in reduction of case processing time, minimization of court appearances for victims and witnesses, and improvement of the public's perception of the quality of the criminal justice system. This program is available for both metropolitan trial courts and state-level court systems. Program objectives and elements are described

in greater detail in the *Program Brief on Court Delay Reduction*.

(A) *Critical elements:* Both the metropolitan and the state level programs are divided into two phases, planning and implementation.

(*1*) *Planning* (Phase I):

(*i*) Formation of delay reduction advisory committee.

(*ii*) Data collection, analysis, and problem identification.

(*iii*) Adoption of case processing goals for criminal cases.

(*iv*) Development of action plan(s).

(*2*) *Implementation* (Phase II):

(*i*) Education of trial judges and others on objectives, standards and procedures.

(*ii*) Systematic monitoring of all criminal cases filed in participating courts.

(*iii*) System for regular acquisition and assessment of data from each trial court (state level only).

(*iv*) Modification of rules and procedures at all levels of program participation when program results indicate need for changes.

(B) *Performance indicators*. (*1*) Time standard established for processing of criminal cases under the project (days from arrest to trial).

(*2*) Percentage of criminal cases prior to project that met standard.

(*3*) Percentage of criminal cases disposed of during the project reporting period that met time disposition standard.

(*4*) Reduction in the average number of continuances from the equivalent pre-project period.

(6)(i) *Purpose:* Developing and implementing programs which provide assistance to jurors and witnesses, and assistance (other than compensation) to victims of crimes.

(ii) *Certified program: victim assistance*. This program provides services and assistance to victims in order to speed their recovery from the financial loss, physical suffering and emotional trauma of victimization, and to assure proper and sensitive treatment of innocent victims in the criminal justice process. Victim assistance programs usually encompass a wide range of support services. The specific services to be provided, and the specific target group should reflect local needs and priorities. Program objectives and elements are described in greater detail in the *Program Brief on Victim Assistance*.

(A) *Critical elements:*

(*1*) Analysis of the community's victim/witness needs and problems.

(*2*) Targeting of existing and planned activities and services to respond to this community situation.

(*3*) Formulation of agreements for cooperation between criminal justice system agencies and public and private victim/witness service providers.

(B) *Optional activities:* Projects must implement a minimum of three (3) or more of the following:

(*1*) 24 hour crisis intervention and support or emergency services.

(*2*) Counseling.

(*3*) Assistance with compensation claims, creditors, community referrals, and restitution.

(*4*) Police, prosecutor or court-related services.

(*5*) Safety (including shelter), supportive counseling, social services support and criminal justice advocacy.

(*6*) Training and education for individuals having direct contact with the victims, i.e., police, medical personnel, prosecutors, judges, etc.

(C) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Types of services provided.

(*3*) Number of victims/witnesses served (by type of service).

(*4*) Number of criminal justice personnel and others trained.

(7)(i) *Purpose:* Providing alternatives to pretrial detention, jail, and prison for persons who pose no danger to the community.

(ii) *Certified program: Jail overcrowding/alternatives to pretrial detention*. This program aims to control jail population through improved intake screening which assures that persons who should be in jail are detained, and that alternatives are available for those requiring less than maximum supervision. Particular care must be taken that persons charged with violent crimes be detained and that the impact on victims and witnesses be a factor in screening decisions. The program calls for the development of a jail population management plan as part of

a planning phase, followed by implementation of specific activities and services. Among the activities and services that may be funded are central intake and screening, pretrial services, diversion to detoxification centers, citation release, community corrections, sentencing alternatives, and jail management information systems. Program objectives and elements are described in greater detail in the *Program Brief on Jail Overcrowding/Alternatives to Pretrial Detention*.

(A) *Critical elements:*

(*1*) Implementation of program by state.

(*2*) Formation of broad-based jail policy committee.

(*3*) Program planning that includes data collection, analysis, problem identification, and development of jail population management plan, including the removal of juveniles from adult jails and lockups.

(*4*) Implementation of plan.

(B) *Optional activities:* Based on their plans, projects must implement one or more of the following activities or components:

(*1*) Central intake and classification.

(*2*) Comprehensive pre-trial services.

(*3*) Diversion of public inebriates to detoxification centers.

(*4*) Diversion of juveniles to secure and non-secure alternatives.

(*5*) Citation release.

(*6*) Community correction centers.

(*7*) Sentencing alternatives (including restitution and work release).

(*8*) Jail management information system.

(C) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Pretrial jail population.

(*3*) Types of services and alternatives implemented.

(*4*) Numbers of arrestees served/diverted by type of alternative.

(*5*) Convicted clients completing alternative punishment successfully.

(*6*) Re-arrest rate of released defendants.

(*7*) Estimated jail days saved.

(8)(i) *Purpose:* Providing programs which identify and meet the needs of drug-dependent offenders.

(ii) *Certified program: Treatment Alternatives to Street Crime Program (TASC).* This program intervenes in the criminal justice process by early identification of substance-abusing offenders, referral to community treatment resources, and monitoring of treatment. Model programs provide the following services: screening arrestees, providing diagnostic/referral services for treatment, and monitoring progress of clients. Persons charged with or convicted of violent crimes including murder, rape, arson, armed robbery, sexual assault, burglary, child molestation, and manslaughter are excluded. Program objectives and elements are described in greater detail in the *Program Brief on Treatment Alternatives to Street Crime*.

(A) *Critical elements:*

(*1*) Broad-based support by criminal justice agencies.

(*2*) Establishment of TASC advisory board.

(*3*) Establishment of administrative management unit with full-time director.

(*4*) Development of specific program eligibility criteria.

(*5*) Establishment of a process for screening potential clients and court liaison.

(*6*) Development of methods for assessing most appropriate treatment approaches.

(*7*) Documentation of the availability of community treatment programs and their willingness to accept TASC clients.

(*8*) Establishment of monitoring/tracking system.

(B) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Number of persons screened.

(*3*) Number of clients accepted.

(*4*) Number of clients completing program.

(*5*) Number of client re-arrests while in the program.

(9) *Purpose:* Providing programs which alleviate prison and jail overcrowding and programs which identify existing state and Federal buildings suitable for prison use. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions of § 33.41.)

(10)(i) *Purpose:* Provide training, management, and technical assistance to criminal justice personnel and determining appropriate prosecutorial and judicial personnel needs. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions in §33.41. Training, management, and technical assistance programs must be focused on one of the 17 other statutory purposes and be based on a needs assessment. Entry level or basic training is prohibited.)

(11) *Purpose:* Providing prison industry projects designed to place inmates in a realistic working and training environment in which they will be enabled to acquire marketable skills and to make financial payments for restitution to their victims, for support of their own familes, and for support of themselves in the institution. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions of §33.41.)

(12)(i) *Purpose:* Providing for operational information systems and workload management systems which improve the effectiveness of criminal justice agencies. All operational information system programs must be based on a needs assessment and requirements analysis and must include the definition of goals and objectives. In addition, they must assure that if public domain software is not available, any improvements to proprietary software will be placed in the public domain.

(ii) *Certified program: Prosecution Management Support System (PMSS).* This program is a specific application of the generic planning, implementation, and assessment requirements for effective system development and performance. PMSS uses automated data processing systems to support priority prosecution, improved conviction rates, speedy trial management, and improved efficiency/effectiveness of the prosecutor's office. Model programs result in information systems which support prosecution activities such as identification of violent and career criminals, case and subpoena preparation and witness notification. Systems are used to monitor management decisions and prosecutor actions and to reduce case processing time and case preparation time. Program objectives and elements are described in greater detail in the *Program Brief on Prosecution Management Support System.* This Program Brief has been designed to provide guidance for all criminal justice information systems. The critical elements for PMSS are transferable to and are equally critical for other criminal justice information systems.

(A) *Critical elements:*

(*1*) Pre-program needs assessment.

(*2*) Implementation plan for fulfilling information needs and improving management and research capabilities.

(*3*) Process for monitoring management decisions and prosecutor actions.

(B) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Case processing time.

(*3*) Conviction rates.

(13) *Purpose:* Providing programs of the same types as programs described in section 501(a)(4) of the Act which:

(i) The Director establishes under section 503(a) of the Justice Assistance Act as discretionary programs for financial assistance; or

(ii) Are innovative and have been deemed by the Director as likely to prove successful.

(14) *Purpose:* Implementing programs which address critical problems of crime, such as drug trafficking, which have been certified by the Director, after a process of consultation coordinated by the Assistant Attorney General, Office of Justice Programs, with the Director of the National Institute of Justice, Director of the Bureau of Justice Statistics, and Administrator of the Office of Juvenile Justice and Delinquency Prevention, as having proved successful.

(15)(i) *Purpose:* Providing programs which address the problem of serious offenses committed by juveniles.

(ii) *Certified program: Restitution by juvenile offenders:* This program promotes the use of restitution by juvenile offenders to make juveniles accountable to the victim and the community and to increase community confidence in the juvenile justice system. Juvenile restitution has been an effective alternative to incarceration in jurisdictions that have used it, reducing recidivism

and providing benefits to victims. Assistance in the design and development of Juvenile Restitution Programs funded under this Program is available through the Restitution Education, Training and Technical Assistance (RESTTA) Program funded by the Office of Juvenile Justice and Delinquency Prevention. Program objectives and elements are described in greater detail in the *Program Brief on Restitution by Juvenile Offenders*.

(A) *Critical elements:*

(*1*) Legal authority to order restitution as a disposition for delinquent offenses.

(*2*) Commitment of the court and juvenile justice personnel.

(*3*) Pre-program planning to establish written policies and procedures, including:

(*i*) The stage of the system at which restitution will be initiated;

(*ii*) Specification of the target population; and

(*iii*) Establishment of procedures for determining the appropriate restitution to be rendered by the juvenile offender, enforcing restitution orders.

(*4*) Program management and administration should describe:

(*i*) Agency roles and responsibilities; and

(*ii*) Case management and tracking system for performance indicators.

(*5*) Community involvement in the program.

(B) *Performance indicators:*

(*1*) Personnel:

(*i*) Number employed full and part-time in restitution; and

(*ii*) Average restitution caseload per restitution/probation officer.

(*2*) Program participation:

(*i*) Number of juveniles by offense type;

(*ii*) Type and amount of restitution ordered; and

(*iii*) Number of victims (by type and amount of loss/injury) receiving restitution.

(*3*) Number/percent juveniles successfully completing their restitution orders.

(*4*) Total amount of restitution collected/completed.

(*5*) Number obtaining restitution-related employment/job services.

(*6*) Operational costs per case.

(*7*) Number of participants rearrested during the program.

(*8*) Number of participants incarcerated as a result of a rearrest or program failure.

(*9*) Number retaining restitution-related employment following completion.

(*10*) Victim satisfaction with the program.

(16) *Purpose:* Addressing the problem of crime committed against the elderly. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions of § 33.41. Many of the programs identified under other purposes indirectly address the problem of crime against the elderly. Victim assistance programs and community crime prevention programs in particular often provide services that meet the special needs of the elderly.)

(17) *Purpose:* Provide training, technical assistance, and programs to assist state and local law enforcement authorities in rural areas in combating crime, with particular emphasis on violent crime, juvenile delinquency, and crime prevention. (No specific program has been certified by the Bureau. Applicants may propose programs for approval in accordance with the provisions of § 33.41. Many of the programs identified under other purposes are equally applicable to rural and urban areas.)

(18)(i) *Purpose:* Improve the operational effectiveness of law enforcement by integrating and maximizing the effectiveness of police field operations and the use of crime analysis techniques.

(ii) *Certified program: Integrated Criminal Apprehension Program (ICAP).* This program integrates and directs law enforcement activities relative to the prevention, detection and investigation of serious and violent crime. Components of model programs have included systematic data collection and analysis, crime analysis, structured planning and service delivery. The program emphasizes better use of existing resources and better management of the patrol operation and investigative process. It results in a process which increases arrests for serious crimes. Program objectives and elements are

described in greater detail in the *Program Brief on the Integrated Criminal Apprehension Program.*

(A) *Critical elements:*

(*1*) Commitment of law enforcement agency top management to concept of manpower deployment based on crime analysis.

(*2*) Modification of agency data gathering methods to enhance planning and crime analysis.

(*3*) Establishment of crime analysis and planning function.

(*4*) Implementation of strategies, tactics and processes based on analysis that contribute to better management of criminal investigation and patrol.

(B) *Performance indicators:*

(*1*) Number of staff assigned to project.

(*2*) Types of strategies implementations e.g., directed patrol, crime analysis.

(*3*) Types of crimes targeted.

(*4*) Clearance rates (by arrest) for targeted crimes.

(*5*) Conviction rates for targeted crimes.

APPLICATION REQUIREMENTS

§ 33.40 General.

Sections 33.40 and 33.41 set forth the required programmatic content of block grant applications.

[50 FR 22990, May 30, 1985, as amended at 63 FR 50761, Sept. 23, 1998]

§ 33.41 Application content.

(a) *Format.* Applications from the states for criminal justice block grants must be submitted on Standard Form 424, Application for Federal Assistance, at a time specified by the Bureau of Justice Assistance. The Bureau will provide to the states an ''Application Kit'' that includes SF 424, a list of assurances that the applicant must agree to, a table of fund allocations, and additional guidance on how to prepare and submit an application for criminal justice block grants.

(b) *Programs.* Applications must set forth programs and projects covering a two-year period which meet the purposes and criteria of section 403(a) of the Justice Assistance Act and these regulations. Applications must be amended annually, if new programs or projects are to be added or if the programs or projects contained in the approved application are not implemented. The application must designate which statutory purpose the program or project is intended to achieve, identify the state agency or unit of local government that will implement the program or project, and provide the estimated funding level for the program or project including the amount and source of cash matching funds. Section 405 of the Act.

(1) Section 33.32 of the regulations identifies specific programs which have been certified by the Bureau to meet the requirements of the Act. Approval will be given for implementation of any of these programs, if the applicant agrees to include all the critical elements in the program design. An applicant need only identify the program, which purpose it is intended to achieve, the state agency or unit of local government which will implement it, the funding level (including amount and source of match).

(2) Applicants may request approval of programs other than one of those certified by the Bureau. The application must contain, in addition to the information in § 33.41(b), a description of the program (including its critical elements and performance indicators) and evidence that it meets the criteria of offering a high probability of improving the functions of the criminal justice system. Evidence may include, but is not necessarily limited to, the results of any evaluations of previous tests or demonstrations of the program concept.

(3) Applicants may also request approval to expend up to 10 per centum of their funds for programs which the Director of the Bureau of Justice Assistance has established as priorities for discretionary grants under section 503 of the Act, or which are innovative programs that are deemed by the Director as likely to prove successful. For a program the same as a discretionary program, the applicant may identify it by name only and provide the information required under § 33.41(b)(1) of the regulations. For an innovative program, the applicant must describe the program (including its critical elements

and performance indicators) and provide evidence that it is likely to prove successful.

(c) *Confidential information.* Applications which request funds for the STING Program should not state the location of the project. The application should only include the program designation, the funds involved, and the number of projects. The state agency or unit of local government implementing the project will be made known to the Bureau of Justice Assistance upon request or upon completion of the project.

(d) *Audit requirement.* Applications from the state must include the date of the State Office's last audit and the anticipated date of the next audit.

(e) *Civil rights contact.* Applications from the state must include the name of a civil rights contact person who has lead responsibility in insuring that all applicable civil rights requirements are met and who shall act as liaison in civil rights matters with the Office of Civil Rights Compliance of the Office of Justice Programs.

(f) *Application assurances.* Applications must include the following assurances:

(1) An assurance that, following the first fiscal year covered by an application and each fiscal year thereafter, the applicant will submit to the Bureau of Justice Assistance, where the applicant is a state or jurisdiction in a non-participating state, a performance report concerning the activities carried out, and an assessment of their impact; section 405(1) of the Act.

(2) A certification that Federal funds made available under this title will not be used to supplant state or local funds, but will be used to increase the amounts of such funds that would, in the absence of Federal funds, be made available for criminal justice activities; section 405(2) of the Act.

(3) An assurance that funds accounting, auditing, monitoring, and such evaluation procedures as may be necessary to keep such records as the Bureau of Justice Assistance shall prescribe will be provided to assure fiscal control, proper management, and efficient disbursement of funds received under this title; section 405(3) of the Act.

(4) An assurance that the applicant shall maintain such data and information and submit such reports, in such form, at such times, and containing such information as the Bureau of Justice Assistance may require; section 405(4) of the Act.

(5) A certification that the programs meet all the requirements, that all the information contained in the application is correct, that there has been appropriate coordination with affected agencies, and that the applicant will comply with all provisions of the Justice Assistance Act 1984 and all other applicable Federal laws; section 405(5) of the Act.

(6) If the applicant is a state, an assurance that not more than 10 percent of the aggregate amount of funds received by a State under this part for a fiscal year will be distributed for programs and projects designated as intended to achieve the purpose specified in section 403(a)(13) of the Act; section 405(6) of the Act.

(7) An assurance that the state will take into account the needs and requests of units of general local government in the state and encourage local initiative in the development of programs which meet the purposes of the Act; section 405(7) of the Act.

(8) An assurance that the state application and any amendment to such application, has been submitted for review to the state legislature or its designated body (for purpose of this requirement, an application or amendment shall be deemed to be reviewed if the state legislature or its designated body does not review it within 60 days from the time it was submitted to it); section 405(8) of the Act.

(9) An assurance that the state application and any amendment thereto was made public before submission to the Bureau and, to the extent provided under state law or established procedure, an opportunity to comment thereon was provided to citizens and to neighborhood and community groups; section 405(9) of the Act.

(10) An assurance that the applicant will comply, and all its subgrantees and contractors will comply, with the non-discrimination requirements of the Justice Assistance Act; title VI of the Civil Rights Act of 1964; section 504 of

the Rehabilitation Act of 1973, as amended; title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975; and the Department of Justice Non-Discrimination regulations 28 CFR part 42, subparts C, D, E, and G;

(11) An assurance that in the event a Federal or state court or Federal or state administrative agency makes a finding of discrimination after a due process hearing on the grounds of race, color, religion, national orgin or sex against a recipient of funds, the recipient will forward a copy of the finding to the Office of Civil Rights Compliance (OCRC) of the Office of Justice Programs;

(12) An assurance that the applicant will require that every recipient required to formulate an Equal Employment Opportunity Program (EEOP) in accordance with 28 CFR 42.301 *et. seq.*, submit a certification to the state that it has a current EEOP on file which meets the requirements herein;

(13) An assurance that the applicant will provide an EEOP, if required to maintain one, where the application is for $500,000 or more and provide the EEOP of any subgrantee of $500,000 or more;

(14) An assurance that the applicant will comply with the provisions of the Office of Justice Programs ''Financial and Administrative Guide for Grants,'' M 7100.1;

(15) An assurance that the applicant will comply with the provisions of 28 CFR applicable to grants and cooperative agreements including part 18, Administrative Review Procedure; part 20, Criminal Justice Information Systems; part 22, Confidentiality of Identifiable Research and Statistical Information; part 23, Criminal Intelligence Systems Operating Policies; part 30, Intergovernmental Review of Department of Justice Programs and Activities; part 42; Non-discrimination Equal Employment Opportunity Policies and Procedures; part 61, Procedures for Implementing the National Environmental Policy Act; and part 63, Floodplain Management and Wetland Protection Procedures.

(g) *Non-participating State.* If a state notifies the Bureau of Justice Assistance of its intent not to apply for block grant funds or fails to submit an application by the submission date, the Bureau will announce the availability of the block grant funds to local units of government in the non-participating state and will invite them to submit applications directly to the Bureau. A unit of local government receiving a block grant award directly from the Bureau assumes responsibility for all activities which would normally be the responsibility of the State Office.

ADDITIONAL REQUIREMENTS

§ 33.50 General financial requirements.

Grants funded under the criminal justice block grant program are governed by the provisions of the Office of Management and Budget (OMB) Circulars applicable to financial assistance. These Circulars along with additional information and guidance are contained in ''Financial and Administrative Guide for Grants,'' Guideline Manual 7100.1, available from the Office of Justice Programs. This Guideline Manual provides information on cost allowability, methods of payment, audit, accounting systems and financial records.

§ 33.51 Audit.

Pursuant to Office of Management and Budget Circular A–128 ''Audits of State and Local Governments,'' all grantees and subgrantees must provide for an independent audit of their activities on a periodic basis. For additional information on audit requirements, applicants should refer to the ''Financial and Administrative Guide for Grants,'' Guideline Manual 7100.1, Office of Justice Programs.

§ 33.52 Civil rights.

The Justice Assistance Act provides that ''no person in any state shall on the ground of race, color, religion, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under or denied employment in connection with any programs or activity funded in whole or in part with funds made available under this title.'' Section 809(c)(1) of the Act. Recipients of funds under the Act are also subject to the provisions of title VI of the Civil

Rights Act of 1964; section 504 of the Rehabilitation Act of 1973, as amended; title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975; and the Department of Justice Non-Discrimination regulations 28 CFR part 42, subparts C, D, E, and G.

§ 33.53 Participation by faith-based organizations.

The funds provided under this part shall be administered in compliance with the standards set forth in part 38 (Equal Treatment for Faith-based Organizations) of this chapter.

[Order No. 2703–2004, 69 FR 2838, Jan. 21, 2004]

SUBMISSION AND REVIEW OF APPLICATIONS

§ 33.60 General.

This subpart describes the process and criteria for Bureau of Justice Assistance review and approval of state applications and amendments.

§ 33.61 Review of State applications.

(a) *Review criteria.* The Act provides the basis for review and approval or disapproval of state applications and amendments in whole or in part. These are:

(1) Compliance with the statutory requirements of the Justice Assistance Act and the regulations of the Bureau of Justice Assistance. Section 406(a)(1) of the Act.

(2) Compliance with Executive Order 12372, ''Intergovernmental Review of Federal Programs.'' This program is covered by Executive Order 12372 and Department of Justice Implementing regulations 28 CFR part 30. States must submit block grant applications to the state ''Single Point of Contact'', if there is a ''Single Point of Contact'', and if this program has been selected for coverage by the state process, at the same time applications are submitted to the Bureau of Justice Assistance. State processes have 60 days starting from the application submission date to comment on applications. Applicants should contact their state ''Single Point of Contact'' as soon as possible to alert them of the prospective application and receive instructions regarding the process.

(b) *Sixty day rule.* The Bureau of Justice Assistance shall approve or disapprove applications or amendments within sixty (60) days of official receipt. The application or amendment shall be considered approved unless the Bureau of Justice Assistance informs the applicant in writing of specific reasons for disapproval prior to the expiration of the 60-day period. Applications that are incomplete, as determined by the Bureau of Justice Assistance, shall not be considered officially received for purposes of the 60-day rule. Section 406(a)(2) of the Act.

(c) *Written notification and reasons for disapproval.* The Bureau of Justice Assistance shall notify the applicant in writing of the specific reasons for the disapproval of the application or amendment, in whole or in part. Section 406(a)(2) of the Act.

(d) *Affirmative finding.* The Bureau of Justice Assistance, prior to approval of the application or amendments, must make an affirmative finding in writing that the program or project has been reviewed in accordance with section 405 of the Act and is likely to contribute effectively to the achievement of the objectives of the Act. Section 406(a)(2) of the Act.

REPORTS

§ 33.70 Annual performance report.

(a) Section 405 of the Justice Assistance Act requires that the state, or a local unit of government in the case of a non-participating state, submit annually to the Bureau of Justice Assistance a performance report (including an assessment of impact) concerning the activities carried out under the grant. These performance reports will provide the basis for the annual report from the Bureau to the President and the Congress as required by section 810 of the Act.

(b) The performance report will describe the activities undertaken and results achieved of each project funded. It will include the data gathered on the approved performance indicators. The report is due to the Bureau by no later than December 31 and must cover projects for the prior Federal fiscal year that have either been completed or been in operation for 12 months or

more. The first performance report shall be due to the Bureau by December 31, 1986.

(c) In order to help states and localities prepare these performance reports, the Bureau will provide data collection forms and instructions that will enable information to be gathered and reported in the most convenient manner possible. These forms and instructions will be developed in consultation with states and localities.

§ 33.71 Initial project report.

States are required to provide to the Bureau of Justice Assistance within 30 days after the award of a subgrant, an initial project report which provides information on the subgrant recipient (name, address, contact person), the subgrant period, the type of award (new or renewal), the subgrant funding level, and the general target area (geographic area, population group) to be impacted. The Bureau of Justice Assistance will provide a form to assist the states in reporting this information.

SUSPENSION OF FUNDING

§ 33.80 Suspension of funding.

The Bureau of Justice Assistance shall, after reasonable notice and opportunity for a hearing on the record, terminate or suspend funding for a state that implements programs or projects which fail to conform to the requirements or statutory objectives of the Act, or that fails to comply substantially with the Justice Assistance Act, these regulations or the terms and conditions of its grant award. Hearing and appeal procedures are set forth in Department of Justice regulations 28 CFR part 18.

Subpart B—Bulletproof Vest Partnership Grant Program Applying for the Program

SOURCE: 63 FR 50761, Sept. 23, 1998, unless otherwise noted.

§ 33.100 Definitions.

The Bureau of Justice Assistance (BJA) will use the following definitions in providing guidance to your jurisdiction regarding the purchase of armor vests under the Bulletproof Vest Partnership Grant Act of 1998—

(a) The term *program* will refer to the activities administered by BJA to implement the Bulletproof Vest Partnership Grant Act of 1998;

(b) The terms *you* and *your* will refer to a jurisdiction applying to this program;

(c) The term *armor vest* under this program will mean a vest that has met the performance standards established by the National Law Enforcement and Corrections Technology Center of the National Institute of Justice (NIJ) as published in NIJ Standard 0101.03, or any formal revision of this standard;

(d) The term *State* will be used to mean each of the 50 States, as well as the District of Columbia, the Commonwealth of Puerto Rico, the United States Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands;

(e) The term *unit of local government* will mean a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level;

(f) The term *Indian tribe* has the same meaning as in section 4(e) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(e)) which defines Indian tribe as meaning any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) (43 U.S.C. 1601 *et seq.*);

(g) The term *law enforcement officer* will mean any officer, agent, or employee of a State, unit of local government, or Indian tribe authorized by law or by a government agency to engage in or supervise the prevention, detection, or investigation of any violation of criminal law, or authorized by law to supervise sentenced criminal offenders; and

(h) The term *mandatory wear policy* will mean a policy formally adopted by a jurisdiction that requires a law enforcement officer to wear an armor vest throughout each duty shift whenever feasible.

§ 33.101 Standards and requirements.

This program has been developed to assist your jurisdiction with selecting and obtaining high quality armor vests in the quickest and easiest manner available. The program will assist your jurisdiction in determining which type of armor vest will best suit your jurisdiction's needs, and will ensure that each armor vest obtained through this program meets the NIJ standard.

(a) Your jurisdiction will be provided with model numbers for armor vests that meet the NIJ Standard in order to ensure your jurisdiction receives the approved vests in the quickest manner;

(b) If you are a State or unit of local government, your jurisdiction will be required to partner with the Federal government in this program by paying at least 50 percent of the total cost for each armor vest purchased under this program. These matching funds may not be obtained from another Federal source;

(c) If you are an Indian tribe, your jurisdiction will be required to partner with the Federal government in this program by paying at least 50 percent of the total cost for each armor vest purchased under this program. Total cost will include the cost of the armor vests, taxes, shipping, and handling. You may use any funds appropriated by Congress toward the performing of law enforcement functions on your lands as matching funds for this program or any funds appropriated by Congress for the activities of any agency of your tribal government;

(d) BJA will conduct outreach to ensure that at least half of all funds available for armor vest purchases be given to units of local government with fewer than 100,000 residents;

(e) Each State government is responsible for coordinating the needs of law enforcement officers across agencies within its own jurisdiction and making one application per fiscal year;

(f) Each unit of local government and Indian tribe is responsible for coordinating the needs of law enforcement officers across agencies within its own jurisdiction and making one application per fiscal year;

(g) Your individual jurisdiction may not receive more than 5 percent of the total program funds in any fiscal year;

(h) The 50 States, the District of Columbia, and the Commonwealth of Puerto Rico, together with their units of local government, each may not receive less than one half percent and not more than 20 percent of the total program funds during a fiscal year;

(i) The United States Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands, together with their units of local government, each may not receive less than one fourth percent and not more than 20 percent of the total program funds during a fiscal year; and

(j) If your jurisdiction also is applying for a Local Law Enforcement Block Grant (LLEBG), then you will be asked to certify:

(1) Whether LLEBG funds will be used to purchase vests; and, if not,

(2) Whether your jurisdiction considered using LLEBG funds to purchase vests, but has concluded it will not use its LLEBG funds in that manner.

§ 33.102 Preferences.

BJA may give preferential consideration, at its discretion, to an application from a jurisdiction that—

(a) Has the greatest need for armor vests based on the percentage of law enforcement officers who do not have access to an armor vest;

(b) Has, or will institute, a mandatory wear policy that requires on-duty law enforcement officers to wear armor vests whenever feasible; and

(c) Has a violent crime rate at or above the national average as determined by the Federal Bureau of Investigation; or

(d) Has not received a Local Law Enforcement Block Grant.

§ 33.103 How to apply.

BJA will issue Guidelines regarding the process to follow in applying to the program for grants of armor vests.

PART 34—OJJDP COMPETITION AND PEER REVIEW PROCEDURES

Subpart A—Competition

Sec.

34.1 Purpose and applicability.
34.2 Exceptions to applicability.
34.3 Selection criteria.

34.4 Additional competitive application requirements and procedures.

Subpart B—Peer Review

34.100 Purpose and applicability.
34.101 Exceptions to applicability.
34.102 Peer review procedures.
34.103 Definition.
34.104 Use of peer review.
34.105 Peer review methods.
34.106 Number of peer reviewers.
34.107 Use of Department of Justice staff.
34.108 Selection of reviewers.
34.109 Qualifications of peer reviewers.
34.110 Management of peer reviews.
34.111 Compensation.

Subpart C—Emergency Expedited Review [Reserved]

AUTHORITY: Juvenile Justice and Delinquency Prevention Act of 1974, as amended, (42 U.S.C. 5601 *et seq.*).

SOURCE: 55 FR 39234, Sept. 25, 1990, unless otherwise noted.

Subpart A—Competition

§ 34.1 Purpose and applicability.

(a) This subpart of the regulation implements section 262(d)(1) (A) and (B) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended (42 U.S.C. 5601 *et seq.*). This provision requires that project applications, selected for categorical assistance awards under part C—National Programs shall be selected through a competitive process established by rule by the Administrator, OJJDP. The statute specifies that this process must include announcement in the FEDERAL REGISTER of the availability of funds for assistance programs, the general criteria applicable to the selection of applications for assistance, and a description of the procedures applicable to the submission and review of assistance applications.

(b) This subpart of the regulation applies to all grant, cooperative agreement, and other assistance awards selected by the Administrator, OJJDP, or the Administrator's designee, under part C—National Programs, of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, except as provided in the exceptions to applicability set forth below.

§ 34.2 Exceptions to applicability.

The following are assistance and procurement contract award situations that OJJDP considers to be outside the scope of the section 262(d)(1) competition requirement:

(a) Assistance awards to initially fund or continue projects if the Administrator has made a written determination that the proposed program is not within the scope of any program announcement expected to be issued, is otherwise eligible for an award, and the proposed project is of such outstanding merit, as determined through peer review under subpart B of this part, that an assistance award without competition is justified (section 262(d)(1)(B)(i));

(b) Assistance awards to initially fund or continue training services to be funded under part C, section 244, if the Administrator has made a written determination that the applicant is uniquely qualified to provide proposed training services and other qualified sources are not capable of providing such services (section 262(d)(1)(B)(ii));

(c) Assistance awards of funds transferred to OJJDP by another Federal agency to augment authorized juvenile justice programs, projects, or purposes;

(d) Funds transferred to other Federal agencies by OJJDP for program purposes as authorized by law;

(e) Procurement contract awards which are subject to applicable Federal laws and regulations governing the procurement of goods and services for the benefit and use of the government;

(f) Assistance awards from the 5% ''set aside'' of Special Emphasis funds under section 261(e); and

(g) Assistance awards under section 241(f).

§ 34.3 Selection criteria.

(a) All individual project applications will, at a minimum, be subject to review based on the extent to which they meet the following general selection criteria:

(1) The problem to be addressed by the project is clearly stated;

(2) The objectives of the proposed project are clearly defined;

(3) The project design is sound and contains program elements directly linked to the achievement of project objectives;

(4) The project management structure is adequate to the successful conduct of the project;

(5) Organizational capability is demonstrated at a level sufficient to successfully support the project; and

(6) Budgeted costs are reasonable, allowable and cost effective for the activities proposed to be undertaken.

(b) The general selection criteria set forth under paragraph (a) of this section, may be supplemented for each announced competitive program by program-specific selection criteria for the particular part C program. Such announcements may also modify the general selection criteria to provide greater specificity or otherwise improve their applicability to a given program. The relative weight (point value) for each selection criterion will be specified in the program announcement.

§ 34.4 Additional competitive application requirements and procedures.

(a) *Applications for grants.* Any applicant eligible for assistance may submit on or before such submission deadline date or dates as the Administrator may establish in program announcements, an application containing such pertinent information and in accordance with the forms and instructions as prescribed therein and any additional forms and instructions as may be specified by the Administrator. Such application shall be executed by the applicant or an official or representative of the applicant duly authorized to make such application and to assume on behalf of the applicant the obligations imposed by law, applicable regulations, and any additional terms and conditions of the assistance award. The Administrator may require any applicant eligible for assistance under this subpart to submit a preliminary proposal for review and approval prior to the acceptance of an application.

(b) *Cooperative arrangements.* (1) When specified in program announcements, eligible parties may enter into cooperative arrangements with other eligible parties, including those in another State, and submit joint applications for assistance.

(2) A joint application made by two or more applicants for assistance may have separate budgets corresponding to the programs, services and activities performed by each of the joint applicants or may have a combined budget. If joint applications present separate budgets, the Administrator may make separate awards, or may award a single assistance award authorizing separate amounts for each of the joint applicants.

(c) *Evaluation of applications submitted under part C of the Act.* All applications filed in accordance with § 34.1 of this subpart for assistance with part C—National Programs funds shall be evaluated by the Administrator through OJJDP and other DOJ personnel (internal review) and by such experts or consultants required for this purpose that the Administrator determines are specially qualified in the particular part C program area covered by the announced program (peer review). Supplementary application review procedures, in addition to internal review and peer review, may be used for each competitive part C program announcement. The program announcement shall clearly state the application review procedures (peer review and other) to be used for each competitive part C program announcement.

(d) *Applicant's performance on prior award.* When the applicant has previously received an award from OJJDP or another Federal agency, the applicant's noncompliance with requirements applicable to such prior award as reflected in past written evaluation reports and memoranda on performance, and the completeness of required submissions, may be considered by the Administrator. In any case where the Administrator proposes to deny assistance based upon the applicant's noncompliance with requirements applicable to a prior award, the Administrator shall do so only after affording the applicant reasonable notice and an opportunity to rebut the proposed basis for denial of assistance.

(e) *Applicant's fiscal integrity.* Applicants must meet OJP standard of fiscal integrity (see OJP M 7100.1C, par. 24 and OJP HB 4500.2B, par. 48 a and b).

(f) *Disposition of applications.* On the basis of competition and applicable review procedures completed pursuant to this regulation, the Administrator will either:

(1) Approve the application for funding, in whole or in part, for such amount of funds, and subject to such conditions as the Administrator deems necessary or desirable for the completion of the approved project;

(2) Determine that the application is of acceptable quality for funding, in that it meets minimum criteria, but that the application must be disapproved for funding because it did not rank sufficiently high in relation to other applications approved for funding to qualify for an award based on the level of funding allocated to the program; or

(3) Reject the application for failure to meet the applicable selection criteria at a sufficiently high level to justify an award of funds, or for other reason which the Administrator deems compelling, as provided in the documentation of the funding decision.

(g) *Notification of disposition.* The Administrator will notify the applicant in writing of the disposition of the application. A signed Grant/Cooperative Agreement form will be issued to notify the applicant of an approved project application.

(h) *Effective date of approved grant.* Federal financial assistance is normally available only with respect to obligations incurred subsequent to the effective date of an approved assistance project. The effective date of the project will be set forth in the Grant/Cooperative Agreement form. Recipients may be reimbursed for costs resulting from obligations incurred before the effective date of the assistance award, if such costs are authorized by the Administrator in the notification of assistance award or subsequently in writing, and otherwise would be allowable as costs of the assistance award under applicable guidelines, regulations, and award terms and conditions.

Subpart B—Peer Review

§ 34.100 Purpose and applicability.

(a) This subpart of the regulation implements section 262(d)(2) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended. This provision requires that projects funded as new or continuation programs selected for categorical assistance awards under part C—National Programs shall be reviewed before selection and thereafter as appropriate through a formal peer review process. Such process must utilize experts (other than officials and employees of the Department of Justice) in fields related to the technical and/or subject matter of the proposed program.

(b) This subpart of the regulation applies to all applications for grants, cooperative agreements, and other assistance awards selected by the Administrator, OJJDP, for funding under part C—National Programs that are being considered for competitive and noncompetitive (including continuation) awards to begin new project periods, except as provided in the exceptions to applicability set forth below.

§ 34.101 Exceptions to applicability.

The assistance and procurement contract situations specified in § 34.2 (c), (d), (e), (f), and (g) of subpart A of this part are considered by OJJDP to be outside the scope of the section 262(d) peer review requirement as set forth in this subpart.

§ 34.102 Peer review procedures.

The OJJDP peer review process is contained in an OJJDP ''Peer Review Guideline,'' developed in consultation with the Directors and other appropriate officials of the National Science Foundation and the National Institute of Mental Health. In addition to specifying substantive and procedural matters related to the peer review process, the ''Guideline'' addresses such issues as standards of conduct, conflict of interest, compensation of peer reviewers, etc. The ''Guideline'' describes a process that evolves in accordance with experience and opportunities to effect improvements. The peer review process for all part C—National Programs assistance awards subject to this regulation will be conducted in a manner consistent with this subpart as implemented in the ''Peer Review Guideline''.

§ 34.103 Definition.

Peer review means the technical and programmatic evaluation by a group of experts (other than officers and employees of the Department of Justice)

qualified by training and experience to give expert advice, based on selection criteria established under subpart A of this part, in a program announcement, or as established by the Administrator, on the technical and programmatic merit of assistance.

§ 34.104 Use of peer review.

(a) *Peer review for competitive and noncompetitive applications.* (1) For competitive applications, each program announcement will indicate the program specific peer review procedures and selection criteria to be followed in peer review for that program. In the case of competitive programs for which a large number of applications is expected, preapplications (concept papers) may be required. Preapplications will be reviewed by qualified OJJDP staff to eliminate those pre-applications which fail to meet minimum program requirements, as specified in a program announcement, or clearly lack sufficient merit to qualify as potential candidates for funding consideration. The Administrator may subject both preapplications and formal applications to the peer review process.

(2) For noncompetitive applications, the general selection criteria set forth under subpart A of this part may be supplemented by program specific selection criteria for the particular part C program. Applicants for noncompetitive continuation awards will be fully informed of any additional specific criteria in writing.

(b) When formal applications are required in response to a program announcement, an initial review will be conducted by qualified OJJDP staff, in order to eliminate from peer review consideration applications which do not meet minimum program requirements. Such requirements will be specified in the program announcement. Applications determined to be qualified and eligible for further consideration will then be considered under the peer review process.

(c) Ratings will be in the form of numerical scores assigned by individual peer reviewers as illustrated in the OJJDP ''Peer Review Guideline.'' The results of peer review under a competitive program will be a relative aggregate ranking of applications in the form of ''Summary Ratings.'' The results of peer review for a noncompetitive new or continuation project will be in the form of numerical scores based on criteria established by the Administrator.

(d) Peer review recommendations, in conjunction with the results of internal review and any necessary supplementary review, will assist the Administrator's consideration of competitive, noncompetitive, applications and selection of applications for funding.

(e) Peer review recommendations are advisory only and are binding on the Administrator only as provided by section 262(d)(B)(i) for noncompetitive assistance awards to programs determined through peer review not to be of such outstanding merit that an award without competition is justified. In such case, the determination of whether to issue a competitive program announcement will be subject to the exercise of the Administrator's discretion.

§ 34.105 Peer review methods.

(a) For both competitive and noncompetitive applications, peer review will normally consist of written comments provided in response to the general selection criteria established under subpart A of this part and any program specific selection criteria identified in the program announcement or otherwise established by the Administrator, together with the assignment of numerical values. Peer review may be conducted at meetings with peer reviewers held under OJJDP oversight, through mail reviews, or a combination of both. When advisable, site visits may also be employed. The method of peer review anticipated for each announced competitive program, including the evaluation criteria to be used by peer reviewers, will be specified in each program announcement.

(b) When peer review is conducted through meetings, peer review panelists will be gathered together for instruction by OJJDP, including review of the OJJDP ''Peer Review Guideline''. OJJDP will oversee the conduct of individual and group review sessions, as appropriate. When time or other factors preclude the convening of a peer review panel, mail reviews will be used.

For competitive programs, mail reviews will be used only where the Administrator makes a written determination of necessity.

§ 34.106 Number of peer reviewers.

The number of peer reviewers will vary by program (as affected by the volume of applications anticipated or received). OJJDP will select a minimum of three peer reviewers (qualified individuals who are not officers or employees of the Department of Justice) for each program or project review in order to ensure a diversity of backgrounds and perspectives. In no case will fewer than three reviews be made of each individual application.

§ 34.107 Use of Department of Justice staff.

OJJDP will use qualified OJJDP and other DOJ staff as internal reviewers. Internal reviewers determine applicant compliance with basic program and statutory requirements, review the results of peer review, and provide overall program evaluation and recommendations to the Administrator.

§ 34.108 Selection of reviewers.

The Program Manager, through the Director of the OJJDP program division with responsibility for a particular program or project will propose a selection of peer reviewers from an extensive and varied pool of juvenile justice and delinquency prevention experts for approval by the Administrator. The selection process for peer reviewers is detailed in the OJJDP ''Peer Review Guideline''.

§ 34.109 Qualifications of peer reviewers.

The general reviewer qualification criteria to be used in the selection of peer reviewers are:

(a) Generalized knowledge of juvenile justice or related fields; and

(b) Specialized knowledge in areas or disciplines addressed by the applications to be reviewed under a particular program.

(c) Must not have a conflict of interest (see OJP M7100.1C, par. 94).

Additional details concerning peer reviewer qualifications are provided in the OJJDP ''Peer Review Guideline''.

§ 34.110 Management of peer reviews.

A technical support contractor may assist in managing the peer review process.

§ 34.111 Compensation.

All peer reviewers will be eligible to be paid according to applicable regulations and policies concerning consulting fees and reimbursement for expenses. Detailed information is provided in the OJJDP ''Peer Review Guideline''.

Subpart C—Emergency Expedited Review [Reserved]

PART 35—NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES

Subpart A—General

Sec.
35.101 Purpose.
35.102 Application.
35.103 Relationship to other laws.
35.104 Definitions.
35.105 Self-evaluation.
35.106 Notice.
35.107 Designation of responsible employee and adoption of grievance procedures.
35.108–35.129 [Reserved]

Subpart B—General Requirements

35.130 General prohibitions against discrimination.
35.131 Illegal use of drugs.
35.132 Smoking.
35.133 Maintenance of accessible features.
35.134 Retaliation or coercion.
35.135 Personal devices and services.
35.136 Service animals.
35.137 Mobility devices.
35.138 Ticketing.
35.139 Direct threat.

Subpart C—Employment

35.140 Employment discrimination prohibited.
35.141–35.148 [Reserved]

Subpart D—Program Accessibility

35.149 Discrimination prohibited.
35.150 Existing facilities.
35.151 New construction and alterations.
35.152 Jails, detention and correctional facilities, and community correctional facilities.

35.153–35.159 [Reserved]

Subpart E—Communications

35.160 General.
35.161 Telecommunications.
35.162 Telephone emergency services.
35.163 Information and signage.
35.164 Duties.
35.165–35.169 [Reserved]

Subpart F—Compliance Procedures

35.170 Complaints.
35.171 Acceptance of complaints.
35.172 Investigations and compliance reviews.
35.173 Voluntary compliance agreements.
35.174 Referral.
35.175 Attorney's fees.
35.176 Alternative means of dispute resolution.
35.177 Effect of unavailability of technical assistance.
35.178 State immunity.
35.179–35.189 [Reserved]

Subpart G—Designated Agencies

35.190 Designated agencies.
35.191–35.999 [Reserved]

APPENDIX A TO PART 35—GUIDANCE TO REVISIONS TO ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES

APPENDIX B TO PART 35—GUIDANCE ON ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES ORIGINALLY PUBLISHED JULY 26, 1991

AUTHORITY: 5 U.S.C. 301; 28 U.S.C. 509, 510; 42 U.S.C. 12134.

SOURCE: Order No. 1512–91, 56 FR 35716, July 26, 1991, unless otherwise noted.

Subpart A—General

§ 35.101 Purpose.

The purpose of this part is to effectuate subtitle A of title II of the Americans with Disabilities Act of 1990 (42 U.S.C. 12131), which prohibits discrimination on the basis of disability by public entities.

§ 35.102 Application.

(a) Except as provided in paragraph (b) of this section, this part applies to all services, programs, and activities provided or made available by public entities.

(b) To the extent that public transportation services, programs, and activities of public entities are covered by subtitle B of title II of the ADA (42 U.S.C. 12141), they are not subject to the requirements of this part.

§ 35.103 Relationship to other laws.

(a) *Rule of interpretation.* Except as otherwise provided in this part, this part shall not be construed to apply a lesser standard than the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 791) or the regulations issued by Federal agencies pursuant to that title.

(b) *Other laws.* This part does not invalidate or limit the remedies, rights, and procedures of any other Federal laws, or State or local laws (including State common law) that provide greater or equal protection for the rights of individuals with disabilities or individuals associated with them.

§ 35.104 Definitions.

For purposes of this part, the term—

1991 Standards means the requirements set forth in the ADA Standards for Accessible Design, originally published on July 26, 1991, and republished as Appendix D to 28 CFR part 36.

2004 ADAAG means the requirements set forth in appendices B and D to 36 CFR part 1191 (2009).

2010 Standards means the 2010 ADA Standards for Accessible Design, which consist of the 2004 ADAAG and the requirements contained in § 35.151.

Act means the Americans with Disabilities Act (Pub. L. 101–336, 104 Stat. 327, 42 U.S.C. 12101–12213 and 47 U.S.C. 225 and 611).

Assistant Attorney General means the Assistant Attorney General, Civil Rights Division, United States Department of Justice.

Auxiliary aids and services includes—(1) Qualified interpreters on-site or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice,

text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing;

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

Complete complaint means a written statement that contains the complainant's name and address and describes the public entity's alleged discriminatory action in sufficient detail to inform the agency of the nature and date of the alleged violation of this part. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name, if possible) the alleged victims of discrimination.

Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

Designated agency means the Federal agency designated under subpart G of this part to oversee compliance activities under this part for particular components of State and local governments.

Direct threat means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices or procedures, or by the provision of auxiliary aids or services as provided in §35.139.

Disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

(1)(i) The phrase *physical or mental impairment* means—

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, respiratory (including speech organs), cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine;

(B) Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(ii) The phrase *physical or mental impairment* includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism.

(iii) The phrase *physical or mental impairment* does not include homosexuality or bisexuality.

(2) The phrase *major life activities* means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) The phrase *has a record of such an impairment* means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) The phrase *is regarded as having an impairment means*—

(i) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a public entity as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major

life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (1) of this definition but is treated by a public entity as having such an impairment.

(5) The term *disability* does not include—

(i) Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(ii) Compulsive gambling, kleptomania, or pyromania; or

(iii) Psychoactive substance use disorders resulting from current illegal use of drugs.

Drug means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

Existing facility means a facility in existence on any given date, without regard to whether the facility may also be considered newly constructed or altered under this part.

Facility means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the building, property, structure, or equipment is located.

Historic preservation programs means programs conducted by a public entity that have preservation of historic properties as a primary purpose.

Historic Properties means those properties that are listed or eligible for listing in the National Register of Historic Places or properties designated as historic under State or local law.

Housing at a place of education means housing operated by or on behalf of an elementary, secondary, undergraduate, or postgraduate school, or other place of education, including dormitories, suites, apartments, or other places of residence.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). The term *illegal use of drugs* does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with a disability means a person who has a disability. The term *individual with a disability* does not include an individual who is currently engaging in the illegal use of drugs, when the public entity acts on the basis of such use.

Other power-driven mobility device means any mobility device powered by batteries, fuel, or other engines—whether or not designed primarily for use by individuals with mobility disabilities—that is used by individuals with mobility disabilities for the purpose of locomotion, including golf cars, electronic personal assistance mobility devices (EPAMDs), such as the Segway® PT, or any mobility device designed to operate in areas without defined pedestrian routes, but that is not a wheelchair within the meaning of this section. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

Public entity means—

(1) Any State or local government;

(2) Any department, agency, special purpose district, or other instrumentality of a State or States or local government; and

(3) The National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act).

Qualified individual with a disability means an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.

Qualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively,

using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.

Qualified reader means a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.

Section 504 means section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–112, 87 Stat. 394 (29 U.S.C. 794)), as amended.

Service animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. Examples of work or tasks include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing non-violent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

State means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

Video remote interpreting (VRI) service means an interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide-bandwidth video connection that delivers high-quality video images as provided in §35.160(d).

Wheelchair means a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or of both indoor and outdoor locomotion. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

[Order No. 1512–91, 56 FR 35716, July 26, 1991, as amended by AG Order No. 3180–2010, 75 FR 56177, Sept. 15, 2010; 76 FR 13285, Mar. 11, 2011]

§35.105 Self-evaluation.

(a) A public entity shall, within one year of the effective date of this part, evaluate its current services, policies, and practices, and the effects thereof, that do not or may not meet the requirements of this part and, to the extent modification of any such services, policies, and practices is required, the public entity shall proceed to make the necessary modifications.

(b) A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the self-evaluation process by submitting comments.

(c) A public entity that employs 50 or more persons shall, for at least three years following completion of the self-evaluation, maintain on file and make available for public inspection:

(1) A list of the interested persons consulted;

(2) A description of areas examined and any problems identified; and

(3) A description of any modifications made.

(d) If a public entity has already complied with the self-evaluation requirement of a regulation implementing section 504 of the Rehabilitation Act of 1973, then the requirements of this section shall apply only to those

policies and practices that were not included in the previous self-evaluation.

(Approved by the Office of Management and Budget under control number 1190–0006)

[56 FR 35716, July 26, 1991, as amended by Order No. 1694–93, 58 FR 17521, Apr. 5, 1993]

§ 35.106 Notice.

A public entity shall make available to applicants, participants, beneficiaries, and other interested persons information regarding the provisions of this part and its applicability to the services, programs, or activities of the public entity, and make such information available to them in such manner as the head of the entity finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

§ 35.107 Designation of responsible employee and adoption of grievance procedures.

(a) *Designation of responsible employee.* A public entity that employs 50 or more persons shall designate at least one employee to coordinate its efforts to comply with and carry out its responsibilities under this part, including any investigation of any complaint communicated to it alleging its noncompliance with this part or alleging any actions that would be prohibited by this part. The public entity shall make available to all interested individuals the name, office address, and telephone number of the employee or employees designated pursuant to this paragraph.

(b) *Complaint procedure.* A public entity that employs 50 or more persons shall adopt and publish grievance procedures providing for prompt and equitable resolution of complaints alleging any action that would be prohibited by this part.

§§ 35.108–35.129 [Reserved]

Subpart B—General Requirements

§ 35.130 General prohibitions against discrimination.

(a) No qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity.

(b)(1) A public entity, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of disability—

(i) Deny a qualified individual with a disability the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified individual with a disability an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified individual with a disability with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aids, benefits, or services to individuals with disabilities or to any class of individuals with disabilities than is provided to others unless such action is necessary to provide qualified individuals with disabilities with aids, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified individual with a disability by providing significant assistance to an agency, organization, or person that discriminates on the basis of disability in providing any aid, benefit, or service to beneficiaries of the public entity's program;

(vi) Deny a qualified individual with a disability the opportunity to participate as a member of planning or advisory boards;

(vii) Otherwise limit a qualified individual with a disability in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving the aid, benefit, or service.

(2) A public entity may not deny a qualified individual with a disability the opportunity to participate in services, programs, or activities that are not separate or different, despite the existence of permissibly separate or different programs or activities.

(3) A public entity may not, directly or through contractual or other arrangements, utilize criteria or methods of administration:

(i) That have the effect of subjecting qualified individuals with disabilities to discrimination on the basis of disability;

(ii) That have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the public entity's program with respect to individuals with disabilities; or

(iii) That perpetuate the discrimination of another public entity if both public entities are subject to common administrative control or are agencies of the same State.

(4) A public entity may not, in determining the site or location of a facility, make selections—

(i) That have the effect of excluding individuals with disabilities from, denying them the benefits of, or otherwise subjecting them to discrimination; or

(ii) That have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the service, program, or activity with respect to individuals with disabilities.

(5) A public entity, in the selection of procurement contractors, may not use criteria that subject qualified individuals with disabilities to discrimination on the basis of disability.

(6) A public entity may not administer a licensing or certification program in a manner that subjects qualified individuals with disabilities to discrimination on the basis of disability, nor may a public entity establish requirements for the programs or activities of licensees or certified entities that subject qualified individuals with disabilities to discrimination on the basis of disability. The programs or activities of entities that are licensed or certified by a public entity are not, themselves, covered by this part.

(7) A public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity.

(8) A public entity shall not impose or apply eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any service, program, or activity, unless such criteria can be shown to be necessary for the provision of the service, program, or activity being offered.

(c) Nothing in this part prohibits a public entity from providing benefits, services, or advantages to individuals with disabilities, or to a particular class of individuals with disabilities beyond those required by this part.

(d) A public entity shall administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities.

(e)(1) Nothing in this part shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit provided under the ADA or this part which such individual chooses not to accept.

(2) Nothing in the Act or this part authorizes the representative or guardian of an individual with a disability to decline food, water, medical treatment, or medical services for that individual.

(f) A public entity may not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids or program accessibility, that are required to provide that individual or group with the nondiscriminatory treatment required by the Act or this part.

(g) A public entity shall not exclude or otherwise deny equal services, programs, or activities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(h) A public entity may impose legitimate safety requirements necessary for the safe operation of its services, programs, or activities. However, the public entity must ensure that its safety requirements are based

on actual risks, not on mere speculation, stereotypes, or generalizations about individuals with disabilities.

[Order No. 1512–91, 56 FR 35716, July 26, 1991, as amended by AG Order No. 3180–2010, 75 FR 56178, Sept. 15, 2010]

§ 35.131 Illegal use of drugs.

(a) *General.* (1) Except as provided in paragraph (b) of this section, this part does not prohibit discrimination against an individual based on that individual's current illegal use of drugs.

(2) A public entity shall not discriminate on the basis of illegal use of drugs against an individual who is not engaging in current illegal use of drugs and who—

(i) Has successfully completed a supervised drug rehabilitation program or has otherwise been rehabilitated successfully;

(ii) Is participating in a supervised rehabilitation program; or

(iii) Is erroneously regarded as engaging in such use.

(b) *Health and drug rehabilitation services.* (1) A public entity shall not deny health services, or services provided in connection with drug rehabilitation, to an individual on the basis of that individual's current illegal use of drugs, if the individual is otherwise entitled to such services.

(2) A drug rehabilitation or treatment program may deny participation to individuals who engage in illegal use of drugs while they are in the program.

(c) *Drug testing.* (1) This part does not prohibit a public entity from adopting or administering reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual who formerly engaged in the illegal use of drugs is not now engaging in current illegal use of drugs.

(2) Nothing in paragraph (c) of this section shall be construed to encourage, prohibit, restrict, or authorize the conduct of testing for the illegal use of drugs.

§ 35.132 Smoking.

This part does not preclude the prohibition of, or the imposition of restrictions on, smoking in transportation covered by this part.

§ 35.133 Maintenance of accessible features.

(a) A public entity shall maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities by the Act or this part.

(b) This section does not prohibit isolated or temporary interruptions in service or access due to maintenance or repairs.

(c) If the 2010 Standards reduce the technical requirements or the number of required accessible elements below the number required by the 1991 Standards, the technical requirements or the number of accessible elements in a facility subject to this part may be reduced in accordance with the requirements of the 2010 Standards.

[56 FR 35716, July 26, 1991, as amended by Order No. 1694–93, 58 FR 17521, Apr. 5, 1993; AG Order No. 3180–2010, 75 FR 56178, Sept. 15, 2010]

§ 35.134 Retaliation or coercion.

(a) No private or public entity shall discriminate against any individual because that individual has opposed any act or practice made unlawful by this part, or because that individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under the Act or this part.

(b) No private or public entity shall coerce, intimidate, threaten, or interfere with any individual in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other individual in the exercise or enjoyment of, any right granted or protected by the Act or this part.

§ 35.135 Personal devices and services.

This part does not require a public entity to provide to individuals with disabilities personal devices, such as wheelchairs; individually prescribed devices, such as prescription eyeglasses or hearing aids; readers for personal use or study; or services of a personal nature including assistance in eating, toileting, or dressing.

§ 35.136 Service animals.

(a) *General.* Generally, a public entity shall modify its policies, practices, or procedures to permit the use of a service animal by an individual with a disability.

(b) *Exceptions.* A public entity may ask an individual with a disability to remove a service animal from the premises if—

(1) The animal is out of control and the animal's handler does not take effective action to control it; or

(2) The animal is not housebroken.

(c) *If an animal is properly excluded.* If a public entity properly excludes a service animal under § 35.136(b), it shall give the individual with a disability the opportunity to participate in the service, program, or activity without having the service animal on the premises.

(d) *Animal under handler's control.* A service animal shall be under the control of its handler. A service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.*, voice control, signals, or other effective means).

(e) *Care or supervision.* A public entity is not responsible for the care or supervision of a service animal.

(f) *Inquiries.* A public entity shall not ask about the nature or extent of a person's disability, but may make two inquiries to determine whether an animal qualifies as a service animal. A public entity may ask if the animal is required because of a disability and what work or task the animal has been trained to perform. A public entity shall not require documentation, such as proof that the animal has been certified, trained, or licensed as a service animal. Generally, a public entity may not make these inquiries about a service animal when it is readily apparent that an animal is trained to do work or perform tasks for an individual with a disability (*e.g.*, the dog is observed guiding an individual who is blind or has low vision, pulling a person's wheelchair, or providing assistance with stability or balance to an individual with an observable mobility disability).

(g) *Access to areas of a public entity.* Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of a public entity's facilities where members of the public, participants in services, programs or activities, or invitees, as relevant, are allowed to go.

(h) *Surcharges.* A public entity shall not ask or require an individual with a disability to pay a surcharge, even if people accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If a public entity normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animal.

(i) *Miniature horses.* (1) *Reasonable modifications.* A public entity shall make reasonable modifications in policies, practices, or procedures to permit the use of a miniature horse by an individual with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability.

(2) *Assessment factors.* In determining whether reasonable modifications in policies, practices, or procedures can be made to allow a miniature horse into a specific facility, a public entity shall consider—

(i) The type, size, and weight of the miniature horse and whether the facility can accommodate these features;

(ii) Whether the handler has sufficient control of the miniature horse;

(iii) Whether the miniature horse is housebroken; and

(iv) Whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation.

(3) *Other requirements.* Paragraphs 35.136(c) through (h) of this section, which apply to service animals, shall also apply to miniature horses.

[AG Order No. 3180–2010, 75 FR 56178, Sept. 15, 2010; 76 FR 13285, Mar. 11, 2011]

§ 35.137 Mobility devices.

(a) *Use of wheelchairs and manually-powered mobility aids.* A public entity shall permit individuals with mobility disabilities to use wheelchairs and manually-powered mobility aids, such as walkers, crutches, canes, braces, or other similar devices designed for use by individuals with mobility disabilities, in any areas open to pedestrian use.

(b)(1) *Use of other power-driven mobility devices.* A public entity shall make reasonable modifications in its policies, practices, or procedures to permit the use of other power-driven mobility devices by individuals with mobility disabilities, unless the public entity can demonstrate that the class of other power-driven mobility devices cannot be operated in accordance with legitimate safety requirements that the public entity has adopted pursuant to § 35.130(h).

(2) *Assessment factors.* In determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification under paragraph (b)(1) of this section, a public entity shall consider—

(i) The type, size, weight, dimensions, and speed of the device;

(ii) The facility's volume of pedestrian traffic (which may vary at different times of the day, week, month, or year);

(iii) The facility's design and operational characteristics (*e.g.,* whether its service, program, or activity is conducted indoors, its square footage, the density and placement of stationary devices, and the availability of storage for the device, if requested by the user);

(iv) Whether legitimate safety requirements can be established to permit the safe operation of the other power-driven mobility device in the specific facility; and

(v) Whether the use of the other power-driven mobility device creates a substantial risk of serious harm to the immediate environment or natural or cultural resources, or poses a conflict with Federal land management laws and regulations.

(c)(1) *Inquiry about disability.* A public entity shall not ask an individual using a wheelchair or other power-driven mobility device questions about the nature and extent of the individual's disability.

(2) *Inquiry into use of other power-driven mobility device.* A public entity may ask a person using an other power-driven mobility device to provide a credible assurance that the mobility device is required because of the person's disability. A public entity that permits the use of an other power-driven mobility device by an individual with a mobility disability shall accept the presentation of a valid, State-issued, disability parking placard or card, or other State-issued proof of disability as a credible assurance that the use of the other power-driven mobility device is for the individual's mobility disability. In lieu of a valid, State-issued disability parking placard or card, or State-issued proof of disability, a public entity shall accept as a credible assurance a verbal representation, not contradicted by observable fact, that the other power-driven mobility device is being used for a mobility disability. A ''valid'' disability placard or card is one that is presented by the individual to whom it was issued and is otherwise in compliance with the State of issuance's requirements for disability placards or cards.

[AG Order No. 3180–2010, 75 FR 56178, Sept. 15, 2010]

§ 35.138 Ticketing.

(a)(1) For the purposes of this section, ''accessible seating'' is defined as wheelchair spaces and companion seats that comply with sections 221 and 802 of the 2010 Standards along with any other seats required to be offered for sale to the individual with a disability pursuant to paragraph (d) of this section.

(2) *Ticket sales.* A public entity that sells tickets for a single event or series of events shall modify its policies, practices, or procedures to ensure that individuals with disabilities have an equal opportunity to purchase tickets for accessible seating—

(i) During the same hours;

(ii) During the same stages of ticket sales, including, but not limited to, pre-sales, promotions, lotteries, waitlists, and general sales;

(iii) Through the same methods of distribution;

(iv) In the same types and numbers of ticketing sales outlets, including telephone service, in-person ticket sales at the facility, or third-party ticketing services, as other patrons; and

(v) Under the same terms and conditions as other tickets sold for the same event or series of events.

(b) *Identification of available accessible seating.* A public entity that sells or distributes tickets for a single event or series of events shall, upon inquiry—

(1) Inform individuals with disabilities, their companions, and third parties purchasing tickets for accessible seating on behalf of individuals with disabilities of the locations of all unsold or otherwise available accessible seating for any ticketed event or events at the facility;

(2) Identify and describe the features of available accessible seating in enough detail to reasonably permit an individual with a disability to assess independently whether a given accessible seating location meets his or her accessibility needs; and

(3) Provide materials, such as seating maps, plans, brochures, pricing charts, or other information, that identify accessible seating and information relevant thereto with the same text or visual representations as other seats, if such materials are provided to the general public.

(c) *Ticket prices.* The price of tickets for accessible seating for a single event or series of events shall not be set higher than the price for other tickets in the same seating section for the same event or series of events. Tickets for accessible seating must be made available at all price levels for every event or series of events. If tickets for accessible seating at a particular price level are not available because of inaccessible features, then the percentage of tickets for accessible seating that should have been available at that price level (determined by the ratio of the total number of tickets at that price level to the total number of tickets in the assembly area) shall be offered for purchase, at that price level, in a nearby or similar accessible location.

(d) *Purchasing multiple tickets.* (1) *General.* For each ticket for a wheelchair space purchased by an individual with a disability or a third-party purchasing such a ticket at his or her request, a public entity shall make available for purchase three additional tickets for seats in the same row that are contiguous with the wheelchair space, provided that at the time of purchase there are three such seats available. A public entity is not required to provide more than three contiguous seats for each wheelchair space. Such seats may include wheelchair spaces.

(2) *Insufficient additional contiguous seats available.* If patrons are allowed to purchase at least four tickets, and there are fewer than three such additional contiguous seat tickets available for purchase, a public entity shall offer the next highest number of such seat tickets available for purchase and shall make up the difference by offering tickets for sale for seats that are as close as possible to the accessible seats.

(3) *Sales limited to less than four tickets.* If a public entity limits sales of tickets to fewer than four seats per patron, then the public entity is only obligated to offer as many seats to patrons with disabilities, including the ticket for the wheelchair space, as it would offer to patrons without disabilities.

(4) *Maximum number of tickets patrons may purchase exceeds four.* If patrons are allowed to purchase more than four tickets, a public entity shall allow patrons with disabilities to purchase up to the same number of tickets, including the ticket for the wheelchair space.

(5) *Group sales.* If a group includes one or more individuals who need to use accessible seating because of a mobility disability or because their disability requires the use of the accessible features that are provided in accessible seating, the group shall be placed in a seating area with accessible seating so that, if possible, the group can sit together. If it is necessary to divide the group, it should be divided so that the individuals in the group who use wheelchairs are not isolated from their group.

(e) *Hold-and-release of tickets for accessible seating.* (1) *Tickets for accessible*

seating may be released for sale in certain limited circumstances. A public entity may release unsold tickets for accessible seating for sale to individuals without disabilities for their own use for a single event or series of events only under the following circumstances—

(i) When all non-accessible tickets (excluding luxury boxes, club boxes, or suites) have been sold;

(ii) When all non-accessible tickets in a designated seating area have been sold and the tickets for accessible seating are being released in the same designated area; or

(iii) When all non-accessible tickets in a designated price category have been sold and the tickets for accessible seating are being released within the same designated price category.

(2) *No requirement to release accessible tickets.* Nothing in this paragraph requires a facility to release tickets for accessible seating to individuals without disabilities for their own use.

(3) *Release of series-of-events tickets on a series-of-events basis.* (i) *Series-of-events tickets sell-out when no ownership rights are attached.* When series-of-events tickets are sold out and a public entity releases and sells accessible seating to individuals without disabilities for a series of events, the public entity shall establish a process that prevents the automatic reassignment of the accessible seating to such ticket holders for future seasons, future years, or future series so that individuals with disabilities who require the features of accessible seating and who become newly eligible to purchase tickets when these series-of-events tickets are available for purchase have an opportunity to do so.

(ii) *Series-of-events tickets when ownership rights are attached.* When series-of-events tickets with an ownership right in accessible seating areas are forfeited or otherwise returned to a public entity, the public entity shall make reasonable modifications in its policies, practices, or procedures to afford individuals with mobility disabilities or individuals with disabilities that require the features of accessible seating an opportunity to purchase such tickets in accessible seating areas.

(f) *Ticket transfer.* Individuals with disabilities who hold tickets for accessible seating shall be permitted to transfer tickets to third parties under the same terms and conditions and to the same extent as other spectators holding the same type of tickets, whether they are for a single event or series of events.

(g) *Secondary ticket market.* (1) A public entity shall modify its policies, practices, or procedures to ensure that an individual with a disability may use a ticket acquired in the secondary ticket market under the same terms and conditions as other individuals who hold a ticket acquired in the secondary ticket market for the same event or series of events.

(2) If an individual with a disability acquires a ticket or series of tickets to an inaccessible seat through the secondary market, a public entity shall make reasonable modifications to its policies, practices, or procedures to allow the individual to exchange his ticket for one to an accessible seat in a comparable location if accessible seating is vacant at the time the individual presents the ticket to the public entity.

(h) *Prevention of fraud in purchase of tickets for accessible seating.* A public entity may not require proof of disability, including, for example, a doctor's note, before selling tickets for accessible seating.

(1) *Single-event tickets.* For the sale of single-event tickets, it is permissible to inquire whether the individual purchasing the tickets for accessible seating has a mobility disability or a disability that requires the use of the accessible features that are provided in accessible seating, or is purchasing the tickets for an individual who has a mobility disability or a disability that requires the use of the accessible features that are provided in the accessible seating.

(2) *Series-of-events tickets.* For series-of-events tickets, it is permissible to ask the individual purchasing the tickets for accessible seating to attest in writing that the accessible seating is for a person who has a mobility disability or a disability that requires the use of the accessible features that are provided in the accessible seating.

(3) *Investigation of fraud.* A public entity may investigate the potential misuse of accessible seating where there is good cause to believe that such seating has been purchased fraudulently.

[AG Order No. 3180–2010, 75 FR 56179, Sept. 15, 2010]

§ 35.139 Direct threat.

(a) This part does not require a public entity to permit an individual to participate in or benefit from the services, programs, or activities of that public entity when that individual poses a direct threat to the health or safety of others.

(b) In determining whether an individual poses a direct threat to the health or safety of others, a public entity must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.

[AG Order No. 3180–2010, 75 FR 56180, Sept. 15, 2010]

Subpart C—Employment

§ 35.140 Employment discrimination prohibited.

(a) No qualified individual with a disability shall, on the basis of disability, be subjected to discrimination in employment under any service, program, or activity conducted by a public entity.

(b)(1) For purposes of this part, the requirements of title I of the Act, as established by the regulations of the Equal Employment Opportunity Commission in 29 CFR part 1630, apply to employment in any service, program, or activity conducted by a public entity if that public entity is also subject to the jurisdiction of title I.

(2) For the purposes of this part, the requirements of section 504 of the Rehabilitation Act of 1973, as established by the regulations of the Department of Justice in 28 CFR part 41, as those requirements pertain to employment, apply to employment in any service, program, or activity conducted by a public entity if that public entity is not also subject to the jurisdiction of title I.

§§ 35.141–35.148 [Reserved]

Subpart D—Program Accessibility

§ 35.149 Discrimination prohibited.

Except as otherwise provided in § 35.150, no qualified individual with a disability shall, because a public entity's facilities are inaccessible to or unusable by individuals with disabilities, be excluded from participation in, or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity.

§ 35.150 Existing facilities.

(a) *General.* A public entity shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. This paragraph does not—

(1) Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;

(2) Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or

(3) Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with § 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all

resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

(b) *Methods*—(1) *General.* A public entity may comply with the requirements of this section through such means as redesign or acquisition of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities, use of accessible rolling stock or other conveyances, or any other methods that result in making its services, programs, or activities readily accessible to and usable by individuals with disabilities. A public entity is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section. A public entity, in making alterations to existing buildings, shall meet the accessibility requirements of §35.151. In choosing among available methods for meeting the requirements of this section, a public entity shall give priority to those methods that offer services, programs, and activities to qualified individuals with disabilities in the most integrated setting appropriate.

(2)(i) *Safe harbor.* Elements that have not been altered in existing facilities on or after March 15, 2012 and that comply with the corresponding technical and scoping specifications for those elements in either the 1991 Standards or in the Uniform Federal Accessibility Standards (UFAS), Appendix A to 41 CFR part 101–19.6 (July 1, 2002 ed.), 49 FR 31528, app. A (Aug. 7, 1984) are not required to be modified in order to comply with the requirements set forth in the 2010 Standards.

(ii) The safe harbor provided in §35.150(b)(2)(i) does not apply to those elements in existing facilities that are subject to supplemental requirements (*i.e.*, elements for which there are neither technical nor scoping specifications in the 1991 Standards). Elements in the 2010 Standards not eligible for the element-by-element safe harbor are identified as follows—

(A) *Residential facilities dwelling units*, sections 233 and 809.

(B) *Amusement rides*, sections 234 and 1002; 206.2.9; 216.12.

(C) *Recreational boating facilities*, sections 235 and 1003; 206.2.10.

(D) *Exercise machines and equipment*, sections 236 and 1004; 206.2.13.

(E) *Fishing piers and platforms*, sections 237 and 1005; 206.2.14.

(F) *Golf facilities*, sections 238 and 1006; 206.2.15.

(G) *Miniature golf facilities*, sections 239 and 1007; 206.2.16.

(H) *Play areas*, sections 240 and 1008; 206.2.17.

(I) *Saunas and steam rooms*, sections 241 and 612.

(J) *Swimming pools, wading pools, and spas*, sections 242 and 1009.

(K) *Shooting facilities with firing positions*, sections 243 and 1010.

(L) *Miscellaneous.* (*1*) Team or player seating, section 221.2.1.4.

(*2*) Accessible route to bowling lanes, section 206.2.11.

(*3*) Accessible route in court sports facilities, section 206.2.12.

(3) *Historic preservation programs.* In meeting the requirements of §35.150(a) in historic preservation programs, a public entity shall give priority to methods that provide physical access to individuals with disabilities. In cases where a physical alteration to an historic property is not required because of paragraph (a)(2) or (a)(3) of this section, alternative methods of achieving program accessibility include—

(i) Using audio-visual materials and devices to depict those portions of an historic property that cannot otherwise be made accessible;

(ii) Assigning persons to guide individuals with handicaps into or through portions of historic properties that cannot otherwise be made accessible; or

(iii) Adopting other innovative methods.

(4) *Swimming pools, wading pools, and spas.* The requirements set forth in sections 242 and 1009 of the 2010 Standards shall not apply until January 31, 2013, if a public entity chooses to make structural changes to existing swimming pools, wading pools, or spas built before March 15, 2012, for the sole purpose of complying with the program accessibility requirements set forth in this section.

(c) *Time period for compliance.* Where structural changes in facilities are undertaken to comply with the obligations established under this section, such changes shall be made within three years of January 26, 1992, but in any event as expeditiously as possible.

(d) *Transition plan.* (1) In the event that structural changes to facilities will be undertaken to achieve program accessibility, a public entity that employs 50 or more persons shall develop, within six months of January 26, 1992, a transition plan setting forth the steps necessary to complete such changes. A public entity shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments. A copy of the transition plan shall be made available for public inspection.

(2) If a public entity has responsibility or authority over streets, roads, or walkways, its transition plan shall include a schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the Act, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas.

(3) The plan shall, at a minimum—

(i) Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;

(ii) Describe in detail the methods that will be used to make the facilities accessible;

(iii) Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and

(iv) Indicate the official responsible for implementation of the plan.

(4) If a public entity has already complied with the transition plan requirement of a Federal agency regulation implementing section 504 of the Rehabilitation Act of 1973, then the requirements of this paragraph (d) shall apply only to those policies and practices that were not included in the previous transition plan.

(Approved by the Office of Management and Budget under control number 1190–0004)

[56 FR 35716, July 26, 1991, as amended by Order No. 1694–93, 58 FR 17521, Apr. 5, 1993; AG Order No. 3180–2010, 75 FR 56180, Sept. 15, 2010; AG Order 3332–2012, 77 FR 30179, May 21, 2012]

§ 35.151 New construction and alterations.

(a) *Design and construction.* (1) Each facility or part of a facility constructed by, on behalf of, or for the use of a public entity shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities, if the construction was commenced after January 26, 1992.

(2) *Exception for structural impracticability.* (i) Full compliance with the requirements of this section is not required where a public entity can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features.

(ii) If full compliance with this section would be structurally impracticable, compliance with this section is required to the extent that it is not structurally impracticable. In that case, any portion of the facility that can be made accessible shall be made accessible to the extent that it is not structurally impracticable.

(iii) If providing accessibility in conformance with this section to individuals with certain disabilities (*e.g.*, those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to

persons with other types of disabilities, (*e.g.*, those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

(b) *Alterations.* (1) Each facility or part of a facility altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part of the facility shall, to the maximum extent feasible, be altered in such manner that the altered portion of the facility is readily accessible to and usable by individuals with disabilities, if the alteration was commenced after January 26, 1992.

(2) The path of travel requirements of §35.151(b)(4) shall apply only to alterations undertaken solely for purposes other than to meet the program accessibility requirements of §35.150.

(3)(i) Alterations to historic properties shall comply, to the maximum extent feasible, with the provisions applicable to historic properties in the design standards specified in §35.151(c).

(ii) If it is not feasible to provide physical access to an historic property in a manner that will not threaten or destroy the historic significance of the building or facility, alternative methods of access shall be provided pursuant to the requirements of §35.150.

(4) *Path of travel.* An alteration that affects or could affect the usability of or access to an area of a facility that contains a primary function shall be made so as to ensure that, to the maximum extent feasible, the path of travel to the altered area and the restrooms, telephones, and drinking fountains serving the altered area are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the cost and scope of such alterations is disproportionate to the cost of the overall alteration.

(i) *Primary function.* A ''primary function'' is a major activity for which the facility is intended. Areas that contain a primary function include, but are not limited to, the dining area of a cafeteria, the meeting rooms in a conference center, as well as offices and other work areas in which the activities of the public entity using the facility are carried out.

(A) Mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, janitorial closets, entrances, and corridors are not areas containing a primary function. Restrooms are not areas containing a primary function unless the provision of restrooms is a primary purpose of the area, *e.g.*, in highway rest stops.

(B) For the purposes of this section, alterations to windows, hardware, controls, electrical outlets, and signage shall not be deemed to be alterations that affect the usability of or access to an area containing a primary function.

(ii) A ''path of travel'' includes a continuous, unobstructed way of pedestrian passage by means of which the altered area may be approached, entered, and exited, and which connects the altered area with an exterior approach (including sidewalks, streets, and parking areas), an entrance to the facility, and other parts of the facility.

(A) An accessible path of travel may consist of walks and sidewalks, curb ramps and other interior or exterior pedestrian ramps; clear floor paths through lobbies, corridors, rooms, and other improved areas; parking access aisles; elevators and lifts; or a combination of these elements.

(B) For the purposes of this section, the term ''path of travel'' also includes the restrooms, telephones, and drinking fountains serving the altered area.

(C) *Safe harbor.* If a public entity has constructed or altered required elements of a path of travel in accordance with the specifications in either the 1991 Standards or the Uniform Federal Accessibility Standards before March 15, 2012, the public entity is not required to retrofit such elements to reflect incremental changes in the 2010 Standards solely because of an alteration to a primary function area served by that path of travel.

(iii) *Disproportionality.* (A) Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area.

(B) Costs that may be counted as expenditures required to provide an accessible path of travel may include:

(*1*) Costs associated with providing an accessible entrance and an accessible route to the altered area, for example, the cost of widening doorways or installing ramps;

(*2*) Costs associated with making restrooms accessible, such as installing grab bars, enlarging toilet stalls, insulating pipes, or installing accessible faucet controls;

(*3*) Costs associated with providing accessible telephones, such as relocating the telephone to an accessible height, installing amplification devices, or installing a text telephone (TTY); and

(*4*) Costs associated with relocating an inaccessible drinking fountain.

(iv) *Duty to provide accessible features in the event of disproportionality.* (A) When the cost of alterations necessary to make the path of travel to the altered area fully accessible is disproportionate to the cost of the overall alteration, the path of travel shall be made accessible to the extent that it can be made accessible without incurring disproportionate costs.

(B) In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access, in the following order—

(*1*) An accessible entrance;

(*2*) An accessible route to the altered area;

(*3*) At least one accessible restroom for each sex or a single unisex restroom;

(*4*) Accessible telephones;

(*5*) Accessible drinking fountains; and

(*6*) When possible, additional accessible elements such as parking, storage, and alarms.

(v) *Series of smaller alterations.* (A) The obligation to provide an accessible path of travel may not be evaded by performing a series of small alterations to the area served by a single path of travel if those alterations could have been performed as a single undertaking.

(B)(*1*) If an area containing a primary function has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area, or a different area on the same path of travel, are undertaken within three years of the original alteration, the total cost of alterations to the primary function areas on that path of travel during the preceding three year period shall be considered in determining whether the cost of making that path of travel accessible is disproportionate.

(*2*) Only alterations undertaken on or after March 15, 2011 shall be considered in determining if the cost of providing an accessible path of travel is disproportionate to the overall cost of the alterations.

(c) *Accessibility standards and compliance date.* (1) If physical construction or alterations commence after July 26, 1992, but prior to September 15, 2010, then new construction and alterations subject to this section must comply with either UFAS or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(2) If physical construction or alterations commence on or after September 15, 2010 and before March 15, 2012, then new construction and alterations subject to this section may comply with one of the following: The 2010 Standards, UFAS, or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(3) If physical construction or alterations commence on or after March 15, 2012, then new construction and alterations subject to this section shall comply with the 2010 Standards.

(4) For the purposes of this section, ceremonial groundbreaking or razing of structures prior to site preparation do not commence physical construction or alterations.

(5) *Noncomplying new construction and alterations.* (i) Newly constructed or altered facilities or elements covered by

§§ 35.151(a) or (b) that were constructed or altered before March 15, 2012, and that do not comply with the 1991 Standards or with UFAS shall before March 15, 2012, be made accessible in accordance with either the 1991 Standards, UFAS, or the 2010 Standards.

(ii) Newly constructed or altered facilities or elements covered by §§ 35.151(a) or (b) that were constructed or altered before March 15, 2012 and that do not comply with the 1991 Standards or with UFAS shall, on or after March 15, 2012, be made accessible in accordance with the 2010 Standards.

APPENDIX TO § 35.151(c)

Compliance dates for new construction and alterations	Applicable standards
Before September 15, 2010 ..	1991 Standards or UFAS.
On or after September 15, 2010 and before March 15, 2012.	1991 Standards, UFAS, or 2010 Standards.
On or after March 15, 2012 ...	2010 Standards.

(d) *Scope of coverage.* The 1991 Standards and the 2010 Standards apply to fixed or built-in elements of buildings, structures, site improvements, and pedestrian routes or vehicular ways located on a site. Unless specifically stated otherwise, the advisory notes, appendix notes, and figures contained in the 1991 Standards and the 2010 Standards explain or illustrate the requirements of the rule; they do not establish enforceable requirements.

(e) *Social service center establishments.* Group homes, halfway houses, shelters, or similar social service center establishments that provide either temporary sleeping accommodations or residential dwelling units that are subject to this section shall comply with the provisions of the 2010 Standards applicable to residential facilities, including, but not limited to, the provisions in sections 233 and 809.

(1) In sleeping rooms with more than 25 beds covered by this section, a minimum of 5% of the beds shall have clear floor space complying with section 806.2.3 of the 2010 Standards.

(2) Facilities with more than 50 beds covered by this section that provide common use bathing facilities shall provide at least one roll-in shower with a seat that complies with the relevant provisions of section 608 of the 2010 Standards. Transfer-type showers are not permitted in lieu of a roll-in shower with a seat, and the exceptions in sections 608.3 and 608.4 for residential dwelling units are not permitted. When separate shower facilities are provided for men and for women, at least one roll-in shower shall be provided for each group.

(f) *Housing at a place of education.* Housing at a place of education that is subject to this section shall comply with the provisions of the 2010 Standards applicable to transient lodging, including, but not limited to, the requirements for transient lodging guest rooms in sections 224 and 806 subject to the following exceptions. For the purposes of the application of this section, the term ''sleeping room'' is intended to be used interchangeably with the term ''guest room'' as it is used in the transient lodging standards.

(1) Kitchens within housing units containing accessible sleeping rooms with mobility features (including suites and clustered sleeping rooms) or on floors containing accessible sleeping rooms with mobility features shall provide turning spaces that comply with section 809.2.2 of the 2010 Standards and kitchen work surfaces that comply with section 804.3 of the 2010 Standards.

(2) Multi-bedroom housing units containing accessible sleeping rooms with mobility features shall have an accessible route throughout the unit in accordance with section 809.2 of the 2010 Standards.

(3) Apartments or townhouse facilities that are provided by or on behalf of a place of education, which are leased on a year-round basis exclusively to graduate students or faculty, and do not contain any public use or common use areas available for educational programming, are not subject to the transient lodging standards and shall comply with the requirements for residential facilities in sections 233 and 809 of the 2010 Standards.

(g) *Assembly areas.* Assembly areas subject to this section shall comply with the provisions of the 2010 Standards applicable to assembly areas, including, but not limited to, sections 221 and 802. In addition, assembly areas shall ensure that—

(1) In stadiums, arenas, and grandstands, wheelchair spaces and companion seats are dispersed to all levels that include seating served by an accessible route;

(2) Assembly areas that are required to horizontally disperse wheelchair spaces and companion seats by section 221.2.3.1 of the 2010 Standards and have seating encircling, in whole or in part, a field of play or performance area shall disperse wheelchair spaces and companion seats around that field of play or performance area;

(3) Wheelchair spaces and companion seats are not located on (or obstructed by) temporary platforms or other movable structures, except that when an entire seating section is placed on temporary platforms or other movable structures in an area where fixed seating is not provided, in order to increase seating for an event, wheelchair spaces and companion seats may be placed in that section. When wheelchair spaces and companion seats are not required to accommodate persons eligible for those spaces and seats, individual, removable seats may be placed in those spaces and seats;

(4) Stadium-style movie theaters shall locate wheelchair spaces and companion seats on a riser or cross-aisle in the stadium section that satisfies at least one of the following criteria—

(i) It is located within the rear 60% of the seats provided in an auditorium; or

(ii) It is located within the area of an auditorium in which the vertical viewing angles (as measured to the top of the screen) are from the 40th to the 100th percentile of vertical viewing angles for all seats as ranked from the seats in the first row (1st percentile) to seats in the back row (100th percentile).

(h) *Medical care facilities.* Medical care facilities that are subject to this section shall comply with the provisions of the 2010 Standards applicable to medical care facilities, including, but not limited to, sections 223 and 805. In addition, medical care facilities that do not specialize in the treatment of conditions that affect mobility shall disperse the accessible patient bedrooms required by section 223.2.1 of the 2010 Standards in a manner that is proportionate by type of medical specialty.

(i) *Curb ramps.* (1) Newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway.

(2) Newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways.

(j) *Facilities with residential dwelling units for sale to individual owners.* (1) Residential dwelling units designed and constructed or altered by public entities that will be offered for sale to individuals shall comply with the requirements for residential facilities in the 2010 Standards, including sections 233 and 809.

(2) The requirements of paragraph (1) also apply to housing programs that are operated by public entities where design and construction of particular residential dwelling units take place only after a specific buyer has been identified. In such programs, the covered entity must provide the units that comply with the requirements for accessible features to those pre-identified buyers with disabilities who have requested such a unit.

(k) *Detention and correctional facilities.* (1) New construction of jails, prisons, and other detention and correctional facilities shall comply with the 2010 Standards except that public entities shall provide accessible mobility features complying with section 807.2 of the 2010 Standards for a minimum of 3%, but no fewer than one, of the total number of cells in a facility. Cells with mobility features shall be provided in each classification level.

(2) *Alterations to detention and correctional facilities.* Alterations to jails, prisons, and other detention and correctional facilities shall comply with the 2010 Standards except that public entities shall provide accessible mobility features complying with section 807.2 of the 2010 Standards for a minimum of 3%, but no fewer than one, of the total number of cells being altered until at least 3%, but no fewer than one, of the total number of cells in a facility shall provide mobility features

complying with section 807.2. Altered cells with mobility features shall be provided in each classification level. However, when alterations are made to specific cells, detention and correctional facility operators may satisfy their obligation to provide the required number of cells with mobility features by providing the required mobility features in substitute cells (cells other than those where alterations are originally planned), provided that each substitute cell—

(i) Is located within the same prison site;

(ii) Is integrated with other cells to the maximum extent feasible;

(iii) Has, at a minimum, equal physical access as the altered cells to areas used by inmates or detainees for visitation, dining, recreation, educational programs, medical services, work programs, religious services, and participation in other programs that the facility offers to inmates or detainees; and

(iv) If it is technically infeasible to locate a substitute cell within the same prison site, a substitute cell must be provided at another prison site within the corrections system.

(3) With respect to medical and long-term care facilities in jails, prisons, and other detention and correctional facilities, public entities shall apply the 2010 Standards technical and scoping requirements for those facilities irrespective of whether those facilities are licensed.

[56 FR 35716, July 26, 1991, as amended by Order No. 1694–93, 58 FR 17521, Apr. 5, 1993; AG Order No. 3180–2010, 75 FR 56180, Sept. 15, 2010; 76 FR 13285, Mar. 11, 2011]

§ 35.152 Jails, detention and correctional facilities, and community correctional facilities.

(a) *General.* This section applies to public entities that are responsible for the operation or management of adult and juvenile justice jails, detention and correctional facilities, and community correctional facilities, either directly or through contractual, licensing, or other arrangements with public or private entities, in whole or in part, including private correctional facilities.

(b) *Discrimination prohibited.* (1) Public entities shall ensure that qualified inmates or detainees with disabilities shall not, because a facility is inaccessible to or unusable by individuals with disabilities, be excluded from participation in, or be denied the benefits of, the services, programs, or activities of a public entity, or be subjected to discrimination by any public entity.

(2) Public entities shall ensure that inmates or detainees with disabilities are housed in the most integrated setting appropriate to the needs of the individuals. Unless it is appropriate to make an exception, a public entity—

(i) Shall not place inmates or detainees with disabilities in inappropriate security classifications because no accessible cells or beds are available;

(ii) Shall not place inmates or detainees with disabilities in designated medical areas unless they are actually receiving medical care or treatment;

(iii) Shall not place inmates or detainees with disabilities in facilities that do not offer the same programs as the facilities where they would otherwise be housed; and

(iv) Shall not deprive inmates or detainees with disabilities of visitation with family members by placing them in distant facilities where they would not otherwise be housed.

(3) Public entities shall implement reasonable policies, including physical modifications to additional cells in accordance with the 2010 Standards, so as to ensure that each inmate with a disability is housed in a cell with the accessible elements necessary to afford the inmate access to safe, appropriate housing.

[AG Order No. 3180–2010, 75 FR 56183, Sept. 15, 2010]

§§ 35.152–35.159 [Reserved]

Subpart E—Communications

§ 35.160 General.

(a)(1) A public entity shall take appropriate steps to ensure that communications with applicants, participants, members of the public, and companions with disabilities are as effective as communications with others.

(2) For purposes of this section, ''companion'' means a family member,

friend, or associate of an individual seeking access to a service, program, or activity of a public entity, who, along with such individual, is an appropriate person with whom the public entity should communicate.

(b)(1) A public entity shall furnish appropriate auxiliary aids and services where necessary to afford individuals with disabilities, including applicants, participants, companions, and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity of a public entity.

(2) The type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. In determining what types of auxiliary aids and services are necessary, a public entity shall give primary consideration to the requests of individuals with disabilities. In order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way as to protect the privacy and independence of the individual with a disability.

(c)(1) A public entity shall not require an individual with a disability to bring another individual to interpret for him or her.

(2) A public entity shall not rely on an adult accompanying an individual with a disability to interpret or facilitate communication except—

(i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available; or

(ii) Where the individual with a disability specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.

(3) A public entity shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.

(d) *Video remote interpreting (VRI) services.* A public entity that chooses to provide qualified interpreters via VRI services shall ensure that it provides—

(1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high-quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication;

(2) A sharply delineated image that is large enough to display the interpreter's face, arms, hands, and fingers, and the participating individual's face, arms, hands, and fingers, regardless of his or her body position;

(3) A clear, audible transmission of voices; and

(4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the VRI.

[Order No. 1512–91, 56 FR 35716, July 26, 1991, as amended by AG Order No. 3180–2010, 75 FR 56183, Sept. 15, 2010]

§ 35.161 Telecommunications.

(a) Where a public entity communicates by telephone with applicants and beneficiaries, text telephones (TTYs) or equally effective telecommunications systems shall be used to communicate with individuals who are deaf or hard of hearing or have speech impairments.

(b) When a public entity uses an automated-attendant system, including, but not limited to, voicemail and messaging, or an interactive voice response system, for receiving and directing incoming telephone calls, that system must provide effective real-time communication with individuals using auxiliary aids and services, including TTYs and all forms of FCC-approved telecommunications relay systems, including Internet-based relay systems.

(c) A public entity shall respond to telephone calls from a telecommunications relay service established under title IV of the ADA in the same manner that it responds to other telephone calls.

[AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010]

§ 35.162 Telephone emergency services.

Telephone emergency services, including 911 services, shall provide direct access to individuals who use TDD's and computer modems.

§ 35.163 Information and signage.

(a) A public entity shall ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of accessible services, activities, and facilities.

(b) A public entity shall provide signage at all inaccessible entrances to each of its facilities, directing users to an accessible entrance or to a location at which they can obtain information about accessible facilities. The international symbol for accessibility shall be used at each accessible entrance of a facility.

§ 35.164 Duties.

This subpart does not require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with this subpart would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of the public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action required to comply with this subpart would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the benefits or services provided by the public entity.

§§ 35.165–35.169 [Reserved]

Subpart F—Compliance Procedures

§ 35.170 Complaints.

(a) *Who may file.* An individual who believes that he or she or a specific class of individuals has been subjected to discrimination on the basis of disability by a public entity may, by himself or herself or by an authorized representative, file a complaint under this part.

(b) *Time for filing.* A complaint must be filed not later than 180 days from the date of the alleged discrimination, unless the time for filing is extended by the designated agency for good cause shown. A complaint is deemed to be filed under this section on the date it is first filed with any Federal agency.

(c) *Where to file.* An individual may file a complaint with any agency that he or she believes to be the appropriate agency designated under subpart G of this part, or with any agency that provides funding to the public entity that is the subject of the complaint, or with the Department of Justice for referral as provided in § 35.171(a)(2).

§ 35.171 Acceptance of complaints.

(a) *Receipt of complaints.* (1)(i) Any Federal agency that receives a complaint of discrimination on the basis of disability by a public entity shall promptly review the complaint to determine whether it has jurisdiction over the complaint under section 504.

(ii) If the agency does not have section 504 jurisdiction, it shall promptly determine whether it is the designated agency under subpart G of this part responsible for complaints filed against that public entity.

(2)(i) If an agency other than the Department of Justice determines that it does not have section 504 jurisdiction and is not the designated agency, it shall promptly refer the complaint to the appropriate designated agency, the agency that has section 504 jurisdiction, or the Department of Justice, and so notify the complainant.

(ii) When the Department of Justice receives a complaint for which it does not have jurisdiction under section 504 and is not the designated agency, it may exercise jurisdiction pursuant to §35.190(e) or refer the complaint to an agency that does have jurisdiction under section 504 or to the appropriate agency designated in subpart G of this part or, in the case of an employment complaint that is also subject to title I of the Act, to the Equal Employment Opportunity Commission.

(3)(i) If the agency that receives a complaint has section 504 jurisdiction, it shall process the complaint according to its procedures for enforcing section 504.

(ii) If the agency that receives a complaint does not have section 504 jurisdiction, but is the designated agency, it shall process the complaint according to the procedures established by this subpart.

(b) *Employment complaints.* (1) If a complaint alleges employment discrimination subject to title I of the Act, and the agency has section 504 jurisdiction, the agency shall follow the procedures issued by the Department of Justice and the Equal Employment Opportunity Commission under section 107(b) of the Act.

(2) If a complaint alleges employment discrimination subject to title I of the Act, and the designated agency does not have section 504 jurisdiction, the agency shall refer the complaint to the Equal Employment Opportunity Commission for processing under title I of the Act.

(3) Complaints alleging employment discrimination subject to this part, but not to title I of the Act shall be processed in accordance with the procedures established by this subpart.

(c) *Complete complaints.* (1) A designated agency shall accept all complete complaints under this section and shall promptly notify the complainant and the public entity of the receipt and acceptance of the complaint.

(2) If the designated agency receives a complaint that is not complete, it shall notify the complainant and specify the additional information that is needed to make the complaint a complete complaint. If the complainant fails to complete the complaint, the designated agency shall close the complaint without prejudice.

[Order No. 1512–91, 56 FR 35716, July 26, 1991, as amended by AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010]

§ 35.172 Investigations and compliance reviews.

(a) The designated agency shall investigate complaints for which it is responsible under §35.171.

(b) The designated agency may conduct compliance reviews of public entities in order to ascertain whether there has been a failure to comply with the nondiscrimination requirements of this part.

(c) Where appropriate, the designated agency shall attempt informal resolution of any matter being investigated under this section, and, if resolution is not achieved and a violation is found, issue to the public entity and the complainant, if any, a Letter of Findings that shall include—

(1) Findings of fact and conclusions of law;

(2) A description of a remedy for each violation found (including compensatory damages where appropriate); and

(3) Notice of the rights and procedures available under paragraph (d) of this section and §§35.173 and 35.174.

(d) At any time, the complainant may file a private suit pursuant to section 203 of the Act, 42 U.S.C. 12133, whether or not the designated agency finds a violation.

[AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010]

§ 35.173 Voluntary compliance agreements.

(a) When the designated agency issues a noncompliance Letter of Findings, the designated agency shall—

(1) Notify the Assistant Attorney General by forwarding a copy of the Letter of Findings to the Assistant Attorney General; and

(2) Initiate negotiations with the public entity to secure compliance by voluntary means.

(b) Where the designated agency is able to secure voluntary compliance, the voluntary compliance agreement shall—

(1) Be in writing and signed by the parties;
(2) Address each cited violation;
(3) Specify the corrective or remedial action to be taken, within a stated period of time, to come into compliance;
(4) Provide assurance that discrimination will not recur; and
(5) Provide for enforcement by the Attorney General.

§ 35.174 Referral.

If the public entity declines to enter into voluntary compliance negotiations or if negotiations are unsuccessful, the designated agency shall refer the matter to the Attorney General with a recommendation for appropriate action.

§ 35.175 Attorney's fees.

In any action or administrative proceeding commenced pursuant to the Act or this part, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

§ 35.176 Alternative means of dispute resolution.

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, is encouraged to resolve disputes arising under the Act and this part.

§ 35.177 Effect of unavailability of technical assistance.

A public entity shall not be excused from compliance with the requirements of this part because of any failure to receive technical assistance, including any failure in the development or dissemination of any technical assistance manual authorized by the Act.

§ 35.178 State immunity.

A State shall not be immune under the eleventh amendment to the Constitution of the United States from an action in Federal or State court of competent jurisdiction for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

§§ 35.179–35.189 [Reserved]

Subpart G—Designated Agencies

§ 35.190 Designated agencies.

(a) The Assistant Attorney General shall coordinate the compliance activities of Federal agencies with respect to State and local government components, and shall provide policy guidance and interpretations to designated agencies to ensure the consistent and effective implementation of the requirements of this part.

(b) The Federal agencies listed in paragraph (b) (1) through (8) of this section shall have responsibility for the implementation of subpart F of this part for components of State and local governments that exercise responsibilities, regulate, or administer services, programs, or activities in the following functional areas.

(1) *Department of Agriculture:* All programs, services, and regulatory activities relating to farming and the raising of livestock, including extension services.

(2) *Department of Education:* All programs, services, and regulatory activities relating to the operation of elementary and secondary education systems and institutions, institutions of higher education and vocational education (other than schools of medicine, dentistry, nursing, and other health-related schools), and libraries.

(3) *Department of Health and Human Services:* All programs, services, and regulatory activities relating to the provision of health care and social services, including schools of medicine, dentistry, nursing, and other health-related schools, the operation of health care and social service providers and institutions, including ''grass-roots'' and community services organizations and programs, and preschool and daycare programs.

(4) *Department of Housing and Urban Development:* All programs, services, and regulatory activities relating to state and local public housing, and housing assistance and referral.

(5) *Department of Interior:* All programs, services, and regulatory activities relating to lands and natural resources, including parks and recreation, water and waste management, environmental protection, energy, historic and cultural preservation, and museums.

(6) *Department of Justice:* All programs, services, and regulatory activities relating to law enforcement, public safety, and the administration of justice, including courts and correctional institutions; commerce and industry, including general economic development, banking and finance, consumer protection, insurance, and small business; planning, development, and regulation (unless assigned to other designated agencies); state and local government support services (e.g., audit, personnel, comptroller, administrative services); all other government functions not assigned to other designated agencies.

(7) *Department of Labor:* All programs, services, and regulatory activities relating to labor and the work force.

(8) *Department of Transportation:* All programs, services, and regulatory activities relating to transportation, including highways, public transportation, traffic management (non-law enforcement), automobile licensing and inspection, and driver licensing.

(c) Responsibility for the implementation of subpart F of this part for components of State or local governments that exercise responsibilities, regulate, or administer services, programs, or activities relating to functions not assigned to specific designated agencies by paragraph (b) of this section may be assigned to other specific agencies by the Department of Justice.

(d) If two or more agencies have apparent responsibility over a complaint, the Assistant Attorney General shall determine which one of the agencies shall be the designated agency for purposes of that complaint.

(e) When the Department receives a complaint directed to the Attorney General alleging a violation of this part that may fall within the jurisdiction of a designated agency or another Federal agency that may have jurisdiction under section 504, the Department may exercise its discretion to retain the complaint for investigation under this part.

[Order No. 1512–91, 56 FR 35716, July 26, 1991, as amended by AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010]

§§ 35.191–35.999 [Reserved]

APPENDIX A TO PART 35—GUIDANCE TO REVISIONS TO ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES

NOTE: This Appendix contains guidance providing a section-by-section analysis of the revisions to 28 CFR part 35 published on September 15, 2010.

SECTION-BY-SECTION ANALYSIS AND RESPONSE TO PUBLIC COMMENTS

This section provides a detailed description of the Department's changes to the title II regulation, the reasoning behind those changes, and responses to public comments received on these topics. The Section-by-Section Analysis follows the order of the title II regulation itself, except that, if the Department has not changed a regulatory section, the unchanged section has not been mentioned.

SUBPART A—GENERAL

Section 35.104 Definitions.

''1991 Standards'' and ''2004 ADAAG''

The Department has included in the final rule new definitions of both the ''1991 Standards'' and the ''2004 ADAAG.'' The term ''1991 Standards'' refers to the ADA Standards for Accessible Design, originally published on July 26, 1991, and republished as Appendix D to part 36. The term ''2004 ADAAG'' refers to ADA Chapter 1, ADA Chapter 2, and Chapters 3 through 10 of the Americans with Disabilities Act and Architectural Barriers Act Accessibility Guidelines, which were issued by the Access Board on July 23, 2004, 36 CFR 1191, app. B and D (2009), and which the Department has adopted in this final rule. These terms are included in the definitions section for ease of reference.

''2010 Standards''

The Department has added to the final rule a definition of the term ''2010 Standards.'' The term ''2010 Standards'' refers to the 2010 ADA Standards for Accessible Design, which

consist of the 2004 ADAAG and the requirements contained in §35.151.

''Auxiliary Aids and Services''

In the NPRM, the Department proposed revisions to the definition of auxiliary aids and services under §35.104 to include several additional types of auxiliary aids that have become more readily available since the promulgation of the 1991 title II regulation, and in recognition of new technology and devices available in some places that may provide effective communication in some situations.

The NPRM proposed adding an explicit reference to written notes in the definition of ''auxiliary aids.'' Although this policy was already enunciated in the Department's 1993 Title II Technical Assistance Manual at II–7.1000, the Department proposed inclusion in the regulation itself because some Title II entities do not understand that exchange of written notes using paper and pencil is an available option in some circumstances. *See* Department of Justice, *The Americans with Disabilities Act, Title II Technical Assistance Manual Covering State and Local Government Programs and Services* (1993), available at *http://www.ada.gov/taman2.html*. Comments from several disability advocacy organizations and individuals discouraged the Department from including the exchange of written notes in the list of available auxiliary aids in §35.104. Advocates and persons with disabilities requested explicit limits on the use of written notes as a form of auxiliary aid because, they argue, most exchanges are not simple and are not communicated effectively using handwritten notes. One major advocacy organization, for example, noted that the speed at which individuals communicate orally or use sign language averages about 200 words per minute or more while exchange of notes often leads to truncated or incomplete communication. For persons whose primary language is American Sign Language (ASL), some commenters pointed out, using written English in exchange of notes often is ineffective because ASL syntax and vocabulary is dissimilar from English. By contrast, some commenters from professional medical associations sought more specific guidance on when notes are allowed, especially in the context of medical offices and health care situations.

Exchange of notes likely will be effective in situations that do not involve substantial conversation, for example, blood work for routine lab tests or regular allergy shots. Video Interpreting Services (hereinafter referred to as ''video remote interpreting services'' or VRI) or an interpreter should be used when the matter involves greater complexity, such as in situations requiring communication of medical history or diagnoses, in conversations about medical procedures and treatment decisions, or when giving instructions for care at home or elsewhere. In the Section-By-Section Analysis of §35.160 (Communications) below, the Department discusses in greater detail the kinds of situations in which interpreters or captioning would be necessary. Additional guidance on this issue can be found in a number of agreements entered into with health-care providers and hospitals that are available on the Department's Web site at *http://www.ada.gov*.

In the NPRM, in paragraph (1) of the definition in §35.104, the Department proposed replacing the term ''telecommunications devices for deaf persons (TDD)'' with the term ''text telephones (TTYs).'' TTY has become the commonly accepted term and is consistent with the terminology used by the Access Board in the 2004 ADAAG. Commenters representing advocates and persons with disabilities expressed approval of the substitution of TTY for TDD in the proposed regulation.

Commenters also expressed the view that the Department should expand paragraph (1) of the definition of auxiliary aids to include ''TTY's and other voice, text, and video-based telecommunications products and systems such as videophones and captioned telephones.'' The Department has considered these comments and has revised the definition of ''auxiliary aids'' to include references to voice, text, and video-based telecommunications products and systems, as well as accessible electronic and information technology.

In the NPRM, the Department also proposed including a reference in paragraph (1) to a new technology, Video Interpreting Services (VIS). The reference remains in the final rule. VIS is discussed in the Section-By-Section Analysis below in reference to §35.160 (Communications), but is referred to as VRI in both the final rule and Appendix A to more accurately reflect the terminology used in other regulations and among users of the technology.

In the NPRM, the Department noted that technological advances in the 18 years since the ADA's enactment had increased the range of auxiliary aids and services for those who are blind or have low vision. As a result the Department proposed additional examples to paragraph (2) of the definition, including Brailled materials and displays, screen reader software, optical readers, secondary auditory programs (SAP), and accessible electronic and information technology. Some commenters asked for more detailed requirements for auxiliary aids for persons with vision disabilities. The Department has decided it will not make additional changes to that provision at this time.

Several comments suggested expanding the auxiliary aids provision for persons who are both deaf and blind, and in particular, to include in the list of auxiliary aids a new category, ''support service providers (SSP),''

which was described in comments as a navigator and communication facilitator. The Department believes that services provided by communication facilitators are already encompassed in the requirement to provide qualified interpreters. Moreover, the Department is concerned that as described by the commenters, the category of support service providers would include some services that would be considered personal services and that do not qualify as auxiliary aids. Accordingly, the Department declines to add this new category to the list at this time.

Some commenters representing advocacy organizations and individuals asked the Department to explicitly require title II entities to make any or all of the devices or technology available in all situations upon the request of the person with a disability. The Department recognizes that such devices or technology may provide effective communication and in some circumstances may be effective for some persons, but the Department does not intend to require that every entity covered by title II provide every device or all new technology at all times as long as the communication that is provided is as effective as communication with others. The Department recognized in the preamble to the 1991 title II regulation that the list of auxiliary aids was ''not an all-inclusive or exhaustive catalogue of possible or available auxiliary aids or services. It is not possible to provide an exhaustive list, and an attempt to do so would omit the new devices that will become available with emerging technology.'' 28 CFR part 35, app. A at 560 (2009). The Department continues to endorse that view; thus, the inclusion of a list of examples of possible auxiliary aids in the definition of ''auxiliary aids'' should not be read as a mandate for a title II entity to offer every possible auxiliary aid listed in the definition in every situation.

''Direct Threat''

In Appendix A of the Department's 1991 title II regulation, the Department included a detailed discussion of ''direct threat'' that, among other things, explained that ''the principles established in §36.208 of the Department's [title III] regulation'' were ''applicable'' as well to title II, insofar as ''questions of safety are involved.'' 28 CFR part 35, app. A at 565 (2009). In the final rule, the Department has included an explicit definition of ''direct threat'' that is parallel to the definition in the title III rule and placed it in the definitions section at §35.104.

''Existing Facility''

The 1991 title II regulation provided definitions for ''new construction'' at §35.151(a) and ''alterations'' at §35.151(b). In contrast, the term ''existing facility'' was not explicitly defined, although it is used in the statute and regulations for title II. *See* 42 U.S.C. 12134(b); 28 CFR 35.150. It has been the Department's view that newly constructed or altered facilities are also existing facilities with continuing program access obligations, and that view is made explicit in this rule.

The classification of facilities under the ADA is neither static nor mutually exclusive. Newly constructed or altered facilities are also existing facilities. A newly constructed facility remains subject to the accessibility standards in effect at the time of design and construction, with respect to those elements for which, at that time, there were applicable ADA Standards. And at some point, the facility may undergo alterations, which are subject to the alterations requirements in effect at the time. *See* §35.151(b)–(c). The fact that the facility is also an existing facility does not relieve the public entity of its obligations under the new construction and alterations requirements in this part.

For example, a facility constructed or altered after the effective date of the original title II regulations but prior to the effective date of the revised title II regulation and Standards, must have been built or altered in compliance with the Standards (or UFAS) in effect at that time, in order to be in compliance with the ADA. In addition, a ''newly constructed'' facility or ''altered'' facility is also an ''existing facility'' for purposes of application of the title II program accessibility requirements. Once the 2010 Standards take effect, they will become the new reference point for determining the program accessibility obligations of all existing facilities. This is because the ADA contemplates that as our knowledge and understanding of accessibility advances and evolves, this knowledge will be incorporated into and result in increased accessibility in the built environment. Under title II, this goal is accomplished through the statute's program access framework. While newly constructed or altered facilities must meet the accessibility standards in effect at the time, the fact that these facilities are also existing facilities ensures that the determination of whether a program is accessible is not frozen at the time of construction or alteration. Program access may require consideration of potential barriers to access that were not recognized as such at the time of construction or alteration, including, but not limited to, the elements that are first covered in the 2010 Standards, as that term is defined in §35.104. Adoption of the 2010 Standards establishes a new reference point for title II entities that choose to make structural changes to existing facilities to meet their program access requirements.

The NPRM included the following proposed definition of ''existing facility.'' ''A facility that has been constructed and remains in existence on any given date.'' 73 FR 34466, 34504 (June 17, 2008). The Department received a

number of comments on this issue. The commenters urged the Department to clarify that all buildings remain subject to the standards in effect at the time of their construction, that is, that a facility designed and constructed for first occupancy between January 26, 1992, and the effective date of the final rule is still considered ''new construction'' and that alterations occurring between January 26, 1992, and the effective date of the final rule are still considered ''alterations.''

The final rule includes clarifying language to ensure that the Department's interpretation is accurately reflected. As established by this rule, existing facility means a facility in existence on any given date, without regard to whether the facility may also be considered newly constructed or altered under this part. Thus, this definition reflects the Department's interpretation that public entities have program access requirements that are independent of, but may coexist with, requirements imposed by new construction or alteration requirements in those same facilities.

''Housing at a Place of Education''

The Department has added a new definition to §35.104, ''housing at a place of education,'' to clarify the types of educational housing programs that are covered by this title. This section defines ''housing at a place of education'' as ''housing operated by or on behalf of an elementary, secondary, undergraduate, or postgraduate school, or other place of education, including dormitories, suites, apartments, or other places of residence.'' This definition does not apply to social service programs that combine residential housing with social services, such as a residential job training program.

''Other Power-Driven Mobility Device'' and ''Wheelchair''

Because relatively few individuals with disabilities were using nontraditional mobility devices in 1991, there was no pressing need for the 1991 title II regulation to define the terms ''wheelchair'' or ''other power-driven mobility device,'' to expound on what would constitute a reasonable modification in policies, practices, or procedures under §35.130(b)(7), or to set forth within that section specific requirements for the accommodation of mobility devices. Since the issuance of the 1991 title II regulation, however, the choices of mobility devices available to individuals with disabilities have increased dramatically. The Department has received complaints about and has become aware of situations where individuals with mobility disabilities have utilized devices that are not designed primarily for use by an individual with a mobility disability, including the Segway® Personal Transporter (Segway® PT), golf cars, all-terrain vehicles (ATVs), and other locomotion devices.

The Department also has received questions from public entities and individuals with mobility disabilities concerning which mobility devices must be accommodated and under what circumstances. Indeed, there has been litigation concerning the legal obligations of covered entities to accommodate individuals with mobility disabilities who wish to use an electronic personal assistance mobility device (EPAMD), such as the Segway® PT, as a mobility device. The Department has participated in such litigation as *amicus curiae*. *See Ault* v. *Walt Disney World Co.*, No. 6:07–cv–1785–Orl–31KRS, 2009 WL 3242028 (M.D. Fla. Oct. 6, 2009). Much of the litigation has involved shopping malls where businesses have refused to allow persons with disabilities to use EPAMDs. *See, e.g.*, *McElroy* v. *Simon Property Group*, No. 08–404 RDR, 2008 WL 4277716 (D. Kan. Sept. 15, 2008) (enjoining mall from prohibiting the use of a Segway® PT as a mobility device where an individual agrees to all of a mall's policies for use of the device, except indemnification); Shasta Clark, *Local Man Fighting Mall Over Right to Use Segway*, WATE 6 News, July 26, 2005, available at *http://www.wate.com/Global/story.asp?s=3643674* (last visited June 24, 2010).

In response to questions and complaints from individuals with disabilities and covered entities concerning which mobility devices must be accommodated and under what circumstances, the Department began developing a framework to address the use of unique mobility devices, concerns about their safety, and the parameters for the circumstances under which these devices must be accommodated. As a result, the Department's NPRM proposed two new approaches to mobility devices. First, the Department proposed a two-tiered mobility device definition that defined the term ''wheelchair'' separately from ''other power-driven mobility device.'' Second, the Department proposed requirements to allow the use of devices in each definitional category. In §35.137(a), the NPRM proposed that wheelchairs and manually-powered mobility aids used by individuals with mobility disabilities shall be permitted in any areas open to pedestrian use. Section 35.137(b) of the NPRM provided that a public entity ''shall make reasonable modifications in its policies, practices, and procedures to permit the use of other power-driven mobility devices by individuals with disabilities, unless the public entity can demonstrate that the use of the device is not reasonable or that its use will result in a fundamental alteration of the public entity's service, program, or activity.'' 73 FR 34466, 34504 (June 17, 2008).

The Department sought public comment with regard to whether these steps would, in fact, achieve clarity on these issues. Toward

this end, the Department's NPRM asked several questions relating to the definitions of ''wheelchair,'' ''other power-driven mobility device,'' and ''manually-powered mobility aids''; the best way to categorize different classes of mobility devices; the types of devices that should be included in each category; and the circumstances under which certain mobility devices must be accommodated or may be excluded pursuant to the policy adopted by the public entity.

Because the questions in the NPRM that concerned mobility devices and their accommodation were interrelated, many of the commenters' responses did not identify the specific question to which they were responding. Instead, the commenters grouped the questions together and provided comments accordingly. Most commenters spoke to the issues addressed in the Department's questions in broad terms and general concepts. As a result, the responses to the questions posed are discussed below in broadly grouped issue categories rather than on a question-by-question basis.

Two-tiered definitional approach. Commenters supported the Department's proposal to use a two-tiered definition of mobility device. Commenters nearly universally said that wheelchairs always should be accommodated and that they should never be subject to an assessment with regard to their admission to a particular public facility. In contrast, the vast majority of commenters indicated they were in favor of allowing public entities to conduct an assessment as to whether, and under which circumstances, other power-driven mobility devices would be allowed on-site.

Many commenters indicated their support for the two-tiered approach in responding to questions concerning the definition of ''wheelchair'' and ''other-powered mobility device.'' Nearly every disability advocacy group said that the Department's two-tiered approach strikes the proper balance between ensuring access for individuals with disabilities and addressing fundamental alteration and safety concerns held by public entities; however, a minority of disability advocacy groups wanted other power-driven mobility devices to be included in the definition of ''wheelchair.'' Most advocacy, nonprofit, and individual commenters supported the concept of a separate definition for ''other power-driven mobility device'' because it maintains existing legal protections for wheelchairs while recognizing that some devices that are not designed primarily for individuals with mobility disabilities have beneficial uses for individuals with mobility disabilities. They also favored this concept because it recognizes technological developments and that the innovative uses of varying devices may provide increased access to individuals with mobility disabilities.

Many environmental, transit system, and government commenters indicated they opposed in its entirety the concept of ''other power-driven mobility devices'' as a separate category. They believe that the creation of a second category of mobility devices will mean that other power-driven mobility devices, specifically ATVs and off-highway vehicles, must be allowed to go anywhere on national park lands, trails, recreational areas, etc.; will conflict with other Federal land management laws and regulations; will harm the environment and natural and cultural resources; will pose safety risks to users of these devices, as well as to pedestrians not expecting to encounter motorized devices in these settings; will interfere with the recreational enjoyment of these areas; and will require too much administrative work to regulate which devices are allowed and under which circumstances. These commenters all advocated a single category of mobility devices that excludes all fuel-powered devices.

Whether or not they were opposed to the two-tier approach in its entirety, virtually every environmental commenter and most government commenters associated with providing public transportation services or protecting land, natural resources, fish and game, etc., said that the definition of ''other power-driven mobility device'' is too broad. They suggested that they might be able to support the dual category approach if the definition of ''other power-driven mobility device'' were narrowed. They expressed general and program-specific concerns about permitting the use of other power-driven mobility devices. They noted the same concerns as those who opposed the two-tiered concept—that these devices create a host of environmental, safety, cost, administrative and conflict of law issues. Virtually all of these commenters indicated that their support for the dual approach and the concept of other power-driven mobility devices is, in large measure, due to the other power-driven mobility device assessment factors in §35.137(c) of the NPRM.

By maintaining the two-tiered approach to mobility devices and defining ''wheelchair'' separately from ''other power-driven mobility device,'' the Department is able to preserve the protection users of traditional wheelchairs and other manually powered mobility aids have had since the ADA was enacted, while also recognizing that human ingenuity, personal choice, and new technologies have led to the use of devices that may be more beneficial for individuals with certain mobility disabilities.

Moreover, the Department believes the two-tiered approach gives public entities guidance to follow in assessing whether reasonable modifications can be made to permit the use of other power-driven mobility devices on-site and to aid in the development

of policies describing the circumstances under which persons with disabilities may use such devices. The two-tiered approach neither mandates that all other power-driven mobility devices be accommodated in every circumstance, nor excludes these devices. This approach, in conjunction with the factor assessment provisions in §35.137(b)(2), will serve as a mechanism by which public entities can evaluate their ability to accommodate other power-driven mobility devices. As will be discussed in more detail below, the assessment factors in §35.137(b)(2) are designed to provide guidance to public entities regarding whether it is appropriate to bar the use of a specific ''other power-driven mobility device in a specific facility. In making such a determination, a public entity must consider the device's type, size, weight, dimensions, and speed; the facility's volume of pedestrian traffic; the facility's design and operational characteristics; whether the device conflicts with legitimate safety requirements; and whether the device poses a substantial risk of serious harm to the immediate environment or natural or cultural resources, or conflicts with Federal land management laws or regulations. In addition, if under §35.130(b)(7), the public entity claims that it cannot make reasonable modifications to its policies, practices, or procedures to permit the use of other power-driven mobility devices by individuals with disabilities, the burden of proof to demonstrate that such devices cannot be operated in accordance with legitimate safety requirements rests upon the public entity.

Categorization of wheelchair versus other power-driven mobility devices. Implicit in the creation of the two-tiered mobility device concept is the question of how to categorize which devices are wheelchairs and which are other power-driven mobility devices. Finding weight and size to be too restrictive, the vast majority of advocacy, nonprofit, and individual commenters opposed using the Department of Transportation's definition of ''common wheelchair'' to designate the mobility device's appropriate category. Commenters who generally supported using weight and size as the method of categorization did so because of their concerns about potentially detrimental impacts on the environment and cultural and natural resources; on the enjoyment of the facility by other recreational users, as well as their safety; on the administrative components of government agencies required to assess which devices are appropriate on narrow, steeply sloped, or foot-and-hoof only trails; and about the impracticality of accommodating such devices in public transportation settings.

Many environmental, transit system, and government commenters also favored using the device's intended-use to categorize which devices constitute wheelchairs and which are other power-driven mobility devices. Furthermore, the intended-use determinant received a fair amount of support from advocacy, nonprofit, and individual commenters, either because they sought to preserve the broad accommodation of wheelchairs or because they sympathized with concerns about individuals without mobility disabilities fraudulently bringing other power-driven mobility devices into public facilities.

Commenters seeking to have the Segway® PT included in the definition of ''wheelchair'' objected to classifying mobility devices on the basis of their intended use because they felt that such a classification would be unfair and prejudicial to Segway® PT users and would stifle personal choice, creativity, and innovation. Other advocacy and nonprofit commenters objected to employing an intended-use approach because of concerns that the focus would shift to an assessment of the device, rather than the needs or benefits to the individual with the mobility disability. They were of the view that the mobility-device classification should be based on its function—whether it is used for a mobility disability. A few commenters raised the concern that an intended-use approach might embolden public entities to assess whether an individual with a mobility disability really needs to use the other power-driven mobility device at issue or to question why a wheelchair would not provide sufficient mobility. Those citing objections to the intended use determinant indicated it would be more appropriate to make the categorization determination based on whether the device is being used for a mobility disability in the context of the impact of its use in a specific environment. Some of these commenters preferred this approach because it would allow the Segway® PT to be included in the definition of ''wheelchair.''

Many environmental and government commenters were inclined to categorize mobility devices by the way in which they are powered, such as battery-powered engines versus fuel or combustion engines. One commenter suggested using exhaust level as the determinant. Although there were only a few commenters who would make the determination based on indoor or outdoor use, there was nearly universal support for banning the indoor use of devices that are powered by fuel or combustion engines.

A few commenters thought it would be appropriate to categorize the devices based on their maximum speed. Others objected to this approach, stating that circumstances should dictate the appropriate speed at which mobility devices should be operated—for example, a faster speed may be safer when crossing streets than it would be for sidewalk use—and merely because a device can go a certain speed does not mean it will be operated at that speed.

The Department has decided to maintain the device's intended use as the appropriate determinant for which devices are categorized as ''wheelchairs.'' However, because wheelchairs may be intended for use by individuals who have temporary conditions affecting mobility, the Department has decided that it is more appropriate to use the phrase ''primarily designed'' rather than ''solely designed'' in making such categorizations. The Department will not foreclose any future technological developments by identifying or banning specific devices or setting restrictions on size, weight, or dimensions. Moreover, devices designed primarily for use by individuals with mobility disabilities often are considered to be medical devices and are generally eligible for insurance reimbursement on this basis. Finally, devices designed primarily for use by individuals with mobility disabilities are less subject to fraud concerns because they were not designed to have a recreational component. Consequently, rarely, if ever, is any inquiry or assessment as to their appropriateness for use in a public entity necessary.

Definition of ''wheelchair.'' In seeking public feedback on the NPRM's definition of ''wheelchair,'' the Department explained its concern that the definition of ''wheelchair'' in section 508(c)(2) of the ADA (formerly section 507(c)(2), July 26, 1990, 104 Stat. 372, 42 U.S.C. 12207, renumbered section 508(c)(2), Public Law 110–325 section 6(a)(2), Sept. 25, 2008, 122 Stat. 3558), which pertains to Federal wilderness areas, is not specific enough to provide clear guidance in the array of settings covered by title II and that the stringent size and weight requirements for the Department of Transportation's definition of ''common wheelchair'' are not a good fit in the context of most public entities. The Department noted in the NPRM that it sought a definition of ''wheelchair'' that would include manually-operated and power-driven wheelchairs and mobility scooters (*i.e.*, those that typically are single-user, have three to four wheels, and are appropriate for both indoor and outdoor pedestrian areas), as well as a variety of types of wheelchairs and mobility scooters with individualized or unique features or models with different numbers of wheels. The NPRM defined a wheelchair as ''a device designed solely for use by an individual with a mobility impairment for the primary purpose of locomotion in typical indoor and outdoor pedestrian areas. A wheelchair may be manually-operated or power-driven.'' 73 FR 34466, 34479 (June 17, 2008). Although the NPRM's definition of ''wheelchair'' excluded mobility devices that are not designed solely for use by individuals with mobility disabilities, the Department, noting that the use of the Segway® PT by individuals with mobility disabilities is on the upswing, inquired as to whether this device should be included in the definition of ''wheelchair.''

Many environment and Federal government employee commenters objected to the Department's proposed definition of ''wheelchair'' because it differed from the definition of ''wheelchair'' found in section 508(c)(2) of the ADA—a definition used in the statute only in connection with a provision relating to the use of a wheelchair in a designated wilderness area. *See* 42 U.S.C. 12207(c)(1). Other government commenters associated with environmental issues wanted the phrase ''outdoor pedestrian use'' eliminated from the definition of ''wheelchair.'' Some transit system commenters wanted size, weight, and dimensions to be part of the definition because of concerns about costs associated with having to accommodate devices that exceed the dimensions of the ''common wheelchair'' upon which the 2004 ADAAG was based.

Many advocacy, nonprofit, and individual commenters indicated that as long as the Department intends the scope of the term ''mobility impairments'' to include other disabilities that cause mobility impairments (*e.g.*, respiratory, circulatory, stamina, etc.), they were in support of the language. Several commenters indicated a preference for the definition of ''wheelchair'' in section 508(c)(2) of the ADA. One commenter indicated a preference for the term ''assistive device,'' as it is defined in the Rehabilitation Act of 1973, over the term ''wheelchair.'' A few commenters indicated that strollers should be added to the preamble's list of examples of wheelchairs because parents of children with disabilities frequently use strollers as mobility devices until their children get older.

In the final rule, the Department has rearranged some wording and has made some changes in the terminology used in the definition of ''wheelchair,'' but essentially has retained the definition, and therefore the rationale, that was set forth in the NPRM. Again, the text of the ADA makes the definition of ''wheelchair'' contained in section 508(c)(2) applicable only to the specific context of uses in designated wilderness areas, and therefore does not compel the use of that definition for any other purpose. Moreover, the Department maintains that limiting the definition to devices suitable for use in an ''indoor pedestrian area'' as provided for in section 508(c)(2) of the ADA, would ignore the technological advances in wheelchair design that have occurred since the ADA went into effect and that the inclusion of the phrase ''indoor pedestrian area'' in the definition of ''wheelchair'' would set back progress made by individuals with mobility disabilities who, for many years now, have been using devices designed for locomotion

in indoor *and* outdoor settings. The Department has concluded that same rationale applies to placing limits on the size, weight, and dimensions of wheelchairs.

With regard to the term ''mobility impairments,'' the Department intended a broad reading so that a wide range of disabilities, including circulatory and respiratory disabilities, that make walking difficult or impossible, would be included. In response to comments on this issue, the Department has revisited the issue and has concluded that the most apt term to achieve this intent is ''mobility disability.''

In addition, the Department has decided that it is more appropriate to use the phrase ''primarily'' designed for use by individuals with disabilities in the final rule, rather than ''solely'' designed for use by individuals with disabilities—the phrase proposed in the NPRM. The Department believes that this phrase more accurately covers the range of devices the Department intends to fall within the definition of ''wheelchair.''

After receiving comments that the word ''typical'' is vague and the phrase ''pedestrian areas'' is confusing to apply, particularly in the context of similar, but not identical, terms used in the proposed Standards, the Department decided to delete the term ''typical indoor and outdoor pedestrian areas'' from the final rule. Instead, the final rule references ''indoor or of both indoor and outdoor locomotion,'' to make clear that the devices that fall within the definition of ''wheelchair'' are those that are used for locomotion on indoor and outdoor pedestrian paths or routes and not those that are intended exclusively for traversing undefined, unprepared, or unimproved paths or routes. Thus, the final rule defines the term ''wheelchair'' to mean ''a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or of both indoor and outdoor locomotion.''

Whether the definition of ''wheelchair'' includes the Segway® PT. As discussed above, because individuals with mobility disabilities are using the Segway® PT as a mobility device, the Department asked whether it should be included in the definition of ''wheelchair.'' The basic Segway® PT model is a two-wheeled, gyroscopically-stabilized, battery-powered personal transportation device. The user stands on a platform suspended three inches off the ground by wheels on each side, grasps a T-shaped handle, and steers the device similarly to a bicycle. Most Segway® PTs can travel up to 12½ miles per hour, compared to the average pedestrian walking speed of three to four miles per hour and the approximate maximum speed for power-operated wheelchairs of six miles per hour. In a study of trail and other non-motorized transportation users including EPAMDs, the Federal Highway Administration (FHWA) found that the eye height of individuals using EPAMDs ranged from approximately 69 to 80 inches. *See* Federal Highway Administration, *Characteristics of Emerging Road and Trail Users and Their Safety* (Oct. 14, 2004), available at *http://www.tfhrc.gov/safety/pubs/04103* (last visited June 24, 2010). Thus, the Segway® PT can operate at much greater speeds than wheelchairs, and the average user stands much taller than most wheelchair users.

The Segway® PT has been the subject of debate among users, pedestrians, disability advocates, State and local governments, businesses, and bicyclists. The fact that the Segway® PT is not designed primarily for use by individuals with disabilities, nor used primarily by persons with disabilities, complicates the question of to what extent individuals with disabilities should be allowed to operate them in areas and facilities where other power-driven mobility devices are not allowed. Those who question the use of the Segway® PT in pedestrian areas argue that the speed, size, and operating features of the devices make them too dangerous to operate alongside pedestrians and wheelchair users.

Comments regarding whether to include the Segway® PT in the definition of ''wheelchair'' were, by far, the most numerous received in the category of comments regarding wheelchairs and other power-driven mobility devices. Significant numbers of veterans with disabilities, individuals with multiple sclerosis, and those advocating on their behalf made concise statements of general support for the inclusion of the Segway® PT in the definition of ''wheelchair.'' Two veterans offered extensive comments on the topic, along with a few advocacy and nonprofit groups and individuals with disabilities for whom sitting is uncomfortable or impossible.

While there may be legitimate safety issues for EPAMD users and bystanders in some circumstances, EPAMDs and other non-traditional mobility devices can deliver real benefits to individuals with disabilities. Among the reasons given by commenters to include the Segway® PT in the definition of ''wheelchair'' were that the Segway® PT is well-suited for individuals with particular conditions that affect mobility including multiple sclerosis, Parkinson's disease, chronic obstructive pulmonary disease, amputations, spinal cord injuries, and other neurological disabilities, as well as functional limitations, such as gait limitation, inability to sit or discomfort in sitting, and diminished stamina issues. Such individuals often find that EPAMDs are more comfortable and easier to use than more traditional mobility devices and assist with balance, circulation, and digestion in ways that wheelchairs do not. *See* Rachel Metz, *Disabled Embrace Segway,* New York Times, Oct. 14, 2004. Commenters specifically cited pressure

relief, reduced spasticity, increased stamina, and improved respiratory, neurologic, and muscular health as secondary medical benefits from being able to stand.

Other arguments for including the Segway® PT in the definition of ''wheelchair'' were based on commenters' views that the Segway® PT offers benefits not provided by wheelchairs and mobility scooters, including its intuitive response to body movement, ability to operate with less coordination and dexterity than is required for many wheelchairs and mobility scooters, and smaller footprint and turning radius as compared to most wheelchairs and mobility scooters. Several commenters mentioned improved visibility, either due to the Segway® PT's raised platform or simply by virtue of being in a standing position. And finally, some commenters advocated for the inclusion of the Segway® PT simply based on civil rights arguments and the empowerment and self-esteem obtained from having the power to select the mobility device of choice.

Many commenters, regardless of their position on whether to include the Segway® PT in the definition of ''wheelchair,'' noted that the Segway® PT's safety record is as good as, if not better, than the record for wheelchairs and mobility scooters.

Most environmental, transit system, and government commenters were opposed to including the Segway® PT in the definition of ''wheelchair'' but were supportive of its inclusion as an ''other power-driven mobility device.'' Their concerns about including the Segway® PT in the definition of ''wheelchair'' had to do with the safety of the operators of these devices (*e.g.*, height clearances on trains and sloping trails in parks) and of pedestrians, particularly in confined and crowded facilities or in settings where motorized devices might be unexpected; the potential harm to the environment; the additional administrative, insurance, liability, and defensive litigation costs; potentially detrimental impacts on the environment and cultural and natural resources; and the impracticality of accommodating such devices in public transportation settings.

Other environmental, transit system, and government commenters would have banned all fuel-powered devices as mobility devices. In addition, these commenters would have classified non-motorized devices as ''wheelchairs'' and would have categorized motorized devices, such as the Segway® PT, battery-operated wheelchairs, and mobility scooters as ''other power-driven mobility devices.'' In support of this position, some of these commenters argued that because their equipment and facilities have been designed to comply with the dimensions of the ''common wheelchair'' upon which the ADAAG is based, any device that is larger than the prototype wheelchair would be misplaced in the definition of ''wheelchair.''

Still others in this group of commenters wished for only a single category of mobility devices and would have included wheelchairs, mobility scooters, and the Segway® PT as ''mobility devices'' and excluded fuel-powered devices from that definition.

Many disability advocacy and nonprofit commenters did not support the inclusion of the Segway® PT in the definition of ''wheelchair.'' Paramount to these commenters was the maintenance of existing protections for wheelchair users. Because there was unanimous agreement that wheelchair use rarely, if ever, may be restricted, these commenters strongly favored categorizing wheelchairs separately from the Segway® PT and other power-driven mobility devices and applying the intended-use determinant to assign the devices to either category. They indicated that while they support the greatest degree of access in public entities for all persons with disabilities who require the use of mobility devices, they recognize that under certain circumstances, allowing the use of other power-driven mobility devices would result in a fundamental alteration of programs, services, or activities, or run counter to legitimate safety requirements necessary for the safe operation of a public entity. While these groups supported categorizing the Segway® PT as an ''other power-driven mobility device,'' they universally noted that in their view, because the Segway® PT does not present environmental concerns and is as safe to use as, if not safer than, a wheelchair, it should be accommodated in most circumstances.

The Department has considered all the comments and has concluded that it should not include the Segway® PT in the definition of ''wheelchair.'' The final rule provides that the test for categorizing a device as a wheelchair or an other power-driven mobility device is whether the device is designed primarily for use by individuals with mobility disabilities. Mobility scooters are included in the definition of ''wheelchair'' because they are designed primarily for users with mobility disabilities. However, because the current generation of EPAMDs, including the Segway® PT, was designed for recreational users and not primarily for use by individuals with mobility disabilities, the Department has decided to continue its approach of excluding EPAMDs from the definition of ''wheelchair'' and including them in the definition of ''other power-driven mobility device.'' Although EPAMDs, such as the Segway® PT, are not included in the definition of a ''wheelchair,'' public entities must assess whether they can make reasonable modifications to permit individuals with mobility disabilities to use such devices on their premises. The Department recognizes that the Segway® PT provides many benefits to those who use them as mobility devices, including a measure of privacy with regard

to the nature of one's particular disability, and believes that in the vast majority of circumstances, the application of the factors described in §35.137 for providing access to other-powered mobility devices will result in the admission of the Segway® PT.

Treatment of ''manually-powered mobility aids.'' The Department's NPRM did not define the term ''manually-powered mobility aids.'' Instead, the NPRM included a non-exhaustive list of examples in §35.137(a). The NPRM queried whether the Department should maintain this approach to manually-powered mobility aids or whether it should adopt a more formal definition.

Only a few commenters addressed ''manually-powered mobility aids.'' Virtually all commenters were in favor of maintaining a non-exhaustive list of examples of ''manually-powered mobility aids'' rather than adopting a definition of the term. Of those who commented, a few sought clarification of the term ''manually-powered.'' One commenter suggested that the term be changed to ''human-powered.'' Other commenters requested that the Department include ordinary strollers in the non-exhaustive list of ''manually-powered mobility aids.'' Since strollers are not devices designed primarily for individuals with mobility disabilities, the Department does not consider them to be manually-powered mobility aids; however, strollers used in the context of transporting individuals with disabilities are subject to the same assessment required by the ADA's title II reasonable modification standards at §35.130(b)(7). The Department believes that because the existing approach is clear and understood easily by the public, no formal definition of the term ''manually-powered mobility aids'' is required.

Definition of ''other power-driven mobility device.'' The Department's NPRM defined the term ''other power-driven mobility device'' in §35.104 as ''any of a large range of devices powered by batteries, fuel, or other engines—whether or not designed solely for use by individuals with mobility impairments—that are used by individuals with mobility impairments for the purpose of locomotion, including golf cars, bicycles, electronic personal assistance mobility devices (EPAMDs), or any mobility aid designed to operate in areas without defined pedestrian routes.'' 73 FR 34466, 34504 (June 17, 2008).

Nearly all environmental, transit systems, and government commenters who supported the two-tiered concept of mobility devices said that the Department's definition of ''other power-driven mobility device'' is overbroad because it includes fuel-powered devices. These commenters sought a ban on fuel-powered devices in their entirety because they believe they are inherently dangerous and pose environmental and safety concerns. They also argued that permitting the use of many of the contemplated other power-driven mobility devices, fuel-powered ones especially, would fundamentally alter the programs, services, or activities of public entities.

Advocacy, nonprofit, and several individual commenters supported the definition of ''other power-driven mobility device'' because it allows new technologies to be added in the future, maintains the existing legal protections for wheelchairs, and recognizes that some devices, particularly the Segway® PT, which are not designed primarily for individuals with mobility disabilities, have beneficial uses for individuals with mobility disabilities. Despite support for the definition of ''other power-driven mobility device,'' however, most advocacy and nonprofit commenters expressed at least some hesitation about the inclusion of fuel-powered mobility devices in the definition. While virtually all of these commenters noted that a blanket exclusion of any device that falls under the definition of ''other power-driven mobility device'' would violate basic civil rights concepts, they also specifically stated that certain devices, particularly, off-highway vehicles, cannot be permitted in certain circumstances. They also made a distinction between the Segway® PT and other power-driven mobility devices, noting that the Segway® PT should be accommodated in most circumstances because it satisfies the safety and environmental elements of the policy analysis. These commenters indicated that they agree that other power-driven mobility devices must be assessed, particularly as to their environmental impact, before they are accommodated.

Although many commenters had reservations about the inclusion of fuel-powered devices in the definition of other power-driven mobility devices, the Department does not want the definition to be so narrow that it would foreclose the inclusion of new technological developments (whether powered by fuel or by some other means). It is for this reason that the Department has maintained the phrase ''any mobility device designed to operate in areas without defined pedestrian routes'' in the final rule's definition of other power-driven mobility devices. The Department believes that the limitations provided by ''fundamental alteration'' and the ability to impose legitimate safety requirements will likely prevent the use of fuel and combustion engine-driven devices indoors, as well as in outdoor areas with heavy pedestrian traffic. The Department notes, however, that in the future, technological developments may result in the production of safe fuel-powered mobility devices that do not pose environmental and safety concerns. The final rule allows consideration to be given as to whether the use of a fuel-powered device would create a substantial risk of serious harm to the environment or natural or cultural resources, and to whether the use of

such a device conflicts with Federal land management laws or regulations; this aspect of the final rule will further limit the inclusion of fuel-powered devices where they are not appropriate. Consequently, the Department has maintained fuel-powered devices in the definition of ''other power-driven mobility device.'' The Department has also added language to the definition of ''other power-driven mobility device'' to reiterate that the definition does not apply to Federal wilderness areas, which are not covered by title II of the ADA; the use of wheelchairs in such areas is governed by section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

''Qualified Interpreter''

In the NPRM, the Department proposed adding language to the definition of ''qualified interpreter'' to clarify that the term includes, but is not limited to, sign language interpreters, oral interpreters, and cued-speech interpreters. As the Department explained, not all interpreters are qualified for all situations. For example, a qualified interpreter who uses American Sign Language (ASL) is not necessarily qualified to interpret orally. In addition, someone with only a rudimentary familiarity with sign language or finger spelling is not qualified, nor is someone who is fluent in sign language but unable to translate spoken communication into ASL or to translate signed communication into spoken words.

As further explained, different situations will require different types of interpreters. For example, an oral interpreter who has special skill and training to mouth a speaker's words silently for individuals who are deaf or hard of hearing may be necessary for an individual who was raised orally and taught to read lips or was diagnosed with hearing loss later in life and does not know sign language. An individual who is deaf or hard of hearing may need an oral interpreter if the speaker's voice is unclear, if there is a quick-paced exchange of communication (*e.g.*, in a meeting), or when the speaker does not directly face the individual who is deaf or hard of hearing. A cued-speech interpreter functions in the same manner as an oral interpreter except that he or she also uses a hand code or cue to represent each speech sound.

The Department received many comments regarding the proposed modifications to the definition of ''interpreter.'' Many commenters requested that the Department include within the definition a requirement that interpreters be certified, particularly if they reside in a State that licenses or certifies interpreters. Other commenters opposed a certification requirement as unduly limiting, noting that an interpreter may well be qualified even if that same interpreter is not certified. These commenters noted the absence of nationwide standards or universally accepted criteria for certification.

On review of this issue, the Department has decided against imposing a certification requirement under the ADA. It is sufficient under the ADA that the interpreter be qualified. However, as the Department stated in the original preamble, this rule does not invalidate or limit State or local laws that impose standards for interpreters that are equal to or more stringent than those imposed by this definition. *See* 28 CFR part 35, app. A at 566 (2009). For instance, the definition would not supersede any requirement of State law for use of a certified interpreter in court proceedings.

With respect to the proposed additions to the rule, most commenters supported the expansion of the list of qualified interpreters, and some advocated for the inclusion of other types of interpreters on the list as well, such as deaf-blind interpreters, certified deaf interpreters, and speech-to-speech interpreters. As these commenters explained, deaf-blind interpreters are interpreters who have specialized skills and training to interpret for individuals who are deaf and blind; certified deaf interpreters are deaf or hard of hearing interpreters who work with hearing sign language interpreters to meet the specific communication needs of deaf individuals; and speech-to-speech interpreters have special skill and training to interpret for individuals who have speech disabilities.

The list of interpreters in the definition of qualified interpreter is illustrative, and the Department does not believe it necessary or appropriate to attempt to provide an exhaustive list of qualified interpreters. Accordingly, the Department has decided not to expand the proposed list. However, if a deaf and blind individual needs interpreter services, an interpreter who is qualified to handle the needs of that individual may be required. The guiding criterion is that the public entity must provide appropriate auxiliary aids and services to ensure effective communication with the individual. Commenters also suggested various definitions for the term ''cued-speech interpreters,'' and different descriptions of the tasks they performed. After reviewing the various comments, the Department has determined that it is more accurate and appropriate to refer to such individuals as ''cued-language transliterators.'' Likewise, the Department has changed the term ''oral interpreters'' to ''oral transliterators.'' These two changes have been made to distinguish between sign language interpreters, who translate one language into another language (*e.g.*, ASL to English and English to ASL), from transliterators who interpret within the same language between deaf and hearing individuals. A cued-language transliterator is

an interpreter who has special skill and training in the use of the Cued Speech system of handshapes and placements, along with non-manual information, such as facial expression and body language, to show auditory information visually, including speech and environmental sounds. An oral transliterator is an interpreter who has special skill and training to mouth a speaker's words silently for individuals who are deaf or hard of hearing. While the Department included definitions for ''cued-speech interpreter'' and ''oral interpreter'' in the regulatory text proposed in the NPRM, the Department has decided that it is unnecessary to include such definitions in the text of the final rule.

Many commenters questioned the proposed deletion of the requirement that a qualified interpreter be able to interpret both receptively and expressively, noting the importance of both these skills. Commenters stated that this phrase was carefully crafted in the original regulation to make certain that interpreters both (1) are capable of understanding what a person with a disability is saying and (2) have the skills needed to convey information back to that individual. These are two very different skill sets and both are equally important to achieve effective communication. For example, in a medical setting, a sign language interpreter must have the necessary skills to understand the grammar and syntax used by an ASL user (receptive skills) and the ability to interpret complicated medical information—presented by medical staff in English—back to that individual in ASL (expressive skills). The Department agrees and has put the phrase ''both receptively and expressively'' back in the definition.

Several advocacy groups suggested that the Department make clear in the definition of qualified interpreter that the interpreter may appear either on-site or remotely using a video remote interpreting (VRI) service. Given that the Department has included in this rule both a definition of VRI services and standards that such services must satisfy, such an addition to the definition of qualified interpreter is appropriate.

After consideration of all relevant information submitted during the public comment period, the Department has modified the definition from that initially proposed in the NPRM. The final definition now states that ''[q]ualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.''

''Qualified Reader''

The 1991 title II regulation identifies a qualified reader as an auxiliary aid, but did not define the term. *See* 28 CFR 35.104(2). Based upon the Department's investigation of complaints alleging that some entities have provided ineffective readers, the Department proposed in the NPRM to define ''qualified reader'' similarly to ''qualified interpreter'' to ensure that entities select qualified individuals to read an examination or other written information in an effective, accurate, and impartial manner. This proposal was suggested in order to make clear to public entities that a failure to provide a qualified reader to a person with a disability may constitute a violation of the requirement to provide appropriate auxiliary aids and services.

The Department received comments supporting inclusion in the regulation of a definition of a ''qualified reader.'' Some commenters suggested the Department add to the definition a requirement prohibiting the use of a reader whose accent, diction, or pronunciation makes full comprehension of material being read difficult. Another commenter requested that the Department include a requirement that the reader ''will follow the directions of the person for whom he or she is reading.'' Commenters also requested that the Department define ''accurately'' and ''effectively'' as used in this definition.

While the Department believes that its proposed regulatory definition adequately addresses these concerns, the Department emphasizes that a reader, in order to be ''qualified,'' must be skilled in reading the language and subject matter and must be able to be easily understood by the individual with the disability. For example, if a reader is reading aloud the questions for a college microbiology examination, that reader, in order to be qualified, must know the proper pronunciation of scientific terminology used in the text, and must be sufficiently articulate to be easily understood by the individual with a disability for whom he or she is reading. In addition, the terms ''effectively'' and ''accurately'' have been successfully used and understood in the Department's existing definition of ''qualified interpreter'' since 1991 without specific regulatory definitions. Instead, the Department has relied upon the common use and understanding of those terms from standard English dictionaries. Thus, the definition of ''qualified reader'' has not been changed from that contained in the NPRM. The final rule defines ''qualified reader'' to mean ''a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.''

''Service Animal''

Although there is no specific language in the 1991 title II regulation concerning service animals, title II entities have the same legal obligations as title III entities to make reasonable modifications in policies, practices, or procedures to allow service animals when necessary in order to avoid discrimination on the basis of disability, unless the entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program, or activity. *See* 28 CFR 35.130(b)(7). The 1991 title III regulation, 28 CFR 36.104, defines a ''service animal'' as ''any guide dog, signal dog, or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals with impaired hearing to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair, or fetching dropped items.'' Section 36.302(c)(1) of the 1991 title III regulation requires that ''[g]enerally, a public accommodation shall modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability.'' Section 36.302(c)(2) of the 1991 title III regulation states that ''a public accommodation [is not required] to supervise or care for a service animal.''

The Department has issued guidance and provided technical assistance and publications concerning service animals since the 1991 regulations became effective. In the NPRM, the Department proposed to modify the definition of service animal, added the definition to title II, and asked for public input on several issues related to the service animal provisions of the title II regulation: whether the Department should clarify the phrase ''providing minimal protection'' in the definition or remove it; whether there are any circumstances where a service animal ''providing minimal protection'' would be appropriate or expected; whether certain species should be eliminated from the definition of ''service animal,'' and, if so, which types of animals should be excluded; whether ''common domestic animal'' should be part of the definition; and whether a size or weight limitation should be imposed for common domestic animals even if the animal satisfies the ''common domestic animal'' part of the NPRM definition.

The Department received extensive comments on these issues, as well as requests to clarify the obligations of State and local government entities to accommodate individuals with disabilities who use service animals, and has modified the final rule in response. In the interests of avoiding unnecessary repetition, the Department has elected to discuss the issues raised in the NPRM questions about service animals and the corresponding public comments in the following discussion of the definition of ''service animal.''

The Department's final rule defines ''service animal'' as ''any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. Examples of work or tasks include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing non-violent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.''

This definition has been designed to clarify a key provision of the ADA. Many covered entities indicated that they are confused regarding their obligations under the ADA with regard to individuals with disabilities who use service animals. Individuals with disabilities who use trained guide or service dogs are concerned that if untrained or unusual animals are termed ''service animals,'' their own right to use guide or service dogs may become unnecessarily restricted or questioned. Some individuals who are not individuals with disabilities have claimed, whether fraudulently or sincerely (albeit mistakenly), that their animals are service animals covered by the ADA, in order to gain access to courthouses, city or county administrative offices, and other title II facilities. The increasing use of wild, exotic, or unusual species, many of which are untrained, as service animals has also added to the confusion.

Finally, individuals with disabilities who have the legal right under the Fair Housing Act (FHAct) to use certain animals in their homes as a reasonable accommodation to their disabilities have assumed that their animals also qualify under the ADA. This is not necessarily the case, as discussed below.

The Department recognizes the diverse needs and preferences of individuals with disabilities protected under the ADA, and does

not wish to unnecessarily impede individual choice. Service animals play an integral role in the lives of many individuals with disabilities and, with the clarification provided by the final rule, individuals with disabilities will continue to be able to use their service animals as they go about their daily activities and civic interactions. The clarification will also help to ensure that the fraudulent or mistaken use of other animals not qualified as service animals under the ADA will be deterred. A more detailed analysis of the elements of the definition and the comments responsive to the service animal provisions of the NPRM follows.

Providing minimal protection. As previously noted, the 1991 title II regulation does not contain specific language concerning service animals. The 1991 title III regulation included language stating that ''minimal protection'' was a task that could be performed by an individually trained service animal for the benefit of an individual with a disability. In the Department's ''ADA Business Brief on Service Animals'' (2002), the Department interpreted the ''minimal protection'' language within the context of a seizure (*i.e.*, alerting and protecting a person who is having a seizure). The Department received many comments in response to the question of whether the ''minimal protection'' language should be clarified. Many commenters urged the removal of the ''minimal protection'' language from the service animal definition for two reasons: (1) The phrase can be interpreted to allow any dog that is trained to be aggressive to qualify as a service animal simply by pairing the animal with a person with a disability; and (2) the phrase can be interpreted to allow any untrained pet dog to qualify as a service animal, since many consider the mere presence of a dog to be a crime deterrent, and thus sufficient to meet the minimal protection standard. These commenters argued, and the Department agrees, that these interpretations were not contemplated under the original title III regulation, and, for the purposes of the final title II regulations, the meaning of ''minimal protection'' must be made clear.

While many commenters stated that they believe that the ''minimal protection'' language should be eliminated, other commenters recommended that the language be clarified, but retained. Commenters favoring clarification of the term suggested that the Department explicitly exclude the function of attack or exclude those animals that are trained solely to be aggressive or protective. Other commenters identified non-violent behavioral tasks that could be construed as minimally protective, such as interrupting self-mutilation, providing safety checks and room searches, reminding the individual to take medications, and protecting the individual from injury resulting from seizures or unconsciousness.

Several commenters noted that the existing direct threat defense, which allows the exclusion of a service animal if the animal exhibits unwarranted or unprovoked violent behavior or poses a direct threat, prevents the use of ''attack dogs'' as service animals. One commenter noted that the use of a service animal trained to provide ''minimal protection'' may impede access to care in an emergency, for example, where the first responder, usually a title II entity, is unable or reluctant to approach a person with a disability because the individual's service animal is in a protective posture suggestive of aggression.

Many organizations and individuals stated that in the general dog training community, ''protection'' is code for attack or aggression training and should be removed from the definition. Commenters stated that there appears to be a broadly held misconception that aggression-trained animals are appropriate service animals for persons with post traumatic stress disorder (PTSD). While many individuals with PTSD may benefit by using a service animal, the work or tasks performed appropriately by such an animal would not involve unprovoked aggression but could include actively cuing the individual by nudging or pawing the individual to alert to the onset of an episode and removing the individual from the anxiety-provoking environment.

The Department recognizes that despite its best efforts to provide clarification, the ''minimal protection'' language appears to have been misinterpreted. While the Department maintains that protection from danger is one of the key functions that service animals perform for the benefit of persons with disabilities, the Department recognizes that an animal individually trained to provide aggressive protection, such as an attack dog, is not appropriately considered a service animal. Therefore, the Department has decided to modify the ''minimal protection'' language to read ''non-violent protection,'' thereby excluding so-called ''attack dogs'' or dogs with traditional ''protection training'' as service animals. The Department believes that this modification to the service animal definition will eliminate confusion, without restricting unnecessarily the type of work or tasks that service animals may perform. The Department's modification also clarifies that the crime-deterrent effect of a dog's presence, by itself, does not qualify as work or tasks for purposes of the service animal definition.

Alerting to intruders. The phrase ''alerting to intruders'' is related to the issues of minimal protection and the work or tasks an animal may perform to meet the definition of a service animal. In the original 1991 regulatory text, this phrase was intended to identify service animals that alert individuals

who are deaf or hard of hearing to the presence of others. This language has been misinterpreted by some to apply to dogs that are trained specifically to provide aggressive protection, resulting in the assertion that such training qualifies a dog as a service animal under the ADA. The Department reiterates that title II entities are not required to admit any animal whose use poses a direct threat under §35.139. In addition, the Department has decided to remove the word ''intruders'' from the service animal definition and replace it with the phrase ''the presence of people or sounds.'' The Department believes this clarifies that so-called ''attack training'' or other aggressive response types of training that cause a dog to provide an aggressive response do not qualify a dog as a service animal under the ADA.

Conversely, if an individual uses a breed of dog that is perceived to be aggressive because of breed reputation, stereotype, or the history or experience the observer may have with other dogs, but the dog is under the control of the individual with a disability and does not exhibit aggressive behavior, the title II entity cannot exclude the individual or the animal from a State or local government program, service, or facility. The animal can only be removed if it engages in the behaviors mentioned in §35.136(b) (as revised in the final rule) or if the presence of the animal constitutes a fundamental alteration to the nature of the service, program, or activity of the title II entity.

Doing ''work'' or ''performing tasks.'' The NPRM proposed that the Department maintain the requirement, first articulated in the 1991 title III regulation, that in order to qualify as a service animal, the animal must ''perform tasks'' or ''do work'' for the individual with a disability. The phrases ''perform tasks'' and ''do work'' describe what an animal must do for the benefit of an individual with a disability in order to qualify as a service animal.

The Department received a number of comments in response to the NPRM proposal urging the removal of the term ''do work'' from the definition of a service animal. These commenters argued that the Department should emphasize the performance of tasks instead. The Department disagrees. Although the common definition of work includes the performance of tasks, the definition of work is somewhat broader, encompassing activities that do not appear to involve physical action.

One service dog user stated that in some cases, ''critical forms of assistance can't be construed as physical tasks,'' noting that the manifestations of ''brain-based disabilities,'' such as psychiatric disorders and autism, are as varied as their physical counterparts. The Department agrees with this statement but cautions that unless the animal is individually trained to do something that qualifies as work or a task, the animal is a pet or support animal and does not qualify for coverage as a service animal. A pet or support animal may be able to discern that the individual is in distress, but it is what the animal is trained to do in response to this awareness that distinguishes a service animal from an observant pet or support animal.

The NPRM contained an example of ''doing work'' that stated ''a psychiatric service dog can help some individuals with dissociative identity disorder to remain grounded in time or place.'' 73 FR 34466, 34504 (June 17, 2008). Several commenters objected to the use of this example, arguing that grounding was not a ''task'' and therefore, the example inherently contradicted the basic premise that a service animal must perform a task in order to mitigate a disability. Other commenters stated that ''grounding'' should not be included as an example of ''work'' because it could lead to some individuals claiming that they should be able to use emotional support animals in public because the dog makes them feel calm or safe. By contrast, one commenter with experience in training service animals explained that grounding is a trained task based upon very specific behavioral indicators that can be observed and measured. These tasks are based upon input from mental health practitioners, dog trainers, and individuals with a history of working with psychiatric service dogs.

It is the Department's view that an animal that is trained to ''ground'' a person with a psychiatric disorder does work or performs a task that would qualify it as a service animal as compared to an untrained emotional support animal whose presence affects a person's disability. It is the fact that the animal is trained to respond to the individual's needs that distinguishes an animal as a service animal. The process must have two steps: Recognition and response. For example, if a service animal senses that a person is about to have a psychiatric episode and it is trained to respond for example, by nudging, barking, or removing the individual to a safe location until the episode subsides, then the animal has indeed performed a task or done work on behalf of the individual with the disability, as opposed to merely sensing an event.

One commenter suggested defining the term ''task,'' presumably to improve the understanding of the types of services performed by an animal that would be sufficient to qualify the animal for coverage. The Department believes that the common definition of the word ''task'' is sufficiently clear and that it is not necessary to add to the definitions section. However, the Department has added examples of other kinds of work or tasks to help illustrate and provide

clarity to the definition. After careful evaluation of this issue, the Department has concluded that the phrases ''do work'' and ''perform tasks'' have been effective during the past two decades to illustrate the varied services provided by service animals for the benefit of individuals with all types of disabilities. Thus, the Department declines to depart from its longstanding approach at this time.

Species limitations. When the Department originally issued its title III regulation in the early 1990s, the Department did not define the parameters of acceptable animal species. At that time, few anticipated the variety of animals that would be promoted as service animals in the years to come, which ranged from pigs and miniature horses to snakes, iguanas, and parrots. The Department has followed this particular issue closely, keeping current with the many unusual species of animals represented to be service animals. Thus, the Department has decided to refine further this aspect of the service animal definition in the final rule.

The Department received many comments from individuals and organizations recommending species limitations. Several of these commenters asserted that limiting the number of allowable species would help stop erosion of the public's trust, which has resulted in reduced access for many individuals with disabilities who use trained service animals that adhere to high behavioral standards. Several commenters suggested that other species would be acceptable if those animals could meet nationally recognized behavioral standards for trained service dogs. Other commenters asserted that certain species of animals (*e.g.*, reptiles) cannot be trained to do work or perform tasks, so these animals would not be covered.

In the NPRM, the Department used the term ''common domestic animal'' in the service animal definition and excluded reptiles, rabbits, farm animals (including horses, miniature horses, ponies, pigs, and goats), ferrets, amphibians, and rodents from the service animal definition. 73 FR 34466, 34478 (June 17, 2008). However, the term ''common domestic animal'' is difficult to define with precision due to the increase in the number of domesticated species. Also, several State and local laws define a ''domestic'' animal as an animal that is not wild. The Department agrees with commenters' views that limiting the number and types of species recognized as service animals will provide greater predictability for State and local government entities as well as added assurance of access for individuals with disabilities who use dogs as service animals. As a consequence, the Department has decided to limit this rule's coverage of service animals to dogs, which are the most common service animals used by individuals with disabilities.

Wild animals, monkeys, and other nonhuman primates. Numerous business entities endorsed a narrow definition of acceptable service animal species, and asserted that there are certain animals (*e.g.*, reptiles) that cannot be trained to do work or perform tasks. Other commenters suggested that the Department should identify excluded animals, such as birds and llamas, in the final rule. Although one commenter noted that wild animals bred in captivity should be permitted to be service animals, the Department has decided to make clear that all wild animals, whether born or bred in captivity or in the wild, are eliminated from coverage as service animals. The Department believes that this approach reduces risks to health or safety attendant with wild animals. Some animals, such as certain nonhuman primates including certain monkeys, pose a direct threat; their behavior can be unpredictably aggressive and violent without notice or provocation. The American Veterinary Medical Association (AVMA) issued a position statement advising against the use of monkeys as service animals, stating that ''[t]he AVMA does not support the use of nonhuman primates as assistance animals because of animal welfare concerns, and the potential for serious injury and zoonotic [animal to human disease transmission] risks.'' AVMA Position Statement, *Nonhuman Primates as Assistance Animals,* (2005) available at *http://www.avma.org/issues/policy/nonhuman_primates.asp* (last visited June 24, 2010).

An organization that trains capuchin monkeys to provide in-home services to individuals with paraplegia and quadriplegia was in substantial agreement with the AVMA's views but requested a limited recognition in the service animal definition for the capuchin monkeys it trains to provide assistance for persons with disabilities. The organization commented that its trained capuchin monkeys undergo scrupulous veterinary examinations to ensure that the animals pose no health risks, and are used by individuals with disabilities exclusively in their homes. The organization acknowledged that the capuchin monkeys it trains are not necessarily suitable for use in State or local government facilities. The organization noted that several State and local government entities have local zoning, licensing, health, and safety laws that prohibit nonhuman primates, and that these prohibitions would prevent individuals with disabilities from using these animals even in their homes.

The organization argued that including capuchin monkeys under the service animal umbrella would make it easier for individuals with disabilities to obtain reasonable modifications of State and local licensing, health, and safety laws that would permit the use of these monkeys. The organization argued that this limited modification to the

service animal definition was warranted in view of the services these monkeys perform, which enable many individuals with paraplegia and quadriplegia to live and function with increased independence.

The Department has carefully considered the potential risks associated with the use of nonhuman primates as service animals in State and local government facilities, as well as the information provided to the Department about the significant benefits that trained capuchin monkeys provide to certain individuals with disabilities in residential settings. The Department has determined, however, that nonhuman primates, including capuchin monkeys, will not be recognized as service animals for purposes of this rule because of their potential for disease transmission and unpredictable aggressive behavior. The Department believes that these characteristics make nonhuman primates unsuitable for use as service animals in the context of the wide variety of public settings subject to this rule. As the organization advocating the inclusion of capuchin monkeys acknowledges, capuchin monkeys are not suitable for use in public facilities.

The Department emphasizes that it has decided only that capuchin monkeys will not be included in the definition of service animals for purposes of its regulation implementing the ADA. This decision does not have any effect on the extent to which public entities are required to allow the use of such monkeys under other Federal statutes. For example, under the FHAct, an individual with a disability may have the right to have an animal other than a dog in his or her home if the animal qualifies as a ''reasonable accommodation'' that is necessary to afford the individual equal opportunity to use and enjoy a dwelling, assuming that the use of the animal does not pose a direct threat. In some cases, the right of an individual to have an animal under the FHAct may conflict with State or local laws that prohibit all individuals, with or without disabilities, from owning a particular species. However, in this circumstance, an individual who wishes to request a reasonable modification of the State or local law must do so under the FHAct, not the ADA.

Having considered all of the comments about which species should qualify as service animals under the ADA, the Department has determined the most reasonable approach is to limit acceptable species to dogs.

Size or weight limitations. The vast majority of commenters did not support a size or weight limitation. Commenters were typically opposed to a size or weight limit because many tasks performed by service animals require large, strong dogs. For instance, service animals may perform tasks such as providing balance and support or pulling a wheelchair. Small animals may not be suitable for large adults. The weight of the service animal user is often correlated with the size and weight of the service animal. Others were concerned that adding a size and weight limit would further complicate the difficult process of finding an appropriate service animal. One commenter noted that there is no need for a limit because ''if, as a practical matter, the size or weight of an individual's service animal creates a direct threat or fundamental alteration to a particular public entity or accommodation, there are provisions that allow for the animal's exclusion or removal.'' Some common concerns among commenters in support of a size and weight limit were that a larger animal may be less able to fit in various areas with its handler, such as toilet rooms and public seating areas, and that larger animals are more difficult to control.

Balancing concerns expressed in favor of and against size and weight limitations, the Department has determined that such limitations would not be appropriate. Many individuals of larger stature require larger dogs. The Department believes it would be inappropriate to deprive these individuals of the option of using a service dog of the size required to provide the physical support and stability these individuals may need to function independently. Since large dogs have always served as service animals, continuing their use should not constitute fundamental alterations or impose undue burdens on title II entities.

Breed limitations. A few commenters suggested that certain breeds of dogs should not be allowed to be used as service animals. Some suggested that the Department should defer to local laws restricting the breeds of dogs that individuals who reside in a community may own. Other commenters opposed breed restrictions, stating that the breed of a dog does not determine its propensity for aggression and that aggressive and non-aggressive dogs exist in all breeds.

The Department does not believe that it is either appropriate or consistent with the ADA to defer to local laws that prohibit certain breeds of dogs based on local concerns that these breeds may have a history of unprovoked aggression or attacks. Such deference would have the effect of limiting the rights of persons with disabilities under the ADA who use certain service animals based on where they live rather than on whether the use of a particular animal poses a direct threat to the health and safety of others. Breed restrictions differ significantly from jurisdiction to jurisdiction. Some jurisdictions have no breed restrictions. Others have restrictions that, while well-meaning, have the unintended effect of screening out the very breeds of dogs that have successfully served as service animals for decades without a history of the type of unprovoked aggression or attacks that would pose a direct

threat, *e.g.*, German Shepherds. Other jurisdictions prohibit animals over a certain weight, thereby restricting breeds without invoking an express breed ban. In addition, deference to breed restrictions contained in local laws would have the unacceptable consequence of restricting travel by an individual with a disability who uses a breed that is acceptable and poses no safety hazards in the individual's home jurisdiction but is nonetheless banned by other jurisdictions. State and local government entities have the ability to determine, on a case-by-case basis, whether a particular service animal can be excluded based on that particular animal's actual behavior or history—not based on fears or generalizations about how an animal or breed might behave. This ability to exclude an animal whose behavior or history evidences a direct threat is sufficient to protect health and safety.

Recognition of psychiatric service animals but not ''emotional support animals.'' The definition of ''service animal'' in the NPRM stated the Department's longstanding position that emotional support animals are not included in the definition of ''service animal.'' The proposed text in §35.104 provided that ''[a]nimals whose sole function is to provide emotional support, comfort, therapy, companionship, therapeutic benefits or to promote emotional well-being are not service animals.'' 73 FR 34466, 34504 (June 17, 2008).

Many advocacy organizations expressed concern and disagreed with the exclusion of comfort and emotional support animals. Others have been more specific, stating that individuals with disabilities may need their emotional support animals in order to have equal access. Some commenters noted that individuals with disabilities use animals that have not been trained to perform tasks directly related to their disability. These animals do not qualify as service animals under the ADA. These are emotional support or comfort animals.

Commenters asserted that excluding categories such as ''comfort'' and ''emotional support'' animals recognized by laws such as the FHAct or the Air Carrier Access Act (ACAA) is confusing and burdensome. Other commenters noted that emotional support and comfort animals perform an important function, asserting that animal companionship helps individuals who experience depression resulting from multiple sclerosis.

Some commenters explained the benefits emotional support animals provide, including emotional support, comfort, therapy, companionship, therapeutic benefits, and the promotion of emotional well-being. They contended that without the presence of an emotional support animal in their lives they would be disadvantaged and unable to participate in society. These commenters were concerned that excluding this category of animals will lead to discrimination against, and the excessive questioning of, individuals with non-visible or non-apparent disabilities. Other commenters expressing opposition to the exclusion of individually trained ''comfort'' or ''emotional support'' animals asserted that the ability to soothe or de-escalate and control emotion is ''work'' that benefits the individual with the disability.

Many commenters requested that the Department carve out an exception that permits current or former members of the military to use emotional support animals. They asserted that a significant number of service members returning from active combat duty have adjustment difficulties due to combat, sexual assault, or other traumatic experiences while on active duty. Commenters noted that some current or former members of the military service have been prescribed animals for conditions such as PTSD. One commenter stated that service women who were sexually assaulted while in the military use emotional support animals to help them feel safe enough to step outside their homes. The Department recognizes that many current and former members of the military have disabilities as a result of service-related injuries that may require emotional support and that such individuals can benefit from the use of an emotional support animal and could use such animal in their home under the FHAct. However, having carefully weighed the issues, the Department believes that its final rule appropriately addresses the balance of issues and concerns of both the individual with a disability and the public entity. The Department also notes that nothing in this part prohibits a public entity from allowing current or former military members or anyone else with disabilities to utilize emotional support animals if it wants to do so.

Commenters asserted the view that if an animal's ''mere presence'' legitimately provides such benefits to an individual with a disability and if those benefits are necessary to provide equal opportunity given the facts of the particular disability, then such an animal should qualify as a ''service animal.'' Commenters noted that the focus should be on the nature of a person's disability, the difficulties the disability may impose and whether the requested accommodation would legitimately address those difficulties, not on evaluating the animal involved. The Department understands this approach has benefitted many individuals under the FHAct and analogous State law provisions, where the presence of animals poses fewer health and safety issues, and where emotional support animals provide assistance that is unique to residential settings. The Department believes, however, that the presence of such animals is not required in the context of title II entities such as courthouses, State and local government administrative buildings, and similar title II facilities.

Under the Department's previous regulatory framework, some individuals and entities assumed that the requirement that service animals must be individually trained to do work or perform tasks excluded all individuals with mental disabilities from having service animals. Others assumed that any person with a psychiatric condition whose pet provided comfort to them was covered by the 1991 title II regulation. The Department reiterates that psychiatric service animals that are trained to do work or perform a task for individuals whose disability is covered by the ADA are protected by the Department's present regulatory approach. Psychiatric service animals can be trained to perform a variety of tasks that assist individuals with disabilities to detect the onset of psychiatric episodes and ameliorate their effects. Tasks performed by psychiatric service animals may include reminding individuals to take medicine, providing safety checks or room searches for individuals with PTSD, interrupting self-mutilation, and removing disoriented individuals from dangerous situations.

The difference between an emotional support animal and a psychiatric service animal is the work or tasks that the animal performs. Traditionally, service dogs worked as guides for individuals who were blind or had low vision. Since the original regulation was promulgated, service animals have been trained to assist individuals with many different types of disabilities.

In the final rule, the Department has retained its position on the exclusion of emotional support animals from the definition of ''service animal.'' The definition states that ''[t]he provision of emotional support, well-being, comfort, or companionship, * * * do[es] not constitute work or tasks for the purposes of this definition.'' The Department notes, however, that the exclusion of emotional support animals from coverage in the final rule does not mean that individuals with psychiatric or mental disabilities cannot use service animals that meet the regulatory definition. The final rule defines service animal as follows: ''[s]ervice animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability.'' This language simply clarifies the Department's long-standing position.

The Department's position is based on the fact that the title II and title III regulations govern a wider range of public settings than the housing and transportation settings for which the Department of Housing and Urban Development (HUD) and DOT regulations allow emotional support animals or comfort animals. The Department recognizes that there are situations not governed by the title II and title III regulations, particularly in the context of residential settings and transportation, where there may be a legal obligation to permit the use of animals that do not qualify as service animals under the ADA, but whose presence nonetheless provides necessary emotional support to persons with disabilities. Accordingly, other Federal agency regulations, case law, and possibly State or local laws governing those situations may provide appropriately for increased access for animals other than service animals as defined under the ADA. Public officials, housing providers, and others who make decisions relating to animals in residential and transportation settings should consult the Federal, State, and local laws that apply in those areas (*e.g.*, the FHAct regulations of HUD and the ACAA) and not rely on the ADA as a basis for reducing those obligations.

Retain term ''service animal.'' Some commenters asserted that the term ''assistance animal'' is a term of art and should replace the term ''service animal.'' However, the majority of commenters preferred the term ''service animal'' because it is more specific. The Department has decided to retain the term ''service animal'' in the final rule. While some agencies, like HUD, use the term ''assistance animal,'' ''assistive animal,'' or ''support animal,'' these terms are used to denote a broader category of animals than is covered by the ADA. The Department has decided that changing the term used in the final rule would create confusion, particularly in view of the broader parameters for coverage under the FHAct, *cf.*, preamble to HUD's Final Rule for Pet Ownership for the Elderly and Persons with Disabilities, 73 FR 63834–38 (Oct. 27, 2008); HUD Handbook No. 4350.3 Rev–1, Chapter 2, Occupancy Requirements of Subsidized Multifamily Housing Programs (June 2007), available at *http://www.hud.gov/offices/adm/hudclips/handbooks/hsgh/4350.3* (last visited June 24, 2010). Moreover, as discussed above, the Department's definition of ''service animal'' in the title II final rule does not affect the rights of individuals with disabilities who use assistance animals in their homes under the FHAct or who use ''emotional support animals'' that are covered under the ACAA and its implementing regulations. *See* 14 CFR 382.7 *et seq.; see also* Department of Transportation, *Guidance Concerning Service Animals in Air Transportation*, 68 FR 24874, 24877 (May 9, 2003) (discussing accommodation of service animals and emotional support animals on aircraft).

''Video Remote Interpreting'' (VRI) Services

In the NPRM, the Department proposed adding Video Interpreting Services (VIS) to the list of auxiliary aids available to provide effective communication described in §35.104. In the preamble to the NPRM, VIS was defined as ''a technology composed of a video

phone, video monitors, cameras, a high-speed Internet connection, and an interpreter. The video phone provides video transmission to a video monitor that permits the individual who is deaf or hard of hearing to view and sign to a video interpreter (*i.e.*, a live interpreter in another location), who can see and sign to the individual through a camera located on or near the monitor, while others can communicate by speaking. The video monitor can display a split screen of two live images, with the interpreter in one image and the individual who is deaf or hard of hearing in the other image.'' 73 FR 34446, 34479 (June 17, 2008). Comments from advocacy organizations and individuals unanimously requested that the Department use the term ''video remote interpreting (VRI),'' instead of VIS, for consistency with Federal Communications Commission (FCC) regulations. *See* FCC Public Notice, DA–0502417 (Sept. 7, 2005), and with common usage by consumers. The Department has made that change throughout the regulation to avoid confusion and to make the regulation more consistent with existing regulations.

Many commenters also requested that the Department distinguish between VRI and ''video relay service (VRS).'' Both VRI and VRS use a remote interpreter who is able to see and communicate with a deaf person and a hearing person, and all three individuals may be connected by a video link. VRI is a fee-based interpreting service conveyed via videoconferencing where at least one person, typically the interpreter, is at a separate location. VRI can be provided as an on-demand service or by appointment. VRI normally involves a contract in advance for the interpreter who is usually paid by the covered entity.

VRS is a telephone service that enables persons with disabilities to use the telephone to communicate using video connections and is a more advanced form of relay service than the traditional voice to text telephones (TTY) relay systems that were recognized in the 1991 title II regulation. More specifically, VRS is a video relay service using interpreters connected to callers by video hookup and is designed to provide telephone services to persons who are deaf and use American Sign Language that are functionally equivalent to those provided to users who are hearing. VRS is funded through the Interstate Telecommunications Relay Services Fund and overseen by the FCC. *See* 47 CFR 64.601(a)(26). There are no fees for callers to use the VRS interpreters and the video connection, although there may be relatively inexpensive initial costs to the title II entities to purchase the videophone or camera for on-line video connection, or other equipment to connect to the VRS service. The FCC has made clear that VRS functions as a telephone service and is not intended to be used for interpreting services where both parties are in the same room; the latter is reserved for VRI. The Department agrees that VRS cannot be used as a substitute for in-person interpreters or for VRI in situations that would not, absent one party's disability, entail use of the telephone.

Many commenters strongly recommended limiting the use of VRI to circumstances where it will provide effective communication. Commenters from advocacy groups and persons with disabilities expressed concern that VRI may not always be appropriate to provide effective communication, especially in hospitals and emergency rooms. Examples were provided of patients who are unable to see the video monitor because they are semiconscious or unable to focus on the video screen; other examples were given of cases where the video monitor is out of the sightline of the patient or the image is out of focus; still other examples were given of patients who could not see the image because the signal was interrupted, causing unnatural pauses in the communication, or the image was grainy or otherwise unclear. Many commenters requested more explicit guidelines on the use of VRI, and some recommended requirements for equipment maintenance, high-speed, wide-bandwidth video links using dedicated lines or wireless systems, and training of staff using VRI, especially in hospital and health care situations. Several major organizations requested a requirement to include the interpreter's face, head, arms, hands, and eyes in all transmissions. Finally, one State agency asked for additional guidance, outreach, and mandated advertising about the availability of VRI in title II situations so that local government entities would budget for and facilitate the use of VRI in libraries, schools, and other places.

After consideration of the comments and the Department's own research and experience, the Department has determined that VRI can be an effective method of providing interpreting services in certain circumstances, but not in others. For example, VRI should be effective in many situations involving routine medical care, as well as in the emergency room where urgent care is important, but no in-person interpreter is available; however, VRI may not be effective in situations involving surgery or other medical procedures where the patient is limited in his or her ability to see the video screen. Similarly, VRI may not be effective in situations where there are multiple people in a room and the information exchanged is highly complex and fast-paced. The Department recognizes that in these and other situations, such as where communication is needed for persons who are deaf-blind, it may be necessary to summon an in-person interpreter to assist certain individuals. To ensure that VRI is effective in situations where

it is appropriate, the Department has established performance standards in §35.160(d).

SUBPART B—GENERAL REQUIREMENTS

Section 35.130(h) Safety.

Section 36.301(b) of the 1991 title III regulation provides that a public accommodation ''may impose legitimate safety requirements that are necessary for safe operation. Safety requirements must be based on actual risks, and not on mere speculation, stereotypes, or generalizations about individuals with disabilities.'' 28 CFR 36.301(b). Although the 1991 title II regulation did not include similar language, the Department's 1993 ADA Title II Technical Assistance Manual at II–3.5200 makes clear the Department's view that public entities also have the right to impose legitimate safety requirements necessary for the safe operation of services, programs, or activities. To ensure consistency between the title II and title III regulations, the Department has added a new §35.130(h) in the final rule incorporating this longstanding position relating to imposition of legitimate safety requirements.

Section 35.133 Maintenance of accessible features.

Section 35.133 in the 1991 title II regulation provides that a public entity must maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by qualified individuals with disabilities. *See* 28 CFR 35.133(a). In the NPRM, the Department clarified the application of this provision and proposed one change to the section to address the discrete situation in which the scoping requirements provided in the 2010 Standards reduce the number of required elements below the requirements of the 1991 Standards. In that discrete event, a public entity may reduce such accessible features in accordance with the requirements in the 2010 Standards.

The Department received only four comments on this proposed amendment. None of the commenters opposed the change. In the final rule, the Department has revised the section to make it clear that if the 2010 Standards reduce either the technical requirements or the number of required accessible elements below that required by the 1991 Standards, then the public entity may reduce the technical requirements or the number of accessible elements in a covered facility in accordance with the requirements of the 2010 Standards.

One commenter urged the Department to amend §35.133(b) to expand the language of the section to restocking of shelves as a permissible activity for isolated or temporary interruptions in service or access. It is the Department's position that a temporary interruption that blocks an accessible route, such as restocking of shelves, is already permitted by §35.133(b), which clarifies that ''isolated or temporary interruptions in service or access due to maintenance or repairs'' are permitted. Therefore, the Department will not make any additional changes in the final rule to the language of §35.133(b) other than those discussed in the preceding paragraph.

Section 35.136 Service animals.

The 1991 title II regulation states that ''[a] public entity shall make reasonable modifications in policies, practices, or procedures when the modifications are necessary to avoid discrimination on the basis of disability, unless the public entity can demonstrate that making the modifications would fundamentally alter the nature of the service, program or activity.'' 28 CFR 130(b)(7). Unlike the title III regulation, the 1991 title II regulation did not contain a specific provision addressing service animals.

In the NPRM, the Department stated the intention of providing the broadest feasible access to individuals with disabilities and their service animals, unless a public entity can demonstrate that making the modifications to policies excluding animals would fundamentally alter the nature of the public entity's service, program, or activity. The Department proposed creating a new §35.136 addressing service animals that was intended to retain the scope of the 1991 title III regulation at §36.302(c), while clarifying the Department's longstanding policies and interpretations, as outlined in published technical assistance, *Commonly Asked Questions About Service Animals in Places of Business* (1996), available at *http://www.ada.gov/qasrvc.ftm* and *ADA Guide for Small Businesses* (1999), available at *http://www.ada.gov/smbustxt.htm*, and to add that a public entity may exclude a service animal in certain circumstances where the service animal fails to meet certain behavioral standards. The Department received extensive comments in response to proposed §35.136 from individuals, disability advocacy groups, organizations involved in training service animals, and public entities. Those comments and the Department's response are discussed below.

Exclusion of service animals. In the NPRM, the Department proposed incorporating the title III regulatory language of §36.302(c) into new §35.136(a), which states that ''[g]enerally, a public entity shall modify its policies, practices, or procedures to permit the use of a service animal by an individual with a disability, unless the public entity can demonstrate that the use of a service animal would fundamentally alter the public entity's service, program, or activity.'' The final rule retains this language with some modifications.

In addition, in the NPRM, the Department proposed clarifying those circumstances

where otherwise eligible service animals may be excluded by public entities from their programs or facilities. The Department proposed in §35.136(b)(1) of the NPRM that a public entity may ask an individual with a disability to remove a service animal from a title II service, program, or activity if: ''[t]he animal is out of control and the animal's handler does not take effective action to control it.'' 73 FR 34466, 34504 (June 17, 2008).

The Department has long held that a service animal must be under the control of the handler at all times. Commenters overwhelmingly were in favor of this language, but noted that there are occasions when service animals are provoked to disruptive or aggressive behavior by agitators or troublemakers, as in the case of a blind individual whose service dog is taunted or pinched. While all service animals are trained to ignore and overcome these types of incidents, misbehavior in response to provocation is not always unreasonable. In circumstances where a service animal misbehaves or responds reasonably to a provocation or injury, the public entity must give the handler a reasonable opportunity to gain control of the animal. Further, if the individual with a disability asserts that the animal was provoked or injured, or if the public entity otherwise has reason to suspect that provocation or injury has occurred, the public entity should seek to determine the facts and, if provocation or injury occurred, the public entity should take effective steps to prevent further provocation or injury, which may include asking the provocateur to leave the public entity. This language is unchanged in the final rule.

The NPRM also proposed language at §35.136(b)(2) to permit a public entity to exclude a service animal if the animal is not housebroken (*i.e.*, trained so that, absent illness or accident, the animal controls its waste elimination) or the animal's presence or behavior fundamentally alters the nature of the service the public entity provides (*e.g.*, repeated barking during a live performance). Several commenters were supportive of this NPRM language, but cautioned against overreaction by the public entity in these instances. One commenter noted that animals get sick, too, and that accidents occasionally happen. In these circumstances, simple clean up typically addresses the incident. Commenters noted that the public entity must be careful when it excludes a service animal on the basis of ''fundamental alteration,'' asserting for example that a public entity should not exclude a service animal for barking in an environment where other types of noise, such as loud cheering or a child crying, is tolerated. The Department maintains that the appropriateness of an exclusion can be assessed by reviewing how a public entity addresses comparable situations that do not involve a service animal. The Department has retained in §35.136(b) of the final rule the exception requiring animals to be housebroken. The Department has not retained the specific NPRM language stating that animals can be excluded if their presence or behavior fundamentally alters the nature of the service provided by the public entity, because the Department believes that this exception is covered by the general reasonable modification requirement contained in §35.130(b)(7).

The NPRM also proposed at §35.136(b)(3) that a service animal can be excluded where ''[t]he animal poses a direct threat to the health or safety of others that cannot be eliminated by reasonable modifications.'' 73 FR 34466, 34504 (June 17, 2008). Commenters were universally supportive of this provision as it makes express the discretion of a public entity to exclude a service animal that poses a direct threat. Several commenters cautioned against the overuse of this provision and suggested that the Department provide an example of the rule's application. The Department has decided not to include regulatory language specifically stating that a service animal can be excluded if it poses a direct threat. The Department believes that the addition of new §35.139, which incorporates the language of the title III provisions at §36.302 relating to the general defense of direct threat, is sufficient to establish the availability of this defense to public entities.

Access to a public entity following the proper exclusion of a service animal. The NPRM proposed that in the event a public entity properly excludes a service animal, the public entity must give the individual with a disability the opportunity to access the programs, services, and facilities of the public entity without the service animal. Most commenters welcomed this provision as a common sense approach. These commenters noted that they do not wish to preclude individuals with disabilities from the full and equal enjoyment of the State or local government's programs, services, or facilities, simply because of an isolated problem with a service animal. The Department has elected to retain this provision in §35.136(a).

Other requirements. The NPRM also proposed that the regulation include the following requirements: that the work or tasks performed by the service animal must be directly related to the handler's disability; that a service animal must be individually trained to do work or perform a task, be housebroken, and be under the control of the handler; and that a service animal must have a harness, leash, or other tether. Most commenters addressed at least one of these issues in their responses. Most agreed that these provisions are important to clarify further the 1991 service animal regulation. The Department has moved the requirement that

the work or tasks performed by the service animal must be related directly to the individual's disability to the definition of 'service animal' in §35.104. In addition, the Department has modified the proposed language in §35.136(d) relating to the handler's control of the animal with a harness, leash, or other tether to state that ''[a] service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.*, voice control, signals, or other effective means).'' The Department has retained the requirement that the service animal must be individually trained (*see* Appendix A discussion of §35.104, definition of ''service animal''), as well as the requirement that the service animal be housebroken.

Responsibility for supervision and care of a service animal. The NPRM proposed language at §35.136(e) stating that ''[a] public entity is not responsible for caring for or supervising a service animal.'' 73 FR 34466, 34504 (June 17, 2008). Most commenters did not address this particular provision. The Department recognizes that there are occasions when a person with a disability is confined to bed in a hospital for a period of time. In such an instance, the individual may not be able to walk or feed the service animal. In such cases, if the individual has a family member, friend, or other person willing to take on these responsibilities in the place of the individual with disabilities, the individual's obligation to be responsible for the care and supervision of the service animal would be satisfied. The language of this section is retained, with minor modifications, in §35.136(e) of the final rule.

Inquiries about service animals. The NPRM proposed language at §35.136(f) setting forth parameters about how a public entity may determine whether an animal qualifies as a service animal. The proposed section stated that a public entity may ask if the animal is required because of a disability and what task or work the animal has been trained to do but may not require proof of service animal certification or licensing. Such inquiries are limited to eliciting the information necessary to make a decision without requiring disclosure of confidential disability-related information that a State or local government entity does not need. This language is consistent with the policy guidance outlined in two Department publications, *Commonly Asked Questions about Service Animals in Places of Business* (1996), available at *http://www.ada.gov/qasrvc.htm*, and *ADA Guide for Small Businesses*, (1999), available at *http://www.ada.gov/smbustxt.htm.*

Although some commenters contended that the NPRM service animal provisions leave unaddressed the issue of how a public entity can distinguish between a psychiatric service animal, which is covered under the final rule, and a comfort animal, which is not, other commenters noted that the Department's published guidance has helped public entities to distinguish between service animals and pets on the basis of an individual's response to these questions. Accordingly, the Department has retained the NPRM language incorporating its guidance concerning the permissible questions into the final rule.

Some commenters suggested that a title II entity be allowed to require current documentation, no more than one year old, on letterhead from a mental health professional stating the following: (1) That the individual seeking to use the animal has a mental health-related disability; (2) that having the animal accompany the individual is necessary to the individual's mental health or treatment or to assist the person otherwise; and (3) that the person providing the assessment of the individual is a licensed mental health professional and the individual seeking to use the animal is under that individual's professional care. These commenters asserted that this will prevent abuse and ensure that individuals with legitimate needs for psychiatric service animals may use them. The Department believes that this proposal would treat persons with psychiatric, intellectual, and other mental disabilities less favorably than persons with physical or sensory disabilities. The proposal would also require persons with disabilities to obtain medical documentation and carry it with them any time they seek to engage in ordinary activities of daily life in their communities—something individuals without disabilities have not been required to do. Accordingly, the Department has concluded that a documentation requirement of this kind would be unnecessary, burdensome, and contrary to the spirit, intent, and mandates of the ADA.

Areas of a public entity open to the public, participants in services, programs, or activities, or invitees. The NPRM proposed at §35.136(g) that an individual with a disability who uses a service animal has the same right of access to areas of a title II entity as members of the public, participants in services, programs, or activities, or invitees. Commenters indicated that allowing individuals with disabilities to go with their service animals into the same areas as members of the public, participants in programs, services, or activities, or invitees is accepted practice by most State and local government entities. The Department has included a slightly modified version of this provision in §35.136(g) of the final rule.

The Department notes that under the final rule, a healthcare facility must also permit a person with a disability to be accompanied by a service animal in all areas of the facility in which that person would otherwise be allowed. There are some exceptions, however. The Department follows the guidance of the Centers for Disease Control and Prevention (CDC) on the use of service animals in a hospital setting. Zoonotic diseases can be transmitted to humans through bites, scratches, direct contact, arthropod vectors, or aerosols.

Consistent with CDC guidance, it is generally appropriate to exclude a service animal from limited-access areas that employ general infection-control measures, such as operating rooms and burn units. *See* Centers for Disease Control and Prevention, *Guidelines for Environmental Infection Control in Health-Care Facilities: Recommendations of CDC and the Healthcare Infection Control Practices Advisory Committee* (June 2003), available at *http://www.cdc.gov/hicpac/pdf/guidelines/eic_in_HCF_03.pdf* (last visited June 24, 2010). A service animal may accompany its handler to such areas as admissions and discharge offices, the emergency room, inpatient and outpatient rooms, examining and diagnostic rooms, clinics, rehabilitation therapy areas, the cafeteria and vending areas, the pharmacy, restrooms, and all other areas of the facility where healthcare personnel, patients, and visitors are permitted without added precaution.

Prohibition against surcharges for use of a service animal. In the NPRM, the Department proposed to incorporate the previously mentioned policy guidance, which prohibits the assessment of a surcharge for the use of a service animal, into proposed §35.136(h). Several commenters agreed that this provision makes clear the obligation of a public entity to admit an individual with a service animal without surcharges, and that any additional costs imposed should be factored into the overall cost of administering a program, service, or activity, and passed on as a charge to all participants, rather than an individualized surcharge to the service animal user. Commenters also noted that service animal users cannot be required to comply with other requirements that are not generally applicable to other persons. If a public entity normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animal. The Department has retained this language, with minor modifications, in the final rule at §35.136(h).

Training requirement. Certain commenters recommended the adoption of formal training requirements for service animals. The Department has rejected this approach and will not impose any type of formal training requirements or certification process, but will continue to require that service animals be individually trained to do work or perform tasks for the benefit of an individual with a disability. While some groups have urged the Department to modify this position, the Department has determined that such a modification would not serve the full array of individuals with disabilities who use service animals, since individuals with disabilities may be capable of training, and some have trained, their service animal to perform tasks or do work to accommodate their disability. A training and certification requirement would increase the expense of acquiring a service animal and might limit access to service animals for individuals with limited financial resources.

Some commenters proposed specific behavior or training standards for service animals, arguing that without such standards, the public has no way to differentiate between untrained pets and service animals. Many of the suggested behavior or training standards were lengthy and detailed. The Department believes that this rule addresses service animal behavior sufficiently by including provisions that address the obligations of the service animal user and the circumstances under which a service animal may be excluded, such as the requirements that an animal be housebroken and under the control of its handler.

Miniature horses. The Department has been persuaded by commenters and the available research to include a provision that would require public entities to make reasonable modifications to policies, practices, or procedures to permit the use of a miniature horse by a person with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability. The traditional service animal is a dog, which has a long history of guiding individuals who are blind or have low vision, and over time dogs have been trained to perform an even wider variety of services for individuals with all types of disabilities. However, an organization that developed a program to train miniature horses, modeled on the program used for guide dogs, began training miniature horses in 1991.

Although commenters generally supported the species limitations proposed in the NPRM, some were opposed to the exclusion of miniature horses from the definition of a service animal. These commenters noted that these animals have been providing assistance to persons with disabilities for many years. Miniature horses were suggested by some commenters as viable alternatives to dogs for individuals with allergies, or for those whose religious beliefs preclude the use of dogs. Another consideration mentioned in favor of the use of miniature horses is the longer life span and strength of miniature horses in comparison to dogs. Specifically, miniature horses can provide service

for more than 25 years while dogs can provide service for approximately 7 years, and, because of their strength, miniature horses can provide services that dogs cannot provide. Accordingly, use of miniature horses reduces the cost involved to retire, replace, and train replacement service animals.

The miniature horse is not one specific breed, but may be one of several breeds, with distinct characteristics that produce animals suited to service animal work. The animals generally range in height from 24 inches to 34 inches measured to the withers, or shoulders, and generally weigh between 70 and 100 pounds. These characteristics are similar to those of large breed dogs such as Labrador Retrievers, Great Danes, and Mastiffs. Similar to dogs, miniature horses can be trained through behavioral reinforcement to be ''housebroken.'' Most miniature service horse handlers and organizations recommend that when the animals are not doing work or performing tasks, the miniature horses should be kept outside in a designated area, instead of indoors in a house.

According to information provided by an organization that trains service horses, these miniature horses are trained to provide a wide array of services to their handlers, primarily guiding individuals who are blind or have low vision, pulling wheelchairs, providing stability and balance for individuals with disabilities that impair the ability to walk, and supplying leverage that enables a person with a mobility disability to get up after a fall. According to the commenter, miniature horses are particularly effective for large stature individuals. The animals can be trained to stand (and in some cases, lie down) at the handler's feet in venues where space is at a premium, such as assembly areas or inside some vehicles that provide public transportation. Some individuals with disabilities have traveled by train and have flown commercially with their miniature horses.

The miniature horse is not included in the definition of service animal, which is limited to dogs. However, the Department has added a specific provision at §35.136(i) of the final rule covering miniature horses. Under this provision, a public entity must make reasonable modifications in policies, practices, or procedures to permit the use of a miniature horse by an individual with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability. The public entity may take into account a series of assessment factors in determining whether to allow a miniature horse into a specific facility. These include the type, size, and weight of the miniature horse; whether the handler has sufficient control of the miniature horse; whether the miniature horse is housebroken; and whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation. In addition, paragraphs (c)–(h) of this section, which are applicable to dogs, also apply to miniature horses.

Ponies and full-size horses are not covered by §35.136(i). Also, because miniature horses can vary in size and can be larger and less flexible than dogs, covered entities may exclude this type of service animal if the presence of the miniature horse, because of its larger size and lower level of flexibility, results in a fundamental alteration to the nature of the programs activities, or services provided.

Section 35.137 Mobility devices.

Section 35.137 of the NPRM clarified the scope and circumstances under which covered entities are legally obligated to accommodate various ''mobility devices.'' Section 35.137 set forth specific requirements for the accommodation of ''mobility devices,'' including wheelchairs, manually-powered mobility aids, and other power-driven mobility devices.

In both the NPRM and the final rule, §35.137(a) states the general rule that in any areas open to pedestrians, public entities shall permit individuals with mobility disabilities to use wheelchairs and manually-powered mobility aids, including walkers, crutches, canes, braces, or similar devices. Because mobility scooters satisfy the definition of ''wheelchair'' (*i.e.*, ''manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor, or of both indoor and outdoor locomotion''), the reference to them in §35.137(a) of the final rule has been omitted to avoid redundancy.

Some commenters expressed concern that permitting the use of other power-driven mobility devices by individuals with mobility disabilities would make such devices akin to wheelchairs and would require them to make physical changes to their facilities to accommodate their use. This concern is misplaced. If a facility complies with the applicable design requirements in the 1991 Standards or the 2010 Standards, the public entity will not be required to exceed those standards to accommodate the use of wheelchairs or other power-driven mobility devices that exceed those requirements.

Legal standard for other power-driven mobility devices. The NPRM version of §35.137(b) provided that ''[a] public entity shall make reasonable modifications in its policies, practices, and procedures to permit the use of other power-driven mobility devices by individuals with disabilities, unless the public entity can demonstrate that the use of the device is not reasonable or that its use will result in a fundamental alteration in the

public entity's service, program, or activity.'' 73 FR 34466, 34505 (June 17, 2008). In other words, public entities are by default required to permit the use of other power-driven mobility devices; the burden is on them to prove the existence of a valid exception.

Most commenters supported the notion of assessing whether the use of a particular device is reasonable in the context of a particular venue. Commenters, however, disagreed about the meaning of the word ''reasonable'' as it is used in §35.137(b) of the NPRM. Advocacy and nonprofit groups almost universally objected to the use of a general reasonableness standard with regard to the assessment of whether a particular device should be allowed at a particular venue. They argued that the assessment should be based on whether reasonable modifications could be made to allow a particular device at a particular venue, and that the only factors that should be part of the calculus that results in the exclusion of a particular device are undue burden, direct threat, and fundamental alteration.

A few commenters opposed the proposed provision requiring public entities to assess whether reasonable modifications can be made to allow other power-driven mobility devices, preferring instead that the Department issue guidance materials so that public entities would not have to incur the cost of such analyses. Another commenter noted a ''fox guarding the hen house''-type of concern with regard to public entities developing and enforcing their own modification policy.

In response to comments received, the Department has revised §35.137(b) to provide greater clarity regarding the development of legitimate safety requirements regarding other power-driven mobility devices and has added a new §35.130(h) (Safety) to the title II regulation which specifically permits public entities to impose legitimate safety requirements necessary for the safe operation of their services, programs, and activities. (*See* discussion below.) The Department has not retained the proposed NPRM language stating that an other power-driven mobility device can be excluded if a public entity can demonstrate that its use is unreasonable or will result in a fundamental alteration of the entity's service, program, or activity, because the Department believes that this exception is covered by the general reasonable modification requirement contained in §35.130(b)(7).

Assessment factors. Section 35.137(c) of the NPRM required public entities to ''establish policies to permit the use of other power-driven mobility devices'' and articulated four factors upon which public entities must base decisions as to whether a modification is reasonable to allow the use of a class of other power-driven mobility devices by individuals with disabilities in specific venues (e.g., parks, courthouses, office buildings, etc.). 73 FR 34466, 34504 (June 17, 2008).

The Department has relocated and modified the NPRM text that appeared in §35.137(c) to new paragraph §35.137(b)(2) to clarify what factors the public entity shall use in determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification. Section 35.137(b)(2) now states that ''[i]n determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification under (b)(1), a public entity shall consider'' certain enumerated factors. The assessment factors are designed to assist public entities in determining whether allowing the use of a particular other power-driven mobility device in a specific facility is reasonable. Thus, the focus of the analysis must be on the appropriateness of the use of the device at a specific facility, rather than whether it is necessary for an individual to use a particular device.

The NPRM proposed the following specific assessment factors: (1) The dimensions, weight, and operating speed of the mobility device in relation to a wheelchair; (2) the potential risk of harm to others by the operation of the mobility device; (3) the risk of harm to the environment or natural or cultural resources or conflict with Federal land management laws and regulations; and (4) the ability of the public entity to stow the mobility device when not in use, if requested by the user.

Factor 1 was designed to help public entities assess whether a particular device was appropriate, given its particular physical features, for a particular location. Virtually all commenters said the physical features of the device affected their view of whether a particular device was appropriate for a particular location. For example, while many commenters supported the use of another power-driven mobility device if the device were a Segway® PT, because of environmental and health concerns they did not offer the same level of support if the device were an off-highway vehicle, all-terrain vehicle (ATV), golf car, or other device with a fuel-powered or combustion engine. Most commenters noted that indicators such as speed, weight, and dimension really were an assessment of the appropriateness of a particular device in specific venues and suggested that factor 1 say this more specifically.

The term ''in relation to a wheelchair'' in the NPRM's factor 1 apparently created some concern that the same legal standards that apply to wheelchairs would be applied to other power-driven mobility devices. The Department has omitted the term ''in relation to a wheelchair'' from §35.137(b)(2)(i) to

clarify that if a facility that is in compliance with the applicable provisions of the 1991 Standards or the 2010 Standards grants permission for an other power-driven mobility device to go on-site, it is not required to exceed those standards to accommodate the use of other power-driven mobility devices.

In response to requests that NPRM factor 1 state more specifically that it requires an assessment of an other power-driven mobility device's appropriateness under particular circumstances or in particular venues, the Department has added several factors and more specific language. In addition, although the NPRM made reference to the operation of other power-driven mobility devices in ''specific venues,'' the Department's intent is captured more clearly by referencing ''specific facility'' in paragraph (b)(2). The Department also notes that while speed is included in factor 1, public entities should not rely solely on a device's top speed when assessing whether the device can be accommodated; instead, public entities should also consider the minimum speeds at which a device can be operated and whether the development of speed limit policies can be established to address concerns regarding the speed of the device. Finally, since the ability of the public entity to stow the mobility device when not in use is an aspect of its design and operational characteristics, the text proposed as factor 4 in the NPRM has been incorporated in paragraph (b)(2)(iii).

The NPRM's version of factor 2 provided that the ''risk of potential harm to others by the operation of the mobility device'' is one of the determinants in the assessment of whether other power-driven mobility devices should be excluded from a site. The Department intended this requirement to be consistent with the Department's longstanding interpretation, expressed in §II–3.5200 (Safety) of the 1993 Title II Technical Assistance Manual, which provides that public entities may ''impose legitimate safety requirements that are necessary for safe operation.'' (This language parallels the provision in the title III regulation at §36.301(b).) However, several commenters indicated that they read this language, particularly the phrase ''risk of potential harm,'' to mean that the Department had adopted a concept of risk analysis different from that which is in the existing standards. The Department did not intend to create a new standard and has changed the language in paragraphs (b)(1) and (b)(2) to clarify the applicable standards, thereby avoiding the introduction of new assessments of risk beyond those necessary for the safe operation of the public entity. In addition, the Department has added a new section, 35.130(h), which incorporates the existing safety standard into the title II regulation.

While all applicable affirmative defenses are available to public entities in the establishment and execution of their policies regarding other power-driven mobility devices, the Department did not explicitly incorporate the direct threat defense into the assessment factors because §35.130(h) provides public entities the appropriate framework with which to assess whether legitimate safety requirements that may preclude the use of certain other power-driven mobility devices are necessary for the safe operation of the public entities. In order to be legitimate, the safety requirement must be based on actual risks and not mere speculation regarding the device or how it will be operated. Of course, public entities may enforce legitimate safety rules established by the public entity for the operation of other power-driven mobility devices (*e.g.*, reasonable speed restrictions). Finally, NPRM factor 3 concerning environmental resources and conflicts of law has been relocated to §35.137(b)(2)(v).

As a result of these comments and requests, NPRM factors 1, 2, 3, and 4 have been revised and renumbered within paragraph (b)(2) in the final rule.

Several commenters requested that the Department provide guidance materials or more explicit concepts of which considerations might be appropriate for inclusion in a policy that allows the use of other power-driven mobility devices. A public entity that has determined that reasonable modifications can be made in its policies, practices, or procedures to allow the use of other power-driven mobility devices should develop a policy that clearly states the circumstances under which the use of other power-driven mobility devices by individuals with a mobility disability will be permitted. It also should include clear, concise statements of specific rules governing the operation of such devices. Finally, the public entity should endeavor to provide individuals with disabilities who use other power-driven mobility devices with advanced notice of its policy regarding the use of such devices and what rules apply to the operation of these devices.

For example, the U.S. General Services Administration (GSA) has developed a policy allowing the use of the Segway® PT and other EPAMDs in all Federal buildings under GSA's jurisdiction. *See* General Services Administration, *Interim Segway® Personal Transporter Policy* (Dec. 3, 2007), available at *http://www.gsa.gov/graphics/pbs/Interim__Segway__Policy__121007.pdf* (last visited June 24, 2010). The GSA policy defines the policy's scope of coverage by setting out what devices are and are not covered by the policy. The policy also sets out requirements for safe operation, such as a speed limit, prohibits the use of EPAMDs on escalators, and provides guidance regarding security screening of these devices and their operators.

A public entity that determines that it can make reasonable modifications to permit the use of an other power-driven mobility device by an individual with a mobility disability might include in its policy the procedure by which claims that the other power-driven mobility device is being used for a mobility disability will be assessed for legitimacy (*i.e.*, a credible assurance that the device is being used for a mobility disability, including a verbal representation by the person with a disability that is not contradicted by observable fact, or the presentation of a disability parking space placard or card, or State-issued proof of disability); the type or classes of other power-driven mobility devices are permitted to be used by individuals with mobility disabilities; the size, weight, and dimensions of the other power-driven mobility devices that are permitted to be used by individuals with mobility disabilities; the speed limit for the other power-driven mobility devices that are permitted to be used by individuals with mobility disabilities; the places, times, or circumstances under which the use of the other power-driven mobility device is or will be restricted or prohibited; safety, pedestrian, and other rules concerning the use of the other power-driven mobility device; whether, and under which circumstances, storage for the other power-driven mobility device will be made available; and how and where individuals with a mobility disability can obtain a copy of the other power-driven mobility device policy.

Public entities also might consider grouping other power-driven mobility devices by type (*e.g.*, EPAMDs, golf cars, gasoline-powered vehicles, and other devices). For example, an amusement park may determine that it is reasonable to allow individuals with disabilities to use EPAMDs in a variety of outdoor programs and activities, but that it would not be reasonable to allow the use of golf cars as mobility devices in similar circumstances. At the same time, the entity may address its concerns about factors such as space limitations by disallowing use of EPAMDs by members of the general public who do not have mobility disabilities.

The Department anticipates that, in many circumstances, public entities will be able to develop policies that will allow the use of other power-driven mobility devices by individuals with mobility disabilities. Consider the following example:

A county courthouse has developed a policy whereby EPAMDs may be operated in the pedestrian areas of the courthouse if the operator of the device agrees not to operate the device faster than pedestrians are walking; to yield to pedestrians; to provide a rack or stand so that the device can stand upright; and to use the device only in courtrooms that are large enough to accommodate such devices. If the individual is selected for jury duty in one of the smaller courtrooms, the county's policy indicates that if it is not possible for the individual with the disability to park the device and walk into the courtroom, the location of the trial will be moved to a larger courtroom.

Inquiry into the use of other power-driven mobility device. The NPRM version of §35.137(d) provided that ''[a] public entity may ask a person using a power-driven mobility device if the mobility device is needed due to the person's disability. A public entity shall not ask a person using a mobility device questions about the nature and extent of the person's disability.'' 73 FR 34466, 34504 (June 17, 2008).

Many environmental, transit system, and government commenters expressed concern about people feigning mobility disabilities to be able to use other power-driven mobility devices in public entities in which their use is otherwise restricted. These commenters felt that a mere inquiry into whether the device is being used for a mobility disability was an insufficient mechanism by which to detect fraud by other power-driven mobility device users who do not have mobility disabilities. These commenters believed they should be given more latitude to make inquiries of other power-driven mobility device users claiming a mobility disability than they would be given for wheelchair users. They sought the ability to establish a policy or method by which public entities may assess the legitimacy of the mobility disability. They suggested some form of certification, sticker, or other designation. One commenter suggested a requirement that a sticker bearing the international symbol for accessibility be placed on the device or that some other identification be required to signal that the use of the device is for a mobility disability. Other suggestions included displaying a disability parking placard on the device or issuing EPAMDs, like the Segway® PT, a permit that would be similar to permits associated with parking spaces reserved for those with disabilities.

Advocacy, nonprofit, and several individual commenters balked at the notion of allowing any inquiry beyond whether the device is necessary for a mobility disability and encouraged the Department to retain the NPRM's language on this topic. Other commenters, however, were empathetic with commenters who had concerns about fraud. At least one Segway® PT advocate suggested it would be permissible to seek documentation of the mobility disability in the form of a simple sign or permit.

The Department has sought to find common ground by balancing the needs of public entities and individuals with mobility disabilities wishing to use other power-driven mobility devices with the Department's longstanding, well-established policy of not allowing public entities or establishments to

require proof of a mobility disability. There is no question that public entities have a legitimate interest in ferreting out fraudulent representations of mobility disabilities, especially given the recreational use of other power-driven mobility devices and the potential safety concerns created by having too many such devices in a specific facility at one time. However, the privacy of individuals with mobility disabilities and respect for those individuals, is also vitally important.

Neither §35.137(d) of the NPRM nor §35.137(c) of the final rule permits inquiries into the nature of a person's mobility disability. However, the Department does not believe it is unreasonable or overly intrusive for an individual with a mobility disability seeking to use an other power-driven mobility device to provide a credible assurance to verify that the use of the other power-driven mobility device is for a mobility disability. The Department sought to minimize the amount of discretion and subjectivity exercised by public entities in assessing whether an individual has a mobility disability and to allow public entities to verify the existence of a mobility disability. The solution was derived from comments made by several individuals who said they have been admitted with their Segway® PTs into public entities and public accommodations that ordinarily do not allow these devices on-site when they have presented or displayed State-issued disability parking placards. In the examples provided by commenters, the parking placards were accepted as verification that the Segway® PTs were being used as mobility devices.

Because many individuals with mobility disabilities avail themselves of State programs that issue disability parking placards or cards and because these programs have penalties for fraudulent representations of identity and disability, utilizing the parking placard system as a means to establish the existence of a mobility disability strikes a balance between the need for privacy of the individual and fraud protection for the public entity. Consequently, the Department has decided to include regulatory text in §35.137(c)(2) of the final rule that requires public entities to accept the presentation of a valid, State-issued disability parking placard or card, or State-issued proof of disability, as verification that an individual uses the other power-driven mobility device for his or her mobility disability. A ''valid'' disability placard or card is one that is presented by the individual to whom it was issued and is otherwise in compliance with the State of issuance's requirements for disability placards or cards. Public entities are required to accept a valid, State-issued disability parking placard or card, or State-issued proof of disability as a credible assurance, but they cannot demand or require the presentation of a valid disability placard or card, or State-issued proof of disability, as a prerequisite for use of an other power-driven mobility device, because not all persons with mobility disabilities have such means of proof. If an individual with a mobility disability does not have such a placard or card, or State-issued proof of disability, he or she may present other information that would serve as a credible assurance of the existence of a mobility disability.

In lieu of a valid, State-issued disability parking placard or card, or State-issued proof of disability, a verbal representation, not contradicted by observable fact, shall be accepted as a credible assurance that the other power-driven mobility device is being used because of a mobility disability. This does not mean, however, that a mobility disability must be observable as a condition for allowing the use of an other power-driven mobility device by an individual with a mobility disability, but rather that if an individual represents that a device is being used for a mobility disability and that individual is observed thereafter engaging in a physical activity that is contrary to the nature of the represented disability, the assurance given is no longer credible and the individual may be prevented from using the device.

Possession of a valid, State-issued disability parking placard or card or a verbal assurance does not trump a public entity's valid restrictions on the use of other power-driven mobility devices. Accordingly, a credible assurance that the other power-driven mobility device is being used because of a mobility disability is not a guarantee of entry to a public entity because, notwithstanding such credible assurance, use of the device in a particular venue may be at odds with the legal standard in §35.137(b)(1) or with one or more of the §35.137(b)(2) factors. Only after an individual with a disability has satisfied all of the public entity's policies regarding the use of other power-driven mobility devices does a credible assurance become a factor in allowing the use of the device. For example, if an individual seeking to use an other power-driven mobility device fails to satisfy any of the public entity's stated policies regarding the use of other power-driven mobility devices, the fact that the individual legitimately possesses and presents a valid, State-issued disability parking placard or card, or State-issued proof of disability, does not trump the policy and require the public entity to allow the use of the device. In fact, in some instances, the presentation of a legitimately held placard or card, or State-issued proof of disability, will have no relevance or bearing at all on whether the other power-driven mobility device may be used, because the public entity's policy does not permit the device in question on-site under any circumstances (*e.g.,* because its use would create a substantial risk

of serious harm to the immediate environment or natural or cultural resources). Thus, an individual with a mobility disability who presents a valid disability placard or card, or State-issued proof of disability, will not be able to use an ATV as an other power-driven mobility device in a State park if the State park has adopted a policy banning their use for any or all of the above-mentioned reasons. However, if a public entity permits the use of a particular other power-driven mobility device, it cannot refuse to admit an individual with a disability who uses that device if the individual has provided a credible assurance that the use of the device is for a mobility disability.

Section 35.138 Ticketing

The 1991 title II regulation did not contain specific regulatory language on ticketing. The ticketing policies and practices of public entities, however, are subject to title II's nondiscrimination provisions. Through the investigation of complaints, enforcement actions, and public comments related to ticketing, the Department became aware that some venue operators, ticket sellers, and distributors were violating title II's nondiscrimination mandate by not providing individuals with disabilities the same opportunities to purchase tickets for accessible seating as they provided to spectators purchasing conventional seats. In the NPRM, the Department proposed §35.138 to provide explicit direction and guidance on discriminatory practices for entities involved in the sale or distribution of tickets.

The Department received comments from advocacy groups, assembly area trade associations, public entities, and individuals. Many commenters supported the addition of regulatory language pertaining to ticketing and urged the Department to retain it in the final rule. Several commenters, however, questioned why there were inconsistencies between the title II and title III provisions and suggested that the same language be used for both titles. The Department has decided to retain ticketing regulatory language and to ensure consistency between the ticketing provisions in title II and title III.

Because many in the ticketing industry view season tickets and other multi-event packages differently from individual tickets, the Department bifurcated some season ticket provisions from those concerning single-event tickets in the NPRM. This structure, however, resulted in some provisions being repeated for both types of tickets but not for others even though they were intended to apply to both types of tickets. The result was that it was not entirely clear that some of the provisions that were not repeated also were intended to apply to season tickets. The Department is addressing the issues raised by these commenters using a different approach. For the purposes of this section, a *single event* refers to an individual performance for which tickets may be purchased. In contrast, a *series of events* includes, but is not limited to, subscription events, event packages, season tickets, or any other tickets that may be purchased for multiple events of the same type over the course of a specified period of time whose ownership right reverts to the public entity at the end of each season or time period. Series-of-events tickets that give their holders an enhanced ability to purchase such tickets from the public entity in seasons or periods of time that follow, such as a right of first refusal or higher ranking on waiting lists for more desirable seats, are subject to the provisions in this section. In addition, the final rule merges together some NPRM paragraphs that dealt with related topics and has reordered and renamed some of the paragraphs that were in the NPRM.

Ticket sales. In the NPRM, the Department proposed, in §35.138(a), a general rule that a public entity shall modify its policies, practices, or procedures to ensure that individuals with disabilities can purchase tickets for accessible seating for an event or series of events in the same way as others (i.e., during the same hours and through the same distribution methods as other seating is sold). 73 FR 34466, 34504 (June 17, 2008). ''Accessible seating'' is defined in §35.138(a)(1) of the final rule to mean ''wheelchair spaces and companion seats that comply with sections 221 and 802 of the 2010 Standards along with any other seats required to be offered for sale to the individual with a disability pursuant to paragraph (d) of this section.'' The defined term does not include designated aisle seats. A ''wheelchair space'' refers to a space for a single wheelchair and its occupant.

The NPRM proposed requiring that accessible seats be sold through the ''same methods of distribution'' as non-accessible seats. Comments from venue managers and others in the business community, in general, noted that multiple parties are involved in ticketing, and because accessible seats may not be allotted to all parties involved at each stage, such parties should be protected from liability. For example, one commenter noted that a third-party ticket vendor, like Ticketmaster, can only sell the tickets it receives from its client. Because §35.138(a)(2)(iii) of the final rule requires venue operators to make available accessible seating through the same methods of distribution they use for their regular tickets, venue operators that provide tickets to third-party ticket vendors are required to provide accessible seating to the third-party ticket vendor. This provision will enhance third-party ticket vendors' ability to acquire and sell accessible seating for sale in the future. The Department notes that once third-

party ticket vendors acquire accessible tickets, they are obligated to sell them in accordance with these rules.

The Department also has received frequent complaints that individuals with disabilities have not been able to purchase accessible seating over the Internet, and instead have had to engage in a laborious process of calling a customer service line, or sending an e-mail to a customer service representative and waiting for a response. Not only is such a process burdensome, but it puts individuals with disabilities at a disadvantage in purchasing tickets for events that are popular and may sell out in minutes. Because §35.138(e) of the final rule authorizes venues to release accessible seating in case of a sell-out, individuals with disabilities effectively could be cut off from buying tickets unless they also have the ability to purchase tickets in real time over the Internet. The Department's new regulatory language is designed to address this problem.

Several commenters representing assembly areas raised concerns about offering accessible seating for sale over the Internet. They contended that this approach would increase the incidence of fraud since anyone easily could purchase accessible seating over the Internet. They also asserted that it would be difficult technologically to provide accessible seating for sale in real time over the Internet, or that to do so would require simplifying the rules concerning the purchase of multiple additional accompanying seats. Moreover, these commenters argued that requiring an individual purchasing accessible seating to speak with a customer service representative would allow the venue to meet the patron's needs most appropriately and ensure that wheelchair spaces are reserved for individuals with disabilities who require wheelchair spaces. Finally, these commenters argued that individuals who can transfer effectively and conveniently from a wheelchair to a seat with a movable armrest seat could instead purchase designated aisle seats.

The Department considered these concerns carefully and has decided to continue with the general approach proposed in the NPRM. Although fraud is an important concern, the Department believes that it is best combated by other means that would not have the effect of limiting the ability of individuals with disabilities to purchase tickets, particularly since restricting the purchase of accessible seating over the Internet will, of itself, not curb fraud. In addition, the Department has identified permissible means for covered entities to reduce the incidence of fraudulent accessible seating ticket purchases in §35.138(h) of the final rule.

Several commenters questioned whether ticket websites themselves must be accessible to individuals who are blind or have low vision, and if so, what that requires. The Department has consistently interpreted the ADA to cover websites that are operated by public entities and stated that such sites must provide their services in an accessible manner or provide an accessible alternative to the website that is available 24 hours a day, seven days a week. The final rule, therefore, does not impose any new obligation in this area. The accessibility of websites is discussed in more detail in the section of Appendix A entitled ''Other Issues.''

In §35.138(b) of the NPRM, the Department also proposed requiring public entities to make accessible seating available during all stages of tickets sales including, but not limited to, presales, promotions, lotteries, waitlists, and general sales. For example, if tickets will be presold for an event that is open only to members of a fan club, or to holders of a particular credit card, then tickets for accessible seating must be made available for purchase through those means. This requirement does not mean that any individual with a disability would be able to purchase those seats. Rather, it means that an individual with a disability who meets the requirement for such a sale (*e.g.*, who is a member of the fan club or holds that credit card) will be able to participate in the special promotion and purchase accessible seating. The Department has maintained the substantive provisions of the NPRM's §35.138(a) and (b) but has combined them in a single paragraph at §35.138(a)(2) of the final rule so that all of the provisions having to do with the manner in which tickets are sold are located in a single paragraph.

Identification of available accessible seating. In the NPRM, the Department proposed §35.138(c), which, as modified and renumbered as paragraph (b)(3) in the final rule, requires a facility to identify available accessible seating through seating maps, brochures, or other methods if that information is made available about other seats sold to the general public. This rule requires public entities to provide information about accessible seating to the same degree of specificity that it provides information about general seating. For example, if a seating map displays color-coded blocks pegged to prices for general seating, then accessible seating must be similarly color-coded. Likewise, if covered entities provide detailed maps that show exact seating and pricing for general seating, they must provide the same for accessible seating.

The NPRM did not specify a requirement to identify prices for accessible seating. The final rule requires that if such information is provided for general seating, it must be provided for accessible seating as well.

In the NPRM, the Department proposed in §35.138(d) that a public entity, upon being asked, must inform persons with disabilities and their companions of the locations of all unsold or otherwise available seating. This

provision is intended to prevent the practice of ''steering'' individuals with disabilities to certain accessible seating so that the facility can maximize potential ticket sales by releasing unsold accessible seating, especially in preferred or desirable locations, for sale to the general public. The Department received no significant comment on this proposal. The Department has retained this provision in the final rule but has added it, with minor modifications, to §35.138(b) as paragraph (1).

Ticket prices. In the NPRM, the Department proposed §35.138(e) requiring that ticket prices for accessible seating be set no higher than the prices for other seats in that seating section for that event. The NPRM's provision also required that accessible seating be made available at every price range, and if an existing facility has barriers to accessible seating within a particular price range, a proportionate amount of seating (determined by the ratio of the total number of seats at that price level to the total number of seats in the assembly area) must be offered in an accessible location at that same price. Under this rule, for example, if a public entity has a 20,000-seat facility built in 1980 with inaccessible seating in the $20-price category, which is on the upper deck, and it chooses not to put accessible seating in that section, then it must place a proportionate number of seats in an accessible location for $20. If the upper deck has 2,000 seats, then the facility must place 10 percent of its accessible seating in an accessible location for $20 provided that it is part of a seating section where ticket prices are equal to or more than $20—a facility may not place the $20-accessible seating in a $10-seating section. The Department received no significant comment on this rule, and it has been retained, as amended, in the final rule in §35.138(c).

Purchase of multiple tickets. In the NPRM, the Department proposed §35.138(i) to address one of the most common ticketing complaints raised with the Department: That individuals with disabilities are not able to purchase more than two tickets. The Department proposed this provision to facilitate the ability of individuals with disabilities to attend events with friends, companions, or associates who may or may not have a disability by enabling individuals with disabilities to purchase the maximum number of tickets allowed per transaction to other spectators; by requiring venues to place accompanying individuals in general seating as close as possible to accessible seating (in the event that a group must be divided because of the large size of the group); and by allowing an individual with a disability to purchase up to three additional contiguous seats per wheelchair space if they are available at the time of sale. Section 35.138(i)(2) of the NPRM required that a group containing one or more wheelchair users must be placed together, if possible, and that in the event that the group could not be placed together, the individuals with disabilities may not be isolated from the rest of the group.

The Department asked in the NPRM whether this rule was sufficient to effectuate the integration of individuals with disabilities. Many advocates and individuals praised it as a welcome and much-needed change, stating that the trade-off of being able to sit with their family or friends was worth reducing the number of seats available for individuals with disabilities. Some commenters went one step further and suggested that the number of additional accompanying seats should not be restricted to three.

Although most of the substance of the proposed provision on the purchase of multiple tickets has been maintained in the final rule, it has been renumbered as §35.138(d), reorganized, and supplemented. To preserve the availability of accessible seating for other individuals with disabilities, the Department has not expanded the rule beyond three additional contiguous seats. Section 35.138(d)(1) of the final rule requires public entities to make available for purchase three additional tickets for seats in the same row that are contiguous with the wheelchair space provided that at the time of the purchase there are three such seats available. The requirement that the additional seats be ''contiguous with the wheelchair space'' does not mean that each of the additional seats must be in actual contact or have a border in common with the wheelchair space; however, at least one of the additional seats should be immediately adjacent to the wheelchair space. The Department recognizes that it will often be necessary to use vacant wheelchair spaces to provide for contiguous seating.

The Department has added paragraphs (d)(2) and (d)(3) to clarify that in situations where there are insufficient unsold seats to provide three additional contiguous seats per wheelchair space or a ticket office restricts sales of tickets to a particular event to less than four tickets per customer, the obligation to make available three additional contiguous seats per wheelchair space would be affected. For example, if at the time of purchase, there are only two additional contiguous seats available for purchase because the third has been sold already, then the ticket purchaser would be entitled to two such seats. In this situation, the public entity would be required to make up the difference by offering one additional ticket for sale that is as close as possible to the accessible seats. Likewise, if ticket purchases for an event are limited to two per customer, a person who uses a wheelchair who seeks to purchase tickets would be entitled to purchase only one additional contiguous seat for the event.

The Department also has added paragraph (d)(4) to clarify that the requirement for

three additional contiguous seats is not intended to serve as a cap if the maximum number of tickets that may be purchased by members of the general public exceeds the four tickets an individual with a disability ordinarily would be allowed to purchase (*i.e.*, a wheelchair space and three additional contiguous seats). If the maximum number of tickets that may be purchased by members of the general public exceeds four, an individual with a disability is to be allowed to purchase the maximum number of tickets; however, additional tickets purchased by an individual with a disability beyond the wheelchair space and the three additional contiguous seats provided in §35.138(d)(1) do not have to be contiguous with the wheelchair space.

The NPRM proposed at §35.138(i)(2) that for group sales, if a group includes one or more individuals who use a wheelchair, then the group shall be placed in a seating area with accessible seating so that, if possible, the group can sit together. If it is necessary to divide the group, it should be divided so that the individuals in the group who use wheelchairs are not isolated from the rest of the members of their group. The final rule retains the NPRM language in paragraph (d)(5).

Hold-and-release of unsold accessible seating. The Department recognizes that not all accessible seating will be sold in all assembly areas for every event to individuals with disabilities who need such seating and that public entities may have opportunities to sell such seating to the general public. The Department proposed in the NPRM a provision aimed at striking a balance between affording individuals with disabilities adequate time to purchase accessible seating and the entity's desire to maximize ticket sales. In the NPRM, the Department proposed §35.138(f), which allowed for the release of accessible seating under the following circumstances: (i) When all seating in the facility has been sold, excluding luxury boxes, club boxes, or suites; (ii) when all seating in a designated area has been sold and the accessible seating being released is in the same area; or (iii) when all seating in a designated price range has been sold and the accessible seating being released is within the same price range.

The Department's NPRM asked ''whether additional regulatory guidance is required or appropriate in terms of a more detailed or set schedule for the release of tickets in conjunction with the three approaches described above. For example, does the proposed regulation address the variable needs of assembly areas covered by the ADA? Is additional regulatory guidance required to eliminate discriminatory policies, practices and procedures related to the sale, hold, and release of accessible seating? What considerations should appropriately inform the determination of when unsold accessible seating can be released to the general public?'' 73 FR 34466, 34484 (June 17, 2008).

The Department received comments both supporting and opposing the inclusion of a hold-and-release provision. One side proposed loosening the restrictions on the release of unsold accessible seating. One commenter from a trade association suggested that tickets should be released regardless of whether there is a sell-out, and that these tickets should be released according to a set schedule. Conversely, numerous individuals, advocacy groups, and at least one public entity urged the Department to tighten the conditions under which unsold tickets for accessible seating may be released. These commenters suggested that venues should not be permitted to release tickets during the first two weeks of sale, or alternatively, that they should not be permitted to be released earlier than 48 hours before a sold-out event. Many of these commenters criticized the release of accessible seating under the second and third prongs of §35.138(f) in the NPRM (when there is a sell-out in general seating in a designated seating area or in a price range), arguing that it would create situations where general seating would be available for purchase while accessible seating would not be.

Numerous commenters—both from the industry and from advocacy groups—asked for clarification of the term ''sell-out.'' Business groups commented that industry practice is to declare a sell-out when there are only ''scattered singles'' available—isolated seats that cannot be purchased as a set of adjacent pairs. Many of those same commenters also requested that ''sell-out'' be qualified with the phrase ''of all seating available for sale'' since it is industry practice to hold back from release tickets to be used for groups connected with that event (*e.g.*, the promoter, home team, or sports league). They argued that those tickets are not available for sale and any return of these tickets to the general inventory happens close to the event date. Noting the practice of holding back tickets, one advocacy group suggested that covered entities be required to hold back accessible seating in proportion to the number of tickets that are held back for later release.

The Department has concluded that it would be inappropriate to interfere with industry practice by defining what constitutes a ''sell-out'' and that a public entity should continue to use its own approach to defining a ''sell-out.'' If, however, a public entity declares a sell-out by reference to those seats that are available for sale, but it holds back tickets that it reasonably anticipates will be released later, it must hold back a proportional percentage of accessible seating to be released as well.

Adopting any of the alternatives proposed in the comments summarized above would have upset the balance between protecting the rights of individuals with disabilities and meeting venues' concerns about lost revenue from unsold accessible seating. As a result, the Department has retained §35.138(f) (renumbered as §35.138(e)) in the final rule.

The Department has, however, modified the regulation text to specify that accessible seating may be released only when ''all non-accessible tickets in a designated seating area have been sold and the tickets for accessible seating are being released in the same designated area.'' As stated in the NPRM, the Department intended for this provision to allow, for example, the release of accessible seating at the orchestra level when all other seating at the orchestra level is sold. The Department has added this language to the final rule at §35.138(e)(1)(ii) to clarify that venues cannot designate or redesignate seating areas for the purpose of maximizing the release of unsold accessible seating. So, for example, a venue may not determine on an *ad hoc* basis that a group of seats at the orchestra level is a designated seating area in order to release unsold accessible seating in that area.

The Department also has maintained the hold-and-release provisions that appeared in the NPRM but has added a provision to address the release of accessible seating for series-of-events tickets on a series-of-events basis. Many commenters asked the Department whether unsold accessible seating may be converted to general seating and released to the general public on a season-ticket basis or longer when tickets typically are sold as a season-ticket package or other long-term basis. Several disability rights organizations and individual commenters argued that such a practice should not be permitted, and, if it were, that conditions should be imposed to ensure that individuals with disabilities have future access to those seats.

The Department interprets the fundamental principle of the ADA as a requirement to give individuals with disabilities equal, not better, access to those opportunities available to the general public. Thus, for example, a public entity that sells out its facility on a season-ticket only basis is not required to leave unsold its accessible seating if no persons with disabilities purchase those season-ticket seats. Of course, public entities may choose to go beyond what is required by reserving accessible seating for individuals with disabilities (or releasing such seats for sale to the general public) on an individual-game basis.

If a covered entity chooses to release unsold accessible seating for sale on a season-ticket or other long-term basis, it must meet at least two conditions. Under §35.138(g) of the final rule, public entities must leave flexibility for game-day changeouts to accommodate ticket transfers on the secondary market. And public entities must modify their ticketing policies so that, in future years, individuals with disabilities will have the ability to purchase accessible seating on the same basis as other patrons (e.g., as season tickets). Put differently, releasing accessible seating to the general public on a season-ticket or other long-term basis cannot result in that seating being lost to individuals with disabilities in perpetuity. If, in future years, season tickets become available and persons with disabilities have reached the top of the waiting list or have met any other eligibility criteria for season-ticket purchases, public entities must ensure that accessible seating will be made available to the eligible individuals. In order to accomplish this, the Department has added §35.138(e)(3)(i) to require public entities that release accessible season tickets to individuals who do not have disabilities that require the features of accessible seating to establish a process to prevent the automatic reassignment of such ticket holders to accessible seating. For example, a public entity could have in place a system whereby accessible seating that was released because it was not purchased by individuals with disabilities is not in the pool of tickets available for purchase for the following season unless and until the conditions for ticket release have been satisfied in the following season. Alternatively, a public entity might release tickets for accessible seating only when a purchaser who does not need its features agrees that he or she has no guarantee of or right to the same seats in the following season, or that if season tickets are guaranteed for the following season, the purchaser agrees that the offer to purchase tickets is limited to non-accessible seats having to the extent practicable, comparable price, view, and amenities to the accessible seats such individuals held in the prior year. The Department is aware that this rule may require some administrative changes but believes that this process will not create undue financial and administrative burdens. The Department believes that this approach is balanced and beneficial. It will allow public entities to sell all of their seats and will leave open the possibility, in future seasons or series of events, that persons who need accessible seating may have access to it.

The Department also has added §35.138(e)(3)(ii) to address how season tickets or series-of-events tickets that have attached ownership rights should be handled if the ownership right returns to the public entity (e.g., when holders forfeit their ownership right by failing to purchase season tickets or sell their ownership right back to a public entity). If the ownership right is for

accessible seating, the public entity is required to adopt a process that allows an eligible individual with a disability who requires the features of such seating to purchase the rights and tickets for such seating.

Nothing in the regulatory text prevents a public entity from establishing a process whereby such ticket holders agree to be voluntarily reassigned from accessible seating to another seating area so that individuals with mobility disabilities or disabilities that require the features of accessible seating and who become newly eligible to purchase season tickets have an opportunity to do so. For example, a public entity might seek volunteers to relocate to another location that is at least as good in terms of its location, price, and amenities, or a public entity might use a seat with forfeited ownership rights as an inducement to get a ticket holder to give up accessible seating he or she does not need.

Ticket transfer. The Department received many comments asking whether accessible seating has the same transfer rights as general seats. The proposed regulation at §35.138(e) required that individuals with disabilities must be allowed to purchase season tickets for accessible seating on the same terms and conditions as individuals purchasing season tickets for general seating, including the right—if it exists for other ticket-holders—to transfer individual tickets to friends or associates. Some commenters pointed out that the NPRM proposed explicitly allowing individuals with disabilities holding season tickets to transfer tickets but did not address the transfer of tickets purchased for individual events. Several commenters representing assembly areas argued that persons with disabilities holding tickets for an individual event should not be allowed to sell or transfer them to third parties because such ticket transfers would increase the risk of fraud or would make unclear the obligation of the entity to accommodate secondary ticket transfers. They argued that individuals holding accessible seating should either be required to transfer their tickets to another individual with a disability or return them to the facility for a refund.

Although the Department is sympathetic to concerns about administrative burden, curtailing transfer rights for accessible seating when other ticket holders are permitted to transfer tickets would be inconsistent with the ADA's guiding principle that individuals with disabilities must have rights equal to others. Thus, the Department has added language in the final rule in §35.138(f) that requires that individuals with disabilities holding accessible seating for any event have the same transfer rights accorded other ticket holders for that event. Section 35.138(f) also preserves the rights of individuals with disabilities who hold tickets to accessible seats for a series of events to transfer individual tickets to others, regardless of whether the transferee needs accessible seating. This approach recognizes the common practice of individuals splitting season tickets or other multi-event ticket packages with friends, colleagues, or other spectators to make the purchase of season tickets affordable; individuals with disabilities should not be placed in the burdensome position of having to find another individual with a disability with whom to share the package.

This provision, however, does not require public entities to seat an individual who holds a ticket to an accessible seat in such seating if the individual does not need the accessible features of the seat. A public entity may reserve the right to switch these individuals to different seats if they are available, but a public entity is not required to remove a person without a disability who is using accessible seating from that seating, even if a person who uses a wheelchair shows up with a ticket from the secondary market for a non-accessible seat and wants accessible seating.

Secondary ticket market. Section 35.138(g) is a new provision in the final rule that requires a public entity to modify its policies, practices, or procedures to ensure that an individual with a disability, who acquires a ticket in the secondary ticket market, may use that ticket under the same terms and conditions as other ticket holders who acquire a ticket in the secondary market for an event or series of events. This principle was discussed in the NPRM in connection with §35.138(e), pertaining to season-ticket sales. There, the Department asked for public comment regarding a public entity's proposed obligation to accommodate the transfer of accessible seating tickets on the secondary ticket market to those who do not need accessible seating and vice versa.

The secondary ticket market, for the purposes of this rule, broadly means any transfer of tickets after the public entity's initial sale of tickets to individuals or entities. It thus encompasses a wide variety of transactions, from ticket transfers between friends to transfers using commercial exchange systems. Many commenters noted that the distinction between the primary and secondary ticket market has become blurred as a result of agreements between teams, leagues, and secondary market sellers. These commenters noted that the secondary market may operate independently of the public entity, and parts of the secondary market, such as ticket transfers between friends, undoubtedly are outside the direct jurisdiction of the public entity.

To the extent that venues seat persons who have purchased tickets on the secondary market, they must similarly seat persons with disabilities who have purchased tickets on the secondary market. In addition, some

public entities may acquire ADA obligations directly by formally entering the secondary ticket market.

The Department's enforcement experience with assembly areas also has revealed that venues regularly provide for and make last-minute seat transfers. As long as there are vacant wheelchair spaces, requiring venues to provide wheelchair spaces for patrons who acquired inaccessible seats and need wheelchair spaces is an example of a reasonable modification of a policy under title II of the ADA. Similarly, a person who has a ticket for a wheelchair space but who does not require its accessible features could be offered non-accessible seating if such seating is available.

The Department's longstanding position that title II of the ADA requires venues to make reasonable modifications in their policies to allow individuals with disabilities who acquired non-accessible tickets on the secondary ticket market to be seated in accessible seating, where such seating is vacant, is supported by the only Federal court to address this issue. *See Independent Living Resources* v. *Oregon Arena Corp.*, 1 F. Supp. 2d 1159, 1171 (D. Or. 1998). The Department has incorporated this position into the final rule at §35.138(g)(2).

The NPRM contained two questions aimed at gauging concern with the Department's consideration of secondary ticket market sales. The first question asked whether a secondary purchaser who does not have a disability and who buys an accessible seat should be required to move if the space is needed for someone with a disability.

Many disability rights advocates answered that the individual should move provided that there is a seat of comparable or better quality available for him and his companion. Some venues, however, expressed concerns about this provision, and asked how they are to identify who should be moved and what obligations apply if there are no seats available that are equivalent or better in quality.

The Department's second question asked whether there are particular concerns about the obligation to provide accessible seating, including a wheelchair space, to an individual with a disability who purchases an inaccessible seat through the secondary market.

Industry commenters contended that this requirement would create a ''logistical nightmare,'' with venues scrambling to reseat patrons in the short time between the opening of the venues' doors and the commencement of the event. Furthermore, they argued that they might not be able to reseat all individuals and that even if they were able to do so, patrons might be moved to inferior seats (whether in accessible or non-accessible seating). These commenters also were concerned that they would be sued by patrons moved under such circumstances.

These commenters seem to have misconstrued the rule. Covered entities are not required to seat every person who acquires a ticket for inaccessible seating but needs accessible seating, and are not required to move any individual who acquires a ticket for accessible seating but does not need it. Covered entities that allow patrons to buy and sell tickets on the secondary market must make reasonable modifications to their policies to allow persons with disabilities to participate in secondary ticket transfers. The Department believes that there is no one-size-fits-all rule that will suit all assembly areas. In those circumstances where a venue has accessible seating vacant at the time an individual with a disability who needs accessible seating presents his ticket for inaccessible seating at the box office, the venue must allow the individual to exchange his ticket for an accessible seat in a comparable location if such an accessible seat is vacant. Where, however, a venue has sold all of its accessible seating, the venue has no obligation to provide accessible seating to the person with a disability who purchased an inaccessible seat on the secondary market. Venues may encourage individuals with disabilities who hold tickets for inaccessible seating to contact the box office before the event to notify them of their need for accessible seating, even though they may not require ticketholders to provide such notice.

The Department notes that public entities are permitted, though not required, to adopt policies regarding moving patrons who do not need the features of an accessible seat. If a public entity chooses to do so, it might mitigate administrative concerns by marking tickets for accessible seating as such, and printing on the ticket that individuals who purchase such seats but who do not need accessible seating are subject to being moved to other seats in the facility if the accessible seating is required for an individual with a disability. Such a venue might also develop and publish a ticketing policy to provide transparency to the general public and to put holders of tickets for accessible seating who do not require it on notice that they may be moved.

Prevention of fraud in purchase of accessible seating. Assembly area managers and advocacy groups have informed the Department that the fraudulent purchase of accessible seating is a pressing concern. Curbing fraud is a goal that public entities and individuals with disabilities share. Steps taken to prevent fraud, however, must be balanced carefully against the privacy rights of individuals with disabilities. Such measures also must not impose burdensome requirements upon, nor restrict the rights of, individuals with disabilities.

In the NPRM, the Department struck a balance between these competing concerns by proposing §35.138(h), which prohibited

public entities from asking for proof of disability before the purchase of accessible seating but provided guidance in two paragraphs on appropriate measures for curbing fraud. Paragraph (1) proposed allowing a public entity to ask individuals purchasing single-event tickets for accessible seating whether they are wheelchair users. Paragraph (2) proposed allowing a public entity to require the individuals purchasing accessible seating for season tickets or other multi-event ticket packages to attest in writing that the accessible seating is for a wheelchair user. Additionally, the NPRM proposed to permit venues, when they have good cause to believe that an individual has fraudulently purchased accessible seating, to investigate that individual.

Several commenters objected to this rule on the ground that it would require a wheelchair user to be the purchaser of tickets. The Department has reworded this paragraph to reflect that the individual with a disability does not have to be the ticket purchaser. The final rule allows third parties to purchase accessible tickets at the request of an individual with a disability.

Commenters also argued that other individuals with disabilities who do not use wheelchairs should be permitted to purchase accessible seating. Some individuals with disabilities who do not use wheelchairs urged the Department to change the rule, asserting that they, too, need accessible seating. The Department agrees that such seating, although designed for use by a wheelchair user, may be used by non-wheelchair users, if those persons are persons with a disability who need to use accessible seating because of a mobility disability or because their disability requires the use of the features that accessible seating provides (*e.g.*, individuals who cannot bend their legs because of braces, or individuals who, because of their disability, cannot sit in a straight-back chair).

Some commenters raised concerns that allowing venues to ask questions to determine whether individuals purchasing accessible seating are doing so legitimately would burden individuals with disabilities in the purchase of accessible seating. The Department has retained the substance of this provision in §35.138(h) of the final rule, but emphasizes that such questions should be asked at the initial time of purchase. For example, if the method of purchase is via the Internet, then the question(s) should be answered by clicking a yes or no box during the transaction. The public entity may warn purchasers that accessible seating is for individuals with disabilities and that individuals purchasing such tickets fraudulently are subject to relocation.

One commenter argued that face-to-face contact between the venue and the ticket holder should be required in order to prevent fraud and suggested that individuals who purchase accessible seating should be required to pick up their tickets at the box office and then enter the venue immediately. The Department has declined to adopt that suggestion. It would be discriminatory to require individuals with disabilities to pick up tickets at the box office when other spectators are not required to do so. If the assembly area wishes to make face-to-face contact with accessible seating ticket holders to curb fraud, it may do so through its ushers and other customer service personnel located within the seating area.

Some commenters asked whether it is permissible for assembly areas to have voluntary clubs where individuals with disabilities self-identify to the public entity in order to become a member of a club that entitles them to purchase accessible seating reserved for club members or otherwise receive priority in purchasing accessible seating. The Department agrees that such clubs are permissible, provided that a reasonable amount of accessible seating remains available at all prices and dispersed at all locations for individuals with disabilities who are non-members.

§ 35.139 Direct threat

In Appendix A of the Department's 1991 title II regulation, the Department included a detailed discussion of ''direct threat'' that, among other things, explained that ''the principles established in §36.208 of the Department's [title III] regulation'' were ''applicable'' as well to title II, insofar as ''questions of safety are involved.'' 28 CFR part 35, app. A at 565 (2009). In the final rule, the Department has included specific requirements related to ''direct threat'' that parallel those in the title III rule. These requirements are found in new §35.139.

SUBPART D—PROGRAM ACCESSIBILITY

Section 35.150(b)(2) Safe harbor

The ''program accessibility'' requirement in regulations implementing title II of the Americans with Disabilities Act requires that each service, program, or activity, *when viewed in its entirety*, be readily accessible to and usable by individuals with disabilities. 28 CFR 35.150(a). Because title II evaluates a public entity's programs, services, and activities in their entirety, public entities have flexibility in addressing accessibility issues. Program access does not necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities, and public entities are not required to make structural changes to existing facilities where other methods are effective in achieving program

access. *See id.*[3] Public entities do, however, have program access considerations that are independent of, but may coexist with, requirements imposed by new construction or alteration requirements in those same facilities.

Where a public entity opts to alter existing facilities to comply with its program access requirements, the entity must meet the accessibility requirements for alterations set out in §35.151. Under the final rule, these alterations will be subject to the 2010 Standards. The 2010 Standards introduce technical and scoping specifications for many elements not covered by the 1991 Standards. In existing facilities, these supplemental requirements need to be taken into account by a public entity in ensuring program access. Also included in the 2010 Standards are revised technical and scoping requirements for a number of elements that were addressed in the 1991 Standards. These revised requirements reflect incremental changes that were added either because of additional study by the Access Board or in order to harmonize requirements with the model codes.

Although the program accessibility standard offers public entities a level of discretion in determining how to achieve program access, in the NPRM, the Department proposed an addition to §35.150 at §35.150(b)(2), denominated ''Safe Harbor,'' to clarify that ''[i]f a public entity has constructed or altered elements * * * in accordance with the specifications in either the 1991 Standards or the Uniform Federal Accessibility Standard, such public entity is not, solely because of the Department's adoption of the [2010] Standards, required to retrofit such elements to reflect incremental changes in the proposed standards.'' 73 FR 34466, 34505 (June 17, 2008). In these circumstances, the public entity would be entitled to a safe harbor for the already compliant elements until those elements are altered. The safe harbor does not negate a public entity's new construction or alteration obligations. A public entity must comply with the new construction or alteration requirements in effect at the time of the construction or alteration. With respect to existing facilities designed and constructed after January 26, 1992, but before the public entities are required to comply with the 2010 Standards, the rule is that any elements in these facilities that were not constructed in conformance with UFAS or the 1991 Standards are in violation of the ADA and must be brought into compliance. If elements in existing facilities were altered after January 26, 1992, and those alterations were not made in conformance with the alteration requirements in effect at the time, then those alteration violations must be corrected. Section 35.150(b)(2) of the final rule specifies that until the compliance date for the Standards (18 months from the date of publication of the rule), facilities or elements covered by §35.151(a) or (b) that are noncompliant with either the 1991 Standards or UFAS shall be made accessible in accordance with the 1991 Standards, UFAS, or the 2010 Standards. Once the compliance date is reached, such noncompliant facilities or elements must be made accessible in accordance with the 2010 Standards.

The Department received many comments on the safe harbor during the 60-day public comment period. Advocacy groups were opposed to the safe harbor for compliant elements in existing facilities. These commenters objected to the Department's characterization of revisions between the 1991 and 2010 Standards as incremental changes and assert that these revisions represent important advances in accessibility for individuals with disabilities. Commenters saw no basis for ''grandfathering'' outdated accessibility standards given the flexibility inherent in the program access standard. Others noted that title II's ''undue financial and administrative burdens'' and ''fundamental alteration'' defenses eliminate any need for further exemptions from compliance. Some commenters suggested that entities' past efforts to comply with the program access standard of 28 CFR 35.150(a) might appropriately be a factor in determining what is required in the future.

Many public entities welcomed the Department's proposed safe harbor. These commenters contend that the safe harbor allows public entities needed time to evaluate program access in light of the 2010 Standards, and incorporate structural changes in a careful and thoughtful way toward increasing accessibility entity-wide. Many felt that it would be an ineffective use of public funds to update buildings to retrofit elements that had already been constructed or modified to Department-issued and sanctioned specifications. One entity pointed to the ''possibly budget-breaking'' nature of forcing compliance with incremental changes.

The Department has reviewed and considered all information received during the 60-day public comment period. Upon review, the Department has decided to retain the title II safe harbor with minor revisions. The Department believes that the safe harbor provides an important measure of clarity and certainty for public entities as to the effect of the final rule with respect to existing facilities. Additionally, by providing a safe harbor for elements already in compliance with the technical and scoping specifications in the 1991 Standards or UFAS, funding that would otherwise be spent on incremental changes and repeated retrofitting is freed up to be used toward increased entity-wide program access. Public entities may thereby

[3] The term ''existing facility'' is defined in §35.104 as amended by this rule.

make more efficient use of the resources available to them to ensure equal access to their services, programs, or activities for all individuals with disabilities.

The safe harbor adopted with this final rule is a narrow one, as the Department recognizes that this approach may delay, in some cases, the increased accessibility that the revised requirements would provide, and that for some individuals with disabilities the impact may be significant. This safe harbor operates only with respect to elements that are in compliance with the scoping and technical specifications in either the 1991 Standards or UFAS; it does not apply to supplemental requirements, those elements for which scoping and technical specifications are first provided in the 2010 Standards.

Existing Facilities

Existing play areas. The 1991 Standards do not include specific requirements for the design and construction of play areas. To meet program accessibility requirements where structural changes are necessary, public entities have been required to apply the general new construction and alteration standards to the greatest extent possible, including with respect to accessible parking, routes to the playground, playground equipment, and playground amenities (e.g., picnic tables and restrooms). The Access Board published final guidelines for play areas in October 2000. The guidelines extended beyond general playground access to establish specific scoping and technical requirements for ground-level and elevated play components, accessible routes connecting the components, accessible ground surfaces, and maintenance of those surfaces. These guidelines filled a void left by the 1991 Standards. They have been referenced in Federal playground construction and safety guidelines and have been used voluntarily when many play areas across the country have been altered or constructed.

In adopting the 2004 ADAAG (which includes the 2000 play area guidelines), the Department acknowledges both the importance of integrated, full access to play areas for children and parents with disabilities, as well as the need to avoid placing an untenable fiscal burden on public entities. In the NPRM, the Department stated it was proposing two specific provisions to reduce the impact on existing facilities that undertake structural modifications pursuant to the program accessibility requirement. First, the Department proposed in §35.150(b)(4) that existing play areas that are not being altered would be permitted to meet a reduced scoping requirement with respect to their elevated play components. Elevated play components, which are found on most playgrounds, are the individual components that are linked together to form large-scale composite playground equipment (*e.g.*, the monkey bars attached to the suspension bridge attached to the tube slide, etc.) The 2010 Standards provide that a play area that includes both ground level and elevated play components must ensure that a specified number of the ground-level play components and at least 50 percent of the elevated play components are accessible.

In the NPRM, the Department asked for specific public comment with regard to whether existing play areas should be permitted to substitute additional ground-level play components for the elevated play components they would otherwise have been required to make accessible. The Department also queried if there were other requirements applicable to play areas in the 2004 ADAAG for which the Department should consider exemptions or reduced scoping. Many commenters opposed permitting existing play areas to make such substitutions. Several commenters stated that the Access Board already completed significant negotiation and cost balancing in its rulemaking, so no additional exemptions should be added in either meeting program access requirements or in alterations. Others noted that elevated components are generally viewed as the more challenging and exciting by children, so making more ground than elevated play components accessible would result in discrimination against children with disabilities in general and older children with disabilities in particular. They argued that the ground components would be seen as equipment for younger children and children with disabilities, while elevated components would serve only older children without disabilities. In addition, commenters advised that including additional ground-level play components would require more accessible route and use zone surfacing, which would result in a higher cost burden than making elevated components accessible.

The Department also asked for public comment on whether it would be appropriate for the Access Board to consider issuing guidelines for alterations to play and recreational facilities that would permit reduced scoping of accessible components or substitution of ground-level play components in lieu of elevated play components. Most commenters opposed any additional reductions in scoping and substitutions. These commenters uniformly stated that the Access Board completed sufficient negotiation during its rulemaking on its play area guidelines published in 2000 and that those guidelines consequently should stand as is. One commenter advocated reduced scoping and substitution of ground play components during alterations only for those play areas built prior to the finalization of the guidelines.

The Department has considered the comments it has received and has determined that it is not necessary to provide a specific

exemption to the scoping for components for existing play areas or to recommend reduced scoping or additional exemptions for alteration, and has deleted the reduced scoping proposed in NPRM §35.150(b)(4)(i) from the final rule. The Department believes that it is preferable for public entities to try to achieve compliance with the design standards established in the 2010 Standards. If this is not possible to achieve in an existing setting, the requirements for program accessibility provide enough flexibility to permit the covered entity to pursue alternative approaches to provide accessibility.

Second, in §35.150(b)(5)(i) of the NPRM, the Department proposed language stating that existing play areas that are less than 1,000 square feet in size and are not otherwise being altered, need not comply with the scoping and technical requirements for play areas in section 240 of the 2004 ADAAG. The Department stated it selected this size based on the provision in section 1008.2.4.1 of the 2004 ADAAG, Exception 1, which permits play areas less than 1,000 square feet in size to provide accessible routes with a reduced clear width (44 inches instead of 60 inches). In its 2000 regulatory assessment for the play area guidelines, the Access Board assumed that such ''small'' play areas represented only about 20 percent of the play areas located in public schools, and none of the play areas located in city and State parks (which the Board assumed were typically larger than 1,000 square feet).

In the NPRM, the Department asked if existing play areas less than 1,000 square feet should be exempt from the requirements applicable to play areas. The vast majority of commenters objected to such an exemption. One commenter stated that many localities that have parks this size are already making them accessible; many cited concerns that this would leave all or most public playgrounds in small towns inaccessible; and two commenters stated that, since many of New York City's parks are smaller than 1,000 square feet, only scattered larger parks in the various boroughs would be obliged to become accessible. Residents with disabilities would then have to travel substantial distances outside their own neighborhoods to find accessible playgrounds. Some commenters responded that this exemption should not apply in instances where the play area is the only one in the program, while others said that if a play area is exempt for reasons of size, but is the only one in the area, then it should have at least an accessible route and 50 percent of its ground-level play components accessible. One commenter supported the exemption as presented in the question.

The Department is persuaded by these comments that it is inappropriate to exempt public play areas that are less than 1,000 square feet in size. The Department believes that the factors used to determine program accessibility, including the limits established by the undue financial and administrative burdens defense, provide sufficient flexibility to public entities in determining how to make their existing play areas accessible. In those cases where a title II entity believes that present economic concerns make it an undue financial and administrative burden to immediately make its existing playgrounds accessible in order to comply with program accessibility requirements, then it may be reasonable for the entity to develop a multi-year plan to bring its facilities into compliance.

In addition to requesting public comment about the specific sections in the NPRM, the Department also asked for public comment about the appropriateness of a general safe harbor for existing play areas and a safe harbor for public entities that have complied with State or local standards specific to play areas. In the almost 200 comments received on title II play areas, the vast majority of commenters strongly opposed all safe harbors, exemptions, and reductions in scoping. By contrast, one commenter advocated a safe harbor from compliance with the 2004 ADAAG play area requirements along with reduced scoping and exemptions for both program accessibility and alterations; a second commenter advocated only the general safe harbor from compliance with the supplemental requirements.

In response to the question of whether the Department should exempt public entities from specific compliance with the supplemental requirements for play areas, commenters stated that since no specific standards previously existed, play areas are more than a decade behind in providing full access for individuals with disabilities. When accessible play areas were created, public entities, acting in good faith, built them according to the 2004 ADAAG requirements; many equipment manufacturers also developed equipment to meet those guidelines. If existing playgrounds were exempted from compliance with the supplemental guidelines, commenters said, those entities would be held to a lesser standard and left with confusion, a sense of wasted resources, and federally condoned discrimination and segregation. Commenters also cited Federal agency settlement agreements on play areas that required compliance with the guidelines. Finally, several commenters observed that the provision of a safe harbor in this instance was invalid for two reasons: (1) The rationale for other safe harbors—that entities took action to comply with the 1991 Standards and should not be further required to comply with new standards—does not exist; and (2) concerns about financial and administrative burdens are adequately addressed by program access requirements.

The question of whether accessibility of play areas should continue to be assessed on the basis of case-by-case evaluations elicited conflicting responses. One commenter asserted that there is no evidence that the case-by-case approach is not working and so it should continue until found to be inconsistent with the ADA's goals. Another commenter argued that case-by-case evaluations result in unpredictable outcomes which result in costly and long court actions. A third commenter, advocating against case-by-case evaluations, requested instead increased direction and scoping to define what constitutes an accessible play area program.

The Department has considered all of the comments it received in response to its questions and has concluded that there is insufficient basis to establish a safe harbor from compliance with the supplemental guidelines. Thus, the Department has eliminated the proposed exemption contained in §35.150(b)(5)(i) of the NPRM for existing play areas that are less than 1,000 square feet. The Department believes that the factors used to determine program accessibility, including the limits established by the undue financial and administrative burdens defense, provide sufficient flexibility to public entities in determining how to make their existing play areas accessible.

In the NPRM, the Department also asked whether there are State and local standards addressing play and recreation area accessibility and, to the extent that there are such standards, whether facilities currently governed by, and in compliance with, such State and local standards or codes should be subject to a safe harbor from compliance with applicable requirements in the 2004 ADAAG. The Department also asked whether it would be appropriate for the Access Board to consider the implementation of guidelines that would permit such a safe harbor with respect to play and recreation areas undertaking alterations. In response, commenters stated that few State or local governments have standards that address issues of accessibility in play areas, and one commenter organization said that it was unaware of any State or local standards written specifically for accessible play areas. One commenter observed from experience that most State and local governments were waiting for the Access Board guidelines to become enforceable standards as they had no standards themselves to follow. Another commenter offered that public entities across the United States already include in their playground construction bid specifications language that requires compliance with the Access Board's guidelines. A number of commenters advocated for the Access Board's guidelines to become comprehensive Federal standards that would complement any abbreviated State and local standards. One commenter, however, supported a safe harbor for play areas undergoing alterations if the areas currently comply with State or local standards.

The Department is persuaded by these comments that there is insufficient basis to establish a safe harbor for program access or alterations for play areas built in compliance with State or local laws.

In the NPRM, the Department asked whether ''a reasonable number, but at least one'' is a workable standard to determine the appropriate number of existing play areas that a public entity must make accessible. Many commenters objected to this standard, expressing concern that the phrase ''at least one'' would be interpreted as a maximum rather than a minimum requirement. Such commenters feared that this language would allow local governments to claim compliance by making just one public park accessible, regardless of the locality's size, budget, or other factors, and would support segregation, forcing children with disabilities to leave their neighborhoods to enjoy an accessible play area. While some commenters criticized what they viewed as a new analysis of program accessibility, others asserted that the requirements of program accessibility should be changed to address issues related to play areas that are not the main program in a facility but are essential components of a larger program (*e.g.*, drop-in child care for a courthouse).

The Department believes that those commenters who opposed the Department's ''reasonable number, but at least one'' standard for program accessibility misunderstood the Department's proposal. The Department did not intend any change in its longstanding interpretation of the program accessibility requirement. Program accessibility requires that each service, program, or activity be operated ''so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities,'' 28 CFR 35.150(a), subject to the undue financial and administrative burdens and fundamental alterations defenses provided in 28 CFR 35.150. In determining how many facilities of a multi-site program must be made accessible in order to make the overall program accessible, the standard has always been an assessment of what is reasonable under the circumstances to make the program readily accessible to and usable by individuals with disabilities, taking into account such factors as the size of the public entity, the particular program features offered at each site, the geographical distance between sites, the travel times to the sites, the number of sites, and availability of public transportation to the sites. In choosing among available methods for meeting this requirement, public entities are required to give priority ''to those methods that offer services, programs, and activities * * * in the most integrated setting appropriate.'' 28 CFR 35.150(b)(1). As a

result, in cases where the sites are widely dispersed with difficult travel access and where the program features offered vary widely between sites, program accessibility will require a larger number of facilities to be accessible in order to ensure program accessibility than where multiple sites are located in a concentrated area with easy travel access and uniformity in program offerings.

Commenters responded positively to the Department's question in the NPRM whether the final rule should provide a list of factors that a public entity should use to determine how many of its existing play areas should be made accessible. Commenters also asserted strongly that the number of existing parks in the locality should not be the main factor. In addition to the Department's initial list—including number of play areas in an area, travel times or geographic distances between play areas, and the size of the public entity—commenters recommended such factors as availability of accessible pedestrian routes to the playgrounds, ready availability of accessible transportation, comparable amenities and services in and surrounding the play areas, size of the playgrounds, and sufficient variety in accessible play components within the playgrounds. The Department agrees that these factors should be considered, where appropriate, in any determination of whether program accessibility has been achieved. However, the Department has decided that it need not address these factors in the final rule itself because the range of factors that might need to be considered would vary depending upon the circumstances of particular public entities. The Department does not believe any list would be sufficiently comprehensive to cover every situation.

The Department also requested public comment about whether there was a ''tipping point'' at which the costs of compliance with the new requirements for existing play areas would be so burdensome that the entity would simply shut down the playground. Commenters generally questioned the feasibility of determining a ''tipping point.'' No commenters offered a recommended ''tipping point.'' Moreover, most commenters stated that a ''tipping point'' is not a valid consideration for various reasons, including that ''tipping points'' will vary based upon each entity's budget and other mandates, and costs that are too high will be addressed by the limitations of the undue financial and administrative burdens defense in the program accessibility requirement and that a ''tipping point'' must be weighed against quality of life issues, which are difficult to quantify. The Department has decided that comments did not establish any clear ''tipping point'' and therefore provides no regulatory requirement in this area.

Swimming pools. The 1991 Standards do not contain specific scoping or technical requirements for swimming pools. As a result, under the 1991 title II regulation, title II entities that operate programs or activities that include swimming pools have not been required to provide an accessible route into those pools via a ramp or pool lift, although they are required to provide an accessible route to such pools. In addition, these entities continue to be subject to the general title II obligation to make their programs usable and accessible to persons with disabilities.

The 2004 ADAAG includes specific technical and scoping requirements for new and altered swimming pools at sections 242 and 1009. In the NPRM, the Department sought to address the impact of these requirements on existing swimming pools. Section 242.2 of the 2004 ADAAG states that swimming pools must provide two accessible means of entry, except that swimming pools with less than 300 linear feet of swimming pool wall are only required to provide one accessible means of entry, provided that the accessible means of entry is either a swimming pool lift complying with section 1009.2 or a sloped entry complying with section 1009.3.

In the NPRM, the Department proposed, in §35.150(b)(4)(ii), that for measures taken to comply with title II's program accessibility requirements, existing swimming pools with at least 300 linear feet of swimming pool wall would be required to provide only one accessible means of access that complied with section 1009.2 or section 1009.3 of the 2004 ADAAG.

The Department specifically sought comment from public entities and individuals with disabilities on the question whether the Department should ''allow existing public entities to provide only one accessible means of access to swimming pools more than 300 linear feet long?'' The Department received significant public comment on this proposal.

Most commenters opposed any reduction in the scoping required in the 2004 ADAAG, citing the fact that swimming is a common therapeutic form of exercise for many individuals with disabilities. Many commenters also stated that the cost of a swimming pool lift, approximately $5,000, or other nonstructural options for pool access such as transfer steps, transfer walls, and transfer platforms, would not be an undue financial and administrative burden for most title II entities. Other commenters pointed out that the undue financial and administrative burdens defense already provided public entities with a means to reduce their scoping requirements. A few commenters cited safety concerns resulting from having just one accessible means of access, and stated that because pools typically have one ladder for every 75 linear feet of pool wall, they should

have more than one accessible means of access. One commenter stated that construction costs for a public pool are approximately $4,000–4,500 per linear foot, making the cost of a pool with 300 linear feet of swimming pool wall approximately $1.2 million, compared to $5,000 for a pool lift. Some commenters did not oppose the one accessible means of access for larger pools so long as a lift was used. A few commenters approved of the one accessible means of access for larger pools. The Department also considered the American National Standard for Public Swimming Pools, ANSI/NSPI–1 2003, section 23 of which states that all pools should have at least two means of egress.

In the NPRM, the Department also proposed at §35.150(b)(5)(ii) that existing swimming pools with less than 300 linear feet of swimming pool wall be exempted from having to comply with the provisions of section 242.2. The Department's NPRM requested public comment about the potential effect of this approach, asking whether existing swimming pools with less than 300 linear feet of pool wall should be exempt from the requirements applicable to swimming pools.

Most commenters were opposed to this proposal. A number of commenters stated, based on the Access Board estimates that 90 percent of public high school pools, 40 percent of public park and community center pools, and 30 percent of public college and university pools have less than 300 linear feet of pool wall, that a large number of public swimming pools would fall under this exemption. Other commenters pointed to the existing undue financial and administrative burdens defenses as providing public entities with sufficient protection from excessive compliance costs. Few commenters supported this exemption.

The Department also considered the fact that many existing swimming pools owned or operated by public entities are recipients of Federal financial assistance and therefore, are also subject to the program accessibility requirements of section 504 of the Rehabilitation Act.

The Department has carefully considered all the information available to it including the comments submitted on these two proposed exemptions for swimming pools owned or operated by title II entities. The Department acknowledges that swimming provides important therapeutic, exercise, and social benefits for many individuals with disabilities and is persuaded that exemption of many publicly owned or operated pools from the 2010 Standards is neither appropriate nor necessary. The Department agrees with the commenters that title II already contains sufficient limitations on public entities' obligations to make their programs accessible. In particular, the Department agrees that those public entities that can demonstrate that making particular existing swimming pools accessible in accordance with the 2010 Standards would be an undue financial and administrative burden are sufficiently protected from excessive compliance costs. Thus, the Department has eliminated proposed §§35.150(b)(4)(ii) and (b)(5)(ii) from the final rule.

In addition, although the NPRM contained no specific proposed regulatory language on this issue, the NPRM sought comment on what would be a workable standard for determining the appropriate number of existing swimming pools that a public entity must make accessible for its program to be accessible. The Department asked whether a ''reasonable number, but at least one'' would be a workable standard and, if not, whether there was a more appropriate specific standard. The Department also asked if, in the alternative, the Department should provide ''a list of factors that a public entity could use to determine how many of its existing swimming pools to make accessible, e.g., number of swimming pools, travel times or geographic distances between swimming pools, and the size of the public entity?''

A number of commenters expressed concern over the ''reasonable number, but at least one'' standard and contended that, in reality, public entities would never provide more than one accessible existing pool, thus segregating individuals with disabilities. Other commenters felt that the existing program accessibility standard was sufficient. Still others suggested that one in every three existing pools should be made accessible. One commenter suggested that all public pools should be accessible. Some commenters proposed a list of factors to determine how many existing pools should be accessible. Those factors include the total number of pools, the location, size, and type of pools provided, transportation availability, and lessons and activities available. A number of commenters suggested that the standard should be based on geographic areas, since pools serve specific neighborhoods. One commenter argued that each pool should be examined individually to determine what can be done to improve its accessibility.

The Department did not include any language in the final rule that specifies the ''reasonable number, but at least one'' standard for program access. However, the Department believes that its proposal was misunderstood by many commenters. Each service, program, or activity conducted by a public entity, when viewed in its entirety, must still be readily accessible to and usable by individuals with disabilities unless doing so would result in a fundamental alteration in the nature of the program or activity or in undue financial and administrative burdens. Determining which pool(s) to make accessible and whether more than one accessible pool is necessary to provide program access

requires analysis of a number of factors, including, but not limited to, the size of the public entity, geographical distance between pool sites, whether more than one community is served by particular pools, travel times to the pools, the total number of pools, the availability of lessons and other programs and amenities at each pool, and the availability of public transportation to the pools. In many instances, making one existing swimming pool accessible will not be sufficient to ensure program accessibility. There may, however, be some circumstances where a small public entity can demonstrate that modifying one pool is sufficient to provide access to the public entity's program of providing public swimming pools. In all cases, a public entity must still demonstrate that its programs, including the program of providing public swimming pools, when viewed in their entirety, are accessible.

Wading pools. The 1991 Standards do not address wading pools. Section 242.3 of the 2004 ADAAG requires newly constructed or altered wading pools to provide at least one sloped means of entry to the deepest part of the pool. The Department was concerned about the potential impact of this new requirement on existing wading pools. Therefore, in the NPRM, the Department sought comments on whether existing wading pools that are not being altered should be exempt from this requirement, asking, ''[w]hat site constraints exist in existing facilities that could make it difficult or infeasible to install a sloped entry in an existing wading pool? Should existing wading pools that are not being altered be exempt from the requirement to provide a sloped entry?'' 73 FR 34466, 34487–88 (June 17, 2008). Most commenters agreed that existing wading pools that are not being altered should be exempt from this requirement. Almost all commenters felt that during alterations a sloped entry should be provided unless it was technically infeasible to do so. Several commenters felt that the required clear deck space surrounding a pool provided sufficient space for a sloped entry during alterations.

The Department also solicited comments on the possibility of exempting existing wading pools from the obligation to provide program accessibility. Most commenters argued that installing a sloped entry in an existing wading pool is not very feasible. Because covered entities are not required to undertake modifications that would be technically infeasible, the Department believes that the rule as drafted provides sufficient protection from unwarranted expense to the operators of small existing wading pools. Other existing wading pools, particularly those larger pools associated with facilities such as aquatic centers or water parks, must be assessed on a case-by-case basis. Therefore, the Department has not included such an exemption for wading pools in its final rule.

Saunas and steam rooms. The 1991 Standards do not address saunas and steam rooms. Section 35.150(b)(5)(iii) of the NPRM exempted existing saunas and steam rooms that seat only two individuals and were not being altered from section 241 of the 2004 ADAAG, which requires an accessible turning space. Two commenters objected to this exemption as unnecessary, and argued that the cost of accessible saunas is not high and public entities still have an undue financial and administrative burdens defense.

The Department considered these comments and has decided to eliminate the exemption for existing saunas and steam rooms that seat only two people. Such an exemption is unnecessary because covered entities will not be subject to program accessibility requirements to make existing saunas and steam rooms accessible if doing so constitutes an undue financial and administrative burden. The Department believes it is likely that because of their pre-fabricated forms, which include built-in seats, it would be either technically infeasible or an undue financial and administrative burden to modify such saunas and steams rooms. Consequently, a separate exemption for saunas and steam rooms would have been superfluous. Finally, employing the program accessibility standard for small saunas and steam rooms is consistent with the Department's decisions regarding the proposed exemptions for play areas and swimming pools.

Several commenters also argued in favor of a specific exemption for existing spas. The Department notes that the technical infeasibility and program accessibility defenses are applicable equally to existing spas and declines to adopt such an exemption.

Other recreational facilities. In the NPRM, the Department asked about a number of issues relating to recreation facilities such as team or player seating areas, areas of sport activity, exercise machines, boating facilities, fishing piers and platforms, and miniature golf courses. The Department's questions addressed the costs and benefits of applying the 2004 ADAAG to these spaces and facilities and the application of the specific technical requirements in the 2004 ADAAG for these spaces and facilities. The discussion of the comments received by the Department on these issues and the Department's response to those comments can be found in either the section of Appendix A to this rule entitled ''Other Issues,'' or in Appendix B to the final title III rule, which will be published today elsewhere in this volume.

Section 35.151 New construction and alterations

Section 35.151(a), which provided that those facilities that are constructed or altered by, on behalf of, or for the use of a public entity shall be designed, constructed, or altered to be readily accessible to and usable

by individuals with disabilities, is unchanged in the final rule, but has been redesignated as §35.151(a)(1). The Department has added a new section, designated as §35.151(a)(2), to provide that full compliance with the requirements of this section is not required where an entity can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features. This exception was contained in the title III regulation and in the 1991 Standards (applicable to both public accommodations and facilities used by public entities), so it has applied to any covered facility that was constructed under the 1991 Standards since the effective date of the ADA. The Department added it to the text of §35.151 to maintain consistency between the design requirements that apply under title II and those that apply under title III. The Department received no significant comments about this section.

Section 35.151(b) Alterations

The 1991 title II regulation does not contain any specific regulatory language comparable to the 1991 title III regulation relating to alterations and path of travel for covered entities, although the 1991 Standards describe standards for path of travel during alterations to a primary function. *See* 28 CFR part 36, app A., section 4.1.6(a) (2009).

The path of travel requirements contained in the title III regulation are based on section 303(a)(2) of the ADA, 42 U.S.C. 12183(a)(2), which provides that when an entity undertakes an alteration to a place of public accommodation or commercial facility that affects or could affect the usability of or access to an area that contains a primary function, the entity shall ensure that, to the maximum extent feasible, the path of travel to the altered area—and the restrooms, telephones, and drinking fountains serving it—is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The NPRM proposed amending §35.151 to add both the path of travel requirements and the exemption relating to barrier removal (as modified to apply to the program accessibility standard in title II) that are contained in the title III regulation to the title II regulation. Proposed §35.151(b)(4) contained the requirements for path of travel. Proposed §35.151(b)(2) stated that the path of travel requirements of §35.151(b)(4) shall not apply to measures taken solely to comply with program accessibility requirements.

Where the specific requirements for path of travel apply under title III, they are limited to the extent that the cost and scope of alterations to the path of travel are disproportionate to the cost of the overall alteration, as determined under criteria established by the Attorney General.

The Access Board included the path of travel requirement for alterations to facilities covered by the standards (other than those subject to the residential facilities standards) in section 202.4 of 2004 ADAAG. Section 35.151(b)(4)(iii) of the final rule establishes the criteria for determining when the cost of alterations to the path of travel is ''disproportionate'' to the cost of the overall alteration.

The NPRM also provided that areas such as supply storage rooms, employee lounges and locker rooms, janitorial closets, entrances, and corridors are not areas containing a primary function. Nor are restroom areas considered to contain a primary function unless the provision of restrooms is a primary purpose of the facility, such as at a highway rest stop. In that situation, a restroom would be considered to be an ''area containing a primary function'' of the facility.

The Department is not changing the requirements for program accessibility. As provided in §35.151(b)(2) of the regulation, the path of travel requirements of §35.151(b)(4) only apply to alterations undertaken solely for purposes other than to meet the program accessibility requirements. The exemption for the specific path of travel requirement was included in the regulation to ensure that the specific requirements and disproportionality exceptions for path of travel are not applied when areas are being altered to meet the title II program accessibility requirements in §35.150. In contrast, when areas are being altered to meet program accessibility requirements, they must comply with all of the applicable requirements referenced in section 202 of the 2010 Standards. A covered title II entity must provide accessibility to meet the requirements of §35.150 unless doing so is an undue financial and administrative burden in accordance with §35.150(a)(3). A covered title II entity may not use the disproportionality exception contained in the path of travel provisions as a defense to providing an accessible route as part of its obligation to provide program accessibility. The undue financial and administrative burden standard does *not* contain any bright line financial tests.

The Department's proposed §35.151(b)(4) adopted the language now contained in §36.403 of the title III regulation, including the disproportionality limitation (*i.e.*, alterations made to provide an accessible path of travel to the altered area would be deemed disproportionate to the overall alteration when the cost exceeds 20 percent of the cost of the alteration to the primary function area). Proposed §35.151(b)(2) provided that the path of travel requirements do not apply to alterations undertaken solely to comply with program accessibility requirements.

The Department received a substantial number of comments objecting to the Department's adoption of the exemption for the path of travel requirements when alterations are undertaken solely to meet program accessibility requirements. These commenters argued that the Department had no statutory basis for providing this exemption nor does it serve any purpose. In addition, these commenters argued that the path of travel exemption has the effect of placing new limitations on the obligations to provide program access. A number of commenters argued that doing away with the path of travel requirement would render meaningless the concept of program access. They argued that just as the requirement to provide an accessible path of travel to an altered area (regardless of the reason for the alteration), including making the restrooms, telephones, and drinking fountains that serve the altered area accessible, is a necessary requirement in other alterations, it is equally necessary for alterations made to provide program access. Several commenters expressed concern that a readily accessible path of travel be available to ensure that persons with disabilities can get to the physical location in which programs are held. Otherwise, they will not be able to access the public entity's service, program, or activity. Such access is a cornerstone of the protections provided by the ADA. Another commenter argued that it would be a waste of money to create an accessible facility without having a way to get to the primary area. This commenter also stated that the International Building Code (IBC) requires the path of travel to a primary function area, up to 20 percent of the cost of the project. Another commenter opposed the exemption, stating that the trigger of an alteration is frequently the only time that a facility must update its facilities to comply with evolving accessibility standards.

In the Department's view, the commenters objecting to the path of travel exemption contained in §35.151(b)(2) did not understand the intention behind the exemption. The exemption was not intended to eliminate any existing requirements related to accessibility for alterations undertaken in order to meet program access obligations under §35.149 and §35.150. Rather, it was intended to ensure that covered entities did not apply the path of travel requirements in lieu of the overarching requirements in this Subpart that apply when making a facility accessible in order to comply with program accessibility. The exemption was also intended to make it clear that the disproportionality test contained in the path of travel standards is not applicable in determining whether providing program access results in an undue financial and administration burden within the meaning of §35.150(a)(3). The exemption was also provided to maintain consistency with the title III path of travel exemption for barrier removal, *see* §36.304(d), in keeping with the Department's regulatory authority under title II of the ADA. *See* 42 U.S.C. 12134(b); *see also* H. R Rep. No. 101B485, pt. 2, at 84 (1990) (''The committee intends, however, that the forms of discrimination prohibited by section 202 be identical to those set out in the applicable provisions of titles I and III of this legislation.'').

For title II entities, the path of travel requirements are of significance in those cases where an alteration is being made solely for reasons other than program accessibility. For example, a public entity might have six courtrooms in two existing buildings and might determine that only three of those courtrooms and the public use and common use areas serving those courtrooms in one building are needed to be made accessible in order to satisfy its program access obligations. When the public entity makes those courtrooms and the public use and common use areas serving them accessible in order to meet its program access obligations, it will have to comply with the 2010 Standards unless the public entity can demonstrate that full compliance would result in undue financial and administrative burdens as described in §35.150(a)(3). If such action would result in an undue financial or administrative burden, the public entity would nevertheless be required to take some other action that would not result in such an alteration or such burdens but would ensure that the benefits and services provided by the public entity are readily accessible to persons with disabilities. When the public entity is making modifications to meet its program access obligation, it may not rely on the path of travel exception under §35.151(b)(4), which limits the requirement to those alterations where the cost and scope of the alterations are not disproportionate to the cost and scope of the overall alterations. If the public entity later decides to alter courtrooms in the other building, for purposes of updating the facility (and, as previously stated, has met its program access obligations) then in that case, the public entity would have to comply with the path of travel requirements in the 2010 Standards subject to the disproportionality exception set forth in §35.151(b)(4).

The Department has slightly revised proposed §35.151(b)(2) to make it clearer that the path of travel requirements only apply when alterations are undertaken solely for purposes other than program accessibility.

Section 35.151(b)(4)(ii)(C) Path of travel—safe harbor

In §35.151(b)(4)(ii)(C) of the NPRM, the Department included a provision that stated

that public entities that have brought required elements of path of travel into compliance with the 1991 Standards are not required to retrofit those elements in order to reflect incremental changes in the 2010 Standards solely because of an alteration to a primary function area that is served by that path of travel. In these circumstances, the public entity is entitled to a safe harbor and is only required to modify elements to comply with the 2010 Standards if the public entity is planning an alteration to the element.

A substantial number of commenters objected to the Department's imposition of a safe harbor for alterations to facilities of public entities that comply with the 1991 Standards. These commenters argued that if a public entity is already in the process of altering its facility, there should be a legal requirement that individuals with disabilities be entitled to increased accessibility by using the 2010 Standards for path of travel work. They also stated that they did not believe there was a statutory basis for ''grandfathering'' facilities that comply with the 1991 Standards.

The ADA is silent on the issue of ''grandfathering'' or establishing a safe harbor for measuring compliance in situations where the covered entity is not undertaking a planned alteration to specific building elements. The ADA delegates to the Attorney General the responsibility for issuing regulations that define the parameters of covered entities' obligations when the statute does not directly address an issue. This regulation implements that delegation of authority.

One commenter proposed that a previous record of barrier removal be one of the factors in determining, prospectively, what renders a facility, when viewed in its entirety, usable and accessible to persons with disabilities. Another commenter asked the Department to clarify, at a minimum, that to the extent compliance with the 1991 Standards does not provide program access, particularly with regard to areas not specifically addressed in the 1991 Standards, the safe harbor will not operate to relieve an entity of its obligations to provide program access.

One commenter supported the proposal to add a safe harbor for path of travel.

The final rule retains the safe harbor for required elements of a path of travel to altered primary function areas for public entities that have already complied with the 1991 Standards with respect to those required elements. The Department believes that this safe harbor strikes an appropriate balance between ensuring that individuals with disabilities are provided access to buildings and facilities and potential financial burdens on existing public entities that are undertaking alterations subject to the 2010 Standards. This safe harbor is not a blanket exemption for facilities. If a public entity undertakes an alteration to a primary function area, only the required elements of a path of travel to that area that already comply with the 1991 Standards are subject to the safe harbor. If a public entity undertakes an alteration to a primary function area and the required elements of a path of travel to the altered area do not comply with the 1991 Standards, then the public entity must bring those elements into compliance with the 2010 Standards.

Section 35.151(b)(3) Alterations to historic facilities

The final rule renumbers the requirements for alterations to historic facilities enumerated in current §35.151(d)(1) and (2) as §35.151(b)(3)(i) and (ii). Currently, the regulation provides that alterations to historic facilities shall comply to the maximum extent feasible with section 4.1.7 of UFAS or section 4.1.7 of the 1991 Standards. *See* 28 CFR 35.151(d)(1). Section 35.151(b)(3)(i) of the final rule eliminates the option of using UFAS for alterations that commence on or after March 15, 2012. The substantive requirement in current §35.151(d)(2)—that alternative methods of access shall be provided pursuant to the requirements of §35.150 if it is not feasible to provide physical access to an historic property in a manner that will not threaten or destroy the historic significance of the building or facility—is contained in §35.151(b)(3)(ii).

Section 35.151(c) Accessibility standards for new construction and alterations

Section 35.151(c) of the NPRM proposed to adopt ADA Chapter 1, ADA Chapter 2, and Chapters 3 through 10 of the Americans with Disabilities Act and Architectural Barriers Act Guidelines (2004 ADAAG) into the ADA Standards for Accessible Design (2010 Standards). As the Department has noted, the development of these standards represents the culmination of a lengthy effort by the Access Board to update its guidelines, to make the Federal guidelines consistent to the extent permitted by law, and to harmonize the Federal requirements with the private sector model codes that form the basis of many State and local building code requirements. The full text of the 2010 Standards is available for public review on the ADA Home Page (*http://www.ada.gov*) and on the Access Board's Web site (*http://www.access-board.gov/gs.htm*) (last visited June 24, 2010). The Access Board site also includes an extensive discussion of the development of the 2004 ADA/ABA Guidelines, and a detailed comparison of the 1991 Standards, the 2004 ADA/ABA Guidelines, and the 2003 International Building Code.

Section 204 of the ADA, 42 U.S.C. 12134, directs the Attorney General to issue regulations to implement title II that are consistent with the minimum guidelines published by the Access Board. The Attorney General (or his designee) is a statutory member of the Access Board (*see* 29 U.S.C. 792(a)(1)(B(vii)) and was involved in the development of the 2004 ADAAG. Nevertheless, during the process of drafting the NPRM, the Department reviewed the 2004 ADAAG to determine if additional regulatory provisions were necessary. As a result of this review, the Department decided to propose new sections, which were contained in §35.151(e)–(h) of the NPRM, to clarify how the Department will apply the proposed standards to social service center establishments, housing at places of education, assembly areas, and medical care facilities. Each of these provisions is discussed below.

Congress anticipated that there would be a need for close coordination of the ADA building requirements with State and local building code requirements. Therefore, the ADA authorized the Attorney General to establish an ADA code certification process under title III of the ADA. That process is addressed in 28 CFR part 36, subpart F. Revisions to that process are addressed in the regulation amending the title III regulation published elsewhere in the FEDERAL REGISTER today. In addition, the Department operates an extensive technical assistance program. The Department anticipates that once this rule is final, revised technical assistance material will be issued to provide guidance about its implementation.

Section 35.151(c) of the 1991 title II regulation establishes two standards for accessible new construction and alteration. Under paragraph (c), design, construction, or alteration of facilities in conformance with UFAS or with the 1991 Standards (which, at the time of the publication of the rule were also referred to as the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (1991 ADAAG)) is deemed to comply with the requirements of this section with respect to those facilities (except that if the 1991 Standards are chosen, the elevator exemption does not apply). The 1991 Standards were based on the 1991 ADAAG, which was initially developed by the Access Board as guidelines for the accessibility of buildings and facilities that are subject to title III. The Department adopted the 1991 ADAAG as the standards for places of public accommodation and commercial facilities under title III of the ADA and it was published as Appendix A to the Department's regulation implementing title III, 56 FR 35592 (July 26, 1991) as amended, 58 FR 17522 (April 5, 1993), and as further amended, 59 FR 2675 (Jan. 18, 1994), codified at 28 CFR part 36 (2009).

Section 35.151(c) of the final rule adopts the 2010 Standards and establishes the compliance date and triggering events for the application of those standards to both new construction and alterations. Appendix B of the final title III rule (Analysis and Commentary on the 2010 ADA Standards for Accessible Design) (which will be published today elsewhere in this volume and codified as Appendix B to 28 CFR part 36) provides a description of the major changes in the 2010 Standards (as compared to the 1991 ADAAG) and a discussion of the public comments that the Department received on specific sections of the 2004 ADAAG. A number of commenters asked the Department to revise certain provisions in the 2004 ADAAG in a manner that would reduce either the required scoping or specific technical accessibility requirements. As previously stated, although the ADA requires the enforceable standards issued by the Department under title II and title III to be consistent with the minimum guidelines published by the Access Board, it is the sole responsibility of the Attorney General to promulgate standards and to interpret and enforce those standards. The guidelines adopted by the Access Board are ''minimum guidelines.'' 42 U.S.C. 12186(c).

Compliance date. When the ADA was enacted, the effective dates for various provisions were delayed in order to provide time for covered entities to become familiar with their new obligations. Titles II and III of the ADA generally became effective on January 26, 1992, six months after the regulations were published. *See* 42 U.S.C. 12131 note; 42 U.S.C. 12181 note. New construction under title II and alterations under either title II or title III had to comply with the design standards on that date. *See* 42 U.S.C. 12183(a)(1). For new construction under title III, the requirements applied to facilities designed and constructed for first occupancy after January 26, 1993—18 months after the 1991 Standards were published by the Department. In the NPRM, the Department proposed to amend §35.151(c)(1) by revising the current language to limit the application of the 1991 standards to facilities on which construction commences within six months of the final rule adopting revised standards. The NPRM also proposed adding paragraph (c)(2) to §35.151, which states that facilities on which construction commences on or after the date six months following the effective date of the final rule shall comply with the proposed standards adopted by that rule.

As a result, under the NPRM, for the first six months after the effective date, public entities would have the option to use either UFAS or the 1991 Standards and be in compliance with title II. Six months after the effective date of the rule, the new standards would take effect. At that time, construction in accordance with UFAS would no longer satisfy ADA requirements. The Department

stated that in order to avoid placing the burden of complying with both standards on public entities, the Department would coordinate a government-wide effort to revise Federal agencies' section 504 regulations to adopt the 2004 ADAAG as the standard for new construction and alterations.

The purpose of the proposed six-month delay in requiring compliance with the 2010 Standards was to allow covered entities a reasonable grace period to transition between the existing and the proposed standards. For that reason, if a title II entity preferred to use the 2010 Standards as the standard for new construction or alterations commenced within the six-month period after the effective date of the final rule, such entity would be considered in compliance with title II of the ADA.

The Department received a number of comments about the proposed six-month effective date for the title II regulation that were similar in content to those received on this issue for the proposed title III regulation. Several commenters supported the six-month effective date. One commenter stated that any revisions to its State building code becomes effective six months after adoption and that this has worked well. In addition, this commenter stated that since 2004 ADAAG is similar to IBC 2006 and ICC/ANSI A117.1–2003, the transition should be easy. By contrast, another commenter advocated for a minimum 12-month effective date, arguing that a shorter effective date could cause substantial economic hardships to many cities and towns because of the lengthy lead time necessary for construction projects. This commenter was concerned that a six-month effective date could lead to projects having to be completely redrawn, rebid, and rescheduled to ensure compliance with the new standards. Other commenters advocated that the effective date be extended to at least 18 months after the publication of the rule. One of these commenters expressed concern that the kinds of bureaucratic organizations subject to the title II regulations lack the internal resources to quickly evaluate the regulatory changes, determine whether they are currently compliant with the 1991 standards, and determine what they have to do to comply with the new standards. The other commenter argued that 18 months is the minimum amount of time necessary to ensure that projects that have already been designed and approved do not have to undergo costly design revisions at taxpayer expense.

The Department is persuaded by the concerns raised by commenters for both the title II and III regulations that the six-month compliance date proposed in the NPRM for application of the 2010 Standards may be too short for certain projects that are already in the midst of the design and permitting process. The Department has determined that for new construction and alterations, compliance with the 2010 Standards will not be required until 18 months from the date the final rule is published. Until the time compliance with the 2010 Standards is required, public entities will have the option of complying with the 2010 Standards, the UFAS, or the 1991 Standards. However, public entities that choose to comply with the 2010 Standards in lieu of the 1991 Standards or UFAS prior to the compliance date described in this rule must choose one of the three standards, and may not rely on some of the requirements contained in one standard and some of the requirements contained in the other standards.

Triggering event. In §35.151(c)(2) of the NPRM, the Department proposed that the commencement of construction serve as the triggering event for applying the proposed standards to new construction and alterations under title II. This language is consistent with the triggering event set forth in §35.151(a) of the 1991 title II regulation. The Department received only four comments on this section of the title II rule. Three commenters supported the use of ''start of construction'' as the triggering event. One commenter argued that the Department should use the ''last building permit or start of physical construction, whichever comes first,'' stating that ''altering a design after a building permit has been issued can be an undue burden.''

After considering these comments, the Department has decided to continue to use the commencement of physical construction as the triggering event for application of the 2010 Standards for entities covered by title II. The Department has also added clarifying language at §35.151(c)(4) to the regulation to make it clear that the date of ceremonial groundbreaking or the date a structure is razed to make it possible for construction of a facility to take place does not qualify as the commencement of physical construction.

Section 234 of the 2010 Standards provides accessibility guidelines for newly designed and constructed amusement rides. The amusement ride provisions do not provide a ''triggering event'' for new construction or alteration of an amusement ride. An industry commenter requested that the triggering event of ''first use,'' as noted in the Advisory note to section 234.1 of the 2004 ADAAG, be included in the final rule. The Advisory note provides that ''[a] custom designed and constructed ride is new upon its first use, which is the first time amusement park patrons take the ride.'' The Department declines to treat amusement rides differently than other types of new construction and alterations. Under the final rule, they are subject to §35.151(c). Thus, newly constructed and altered amusement rides shall comply with the 2010 Standards if the start of physical construction or the alteration is on or after 18 months from the publication date of this

rule. The Department also notes that section 234.4.2 of the 2010 Standards only applies where the structural or operational characteristics of an amusement ride are altered. It does not apply in cases where the only change to a ride is the theme.

Noncomplying new construction and alterations. The element-by-element safe harbor referenced in §35.150(b)(2) has no effect on new or altered elements in existing facilities that were subject to the 1991 Standards or UFAS on the date that they were constructed or altered, but do not comply with the technical and scoping specifications for those elements in the 1991 Standards or UFAS. Section 35.151(c)(5) of the final rule sets forth the rules for noncompliant new construction or alterations in facilities that were subject to the requirements of this part. Under those provisions, noncomplying new construction and alterations constructed or altered after the effective date of the applicable ADA requirements and before March 15, 2012 shall, before March 15, 2012, be made accessible in accordance with either the 1991 Standards, UFAS, or the 2010 Standards. Noncomplying new construction and alterations constructed or altered after the effective date of the applicable ADA requirements and before March 15, 2012, shall, on or after March 15, 2012 be made accessible in accordance with the 2010 Standards.

Section 35.151(d) Scope of coverage

In the NPRM, the Department proposed a new provision, §35.151(d), to clarify that the requirements established by §35.151, including those contained in the 2004 ADAAG, prescribe what is necessary to ensure that buildings and facilities, including fixed or built-in elements in new or altered facilities, are accessible to individuals with disabilities. Once the construction or alteration of a facility has been completed, all other aspects of programs, services, and activities conducted in that facility are subject to the operational requirements established in this final rule. Although the Department may use the requirements of the 2010 Standards as a guide to determining when and how to make equipment and furnishings accessible, those determinations fall within the discretionary authority of the Department.

The Department also wishes to clarify that the advisory notes, appendix notes, and figures that accompany the 1991 and 2010 Standards do not establish separately enforceable requirements unless specifically stated otherwise in the text of the standards. This clarification has been made to address concerns expressed by ANPRM commenters who mistakenly believed that the advisory notes in the 2004 ADAAG established requirements beyond those established in the text of the guidelines (e.g., Advisory 504.4 suggests, but does not require, that covered entities provide visual contrast on stair tread nosing to make them more visible to individuals with low vision). The Department received no significant comments on this section and it is unchanged in the final rule.

Definitions of residential facilities and transient lodging. The 2010 Standards add a definition of ''residential dwelling unit'' and modify the current definition of ''transient lodging.'' Under section 106.5 of the 2010 Standards, ''residential dwelling unit'' is defined as ''[a] unit intended to be used as a residence, that is primarily long-term in nature'' and does not include transient lodging, inpatient medical care, licensed long-term care, and detention or correctional facilities. Additionally, section 106.5 of the 2010 Standards changes the definition of ''transient lodging'' to a building or facility ''containing one or more guest room(s) for sleeping that provides accommodations that are primarily short-term in nature.'' ''Transient lodging'' does not include residential dwelling units intended to be used as a residence. The references to ''dwelling units'' and ''dormitories'' that are in the definition of the 1991 Standards are omitted from the 2010 Standards.

The comments about the application of transient lodging or residential standards to social service center establishments, and housing at a place of education are addressed separately below. The Department received one additional comment on this issue from an organization representing emergency response personnel seeking an exemption from the transient lodging accessibility requirements for crew quarters and common use areas serving those crew quarters (*e.g.,* locker rooms, exercise rooms, day room) that are used exclusively by on-duty emergency response personnel and that are not used for any public purpose. The commenter argued that since emergency response personnel must meet certain physical qualifications that have the effect of exempting persons with mobility disabilities, there is no need to build crew quarters and common use areas serving those crew quarters to meet the 2004 ADAAG. In addition, the commenter argued that applying the transient lodging standards would impose significant costs and create living space that is less usable for most emergency response personnel.

The ADA does not exempt spaces because of a belief or policy that excludes persons with disabilities from certain work. However, the Department believes that crew quarters that are used exclusively as a residence by emergency response personnel and the kitchens and bathrooms exclusively serving those quarters are more like residential dwelling units and are therefore covered by the residential dwelling standards in the 2010

Standards, not the transient lodging standards. The residential dwelling standards address most of the concerns of the commenter. For example, the commenter was concerned that sinks in kitchens and lavatories in bathrooms that are accessible under the transient lodging standards would be too low to be comfortably used by emergency response personnel. The residential dwelling standards allow such features to be adaptable so that they would not have to be lowered until accessibility was needed. Similarly, grab bars and shower seats would not have to be installed at the time of construction provided that reinforcement has been installed in walls and located so as to permit their installation at a later date.

Section 35.151(e) Social service center establishments

In the NPRM, the Department proposed a new §35.151(e) requiring group homes, halfway houses, shelters, or similar social service center establishments that provide temporary sleeping accommodations or residential dwelling units to comply with the provisions of the 2004 ADAAG that apply to residential facilities, including, but not limited to, the provisions in sections 233 and 809.

The NPRM explained that this proposal was based on two important changes in the 2004 ADAAG. First, for the first time, residential dwelling units are explicitly covered in the 2004 ADAAG in section 233. Second, the 2004 ADAAG eliminates the language contained in the 1991 Standards addressing scoping and technical requirements for homeless shelters, group homes, and similar social service center establishments. Currently, such establishments are covered in section 9.5 of the transient lodging section of the 1991 Standards. The deletion of section 9.5 creates an ambiguity of coverage that must be addressed.

The NPRM explained the Department's belief that transferring coverage of social service center establishments from the transient lodging standards to the residential facilities standards would alleviate conflicting requirements for social service center providers. The Department believes that a substantial percentage of social service center establishments are recipients of Federal financial assistance from the Department of Housing and Urban Development (HUD). The Department of Health and Human Services (HHS) also provides financial assistance for the operation of shelters through the Administration for Children and Families programs. As such, these establishments are covered both by the ADA and section 504 of the Rehabilitation Act. UFAS is currently the design standard for new construction and alterations for entities subject to section 504. The two design standards for accessibility—the 1991 Standards and UFAS—have confronted many social service providers with separate, and sometimes conflicting, requirements for design and construction of facilities. To resolve these conflicts, the residential facilities standards in the 2004 ADAAG have been coordinated with the section 504 requirements. The transient lodging standards, however, are not similarly coordinated. The deletion of section 9.5 of the 1991 Standards from the 2004 ADAAG presented two options: (1) Require coverage under the transient lodging standards, and subject such facilities to separate, conflicting requirements for design and construction; or (2) require coverage under the residential facilities standards, which would harmonize the regulatory requirements under the ADA and section 504. The Department chose the option that harmonizes the regulatory requirements: coverage under the residential facilities standards.

In the NPRM, the Department expressed concern that the residential facilities standards do not include a requirement for clear floor space next to beds similar to the requirement in the transient lodging standards and as a result, the Department proposed adding a provision that would require certain social service center establishments that provide sleeping rooms with more than 25 beds to ensure that a minimum of 5 percent of the beds have clear floor space in accordance with section 806.2.3 or of the 2004 ADAAG.

In the NPRM, the Department requested information from providers who operate homeless shelters, transient group homes, halfway houses, and other social service center establishments, and from the clients of these facilities who would be affected by this proposed change, asking, ''[t]o what extent have conflicts between the ADA and section 504 affected these facilities? What would be the effect of applying the residential dwelling unit requirements to these facilities, rather than the requirements for transient lodging guest rooms?'' 73 FR 34466, 34491 (June 17, 2008).

Many of the commenters supported applying the residential facilities requirements to social service center establishments, stating that even though the residential facilities requirements are less demanding in some instances, the existence of one clear standard will result in an overall increased level of accessibility by eliminating the confusion and inaction that are sometimes caused by the current existence of multiple requirements. One commenter also stated that ''it makes sense to treat social service center establishments like residential facilities because this is how these establishments function in practice.''

Two commenters agreed with applying the residential facilities requirements to social service center establishments but recommended adding a requirement for various

bathing options, such as a roll-in shower (which is not required under the residential standards).

One commenter objected to the change and asked the Department to require that social service center establishments continue to comply with the transient lodging standards. One commenter stated that it did not agree that the standards for residential coverage would serve persons with disabilities as well as the 1991 transient lodging standards. This commenter expressed concern that the Department had eliminated guidance for social service agencies and that the rule should be put on hold until those safeguards are restored. Another commenter argued that the rule that would provide the greatest access for persons with disabilities should prevail.

Several commenters argued for the application of the transient lodging standards to all social service center establishments except those that were ''intended as a person's place of abode,'' referencing the Department's question related to the definition of ''place of lodging'' in the title III NPRM. One commenter stated that the International Building Code requires accessible units in all transient facilities. The commenter expressed concern that group homes should be built to be accessible, rather than adaptable.

The Department continues to be concerned about alleviating the challenges for social service providers that are also subject to section 504 and would likely be subject to conflicting requirements if the transient lodging standards were applied. Thus, the Department has retained the requirement that social service center establishments comply with the residential dwelling standards. The Department believes, however, that social service center establishments that provide emergency shelter to large transient populations should be able to provide bathing facilities that are accessible to persons with mobility disabilities who need roll-in showers. Because of the transient nature of the population of these large shelters, it will not be feasible to modify bathing facilities in a timely manner when faced with a need to provide a roll-in shower with a seat when requested by an overnight visitor. As a result, the Department has added a requirement that social service center establishments with sleeping accommodations for more than 50 individuals must provide at least one roll-in shower with a seat that complies with the relevant provisions of section 608 of the 2010 Standards. Transfer-type showers are not permitted in lieu of a roll-in shower with a seat and the exceptions in sections 608.3 and 608.4 for residential dwelling units are not permitted. When separate shower facilities are provided for men and for women, at least one roll-in shower shall be provided for each group. This supplemental requirement to the residential facilities standards is in addition to the supplemental requirement that was proposed in the NPRM for clear floor space in sleeping rooms with more than 25 beds.

The Department also notes that while dwelling units at some social service center establishments are also subject to the Fair Housing Act (FHAct) design and construction requirements that require certain features of adaptable and accessible design, FHAct units do not provide the same level of accessibility that is required for residential facilities under the 2010 Standards. The FHAct requirements, where also applicable, should not be considered a substitute for the 2010 Standards. Rather, the 2010 Standards must be followed in addition to the FHAct requirements.

The Department also notes that whereas the NPRM used the term ''social service establishment,'' the final rule uses the term ''social service center establishment.'' The Department has made this editorial change so that the final rule is consistent with the terminology used in the ADA. *See* 42 U.S.C. 12181(7)(k).

Section 35.151(f) Housing at a place of education

The Department of Justice and the Department of Education share responsibility for regulation and enforcement of the ADA in postsecondary educational settings, including its requirements for architectural features. In addition, the Department of Housing and Urban Development (HUD) has enforcement responsibility for housing subject to title II of the ADA. Housing facilities in educational settings range from traditional residence halls and dormitories to apartment or townhouse-style residences. In addition to title II of the ADA, public universities and schools that receive Federal financial assistance are also subject to section 504, which contains its own accessibility requirements through the application of UFAS. Residential housing in an educational setting is also covered by the FHAct, which requires newly constructed multifamily housing to include certain features of accessible and adaptable design. Covered entities subject to the ADA must always be aware of, and comply with, any other Federal statutes or regulations that govern the operation of residential properties.

Although the 1991 Standards mention dormitories as a form of transient lodging, they do not specifically address how the ADA applies to dormitories or other types of residential housing provided in an educational setting. The 1991 Standards also do not contain any specific provisions for residential facilities, allowing covered entities to elect to follow the residential standards contained in UFAS. Although the 2004 ADAAG contains provisions for both residential facilities and transient lodging, the guidelines do not indicate which requirements apply to housing provided in an educational setting, leaving it

to the adopting agencies to make that choice. After evaluating both sets of standards, the Department concluded that the benefits of applying the transient lodging standards outweighed the benefits of applying the residential facilities standards. Consequently, in the NPRM, the Department proposed a new §35.151(f) that provided that residence halls or dormitories operated by or on behalf of places of education shall comply with the provisions of the proposed standards for transient lodging, including, but not limited to, the provisions in sections 224 and 806 of the 2004 ADAAG.

Both public and private school housing facilities have varied characteristics. College and university housing facilities typically provide housing for up to one academic year, but may be closed during school vacation periods. In the summer, they are often used for short-term stays of one to three days, a week, or several months. Graduate and faculty housing is often provided year-round in the form of apartments, which may serve individuals or families with children. These housing facilities are diverse in their layout. Some are double-occupancy rooms with a shared toilet and bathing room, which may be inside or outside the unit. Others may contain cluster, suite, or group arrangements where several rooms are located inside a defined unit with bathing, kitchen, and similar common facilities. In some cases, these suites are indistinguishable in features from traditional apartments. Universities may build their own housing facilities or enter into agreements with private developers to build, own, or lease housing to the educational institution or to its students. Academic housing may be located on the campus of the university or may be located in nearby neighborhoods.

Throughout the school year and the summer, academic housing can become program areas in which small groups meet, receptions and educational sessions are held, and social activities occur. The ability to move between rooms—both accessible rooms and standard rooms—in order to socialize, to study, and to use all public use and common use areas is an essential part of having access to these educational programs and activities. Academic housing is also used for short-term transient educational programs during the time students are not in regular residence and may be rented out to transient visitors in a manner similar to a hotel for special university functions.

The Department was concerned that applying the new construction requirements for residential facilities to educational housing facilities could hinder access to educational programs for students with disabilities. Elevators are not generally required under the 2004 ADAAG residential facilities standards unless they are needed to provide an accessible route from accessible units to public use and common use areas, while under the 2004 ADAAG as it applies to other types of facilities, multistory public facilities must have elevators unless they meet very specific exceptions. In addition, the residential facilities standards do not require accessible roll-in showers in bathrooms, while the transient lodging requirements require some of the accessible units to be served by bathrooms with roll-in showers. The transient lodging standards also require that a greater number of units have accessible features for persons with communication disabilities. The transient lodging standards provide for installation of the required accessible features so that they are available immediately, but the residential facilities standards allow for certain features of the unit to be adaptable. For example, only reinforcements for grab bars need to be provided in residential dwellings, but the actual grab bars must be installed under the transient lodging standards. By contrast, the residential facilities standards do require certain features that provide greater accessibility within units, such as more usable kitchens, and an accessible route throughout the dwelling. The residential facilities standards also require 5 percent of the units to be accessible to persons with mobility disabilities, which is a continuation of the same scoping that is currently required under UFAS, and is therefore applicable to any educational institution that is covered by section 504. The transient lodging standards require a lower percentage of accessible sleeping rooms for facilities with large numbers of rooms than is required by UFAS. For example, if a dormitory had 150 rooms, the transient lodging standards would require seven accessible rooms while the residential standards would require eight. In a large dormitory with 500 rooms, the transient lodging standards would require 13 accessible rooms and the residential facilities standards would require 25. There are other differences between the two sets of standards as well with respect to requirements for accessible windows, alterations, kitchens, accessible route throughout a unit, and clear floor space in bathrooms allowing for a side transfer.

In the NPRM, the Department requested public comment on how to scope educational housing facilities, asking, ''[w]ould the residential facility requirements or the transient lodging requirements in the 2004 ADAAG be more appropriate for housing at places of education? How would the different requirements affect the cost when building new dormitories and other student housing?'' 73 FR 34466, 34492 (June 17, 2008).

The vast majority of the comments received by the Department advocated using the residential facilities standards for housing at a place of education instead of the transient lodging standards, arguing that housing at places of public education are in

fact homes for the students who live in them. These commenters argued, however, that the Department should impose a requirement for a variety of options for accessible bathing and should ensure that all floors of dormitories be accessible so that students with disabilities have the same opportunities to participate in the life of the dormitory community that are provided to students without disabilities. Commenters representing persons with disabilities and several individuals argued that, although the transient lodging standards may provide a few more accessible features (such as roll-in showers), the residential facilities standards would ensure that students with disabilities have access to all rooms in their assigned unit, not just to the sleeping room, kitchenette, and wet bar. One commenter stated that, in its view, the residential facilities standards were congruent with overlapping requirements from HUD, and that access provided by the residential facilities requirements within alterations would ensure dispersion of accessible features more effectively. This commenter also argued that while the increased number of required accessible units for residential facilities as compared to transient lodging may increase the cost of construction or alteration, this cost would be offset by a reduced need to adapt rooms later if the demand for accessible rooms exceeds the supply. The commenter also encouraged the Department to impose a visitability (accessible doorways and necessary clear floor space for turning radius) requirement for both the residential facilities and transient lodging requirements to allow students with mobility impairments to interact and socialize in a fully integrated fashion.

Two commenters supported the Department's proposed approach. One commenter argued that the transient lodging requirements in the 2004 ADAAG would provide greater accessibility and increase the opportunity of students with disabilities to participate fully in campus life. A second commenter generally supported the provision of accessible dwelling units at places of education, and pointed out that the relevant scoping in the International Building Code requires accessible units ''consistent with hotel accommodations.''

The Department has considered the comments recommending the use of the residential facilities standards and acknowledges that they require certain features that are not included in the transient lodging standards and that should be required for housing provided at a place of education. In addition, the Department notes that since educational institutions often use their academic housing facilities as short-term transient lodging in the summers, it is important that accessible features be installed at the outset. It is not realistic to expect that the educational institution will be able to adapt a unit in a timely manner in order to provide accessible accommodations to someone attending a one-week program during the summer.

The Department has determined that the best approach to this type of housing is to continue to require the application of transient lodging standards, but at the same time to add several requirements drawn from the residential facilities standards related to accessible turning spaces and work surfaces in kitchens, and the accessible route throughout the unit. This will ensure the maintenance of the transient lodging standard requirements related to access to all floors of the facility, roll-in showers in facilities with more than 50 sleeping rooms, and other important accessibility features not found in the residential facilities standards, but will also ensure usable kitchens and access to all the rooms in a suite or apartment.

The Department has added a new definition to §35.104, ''Housing at a Place of Education,'' and has revised §35.151(f) to reflect the accessible features that now will be required in addition to the requirements set forth under the transient lodging standards. The Department also recognizes that some educational institutions provide some residential housing on a year-round basis to graduate students and staff which is comparable to private rental housing, and which contains no facilities for educational programming. Section 35.151(f)(3) exempts from the transient lodging standards apartments or townhouse facilities provided by or on behalf of a place of education that are leased on a year-round basis exclusively to graduate students or faculty, and do not contain any public use or common use areas available for educational programming; instead, such housing shall comply with the requirements for residential facilities in sections 233 and 809 of the 2010 Standards.

Section 35.151(f) uses the term ''sleeping room'' in lieu of the term ''guest room,'' which is the term used in the transient lodging standards. The Department is using this term because it believes that, for the most part, it provides a better description of the sleeping facilities used in a place of education than ''guest room.'' The final rule states that the Department intends the terms to be used interchangeably in the application of the transient lodging standards to housing at a place of education.

Section 35.151(g) Assembly areas

In the NPRM, the Department proposed §35.151(g) to supplement the assembly area requirements of the 2004 ADAAG, which the Department is adopting as part of the 2010 Standards. The NPRM proposed at §35.151(g)(1) to require wheelchair spaces and companion seating locations to be dispersed to all levels of the facility and are served by

an accessible route. The Department received no significant comments on this paragraph and has decided to adopt the proposed language with minor modifications. The Department has retained the substance of this section in the final rule but has clarified that the requirement applies to stadiums, arenas, and grandstands. In addition, the Department has revised the phrase ''wheelchair and companion seating locations'' to ''wheelchair spaces and companion seats.''

Section 35.151(g)(1) ensures that there is greater dispersion of wheelchair spaces and companion seats throughout stadiums, arenas, and grandstands than would otherwise be required by sections 221 and 802 of the 2004 ADAAG. In some cases, the accessible route may not be the same route that other individuals use to reach their seats. For example, if other patrons reach their seats on the field by an inaccessible route (*e.g.*, by stairs), but there is an accessible route that complies with section 206.3 of the 2010 Standards that could be connected to seats on the field, wheelchair spaces and companion seats must be placed on the field even if that route is not generally available to the public.

Regulatory language that was included in the 2004 ADAAG advisory, but that did not appear in the NPRM, has been added by the Department in §35.151(g)(2). Section 35.151(g)(2) now requires an assembly area that has seating encircling, in whole or in part, a field of play or performance area such as an arena or stadium, to place wheelchair spaces and companion seats around the entire facility. This rule, which is designed to prevent a public entity from placing wheelchair spaces and companion seats on one side of the facility only, is consistent with the Department's enforcement practices and reflects its interpretation of section 4.33.3 of the 1991 Standards.

In the NPRM, the Department proposed §35.151(g)(2) which prohibits wheelchair spaces and companion seating locations from being ''located on, (or obstructed by) temporary platforms or other moveable structures.'' Through its enforcement actions, the Department discovered that some venues place wheelchair spaces and companion seats on temporary platforms that, when removed, reveal conventional seating underneath, or cover the wheelchair spaces and companion seats with temporary platforms on top of which they place risers of conventional seating. These platforms cover groups of conventional seats and are used to provide groups of wheelchair seats and companion seats.

Several commenters requested an exception to the prohibition of the use of temporary platforms for public entities that sell most of their tickets on a season-ticket or other multi-event basis. Such commenters argued that they should be able to use temporary platforms because they know, in advance, that the patrons sitting in certain areas for the whole season do not need wheelchair spaces and companion seats. The Department declines to adopt such an exception. As it explained in detail in the NPRM, the Department believes that permitting the use of movable platforms that seat four or more wheelchair users and their companions have the potential to reduce the number of available wheelchair seating spaces below the level required, thus reducing the opportunities for persons who need accessible seating to have the same choice of ticket prices and amenities that are available to other patrons in the facility. In addition, use of removable platforms may result in instances where last minute requests for wheelchair and companion seating cannot be met because entire sections of accessible seating will be lost when a platform is removed. *See* 73 FR 34466, 34493 (June 17, 2008). Further, use of temporary platforms allows facilities to limit persons who need accessible seating to certain seating areas, and to relegate accessible seating to less desirable locations. The use of temporary platforms has the effect of neutralizing dispersion and other seating requirements (*e.g.*, line of sight) for wheelchair spaces and companion seats. *Cf. Independent Living Resources* v. *Oregon Arena Corp.*, 1 F. Supp. 2d 1159, 1171 (D. Or. 1998) (holding that while a public accommodation may ''infill'' wheelchair spaces with removable seats when the wheelchair spaces are not needed to accommodate individuals with disabilities, under certain circumstances ''[s]uch a practice might well violate the rule that wheelchair spaces must be dispersed throughout the arena in a manner that is roughly proportionate to the overall distribution of seating''). In addition, using temporary platforms to convert unsold wheelchair spaces to conventional seating undermines the flexibility facilities need to accommodate secondary ticket markets exchanges as required by §35.138(g) of the final rule.

As the Department explained in the NPRM, however, this provision was not designed to prohibit temporary seating that increases seating for events (*e.g.*, placing temporary seating on the floor of a basketball court for a concert). Consequently, the final rule, at §35.151(g)(3), has been amended to clarify that if an entire seating section is on a temporary platform for a particular event, then wheelchair spaces and companion seats may be in that seating section. However, adding a temporary platform to create wheelchair spaces and companion seats that are otherwise dissimilar from nearby fixed seating and then simply adding a small number of additional seats to the platform would not qualify as an ''entire seating section'' on the platform. In addition, §35.151(g)(3) clarifies that facilities may fill in wheelchair

spaces with removable seats when the wheelchair spaces are not needed by persons who use wheelchairs.

The Department has been responsive to assembly areas' concerns about reduced revenues due to unused accessible seating. Accordingly, the Department has reduced scoping requirements significantly—by almost half in large assembly areas—and determined that allowing assembly areas to infill unsold wheelchair spaces with readily removable temporary individual seats appropriately balances their economic concerns with the rights of individuals with disabilities. *See* section 221.2 of the 2010 Standards.

For stadium-style movie theaters, in §35.151(g)(4) of the NPRM the Department proposed requiring placement of wheelchair seating spaces and companion seats on a riser or cross-aisle in the stadium section of the theater and placement of such seating so that it satisfies at least one of the following criteria: (1) It is located within the rear 60 percent of the seats provided in the auditorium; or (2) it is located within the area of the auditorium where the vertical viewing angles are between the 40th to 100th percentile of vertical viewing angles for all seats in that theater as ranked from the first row (1st percentile) to the back row (100th percentile). The vertical viewing angle is the angle between a horizontal line perpendicular to the seated viewer's eye to the screen and a line from the seated viewer's eye to the top of the screen.

The Department proposed this bright-line rule for two reasons: (1) The movie theater industry petitioned for such a rule; and (2) the Department has acquired expertise on the design of stadium style theaters from litigation against several major movie theater chains. *See U.S.* v. *AMC Entertainment,* 232 F. Supp. 2d 1092 (C.D. Ca. 2002), *rev'd in part,* 549 F. 3d 760 (9th Cir. 2008); *U.S.* v. *Cinemark USA, Inc.,* 348 F. 3d 569 (6th Cir. 2003), *cert. denied,* 542 U.S. 937 (2004). Two industry commenters—at least one of whom otherwise supported this rule—requested that the Department explicitly state that this rule does not apply retroactively to existing theaters. Although this rule on its face applies to new construction and alterations, these commenters were concerned that the rule could be interpreted to apply retroactively because of the Department's statement in the ANPRM that this bright-line rule, although newly-articulated, does not represent a ''substantive change from the existing line-of-sight requirements'' of section 4.33.3 of the 1991 Standards. *See* 69 FR 58768, 58776 (Sept. 30, 2004).

Although the Department intends for §35.151(g)(4) of this rule to apply prospectively to new construction and alterations, this rule is not a departure from, and is consistent with, the line-of-sight requirements in the 1991 Standards. The Department has always interpreted the line-of-sight requirements in the 1991 Standards to require viewing angles provided to patrons who use wheelchairs to be comparable to those afforded to other spectators. Section 35.151(g)(4) merely represents the application of these requirements to stadium-style movie theaters.

One commenter from a trade association sought clarification whether §35.151(g)(4) applies to stadium-style theaters with more than 300 seats, and argued that it should not since dispersion requirements apply in those theaters. The Department declines to limit this rule to stadium-style theaters with 300 or fewer seats; stadium-style theaters of all sizes must comply with this rule. So, for example, stadium-style theaters that must vertically disperse wheelchair and companion seats must do so within the parameters of this rule.

The NPRM included a provision that required assembly areas with more than 5,000 seats to provide at least five wheelchair spaces with at least three companion seats for each of those five wheelchair spaces. The Department agrees with commenters who asserted that group seating is better addressed through ticketing policies rather than design and has deleted that provision from this section of the final rule.

Section 35.151(h) Medical care facilities

In the 1991 title II regulation, there was no provision addressing the dispersion of accessible sleeping rooms in medical care facilities. The Department is aware, however, of problems that individuals with disabilities face in receiving full and equal medical care when accessible sleeping rooms are not adequately dispersed. When accessible rooms are not fully dispersed, a person with a disability is often placed in an accessible room in an area that is not medically appropriate for his or her condition, and is thus denied quick access to staff with expertise in that medical specialty and specialized equipment. While the Access Board did not establish specific design requirements for dispersion in the 2004 ADAAG, in response to extensive comments in support of dispersion it added an advisory note, Advisory 223.1 General, encouraging dispersion of accessible rooms within the facility so that accessible rooms are more likely to be proximate to appropriate qualified staff and resources.

In the NPRM, the Department sought additional comment on the issue, asking whether it should require medical care facilities, such as hospitals, to disperse their accessible sleeping rooms, and if so, by what method (by specialty area, floor, or other criteria). All of the comments the Department received on this issue supported dispersing accessible sleeping rooms proportionally by specialty area. These comments, from individuals, organizations, and a building code

association, argued that it would not be difficult for hospitals to disperse rooms by specialty area, given the high level of regulation to which hospitals are subject and the planning that hospitals do based on utilization trends. Further, commenters suggested that without a requirement, it is unlikely that hospitals would disperse the rooms. In addition, concentrating accessible rooms in one area perpetuates segregation of individuals with disabilities, which is counter to the purpose of the ADA.

The Department has decided to require medical care facilities to disperse their accessible sleeping rooms in a manner that is proportionate by type of medical specialty. This does not require exact mathematical proportionality, which at times would be impossible. However, it does require that medical care facilities disperse their accessible rooms by medical specialty so that persons with disabilities can, to the extent practical, stay in an accessible room within the wing or ward that is appropriate for their medical needs. The language used in this rule (''in a manner that is proportionate by type of medical specialty'') is more specific than that used in the NPRM (''in a manner that enables patients with disabilities to have access to appropriate specialty services'') and adopts the concept of proportionality proposed by the commenters. Accessible rooms should be dispersed throughout all medical specialties, such as obstetrics, orthopedics, pediatrics, and cardiac care.

Section 35.151(i) Curb ramps

Section 35.151(e) on curb ramps in the 1991 rule has been redesignated as §35.151(i). In the NPRM, the Department proposed making a minor editorial change to this section, deleting the phrase ''other sloped areas'' from the two places in which it appears in the 1991 title II regulation. In the NPRM, the Department stated that the phrase ''other sloped areas'' lacks technical precision. The Department received no significant public comments on this proposal. Upon further consideration, however, the Department has concluded that the regulation should acknowledge that there are times when there are transitions from sidewalk to road surface that do not technically qualify as ''curb ramps'' (sloped surfaces that have a running slope that exceed 5 percent). Therefore, the Department has decided not to delete the phrase ''other sloped areas.''

Section 35.151(j) Residential housing for sale to individual owners

Although public entities that operate residential housing programs are subject to title II of the ADA, and therefore must provide accessible residential housing, the 1991 Standards did not contain scoping or technical standards that specifically applied to residential housing units. As a result, under the Department's title II regulation, these agencies had the choice of complying with UFAS, which contains specific scoping and technical standards for residential housing units, or applying the ADAAG transient lodging standards to their housing. Neither UFAS nor the 1991 Standards distinguish between residential housing provided for rent and those provided for sale to individual owners. Thus, under the 1991 title II regulation, public entities that construct residential housing units to be sold to individual owners must ensure that some of those units are accessible. This requirement is in addition to any accessibility requirements imposed on housing programs operated by public entities that receive Federal financial assistance from Federal agencies such as HUD.

The 2010 Standards contain scoping and technical standards for residential dwelling units. However, section 233.3.2 of the 2010 Standards specifically defers to the Department and to HUD, the standard-setting agency under the ABA, to decide the appropriate scoping for those residential dwelling units built by or on behalf of public entities with the intent that the finished units will be sold to individual owners. These programs include, for example, HUD's public housing and HOME programs as well as State-funded programs to construct units for sale to individuals. In the NPRM, the Department did not make a specific proposal for this scoping. Instead, the Department stated that after consultation and coordination with HUD, the Department would make a determination in the final rule. The Department also sought public comment on this issue stating that ''[t]he Department would welcome recommendations from individuals with disabilities, public housing authorities, and other interested parties that have experience with these programs. Please comment on the appropriate scoping for residential dwelling units built by or on behalf of public entities with the intent that the finished units will be sold to individual owners.'' 73 FR 34466, 34492 (June 17, 2008).

All of the public comments received by the Department in response to this question were supportive of the Department's ensuring that the residential standards apply to housing built on behalf of public entities with the intent that the finished units would be sold to individual owners. The vast majority of commenters recommended that the Department require that projects consisting of five or more units, whether or not the units are located on one or multiple locations, comply with the 2004 ADAAG requirements for scoping of residential units, which require that 5 percent, and no fewer than one, of the dwelling units provide mobility features, and that 2 percent, and no fewer

than one, of the dwelling units provide communication features. *See* 2004 ADAAG Section 233.3. These commenters argued that the Department should not defer to HUD because HUD has not yet adopted the 2004 ADAAG and there is ambiguity on the scope of coverage of pre-built for sale units under HUD's current section 504 regulations. In addition, these commenters expressed concern that HUD's current regulation, 24 CFR 8.29, presumes that a prospective buyer is identified before design and construction begins so that disability features can be incorporated prior to construction. These commenters stated that State and Federally funded homeownership programs typically do not identify prospective buyers before construction has commenced. One commenter stated that, in its experience, when public entities build accessible for-sale units, they often sell these units through a lottery system that does not make any effort to match persons who need the accessible features with the units that have those features. Thus, accessible units are often sold to persons without disabilities. This commenter encouraged the Department to make sure that accessible for-sale units built or funded by public entities are placed in a separate lottery restricted to income-eligible persons with disabilities.

Two commenters recommended that the Department develop rules for four types of for-sale projects: single family pre-built (where buyer selects the unit after construction), single family post-built (where the buyer chooses the model prior to its construction), multi-family pre-built, and multi-family post-built. These commenters recommended that the Department require pre-built units to comply with the 2004 ADAAG 233.1 scoping requirements. For post-built units, the commenters recommended that the Department require all models to have an alternate design with mobility features and an alternate design with communications features in compliance with 2004 ADAAG. Accessible models should be available at no extra cost to the buyer. One commenter recommended that, in addition to required fully accessible units, all ground floor units should be readily convertible for accessibility or for sensory impairments technology enhancements.

The Department believes that consistent with existing requirements under title II, housing programs operated by public entities that design and construct or alter residential units for sale to individual owners should comply with the 2010 Standards, including the requirements for residential facilities in sections 233 and 809. These requirements will ensure that a minimum of 5 percent of the units, but no fewer than one unit, of the total number of residential dwelling units will be designed and constructed to be accessible for persons with mobility disabilities. At least 2 percent, but no fewer than one unit, of the total number of residential dwelling units shall provide communication features.

The Department recognizes that there are some programs (such as the one identified by the commenter), in which units are not designed and constructed until an individual buyer is identified. In such cases, the public entity is still obligated to comply with the 2010 Standards. In addition, the public entity must ensure that pre-identified buyers with mobility disabilities and visual and hearing disabilities are afforded the opportunity to buy the accessible units. Once the program has identified buyers who need the number of accessible units mandated by the 2010 Standards, it may have to make reasonable modifications to its policies, practices, and procedures in order to provide accessible units to other buyers with disabilities who request such units.

The Department notes that the residential facilities standards allow for construction of units with certain features of adaptability. Public entities that are concerned that fully accessible units are less marketable may choose to build these units to include the allowable adaptable features, and then adapt them at their own expense for buyers with mobility disabilities who need accessible units. For example, features such as grab bars are not required but may be added by the public entity if needed by the buyer at the time of purchase and cabinets under sinks may be designed to be removable to allow access to the required knee space for a forward approach.

The Department agrees with the commenters that covered entities may have to make reasonable modifications to their policies, practices, and procedures in order to ensure that when they offer pre-built accessible residential units for sale, the units are offered in a manner that gives access to those units to persons with disabilities who need the features of the units and who are otherwise eligible for the housing program. This may be accomplished, for example, by adopting preferences for accessible units for persons who need the features of the units, holding separate lotteries for accessible units, or other suitable methods that result in the sale of accessible units to persons who need the features of such units. In addition, the Department believes that units designed and constructed or altered that comply with the requirements for residential facilities and are offered for sale to individuals must be provided at the same price as units without such features.

Section 35.151(k) Detention and correctional facilities

The 1991 Standards did not contain specific accessibility standards applicable to cells in correctional facilities. However, correctional

and detention facilities operated by or on behalf of public entities have always been subject to the nondiscrimination and program accessibility requirements of title II of the ADA. The 2004 ADAAG established specific requirements for the design and construction and alterations of cells in correctional facilities for the first time.

Based on complaints received by the Department, investigations, and compliance reviews of jails, prisons, and other detention and correctional facilities, the Department has determined that many detention and correctional facilities do not have enough accessible cells, toilets, and shower facilities to meet the needs of their inmates with mobility disabilities and some do not have any at all. Inmates are sometimes housed in medical units or infirmaries separate from the general population simply because there are no accessible cells. In addition, some inmates have alleged that they are housed at a more restrictive classification level simply because no accessible housing exists at the appropriate classification level. The Department's compliance reviews and investigations have substantiated certain of these allegations.

The Department believes that the insufficient number of accessible cells is, in part, due to the fact that most jails and prisons were built long before the ADA became law and, since then, have undergone few alterations that would trigger the obligation to provide accessible features in accordance with UFAS or the 1991 Standards. In addition, the Department has found that even some new correctional facilities lack accessible features. The Department believes that the unmet demand for accessible cells is also due to the changing demographics of the inmate population. With thousands of prisoners serving life sentences without eligibility for parole, prisoners are aging, and the prison population of individuals with disabilities and elderly individuals is growing. A Bureau of Justice Statistics study of State and Federal sentenced inmates (those sentenced to more than one year) shows the total estimated count of State and Federal prisoners aged 55 and older grew by 36,000 inmates from 2000 (44,200) to 2006 (80,200). William J. Sabol *et al., Prisoners in 2006*, Bureau of Justice Statistics Bulletin, Dec. 2007, at 23 (app. table 7), available at *http://bjs.ojp.usdoj.gov/index.cfm?ty=pbdetail&iid=908* (last visited July 16, 2008); Allen J. Beck et al., *Prisoners in 2000*, Bureau of Justice Statistics Bulletin, Aug. 2001, at 10 (Aug. 2001) (Table 14), available at *bjs.ojp.usdoj.gov/index.cfm?ty=pbdetail&iid=927* (last visited July 16, 2008). This jump constitutes an increase of 81 percent in prisoners aged 55 and older during this period.

In the NPRM, the Department proposed a new section, §35.152, which combined a range of provisions relating to both program accessibility and application of the proposed standards to detention and correctional facilities. In the final rule, the Department is placing those provisions that refer to design, construction, and alteration of detention and correction facilities in a new paragraph (k) of §35.151, the section of the rule that addresses new construction and alterations for covered entities. Those portions of the final rule that address other issues, such as placement policies and program accessibility, are placed in the new §35.152.

In the NPRM, the Department also sought input on how best to meet the needs of inmates with mobility disabilities in the design, construction, and alteration of detention and correctional facilities. The Department received a number of comments in response to this question.

New Construction. The NPRM did not expressly propose that new construction of correctional and detention facilities shall comply with the proposed standards because the Department assumed it would be clear that the requirements of §35.151 would apply to new construction of correctional and detention facilities in the same manner that they apply to other facilities constructed by covered entities. The Department has decided to create a new section, §35.151(k)(1), which clarifies that new construction of jails, prisons, and other detention facilities shall comply with the requirements of 2010 Standards. Section 35.151(k)(1) also increases the scoping for accessible cells from the 2 percent specified in the 2004 ADAAG to 3 percent.

Alterations. Although the 2010 Standards contain specifications for alterations in existing detention and correctional facilities, section 232.2 defers to the Attorney General the decision as to the extent these requirements will apply to alterations of cells. The NPRM proposed at §35.152(c) that ''[a]lterations to jails, prisons, and other detention and correctional facilities will comply with the requirements of §35.151(b).'' 73 FR 34466, 34507 (June 17, 2008). The final rule retains that requirement at §35.151(k)(2), but increases the scoping for accessible cells from the 2 percent specified in the 2004 ADAAG to 3 percent.

Substitute cells. In the ANPRM, the Department sought public comment about the most effective means to ensure that existing correctional facilities are made accessible to prisoners with disabilities and presented three options: (1) Require all altered elements to be accessible, which would maintain the current policy that applies to other ADA alteration requirements; (2) permit substitute cells to be made accessible within the same facility, which would permit correctional authorities to meet their obligation by providing the required accessible features in cells within the same facility, other than those specific cells in which alterations are

planned; or (3) permit substitute cells to be made accessible within a prison system, which would focus on ensuring that prisoners with disabilities are housed in facilities that best meet their needs, as alterations within a prison environment often result in piecemeal accessibility.

In §35.152(c) of the NPRM, the Department proposed language based on Option 2, providing that when cells are altered, a covered entity may satisfy its obligation to provide the required number of cells with mobility features by providing the required mobility features in substitute cells (i.e., cells other than those where alterations are originally planned), provided that each substitute cell is located within the same facility, is integrated with other cells to the maximum extent feasible, and has, at a minimum, physical access equal to that of the original cells to areas used by inmates or detainees for visitation, dining, recreation, educational programs, medical services, work programs, religious services, and participation in other programs that the facility offers to inmates or detainees.

The Department received few comments on this proposal. The majority who chose to comment supported an approach that allowed substitute cells to be made accessible within the same facility. In their view, such an approach balanced administrators' needs, cost considerations, and the needs of inmates with disabilities. One commenter noted, however, that with older facilities, required modifications may be inordinately costly and technically infeasible. A large county jail system supported the proposed approach as the most viable option allowing modification or alteration of existing cells based on need and providing a flexible approach to provide program and mobility accessibility. It noted, as an alternative, that permitting substitute cells to be made accessible within a prison system would also be a viable option since such an approach could create a centralized location for accessibility needs and, because that jail system's facilities were in close proximity, it would have little impact on families for visitation or on accessible programming.

A large State department of corrections objected to the Department's proposal. The commenter stated that some very old prison buildings have thick walls of concrete and reinforced steel that are difficult, if not impossible to retrofit, and to do so would be very expensive. This State system approaches accessibility by looking at its system as a whole and providing access to programs for inmates with disabilities at selected prisons. This commenter explained that not all of its facilities offer the same programs or the same levels of medical or mental health services. An inmate, for example, who needs education, substance abuse treatment, and sex offender counseling may be transferred between facilities in order to meet his needs. The inmate population is always in flux and there are not always beds or program availability for every inmate at his security level. This commenter stated that the Department's proposed language would put the State in the position of choosing between adding accessible cells and modifying paths of travel to programs and services at great expense or not altering old facilities, causing them to become in states of disrepair and obsolescent, which would be fiscally irresponsible.

The Department is persuaded by these comments and has modified the alterations requirement in §35.151(k)(2)(iv) in the final rule to allow that if it is technically infeasible to provide substitute cells in the same facility, cells can be provided elsewhere within the corrections system.

Number of accessible cells. Section 232.2.1 of the 2004 ADAAG requires at least 2 percent, but no fewer than one, of the cells in newly constructed detention and correctional facilities to have accessibility features for individuals with mobility disabilities. Section 232.3 provides that, where special holding cells or special housing cells are provided, at least one cell serving each purpose shall have mobility features. The Department sought input on whether these 2004 ADAAG requirements are sufficient to meet the needs of inmates with mobility disabilities. A major association representing county jails throughout the country stated that the 2004 ADAAG 2 percent requirement for accessible cells is sufficient to meet the needs of county jails. Similarly, a large county sheriff's department advised that the 2 percent requirement far exceeds the need at its detention facility, where the average age of the population is 32. This commenter stressed that the regulations need to address the differences between a local detention facility with low average lengths of stay as opposed to a State prison housing inmates for lengthy periods. This commenter asserted that more stringent requirements will raise construction costs by requiring modifications that are not needed. If more stringent requirements are adopted, the commenter suggested that they apply only to State and Federal prisons that house prisoners sentenced to long terms. The Department notes that a prisoner with a mobility disability needs a cell with mobility features regardless of the length of incarceration. However, the length of incarceration is most relevant in addressing the needs of an aging population.

The overwhelming majority of commenters responded that the 2 percent ADAAG requirement is inadequate to meet the needs of the incarcerated. Many commenters suggested that the requirement be expanded to apply to each area, type, use, and class of

cells in a facility. They asserted that if a facility has separate areas for specific programs, such as a dog training program or a substance abuse unit, each of these areas should also have 2 percent accessible cells but not less than one. These same commenters suggested that 5–7 percent of cells should be accessible to meet the needs of both an aging population and the larger number of inmates with mobility disabilities. One organization recommended that the requirement be increased to 5 percent overall, and that at least 2 percent of each type and use of cell be accessible. Another commenter recommended that 10 percent of cells be accessible. An organization with extensive corrections experience noted that the integration mandate requires a sufficient number and distribution of accessible cells so as to provide distribution of locations relevant to programs to ensure that persons with disabilities have access to the programs.

Through its investigations and compliance reviews, the Department has found that in most detention and correctional facilities, a 2 percent accessible cell requirement is inadequate to meet the needs of the inmate population with disabilities. That finding is supported by the majority of the commenters that recommended a 5–7 percent requirement. Indeed, the Department itself requires more than 2 percent of the cells to be accessible at its own corrections facilities. The Federal Bureau of Prisons is subject to the requirements of the 2004 ADAAG through the General Services Administration's adoption of the 2004 ADAAG as the enforceable accessibility standard for Federal facilities under the Architectural Barriers Act of 1968. 70 FR 67786, 67846–47 (Nov. 8, 2005). However, in order to meet the needs of inmates with mobility disabilities, the Bureau of Prisons has elected to increase that percentage and require that 3 percent of inmate housing at its facilities be accessible. Bureau of Prisons, Design Construction Branch, Design Guidelines, Attachment A: Accessibility Guidelines for Design, Construction, and Alteration of Federal Bureau of Prisons (Oct. 31, 2006).

The Department believes that a 3 percent accessible requirement is reasonable. Moreover, it does not believe it should impose a higher percentage on detention and corrections facilities than it utilizes for its own facilities. Thus, the Department has adopted a 3 percent requirement in §35.151(k) for both new construction and alterations. The Department notes that the 3 percent requirement is a minimum. As corrections systems plan for new facilities or alterations, the Department urges planners to include numbers of inmates with disabilities in their population projections in order to take the necessary steps to provide a sufficient number of accessible cells to meet inmate needs.

Dispersion of Cells. The NPRM did not contain express language addressing dispersion of cells in a facility. However, Advisory 232.2 of the 2004 ADAAG recommends that ''[a]ccessible cells or rooms should be dispersed among different levels of security, housing categories, and holding classifications (*e.g.,* male/female and adult/juvenile) to facilitate access.'' In explaining the basis for recommending, but not requiring, this type of dispersal, the Access Board stated that ''[m]any detention and correctional facilities are designed so that certain areas (*e.g.,* 'shift' areas) can be adapted to serve as different types of housing according to need'' and that ''[p]lacement of accessible cells or rooms in shift areas may allow additional flexibility in meeting requirements for dispersion of accessible cells or rooms.''

The Department notes that inmates are typically housed in separate areas of detention and correctional facilities based on a number of factors, including their classification level. In many instances, detention and correctional facilities have housed inmates in inaccessible cells, even though accessible cells were available elsewhere in the facility, because there were no cells in the areas where they needed to be housed, such as in administrative or disciplinary segregation, the women's section of the facility, or in a particular security classification area.

The Department received a number of comments stating that dispersal of accessible cells together with an adequate number of accessible cells is necessary to prevent inmates with disabilities from placement in improper security classification and to ensure integration. Commenters recommended modification of the scoping requirements to require a percentage of accessible cells in each program, classification, use or service area. The Department is persuaded by these comments. Accordingly, §35.151(k)(1) and (k)(2) of the final rule require accessible cells in each classification area.

Medical facilities. The NPRM also did not propose language addressing the application of the 2004 ADAAG to medical and long-term care facilities in correctional and detention facilities. The provisions of the 2004 ADAAG contain requirements for licensed medical and long-term care facilities, but not those that are unlicensed. A disability advocacy group and a number of other commenters recommended that the Department expand the application of section 232.4 to apply to all such facilities in detention and correctional facilities, regardless of licensure. They recommended that whenever a correctional facility has a program that is addressed specifically in the 2004 ADAAG, such as a long-term care facility, the 2004 ADAAG scoping and design features should apply for those elements. Similarly, a building code organization noted that its percentage requirements for accessible units is based on

what occurs in the space, not on the building type.

The Department is persuaded by these comments and has added §35.151(k)(3), which states that ''[w]ith respect to medical and long-term care facilities in jails, prisons, and other detention and correctional facilities, public entities shall apply the 2010 Standards technical and scoping requirements for those facilities irrespective of whether those facilities are licensed.''

Section 35.152 Detention and correctional facilities—program requirements

As noted in the discussion of §35.151(k), the Department has determined that inmates with mobility and other disabilities in detention and correctional facilities do not have equal access to prison services. The Department's concerns are based not only on complaints it has received, but the Department's substantial experience in investigations and compliance reviews of jails, prisons, and other detention and correctional facilities. Based on that review, the Department has found that many detention and correctional facilities have too few or no accessible cells, toilets, and shower facilities to meet the needs of their inmates with mobility disabilities. These findings, coupled with statistics regarding the current percentage of inmates with mobility disabilities and the changing demographics of the inmate population reflecting thousands of prisoners serving life sentences and increasingly large numbers of aging inmates who are not eligible for parole, led the Department to conclude that a new regulation was necessary to address these concerns.

In the NPRM, the Department proposed a new section, §35.152, which combined a range of provisions relating to both program accessibility and application of the proposed standards to detention and correctional facilities. As mentioned above, in the final rule, the Department is placing those provisions that refer to design, construction, and alteration of detention and correction facilities in new paragraph (k) in §35.151 dealing with new construction and alterations for covered entities. Those portions of the final rule that address other program requirements remain in §35.152.

The Department received many comments in response to the program accessibility requirements in proposed §35.152. These comments are addressed below.

Facilities operated through contractual, licensing, or other arrangements with other public entities or private entities. The Department is aware that some public entities are confused about the applicability of the title II requirements to correctional facilities built or run by other public entities or private entities. It has consistently been the Department's position that title II requirements apply to correctional facilities used by State or local government entities, irrespective of whether the public entity contracts with another public or private entity to build or run the correctional facility. The power to incarcerate citizens rests with the State or local government, not a private entity. As the Department stated in the preamble to the original title II regulation, ''[a]ll governmental activities of public entities are covered, even if they are carried out by contractors.'' 28 CFR part 35, app. A at 558 (2009). If a prison is occupied by State prisoners and is inaccessible, the State is responsible under title II of the ADA. The same is true for a county or city jail. In essence, the private builder or contractor that operates the correctional facility does so at the direction of the government entity. Moreover, even if the State enters into a contractual, licensing, or other arrangement for correctional services with a public entity that has its own title II obligations, the State is still responsible for ensuring that the other public entity complies with title II in providing these services.

Also, through its experience in investigations and compliance reviews, the Department has noted that public entities contract for a number of services to be run by private or other public entities, for example, medical and mental health services, food services, laundry, prison industries, vocational programs, and drug treatment and substance abuse programs, all of which must be operated in accordance with title II requirements.

Proposed §35.152(a) in the NPRM was designed to make it clear that title II applies to all State and local detention and correctional facilities, regardless of whether the detention or correctional facility is directly operated by the public entity or operated by a private entity through a contractual, licensing, or other arrangement. Commenters specifically supported the language of this section. One commenter cited Department of Justice statistics stating that of the approximately 1.6 million inmates in State and Federal facilities in December 2006, approximately 114,000 of these inmates were held in private prison facilities. *See* William J. Sabol *et al.*, *Prisoners in 2006*, Bureau of Justice Statistics Bulletin, Dec. 2007, at 1, 4, available at *http://bjs.ojp.usdoj.gov/index.cfm?ty=pbdetail&iid=908*. Some commenters wanted the text ''through contracts or other arrangements'' changed to read ''through contracts or any other arrangements'' to make the intent clear. However, a large number of commenters recommended that the text of the rule make explicit that it applies to correctional facilities operated by private contractors. Many commenters also suggested that the text make clear that the rule applies to adult facilities, juvenile

justice facilities, and community correctional facilities. In the final rule, the Department is adopting these latter two suggestions in order to make the section's intent explicit.

Section 35.152(a) of the final rule states specifically that the requirements of the section apply to public entities responsible for the operation or management of correctional facilities, ''either directly or through contractual, licensing, or other arrangements with public or private entities, in whole or in part, including private correctional facilities.'' Additionally, the section explicitly provides that it applies to adult and juvenile justice detention and correctional facilities and community correctional facilities.

Discrimination prohibited. In the NPRM, §35.152(b)(1) proposed language stating that public entities are prohibited from excluding qualified detainees and inmates from participation in, or denying, benefits, services, programs, or activities because a facility is inaccessible to persons with disabilities ''unless the public entity can demonstrate that the required actions would result in a fundamental alteration or undue burden.'' 73 FR 34446, 34507 (June 17, 2008). One large State department of corrections objected to the entire section applicable to detention and correctional facilities, stating that it sets a higher standard for correctional and detention facilities because it does not provide a defense for undue administrative burden. The Department has not retained the proposed NPRM language referring to the defenses of fundamental alteration or undue burden because the Department believes that these exceptions are covered by the general language of 35.150(a)(3), which states that a public entity is not required to take ''any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity, or in undue financial and administrative burdens.'' The Department has revised the language of §35.152(b)(1) accordingly.

Integration of inmates and detainees with disabilities. In the NPRM, the Department proposed language in §35.152(b)(2) specifically applying the ADA's general integration mandate to detention and correctional facilities. The proposed language would have required public entities to ensure that individuals with disabilities are housed in the most integrated setting appropriate to the needs of the individual. It further stated that unless the public entity can demonstrate that it is appropriate to make an exception for a specific individual, a public entity:

(1) Should not place inmates or detainees with disabilities in locations that exceed their security classification because there are no accessible cells or beds in the appropriate classification;

(2) should not place inmates or detainees with disabilities in designated medical areas unless they are actually receiving medical care or treatment;

(3) should not place inmates or detainees with disabilities in facilities that do not offer the same programs as the facilities where they would ordinarily be housed; and

(4) should not place inmates or detainees with disabilities in facilities farther away from their families in order to provide accessible cells or beds, thus diminishing their opportunity for visitation based on their disability. 73 FR 34466, 34507 (June 17, 2008).

In the NPRM, the Department recognized that there are a wide range of considerations that affect decisions to house inmates or detainees and that in specific cases there may be compelling reasons why a placement that does not meet the general requirements of §35.152(b)(2) may, nevertheless, comply with the ADA. However, the Department noted that it is essential that the planning process initially assume that inmates or detainees with disabilities will be assigned within the system under the same criteria that would be applied to inmates who do not have disabilities. Exceptions may be made on a case-by-case basis if the specific situation warrants different treatment. For example, if an inmate is deaf and communicates only using sign language, a prison may consider whether it is more appropriate to give priority to housing the prisoner in a facility close to his family that houses no other deaf inmates, or if it would be preferable to house the prisoner in a setting where there are sign language interpreters and other sign language users with whom he can communicate.

In general, commenters strongly supported the NPRM's clarification that the title II integration mandate applies to State and local corrections agencies and the facilities in which they house inmates. Commenters pointed out that inmates with disabilities continue to be segregated based on their disabilities and also excluded from participation in programs. An organization actively involved in addressing the needs of prisoners cited a number of recent lawsuits in which prisoners allege such discrimination.

The majority of commenters objected to the language in proposed §35.152(b)(2) that creates an exception to the integration mandate when the ''public entity can demonstrate that it is appropriate to make an exception for a specific individual.'' 73 FR 34466, 34507 (June 17, 2008). The vast majority of commenters asserted that, given the practice of many public entities to segregate and cluster inmates with disabilities, the exception will be used to justify the status quo. The commenters acknowledged that the intent of the section is to ensure that an individual with a disability who can be better served in a less integrated setting can legally be placed in that setting. They were concerned, however, that the proposed language would allow certain objectionable

practices to continue, *e.g.*, automatically placing persons with disabilities in administrative segregation. An advocacy organization with extensive experience working with inmates recommended that the inmate have ''input'' in the placement decision.

Others commented that the exception does not provide sufficient guidance on when a government entity may make an exception, citing the need for objective standards. Some commenters posited that a prison administration may want to house a deaf inmate at a facility designated and equipped for deaf inmates that is several hundred miles from the inmate's home. Although under the exception language, such a placement may be appropriate, these commenters argued that this outcome appears to contradict the regulation's intent to eliminate or reduce the segregation of inmates with disabilities and prevent them from being placed far from their families. The Department notes that in some jurisdictions, the likelihood of such outcomes is diminished because corrections facilities with different programs and levels of accessibility are clustered in close proximity to one another, so that being far from family is not an issue. The Department also takes note of advancements in technology that will ease the visitation dilemma, such as family visitation through the use of videoconferencing.

Only one commenter, a large State department of corrections, objected to the integration requirement. This commenter stated it houses all maximum security inmates in maximum security facilities. Inmates with lower security levels may or may not be housed in lower security facilities depending on a number of factors, such as availability of a bed, staffing, program availability, medical and mental health needs, and enemy separation. The commenter also objected to the proposal to prohibit housing inmates with disabilities in medical areas unless they are receiving medical care. This commenter stated that such housing may be necessary for several days, for example, at a stopover facility for an inmate with a disability who is being transferred from one facility to another. Also, this commenter stated that inmates with disabilities in disciplinary status may be housed in the infirmary because not every facility has accessible cells in disciplinary housing. Similarly the commenter objected to the prohibition on placing inmates in facilities without the same programs as facilities where they normally would be housed. Finally, the commenter objected to the prohibition on placing an inmate at a facility distant from where the inmate would normally be housed. The commenter stressed that in its system, there are few facilities near most inmates' homes. The commenter noted that most inmates are housed at facilities far from their homes, a fact shared by all inmates, not just inmates with disabilities. Another commenter noted that in some jurisdictions, inmates who need assistance in activities of daily living cannot obtain that assistance in the general population, but only in medical facilities where they must be housed.

The Department has considered the concerns raised by the commenters with respect to this section and recognizes that corrections systems may move inmates routinely and for a variety of reasons, such as crowding, safety, security, classification change, need for specialized programs, or to provide medical care. Sometimes these moves are within the same facility or prison system. On other occasions, inmates may be transferred to facilities in other cities, counties, and States. Given the nature of the prison environment, inmates have little say in their placement and administrators must have flexibility to meet the needs of the inmates and the system. The Department has revised the language of the exception contained in renumbered §35.152(b)(2) to better accommodate corrections administrators' need for flexibility in making placement decisions based on legitimate, specific reasons. Moreover, the Department believes that temporary, short-term moves that are necessary for security or administrative purposes (e.g., placing an inmate with a disability in a medical area at a stopover facility during a transfer from one facility to another) do not violate the requirements of §35.152(b)(2).

The Department notes that §35.150(a)(3) states that a public entity is not required to take ''any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens.'' Thus, corrections systems would not have to comply with the requirements of §35.152(b)(1) in any specific circumstance where these defenses are met.

Several commenters recommended that the word ''should'' be changed to ''shall'' in the subparts to §35.152(b)(2). The Department agrees that because the rule contains a specific exception and because the integration requirement is subject to the defenses provided in paragraph (a) of that section, it is more appropriate to use the word ''shall'' and the Department accordingly is making that change in the final rule.

Program requirements. In a unanimous decision, the Supreme Court, in *Pennsylvania Department of Corrections* v. *Yeskey*, 524 U.S. 206 (1998), stated explicitly that the ADA covers the operations of State prisons; accordingly, title II's program accessibility requirements apply to State and local correctional and detention facilities. In the NPRM, in addressing the accessibility of existing correctional and detention facilities, the Department considered the challenges of applying the title II program access requirement for existing facilities under §31.150(a) in light of

the realities of many inaccessible correctional facilities and strained budgets.

Correctional and detention facilities commonly provide a variety of different programs for education, training, counseling, or other purposes related to rehabilitation. Some examples of programs generally available to inmates include programs to obtain GEDs, computer training, job skill training and on-the-job training, religious instruction and guidance, alcohol and substance abuse groups, anger management, work assignments, work release, halfway houses, and other programs. Historically, individuals with disabilities have been excluded from such programs because they are not located in accessible locations, or inmates with disabilities have been segregated in units without equivalent programs. In light of the Supreme Court's decision in *Yeskey* and the requirements of title II, however, it is critical that public entities provide these opportunities to inmates with disabilities. In proposed §35.152, the Department sought to clarify that title II required equal access for inmates with disabilities to participate in programs offered to inmates without disabilities.

The Department wishes to emphasize that detention and correctional facilities are unique facilities under title II. Inmates cannot leave the facilities and must have their needs met by the corrections system, including needs relating to a disability. If the detention and correctional facilities fail to accommodate prisoners with disabilities, these individuals have little recourse, particularly when the need is great (*e.g.,* an accessible toilet; adequate catheters; or a shower chair). It is essential that corrections systems fulfill their nondiscrimination and program access obligations by adequately addressing the needs of prisoners with disabilities, which include, but are not limited to, proper medication and medical treatment, accessible toilet and shower facilities, devices such as a bed transfer or a shower chair, and assistance with hygiene methods for prisoners with physical disabilities.

In the NPRM, the Department also sought input on whether it should establish a program accessibility requirement that public entities modify additional cells at a detention or correctional facility to incorporate the accessibility features needed by specific inmates with mobility disabilities when the number of cells required by sections 232.2 and 232.3 of the 2004 ADAAG are inadequate to meet the needs of their inmate population.

Commenters supported a program accessibility requirement, viewing it as a flexible and practical means of allowing facilities to meet the needs of inmates in a cost effective and expedient manner. One organization supported a requirement to modify additional cells when the existing number of accessible cells is inadequate. It cited the example of a detainee who was held in a hospital because the local jail had no accessible cells. Similarly, a State agency recommended that the number of accessible cells should be sufficient to accommodate the population in need. One group of commenters voiced concern about accessibility being provided in a timely manner and recommended that the rule specify that the program accessibility requirement applies while waiting for the accessibility modifications. A group with experience addressing inmate needs recommended the inmate's input should be required to prevent inappropriate segregation or placement in an inaccessible or inappropriate area.

The Department is persuaded by these comments. Accordingly, §35.152(b)(3) requires public entities to ''implement reasonable policies, including physical modifications to additional cells in accordance with the 2010 Standards, so as to ensure that each inmate with a disability is housed in a cell with the accessible elements necessary to afford the inmate access to safe, appropriate housing.''

Communication. Several large disability advocacy organizations commented on the 2004 ADAAG section 232.2.2 requirement that at least 2 percent of the general holding cells and housing cells must be equipped with audible emergency alarm systems. Permanently installed telephones within these cells must have volume control. Commenters said that the communication features in the 2004 ADAAG do not address the most common barriers that deaf and hard-of-hearing inmates face. They asserted that few cells have telephones and the requirements to make them accessible is limited to volume control, and that emergency alarm systems are only a small part of the amplified information that inmates need. One large association commented that it receives many inmate complaints that announcements are made over loudspeakers or public address systems, and that inmates who do not hear announcements for inmate count or other instructions face disciplinary action for failure to comply. They asserted that inmates who miss announcements miss meals, exercise, showers, and recreation. They argued that systems that deliver audible announcements, signals, and emergency alarms must be made accessible and that TTYs must be made available. Commenters also recommended that correctional facilities should provide access to advanced forms of telecommunications. Additional commenters noted that few persons now use TTYs, preferring instead to communicate by email, texting, and videophones.

The Department agrees with the commenters that correctional facilities and jails must ensure that inmates who are deaf or hard of hearing actually receive the same information provided to other inmates. The

Department believes, however, that the reasonable modifications, program access, and effective communications requirements of title II are sufficient to address the needs of individual deaf and hard of hearing inmates, and as a result, declines to add specific requirements for communications features in cells for deaf and hard of hearing inmates at this time. The Department notes that as part of its ongoing enforcement of the reasonable modifications, program access, and effective communications requirements of title II, the Department has required correctional facilities and jails to provide communication features in cells serving deaf and hard of hearing inmates.

SUBPART E—COMMUNICATIONS

Section 35.160 Communications.

Section 35.160 of the 1991 title II regulation requires a public entity to take appropriate steps to ensure that communications with applicants, participants, and members of the public with disabilities are as effective as communications with others. 28 CFR 35.160(a). In addition, a public entity must ''furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity conducted by a public entity.'' 28 CFR 35.160(b)(1). Moreover, the public entity must give ''primary consideration to the requests of the individual with disabilities'' in determining what type of auxiliary aid and service is necessary. 28 CFR 35.160(b)(2).

Since promulgation of the 1991 title II regulation, the Department has investigated hundreds of complaints alleging failures by public entities to provide effective communication, and many of these investigations resulted in settlement agreements and consent decrees. From these investigations, the Department has concluded that public entities sometimes misunderstand the scope of their obligations under the statute and the regulation. Section 35.160 in the final rule codifies the Department's longstanding policies in this area and includes provisions that reflect technological advances in the area of auxiliary aids and services.

In the NPRM, the Department proposed adding ''companion'' to the scope of coverage under §35.160 to codify the Department's longstanding position that a public entity's obligation to ensure effective communication extends not just to applicants, participants, and members of the public with disabilities, but to *companions* as well, if any of them are individuals with disabilities. The NPRM defined companion as a person who is a family member, friend, or associate of a program participant, who, along with the program participant, is ''an appropriate person with whom the public entity should communicate.'' 73 FR 34466, 34507 (June 17, 2008).

Many commenters supported inclusion of ''companions'' in the rule, and urged even more specific language about public entities' obligations. Some commenters asked the Department to clarify that a companion with a disability may be entitled to effective communication from a public entity even though the applicants, participants, or members of the general public seeking access to, or participating in, the public entity's services, programs, or activities are not individuals with disabilities. Others requested that the Department explain the circumstances under which auxiliary aids and services should be provided to companions. Still others requested explicit clarification that where the individual seeking access to or participating in the public entity's program, services, or activities requires auxiliary aids and services, but the companion does not, the public entity may not seek out, or limit its communications to, the companion instead of communicating directly with the individual with a disability when it would be appropriate to do so.

Some in the medical community objected to the inclusion of any regulatory language regarding companions, asserting that such language is overbroad, seeks services for individuals whose presence is not required by the public entity, is not necessary for the delivery of the services or participation in the program, and places additional burdens on the medical community. These commenters asked that the Department limit the public entity's obligation to communicate effectively with a companion to situations where such communications are necessary to serve the interests of the person who is receiving the public entity's services.

After consideration of the many comments on this issue, the Department believes that explicit inclusion of ''companions'' in the final rule is appropriate to ensure that public entities understand the scope of their effective communication obligations. There are many situations in which the interests of program participants without disabilities require that their companions with disabilities be provided effective communication. In addition, the program participant need not be physically present to trigger the public entity's obligations to a companion. The controlling principle is that auxiliary aids and services must be provided if the companion is an appropriate person with whom the public entity should or would communicate.

Examples of such situations include back-to-school nights or parent-teacher conferences at a public school. If the faculty writes on the board or otherwise displays information in a visual context during a back-to-school night, this information must be communicated effectively to parents or guardians who are blind or have low vision.

At a parent-teacher conference, deaf parents or guardians must be provided with appropriate auxiliary aids and services to communicate effectively with the teacher and administrators. It makes no difference that the child who attends the school does not have a disability. Likewise, when a deaf spouse attempts to communicate with public social service agencies about the services necessary for the hearing spouse, appropriate auxiliary aids and services to the deaf spouse must be provided by the public entity to ensure effective communication. Parents or guardians, including foster parents, who are individuals with disabilities, may need to interact with child services agencies on behalf of their children; in such a circumstance, the child services agencies would need to provide appropriate auxiliary aids and services to those parents or guardians.

Effective communication with companions is particularly critical in health care settings where miscommunication may lead to misdiagnosis and improper or delayed medical treatment. The Department has encountered confusion and reluctance by medical care providers regarding the scope of their obligation with respect to such companions. Effective communication with a companion is necessary in a variety of circumstances. For example, a companion may be legally authorized to make health care decisions on behalf of the patient or may need to help the patient with information or instructions given by hospital personnel. A companion may be the patient's next-of-kin or health care surrogate with whom hospital personnel must communicate about the patient's medical condition. A companion could be designated by the patient to communicate with hospital personnel about the patient's symptoms, needs, condition, or medical history. Or the companion could be a family member with whom hospital personnel normally would communicate.

Accordingly, §35.160(a)(1) in the final rule now reads, ''[a] public entity shall take appropriate steps to ensure that communications with applicants, participants, members of the public, and companions with disabilities are as effective as communications with others.'' Section 35.160(a)(2) further defines ''companion'' as ''a family member, friend, or associate of an individual seeking access to a service, program, or activity of a public entity, who, along with the individual, is an appropriate person with whom the public entity should communicate.'' Section 35.160(b)(1) clarifies that the obligation to furnish auxiliary aids and services extends to companions who are individuals with disabilities, whether or not the individual accompanied also is an individual with a disability. The provision now states that ''[a] public entity shall furnish appropriate auxiliary aids and services where necessary to afford individuals with disabilities, including applicants, participants, companions, and members of the public, an equal opportunity to participate in, and enjoy the benefits of, a service, program, or activity of a public entity.''

These provisions make clear that if the companion is someone with whom the public entity normally would or should communicate, then the public entity must provide appropriate auxiliary aids and services to that companion to ensure effective communication with the companion. This commonsense rule provides the guidance necessary to enable public entities to properly implement the nondiscrimination requirements of the ADA.

As set out in the final rule, §35.160(b)(2) states, in pertinent part, that ''[t]he type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual, the nature, length, and complexity of the communication involved, and the context in which the communication is taking place. In determining what types of auxiliary aids and services are necessary, a public entity shall give primary consideration to the requests of individuals with disabilities.''

The second sentence of §35.160(b)(2) of the final rule restores the ''primary consideration'' obligation set out at §35.160(b)(2) in the 1991 title II regulation. This provision was inadvertently omitted from the NPRM, and the Department agrees with the many commenters on this issue that this provision should be retained. As noted in the preamble to the 1991 title II regulation, and reaffirmed here: ''The public entity shall honor the choice [of the individual with a disability] unless it can demonstrate that another effective means of communication exists or that use of the means chosen would not be required under §35.164. Deference to the request of the individual with a disability is desirable because of the range of disabilities, the variety of auxiliary aids and services, and different circumstances requiring effective communication.'' 28 CFR part 35, app. A at 580 (2009).

The first sentence in §35.160(b)(2) codifies the axiom that the type of auxiliary aid or service necessary to ensure effective communication will vary with the situation, and provides factors for consideration in making the determination, including the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. Inclusion of this language under title II is consistent with longstanding policy in this area. *See, e.g., The Americans with Disabilities Act Title II Technical Assistance Manual Covering State and Local Government Programs and Services,* section II–7.1000, available at

www.ada.gov/taman2.html (''The type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the length and complexity of the communication involved. * * * Sign language or oral interpreters, for example, may be required when the information being communicated in a transaction with a deaf individual is complex, or is exchanged for a lengthy period of time. Factors to be considered in determining whether an interpreter is required include the context in which the communication is taking place, the number of people involved, and the importance of the communication.''); *see also* 28 CFR part 35, app. A at 580 (2009). As explained in the NPRM, an individual who is deaf or hard of hearing may need a qualified interpreter to communicate with municipal hospital personnel about diagnoses, procedures, tests, treatment options, surgery, or prescribed medication (*e.g.*, dosage, side effects, drug interactions, etc.), or to explain follow-up treatments, therapies, test results, or recovery. In comparison, in a simpler, shorter interaction, the method to achieve effective communication can be more basic. An individual who is seeking local tax forms may only need an exchange of written notes to achieve effective communication.

Section 35.160(c)(1) has been added to the final rule to make clear that a public entity shall not require an individual with a disability to bring another individual to interpret for him or her. The Department receives many complaints from individuals who are deaf or hard of hearing alleging that public entities expect them to provide their own sign language interpreters. Proposed §35.160(c)(1) was intended to clarify that when a public entity is interacting with a person with a disability, it is the public entity's responsibility to provide an interpreter to ensure effective communication. It is not appropriate to require the person with a disability to bring another individual to provide such services.

Section 35.160(c)(2) of the NPRM proposed codifying the Department's position that there are certain limited instances when a public entity may rely on an accompanying individual to interpret or facilitate communication: (1) In an emergency involving a threat to the public safety or welfare; or (2) if the individual with a disability specifically requests it, the accompanying individual agrees to provide the assistance, and reliance on that individual for this assistance is appropriate under the circumstances.

Many commenters supported this provision, but sought more specific language to address what they see as a particularly entrenched problem. Some commenters requested that the Department explicitly require the public entity first to notify the individual with a disability that the individual has a right to request and receive appropriate auxiliary aids and services without charge from the public entity before using that person's accompanying individual as a communication facilitator. Advocates stated that an individual who is unaware of his or her rights may decide to use a third party simply because he or she believes that is the only way to communicate with the public entity.

The Department has determined that inclusion of specific language requiring notification is unnecessary. Section 35.160(b)(1) already states that is the responsibility of the public entity to provide auxiliary aids and services. Moreover, §35.130(f) already prohibits the public entity from imposing a surcharge on a particular individual with a disability or on any group of individuals with disabilities to cover the costs of auxiliary aids. However, the Department strongly advises public entities that they should first inform the individual with a disability that the public entity can and will provide auxiliary aids and services, and that there would be no cost for such aids or services.

Many commenters requested that the Department make clear that the public entity cannot request, rely upon, or coerce an adult accompanying an individual with a disability to provide effective communication for that individual with a disability—that only a voluntary offer is acceptable. The Department states unequivocally that consent of, and for, the adult accompanying the individual with a disability to facilitate communication must be provided freely and voluntarily both by the individual with a disability and the accompanying third party—absent an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available. The public entity may not coerce or attempt to persuade another adult to provide effective communication for the individual with a disability. Some commenters expressed concern that the regulation could be read by public entities, including medical providers, to prevent parents, guardians, or caregivers from providing effective communication for children or that a child, regardless of age, would have to specifically request that his or her caregiver act as interpreter. The Department does not intend §35.160(c)(2) to prohibit parents, guardians, or caregivers from providing effective communication for children where so doing would be appropriate. Rather, the rule prohibits public entities, including medical providers, from requiring, relying on, or forcing adults accompanying individuals with disabilities, including parents, guardians, or caregivers, to facilitate communication.

Several commenters asked that the Department make absolutely clear that children are not to be used to provide effective communication for family members and

friends, and that it is the public entity's responsibility to provide effective communication, stating that often interpreters are needed in settings where it would not be appropriate for children to be interpreting, such as those involving medical issues, domestic violence, or other situations involving the exchange of confidential or adult-related material. Commenters observed that children are often hesitant to turn down requests to provide communication services, and that such requests put them in a very difficult position vis-a-vis family members and friends. The Department agrees. It is the Department's position that a public entity shall not rely on a minor child to facilitate communication with a family member, friend, or other individual, except in an emergency involving imminent threat to the safety or welfare of an individual or the public where there is no interpreter available. Accordingly, the Department has revised the rule to state: ''A public entity shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.'' §35.160(c)(3). Sections 35.160(c)(2) and (3) have no application in circumstances where an interpreter would not otherwise be required in order to provide effective communication (*e.g.,* in simple transactions such as purchasing movie tickets at a theater). The Department stresses that privacy and confidentiality must be maintained but notes that covered entities, such as hospitals, that are subject to the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104–191, Privacy Rules are permitted to disclose to a patient's relative, close friend, or any other person identified by the patient (such as an interpreter) relevant patient information if the patient agrees to such disclosures. *See* 45 CFR parts 160 and 164. The agreement need not be in writing. Covered entities should consult the HIPAA Privacy Rules regarding other ways disclosures might be able to be made to such persons.

With regard to emergency situations, the NPRM proposed permitting reliance on an individual accompanying an individual with a disability to interpret or facilitate communication in an emergency involving a threat to the public safety or welfare. Commenters requested that the Department make clear that often a public entity can obtain appropriate auxiliary aids and services in advance of an emergency by making necessary advance arrangements, particularly in anticipated emergencies such as predicted dangerous weather or certain medical situations such as childbirth. These commenters did not want public entities to be relieved of their responsibilities to provide effective communication in emergency situations, noting that the obligation to provide effective communication may be more critical in such situations. Several commenters requested a separate rule that requires public entities to provide timely and effective communication in the event of an emergency, noting that the need for effective communication escalates in an emergency.

Commenters also expressed concern that public entities, particularly law enforcement authorities and medical personnel, would apply the ''emergency situation'' provision in inappropriate circumstances and would rely on accompanying individuals without making any effort to seek appropriate auxiliary aids and services. Other commenters asked that the Department narrow this provision so that it would not be available to entities that are responsible for emergency preparedness and response. Some commenters noted that certain exigent circumstances, such as those that exist during and perhaps immediately after, a major hurricane, temporarily may excuse public entities of their responsibilities to provide effective communication. However, they asked that the Department clarify that these obligations are ongoing and that, as soon as such situations begin to abate or stabilize, the public entity must provide effective communication.

The Department recognizes that the need for effective communication is critical in emergency situations. After due consideration of all of these concerns raised by commenters, the Department has revised §35.160(c) to narrow the exception permitting reliance on individuals accompanying the individual with a disability during an emergency to make it clear that it only applies to emergencies involving an ''imminent threat to the safety or welfare of an individual or the public.'' *See* §35.160(c)(2)–(3). Arguably, all visits to an emergency room or situations to which emergency workers respond are by definition emergencies. Likewise, an argument can be made that most situations that law enforcement personnel respond to involve, in one way or another, a threat to the safety or welfare of an individual or the public. The imminent threat exception in §35.160(c)(2)–(3) is not intended to apply to the typical and foreseeable emergency situations that are part of the normal operations of these institutions. As such, a public entity may rely on an accompanying individual to interpret or facilitate communication under the §35.160(c)(2)–(3) imminent threat exception only where in truly exigent circumstances, i.e., where any delay in providing immediate services to the individual could have life-altering or life-ending consequences.

Many commenters urged the Department to stress the obligation of State and local courts to provide effective communication.

The Department has received many complaints that State and local courts often do not provide needed qualified sign language interpreters to witnesses, litigants, jurors, potential jurors, and companions and associates of persons participating in the legal process. The Department cautions public entities that without appropriate auxiliary aids and services, such individuals are denied an opportunity to participate fully in the judicial process, and denied benefits of the judicial system that are available to others.

Another common complaint about access to State and local court systems is the failure to provide effective communication in deferral programs that are intended as an alternative to incarceration, or for other court-ordered treatment programs. These programs must provide effective communication, and courts referring individuals with disabilities to such programs should only refer individuals with disabilities to programs or treatment centers that provide effective communication. No person with a disability should be denied access to the benefits conferred through participation in a court-ordered referral program on the ground that the program purports to be unable to provide effective communication.

The general nondiscrimination provision in §35.130(a) provides that no individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity. The Department consistently interprets this provision and §35.160 to require effective communication in courts, jails, prisons, and with law enforcement officers. Persons with disabilities who are participating in the judicial process as witnesses, jurors, prospective jurors, parties before the court, or companions of persons with business in the court, should be provided auxiliary aids and services as needed for effective communication. The Department has developed a variety of technical assistance and guidance documents on the requirements for title II entities to provide effective communication; those materials are available on the Department Web site at: *http://www.ada.gov*.

Many advocacy groups urged the Department to add language in the final rule that would require public entities to provide accessible material in a manner that is timely, accurate, and private. The Department has included language in §35.160(b)(2) stating that ''[i]n order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way so as to protect the privacy and independence of the individual with a disability.''

Because the appropriateness of particular auxiliary aids and services may vary as a situation changes, the Department strongly encourages public entities to do a communication assessment of the individual with a disability when the need for auxiliary aids and services is first identified, and to re-assess communication effectiveness regularly throughout the communication. For example, a deaf individual may go to an emergency department of a public community health center with what is at first believed to be a minor medical emergency, such as a sore knee, and the individual with a disability and the public community health center both believe that exchanging written notes will be effective. However, during that individual's visit, it is determined that the individual is, in fact, suffering from an anterior cruciate ligament tear and must have surgery to repair the torn ligament. As the situation develops and the diagnosis and recommended course of action evolve into surgery, an interpreter most likely will be necessary. A public entity has a continuing obligation to assess the auxiliary aids and services it is providing, and should consult with individuals with disabilities on a continuing basis to assess what measures are required to ensure effective communication. Public entities are further advised to keep individuals with disabilities apprised of the status of the expected arrival of an interpreter or the delivery of other requested or anticipated auxiliary aids and services.

Video remote interpreting (VRI) services. In §35.160(d) of the NPRM, the Department proposed the inclusion of four performance standards for VRI (which the NPRM termed video interpreting services (VIS)), for effective communication: (1) High-quality, clear, real-time, full-motion video and audio over a dedicated high-speed Internet connection; (2) a clear, sufficiently large, and sharply delineated picture of the participating individual's head, arms, hands, and fingers, regardless of his body position; (3) clear transmission of voices; and (4) persons who are trained to set up and operate the VRI quickly. Commenters generally approved of those performance standards, but recommended that some additional standards be included in the final rule. Some State agencies and advocates for persons with disabilities requested that the Department add more detail in the description of the first standard, including modifying the term ''dedicated high-speed Internet connection'' to read ''dedicated high-speed, wide-bandwidth video connection.'' These commenters argued that this change was necessary to ensure a high-quality video image that will not produce lags, choppy images, or irregular pauses in communication. The Department agrees with those comments and has amended the provision in the final rule accordingly.

For persons who are deaf with limited vision, commenters requested that the Department include an explicit requirement that interpreters wear high-contrast clothing with no patterns that might distract from

their hands as they are interpreting, so that a person with limited vision can see the signs made by the interpreter. While the Department reiterates the importance of such practices in the delivery of effective VRI, as well as in-person interpreting, the Department declines to adopt such performance standards as part of this rule. In general, professional interpreters already follow such practices—the Code of Professional Conduct for interpreters developed by the Registry of Interpreters for the Deaf, Inc. and the National Association of the Deaf incorporates attire considerations into their standards of professionalism and conduct. (This code is available at *http://www.vid.org/userfiles/file/pdfs/codeofethics.pdf* (Last visited July 18, 2010). Moreover, as a result of this code, many VRI agencies have adopted detailed dress standards that interpreters hired by the agency must follow. In addition, commenters urged that a clear image of the face and eyes of the interpreter and others be explicitly required. Because the face includes the eyes, the Department has amended §35.160(d)(2) of the final rule to include a requirement that the interpreter's face be displayed.

In response to comments seeking more training for users and non-technicians responsible for VRI in title II facilities, the Department is extending the requirement in §35.160(d)(4) to require training for ''users of the technology'' so that staff who would have reason to use the equipment in an emergency room, State or local court, or elsewhere are properly trained. Providing for such training will enhance the success of VRI as means of providing effective communication.

Captioning at sporting venues. In the NPRM at §35.160(e), the Department proposed that sports stadiums that have a capacity of 25,000 or more shall provide captioning for safety and emergency information on scoreboards and video monitors. In addition, the Department posed four questions about captioning of information, especially safety and emergency information announcements, provided over public address (PA) systems. The Department received many extremely detailed and divergent responses to each of the four questions and the proposed regulatory text. Because comments submitted on the Department's title II and title III proposals were intertwined, because of the similarity of issues involved for title II entities and title III entities, and in recognition of the fact that many large sports stadiums are covered by both title II and title III as joint operations of State or local governments and one or more public accommodations, the Department presents here a single consolidated review and summary of the issues raised in comments.

The Department asked whether requiring captioning of safety and emergency information made over the public address system in stadiums seating fewer than 25,000 would create an undue burden for smaller entities, whether it would be feasible for small stadiums, or whether a larger threshold, such as sports stadiums with a capacity of 50,000 or more, would be appropriate.

There was a consensus among the commenters, including disability advocates as well as venue owners and stadium designers and operators, that using the stadium size or seating capacity as the exclusive deciding factor for any obligation to provide captioning for safety and emergency information broadcast over the PA system is not preferred. Most disability advocacy organizations and individuals with disabilities complained that using size or seating capacity as a threshold for captioning safety and emergency information would undermine the ''undue burden'' defense found in both titles II and III. Many commenters provided examples of facilities like professional hockey arenas that seat less than 25,000 fans but which, commenters argued, should be able to provide real-time captioning. Other commenters suggested that some high school or college stadiums, for example, may hold 25,000 fans or more and yet lack the resources to provide real-time captioning. Many commenters noted that real-time captioning would require trained stenographers and that most high school and college sports facilities rely upon volunteers to operate scoreboards and PA systems, and they would not be qualified stenographers, especially in case of an emergency. One national association noted that the typical stenographer expense for a professional football game in Washington, DC is about $550 per game. Similarly, one trade association representing venues estimated that the cost for a professional stenographer at a sporting event runs between $500 and $1,000 per game or event, the cost of which, they argued, would be unduly burdensome in many cases. Some commenters posited that schools that do not sell tickets to athletic events would find it difficult to meet such expenses, in contrast to major college athletic programs and professional sports teams, which would be less likely to prevail using an ''undue burden'' defense.

Some venue owners and operators and other covered entities argued that stadium size should not be the key consideration when requiring scoreboard captioning. Instead, these entities suggested that equipment already installed in the stadium, including necessary electrical equipment and backup power supply, should be the determining factor for whether captioning is mandated. Many commenters argued that the requirement to provide captioning should only apply to stadiums with scoreboards that meet the National Fire Protection Association (NFPA) National Fire Alarm Code

(NFPA 72). Commenters reported that NFPA 72 requires at least two independent and reliable power supplies for emergency information systems, including one source that is a generator or battery sufficient to run the system in the event the primary power fails. Alternatively, some stadium designers and title II entities commented that the requirement should apply when the facility has at least one elevator providing firefighter emergency operation, along with approval of authorities with responsibility for fire safety. Other commenters argued for flexibility in the requirements for providing captioning and that any requirement should only apply to stadiums constructed after the effective date of the regulation.

In the NPRM, the Department also asked whether the rule should address the specific means of captioning equipment, whether it should be provided through any effective means (scoreboards, line boards, handheld devices, or other means), or whether some means, such as handheld devices, should be eliminated as options. This question elicited many comments from advocates for persons with disabilities as well as from covered entities. Advocacy organizations and individuals with experience using handheld devices argue that such devices do not provide effective communication. These commenters noted that information is often delayed in the transmission to such devices, making them hard to use when following action on the playing field or in the event of an emergency when the crowd is already reacting to aural information provided over the PA system well before it is received on the handheld device.

Several venue owners and operators and others commented that handheld technology offers advantages of flexibility and portability so that it may be used successfully regardless of where in the facility the user is located, even when not in the line of sight of a scoreboard or other captioning system. Still other commenters urged the Department not to regulate in such a way as to limit innovation and use of such technology now and in the future. Cost considerations were included in some comments from some stadium designers and venue owners and operators, who reported that the cost of providing handheld systems is far less than the cost of real-time captioning on scoreboards, especially in facilities that do not currently have the capacity to provide real-time captions on existing equipment. Others noted that handheld technology is not covered by fire and safety model codes, including the NFPA, and thus would be more easily adapted into existing facilities if captioning were required by the Department.

The Department also asked about providing open captioning of all public address announcements, and not limiting captioning to safety and emergency information. A variety of advocates and persons with disabilities argued that all information broadcast over a PA system should be captioned in real time at all facilities in order to provide effective communication and that a requirement only to provide emergency and safety information would not be sufficient. A few organizations for persons with disabilities commented that installation of new systems should not be required, but that all systems within existing facilities that are capable of providing captioning must be utilized to the maximum extent possible to provide captioning of as much information as possible. Several organizations representing persons with disabilities commented that all facilities must include in safety planning the requirement to caption all aurally-provided information for patrons with communication disabilities. Some advocates suggested that demand for captions will only increase as the number of deaf and hard of hearing persons grows with the aging of the general population and with increasing numbers of veterans returning from war with disabilities. Multiple comments noted that the captioning would benefit others as well as those with communication disabilities.

By contrast, venue owners and operators and others commented that the action on the sports field is self-explanatory and does not require captioning and they objected to an explicit requirement to provide real-time captioning for all information broadcast on the PA system at a sporting event. Other commenters objected to requiring captioning even for emergency and safety information over the scoreboard rather than through some other means. By contrast, venue operators, State government agencies, and some model code groups, including NFPA, commented that emergency and safety information must be provided in an accessible format and that public safety is a paramount concern. Other commenters argued that the best method to deliver safety and emergency information would be television monitors showing local TV broadcasts with captions already mandated by the FCC. Some commenters posited that the most reliable information about a major emergency would be provided on the television news broadcasts. Several commenters argued that television monitors may be located throughout the facility, improving line of sight for patrons, some of whom might not be able to see the scoreboard from their seats or elsewhere in the facility. Some stadium designers, venue operators, and model code groups pointed out that video monitors are not regulated by the NFPA or other agencies, so that such monitors could be more easily provided. Video monitors may receive transmissions from within the facility and could provide real-time captions if there is the necessary software and equipment to feed the captioning signal to a closed video network

within the facility. Several comments suggested that using monitors would be preferable to requiring captions on the scoreboard if the regulation mandates real-time captioning. Some venue owners and operators argued that retrofitting existing stadiums with new systems could easily cost hundreds of thousands of dollars per scoreboard or system. Some stadium designers and others argued that captioning should only be required in stadiums built after the effective date of the regulation. For stadiums with existing systems that allow for real-time captioning, one commenter posited that dedicating the system exclusively to real-time captioning would lead to an annual loss of between $2 and $3 million per stadium in revenue from advertising currently running in that space.

After carefully considering the wide range of public comments on this issue, the Department has concluded that the final rule will not provide additional requirements for effective communication or emergency information provided at sports stadiums at this time. The 1991 title II and title III regulations and statutory requirements are not in any way affected by this decision. The decision to postpone rulemaking on this complex issue is based on a number of factors, including the multiple layers of existing regulation by various agencies and levels of government, and the wide array of information, requests, and recommendations related to developing technology offered by the public. In addition, there is a huge variety of covered entities, information and communication systems, and differing characteristics among sports stadiums. The Department has concluded that further consideration and review would be prudent before it issues specific regulatory requirements.

Section 35.161 Telecommunications.

The Department proposed to retitle this section ''Telecommunications'' to reflect situations in which the public entity must provide an effective means to communicate by telephone for individuals with disabilities. First, the NPRM proposed redesignating §35.161 as §35.161(a) and replacing the term ''Telecommunications devices for the deaf (TDD)'' with ''Text telephones (TTY).'' Public comment was universally supportive of this change in nomenclature to TTY.

In the NPRM, at §35.161(b), the Department addressed automated-attendant systems that handle telephone calls electronically. Often individuals with disabilities, including persons who are deaf or hard of hearing, are unable to use such automated systems. Some systems are not compatible with TTYs or the telecommunications relay service. Automated systems can and often do disconnect calls from TTYs or relay calls, making it impossible for persons using a TTY or relay system to do business with title II entities in the same manner as others. The Department proposed language that would require a telecommunications service to permit persons using relay or TTYs or other assistive technology to use the automated-attendant system provided by the public entity. The FCC raised this concern with the Department after the 1991 title II regulation went into effect, and the Department acted upon that request in the NPRM. Comments from disability advocates and persons with disabilities consistently requested the provision be amended to cover ''voice mail, messaging, auto-attendant, and interactive voice response systems.'' The Department recognizes that those are important features of widely used telecommunications technology that should be as accessible to persons who are deaf or hard of hearing as they are to others, and has amended the section in the final rule to include the additional features.

Many commenters, including advocates and persons with disabilities, as well as State agencies and national organizations, asked that all automated systems have an option for the caller to bypass the automated system and speak to a live person who could communicate using relay services. The Department understands that automated telecommunications systems typically do not offer the opportunity to avoid or bypass the automated system and speak to a live person. The Department believes that at this time it is inappropriate to add a requirement that all such systems provide an override capacity that permits a TTY or relay caller to speak with a live clerk on a telecommunications relay system. However, if a system already provides an option to speak to a person, that system must accept TTY and relay calls and must not disconnect or refuse to accept such calls.

Other comments from advocacy organizations and individuals urged the Department to require specifications for the operation of such systems that would involve issuing technical requirements for encoding and storage of automated text, as well as controls for speed, pause, rewind, and repeat, and prompts without any background noise. The same comments urged that these requirements should be consistent with a pending advisory committee report to the Access Board, submitted in April 2008. *See* Telecommunications and Electronic Information Technology Advisory Committee, Report to the Access Board Refreshed Accessibility Standards and Guidelines in Telecommunications and Electronic and Information Technology (Apr. 2008) available at *http://www.access-board.gov/sec508/refresh/report/*.
The Department is declining at this time to preempt ongoing consideration of these issues by the Board. Instead, the Department

will monitor activity by the Board. The Department is convinced that the general requirement to make such automated systems usable by persons with disabilities is appropriate at this time and title II entities should evaluate their automated systems in light of concerns about providing systems that offer effective communication to persons with disabilities.

Finally, the Department has adopted in §35.161(c) of the final rule the requirement that all such systems must not disconnect or refuse to take calls from all forms of FCC-approved telecommunications relay systems, including Internet-based relay systems. (Internet-based relay systems refer to the mechanism by which the message is relayed). They do not require a public entity to have specialized computer equipment. Commenters from some State agencies, many advocacy organizations, and individuals strongly urged the Department to mandate such action because of the high proportion of TTY calls and relay service calls that are not completed because the title II entity's phone system or employees do not take the calls. This presents a serious obstacle for persons doing business with State and local government and denies persons with disabilities access to use the telephone for business that is typically handled over the phone for others.

In addition, commenters requested that the Department include ''real-time'' before any mention of ''computer-aided'' technology to highlight the value of simultaneous translation of any communication. The Department has added ''real-time'' before ''computer-aided transcription services'' in the definition of ''auxiliary aids in §35.104 and before ''communication'' in §35.161(b).

SUBPART F—COMPLIANCE PROCEDURES

Section 35.171 Acceptance of complaints.

In the NPRM, the Department proposed changing the current language in §35.171(a)(2)(i) regarding misdirected complaints to make it clear that if an agency receives a complaint for which it lacks jurisdiction either under section 504 or as a designated agency under the ADA, the agency may refer the complaint to the appropriate agency with title II or section 504 jurisdiction or to the Department of Justice. The language of the 1991 title II regulation only requires the agency to refer such a complaint to the Department, which in turn refers the complaint to the appropriate designated agency. The proposed revisions to §35.171 made it clear that an agency can refer a misdirected complaint either directly to the appropriate agency or to the Department. This amendment was intended to protect against the unnecessary backlogging of complaints and to prevent undue delay in an agency taking action on a complaint.

Several commenters supported this amendment as a more efficient means of directing title II complaints to the appropriate enforcing agency. One commenter requested that the Department emphasize the need for timeliness in referring a complaint. The Department does not believe it is appropriate to adopt a specific time frame but will continue to encourage designated agencies to make timely referrals. The final rule retains, with minor modifications, the language in proposed §35.171(a)(2)(i). The Department has also amended §35.171(a)(2)(ii) to be consistent with the changes in the rule at §35.190(e), as discussed below.

Section 35.172 Investigations and compliance reviews.

In the NPRM, the Department proposed a number of changes to language in §35.172 relating to the resolution of complaints. Subtitle A of title II of the ADA defines the remedies, procedures, and rights provided for qualified individuals with disabilities who are discriminated against on the basis of disability in the services, programs, or activities of State and local governments. 42 U.S.C. 12131–12134. Subpart F of the current regulation establishes administrative procedures for the enforcement of title II of the ADA. 28 CFR 35.170–35.178. Subpart G identifies eight ''designated agencies,'' including the Department, that have responsibility for investigating complaints under title II. *See* 28 CFR 35.190(b).

The Department's 1991 title II regulation is based on the enforcement procedures established in regulations implementing section 504. Thus, the Department's 1991 title II regulation provides that the designated agency ''shall investigate each complete complaint'' alleging a violation of title II and shall ''attempt informal resolution'' of such complaint. 28 CFR 35.172(a). The full range of remedies (including compensatory damages) that are available to the Department when it resolves a complaint or resolves issues raised in a compliance review are available to designated agencies when they are engaged in informal complaint resolution or resolution of issues raised in a compliance review under title II.

In the years since the 1991 title II regulation went into effect, the Department has received many more complaints alleging violations of title II than its resources permit it to resolve. The Department has reviewed each complaint that the Department has received and directed its resources to resolving the most critical matters. In the NPRM, the Department proposed deleting the word ''each'' as it appears before ''complaint'' in §35.172(a) of the 1991 title II regulation as a means of clarifying that designated agencies may exercise discretion in selecting title II complaints for resolution.

Many commenters opposed the removal of the term ''each,'' requesting that all title II complaints be investigated. The commenters explained that complaints against title II entities implicate the fundamental right of access to government facilities and programs, making an administrative enforcement mechanism critical. Rather than aligning enforcement discretion of title II complaints with the discretion under the enforcement procedures of title III, the commenters favored obtaining additional resources to address more complaints. The commenters highlighted the advantage afforded by Federal involvement in complaint investigations in securing favorable voluntary resolutions. When Federal involvement results in settlement agreements, commenters believed those agreements are more persuasive to other public entities than private settlements. Private litigation as a viable alternative was rejected by the commenters because of the financial limitations of many complainants, and because in some scenarios legal barriers foreclose private litigation as an option.

Several of those opposing this amendment argued that designated agencies are required to investigate each complaint under section 504, and a departure for title II complaints would be an inconsistency. The Department believes that §35.171(a) of the final rule is consistent with the obligation to evaluate all complaints. However, there is no statutory requirement that every title II complaint receive a full investigation. Section 203 of the ADA, 42 U.S.C. 12133, adopts the ''remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973'' (29 U.S.C. 794a). Section 505 of the Rehabilitation Act, in turn, incorporates the remedies available under title VI of the Civil Rights Act of 1964 into section 504. Under these statutes, agencies may engage in conscientious enforcement without fully investigating each citizen complaint. An agency's decision to conduct a full investigation requires a complicated balancing of a number of factors that are particularly within its expertise. Thus, the agency must not only assess whether a violation may have occurred, but also whether agency resources are best spent on this complaint or another, whether the agency is likely to succeed if it acts, and whether the particular enforcement action requested best fits the agency's overall policies. Availability of resources will always be a factor, and the Department believes discretion to maximize these limited resources will result in the most effective enforcement program. If agencies are bound to investigate each complaint fully, regardless of merit, such a requirement could have a deleterious effect on their overall enforcement efforts. The Department continues to expect that each designated agency will review the complaints the agency receives to determine whether further investigation is appropriate.

The Department also proposed revising §35.172 to add a new paragraph (b) that provided explicit authority for compliance reviews consistent with the Department's longstanding position that such authority exists. The proposed section stated, ''[t]he designated agency may conduct compliance reviews of public entities based on information indicating a possible failure to comply with the nondiscrimination requirements of this part.'' Several commenters supported this amendment, identifying title III compliance reviews as having been a successful means for the Department and designated agencies to improve accessibility. The Department has retained this section. However, the Department has modified the language of the section to make the authority to conduct compliance reviews consistent with that available under section 504 and title VI. *See, e.g.,* 28 CFR 42.107(a). The new provision reads as follows: ''(b) The designated agency may conduct compliance reviews of public entities in order to ascertain whether there has been a failure to comply with the nondiscrimination requirements of this part.'' The Department has also added a provision to §35.172(c)(2) clarifying the Department's longstanding view that agencies may obtain compensatory damages on behalf of complainants as the result of a finding of discrimination pursuant to a compliance review or in informal resolution of a complaint.

Finally, in the NPRM, the Department proposed revising the requirements for letters of findings for clarification and to reflect current practice. Section 35.172(a) of the 1991 title II regulation required designated agencies to issue a letter of findings at the conclusion of an investigation if the complaint was not resolved informally, and to attempt to negotiate a voluntary compliance agreement if a violation was found. The Department's proposed changes to the 1991 title II regulation moved the discussion of letters of findings to a new paragraph (c) in the NPRM, and clarified that letters of findings are only required when a violation is found.

One commenter opposed the proposal to eliminate the obligation of the Department and designated agencies to issue letters of finding at the conclusion of every investigation. The commenter argued that it is beneficial for public entities, as well as complainants, for the Department to provide a reasonable explanation of both compliance and noncompliance findings.

The Department has considered this comment but continues to believe that this change will promote the overall effectiveness of its enforcement program. The final rule retains the proposed language.

SUBPART G—DESIGNATED AGENCIES

Section 35.190 Designated agencies.

Subpart G of the 1991 title II regulation designates specific Federal agencies to investigate certain title II complaints. Paragraph 35.190(b) specifies these agency designations. Paragraphs 35.190(c) and (d), respectively, grant the Department discretion to designate further oversight responsibilities for matters not specifically assigned or where there are apparent conflicts of jurisdiction. The NPRM proposed adding a new §35.190(e) further refining procedures for complaints filed with the Department of Justice. Proposed §35.190(e) provides that when the Department receives a complaint alleging a violation of title II that is directed to the Attorney General but may fall within the jurisdiction of a designated agency or another Federal agency with jurisdiction under section 504, the Department may exercise its discretion to retain the complaint for investigation under this part. The Department would, of course, consult with the designated agency when the Department plans to retain a complaint. In appropriate circumstances, the Department and the designated agency may conduct a joint investigation.

Several commenters supported this amendment as a more efficient means of processing title II complaints. The commenters supported the Department using its discretion to conduct timely investigations of such complaints. The language of the proposed §35.190(e) remains unchanged in the final rule.

OTHER ISSUES

Questions Posed in the NPRM Regarding Costs and Benefits of Complying With the 2010 Standards

In the NPRM, the Department requested comment on various cost and benefit issues related to eight requirements in the Department's Initial Regulatory Impact Analysis (Initial RIA), available at *ada.gov/NPRM2008/ria.htm*), that were projected to have incremental costs exceeding monetized benefits by more than $100 million when using the 1991 Standards as the comparative baseline, *i.e.*, side reach, water closet clearances in single-user toilet rooms with in-swinging doors, stairs, elevators, location of accessible routes to stages, accessible attorney areas and witness stands, assistive listening systems, and accessible teeing grounds, putting greens, and weather shelters at golf courses. 73 FR 34466, 34469 (June 17, 2008). The Department noted that pursuant to the ADA, the Department does not have statutory authority to modify the 2004 ADAAG and is required instead to issue regulations implementing the ADA that are consistent with the Board's guidelines. In that regard, the Department also requested comment about whether any of these eight elements in the 2010 Standards should be returned to the Access Board for further consideration, in particular as applied to alterations. Many of the comments received by the Department in response to these questions addressed both titles II and III. As a result, the Department's discussion of these comments and its response are collectively presented for both titles.

Side reach. The 1991 Standards at section 4.2.6 establish a maximum side-reach height of 54 inches. The 2010 Standards at section 308.3 reduce that maximum height to 48 inches. The 2010 Standards also add exceptions for certain elements to the scoping requirement for operable parts.

The vast majority of comments the Department received were in support of the lower side-reach maximum of 48 inches in the 2010 Standards. Most of these comments, but not all, were received from individuals of short stature, relatives of individuals of short stature, or organizations representing the interests of persons with disabilities, including individuals of short stature. Comments from individuals with disabilities and disability advocacy groups stated that the 48-inch side reach would permit independence in performing many activities of daily living for individuals with disabilities, including individuals of short stature, persons who use wheelchairs, and persons who have limited upper body strength. In this regard, one commenter who is a business owner pointed out that as a person of short stature there were many occasions when he was unable to exit a public restroom independently because he could not reach the door handle. The commenter said that often elevator control buttons are out of his reach and, if he is alone, he often must wait for someone else to enter the elevator so that he can ask that person to press a floor button for him. Another commenter, who is also a person of short stature, said that he has on several occasions pulled into a gas station only to find that he was unable to reach the credit card reader on the gas pump. Unlike other customers who can reach the card reader, swipe their credit or debit cards, pump their gas and leave the station, he must use another method to pay for his gas. Another comment from a person of short stature pointed out that as more businesses take steps to reduce labor costs—a trend expected to continue—staffed booths are being replaced with automatic machines for the sale, for example, of parking tickets and other products. He observed that the ''ability to access and operate these machines becomes ever more critical to function in society,'' and, on that basis, urged the Department to adopt the 48-inch side-reach requirement. Another individual commented that persons of short stature should not have to carry with them

adaptive tools in order to access building or facility elements that are out of their reach, any more than persons in wheelchairs should have to carry ramps with them in order to gain access to facilities.

Many of the commenters who supported the revised side-reach requirement pointed out that lowering the side-reach requirement to 48 inches would avoid a problem sometimes encountered in the built environment when an element was mounted for a parallel approach at 54 inches only to find afterwards that a parallel approach was not possible. Some commenters also suggested that lowering the maximum unobstructed side reach to 48 inches would reduce confusion among design professionals by making the unobstructed forward and side-reach maximums the same (the unobstructed forward reach in both the 1991 and 2010 Standards is 48 inches maximum). These commenters also pointed out that the ICC/ANSI A117.1 Standard, which is a private sector model accessibility standard, has included a 48-inch maximum high side-reach requirement since 1998. Many jurisdictions have already incorporated this requirement into their building codes, which these commenters believed would reduce the cost of compliance with the 2010 Standards. Because numerous jurisdictions have already adopted the 48-inch side-reach requirement, the Department's failure to adopt the 48-inch side-reach requirement in the 2010 Standards, in the view of many commenters, would result in a significant reduction in accessibility, and would frustrate efforts that have been made to harmonize private sector model construction and accessibility codes with Federal accessibility requirements. Given these concerns, they overwhelmingly opposed the idea of returning the revised side-reach requirement to the Access Board for further consideration.

The Department also received comments in support of the 48-inch side-reach requirement from an association of professional commercial property managers and operators and from State governmental entities. The association of property managers pointed out that the revised side-reach requirement provided a reasonable approach to ''regulating elevator controls and all other operable parts'' in existing facilities in light of the manner in which the safe harbor, barrier removal, and alterations obligations will operate in the 2010 Standards. One governmental entity, while fully supporting the 48-inch side-reach requirement, encouraged the Department to adopt an exception to the lower reach range for existing facilities similar to the exception permitted in the ICC/ANSI A117.1 Standard. In response to this latter concern, the Department notes that under the safe harbor, existing facilities that are in compliance with the 1991 Standards, which require a 54-inch side-reach maximum, would not be required to comply with the lower side-reach requirement, unless there is an alteration. *See* §35.150(b)(2).

A number of commenters expressed either concern with, or opposition to, the 48-inch side-reach requirement and suggested that it be returned to the Access Board for further consideration. These commenters included trade and business associations, associations of retail stores, associations of restaurant owners, retail and convenience store chains, and a model code organization. Several businesses expressed the view that the lower side-reach requirement would discourage the use of their products and equipment by most of the general public. In particular, concerns were expressed by a national association of pay phone service providers regarding the possibility that pay telephones mounted at the lower height would not be used as frequently by the public to place calls, which would result in an economic burden on the pay phone industry. The commenter described the lower height required for side reach as creating a new ''barrier'' to pay phone use, which would reduce revenues collected from pay phones and, consequently, further discourage the installation of new pay telephones. In addition, the commenter expressed concern that phone service providers would simply decide to remove existing pay phones rather than incur the costs of relocating them at the lower height. With regard to this latter concern, the commenter misunderstood the manner in which the safe harbor obligation will operate in the revised title II regulation for elements that comply with the 1991 Standards. If the pay phones comply with the 1991 Standards or UFAS, the adoption of the 2010 Standards does not require retrofitting of these elements to reflect incremental changes in the 2010 Standards (*see* §35.150(b)(2)). However, pay telephones that were required to meet the 1991 Standards as part of new construction or alterations, but do not in fact comply with those standards, will need to be brought into compliance with the 2010 Standards as of 18 months from the publication date of this final rule. *See* §35.151(c)(5)(ii).

The Department does not agree with the concerns expressed by the commenter about reduced revenues from pay phones mounted at lower heights. The Department believes that, while given the choice some individuals may prefer to use a pay phone that is at a higher height, the availability of some phones at a lower height will not deter individuals from making needed calls.

The 2010 Standards will not require every pay phone to be installed or moved to a lowered height. The table accompanying section 217.2 of the 2010 Standards makes clear that, where one or more telephones are provided on a floor, level, or an exterior site, only one phone per floor, level, or exterior site must be placed at an accessible height. Similarly, where there is one bank of phones per floor,

level, or exterior site, only one phone per floor, level, or exterior site must be accessible. And if there are two or more banks of phones per floor, level, or exterior site, only one phone per bank must be placed at an accessible height.

Another comment in opposition to the lower reach range requirement was submitted on behalf of a chain of convenience stores with fuel stops. The commenter expressed the concern that the 48-inch side reach ''will make it uncomfortable for the majority of the public,'' including persons of taller stature who would need to stoop to use equipment such as fuel dispensers mounted at the lower height. The commenter offered no objective support for the observation that a majority of the public would be rendered uncomfortable if, as required in the 2010 Standards, at least one of each type of fuel dispenser at a facility was made accessible in compliance with the lower reach range. Indeed, the Department received no comments from any individuals of tall stature expressing concern about accessible elements or equipment being mounted at the 48-inch height.

Several convenience store, restaurant, and amusement park commenters expressed concern about the burden the lower side-reach requirement would place on their businesses in terms of self-service food stations and vending areas if the 48-inch requirement were applied retroactively. The cost of lowering counter height, in combination with the lack of control businesses exercise over certain prefabricated service or vending fixtures, outweighed, they argued, any benefits to persons with disabilities. For this reason, they suggested the lower side-reach requirement be referred back to the Access Board.

These commenters misunderstood the safe harbor and barrier removal obligations that will be in effect under the 2010 Standards. Those existing self-service food stations and vending areas that already are in compliance with the 1991 Standards will not be required to satisfy the 2010 Standards unless they engage in alterations. With regard to prefabricated vending machines and food service components that will be purchased and installed in businesses after the 2010 Standards become effective, the Department expects that companies will design these machines and fixtures to comply with the 2010 Standards in the future, as many have already done in the 10 years since the 48-inch side-reach requirement has been a part of the model codes and standards used by many jurisdictions as the basis for their construction codes.

A model code organization commented that the lower side-reach requirement would create a significant burden if it required entities to lower the mounting height for light switches, environmental controls, and outlets when an alteration did not include the walls where these elements were located, such as when ''an area is altered or as a path of travel obligation.'' The Department believes that the final rule adequately addresses those situations about which the commenter expressed concern by not requiring the relocation of existing elements, such as light switches, environmental controls, and outlets, unless they are altered. Moreover, under §35.151(b)(4)(iii) of the final rule, costs for altering the path of travel to an altered area of primary function that exceed 20 percent of the overall costs of the alteration will be deemed disproportionate.

The Department has determined that the revised side-reach requirement should not be returned to the Access Board for further consideration, based in large part on the views expressed by a majority of the commenters regarding the need for, and importance of, the lower side-reach requirement to ensure access for persons with disabilities.

Alterations and Water Closet Clearances in Single-User Toilet Rooms With In-Swinging Doors

The 1991 Standards allow a lavatory to be placed a minimum of 18 inches from the water closet centerline and a minimum of 36 inches from the side wall adjacent to the water closet, which precludes side transfers. The 1991 Standards do not allow an in-swinging door in a toilet or bathing room to overlap the required clear floor space at any accessible fixture. To allow greater transfer options, section 604.3.2 of the 2010 Standards prohibits lavatories from overlapping the clear floor space at water closets, except in residential dwelling units. Section 603.2.3 of the 2010 Standards maintains the prohibition on doors swinging into the clear floor space or clearance required for any fixture, except that they permit the doors of toilet or bathing rooms to swing into the required turning space, provided that there is sufficient clearance space for the wheelchair outside the door swing. In addition, in single-user toilet or bathing rooms, exception 2 of section 603.2.3 of the 2010 Standards permits the door to swing into the clear floor space of an accessible fixture if a clear floor space that measures at least 30 inches by 48 inches is available outside the arc of the door swing.

The majority of commenters believed that this requirement would increase the number of toilet rooms accessible to individuals with disabilities who use wheelchairs or mobility scooters, and will make it easier for them to transfer. A number of commenters stated that there was no reason to return this provision to the Access Board. Numerous commenters noted that this requirement is already included in other model accessibility standards and many State and local building codes and that the adoption of the 2010

Standards is an important part of harmonization efforts.

Other commenters, mostly trade associations, opposed this requirement, arguing that the added cost to the industry outweighs any increase in accessibility. Two commenters stated that these proposed requirements would add two feet to the width of an accessible single-user toilet room; however, another commenter said the drawings in the proposed regulation demonstrated that there would be no substantial increase in the size of the toilet room. Several commenters stated that this requirement would require moving plumbing fixtures, walls, or doors at significant additional expense. Two commenters wanted the permissible overlap between the door swing and clearance around any fixture eliminated. One commenter stated that these new requirements will result in fewer alterations to toilet rooms to avoid triggering the requirement for increased clearances, and suggested that the Department specify that repairs, maintenance, or minor alterations would not trigger the need to provide increased clearances. Another commenter requested that the Department exempt existing guest room bathrooms and single-user toilet rooms that comply with the 1991 Standards from complying with the increased clearances in alterations.

After careful consideration of these comments, the Department believes that the revised clearances for single-user toilet rooms will allow safer and easier transfers for individuals with disabilities, and will enable a caregiver, aide, or other person to accompany an individual with a disability into the toilet room to provide assistance. The illustrations in Appendix B to the final title III rule, ''Analysis and Commentary on the 2010 ADA Standards for Accessible Design,'' published elsewhere in this volume and codified as Appendix B to 28 CFR part 36, describe several ways for public entities and public accommodations to make alterations while minimizing additional costs or loss of space. Further, in any isolated instances where existing structural limitations may entail loss of space, the public entity and public accommodation may have a technical infeasibility defense for that alteration. The Department also recognizes that in attempting to create the required clear floor space pursuant to section 604.3.2, there may be certain specific circumstances where it would be technically infeasible for a covered entity to comply with the clear floor space requirement, such as where an entity must move a plumbing wall in a multistory building where the mechanical chase for plumbing is an integral part of a building's structure or where the relocation of a wall or fixture would violate applicable plumbing codes. In such circumstances, the required clear floor space would not have to be provided although the covered entity would have to provide accessibility to the maximum extent feasible. The Department has, therefore, decided not to return this requirement to the Access Board.

Alterations to stairs. The 1991 Standards only require interior and exterior stairs to be accessible when they provide access to levels that are not connected by an elevator, ramp, or other accessible means of vertical access. In contrast, section 210.1 of the 2010 Standards requires all newly constructed stairs that are part of a means of egress to be accessible. However, exception 2 of section 210.1 of the 2010 Standards provides that in alterations, stairs between levels connected by an accessible route need not be accessible, except that handrails shall be provided. Most commenters were in favor of this requirement for handrails in alterations, and stated that adding handrails to stairs during alterations was not only feasible and not cost-prohibitive, but also provided important safety benefits. One commenter stated that making all points of egress accessible increased the number of people who could use the stairs in an emergency. A majority of the commenters did not want this requirement returned to the Access Board for further consideration.

The International Building Code (IBC), which is a private sector model construction code, contains a similar provision, and most jurisdictions enforce a version of the IBC as their building code, thereby minimizing the impact of this provision on public entities and public accommodations. The Department believes that by requiring only the addition of handrails to altered stairs where levels are connected by an accessible route, the costs of compliance for public entities and public accommodations are minimized, while safe egress for individuals with disabilities is increased. Therefore, the Department has decided not to return this requirement to the Access Board.

Alterations to elevators. Under the 1991 Standards, if an existing elevator is altered, only that altered elevator must comply with the new construction requirements for accessible elevators to the maximum extent feasible. It is therefore possible that a bank of elevators controlled by a single call system may contain just one accessible elevator, leaving an individual with a disability with no way to call an accessible elevator and thus having to wait indefinitely until an accessible elevator happens to respond to the call system. In the 2010 Standards, when an element in one elevator is altered, section 206.6.1 will require the same element to be altered in all elevators that are programmed to respond to the same call button as the altered elevator.

Most commenters favored the proposed requirement. This requirement, according to these commenters, is necessary so a person with a disability need not wait until an accessible elevator responds to his or her call.

One commenter suggested that elevator owners could also comply by modifying the call system so the accessible elevator could be summoned independently. One commenter suggested that this requirement would be difficult for small businesses located in older buildings, and one commenter suggested that this requirement be sent back to the Access Board.

After considering the comments, the Department agrees that this requirement is necessary to ensure that when an individual with a disability presses a call button, an accessible elevator will arrive in a timely manner. The IBC contains a similar provision, and most jurisdictions enforce a version of the IBC as their building code, minimizing the impact of this provision on public entities and public accommodations. Public entities and businesses located in older buildings need not comply with this requirement where it is technically infeasible to do so. Further, as pointed out by one commenter, modifying the call system so the accessible elevator can be summoned independently is another means of complying with this requirement in lieu of altering all other elevators programmed to respond to the same call button. Therefore, the Department has decided not to return this requirement to the Access Board.

Location of accessible routes to stages. The 1991 Standards at section 4.33.5 require an accessible route to connect the accessible seating and the stage, as well as other ancillary spaces used by performers. The 2010 Standards at section 206.2.6 provide in addition that where a circulation path directly connects the seating area and the stage, the accessible route must directly connect the accessible seating and the stage, and, like the 1991 Standards, an accessible route must connect the stage with the ancillary spaces used by performers.

In the NPRM, the Department asked operators of auditoria about the extent to which auditoria already provide direct access to stages and whether there were planned alterations over the next 15 years that included accessible direct routes to stages. The Department also asked how to quantify the benefits of this requirement for persons with disabilities, and invited commenters to provide illustrative anecdotal experiences about the requirement's benefits. The Department received many comments regarding the costs and benefits of this requirement. Although little detail was provided, many industry and governmental entity commenters anticipated that the costs of this requirement would be great and that it would be difficult to implement. They noted that premium seats may have to be removed and that load-bearing walls may have to be relocated. These commenters suggested that the significant costs would deter alterations to the stage area for a great many auditoria. Some commenters suggested that ramps to the front of the stage may interfere with means of egress and emergency exits. Several commenters requested that the requirement apply to new construction only, and one industry commenter requested an exemption for stages used in arenas or amusement parks where there is no audience participation or where the stage is a work area for performers only. One commenter requested that the requirement not apply to temporary stages.

The final rule does not require a direct accessible route to be constructed where a direct circulation path from the seating area to the stage does not exist. Consequently, those commenters who expressed concern about the burden imposed by the revised requirement (i.e., where the stage is constructed with no direct circulation path connecting the general seating and performing area) should note that the final rule will not require the provision of a direct accessible route under these circumstances. The final rule applies to permanent stages, as well as ''temporary stages,'' if there is a direct circulation path from the seating area to the stage. However, the Department does recognize that in some circumstances, such as an alteration to a primary function area, the ability to provide a direct accessible route to a stage may be costly or technically infeasible, the auditorium owner is not precluded by the revised requirement from asserting defenses available under the regulation. In addition, the Department notes that since section 4.33.5 of the 1991 Standards requires an accessible route to a stage, the safe harbor will apply to existing facilities whose stages comply with the 1991 Standards.

Several governmental entities supported accessible auditoria and the revised requirement. One governmental entity noted that its State building code already required direct access, that it was possible to provide direct access, and that creative solutions had been found to do so.

Many advocacy groups and individual commenters strongly supported the revised requirement, discussing the acute need for direct access to stages as it impacts a great number of people at important life events such as graduations and awards ceremonies, at collegiate and competitive performances and other school events, and at entertainment events that include audience participation. Many commenters expressed the belief that direct access is essential for integration mandates to be satisfied and that separate routes are stigmatizing and unequal. The Department agrees with these concerns.

Commenters described the impact felt by persons in wheelchairs who are unable to access the stage at all when others are able to do so. Some of these commenters also discussed the need for performers and production staff who use wheelchairs to have direct

access to the stage and provided a number of examples that illustrated the importance of the rule proposed in the NPRM. Personal anecdotes were provided in comments and at the Department's public hearing on the NPRM. One mother spoke passionately and eloquently about the unequal treatment experienced by her daughter, who uses a wheelchair, at awards ceremonies and band concerts. Her daughter was embarrassed and ashamed to be carried by her father onto a stage at one band concert. When the venue had to be changed for another concert to an accessible auditorium, the band director made sure to comment that he was unhappy with the switch. Rather than endure the embarrassment and indignities, her child dropped out of band the following year. Another father commented about how he was unable to speak from the stage at a PTA meeting at his child's school. Speaking from the floor limited his line of sight and his participation. Several examples were provided of children who could not participate on stage during graduation, awards programs, or special school events, such as plays and festivities. One student did not attend his college graduation because he would not be able to get on stage. Another student was unable to participate in the class Christmas programs or end-of-year parties unless her father could attend and lift her onto the stage. These commenters did not provide a method to quantify the benefits that would accrue by having direct access to stages. One commenter stated, however, that ''the cost of dignity and respect is without measure.''

Many industry commenters and governmental entities suggested that the requirement be sent back to the Access Board for further consideration. One industry commenter mistakenly noted that some international building codes do not incorporate the requirement and that therefore there is a need for further consideration. However, the Department notes that both the 2003 and 2006 editions of the IBC include scoping provisions that are almost identical to this requirement and that these editions of the model code are the most frequently used. Many individuals and advocacy group commenters requested that the requirement be adopted without further delay. These commenters spoke of the acute need for direct access to stages and the amount of time it would take to resubmit the requirement to the Access Board. Several commenters noted that the 2004 ADAAG tracks recent model codes and thus there is no need for further consideration. The Department agrees that no further delay is necessary and therefore has decided not to return the requirement to the Access Board for further consideration.

Attorney areas and witness stands. The 1991 Standards do not require that public entities meet specific architectural standards with regard to the construction and alteration of courtrooms and judicial facilities. Because it is apparent that the judicial facilities of State and local governments have often been inaccessible to individuals with disabilities, as part of the NPRM, the Department proposed the adoption of sections 206.2.4, 231.2, 808, 304, 305, and 902 of the 2004 ADAAG concerning judicial facilities and courtrooms, including requirements for accessible courtroom stations and accessible jury boxes and witness stands.

Those who commented on access to judicial facilities and courtrooms uniformly favored the adoption of the 2010 Standards. Virtually all of the commenters stated that accessible judicial facilities are crucial to ensuring that individuals with disabilities are afforded due process under law and have an equal opportunity to participate in the judicial process. None of the commenters favored returning this requirement to the Access Board for further consideration.

The majority of commenters, including many disability rights and advocacy organizations, stated that it is crucial for individuals with disabilities to have effective and meaningful access to our judicial system so as to afford them due process under law. They objected to asking the Access Board to reconsider this requirement. In addition to criticizing the initial RIA for virtually ignoring the intangible and non-monetary benefits associated with accessible courtrooms, these commenters frequently cited the Supreme Court's decision in *Tennessee* v. *Lane*, 541 U.S. 509, 531 (2004),[4] as ample justification for the requirement, noting the Court's finding that ''[t]he unequal treatment of disabled persons in the administration of judicial services has a long history, and has persisted despite several legislative efforts to remedy the problem of disability discrimination.'' *Id.* at 531. These commenters also made a number of observations, including the following: providing effective access to individuals with mobility impairments is not possible when architectural barriers impede their path of travel and negatively emphasize an individual's disability; the perception generated by makeshift accommodations discredits witnesses and attorneys with disabilities, who should not be stigmatized or treated like second-class citizens; the cost of accessibility modifications to existing courthouses can often be significantly decreased by planning ahead, by focusing on low-cost options that provide effective access, and by addressing existing barriers when reasonable modifications to the courtroom can be made;

[4] The Supreme Court in *Tennessee* v. *Lane*, 541 U.S. 509, 533–534 (2004), held that title II of the ADA constitutes a valid exercise of Congress' enforcement power under the Fourteenth Amendment in cases implicating the fundamental right of access to the courts.

by planning ahead and by following best practices, jurisdictions can avoid those situations where it is apparent that someone's disability is the reason why ad hoc arrangements have to be made prior to the beginning of court proceedings; and accessibility should be a key concern during the planning and construction process so as to ensure that both courtroom grandeur and accessibility are achieved. One commenter stated that, in order for attorneys with disabilities to perform their professional duties to their clients and the court, it is essential that accessible courtrooms, conference rooms, law libraries, judicial chambers, and other areas of a courthouse be made barrier-free by taking accessible design into account prior to construction.

Numerous commenters identified a variety of benefits that would accrue as a result of requiring judicial facilities to be accessible. These included the following: maintaining the decorum of the courtroom and eliminating the disruption of court proceedings when individuals confront physical barriers; providing an accessible route to the witness stand and attorney area and clear floor space to accommodate a wheelchair within the witness area; establishing crucial lines of sight between the judge, jury, witnesses, and attorneys—which commenters described as crucial; ensuring that the judge and the jury will not miss key visual indicators of a witness; maintaining a witness's or attorney's dignity and credibility; shifting the focus from a witness's disability to the substance of that person's testimony; fostering the independence of an individual with disability; allowing persons with mobility impairments to testify as witnesses, including as expert witnesses; ensuring the safety of various participants in a courtroom proceeding; and avoiding unlawful discrimination. One commenter stated that equal access to the well of the courtroom for both attorney and client is important for equal participation and representation in our court system. Other commenters indicated that accessible judicial facilities benefit a wide range of people, including many persons without disabilities, senior citizens, parents using strollers with small children, and attorneys and court personnel wheeling documents into the courtroom. One commenter urged the adoption of the work area provisions because they would result in better workplace accessibility and increased productivity. Several commenters urged the adoption of the rule because it harmonizes the ADAAG with the model IBC, the standards developed by the American National Standards Institute (ANSI), and model codes that have been widely adopted by State and local building departments, thus increasing the prospects for better understanding and compliance with the ADAAG by architects, designers, and builders.

Several commenters mentioned the report ''Justice for All: Designing Accessible Courthouses'' (Nov. 15, 2006), available at *http://www.access-board.gov/caac/report.htm* (Nov. 24, 2009) (last visited June 24, 2010). The report, prepared by the Courthouse Access Advisory Committee for the Access Board, contained recommendations for the Board's use in developing and disseminating guidance on accessible courthouse design under the ADA and the ABA. These commenters identified some of the report's best practices concerning courtroom accessibility for witness stands, jury boxes, and attorney areas; addressed the costs and benefits arising from the use of accessible courtrooms; and recommended that the report be incorporated into the Department's final rule. With respect to existing courtrooms, one commenter in this group suggested that consideration be given to ensuring that there are barrier-free emergency evacuation routes for all persons in the courtroom, including different evacuation routes for different classes of individuals given the unique nature of judicial facilities and courtrooms.

The Department declines to incorporate the report into the regulation. However, the Department encourages State and local governments to consult the Committee report as a useful guide on ways to facilitate and increase accessibility of their judicial facilities. The report includes many excellent examples of accessible courtroom design.

One commenter proposed that the regulation also require a sufficient number of accessible benches for judges with disabilities. Under section 206.2.4 of the 2004 ADAAG, raised courtroom stations used by judges and other judicial staff are not required to provide full vertical access when first constructed or altered, as long as the required clear floor space, maneuvering space, and any necessary electrical service for future installation of a means of vertical access, is provided at the time of new construction or can be achieved without substantial reconstruction during alterations. The Department believes that this standard easily allows a courtroom station to be adapted to provide vertical access in the event a judge requires an accessible judge's bench.

The Department received several anecdotal accounts of courtroom experiences of individuals with disabilities. One commenter recalled numerous difficulties that her law partner faced as the result of inaccessible courtrooms, and their concerns that the attention of judge and jury was directed away from the merits of case to the lawyer and his disability. Among other things, the lawyer had to ask the judges on an appellate panel to wait while he maneuvered through insufficient space to the counsel table; ask judges to relocate bench conferences to accessible areas; and make last-minute preparations and rearrangements that his peers without

disabilities did not have to make. Another commenter with extensive experience as a lawyer, witness, juror, and consultant observed that it is common practice for a witness who uses mobility devices to sit in front of the witness stand. He described how disconcerting and unsettling it has been for him to testify in front of the witness stand, which allowed individuals in the courtroom to see his hands or legs shaking because of spasticity, making him feel like a second-class citizen.

Two other commenters with mobility disabilities described their experiences testifying in court. One accessibility consultant stated that she was able to represent her clients successfully when she had access to an accessible witness stand because it gave her the ability ''to look the judge in the eye, speak comfortably and be heard, hold up visual aids that could be seen by the judge, and perform without an architectural stigma.'' She did not believe that she was able to achieve a comparable outcome or have meaningful access to the justice system when she testified from an inaccessible location. Similarly, a licensed clinical social worker indicated that she has testified in several cases in accessible courtrooms, and that having full access to the witness stand in the presence of the judge and the jury was important to her effectiveness as an expert witness. She noted that accessible courtrooms often are not available, and that she was aware of instances in which victims, witnesses, and attorneys with disabilities have not been able to obtain needed disability accommodations in order to fulfill their roles at trial.

Two other commenters indicated that they had been chosen for jury duty but that they were effectively denied their right to participate as jurors because the courtrooms were not accessible. Another commenter indicated that he has had to sit apart from the other jurors because the jury box was inaccessible.

A number of commenters expressed approval of actions taken by States to facilitate access in judicial facilities. A member of a State commission on disability noted that the State had been working toward full accessibility since 1997 when the Uniform Building Code required interior accessible routes. This commenter stated that the State's district courts had been renovated to the maximum extent feasible to provide greater access. This commenter also noted that a combination of Community Development Block Grant money and State funds are often awarded for renovations of courtroom areas. One advocacy group that has dealt with court access issues stated that members of the State legal community and disability advocates have long been promoting efforts to ensure that the State courts are accessible to individuals with disabilities. The comment cited a publication distributed to the Washington State courts by the State bar association entitled, ''Ensuring Equal Access to the Courts for Persons with Disabilities.'' (Aug. 2006), available at *http://www.wsba.org/ensuringaccessguidebook.pdf* (last visited July 20, 2010). In addition, the commenter also indicated that the State supreme court had promulgated a new rule governing how the courts should respond to requests of accommodation based upon disability; the State legislature had created the position of Disability Access Coordinator for Courts to facilitate accessibility in the court system; and the State legislature had passed a law requiring that all planned improvements and alterations to historic courthouses be approved by the ADA State facilities program manager and committee in order to ensure that the alterations will enhance accessibility.

The Department has decided to adopt the requirements in the 2004 ADAAG with respect to judicial facilities and courtrooms and will not ask the Access Board to review these requirements. The final rule is wholly consistent with the objectives of the ADA. It addresses a well-documented history of discrimination with respect to judicial administration and significantly increases accessibility for individuals with disabilities. It helps ensure that they will have an opportunity to participate equally in the judicial process. As stated, the final rule is consistent with a number of model and local building codes that have been widely adopted by State and local building departments and provides greater uniformity for planners, architects, and builders.

Assistive listening systems. The 1991 Standards at sections 4.33.6 and 4.33.7 require assistive listening systems (ALS) in assembly areas and prescribe general performance standards for ALS systems. In the NPRM, the Department proposed adopting the technical specifications in the 2004 ADAAG for ALS that are intended to ensure better quality and effective delivery of sound and information for persons with hearing impairments, especially those using hearing aids. The Department noted in the NPRM that since 1991, advancements in ALS and the advent of digital technology have made these systems more amenable to uniform standards, which, among other things, should ensure that a certain percentage of required ALS systems are hearing-aid compatible. 73 FR 34466, 34471 (June 17, 2008). The 2010 Standards at section 219 provide scoping requirements and at section 706 address receiver jacks, hearing aid compatibility, sound pressure level, signal-to-noise ratio, and peak clipping level. The Department requested comments specifically from arena and assembly area administrators on the cost and maintenance issues associated with ALS, asked generally about the costs and

benefits of ALS, and asked whether, based upon the expected costs of ALS, the issue should be returned to the Access Board for further consideration.

Comments from advocacy organizations noted that persons who develop significant hearing loss often discontinue their normal routines and activities, including meetings, entertainment, and large group events, due to a sense of isolation caused by the hearing loss or embarrassment. Individuals with longstanding hearing loss may never have participated in group activities for many of the same reasons. Requiring ALS may allow individuals with disabilities to contribute to the community by joining in government and public events, and increasing economic activity associated with community activities and entertainment. Making public events and entertainment accessible to persons with hearing loss also brings families and other groups that include persons with hearing loss into more community events and activities, thus exponentially increasing the benefit from ALS.

Many commenters noted that when a person has significant hearing loss, that person may be able to hear and understand information in a quiet situation with the use of hearing aids or cochlear implants; however, as background noise increases and the distance between the source of the sound and the listener grows, and especially where there is distortion in the sound, an ALS becomes essential for basic comprehension and understanding. Commenters noted that among the 31 million Americans with hearing loss, and with a projected increase to over 78 million Americans with hearing loss by 2030, the benefit from ALS is huge and growing. Advocates for persons with disabilities and individuals commented that they appreciated the improvements in the 2004 ADAAG standards for ALS, including specifications for the ALS systems and performance standards. They noted that neckloops that translate the signal from the ALS transmitter to a frequency that can be heard on a hearing aid or cochlear implant are much more effective than separate ALS system headsets, which sometimes create feedback, often malfunction, and may create distractions for others seated nearby. Comments from advocates and users of ALS systems consistently noted that the Department's regulation should, at a minimum, be consistent with the 2004 ADAAG. Although there were requests for adjustments in the scoping requirements from advocates seeking increased scoping requirements, and from large venue operators seeking fewer requirements, there was no significant concern expressed by commenters about the technical specifications for ALS in the 2004 ADAAG.

Some commenters from trade associations and large venue owners criticized the scoping requirements as too onerous and one commenter asked for a remand to the Access Board for new scoping rules. However, one State agency commented that the 2004 ADAAG largely duplicates the requirements in the 2006 IBC and the 2003 ANSI codes, which means that entities that comply with those standards would not incur additional costs associated with ADA compliance.

According to one State office of the courts, the cost to install either an infrared system or an FM system at average-sized facilities, including most courtrooms covered by title II, would be between $500 and $2,000, which the agency viewed as a small price in comparison to the benefits of inclusion. Advocacy organizations estimated wholesale costs of ALS systems at about $250 each and individual neckloops to link the signal from the ALS transmitter to hearing aids or cochlear implants at less than $50 per unit. Many commenters pointed out that if a facility already is using induction neckloops, it would already be in compliance and would not have any additional installation costs. One major city commented that annual maintenance is about $2,000 for the entire system of performance venues in the city. A trade association representing very large venues estimated annual maintenance and upkeep expenses, including labor and replacement parts, to be at most about $25,000 for a very large professional sports stadium.

One commenter suggested that the scoping requirements for ALS in the 2004 ADAAG were too stringent and that the Department should return them to the Access Board for further review and consideration. Others commented that the requirement for new ALS systems should mandate multichannel receivers capable of receiving audio description for persons who are blind, in addition to a channel for amplification for persons who are hard of hearing. Some comments suggested that the Department should require a set schedule and protocol of mandatory maintenance. Department regulations already require maintenance of accessible features at §35.133(a) of the title II regulation, which obligates a title II entity to maintain ALS in good working order. The Department recognizes that maintenance of ALS is key to its usability. Necessary maintenance will vary dramatically from venue to venue based upon a variety of factors including frequency of use, number of units, quality of equipment, and others items. Accordingly, the Department has determined that it is not appropriate to mandate details of maintenance, but notes that failure to maintain ALS would violate §35.133(a) of this rule.

The NPRM asked whether the Department should return the issue of ALS requirements to the Access Board. The Department has received substantial feedback on the technical and scoping requirements for ALS and is

convinced that these requirements are reasonable and that the benefits justify the requirements. In addition, the Department believes that the new specifications will make ALS work more effectively for more persons with disabilities, which, together with a growing population of new users, will increase demand for ALS, thus mooting criticism from some large venue operators about insufficient demand. Thus, the Department has determined that it is unnecessary to refer this issue back to the Access Board for reconsideration.

Accessible teeing grounds, putting greens, and weather shelters. In the NPRM, the Department sought public input on the proposed requirements for accessible golf courses. These requirements specifically relate to accessible routes within the boundaries of courses, as well as the accessibility of golfing elements (*e.g.*, teeing grounds, putting greens, weather shelters).

In the NPRM, the Department sought information from the owners and operators of golf courses, both public and private, on the extent to which their courses already have golf car passages, and, if so, whether they intended to avail themselves of the proposed accessible route exception for golf car passages. 73 FR 34466, 34471 (June 17, 2008).

Most commenters expressed support for the adoption of an accessible route requirement that includes an exception permitting golf car passage as all or part of an accessible route. Comments in favor of the proposed standard came from golf course owners and operators, individuals, organizations, and disability rights groups, while comments opposing adoption of the golf course requirements generally came from golf courses and organizations representing the golf course industry.

The majority of commenters expressed the general viewpoint that nearly all golf courses provide golf cars and have either well-defined paths or permit golf cars to drive on the course where paths are not present, thus meeting the accessible route requirement. Several commenters disagreed with the assumption in the initial RIA, that virtually every tee and putting green on an existing course would need to be regraded in order to provide compliant accessible routes. According to one commenter, many golf courses are relatively flat with little slope, especially those heavily used by recreational golfers. This commenter concurred with the Department that it is likely that most existing golf courses have a golf car passage to tees and greens, thereby substantially minimizing the cost of bringing an existing golf course into compliance with the proposed standards. One commenter reported that golf course access audits found that the vast majority of public golf courses would have little difficulty in meeting the proposed golf course requirements. In the view of some commenters, providing access to golf courses would increase golf participation by individuals with disabilities.

The Department also received many comments requesting clarification of the term ''golf car passage.'' For example, one commenter requesting clarification of the term ''golf car passage'' argued that golf courses typically do not provide golf car paths or pedestrian paths onto the actual teeing grounds or greens, many of which are higher or lower than the car path. This commenter argued that if golf car passages were required to extend onto teeing grounds and greens in order to qualify for an exception, then some golf courses would have to substantially regrade teeing grounds and greens at a high cost.

After careful consideration of the comments, the Department has decided to adopt the 2010 Standards specific to golf facilities. The Department believes that in order for individuals with mobility disabilities to have an opportunity to play golf that is equal to golfers without disabilities, it is essential that golf courses provide an accessible route or accessible golf car passage to connect accessible elements and spaces within the boundary of the golf course, including teeing grounds, putting greens, and weather shelters.

PUBLIC COMMENTS ON OTHER NPRM ISSUES

Equipment and furniture. In the 1991 title II regulation, there are no specific provisions addressing equipment and furniture, although §35.150(b) states that one means by which a public entity can make its program accessible to individuals with disabilities is ''redesign of equipment.'' In the NPRM, the Department announced its intention not to regulate equipment, proposing instead to continue with the current approach, under which equipment and furniture are covered by other provisions, including those requiring reasonable modifications of policies, practices, or procedures, program accessibility, and effective communication. The Department suggested that entities apply the accessibility standards for fixed equipment in the 2004 ADAAG to analogous free-standing equipment in order to ensure that such equipment is accessible, and that entities consult relevant portions of the 2004 ADAAG and standards from other Federal agencies to make equipment accessible to individuals who are blind or have low vision (*e.g.*, the communication-related standards for ATMs in the 2004 ADAAG).

The Department received numerous comments objecting to this decision and urging the Department to issue equipment and furniture regulations. Based on these comments, the Department has decided that it needs to revisit the issuance of equipment and furniture regulations and it intends to do so in future rulemaking.

Among the commenters' key concerns, many from the disability community and some public entities, were objections to the Department's earlier decision not to issue equipment regulations, especially for medical equipment. These groups recommended that the Department list by name certain types of medical equipment that must be accessible, including exam tables (that lower to 15 inches above floor or lower), scales, medical and dental chairs, and radiologic equipment (including mammography equipment). These commenters emphasized that the provision of medically related equipment and furniture should also be specifically regulated since they are not included in the 2004 ADAAG (while depositories, change machines, fuel dispensers, and ATMs were) and because of their crucial role in the provision of healthcare. Commenters described how the lack of accessible medical equipment negatively affects the health of individuals with disabilities. For example, some individuals with mobility disabilities do not get thorough medical care because their health providers do not have accessible examination tables or scales.

Commenters also said that the Department's stated plan to assess the financial impact of free-standing equipment on businesses was not necessary, as any regulations could include a financial balancing test. Other commenters representing persons who are blind or have low vision urged the Department to mandate accessibility for a wide range of equipment—including household appliances (stoves, washers, microwaves, and coffee makers), audiovisual equipment (stereos and DVD players), exercise machines, vending equipment, ATMs, computers at Internet cafes or hotel business centers, reservations kiosks at hotels, and point-of-sale devices—through speech output and tactile labels and controls. They argued that modern technology allows such equipment to be made accessible at minimal cost. According to these commenters, the lack of such accessibility in point-of-sale devices is particularly problematic because it forces blind individuals to provide personal or sensitive information (such as personal identification numbers) to third parties, which exposes them to identity fraud. Because the ADA does not apply directly to the manufacture of products, the Department lacks the authority to issue design requirements for equipment designed exclusively for use in private homes. *See* Department of Justice, Americans with Disabilities Act, *ADA Title III Technical Assistance Manual Covering Public Accommodations and Commercial Facilities,* III–4.4200, available at *http://www.ada.gov/taman3.*

Some commenters urged the Department to require swimming pool operators to provide aquatic wheelchairs for the use of persons with disabilities when the swimming pool has a sloped entry. If there is a sloped entry, a person who uses a wheelchair would require a wheelchair designed for use in the water in order to gain access to the pool because taking a personal wheelchair into water would rust and corrode the metal on the chair and damage any electrical components of a power wheelchair. Providing an aquatic wheelchair made of non-corrosive materials and designed for access into the water will protect the water from contamination and avoid damage to personal wheelchairs or other mobility aids.

Additionally, many commenters urged the Department to regulate the height of beds in accessible hotel guest rooms and to ensure that such beds have clearance at the floor to accommodate a mechanical lift. These commenters noted that in recent years, hotel beds have become higher as hotels use thicker mattresses, thereby making it difficult or impossible for many individuals who use wheelchairs to transfer onto hotel beds. In addition, many hotel beds use a solid-sided platform base with no clearance at the floor, which prevents the use of a portable lift to transfer an individual onto the bed. Consequently, individuals who bring their own lift to transfer onto the bed cannot independently get themselves onto the bed. Some commenters suggested various design options that might avoid these situations.

The Department intends to provide specific guidance relating to both hotel beds and aquatic wheelchairs in a future rulemaking. For the present, the Department reminds covered entities that they have an obligation to undertake reasonable modifications to their current policies and to make their programs accessible to persons with disabilities. In many cases, providing aquatic wheelchairs or adjusting hotel bed heights may be necessary to comply with those requirements.

The Department has decided not to add specific scoping or technical requirements for equipment and furniture in this final rule. Other provisions of the regulation, including those requiring reasonable modifications of policies, practices, or procedures, program accessibility, and effective communication may require the provision of accessible equipment in individual circumstances. The 1991 title II regulation at §35.150(a) requires that entities operate each service, program, or activity so that, when viewed in its entirety, each is readily accessible to, and usable by, individuals with disabilities, subject to a defense of fundamental alteration or undue financial and administrative burdens. Section 35.150(b) specifies that such entities may meet their program accessibility obligation through the ''redesign of equipment.'' The Department expects to undertake a rulemaking to address these issues in the near future.

Accessible golf cars. An accessible golf car means a device that is designed and manufactured to be driven on all areas of a golf course, is independently usable by individuals with mobility disabilities, has a hand-operated brake and accelerator, carries golf clubs in an accessible location, and has a seat that both swivels and raises to put the golfer in a standing or semi-standing position.

The 1991 title II regulation contained no language specifically referencing accessible golf cars. After considering the comments addressing the ANPRM's proposed requirement that golf courses make at least one specialized golf car available for the use of individuals with disabilities, and the safety of accessible golf cars and their use on golf course greens, the Department stated in the NPRM that it would not issue regulations specific to golf cars.

The Department received many comments in response to its decision to propose no new regulation specific to accessible golf cars. The majority of commenters urged the Department to require golf courses to provide accessible golf cars. These comments came from individuals, disability advocacy and recreation groups, a manufacturer of accessible golf cars, and representatives of local government. Comments supporting the Department's decision not to propose a new regulation came from golf course owners, associations, and individuals.

Many commenters argued that while the existing title II regulation covered the issue, the Department should nonetheless adopt specific regulatory language requiring golf courses to provide accessible golf cars. Some commenters noted that many local governments and park authorities that operate public golf courses have already provided accessible golf cars. Experience indicates that such golf cars may be used without damaging courses. Some argued that having accessible golf cars would increase golf course revenue by enabling more golfers with disabilities to play the game. Several commenters requested that the Department adopt a regulation specifically requiring each golf course to provide one or more accessible golf cars. Other commenters recommended allowing golf courses to make ''pooling'' arrangements to meet demands for such cars. A few commenters expressed support for using accessible golf cars to accommodate golfers with and without disabilities. Commenters also pointed out that the Departments of the Interior and Defense have already mandated that golf courses under their jurisdictional control must make accessible golf cars available unless it can be demonstrated that doing so would change the fundamental nature of the game.

While an industry association argued that at least two models of accessible golf cars meet the specifications recognized in the field, and that accessible golf cars cause no more damage to greens or other parts of golf courses than players standing or walking across the course, other commenters expressed concerns about the potential for damage associated with the use of accessible golf cars. Citing safety concerns, golf organizations recommended that an industry safety standard be developed.

Although the Department declines to add specific scoping or technical requirements for golf cars to this final rule, the Department expects to address requirements for accessible golf cars in future rulemaking. In the meantime, the Department believes that golfers with disabilities who need accessible golf cars are protected by other existing provisions in the title II regulation, including those requiring reasonable modifications of policies, practices, or procedures, and program accessibility.

Web site accessibility. Many commenters expressed disappointment that the NPRM did not require title II entities to make their Web sites, through which they offer programs and services, accessible to individuals with disabilities, including those who are blind or have low vision. Commenters argued that the cost of making Web sites accessible, through Web site design, is minimal, yet critical to enabling individuals with disabilities to benefit from the entity's programs and services. Internet Web sites, when accessible, provide individuals with disabilities great independence, and have become an essential tool for many Americans. Commenters recommended that the Department require covered entities, at a minimum, to meet the section 508 Standard for Electronic and Information Technology for Internet accessibility. Under section 508 of the Rehabilitation Act of 1973, Federal agencies are required to make their Web sites accessible. 29 U.S.C. 794(d); 36 CFR 1194.

The Department agrees that the ability to access, on an equal basis, the programs and activities offered by public entities through Internet-based Web sites is of great importance to individuals with disabilities, particularly those who are blind or who have low vision. When the ADA was enacted in 1990, the Internet was unknown to most Americans. Today, the Internet plays a critical role in daily life for personal, civic, commercial, and business purposes. In a period of shrinking resources, public entities increasingly rely on the web as an efficient and comprehensive way to deliver services and to inform and communicate with their citizens and the general public. In light of the growing importance Web sites play in providing access to public services and to disseminating the information citizens need to participate fully in civic life, accessing the Web sites of public entities can play a significant role in fulfilling the goals of the ADA.

Although the language of the ADA does not explicitly mention the Internet, the Department has taken the position that title II covers Internet Web site access. Public entities that choose to provide services through web-based applications (*e.g.,* renewing library books or driver's licenses) or that communicate with their constituents or provide information through the Internet must ensure that individuals with disabilities have equal access to such services or information, unless doing so would result in an undue financial and administrative burden or a fundamental alteration in the nature of the programs, services, or activities being offered. The Department has issued guidance on the ADA as applied to the Web sites of public entities in a 2003 publication entitled, *Accessibility of State and Local Government Web sites to People with Disabilities,* (June 2003) available at *http://www.ada.gov/websites2.htm.* As the Department stated in that publication, an agency with an inaccessible Web site may also meet its legal obligations by providing an alternative accessible way for citizens to use the programs or services, such as a staffed telephone information line. However, such an alternative must provide an equal degree of access in terms of hours of operation and the range of options and programs available. For example, if job announcements and application forms are posted on an inaccessible Web site that is available 24 hours a day, seven days a week to individuals without disabilities, then the alternative accessible method must also be available 24 hours a day, 7 days a week. Additional guidance is available in the Web Content Accessibility Guidelines (WCAG), (May 5, 1999) available at *http://www.w3.org/TR/WAI-WEBCONTENT* (last visited June 24, 2010) which are developed and maintained by the Web Accessibility Initiative, a subgroup of the World Wide Web Consortium (W3C®).

The Department expects to engage in rulemaking relating to website accessibility under the ADA in the near future. The Department has enforced the ADA in the area of website accessibility on a case-by-case basis under existing rules consistent with the guidance noted above, and will continue to do so until the issue is addressed in a final regulation.

Multiple chemical sensitivities. The Department received comments from a number of individuals asking the Department to add specific language to the final rule addressing the needs of individuals with chemical sensitivities. These commenters expressed concern that the presence of chemicals interferes with their ability to participate in a wide range of activities. These commenters also urged the Department to add multiple chemical sensitivities to the definition of a disability.

The Department has determined not to include specific provisions addressing multiple chemical sensitivities in the final rule. In order to be viewed as a disability under the ADA, an impairment must substantially limit one or more major life activities. An individual's major life activities of respiratory or neurological functioning may be substantially limited by allergies or sensitivity to a degree that he or she is a person with a disability. When a person has this type of disability, a covered entity may have to make reasonable modifications in its policies and practices for that person. However, this determination is an individual assessment and must be made on a case-by-case basis.

Examinations and Courses. The Department received one comment requesting that it specifically include language regarding examinations and courses in the title II regulation. Because section 309 of the ADA 42 U.S.C. 12189, reaches ''[a]ny person that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or post secondary education, professional, or trade purposes,'' public entities also are covered by this section of the ADA. Indeed, the requirements contained in title II (including the general prohibitions against discrimination, the program access requirements, the reasonable modifications requirements, and the communications requirements) apply to courses and examinations administered by public entities that meet the requirements of section 309. While the Department considers these requirements to be sufficient to ensure that examinations and courses administered by public entities meet the section 309 requirements, the Department acknowledges that the title III regulation, because it addresses examinations in some detail, is useful as a guide for determining what constitutes discriminatory conduct by a public entity in testing situations. *See* 28 CFR 36.309.

Hotel Reservations. In the NPRM, at §36.302(e), the Department proposed adding specific language to title III addressing the requirements that hotels, timeshare resorts, and other places of lodging make reasonable modifications to their policies, practices, or procedures, when necessary to ensure that individuals with disabilities are able to reserve accessible hotel rooms with the same efficiency, immediacy, and convenience as those who do not need accessible guest rooms. The NPRM did not propose adding comparable language to the title II regulation as the Department believes that the general nondiscrimination, program access, effective communication, and reasonable modifications requirements of title II provide sufficient guidance to public entities that operate places of lodging (*i.e.,* lodges in State parks, hotels on public college campuses). The Department received no public comments suggesting that it add language

on hotel reservations comparable to that proposed for the title III regulation. Although the Department continues to believe that it is unnecessary to add specific language to the title II regulation on this issue, the Department acknowledges that the title III regulation, because it addresses hotel reservations in some detail, is useful as a guide for determining what constitutes discriminatory conduct by a public entity that operates a reservation system serving a place of lodging.*See* 28 CFR 36.302(e).

[AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010; 76 FR 13285, Mar. 11, 2011]

APPENDIX B TO PART 35—GUIDANCE ON ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES ORIGINALLY PUBLISHED JULY 26, 1991

NOTE: For the convenience of the reader, this appendix contains the text of the preamble to the final regulation on nondiscrimination on the basis of disability in State and local government services beginning at the heading ''Section-by-Section Analysis'' and ending before ''List of Subjects in 28 CFR Part 35'' (56 FR 35696, July 26, 1991).

SECTION-BY-SECTION ANALYSIS

Subpart A—General

Section 35.101 Purpose

Section 35.101 states the purpose of the rule, which is to effectuate subtitle A of title II of the Americans with Disabilities Act of 1990 (the Act), which prohibits discrimination on the basis of disability by public entities. This part does not, however, apply to matters within the scope of the authority of the Secretary of Transportation under subtitle B of title II of the Act.

Section 35.102 Application

This provision specifies that, except as provided in paragraph (b), the regulation applies to all services, programs, and activities provided or made available by public entities, as that term is defined in §35.104. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), which prohibits discrimination on the basis of handicap in federally assisted programs and activities, already covers those programs and activities of public entities that receive Federal financial assistance. Title II of the ADA extends this prohibition of discrimination to include all services, programs, and activities provided or made available by State and local governments or any of their instrumentalities or agencies, regardless of the receipt of Federal financial assistance. Except as provided in §35.134, this part does not apply to private entities.

The scope of title II's coverage of public entities is comparable to the coverage of Federal Executive agencies under the 1978 amendment to section 504, which extended section 504's application to all programs and activities ''conducted by'' Federal Executive agencies, in that title II applies to anything a public entity does. Title II coverage, however, is not limited to ''Executive'' agencies, but includes activities of the legislative and judicial branches of State and local governments. All governmental activities of public entities are covered, even if they are carried out by contractors. For example, a State is obligated by title II to ensure that the services, programs, and activities of a State park inn operated under contract by a private entity are in compliance with title II's requirements. The private entity operating the inn would also be subject to the obligations of public accommodations under title III of the Act and the Department's title III regulations at 28 CFR part 36.

Aside from employment, which is also covered by title I of the Act, there are two major categories of programs or activities covered by this regulation: those involving general public contact as part of ongoing operations of the entity and those directly administered by the entities for program beneficiaries and participants. Activities in the first category include communication with the public (telephone contacts, office walk-ins, or interviews) and the public's use of the entity's facilities. Activities in the second category include programs that provide State or local government services or benefits.

Paragraph (b) of §35.102 explains that to the extent that the public transportation services, programs, and activities of public entities are covered by subtitle B of title II of the Act, they are subject to the regulation of the Department of Transportation (DOT) at 49 CFR part 37, and are not covered by this part. The Department of Transportation's ADA regulation establishes specific requirements for construction of transportation facilities and acquisition of vehicles. Matters not covered by subtitle B, such as the provision of auxiliary aids, are covered by this rule. For example, activities that are covered by the Department of Transportation's regulation implementing subtitle B are not required to be included in the self-evaluation required by §35.105. In addition, activities not specifically addressed by DOT's ADA regulation may be covered by DOT's regulation implementing section 504 for its federally assisted programs and activities at 49 CFR part 27. Like other programs of public entities that are also recipients of Federal financial assistance, those programs would be covered by both the section 504 regulation and this part. Although

airports operated by public entities are not subject to DOT's ADA regulation, they are subject to subpart A of title II and to this rule.

Some commenters asked for clarification about the responsibilities of public school systems under section 504 and the ADA with respect to programs, services, and activities that are not covered by the Individuals with Disabilities Education Act (IDEA), including, for example, programs open to parents or to the public, graduation ceremonies, parent-teacher organization meetings, plays and other events open to the public, and adult education classes. Public school systems must comply with the ADA in all of their services, programs, or activities, including those that are open to parents or to the public. For instance, public school systems must provide program accessibility to parents and guardians with disabilities to these programs, activities, or services, and appropriate auxiliary aids and services whenever necessary to ensure effective communication, as long as the provision of the auxiliary aids results neither in an undue burden or in a fundamental alteration of the program.

Section 35.103 Relationship to Other Laws

Section 35.103 is derived from sections 501 (a) and (b) of the ADA. Paragraph (a) of this section provides that, except as otherwise specifically provided by this part, title II of the ADA is not intended to apply lesser standards than are required under title V of the Rehabilitation Act of 1973, as amended (29 U.S.C. 790–94), or the regulations implementing that title. The standards of title V of the Rehabilitation Act apply for purposes of the ADA to the extent that the ADA has not explicitly adopted a different standard than title V. Because title II of the ADA essentially extends the antidiscrimination prohibition embodied in section 504 to all actions of State and local governments, the standards adopted in this part are generally the same as those required under section 504 for federally assisted programs. Title II, however, also incorporates those provisions of titles I and III of the ADA that are not inconsistent with the regulations implementing section 504. Judiciary Committee report, H.R. Rep. No. 485, 101st Cong., 2d Sess., pt. 3, at 51 (1990) (hereinafter ''Judiciary report'') ; Education and Labor Committee report, H.R. Rep. No. 485, 101st Cong., 2d Sess., pt. 2, at 84 (1990) (hereinafter ''Education and Labor report''). Therefore, this part also includes appropriate provisions derived from the regulations implementing those titles. The inclusion of specific language in this part, however, should not be interpreted as an indication that a requirement is not included under a regulation implementing section 504.

Paragraph (b) makes clear that Congress did not intend to displace any of the rights or remedies provided by other Federal laws (including section 504) or other State laws (including State common law) that provide greater or equal protection to individuals with disabilities. As discussed above, the standards adopted by title II of the ADA for State and local government services are generally the same as those required under section 504 for federally assisted programs and activities. Subpart F of the regulation establishes compliance procedures for processing complaints covered by both this part and section 504.

With respect to State law, a plaintiff may choose to pursue claims under a State law that does not confer greater substantive rights, or even confers fewer substantive rights, if the alleged violation is protected under the alternative law and the remedies are greater. For example, a person with a physical disability could seek damages under a State law that allows compensatory and punitive damages for discrimination on the basis of physical disability, but not on the basis of mental disability. In that situation, the State law would provide narrower coverage, by excluding mental disabilities, but broader remedies, and an individual covered by both laws could choose to bring an action under both laws. Moreover, State tort claims confer greater remedies and are not preempted by the ADA. A plaintiff may join a State tort claim to a case brought under the ADA. In such a case, the plaintiff must, of course, prove all the elements of the State tort claim in order to prevail under that cause of action.

Section 35.104 Definitions

''Act.'' The word ''Act'' is used in this part to refer to the Americans with Disabilities Act of 1990, Public Law 101–336, which is also referred to as the ''ADA.''

''Assistant Attorney General.'' The term ''Assistant Attorney General'' refers to the Assistant Attorney General of the Civil Rights Division of the Department of Justice.

''Auxiliary aids and services.'' Auxiliary aids and services include a wide range of services and devices for ensuring effective communication. The proposed definition in §35.104 provided a list of examples of auxiliary aids and services that were taken from the definition of auxiliary aids and services in section 3(1) of the ADA and were supplemented by examples from regulations implementing section 504 in federally conducted programs (see 28 CFR 39.103).

A substantial number of commenters suggested that additional examples be added to this list. The Department has added several items to this list but wishes to clarify that the list is not an all-inclusive or exhaustive catalogue of possible or available auxiliary

aids or services. It is not possible to provide an exhaustive list, and an attempt to do so would omit the new devices that will become available with emerging technology.

Subparagraph (1) lists several examples, which would be considered auxiliary aids and services to make aurally delivered materials available to individuals with hearing impairments. The Department has changed the phrase used in the proposed rules, ''orally delivered materials,'' to the statutory phrase, ''aurally delivered materials,'' to track section 3 of the ADA and to include non-verbal sounds and alarms, and computer generated speech.

The Department has added videotext displays, transcription services, and closed and open captioning to the list of examples. Videotext displays have become an important means of accessing auditory communications through a public address system. Transcription services are used to relay aurally delivered material almost simultaneously in written form to persons who are deaf or hearing-impaired. This technology is often used at conferences, conventions, and hearings. While the proposed rule expressly included television decoder equipment as an auxiliary aid or service, it did not mention captioning itself. The final rule rectifies this omission by mentioning both closed and open captioning.

Several persons and organizations requested that the Department replace the term ''telecommunications devices for deaf persons'' or ''TDD's'' with the term ''text telephone.'' The Department has declined to do so. The Department is aware that the Architectural and Transportation Barriers Compliance Board (ATBCB) has used the phrase ''text telephone'' in lieu of the statutory term ''TDD'' in its final accessibility guidelines. Title IV of the ADA, however, uses the term ''Telecommunications Device for the Deaf'' and the Department believes it would be inappropriate to abandon this statutory term at this time.

Several commenters urged the Department to include in the definition of ''auxiliary aids and services'' devices that are now available or that may become available with emerging technology. The Department declines to do so in the rule. The Department, however, emphasizes that, although the definition would include ''state of the art'' devices, public entities are not required to use the newest or most advanced technologies as long as the auxiliary aid or service that is selected affords effective communication.

Subparagraph (2) lists examples of aids and services for making visually delivered materials accessible to persons with visual impairments. Many commenters proposed additional examples, such as signage or mapping, audio description services, secondary auditory programs, telebraillers, and reading machines. While the Department declines to add these items to the list, they are auxiliary aids and services and may be appropriate depending on the circumstances.

Subparagraph (3) refers to acquisition or modification of equipment or devices. Several commenters suggested the addition of current technological innovations in microelectronics and computerized control systems (e.g., voice recognition systems, automatic dialing telephones, and infrared elevator and light control systems) to the list of auxiliary aids. The Department interprets auxiliary aids and services as those aids and services designed to provide effective communications, i.e., making aurally and visually delivered information available to persons with hearing, speech, and vision impairments. Methods of making services, programs, or activities accessible to, or usable by, individuals with mobility or manual dexterity impairments are addressed by other sections of this part, including the provision for modifications in policies, practices, or procedures (§ 35.130 (b)(7)).

Paragraph (b)(4) deals with other similar services and actions. Several commenters asked for clarification that ''similar services and actions'' include retrieving items from shelves, assistance in reaching a marginally accessible seat, pushing a barrier aside in order to provide an accessible route, or assistance in removing a sweater or coat. While retrieving an item from a shelf might be an ''auxiliary aid or service'' for a blind person who could not locate the item without assistance, it might be a method of providing program access for a person using a wheelchair who could not reach the shelf, or a reasonable modification to a self-service policy for an individual who lacked the ability to grasp the item. As explained above, auxiliary aids and services are those aids and services required to provide effective communications. Other forms of assistance are more appropriately addressed by other provisions of the final rule.

''Complete complaint.'' ''Complete complaint'' is defined to include all the information necessary to enable the Federal agency designated under subpart G as responsible for investigation of a complaint to initiate its investigation.

''Current illegal use of drugs.'' The phrase ''current illegal use of drugs'' is used in § 35.131. Its meaning is discussed in the preamble for that section.

''Designated agency.'' The term ''designated agency'' is used to refer to the Federal agency designated under subpart G of this rule as responsible for carrying out the administrative enforcement responsibilities established by subpart F of the rule.

''Disability.'' The definition of the term ''disability'' is the same as the definition in the title III regulation codified at 28 CFR part 36. It is comparable to the definition of

the term ''individual with handicaps'' in section 7(8) of the Rehabilitation Act and section 802(h) of the Fair Housing Act. The Education and Labor Committee report makes clear that the analysis of the term ''individual with handicaps'' by the Department of Health, Education, and Welfare (HEW) in its regulations implementing section 504 (42 FR 22685 (May 4, 1977)) and the analysis by the Department of Housing and Urban Development in its regulation implementing the Fair Housing Amendments Act of 1988 (54 FR 3232 (Jan. 23, 1989)) should also apply fully to the term ''disability'' (Education and Labor report at 50).

The use of the term ''disability'' instead of ''handicap'' and the term ''individual with a disability'' instead of ''individual with handicaps'' represents an effort by Congress to make use of up-to-date, currently accepted terminology. As with racial and ethnic epithets, the choice of terms to apply to a person with a disability is overlaid with stereotypes, patronizing attitudes, and other emotional connotations. Many individuals with disabilities, and organizations representing such individuals, object to the use of such terms as ''handicapped person'' or ''the handicapped.'' In other recent legislation, Congress also recognized this shift in terminology, e.g., by changing the name of the National Council on the Handicapped to the National Council on Disability (Pub. L. 100–630).

In enacting the Americans with Disabilities Act, Congress concluded that it was important for the current legislation to use terminology most in line with the sensibilities of most Americans with disabilities. No change in definition or substance is intended nor should one be attributed to this change in phraseology.

The term ''disability'' means, with respect to an individual—

(A) A physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) A record of such an impairment; or

(C) Being regarded as having such an impairment. If an individual meets any one of these three tests, he or she is considered to be an individual with a disability for purposes of coverage under the Americans with Disabilities Act.

Congress adopted this same basic definition of ''disability,'' first used in the Rehabilitation Act of 1973 and in the Fair Housing Amendments Act of 1988, for a number of reasons. First, it has worked well since it was adopted in 1974. Second, it would not be possible to guarantee comprehensiveness by providing a list of specific disabilities, especially because new disorders may be recognized in the future, as they have since the definition was first established in 1974.

TEST A—A PHYSICAL OR MENTAL IMPAIRMENT THAT SUBSTANTIALLY LIMITS ONE OR MORE OF THE MAJOR LIFE ACTIVITIES OF SUCH INDIVIDUAL

Physical or mental impairment. Under the first test, an individual must have a physical or mental impairment. As explained in paragraph (1)(i) of the definition, ''impairment'' means any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs (which would include speech organs that are not respiratory such as vocal cords, soft palate, tongue, etc.); respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine. It also means any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. This list closely tracks the one used in the regulations for section 504 of the Rehabilitation Act of 1973 (see, *e.g.*, 45 CFR 84.3(j)(2)(i)).

Many commenters asked that ''traumatic brain injury'' be added to the list in paragraph (1)(i). Traumatic brain injury is already included because it is a physiological condition affecting one of the listed body systems, i.e., ''neurological.'' Therefore, it was unnecessary to add the term to the regulation, which only provides representative examples of physiological disorders.

It is not possible to include a list of all the specific conditions, contagious and noncontagious diseases, or infections that would constitute physical or mental impairments because of the difficulty of ensuring the comprehensiveness of such a list, particularly in light of the fact that other conditions or disorders may be identified in the future. However, the list of examples in paragraph (1)(ii) of the definition includes: orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism. The phrase ''symptomatic or asymptomatic'' was inserted in the final rule after ''HIV disease'' in response to commenters who suggested the clarification was necessary.

The examples of ''physical or mental impairments'' in paragraph (1)(ii) are the same as those contained in many section 504 regulations, except for the addition of the phrase ''contagious and noncontagious'' to describe the types of diseases and conditions included, and the addition of ''HIV disease

(symptomatic or asymptomatic)'' and ''tuberculosis'' to the list of examples. These additions are based on the committee reports, caselaw, and official legal opinions interpreting section 504. In *School Board of Nassau County* v. *Arline*, 480 U.S. 273 (1987), a case involving an individual with tuberculosis, the Supreme Court held that people with contagious diseases are entitled to the protections afforded by section 504. Following the *Arline* decision, this Department's Office of Legal Counsel issued a legal opinion that concluded that symptomatic HIV disease is an impairment that substantially limits a major life activity; therefore it has been included in the definition of disability under this part. The opinion also concluded that asymptomatic HIV disease is an impairment that substantially limits a major life activity, either because of its actual effect on the individual with HIV disease or because the reactions of other people to individuals with HIV disease cause such individuals to be treated as though they are disabled. See Memorandum from Douglas W. Kmiec, Acting Assistant Attorney General, Office of Legal Counsel, Department of Justice, to Arthur B. Culvahouse, Jr., Counsel to the President (Sept. 27, 1988), reprinted in Hearings on S. 933, the Americans with Disabilities Act, Before the Subcomm. on the Handicapped of the Senate Comm. on Labor and Human Resources, 101st. Cong., 1st Sess. 346 (1989).

Paragraph (1)(iii) states that the phrase ''physical or mental impairment'' does not include homosexuality or bisexuality. These conditions were never considered impairments under other Federal disability laws. Section 511(a) of the statute makes clear that they are likewise not to be considered impairments under the Americans with Disabilities Act.

Physical or mental impairment does not include simple physical characteristics, such as blue eyes or black hair. Nor does it include environmental, cultural, economic, or other disadvantages, such as having a prison record, or being poor. Nor is age a disability. Similarly, the definition does not include common personality traits such as poor judgment or a quick temper where these are not symptoms of a mental or psychological disorder. However, a person who has these characteristics and also has a physical or mental impairment may be considered as having a disability for purposes of the Americans with Disabilities Act based on the impairment.

Substantial Limitation of a Major Life Activity. Under Test A, the impairment must be one that ''substantially limits a major life activity.'' Major life activities include such things as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

For example, a person who is paraplegic is substantially limited in the major life activity of walking, a person who is blind is substantially limited in the major life activity of seeing, and a person who is mentally retarded is substantially limited in the major life activity of learning. A person with traumatic brain injury is substantially limited in the major life activities of caring for one's self, learning, and working because of memory deficit, confusion, contextual difficulties, and inability to reason appropriately.

A person is considered an individual with a disability for purposes of Test A, the first prong of the definition, when the individual's important life activities are restricted as to the conditions, manner, or duration under which they can be performed in comparison to most people. A person with a minor, trivial impairment, such as a simple infected finger, is not impaired in a major life activity. A person who can walk for 10 miles continuously is not substantially limited in walking merely because, on the eleventh mile, he or she begins to experience pain, because most people would not be able to walk eleven miles without experiencing some discomfort.

The Department received many comments on the proposed rule's inclusion of the word ''temporary'' in the definition of ''disability.'' The preamble indicated that impairments are not necessarily excluded from the definition of ''disability'' simply because they are temporary, but that the duration, or expected duration, of an impairment is one factor that may properly be considered in determining whether the impairment substantially limits a major life activity. The preamble recognized, however, that temporary impairments, such as a broken leg, are not commonly regarded as disabilities, and only in rare circumstances would the degree of the limitation and its expected duration be substantial. Nevertheless, many commenters objected to inclusion of the word ''temporary'' both because it is not in the statute and because it is not contained in the definition of ''disability'' set forth in the title I regulations of the Equal Employment Opportunity Commission (EEOC). The word ''temporary'' has been deleted from the final rule to conform with the statutory language.

The question of whether a temporary impairment is a disability must be resolved on a case-by-case basis, taking into consideration both the duration (or expected duration) of the impairment and the extent to which it actually limits a major life activity of the affected individual.

The question of whether a person has a disability should be assessed without regard to the availability of mitigating measures, such as reasonable modification or auxiliary aids and services. For example, a person with hearing loss is substantially limited in the major life activity of hearing, even though

the loss may be improved through the use of a hearing aid. Likewise, persons with impairments, such as epilepsy or diabetes, that substantially limit a major life activity, are covered under the first prong of the definition of disability, even if the effects of the impairment are controlled by medication.

Many commenters asked that environmental illness (also known as multiple chemical sensitivity) as well as allergy to cigarette smoke be recognized as disabilities. The Department, however, declines to state categorically that these types of allergies or sensitivities are disabilities, because the determination as to whether an impairment is a disability depends on whether, given the particular circumstances at issue, the impairment substantially limits one or more major life activities (or has a history of, or is regarded as having such an effect).

Sometimes respiratory or neurological functioning is so severely affected that an individual will satisfy the requirements to be considered disabled under the regulation. Such an individual would be entitled to all of the protections afforded by the Act and this part. In other cases, individuals may be sensitive to environmental elements or to smoke but their sensitivity will not rise to the level needed to constitute a disability. For example, their major life activity of breathing may be somewhat, but not substantially, impaired. In such circumstances, the individuals are not disabled and are not entitled to the protections of the statute despite their sensitivity to environmental agents.

In sum, the determination as to whether allergies to cigarette smoke, or allergies or sensitivities characterized by the commenters as environmental illness are disabilities covered by the regulation must be made using the same case-by-case analysis that is applied to all other physical or mental impairments. Moreover, the addition of specific regulatory provisions relating to environmental illness in the final rule would be inappropriate at this time pending future consideration of the issue by the Architectural and Transportation Barriers Compliance Board, the Environmental Protection Agency, and the Occupational Safety and Health Administration of the Department of Labor.

TEST B—A RECORD OF SUCH AN IMPAIRMENT

This test is intended to cover those who have a record of an impairment. As explained in paragraph (3) of the rule's definition of disability, this includes a person who has a history of an impairment that substantially limited a major life activity, such as someone who has recovered from an impairment. It also includes persons who have been misclassified as having an impairment.

This provision is included in the definition in part to protect individuals who have recovered from a physical or mental impairment that previously substantially limited them in a major life activity. Discrimination on the basis of such a past impairment is prohibited. Frequently occurring examples of the first group (those who have a history of an impairment) are persons with histories of mental or emotional illness, heart disease, or cancer; examples of the second group (those who have been misclassified as having an impairment) are persons who have been misclassified as having mental retardation or mental illness.

TEST C—BEING REGARDED AS HAVING SUCH AN IMPAIRMENT

This test, as contained in paragraph (4) of the definition, is intended to cover persons who are treated by a public entity as having a physical or mental impairment that substantially limits a major life activity. It applies when a person is treated as if he or she has an impairment that substantially limits a major life activity, regardless of whether that person has an impairment.

The Americans with Disabilities Act uses the same ''regarded as'' test set forth in the regulations implementing section 504 of the Rehabilitation Act. See, e.g., 28 CFR 42.540(k)(2)(iv), which provides:

(iv) ''Is regarded as having an impairment'' means (A) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a recipient as constituting such a limitation; (B) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or (C) Has none of the impairments defined in paragraph (k)(2)(i) of this section but is treated by a recipient as having such an impairment.

The perception of the covered entity is a key element of this test. A person who perceives himself or herself to have an impairment, but does not have an impairment, and is not treated as if he or she has an impairment, is not protected under this test.

A person would be covered under this test if a public entity refused to serve the person because it perceived that the person had an impairment that limited his or her enjoyment of the goods or services being offered.

For example, persons with severe burns often encounter discrimination in community activities, resulting in substantial limitation of major life activities. These persons would be covered under this test based on the attitudes of others towards the impairment, even if they did not view themselves as ''impaired.''

The rationale for this third test, as used in the Rehabilitation Act of 1973, was articulated by the Supreme Court in *Arline*, 480 U.S. 273 (1987). The Court noted that although an individual may have an impairment that does not in fact substantially limit a major life activity, the reaction of

others may prove just as disabling. ''Such an impairment might not diminish a person's physical or mental capabilities, but could nevertheless substantially limit that person's ability to work as a result of the negative reactions of others to the impairment.'' *Id.* at 283. The Court concluded that, by including this test in the Rehabilitation Act's definition, ''Congress acknowledged that society's accumulated myths and fears about disability and diseases are as handicapping as are the physical limitations that flow from actual impairment.'' *Id.* at 284.

Thus, a person who is denied services or benefits by a public entity because of myths, fears, and stereotypes associated with disabilities would be covered under this third test whether or not the person's physical or mental condition would be considered a disability under the first or second test in the definition.

If a person is refused admittance on the basis of an actual or perceived physical or mental condition, and the public entity can articulate no legitimate reason for the refusal (such as failure to meet eligibility criteria), a perceived concern about admitting persons with disabilities could be inferred and the individual would qualify for coverage under the ''regarded as'' test. A person who is covered because of being regarded as having an impairment is not required to show that the public entity's perception is inaccurate (e.g., that he will be accepted by others) in order to receive benefits from the public entity.

Paragraph (5) of the definition lists certain conditions that are not included within the definition of ''disability.'' The excluded conditions are: Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, other sexual behavior disorders, compulsive gambling, kleptomania, pyromania, and psychoactive substance use disorders resulting from current illegal use of drugs. Unlike homosexuality and bisexuality, which are not considered impairments under either section 504 or the Americans with Disabilities Act (see the definition of ''disability,'' paragraph (1)(iv)), the conditions listed in paragraph (5), except for transvestism, are not necessarily excluded as impairments under section 504. (Transvestism was excluded from the definition of disability for section 504 by the Fair Housing Amendments Act of 1988, Pub. L. 100–430, section 6(b)).

''Drug.'' The definition of the term ''drug'' is taken from section 510(d)(2) of the ADA.

''Facility.'' ''Facility'' means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the building, property, structure, or equipment is located. It includes both indoor and outdoor areas where human-constructed improvements, structures, equipment, or property have been added to the natural environment.

Commenters raised questions about the applicability of this part to activities operated in mobile facilities, such as bookmobiles or mobile health screening units. Such activities would be covered by the requirement for program accessibility in §35.150, and would be included in the definition of ''facility'' as ''other real or personal property,'' although standards for new construction and alterations of such facilities are not yet included in the accessibility standards adopted by §35.151. Sections 35.150 and 35.151 specifically address the obligations of public entities to ensure accessibility by providing curb ramps at pedestrian walkways.

''Historic preservation programs'' and ''Historic properties'' are defined in order to aid in the interpretation of §§35.150 (a)(2) and (b)(2), which relate to accessibility of historic preservation programs, and §35.151(d), which relates to the alteration of historic properties.

''Illegal use of drugs.'' The definition of ''illegal use of drugs'' is taken from section 510(d)(1) of the Act and clarifies that the term includes the illegal use of one or more drugs.

''Individual with a disability'' means a person who has a disability but does not include an individual who is currently illegally using drugs, when the public entity acts on the basis of such use. The phrase ''current illegal use of drugs'' is explained in §35.131.

''Public entity.'' The term ''public entity'' is defined in accordance with section 201(1) of the ADA as any State or local government; any department, agency, special purpose district, or other instrumentality of a State or States or local government; or the National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act).

''Qualified individual with a disability.'' The definition of ''qualified individual with a disability'' is taken from section 201(2) of the Act, which is derived from the definition of ''qualified handicapped person'' in the Department of Health and Human Services' regulation implementing section 504 (45 CFR §84.3(k)). It combines the definition at 45 CFR 84.3(k)(1) for employment (''a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question'') with the definition for other services at 45 CFR 84.3(k)(4) (''a handicapped person who meets the essential eligibility requirements for the receipt of such services'').

Some commenters requested clarification of the term ''essential eligibility requirements.'' Because of the variety of situations in which an individual's qualifications will be at issue, it is not possible to include more

specific criteria in the definition. The ''essential eligibility requirements'' for participation in some activities covered under this part may be minimal. For example, most public entities provide information about their operations as a public service to anyone who requests it. In such situations, the only ''eligibility requirement'' for receipt of such information would be the request for it. Where such information is provided by telephone, even the ability to use a voice telephone is not an ''essential eligibility requirement,'' because §35.161 requires a public entity to provide equally effective telecommunication systems for individuals with impaired hearing or speech.

For other activities, identification of the ''essential eligibility requirements'' may be more complex. Where questions of safety are involved, the principles established in §36.208 of the Department's regulation implementing title III of the ADA, to be codified at 28 CFR, part 36, will be applicable. That section implements section 302(b)(3) of the Act, which provides that a public accommodation is not required to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of the public accommodation, if that individual poses a direct threat to the health or safety of others.

A ''direct threat'' is a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services. In *School Board of Nassau County* v. *Arline,* 480 U.S. 273 (1987), the Supreme Court recognized that there is a need to balance the interests of people with disabilities against legitimate concerns for public safety. Although persons with disabilities are generally entitled to the protection of this part, a person who poses a significant risk to others will not be ''qualified,'' if reasonable modifications to the public entity's policies, practices, or procedures will not eliminate that risk.

The determination that a person poses a direct threat to the health or safety of others may not be based on generalizations or stereotypes about the effects of a particular disability. It must be based on an individualized assessment, based on reasonable judgment that relies on current medical evidence or on the best available objective evidence, to determine: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures will mitigate the risk. This is the test established by the Supreme Court in *Arline.* Such an inquiry is essential if the law is to achieve its goal of protecting disabled individuals from discrimination based on prejudice, stereotypes, or unfounded fear, while giving appropriate weight to legitimate concerns, such as the need to avoid exposing others to significant health and safety risks. Making this assessment will not usually require the services of a physician. Sources for medical knowledge include guidance from public health authorities, such as the U.S. Public Health Service, the Centers for Disease Control, and the National Institutes of Health, including the National Institute of Mental Health.

''Qualified interpreter.'' The Department received substantial comment regarding the lack of a definition of ''qualified interpreter.'' The proposed rule defined auxiliary aids and services to include the statutory term, ''qualified interpreters'' (§35.104), but did not define it. Section 35.160 requires the use of auxiliary aids including qualified interpreters and commenters stated that a lack of guidance on what the term means would create confusion among those trying to secure interpreting services and often result in less than effective communication.

Many commenters were concerned that, without clear guidance on the issue of ''qualified'' interpreter, the rule would be interpreted to mean ''available, rather than qualified'' interpreters. Some claimed that few public entities would understand the difference between a qualified interpreter and a person who simply knows a few signs or how to fingerspell.

In order to clarify what is meant by ''qualified interpreter'' the Department has added a definition of the term to the final rule. A qualified interpreter means an interpreter who is able to interpret effectively, accurately, and impartially both receptively and expressively, using any necessary specialized vocabulary. This definition focuses on the actual ability of the interpreter in a particular interpreting context to facilitate effective communication between the public entity and the individual with disabilities.

Public comment also revealed that public entities have at times asked persons who are deaf to provide family members or friends to interpret. In certain circumstances, notwithstanding that the family member of friend is able to interpret or is a certified interpreter, the family member or friend may not be qualified to render the necessary interpretation because of factors such as emotional or personal involvement or considerations of confidentiality that may adversely affect the ability to interpret''effectively, accurately, and impartially.''

The definition of ''qualified interpreter'' in this rule does not invalidate or limit standards for interpreting services of any State or local law that are equal to or more stringent than those imposed by this definition. For instance, the definition would not supersede any requirement of State law for use of a certified interpreter in court proceedings.

''Section 504.'' The Department added a definition of ''section 504'' because the term is used extensively in subpart F of this part.

''State.'' The definition of ''State'' is identical to the statutory definition in section 3(3) of the ADA.

Section 35.105 Self-evaluation

Section 35.105 establishes a requirement, based on the section 504 regulations for federally assisted and federally conducted programs, that a public entity evaluate its current policies and practices to identify and correct any that are not consistent with the requirements of this part. As noted in the discussion of §35.102, activities covered by the Department of Transportation's regulation implementing subtitle B of title II are not required to be included in the self-evaluation required by this section.

Experience has demonstrated the self-evaluation process to be a valuable means of establishing a working relationship with individuals with disabilities, which has promoted both effective and efficient implementation of section 504. The Department expects that it will likewise be useful to public entities newly covered by the ADA.

All public entities are required to do a self-evaluation. However, only those that employ 50 or more persons are required to maintain the self-evaluation on file and make it available for public inspection for three years. The number 50 was derived from the Department of Justice's section 504 regulations for federally assisted programs, 28 CFR 42.505(c). The Department received comments critical of this limitation, some suggesting the requirement apply to all public entities and others suggesting that the number be changed from 50 to 15. The final rule has not been changed. Although many regulations implementing section 504 for federally assisted programs do use 15 employees as the cut-off for this record-keeping requirement, the Department believes that it would be inappropriate to extend it to those smaller public entities covered by this regulation that do not receive Federal financial assistance. This approach has the benefit of minimizing paperwork burdens on small entities.

Paragraph (d) provides that the self-evaluation required by this section shall apply only to programs not subject to section 504 or those policies and practices, such as those involving communications access, that have not already been included in a self-evaluation required under an existing regulation implementing section 504. Because most self-evaluations were done from five to twelve years ago, however, the Department expects that a great many public entities will be re-examining all of their policies and programs. Programs and functions may have changed, and actions that were supposed to have been taken to comply with section 504 may not have been fully implemented or may no longer be effective. In addition, there have been statutory amendments to section 504 which have changed the coverage of section 504, particularly the Civil Rights Restoration Act of 1987, Public Law No. 100–259, 102 Stat. 28 (1988), which broadened the definition of a covered ''program or activity.''

Several commenters suggested that the Department clarify public entities' liability during the one-year period for compliance with the self-evaluation requirement. The self-evaluation requirement does not stay the effective date of the statute nor of this part. Public entities are, therefore, not shielded from discrimination claims during that time.

Other commenters suggested that the rule require that every self-evaluation include an examination of training efforts to assure that individuals with disabilities are not subjected to discrimination because of insensitivity, particularly in the law enforcement area. Although the Department has not added such a specific requirement to the rule, it would be appropriate for public entities to evaluate training efforts because, in many cases, lack of training leads to discriminatory practices, even when the policies in place are nondiscriminatory.

Section 35.106 Notice

Section 35.106 requires a public entity to disseminate sufficient information to applicants, participants, beneficiaries, and other interested persons to inform them of the rights and protections afforded by the ADA and this regulation. Methods of providing this information include, for example, the publication of information in handbooks, manuals, and pamphlets that are distributed to the public to describe a public entity's programs and activities; the display of informative posters in service centers and other public places; or the broadcast of information by television or radio. In providing the notice, a public entity must comply with the requirements for effective communication in §35.160. The preamble to that section gives guidance on how to effectively communicate with individuals with disabilities.

Section 35.107 Designation of Responsible Employee and Adoption of Grievance Procedures

Consistent with §35.105, self-evaluation, the final rule requires that public entities with 50 or more employees designate a responsible employee and adopt grievance procedures. Most of the commenters who suggested that the requirement that self-evaluation be maintained on file for three years not be limited to those employing 50 or more persons made a similar suggestion concerning §35.107. Commenters recommended either that all public entities be subject to §35.107, or that ''50 or more persons'' be changed to ''15 or more persons.'' As explained in the discussion of §35.105, the Department has not adopted this suggestion.

The requirement for designation of an employee responsible for coordination of efforts to carry out responsibilities under this part is derived from the HEW regulation implementing section 504 in federally assisted programs. The requirement for designation of a particular employee and dissemination of information about how to locate that employee helps to ensure that individuals dealing with large agencies are able to easily find a responsible person who is familiar with the requirements of the Act and this part and can communicate those requirements to other individuals in the agency who may be unaware of their responsibilities. This paragraph in no way limits a public entity's obligation to ensure that all of its employees comply with the requirements of this part, but it ensures that any failure by individual employees can be promptly corrected by the designated employee.

Section 35.107(b) requires public entities with 50 or more employees to establish grievance procedures for resolving complaints of violations of this part. Similar requirements are found in the section 504 regulations for federally assisted programs (see, e.g., 45 CFR 84.7(b)). The rule, like the regulations for federally assisted programs, provides for investigation and resolution of complaints by a Federal enforcement agency. It is the view of the Department that public entities subject to this part should be required to establish a mechanism for resolution of complaints at the local level without requiring the complainant to resort to the Federal complaint procedures established under subpart F. Complainants would not, however, be required to exhaust the public entity's grievance procedures before filing a complaint under subpart F. Delay in filing the complaint at the Federal level caused by pursuit of the remedies available under the grievance procedure would generally be considered good cause for extending the time allowed for filing under §35.170(b).

Subpart B—General Requirements

Section 35.130 General Prohibitions Against Discrimination

The general prohibitions against discrimination in the rule are generally based on the prohibitions in existing regulations implementing section 504 and, therefore, are already familiar to State and local entities covered by section 504. In addition, §35.130 includes a number of provisions derived from title III of the Act that are implicit to a certain degree in the requirements of regulations implementing section 504.

Several commenters suggested that this part should include the section of the proposed title III regulation that implemented section 309 of the Act, which requires that courses and examinations related to applications, licensing, certification, or credentialing be provided in an accessible place and manner or that alternative accessible arrangements be made. The Department has not adopted this suggestion. The requirements of this part, including the general prohibitions of discrimination in this section, the program access requirements of subpart D, and the communications requirements of subpart E, apply to courses and examinations provided by public entities. The Department considers these requirements to be sufficient to ensure that courses and examinations administered by public entities meet the requirements of section 309. For example, a public entity offering an examination must ensure that modifications of policies, practices, or procedures or the provision of auxiliary aids and services furnish the individual with a disability an equal opportunity to demonstrate his or her knowledge or ability. Also, any examination specially designed for individuals with disabilities must be offered as often and in as timely a manner as are other examinations. Further, under this part, courses and examinations must be offered in the most integrated setting appropriate. The analysis of §35.130(d) is relevant to this determination.

A number of commenters asked that the regulation be amended to require training of law enforcement personnel to recognize the difference between criminal activity and the effects of seizures or other disabilities such as mental retardation, cerebral palsy, traumatic brain injury, mental illness, or deafness. Several disabled commenters gave personal statements about the abuse they had received at the hands of law enforcement personnel. Two organizations that commented cited the Judiciary report at 50 as authority to require law enforcement training.

The Department has not added such a training requirement to the regulation. Discriminatory arrests and brutal treatment are already unlawful police activities. The general regulatory obligation to modify policies, practices, or procedures requires law enforcement to make changes in policies that result in discriminatory arrests or abuse of individuals with disabilities. Under this section law enforcement personnel would be required to make appropriate efforts to determine whether perceived strange or disruptive behavior or unconsciousness is the result of a disability. The Department notes that a number of States have attempted to address the problem of arresting disabled persons for noncriminal conduct resulting from their disability through adoption of the Uniform Duties to Disabled Persons Act, and encourages other jurisdictions to consider that approach.

Paragraph (a) restates the nondiscrimination mandate of section 202 of the ADA. The remaining paragraphs in §35.130 establish the general principles for analyzing whether any

particular action of the public entity violates this mandate.

Paragraph (b) prohibits overt denials of equal treatment of individuals with disabilities. A public entity may not refuse to provide an individual with a disability with an equal opportunity to participate in or benefit from its program simply because the person has a disability.

Paragraph (b)(1)(i) provides that it is discriminatory to deny a person with a disability the right to participate in or benefit from the aid, benefit, or service provided by a public entity. Paragraph (b)(1)(ii) provides that the aids, benefits, and services provided to persons with disabilities must be equal to those provided to others, and paragraph (b)(1)(iii) requires that the aids, benefits, or services provided to individuals with disabilities must be as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as those provided to others. These paragraphs are taken from the regulations implementing section 504 and simply restate principles long established under section 504.

Paragraph (b)(1)(iv) permits the public entity to develop separate or different aids, benefits, or services when necessary to provide individuals with disabilities with an equal opportunity to participate in or benefit from the public entity's programs or activities, but only when necessary to ensure that the aids, benefits, or services are as effective as those provided to others. Paragraph (b)(1)(iv) must be read in conjunction with paragraphs (b)(2), (d), and (e). Even when separate or different aids, benefits, or services would be more effective, paragraph (b)(2) provides that a qualified individual with a disability still has the right to choose to participate in the program that is not designed to accommodate individuals with disabilities. Paragraph (d) requires that a public entity administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities.

Paragraph (b)(2) specifies that, notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different. Paragraph (e), which is derived from section 501(d) of the Americans with Disabilities Act, states that nothing in this part shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit that he or she chooses not to accept.

Taken together, these provisions are intended to prohibit exclusion and segregation of individuals with disabilities and the denial of equal opportunities enjoyed by others, based on, among other things, presumptions, patronizing attitudes, fears, and stereotypes about individuals with disabilities. Consistent with these standards, public entities are required to ensure that their actions are based on facts applicable to individuals and not on presumptions as to what a class of individuals with disabilities can or cannot do.

Integration is fundamental to the purposes of the Americans with Disabilities Act. Provision of segregated accommodations and services relegates persons with disabilities to second-class status. For example, it would be a violation of this provision to require persons with disabilities to eat in the back room of a government cafeteria or to refuse to allow a person with a disability the full use of recreation or exercise facilities because of stereotypes about the person's ability to participate.

Many commenters objected to proposed paragraphs (b)(1)(iv) and (d) as allowing continued segregation of individuals with disabilities. The Department recognizes that promoting integration of individuals with disabilities into the mainstream of society is an important objective of the ADA and agrees that, in most instances, separate programs for individuals with disabilities will not be permitted. Nevertheless, section 504 does permit separate programs in limited circumstances, and Congress clearly intended the regulations issued under title II to adopt the standards of section 504. Furthermore, Congress included authority for separate programs in the specific requirements of title III of the Act. Section 302(b)(1)(A)(iii) of the Act provides for separate benefits in language similar to that in §35.130(b)(1)(iv), and section 302(b)(1)(B) includes the same requirement for ''the most integrated setting appropriate'' as in §35.130(d).

Even when separate programs are permitted, individuals with disabilities cannot be denied the opportunity to participate in programs that are not separate or different. This is an important and overarching principle of the Americans with Disabilities Act. Separate, special, or different programs that are designed to provide a benefit to persons with disabilities cannot be used to restrict the participation of persons with disabilities in general, integrated activities.

For example, a person who is blind may wish to decline participating in a special museum tour that allows persons to touch sculptures in an exhibit and instead tour the exhibit at his or her own pace with the museum's recorded tour. It is not the intent of this section to require the person who is blind to avail himself or herself of the special tour. Modified participation for persons with disabilities must be a choice, not a requirement.

In addition, it would not be a violation of this section for a public entity to offer recreational programs specially designed for children with mobility impairments. However, it would be a violation of this section if the entity then excluded these children from other recreational services for which they are qualified to participate when these services are made available to nondisabled children, or if the entity required children with disabilities to attend only designated programs.

Many commenters asked that the Department clarify a public entity's obligations within the integrated program when it offers a separate program but an individual with a disability chooses not to participate in the separate program. It is impossible to make a blanket statement as to what level of auxiliary aids or modifications would be required in the integrated program. Rather, each situation must be assessed individually. The starting point is to question whether the separate program is in fact necessary or appropriate for the individual. Assuming the separate program would be appropriate for a particular individual, the extent to which that individual must be provided with modifications in the integrated program will depend not only on what the individual needs but also on the limitations and defenses of this part. For example, it may constitute an undue burden for a public accommodation, which provides a full-time interpreter in its special guided tour for individuals with hearing impairments, to hire an additional interpreter for those individuals who choose to attend the integrated program. The Department cannot identify categorically the level of assistance or aid required in the integrated program.

Paragraph (b)(1)(v) provides that a public entity may not aid or perpetuate discrimination against a qualified individual with a disability by providing significant assistance to an agency, organization, or person that discriminates on the basis of disability in providing any aid, benefit, or service to beneficiaries of the public entity's program. This paragraph is taken from the regulations implementing section 504 for federally assisted programs.

Paragraph (b)(1)(vi) prohibits the public entity from denying a qualified individual with a disability the opportunity to participate as a member of a planning or advisory board.

Paragraph (b)(1)(vii) prohibits the public entity from limiting a qualified individual with a disability in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving any aid, benefit, or service.

Paragraph (b)(3) prohibits the public entity from utilizing criteria or methods of administration that deny individuals with disabilities access to the public entity's services, programs, and activities or that perpetuate the discrimination of another public entity, if both public entities are subject to common administrative control or are agencies of the same State. The phrase ''criteria or methods of administration'' refers to official written policies of the public entity and to the actual practices of the public entity. This paragraph prohibits both blatantly exclusionary policies or practices and nonessential policies and practices that are neutral on their face, but deny individuals with disabilities an effective opportunity to participate. This standard is consistent with the interpretation of section 504 by the U.S. Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985). The Court in *Choate* explained that members of Congress made numerous statements during passage of section 504 regarding eliminating architectural barriers, providing access to transportation, and eliminating discriminatory effects of job qualification procedures. The Court then noted: ''These statements would ring hollow if the resulting legislation could not rectify the harms resulting from action that discriminated by effect as well as by design.'' *Id.* at 297 (footnote omitted).

Paragraph (b)(4) specifically applies the prohibition enunciated in §35.130(b)(3) to the process of selecting sites for construction of new facilities or selecting existing facilities to be used by the public entity. Paragraph (b)(4) does not apply to construction of additional buildings at an existing site.

Paragraph (b)(5) prohibits the public entity, in the selection of procurement contractors, from using criteria that subject qualified individuals with disabilities to discrimination on the basis of disability.

Paragraph (b)(6) prohibits the public entity from discriminating against qualified individuals with disabilities on the basis of disability in the granting of licenses or certification. A person is a ''qualified individual with a disability'' with respect to licensing or certification if he or she can meet the essential eligibility requirements for receiving the license or certification (see §35.104).

A number of commenters were troubled by the phrase ''essential eligibility requirements'' as applied to State licensing requirements, especially those for health care professions. Because of the variety of types of programs to which the definition of ''qualified individual with a disability'' applies, it is not possible to use more specific language in the definition. The phrase ''essential eligibility requirements,'' however, is taken from the definitions in the regulations implementing section 504, so caselaw under section 504 will be applicable to its interpretation. In *Southeastern Community College* v. *Davis*, 442 U.S. 397, for example, the Supreme Court held that section 504 does not require an institution to ''lower or effect substantial modifications of standards to accommodate

a handicapped person,'' 442 U.S. at 413, and that the school had established that the plaintiff was not ''qualified'' because she was not able to ''serve the nursing profession in all customary ways,'' *id.* Whether a particular requirement is ''essential'' will, of course, depend on the facts of the particular case.

In addition, the public entity may not establish requirements for the programs or activities of licensees or certified entities that subject qualified individuals with disabilities to discrimination on the basis of disability. For example, the public entity must comply with this requirement when establishing safety standards for the operations of licensees. In that case the public entity must ensure that standards that it promulgates do not discriminate against the employment of qualified individuals with disabilities in an impermissible manner.

Paragraph (b)(6) does not extend the requirements of the Act or this part directly to the programs or activities of licensees or certified entities themselves. The programs or activities of licensees or certified entities are not themselves programs or activities of the public entity merely by virtue of the license or certificate.

Paragraph (b)(7) is a specific application of the requirement under the general prohibitions of discrimination that public entities make reasonable modifications in policies, practices, or procedures where necessary to avoid discrimination on the basis of disability. Section 302(b)(2)(A)(ii) of the ADA sets out this requirement specifically for public accommodations covered by title III of the Act, and the House Judiciary Committee Report directs the Attorney General to include those specific requirements in the title II regulation to the extent that they do not conflict with the regulations implementing section 504. Judiciary report at 52.

Paragraph (b)(8), a new paragraph not contained in the proposed rule, prohibits the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any service, program, or activity, unless such criteria can be shown to be necessary for the provision of the service, program, or activity being offered. This prohibition is also a specific application of the general prohibitions of discrimination and is based on section 302(b)(2)(A)(i) of the ADA. It prohibits overt denials of equal treatment of individuals with disabilities, or establishment of exclusive or segregative criteria that would bar individuals with disabilities from participation in services, benefits, or activities.

Paragraph (b)(8) also prohibits policies that unnecessarily impose requirements or burdens on individuals with disabilities that are not placed on others. For example, public entities may not require that a qualified individual with a disability be accompanied by an attendant. A public entity is not, however, required to provide attendant care, or assistance in toileting, eating, or dressing to individuals with disabilities, except in special circumstances, such as where the individual is an inmate of a custodial or correctional institution.

In addition, paragraph (b)(8) prohibits the imposition of criteria that ''tend to'' screen out an individual with a disability. This concept, which is derived from current regulations under section 504 (*see, e.g.,* 45 CFR 84.13), makes it discriminatory to impose policies or criteria that, while not creating a direct bar to individuals with disabilities, indirectly prevent or limit their ability to participate. For example, requiring presentation of a driver's license as the sole means of identification for purposes of paying by check would violate this section in situations where, for example, individuals with severe vision impairments or developmental disabilities or epilepsy are ineligible to receive a driver's license and the use of an alternative means of identification, such as another photo I.D. or credit card, is feasible.

A public entity may, however, impose neutral rules and criteria that screen out, or tend to screen out, individuals with disabilities if the criteria are necessary for the safe operation of the program in question. Examples of safety qualifications that would be justifiable in appropriate circumstances would include eligibility requirements for drivers' licenses, or a requirement that all participants in a recreational rafting expedition be able to meet a necessary level of swimming proficiency. Safety requirements must be based on actual risks and not on speculation, stereotypes, or generalizations about individuals with disabilities.

Paragraph (c) provides that nothing in this part prohibits a public entity from providing benefits, services, or advantages to individuals with disabilities, or to a particular class of individuals with disabilities, beyond those required by this part. It is derived from a provision in the section 504 regulations that permits programs conducted pursuant to Federal statute or Executive order that are designed to benefit only individuals with disabilities or a given class of individuals with disabilities to be limited to those individuals with disabilities. Section 504 ensures that federally assisted programs are made available to all individuals, without regard to disabilities, unless the Federal program under which the assistance is provided is specifically limited to individuals with disabilities or a particular class of individuals with disabilities. Because coverage under this part is not limited to federally assisted programs, paragraph (c) has been revised to clarify that State and local governments may provide special benefits, beyond those required by

the nondiscrimination requirements of this part, that are limited to individuals with disabilities or a particular class of individuals with disabilities, without thereby incurring additional obligations to persons without disabilities or to other classes of individuals with disabilities.

Paragraphs (d) and (e), previously referred to in the discussion of paragraph (b)(1)(iv), provide that the public entity must administer services, programs, and activities in the most integrated setting appropriate to the needs of qualified individuals with disabilities, *i.e.*, in a setting that enables individuals with disabilities to interact with nondisabled persons to the fullest extent possible, and that persons with disabilities must be provided the option of declining to accept a particular accommodation.

Some commenters expressed concern that §35.130(e), which states that nothing in the rule requires an individual with a disability to accept special accommodations and services provided under the ADA, could be interpreted to allow guardians of infants or older people with disabilities to refuse medical treatment for their wards. Section 35.130(e) has been revised to make it clear that paragraph (e) is inapplicable to the concern of the commenters. A new paragraph (e)(2) has been added stating that nothing in the regulation authorizes the representative or guardian of an individual with a disability to decline food, water, medical treatment, or medical services for that individual. New paragraph (e) clarifies that neither the ADA nor the regulation alters current Federal law ensuring the rights of incompetent individuals with disabilities to receive food, water, and medical treatment. See, *e.g.*, Child Abuse Amendments of 1984 (42 U.S.C. 5106a(b)(10), 5106g(10)); Rehabilitation Act of 1973, as amended (29 U.S.C. 794); the Developmentally Disabled Assistance and Bill of Rights Act (42 U.S.C. 6042).

Sections 35.130(e) (1) and (2) are based on section 501(d) of the ADA. Section 501(d) was designed to clarify that nothing in the ADA requires individuals with disabilities to accept special accommodations and services for individuals with disabilities that may segregate them:

The Committee added this section [501(d)] to clarify that nothing in the ADA is intended to permit discriminatory treatment on the basis of disability, even when such treatment is rendered under the guise of providing an accommodation, service, aid or benefit to the individual with disability. For example, a blind individual may choose not to avail himself or herself of the right to go to the front of a line, even if a particular public accommodation has chosen to offer such a modification of a policy for blind individuals. Or, a blind individual may choose to decline to participate in a special museum tour that allows persons to touch sculptures in an exhibit and instead tour the exhibits at his or her own pace with the museum's recorded tour.

Judiciary report at 71–72. The Act is not to be construed to mean that an individual with disabilities must accept special accommodations and services for individuals with disabilities when that individual can participate in the regular services already offered. Because medical treatment, including treatment for particular conditions, is not a special accommodation or service for individuals with disabilities under section 501(d), neither the Act nor this part provides affirmative authority to suspend such treatment. Section 501(d) is intended to clarify that the Act is not designed to foster discrimination through mandatory acceptance of special services when other alternatives are provided; this concern does not reach to the provision of medical treatment for the disabling condition itself.

Paragraph (f) provides that a public entity may not place a surcharge on a particular individual with a disability, or any group of individuals with disabilities, to cover any costs of measures required to provide that individual or group with the nondiscriminatory treatment required by the Act or this part. Such measures may include the provision of auxiliary aids or of modifications required to provide program accessibility.

Several commenters asked for clarification that the costs of interpreter services may not be assessed as an element of ''court costs.'' The Department has already recognized that imposition of the cost of courtroom interpreter services is impermissible under section 504. The preamble to the Department's section 504 regulation for its federally assisted programs states that where a court system has an obligation to provide qualified interpreters, ''it has the corresponding responsibility to pay for the services of the interpreters.'' (45 FR 37630 (June 3, 1980)). Accordingly, recouping the costs of interpreter services by assessing them as part of court costs would also be prohibited.

Paragraph (g), which prohibits discrimination on the basis of an individual's or entity's known relationship or association with an individual with a disability, is based on sections 102(b)(4) and 302(b)(1)(E) of the ADA. This paragraph was not contained in the proposed rule. The individuals covered under this paragraph are any individuals who are discriminated against because of their known association with an individual with a disability. For example, it would be a violation of this paragraph for a local government to refuse to allow a theater company to use a school auditorium on the grounds that the company had recently performed for an audience of individuals with HIV disease.

This protection is not limited to those who have a familial relationship with the individual who has a disability. Congress considered, and rejected, amendments that would have limited the scope of this provision to specific associations and relationships. Therefore, if a public entity refuses admission to a person with cerebral palsy and his or her companions, the companions have an independent right of action under the ADA and this section.

During the legislative process, the term ''entity'' was added to section 302(b)(1)(E) to clarify that the scope of the provision is intended to encompass not only persons who have a known association with a person with a disability, but also entities that provide services to or are otherwise associated with such individuals. This provision was intended to ensure that entities such as health care providers, employees of social service agencies, and others who provide professional services to persons with disabilities are not subjected to discrimination because of their professional association with persons with disabilities.

Section 35.131 Illegal Use of Drugs

Section 35.131 effectuates section 510 of the ADA, which clarifies the Act's application to people who use drugs illegally. Paragraph (a) provides that this part does not prohibit discrimination based on an individual's current illegal use of drugs.

The Act and the regulation distinguish between illegal use of drugs and the legal use of substances, whether or not those substances are ''controlled substances,'' as defined in the Controlled Substances Act (21 U.S.C. 812). Some controlled substances are prescription drugs that have legitimate medical uses. Section 35.131 does not affect use of controlled substances pursuant to a valid prescription under supervision by a licensed health care professional, or other use that is authorized by the Controlled Substances Act or any other provision of Federal law. It does apply to illegal use of those substances, as well as to illegal use of controlled substances that are not prescription drugs. The key question is whether the individual's use of the substance is illegal, not whether the substance has recognized legal uses. Alcohol is not a controlled substance, so use of alcohol is not addressed by §35.131 (although alcoholics are individuals with disabilities, subject to the protections of the statute).

A distinction is also made between the use of a substance and the status of being addicted to that substance. Addiction is a disability, and addicts are individuals with disabilities protected by the Act. The protection, however, does not extend to actions based on the illegal use of the substance. In other words, an addict cannot use the fact of his or her addiction as a defense to an action based on illegal use of drugs. This distinction is not artificial. Congress intended to deny protection to people who engage in the illegal use of drugs, whether or not they are addicted, but to provide protection to addicts so long as they are not currently using drugs.

A third distinction is the difficult one between current use and former use. The definition of ''current illegal use of drugs'' in §35.104, which is based on the report of the Conference Committee, H.R. Conf. Rep. No. 596, 101st Cong., 2d Sess. 64 (1990) (hereinafter ''Conference report''), is ''illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.''

Paragraph (a)(2)(i) specifies that an individual who has successfully completed a supervised drug rehabilitation program or has otherwise been rehabilitated successfully and who is not engaging in current illegal use of drugs is protected. Paragraph (a)(2)(ii) clarifies that an individual who is currently participating in a supervised rehabilitation program and is not engaging in current illegal use of drugs is protected. Paragraph (a)(2)(iii) provides that a person who is erroneously regarded as engaging in current illegal use of drugs, but who is not engaging in such use, is protected.

Paragraph (b) provides a limited exception to the exclusion of current illegal users of drugs from the protections of the Act. It prohibits denial of health services, or services provided in connection with drug rehabilitation to an individual on the basis of current illegal use of drugs, if the individual is otherwise entitled to such services. A health care facility, such as a hospital or clinic, may not refuse treatment to an individual in need of the services it provides on the grounds that the individual is illegally using drugs, but it is not required by this section to provide services that it does not ordinarily provide. For example, a health care facility that specializes in a particular type of treatment, such as care of burn victims, is not required to provide drug rehabilitation services, but it cannot refuse to treat an individual's burns on the grounds that the individual is illegally using drugs.

Some commenters pointed out that abstention from the use of drugs is an essential condition of participation in some drug rehabilitation programs, and may be a necessary requirement in inpatient or residential settings. The Department believes that this comment is well-founded. Congress clearly intended to prohibit exclusion from drug treatment programs of the very individuals who need such programs because of their use of drugs, but, once an individual has been admitted to a program, abstention may be a necessary and appropriate condition to continued participation. The final rule therefore

provides that a drug rehabilitation or treatment program may prohibit illegal use of drugs by individuals while they are participating in the program.

Paragraph (c) expresses Congress' intention that the Act be neutral with respect to testing for illegal use of drugs. This paragraph implements the provision in section 510(b) of the Act that allows entities ''to adopt or administer reasonable policies or procedures, including but not limited to drug testing,'' that ensure that an individual who is participating in a supervised rehabilitation program, or who has completed such a program or otherwise been rehabilitated successfully is no longer engaging in the illegal use of drugs. The section is not to be ''construed to encourage, prohibit, restrict, or authorize the conducting of testing for the illegal use of drugs.''

Paragraph 35.131(c) clarifies that it is not a violation of this part to adopt or administer reasonable policies or procedures to ensure that an individual who formerly engaged in the illegal use of drugs is not currently engaging in illegal use of drugs. Any such policies or procedures must, of course, be reasonable, and must be designed to identify accurately the illegal use of drugs. This paragraph does not authorize inquiries, tests, or other procedures that would disclose use of substances that are not controlled substances or are taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law, because such uses are not included in the definition of ''illegal use of drugs.'' A commenter argued that the rule should permit testing for lawful use of prescription drugs, but most commenters preferred that tests must be limited to unlawful use in order to avoid revealing the lawful use of prescription medicine used to treat disabilities.

Section 35.132 Smoking

Section 35.132 restates the clarification in section 501(b) of the Act that the Act does not preclude the prohibition of, or imposition of restrictions on, smoking in transportation covered by title II. Some commenters argued that this section is too limited in scope, and that the regulation should prohibit smoking in all facilities used by public entities. The reference to smoking in section 501, however, merely clarifies that the Act does not require public entities to accommodate smokers by permitting them to smoke in transportation facilities.

Section 35.133 Maintenance of Accessible Features

Section 35.133 provides that a public entity shall maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities by the Act or this part. The Act requires that, to the maximum extent feasible, facilities must be accessible to, and usable by, individuals with disabilities. This section recognizes that it is not sufficient to provide features such as accessible routes, elevators, or ramps, if those features are not maintained in a manner that enables individuals with disabilities to use them. Inoperable elevators, locked accessible doors, or ''accessible'' routes that are obstructed by furniture, filing cabinets, or potted plants are neither ''accessible to'' nor ''usable by'' individuals with disabilities.

Some commenters objected that this section appeared to establish an absolute requirement and suggested that language from the preamble be included in the text of the regulation. It is, of course, impossible to guarantee that mechanical devices will never fail to operate. Paragraph (b) of the final regulation provides that this section does not prohibit isolated or temporary interruptions in service or access due to maintenance or repairs. This paragraph is intended to clarify that temporary obstructions or isolated instances of mechanical failure would not be considered violations of the Act or this part. However, allowing obstructions or ''out of service'' equipment to persist beyond a reasonable period of time would violate this part, as would repeated mechanical failures due to improper or inadequate maintenance. Failure of the public entity to ensure that accessible routes are properly maintained and free of obstructions, or failure to arrange prompt repair of inoperable elevators or other equipment intended to provide access would also violate this part.

Other commenters requested that this section be expanded to include specific requirements for inspection and maintenance of equipment, for training staff in the proper operation of equipment, and for maintenance of specific items. The Department believes that this section properly establishes the general requirement for maintaining access and that further details are not necessary.

Section 35.134 Retaliation or Coercion

Section 35.134 implements section 503 of the ADA, which prohibits retaliation against any individual who exercises his or her rights under the Act. This section is unchanged from the proposed rule. Paragraph (a) of §35.134 provides that no private or public entity shall discriminate against any individual because that individual has exercised his or her right to oppose any act or practice made unlawful by this part, or because that individual made a charge, testified, assisted, or participated in any manner

in an investigation, proceeding, or hearing under the Act or this part.

Paragraph (b) provides that no private or public entity shall coerce, intimidate, threaten, or interfere with any individual in the exercise of his or her rights under this part or because that individual aided or encouraged any other individual in the exercise or enjoyment of any right granted or protected by the Act or this part.

This section protects not only individuals who allege a violation of the Act or this part, but also any individuals who support or assist them. This section applies to all investigations or proceedings initiated under the Act or this part without regard to the ultimate resolution of the underlying allegations. Because this section prohibits any act of retaliation or coercion in response to an individual's effort to exercise rights established by the Act and this part (or to support the efforts of another individual), the section applies not only to public entities subject to this part, but also to persons acting in an individual capacity or to private entities. For example, it would be a violation of the Act and this part for a private individual to harass or intimidate an individual with a disability in an effort to prevent that individual from attending a concert in a State-owned park. It would, likewise, be a violation of the Act and this part for a private entity to take adverse action against an employee who appeared as a witness on behalf of an individual who sought to enforce the Act.

Section 35.135 Personal Devices and Services

The final rule includes a new §35.135, entitles ''Personal devices and services,'' which states that the provision of personal devices and services is not required by title II. This new section, which serves as a limitation on all of the requirements of the regulation, replaces §35.160(b)(2) of the proposed rule, which addressed the issue of personal devices and services explicitly only in the context of communications. The personal devices and services limitation was intended to have general application in the proposed rule in all contexts where it was relevant. The final rule, therefore, clarifies this point by including a general provision that will explicitly apply not only to auxiliary aids and services but across-the-board to include other relevant areas such as, for example, modifications in policies, practices, and procedures (§35.130(b)(7)). The language of §35.135 parallels an analogous provision in the Department's title III regulations (28 CFR 36.306) but preserves the explicit reference to ''readers for personal use or study'' in §35.160(b)(2) of the proposed rule. This section does not preclude the short-term loan of personal receivers that are part of an assistive listening system.

Subpart C—Employment

Section 35.140 Employment Discrimination Prohibited

Title II of the ADA applies to all activities of public entities, including their employment practices. The proposed rule cross-referenced the definitions, requirements, and procedures of title I of the ADA, as established by the Equal Employment Opportunity Commission in 29 CFR part 1630. This proposal would have resulted in use, under §35.140, of the title I definition of ''employer,'' so that a public entity with 25 or more employees would have become subject to the requirements of §35.140 on July 26, 1992, one with 15 to 24 employees on July 26, 1994, and one with fewer than 15 employees would have been excluded completely.

The Department received comments objecting to this approach. The commenters asserted that Congress intended to establish nondiscrimination requirements for employment by all public entities, including those that employ fewer than 15 employees; and that Congress intended the employment requirements of title II to become effective at the same time that the other requirements of this regulation become effective, January 26, 1992. The Department has reexamined the statutory language and legislative history of the ADA on this issue and has concluded that Congress intended to cover the employment practices of all public entities and that the applicable effective date is that of title II.

The statutory language of section 204(b) of the ADA requires the Department to issue a regulation that is consistent with the ADA and the Department's coordination regulation under section 504, 28 CFR part 41. The coordination regulation specifically requires nondiscrimination in employment, 28 CFR 41.52–41.55, and does not limit coverage based on size of employer. Moreover, under all section 504 implementing regulations issued in accordance with the Department's coordination regulation, employment coverage under section 504 extends to all employers with federally assisted programs or activities, regardless of size, and the effective date for those employment requirements has always been the same as the effective date for nonemployment requirements established in the same regulations. The Department therefore concludes that §35.140 must apply to all public entities upon the effective date of this regulation.

In the proposed regulation the Department cross-referenced the regulations implementing title I of the ADA, issued by the Equal Employment Opportunity Commission at 29 CFR part 1630, as a compliance standard for §35.140 because, as proposed, the scope of coverage and effective date of coverage under title II would have been coextensive

with title I. In the final regulation this language is modified slightly. Subparagraph (1) of new paragraph (b) makes it clear that the standards established by the Equal Employment Opportunity Commission in 29 CFR part 1630 will be the applicable compliance standards if the public entity is subject to title I. If the public entity is not covered by title I, or until it is covered by title I, subparagraph (b)(2) cross-references section 504 standards for what constitutes employment discrimination, as established by the Department of Justice in 28 CFR part 41. Standards for title I of the ADA and section 504 of the Rehabilitation Act are for the most part identical because title I of the ADA was based on requirements set forth in regulations implementing section 504.

The Department, together with the other Federal agencies responsible for the enforcement of Federal laws prohibiting employment discrimination on the basis of disability, recognizes the potential for jurisdictional overlap that exists with respect to coverage of public entities and the need to avoid problems related to overlapping coverage. The other Federal agencies include the Equal Employment Opportunity Commission, which is the agency primarily responsible for enforcement of title I of the ADA, the Department of Labor, which is the agency responsible for enforcement of section 503 of the Rehabilitation Act of 1973, and 26 Federal agencies with programs of Federal financial assistance, which are responsible for enforcing section 504 in those programs. Section 107 of the ADA requires that coordination mechanisms be developed in connection with the administrative enforcement of complaints alleging discrimination under title I and complaints alleging discrimination in employment in violation of the Rehabilitation Act. Although the ADA does not specifically require inclusion of employment complaints under title II in the coordinating mechanisms required by title I, Federal investigations of title II employment complaints will be coordinated on a government-wide basis also. The Department is currently working with the EEOC and other affected Federal agencies to develop effective coordinating mechanisms, and final regulations on this issue will be issued on or before January 26, 1992.

Subpart D—Program Accessibility

Section 35.149 Discrimination Prohibited

Section 35.149 states the general nondiscrimination principle underlying the program accessibility requirements of §§35.150 and 35.151.

Section 35.150 Existing Facilities

Consistent with section 204(b) of the Act, this regulation adopts the program accessibility concept found in the section 504 regulations for federally conducted programs or activities (e.g., 28 CFR part 39). The concept of ''program accessibility'' was first used in the section 504 regulation adopted by the Department of Health, Education, and Welfare for its federally assisted programs and activities in 1977. It allowed recipients to make their federally assisted programs and activities available to individuals with disabilities without extensive retrofitting of their existing buildings and facilities, by offering those programs through alternative methods. Program accessibility has proven to be a useful approach and was adopted in the regulations issued for programs and activities conducted by Federal Executive agencies. The Act provides that the concept of program access will continue to apply with respect to facilities now in existence, because the cost of retrofitting existing facilities is often prohibitive.

Section 35.150 requires that each service, program, or activity conducted by a public entity, when viewed in its entirety, be readily accessible to and usable by individuals with disabilities. The regulation makes clear, however, that a public entity is not required to make each of its existing facilities accessible (§35.150(a)(1)). Unlike title III of the Act, which requires public accommodations to remove architectural barriers where such removal is ''readily achievable,'' or to provide goods and services through alternative methods, where those methods are ''readily achievable,'' title II requires a public entity to make its programs accessible in all cases, except where to do so would result in a fundamental alteration in the nature of the program or in undue financial and administrative burdens. Congress intended the ''undue burden'' standard in title II to be significantly higher than the ''readily achievable'' standard in title III. Thus, although title II may not require removal of barriers in some cases where removal would be required under title III, the program access requirement of title II should enable individuals with disabilities to participate in and benefit from the services, programs, or activities of public entities in all but the most unusual cases.

Paragraph (a)(2), which establishes a special limitation on the obligation to ensure program accessibility in historic preservation programs, is discussed below in connection with paragraph (b).

Paragraph (a)(3), which is taken from the section 504 regulations for federally conducted programs, generally codifies case law that defines the scope of the public entity's obligation to ensure program accessibility. This paragraph provides that, in meeting the program accessibility requirement, a public entity is not required to take any action that would result in a fundamental alteration in the nature of its service, program,

or activity or in undue financial and administrative burdens. A similar limitation is provided in §35.164.

This paragraph does not establish an absolute defense; it does not relieve a public entity of all obligations to individuals with disabilities. Although a public entity is not required to take actions that would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens, it nevertheless must take any other steps necessary to ensure that individuals with disabilities receive the benefits or services provided by the public entity.

It is the Department's view that compliance with §35.150(a), like compliance with the corresponding provisions of the section 504 regulations for federally conducted programs, would in most cases not result in undue financial and administrative burdens on a public entity. In determining whether financial and administrative burdens are undue, all public entity resources available for use in the funding and operation of the service, program, or activity should be considered. The burden of proving that compliance with paragraph (a) of §35.150 would fundamentally alter the nature of a service, program, or activity or would result in undue financial and administrative burdens rests with the public entity.

The decision that compliance would result in such alteration or burdens must be made by the head of the public entity or his or her designee and must be accompanied by a written statement of the reasons for reaching that conclusion. The Department recognizes the difficulty of identifying the official responsible for this determination, given the variety of organizational forms that may be taken by public entities and their components. The intention of this paragraph is that the determination must be made by a high level official, no lower than a Department head, having budgetary authority and responsibility for making spending decisions.

Any person who believes that he or she or any specific class of persons has been injured by the public entity head's decision or failure to make a decision may file a complaint under the compliance procedures established in subpart F.

Paragraph (b)(1) sets forth a number of means by which program accessibility may be achieved, including redesign of equipment, reassignment of services to accessible buildings, and provision of aides.

The Department wishes to clarify that, consistent with longstanding interpretation of section 504, carrying an individual with a disability is considered an ineffective and therefore an unacceptable method for achieving program accessibility. Department of Health, Education, and Welfare, Office of Civil Rights, Policy Interpretation No. 4, 43 FR 36035 (August 14, 1978). Carrying will be permitted only in manifestly exceptional cases, and only if all personnel who are permitted to participate in carrying an individual with a disability are formally instructed on the safest and least humiliating means of carrying. ''Manifestly exceptional'' cases in which carrying would be permitted might include, for example, programs conducted in unique facilities, such as an oceanographic vessel, for which structural changes and devices necessary to adapt the facility for use by individuals with mobility impairments are unavailable or prohibitively expensive. Carrying is not permitted as an alternative to structural modifications such as installation of a ramp or a chairlift.

In choosing among methods, the public entity shall give priority consideration to those that will be consistent with provision of services in the most integrated setting appropriate to the needs of individuals with disabilities. Structural changes in existing facilities are required only when there is no other feasible way to make the public entity's program accessible. (It should be noted that ''structural changes'' include all physical changes to a facility; the term does not refer only to changes to structural features, such as removal of or alteration to a load-bearing structural member.) The requirements of §35.151 for alterations apply to structural changes undertaken to comply with this section. The public entity may comply with the program accessibility requirement by delivering services at alternate accessible sites or making home visits as appropriate.

Historic Preservation Programs

In order to avoid possible conflict between the congressional mandates to preserve historic properties, on the one hand, and to eliminate discrimination against individuals with disabilities on the other, paragraph (a)(2) provides that a public entity is not required to take any action that would threaten or destroy the historic significance of an historic property. The special limitation on program accessibility set forth in paragraph (a)(2) is applicable only to historic preservation programs, as defined in §35.104, that is, programs that have preservation of historic properties as a primary purpose. Narrow application of the special limitation is justified because of the inherent flexibility of the program accessibility requirement. Where historic preservation is not a primary purpose of the program, the public entity is not required to use a particular facility. It can relocate all or part of its program to an accessible facility, make home visits, or use other standard methods of achieving program accessibility without making structural alterations that might threaten or destroy significant historic features of the historic

property. Thus, government programs located in historic properties, such as an historic State capitol, are not excused from the requirement for program access.

Paragraph (a)(2), therefore, will apply only to those programs that uniquely concern the preservation and experience of the historic property itself. Because the primary benefit of an historic preservation program is the experience of the historic property, paragraph (b)(2) requires the public entity to give priority to methods of providing program accessibility that permit individuals with disabilities to have physical access to the historic property. This priority on physical access may also be viewed as a specific application of the general requirement that the public entity administer programs in the most integrated setting appropriate to the needs of qualified individuals with disabilities (§35.130(d)). Only when providing physical access would threaten or destroy the historic significance of an historic property, or would result in a fundamental alteration in the nature of the program or in undue financial and administrative burdens, may the public entity adopt alternative methods for providing program accessibility that do not ensure physical access. Examples of some alternative methods are provided in paragraph (b)(2).

TIME PERIODS

Paragraphs (c) and (d) establish time periods for complying with the program accessibility requirement. Like the regulations for federally assisted programs (e.g., 28 CFR 41.57(b)), paragraph (c) requires the public entity to make any necessary structural changes in facilities as soon as practicable, but in no event later than three years after the effective date of this regulation.

The proposed rule provided that, aside from structural changes, all other necessary steps to achieve compliance with this part must be taken within sixty days. The sixty day period was taken from regulations implementing section 504, which generally were effective no more than thirty days after publication. Because this regulation will not be effective until January 26, 1992, the Department has concluded that no additional transition period for non-structural changes is necessary, so the sixty day period has been omitted in the final rule. Of course, this section does not reduce or eliminate any obligations that are already applicable to a public entity under section 504.

Where structural modifications are required, paragraph (d) requires that a transition plan be developed by an entity that employs 50 or more persons, within six months of the effective date of this regulation. The legislative history of title II of the ADA makes it clear that, under title II, ''local and state governments are required to provide curb cuts on public streets.'' Education and Labor report at 84. As the rationale for the provision of curb cuts, the House report explains, ''The employment, transportation, and public accommodation sections of * * * (the ADA) would be meaningless if people who use wheelchairs were not afforded the opportunity to travel on and between the streets.'' Id. Section 35.151(e), which establishes accessibility requirements for new construction and alterations, requires that all newly constructed or altered streets, roads, or highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway, and all newly constructed or altered street level pedestrian walkways must have curb ramps or other sloped areas at intersections to streets, roads, or highways. A new paragraph (d)(2) has been added to the final rule to clarify the application of the general requirement for program accessibility to the provision of curb cuts at existing crosswalks. This paragraph requires that the transition plan include a schedule for providing curb ramps or other sloped areas at existing pedestrian walkways, giving priority to walkways serving entities covered by the Act, including State and local government offices and facilities, transportation, public accommodations, and employers, followed by walkways serving other areas. Pedestrian ''walkways'' include locations where access is required for use of public transportation, such as bus stops that are not located at intersections or crosswalks.

Similarly, a public entity should provide an adequate number of accessible parking spaces in existing parking lots or garages over which it has jurisdiction.

Paragraph (d)(3) provides that, if a public entity has already completed a transition plan required by a regulation implementing section 504, the transition plan required by this part will apply only to those policies and practices that were not covered by the previous transition plan. Some commenters suggested that the transition plan should include all aspects of the public entity's operations, including those that may have been covered by a previous transition plan under section 504. The Department believes that such a duplicative requirement would be inappropriate. Many public entities may find, however, that it will be simpler to include all of their operations in the transition plan than to attempt to identify and exclude specifically those that were addressed in a previous plan. Of course, entities covered under section 504 are not shielded from their obligations under that statute merely because they are included under the transition plan developed under this section.

Section 35.151 New Construction and Alterations

Section 35.151 provides that those buildings that are constructed or altered by, on behalf of, or for the use of a public entity shall be designed, constructed, or altered to be readily accessible to and usable by individuals with disabilities if the construction was commenced after the effective date of this part. Facilities under design on that date will be governed by this section if the date that bids were invited falls after the effective date. This interpretation is consistent with Federal practice under section 504.

Section 35.151(c) establishes two standards for accessible new construction and alteration. Under paragraph (c), design, construction, or alteration of facilities in conformance with the Uniform Federal Accessibility Standards (UFAS) or with the Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (hereinafter ADAAG) shall be deemed to comply with the requirements of this section with respect to those facilities except that, if ADAAG is chosen, the elevator exemption contained at §§36.401(d) and 36.404 does not apply. ADAAG is the standard for private buildings and was issued as guidelines by the Architectural and Transportation Barriers Compliance Board (ATBCB) under title III of the ADA. It has been adopted by the Department of Justice and is published as appendix A to the Department's title III rule in today's FEDERAL REGISTER. Departures from particular requirements of these standards by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided. Use of two standards is a departure from the proposed rule.

The proposed rule adopted UFAS as the only interim accessibility standard because that standard was referenced by the regulations implementing section 504 of the Rehabilitation Act promulgated by most Federal funding agencies. It is, therefore, familiar to many State and local government entities subject to this rule. The Department, however, received many comments objecting to the adoption of UFAS. Commenters pointed out that, except for the elevator exemption, UFAS is not as stringent as ADAAG. Others suggested that the standard should be the same to lessen confusion.

Section 204(b) of the Act states that title II regulations must be consistent not only with section 504 regulations but also with ''this Act.'' Based on this provision, the Department has determined that a public entity should be entitled to choose to comply either with ADAAG or UFAS.

Public entities who choose to follow ADAAG, however, are not entitled to the elevator exemption contained in title III of the Act and implemented in the title III regulation at §36.401(d) for new construction and §36.404 for alterations. Section 303(b) of title III states that, with some exceptions, elevators are not required in facilities that are less than three stories or have less than 3000 square feet per story. The section 504 standard, UFAS, contains no such exemption. Section 501 of the ADA makes clear that nothing in the Act may be construed to apply a lesser standard to public entities than the standards applied under section 504. Because permitting the elevator exemption would clearly result in application of a lesser standard than that applied under section 504, paragraph (c) states that the elevator exemption does not apply when public entities choose to follow ADAAG. Thus, a two-story courthouse, whether built according to UFAS or ADAAG, must be constructed with an elevator. It should be noted that Congress did not include an elevator exemption for public transit facilities covered by subtitle B of title II, which covers public transportation provided by public entities, providing further evidence that Congress intended that public buildings have elevators.

Section 504 of the ADA requires the ATBCB to issue supplemental Minimum Guidelines and Requirements for Accessible Design of buildings and facilities subject to the Act, including title II. Section 204(c) of the ADA provides that the Attorney General shall promulgate regulations implementing title II that are consistent with the ATBCB's ADA guidelines. The ATBCB has announced its intention to issue title II guidelines in the future. The Department anticipates that, after the ATBCB's title II guidelines have been published, this rule will be amended to adopt new accessibility standards consistent with the ATBCB's rulemaking. Until that time, however, public entities will have a choice of following UFAS or ADAAG, without the elevator exemption.

Existing buildings leased by the public entity after the effective date of this part are not required by the regulation to meet accessibility standards simply by virtue of being leased. They are subject, however, to the program accessibility standard for existing facilities in §35.150. To the extent the buildings are newly constructed or altered, they must also meet the new construction and alteration requirements of §35.151.

The Department received many comments urging that the Department require that public entities lease only accessible buildings. Federal practice under section 504 has always treated newly leased buildings as subject to the existing facility program accessibility standard. Section 204(b) of the Act states that, in the area of ''program accessibility, existing facilities,'' the title II regulations must be consistent with section 504 regulations. Thus, the Department has adopted the section 504 principles for these

types of leased buildings. Unlike the construction of new buildings where architectural barriers can be avoided at little or no cost, the application of new construction standards to an existing building being leased raises the same prospect of retrofitting buildings as the use of an existing Federal facility, and the same program accessibility standard should apply to both owned and leased existing buildings. Similarly, requiring that public entities only lease accessible space would significantly restrict the options of State and local governments in seeking leased space, which would be particularly burdensome in rural or sparsely populated areas.

On the other hand, the more accessible the leased space is, the fewer structural modifications will be required in the future for particular employees whose disabilities may necessitate barrier removal as a reasonable accommodation. Pursuant to the requirements for leased buildings contained in the Minimum Guidelines and Requirements for Accessible Design published under the Architectural Barriers Act by the ATBCB, 36 CFR 1190.34, the Federal Government may not lease a building unless it contains (1) One accessible route from an accessible entrance to those areas in which the principal activities for which the building is leased are conducted, (2) accessible toilet facilities, and (3) accessible parking facilities, if a parking area is included within the lease (36 CFR 1190.34). Although these requirements are not applicable to buildings leased by public entities covered by this regulation, such entities are encouraged to look for the most accessible space available to lease and to attempt to find space complying at least with these minimum Federal requirements.

Section 35.151(d) gives effect to the intent of Congress, expressed in section 504(c) of the Act, that this part recognize the national interest in preserving significant historic structures. Commenters criticized the Department's use of descriptive terms in the proposed rule that are different from those used in the ADA to describe eligible historic properties. In addition, some commenters criticized the Department's decision to use the concept of ''substantially impairing'' the historic features of a property, which is a concept employed in regulations implementing section 504 of the Rehabilitation Act of 1973. Those commenters recommended that the Department adopt the criteria of ''adverse effect'' published by the Advisory Council on Historic Preservation under the National Historic Preservation Act, 36 CFR 800.9, as the standard for determining whether an historic property may be altered.

The Department agrees with these comments to the extent that they suggest that the language of the rule should conform to the language employed by Congress in the ADA. A definition of ''historic property,'' drawn from section 504 of the ADA, has been added to §35.104 to clarify that the term applies to those properties listed or eligible for listing in the National Register of Historic Places, or properties designated as historic under State or local law.

The Department intends that the exception created by this section be applied only in those very rare situations in which it is not possible to provide access to an historic property using the special access provisions established by UFAS and ADAAG. Therefore, paragraph (d)(1) of §35.151 has been revised to clearly state that alterations to historic properties shall comply, to the maximum extent feasible, with section 4.1.7 of UFAS or section 4.1.7 of ADAAG. Paragraph (d)(2) has been revised to provide that, if it has been determined under the procedures established in UFAS and ADAAG that it is not feasible to provide physical access to an historic property in a manner that will not threaten or destroy the historic significance of the property, alternative methods of access shall be provided pursuant to the requirements of §35.150.

In response to comments, the Department has added to the final rule a new paragraph (e) setting out the requirements of §36.151 as applied to curb ramps. Paragraph (e) is taken from the statement contained in the preamble to the proposed rule that all newly constructed or altered streets, roads, and highways must contain curb ramps at any intersection having curbs or other barriers to entry from a street level pedestrian walkway, and that all newly constructed or altered street level pedestrian walkways must have curb ramps at intersections to streets, roads, or highways.

Subpart E—Communications

Section 35.160 General

Section 35.160 requires the public entity to take such steps as may be necessary to ensure that communications with applicants, participants, and members of the public with disabilities are as effective as communications with others.

Paragraph (b)(1) requires the public entity to furnish appropriate auxiliary aids and services when necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of, the public entity's service, program, or activity. The public entity must provide an opportunity for individuals with disabilities to request the auxiliary aids and services of their choice. This expressed choice shall be given primary consideration by the public entity (§35.160(b)(2)). The public entity shall honor the choice unless it can demonstrate that another effective means of communication exists or that use of the means chosen would not be required under §35.164.

Deference to the request of the individual with a disability is desirable because of the range of disabilities, the variety of auxiliary aids and services, and different circumstances requiring effective communication. For instance, some courtrooms are now equipped for ''computer-assisted transcripts,'' which allow virtually instantaneous transcripts of courtroom argument and testimony to appear on displays. Such a system might be an effective auxiliary aid or service for a person who is deaf or has a hearing loss who uses speech to communicate, but may be useless for someone who uses sign language.

Although in some circumstances a notepad and written materials may be sufficient to permit effective communication, in other circumstances they may not be sufficient. For example, a qualified interpreter may be necessary when the information being communicated is complex, or is exchanged for a lengthy period of time. Generally, factors to be considered in determining whether an interpreter is required include the context in which the communication is taking place, the number of people involved, and the importance of the communication.

Several commenters asked that the rule clarify that the provision of readers is sometimes necessary to ensure access to a public entity's services, programs or activities. Reading devices or readers should be provided when necessary for equal participation and opportunity to benefit from any governmental service, program, or activity, such as reviewing public documents, examining demonstrative evidence, and filling out voter registration forms or forms needed to receive public benefits. The importance of providing qualified readers for examinations administered by public entities is discussed under §35.130. Reading devices and readers are appropriate auxiliary aids and services where necessary to permit an individual with a disability to participate in or benefit from a service, program, or activity.

Section 35.160(b)(2) of the proposed rule, which provided that a public entity need not furnish individually prescribed devices, readers for personal use or study, or other devices of a personal nature, has been deleted in favor of a new section in the final rule on personal devices and services (see §35.135).

In response to comments, the term ''auxiliary aids and services'' is used in place of ''auxiliary aids'' in the final rule. This phrase better reflects the range of aids and services that may be required under this section.

A number of comments raised questions about the extent of a public entity's obligation to provide access to television programming for persons with hearing impairments. Television and videotape programming produced by public entities are covered by this section. Access to audio portions of such programming may be provided by closed captioning.

Section 35.161 Telecommunication Devices for the Deaf (TDD's)

Section 35.161 requires that, where a public entity communicates with applicants and beneficiaries by telephone, TDD's or equally effective telecommunication systems be used to communicate with individuals with impaired speech or hearing.

Problems arise when a public entity which does not have a TDD needs to communicate with an individual who uses a TDD or vice versa. Title IV of the ADA addresses this problem by requiring establishment of telephone relay services to permit communications between individuals who communicate by TDD and individuals who communicate by the telephone alone. The relay services required by title IV would involve a relay operator using both a standard telephone and a TDD to type the voice messages to the TDD user and read the TDD messages to the standard telephone user.

Section 204(b) of the ADA requires that the regulation implementing title II with respect to communications be consistent with the Department's regulation implementing section 504 for its federally conducted programs and activities at 28 CFR part 39. Section 35.161, which is taken from §39.160(a)(2) of that regulation, requires the use of TDD's or equally effective telecommunication systems for communication with people who use TDD's. Of course, where relay services, such as those required by title IV of the ADA are available, a public entity may use those services to meet the requirements of this section.

Many commenters were concerned that public entities should not rely heavily on the establishment of relay services. The commenters explained that while relay services would be of vast benefit to both public entities and individuals who use TDD's, the services are not sufficient to provide access to all telephone services. First, relay systems do not provide effective access to the increasingly popular automated systems that require the caller to respond by pushing a button on a touch tone phone. Second, relay systems cannot operate fast enough to convey messages on answering machines, or to permit a TDD user to leave a recorded message. Third, communication through relay systems may not be appropriate in cases of crisis lines pertaining to rape, domestic violence, child abuse, and drugs. The Department believes that it is more appropriate for the Federal Communications Commission to address these issues in its rulemaking under title IV.

Some commenters requested that those entities with frequent contacts with clients who use TDD's have on-site TDD's to provide for direct communication between the entity

and the individual. The Department encourages those entities that have extensive telephone contact with the public such as city halls, public libraries, and public aid offices, to have TDD's to insure more immediate access. Where the provision of telephone service is a major function of the entity, TDD's should be available.

Section 35.162 Telephone Emergency Services

Many public entities provide telephone emergency services by which individuals can seek immediate assistance from police, fire, ambulance, and other emergency services. These telephone emergency services—including ''911'' services—are clearly an important public service whose reliability can be a matter of life or death. The legislative history of title II specifically reflects congressional intent that public entities must ensure that telephone emergency services, including 911 services, be accessible to persons with impaired hearing and speech through telecommunication technology (Conference report at 67; Education and Labor report at 84–85).

Proposed §35.162 mandated that public entities provide emergency telephone services to persons with disabilities that are ''functionally equivalent'' to voice services provided to others. Many commenters urged the Department to revise the section to make clear that direct access to telephone emergency services is required by title II of the ADA as indicated by the legislative history (Conference report at 67–68; Education and Labor report at 85). In response, the final rule mandates ''direct access,'' instead of ''access that is functionally equivalent'' to that provided to all other telephone users. Telephone emergency access through a third party or through a relay service would not satisfy the requirement for direct access.

Several commenters asked about a separate seven-digit emergency call number for the 911 services. The requirement for direct access disallows the use of a separate seven-digit number where 911 service is available. Separate seven-digit emergency call numbers would be unfamiliar to many individuals and also more burdensome to use. A standard emergency 911 number is easier to remember and would save valuable time spent in searching in telephone books for a local seven-digit emergency number.

Many commenters requested the establishment of minimum standards of service (e.g., the quantity and location of TDD's and computer modems needed in a given emergency center). Instead of establishing these scoping requirements, the Department has established a performance standard through the mandate for direct access.

Section 35.162 requires public entities to take appropriate steps, including equipping their emergency systems with modern technology, as may be necessary to promptly receive and respond to a call from users of TDD's and computer modems. Entities are allowed the flexibility to determine what is the appropriate technology for their particular needs. In order to avoid mandating use of particular technologies that may become outdated, the Department has eliminated the references to the Baudot and ASCII formats in the proposed rule.

Some commenters requested that the section require the installation of a voice amplification device on the handset of the dispatcher's telephone to amplify the dispatcher's voice. In an emergency, a person who has a hearing loss may be using a telephone that does not have an amplification device. Installation of speech amplification devices on the handsets of the dispatchers' telephones would respond to that situation. The Department encourages their use.

Several commenters emphasized the need for proper maintenance of TDD's used in telephone emergency services. Section 35.133, which mandates maintenance of accessible features, requires public entities to maintain in operable working condition TDD's and other devices that provide direct access to the emergency system.

Section 35.163 Information and Signage

Section 35.163(a) requires the public entity to provide information to individuals with disabilities concerning accessible services, activities, and facilities. Paragraph (b) requires the public entity to provide signage at all inaccessible entrances to each of its facilities that directs users to an accessible entrance or to a location with information about accessible facilities.

Several commenters requested that, where TDD-equipped pay phones or portable TDD's exist, clear signage should be posted indicating the location of the TDD. The Department believes that this is required by paragraph (a). In addition, the Department recommends that, in large buildings that house TDD's, directional signage indicating the location of available TDD's should be placed adjacent to banks of telephones that do not contain a TDD.

Section 35.164 Duties

Section 35.164, like paragraph (a)(3) of §35.150, is taken from the section 504 regulations for federally conducted programs. Like paragraph (a)(3), it limits the obligation of the public entity to ensure effective communication in accordance with *Davis* and the circuit court opinions interpreting it. It also includes specific requirements for determining the existence of undue financial and administrative burdens. The preamble discussion of §35.150(a) regarding that determination is applicable to this section and further explains the public entity's obligation to comply with §§35.160–35.164. Because

of the essential nature of the services provided by telephone emergency systems, the Department assumes that §35.164 will rarely be applied to §35.162.

Subpart F—Compliance Procedures

Subpart F sets out the procedures for administrative enforcement of this part. Section 203 of the Act provides that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) for enforcement of section 504 of the Rehabilitation Act, which prohibits discrimination on the basis of handicap in programs and activities that receive Federal financial assistance, shall be the remedies, procedures, and rights for enforcement of title II. Section 505, in turn, incorporates by reference the remedies, procedures, and rights set forth in title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d to 2000d–4a). Title VI, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs, is enforced by the Federal agencies that provide the Federal financial assistance to the covered programs and activities in question. If voluntary compliance cannot be achieved, Federal agencies enforce title VI either by the termination of Federal funds to a program that is found to discriminate, following an administrative hearing, or by a referral to this Department for judicial enforcement.

Title II of the ADA extended the requirements of section 504 to all services, programs, and activities of State and local governments, not only those that receive Federal financial assistance. The House Committee on Education and Labor explained the enforcement provisions as follows:

It is the Committee's intent that administrative enforcement of section 202 of the legislation should closely parallel the Federal government's experience with section 504 of the Rehabilitation Act of 1973. The Attorney General should use section 504 enforcement procedures and the Department's coordination role under Executive Order 12250 as models for regulation in this area.

The Committee envisions that the Department of Justice will identify appropriate Federal agencies to oversee compliance activities for State and local governments. As with section 504, these Federal agencies, including the Department of Justice, will receive, investigate, and where possible, resolve complaints of discrimination. If a Federal agency is unable to resolve a complaint by voluntary means, * * * the major enforcement sanction for the Federal government will be referral of cases by these Federal agencies to the Department of Justice.

The Department of Justice may then proceed to file suits in Federal district court. As with section 504, there is also a private right of action for persons with disabilities, which includes the full panoply of remedies. Again, consistent with section 504, it is not the Committee's intent that persons with disabilities need to exhaust Federal administrative remedies before exercising their private right of action.

Education & Labor report at 98. See also S. Rep. No. 116, 101st Cong., 1st Sess., at 57–58 (1989).

Subpart F effectuates the congressional intent by deferring to section 504 procedures where those procedures are applicable, that is, where a Federal agency has jurisdiction under section 504 by virtue of its provision of Federal financial assistance to the program or activity in which the discrimination is alleged to have occurred. Deferral to the 504 procedures also makes the sanction of fund termination available where necessary to achieve compliance. Because the Civil Rights Restoration Act (Pub. L. 100–259) extended the application of section 504 to all of the operations of the public entity receiving the Federal financial assistance, many activities of State and local governments are already covered by section 504. The procedures in subpart F apply to complaints concerning services, programs, and activities of public entities that are covered by the ADA.

Subpart G designates the Federal agencies responsible for enforcing the ADA with respect to specific components of State and local government. It does not, however, displace existing jurisdiction under section 504 of the various funding agencies. Individuals may still file discrimination complaints against recipients of Federal financial assistance with the agencies that provide that assistance, and the funding agencies will continue to process those complaints under their existing procedures for enforcing section 504. The substantive standards adopted in this part for title II of the ADA are generally the same as those required under section 504 for federally assisted programs, and public entities covered by the ADA are also covered by the requirements of section 504 to the extent that they receive Federal financial assistance. To the extent that title II provides greater protection to the rights of individuals with disabilities, however, the funding agencies will also apply the substantive requirements established under title II and this part in processing complaints covered by both this part and section 504, except that fund termination procedures may be used only for violations of section 504.

Subpart F establishes the procedures to be followed by the agencies designated in subpart G for processing complaints against State and local government entities when the designated agency does not have jurisdiction under section 504.

Section 35.170 Complaints

Section 35.170 provides that any individual who believes that he or she or a specific class of individuals has been subjected to discrimination on the basis of disability by a public entity may, by himself or herself or by an authorized representative, file a complaint under this part within 180 days of the date of the alleged discrimination, unless the time for filing is extended by the agency for good cause. Although §35.107 requires public entities that employ 50 or more persons to establish grievance procedures for resolution of complaints, exhaustion of those procedures is not a prerequisite to filing a complaint under this section. If a complainant chooses to follow the public entity's grievance procedures, however, any resulting delay may be considered good cause for extending the time allowed for filing a complaint under this part.

Filing the complaint with any Federal agency will satisfy the requirement for timely filing. As explained below, a complaint filed with an agency that has jurisdiction under section 504 will be processed under the agency's procedures for enforcing section 504.

Some commenters objected to the complexity of allowing complaints to be filed with different agencies. The multiplicity of enforcement jurisdiction is the result of following the statutorily mandated enforcement scheme. The Department has, however, attempted to simplify procedures for complainants by making the Federal agency that receives the complaint responsible for referring it to an appropriate agency.

The Department has also added a new paragraph (c) to this section providing that a complaint may be filed with any agency designated under subpart G of this part, or with any agency that provides funding to the public entity that is the subject of the complaint, or with the Department of Justice. Under §35.171(a)(2), the Department of Justice will refer complaints for which it does not have jurisdiction under section 504 to an agency that does have jurisdiction under section 504, or to the agency designated under subpart G as responsible for complaints filed against the public entity that is the subject of the complaint or in the case of an employment complaint that is also subject to title I of the Act, to the Equal Employment Opportunity Commission. Complaints filed with the Department of Justice may be sent to the Coordination and Review Section, P.O. Box 66118, Civil Rights Division, U.S. Department of Justice, Washington, DC 20035–6118.

Section 35.171 Acceptance of Complaints

Section 35.171 establishes procedures for determining jurisdiction and responsibility for processing complaints against public entities. The final rule provides complainants an opportunity to file with the Federal funding agency of their choice. If that agency does not have jurisdiction under section 504, however, and is not the agency designated under subpart G as responsible for that public entity, the agency must refer the complaint to the Department of Justice, which will be responsible for referring it either to an agency that does have jurisdiction under section 504 or to the appropriate designated agency, or in the case of an employment complaint that is also subject to title I of the Act, to the Equal Employment Opportunity Commission.

Whenever an agency receives a complaint over which it has jurisdiction under section 504, it will process the complaint under its section 504 procedures. When the agency designated under subpart G receives a complaint for which it does not have jurisdiction under section 504, it will treat the complaint as an ADA complaint under the procedures established in this subpart.

Section 35.171 also describes agency responsibilities for the processing of employment complaints. As described in connection with §35.140, additional procedures regarding the coordination of employment complaints will be established in a coordination regulation issued by DOJ and EEOC. Agencies with jurisdiction under section 504 for complaints alleging employment discrimination also covered by title I will follow the procedures established by the coordination regulation for those complaints. Complaints covered by title I but not section 504 will be referred to the EEOC, and complaints covered by this part but not title I will be processed under the procedures in this part.

Section 35.172 Resolution of Complaints

Section 35.172 requires the designated agency to either resolve the complaint or issue to the complainant and the public entity a Letter of Findings containing findings of fact and conclusions of law and a description of a remedy for each violation found.

The Act requires the Department of Justice to establish administrative procedures for resolution of complaints, but does not require complainants to exhaust these administrative remedies. The Committee Reports make clear that Congress intended to provide a private right of action with the full panoply of remedies for individual victims of discrimination. Because the Act does not require exhaustion of administrative remedies, the complainant may elect to proceed with a private suit at any time.

Section 35.173 Voluntary Compliance Agreements

Section 35.173 requires the agency to attempt to resolve all complaints in which it

finds noncompliance through voluntary compliance agreements enforceable by the Attorney General.

Section 35.174 Referral

Section 35.174 provides for referral of the matter to the Department of Justice if the agency is unable to obtain voluntary compliance.

Section 35.175 Attorney's Fees

Section 35.175 states that courts are authorized to award attorneys fees, including litigation expenses and costs, as provided in section 505 of the Act. Litigation expenses include items such as expert witness fees, travel expenses, etc. The Judiciary Committee Report specifies that such items are included under the rubric of ''attorneys fees'' and not ''costs'' so that such expenses will be assessed against a plaintiff only under the standard set forth in *Christiansburg Garment Co.* v. *Equal Employment Opportunity Commission,* 434 U.S. 412 (1978). (Judiciary report at 73.)

Section 35.176 Alternative Means of Dispute Resolution

Section 35.176 restates section 513 of the Act, which encourages use of alternative means of dispute resolution.

Section 35.177 Effect of Unavailability of Technical Assistance

Section 35.177 explains that, as provided in section 506(e) of the Act, a public entity is not excused from compliance with the requirements of this part because of any failure to receive technical assistance.

Section 35.178 State Immunity

Section 35.178 restates the provision of section 502 of the Act that a State is not immune under the eleventh amendment to the Constitution of the United States from an action in Federal or State court for violations of the Act, and that the same remedies are available for any such violations as are available in an action against an entity other than a State.

Subpart G—Designated Agencies

Section 35.190 Designated Agencies

Subpart G designates the Federal agencies responsible for investigating complaints under this part. At least 26 agencies currently administer programs of Federal financial assistance that are subject to the nondiscrimination requirements of section 504 as well as other civil rights statutes. A majority of these agencies administer modest programs of Federal financial assistance and/or devote minimal resources exclusively to ''external'' civil rights enforcement activities. Under Executive Order 12250, the Department of Justice has encouraged the use of delegation agreements under which certain civil rights compliance responsibilities for a class of recipients funded by more than one agency are delegated by an agency or agencies to a ''lead'' agency. For example, many agencies that fund institutions of higher education have signed agreements that designate the Department of Education as the ''lead'' agency for this class of recipients.

The use of delegation agreements reduces overlap and duplication of effort, and thereby strengthens overall civil rights enforcement. However, the use of these agreements to date generally has been limited to education and health care recipients. These classes of recipients are funded by numerous agencies and the logical connection to a lead agency is clear (e.g., the Department of Education for colleges and universities, and the Department of Health and Human Services for hospitals).

The ADA's expanded coverage of State and local government operations further complicates the process of establishing Federal agency jurisdiction for the purpose of investigating complaints of discrimination on the basis of disability. Because all operations of public entities now are covered irrespective of the presence or absence of Federal financial assistance, many additional State and local government functions and organizations now are subject to Federal jurisdiction. In some cases, there is no historical or single clear-cut subject matter relationship with a Federal agency as was the case in the education example described above. Further, the 33,000 governmental jurisdictions subject to the ADA differ greatly in their organization, making a detailed and workable division of Federal agency jurisdiction by individual State, county, or municipal entity unrealistic.

This regulation applies the delegation concept to the investigation of complaints of discrimination on the basis of disability by public entities under the ADA. It designates eight agencies, rather than all agencies currently administering programs of Federal financial assistance, as responsible for investigating complaints under this part. These ''designated agencies'' generally have the largest civil rights compliance staffs, the most experience in complaint investigations and disability issues, and broad yet clear subject area responsibilities. This division of responsibilities is made functionally rather than by public entity type or name designation. For example, all entities (regardless of their title) that exercise responsibilities, regulate, or administer services or programs relating to lands and natural resources fall within the jurisdiction of the Department of Interior.

Complaints under this part will be investigated by the designated agency most closely related to the functions exercised by the governmental component against which the complaint is lodged. For example, a complaint against a State medical board, where such a board is a recognizable entity, will be investigated by the Department of Health and Human Services (the designated agency for regulatory activities relating to the provision of health care), even if the board is part of a general umbrella department of planning and regulation (for which the Department of Justice is the designated agency). If two or more agencies have apparent responsibility over a complaint, §35.190(c) provides that the Assistant Attorney General shall determine which one of the agencies shall be the designated agency for purposes of that complaint.

Thirteen commenters, including four proposed designated agencies, addressed the Department of Justice's identification in the proposed regulation of nine ''designated agencies'' to investigate complaints under this part. Most comments addressed the proposed specific delegations to the various individual agencies. The Department of Justice agrees with several commenters who pointed out that responsibility for ''historic and cultural preservation'' functions appropriately belongs with the Department of Interior rather than the Department of Education. The Department of Justice also agrees with the Department of Education that ''museums'' more appropriately should be delegated to the Department of Interior, and that ''preschool and daycare programs'' more appropriately should be assigned to the Department of Health and Human Services, rather than to the Department of Education. The final rule reflects these decisions.

The Department of Commerce opposed its listing as the designated agency for ''commerce and industry, including general economic development, banking and finance, consumer protection, insurance, and small business''. The Department of Commerce cited its lack of a substantial existing section 504 enforcement program and experience with many of the specific functions to be delegated. The Department of Justice accedes to the Department of Commerce's position, and has assigned itself as the designated agency for these functions.

In response to a comment from the Department of Health and Human Services, the regulation's category of ''medical and nursing schools'' has been clarified to read ''schools of medicine, dentistry, nursing, and other health-related fields''. Also in response to a comment from the Department of Health and Human Services, ''correctional institutions'' have been specifically added to the public safety and administration of justice functions assigned to the Department of Justice.

The regulation also assigns the Department of Justice as the designated agency responsible for all State and local government functions not assigned to other designated agencies. The Department of Justice, under an agreement with the Department of the Treasury, continues to receive and coordinate the investigation of complaints filed under the Revenue Sharing Act. This entitlement program, which was terminated in 1986, provided civil rights compliance jurisdiction for a wide variety of complaints regarding the use of Federal funds to support various general activities of local governments. In the absence of any similar program of Federal financial assistance administered by another Federal agency, placement of designated agency responsibilities for miscellaneous and otherwise undesignated functions with the Department of Justice is an appropriate continuation of current practice.

The Department of Education objected to the proposed rule's inclusion of the functional area of ''arts and humanities'' within its responsibilities, and the Department of Housing and Urban Development objected to its proposed designation as responsible for activities relating to rent control, the real estate industry, and housing code enforcement. The Department has deleted these areas from the lists assigned to the Departments of Education and Housing and Urban Development, respectively, and has added a new paragraph (c) to §35.190, which provides that the Department of Justice may assign responsibility for components of State or local governments that exercise responsibilities, regulate, or administer services, programs, or activities relating to functions not assigned to specific designated agencies by paragraph (b) of this section to other appropriate agencies. The Department believes that this approach will provide more flexibility in determining the appropriate agency for investigation of complaints involving those components of State and local governments not specifically addressed by the listings in paragraph (b). As provided in §§35.170 and 35.171, complaints filed with the Department of Justice will be referred to the appropriate agency.

Several commenters proposed a stronger role for the Department of Justice, especially with respect to the receipt and assignment of complaints, and the overall monitoring of the effectiveness of the enforcement activities of Federal agencies. As discussed above, §§35.170 and 35.171 have been revised to provide for referral of complaints by the Department of Justice to appropriate enforcement agencies. Also, language has been added to §35.190(a) of the final regulation stating that the Assistant Attorney

General shall provide policy guidance and interpretations to designated agencies to ensure the consistent and effective implementation of this part.

[Order No. 1512–91, 56 FR 35716, July 26, 1991, redesignated by AG Order No. 3180–2010, 75 FR 56184, Sept. 15, 2010]

PART 36—NONDISCRIMINATION ON THE BASIS OF DISABILITY BY PUBLIC ACCOMMODATIONS AND IN COMMERCIAL FACILITIES

Subpart A—General

Sec.
36.101 Purpose.
36.102 Application.
36.103 Relationship to other laws.
36.104 Definitions.
36.105–36.199 [Reserved]

Subpart B—General Requirements

36.201 General.
36.202 Activities.
36.203 Integrated settings.
36.204 Administrative methods.
36.205 Association.
36.206 Retaliation or coercion.
36.207 Places of public accommodations located in private residences.
36.208 Direct threat.
36.209 Illegal use of drugs.
36.210 Smoking.
36.211 Maintenance of accessible features.
36.212 Insurance.
36.213 Relationship of subpart B to subparts C and D of this part.
36.214–36.299 [Reserved]

Subpart C—Specific Requirements

36.301 Eligibility criteria.
36.302 Modifications in policies, practices, or procedures.
36.303 Auxiliary aids and services.
36.304 Removal of barriers.
36.305 Alternatives to barrier removal.
36.306 Personal devices and services.
36.307 Accessible or special goods.
36.308 Seating in assembly areas.
36.309 Examinations and courses.
36.310 Transportation provided by public accommodations.
35.311 Mobility devices.
36.312–36.399 [Reserved]

Subpart D—New Construction and Alterations

36.401 New construction.
36.402 Alterations.
36.403 Alterations: Path of travel.
36.404 Alterations: Elevator exemption.
36.405 Alterations: Historic preservation.
36.406 Standards for new construction and alterations.
36.407–36.499 [Reserved]

Subpart E—Enforcement

36.501 Private suits.
36.502 Investigations and compliance reviews.
36.503 Suit by the Attorney General.
36.504 Relief.
36.505 Attorneys fees.
36.506 Alternative means of dispute resolution.
36.507 Effect of unavailability of technical assistance.
36.508 Effective date.
36.509–36.599 [Reserved]

Subpart F—Certification of State Laws or Local Building Codes

36.601 Definitions.
36.602 General rule.
36.603 Preliminary determination.
36.604 Procedure following preliminary determination of equivalency.
36.605 Procedure following preliminary denial of certification.
36.606 Effect of certification.
36.607 Guidance concerning model codes.

APPENDIX A TO PART 36—GUIDANCE ON REVISIONS TO ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY BY PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES

APPENDIX B TO PART 36—ANALYSIS AND COMMENTARY ON THE 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN

APPENDIX C TO PART 36—GUIDANCE ON ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY BY PUBLIC ACCOMMODATIONS AND IN COMMERCIAL FACILITIES ORIGINALLY PUBLISHED ON JULY 26, 1991

APPENDIX D TO PART 36—1991 STANDARDS FOR ACCESSIBLE DESIGN AS ORIGINALLY PUBLISHED ON JULY 26, 1991

AUTHORITY: 5 U.S.C. 301; 28 U.S.C. 509, 510; 42 U.S.C. 12186(b).

SOURCE: Order No. 1513–91, 56 FR 35592, July 26, 1991, unless otherwise noted.

Subpart A—General

§ 36.101 Purpose.

The purpose of this part is to implement title III of the Americans with Disabilities Act of 1990 (42 U.S.C. 12181), which prohibits discrimination on the basis of disability by public accommodations and requires places of public

accommodation and commercial facilities to be designed, constructed, and altered in compliance with the accessibility standards established by this part.

§ 36.102 Application.

(a) *General.* This part applies to any—
(1) Public accommodation;
(2) Commercial facility; or
(3) Private entity that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes.

(b) *Public accommodations.* (1) The requirements of this part applicable to public accommodations are set forth in subparts B, C, and D of this part.

(2) The requirements of subparts B and C of this part obligate a public accommodation only with respect to the operations of a place of public accommodation.

(3) The requirements of subpart D of this part obligate a public accommodation only with respect to—

(i) A facility used as, or designed or constructed for use as, a place of public accommodation; or

(ii) A facility used as, or designed and constructed for use as, a commercial facility.

(c) *Commercial facilities.* The requirements of this part applicable to commercial facilities are set forth in subpart D of this part.

(d) *Examinations and courses.* The requirements of this part applicable to private entities that offer examinations or courses as specified in paragraph (a) of this section are set forth in § 36.309.

(e) *Exemptions and exclusions.* This part does not apply to any private club (except to the extent that the facilities of the private club are made available to customers or patrons of a place of public accommodation), or to any religious entity or public entity.

§ 36.103 Relationship to other laws.

(a) *Rule of interpretation.* Except as otherwise provided in this part, this part shall not be construed to apply a lesser standard than the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 791) or the regulations issued by Federal agencies pursuant to that title.

(b) *Section 504.* This part does not affect the obligations of a recipient of Federal financial assistance to comply with the requirements of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and regulations issued by Federal agencies implementing section 504.

(c) *Other laws.* This part does not invalidate or limit the remedies, rights, and procedures of any other Federal laws, or State or local laws (including State common law) that provide greater or equal protection for the rights of individuals with disabilities or individuals associated with them.

§ 36.104 Definitions.

For purposes of this part, the term—

1991 Standards means requirements set forth in the ADA Standards for Accessible Design, originally published on July 26, 1991, and republished as Appendix D to this part.

2004 ADAAG means the requirements set forth in appendices B and D to 36 CFR part 1191 (2009).

2010 Standards means the 2010 ADA Standards for Accessible Design, which consist of the 2004 ADAAG and the requirements contained in subpart D of this part.

Act means the Americans with Disabilities Act of 1990 (Pub. L. 101–336, 104 Stat. 327, 42 U.S.C. 12101–12213 and 47 U.S.C. 225 and 611).

Commerce means travel, trade, traffic, commerce, transportation, or communication—

(1) Among the several States;

(2) Between any foreign country or any territory or possession and any State; or

(3) Between points in the same State but through another State or foreign country.

Commercial facilities means facilities—

(1) Whose operations will affect commerce;

(2) That are intended for nonresidential use by a private entity; and

(3) That are not—

(i) Facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968, as amended (42 U.S.C. 3601–3631);

(ii) Aircraft; or

(iii) Railroad locomotives, railroad freight cars, railroad cabooses, commuter or intercity passenger rail cars (including coaches, dining cars, sleeping cars, lounge cars, and food service cars), any other railroad cars described in section 242 of the Act or covered under title II of the Act, or railroad rights-of-way. For purposes of this definition, ''rail'' and ''railroad'' have the meaning given the term ''railroad'' in section 202(e) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(e)).

Current illegal use of drugs means illegal use of drugs that occurred recently enough to justify a reasonable belief that a person's drug use is current or that continuing use is a real and ongoing problem.

Direct threat means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures, or by the provision of auxiliary aids or services, as provided in §36.208.

Disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

(1) The phrase *physical or mental impairment* means—

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine;

(ii) Any mental or psychological disorder such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities;

(iii) The phrase physical or mental impairment includes, but is not limited to, such contagious and noncontagious diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, HIV disease (whether symptomatic or asymptomatic), tuberculosis, drug addiction, and alcoholism;

(iv) The phrase *physical or mental impairment* does not include homosexuality or bisexuality.

(2) The phrase *major life activities* means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) The phrase *has a record of such an impairment* means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) The phrase *is regarded as having an impairment* means—

(i) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a private entity as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (1) of this definition but is treated by a private entity as having such an impairment.

(5) The term *disability* does not include—

(i) Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(ii) Compulsive gambling, kleptomania, or pyromania; or

(iii) Psychoactive substance use disorders resulting from current illegal use of drugs.

Drug means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

Existing facility means a facility in existence on any given date, without regard to whether the facility may also be considered newly constructed or altered under this part.

Facility means all or any portion of buildings, structures, sites, complexes, equipment, rolling stock or other conveyances, roads, walks, passageways, parking lots, or other real or personal property, including the site where the

building, property, structure, or equipment is located.

Housing at a place of education means housing operated by or on behalf of an elementary, secondary, undergraduate, or postgraduate school, or other place of education, including dormitories, suites, apartments, or other places of residence.

Illegal use of drugs means the use of one or more drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). The term ''illegal use of drugs'' does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

Individual with a disability means a person who has a disability. The term ''individual with a disability'' does not include an individual who is currently engaging in the illegal use of drugs, when the private entity acts on the basis of such use.

Other power-driven mobility device means any mobility device powered by batteries, fuel, or other engines—whether or not designed primarily for use by individuals with mobility disabilities—that is used by individuals with mobility disabilities for the purpose of locomotion, including golf cars, electronic personal assistance mobility devices (EPAMDs), such as the Segway® PT, or any mobility device designed to operate in areas without defined pedestrian routes, but that is not a wheelchair within the meaning of this section. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

Place of public accommodation means a facility operated by a private entity whose operations affect commerce and fall within at least one of the following categories—

(1) Place of lodging, except for an establishment located within a facility that contains not more than five rooms for rent or hire and that actually is occupied by the proprietor of the establishment as the residence of the proprietor. For purposes of this part, a facility is a ''place of lodging'' if it is—

(i) An inn, hotel, or motel; or

(ii) A facility that—

(A) Provides guest rooms for sleeping for stays that primarily are short-term in nature (generally 30 days or less) where the occupant does not have the right to return to a specific room or unit after the conclusion of his or her stay; and

(B) Provides guest rooms under conditions and with amenities similar to a hotel, motel, or inn, including the following—

(*1*) On- or off-site management and reservations service;

(*2*) Rooms available on a walk-up or call-in basis;

(*3*) Availability of housekeeping or linen service; and

(*4*) Acceptance of reservations for a guest room type without guaranteeing a particular unit or room until check-in, and without a prior lease or security deposit.

(2) A restaurant, bar, or other establishment serving food or drink;

(3) A motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(4) An auditorium, convention center, lecture hall, or other place of public gathering;

(5) A bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment;

(6) A laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other service establishment;

(7) A terminal, depot, or other station used for specified public transportation;

(8) A museum, library, gallery, or other place of public display or collection;

(9) A park, zoo, amusement park, or other place of recreation;

(10) A nursery, elementary, secondary, undergraduate, or postgraduate private school, or other place of education;

(11) A day care center, senior citizen center, homeless shelter, food bank, adoption agency, or other social service center establishment; and

(12) A gymnasium, health spa, bowling alley, golf course, or other place of exercise or recreation.

Private club means a private club or establishment exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000a(e)).

Private entity means a person or entity other than a public entity.

Public accommodation means a private entity that owns, leases (or leases to), or operates a place of public accommodation.

Public entity means—

(1) Any State or local government;

(2) Any department, agency, special purpose district, or other instrumentality of a State or States or local government; and

(3) The National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act). (45 U.S.C. 541)

Qualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.

Qualified reader means a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.

Readily achievable means easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable factors to be considered include—

(1) The nature and cost of the action needed under this part;

(2) The overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site;

(3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;

(4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and

(5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

Religious entity means a religious organization, including a place of worship.

Service animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. Examples of work or tasks include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing non-violent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

Specified public transportation means transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public

with general or special service (including charter service) on a regular and continuing basis.

State means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

Undue burden means significant difficulty or expense. In determining whether an action would result in an undue burden, factors to be considered include—

(1) The nature and cost of the action needed under this part;

(2) The overall financial resources of the site or sites involved in the action; the number of persons employed at the site; the effect on expenses and resources; legitimate safety requirements that are necessary for safe operation, including crime prevention measures; or the impact otherwise of the action upon the operation of the site;

(3) The geographic separateness, and the administrative or fiscal relationship of the site or sites in question to any parent corporation or entity;

(4) If applicable, the overall financial resources of any parent corporation or entity; the overall size of the parent corporation or entity with respect to the number of its employees; the number, type, and location of its facilities; and

(5) If applicable, the type of operation or operations of any parent corporation or entity, including the composition, structure, and functions of the workforce of the parent corporation or entity.

Video remote interpreting (VRI) service means an interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide-bandwidth video connection that delivers high-quality video images as provided in § 36.303(f).

Wheelchair means a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or of both indoor and outdoor locomotion. This definition does not apply to Federal wilderness areas; wheelchairs in such areas are defined in section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56250, Sept. 15, 2010; 76 FR 13287, Mar. 11, 2011]

§§ 36.105–36.199 [Reserved]

Subpart B—General Requirements

§ 36.201 General.

(a) *Prohibition of discrimination.* No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation by any private entity who owns, leases (or leases to), or operates a place of public accommodation.

(b) *Landlord and tenant responsibilities.* Both the landlord who owns the building that houses a place of public accommodation and the tenant who owns or operates the place of public accommodation are public accommodations subject to the requirements of this part. As between the parties, allocation of responsibility for complying with the obligations of this part may be determined by lease or other contract.

§ 36.202 Activities.

(a) *Denial of participation.* A public accommodation shall not subject an individual or class of individuals on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, or accommodations of a place of public accommodation.

(b) *Participation in unequal benefit.* A public accommodation shall not afford an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, or accommodation that is not equal to that afforded to other individuals.

(c) *Separate benefit.* A public accommodation shall not provide an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, privilege, advantage, or accommodation, or other opportunity that is as effective as that provided to others.

(d) *Individual or class of individuals.* For purposes of paragraphs (a) through (c) of this section, the term ''individual or class of individuals'' refers to the clients or customers of the public accommodation that enters into the contractual, licensing, or other arrangement.

§ 36.203 Integrated settings.

(a) *General.* A public accommodation shall afford goods, services, facilities, privileges, advantages, and accommodations to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(b) *Opportunity to participate.* Notwithstanding the existence of separate or different programs or activities provided in accordance with this subpart, a public accommodation shall not deny an individual with a disability an opportunity to participate in such programs or activities that are not separate or different.

(c) *Accommodations and services.* (1) Nothing in this part shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit available under this part that such individual chooses not to accept.

(2) Nothing in the Act or this part authorizes the representative or guardian of an individual with a disability to decline food, water, medical treatment, or medical services for that individual.

§ 36.204 Administrative methods.

A public accommodation shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration that have the effect of discriminating on the basis of disability, or that perpetuate the discrimination of others who are subject to common administrative control.

§ 36.205 Association.

A public accommodation shall not exclude or otherwise deny equal goods, services, facilities, privileges, advantages, accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

§ 36.206 Retaliation or coercion.

(a) No private or public entity shall discriminate against any individual because that individual has opposed any act or practice made unlawful by this part, or because that individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under the Act or this part.

(b) No private or public entity shall coerce, intimidate, threaten, or interfere with any individual in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other individual in the exercise or enjoyment of, any right granted or protected by the Act or this part.

(c) Illustrations of conduct prohibited by this section include, but are not limited to:

(1) Coercing an individual to deny or limit the benefits, services, or advantages to which he or she is entitled under the Act or this part;

(2) Threatening, intimidating, or interfering with an individual with a disability who is seeking to obtain or use the goods, services, facilities, privileges, advantages, or accommodations of a public accommodation;

(3) Intimidating or threatening any person because that person is assisting or encouraging an individual or group entitled to claim the rights granted or protected by the Act or this part to exercise those rights; or

(4) Retaliating against any person because that person has participated in any investigation or action to enforce the Act or this part.

§ 36.207 Places of public accommodation located in private residences.

(a) When a place of public accommodation is located in a private residence, the portion of the residence used exclusively as a residence is not covered by this part, but that portion used exclusively in the operation of the place of public accommodation or that portion used both for the place of public accommodation and for residential purposes is covered by this part.

(b) The portion of the residence covered under paragraph (a) of this section extends to those elements used to enter the place of public accommodation, including the homeowner's front sidewalk, if any, the door or entryway, and hallways; and those portions of the residence, interior or exterior, available to or used by customers or clients, including restrooms.

§ 36.208 Direct threat.

(a) This part does not require a public accommodation to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of that public accommodation when that individual poses a direct threat to the health or safety of others.

(b) In determining whether an individual poses a direct threat to the health or safety of others, a public accommodation must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: The nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56251, Sept. 15, 2010]

§ 36.209 Illegal use of drugs.

(a) *General.* (1) Except as provided in paragraph (b) of this section, this part does not prohibit discrimination against an individual based on that individual's current illegal use of drugs.

(2) A public accommodation shall not discriminate on the basis of illegal use of drugs against an individual who is not engaging in current illegal use of drugs and who—

(i) Has successfully completed a supervised drug rehabilitation program or has otherwise been rehabilitated successfully;

(ii) Is participating in a supervised rehabilitation program; or

(iii) Is erroneously regarded as engaging in such use.

(b) *Health and drug rehabilitation services.* (1) A public accommodation shall not deny health services, or services provided in connection with drug rehabilitation, to an individual on the basis of that individual's current illegal use of drugs, if the individual is otherwise entitled to such services.

(2) A drug rehabilitation or treatment program may deny participation to individuals who engage in illegal use of drugs while they are in the program.

(c) *Drug testing.* (1) This part does not prohibit a public accommodation from adopting or administering reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual who formerly engaged in the illegal use of drugs is not now engaging in current illegal use of drugs.

(2) Nothing in this paragraph (c) shall be construed to encourage, prohibit, restrict, or authorize the conducting of testing for the illegal use of drugs.

§ 36.210 Smoking.

This part does not preclude the prohibition of, or the imposition of restrictions on, smoking in places of public accommodation.

§ 36.211 Maintenance of accessible features.

(a) A public accommodation shall maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by persons with disabilities by the Act or this part.

(b) This section does not prohibit isolated or temporary interruptions in

service or access due to maintenance or repairs.

(c) If the 2010 Standards reduce the technical requirements or the number of required accessible elements below the number required by the 1991 Standards, the technical requirements or the number of accessible elements in a facility subject to this part may be reduced in accordance with the requirements of the 2010 Standards.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56251, Sept. 15, 2010]

§ 36.212 Insurance.

(a) This part shall not be construed to prohibit or restrict—

(1) An insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(2) A person or organization covered by this part from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(3) A person or organization covered by this part from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance.

(b) Paragraphs (a) (1), (2), and (3) of this section shall not be used as a subterfuge to evade the purposes of the Act or this part.

(c) A public accommodation shall not refuse to serve an individual with a disability because its insurance company conditions coverage or rates on the absence of individuals with disabilities.

§ 36.213 Relationship of subpart B to subparts C and D of this part.

Subpart B of this part sets forth the general principles of nondiscrimination applicable to all entities subject to this part. Subparts C and D of this part provide guidance on the application of the statute to specific situations. The specific provisions, including the limitations on those provisions, control over the general provisions in circumstances where both specific and general provisions apply.

§§ 36.214–36.299 [Reserved]

Subpart C—Specific Requirements

§ 36.301 Eligibility criteria.

(a) *General.* A public accommodation shall not impose or apply eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, or accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered.

(b) *Safety.* A public accommodation may impose legitimate safety requirements that are necessary for safe operation. Safety requirements must be based on actual risks and not on mere speculation, stereotypes, or generalizations about individuals with disabilities.

(c) *Charges.* A public accommodation may not impose a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the costs of measures, such as the provision of auxiliary aids, barrier removal, alternatives to barrier removal, and reasonable modifications in policies, practices, or procedures, that are required to provide that individual or group with the nondiscriminatory treatment required by the Act or this part.

§ 36.302 Modifications in policies, practices, or procedures.

(a) *General.* A public accommodation shall make reasonable modifications in policies, practices, or procedures, when the modifications are necessary to afford goods, services, facilities, privileges, advantages, or accommodations to individuals with disabilities, unless the public accommodation can demonstrate that making the modifications would fundamentally alter the nature of the goods, services, facilities,

privileges, advantages, or accommodations.

(b) *Specialties*—(1) *General.* A public accommodation may refer an individual with a disability to another public accommodation, if that individual is seeking, or requires, treatment or services outside of the referring public accommodation's area of specialization, and if, in the normal course of its operations, the referring public accommodation would make a similar referral for an individual without a disability who seeks or requires the same treatment or services.

(2) *Illustration—medical specialties.* A health care provider may refer an individual with a disability to another provider, if that individual is seeking, or requires, treatment or services outside of the referring provider's area of specialization, and if the referring provider would make a similar referral for an individual without a disability who seeks or requires the same treatment or services. A physician who specializes in treating only a particular condition cannot refuse to treat an individual with a disability for that condition, but is not required to treat the individual for a different condition.

(c) *Service animals*—(1) *General.* Generally, a public accommodation shall modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability.

(2) *Exceptions.* A public accommodation may ask an individual with a disability to remove a service animal from the premises if:

(i) The animal is out of control and the animal's handler does not take effective action to control it; or

(ii) The animal is not housebroken.

(3) *If an animal is properly excluded.* If a public accommodation properly excludes a service animal under §36.302(c)(2), it shall give the individual with a disability the opportunity to obtain goods, services, and accommodations without having the service animal on the premises.

(4) *Animal under handler's control.* A service animal shall be under the control of its handler. A service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.,* voice control, signals, or other effective means).

(5) *Care or supervision.* A public accommodation is not responsible for the care or supervision of a service animal.

(6) *Inquiries.* A public accommodation shall not ask about the nature or extent of a person's disability, but may make two inquiries to determine whether an animal qualifies as a service animal. A public accommodation may ask if the animal is required because of a disability and what work or task the animal has been trained to perform. A public accommodation shall not require documentation, such as proof that the animal has been certified, trained, or licensed as a service animal. Generally, a public accommodation may not make these inquiries about a service animal when it is readily apparent that an animal is trained to do work or perform tasks for an individual with a disability (*e.g.,* the dog is observed guiding an individual who is blind or has low vision, pulling a person's wheelchair, or providing assistance with stability or balance to an individual with an observable mobility disability).

(7) *Access to areas of a public accommodation.* Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of a place of public accommodation where members of the public, program participants, clients, customers, patrons, or invitees, as relevant, are allowed to go.

(8) *Surcharges.* A public accommodation shall not ask or require an individual with a disability to pay a surcharge, even if people accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If a public accommodation normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animal.

(9) *Miniature horses.* (i) A public accommodation shall make reasonable

modifications in policies, practices, or procedures to permit the use of a miniature horse by an individual with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability.

(ii) *Assessment factors.* In determining whether reasonable modifications in policies, practices, or procedures can be made to allow a miniature horse into a specific facility, a public accommodation shall consider—

(A) The type, size, and weight of the miniature horse and whether the facility can accommodate these features;

(B) Whether the handler has sufficient control of the miniature horse;

(C) Whether the miniature horse is housebroken; and

(D) Whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation.

(iii) *Other requirements.* Sections 36.302(c)(3) through (c)(8), which apply to service animals, shall also apply to miniature horses.

(d) *Check-out aisles.* A store with check-out aisles shall ensure that an adequate number of accessible check-out aisles are kept open during store hours, or shall otherwise modify its policies and practices, in order to ensure that an equivalent level of convenient service is provided to individuals with disabilities as is provided to others. If only one check-out aisle is accessible, and it is generally used for express service, one way of providing equivalent service is to allow persons with mobility impairments to make all their purchases at that aisle.

(e)(1) *Reservations made by places of lodging.* A public accommodation that owns, leases (or leases to), or operates a place of lodging shall, with respect to reservations made by any means, including by telephone, in-person, or through a third party—

(i) Modify its policies, practices, or procedures to ensure that individuals with disabilities can make reservations for accessible guest rooms during the same hours and in the same manner as individuals who do not need accessible rooms;

(ii) Identify and describe accessible features in the hotels and guest rooms offered through its reservations service in enough detail to reasonably permit individuals with disabilities to assess independently whether a given hotel or guest room meets his or her accessibility needs;

(iii) Ensure that accessible guest rooms are held for use by individuals with disabilities until all other guest rooms of that type have been rented and the accessible room requested is the only remaining room of that type;

(iv) Reserve, upon request, accessible guest rooms or specific types of guest rooms and ensure that the guest rooms requested are blocked and removed from all reservations systems; and

(v) Guarantee that the specific accessible guest room reserved through its reservations service is held for the reserving customer, regardless of whether a specific room is held in response to reservations made by others.

(2) *Exception.* The requirements in paragraphs (iii), (iv), and (v) of this section do not apply to reservations for individual guest rooms or other units not owned or substantially controlled by the entity that owns, leases, or operates the overall facility.

(3) *Compliance date.* The requirements in this section will apply to reservations made on or after March 15, 2012.

(f) *Ticketing.* (1)(i) For the purposes of this section, ''accessible seating'' is defined as wheelchair spaces and companion seats that comply with sections 221 and 802 of the 2010 Standards along with any other seats required to be offered for sale to the individual with a disability pursuant to paragraph (4) of this section.

(ii) *Ticket sales.* A public accommodation that sells tickets for a single event or series of events shall modify its policies, practices, or procedures to ensure that individuals with disabilities have an equal opportunity to purchase tickets for accessible seating—

(A) During the same hours;

(B) During the same stages of ticket sales, including, but not limited to, pre-sales, promotions, lotteries, waitlists, and general sales;

(C) Through the same methods of distribution;

(D) In the same types and numbers of ticketing sales outlets, including telephone service, in-person ticket sales at the facility, or third-party ticketing services, as other patrons; and

(E) Under the same terms and conditions as other tickets sold for the same event or series of events.

(2) *Identification of available accessible seating.* A public accommodation that sells or distributes tickets for a single event or series of events shall, upon inquiry—

(i) Inform individuals with disabilities, their companions, and third parties purchasing tickets for accessible seating on behalf of individuals with disabilities of the locations of all unsold or otherwise available accessible seating for any ticketed event or events at the facility;

(ii) Identify and describe the features of available accessible seating in enough detail to reasonably permit an individual with a disability to assess independently whether a given accessible seating location meets his or her accessibility needs; and

(iii) Provide materials, such as seating maps, plans, brochures, pricing charts, or other information, that identify accessible seating and information relevant thereto with the same text or visual representations as other seats, if such materials are provided to the general public.

(3) *Ticket prices.* The price of tickets for accessible seating for a single event or series of events shall not be set higher than the price for other tickets in the same seating section for the same event or series of events. Tickets for accessible seating must be made available at all price levels for every event or series of events. If tickets for accessible seating at a particular price level cannot be provided because barrier removal in an existing facility is not readily achievable, then the percentage of tickets for accessible seating that should have been available at that price level but for the barriers (determined by the ratio of the total number of tickets at that price level to the total number of tickets in the assembly area) shall be offered for purchase, at that price level, in a nearby or similar accessible location.

(4) *Purchasing multiple tickets.* (i) *General.* For each ticket for a wheelchair space purchased by an individual with a disability or a third-party purchasing such a ticket at his or her request, a public accommodation shall make available for purchase three additional tickets for seats in the same row that are contiguous with the wheelchair space, provided that at the time of purchase there are three such seats available. A public accommodation is not required to provide more than three contiguous seats for each wheelchair space. Such seats may include wheelchair spaces.

(ii) *Insufficient additional contiguous seats available.* If patrons are allowed to purchase at least four tickets, and there are fewer than three such additional contiguous seat tickets available for purchase, a public accommodation shall offer the next highest number of such seat tickets available for purchase and shall make up the difference by offering tickets for sale for seats that are as close as possible to the accessible seats.

(iii) *Sales limited to fewer than four tickets.* If a public accommodation limits its sales of tickets to fewer than four seats per patron, then the public accommodation is only obligated to offer as many seats to patrons with disabilities, including the ticket for the wheelchair space, as it would offer to patrons without disabilities.

(iv) *Maximum number of tickets patrons may purchase exceeds four.* If patrons are allowed to purchase more than four tickets, a public accommodation shall allow patrons with disabilities to purchase up to the same number of tickets, including the ticket for the wheelchair space.

(v) *Group sales.* If a group includes one or more individuals who need to use accessible seating because of a mobility disability or because their disability requires the use of the accessible features that are provided in accessible seating, the group shall be placed in a seating area with accessible seating so that, if possible, the group can sit together. If it is necessary to divide the group, it should be divided so that the individuals in the group who use wheelchairs are not isolated from their group.

(5) *Hold and release of tickets for accessible seating.* (i) *Tickets for accessible seating may be released for sale in certain limited circumstances.* A public accommodation may release unsold tickets for accessible seating for sale to individuals without disabilities for their own use for a single event or series of events only under the following circumstances—

(A) When all non-accessible tickets (excluding luxury boxes, club boxes, or suites) have been sold;

(B) When all non-accessible tickets in a designated seating area have been sold and the tickets for accessible seating are being released in the same designated area; or

(C) When all non-accessible tickets in a designated price category have been sold and the tickets for accessible seating are being released within the same designated price category.

(ii) *No requirement to release accessible tickets.* Nothing in this paragraph requires a facility to release tickets for accessible seating to individuals without disabilities for their own use.

(iii) *Release of series-of-events tickets on a series-of-events basis.* (A) *Series-of-events tickets sell-out when no ownership rights are attached.* When series-of-events tickets are sold out and a public accommodation releases and sells accessible seating to individuals without disabilities for a series of events, the public accommodation shall establish a process that prevents the automatic reassignment of the accessible seating to such ticket holders for future seasons, future years, or future series, so that individuals with disabilities who require the features of accessible seating and who become newly eligible to purchase tickets when these series-of-events tickets are available for purchase have an opportunity to do so.

(B) *Series-of-events tickets when ownership rights are attached.* When series-of-events tickets with an ownership right in accessible seating areas are forfeited or otherwise returned to a public accommodation, the public accommodation shall make reasonable modifications in its policies, practices, or procedures to afford individuals with mobility disabilities or individuals with disabilities that require the features of accessible seating an opportunity to purchase such tickets in accessible seating areas.

(6) *Ticket transfer.* Individuals with disabilities who hold tickets for accessible seating shall be permitted to transfer tickets to third parties under the same terms and conditions and to the same extent as other spectators holding the same type of tickets, whether they are for a single event or series of events.

(7) *Secondary ticket market.* (i) A public accommodation shall modify its policies, practices, or procedures to ensure that an individual with a disability may use a ticket acquired in the secondary ticket market under the same terms and conditions as other individuals who hold a ticket acquired in the secondary ticket market for the same event or series of events.

(ii) If an individual with a disability acquires a ticket or series of tickets to an inaccessible seat through the secondary market, a public accommodation shall make reasonable modifications to its policies, practices, or procedures to allow the individual to exchange his ticket for one to an accessible seat in a comparable location if accessible seating is vacant at the time the individual presents the ticket to the public accommodation.

(8) *Prevention of fraud in purchase of tickets for accessible seating.* A public accommodation may not require proof of disability, including, for example, a doctor's note, before selling tickets for accessible seating.

(i) *Single-event tickets.* For the sale of single-event tickets, it is permissible to inquire whether the individual purchasing the tickets for accessible seating has a mobility disability or a disability that requires the use of the accessible features that are provided in accessible seating, or is purchasing the tickets for an individual who has a mobility disability or a disability that requires the use of the accessible features that are provided in the accessible seating.

(ii) *Series-of-events tickets.* For series-of-events tickets, it is permissible to ask the individual purchasing the tickets for accessible seating to attest in writing that the accessible seating is for a person who has a mobility disability or a disability that requires the

use of the accessible features that are provided in the accessible seating.

(iii) *Investigation of fraud.* A public accommodation may investigate the potential misuse of accessible seating where there is good cause to believe that such seating has been purchased fraudulently.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56251, Sept. 15, 2010; 76 FR 13287, Mar. 11, 2011]

§ 36.303 Auxiliary aids and services.

(a) *General.* A public accommodation shall take those steps that may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the public accommodation can demonstrate that taking those steps would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or would result in an undue burden, i.e., significant difficulty or expense.

(b) *Examples.* The term ''auxiliary aids and services'' includes—

(1) Qualified interpreters on-site or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices; assistive listening systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing;

(2) Qualified readers; taped texts; audio recordings; Brailled materials and displays; screen reader software; magnification software; optical readers; secondary auditory programs (SAP); large print materials; accessible electronic and information technology; or other effective methods of making visually delivered materials available to individuals who are blind or have low vision;

(3) Acquisition or modification of equipment or devices; and

(4) Other similar services and actions.

(c) *Effective communication.* (1) A public accommodation shall furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. This includes an obligation to provide effective communication to companions who are individuals with disabilities.

(i) For purposes of this section, ''companion'' means a family member, friend, or associate of an individual seeking access to, or participating in, the goods, services, facilities, privileges, advantages, or accommodations of a public accommodation, who, along with such individual, is an appropriate person with whom the public accommodation should communicate.

(ii) The type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. A public accommodation should consult with individuals with disabilities whenever possible to determine what type of auxiliary aid is needed to ensure effective communication, but the ultimate decision as to what measures to take rests with the public accommodation, provided that the method chosen results in effective communication. In order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way as to protect the privacy and independence of the individual with a disability.

(2) A public accommodation shall not require an individual with a disability to bring another individual to interpret for him or her.

(3) A public accommodation shall not rely on an adult accompanying an individual with a disability to interpret or facilitate communication, except—

(i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available; or

(ii) Where the individual with a disability specifically requests that the accompanying adult interpret or facilitate communication, the accompanying adult agrees to provide such assistance, and reliance on that adult for such assistance is appropriate under the circumstances.

(4) A public accommodation shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.

(d) *Telecommunications.* (1) When a public accommodation uses an automated-attendant system, including, but not limited to, voicemail and messaging, or an interactive voice response system, for receiving and directing incoming telephone calls, that system must provide effective real-time communication with individuals using auxiliary aids and services, including text telephones (TTYs) and all forms of FCC-approved telecommunications relay systems, including Internet-based relay systems.

(2) A public accommodation that offers a customer, client, patient, or participant the opportunity to make outgoing telephone calls using the public accommodation's equipment on more than an incidental convenience basis shall make available accessible public telephones, TTYs, or other telecommunications products and systems for use by an individual who is deaf or hard of hearing, or has a speech impairment.

(3) A public accommodation may use relay services in place of direct telephone communication for receiving or making telephone calls incident to its operations.

(4) A public accommodation shall respond to telephone calls from a telecommunications relay service established under title IV of the ADA in the same manner that it responds to other telephone calls.

(5) This part does not require a public accommodation to use a TTY for receiving or making telephone calls incident to its operations.

(e) *Closed caption decoders.* Places of lodging that provide televisions in five or more guest rooms and hospitals that provide televisions for patient use shall provide, upon request, a means for decoding captions for use by an individual with impaired hearing.

(f) *Video remote interpreting (VRI) services.* A public accommodation that chooses to provide qualified interpreters via VRI service shall ensure that it provides—

(1) Real-time, full-motion video and audio over a dedicated high-speed, wide-bandwidth video connection or wireless connection that delivers high-quality video images that do not produce lags, choppy, blurry, or grainy images, or irregular pauses in communication;

(2) A sharply delineated image that is large enough to display the interpreter's face, arms, hands, and fingers, and the participating individual's face, arms, hands, and fingers, regardless of his or her body position;

(3) A clear, audible transmission of voices; and

(4) Adequate training to users of the technology and other involved individuals so that they may quickly and efficiently set up and operate the VRI.

(g) *Alternatives.* If provision of a particular auxiliary aid or service by a public accommodation would result in a fundamental alteration in the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or in an undue burden, i.e., significant difficulty or expense, the public accommodation shall provide an alternative auxiliary aid or service, if one exists, that would not result in an alteration or such burden but would nevertheless ensure that, to the maximum extent possible, individuals with disabilities receive the goods, services, facilities, privileges, advantages, or accommodations offered by the public accommodation.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56253, Sept. 15, 2010]

§ 36.304 Removal of barriers.

(a) *General.* A public accommodation shall remove architectural barriers in

existing facilities, including communication barriers that are structural in nature, where such removal is readily achievable, i.e., easily accomplishable and able to be carried out without much difficulty or expense.

(b) *Examples.* Examples of steps to remove barriers include, but are not limited to, the following actions—

(1) Installing ramps;

(2) Making curb cuts in sidewalks and entrances;

(3) Repositioning shelves;

(4) Rearranging tables, chairs, vending machines, display racks, and other furniture;

(5) Repositioning telephones;

(6) Adding raised markings on elevator control buttons;

(7) Installing flashing alarm lights;

(8) Widening doors;

(9) Installing offset hinges to widen doorways;

(10) Eliminating a turnstile or providing an alternative accessible path;

(11) Installing accessible door hardware;

(12) Installing grab bars in toilet stalls;

(13) Rearranging toilet partitions to increase maneuvering space;

(14) Insulating lavatory pipes under sinks to prevent burns;

(15) Installing a raised toilet seat;

(16) Installing a full-length bathroom mirror;

(17) Repositioning the paper towel dispenser in a bathroom;

(18) Creating designated accessible parking spaces;

(19) Installing an accessible paper cup dispenser at an existing inaccessible water fountain;

(20) Removing high pile, low density carpeting; or

(21) Installing vehicle hand controls.

(c) *Priorities.* A public accommodation is urged to take measures to comply with the barrier removal requirements of this section in accordance with the following order of priorities.

(1) First, a public accommodation should take measures to provide access to a place of public accommodation from public sidewalks, parking, or public transportation. These measures include, for example, installing an entrance ramp, widening entrances, and providing accessible parking spaces.

(2) Second, a public accommodation should take measures to provide access to those areas of a place of public accommodation where goods and services are made available to the public. These measures include, for example, adjusting the layout of display racks, rearranging tables, providing Brailled and raised character signage, widening doors, providing visual alarms, and installing ramps.

(3) Third, a public accommodation should take measures to provide access to restroom facilities. These measures include, for example, removal of obstructing furniture or vending machines, widening of doors, installation of ramps, providing accessible signage, widening of toilet stalls, and installation of grab bars.

(4) Fourth, a public accommodation should take any other measures necessary to provide access to the goods, services, facilities, privileges, advantages, or accommodations of a place of public accommodation.

(d) *Relationship to alterations requirements of subpart D of this part.* (1) Except as provided in paragraph (d)(3) of this section, measures taken to comply with the barrier removal requirements of this section shall comply with the applicable requirements for alterations in § 36.402 and §§ 36.404 through 36.406 of this part for the element being altered. The path of travel requirements of § 36.403 shall not apply to measures taken solely to comply with the barrier removal requirements of this section.

(d)(2)(i) *Safe harbor.* Elements that have not been altered in existing facilities on or after March 15, 2012 and that comply with the corresponding technical and scoping specifications for those elements in the 1991 Standards are not required to be modified in order to comply with the requirements set forth in the 2010 Standards.

(ii)(A) Before March 15, 2012, elements in existing facilities that do not comply with the corresponding technical and scoping specifications for those elements in the 1991 Standards must be modified to the extent readily achievable to comply with either the 1991 Standards or the 2010 Standards. Noncomplying newly constructed and altered elements may also be subject to the requirements of § 36.406(a)(5).

(B) On or after March 15, 2012, elements in existing facilities that do not comply with the corresponding technical and scoping specifications for those elements in the 1991 Standards must be modified to the extent readily achievable to comply with the requirements set forth in the 2010 Standards. Noncomplying newly constructed and altered elements may also be subject to the requirements of §36.406(a)(5).

(iii) The safe harbor provided in §36.304(d)(2)(i) does not apply to those elements in existing facilities that are subject to supplemental requirements (*i.e.*, elements for which there are neither technical nor scoping specifications in the 1991 Standards), and therefore those elements must be modified to the extent readily achievable to comply with the 2010 Standards. Noncomplying newly constructed and altered elements may also be subject to the requirements of §36.406(a)(5). Elements in the 2010 Standards not eligible for the element-by-element safe harbor are identified as follows—

(A) *Residential facilities and dwelling units*, sections 233 and 809.

(B) *Amusement rides*, sections 234 and 1002; 206.2.9; 216.12.

(C) *Recreational boating facilities*, sections 235 and 1003; 206.2.10.

(D) *Exercise machines and equipment*, sections 236 and 1004; 206.2.13.

(E) *Fishing piers and platforms*, sections 237 and 1005; 206.2.14.

(F) *Golf facilities*, sections 238 and 1006; 206.2.15.

(G) *Miniature golf facilities*, sections 239 and 1007; 206.2.16.

(H) *Play areas*, sections 240 and 1008; 206.2.17.

(I) *Saunas and steam rooms*, sections 241 and 612.

(J) *Swimming pools*, *wading pools*, *and spas*, sections 242 and 1009.

(K) *Shooting facilities with firing positions*, sections 243 and 1010.

(L) *Miscellaneous.* (*1*) Team or player seating, section 221.2.1.4.

(*2*) Accessible route to bowling lanes, section 206.2.11.

(*3*) Accessible route in court sports facilities, section 206.2.12.

(3) If, as a result of compliance with the alterations requirements specified in paragraph (d)(1) and (d)(2) of this section, the measures required to remove a barrier would not be readily achievable, a public accommodation may take other readily achievable measures to remove the barrier that do not fully comply with the specified requirements. Such measures include, for example, providing a ramp with a steeper slope or widening a doorway to a narrower width than that mandated by the alterations requirements. No measure shall be taken, however, that poses a significant risk to the health or safety of individuals with disabilities or others.

APPENDIX TO §36.304(d)

COMPLIANCE DATES AND APPLICABLE STANDARDS FOR BARRIER REMOVAL AND SAFE HARBOR

Date	Requirement	Applicable standards
Before March 15, 2012 ...	Elements that do not comply with the requirements for those elements in the 1991 Standards must be modified to the extent readily achievable. **Note:** Noncomplying newly constructed and altered elements may also be subject to the requirements of §36.406(a)(5).	1991 Standards or 2010 Standards.
On or after March 15, 2012.	Elements that do not comply with the requirements for those elements in the 1991 Standards or that do not comply with the supplemental requirements (*i.e.,* elements for which there are neither technical nor scoping specifications in the 1991 Standards), must be modified to the extent readily achievable. There is an exception for existing pools, wading pools, and spas built before March 15, 2012 [See §36.304(g)(5)]. **Note:** Noncomplying newly constructed and altered elements may also be subject to the requirements of §36.406(a)(5).	2010 Standards.
On or after January 31, 2013.	For existing pools, wading pools, and spas built before March 15, 2012, elements that do not comply with the supplemental requirements for entry to pools, wading pools, and spas must be modified to the extent readily achievable [See §36.304(g)(5)].	Sections 242 and 1009 of the 2010 Standards.
Elements not altered after March 15, 2012.	Elements that comply with the requirements for those elements in the 1991 Standards do not need to be modified.	Safe Harbor.

(e) *Portable ramps.* Portable ramps should be used to comply with this section only when installation of a permanent ramp is not readily achievable. In order to avoid any significant risk to the health or safety of individuals with disabilities or others in using portable ramps, due consideration shall be given to safety features such as nonslip surfaces, railings, anchoring, and strength of materials.

(f) *Selling or serving space.* The rearrangement of temporary or movable structures, such as furniture, equipment, and display racks is not readily achievable to the extent that it results in a significant loss of selling or serving space.

(g) *Limitation on barrier removal obligations.* (1) The requirements for barrier removal under §36.304 shall not be interpreted to exceed the standards for alterations in subpart D of this part.

(2) To the extent that relevant standards for alterations are not provided in subpart D of this part, then the requirements of §36.304 shall not be interpreted to exceed the standards for new construction in subpart D of this part.

(3) This section does not apply to rolling stock and other conveyances to the extent that §36.310 applies to rolling stock and other conveyances.

(4) This requirement does not apply to guest rooms in existing facilities that are places of lodging where the guest rooms are not owned by the entity that owns, leases, or operates the overall facility and the physical features of the guest room interiors are controlled by their individual owners.

(5) With respect to facilities built before March 15, 2012, the requirements in this section for accessible means of entry for swimming pools, wading pools, and spas, as set forth in sections 242 and 1009 of the 2010 Standards, shall not apply until January 31, 2013.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56254, Sept. 15, 2010; AG Order No. 3332–2012, 77 FR 30179, May 21, 2012]

§36.305 Alternatives to barrier removal.

(a) *General.* Where a public accommodation can demonstrate that barrier removal is not readily achievable, the public accommodation shall not fail to make its goods, services, facilities, privileges, advantages, or accommodations available through alternative methods, if those methods are readily achievable.

(b) *Examples.* Examples of alternatives to barrier removal include, but are not limited to, the following actions—

(1) Providing curb service or home delivery;

(2) Retrieving merchandise from inaccessible shelves or racks;

(3) Relocating activities to accessible locations;

(c) *Multiscreen cinemas.* If it is not readily achievable to remove barriers to provide access by persons with mobility impairments to all of the theaters of a multiscreen cinema, the cinema shall establish a film rotation schedule that provides reasonable access for individuals who use wheelchairs to all films. Reasonable notice shall be provided to the public as to the location and time of accessible showings.

§36.306 Personal devices and services.

This part does not require a public accommodation to provide its customers, clients, or participants with personal devices, such as wheelchairs; individually prescribed devices, such as prescription eyeglasses or hearing aids; or services of a personal nature including assistance in eating, toileting, or dressing.

§36.307 Accessible or special goods.

(a) This part does not require a public accommodation to alter its inventory to include accessible or special goods that are designed for, or facilitate use by, individuals with disabilities.

(b) A public accommodation shall order accessible or special goods at the request of an individual with disabilities, if, in the normal course of its operation, it makes special orders on request for unstocked goods, and if the accessible or special goods can be obtained from a supplier with whom the public accommodation customarily does business.

(c) Examples of accessible or special goods include items such as Brailled

versions of books, books on audio cassettes, closed-captioned video tapes, special sizes or lines of clothing, and special foods to meet particular dietary needs.

§ 36.308 Seating in assembly areas.

A public accommodation shall ensure that wheelchair spaces and companion seats are provided in each specialty seating area that provides spectators with distinct services or amenities that generally are not available to other spectators. If it is not readily achievable for a public accommodation to place wheelchair spaces and companion seats in each such specialty seating area, it shall provide those services or amenities to individuals with disabilities and their companions at other designated accessible locations at no additional cost. The number of wheelchair spaces and companion seats provided in specialty seating areas shall be included in, rather than in addition to, wheelchair space requirements set forth in table 221.2.1.1 in the 2010 Standards.

[AG Order No. 3181–2010, 75 FR 56255, Sept. 15, 2010]

§ 36.309 Examinations and courses.

(a) *General.* Any private entity that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

(b) *Examinations.* (1) Any private entity offering an examination covered by this section must assure that—

(i) The examination is selected and administered so as to best ensure that, when the examination is administered to an individual with a disability that impairs sensory, manual, or speaking skills, the examination results accurately reflect the individual's aptitude or achievement level or whatever other factor the examination purports to measure, rather than reflecting the individual's impaired sensory, manual, or speaking skills (except where those skills are the factors that the examination purports to measure);

(ii) An examination that is designed for individuals with impaired sensory, manual, or speaking skills is offered at equally convenient locations, as often, and in as timely a manner as are other examinations; and

(iii) The examination is administered in facilities that are accessible to individuals with disabilities or alternative accessible arrangements are made.

(iv) Any request for documentation, if such documentation is required, is reasonable and limited to the need for the modification, accommodation, or auxiliary aid or service requested.

(v) When considering requests for modifications, accommodations, or auxiliary aids or services, the entity gives considerable weight to documentation of past modifications, accommodations, or auxiliary aids or services received in similar testing situations, as well as such modifications, accommodations, or related aids and services provided in response to an Individualized Education Program (IEP) provided under the Individuals with Disabilities Education Act or a plan describing services provided pursuant to section 504 of the Rehabilitation Act of 1973, as amended (often referred to as a Section 504 Plan).

(vi) The entity responds in a timely manner to requests for modifications, accommodations, or aids to ensure equal opportunity for individuals with disabilities.

(2) Required modifications to an examination may include changes in the length of time permitted for completion of the examination and adaptation of the manner in which the examination is given.

(3) A private entity offering an examination covered by this section shall provide appropriate auxiliary aids for persons with impaired sensory, manual, or speaking skills, unless that private entity can demonstrate that offering a particular auxiliary aid would fundamentally alter the measurement of the skills or knowledge the examination is intended to test or would result in an undue burden. Auxiliary aids and services required by this section may include taped examinations, interpreters or other effective methods of

making orally delivered materials available to individuals with hearing impairments, Brailled or large print examinations and answer sheets or qualified readers for individuals with visual impairments or learning disabilities, transcribers for individuals with manual impairments, and other similar services and actions.

(4) Alternative accessible arrangements may include, for example, provision of an examination at an individual's home with a proctor if accessible facilities or equipment are unavailable. Alternative arrangements must provide comparable conditions to those provided for nondisabled individuals.

(c) *Courses.* (1) Any private entity that offers a course covered by this section must make such modifications to that course as are necessary to ensure that the place and manner in which the course is given are accessible to individuals with disabilities.

(2) Required modifications may include changes in the length of time permitted for the completion of the course, substitution of specific requirements, or adaptation of the manner in which the course is conducted or course materials are distributed.

(3) A private entity that offers a course covered by this section shall provide appropriate auxiliary aids and services for persons with impaired sensory, manual, or speaking skills, unless the private entity can demonstrate that offering a particular auxiliary aid or service would fundamentally alter the course or would result in an undue burden. Auxiliary aids and services required by this section may include taped texts, interpreters or other effective methods of making orally delivered materials available to individuals with hearing impairments, Brailled or large print texts or qualified readers for individuals with visual impairments and learning disabilities, classroom equipment adapted for use by individuals with manual impairments, and other similar services and actions.

(4) Courses must be administered in facilities that are accessible to individuals with disabilities or alternative accessible arrangements must be made.

(5) Alternative accessible arrangements may include, for example, provision of the course through videotape, cassettes, or prepared notes. Alternative arrangements must provide comparable conditions to those provided for nondisabled individuals.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56255, Sept. 15, 2010]

§ 36.310 Transportation provided by public accommodations.

(a) *General.* (1) A public accommodation that provides transportation services, but that is not primarily engaged in the business of transporting people, is subject to the general and specific provisions in subparts B, C, and D of this part for its transportation operations, except as provided in this section.

(2) *Examples.* Transportation services subject to this section include, but are not limited to, shuttle services operated between transportation terminals and places of public accommodation, customer shuttle bus services operated by private companies and shopping centers, student transportation systems, and transportation provided within recreational facilities such as stadiums, zoos, amusement parks, and ski resorts.

(b) *Barrier removal.* A public accommodation subject to this section shall remove transportation barriers in existing vehicles and rail passenger cars used for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles or rail passenger cars by the installation of a hydraulic or other lift) where such removal is readily achievable.

(c) *Requirements for vehicles and systems.* A public accommodation subject to this section shall comply with the requirements pertaining to vehicles and transportation systems in the regulations issued by the Secretary of Transportation pursuant to section 306 of the Act.

§ 36.311 Mobility devices.

(a) *Use of wheelchairs and manually-powered mobility aids.* A public accommodation shall permit individuals with mobility disabilities to use wheelchairs and manually-powered mobility aids, such as walkers, crutches, canes,

braces, or other similar devices designed for use by individuals with mobility disabilities in any areas open to pedestrian use.

(b)(1) *Use of other power-driven mobility devices.* A public accommodation shall make reasonable modifications in its policies, practices, or procedures to permit the use of other power-driven mobility devices by individuals with mobility disabilities, unless the public accommodation can demonstrate that the class of other power-driven mobility devices cannot be operated in accordance with legitimate safety requirements that the public accommodation has adopted pursuant to §36.301(b).

(2) *Assessment factors.* In determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification under paragraph (b)(1) of this section, a public accommodation shall consider—

(i) The type, size, weight, dimensions, and speed of the device;

(ii) The facility's volume of pedestrian traffic (which may vary at different times of the day, week, month, or year);

(iii) The facility's design and operational characteristics (*e.g.,* whether its business is conducted indoors, its square footage, the density and placement of stationary devices, and the availability of storage for the device, if requested by the user);

(iv) Whether legitimate safety requirements can be established to permit the safe operation of the other power-driven mobility device in the specific facility; and

(v) Whether the use of the other power-driven mobility device creates a substantial risk of serious harm to the immediate environment or natural or cultural resources, or poses a conflict with Federal land management laws and regulations.

(c)(1) *Inquiry about disability.* A public accommodation shall not ask an individual using a wheelchair or other power-driven mobility device questions about the nature and extent of the individual's disability.

(2) *Inquiry into use of other power-driven mobility device.* A public accommodation may ask a person using an other power-driven mobility device to provide a credible assurance that the mobility device is required because of the person's disability. A public accommodation that permits the use of an other power-driven mobility device by an individual with a mobility disability shall accept the presentation of a valid, State-issued disability parking placard or card, or State-issued proof of disability, as a credible assurance that the use of the other power-driven mobility device is for the individual's mobility disability. In lieu of a valid, State-issued disability parking placard or card, or State-issued proof of disability, a public accommodation shall accept as a credible assurance a verbal representation, not contradicted by observable fact, that the other power-driven mobility device is being used for a mobility disability. A ''valid'' disability placard or card is one that is presented by the individual to whom it was issued and is otherwise in compliance with the State of issuance's requirements for disability placards or cards.

[AG Order No. 3181–2010, 75 FR 56255, Sept. 15, 2010]

§§ 36.312–36.399 [Reserved]

Subpart D—New Construction and Alterations

§36.401 New construction.

(a) *General.* (1) Except as provided in paragraphs (b) and (c) of this section, discrimination for purposes of this part includes a failure to design and construct facilities for first occupancy after January 26, 1993, that are readily accessible to and usable by individuals with disabilities.

(2) For purposes of this section, a facility is designed and constructed for first occupancy after January 26, 1993, only—

(i) If the last application for a building permit or permit extension for the facility is certified to be complete, by a State, County, or local government after January 26, 1992 (or, in those jurisdictions where the government does not certify completion of applications, if the last application for a building permit or permit extension for the facility is received by the State, County,

or local government after January 26, 1992); and

(ii) If the first certificate of occupancy for the facility is issued after January 26, 1993.

(b) *Commercial facilities located in private residences.* (1) When a commercial facility is located in a private residence, the portion of the residence used exclusively as a residence is not covered by this subpart, but that portion used exclusively in the operation of the commercial facility or that portion used both for the commercial facility and for residential purposes is covered by the new construction and alterations requirements of this subpart.

(2) The portion of the residence covered under paragraph (b)(1) of this section extends to those elements used to enter the commercial facility, including the homeowner's front sidewalk, if any, the door or entryway, and hallways; and those portions of the residence, interior or exterior, available to or used by employees or visitors of the commercial facility, including restrooms.

(c) *Exception for structural impracticability.* (1) Full compliance with the requirements of this section is not required where an entity can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features.

(2) If full compliance with this section would be structurally impracticable, compliance with this section is required to the extent that it is not structurally impracticable. In that case, any portion of the facility that can be made accessible shall be made accessible to the extent that it is not structurally impracticable.

(3) If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities (e.g., those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

(d) *Elevator exemption.* (1) For purposes of this paragraph (d)—

(i) *Professional office of a health care provider* means a location where a person or entity regulated by a State to provide professional services related to the physical or mental health of an individual makes such services available to the public. The facility housing the ''professional office of a health care provider'' only includes floor levels housing at least one health care provider, or any floor level designed or intended for use by at least one health care provider.

(ii) *Shopping center or shopping mall means*—

(A) A building housing five or more sales or rental establishments; or

(B) A series of buildings on a common site, either under common ownership or common control or developed either as one project or as a series of related projects, housing five or more sales or rental establishments. For purposes of this section, places of public accommodation of the types listed in paragraph (5) of the definition of ''place of public accommodation'' in section § 36.104 are considered sales or rental establishments. The facility housing a ''shopping center or shopping mall'' only includes floor levels housing at least one sales or rental establishment, or any floor level designed or intended for use by at least one sales or rental establishment.

(2) This section does not require the installation of an elevator in a facility that is less than three stories or has less than 3000 square feet per story, except with respect to any facility that houses one or more of the following:

(i) A shopping center or shopping mall, or a professional office of a health care provider.

(ii) A terminal, depot, or other station used for specified public transportation, or an airport passenger terminal. In such a facility, any area housing passenger services, including boarding and debarking, loading and unloading, baggage claim, dining facilities, and other common areas open to the public, must be on an accessible route from an accessible entrance.

(3) The elevator exemption set forth in this paragraph (d) does not obviate or limit, in any way the obligation to

comply with the other accessibility requirements established in paragraph (a) of this section. For example, in a facility that houses a shopping center or shopping mall, or a professional office of a health care provider, the floors that are above or below an accessible ground floor and that do not house sales or rental establishments or a professional office of a health care provider, must meet the requirements of this section but for the elevator.

§ 36.402 Alterations.

(a) *General.* (1) Any alteration to a place of public accommodation or a commercial facility, after January 26, 1992, shall be made so as to ensure that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) An alteration is deemed to be undertaken after January 26, 1992, if the physical alteration of the property begins after that date.

(b) *Alteration.* For the purposes of this part, an alteration is a change to a place of public accommodation or a commercial facility that affects or could affect the usability of the building or facility or any part thereof.

(1) Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration, changes or rearrangement in structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, reroofing, painting or wallpapering, asbestos removal, or changes to mechanical and electrical systems are not alterations unless they affect the usability of the building or facility.

(2) If existing elements, spaces, or common areas are altered, then each such altered element, space, or area shall comply with the applicable provisions of appendix A to this part.

(c) *To the maximum extent feasible.* The phrase ''to the maximum extent feasible,'' as used in this section, applies to the occasional case where the nature of an existing facility makes it virtually impossible to comply fully with applicable accessibility standards through a planned alteration. In these circumstances, the alteration shall provide the maximum physical accessibility feasible. Any altered features of the facility that can be made accessible shall be made accessible. If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would not be feasible, the facility shall be made accessible to persons with other types of disabilities (e.g., those who use crutches, those who have impaired vision or hearing, or those who have other impairments).

§ 36.403 Alterations: Path of travel.

(a) *General.* (1) An alteration that affects or could affect the usability of or access to an area of a facility that contains a primary function shall be made so as to ensure that, to the maximum extent feasible, the path of travel to the altered area and the restrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the cost and scope of such alterations is disproportionate to the cost of the overall alteration.

(2) If a private entity has constructed or altered required elements of a path of travel at a place of public accommodation or commercial facility in accordance with the specifications in the 1991 Standards, the private entity is not required to retrofit such elements to reflect the incremental changes in the 2010 Standards solely because of an alteration to a primary function area served by that path of travel.

(b) *Primary function.* A ''primary function'' is a major activity for which the facility is intended. Areas that contain a primary function include, but are not limited to, the customer services lobby of a bank, the dining area of a cafeteria, the meeting rooms in a conference center, as well as offices and other work areas in which the activities of the public accommodation or other private entity using the facility are carried out. Mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, janitorial closets, entrances, corridors, and restrooms are not areas containing a primary function.

(c) *Alterations to an area containing a primary function.* (1) Alterations that affect the usability of or access to an area containing a primary function include, but are not limited to—

(i) Remodeling merchandise display areas or employee work areas in a department store;

(ii) Replacing an inaccessible floor surface in the customer service or employee work areas of a bank;

(iii) Redesigning the assembly line area of a factory; or

(iv) Installing a computer center in an accounting firm.

(2) For the purposes of this section, alterations to windows, hardware, controls, electrical outlets, and signage shall not be deemed to be alterations that affect the usability of or access to an area containing a primary function.

(d) *Landlord/tenant:* If a tenant is making alterations as defined in § 36.402 that would trigger the requirements of this section, those alterations by the tenant in areas that only the tenant occupies do not trigger a path of travel obligation upon the landlord with respect to areas of the facility under the landlord's authority, if those areas are not otherwise being altered.

(e) *Path of travel.* (1) A ''path of travel'' includes a continuous, unobstructed way of pedestrian passage by means of which the altered area may be approached, entered, and exited, and which connects the altered area with an exterior approach (including sidewalks, streets, and parking areas), an entrance to the facility, and other parts of the facility.

(2) An accessible path of travel may consist of walks and sidewalks, curb ramps and other interior or exterior pedestrian ramps; clear floor paths through lobbies, corridors, rooms, and other improved areas; parking access aisles; elevators and lifts; or a combination of these elements.

(3) For the purposes of this part, the term ''path of travel'' also includes the restrooms, telephones, and drinking fountains serving the altered area.

(f) *Disproportionality.* (1) Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area.

(2) Costs that may be counted as expenditures required to provide an accessible path of travel may include:

(i) Costs associated with providing an accessible entrance and an accessible route to the altered area, for example, the cost of widening doorways or installing ramps;

(ii) Costs associated with making restrooms accessible, such as installing grab bars, enlarging toilet stalls, insulating pipes, or installing accessible faucet controls;

(iii) Costs associated with providing accessible telephones, such a relocating the telephone to an accessible height, installing amplification devices, or installing a text telephone (TTY);

(iv) Costs associated with relocating an inaccessible drinking fountain.

(g) *Duty to provide accessible features in the event of disproportionality.* (1) When the cost of alterations necessary to make the path of travel to the altered area fully accessible is disproportionate to the cost of the overall alteration, the path of travel shall be made accessible to the extent that it can be made accessible without incurring disproportionate costs.

(2) In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access, in the following order:

(i) An accessible entrance;

(ii) An accessible route to the altered area;

(iii) At least one accessible restroom for each sex or a single unisex restroom;

(iv) Accessible telephones;

(v) Accessible drinking fountains; and

(vi) When possible, additional accessible elements such as parking, storage, and alarms.

(h) *Series of smaller alterations.* (1) The obligation to provide an accessible path of travel may not be evaded by performing a series of small alterations to the area served by a single path of travel if those alterations could have been performed as a single undertaking.

(2)(i) If an area containing a primary function has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area, or a different area on the same path of travel, are undertaken within three years of the original alteration, the total cost of alterations to the primary function areas on that path of travel during the preceding three year period shall be considered in determining whether the cost of making that path of travel accessible is disproportionate.

(ii) Only alterations undertaken after January 26, 1992, shall be considered in determining if the cost of providing an accessible path of travel is disproportionate to the overall cost of the alterations.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by AG Order No. 3181–2010, 75 FR 56256, Sept. 15, 2010]

§ 36.404 Alterations: Elevator exemption.

(a) This section does not require the installation of an elevator in an altered facility that is less than three stories or has less than 3,000 square feet per story, except with respect to any facility that houses a shopping center, a shopping mall, the professional office of a health care provider, a terminal, depot, or other station used for specified public transportation, or an airport passenger terminal.

(1) For the purposes of this section, *professional office of a health care provider* means a location where a person or entity regulated by a State to provide professional services related to the physical or mental health of an individual makes such services available to the public. The facility that houses a *professional office of a health care provider* only includes floor levels housing by at least one health care provider, or any floor level designed or intended for use by at least one health care provider.

(2) For the purposes of this section, *shopping center or shopping mall* means—

(i) A building housing five or more sales or rental establishments; or

(ii) A series of buildings on a common site, connected by a common pedestrian access route above or below the ground floor, that is either under common ownership or common control or developed either as one project or as a series of related projects, housing five or more sales or rental establishments. For purposes of this section, places of public accommodation of the types listed in paragraph (5) of the definition of *place of public accommodation* in §36.104 are considered sales or rental establishments. The facility housing a *shopping center or shopping mall* only includes floor levels housing at least one sales or rental establishment, or any floor level designed or intended for use by at least one sales or rental establishment.

(b) The exemption provided in paragraph (a) of this section does not obviate or limit in any way the obligation to comply with the other accessibility requirements established in this subpart. For example, alterations to floors above or below the accessible ground floor must be accessible regardless of whether the altered facility has an elevator.

§ 36.405 Alterations: Historic preservation.

(a) Alterations to buildings or facilities that are eligible for listing in the National Register of Historic Places under the National Historic Preservation Act, 16 U.S.C. 470 *et seq.*, or are designated as historic under State or local law, shall comply to the maximum extent feasible with this part.

(b) If it is determined that it is not feasible to provide physical access to an historic property that is a place of public accommodation in a manner that will not threaten or destroy the historic significance of the building or the facility, alternative methods of access shall be provided pursuant to the requirements of subpart C of this part.

[AG Order No. 3181–2010, 75 FR 56256, Sept. 15, 2010]

§ 36.406 Standards for new construction and alterations.

(a) *Accessibility standards and compliance date.* (1) New construction and alterations subject to §§36.401 or 36.402 shall comply with the 1991 Standards if the date when the last application for a building permit or permit extension is certified to be complete by a State,

county, or local government (or, in those jurisdictions where the government does not certify completion of applications, if the date when the last application for a building permit or permit extension is received by the State, county, or local government) is before September 15, 2010, or if no permit is required, if the start of physical construction or alterations occurs before September 15, 2010.

(2) New construction and alterations subject to §§ 36.401 or 36.402 shall comply either with the 1991 Standards or with the 2010 Standards if the date when the last application for a building permit or permit extension is certified to be complete by a State, county, or local government (or, in those jurisdictions where the government does not certify completion of applications, if the date when the last application for a building permit or permit extension is received by the State, county, or local government) is on or after September 15, 2010 and before March 15, 2012, or if no permit is required, if the start of physical construction or alterations occurs on or after September 15, 2010 and before March 15, 2012.

(3) New construction and alterations subject to §§ 36.401 or 36.402 shall comply with the 2010 Standards if the date when the last application for a building permit or permit extension is certified to be complete by a State, county, or local government (or, in those jurisdictions where the government does not certify completion of applications, if the date when the last application for a building permit or permit extension is received by the State, county, or local government) is on or after March 15, 2012, or if no permit is required, if the start of physical construction or alterations occurs on or after March 15, 2012.

(4) For the purposes of this section, ''start of physical construction or alterations'' does not mean ceremonial groundbreaking or razing of structures prior to site preparation.

(5) *Noncomplying new construction and alterations.* (i) Newly constructed or altered facilities or elements covered by §§ 36.401 or 36.402 that were constructed or altered before March 15, 2012 and that do not comply with the 1991 Standards shall, before March 15, 2012, be made accessible in accordance with either the 1991 Standards or the 2010 Standards.

(ii) Newly constructed or altered facilities or elements covered by §§ 36.401 or 36.402 that were constructed or altered before March 15, 2012 and that do not comply with the 1991 Standards shall, on or after March 15, 2012, be made accessible in accordance with the 2010 Standards.

APPENDIX TO § 36.406(a)

Compliance dates for new construction and alterations	Applicable standards
On or after January 26, 1993 and before September 15, 2010.	1991 Standards.
On or after September 15, 2010 and before March 15, 2012.	1991 Standards or 2010 Standards.
On or after March 15, 2012	2010 Standards.

(b) *Scope of coverage.* The 1991 Standards and the 2010 Standards apply to fixed or built-in elements of buildings, structures, site improvements, and pedestrian routes or vehicular ways located on a site. Unless specifically stated otherwise, the advisory notes, appendix notes, and figures contained in the 1991 Standards and 2010 Standards explain or illustrate the requirements of the rule; they do not establish enforceable requirements.

(c) *Places of lodging.* Places of lodging subject to this part shall comply with the provisions of the 2010 Standards applicable to transient lodging, including, but not limited to, the requirements for transient lodging guest rooms in sections 224 and 806 of the 2010 Standards.

(1) *Guest rooms.* Guest rooms with mobility features in places of lodging subject to the transient lodging requirements of 2010 Standards shall be provided as follows—

(i) Facilities that are subject to the same permit application on a common site that each have 50 or fewer guest rooms may be combined for the purposes of determining the required number of accessible rooms and type of accessible bathing facility in accordance with table 224.2 to section 224.2 of the 2010 Standards.

(ii) Facilities with more than 50 guest rooms shall be treated separately for the purposes of determining the required number of accessible rooms and type of accessible bathing facility in

accordance with table 224.2 to section 224.2 of the 2010 Standards.

(2) *Exception.* Alterations to guest rooms in places of lodging where the guest rooms are not owned or substantially controlled by the entity that owns, leases, or operates the overall facility and the physical features of the guest room interiors are controlled by their individual owners are not required to comply with § 36.402 or the alterations requirements in section 224.1.1 of the 2010 Standards.

(3) *Facilities with residential dwelling units and transient lodging units.* Residential dwelling units that are designed and constructed for residential use exclusively are not subject to the transient lodging standards.

(d) *Social service center establishments.* Group homes, halfway houses, shelters, or similar social service center establishments that provide either temporary sleeping accommodations or residential dwelling units that are subject to this part shall comply with the provisions of the 2010 Standards applicable to residential facilities, including, but not limited to, the provisions in sections 233 and 809.

(1) In sleeping rooms with more than 25 beds covered by this part, a minimum of 5% of the beds shall have clear floor space complying with section 806.2.3 of the 2010 Standards.

(2) Facilities with more than 50 beds covered by this part that provide common use bathing facilities shall provide at least one roll-in shower with a seat that complies with the relevant provisions of section 608 of the 2010 Standards. Transfer-type showers are not permitted in lieu of a roll-in shower with a seat, and the exceptions in sections 608.3 and 608.4 for residential dwelling units are not permitted. When separate shower facilities are provided for men and for women, at least one roll-in shower shall be provided for each group.

(e) *Housing at a place of education.* Housing at a place of education that is subject to this part shall comply with the provisions of the 2010 Standards applicable to transient lodging, including, but not limited to, the requirements for transient lodging guest rooms in sections 224 and 806, subject to the following exceptions. For the purposes of the application of this section, the term ''sleeping room'' is intended to be used interchangeably with the term ''guest room'' as it is used in the transient lodging standards.

(1) Kitchens within housing units containing accessible sleeping rooms with mobility features (including suites and clustered sleeping rooms) or on floors containing accessible sleeping rooms with mobility features shall provide turning spaces that comply with section 809.2.2 of the 2010 Standards and kitchen work surfaces that comply with section 804.3 of the 2010 Standards.

(2) Multi-bedroom housing units containing accessible sleeping rooms with mobility features shall have an accessible route throughout the unit in accordance with section 809.2 of the 2010 Standards.

(3) Apartments or townhouse facilities that are provided by or on behalf of a place of education, which are leased on a year-round basis exclusively to graduate students or faculty and do not contain any public use or common use areas available for educational programming, are not subject to the transient lodging standards and shall comply with the requirements for residential facilities in sections 233 and 809 of the 2010 Standards.

(f) *Assembly areas.* Assembly areas that are subject to this part shall comply with the provisions of the 2010 Standards applicable to assembly areas, including, but not limited to, sections 221 and 802. In addition, assembly areas shall ensure that—

(1) In stadiums, arenas, and grandstands, wheelchair spaces and companion seats are dispersed to all levels that include seating served by an accessible route;

(2) In assembly areas that are required to horizontally disperse wheelchair spaces and companion seats by section 221.2.3.1 of the 2010 Standards and that have seating encircling, in whole or in part, a field of play or performance, wheelchair spaces and companion seats are dispersed around that field of play or performance area;

(3) Wheelchair spaces and companion seats are not located on (or obstructed by) temporary platforms or other movable structures, except that when an

entire seating section is placed on temporary platforms or other movable structures in an area where fixed seating is not provided, in order to increase seating for an event, wheelchair spaces and companion seats may be placed in that section. When wheelchair spaces and companion seats are not required to accommodate persons eligible for those spaces and seats, individual, removable seats may be placed in those spaces and seats;

(4) In stadium-style movie theaters, wheelchair spaces and companion seats are located on a riser or cross-aisle in the stadium section that satisfies at least one of the following criteria—

(i) It is located within the rear 60% of the seats provided in an auditorium; or

(ii) It is located within the area of an auditorium in which the vertical viewing angles (as measured to the top of the screen) are from the 40th to the 100th percentile of vertical viewing angles for all seats as ranked from the seats in the first row (1st percentile) to seats in the back row (100th percentile).

(g) *Medical care facilities.* Medical care facilities that are subject to this part shall comply with the provisions of the 2010 Standards applicable to medical care facilities, including, but not limited to, sections 223 and 805. In addition, medical care facilities that do not specialize in the treatment of conditions that affect mobility shall disperse the accessible patient bedrooms required by section 223.2.1 of the 2010 Standards in a manner that is proportionate by type of medical specialty.

[AG Order No. 3181–2010, 75 FR 56256, Sept. 15, 2010]

§§ 36.407–36.499 [Reserved]

Subpart E—Enforcement

§ 36.501 Private suits.

(a) *General.* Any person who is being subjected to discrimination on the basis of disability in violation of the Act or this part or who has reasonable grounds for believing that such person is about to be subjected to discrimination in violation of section 303 of the Act or subpart D of this part may institute a civil action for preventive relief, including an application for a permanent or temporary injunction, restraining order, or other order. Upon timely application, the court may, in its discretion, permit the Attorney General to intervene in the civil action if the Attorney General or his or her designee certifies that the case is of general public importance. Upon application by the complainant and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the civil action without the payment of fees, costs, or security. Nothing in this section shall require a person with a disability to engage in a futile gesture if the person has actual notice that a person or organization covered by title III of the Act or this part does not intend to comply with its provisions.

(b) *Injunctive relief.* In the case of violations of § 36.304, §§ 36.308, 36.310(b), 36.401, 36.402, 36.403, and 36.405 of this part, injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by the Act or this part. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by the Act or this part.

§ 36.502 Investigations and compliance reviews.

(a) The Attorney General shall investigate alleged violations of the Act or this part.

(b) Any individual who believes that he or she or a specific class of persons has been subjected to discrimination prohibited by the Act or this part may request the Department to institute an investigation.

(c) Where the Attorney General has reason to believe that there may be a violation of this part, he or she may initiate a compliance review.

§ 36.503 Suit by the Attorney General.

Following a compliance review or investigation under § 36.502, or at any other time in his or her discretion, the Attorney General may commence a civil action in any appropriate United States district court if the Attorney

General has reasonable cause to believe that—

(a) Any person or group of persons is engaged in a pattern or practice of discrimination in violation of the Act or this part; or

(b) Any person or group of persons has been discriminated against in violation of the Act or this part and the discrimination raises an issue of general public importance.

§ 36.504 Relief.

(a) *Authority of court.* In a civil action under § 36.503, the court—

(1) May grant any equitable relief that such court considers to be appropriate, including, to the extent required by the Act or this part—

(i) Granting temporary, preliminary, or permanent relief;

(ii) Providing an auxiliary aid or service, modification of policy, practice, or procedure, or alternative method; and

(iii) Making facilities readily accessible to and usable by individuals with disabilities;

(2) May award other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General; and

(3) May, to vindicate the public interest, assess a civil penalty against the entity in an amount

(i) Not exceeding $50,000 for a first violation occurring before September 29, 1999, and not exceeding $55,000 for a first violation occurring on or after September 29, 1999, and before April 28, 2014, and not exceeding $75,000 for a first violation occurring on or after April 28, 2014.

(ii) Not exceeding $100,000 for any subsequent violation occurring before September 29, 1999, and not exceeding $110,000 for any subsequent violation occurring on or after September 29, 1999, and before April 28, 2014, and not exceeding $150,000 for any subsequent violation occurring on or after April 28, 2014.

(b) *Single violation.* For purposes of paragraph (a) (3) of this section, in determining whether a first or subsequent violation has occurred, a determination in a single action, by judgment or settlement, that the covered entity has engaged in more than one discriminatory act shall be counted as a single violation.

(c) *Punitive damages.* For purposes of paragraph (a)(2) of this section, the terms ''monetary damages'' and ''such other relief'' do not include punitive damages.

(d) *Judicial consideration.* In a civil action under § 36.503, the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this part by the entity. In evaluating good faith, the court shall consider, among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, as amended by Order No. 2249–99, 64 FR 47103, Aug. 30, 1999; AG Order No. 3324–2014, 79 FR 17436, Mar. 28, 2014]

EFFECTIVE DATE NOTE: By AG Order 3690–2016, 81 FR 42499, June 30, 2016, § 36.504 was amended by revising paragraphs (a)(3)(i) and (a)(3)(ii), effective Aug. 1, 2016. For the convenience of the user, the revised text is set forth as follows:

§ 36.504 Relief.

(a) * * *

(3) * * *

(i) Not exceeding $50,000 for a first violation occurring before September 29, 1999, and not exceeding $55,000 for a first violation occurring on or after September 29, 1999, and before April 28, 2014, and not exceeding $75,000 for a first violation occurring on or after April 28, 2014, except that, for civil penalties assessed after August 1, 2016, for a first violation occurring after November 2, 2015, the civil penalty shall not exceed the applicable amount set forth in 28 CFR 85.5.

(ii) Not exceeding $100,000 for any subsequent violation occurring before September 29, 1999, and not exceeding $110,000 for any subsequent violation occurring on or after September 29, 1999, and before April 28, 2014, and not exceeding $150,000 for any subsequent violation occurring on or after April 28, 2014, except that, for civil penalties assessed after August 1, 2016, for any subsequent violation occurring after November 2, 2015, the civil penalty shall not exceed the applicable amount set forth in 28 CFR 85.5.

* * * * *

§ 36.505 Attorneys fees.

In any action or administrative proceeding commenced pursuant to the Act or this part, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

§ 36.506 Alternative means of dispute resolution.

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, is encouraged to resolve disputes arising under the Act and this part.

§ 36.507 Effect of unavailability of technical assistance.

A public accommodation or other private entity shall not be excused from compliance with the requirements of this part because of any failure to receive technical assistance, including any failure in the development or dissemination of any technical assistance manual authorized by the Act.

§ 36.508 Effective date.

(a) *General.* Except as otherwise provided in this section and in this part, this part shall become effective on January 26, 1992.

(b) *Civil actions.* Except for any civil action brought for a violation of section 303 of the Act, no civil action shall be brought for any act or omission described in section 302 of the Act that occurs—

(1) Before July 26, 1992, against businesses with 25 or fewer employees and gross receipts of $1,000,000 or less.

(2) Before January 26, 1993, against businesses with 10 or fewer employees and gross receipts of $500,000 or less.

(c) *Transportation services provided by public accommodations.* Newly purchased or leased vehicles required to be accessible by §36.310 must be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, if the solicitation for the vehicle is made after August 25, 1990.

§§ 36.509–36.599 [Reserved]

Subpart F—Certification of State Laws or Local Building Codes

§ 36.601 Definitions.

Assistant Attorney General means the Assistant Attorney General for Civil Rights or his or her designee.

Certification of equivalency means a final certification that a code meets or exceeds the minimum requirements of title III of the Act for accessibility and usability of facilities covered by that title.

Code means a State law or local building code or similar ordinance, or part thereof, that establishes accessibility requirements.

Model code means a nationally recognized document developed by a private entity for use by State or local jurisdictions in developing codes as defined in this section. A model code is intended for incorporation by reference or adoption in whole or in part, with or without amendment, by State or local jurisdictions.

Preliminary determination of equivalency means a preliminary determination that a code appears to meet or exceed the minimum requirements of title III of the Act for accessibility and usability of facilities covered by that title.

Submitting official means the State or local official who—

(1) Has principal responsibility for administration of a code, or is authorized to submit a code on behalf of a jurisdiction; and

(2) Files a request for certification under this subpart.

§ 36.602 General rule.

On the application of a State or local government, the Assistant Attorney General may certify that a code meets or exceeds the minimum requirements of the Act for the accessibility and usability of places of public accommodation and commercial facilities under this part by issuing a certification of equivalency. At any enforcement proceeding under title III of the Act, such

certification shall be rebuttable evidence that such State law or local ordinance does meet or exceed the minimum requirements of title III.

§ 36.603 Preliminary determination.

Upon receipt and review of all information relevant to a request filed by a submitting official for certification of a code, and after consultation with the Architectural and Transportation Barriers Compliance Board, the Assistant Attorney General shall make a preliminary determination of equivalency or a preliminary determination to deny certification.

[AG Order No. 3181–2010, 75 FR 56257, Sept. 15, 2010]

§ 36.604 Procedure following preliminary determination of equivalency.

(a) If the Assistant Attorney General makes a preliminary determination of equivalency under §36.603, he or she shall inform the submitting official, in writing, of that preliminary determination. The Assistant Attorney General also shall—

(1) Publish a notice in the FEDERAL REGISTER that advises the public of the preliminary determination of equivalency with respect to the particular code, and invite interested persons and organizations, including individuals with disabilities, during a period of at least 60 days following publication of the notice, to file written comments relevant to whether a final certification of equivalency should be issued;

(2) After considering the information received in response to the notice described in paragraph (a) of this section, and after publishing a separate notice in the FEDERAL REGISTER, hold an informal hearing, in the State or local jurisdiction charged with administration and enforcement of the code, at which interested individuals, including individuals with disabilities, are provided an opportunity to express their views with respect to the preliminary determination of equivalency; and

(b) The Assistant Attorney General, after consultation with the Architectural and Transportation Barriers Compliance Board and consideration of the materials and information submitted pursuant to this section, as well as information provided previously by the submitting official, shall issue either a certification of equivalency or a final determination to deny the request for certification. The Assistant Attorney General shall publish notice of the certification of equivalency or denial of certification in the FEDERAL REGISTER.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, redesignated and amended by AG Order No. 3181–2010, 75 FR 56257, Sept. 15, 2010]

§ 36.605 Procedure following preliminary denial of certification.

(a) If the Assistant Attorney General makes a preliminary determination to deny certification of a code under §36.603, he or she shall notify the submitting official of the determination. The notification may include specification of the manner in which the code could be amended in order to qualify for certification.

(b) The Assistant Attorney General shall allow the submitting official not less than 15 days to submit data, views, and arguments in opposition to the preliminary determination to deny certification. If the submitting official does not submit materials, the Assistant Attorney General shall not be required to take any further action. If the submitting official submits materials, the Assistant Attorney General shall evaluate those materials and any other relevant information. After evaluation of any newly submitted materials, the Assistant Attorney General shall make either a final denial of certification or a preliminary determination of equivalency.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, redesignated and amended by AG Order No. 3181–2010, 75 FR 56258, Sept. 15, 2010]

§ 36.606 Effect of certification.

(a)(1) A certification shall be considered a certification of equivalency only with respect to those features or elements that are both covered by the certified code and addressed by the standards against which equivalency is measured.

(2) For example, if certain equipment is not covered by the code, the determination of equivalency cannot be used as evidence with respect to the question of whether equipment in a building built according to the code satisfies

the Act's requirements with respect to such equipment. By the same token, certification would not be relevant to construction of a facility for children, if the regulations against which equivalency is measured do not address children's facilities.

(b) A certification of equivalency is effective only with respect to the particular edition of the code for which certification is granted. Any amendments or other changes to the code after the date of the certified edition are not considered part of the certification.

(c) A submitting official may reapply for certification of amendments or other changes to a code that has already received certification.

(d) When the standards of the Act against which a code is deemed equivalent are revised or amended substantially, a certification of equivalency issued under the preexisting standards is no longer effective, as of the date the revised standards take effect. However, construction in compliance with a certified code during the period when a certification of equivalency was effective shall be considered rebuttable evidence of compliance with the Standards then in effect as to those elements of buildings and facilities that comply with the certified code. A submitting official may reapply for certification pursuant to the Act's revised standards, and, to the extent possible, priority will be afforded the request in the review process.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, redesignated and amended by AG Order No. 3181–2010, 75 FR 56258, Sept. 15, 2010]

§ 36.607 Guidance concerning model codes.

Upon application by an authorized representative of a private entity responsible for developing a model code, the Assistant Attorney General may review the relevant model code and issue guidance concerning whether and in what respects the model code is consistent with the minimum requirements of the Act for the accessibility and usability of places of public accommodation and commercial facilities under this part.

[Order No. 1513–91, 56 FR 35592, July 26, 1991, redesignated by AG Order No. 3181–2010, 75 FR 56258, Sept. 15, 2010]

APPENDIX A TO PART 36—GUIDANCE ON REVISIONS TO ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY BY PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES

NOTE: This Appendix contains guidance providing a section-by-section analysis of the revisions to 28 CFR part 36 published on September 15, 2010.

SECTION-BY-SECTION ANALYSIS AND RESPONSE TO PUBLIC COMMENTS

This section provides a detailed description of the Department's changes to the title III regulation, the reasoning behind those changes, and responses to public comments received on these topics. The Section-by-Section Analysis follows the order of the title III regulation itself, except that if the Department has not changed a regulatory section, the unchanged section has not been mentioned.

SUBPART A—GENERAL

SECTION 36.104 DEFINITIONS

''1991 Standards'' and ''2004 ADAAG''

The Department has included in the final rule new definitions of both the ''1991 Standards'' and the ''2004 ADAAG.'' The term ''1991 Standards'' refers to the ADA Standards for Accessible Design, originally published on July 26, 1991, and republished as Appendix D to 28 CFR part 36. The term ''2004 ADAAG'' refers to ADA Chapter 1, ADA Chapter 2, and Chapters 3 through 10 of the Americans with Disabilities Act and the Architectural Barriers Act Accessibility Guidelines, which were issued by the Access Board on July 23, 2004, codified at 36 CFR 1191, app. B and D (2009), and which the Department has adopted in this final rule. These terms are included in the definitions section for ease of reference.

''2010 Standards''

The Department has added to the final rule a definition of the term ''2010 Standards.'' The term ''2010 Standards'' refers to the 2010 ADA Standards for Accessible Design, which consist of the 2004 ADAAG and the requirements contained in subpart D of 28 CFR part 36.

''Direct Threat''

The final rule moves the definition of direct threat from § 36.208(b) to the definitions

section at §36.104. This is an editorial change. Consequently, §36.208(c) becomes §36.208(b) in the final rule.

''Existing Facility''

The 1991 title III regulation provided definitions for ''new construction'' at §36.401(a) and ''alterations'' at §36.402(b). In contrast, the term ''existing facility'' was not explicitly defined, although it is used in the statute and regulations for titles II and III. *See, e.g.*, 42 U.S.C. 12182(b)(2)(A)(iv); 28 CFR 35.150. It has been the Department's view that newly constructed or altered facilities are also existing facilities subject to title III's continuing barrier removal obligation, and that view is made explicit in this rule.

The classification of facilities under the ADA is neither static nor mutually exclusive. Newly constructed or altered facilities are also existing facilities. A newly constructed facility remains subject to the accessibility standards in effect at the time of design and construction, with respect to those elements for which, at that time, there were applicable ADA Standards. That same facility, however, after construction, is *also* an existing facility, and subject to the public accommodation's continuing obligation to remove barriers where it is readily achievable to do so. The fact that the facility is also an existing facility does not relieve the public accommodation of its obligations under the new construction requirements of this part. Rather, it means that in addition to the new construction requirements, the public accommodation has a continuing obligation to remove barriers that arise, or are deemed barriers, only after construction. Such barriers include but are not limited to the elements that are first covered in the 2010 Standards, as that term is defined in §36.104.

At some point, the same facility may undergo alterations, which are subject to the alterations requirements in effect at that time. This facility remains subject to its original new construction standards for elements and spaces not affected by the alterations; the facility is subject to the alterations requirements and standards in effect at the time of the alteration for the elements and spaces affected by the alteration; *and*, throughout, the facility remains subject to the continuing barrier removal obligation.

The Department's enforcement of the ADA is premised on a broad understanding of ''existing facility.'' The ADA contemplates that as the Department's knowledge and understanding of accessibility advances and evolves, this knowledge will be incorporated into and result in increased accessibility in the built environment. Title III's barrier removal provisions strike the appropriate balance between ensuring that accessibility advances are reflected in the built environment and mitigating the costs of those advances to public accommodations. With adoption of the final rule, public accommodations engaged in barrier removal measures will now be guided by the 2010 Standards, defined in §36.104, and the safe harbor in §36.304(d)(2).

The NPRM included the following proposed definition of ''existing facility'': ''[A] facility that has been constructed and remains in existence on any given date.'' 73 FR 34508, 34552 (June 17, 2008). While the Department intended the proposed definition to provide clarity with respect to public accommodations' continuing obligation to remove barriers where it is readily achievable to do so, some commenters pointed out arguable ambiguity in the language and the potential for misapplication of the rule in practice.

The Department received a number of comments on this issue. The commenters urged the Department to clarify that all buildings remain subject to the standards in effect at the time of their construction, that is, that a facility designed and constructed for first occupancy between January 26, 1993, and the effective date of the final rule is still considered ''new construction'' and that alterations occurring between January 26, 1993, and the effective date of the final rule are still considered ''alterations.''

The final rule includes clarifying language to ensure that the Department's interpretation is accurately reflected. As established by this rule, existing facility means a facility in existence on any given date, without regard to whether the facility may also be considered newly constructed or altered under this part. Thus, this definition reflects the Department's longstanding interpretation that public accommodations have obligations in existing facilities that are independent of but may coexist with requirements imposed by new construction or alteration requirements in those same facilities.

''Housing at a Place of Education''

The Department has added a new definition to §36.104, ''housing at a place of education,'' to clarify the types of educational housing programs that are covered by this title. This section defines ''housing at a place of education'' as ''housing operated by or on behalf of an elementary, secondary, undergraduate, or postgraduate school, or other place of education, including dormitories, suites, apartments, or other places of residence.'' This definition does not apply to social service programs that combine residential housing with social services, such as a residential job training program.

''Other Power-Driven Mobility Device'' and ''Wheelchair''

Because relatively few individuals with disabilities were using nontraditional mobility devices in 1991, there was no pressing need for the 1991 title III regulation to define

the terms ''wheelchair'' or ''other power-driven mobility device,'' to expound on what would constitute a reasonable modification in policies, practices, or procedures under §36.302, or to set forth within that section specific requirements for the accommodation of mobility devices. Since the issuance of the 1991 title III regulation, however, the choices of mobility devices available to individuals with disabilities have increased dramatically. The Department has received complaints about and has become aware of situations where individuals with mobility disabilities have utilized devices that are not designed primarily for use by an individual with a mobility disability, including the Segway® Personal Transporter (Segway® PT), golf cars, all-terrain vehicles (ATVs), and other locomotion devices.

The Department also has received questions from public accommodations and individuals with mobility disabilities concerning which mobility devices must be accommodated and under what circumstances. Indeed, there has been litigation concerning the legal obligations of covered entities to accommodate individuals with mobility disabilities who wish to use an electronic personal assistance mobility device (EPAMD), such as the Segway® PT, as a mobility device. The Department has participated in such litigation as amicus curiae. *See Ault* v. *Walt Disney World Co.*, No. 6:07–cv–1785–Orl–31KRS, 2009 WL 3242028 (M.D. Fla. Oct. 6, 2009). Much of the litigation has involved shopping malls where businesses have refused to allow persons with disabilities to use EPAMDs. *See, e.g., McElroy* v. *Simon Property Group,* No. 08–404 RDR, 2008 WL 4277716 (D. Kan. Sept. 15, 2008) (enjoining mall from prohibiting the use of a Segway® PT as a mobility device where an individual agrees to all of a mall's policies for use of the device, except indemnification); Shasta Clark, *Local Man Fighting Mall Over Right to Use Segway*, WATE 6 News, July 26, 2005, available at *http://www.wate.com/Global/story.asp?s=3643674* (last visited June 24, 2010).

In response to questions and complaints from individuals with disabilities and covered entities concerning which mobility devices must be accommodated and under what circumstances, the Department began developing a framework to address the use of unique mobility devices, concerns about their safety, and the parameters for the circumstances under which these devices must be accommodated. As a result, the Department's NPRM proposed two new approaches to mobility devices. First, the Department proposed a two-tiered mobility device definition that defined the term ''wheelchair'' separately from ''other power-driven mobility device.'' Second, the Department proposed requirements to allow the use of devices in each definitional category. In §36.311(a), the NPRM proposed that wheelchairs and manually-powered mobility aids used by individuals with mobility disabilities shall be permitted in any areas open to pedestrian use. Section 36.311(b) of the NPRM proposed that a public accommodation ''shall make reasonable modifications in its policies, practices, and procedures to permit the use of other power-driven mobility devices by individuals with disabilities, unless the public accommodation can demonstrate that the use of the device is not reasonable or that its use will result in a fundamental alteration in the nature of the public accommodation's goods, services, facilities, privileges, advantages, or accommodations.'' 73 FR 34508, 34556 (June 17, 2008).

The Department sought public comment with regard to whether these steps would, in fact, achieve clarity on these issues. Toward this end, the Department's NPRM asked several questions relating to the definitions of ''wheelchair,'' ''other power-driven mobility device,'' and ''manually-powered mobility aids''; the best way to categorize different classes of mobility devices, the types of devices that should be included in each category; and the circumstances under which certain types of mobility devices must be accommodated or may be excluded pursuant to the policy adopted by the public accommodation.

Because the questions in the NPRM that concerned mobility devices and their accommodation were interrelated, many of the commenters' responses did not identify the specific question to which they were responding. Instead, commenters grouped the questions together and provided comments accordingly. Most commenters spoke to the issues addressed in the Department's questions in broad terms and using general concepts. As a result, the responses to the questions posed are discussed below in broadly grouped issue categories rather than on a question-by-question basis.

Two-tiered definitional approach. Commenters supported the Department's proposal to use a two-tiered definition of mobility device. Commenters nearly universally said that wheelchairs always should be accommodated and that they should never be subject to an assessment with regard to their admission to a particular public accommodation. In contrast, the vast majority of commenters indicated they were in favor of allowing public accommodations to conduct an assessment as to whether, and under which circumstances, other power-driven mobility devices will be allowed on-site.

Many commenters also indicated their support for the two-tiered approach in responding to questions concerning the definition of ''wheelchair'' and ''other power-driven mobility device.'' Nearly every disability advocacy group said that the Department's two-tiered approach strikes the proper balance between ensuring access for individuals with

disabilities and addressing fundamental alteration and safety concerns held by public accommodations; however, a minority of disability advocacy groups wanted other power-driven mobility devices to be included in the definition of ''wheelchair.'' Most advocacy, nonprofit, and individual commenters supported the concept of a separate definition for ''other power-driven mobility device'' because a separate definition would maintain existing legal protections for wheelchairs while recognizing that some devices that are not designed primarily for individuals with mobility disabilities have beneficial uses for individuals with mobility disabilities. They also favored this concept because it recognizes technological developments and that innovative uses of varying devices may provide increased access to individuals with mobility disabilities.

While two business associations indicated that they opposed the concept of ''other power-driven mobility device'' in its entirety, other business commenters expressed general and industry-specific concerns about permitting their use. They indicated that such devices create a host of safety, cost, and fraud issues that do not exist with wheelchairs. On balance, however, business commenters indicated that they support the establishment of a two-tiered regulatory approach because defining ''other power-driven mobility device'' separately from ''wheelchair'' means that businesses will be able to maintain some measure of control over the admission of the former. Virtually all of these commenters indicated that their support for the dual approach and the concept of other power-driven mobility devices was, in large measure, due to the other power-driven mobility device assessment factors in §36.311(c) of the NPRM.

By maintaining the two-tiered approach to mobility devices and defining ''wheelchair'' separately from ''other power-driven mobility device,'' the Department is able to preserve the protection users of traditional wheelchairs and other manually-powered mobility aids have had since the ADA was enacted, while also recognizing that human ingenuity, personal choice, and new technologies have led to the use of devices that may be more beneficial for individuals with certain mobility disabilities.

Moreover, the Department believes the two-tiered approach gives public accommodations guidance to follow in assessing whether reasonable modifications can be made to permit the use of other power-driven mobility devices on-site and to aid in the development of policies describing the circumstances under which persons with disabilities may use such devices. The two-tiered approach neither mandates that all other power-driven mobility devices be accommodated in every circumstance, nor excludes these devices from all protection. This approach, in conjunction with the factor assessment provisions in §36.311(b)(2), will serve as a mechanism by which public accommodations can evaluate their ability to accommodate other power-driven mobility devices. As will be discussed in more detail below, the assessment factors in §36.311(b)(2) are specifically designed to provide guidance to public accommodations regarding whether it is permissible to bar the use of a specific other power-driven mobility device in a specific facility. In making such a determination, a public accommodation must consider the device's type, size, weight dimensions, and speed; the facility's volume of pedestrian traffic; the facility's design and operational characteristics; whether the device conflicts with legitimate safety requirements; and whether the device poses a substantial risk of serious harm to the immediate environment or natural or cultural resources, or conflicts with Federal land management laws or regulations. In addition, under §36.311(b)(i) if the public accommodation claims that it cannot make reasonable modifications to its policies, practices, or procedures to permit the use of other power-driven mobility devices by individuals with disabilities, the burden of proof to demonstrate that such devices cannot be operated in accordance with legitimate safety requirements rests upon the public accommodation.

Categorization of wheelchair versus other power-driven mobility devices. Implicit in the creation of the two-tiered mobility device concept is the question of how to categorize which devices are wheelchairs and which are other power-driven mobility devices. Finding weight and size to be too restrictive, the vast majority of advocacy, nonprofit, and individual commenters opposed using the Department of Transportation's definition of ''common wheelchair'' to designate the mobility device's appropriate category. Business commenters who generally supported using weight and size as the method of categorization did so because of their concerns about having to make physical changes to their facilities to accommodate oversized devices. The vast majority of business commenters also favored using the device's intended use to categorize which devices constitute wheelchairs and which are other power-driven mobility devices. Furthermore, the intended-use determinant received a fair amount of support from advocacy, nonprofit, and individual commenters, either because they sought to preserve the broad accommodation of wheelchairs or because they sympathized with concerns about individuals without mobility disabilities fraudulently bringing other power-driven mobility devices into places of public accommodation.

Commenters seeking to have the Segway® PT included in the definition of ''wheelchair'' objected to classifying mobility devices on the basis of their intended use because they felt that such a classification would be unfair and prejudicial to Segway® PT users and would stifle personal choice, creativity, and innovation. Other advocacy and nonprofit commenters objected to employing an intended-use approach because of concerns that the focus would shift to an assessment of the device, rather than the needs or benefits to the individual with the mobility disability. They were of the view that the mobility-device classification should be based on its function—whether it is used to address a mobility disability. A few commenters raised the concern that an intended-use approach might embolden public accommodations to assess whether an individual with a mobility disability really needs to use the other power-driven mobility device at issue or to question why a wheelchair would not provide sufficient mobility. Those citing objections to the intended-use determinant indicated it would be more appropriate to make the categorization determination based on whether the device is being used for a mobility disability in the context of the impact of its use in a specific environment. Some of these commenters preferred this approach because it would allow the Segway® PT to be included in the definition of ''wheelchair.''

Some commenters were inclined to categorize mobility devices by the way in which they are powered, such as battery-powered engines versus fuel or combustion engines. One commenter suggested using exhaust level as the determinant. Although there were only a few commenters who would make the determination based on indoor or outdoor use, there was nearly universal support for banning from indoor use devices that are powered by fuel or combustion engines.

A few commenters thought it would be appropriate to categorize the devices based on their maximum speed. Others objected to this approach, stating that circumstances should dictate the appropriate speed at which mobility devices should be operated—for example, a faster speed may be safer when crossing streets than it would be for sidewalk use—and merely because a device can go a certain speed does not mean it will be operated at that speed.

The Department has decided to maintain the device's intended use as the appropriate determinant for which devices are categorized as ''wheelchairs.'' However, because wheelchairs may be intended for use by individuals who have temporary conditions affecting mobility, the Department has decided that it is more appropriate to use the phrase ''primarily designed'' rather than ''solely designed'' in making such categorizations. The Department will not foreclose any future technological developments by identifying or banning specific devices or setting restrictions on size, weight, or dimensions. Moreover, devices designed primarily for use by individuals with mobility disabilities often are considered to be medical devices and are generally eligible for insurance reimbursement on this basis. Finally, devices designed primarily for use by individuals with mobility disabilities are less subject to fraud concerns because they were not designed to have a recreational component. Consequently, rarely, if ever, is any inquiry or assessment as to their appropriateness for use in a public accommodation necessary.

Definition of ''wheelchair.'' In seeking public feedback on the NPRM's definition of ''wheelchair,'' the Department explained its concern that the definition of ''wheelchair'' in section 508(c)(2) of the ADA (formerly section 507(c)(2), July 26, 1990, 104 Stat. 372, 42 U.S.C. 12207, renumbered section 508(c)(2), Public Law 110–325 section 6(a)(2), Sept. 25, 2008, 122 Stat. 3558), which pertains to Federal wilderness areas, is not specific enough to provide clear guidance in the array of settings covered by title III and that the stringent size and weight requirements for the Department of Transportation's definition of ''common wheelchair'' are not a good fit in the context of most public accommodations. The Department noted in the NPRM that it sought a definition of ''wheelchair'' that would include manually-operated and power-driven wheelchairs and mobility scooters (*i.e.,* those that typically are single-user, have three to four wheels, and are appropriate for both indoor and outdoor pedestrian areas), as well as a variety of types of wheelchairs and mobility scooters with individualized or unique features or models with different numbers of wheels. The NPRM defined a wheelchair as ''a device designed solely for use by an individual with a mobility impairment for the primary purpose of locomotion in typical indoor and outdoor pedestrian areas. A wheelchair may be manually-operated or power-driven.'' 73 FR 34508, 34553 (June 17, 2008). Although the NPRM's definition of ''wheelchair'' excluded mobility devices that are not designed solely for use by individuals with mobility disabilities, the Department, noting that the use of the Segway® PT by individuals with mobility disabilities is on the upswing, inquired as to whether this device should be included in the definition of ''wheelchair.''

Most business commenters wished the definition of ''wheelchair'' had included size, weight, and dimension maximums. Ultimately, however, they supported the definition because it excludes other power-driven mobility devices and enables them to engage in an assessment to determine whether a

particular device can be allowed as a reasonable modification. These commenters felt this approach gave them some measure of control over whether, and under what circumstances, other power-driven mobility devices may be used in their facilities by individuals with mobility disabilities. Two commenters noted that because many mobility scooters are oversized, they are misplaced in the definition of ''wheelchair'' and belong with other power-driven mobility devices. Another commenter suggested using maximum size and weight requirements to allocate which mobility scooters should be categorized as wheelchairs, and which should be categorized as other power-driven mobility devices.

Many advocacy, nonprofit, and individual commenters indicated that as long as the Department intends the scope of the term ''mobility impairments'' to include other disabilities that cause mobility impairments (*e.g.*, respiratory, circulatory, stamina, etc.), they were in support of the language. Several commenters indicated a preference for the definition of ''wheelchair'' in section 508(c)(2) of the ADA. One commenter indicated a preference for the term ''assistive device,'' as it is defined in the Rehabilitation Act of 1973, over the term ''wheelchair.'' A few commenters indicated that strollers should be added to the preamble's list of examples of wheelchairs because parents of children with disabilities frequently use strollers as mobility devices until their children get older.

In the final rule, the Department has rearranged some wording and has made some changes in the terminology used in the definition of ''wheelchair,'' but essentially has retained the definition, and therefore the rationale, that was set forth in the NPRM. Again, the text of the ADA makes the definition of ''wheelchair'' contained in section 508(c)(2) applicable only to the specific context of uses in designated wilderness areas, and therefore does not compel the use of that definition for any other purpose. Moreover, the Department maintains that limiting the definition to devices suitable for use in an ''indoor pedestrian area'' as provided for in section 508(c)(2) of the ADA would ignore the technological advances in wheelchair design that have occurred since the ADA went into effect and that the inclusion of the phrase ''indoor pedestrian area'' in the definition of ''wheelchair'' would set back progress made by individuals with mobility disabilities who, for many years now, have been using devices designed for locomotion in indoor *and* outdoor settings. The Department has concluded that same rationale applies to placing limits on the size, weight, and dimensions of wheelchairs.

With regard to the term ''mobility impairments,'' the Department intended a broad reading so that a wide range of disabilities, including circulatory and respiratory disabilities, that make walking difficult or impossible, would be included. In response to comments on this issue, the Department has revisited the issue and has concluded that the most apt term to achieve this intent is ''mobility disability.''

In addition, the Department has decided that it is more appropriate to use the phrase, ''primarily'' designed for use by individuals with disabilities in the final rule, rather than, ''solely'' designed for use by individuals with disabilities—the phrase, proposed in the NPRM. The Department believes that this phrase more accurately covers the range of devices the Department intends to fall within the definition of ''wheelchair.''

After receiving comments that the word ''typical'' is vague and the phrase ''pedestrian areas'' is confusing to apply, particularly in the context of similar, but not identical, terms used in the proposed Standards, the Department decided to delete the term ''typical indoor and outdoor pedestrian areas'' from the final rule. Instead, the final rule references ''indoor or * * * both indoor and outdoor locomotion,'' to make clear that the devices that fall within the definition of ''wheelchair'' are those that are used for locomotion on indoor and outdoor pedestrian paths or routes and not those that are intended exclusively for traversing undefined, unprepared, or unimproved paths or routes. Thus, the final rule defines the term ''wheelchair'' to mean ''a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor or of both indoor and outdoor locomotion.''

Whether the definition of ''wheelchair'' includes the Segway® PT. As discussed above, because individuals with mobility disabilities are using the Segway® PT as a mobility device, the Department asked whether it should be included in the definition of ''wheelchair.'' The basic Segway® PT model is a two-wheeled, gyroscopically-stabilized, battery-powered personal transportation device. The user stands on a platform suspended three inches off the ground by wheels on each side, grasps a T-shaped handle, and steers the device similarly to a bicycle. Most Segway® PTs can travel up to 12½ miles per hour, compared to the average pedestrian walking speed of 3 to 4 miles per hour and the approximate maximum speed for power-operated wheelchairs of 6 miles per hour. In a study of trail and other non-motorized transportation users including EPAMDs, the Federal Highway Administration (FHWA) found that the eye height of individuals using EPAMDs ranged from approximately 69 to 80 inches. *See* Federal Highway Administration, *Characteristics of Emerging Road and Trail Users and Their Safety* (Oct. 14, 2004), available at *http://www.tfhrc.gov/safety/pubs/04103* (last visited June 24, 2010). Thus, the

Segway® PT can operate at much greater speeds than wheelchairs, and the average user stands much taller than most wheelchair users.

The Segway® PT has been the subject of debate among users, pedestrians, disability advocates, State and local governments, businesses, and bicyclists. The fact that the Segway® PT is not designed primarily for use by individuals with disabilities, nor used primarily by persons with disabilities, complicates the question of to what extent individuals with disabilities should be allowed to operate them in areas and facilities where other power-driven mobility devices are not allowed. Those who question the use of the Segway® PT in pedestrian areas argue that the speed, size, and operating features of the devices make them too dangerous to operate alongside pedestrians and wheelchair users.

Comments regarding whether to include the Segway® PT in the definition of ''wheelchair'' were, by far, the most numerous received in the category of comments regarding wheelchairs and other power-driven mobility devices. Significant numbers of veterans with disabilities, individuals with multiple sclerosis, and those advocating on their behalf made concise statements of general support for the inclusion of the Segway® PT in the definition of ''wheelchair.'' Two veterans offered extensive comments on the topic, along with a few advocacy and nonprofit groups and individuals with disabilities for whom sitting is uncomfortable or impossible.

While there may be legitimate safety issues for EPAMD users and bystanders in some circumstances, EPAMDs and other non-traditional mobility devices can deliver real benefits to individuals with disabilities. Among the reasons given by commenters to include the Segway® PT in the definition of ''wheelchair'' were that the Segway® PT is well-suited for individuals with particular conditions that affect mobility including multiple sclerosis, Parkinson's disease, chronic obstructive pulmonary disease, amputations, spinal cord injuries, and other neurological disabilities, as well as functional limitations, such as gait limitation, inability to sit or discomfort in sitting, and diminished stamina issues. Such individuals often find that EPAMDs are more comfortable and easier to use than more traditional mobility devices and assist with balance, circulation, and digestion in ways that wheelchairs do not. *See* Rachel Metz, *Disabled Embrace Segway,* New York Times, Oct. 14, 2004. Commenters specifically cited pressure relief, reduced spasticity, increased stamina, and improved respiratory, neurologic, and muscular health as secondary medical benefits from being able to stand.

Other arguments for including the Segway® PT in the definition of ''wheelchair'' were based on commenters' views that the Segway® PT offers benefits not provided by wheelchairs and mobility scooters, including its intuitive response to body movement, ability to operate with less coordination and dexterity than is required for many wheelchairs and mobility scooters, and smaller footprint and turning radius as compared to most wheelchairs and mobility scooters. Several commenters mentioned improved visibility, either due to the Segway® PT's raised platform or simply by virtue of being in a standing position. And finally, some commenters advocated for the inclusion of the Segway® PT simply based on civil rights arguments and the empowerment and self-esteem obtained from having the power to select the mobility device of choice.

Many commenters, regardless of their position on whether to include the Segway® PT in the definition of ''wheelchair,'' noted that the Segway® PT's safety record is as good as, if not better, than the record for wheelchairs and mobility scooters.

Most business commenters were opposed to the inclusion of the Segway® PT in the definition of ''wheelchair'' but were supportive of its inclusion as an ''other power-driven mobility device.'' They raised industry- or venue-specific concerns about including the Segway® PT in the definition of ''wheelchair.'' For example, civic centers, arenas, and theaters were concerned about the impact on sight-line requirements if Segway® PT users remain on their devices in a designated wheelchair seating area; amusement parks expressed concern that rides have been designed, purchased, and installed to enable wheelchair users to transfer easily or to accommodate wheelchairs on the ride itself; and retail stores mentioned size constraints in some stores. Nearly all business commenters expressed concern—and perceived liability issues—related to having to store or stow the Segway® PT, particularly if it could not be stored in an upright position. These commenters cited concerns about possible damage to the device, injury to customers who may trip over it, and theft of the device as a result of not being able to stow the Segway® PT securely.

Virtually every business commenter mentioned concerns about rider safety, as well as concerns for pedestrians unexpectedly encountering these devices or being hit or run over by these devices in crowded venues where maneuvering space is limited. Their main safety objection to the inclusion of the Segway® PT in the definition of ''wheelchair'' was that the maximum speed at which the Segway® PT can operate is far faster than that of motorized wheelchairs. There was a universal unease among these commenters with regard to relying on the judgment of the Segway® PT user to exercise caution because its top speed is far in excess

of a wheelchair's top speed. Many other safety concerns were industry-specific. For example, amusement parks were concerned that the Segway® PT is much taller than children; that it is too quiet to warn pedestrians, particularly those with low vision or who are blind, of their presence; that it may keep moving after a rider has fallen off or power system fails; and that it has a full-power override which automatically engages when an obstacle is encountered. Hotels and retail stores mentioned that maneuvering the Segway® PT through their tight quarters would create safety hazards.

Business commenters also expressed concern that if the Segway® PT were included in the definition of ''wheelchair'' they would have to make physical changes to their facilities to accommodate Segway® PT riders who stand much taller in these devices than do users of wheelchairs. They also were concerned that if the Segway®7 PT was included in the definition of ''wheelchair,'' they would have no ability to assess whether it is appropriate to allow the entry of the Segway® PT into their facilities the way they would have if the device is categorized as an ''other power-driven mobility device.''

Many disability advocacy and nonprofit commenters did not support the inclusion of the Segway® PT in the definition of ''wheelchair.'' Paramount to these commenters was the maintenance of existing protections for wheelchair users. Because there was unanimous agreement that wheelchair use rarely, if ever, may be restricted, these commenters strongly favored categorizing wheelchairs separately from the Segway® PT and other power-driven mobility devices and applying the intended-use determinant to assign the devices to either category. They indicated that while they support the greatest degree of access in public accommodations for all persons with disabilities who require the use of mobility devices, they recognize that under certain circumstances allowing the use of other power-driven mobility devices would result in a fundamental alteration or run counter to legitimate safety requirements necessary for the safe operation of a public accommodation. While these groups supported categorizing the Segway® PT as an ''other power-driven mobility device,'' they universally noted that because the Segway® PT does not present environmental concerns and is as safe to use as, if not safer than, a wheelchair, it should be accommodated in most circumstances.

The Department has considered all the comments and has concluded that it should not include the Segway® PT in the definition of ''wheelchair.'' The final rule provides that the test for categorizing a device as a wheelchair or an other power-driven mobility device is whether the device is designed primarily for use by individuals with mobility disabilities. Mobility scooters are included in the definition of ''wheelchair'' because they are designed primarily for users with mobility disabilities. However, because the current generation of EPAMDs, including the Segway® PT, was designed for recreational users and not primarily for use by individuals with mobility disabilities, the Department has decided to continue its approach of excluding EPAMDs from the definition of ''wheelchair'' and including them in the definition of ''other power-driven mobility device.'' Although EPAMDs, such as the Segway® PT, are not included in the definition of a ''wheelchair,'' public accommodations must assess whether they can make reasonable modifications to permit individuals with mobility disabilities to use such devices on their premises. The Department recognizes that the Segway® PT provides many benefits to those who use them as mobility devices, including a measure of privacy with regard to the nature of one's particular disability, and believes that in the vast majority of circumstances, the application of the factors described in §36.311 for providing access to other-powered mobility devices will result in the admission of the Segway® PT.

Treatment of ''manually-powered mobility aids.'' The Department's NPRM did not define the term ''manually-powered mobility aids.'' Instead, the NPRM included a non-exhaustive list of examples in §36.311(a). The NPRM queried whether the Department should maintain this approach to manually-powered mobility aids or whether it should adopt a more formal definition.

Only a few commenters addressed ''manually-powered mobility aids.'' Virtually all commenters were in favor of maintaining a non-exhaustive list of examples of ''manually-powered mobility aids'' rather than adopting a definition of the term. Of those who commented, a couple sought clarification of the term ''manually-powered.'' One commenter suggested that the term be changed to ''human-powered.'' Other commenters requested that the Department include ordinary strollers in the non-exhaustive list of manually-powered mobility aids. Since strollers are not devices designed primarily for individuals with mobility disabilities, the Department does not consider them to be manually-powered mobility aids; however, strollers used in the context of transporting individuals with disabilities are subject to the same assessment required by the ADA's reasonable modification standards at §36.302. The Department believes that because the existing approach is clear and understood easily by the public, no formal definition of the term ''manually-powered mobility aids'' is required.

Definition of ''other power-driven mobility device.'' The Department's NPRM defined the term ''other power-driven mobility device'' in §36.104 as ''any of a large range of devices

powered by batteries, fuel, or other engines—whether or not designed solely for use by individuals with mobility impairments—that are used by individuals with mobility impairments for the purpose of locomotion, including golf cars, bicycles, electronic personal assistance mobility devices (EPAMDs), or any mobility aid designed to operate in areas without defined pedestrian routes.'' 73 FR 34508, 34552 (June 17, 2008).

Business commenters mostly were supportive of the definition of ''other power-driven mobility device'' because it gave them the ability to develop policies pertaining to the admission of these devices, but they expressed concern that individuals will feign mobility disabilities so that they can use devices that are otherwise banned in public accommodations. Advocacy, nonprofit, and several individual commenters supported the definition of ''other power-driven mobility device'' because it allows new technologies to be added in the future, maintains the existing legal protections for wheelchairs, and recognizes that some devices, particularly the Segway® PT, which are not designed primarily for individuals with mobility disabilities, have beneficial uses for individuals with mobility disabilities.

Despite support for the definition of ''other power-driven mobility device,'' however, most advocacy and nonprofit commenters expressed at least some hesitation about the inclusion of fuel-powered mobility devices in the definition. While virtually all of these commenters noted that a blanket exclusion of any device that falls under the definition of ''other power-driven mobility device'' would violate basic civil rights concepts, they also specifically stated that certain devices, particularly off-highway vehicles, cannot be permitted in certain circumstances. They also made a distinction between the Segway® PT and other power-driven mobility devices, noting that the Segway® PT should be accommodated in most circumstances because it satisfies the safety and environmental elements of the policy analysis. These commenters indicated that they agree that other power-driven mobility devices must be assessed, particularly as to their environmental impact, before they are accommodated.

Business commenters were even less supportive of the inclusion of fuel-powered devices in the other power-driven mobility devices category. They sought a complete ban on fuel-powered devices because they believe they are inherently dangerous and pose environmental and safety concerns.

Although many commenters had reservations about the inclusion of fuel-powered devices in the definition of other power-driven mobility devices, the Department does not want the definition to be so narrow that it would foreclose the inclusion of new technological developments, whether powered by fuel or by some other means. It is for this reason that the Department has maintained the phrase ''any mobility device designed to operate in areas without defined pedestrian routes'' in the final rule's definition of other power-driven mobility devices. The Department believes that the limitations provided by ''fundamental alteration'' and the ability to impose legitimate safety requirements will likely prevent the use of fuel and combustion engine-driven devices indoors, as well as in outdoor areas with heavy pedestrian traffic. The Department notes, however, that in the future technological developments may result in the production of safe fuel-powered mobility devices that do not pose environmental and safety concerns. The final rule allows consideration to be given as to whether the use of a fuel-powered device would create a substantial risk of serious harm to the environment or natural or cultural resources, and to whether the use of such a device conflicts with Federal land management laws or regulations; this aspect of the final rule will further limit the inclusion of fuel-powered devices where they are not appropriate. Consequently, the Department has maintained fuel-powered devices in the definition of ''other power-driven mobility devices.'' The Department has also added language to the definition of ''other power-driven mobility device'' to reiterate that the definition does not apply to Federal wilderness areas, which are not covered by title II of the ADA; the use of wheelchairs in such areas is governed by section 508(c)(2) of the ADA, 42 U.S.C. 12207(c)(2).

''Place of Public Accommodation''

Definition of ''place of lodging.'' The NPRM stated that a covered ''place of lodging'' is a facility that provides guest rooms for sleeping for stays that are primarily short-term in nature (generally two weeks or less), to which the occupant does not have the right or intent to return to a specific room or unit after the conclusion of his or her stay, and which operates under conditions and with amenities similar to a hotel, motel, or inn, particularly including factors such as: (1) An on-site proprietor and reservations desk; (2) rooms available on a walk-up basis; (3) linen service; and (4) a policy of accepting reservations for a room type without guaranteeing a particular unit or room until check-in, without a prior lease or security deposit. The NPRM stated that timeshares and condominiums or corporate hotels that did not meet this definition would not be covered by §36.406(c) of the proposed regulation, but may be covered by the requirements of the Fair Housing Act (FHAct).

In the NPRM, the Department sought comment on its definition of ''place of lodging,'' specifically seeking public input on whether

the most appropriate time period for identifying facilities used for stays that primarily are short-term in nature should be set at 2 weeks or 30 days.

The vast majority of the comments received by the Department supported the use of a 30-day limitation on places of lodging as more consistent with building codes, local laws, and common real estate practices that treat stays of 30 days or less as transient rather than residential use. One commenter recommended using the phrase ''fourteen days or less.'' Another commenter objected to any bright line standard, stating that the difference between two weeks and 30 days for purposes of title III is arbitrary, viewed in light of conflicting regulations by the States. This commenter argued the Department should continue its existing practice under title III of looking to State law as one factor in determining whether a facility is used for stays that primarily are short-term in nature.

The Department is persuaded by the majority of commenters to adopt a 30-day guideline for the purposes of identifying facilities that primarily are short-term in nature and has modified the section accordingly. The 30-day guideline is intended only to determine when the final rule's transient lodging provisions apply to a facility. It does not alter an entity's obligations under any other applicable statute. For example, the Department recognizes that the FHAct does not employ a bright line standard for determining which facilities qualify as residential facilities under that Act and that there are circumstances where units in facilities that meet the definition of places of lodging will be covered under both the ADA and the FHAct and will have to comply with the requirements of both laws.

The Department also received comments about the factors used in the NPRM's definition of ''place of lodging.'' One commenter proposed modifications to the definition as follows: changing the words ''guest rooms'' to ''accommodations for sleeping''; and adding a fifth factor that states that ''the in-room decor, furnishings and equipment being specified by the owner or operator of the lodging operation rather than generally being determined by the owner of the individual unit or room.'' The Department does not believe that ''guest room'' should be changed to ''accommodations for sleeping.'' Such a change would create confusion because the transient lodging provisions in the 2004 ADAAG use the term ''guest rooms'' and not ''accommodations for sleeping.'' In addition, the Department believes that it would be confusing to add a factor relating to who dictates the in-room decor and furnishings in a unit or room, because there may be circumstances where particular rental programs require individual owners to use certain decor and furnishings as a condition of participating in that program.

One commenter stated that the factors the Department has included for determining whether a rental unit is a place of lodging for the purposes of title III, and therefore a ''place of public accommodation'' under the ADA, address only the way an establishment appears to the public. This commenter recommended that the Department also consider the economic relationships among the unit owners, rental managers, and homeowners' associations, noting that where revenues are not pooled (as they are in a hotel), the economic relationships do not make it possible to spread the cost of providing accessibility features over the entire business enterprise. Another commenter argued that private ownership of sleeping accommodations sets certain facilities apart from traditional hotels, motels, and inns, and that the Department should revise the definition of places of lodging to exempt existing places of lodging that have sleeping accommodations separately owned by individual owners (*e.g.*, condominiums) from the accessible transient lodging guest room requirements in sections 224 and 806 of the 2004 ADAAG, although the commenter agreed that newly constructed places of lodging should meet those standards.

One commenter argued that the Department's proposed definition of place of lodging does not reflect fully the nature of a timeshare facility and one single definition does not fit timeshares, condo hotels, and other types of rental accommodations. This commenter proposed that the Department adopt a separate definition for timeshare resorts as a subcategory of place of lodging. The commenter proposed defining timeshare resorts as facilities that provide the recurring right to occupancy for overnight accommodations for the owners of the accommodations, and other occupancy rights for owners exchanging their interests or members of the public for stays that primarily are short-term in nature (generally 30 consecutive days or less), where neither the owner nor any other occupant has the right or intent to use the unit or room on other than a temporary basis for vacation or leisure purposes. This proposed definition also would describe factors for determining when a timeshare resort is operating in a manner similar to a hotel, motel, or inn, including some or all of the following: rooms being available on a walk-in or call-in basis; housekeeping or linen services being available; on-site management; and reservations being accepted for a room type without guaranteeing any guest or owner use of a particular unit or room until check-in, without a prior lease or security deposit. Timeshares that do not meet this definition would not be subject to the transient lodging standards.

The Department has considered these comments and has revised the definition of ''place of accommodation'' in §36.104 to include a revised subcategory (B), which more clearly defines the factors that must be present for a facility that is not an inn, motel, or hotel to qualify as a place of lodging. These factors include conditions and amenities similar to an inn, motel, or hotel, including on- or off-site management and reservations service, rooms available on a walk-up or call-in basis, availability of housekeeping or linen service, and accepting reservations for a room type without guaranteeing a particular unit or room until check-in without a prior lease or security deposit.

Although the Department understands some of the concerns about the application of the ADA requirements to places of lodging that have ownership structures that involve individually owned units, the Department does not believe that the definitional section of the regulation is the place to address these concerns and has addressed them in §36.406(c)(2) and the accompanying discussion in Appendix A.

''Qualified Interpreter''

In the NPRM, the Department proposed adding language to the definition of ''qualified interpreter'' to clarify that the term includes, but is not limited to, sign language interpreters, oral interpreters, and cued-speech interpreters. As the Department explained, not all interpreters are qualified for all situations. For example, a qualified interpreter who uses American Sign Language (ASL) is not necessarily qualified to interpret orally. In addition, someone with only a rudimentary familiarity with sign language or finger spelling is not qualified, nor is someone who is fluent in sign language but unable to translate spoken communication into ASL or to translate signed communication into spoken words.

As further explained, different situations will require different types of interpreters. For example, an oral interpreter who has special skill and training to mouth a speaker's words silently for individuals who are deaf or hard of hearing may be necessary for an individual who was raised orally and taught to read lips or was diagnosed with hearing loss later in life and does not know sign language. An individual who is deaf or hard of hearing may need an oral interpreter if the speaker's voice is unclear, if there is a quick-paced exchange of communication (*e.g.*, in a meeting), or when the speaker does not directly face the individual who is deaf or hard of hearing. A cued-speech interpreter functions in the same manner as an oral interpreter except that he or she also uses a hand code or cue to represent each speech sound.

The Department received many comments regarding the proposed modifications to the definition of ''qualified interpreter.'' Many commenters requested that the Department include within the definition a requirement that interpreters be certified, particularly if they reside in a State that licenses or certifies interpreters. Other commenters opposed a certification requirement as unduly limiting, noting that an interpreter may well be qualified even if that same interpreter is not certified. These commenters noted the absence of nationwide standards or universally accepted criteria for certification.

On review of this issue, the Department has decided against imposing a certification requirement under the ADA. It is sufficient under the ADA that the interpreter be qualified. With respect to the proposed additions to the rule, most commenters supported the expansion of the list of qualified interpreters, and some advocated for the inclusion of other types of interpreters on the list as well, such as deaf-blind interpreters, certified deaf interpreters, and speech-to-speech interpreters. As these commenters explained, deaf-blind interpreters are interpreters who have specialized skills and training to interpret for individuals who are deaf and blind. Certified deaf interpreters are deaf or hard of hearing interpreters who work with hearing sign language interpreters to meet the specific communication needs of deaf individuals. Speech-to-speech interpreters have special skill and training to interpret for individuals who have speech disabilities.

The list of interpreters in the definition of ''qualified interpreter'' is illustrative, and the Department does not believe it is necessary or appropriate to attempt to provide an exhaustive list of qualified interpreters. Accordingly, the Department has decided not to expand the proposed list. However, if a deaf and blind individual needs interpreting services, an interpreter who is qualified to handle the interpreting needs of that individual may be required. The guiding criterion is that the public accommodation must provide appropriate auxiliary aids and services to ensure effective communication with the individual.

Commenters also suggested various definitions for the term ''cued-speech interpreters,'' and different descriptions of the tasks they performed. After reviewing the various comments, the Department has determined that it is more accurate and appropriate to refer to such individuals as ''cued-language transliterators.'' Likewise, the Department has changed the term ''oral interpreters'' to ''oral transliterators.'' These two changes have been made to distinguish between sign language interpreters, who translate one language into another language (*e.g.*, ASL to English and English to ASL), from transliterators, who interpret within the same language between deaf and hearing

individuals. A cued-language transliterator is an interpreter who has special skill and training in the use of the Cued Speech system of handshapes and placements, along with non-manual information, such as facial expression and body language, to show auditory information visually, including speech and environmental sounds. An oral transliterator is an interpreter who has special skill and training to mouth a speaker's words silently for individuals who are deaf or hard of hearing. While the Department included definitions for ''cued-speech interpreter'' and ''oral interpreter'' in the regulatory text proposed in the NPRM, the Department has decided that it is unnecessary to include such definitions in the text of the final rule.

Many commenters questioned the proposed deletion of the requirement that a qualified interpreter be able to interpret both receptively and expressively, noting the importance of both these skills. Commenters noted that this phrase was carefully crafted in the original regulation to make certain that interpreters both (1) are capable of understanding what a person with a disability is saying and (2) have the skills needed to convey information back to that individual. These are two very different skill sets and both are equally important to achieve effective communication. For example, in a medical setting, a sign language interpreter must have the necessary skills to understand the grammar and syntax used by an ASL user (receptive skills) and the ability to interpret complicated medical information—presented by medical staff in English—back to that individual in ASL (expressive skills). The Department agrees and has put the phrase ''both receptively and expressively'' back in the definition.

Several advocacy groups suggested that the Department make clear in the definition of qualified interpreter that the interpreter may appear either on-site or remotely using a video remote interpreting (VRI) service. Given that the Department has included in this rule both a definition of VRI services and standards that such services must satisfy, such an addition to the definition of qualified interpreter is appropriate.

After consideration of all relevant information submitted during the public comment period, the Department has modified the definition from that initially proposed in the NPRM. The final definition now states that ''[q]ualified interpreter means an interpreter who, via a video remote interpreting (VRI) service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.''

''Qualified Reader''

The 1991 title III regulation identified a qualified reader as an auxiliary aid, but did not define the term. Based upon the Department's investigation of complaints alleging that some entities have provided ineffective readers, the Department proposed in the NPRM to define ''qualified reader'' similarly to ''qualified interpreter'' to ensure that public accommodations select qualified individuals to read an examination or other written information in an effective, accurate, and impartial manner. This proposal was suggested in order to make clear to public accommodations that a failure to provide a qualified reader to a person with a disability may constitute a violation of the requirement to provide appropriate auxiliary aids and services.

The Department received comments supporting the inclusion in the regulation of a definition of a ''qualified reader.'' Some commenters suggested the Department add to the definition a requirement prohibiting the use of a reader whose accent, diction, or pronunciation makes full comprehension of material being read difficult. Another commenter requested that the Department include a requirement that the reader ''will follow the directions of the person for whom he or she is reading.'' Commenters also requested that the Department define ''accurately'' and ''effectively'' as used in this definition.

While the Department believes that the regulatory definition proposed in the NPRM adequately addresses these concerns, the Department emphasizes that a reader, in order to be ''qualified,'' must be skilled in reading the language and subject matter and must be able to be easily understood by the individual with the disability. For example, if a reader is reading aloud the questions for a bar examination, that reader, in order to be qualified, must know the proper pronunciation of all legal terminology used and must be sufficiently articulate to be easily understood by the individual with a disability for whom he or she is reading. In addition, the terms ''effectively'' and ''accurately'' have been successfully used and understood in the Department's existing definition of ''qualified interpreter'' since 1991 without specific regulatory definitions. Instead, the Department has relied upon the common use and understanding of those terms from standard English dictionaries. Thus, the definition of ''qualified reader'' has not been changed from that contained in the NPRM. The final rule defines a ''qualified reader'' to mean ''a person who is able to read effectively, accurately, and impartially using any necessary specialized vocabulary.''

''Service Animal''

Section 36.104 of the 1991 title III regulation defines a ''service animal'' as ''any guide dog, signal dog, or other animal individually trained to do work or perform tasks for the benefit of an individual with a disability, including, but not limited to, guiding individuals with impaired vision, alerting individuals with impaired hearing to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair, or fetching dropped items.'' Section 36.302(c)(1) of the 1991 title III regulation requires that ''[g]enerally, a public accommodation shall modify policies, practices, or procedures to permit the use of a service animal by an individual with a disability.'' Section 36.302(c)(2) of the 1991 title III regulation states that ''a public accommodation [is not required] to supervise or care for a service animal.''

The Department has issued guidance and provided technical assistance and publications concerning service animals since the 1991 regulations became effective. In the NPRM, the Department proposed to modify the definition of service animal and asked for public input on several issues related to the service animal provisions of the 1991 title III regulation: whether the Department should clarify the phrase ''providing minimal protection'' in the definition or remove it; whether there are any circumstances where a service animal ''providing minimal protection'' would be appropriate or expected; whether certain species should be eliminated from the definition of ''service animal,'' and, if so, which types of animals should be excluded; whether ''common domestic animal'' should be part of the definition; and whether a size or weight limitation should be imposed for common domestic animals, even if the animal satisfies the ''common domestic animal'' part of the NPRM definition.

The Department received extensive comments on these issues, as well as requests to clarify the obligations of public accommodations to accommodate individuals with disabilities who use service animals, and has modified the final rule in response. In the interests of avoiding unnecessary repetition, the Department has elected to discuss the issues raised in the NPRM questions about service animals and the corresponding public comments in the following discussion of the definition of ''service animal.''

The Department's final rule defines ''service animal'' as ''any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. Examples of work or tasks include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing non-violent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.''

This definition has been designed to clarify a key provision of the ADA. Many covered entities indicated that they are confused regarding their obligations under the ADA with regard to individuals with disabilities who use service animals. Individuals with disabilities who use trained guide or service dogs are concerned that if untrained or unusual animals are termed ''service animals,'' their own right to use guide or service dogs may become unnecessarily restricted or questioned. Some individuals who are not individuals with disabilities have claimed, whether fraudulently or sincerely (albeit mistakenly), that their animals are service animals covered by the ADA, in order to gain access to hotels, restaurants, and other places of public accommodation. The increasing use of wild, exotic, or unusual species, many of which are untrained, as service animals has also added to the confusion.

Finally, individuals with disabilities who have the legal right under the Fair Housing Act (FHAct) to use certain animals in their homes as a reasonable accommodation to their disabilities have assumed that their animals also qualify under the ADA. This is not necessarily the case, as discussed below.

The Department recognizes the diverse needs and preferences of individuals with disabilities protected under the ADA, and does not wish to unnecessarily impede individual choice. Service animals play an integral role in the lives of many individuals with disabilities, and with the clarification provided by the final rule, individuals with disabilities will continue to be able to use their service animals as they go about their daily activities. The clarification will also help to ensure that the fraudulent or mistaken use of other animals not qualified as service animals under the ADA will be deterred. A more detailed analysis of the elements of the definition and the comments responsive to the

service animal provisions of the NPRM follows.

Providing minimal protection. The 1991 title III regulation included language stating that ''minimal protection'' was a task that could be performed by an individually trained service animal for the benefit of an individual with a disability. In the Department's ''ADA Business Brief on Service Animals'' (2002), the Department interpreted the ''minimal protection'' language within the context of a seizure (*i.e.*, alerting and protecting a person who is having a seizure). The Department received many comments in response to the question of whether the ''minimal protection'' language should be clarified. Many commenters urged the removal of the ''minimal protection'' language from the service animal definition for two reasons: (1) The phrase can be interpreted to allow any dog that is trained to be aggressive to qualify as a service animal simply by pairing the animal with a person with a disability; and (2) The phrase can be interpreted to allow any untrained pet dog to qualify as a service animal, since many consider the mere presence of a dog to be a crime deterrent, and thus sufficient to meet the minimal protection standard. These commenters argued, and the Department agrees, that these interpretations were not contemplated under the original title III regulation.

While many commenters stated that they believe that the ''minimal protection'' language should be eliminated, other commenters recommended that the language be clarified, but retained. Commenters favoring clarification of the term suggested that the Department explicitly exclude the function of attack or exclude those animals that are trained solely to be aggressive or protective. Other commenters identified non-violent behavioral tasks that could be construed as minimally protective, such as interrupting self-mutilation, providing safety checks and room searches, reminding the individual to take medications, and protecting the individual from injury resulting from seizures or unconsciousness.

Several commenters noted that the existing direct threat defense, which allows the exclusion of a service animal if the animal exhibits unwarranted or unprovoked violent behavior or poses a direct threat, prevents the use of ''attack dogs'' as service animals. One commenter noted that the use of a service animal trained to provide ''minimal protection'' may impede access to care in an emergency, for example, where the first responder is unable or reluctant to approach a person with a disability because the individual's service animal is in a protective posture suggestive of aggression.

Many organizations and individuals stated that in the general dog training community, ''protection'' is code for attack or aggression training and should be removed from the definition. Commenters stated that there appears to be a broadly held misconception that aggression-trained animals are appropriate service animals for persons with post traumatic stress disorder (PTSD). While many individuals with PTSD may benefit by using a service animal, the work or tasks performed appropriately by such an animal would not involve unprovoked aggression, but could include actively cuing the individual by nudging or pawing the individual to alert to the onset of an episode and removing the individual from the anxiety-provoking environment.

The Department recognizes that despite its best efforts to provide clarification, the ''minimal protection'' language appears to have been misinterpreted. While the Department maintains that protection from danger is one of the key functions that service animals perform for the benefit of persons with disabilities, the Department recognizes that an animal individually trained to provide aggressive protection, such as an attack dog, is not appropriately considered a service animal. Therefore, the Department has decided to modify the ''minimal protection'' language to read ''non-violent protection,'' thereby excluding so-called ''attack dogs'' or dogs with traditional ''protection training'' as service animals. The Department believes that this modification to the service animal definition will eliminate confusion, without restricting unnecessarily the type of work or tasks that service animals may perform. The Department's modification also clarifies that the crime-deterrent effect of a dog's presence, by itself, does not qualify as work or tasks for purposes of the service animal definition.

Alerting to intruders. The phrase ''alerting to intruders'' is related to the issues of minimal protection and the work or tasks an animal may perform to meet the definition of a service animal. In the original 1991 regulatory text, this phrase was intended to identify service animals that alert individuals who are deaf or hard of hearing to the presence of others. This language has been misinterpreted by some to apply to dogs that are trained specifically to provide aggressive protection, resulting in the assertion that such training qualifies a dog as a service animal under the ADA. The Department reiterates that public accommodations are not required to admit any animal whose use poses a direct threat. In addition, the Department has decided to remove the word ''intruders'' from the service animal definition and replace it with the phrase ''the presence of people or sounds.'' The Department believes this clarifies that so-called ''attack training'' or other aggressive response types of training that cause a dog to provide an aggressive response do not qualify a dog as a service animal under the ADA.

Conversely, if an individual uses a breed of dog that is perceived to be aggressive because of breed reputation, stereotype, or the history or experience the observer may have with other dogs, but the dog is under the control of the individual with a disability and does not exhibit aggressive behavior, the public accommodation cannot exclude the individual or the animal from the place of public accommodation. The animal can only be removed if it engages in the behaviors mentioned in §36.302(c) (as revised in the final rule) or if the presence of the animal constitutes a fundamental alteration to the nature of the goods, services, facilities, and activities of the place of public accommodation.

''Doing work'' or ''performing tasks.'' The NPRM proposed that the Department maintain the requirement first articulated in the 1991 title III regulation that in order to qualify as a service animal, the animal must ''perform tasks'' or ''do work'' for the individual with a disability. The phrases ''perform tasks'' and ''do work'' describe what an animal must do for the benefit of an individual with a disability in order to qualify as a service animal.

The Department received a number of comments in response to the NPRM proposal urging the removal of the term ''do work'' from the definition of a service animal. These commenters argued that the Department should emphasize the performance of tasks instead. The Department disagrees. Although the common definition of work includes the performance of tasks, the definition of work is somewhat broader, encompassing activities that do not appear to involve physical action.

One service dog user stated that, in some cases, ''critical forms of assistance can't be construed as physical tasks,'' noting that the manifestations of ''brain-based disabilities,'' such as psychiatric disorders and autism, are as varied as their physical counterparts. The Department agrees with this statement but cautions that unless the animal is individually trained to do something that qualifies as work or a task, the animal is a pet or support animal and does not qualify for coverage as a service animal. A pet or support animal may be able to discern that the individual is in distress, but it is what the animal is trained to do in response to this awareness that distinguishes a service animal from an observant pet or support animal.

The NPRM contained an example of ''doing work'' that stated ''a psychiatric service dog can help some individuals with dissociative identity disorder to remain grounded in time or place.'' 73 FR 34508, 34521 (June 17, 2008). Several commenters objected to the use of this example, arguing that grounding was not a ''task'' and therefore the example inherently contradicted the basic premise that a service animal must perform a task in order to mitigate a disability. Other commenters stated that ''grounding'' should not be included as an example of ''work'' because it could lead to some individuals claiming that they should be able to use emotional support animals in public because the dog makes them feel calm or safe. By contrast, one commenter with experience in training service animals explained that grounding is a trained task based upon very specific behavioral indicators that can be observed and measured. These tasks are based upon input from mental health practitioners, dog trainers, and individuals with a history of working with psychiatric service dogs.

It is the Department's view that an animal that is trained to ''ground'' a person with a psychiatric disorder does work or performs a task that would qualify it as a service animal as compared to an untrained emotional support animal whose presence affects a person's disability. It is the fact that the animal is trained to respond to the individual's needs that distinguishes an animal as a service animal. The process must have two steps: Recognition and response. For example, if a service animal senses that a person is about to have a psychiatric episode and it is trained to respond, for example, by nudging, barking, or removing the individual to a safe location until the episode subsides, then the animal has indeed performed a task or done work on behalf of the individual with the disability, as opposed to merely sensing an event.

One commenter suggested defining the term ''task,'' presumably to improve the understanding of the types of services performed by an animal that would be sufficient to qualify the animal for coverage. The Department believes that the common definition of the word ''task'' is sufficiently clear and that it is not necessary to add to the definitions section. However, the Department has added examples of other kinds of work or tasks to help illustrate and provide clarity to the definition. After careful evaluation of this issue, the Department has concluded that the phrases ''do work'' and ''perform tasks'' have been effective during the past two decades to illustrate the varied services provided by service animals for the benefit of individuals with all types of disabilities. Thus, the Department declines to depart from its longstanding approach at this time.

Species limitations. When the Department originally issued its title III regulation in the early 1990s, the Department did not define the parameters of acceptable animal species. At that time, few anticipated the variety of animals that would be promoted as service animals in the years to come, which ranged from pigs and miniature horses to snakes, iguanas, and parrots. The Department has followed this particular issue

closely, keeping current with the many unusual species of animals represented to be service animals. Thus, the Department has decided to refine further this aspect of the service animal definition in the final rule.

The Department received many comments from individuals and organizations recommending species limitations. Several of these commenters asserted that limiting the number of allowable species would help stop erosion of the public's trust, which has resulted in reduced access for many individuals with disabilities who use trained service animals that adhere to high behavioral standards. Several commenters suggested that other species would be acceptable if those animals could meet nationally recognized behavioral standards for trained service dogs. Other commenters asserted that certain species of animals (*e.g.,* reptiles) cannot be trained to do work or perform tasks, so these animals would not be covered.

In the NPRM, the Department used the term ''common domestic animal'' in the service animal definition and excluded reptiles, rabbits, farm animals (including horses, miniature horses, ponies, pigs, and goats), ferrets, amphibians, and rodents from the service animal definition. 73 FR 34508, 34553 (June 17, 2008). However, the term ''common domestic animal'' is difficult to define with precision due to the increase in the number of domesticated species. Also, several State and local laws define a ''domestic'' animal as an animal that is not wild.

The Department is compelled to take into account the practical considerations of certain animals and to contemplate their suitability in a variety of public contexts, such as restaurants, grocery stores, hospitals, and performing arts venues, as well as suitability for urban environments. The Department agrees with commenters' views that limiting the number and types of species recognized as service animals will provide greater predictability for public accommodations as well as added assurance of access for individuals with disabilities who use dogs as service animals. As a consequence, the Department has decided to limit this rule's coverage of service animals to dogs, which are the most common service animals used by individuals with disabilities.

Wild animals, monkeys, and other nonhuman primates. Numerous business entities endorsed a narrow definition of acceptable service animal species, and asserted that there are certain animals (*e.g.,* reptiles) that cannot be trained to do work or perform tasks. Other commenters suggested that the Department should identify excluded animals, such as birds and llamas, in the final rule. Although one commenter noted that wild animals bred in captivity should be permitted to be service animals, the Department has decided to make clear that all wild animals, whether born or bred in captivity or in the wild, are eliminated from coverage as service animals. The Department believes that this approach reduces risks to health or safety attendant with wild animals. Some animals, such as certain nonhuman primates, including certain monkeys, pose a direct threat; their behavior can be unpredictably aggressive and violent without notice or provocation. The American Veterinary Medical Association (AVMA) issued a position statement advising against the use of monkeys as service animals, stating that ''[t]he AVMA does not support the use of nonhuman primates as assistance animals because of animal welfare concerns, and the potential for serious injury and zoonotic [animal to human disease transmission] risks.'' AVMA Position Statement, *Nonhuman Primates as Assistance Animals* (2005), available at *http://www.avma.org/issues/policy/nonhuman_primates.asp* (last visited June 24, 2010).

An organization that trains capuchin monkeys to provide in-home services to individuals with paraplegia and quadriplegia was in substantial agreement with the AVMA's views but requested a limited recognition in the service animal definition for the capuchin monkeys it trains to provide assistance for persons with disabilities. The organization commented that its trained capuchin monkeys undergo scrupulous veterinary examinations to ensure that the animals pose no health risks, and are used by individuals with disabilities exclusively in their homes. The organization acknowledged that the capuchin monkeys it trains are not necessarily suitable for use in a place of public accommodation but noted that the monkeys may need to be used in circumstances that implicate title III coverage, *e.g.,* in the event the handler had to leave home due to an emergency, to visit a veterinarian, or for the initial delivery of the monkey to the individual with a disability. The organization noted that several State and local government entities have local zoning, licensing, health, and safety laws that prohibit non-human primates, and that these prohibitions would prevent individuals with disabilities from using these animals even in their homes.

The organization argued that including capuchin monkeys under the service animal umbrella would make it easier for individuals with disabilities to obtain reasonable modifications of State and local licensing, health, and safety laws that would permit the use of these monkeys. The organization argued that this limited modification to the service animal definition was warranted in view of the services these monkeys perform, which enable many individuals with paraplegia and quadriplegia to live and function with increased independence.

The Department has carefully considered the potential risks associated with the use of

nonhuman primates as service animals in places of public accommodation, as well as the information provided to the Department about the significant benefits that trained capuchin monkeys provide to certain individuals with disabilities in residential settings. The Department has determined, however, that nonhuman primates, including capuchin monkeys, will not be recognized as service animals for purposes of this rule because of their potential for disease transmission and unpredictable aggressive behavior. The Department believes that these characteristics make nonhuman primates unsuitable for use as service animals in the context of the wide variety of public settings subject to this rule. As the organization advocating the inclusion of capuchin monkeys acknowledges, capuchin monkeys are not suitable for use in public facilities.

The Department emphasizes that it has decided only that capuchin monkeys will not be included in the definition of service animals for purposes of its regulation implementing the ADA. This decision does not have any effect on the extent to which public accommodations are required to allow the use of such monkeys under other Federal statutes, like the FHAct or the Air Carrier Access Act (ACAA). For example, a public accommodation that also is considered to be a ''dwelling'' may be covered under both the ADA and the FHAct. While the ADA does not require such a public accommodation to admit people with service monkeys, the FHAct may. Under the FHAct an individual with a disability may have the right to have an animal other than a dog in his or her home if the animal qualifies as a ''reasonable accommodation'' that is necessary to afford the individual equal opportunity to use and enjoy a dwelling, assuming that the use of the animal does not pose a direct threat. In some cases, the right of an individual to have an animal under the FHAct may conflict with State or local laws that prohibit all individuals, with or without disabilities, from owning a particular species. However, in this circumstance, an individual who wishes to request a reasonable modification of the State or local law must do so under the FHAct, not the ADA.

Having considered all of the comments about which species should qualify as service animals under the ADA, the Department has determined the most reasonable approach is to limit acceptable species to dogs.

Size or weight limitations. The vast majority of commenters did not support a size or weight limitation. Commenters were typically opposed to a size or weight limit because many tasks performed by service animals require large, strong dogs. For instance, service animals may perform tasks such as providing balance and support or pulling a wheelchair. Small animals may not be suitable for large adults. The weight of the service animal user is often correlated with the size and weight of the service animal. Others were concerned that adding a size and weight limit would further complicate the difficult process of finding an appropriate service animal. One commenter noted that there is no need for a limit because ''if, as a practical matter, the size or weight of an individual's service animal creates a direct threat or fundamental alteration to a particular public entity or accommodation, there are provisions that allow for the animal's exclusion or removal.'' Some common concerns among commenters in support of a size and weight limit were that a larger animal may be less able to fit in various areas with its handler, such as toilet rooms and public seating areas, and that larger animals are more difficult to control.

Balancing concerns expressed in favor of and against size and weight limitations, the Department has determined that such limitations would not be appropriate. Many individuals of larger stature require larger dogs. The Department believes it would be inappropriate to deprive these individuals of the option of using a service dog of the size required to provide the physical support and stability these individuals may need to function independently. Since large dogs have always served as service animals, continuing their use should not constitute fundamental alterations or impose undue burdens on public accommodations.

Breed limitations. A few commenters suggested that certain breeds of dogs should not be allowed to be used as service animals. Some suggested that the Department should defer to local laws restricting the breeds of dogs that individuals who reside in a community may own. Other commenters opposed breed restrictions, stating that the breed of a dog does not determine its propensity for aggression and that aggressive and non-aggressive dogs exist in all breeds.

The Department does not believe that it is either appropriate or consistent with the ADA to defer to local laws that prohibit certain breeds of dogs based on local concerns that these breeds may have a history of unprovoked aggression or attacks. Such deference would have the effect of limiting the rights of persons with disabilities under the ADA who use certain service animals based on where they live rather than on whether the use of a particular animal poses a direct threat to the health and safety of others. Breed restrictions differ significantly from jurisdiction to jurisdiction. Some jurisdictions have no breed restrictions. Others have restrictions that, while well-meaning, have the unintended effect of screening out the very breeds of dogs that have successfully served as service animals for decades without a history of the type of unprovoked aggression or attacks that would pose a direct

threat, *e.g.*, German Shepherds. Other jurisdictions prohibit animals over a certain weight, thereby restricting breeds without invoking an express breed ban. In addition, deference to breed restrictions contained in local laws would have the unacceptable consequence of restricting travel by an individual with a disability who uses a breed that is acceptable and poses no safety hazards in the individual's home jurisdiction but is nonetheless banned by other jurisdictions. Public accommodations have the ability to determine, on a case-by-case basis, whether a particular service animal can be excluded based on that particular animal's actual behavior or history—not based on fears or generalizations about how an animal or breed might behave. This ability to exclude an animal whose behavior or history evidences a direct threat is sufficient to protect health and safety.

Recognition of psychiatric service animals, but not ''emotional support animals.'' The definition of ''service animal'' in the NPRM stated the Department's longstanding position that emotional support animals are not included in the definition of ''service animal.'' The proposed text provided that ''[a]nimals whose sole function is to provide emotional support, comfort, therapy, companionship, therapeutic benefits, or to promote emotional well-being are not service animals.'' 73 FR 34508, 34553 (June 17, 2008).

Many advocacy organizations expressed concern and disagreed with the exclusion of comfort and emotional support animals. Others have been more specific, stating that individuals with disabilities may need their emotional support animals in order to have equal access. Some commenters noted that individuals with disabilities use animals that have not been trained to perform tasks directly related to their disability. These animals do not qualify as service animals under the ADA. These are emotional support or comfort animals.

Commenters asserted that excluding categories such as ''comfort'' and ''emotional support'' animals recognized by laws such as the FHAct or the ACAA is confusing and burdensome. Other commenters noted that emotional support and comfort animals perform an important function, asserting that animal companionship helps individuals who experience depression resulting from multiple sclerosis.

Some commenters explained the benefits emotional support animals provide, including emotional support, comfort, therapy, companionship, therapeutic benefits, and the promotion of emotional well-being. They contended that without the presence of an emotional support animal in their lives they would be disadvantaged and unable to participate in society. These commenters were concerned that excluding this category of animals will lead to discrimination against and excessive questioning of individuals with non-visible or non-apparent disabilities. Other commenters expressing opposition to the exclusion of individually trained ''comfort'' or ''emotional support'' animals asserted that the ability to soothe or de-escalate and control emotion is ''work'' that benefits the individual with the disability.

Many commenters requested that the Department carve out an exception that permits current or former members of the military to use emotional support animals. They asserted that a significant number of service members returning from active combat duty have adjustment difficulties due to combat, sexual assault, or other traumatic experiences while on active duty. Commenters noted that some current or former members of the military service have been prescribed animals for conditions such as PTSD. One commenter stated that service women who were sexually assaulted while in the military use emotional support animals to help them feel safe enough to step outside their homes. The Department recognizes that many current and former members of the military have disabilities as a result of service-related injuries that may require emotional support and that such individuals can benefit from the use of an emotional support animal and could use such animal in their home under the FHAct. However, having carefully weighed the issues, the Department believes that its final rule appropriately addresses the balance of issues and concerns of both the individual with a disability and the public accommodation. The Department also notes that nothing in this part prohibits a public entity from allowing current or former military members or anyone else with disabilities to utilize emotional support animals if it wants to do so.

Commenters asserted the view that if an animal's ''mere presence'' legitimately provides such benefits to an individual with a disability and if those benefits are necessary to provide equal opportunity given the facts of the particular disability, then such an animal should qualify as a ''service animal.'' Commenters noted that the focus should be on the nature of a person's disability, the difficulties the disability may impose and whether the requested accommodation would legitimately address those difficulties, not on evaluating the animal involved. The Department understands this approach has benefitted many individuals under the FHAct and analogous State law provisions, where the presence of animals poses fewer health and safety issues and where emotional support animals provide assistance that is unique to residential settings. The Department believes, however, that the presence of such animals is not required in the context of public accommodations, such as restaurants, hospitals, hotels, retail establishments, and assembly areas.

Under the Department's previous regulatory framework, some individuals and entities assumed that the requirement that service animals must be individually trained to do work or perform tasks excluded all individuals with mental disabilities from having service animals. Others assumed that any person with a psychiatric condition whose pet provided comfort to them was covered by the 1991 title III regulation. The Department reiterates that psychiatric service animals that are trained to do work or perform a task for individuals whose disability is covered by the ADA are protected by the Department's present regulatory approach. Psychiatric service animals can be trained to perform a variety of tasks that assist individuals with disabilities to detect the onset of psychiatric episodes and ameliorate their effects. Tasks performed by psychiatric service animals may include reminding individuals to take medicine, providing safety checks or room searches for individuals with PTSD, interrupting self-mutilation, and removing disoriented individuals from dangerous situations.

The difference between an emotional support animal and a psychiatric service animal is the work or tasks that the animal performs. Traditionally, service dogs worked as guides for individuals who were blind or had low vision. Since the original regulation was promulgated, service animals have been trained to assist individuals with many different types of disabilities.

In the final rule, the Department has retained its position on the exclusion of emotional support animals from the definition of ''service animal.'' The definition states that ''[t]he provision of emotional support, well-being, comfort, or companionship * * * do[es] not constitute work or tasks for the purposes of this definition.'' The Department notes, however, that the exclusion of emotional support animals from coverage in the final rule does not mean that individuals with psychiatric or mental disabilities cannot use service animals that meet the regulatory definition. The final rule defines service animal as follows: ''Service animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability.'' This language simply clarifies the Department's longstanding position.

The Department's position is based on the fact that the title II and title III regulations govern a wider range of public settings than the housing and transportation settings for which the Department of Housing and Urban Development (HUD) and the DOT regulations allow emotional support animals or comfort animals. The Department recognizes that there are situations not governed by the title II and title III regulations, particularly in the context of residential settings and transportation, where there may be a legal obligation to permit the use of animals that do not qualify as service animals under the ADA, but whose presence nonetheless provides necessary emotional support to persons with disabilities. Accordingly, other Federal agency regulations, case law, and possibly State or local laws governing those situations may provide appropriately for increased access for animals other than service animals as defined under the ADA. Public officials, housing providers, and others who make decisions relating to animals in residential and transportation settings should consult the Federal, State, and local laws that apply in those areas (*e.g.*, the FHAct regulations of HUD and the ACAA) and not rely on the ADA as a basis for reducing those obligations.

Retain term ''service animal.'' Some commenters asserted that the term ''assistance animal'' is a term of art and should replace the term ''service animal''; however, the majority of commenters preferred the term ''service animal'' because it is more specific. The Department has decided to retain the term ''service animal'' in the final rule. While some agencies, like HUD, use the terms ''assistance animal,'' ''assistive animal,'' or ''support animal,'' these terms are used to denote a broader category of animals than is covered by the ADA. The Department has decided that changing the term used in the final rule would create confusion, particularly in view of the broader parameters for coverage under the FHAct, *cf.* Preamble to HUD's Final Rule for Pet Ownership for the Elderly and Persons with Disabilities, 73 FR 63834–38 (Oct. 27, 2008); HUD Handbook No. 4350.3 Rev–1, Chapter 2, *Occupancy Requirements of Subsidized Multifamily Housing Programs* (June 2007), available at *http://www.hud.gov/offices/adm/hudclips/handbooks/hsgh/4350.3* (last visited June 24, 2010). Moreover, as discussed above, the Department's definition of ''service animal'' in the final rule does not affect the rights of individuals with disabilities who use assistance animals in their homes under the FHAct or who use ''emotional support animals'' that are covered under the ACAA and its implementing regulations. *See* 14 CFR 382.7 *et seq.; see also* Department of Transportation, *Guidance Concerning Service Animals in Air Transportation,* 68 FR 24874, 24877 (May 9, 2003) (discussing accommodation of service animals and emotional support animals on aircraft).

''Video Remote Interpreting (VRI) Services''

In the NPRM, the Department proposed adding ''Video Interpreting Services (VIS)'' to the list of auxiliary aids available to provide effective communication. In the preamble to the NPRM, VIS was defined as ''a technology composed of a video phone, video

monitors, cameras, a high-speed Internet connection, and an interpreter. The video phone provides video transmission to a video monitor that permits the individual who is deaf or hard of hearing to view and sign to a video interpreter (*i.e.,* a live interpreter in another location), who can see and sign to the individual through a camera located on or near the monitor, while others can communicate by speaking. The video monitor can display a split screen of two live images, with the interpreter in one image and the individual who is deaf or hard of hearing in the other image.'' 73 FR 34508, 34522 (June 17, 2008). Comments from advocacy organizations and individuals unanimously requested that the Department use the term ''video remote interpreting (VRI),'' instead of VIS, for consistency with Federal Communications Commission (FCC) regulations, FCC Public Notice, DA–0502417 (Sept. 7, 2005), and with common usage by consumers. The Department has made that change throughout the regulation to avoid confusion and to make the regulation more consistent with existing regulations.

Many commenters also requested that the Department distinguish between VRI and ''video relay service (VRS).'' Both VRI and VRS use a remote interpreter who is able to see and communicate with a deaf person and a hearing person, and all three individuals may be connected by a video link. VRI is a fee-based interpreting service conveyed via videoconferencing where at least one person, typically the interpreter, is at a separate location. VRI can be provided as an on-demand service or by appointment. VRI normally involves a contract in advance for the interpreter who is usually paid by the covered entity.

VRS is a telephone service that enables persons with disabilities to use the telephone to communicate using video connections and is a more advanced form of relay service than the traditional voice to text telephones (TTY) relay systems that were recognized in the 1991 title III regulation. More specifically, VRS is a video relay service using interpreters connected to callers by video hook-up and is designed to provide telephone services to persons who are deaf and use American Sign Language that are functionally equivalent to those services provided to users who are hearing. VRS is funded through the Interstate Telecommunications Relay Services Fund and overseen by the FCC. *See* 47 CFR 64.601(a)(26). There are no fees for callers to use the VRS interpreters and the video connection, although there may be relatively inexpensive initial costs to the title III entities to purchase the videophone or camera for on-line video connection, or other equipment to connect to the VRS service. The FCC has made clear that VRS functions as a telephone service and is not intended to be used for interpreting services where both parties are in the same room; the latter is reserved for VRI. The Department agrees that VRS cannot be used as a substitute for in-person interpreters or for VRI in situations that would not, absent one party's disability, entail use of the telephone.

Many commenters strongly recommended limiting the use of VRI to circumstances where it will provide effective communication. Commenters from advocacy groups and persons with disabilities expressed concern that VRI may not always be appropriate to provide effective communication, especially in hospitals and emergency rooms. Examples were provided of patients who are unable to see the video monitor because they are semiconscious or unable to focus on the video screen; other examples were given of cases where the video monitor is out of the sightline of the patient or the image is out of focus; still other examples were given of patients who could not see the image because the signal was interrupted, causing unnatural pauses in the communication, or the image was grainy or otherwise unclear. Many commenters requested more explicit guidelines on the use of VRI and some recommended requirements for equipment maintenance, high-speed, wide-bandwidth video links using dedicated lines or wireless systems, and training of staff using VRI, especially in hospital and health care situations. Several major organizations requested a requirement to include the interpreter's face, head, arms, hands, and eyes in all transmissions.

After consideration of the comments and the Department's own research and experience, the Department has determined that VRI can be an effective method of providing interpreting services in certain circumstances, but not in others. For example, VRI should be effective in many situations involving routine medical care, as well as in the emergency room where urgent care is important, but no in-person interpreter is available; however, VRI may not be effective in situations involving surgery or other medical procedures where the patient is limited in his or her ability to see the video screen. Similarly, VRI may not be effective in situations where there are multiple people in a room and the information exchanged is highly complex and fast paced. The Department recognizes that in these and other situations, such as where communication is needed for persons who are deaf-blind, it may be necessary to summon an in-person interpreter to assist certain individuals. To ensure that VRI is effective in situations where it is appropriate, the Department has established performance standards in §36.303(f).

SUBPART B—GENERAL REQUIREMENTS

Section 36.208(b) Direct Threat

The Department has revised the language of §36.208(b) (formerly §36.208(c) in the 1991 title III regulation) to include consideration of whether the provision of auxiliary aids or services will mitigate the risk that an individual will pose a direct threat to the health or safety of others. Originally, the reference to auxiliary aids or services as a mitigating factor was part of §36.208. However, that reference was removed from the section when, for editorial purposes, the Department removed the definition of ''direct threat'' from §36.208 and placed it in §36.104. The Department has put the reference to auxiliary aids or services as a mitigating factor back into §36.208(b) in order to maintain consistency with the current regulation.

Section 36.211 Maintenance of Accessible Features

Section 36.211 of the 1991 title III regulation provides that a public accommodation must maintain in operable working condition those features of facilities and equipment that are required to be readily accessible to and usable by individuals with disabilities. 28 CFR 36.211. In the NPRM, the Department clarified the application of this provision and proposed one change to the section to address the discrete situation in which the scoping requirements provided in the 2010 Standards reduce the number of required elements below the requirements of the 1991 Standards. In that discrete event, a public accommodation may reduce such accessible features in accordance with the requirements in the 2010 Standards.

The Department received only four comments on this proposed amendment. None of the commenters opposed the change. In the final rule, the Department has revised the section to make it clear that if the 2010 Standards reduce either the technical requirements or the number of required accessible elements below that required by the 1991 Standards, then the public accommodation may reduce the technical requirements or the number of accessible elements in a covered facility in accordance with the requirements of the 2010 Standards. One commenter, an association of convenience stores, urged the Department to expand the language of the section to include restocking of shelves as a permissible activity for isolated or temporary interruptions in service or access. It is the Department's position that a temporary interruption that blocks an accessible route, such as restocking of shelves, is already permitted by existing §36.211(b), which clarifies that ''isolated or temporary interruptions in service or access due to maintenance or repairs'' are permitted. Therefore, the Department will not make any additional changes in the language of §36.211 other than those discussed in the preceding paragraph.

SUBPART C—SPECIFIC REQUIREMENTS

Section 36.302 Modifications in Policies, Practices, or Procedures

Section 36.302(c) Service Animals

Section 36.302(c)(1) of the 1991 title III regulation states that ''[g]enerally, a public accommodation shall modify [its] policies, practices, or procedures to permit the use of service animals by an individual with a disability.'' Section 36.302(c)(2) of the 1991 title III regulation states that ''[n]othing in this part requires a public accommodation to supervise or care for a service animal.'' The Department has decided to retain the scope of the 1991 title III regulation while clarifying the Department's longstanding policies and interpretations. Toward that end, the final rule has been revised to include the Department's policy interpretations as outlined in published technical assistance, *Commonly Asked Questions about Service Animals in Places of Business* (1996), available at *http://www.ada.gov/qasrvc.htm*, and *ADA Guide for Small Businesses* (1999), available at *http://www.ada.gov/smbustxt.htm*, and to add that a public accommodation may exclude a service animal in certain circumstances where the service animal fails to meet certain behavioral standards. The Department received extensive comments in response to proposed §36.302(c) from individuals, disability advocacy groups, organizations involved in training service animals, and public accommodations. Those comments and the Department's response are discussed below.

Exclusion of service animals. The 1991 regulatory provision in §36.302(c) addresses reasonable modification and remains unchanged in the final rule. However, based on comments received and the Department's analysis, the Department has decided to clarify those circumstances where otherwise eligible service animals may be excluded by public accommodations.

In the NPRM, in §36.302(c)(2)(i), the Department proposed that a public accommodation may ask an individual with a disability to remove a service animal from the place of public accommodation if ''[t]he animal is out of control and the animal's handler does not take effective action to control it.'' 73 FR 34508, 34553 (June 17, 2008). The Department has long held that a service animal must be under the control of the handler at all times. Commenters overwhelmingly were in favor of this language, but noted that there are occasions when service animals are provoked to disruptive or aggressive behavior by agitators or troublemakers, as in the case of a blind individual whose service dog

is taunted or pinched. While all service animals are trained to ignore and overcome these types of incidents, misbehavior in response to provocation is not always unreasonable. In circumstances where a service animal misbehaves or responds reasonably to a provocation or injury, the public accommodation must give the handler a reasonable opportunity to gain control of the animal. Further, if the individual with a disability asserts that the animal was provoked or injured, or if the public accommodation otherwise has reason to suspect that provocation or injury has occurred, the public accommodation should seek to determine the facts and, if provocation or injury occurred, the public accommodation should take effective steps to prevent further provocation or injury, which may include asking the provocateur to leave the place of public accommodation. This language is unchanged in the final rule.

The NPRM also proposed language at §36.302(c)(2)(ii) to permit a public accommodation to exclude a service animal if the animal is not housebroken (*i.e.,* trained so that, absent illness or accident, the animal controls its waste elimination) or the animal's presence or behavior fundamentally alters the nature of the service the public accommodation provides (*e.g.,* repeated barking during a live performance). Several commenters were supportive of this NPRM language, but cautioned against overreaction by the public accommodation in these instances. One commenter noted that animals get sick, too, and that accidents occasionally happen. In these circumstances, simple clean up typically addresses the incident. Commenters noted that the public accommodation must be careful when it excludes a service animal on the basis of ''fundamental alteration,'' asserting for example, that a public accommodation should not exclude a service animal for barking in an environment where other types of noise, such as loud cheering or a child crying, is tolerated. The Department maintains that the appropriateness of an exclusion can be assessed by reviewing how a public accommodation addresses comparable situations that do not involve a service animal. The Department has retained in §36.302(c)(2) of the final rule the exception requiring animals to be housebroken. The Department has not retained the specific NPRM language stating that animals can be excluded if their presence or behavior fundamentally alters the nature of the service provided by the public accommodation, because the Department believes that this exception is covered by the general reasonable modification requirement contained in §36.302(c)(1).

The NPRM also proposed in §36.302(c)(2)(iii) that a service animal can be excluded where ''[t]he animal poses a direct threat to the health or safety of others that cannot be eliminated by reasonable modifications.'' 73 FR 34508, 34553 (June 17, 2008). Commenters were universally supportive of this provision as it makes express the discretion of a public accommodation to exclude a service animal that poses a direct threat. Several commenters cautioned against the overuse of this provision and suggested that the Department provide an example of the rule's application. The Department has decided not to include regulatory language specifically stating that a service animal can be excluded if it poses a direct threat. The Department believes that the direct threat provision in §36.208 already provides this exception to public accommodations.

Access to a public accommodation following the proper exclusion of a service animal. The NPRM proposed that in the event a public accommodation properly excludes a service animal, the public accommodation must give the individual with a disability the opportunity to obtain the goods and services of the public accommodation without having the service animal on the premises. Most commenters welcomed this provision as a common sense approach. These commenters noted that they do not wish to preclude individuals with disabilities from the full and equal enjoyment of the goods and services simply because of an isolated problem with a service animal. The Department has elected to retain this provision in §36.302(c)(2).

Other requirements. The NPRM also proposed that the regulation include the following requirements: that the work or tasks performed by the service animal must be directly related to the handler's disability; that a service animal must be individually trained to do work or perform a task, be housebroken, and be under the control of the handler; and that a service animal must have a harness, leash, or other tether. Most commenters addressed at least one of these issues in their responses. Most agreed that these provisions are important to clarify further the 1991 service animal regulation. The Department has moved the requirement that the work or tasks performed by the service animal must be related directly to the individual's disability to the definition of 'service animal' in §36.104. In addition, the Department has modified the proposed language relating to the handler's control of the animal with a harness, leash, or other tether to state that ''[a] service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.,* voice control, signals, or other effective means).'' The Department has retained the requirement that the service animal must be

individually trained, as well as the requirement that the service animal be housebroken.

Responsibility for supervision and care of a service animal. The 1991 title III regulation, in §36.302(c)(2), states that ''[n]othing in this part requires a public accommodation to supervise or care for a service animal.'' The NPRM modified this language to state that ''[a] public accommodation is not responsible for caring for or supervising a service animal.'' 73 FR 34508, 34553 (June 17, 2008). Most commenters did not address this particular provision. The Department notes that there are occasions when a person with a disability is confined to bed in a hospital for a period of time. In such an instance, the individual may not be able to walk or feed the service animal. In such cases, if the individual has a family member, friend, or other person willing to take on these responsibilities in the place of the individual with a disability, the individual's obligation to be responsible for the care and supervision of the service animal would be satisfied. The language of this section is retained, with minor modifications, in §36.302(c)(5) of the final rule.

Inquiries about service animals. The NPRM proposed language at §36.302(c)(6) setting forth parameters about how a public accommodation may determine whether an animal qualifies as a service animal. The proposed section stated that a public accommodation may ask if the animal is required because of a disability and what task or work the animal has been trained to do but may not require proof of service animal certification or licensing. Such inquiries are limited to eliciting the information necessary to make a decision without requiring disclosure of confidential disability-related information that a public accommodation does not need.

This language is consistent with the policy guidance outlined in two Department publications, *Commonly Asked Questions about Service Animals in Places of Business* (1996), available at *http://www.ada.gov/qasrvc.htm*, and *ADA Guide for Small Businesses* (1999), available at *http://www.ada.gov/smbustxt.htm.*

Although some commenters contended that the NPRM service animal provisions leave unaddressed the issue of how a public accommodation can distinguish between a psychiatric service animal, which is covered under the final rule, and a comfort animal, which is not, other commenters noted that the Department's published guidance has helped public accommodations to distinguish between service animals and pets on the basis of an individual's response to these questions. Accordingly, the Department has retained the NPRM language incorporating its guidance concerning the permissible questions into the final rule.

Some commenters suggested that a title III entity be allowed to require current documentation, no more than one year old, on letterhead from a mental health professional stating the following: (1) That the individual seeking to use the animal has a mental health-related disability; (2) that having the animal accompany the individual is necessary to the individual's mental health or treatment or to assist the person otherwise; and (3) that the person providing the assessment of the individual is a licensed mental health professional and the individual seeking to use the animal is under that individual's professional care. These commenters asserted that this will prevent abuse and ensure that individuals with legitimate needs for psychiatric service animals may use them. The Department believes that this proposal would treat persons with psychiatric, intellectual, and other mental disabilities less favorably than persons with physical or sensory disabilities. The proposal would also require persons with disabilities to obtain medical documentation and carry it with them any time they seek to engage in ordinary activities of daily life in their communities—something individuals without disabilities have not been required to do. Accordingly, the Department has concluded that a documentation requirement of this kind would be unnecessary, burdensome, and contrary to the spirit, intent, and mandates of the ADA.

Service animal access to areas of a public accommodation. The NPRM proposed at §36.302(c)(7) that an individual with a disability who uses a service animal has the same right of access to areas of a public accommodation as members of the public, program participants, and invitees. Commenters indicated that allowing individuals with disabilities to go with their service animals into the same areas as members of the public, program participants, clients, customers, patrons, or invitees is accepted practice by most places of public accommodation. The Department has included a slightly modified version of this provision in §36.302(c)(7) of the final rule.

The Department notes that under the final rule, a healthcare facility must also permit a person with a disability to be accompanied by a service animal in all areas of the facility in which that person would otherwise be allowed. There are some exceptions, however. The Department follows the guidance of the Centers for Disease Control and Prevention (CDC) on the use of service animals in a hospital setting. Zoonotic diseases can be transmitted to humans through bites, scratches, direct contact, arthropod vectors, or aerosols.

Consistent with CDC guidance, it is generally appropriate to exclude a service animal from limited-access areas that employ general infection-control measures, such as operating rooms and burn units. *See* Centers for Disease Control and Prevention, *Guidelines for Environmental Infection Control in*

Health-Care Facilities: Recommendations of CDC and the Healthcare Infection Control Practices Advisory Committee (June 2003), available at *http://www.cdc.gov/hicpac/pdf/guidelines/eic_in_HCF_03.pdf* (last visited June 24, 2010). A service animal may accompany its handler to such areas as admissions and discharge offices, the emergency room, inpatient and outpatient rooms, examining and diagnostic rooms, clinics, rehabilitation therapy areas, the cafeteria and vending areas, the pharmacy, restrooms, and all other areas of the facility where healthcare personnel, patients, and visitors are permitted without taking added precautions.

Prohibition against surcharges for use of a service animal. In the NPRM, the Department proposed to incorporate the previously mentioned policy guidance, which prohibits the assessment of a surcharge for the use of a service animal, into proposed §36.302(c)(8). Several commenters agreed that this provision makes clear the obligation of a place of public accommodation to admit an individual with a service animal without surcharges, and that any additional costs imposed should be factored into the overall cost of doing business and passed on as a charge to all participants, rather than an individualized surcharge to the service animal user. Commenters also noted that service animal users cannot be required to comply with other requirements that are not generally applicable to other persons. If a public accommodation normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animals. The Department has retained this language, with minor modifications, in the final rule at §36.302(c)(8).

Training requirement. Certain commenters recommended the adoption of formal training requirements for service animals. The Department has rejected this approach and will not impose any type of formal training requirements or certification process, but will continue to require that service animals be individually trained to do work or perform tasks for the benefit of an individual with a disability. While some groups have urged the Department to modify this position, the Department has determined that such a modification would not serve the full array of individuals with disabilities who use service animals, since individuals with disabilities may be capable of training, and some have trained, their service animal to perform tasks or do work to accommodate their disability. A training and certification requirement would increase the expense of acquiring a service animal and might limit access to service animals for individuals with limited financial resources.

Some commenters proposed specific behavior or training standards for service animals, arguing that without such standards, the public has no way to differentiate between untrained pets and service animals. Many of the suggested behavior or training standards were lengthy and detailed. The Department believes that this rule addresses service animal behavior sufficiently by including provisions that address the obligations of the service animal user and the circumstances under which a service animal may be excluded, such as the requirements that an animal be housebroken and under the control of its handler.

Miniature horses. The Department has been persuaded by commenters and the available research to include a provision that would require public accommodations to make reasonable modifications to policies, practices, or procedures to permit the use of a miniature horse by a person with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability. The traditional service animal is a dog, which has a long history of guiding individuals who are blind or have low vision, and over time dogs have been trained to perform an even wider variety of services for individuals with all types of disabilities. However, an organization that developed a program to train miniature horses, modeled on the program used for guide dogs, began training miniature horses in 1991.

Although commenters generally supported the species limitations proposed in the NPRM, some were opposed to the exclusion of miniature horses from the definition of a service animal. These commenters noted that these animals have been providing assistance to persons with disabilities for many years. Miniature horses were suggested by some commenters as viable alternatives to dogs for individuals with allergies, or for those whose religious beliefs preclude the use of dogs. Another consideration mentioned in favor of the use of miniature horses is the longer life span and strength of miniature horses in comparison to dogs. Specifically, miniature horses can provide service for more than 25 years while dogs can provide service for approximately seven years, and, because of their strength, miniature horses can provide services that dogs cannot provide. Accordingly, use of miniature horses reduces the cost involved to retire, replace, and train replacement service animals.

The miniature horse is not one specific breed, but may be one of several breeds, with distinct characteristics that produce animals suited to service animal work. These animals generally range in height from 24 inches to 34 inches measured to the withers, or shoulders, and generally weigh between 70 and 100 pounds. These characteristics are similar to those of large breed dogs, such as Labrador Retrievers, Great Danes, and Mastiffs. Similar to dogs, miniature horses can

be trained through behavioral reinforcement to be ''housebroken.'' Most miniature service horse handlers and organizations recommend that when the animals are not doing work or performing tasks, the miniature horses should be kept outside in a designated area instead of indoors in a house.

According to information provided by an organization that trains service horses, these miniature horses are trained to provide a wide array of services to their handlers, primarily guiding individuals who are blind or have low vision, pulling wheelchairs, providing stability and balance for individuals with disabilities that impair the ability to walk, and supplying leverage that enables a person with a mobility disability to get up after a fall. According to the commenter, miniature horses are particularly effective for large stature individuals. The animal can be trained to stand (and in some cases, lie down) at the handler's feet in venues where space is at a premium, such as assembly areas or inside some vehicles that provide public transportation. Some individuals with disabilities have traveled by train and have flown commercially with their miniature horses.

The miniature horse is not included in the definition of service animal, which is limited to dogs. However, the Department has added a specific provision at §36.302(c)(9) of the final rule covering miniature horses. Under this provision, public accommodations must make reasonable modifications in policies, practices, or procedures to permit the use of a miniature horse by an individual with a disability if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability. The public accommodation may take into account a series of assessment factors in determining whether to allow a miniature horse into a specific facility. These include the type, size, and weight of the miniature horse, whether the handler has sufficient control of the miniature horse, whether the miniature horse is housebroken, and whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation. In addition, paragraphs (c)(3)B–(8) of this section, which are applicable to dogs, also apply to miniature horses.

Ponies and full-size horses are not covered by §36.302(c)(9). Also, because miniature horses can vary in size and can be larger and less flexible than dogs, covered entities may exclude this type of service animal if the presence of the miniature horse, because of its larger size and lower level of flexibility, results in a fundamental alteration to the nature of the services provided.

Section 36.302(e) Hotel Reservations

Section 36.302 of the 1991 title III regulation requires public accommodations to make reasonable modifications in policies, practices, or procedures when such modifications are necessary to afford access to any goods, services, facilities, privileges, advantages, or accommodations, unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, or accommodations. Hotels, timeshare resorts, and other places of lodging are subject to this requirement and must make reasonable modifications to reservations policies, practices, or procedures when necessary to ensure that individuals with disabilities are able to reserve accessible hotel rooms with the same efficiency, immediacy, and convenience as those who do not need accessible guest rooms.

Each year the Department receives many complaints concerning failed reservations. Most of these complaints involve individuals who have reserved an accessible hotel room only to discover upon arrival that the room they reserved is either not available or not accessible. Although problems with reservations services were not addressed in the ANPRM, commenters independently noted an ongoing problem with hotel reservations and urged the Department to provide regulatory guidance. In response, the Department proposed specific language in the NPRM to address hotel reservations. In addition, the Department posed several questions regarding the current practices of hotels and other reservations services including questions about room guarantees and the holding and release of accessible rooms. The Department also questioned whether public accommodations that provide reservations services for a place or places of lodging but do not own, lease (or lease to), or operate a place of lodging—referred to in this discussion as ''third-party reservations services''—should also be subject to the NPRM's proposals concerning hotel reservations.

Although reservations issues were discussed primarily in the context of traditional hotels, the new rule modifies the definition of ''places of lodging'' to clarify the scope of the rule's coverage of rental accommodations in timeshare properties, condominium hotels, and mixed-use and corporate hotel facilities that operate as places of public accommodation (as that term is now defined in §36.104), and the Department received detailed comments, discussed below, regarding the application of reservations requirements to this category of rental accommodations.

General rule on reservations. Section 36.302(e)(1) of the NPRM required a public accommodation that owns, leases (or leases to), or operates a place of lodging to:

Modify its policies, practices, or procedures to ensure that individuals with disabilities can make reservations, including reservations made by telephone, in-person, or through a third party, for accessible guest rooms during the same hours and in the same manner as individuals who do not need accessible rooms.

73 FR 34508, 34553 (June 17, 2008).

Most individual commenters and organizations that represent individuals with disabilities strongly supported the requirement that individuals with disabilities should be able to make reservations for accessible guest rooms during the same hours and in the same manner as individuals who do not need accessible rooms. In many cases individuals with disabilities expressed frustration because, while they are aware of improvements in architectural access brought about as a result of the ADA, they are unable to take advantage of these improvements because of shortcomings in current hotel reservations systems. A number of these commenters pointed out that it can be difficult or impossible to obtain information about accessible rooms and hotel features and that even when information is provided it often is found to be incorrect upon arrival. They also noted difficulty reserving accessible rooms and the inability to guarantee or otherwise ensure that the appropriate accessible room is available when the guest arrives. The ability to obtain information about accessible guest rooms, to make reservations for accessible guest rooms in the same manner as other guests, and to be assured of an accessible room upon arrival was of critical importance to these commenters.

Other commenters, primarily hotels, resort developers, travel agencies, and organizations commenting on their behalf, did not oppose the general rule on reservations, but recommended that the language requiring that reservations be made ''in the same manner'' be changed to require that reservations be made ''in a substantially similar manner.'' These commenters argued that hotel reservations are made in many different ways and through a variety of systems. In general, they argued that current reservations database systems may not contain sufficient information to permit guests, travel agents, or other third-party reservations services to select the most appropriate room without consulting directly with the hotel, and that updating these systems might be expensive and time consuming. They also noted that in some cases, hotels do not always automatically book accessible rooms when requested to do so. Instead, guests may select from a menu of accessibility and other room options when making reservations. This information is transmitted to the hotel's reservations staff, who then contact the individual to verify the guest's accessibility needs. Only when such verification occurs will the accessible room be booked.

The Department is not persuaded that individuals who need to reserve accessible rooms cannot be served in the same manner as those who do not, and it appears that there are hotels of all types and sizes that already meet this requirement. Further, the Department has been able to accomplish this goal in settlement agreements resolving complaints about this issue. As stated in the preamble to the NPRM, basic nondiscrimination principles mandate that individuals with disabilities should be able to reserve hotel rooms with the same efficiency, immediacy, and convenience as those who do not need accessible guest rooms. The regulation does not require reservations services to create new methods for reserving hotel rooms or available timeshare units; instead, covered entities must make the modifications needed to ensure that individuals who need accessible rooms are able to reserve them in the same manner as other guests. If, for example, hotel reservations are not final until all hotel guests have been contacted by the hotel to discuss the guest's needs, a hotel may follow the same process when reserving accessible rooms. Therefore, the Department declines to change this language, which has been moved to §36.302(e)(1)(i). However, in response to the commenters who recommended a transition period that would allow reservations services time to modify existing reservations systems to meet the requirements of this rule, §36.302(e)(3) now provides a 18-month transition period before the requirements of §36.302(e)(1) will be enforced.

Hotels and organizations commenting on their behalf also requested that the language be changed to eliminate any liability for reservations made through third parties, arguing that they are unable to control the actions of unrelated parties. The rule, both as proposed and as adopted, requires covered public accommodations to ensure that reservations made on their behalf by third parties are made in a manner that results in parity between those who need accessible rooms and those who do not.

Hotels and other places of lodging that use third-party reservations services must make reasonable efforts to make accessible rooms available through at least some of these services and must provide these third-party services with information concerning the accessible features of the hotel and the accessible rooms. To the extent a hotel or other place of lodging makes available such rooms and information to a third-party reservation provider, but the third party fails to provide the information or rooms to people with disabilities in accordance with this section, the hotel or other place of lodging will not be responsible.

Identification of accessible features in hotels and guest rooms. NPRM §36.302(e)(2) required

public accommodations that provide hotel reservations services to identify and describe the accessible features in the hotels and guest rooms offered through that service. This requirement is essential to ensure that individuals with disabilities receive the information they need to benefit from the services offered by the place of lodging. As a practical matter, a public accommodation's designation of a guest room as ''accessible'' will not ensure necessarily that the room complies with all of the 1991 Standards. In older facilities subject to barrier removal requirements, strict compliance with the 1991 Standards is not required. Instead, public accommodations must remove barriers to the extent that it is readily achievable to do so.

Further, hotel rooms that are in full compliance with current standards may differ, and individuals with disabilities must be able to ascertain which features—in new and existing facilities—are included in the hotel's accessible guest rooms. For example, under certain circumstances, an accessible hotel bathroom may meet accessibility requirements with either a bathtub or a roll-in shower. The presence or absence of particular accessible features such as these may be the difference between a room that is usable by a particular person with a disability and one that is not.

Individuals with disabilities strongly supported this requirement. In addition to the importance of information about specific access features, several commenters pointed out the importance of knowing the size and number of beds in a room. Many individuals with disabilities travel with family members, personal care assistants, or other companions and require rooms with at least two beds. Although most hotels provide this information when generally categorizing the type or class of room (*e.g.*, deluxe suite with king bed), as described below, all hotels should consider the size and number of beds to be part of the basic information they are required to provide.

Comments made on behalf of reservations services expressed concern that unless the word ''hotels'' is stricken from the text, §36.302(e)(2) of the NPRM essentially would require reservations systems to include a full accessibility report on each hotel or resort property in its system. Along these lines, commenters also suggested that the Department identify the specific accessible features of hotel rooms that must be described in the reservations system. For example, commenters suggested limiting features that must be included to bathroom type (tub or roll-in shower) and communications features.

The Department recognizes that a reservations system is not intended to be an accessibility survey. However, specific information concerning accessibility features is essential to travelers with disabilities. Because of the wide variations in the level of accessibility that travelers will encounter, the Department cannot specify what information must be included in every instance. For hotels that were built in compliance with the 1991 Standards, it may be sufficient to specify that the hotel is accessible and, for each accessible room, to describe the general type of room (*e.g.*, deluxe executive suite), the size and number of beds (*e.g.*, two queen beds), the type of accessible bathing facility (*e.g.*, roll-in shower), and communications features available in the room (*e.g.*, alarms and visual notification devices). Based on that information, many individuals with disabilities will be comfortable making reservations.

For older hotels with limited accessibility features, information about the hotel should include, at a minimum, information about accessible entrances to the hotel, the path of travel to guest check-in and other essential services, and the accessible route to the accessible room or rooms. In addition to the room information described above, these hotels should provide information about important features that do not comply with the 1991 Standards. For example, if the door to the ''accessible'' room or bathroom is narrower than required, this information should be included (*e.g.*, door to guest room measures 30 inches clear). This width may not meet current standards but may be adequate for some wheelchair users who use narrower chairs. In many cases, older hotels provide services through alternatives to barrier removal, for example, by providing check-in or concierge services at a different, accessible location. Reservations services for these entities should include this information and provide a way for guests to contact the appropriate hotel employee for additional information. To recognize that the information and level of detail needed will vary based on the nature and age of the facility, §36.302(e)(2) has been moved to §36.302(e)(1)(ii) in the final rule and modified to require reservations services to:

Identify and describe accessible features in the hotels and guest rooms offered through its reservations service *in enough detail to reasonably permit individuals with disabilities to assess independently whether a given hotel or guest room meets his or her accessibility needs.* [Emphasis added]

As commenters representing hotels have described, once reservations are made, some hotels may wish to contact the guest to offer additional information and services. Or, many individuals with disabilities may wish to contact the hotel or reservations service for more detailed information. At that point, trained staff (including staff located on-site at the hotel and staff located off-site at a reservations center) should be available to provide additional information such as the specific layout of the room and bathroom,

shower design, grab-bar locations, and other amenities available (*e.g.,* bathtub bench).

In the NPRM, the Department sought guidance concerning whether this requirement should be applied to third-party reservations services. Comments made by or on behalf of hotels, resort managers, and other members of the lodging and resort industry pointed out that, in most cases, these third parties do not have direct access to this information and must obtain it from the hotel or other place of lodging. Because third-party reservations services must rely on the place of lodging to provide the requisite information and to ensure that it is accurate and timely, the Department has declined to extend this requirement directly to third-party reservations services.

Hold and release of accessible guest rooms. The Department has addressed the hold and release of accessible guest rooms in settlement agreements and recognizes that current practices vary widely. The Department is concerned about current practices by which accessible guest rooms are released to the general public even though the hotel is not sold out. In such instances, individuals with disabilities may be denied an equal opportunity to benefit from the services offered by the public accommodation, *i.e.,* a hotel guest room. In the NPRM, the Department requested information concerning the current practices of hotels and third-party reservations services with respect to (1) holding accessible rooms for individuals with disabilities and (2) releasing accessible rooms to individuals without disabilities.

Individuals with disabilities and organizations commenting on their behalf strongly supported requiring accessible rooms to be held back for rental by individuals with disabilities. In some cases commenters supported holding back all accessible rooms until all non-accessible rooms were rented. Others supported holding back accessible rooms in each category of rooms until all other rooms of that type were reserved. This latter position was also supported in comments received on behalf of the lodging industry; commenters also noted that this is the current practice of many hotels. In general, holding accessible rooms until requested by an individual who needs a room with accessible features or until it is the only available room of its type was viewed widely as a sensible approach to allocating scarce accessible rooms without imposing unnecessary costs on hotels.

The Department agrees with this latter approach and has added §36.302(e)(1)(iii), which requires covered entities to hold accessible rooms for use by individuals with disabilities until all other guest rooms of that type have been rented and the accessible room requested is the only remaining room of that type. For example, if there are 25 rooms of a given type and two of these rooms are accessible, the reservations service is required to rent all 23 non-accessible rooms before it is permitted to rent these two accessible rooms to individuals without disabilities. If a one-of-a-kind room is accessible, that room is available to the first party to request it. The Department believes that this is the fairest approach available since it reserves accessible rooms for individuals who require them until all non-accessible rooms of that type have been reserved, and then provides equal access to any remaining rooms. It is also fair to hotels because it does not require them to forego renting a room that actually has been requested in favor of the possibility that an individual with a disability may want to reserve it at a later date.

Requirement to block accessible guest room reservations. NPRM §36.302(e)(3) required a public accommodation that owns, leases (or leases to), or operates a place of lodging to guarantee accessible guest rooms that are reserved through a reservations service to the same extent that it guarantees rooms that are not accessible. In the NPRM, the Department sought comment on the current practices of hotels and third party reservations services with respect to ''guaranteed'' hotel reservations and on the impact of requiring a public accommodation to guarantee accessible rooms to the extent it guarantees other rooms.

Comments received by the Department by and on behalf of both individuals with disabilities and public accommodations that provide reservations services made clear that, in many cases, when speaking of room guarantees, parties who are not familiar with hotel terminology actually mean to refer to policies for blocking and holding specific hotel rooms. Several commenters explained that, in most cases, when an individual makes ''reservations,'' hotels do not reserve specific rooms; rather the individual is reserving a room with certain features at a given price. When the hotel guest arrives, he or she is provided with a room that has those features.

In most cases, this does not pose a problem because there are many available rooms of a given type. However, in comparison, accessible rooms are much more limited in availability and there may be only one room in a given hotel that meets a guest's needs. As described in the discussion on the identification of accessible features in hotels and guest rooms, the presence or absence of particular accessible features may be the difference between a room that is usable by a particular person with a disability and one that is not.

For that reason, the Department has added §36.302(e)(1)(iv) to the final rule. Section 36.302(e)(1)(iv) requires covered entities to reserve, upon request, accessible guest rooms or specific types of guest rooms and ensure that the guest rooms requested are blocked

and removed from all reservations systems (to eliminate double-booking, which is a common problem that arises when rooms are made available to be reserved through more than one reservations service). Of course, if a public accommodation typically requires a payment or deposit from its patrons in order to reserve a room, it may require the same payment or deposit from individuals with disabilities before it reserves an accessible room and removes it from all its reservations systems. These requirements should alleviate the widely-reported problem of arriving at a hotel only to discover that, although an accessible room was reserved, the room available is not accessible or does not have the specific accessible features needed. Many hotels already have a similar process in place for other guest rooms that are unique or one-of-a-kind, such as ''Presidential'' suites. The Department has declined to extend this requirement directly to third-party reservations services. Comments the Department received in response to the NPRM indicate that most of the actions required to implement these requirements primarily are within the control of the entities that own the place of lodging or that manage it on behalf of its owners.

Guarantees of reservations for accessible guest rooms. The Department recognizes that not all reservations are guaranteed, and the rule does not impose an affirmative duty to guarantee reservations. When a public accommodation does guarantee hotel or other room reservations, it must provide the same guarantee for accessible guest rooms as it makes for other rooms, except that it must apply that guarantee to the specific room reserved and blocked, even if in other situations, its guarantee policy only guarantees that a room of a specific type will be available at the guaranteed price. Without this reasonable modification to its guarantee policy, any guarantee for accessible rooms would be meaningless. If, for example, a hotel makes reservations for an accessible ''Executive Suite'' but, upon arrival, offers its guest an inaccessible Executive Suite that the guest is unable to enter, it would be meaningless to consider the hotel's guarantee fulfilled. As with the requirements for identifying, holding, and blocking accessible rooms, the Department has declined to extend this requirement directly to third-party reservations services because the fulfillment of guarantees largely is beyond their power to control.

Application to rental units in timeshare, vacation communities, and condo-hotels. Because the Department has revised the definition of ''Places of Lodging'' in the final rule, the reservations requirements now apply to guest rooms and other rental units in timeshares, vacation communities, and condo-hotels where some or all of the units are owned and controlled by individual owners and rented out some portion of time to the public, as compared to traditional hotels and motels that are owned, controlled, and rented to the public by one entity. If a reservations service owns and controls one or more of the guest rooms or other units in the rental property (*e.g.*, a developer who retains and rents out unsold inventory), it is subject to the requirements set forth in §36.302(e).

Several commenters expressed concern about any rule that would require accessible units that are owned individually to be removed from the rental pool and rented last. Commenters pointed out that this would be a disadvantage to the owners of accessible units because they would be rented last, if at all. Further, certain vacation property managers consider holding specific units back to be a violation of their ethical responsibility to present all properties they manage at an equal advantage. To address these concerns, the Department has added §36.302(e)(2), which exempts reservations for individual guest rooms and other units that are not owned or substantially controlled by the entity that owns, leases, or operates the overall facility from the requirement that accessible guest rooms be held back from rental until all other guest rooms of that type have been rented. Section 36.302(e)(2) also exempts such rooms from requirements for blocking and guaranteeing reserved rooms. In resort developments with mixed ownership structures, such as a resort where some units are operated as hotel rooms and others are owned and controlled individually, a reservations service operated by the owner of the hotel portion may apply the exemption only to the rooms that are not owned or substantially controlled by the entity that owns, manages, or otherwise controls the overall facility.

Other reservations-related comments made on behalf of these entities reflected concerns similar to the general concerns expressed with respect to traditional hotel properties. For example, commenters noted that because of the unique nature of the timeshare industry, additional flexibility is needed when making reservations for accessible units. One commenter explained that reservations are sometimes made through unusual entities such as exchange companies, which are not public accommodations and which operate to trade ownership interests of millions of individual owners. The commenter expressed concern that developers or resort owners would be held responsible for the actions of these exchange entities. If, as described, the choice to list a unit with an exchange company is made by the individual owner of the property and the exchange company does not operate on behalf of the reservations service, the reservations service is not liable for the exchange company's actions.

As with hotels, the Department believes that within the 18-month transition period

these reservations services should be able to modify their systems to ensure that potential guests with disabilities who need accessible rooms can make reservations during the same hours and in the same manner as those who do not need accessible rooms.

Section 36.302(f) Ticketing

The 1991 title III regulation did not contain specific regulatory language on ticketing. The ticketing policies and practices of public accommodations, however, are subject to title III's nondiscrimination provisions. Through the investigation of complaints, enforcement actions, and public comments related to ticketing, the Department became aware that some venue operators, ticket sellers, and distributors were violating title III's nondiscrimination mandate by not providing individuals with disabilities the same opportunities to purchase tickets for accessible seating as provided to spectators purchasing conventional seats. In the NPRM, the Department proposed §36.302(f) to provide explicit direction and guidance on discriminatory practices for entities involved in the sale or distribution of tickets.

The Department received comments from advocacy groups, assembly area trade associations, public accommodations, and individuals. Many commenters supported the addition of regulatory language pertaining to ticketing and urged the Department to retain it in the final rule. Several commenters, however, questioned why there were inconsistencies between the title II and title III provisions and suggested that the same language be used for both titles. The Department has decided to retain ticketing regulatory language and to ensure consistency between the ticketing provisions in title II and title III.

Because many in the ticketing industry view season tickets and other multi-event packages differently from individual tickets, the Department bifurcated some season ticket provisions from those concerning single-event tickets in the NPRM. This structure, however, resulted in some provisions being repeated for both types of tickets but not for others even though they were intended to apply to both types of tickets. The result was that it was not entirely clear that some of the provisions that were not repeated also were intended to apply to season tickets. The Department is addressing the issues raised by these commenters using a different approach. For the purposes of this section, a *single event* refers to an individual performance for which tickets may be purchased. In contrast, a *series of events* includes, but is not limited to, subscription events, event packages, season tickets, or any other tickets that may be purchased for multiple events of the same type over the course of a specified period of time whose ownership right reverts to the public accommodation at the end of each season or time period. Series-of-events tickets that give their holders an enhanced ability to purchase such tickets from the public accommodation in seasons or periods of time that follow, such as a right of first refusal or higher ranking on waiting lists for more desirable seats, are subject to the provisions in this section. In addition, the final rule merges together some NPRM paragraphs that dealt with related topics and has reordered and renamed some of the paragraphs that were in the NPRM.

Ticket sales. In the NPRM, the Department proposed, in §36.302(f)(1), a general rule that a public accommodation shall modify its policies, practices, or procedures to ensure that individuals with disabilities can purchase tickets for accessible seating for an event or series of events in the same way as others (*i.e.*, during the same hours and through the same distribution methods as other seating is sold). ''Accessible seating'' is defined in §36.302(f)(1)(i) of the final rule to mean ''wheelchair spaces and companion seats that comply with sections 221 and 802 of the 2010 Standards along with any other seats required to be offered for sale to the individual with a disability pursuant to paragraph (4) of this section.'' The defined term does not include designated aisle seats. A ''wheelchair space'' refers to a space for a single wheelchair and its occupant.

The NPRM proposed requiring that accessible seats be sold through the ''same methods of distribution'' as non-accessible seats. 73 FR 34508, 34554 (June 17, 2008). Comments from venue managers and others in the business community, in general, noted that multiple parties are involved in ticketing, and because accessible seats may not be allotted to all parties involved at each stage, such parties should be protected from liability. For example, one commenter noted that a third-party ticket vendor, like Ticketmaster, can only sell the tickets it receives from its client. Because §36.302(f)(1) of the final rule requires venue operators to make available accessible seating through the same methods of distribution they use for their regular tickets, venue operators that provide tickets to third-party ticket vendors are required to provide accessible seating to the third-party ticket vendor. This provision will enhance third-party ticket vendors' ability to acquire and sell accessible seating for sale in the future. The Department notes that once third-party ticket vendors acquire accessible tickets, they are obligated to sell them in accordance with these rules.

The Department also has received frequent complaints that individuals with disabilities have not been able to purchase accessible seating over the Internet, and instead have had to engage in a laborious process of calling a customer service line, or sending an

email to a customer service representative and waiting for a response. Not only is such a process burdensome, but it puts individuals with disabilities at a disadvantage in purchasing tickets for events that are popular and may sell out in minutes. Because §36.302(f)(5) of the final rule authorizes venues to release accessible seating in case of a sell-out, individuals with disabilities effectively could be cut off from buying tickets unless they also have the ability to purchase tickets in real time over the Internet. The Department's new regulatory language is designed to address this problem.

Several commenters representing assembly areas raised concerns about offering accessible seating for sale over the Internet. They contended that this approach would increase the incidence of fraud since anyone easily could purchase accessible seating over the Internet. They also asserted that it would be difficult technologically to provide accessible seating for sale in real time over the Internet, or that to do so would require simplifying the rules concerning the purchase of multiple additional accompanying seats. Moreover, these commenters argued that requiring an individual purchasing accessible seating to speak with a customer service representative would allow the venue to meet the patron's needs most appropriately and ensure that wheelchair spaces are reserved for individuals with disabilities who require wheelchair spaces. Finally, these commenters argued that individuals who can transfer effectively and conveniently from a wheelchair to a seat with a movable armrest seat could instead purchase designated aisle seats.

The Department considered these concerns carefully and has decided to continue with the general approach proposed in the NPRM. Although fraud is an important concern, the Department believes that it is best combated by other means that would not have the effect of limiting the ability of individuals with disabilities to purchase tickets, particularly since restricting the purchase of accessible seating over the Internet will, of itself, not curb fraud. In addition, the Department has identified permissible means for covered entities to reduce the incidence of fraudulent accessible seating ticket purchases in §36.302(f)(8) of the final rule.

Several commenters questioned whether ticket Web sites themselves must be accessible to individuals who are blind or have low vision, and if so, what that requires. The Department has consistently interpreted the ADA to cover Web sites that are operated by public accommodations and stated that such sites must provide their services in an accessible manner or provide an accessible alternative to the Web site that is available 24 hours a day, seven days a week. The final rule, therefore, does not impose any new obligation in this area. The accessibility of Web sites is discussed in more detail in the section entitled ''Other Issues.''

In §36.302(f)(2) of the NPRM, the Department also proposed requiring public accommodations to make accessible seating available during all stages of tickets sales including, but not limited to, presales, promotions, lotteries, waitlists, and general sales. For example, if tickets will be presold for an event that is open only to members of a fan club, or to holders of a particular credit card, then tickets for accessible seating must be made available for purchase through those means. This requirement does not mean that any individual with a disability would be able to purchase those seats. Rather, it means that an individual with a disability who meets the requirement for such a sale (*e.g.*, who is a member of the fan club or holds that credit card) will be able to participate in the special promotion and purchase accessible seating. The Department has maintained the substantive provisions of the NPRM's §§36.302(f)(1) and (f)(2) but has combined them in a single paragraph at §36.302(f)(1)(ii) of the final rule so that all of the provisions having to do with the manner in which tickets are sold are located in a single paragraph.

Identification of available accessible seating. In the NPRM, the Department proposed §36.302(f)(3), which, as modified and renumbered §36.302(f)(2)(iii) in the final rule, requires a facility to identify available accessible seating through seating maps, brochures, or other methods if that information is made available about other seats sold to the general public. This rule requires public accommodations to provide information about accessible seating to the same degree of specificity that it provides information about general seating. For example, if a seating map displays color-coded blocks pegged to prices for general seating, then accessible seating must be similarly color-coded. Likewise, if covered entities provide detailed maps that show exact seating and pricing for general seating, they must provide the same for accessible seating.

The NPRM did not specify a requirement to identify prices for accessible seating. The final rule requires that if such information is provided for general seating, it must be provided for accessible seating as well.

In the NPRM, the Department proposed in §36.302(f)(4) that a public accommodation, upon being asked, must inform persons with disabilities and their companions of the locations of all unsold or otherwise available seating. This provision is intended to prevent the practice of ''steering'' individuals with disabilities to certain accessible seating so that the facility can maximize potential ticket sales by releasing unsold accessible seating, especially in preferred or desirable locations, for sale to the general public. The Department received no significant comment

on this proposal. The Department has retained this provision in the final rule but has added it, with minor modifications, to §36.302(f)(2) as paragraph (i).

Ticket prices. In the NPRM, the Department proposed §36.302(f)(7) requiring that ticket prices for accessible seating be set no higher than the prices for other seats in that seating section for that event. The NPRM's provision also required that accessible seating be made available at every price range, and if an existing facility has barriers to accessible seating within a particular price range, a proportionate amount of seating (determined by the ratio of the total number of seats at that price level to the total number of seats in the assembly area) must be offered in an accessible location at that same price. Under this rule, for example, if it is not readily achievable for a 20,000-seat facility built in 1980 to place accessible seating in the $20-price category, which is on the upper deck, it must place a proportionate number of seats in an accessible location for $20. If the upper deck has 2,000 seats, then the facility must place 10 percent of its accessible seating in an accessible location for $20 provided that it is part of a seating section where ticket prices are equal to or more than $20—a facility may not place the $20-accessible seating in a $10-seating section. The Department received no significant comment on this rule, and it has been retained, as amended, in the final rule in §36.302(f)(3).

Purchase of multiple tickets. In the NPRM, the Department proposed §36.302(f)(9) to address one of the most common ticketing complaints raised with the Department: that individuals with disabilities are not able to purchase more than two tickets. The Department proposed this provision to facilitate the ability of individuals with disabilities to attend events with friends, companions, or associates who may or may not have a disability by enabling individuals with disabilities to purchase the maximum number of tickets allowed per transaction to other spectators; by requiring venues to place accompanying individuals in general seating as close as possible to accessible seating (in the event that a group must be divided because of the large size of the group); and by allowing an individual with a disability to purchase up to three additional contiguous seats per wheelchair space if they are available at the time of sale. Section 36.302(f)(9)(ii) of the NPRM required that a group containing one or more wheelchair users must be placed together, if possible, and that in the event that the group could not be placed together, the individuals with disabilities may not be isolated from the rest of the group.

The Department asked in the NPRM whether this rule was sufficient to effectuate the integration of individuals with disabilities. Many advocates and individuals praised it as a welcome and much-needed change, stating that the trade-off of being able to sit with their family or friends was worth reducing the number of seats available for individuals with disabilities. Some commenters went one step further and suggested that the number of additional accompanying seats should not be restricted to three.

Although most of the substance of the proposed provision on the purchase of multiple tickets has been maintained in the final rule, it has been renumbered as §36.302(f)(4), reorganized, and supplemented. To preserve the availability of accessible seating for other individuals with disabilities, the Department has not expanded the rule beyond three additional contiguous seats. Section 36.302(f)(4)(i) of the final rule requires public accommodations to make available for purchase three additional tickets for seats in the same row that are contiguous with the wheelchair space, provided that at the time of purchase there are three such seats available. The requirement that the additional seats be ''contiguous with the wheelchair space'' does not mean that each of the additional seats must be in actual contact or have a border in common with the wheelchair space; however, at least one of the additional seats should be immediately adjacent to the wheelchair space. The Department recognizes that it will often be necessary to use vacant wheelchair spaces to provide for contiguous seating.

The Department has added paragraphs (4)(ii) and (4)(iii) to clarify that in situations where there are insufficient unsold seats to provide three additional contiguous seats per wheelchair space or a ticket office restricts sales of tickets to a particular event to less than four tickets per customer, the obligation to make available three additional contiguous seats per wheelchair space would be affected. For example, if at the time of purchase, there are only two additional contiguous seats available for purchase because the third has been sold already, then the ticket purchaser would be entitled to two such seats. In this situation, the public entity would be required to make up the difference by offering one additional ticket for sale that is as close as possible to the accessible seats. Likewise, if ticket purchases for an event are limited to two per customer, a person who uses a wheelchair who seeks to purchase tickets would be entitled to purchase only one additional contiguous seat for the event.

The Department has also added paragraph (4)(iv) to clarify that the requirement for three additional contiguous seats is not intended to serve as a cap if the maximum number of tickets that may be purchased by members of the general public exceeds the four tickets an individual with a disability ordinarily would be allowed to purchase (*i.e.*, a wheelchair space and three additional contiguous seats). If the maximum number of

tickets that may be purchased by members of the general public exceeds four, an individual with a disability is to be allowed to purchase the maximum number of tickets; however, additional tickets purchased by an individual with a disability beyond the wheelchair space and the three additional contiguous seats provided in §36.302(f)(4)(i) do not have to be contiguous with the wheelchair space.

The NPRM proposed at §36.302(f)(9)(ii) that for group sales, if a group includes one or more individuals who use a wheelchair, then the group shall be placed in a seating area with accessible seating so that, if possible, the group can sit together. If it is necessary to divide the group, it should be divided so that the individuals in the group who use wheelchairs are not isolated from the rest of the members of their group. The final rule retains the NPRM language in paragraph (4)(v).

Hold and release of unsold accessible seating. The Department recognizes that not all accessible seating will be sold in all assembly areas for every event to individuals with disabilities who need such seating and that public accommodations may have opportunities to sell such seating to the general public. The Department proposed in the NPRM a provision aimed at striking a balance between affording individuals with disabilities adequate time to purchase accessible seating and the entity's desire to maximize ticket sales. In the NPRM, the Department proposed §36.302(f)(6), which allowed for the release of accessible seating under the following circumstances: (i) When all seating in the facility has been sold, excluding luxury boxes, club boxes, or suites; (ii) when all seating in a designated area has been sold and the accessible seating being released is in the same area; or (iii) when all seating in a designated price range has been sold and the accessible seating being released is within the same price range.

The Department's NPRM asked ''whether additional regulatory guidance is required or appropriate in terms of a more detailed or set schedule for the release of tickets in conjunction with the three approaches described above. For example, does the proposed regulation address the variable needs of assembly areas covered by the ADA? Is additional regulatory guidance required to eliminate discriminatory policies, practices and procedures related to the sale, hold, and release of accessible seating? What considerations should appropriately inform the determination of when unsold accessible seating can be released to the general public?'' 73 FR 34508, 34527 (June 17, 2008).

The Department received comments both supporting and opposing the inclusion of a hold-and-release provision. One side proposed loosening the restrictions on the release of unsold accessible seating. One commenter from a trade association suggested that tickets should be released regardless of whether there is a sell-out, and that these tickets should be released according to a set schedule. Conversely, numerous individuals, advocacy groups, and at least one public entity urged the Department to tighten the conditions under which unsold tickets for accessible seating may be released. These commenters suggested that venues should not be permitted to release tickets during the first two weeks of sale, or alternatively, that they should not be permitted to be released earlier than 48 hours before a sold-out event. Many of these commenters criticized the release of accessible seating under the second and third prongs of §36.302(f)(6) in the NPRM (when there is a sell-out in general seating in a designated seating area or in a price range), arguing that it would create situations where general seating would be available for purchase while accessible seating would not be.

Numerous commenters—both from the industry and from advocacy groups—asked for clarification of the term ''sell-out.'' Business groups commented that industry practice is to declare a sell-out when there are only ''scattered singles'' available—isolated seats that cannot be purchased as a set of adjacent pairs. Many of those same commenters also requested that ''sell-out'' be qualified with the phrase ''of all seating available for sale'' since it is industry practice to hold back from release tickets to be used for groups connected with that event (*e.g.*, the promoter, home team, or sports league). They argued that those tickets are not available for sale and any return of these tickets to the general inventory happens close to the event date. Noting the practice of holding back tickets, one advocacy group suggested that covered entities be required to hold back accessible seating in proportion to the number of tickets that are held back for later release.

The Department has concluded that it would be inappropriate to interfere with industry practice by defining what constitutes a ''sell-out'' and that a public accommodation should continue to use its own approach to defining a ''sell-out.'' If, however, a public accommodation declares a sell-out by reference to those seats that are available for sale, but it holds back tickets that it reasonably anticipates will be released later, it must hold back a proportional percentage of accessible seating to be released as well.

Adopting any of the alternatives proposed in the comments summarized above would have upset the balance between protecting the rights of individuals with disabilities and meeting venues' concerns about lost revenue from unsold accessible seating. As a result, the Department has retained §36.302(f)(6) renumbered as §36.302(f)(5) in the final rule. The Department has, however, modified the

regulation text to specify that accessible seating may be released only when ''all nonaccessible tickets in a designated seating area have been sold and the tickets for accessible seating are being released in the same designated area.'' As stated in the NPRM, the Department intended for this provision to allow, for example, the release of accessible seating at the orchestra level when all other seating at the orchestra level is sold. The Department has added this language to the final rule at §36.302(f)(5)(B) to clarify that venues cannot designate or redesignate seating areas for the purpose of maximizing the release of unsold accessible seating. So, for example, a venue may not determine on an ad hoc basis that a group of seats at the orchestra level is a designated seating area in order to release unsold accessible seating in that area.

The Department also has maintained the hold-and-release provisions that appeared in the NPRM, but has added a provision to address the release of accessible seating for series-of-events tickets on a series-of-events basis. Many commenters asked the Department whether unsold accessible seating may be converted to general seating and released to the general public on a season-ticket basis or longer when tickets typically are sold as a season-ticket package or other long-term basis. Several disability rights organizations and individual commenters argued that such a practice should not be permitted, and, if it were, that conditions should be imposed to ensure that individuals with disabilities have future access to those seats.

The Department interprets the fundamental principle of the ADA as a requirement to give individuals with disabilities equal, not better, access to those opportunities available to the general public. Thus, for example, a public accommodation that sells out its facility on a season-ticket only basis is not required to leave unsold its accessible seating if no persons with disabilities purchase those season-ticket seats. Of course, public accommodations may choose to go beyond what is required by reserving accessible seating for individuals with disabilities (or releasing such seats for sale to the general public) on an individual-game basis.

If a covered entity chooses to release unsold accessible seating for sale on a season-ticket or other long-term basis, it must meet at least two conditions. Under §36.302(f)(5)(iii) of the final rule, public accommodations must leave flexibility for game-day change-outs to accommodate ticket transfers on the secondary market. And public accommodations must modify their ticketing policies so that, in future years, individuals with disabilities will have the ability to purchase accessible seating on the same basis as other patrons (*e.g.*, as season tickets). Put differently, releasing accessible seating to the general public on a season-ticket or other long-term basis cannot result in that seating being lost to individuals with disabilities in perpetuity. If, in future years, season tickets become available and persons with disabilities have reached the top of the waiting list or have met any other eligibility criteria for season ticket purchases, public accommodations must ensure that accessible seating will be made available to the eligible individuals. In order to accomplish this, the Department has added §36.302(f)(5)(iii)(A) to require public accommodations that release accessible season tickets to individuals who do not have disabilities that require the features of accessible seating to establish a process to prevent the automatic reassignment of such ticket holders to accessible seating. For example, a public accommodation could have in place a system whereby accessible seating that was released because it was not purchased by individuals with disabilities is not in the pool of tickets available for purchase for the following season unless and until the conditions for ticket release have been satisfied in the following season. Alternatively, a public accommodation might release tickets for accessible seating only when a purchaser who does not need its features agrees that he or she has no guarantee of or right to the same seats in the following season, or that if season tickets are guaranteed for the following season, the purchaser agrees that the offer to purchase tickets is limited to non-accessible seats with, to the extent practicable, comparable price, view, and amenities to the accessible seats such individuals held in the prior year. The Department is aware that this rule may require some administrative changes but believes that this process will not create undue financial and administrative burdens. The Department believes that this approach is balanced and beneficial. It will allow public accommodations to sell all of their seats and will leave open the possibility, in future seasons or series of events, that persons who need accessible seating may have access to it.

The Department also has added §36.302(f)(5)(iii)(B) to address how season tickets or series-of-events tickets that have attached ownership rights should be handled if the ownership right returns to the public accommodation (*e.g.*, when holders forfeit their ownership right by failing to purchase season tickets or sell their ownership right back to a public accommodation). If the ownership right is for accessible seating, the public accommodation is required to adopt a process that allows an eligible individual with a disability who requires the features of such seating to purchase the rights and tickets for such seating.

Nothing in the regulatory text prevents a public accommodation from establishing a process whereby such ticket holders agree to be voluntarily reassigned from accessible

seating to another seating area so that individuals with mobility disabilities or disabilities that require the features of accessible seating and who become newly eligible to purchase season tickets have an opportunity to do so. For example, a public accommodation might seek volunteers to relocate to another location that is at least as good in terms of its location, price, and amenities or a public accommodation might use a seat with forfeited ownership rights as an inducement to get a ticket holder to give up accessible seating he or she does not need.

Ticket transfer. The Department received many comments asking whether accessible seating has the same transfer rights as general seats. The proposed regulation at §36.302(f)(5) required that individuals with disabilities must be allowed to purchase season tickets for accessible seating on the same terms and conditions as individuals purchasing season tickets for general seating, including the right—if it exists for other ticket-holders—to transfer individual tickets to friends or associates. Some commenters pointed out that the NPRM proposed explicitly allowing individuals with disabilities holding season tickets to transfer tickets but did not address the transfer of tickets purchased for individual events. Several commenters representing assembly areas argued that persons with disabilities holding tickets for an individual event should not be allowed to sell or transfer them to third parties because such ticket transfers would increase the risk of fraud or would make unclear the obligation of the entity to accommodate secondary ticket transfers. They argued that individuals holding accessible seating should either be required to transfer their tickets to another individual with a disability or return them to the facility for a refund.

Although the Department is sympathetic to concerns about administrative burden, curtailing transfer rights for accessible seating when other ticket holders are permitted to transfer tickets would be inconsistent with the ADA's guiding principle that individuals with disabilities must have rights equal to others. Thus, the Department has added language in the final rule in §36.302(f)(6) that requires that individuals with disabilities holding accessible seating for any event have the same transfer rights accorded other ticket holders for that event. Section 36.302(f)(6) also preserves the rights of individuals with disabilities who hold tickets to accessible seats for a series of events to transfer individual tickets to others, regardless of whether the transferee needs accessible seating. This approach recognizes the common practice of individuals splitting season tickets or other multi-event ticket packages with friends, colleagues, or other spectators to make the purchase of season tickets affordable; individuals with disabilities should not be placed in the burdensome position of having to find another individual with a disability with whom to share the package.

This provision, however, does not require public accommodations to seat an individual who holds a ticket to an accessible seat in such seating if the individual does not need the accessible features of the seat. A public accommodation may reserve the right to switch these individuals to different seats if they are available, but a public accommodation is not required to remove a person without a disability who is using accessible seating from that seating, even if a person who uses a wheelchair shows up with a ticket from the secondary market for a non-accessible seat and wants accessible seating.

Secondary ticket market. Section 36.302(f)(7) is a new provision in the final rule that requires a public accommodation to modify its policies, practices, or procedures to ensure that an individual with a disability, who acquires a ticket in the secondary ticket market, may use that ticket under the same terms and conditions as other ticket holders who acquire a ticket in the secondary market for an event or series of events. This principle was discussed in the NPRM in connection with §36.302(f)(5), pertaining to season-ticket sales. There, the Department asked for public comment regarding a public accommodation's proposed obligation to accommodate the transfer of accessible seating tickets on the secondary ticket market to those who do not need accessible seating and vice versa.

The secondary ticket market, for the purposes of this rule, broadly means any transfer of tickets after the public accommodation's initial sale of tickets to individuals or entities. It thus encompasses a wide variety of transactions, from ticket transfers between friends to transfers using commercial exchange systems. Many commenters noted that the distinction between the primary and secondary ticket market has become blurred as a result of agreements between teams, leagues, and secondary market sellers. These commenters noted that the secondary market may operate independently of the public accommodation, and parts of the secondary market, such as ticket transfers between friends, undoubtedly are outside the direct jurisdiction of the public accommodation. To the extent that venues seat persons who have purchased tickets on the secondary market, they must similarly seat persons with disabilities who have purchased tickets on the secondary market. In addition, some public accommodations may acquire ADA obligations directly by formally entering the secondary ticket market.

The Department's enforcement experience with assembly areas also has revealed that venues regularly provide for and make last-minute seat transfers. As long as there are

vacant wheelchair spaces, requiring venues to provide wheelchair spaces for patrons who acquired inaccessible seats and need wheelchair spaces is an example of a reasonable modification of a policy under title III of the ADA. Similarly, a person who has a ticket for a wheelchair space but who does not require its accessible features could be offered non-accessible seating if such seating is available.

The Department's longstanding position that title III of the ADA requires venues to make reasonable modifications in their policies to allow individuals with disabilities who acquired non-accessible tickets on the secondary ticket market to be seated in accessible seating, where such seating is vacant, is supported by the only Federal court to address this issue. *See Independent Living Resources* v. *Oregon Arena Corp.*, 1 F. Supp. 2d 1159, 1171 (D. Or. 1998). The Department has incorporated this position into the final rule at §36.302(f)(7)(ii).

The NPRM contained two questions aimed at gauging concern with the Department's consideration of secondary ticket market sales. The first question asked whether a secondary purchaser who does not have a disability and who buys an accessible seat should be required to move if the space is needed for someone with a disability.

Many disability rights advocates answered that the individual should move provided that there is a seat of comparable or better quality available for him and his companion. Some venues, however, expressed concerns about this provision, and asked how they are to identify who should be moved and what obligations apply if there are no seats available that are equivalent or better in quality.

The Department's second question asked whether there are particular concerns about the obligation to provide accessible seating, including a wheelchair space, to an individual with a disability who purchases an inaccessible seat through the secondary market.

Industry commenters contended that this requirement would create a ''logistical nightmare,'' with venues scrambling to reseat patrons in the short time between the opening of the venues' doors and the commencement of the event. Furthermore, they argued that they might not be able to reseat all individuals and that even if they were able to do so, patrons might be moved to inferior seats (whether in accessible or non-accessible seating). These commenters also were concerned that they would be sued by patrons moved under such circumstances.

These commenters seem to have misconstrued the rule. Covered entities are not required to seat every person who acquires a ticket for inaccessible seating but needs accessible seating, and are not required to move any individual who acquires a ticket for accessible seating but does not need it. Covered entities that allow patrons to buy and sell tickets on the secondary market must make reasonable modifications to their policies to allow persons with disabilities to participate in secondary ticket transfers. The Department believes that there is no one-size-fits-all rule that will suit all assembly areas. In those circumstances where a venue has accessible seating vacant at the time an individual with a disability who needs accessible seating presents his ticket for inaccessible seating at the box office, the venue must allow the individual to exchange his ticket for an accessible seat in a comparable location if such an accessible seat is vacant. Where, however, a venue has sold all of its accessible seating, the venue has no obligation to provide accessible seating to the person with a disability who purchased an inaccessible seat on the secondary market. Venues may encourage individuals with disabilities who hold tickets for inaccessible seating to contact the box office before the event to notify them of their need for accessible seating, even though they may not require ticketholders to provide such notice.

The Department notes that public accommodations are permitted, though not required, to adopt policies regarding moving patrons who do not need the features of an accessible seat. If a public accommodation chooses to do so, it might mitigate administrative concerns by marking tickets for accessible seating as such, and printing on the ticket that individuals who purchase such seats but who do not need accessible seating are subject to being moved to other seats in the facility if the accessible seating is required for an individual with a disability. Such a venue might also develop and publish a ticketing policy to provide transparency to the general public and to put holders of tickets for accessible seating who do not require it on notice that they may be moved.

Prevention of fraud in purchase of accessible seating. Assembly area managers and advocacy groups have informed the Department that the fraudulent purchase of accessible seating is a pressing concern. Curbing fraud is a goal that public accommodations and individuals with disabilities share. Steps taken to prevent fraud, however, must be balanced carefully against the privacy rights of individuals with disabilities. Such measures also must not impose burdensome requirements upon, nor restrict the rights of, individuals with disabilities.

In the NPRM, the Department struck a balance between these competing concerns by proposing §36.302(f)(8), which prohibited public accommodations from asking for proof of disability before the purchase of accessible seating but provided guidance in two paragraphs on appropriate measures for

curbing fraud. Paragraph (i) proposed allowing a public accommodation to ask individuals purchasing single-event tickets for accessible seating whether they are wheelchair users. Paragraph (ii) proposed allowing a public accommodation to require individuals purchasing accessible seating for season tickets or other multi-event ticket packages to attest in writing that the accessible seating is for a wheelchair user. Additionally, the NPRM proposed to permit venues, when they have good cause to believe that an individual has fraudulently purchased accessible seating, to investigate that individual.

Several commenters objected to this rule on the ground that it would require a wheelchair user to be the purchaser of tickets. The Department has reworded this paragraph to reflect that the individual with a disability does not have to be the ticket purchaser. The final rule allows third parties to purchase accessible tickets at the request of an individual with a disability.

Commenters also argued that other individuals with disabilities who do not use wheelchairs should be permitted to purchase accessible seating. Some individuals with disabilities who do not use wheelchairs urged the Department to change the rule, asserting that they, too, need accessible seating. The Department agrees that such seating, although designed for use by a wheelchair user, may be used by non-wheelchair users, if those persons are persons with a disability who need to use accessible seating because of a mobility disability or because their disability requires the use of the features that accessible seating provides (*e.g.*, individuals who cannot bend their legs because of braces, or individuals who, because of their disability, cannot sit in a straight-back chair).

Some commenters raised concerns that allowing venues to ask questions to determine whether individuals purchasing accessible seating are doing so legitimately would burden individuals with disabilities in the purchase of accessible seating. The Department has retained the substance of this provision in §36.302(f)(8) of the final rule, but emphasizes that such questions should be asked at the initial time of purchase. For example, if the method of purchase is via the Internet, then the question(s) should be answered by clicking a yes or no box during the transaction. The public accommodation may warn purchasers that accessible seating is for individuals with disabilities and that individuals purchasing such tickets fraudulently are subject to relocation.

One commenter argued that face-to-face contact between the venue and the ticket holder should be required in order to prevent fraud and suggested that individuals who purchase accessible seating should be required to pick up their tickets at the box office and then enter the venue immediately. The Department has declined to adopt that suggestion. It would be discriminatory to require individuals with disabilities to pick up tickets at the box office when other spectators are not required to do so. If the assembly area wishes to make face-to-face contact with accessible seating ticket holders to curb fraud, it may do so through its ushers and other customer service personnel located within the seating area.

Some commenters asked whether it is permissible for assembly areas to have voluntary clubs where individuals with disabilities self-identify to the public accommodation in order to become a member of a club that entitles them to purchase accessible seating reserved for club members or otherwise receive priority in purchasing accessible seating. The Department agrees that such clubs are permissible, provided that a reasonable amount of accessible seating remains available at all prices and dispersed at all locations for individuals with disabilities who are non-members.

Section 36.303 Auxiliary Aids and Services

Section 36.303(a) of the 1991 title III regulation requires a public accommodation to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the public accommodation can demonstrate that taking such steps would fundamentally alter the nature of the goods, services, facilities, advantages, or accommodations being offered or would result in an undue burden. Implicit in this duty to provide auxiliary aids and services is the underlying obligation of a public accommodation to communicate effectively with customers, clients, patients, companions, or participants who have disabilities affecting hearing, vision, or speech. The Department notes that §36.303(a) does not require public accommodations to provide assistance to individuals with disabilities that is unrelated to effective communication, although requests for such assistance may be otherwise subject to the reasonable modifications or barrier removal requirements.

The Department has investigated hundreds of complaints alleging that public accommodations have failed to provide effective communication, and many of these investigations have resulted in settlement agreements and consent decrees. During the course of these investigations, the Department has determined that public accommodations sometimes misunderstand the scope of their obligations under the statute and the regulation. Section 36.303 in the final rule codifies the Department's longstanding policies in this area, and includes provisions based on technological advances and breakthroughs in the area of auxiliary aids and

services that have occurred since the 1991 title III regulation was published.

Video remote interpreting (VRI). Section 36.303(b)(1) sets out examples of auxiliary aids and services. In the NPRM, the Department proposed adding video remote services (hereafter referred to as ''video remote interpreting'' or ''VRI'') and the exchange of written notes among the examples. The Department also proposed amending the provision to reflect technological advances, such as the wide availability of real-time capability in transcription services and captioning.

VRI is defined in the final rule at §36.104 as ''an interpreting service that uses video conference technology over dedicated lines or wireless technology offering high-speed, wide-bandwidth video connection or wireless connection that delivers high-quality video images as provided in §36.303(f).'' The Department notes that VRI generally consists of a videophone, monitors, cameras, a high-speed video connection, and an interpreter provided by the public accommodation pursuant to a contract for services. The term's inclusion within the definition of ''qualified interpreter'' makes clear that a public accommodation's use of VRI satisfies its title III obligations only where VRI affords effective communication. Comments from advocates and persons with disabilities expressed concern that VRI may not always provide effective communication, especially in hospitals and emergency rooms. Examples were provided of patients who are unable to see the video monitor because they are semiconscious or unable to focus on the video screen; other examples were given of cases where the video monitor is out of the sightline of the patient or the image is out of focus; still other examples were given of patients who cannot see the screen because the signal is interrupted, causing unnatural pauses in communication, or the image is grainy or otherwise unclear. Many commenters requested more explicit guidelines on the use of VRI, and some recommended requirements for equipment maintenance, dedicated high-speed, wide-bandwidth video connections, and training of staff using VRI, especially in hospital and health care situations. Several major organizations requested a requirement to include the interpreter's face, head, arms, hands, and eyes in all transmissions.

The Department has determined that VRI can be an effective method of providing interpreting service in certain situations, particularly when a live interpreter cannot be immediately on the scene. To ensure that VRI is effective, the Department has established performance standards for VRI in §36.303(f). The Department recognizes that reliance on VRI may not be effective in certain situations, such as those involving the exchange of complex information or involving multiple parties, and for some individuals, such as for persons who are deaf-blind, and using VRI in those circumstances would not satisfy a public accommodation's obligation to provide effective communication.

Comments from several disability advocacy organizations and individuals discouraged the Department from adding the exchange of written notes to the list of available auxiliary aids in §36.303(b). The Department consistently has recognized that the exchange of written notes may provide effective communication in certain contexts. The NPRM proposed adding an explicit reference to written notes because some title III entities do not understand that exchange of written notes using paper and pencil may be an available option in some circumstances. Advocates and persons with disabilities requested explicit limits on the use of written notes as a form of auxiliary aid because, they argued, most exchanges are not simple, and handwritten notes do not afford effective communication. One major advocacy organization, for example, noted that the speed at which individuals communicate orally or use sign language averages about 200 words per minute or more, and thus, the exchange of notes may provide only truncated or incomplete communication. For persons whose primary language is American Sign Language (ASL), some commenters pointed out, using written English in exchange of notes often is ineffective because ASL syntax and vocabulary is dissimilar from English. By contrast, some commenters from professional medical associations sought more specific guidance on when notes are allowed, especially in the context of medical offices and health care situations.

Exchange of notes likely will be effective in situations that do not involve substantial conversation, for example, when blood is drawn for routine lab tests or regular allergy shots are administered. However, interpreters should be used when the matter involves more complexity, such as in communication of medical history or diagnoses, in conversations about medical procedures and treatment decisions, or in communication of instructions for care at home or elsewhere. The Department discussed in the NPRM the kinds of situations in which use of interpreters or captioning is necessary. Additional guidance on this issue can be found in a number of agreements entered into with health care providers and hospitals that are available on the Department's Web site at *http://www.ada.gov*.

In addition, commenters requested that the Department include ''real-time'' before any mention of ''computer-aided'' or ''captioning'' technology to highlight the value of simultaneous translation of any communication. The Department has added to the final rule appropriate references to ''real-time'' to

recognize this aspect of effective communication. Lastly, in this provision and elsewhere in the title III regulation, the Department has replaced the term ''telecommunications devices for deaf persons (TDD)'' with ''text telephones (TTYs).'' As noted in the NPRM, TTY has become the commonly accepted term and is consistent with the terminology used by the Access Board in the 2004 ADAAG. Comments from advocates and persons with disabilities expressed approval of the substitution of TTY for TDD in the proposed regulation, but expressed the view that the Department should expand the definition to ''voice, text, and video-based telecommunications products and systems, including TTY's, videophones, and captioned telephones, or equally effective telecommunications systems.'' The Department has expanded its definition of ''auxiliary aids and services'' in §36.303 to include those examples in the final rule. Other additions proposed in the NPRM, and retained in the final rule, include Brailled materials and displays, screen reader software, magnification software, optical readers, secondary auditory programs (SAP), and accessible electronic and information technology.

As the Department noted in the preamble to the NPRM, the list of auxiliary aids in §36.303(b) is merely illustrative. The Department does not intend that every public accommodation covered by title III must have access to every device or all new technology at all times, as long as the communication provided is effective.

Companions who are individuals with disabilities. The Department has added several new provisions to §36.303(c), but these provisions do not impose new obligations on places of public accommodation. Rather, these provisions simply codify the Department's longstanding positions. Section 36.303(c)(1) now states that ''[a] public accommodation shall furnish appropriate auxiliary aids and services where necessary to ensure effective communication with individuals with disabilities. This includes an obligation to provide effective communication to companions who are individuals with disabilities.'' Section 36.303(c)(1)(i) defines ''companion'' as ''a family member, friend, or associate of an individual seeking access to, or participating in, the goods, services, facilities, privileges, advantages, or accommodations of a public accommodation, who, along with such individual, is an appropriate person with whom the public accommodation should communicate.''

This provision makes clear that if the companion is someone with whom the public accommodation normally would or should communicate, then the public accommodation must provide appropriate auxiliary aids and services to that companion to ensure effective communication with the companion. This commonsense rule provides the necessary guidance to public accommodations to implement properly the nondiscrimination requirements of the ADA. Commenters also questioned why, in the NPRM, the Department defined companion as ''a family member, friend, or associate of a program participant * * *,'' noting that the scope of a public accommodation's obligation is not limited to ''program participants'' but rather includes all individuals seeking access to, or participating in, the goods, services, facilities, privileges, advantages, or accommodations of the public accommodation. 73 FR 34508, 34554 (June 17, 2008). The Department agrees and has amended the regulatory language accordingly. Many commenters supported inclusion of companions in the rule and requested that the Department clarify that a companion with a disability may be entitled to effective communication from the public accommodation, even though the individual seeking access to, or participating in, the goods, services, facilities, privileges, advantages, or accommodations of the public accommodation is not an individual with a disability. Some commenters asked the Department to make clear that if the individual seeking access to or participating in the public accommodation's program or services is an individual with a disability and the companion is not, the public accommodation may not limit its communication to the companion, instead of communicating directly with the individual with a disability, when it would otherwise be appropriate to communicate with the individual with the disability.

Most entities and individuals from the medical field objected to the Department's proposal, suggesting that medical and health care providers, and they alone, should determine to whom medical information should be communicated and when auxiliary aids and services should be provided to companions. Others asked that the Department limit the public accommodation's obligation to communicate effectively with a companion to situations where such communication is necessary to serve the interests of the person who is receiving the public accommodation's services. It also was suggested that companions should receive auxiliary aids and services only when necessary to ensure effective communication with the person receiving the public accommodation's services, with an emphasis on the particular needs of the patient requiring assistance, not the patient's family or guardian.

Some in the medical community objected to the inclusion of any regulatory language regarding companions, asserting that such language is overbroad, seeks services for individuals whose presence is neither required by the public accommodation nor necessary for the delivery of the services or good, places additional burdens on the medical

community, and represents an uncompensated mandate. One medical association commenter stated that such a mandate was particularly burdensome in situations where a patient is fully and legally capable of participating in the decision-making process and needs little or no assistance in obtaining care and following through on physician's instructions.

The final rule codifies the Department's longstanding interpretation of the ADA, and clarifies that public accommodations have effective communication obligations with respect to companions who are individuals with disabilities even where the individual seeking to participate in or benefit from what a public accommodation offers does not have a disability. There are many instances in which such an individual may not be an individual with a disability but his or her companion is an individual with a disability. The effective communication requirement applies equally to that companion.

Effective communication with companions is particularly critical in health care settings where miscommunication may lead to misdiagnosis and improper or delayed medical treatment. The Department has encountered confusion and reluctance by medical care providers regarding the scope of their obligation with respect to such companions. Effective communication with a companion is necessary in a variety of circumstances. For example, a companion may be legally authorized to make health care decisions on behalf of the patient or may need to help the patient with information or instructions given by hospital personnel. In addition, a companion may be the patient's next of kin or health care surrogate with whom hospital personnel need to communicate concerning the patient's medical condition. Moreover, a companion could be designated by the patient to communicate with hospital personnel about the patient's symptoms, needs, condition, or medical history. Furthermore, the companion could be a family member with whom hospital personnel normally would communicate. It has been the Department's longstanding position that public accommodations are required to provide effective communication to companions when they accompany patients to medical care providers for treatment.

The individual with a disability does not need to be present physically to trigger the public accommodation's obligation to provide effective communication to a companion. The controlling principle regarding whether appropriate auxiliary aids and services should be provided is whether the companion is an appropriate person with whom the public accommodation should communicate. Examples of such situations include back-to-school night or parent-teacher conferences at a private school. If the faculty writes on the board or otherwise displays information in a visual context during back-to-school night, this information must be communicated effectively to parents or guardians who are blind or have low vision. At a parent-teacher conference, deaf parents or guardians are to be provided with appropriate auxiliary aids and service to communicate effectively with the teacher and administrators. Likewise, when a deaf spouse attempts to communicate with private social service agencies about the services necessary for the hearing spouse, appropriate auxiliary aids and services must be provided to the deaf spouse by the public accommodation to ensure effective communication.

One medical association sought approval to impose a charge against an individual with a disability, either the patient or the companion, where that person had stated he or she needed an interpreter for a scheduled appointment, the medical provider had arranged for an interpreter to appear, and then the individual requiring the interpreter did not show up for the scheduled appointment. Section 36.301(c) of the 1991 title III regulation prohibits the imposition of surcharges to cover the costs of necessary auxiliary aids and services. As such, medical providers cannot pass along to their patients with disabilities the cost of obtaining an interpreter, even in situations where the individual cancels his or her appointment at the last minute or is a ''no-show'' for the scheduled appointment. The medical provider, however, may charge for the missed appointment if all other patients are subject to such a charge in the same circumstances.

Determining appropriate auxiliary aids. The type of auxiliary aid the public accommodation provides is dependent on which auxiliary aid is appropriate under the particular circumstances. Section 36.303(c)(1)(ii) codifies the Department's longstanding interpretation that the type of auxiliary aid or service necessary to ensure effective communication will vary in accordance with the method of communication used by the individual; the nature, length, and complexity of the communication involved; and the context in which the communication is taking place. As the Department explained in the NPRM, this provision lists factors the public accommodation should consider in determining which type of auxiliary aids and services are necessary. For example, an individual with a disability who is deaf or hard of hearing may need a qualified interpreter to discuss with hospital personnel a diagnosis, procedures, tests, treatment options, surgery, or prescribed medication (*e.g.,* dosage, side effects, drug interactions, etc.). In comparison, an individual who is deaf or hard of hearing who purchases an item in the hospital gift shop may need only an exchange of written notes to achieve effective communication.

The language in the first sentence of §36.303(c)(1)(ii) is derived from the Department's Technical Assistance Manual. *See* Department of Justice, Americans with Disabilities Act, *ADA Title III Technical Assistance Manual Covering Public Accommodations and Commercial Facilities*, III–4.3200, available at *http://www.ada.gov/taman3.html*. There were few comments regarding inclusion of this policy in the regulation itself, and those received were positive.

Many advocacy groups, particularly those representing blind individuals and those with low vision, urged the Department to add language in the final rule requiring the provision of accessible material in a manner that is timely, accurate, and private. This, they argued, would be especially important with regard to billing information, other time-sensitive material, or confidential information. The Department has added a provision in §36.303(c)(1)(ii) stating that in ''order to be effective, auxiliary aids and services must be provided in accessible formats, in a timely manner, and in such a way so as to protect the privacy and independence of the individual with a disability.''

The second sentence of §36.303(c)(1)(ii) states that ''[a] public accommodation should consult with individuals with disabilities whenever possible to determine what type of auxiliary aid is needed to ensure effective communication, but the ultimate decision as to what measures to take rests with the public accommodation, provided that the method chosen results in effective communication.'' Many commenters urged the Department to amend this provision to require public accommodations to give primary consideration to the expressed choice of an individual with a disability. However, as the Department explained when it initially promulgated the 1991 title III regulation, the Department believes that Congress did not intend under title III to impose upon a public accommodation the requirement that it give primary consideration to the request of the individual with a disability. *See* 28 CFR part 36, app. B at 726 (2009). The legislative history does, however, demonstrate congressional intent to strongly encourage consulting with persons with disabilities. *Id*. As the Department explained in the 1991 preamble, ''the House Education and Labor Committee stated that it 'expects' that 'public accommodation(s) will consult with the individual with a disability before providing a particular auxiliary aid or service.' (Education and Labor report at 107).'' *Id*.

The commenters who urged that primary consideration be given to the individual with a disability noted, for example, that a public accommodation would not provide effective communication by using written notes where the individual requiring an auxiliary aid is in severe pain, or by providing a qualified ASL interpreter when an individual needs an oral interpreter instead. Both examples illustrate the importance of consulting with the individual with a disability in order to ensure that the communication provided is effective. When a public accommodation ignores the communication needs of the individual requiring an auxiliary aid or service, it does so at its peril, for if the communication provided is not effective, the public accommodation will have violated title III of the ADA.

Consequently, the regulation strongly encourages the public accommodation to engage in a dialogue with the individual with a disability to determine what auxiliary aids and services are appropriate under the circumstances. This dialogue should include a communication assessment of the individual with a disability initially, regularly, and as needed, because the auxiliary aids and services necessary to provide effective communication to the individual may fluctuate. For example, a deaf individual may go to a private community health center with what is at first believed to be a minor medical emergency, such as a sore knee, and the individual with a disability and the community health center both may believe that exchanging written notes will be effective; however, during that individual's visit, it may be determined that the individual is, in fact, suffering from an anterior cruciate ligament tear and must have surgery to repair the torn ligament. As the situation develops and the diagnosis and recommended course of action evolve into surgery, an interpreter likely will be necessary. The community health center has a continuing obligation to assess the auxiliary aids and services it is providing, and should consult with individuals with disabilities on a continuing basis to assess what measures are required to ensure effective communication.

Similarly, the Department strongly encourages public accommodations to keep individuals with disabilities apprised of the status of the expected arrival of an interpreter or the delivery of other requested or anticipated auxiliary aids and services. Also, when the public accommodation decides not to provide the auxiliary aids and services requested by an individual with a disability, the public accommodation should provide that individual with the reason for its decision.

Family members and friends as interpreters. Section 36.303(c)(2), which was proposed in the NPRM, has been included in the final rule to make clear that a public accommodation shall not require an individual with a disability to bring another individual to interpret for him or her. The Department has added this regulatory requirement to emphasize that when a public accommodation is interacting with a person with a disability,

it is the public accommodation's responsibility to provide an interpreter to ensure effective communication. It is not appropriate to require the person with a disability to bring another individual to provide such services.

Many commenters supported inclusion of this language in the new rule. A representative from a cruise line association opined, however, that if a guest chose to cruise without an interpreter or companion, the ship would not be compelled to provide an interpreter for the medical facility. On the contrary, when an individual with a disability goes on a cruise, the cruise ship has an obligation to provide effective communication, including, if necessary, a qualified interpreter as defined in the rule.

Some representatives of pediatricians objected to this provision, stating that parents of children with disabilities often know best how to interpret their children's needs and health status and relay that information to the child's physician, and to remove that parent, or add a stranger into the examining room, may frighten children. These commenters requested clarification in the regulation that public accommodations should permit parents, guardians, or caregivers of children with disabilities to accompany them in medical settings to ensure effective communication. The regulation does not prohibit parents, guardians, or caregivers from being present or providing effective communication for children. Rather, it prohibits medical professionals (and other public accommodations) from requiring or forcing individuals with disabilities to bring other individuals with them to facilitate communication so that the public accommodation will not have to provide appropriate auxiliary aids and services. The public accommodation cannot avoid its obligation to provide an interpreter except under the circumstances described in §36.303(c)(3)–(4).

A State medical association also objected to this provision, opining that medical providers should have the authority to ask patients to bring someone with them to provide interpreting services if the medical provider determines that such a practice would result in effective communication and that patient privacy and confidentiality would be maintained. While the public accommodation has the obligation to determine what type of auxiliary aids and services are necessary to ensure effective communication, it cannot unilaterally determine whether the patient's privacy and confidentiality would be maintained.

Section 36.303(c)(3) of the final rule codifies the Department's position that there are certain limited instances when a public accommodation may rely on an accompanying adult to interpret or facilitate communication: (1) In an emergency involving an imminent threat to the safety or welfare of an individual or the public; or (2) if the individual with a disability specifically requests it, the accompanying adult agrees to provide the assistance, and reliance on that adult for this assistance is appropriate under the circumstances. In such instances, the public accommodation should first offer to provide appropriate auxiliary aids and services free of charge.

Commenters requested that the Department make clear that the public accommodation cannot request, rely on, or coerce an accompanying adult to provide effective communication for an individual with a disability, and that only a voluntary offer of assistance is acceptable. The Department states unequivocally that consent of, and for, the accompanying adult to facilitate communication must be provided freely and voluntarily both by the individual with a disability and the accompanying adult—absent an emergency involving an imminent threat to the safety or welfare of an individual or the public. The public accommodation cannot coerce or attempt to persuade another adult to provide effective communication for the individual with a disability.

Several commenters asked that the Department make clear that children are not to be used to provide effective communication for family members and friends and that it is the responsibility of the public accommodation to provide effective communication, stating that interpreters often are needed in settings where it would not be appropriate for children to be interpreting, such as those involving medical issues, domestic violence, or other situations involving the exchange of confidential or adult-related material. Children often are hesitant to decline requests to provide communication services, which puts them in a very difficult position vis-a-vis family members and friends. The Department agrees. It is the Department's position that a public accommodation shall not rely on a minor child to facilitate communication with a family member, friend, or other individual except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where no interpreter is available. Accordingly, the Department has revised the rule to state that ''[a] public accommodation shall not rely on a minor child to interpret or facilitate communication, except in an emergency involving an imminent threat to the safety or welfare of an individual or the public where there is no interpreter available.'' §36.303(c)(4). Sections 36.303(c)(3) and (c)(4) have no application in circumstances where an interpreter would not otherwise be required in order to provide effective communication (*e.g.*, in simple transactions such as purchasing movie tickets at a theater).

The Department stresses that privacy and confidentiality must be maintained but

notes that covered entities, such as hospitals, that are subject to the Privacy Rules, 45 CFR parts 160 and 164, of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104–191, are permitted to disclose to a patient's relative, close friend, or any other person identified by the patient (such as an interpreter) relevant patient information if the patient agrees to such disclosures. *See* 45 CFR parts 160 and 164. The agreement need not be in writing. Covered entities should consult the HIPAA Privacy Rules regarding other ways disclosures may be made to such persons.

With regard to emergency situations, proposed §36.303(c)(3) permitted reliance on an individual accompanying an individual with a disability to interpret or facilitate communication in an emergency involving a threat to the safety or welfare of an individual or the public. Commenters requested that the Department make clear that often a public accommodation can obtain appropriate auxiliary aids and services in advance of an emergency, particularly in anticipated emergencies, such as predicted dangerous weather, or in certain medical situations, such as pending childbirth, by making necessary prearrangements. These commenters did not want public accommodations to be relieved of their responsibilities to provide effective communication in emergency situations, noting that the need for effective communication in emergencies is heightened. For the same reason, several commenters requested a separate rule that requires public accommodations to provide timely and effective communication in the event of an emergency.

One group of commenters asked that the Department narrow the regulation permitting reliance on a companion to interpret or facilitate communication in emergency situations so that it is not available to entities with responsibilities for emergency preparedness and response. Some commenters noted that certain exigent circumstances, such as those that exist during and, perhaps, immediately after a major hurricane, temporarily may excuse public accommodations of their responsibilities to provide effective communication. However, they asked that the Department clarify that these obligations are ongoing, and that as soon as such situations begin to abate or become stabilized, the public accommodation must provide effective communication.

The Department recognizes the need for effective communication is critical in emergency situations. After due consideration of all of these concerns raised by commenters, the Department has revised §36.303(c) to narrow the exception permitting reliance on individuals accompanying the individual with a disability during an emergency to make it clear that it applies only to emergencies involving an ''imminent threat to the safety or welfare of an individual or the public * * *.'' §36.303(c)(3)–(4). The Department wishes to emphasize, however, that application of this exception is narrowly tailored to emergencies involving an imminent threat to the safety or welfare of individuals or the public. Arguably, all visits to an emergency room are by definition emergencies. Likewise, an argument can be made that most situations to which emergency workers respond involve, in one way or another, a threat to the safety or welfare of an individual or the public. The imminent threat exception in §36.303(c)(3)–(4) is not intended to apply to typical and foreseeable emergency situations that are part of the normal operations of these institutions. As such, a public accommodation may rely on an accompanying individual to interpret or facilitate communication under the §36.303(c)(3)–(4) imminent threat exception only where there is a true emergency, *i.e.*, where any delay in providing immediate services to the individual could have life-altering or life-ending consequences.

Telecommunications. In addition to the changes discussed in §36.303(b) regarding telecommunications, telephones, and text telephones, the Department has adopted provisions in §36.303(d) of the final rule (which also were included in the NPRM) requiring that public accommodations must not disconnect or refuse to take calls from FCC-approved telecommunications relay systems, including Internet-based relay systems. Commenters from some State agencies, many advocacy organizations, and individuals strongly urged the Department to mandate such action because of the high proportion of TTY calls and relay service calls to title III entities that are not completed because of phone systems or employees not taking the calls. This refusal presents a significant obstacle for persons using TTYs who do business with public accommodations and denies persons with disabilities telephone access for business that typically is handled over the telephone.

Section 36.303(d)(1)(ii) of the NPRM added public telephones equipped with volume control mechanisms and hearing aid-compatible telephones to the examples of types of telephone equipment to be provided. Commenters from the disability community and from telecommunications relay service providers argued that requirements for these particular features on telephones are obsolete not only because the deaf and hard of hearing community uses video technology more frequently than other types of telecommunication, but also because all public coin phones have been hearing aid compatible since 1983, pursuant to the Telecommunications for the Disabled Act of 1982, 47 U.S.C. 610. The Hearing Aid Compatibility

Act of 1988, 47 U.S.C. 610, extended this requirement to all wireline telephones imported into or manufactured in the United States since 1989. In 1997, the FCC further required that all such phones also be equipped with volume control. *See* 47 CFR 68.6. Given these existing statutory obligations, the proposed language is unnecessary. Accordingly, the Department has deleted that language from the final rule.

The Department understands that there are many new devices and advances in technology that should be included in the definition of available auxiliary aids and is including many of the telecommunications devices and some new technology. While much of this technology is not expensive and should be available to most title III entities, there may be legitimate reasons why in a particular situation some of these new and developing auxiliary aids may not be available, may be prohibitively costly (thus supporting an undue burden defense), or may otherwise not be suitable given other circumstances related to the particular terrain, situation, or functionality in specialized areas where security, among other things, may be a factor limiting the appropriateness of the use of a particular technology or device. The Department recognizes that the available new technology may provide more effective communication than existing technology and that providing effective communication often will include use of new technology and video relay services, as well as interpreters. However, the Department has not mandated that title III entities make all technology or services available upon demand in all situations. When a public accommodation provides the opportunity to make outgoing phone calls on more than an incidental-convenience basis, it shall make available accessible public telephones, TTYs, or other telecommunications products and systems for use by an individual who is deaf or hard of hearing, or has a speech impairment.

Video remote interpreting (VRI) services. In §36.303(f) of the NPRM, the Department proposed the inclusion of four performance standards for VRI (which the NPRM termed video interpreting services (VIS)), for effective communication: (1) High-quality, clear, real-time, full-motion video, and audio over a dedicated high-speed Internet connection; (2) a clear, sufficiently large, and sharply delineated picture of the participants' heads, arms, hands, and fingers, regardless of their body position; (3) clear transmission of voices; and (4) persons who are trained to set up and operate the VIS quickly and efficiently.

Commenters generally approved of these proposed performance standards, but recommended that some additional standards be included in the final rule. For persons who are deaf with limited vision, commenters requested that the Department include an explicit requirement that interpreters wear high-contrast clothing with no patterns that might distract from their hands as they are interpreting, so that a person with limited vision could still see the signs made by the interpreter. While the Department reiterates the importance of such practices in the delivery of effective VRI as well as in-person interpreting, the Department declines to adopt such performance standards as part of this rule. In general, professional interpreters already follow such practices, as the Code of Professional Conduct for interpreters developed by the Registry of Interpreter for the Deaf and the National Association of the Deaf incorporates attire considerations into their standards of professionalism and conduct. Moreover, as a result of this code, many VRI agencies have adopted detailed dress standards that interpreters hired by the agency must follow. Commenters also urged explicit requirement of a clear image of the face and eyes of the interpreter and others. Because the face includes the eyes, the Department has amended §36.303(f)(2) of the final rule to include a requirement that the interpreter's face be displayed. Other commenters requested requirement of a wide-bandwidth video connection for the VRI system, and the Department has included this requirement in §36.303(f)(1) of the final rule.

ATMs. The 2010 Standards set out detailed requirements for ATMs, including communication-related requirements to make ATMs usable by individuals who are blind or have low vision. In the NPRM, the Department discussed the application of a safe harbor to the communication-related elements of ATMs. The NPRM explained that the Department considers the communication-related elements of ATMs to be auxiliary aids and services, to which the safe harbor for elements built in compliance with the 1991 standards does not apply.

The Department received several comments regarding this issue. Several commenters representing banks objected to the exclusion of communication-related aspects of ATMs from the safe harbor provision. They explained that the useful life of ATMs—on average 10 years—was longer than the Department noted; thus, without the safe harbor, banks would be forced to retrofit many ATMs in order to comply with the proposed regulation. Such retrofitting, they noted, would be costly to the industry. A few representatives of the disability community commented that communication-related aspects of ATMs should be excluded from the safe harbor.

The Department consistently has taken the position that the communication-related elements of ATMs are auxiliary aids and services, rather than structural elements. *See* 28 CFR part 36, app. B at 728 (2009). Thus, the safe harbor provision does not apply to

these elements. The Department believes that the limitations on the effective communication requirements, which provide that a covered entity does not have to take measures that would result in a fundamental alteration of its program or would cause undue burdens, provide adequate protection to covered entities that operate ATMs.

Captioning at sporting venues. In §36.303(g) of the NPRM, the Department proposed that sports stadiums that have a capacity of 25,000 or more shall provide captioning for safety and emergency information on scoreboards and video monitors. In addition, the Department posed four questions about captioning of information, especially safety and emergency information announcements, provided over public address (PA) systems. The Department received many detailed and divergent responses to each of the four questions and the proposed regulatory text. Because comments submitted on the Department's title II and title III proposals were intertwined, because of the similarity of issues involved for title II entities and title III entities, and in recognition of the fact that many large sports stadiums are covered by both title II and title III as joint operations of State or local government and one or more public accommodations, the Department presents here a single consolidated review and summary of the issues raised in comments.

The Department asked whether requiring captioning of safety and emergency information made over the public address system in stadiums seating fewer than 25,000 would create an undue burden for smaller entities, and whether it would be feasible for small stadiums to provide such captioning, or whether a larger threshold, such as sports stadiums with a capacity of 50,000 or more, would be appropriate.

There was a consensus among the commenters, including disability advocates as well as venue owners and stadium designers and operators, that using the stadium size or seating capacity should not be the exclusive deciding factor for any obligation to provide captioning for safety and emergency information broadcast over the PA system. Most disability advocacy organizations and individuals with disabilities complained that using size or seating capacity as a threshold for captioning safety and emergency information would undermine the ''undue burden'' defense found in both titles II and III. Many commenters provided examples of facilities such as professional hockey arenas that seat less than 25,000 fans but that, commenters argued, should be able to provide real-time captioning. Other commenters suggested that some high school or college stadiums, for example, may hold 25,000 fans or more and yet lack the resources to provide real-time captioning. Many commenters noted that real-time captioning would require use of trained stenographers, and that most high school and college sports facilities rely upon volunteers to operate scoreboards and PA systems and they would not be qualified stenographers, especially in case of an emergency. One national association noted that the typical stenographer expense for a professional football game in Washington, DC, is about $550 per game. Similarly, one trade association representing venues estimated that the cost for a professional stenographer at a sporting event runs between $500 and $1,000 per game or event, the cost of which, they argued, would be unduly burdensome in many cases. Some commenters posited that schools that do not sell tickets to athletic events would be challenged to meet such expenses, in contrast to major college athletic programs and professional sports teams, which would be less likely to prevail using an ''undue burden'' defense.

Some venue owners and operators and other covered entities also argued that stadium size should not be the key consideration for whether scoreboard captioning will be required. Instead, these entities suggested that equipment already installed in the stadium, including necessary electrical equipment and backup power supply, should be the determining factor for whether captioning is mandated. Many commenters argued that the requirement to provide captioning should apply only to stadiums with scoreboards that meet the National Fire Protection Association (NFPA) National Fire Alarm Code. Commenters reported that NFPA 72 requires at least two independent and reliable power supplies for emergency information systems, including one source that is a generator or a battery sufficient to run the system in the event the primary power fails. Alternatively, some stadium designers and title II entities commented that the requirement should arise when the facility has at least one elevator providing firefighter emergency operation, along with approval of authorities with responsibility for fire safety. An organization concerned with fire safety codes commented that the Department lacks the expertise to regulate on this topic. Other commenters argued for flexibility in the requirements for providing captioning and contended that any requirement should apply only to stadiums constructed after the effective date of the regulation.

In the NPRM, the Department also asked whether the rule should address the specific means of captioning equipment, whether captioning should be provided through any effective means (*e.g.*, scoreboards, line boards, handheld devices, or other means), or whether some means, such as handheld devices, should be eliminated as options. This question elicited many comments from advocates for persons with disabilities as well as

from covered entities. Advocacy organizations and individuals with experience using handheld devices argued that such devices do not provide effective communication. These commenters noted that information is often delayed in the transmission to such devices, making them hard to use when following action on the playing field or in the event of an emergency when the crowd is already reacting to aural information provided over the PA system well before it is received on the handheld device.

Several venue owners and operators and others commented that handheld technology offers advantages of flexibility and portability so that it may be used successfully regardless of where in the facility the user is located, even when not in the line of sight of a scoreboard or other captioning system. Still other commenters urged the Department not to regulate in such a way as to limit innovation and use of such technology now and in the future. Cost considerations were included in comments from some stadium designers and venue owners and operators who reported that the cost of providing handheld systems is far less than the cost of providing real-time captioning on scoreboards, especially in facilities that do not currently have the capacity to provide real-time captions on existing equipment. Others noted that handheld technology is not covered by fire and safety model codes, including the NFPA, and thus would be more easily adapted into existing facilities if captioning were required by the Department.

The Department also asked about requiring open captioning of all public address announcements, rather than limiting the captioning requirement to safety and emergency information. A variety of advocates and persons with disabilities argued that all information broadcast over a PA system should be captioned in real time at all facilities in order to provide effective communication, and that a requirement only to provide emergency and safety information would not be sufficient. A few organizations representing persons with disabilities commented that installation of new systems should not be required, but that all systems within existing facilities that are capable of providing captioning should provide captioning of information to the maximum extent possible. Several organizations for persons with disabilities commented that all facilities should include in their safety planning measures a requirement that all aurally provided information for patrons with communication disabilities be captioned. Some advocates suggested that demand for captions will only increase as the number of deaf and hard of hearing persons grows with the aging of the general population and with increasing numbers of veterans returning from war with disabilities. Multiple commenters noted that the captioning would benefit others as well as those with communication disabilities.

By contrast, venue owners and operators and others commented that the action on the sports field is self-explanatory and does not require captioning. These commenters objected to an explicit requirement to provide real-time captioning for all information broadcast on the PA system at a sporting event. Other commenters objected to requiring captioning even for emergency and safety information over the scoreboard rather than through some other means. By contrast, venue operators, State government agencies, and some model code groups, including the NFPA, commented that emergency and safety information must be provided in an accessible format and that public safety is a paramount concern. Other commenters argued that the best method to deliver safety and emergency information would be television monitors showing local TV broadcasts with captions already mandated by the FCC. Some commenters posited that the most reliable information about a major emergency would be provided on the television news broadcasts. They argued that television monitors may be located throughout the facility, improving line of sight for patrons, some of whom might not be able to see the scoreboard from their seats or elsewhere in the facility. Some stadium designers, venue operators, and model code groups pointed out that video monitors are not regulated by the NFPA or other agencies, so that such monitors could be more easily provided. Video monitors may receive transmissions from within the facility and could provide real-time captions if there is the necessary software and equipment to feed the captioning signal to a closed video network within the facility. Several commenters suggested that using monitors would be preferable to requiring captions on the scoreboard if the regulation mandates real-time captioning. Some venue owners and operators argued that retrofitting existing stadiums with new systems could easily cost in the hundreds of thousands of dollars per scoreboard or system. Some stadium designers and others argued that captioning should be required only in stadiums built after the effective date of the regulation. For stadiums with existing systems that allow for real-time captioning, one commenter posited that dedicating the system exclusively to real-time captioning would lead to an annual loss of between two and three million dollars per stadium in revenue from advertising currently running in that space.

After carefully considering the wide range of public comments on this issue, the Department has concluded that the final rule will not provide additional requirements for effective communication or emergency information provided at sports stadiums at this

time. The 1991 title II and title III regulations and statutory requirements are not in any way affected by this decision. The decision to postpone rulemaking on this complex issue is based on a number of factors, including the multiple layers of existing regulations by various agencies and levels of government, and the wide array of information, requests, and recommendations related to developing technology offered by the public. The diversity of existing information and communication systems and other characteristics among sports stadiums also complicates the regulation of captioning. The Department has concluded that further consideration and review is prudent before it issues specific regulatory requirements.

Movie captioning. In the NPRM, the Department stated that options were being considered to require movie theater owners and operators to exhibit movies that are captioned for patrons who are deaf or hard of hearing. Captioning makes films accessible to individuals whose hearing is too limited to benefit from assistive listening devices. Both open and closed captioning are examples of auxiliary aids and services required under the Department's 1991 title III regulation. *See* 28 CFR 36.303(b)(1). Open captions are similar to subtitles in that the text is visible to everyone in the theater, while closed captioning displays the written text of the audio only to those individuals who request it.

In the NPRM, the Department also stated that options were being considered to require movie theater owners and operators to exhibit movies with video description,[3] a technology that enables individuals who are blind or have low vision to enjoy movies by providing a spoken interpretation of key visual elements of a movie, such as actions, settings, facial expressions, costumes, and scene changes. The descriptions are narrated and recorded onto an audiotape or disk that can be synchronized with the film as it is projected. An audio recording is an example of an auxiliary aid and service required under the Department's 1991 title III regulation. *See* 28 CFR 36.303(b)(2).

The NPRM stated that technological advances since the early 1990s have made open and closed captioning and video description for movies more readily available and effective and noted that the Department was considering options to require captioning and video description for movies exhibited by public accommodations. The NPRM also noted that the Department is aware that the movie industry is transitioning, in whole or in part, to movies in digital format and that movie theater owners and operators are beginning to purchase digital projectors. The Department noted in the NPRM that movie theater owners and operators with digital projectors may have available to them different capabilities than those without digital projectors. The Department sought comment regarding whether and how to require captioning and video description while the film industry makes this transition. In addition, the NPRM stated the Department's concern about the potential cost to exhibit captioned movies, noting that cost may vary depending upon whether open or closed captioning is used and whether or not digital projectors are used, and stated that the cost of captioning must stay within the parameters of the undue burden requirement in 28 CFR 36.303(a). The Department further noted that it understands the cost of video description equipment to be less than that for closed captioning. The Department then stated that it was considering the possibility of requiring public accommodations to exhibit all new movies in captioned format and with video description at every showing. The NPRM stated that the Department would not specify the types of captioning required, leaving such decisions to the discretion of the movie theater owners and operators.

In the NPRM, the Department requested public comment as to whether public accommodations should be required to exhibit all new movies in captioned format at every showing, whether it would be more appropriate to require captioning less frequently, and, if so, with what frequency captioning should be provided. The Department also inquired as to whether the requirement for captioning should be tied to the conversion of movies from film to the use of a digital format. The Department also asked for public comment regarding the exhibition of all new movies with narrative description, whether it would it be more appropriate to require narrative description less frequently, and whether narrative description of movies should be tied to the use of a digital format.

Representatives from the movie industry, a commenter from a non-profit organization, and a disability rights advocacy group provided information in their comments on the status of captioning and video description technology today as well as an update on the transition to digital cinema in the industry. A representative of major movie producers and distributors commented that traditionally open captions were created by ''burning'' the captions onto a special print of a selected movie, which the studios would make available to the exhibitors (movie theater owners and operators). Releases with open captions typically would be presented at special screenings. More recently, according to

[3] In the NPRM, the Department referred to this technology as ''narrative description.'' 73 FR 34508, 34531 (June 17, 2008). Several commenters informed the Department that the more accurate and commonly understood term is ''video description,'' even though the subject is movies, not video, and so the Department decided to employ that term.

this commenter, alternative methods have been developed for presenting movies with open captions, but their common feature is that the captions are visible to all theatergoers. Closed captioning is an innovation in technology that was first made available in a feature film presentation in late 1997. Closed captioning technology currently in use allows viewers to see captions using a clear panel that is mounted in front of the viewer's seat.[4] According to commenters from the industry, the panel reflects captions that are shown in reverse on an LED display in the back of the theater, with captions appearing on or near the movie image. Moviegoers may use this technology at any showing at a theater that has been equipped with the technology, so that the theater does not have to arrange limited special screenings.

Video description technology also has existed since 1997, according to a commenter who works with the captioning and video description industry. According to a movie industry commenter, video description requires the creation of a separate script written by specially trained writers called ''describers.'' As the commenter explained, a describer initially listens to the movie without watching it in order to approximate the experience of an audience member who is blind or has low vision. Using software to map out the pauses in the soundtrack, the describer writes a description in the space available. After an initial script is written for video description, it is edited and checked for timing, continuity, accuracy, and a natural flow. A narrator then records the new script to match the corresponding movie. This same industry commenter said that video description currently is provided in theaters through screens equipped with the same type of technology as that used for closed captioning. As commenters explained, technologies in use today deliver video descriptions via infrared or FM listening systems to headsets worn by individuals who are blind or have low vision.

According to the commenter representing major movie producers and distributors, the percentage of motion pictures produced with closed captioning by its member studios had grown to 88 percent of total releases by 2007; the percentage of motion pictures produced with open captioning by its member studios had grown to 78 percent of total releases by 2007; and the percentage of motion pictures provided with video description has ranged consistently between 50 percent and 60 percent of total releases. It is the movie producers and distributors, not the movie theater owners and operators, who determine what to caption and describe, the type of captioning to use, and the content of the captions and video description script. These same producers and distributors also assume the costs of captioning and describing movies. Movie theater owners and operators simply purchase the equipment to display the captions and play the video description in their auditoria.

The transition to digital cinema, considered by the industry to be one of the most profound advancements in motion picture production and technology of the last 100 years, will provide numerous advantages both for the industry and the audience. According to one commenter, currently there are sufficient standards and interim solutions to support captioning and video description now in digital format. Additionally, movie studios are supporting those efforts by providing accessibility tracks (captioning and video description) in many digital cinema content packages. Moreover, a group of industry commenters composed in pertinent part of members of the motion picture industry, the central standards organizations for this industry, and key digital equipment vendors, noted that they are participating in a joint venture to establish the remaining accessibility specifications and standards for access audio tracks. Access audio tracks are supplemental sound audio tracks for the hard of hearing and narrative audio tracks for individuals who have vision disabilities. According to a commenter and to industry documents, these standards were expected to be in place by spring 2009. According to a commenter, at that time, all of the major digital cinema equipment vendors were expected to have support for a variety of closed caption display and video description products. This same commenter stated that these technologies will be supported by the studios that produce and distribute feature films, by the theaters that show these films to the public, and by the full complement of equipment in the production, distribution, and display chain.

The initial investment for movie theater owners and operators to convert to digital cinema is expensive. One industry commenter estimated that converting theaters to digital projection costs between $70,000 and $100,000 per screen and that maintenance costs for digital projectors are estimated to run between $5,000 and $10,000 a year—approximately five times as expensive as the maintenance costs for film projectors. According to this same commenter, while there has been progress in making the conversion, only approximately 5,000 screens out of 38,794

[4] Other closed captioning technologies for movies that have been developed but are not in use at this time include hand-held displays similar to a PDA (personal digital assistant); eyeglasses fitted with a prism over one lens; and projected bitmap captions. The PDA and eyeglass systems use a wireless transmitter to send the captions to the display device.

nationwide have been converted, and the cost to make the remaining conversions involves a total investment of several billion dollars. According to another commenter, predictions as to when more than half of all screens will have been converted to digital projection are 10 years or more, depending on the finances of the movie theater owners and operators, the state of the economy, and the incentives supporting conversion. That said, according to one commenter who represents movie theater owners and operators, the majority of screens in the United States were expected to enter into agreements by the end of 2008 to convert to digital cinema. Most importantly, however, according to a few commenters, the systems in place today for captioning and video description will not become obsolete once a theater has converted to digital cinema but still can be used by the movie theater owner and operator to exhibit captions and video description. The only difference for a movie theater owner or operator will be the way the data is delivered to the captioning and video description equipment in place in an auditorium.

Despite the current availability of movies that are captioned and provide video description, movie theater owners and operators rarely exhibit the captions or descriptions. According to several commenters, less than 1 percent of all movies being exhibited in theaters are shown with captions.

Individuals with disabilities, advocacy groups, the representative from a non-profit, and representatives of State governments, including 11 State attorneys general, overwhelmingly supported issuance of a regulation requiring movie theater owners and operators to exhibit captioned and video described movies at all showings unless doing so would result in an undue burden or fundamental alteration of the goods and services offered by the public accommodation. In addition, this same group of commenters urged that any such regulation should be made effective now, and should not be tied to the conversion to digital cinema by the movie theater owners and operators. In support of such arguments, these commenters stated that the technology exists now to display movies with captions and video descriptions, regardless of whether the movie is exhibited on film or using digital cinema. Moreover, since the technology in use for displaying captions and video descriptions on film will be compatible with digital projection systems, they argued, there is no need to postpone implementation of a captioning or video description regulation until the conversion to digital has been made. Furthermore, since the conversion to digital may take years, commenters urged the Department to issue a regulation requiring captioning and video description now, rather than several years from now.

Advocacy groups and the 11 State attorneys general also requested that any regulation include factors describing what constitutes effective captioning and video description. Recommendations included requiring that captioning be within the same line of sight to the screen as the movie so that individuals who are deaf or hard of hearing can watch the movie and read the captions at the same time; that the captioning be accessible from each seat; that the captions be of sufficient size and contrast to the background so as to be readable easily; and that the recent recommendations of the Telecommunications and Electronics and Information Technology Advisory Committee Report to the Access Board that captions be ''timely, accurate, complete, and efficient'' [5] also be included.

The State attorneys general supported the Department's statement in the NPRM that the Department did not anticipate specifying which type of captioning to provide or what type of technology to use to provide video description, but would instead leave that to the discretion of the movie theater owners and operators. These State attorneys general opined that such discretion in the selection of the type of technology was consistent with the statutory and regulatory scheme of the ADA and would permit any new regulation to keep pace with future advancements in captioning and video description technology. These same commenters stated that such discretion may result in a mixed use of both closed captioning and open captioning, affording more choices both for the movie theater owners and operators and for individuals who are deaf or hard of hearing.

The representatives from the movie theater industry strongly urged the Department against issuing a regulation requiring captioning or video description. These commenters argued that the legislative history of the ADA expressly precluded regulating in the area of captioning. (These same commenters were silent with regard to video description on this issue.) The industry commenters also argued that to require movie theater owners and operators to exhibit captioned and video described movies would constitute a fundamental alteration in the nature of the goods and services offered by the movie theater owners and operators. In addition, some industry commenters argued that any such regulation by the Department would be inconsistent with the Access Board's guidelines. Also, these commenters noted the progress that has been made in the

[5] *Refreshed Accessibility Standards and Guidelines in Telecommunications and Electronic and Information Technology* (April 2008), available at *http://www.access-board.gov/sec508/refresh/report/* (last visited June 24, 2010).

industry in making cinema more accessible even though there is no mandate to caption or describe movies, and they questioned whether any mandate is necessary. Finally, all the industry commenters argued that to require captioning or video description in 100 percent of movie theater screens for all showings would constitute an undue burden.

The comments have provided the Department with significant information on the state of the movie industry with regard to the availability of captioning and video description, the status of closed captioning technology, and the status of the transition to digital cinema. The Department also has given due consideration to the comments it has received from individuals, advocacy groups, governmental entities, and representatives of the movie industry. Recently, the United States Court of Appeals for the Ninth Circuit held that the ADA requires a chain of movie theaters to exhibit movies with closed captioning and video description unless the theaters can show that to do so would amount to a fundamental alteration or undue burden. *Arizona ex rel. Goddard* v. *Harkins Amusement Enterprises, Inc.*, 603 F.3d 666 (9th Cir. 2010). However, rather than issue specific regulatory text at this time, the Department has determined that it should obtain additional information regarding issues raised by commenters that were not contemplated at the time of the 2008 NPRM, supplemental technical information, and updated information regarding the current and future status of the conversion to digital cinema by movie theater owners and operators. To this end, the Department is planning to engage in rulemaking relating specifically to movie captioning under the ADA in the near future.

Section 36.304 Removal of Barriers

With the adoption of the 2010 Standards, an important issue that the Department must address is the effect that the new (referred to as ''supplemental'') and revised ADA Standards will have on the continuing obligation of public accommodations to remove architectural, transportation, and communication barriers in existing facilities to the extent that it is readily achievable to do so. *See* 42 U.S.C. 12182(b)(2)(A)(iv). This issue was not addressed in the 2004 ADAAG because it was outside the scope of the Access Board's statutory authority under the ADA and section 502 of the Rehabilitation Act of 1973. *See* 29 U.S.C. 792(b)(3)(A)–(B) (authorizing the Access Board to establish and maintain minimum guidelines for the standards issued pursuant to the Architectural Barriers Act of 1968 and titles II and III of the ADA). Responsibility for implementing title III's requirement that public accommodations eliminate barriers in existing facilities where such removal is readily achievable rests solely with the Department. The term ''existing facility'' is defined in §36.104 of the final rule. This definition is discussed in more detail above. *See* Appendix A discussion of definitions (§36.104).

The requirements for barrier removal by public accommodations are established in the Department's title III regulation. 28 CFR 36.304. Under this regulation, the Department used the 1991 Standards as a guide to identify what constitutes an architectural barrier, as well as the specifications that covered entities must follow in making architectural changes to remove the barrier to the extent that such removal is readily achievable. 28 CFR 36.304(d); 28 CFR part 36, app. A (2009). With adoption of the final rule, public accommodations will now be guided by the 2010 Standards, defined in §36.104 as the 2004 ADAAG and the requirements contained in subpart D of 28 CFR part 36.

The 2010 Standards include technical and scoping specifications for a number of elements that were not addressed specifically in the 1991 Standards; these new requirements were identified as ''supplemental requirements'' in the NPRM. The 2010 Standards also include revisions to technical or scoping specifications for certain elements that were addressed in the 1991 Standards, *i.e.*, elements for which there already were technical and scoping specifications. Requirements for which there are revised technical or scoping specifications in the 2010 Standards are referred to in the NPRM as ''incremental changes.''

The Department expressed concern that requiring barrier removal for incremental changes might place unnecessary cost burdens on businesses that already had removed barriers in existing facilities in compliance with the 1991 Standards. With this rulemaking, the Department sought to strike an appropriate balance between ensuring that individuals with disabilities are provided access to facilities and mitigating potential financial burdens from barrier removal on existing places of public accommodation that satisfied their obligations under the 1991 Standards.

In the NPRM, the Department proposed several potential additions to §36.304(d) that might reduce such financial burdens. First, the Department proposed a safe harbor for elements in existing facilities that were compliant with the 1991 Standards. Under this approach, an element that is not altered after the effective date of the 2010 Standards and that complies with the scoping and technical requirements for that element in the 1991 Standards would not be required to undergo modification to comply with the 2010 Standards to satisfy the ADA's barrier removal obligations. The public accommodation would thus be deemed to have met its barrier removal obligation with respect to that element.

The Department received many comments on this issue during the 60-day public comment period. After consideration of all relevant information presented on the issue, it is the Department's view that this element-by-element safe harbor provision should be retained in the final rule. This issue is discussed further below.

Second, the NPRM proposed several exceptions and exemptions from certain supplemental requirements to mitigate the barrier removal obligations of existing play areas and recreation facilities under the 2004 ADAAG. These proposals elicited many comments from both the business and disability communities. After consideration of all relevant information presented on the issue, it is the Department's view that these exceptions and exemptions should not be retained in the final rule. The specific proposals and comments, and the Department's conclusions, are discussed below.

Third, the NPRM proposed a new safe harbor approach to readily achievable barrier removal as applied to qualified small businesses. This proposed small business safe harbor was based on suggestions from small business advocacy groups that requested clearer guidance on the barrier removal obligations for small businesses. According to these groups, the Department's traditional approach to barrier removal disproportionately affects small businesses. They argued that most small businesses owners neither are equipped to understand the ADA Standards nor can they afford the architects, consultants, and attorneys that might provide some level of assurance of compliance with the ADA. For these same reasons, these commenters contended, small business owners are vulnerable to litigation, particularly lawsuits arising under title III, and often are forced to settle because the ADA Standards' complexity makes inadvertent noncompliance likely, even when a small business owner is acting in good faith, or because the business cannot afford the costs of litigation.

To address these and similar concerns, the NPRM proposed a level of barrier removal expenditures at which qualified small businesses would be deemed to have met their readily achievable barrier removal obligations for certain tax years. This safe harbor would have provided some protection from litigation because compliance could be assessed easily. Such a rule, the Department believed, also could further accessibility, because qualified small businesses would have an incentive to incorporate barrier removal into short- and long-term planning. The Department recognized that a qualified small business safe harbor would be a significant change to the Department's title III enforcement scheme. Accordingly, the Department sought comment on whether such an approach would further the aims underlying the statute's barrier removal provisions, and, if so, the appropriate parameters of the provision.

After consideration of the many comments received on this issue, the Department has decided not to include a qualified small business safe harbor in the final rule. This decision is discussed more fully below.

Element-by-element safe harbor for public accommodations. Public accommodations have a continuing obligation to remove certain architectural, communications, and transportation barriers in existing facilities to the extent readily achievable. 42 U.S.C. 12182(b)(2)(A)(iv). Because the Department uses the ADA Standards as a guide to identifying what constitutes an architectural barrier, the 2010 Standards, once they become effective, will provide a new reference point for assessing an entity's barrier removal obligations. The 2010 Standards introduce technical and scoping specifications for many elements that were not included in the 1991 Standards. Accordingly, public accommodations will have to consider these supplemental requirements when evaluating whether there are covered barriers in existing facilities, and, if so, remove them to the extent readily achievable. Also included in the 2010 Standards are revised technical and scoping requirements for elements that were addressed in the 1991 Standards. These incremental changes were made to address technological changes that have occurred since the promulgation of the 1991 Standards, to reflect additional study by the Access Board, and to harmonize ADAAG requirements with the model codes.

In the NPRM, the Department sought input on a safe harbor in proposed §36.304(d)(2) intended to address concerns about the practical effects of the incremental changes on public accommodations' readily achievable barrier removal obligations. The proposed element-by-element safe harbor provided that in existing facilities elements that are, as of the effective date of the 2010 Standards, fully compliant with the applicable technical and scoping requirements in the 1991 Standards, need not be modified or retrofitted to meet the 2010 Standards, until and unless those elements are altered. The Department posited that it would be an inefficient use of resources to require covered entities that have complied with the 1991 Standards to retrofit already compliant elements when the change might only provide a minimal improvement in accessibility. In addition, the Department was concerned that covered entities would have a strong disincentive for voluntary compliance if every time the applicable standards were revised covered entities would be required once again to modify elements to keep pace with new requirements. The Department recognized that revisions to some elements might confer a significant benefit on some individuals with disabilities and because of

the safe harbor these benefits would be unavailable until the facility undergoes alterations.

The Department received many comments on this issue from the business and disability communities. Business owners and operators, industry groups and trade associations, and business advocacy organizations strongly supported the element-by-element safe harbor. By contrast, disability advocacy organizations and individuals commenting on behalf of the disability community were opposed to this safe harbor with near unanimity.

Businesses and business groups agreed with the concerns outlined by the Department in the NPRM, and asserted that the element-by-element safe harbor is integral to ensuring continued good faith compliance efforts by covered entities. These commenters argued that the financial cost and business disruption resulting from retrofitting elements constructed or previously modified to comply with 1991 Standards would be detrimental to nearly all businesses and not readily achievable for most. They contended that it would be fundamentally unfair to place these entities in a position where, despite full compliance with the 1991 Standards, the entities would now, overnight, be vulnerable to barrier removal litigation. They further contended that public accommodations will have little incentive to undertake large barrier removal projects or incorporate barrier removal into long-term planning if there is no assurance that the actions taken and money spent for barrier removal would offer some protection from litigation. One commenter also pointed out that the proposed safe harbor would be consistent with practices under other Federal accessibility standards, including the Uniform Federal Accessibility Standards (UFAS) and the ADAAG.

Some business commenters urged the Department to expand the element-by-element safe harbor to include supplemental requirements. These commenters argued that imposing the 2010 Standards on existing facilities will provide a strong incentive for such facilities to eliminate some elements entirely, particularly where the element is not critical to the public accommodation's business or operations (*e.g.,* play areas in fast food restaurants) or the cost of retrofitting is significant. Some of these same commenters urged the Department to include within the safe harbor those elements not covered by the 1991 Standards, but which an entity had built in compliance with State or local accessibility laws. Other commenters requested safe harbor protection where a business had attempted barrier removal prior to the establishment of technical and scoping requirements for a particular element (*e.g.,* play area equipment) if the business could show that the element now covered by the 2010 Standards was functionally accessible.

Other commenters noted ambiguity in the NPRM as to whether the element-by-element safe harbor applies only to elements that comply fully with the 1991 Standards, or also encompasses elements that comply with the 1991 Standards to the extent readily achievable. Some commenters proposed that the safe harbor should exist in perpetuity—that an element subject to a safe harbor at one point in time also should be afforded the same protection with respect to all future revisions to the ADA Standards (as with many building codes). These groups contended that allowing permanent compliance with the 1991 Standards will ensure readily accessible and usable facilities while also mitigating the need for expensive and time-consuming documentation of changes and maintenance.

A number of commenters inquired about the effect of the element-by-element safe harbor on elements that are not in strict compliance with the 1991 Standards, but conform to the terms of settlement agreements or consent decrees resulting from private litigation or Federal enforcement actions. These commenters noted that litigation or threatened litigation often has resulted in compromise among parties as to what is readily achievable. Business groups argued that facilities that have made modifications subject to those negotiated agreements should not be subject to the risk of further litigation as a result of the 2010 Standards.

Lastly, some business groups that supported the element-by-element safe harbor nevertheless contended that a better approach would be to separate barrier removal altogether from the 2010 Standards, such that the 2010 Standards would not be used to determine whether access to an existing facility is impeded by architectural barriers. These commenters argued that application of the 2010 Standards to barrier removal obligations is contrary to the ADA's directive that barrier removal is required only where ''easily accomplishable and able to be carried out without much difficulty or expense,'' 42 U.S.C. 12181(9).

Nearly all commenters from the disability community objected to the proposed element-by-element safe harbor. These commenters asserted that the adoption of this safe harbor would permit and sanction the retention of outdated access standards even in cases where retrofitting to the 2010 Standards would be readily achievable. They argued that title III's readily achievable defense is adequate to address businesses' cost concerns, and rejected the premise that requiring businesses to retrofit currently compliant elements would be an inefficient use of resources where readily achievable to do so. The proposed regulations, these commenters asserted, incorporate advances in

technology, design, and construction, and reflect congressional and societal understanding that accessibility is not a static concept and that the ADA is a civil rights law intended to maximize accessibility. Additionally, these commenters noted that since the 2004 revision of the ADAAG will not be the last, setting a precedent of safe harbors for compliant elements will have the effect of preserving and protecting layers of increasingly outdated accessibility standards.

Many commenters objected to the Department's characterization of the requirements subject to the safe harbor as reflecting only incremental changes and asserted that many of these incremental changes will result in significantly enhanced accessibility at little cost. The requirement concerning side-reach ranges was highlighted as an example of such requirements. Commenters from the disability community argued that the revised maximum side-reach range (from 54 inches to 48 inches) will result in a substantial increase in accessibility for many persons with disabilities—particularly individuals of short stature, for whom the revised reach range represents the difference between independent access to many features and dependence—and that the revisions should be made where readily achievable to do so. Business commenters, on the other hand, contended that application of the safe harbor to this requirement is critical because retrofitting items, such as light switches and thermostats often requires work (*e.g.*, rewiring, patching, painting, and re-wallpapering), that would be extremely burdensome for entities to undertake. These commenters argued that such a burden is not justified where many of the affected entities already have retrofitted to meet the 1991 Standards.

Some commenters that were opposed to the element-by-element safe harbor proposed that an entity's past efforts to comply with the 1991 Standards might appropriately be a factor in the readily achievable analysis. Several commenters proposed a temporary 5-year safe harbor that would provide reassurance and stability to covered entities that have recently taken proactive steps for barrier removal, but would also avoid the problems of preserving access deficits in perpetuity and creating multiple standards as subsequent updates are adopted.

After consideration of all relevant information presented on this issue during the comment period, the Department has decided to retain the proposed element-by-element safe harbor. Title III's architectural-barrier provisions place the most significant requirements of accessibility on new construction and alterations. The aim is to require businesses to make their facilities fully accessible at the time they are first constructing or altering those facilities, when burdens are less and many design elements will necessarily be in flux, and to impose a correspondingly lesser duty on businesses that are not changing their facilities. The Department believes that it would be consistent with this statutory structure not to change the requirements for design elements that were specifically addressed in our prior standards for those facilities that were built or altered in full compliance with those standards. The Department similarly believes it would be consistent with the statutory scheme not to change the requirements for design elements that were specifically addressed in our prior standards for those existing facilities that came into full compliance with those standards. Accordingly, the final rule at §36.304(d)(2)(i) provides that elements that have not been altered in existing facilities on or after March 15, 2012 and that comply with the corresponding technical and scoping specifications for those elements in the 1991 Standards are not required to be modified in order to comply with the requirements set forth in the 2010 Standards. The safe harbor adopted is consistent in principle with the proposed provision in the NPRM, and reflects the Department's determination that this approach furthers the statute's barrier removal provisions and promotes continued good-faith compliance by public accommodations.

The element-by-element safe harbor adopted in this final rule is a narrow one. The Department recognizes that this safe harbor will delay, in some cases, the increased accessibility that the incremental changes would provide and that for some individuals with disabilities the impact may be significant. This safe harbor, however, is not a blanket exemption for every element in existing facilities. Compliance with the 1991 Standards is determined on an element-by-element basis in each existing facility.

Section 36.304(d)(2)(ii)(A) provides that prior to the compliance date of the rule March 15, 2012, noncompliant elements that have not been altered are obligated to be modified to the extent readily achievable to comply with the requirements set forth in the 1991 Standards or the 2010 Standards. Section 36.304(d)(2)(ii)(B) provides that after the date the 2010 Standards take effect (18 months after publication of the rule), noncompliant elements that have not been altered must be modified to the extent readily achievable to comply with the requirements set forth in the 2010 Standards. Noncomplying newly constructed and altered elements may also be subject to the requirements of §36.406(a)(5).

The Department has not expanded the scope of the element-by-element safe harbor beyond those elements subject to the incremental changes. The Department has added §36.304(d)(2)(iii), explicitly clarifying that existing elements subject to supplemental requirements for which scoping and technical specifications are provided for the first time

in the 2010 Standards (*e.g.*, play area requirements) are not covered by the safe harbor and, therefore, must be modified to comply with the 2010 Standards to the extent readily achievable. Section 36.304(d)(2)(iii) also identifies the elements in the 2010 Standards that are not eligible for the element-by-element safe harbor. The safe harbor also does not apply to the accessible routes not previously scoped in the 1991 standards, such as those required to connect the boundary of each area of sport activity, including soccer fields, basketball courts, baseball fields, running tracks, skating rinks, and areas surrounding a piece of gymnastic equipment. *See* Advisory note to section F206.2.2 of the 2010 Standards. The resource and fairness concerns underlying the element-by-element safe harbor are not implicated by barrier removal involving supplemental requirements. Public accommodations have not been subject previously to technical and scoping specifications for these supplemental requirements. Thus, with respect to supplemental requirements, the existing readily achievable standard best maximizes accessibility in the built environment without imposing unnecessary burdens on public accommodations.

The Department also has declined to expand the element-by-element safe harbor to cover existing elements subject to supplemental requirements that also may have been built in compliance with State or local accessibility laws. Measures taken to remove barriers under a Federal accessibility provision logically must be considered in regard to Federal standards, in this case the 2010 Standards. This approach is based on the Department's determination that reference to ADA Standards for barrier removal will promote certainty, safety, and good design while still permitting slight deviations through readily achievable alternative methods. The Department continues to believe that this approach provides an appropriate and workable framework for implementation of title III's barrier removal provisions. Because compliance with State or local accessibility codes is not a reliable indicator of effective access for purposes of the ADA Standards, the Department has decided not to include reliance on such codes as part of the safe harbor provision.

Only elements compliant with the 1991 Standards are eligible for the safe harbor. Thus, where a public accommodation attempted barrier removal but full compliance with the 1991 Standards was not readily achievable, the modified element does not fall within the scope of the safe harbor provision. A public accommodation at any point in time must remove barriers to the extent readily achievable. For existing elements, for which removal is not readily achievable at any given time, the public accommodation must provide its goods, services, facilities, privileges, advantages, or accommodations through alternative methods that are readily achievable. *See* 42 U.S.C. 12182(b)(2)(A)(iv), (v).

One-time evaluation and implementation of the readily achievable standard is not the end of the public accommodation's barrier-removal obligation. Public accommodations have a continuing obligation to reevaluate barrier removal on a regular basis. For example, if a public accommodation identified barriers under the 1991 Standards but did not remove them because removal was not readily achievable based on cost considerations, it has a continuing obligation to remove these barriers if the economic considerations for the public accommodation change. The fact that the public accommodation has been providing its goods or services through alternative methods does not negate the continuing obligation to assess whether removal of the barrier at issue has become readily achievable. Public accommodations should incorporate consideration of their continuing barrier removal obligations in both short-term and long-term business planning.

The Department notes that commenters across the board expressed concern with recordkeeping burdens implicated by the element-by-element safe harbor. Businesses noted the additional costs and administrative burdens associated with identifying elements that fall within the element-by-element safe harbor, as well as tracking, documenting, and maintaining data on installation dates. Disability advocates expressed concern that varying compliance standards will make enforcement efforts more difficult, and urged the Department to clarify that title III entities bear the burden of proof regarding entitlement to safe harbor protection. The Department emphasizes that public accommodations wishing to benefit from the element-by-element safe harbor must demonstrate their safe harbor eligibility. The Department encourages public accommodations to take appropriate steps to confirm and document the compliance of existing elements with the 1991 Standards. Finally, while the Department has decided not to adopt in this rulemaking the suggestion by some commenters to make the protection afforded by the element-by-element safe harbor temporary, the Department believes this proposal merits further consideration. The Department, therefore, will continue to evaluate the efficacy and appropriateness of a safe harbor expiration or sunset provision.

Application to specific scenarios raised in comments. In response to the NPRM, the Department received a number of comments that raised issues regarding application of the element-by-element safe harbor to particular situations. Business commenters requested guidance on whether the replacement for a broken or malfunctioning element that is covered by the 1991 Standards

would have to comply with the 2010 Standards. These commenters expressed concern that in some cases replacement of a broken fixture might necessitate moving a number of other accessible fixtures (such as in a bathroom) in order to comply with the fixture and space requirements of the 2010 Standards. Others questioned the effect of the new standards where an entity replaces an existing element currently protected by the safe harbor provision for water or energy conservation reasons. The Department intends to address these types of scenarios in technical guidance.

Effective date for barrier removal. Several commenters expressed concern that the NPRM did not propose a transition period for applying the 2004 ADAAG to barrier removal in existing facilities in cases where the safe harbors do not apply. These commenters argued that for newly covered elements, they needed time to hire attorneys and consultants to assess the impact of the new requirements, determine whether they need to make additional retrofits, price those retrofits, assess whether the change actually is ''readily achievable,'' obtain approval for the removal from owners who must pay for the changes, obtain permits, and then do the actual work. The commenters recognized that there may be some barrier removal actions that require little planning, but stated that other actions cost significantly more and require more budgeting, planning, and construction time.

Barrier removal has been an ongoing requirement that has applied to public accommodations since the original regulation took effect on January 26, 1992. The final rule maintains the existing regulatory provision that barrier removal does not have to be undertaken unless it is ''readily achievable.'' The Department has provided in §36.304(d)(2)(ii)(B) that public accommodations are not required to apply the 2010 Standards to barrier removal until 18 months after the publication date of this rule. It is the Department's view that 18 months is a sufficient amount of time for application of the 2010 Standards to barrier removal for those elements not subject to the safe harbor. This is also consistent with the compliance date the Department has specified for applying the 2010 Standards to new construction and alterations.

Reduced scoping for play areas and other recreation facilities.

Play areas. The Access Board published final guidelines for play areas in October 2000. 65 FR 62498 (Oct. 18, 2000). The guidelines include requirements for ground-level and elevated play components, accessible routes connecting the components, accessible ground surfaces, and maintenance of those surfaces. They have been referenced in Federal playground construction and safety guidelines and in some State and local codes and have been used voluntarily when many play areas across the country have been altered or constructed.

In adopting the 2004 ADAAG (which includes the play area guidelines published in 2000), the Department acknowledges both the importance of integrated, full access to play areas for children and parents with disabilities as well as the need to avoid placing an untenable fiscal burden on businesses. Consequently, the Department asked seven questions in the NPRM related to existing play areas. Two questions related to safe harbors: one on the appropriateness of a general safe harbor for existing play areas and another on public accommodations that have complied with State or local standards specific to play areas. The others related to reduced scoping, limited exemptions, and whether there is a ''tipping point'' at which the costs of compliance with supplemental requirements would be so burdensome that a public accommodation would shut down a program rather than comply with the new requirements. In the nearly 100 comments received on title III play areas, the majority of commenters strongly opposed all safe harbors, exemptions, and reductions in scoping, and questioned the feasibility of determining a tipping point. A smaller number of commenters advocated for a safe harbor from compliance with the 2004 ADAAG play area requirements along with reduced scoping and exemptions for both readily achievable barrier removal and alterations.

Commenters were split as to whether the Department should exempt owners and operators of public accommodations from compliance with the supplemental requirements for play areas and recreation facilities and instead continue to determine accessibility in these facilities on a case-by-case basis under existing law. Many commenters were of the view that the exemption was not necessary because concerns of financial burden are addressed adequately by the defenses inherent in the standard for what constitutes readily achievable barrier removal. A number of commenters found the exemption inappropriate because no standards for play areas previously existed. Commenters also were concerned that a safe harbor applicable only to play areas and recreation facilities (but not to other facilities operated by a public accommodation) would create confusion, significantly limit access for children and parents with disabilities, and perpetuate the discrimination and segregation individuals with disabilities face in the important social arenas of play and recreation—areas where little access has been provided in the absence of specific standards. Many commenters suggested that instead of an exemption, the Department should provide guidance on barrier removal with respect to play areas and other recreation facilities.

Several commenters supported the exemption, mainly on the basis of the cost of barrier removal. More than one commenter noted that the most expensive aspect of barrier removal on existing play areas is the surfaces for the accessible routes and use zones. Several commenters expressed the view that where a play area is ancillary to a public accommodation (*e.g.*, in quick service restaurants or shopping centers), the play area should be exempt from compliance with the supplemental requirements because barrier removal would be too costly, and as a result, the public accommodation might eliminate the area.

The Department has been persuaded that the ADA's approach to barrier removal, the readily achievable standard, provides the appropriate balance for the application of the 2010 Standards to existing play areas. Thus, in existing playgrounds, public accommodations will be required to remove barriers to access where these barriers can be removed without much difficulty or expense.

The NPRM asked if there are State and local standards specifically regarding play and recreation area accessibility and whether facilities currently governed by, and in compliance with, such State and local standards or codes should be subject to a safe harbor from compliance with similar applicable requirements in the 2004 ADAAG. The Department also requested comments on whether it would be appropriate for the Access Board to consider the implementation of guidelines that would extend such a safe harbor to play and recreation areas undertaking alterations. In response, no comprehensive State or local codes were identified, and commenters generally noted that because the 2004 ADAAG contained comprehensive accessibility requirements for these unique areas, public accommodations should not be afforded a safe harbor from compliance with them when altering play and recreation areas. The Department is persuaded by these comments that there is insufficient basis to apply a safe harbor for readily achievable barrier removal or alterations for play areas built in compliance with State or local laws.

In the NPRM, the Department requested that public accommodations identify a ''tipping point'' at which the costs of compliance with the supplemental requirements for existing play areas would be so burdensome that the entity simply would shut down the playground. In response, no tipping point was identified. Some commenters noted, however, that the scope of the requirements may create the choice between wholesale replacement of play areas and discontinuance of some play areas, while others speculated that some public accommodations may remove play areas that are merely ancillary amenities rather than incur the cost of barrier removal under the 2010 Standards. The Department has decided that the comments did not establish any clear tipping point and therefore that no regulatory response is appropriate in this area.

The NPRM also asked for comment about the potential effect of exempting existing play areas of less than 1,000 square feet in size from the requirements applicable to play areas. Many trade and business associations favored exempting these small play areas, with some arguing that where the play areas are only ancillary amenities, the cost of barrier removal may dictate that they be closed down. Some commenters sought guidance on the definition of a 1,000-square-foot play area, seeking clarification that seating and bathroom spaces associated with a play area are not included in the size definition. Disability rights advocates, by contrast, overwhelmingly opposed this exemption, arguing that these play areas may be some of the few available in a community; that restaurants and day care facilities are important places for socialization between children with disabilities and those without disabilities; that integrated play is important to the mission of day care centers and that many day care centers and play areas in large cities, such as New York City, have play areas that are less than 1,000 square feet in size; and that 1,000 square feet was an arbitrary size requirement.

The Department agrees that children with disabilities are entitled to access to integrated play opportunities. However, the Department is aware that small public accommodations are concerned about the costs and efforts associated with barrier removal. The Department has given careful consideration as to how best to insulate small entities from overly burdensome costs and undertakings and has concluded that the existing readily achievable standard, not a separate exemption, is an effective and employable method by which to protect these entities. Under the existing readily achievable standard, small public accommodations would be required to comply only with the scoping and technical requirements of the 2010 Standards that are easily accomplishable and able to be carried out without much difficulty or expense. Thus, concerns about prohibitive costs and efforts clearly are addressed by the existing readily achievable standard. Moreover, as evidenced by comments inquiring as to how 1,000-square-foot play areas are to be measured and complaining that the 1,000-square-foot cut-off is arbitrary, the exemption posited in the NPRM would have been difficult to apply. Finally, a separate exemption would have created confusion as to whether, or when, to apply the exemption or the readily achievable standard. Consequently, the Department has decided that an exemption, separate and apart from the readily achievable

standard, is not appropriate or necessary for small private play areas.

In the NPRM, the Department requested public comment as to whether existing play areas should be permitted to substitute additional ground-level play components for the elevated play components that they otherwise would have been required to make accessible. Most commenters opposed this substitution because the guidelines as well as considerations of ''readily achievable barrier removal'' inherently contain the flexibility necessary for a variety of situations. Such commenters also noted that the Access Board adopted extensive guidelines with ample public input, including significant negotiation and balancing of costs. In addition, commenters advised that including additional ground level play components might result in higher costs because more accessible route surfaces might be required. A limited number of commenters favored substitution. The Department is persuaded by these comments that the proposed substitution of elements may not be beneficial. The current rules applicable to readily achievable barrier removal will be used to determine the number and type of accessible elements appropriate for a specific facility.

In the NPRM, the Department requested public comment on whether it would be appropriate for the Access Board to consider issuing guidelines for alterations to play and recreation facilities that would permit reduced scoping of accessible components or substitution of ground level play components in lieu of elevated play components. The Department received little input on this issue, and most commenters disfavored the suggestion. One commenter that supported this approach conjectured that it would encourage public accommodations to maintain and improve their playgrounds as well as provide more accessibility. The Department is persuaded that it is not necessary to ask the Access Board to revisit this issue.

The NPRM also asked whether only one play area of each type should be required to comply at existing sites with multiple play areas and whether there are other select requirements applicable to play areas in the 2004 ADAAG for which the Department should consider exemptions or reduced scoping. Some commenters were opposed to the concept of requiring compliance at one play area of each type at a site with multiple play areas, citing lack of choice and ongoing segregation of children and adults with disabilities. Other commenters who supported an exemption and reduced scoping for alterations noted that the play equipment industry has adjusted to, and does not take issue with, the provisions of the 2004 ADAAG; however, they asked for some flexibility in the barrier removal requirements as applied to play equipment, arguing that augmentation of the existing equipment and installation of accessible play surfacing equates to wholesale replacement of the play equipment. The Department is persuaded that the current rules applicable to readily achievable barrier removal should be used to decide which play areas must comply with the supplemental requirements presented in the 2010 Standards.

Swimming pools, wading pools, saunas, and steam rooms. Section 36.304(d)(3)(ii) in the NPRM specified that for measures taken to comply with the barrier removal requirements, existing swimming pools with at least 300 linear feet of swimming pool wall would need to provide only one accessible means of entry that complies with section 1009.2 or section 1009.3 of the 2004 ADAAG, instead of the two means required for new construction. Commenters opposed the Department's reducing the scoping from that required in the 2004 ADAAG. The following were among the factors cited in comments: that swimming is a common therapeutic form of exercise for many individuals with disabilities; that the cost of a swimming pool lift or other options for pool access is readily achievable and can be accomplished without much difficulty or expense; and that the readily achievable standard already provides public accommodations with a means to reduce their scoping requirements. A few commenters cited safety concerns resulting from having just one accessible means of access, and stated that because pools typically have one ladder for every 75 linear feet of pool wall, they should have more than one accessible means of egress. Other commenters either approved or did not oppose providing one accessible means of access for larger pools so long as a lift was used.

Section 36.304(d)(4)(ii) of the NPRM proposed to exempt existing swimming pools with fewer than 300 linear feet of swimming pool wall from the obligation to provide an accessible means of entry. Most commenters strongly opposed this provision, arguing that aquatic activity is a safe and beneficial form of exercise that is particularly appropriate for individuals with disabilities. Many argued that the readily achievable standard for barrier removal is available as a defense and is preferable to creating an exemption for pool operators for whom providing an accessible means of entry would be readily achievable. Commenters who supported this provision apparently assumed that providing an accessible means of entry would be readily achievable and that therefore the exemption is needed so that small pool operators do not have to provide an accessible means of entry.

The Department has carefully considered all the information available to it as well as the comments submitted on these two proposed exemptions for swimming pools owned or operated by title III entities. The Department acknowledges that swimming provides important therapeutic, exercise, and social

benefits for many individuals with disabilities and is persuaded that exemption of the vast majority of privately owned or operated pools from the 2010 Standards is neither appropriate nor necessary. The Department agrees with the commenters that title III already contains sufficient limitations on private entities' obligations to remove barriers. In particular, the Department agrees that those public accommodations that can demonstrate that making particular existing swimming pools accessible in accordance with the 2010 Standards is not readily achievable are sufficiently protected from excessive compliance costs. Thus, the Department has eliminated proposed §36.304(d)(3)(ii) and (d)(4)(ii) from the final rule.

Proposed §36.304(d)(4)(iii) would have exempted existing saunas and steam rooms that seat only two individuals from the obligation to remove barriers. This provision generated far fewer comments than the provisions for swimming pools. People who commented were split fairly evenly between those who argued that the readily achievable standard for barrier removal should be applied to all existing saunas and steam rooms and those who argued that all existing saunas and steam rooms, regardless of size, should be exempt from any barrier removal obligations. The Department considered these comments and has decided to eliminate the exemption for existing saunas and steam rooms that seat only two people. Such an exemption for saunas and steam rooms that seat only two people is unnecessary because the readily achievable standard provides sufficient protection against barrier removal that is overly expensive or too difficult. Moreover, the Department believes barrier removal likely will not be readily achievable for most of these small saunas because the nature of their prefabricated forms, which include built-in seats, make it either technically infeasible or too difficult or expensive to remove barriers. Consequently a separate exemption for saunas and steam rooms would have been superfluous. Finally, employing the readily achievable standard for small saunas and steam rooms is consistent with the Department's decisions regarding the proposed exemptions for play areas and swimming pools.

Several commenters also argued in favor of a specific exemption for existing spas. The Department notes that the technically infeasible and readily achievable defenses are applicable equally to existing spas and declines to adopt such an exemption.

The Department also solicited comment on the possibility of exempting existing wading pools from the obligation to remove barriers where readily achievable. Most commenters stated that installing a sloped entry in an existing wading pool is not likely to be feasible. Because covered entities are not required to undertake modifications that are not readily achievable or that would be technically infeasible, the Department believes that the rule as drafted provides sufficient protection from unwarranted expense to the operators of small existing wading pools. Other existing wading pools, particularly those large wading pools found in facilities such as water parks, must be assessed on a case-by-case basis. Therefore, the Department has not included an exemption for wading pools in its final rule.

The Department received several comments recommending that existing wave pools be exempt from barrier removal requirements. The commenters pointed out that existing wave pools often have a sloped entry, but do not have the handrails, level landings, or edge protection required for accessible entry. Because pool bottom slabs are structural, they could be subject to catastrophic failure if the soil pressure stability or the under slab dewatering are not maintained during the installation of these accessibility features in an already-constructed pool. They also argue that the only safe design scenario is to design the wheelchair ramp, pool lift, or transfer access in a side cove where the mean water level largely is unaffected by the wave action, and that this additional construction to an existing wave pool is not readily achievable. If located in the main pool area, the handrails, stanchions, and edge protection for sloped entry will become underwater hazards when the wave action is pushing onto pool users, and the use of a pool lift will not be safe without a means of stabilizing the person against the forces of the waves while using the lift. They also pointed out that a wheelchair would pose a hazard to all wave pool users, in that the wave action might push other pool users into the wheelchair or push the wheelchair into other pool users. The wheelchair would have to be removed from the pool after the user has entered (and has transferred to a flotation device if needed). The commenters did not specify if these two latter concerns are applicable to all wave pools or only to those with more aggressive wave action. The Department has decided that the issue of modifications to wave pools is best addressed on a case-by-case basis, and therefore, this rule does not contain barrier removal exemptions applicable to wave pools.

The Department also received comments suggesting that it is not appropriate to require two accessible means of entry to wave pools, lazy rivers, sand bottom pools, and other water amusements that have only one point of entry. The Department agrees. The 2010 Standards (at section 242.2, Exception 2) provide that only one means of entry is required for wave pools, lazy rivers, sand bottom pools, and other water amusement where user access is limited to one area.

Other recreation facilities. In the NPRM, the Department asked about a number of issues relating to recreation facilities, such as team or player seating areas, areas of sport activity, exercise machines, boating facilities, fishing piers and platforms, golf courses, and miniature golf courses. The Department asked for public comment on the costs and benefits of applying the 2004 ADAAG to these spaces and facilities. The discussion of the comments received by the Department on these issues and the Department's response to those comments can be found in either the section entitled ''Other Issues'' of Appendix A to this final rule.

Safe harbor for qualified small businesses. Section 36.304(d)(5) of the NPRM would have provided that a qualified small business would meet its obligation to remove architectural barriers where readily achievable for a given year if, during that tax year, the entity spent at least 1 percent of its gross revenue in the preceding tax year on measures undertaken in compliance with barrier removal requirements. Proposed §36.304(d)(5) has been omitted from the final rule.

The qualified small business safe harbor was proposed in response to small business advocates' requests for clearer guidance on when barrier removal is, and is not, readily achievable. According to these groups, the Department's approach to readily achievable barrier removal disproportionately affects small business for the following reasons: (1) Small businesses are more likely to operate in older buildings and facilities; (2) the 1991 Standards are too numerous and technical for most small business owners to understand and determine how they relate to State and local building or accessibility codes; and (3) small businesses are vulnerable to title III litigation and often are compelled to settle because they cannot afford the litigation costs involved in proving that an action is not readily achievable.

The 2010 Standards go a long way toward meeting the concern of small businesses with regard to achieving compliance with both Federal and State accessibility requirements, because the Access Board harmonized the 2004 ADAAG with the model codes that form the basis of most State and local accessibility codes. Moreover, the element-by-element safe harbor will ensure that unless and until a small business engages in alteration of affected elements, the small business will not have to retrofit elements that were constructed in compliance with the 1991 Standards or, with respect to elements in an existing facility, that were retrofitted to the 1991 Standards in conjunction with the business's barrier removal obligation prior to the rule's compliance date.

In proposing an additional safe harbor for small businesses, the Department had sought to promulgate a rule that would provide small businesses a level of certainty in short-term and long-term planning with respect to barrier removal. This in turn would benefit individuals with disabilities in that it would encourage small businesses to consider and incorporate barrier removal in their yearly budgets. Such a rule also would provide some protection, through diminished litigation risks, to small businesses that undertake significant barrier removal projects.

As proposed in the NPRM, the qualified small business safe harbor would provide that a qualified small business has met its readily achievable barrier removal obligations for a given year if, during that tax year, the entity has spent at least 1 percent of its gross revenue in the preceding tax year on measures undertaken to comply with title III barrier removal requirements. (Several small business advocacy organizations pointed out an inconsistency between the Department's description of the small business safe harbor in the Section-by-Section Analysis for §36.304 and the proposed regulatory text for that provision. The proposed regulatory text sets out the correct parameters of the proposed rule. The Department does not believe that the error substantively affected the comments on this issue. Some commenters noted the discrepancy and commented on both; others commented more generally on the proposal, so the discrepancy was not relevant.) The Department noted that the efficacy of any proposal for a small business safe harbor would turn on the following two determinations: (1) The definition of a qualified small business, and (2) the formula for calculating what percentage of revenue is sufficient to satisfy the readily achievable presumption.

As proposed in §36.104 in the NPRM, a ''qualified small business'' is a business entity defined as a small business concern under the regulations promulgated by the Small Business Administration (SBA) pursuant to the Small Business Act. *See* 15 U.S.C. 632; 13 CFR part 121. The Department noted that under section 3(a)(2)(C) of the Small Business Act, Federal departments and agencies are prohibited from prescribing a size standard for categorizing a business concern as a small business unless the department or agency has been authorized specifically to do so or has proposed a size standard in compliance with the criteria set forth in the SBA regulations, has provided an opportunity for public notice and comment on the proposed standard, and has received approval from the Administrator of the SBA to use the standard. *See* 15 U.S.C. 632(a)(2)(C). The Department further noted that Federal agencies or departments promulgating regulations relating to small businesses usually use SBA size criteria, and they otherwise must be prepared to justify how they arrived at a different standard and why the SBA's regulations do not satisfy the agency's program requirements. *See* 13 CFR 121.903. The ADA

does not define ''small business'' or specifically authorize the Department to prescribe size standards.

In the NPRM, the Department indicated its belief that the size standards developed by the SBA are appropriate for determining which businesses subject to the ADA should be eligible for the small business safe harbor provisions, and proposed to adopt the SBA's size standards to define small businesses for purposes of the qualified small business safe harbor. The SBA's small business size standards define the maximum size that a concern, together with all of its affiliates, may be if it is to be eligible for Federal small business programs or to be considered a small business for the purpose of other Federal agency programs. Concerns primarily engaged in the same kind of economic activity are classified in the same industry regardless of their types of ownership (such as sole proprietorship, partnership, or corporation). Approximately 1200 industries are described in detail in the North American Industry Classification System—United States, 2007. For most businesses, the SBA has established a size standard based on average annual receipts. The majority of places of public accommodation will be classified as small businesses if their average annual receipts are less than $6.5 million. However, some will qualify with higher annual receipts. The SBA small business size standards should be familiar to many if not most small businesses, and using these standards in the ADA regulation would provide some certainty to owners, operators, and individuals because the SBA's current size standards can be changed only after notice and comment rulemaking.

The Department explained in the NPRM that the choice of gross revenue as the basis for calculating the safe harbor threshold was intended to avoid the effect of differences in bookkeeping practices and to maximize accessibility consistent with congressional intent. The Department recognized, however, that entities with similar gross revenue could have very different net revenue, and that this difference might affect what is readily achievable for a particular entity. The Department also recognized that adopting a small business safe harbor would effect a marked change to the Department's current position on barrier removal. Accordingly, the Department sought public comment on whether a presumption should be adopted whereby qualifying small businesses are presumed to have done what is readily achievable for a given year if, during that tax year, the entity spent at least 1 percent of its gross revenue in the preceding tax year on barrier removal, and on whether 1 percent is an appropriate amount or whether gross revenue would be the appropriate measure.

The Department received many comments on the proposed qualified small business safe harbor. From the business community, comments were received from individual business owners and operators, industry and trade groups, and advocacy organizations for business and industry. From the disability community, comments were received from individuals, disability advocacy groups, and nonprofit organizations involved in providing services for persons with disabilities or involved in disability-related fields. The Department has considered all relevant matter submitted on this issue during the 60-day public comment period.

Small businesses and industry groups strongly supported a qualified small business safe harbor of some sort, but none supported the structure proposed by the Department in the NPRM. All felt strongly that clarifications and modifications were needed to strengthen the provision and to provide adequate protection from litigation.

Business commenters' objections to the proposed qualified small business safe harbor fell generally into three categories: (1) That gross revenue is an inappropriate and inaccurate basis for determining what is readily achievable by a small business since it does not take into account expenses that may result in a small business operating at a loss; (2) that courts will interpret the regulation to mean that a small business *must* spend 1 percent of gross revenue each year on barrier removal, *i.e.*, that expenditure of 1 percent of gross revenue on barrier removal is always ''readily achievable''; and (3) that a similar misinterpretation of the 1 percent gross revenue concept, *i.e.*, that 1 percent of gross revenue is always ''readily achievable,'' will be applied to public accommodations that are not small businesses and that have substantially larger gross revenue. Business groups also expressed significant concern about the recordkeeping burdens they viewed as inherent in the Department's proposal.

Across the board, business commenters objected to the Department's proposed use of gross revenue as the basis for calculating whether the small business safe harbor has been met. All contended that 1 percent of gross revenue is too substantial a trigger for safe harbor protection and would result in barrier removal burdens far exceeding what is readily achievable or ''easily accomplishable and able to be carried out without much difficulty or expense.'' 42 U.S.C. 12181(9). These commenters further pointed out that gross revenue and receipts vary considerably from industry to industry depending on the outputs sold in each industry, and that the use of gross revenue or receipts would therefore result in arbitrary and inequitable burdens on those subject to the rule. These commenters stated that the readily achievable analysis, and thus the safe harbor threshold, should be premised on a business's net revenue so that operating expenses are offset before determining what amount might be

available for barrier removal. Many business commenters contended that barrier removal is not readily achievable if an entity is operating at a loss, and that a spending formula premised on net revenue can reflect more accurately businesses' ability to engage in barrier removal.

There was no consensus among the business commenters as to a formula that would reflect more accurately what is readily achievable for small businesses with respect to barrier removal. Those that proposed alternative formulas offered little in the way of substantive support for their proposals. One advocacy organization representing a large cross-section of small businesses provided some detail on the gross and net revenue of various industry types and sizes in support of its position that for nearly all small businesses, net revenue is a better indicator of a business's financial ability to spend money on barrier removal. The data also incidentally highlighted the importance and complexity of ensuring that each component in a safe harbor formula accurately informs and contributes to the ultimate question of what is and is not readily achievable for a small business.

Several business groups proposed that a threshold of 0.5 percent (or one-half of 1 percent) of gross revenue, or 2.5 percent of net revenue, spent on ADA compliance might be a workable measure of what is ''readily achievable'' for small businesses. Other groups proposed 3 to 5 percent of net revenue as a possible measure. Several commenters proposed affording small businesses an option of using gross or net revenue to determine safe harbor eligibility. Another commenter proposed premising the safe harbor threshold on a designated percentage of the amount spent on renovation in a given year. Others proposed averaging gross or net revenue over a number of years to account for cyclical changes in economic and business environments. Additionally, many proposed that an entity should be able to roll over expenditures in excess of the safe harbor for inclusion in safe harbor analysis in subsequent years, to facilitate barrier removal planning and encourage large-scale barrier removal measures.

Another primary concern of many businesses and business groups is that the 1 percent threshold for safe harbor protection would become a de facto ''floor'' for what is readily achievable for any small business entity. These commenters urged the Department to clarify that readily achievable barrier removal remains the standard, and that in any given case, an entity retains the right to assert that barrier removal expenditures below the 1 percent threshold are not readily achievable. Other business groups worried that courts would apply the 1 percent calculus to questions of barrier removal by businesses too large to qualify for the small business safe harbor. These commenters requested clarification that the rationale underlying the Department's determination that a percentage of gross revenue can appropriately approximate readily achievable barrier removal for small businesses does not apply outside the small business context.

Small businesses and business groups uniformly requested guidance as to what expenses would be included in barrier removal costs for purposes of determining whether the safe harbor threshold has been met. These commenters contended that any and all expenses associated with ADA compliance—*e.g.*, consultants, architects, engineers, staff training, and recordkeeping—should be included in the calculation. Some proposed that litigation-related expenses, including defensive litigation costs, also should be accounted for in a small business safe harbor. Additionally, several commenters urged the Department to issue a small business compliance guide with detailed guidance and examples regarding application of the readily achievable barrier removal standard and the safe harbor. Some commenters felt that the Department's regulatory efforts should be focused on clarifying the readily achievable standard rather than on introducing a safe harbor based on a set spending level.

Businesses and business groups expressed concern that the Department's proposed small business safe harbor would not alleviate small business vulnerability to litigation. Individuals and advocacy groups were equally concerned that the practical effect of the Department's proposal likely would be to accelerate or advance the initiation of litigation. These commenters pointed out that an individual encountering barriers in small business facilities will not know whether the entity is noncompliant or entitled to safe harbor protection. Safe harbor eligibility can be evaluated only after review of the small business's barrier removal records *and* financial records. Individuals and advocacy groups argued that the Department should not promulgate a rule by which individuals must file suit to obtain the information needed to determine whether a lawsuit is appropriate in a particular case, and that, therefore, the rule should clarify that small businesses are required to produce such documentation to any individual upon request.

Several commenters noted that a small business safe harbor based on net, rather than gross, revenue would complicate exponentially its efficacy as an affirmative defense, because accounting practices and asserted expenses would be subject to discovery and dispute. One business advocacy group representing a large cross-section of small businesses noted that some small business owners and operators likely would be uncomfortable with producing detailed financial information, or could be prevented

from using the safe harbor because of inadvertent recordkeeping deficiencies.

Individuals, advocacy groups, and nonprofit organizations commenting on behalf of the disability community uniformly and strongly opposed a safe harbor for qualified small businesses, saying it is fundamentally at odds with the intent of Congress and the plain language of the ADA. These commenters contended that the case-specific factors underlying the statute's readily achievable standard cannot be reconciled with a formulaic accounting approach, and that a blanket formula inherently is less fair, less flexible, and less effective than the current case-by-case determination for whether an action is readily achievable. Moreover, they argued, a small business safe harbor for readily achievable barrier removal is unnecessary because the statutory standard explicitly provides that a business need only spend what is readily achievable—an amount that may be more or less than 1 percent of revenue in any given year.

Several commenters opined that the formulaic approach proposed by the Department overlooks the factors that often prove most conducive and integral to readily achievable barrier removal—planning and prioritization. Many commenters expressed concern that the safe harbor creates an incentive for business entities to forego large-scale barrier removal in favor of smaller, less costly removal projects, regardless of the relative access the measures might provide. Others commented that an emphasis on a formulaic amount rather than readily achievable barrier removal might result in competition among types of disabilities as to which barriers get removed first, or discrimination against particular types of disabilities if barrier removal for those groups is more expensive.

Many commenters opposed to the small business safe harbor proposed clarifications and limiting rules. A substantial number of commenters were strongly opposed to what they perceived as a vastly overbroad and overly complicated definition of ''qualified small business'' for purposes of eligibility for the safe harbor, and urged the Department to limit the qualified small business safe harbor to those businesses eligible for the ADA small business tax credit under section 44 of the Tax Code. Some commenters from the disability community contended that the spending level that triggers the safe harbor should be cumulative, to reflect the continuing nature of the readily achievable barrier obligation and to preclude a business from erasing years of unjustifiable inaction or insufficient action by spending up to the safe harbor threshold for one year. These commenters also sought explicit clarification that the small business safe harbor is an affirmative defense.

A number of commenters proposed that a business seeking to use the qualified small business safe harbor should be required to have a written barrier removal plan that contains a prioritized list of significant access barriers, a schedule for removal, and a description of the methods used to identify and prioritize barriers. These commenters argued that only spending consistent with the plan should count toward the qualified small business threshold.

After consideration of all relevant matter presented, the Department has concluded that neither the qualified small business safe harbor proposed in the NPRM nor any of the alternatives proposed by commenters will achieve the Department's intended results. Business and industry commenters uniformly objected to a safe harbor based on gross revenue, argued that 1 percent of gross revenue was out of reach for most, if not all, small businesses, and asserted that a safe harbor based on net revenue would better capture whether and to what extent barrier removal is readily achievable for small businesses. Individuals and disability advocacy groups rejected a set formula as fundamentally inconsistent with the case-specific approach reflected in the statute.

Commenters on both sides noted ambiguity as to which ADA-related costs appropriately should be included in the calculation of the safe harbor threshold, and expressed concern about the practical effect of the proposed safe harbor on litigation. Disability organizations expressed concern that the proposal might increase litigation because individuals with disabilities confronted with barriers in places of public accommodation would not be able to independently assess whether an entity is noncompliant or is, in fact, protected by the small business safe harbor. The Department notes that the concerns about enforcement-related complexity and expense likely would increase exponentially with a small business safe harbor based on net revenue.

The Department continues to believe that promulgation of a small business safe harbor would be within the scope of the Attorney General's mandate under 42 U.S.C. 12186(b) to issue regulations to carry out the provisions of title III. Title III defines ''readily achievable'' to mean ''easily accomplishable and able to be carried out without much difficulty or expense,'' 42 U.S.C. 12181(9), and sets out factors to consider in determining whether an action is readily achievable. While the statutory factors reflect that whether an action is readily achievable is a fact-based determination, there is no inherent inconsistency with the Department's proposition that a formula based on revenue and barrier removal expenditure could accurately approximate the high end of the level of expenditure that can be considered readily achievable for a circumscribed subset of title

III entities defined, in part, by their maximum annual average receipts. Moreover, the Department's obligation under the SBREFA to consider alternative means of compliance for small businesses, *see* 5 U.S.C. 603(c), further supports the Department's conclusion that a well-targeted formula is a reasonable approach to implementation of the statute's readily achievable standard. While the Department ultimately has concluded that a small business safe harbor should not be included in the final rule, the Department continues to believe that it is within the Department's authority to develop and implement such a safe harbor.

As noted above, the business community strongly objected to a safe harbor premised on gross revenue, on the ground that gross revenue is an unreliable indicator of an entity's ability to remove barriers, and urged the Department to formulate a safe harbor based on net revenue. The Department's proposed use of gross revenue was intended to offer a measure of certainty for qualified small businesses while ensuring that those businesses continue to meet their ongoing obligation to remove architectural barriers where doing so is readily achievable.

The Department believes that a qualified small business safe harbor based on net revenue would be an unreliable indicator of what is readily achievable and would be unworkable in practice. Evaluation of what is readily achievable for a small business cannot rest solely on a business's net revenue because many decisions about expenses are inherently subjective, and in some cases a net loss may be more beneficial (in terms of taxes, for example) than a small net profit. The Department does not read the ADA's readily achievable standard to mean necessarily that architectural barrier removal is to be, or should be, a business's last concern, or that a business can claim that every barrier removal obligation is not readily achievable. Therefore, if a qualified small business safe harbor were to be premised on net revenue, assertion of the affirmative defense would trigger discovery and examination of the business's accounting methods and the validity or necessity of offsetting expenses. The practical benefits and legal certainty intended by the NPRM would be lost.

Because there was little to no support for the Department's proposed use of gross revenue and no workable alternatives are available at this time, the Department will not adopt a small business safe harbor in this final rule. Small business public accommodations are subject to the barrier removal requirements set out in §36.304 of the final rule. In addition, the Department plans to provide small businesses with more detailed guidance on assessing and meeting their barrier removal obligations in a small business compliance guide.

Section 36.308 Seating in Assembly Areas

In the 1991 rule, §36.308 covered seating obligations for public accommodations in assembly areas. It was bifurcated into (a) existing facilities and (b) new construction and alterations. The new construction and alterations provision, §36.308(b), merely stated that assembly areas should be built or altered in accordance with the applicable provisions in the 1991 Standards. Section 36.308(a), by contrast, provided detailed guidelines on what barrier removal was required.

The Department explained in the preamble to the 1991 rule that §36.308 provided specific rules on assembly areas to ensure that wheelchair users, who typically were relegated to inferior seating in the back of assembly areas separate from their friends and family, would be provided access to seats that were integrated and equal in quality to those provided to the general public. Specific guidance on assembly areas was desirable because they are found in many different types of places of public accommodation, ranging from opera houses (places of exhibition or entertainment) to private university lecture halls (places of education), and include assembly areas that range in size from small movie theaters of 100 or fewer seats to 100,000-seat sports stadiums.

In the NPRM, the Department proposed to update §36.308(a) by incorporating some of the applicable assembly area provisions from the 2010 Standards. Upon further review, however, the Department has determined that the need to provide special guidance for assembly areas in a separate section no longer exists, except for specialty seating areas, as discussed below. Since enactment of the ADA, the Department has interpreted the 1991 Standards as a guide for determining the existence of barriers. Courts have affirmed this interpretation. *See, e.g., Colorado Cross Disability Coalition* v. *Too, Inc.*, 344 F. Supp. 2d 707 (D. Colo. 2004); *Access Now, Inc.* v. *AMH CGH, Inc.*, 2001 WL 1005593 (S.D. Fla. 2001); *Pascuiti* v. *New York Yankees*, 87 F. Supp. 2d 221 (S.D.N.Y. 1999). The 2010 Standards now establish detailed guidance for newly constructed and altered assembly areas, which is provided in §36.406(f), and these Standards will serve as a new guide for barrier removal. Accordingly, the former §36.308(a) has been replaced in the final rule. Assembly areas will benefit from the same safe harbor provisions applicable to barrier removal in all places of public accommodations as provided in §36.304(d)(2) of the final rule.

The Department has also decided to remove proposed §36.308(c)(2) from the final rule. This provision would have required assembly areas with more than 5,000 seats to provide five wheelchair spaces with at least three designated companion seats for each of

those five wheelchair spaces. The Department agrees with commenters who asserted that group seating already is addressed more appropriately in ticketing under §36.302(f).

The Department has determined that proposed §36.308(c)(1), addressing specialty seating in assembly areas, should remain as §36.308 in the final rule with additional language. This paragraph is designed to ensure that individuals with disabilities have an opportunity to access specialty seating areas that entitle spectators to distinct services or amenities not generally available to others. This provision is not, as several commenters mistakenly thought, designed to cover luxury boxes and suites. Those areas have separate requirements outlined in section 221 of the 2010 Standards.

Section 36.308 requires only that accessible seating be provided in each area with *distinct* services or amenities. To the extent a covered entity provides multiple seating areas with the same services and amenities, each of those areas would not be distinct and thus all of them would not be required to be accessible. For example, if a facility has similar dining service in two areas, both areas would not need to be made accessible; however, if one dining service area is open to families, while the other is open only to individuals over the age of 21, both areas would need to be made accessible. Factors distinguishing specialty seating areas generally are dictated by the type of facility or event, but may include, for example, such distinct services and amenities as access to wait staff for in-seat food or beverage service; availability of catered food or beverages for pregame, intermission, or post-game events; restricted access to lounges with special amenities, such as couches or flat-screen televisions; or access to team personnel or facilities for team-sponsored events (*e.g.*, autograph sessions, sideline passes, or facility tours) not otherwise available to other spectators.

The NPRM required public accommodations to locate wheelchair seating spaces and companion seats in each specialty seating area within the assembly area. The Department has added language in the final rule stating that public accommodations that cannot place wheelchair seating spaces and companion seats in each specialty area because it is not readily achievable to do so may meet their obligation by providing specialty services or amenities to individuals with disabilities and their companions at other designated accessible locations at no additional cost. For example, if a theater that only has barrier removal obligations provides wait service to spectators in the mezzanine, and it is not readily achievable to place accessible seating there, it may meet its obligation by providing wait service to patrons with disabilities who use wheelchairs and their companions at other designated accessible locations at no additional cost. This provision does not obviate the obligation to comply with applicable requirements for new construction and alterations, including dispersion of accessible seating.

Section 36.309 Examinations and Courses

Section 36.309(a) sets forth the general rule that any private entity that offers examinations or courses relating to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals. In the NPRM preamble and proposed regulatory amendment and in this final rule, the Department relied on its history of enforcement efforts, research, and body of knowledge of testing and modifications, accommodations, and aids in detailing steps testing entities should take to ensure that persons with disabilities receive appropriate modifications, accommodations, or auxiliary aids in examination and course settings as required by the ADA. The Department received comments from disability rights groups, organizations that administer tests, State governments, professional associations, and individuals on the language appearing in the NPRM preamble and amended regulation and has carefully considered these comments.

The Department initially set out the parameters of appropriate documentation requests relating to examinations and courses covered by this section in the 1991 preamble at 28 CFR part 36, stating that ''requests for documentation must be reasonable and must be limited to the need for the modification or aid requested.'' *See* 28 CFR part 36, app. B at 735 (2009). Since that time, the Department, through its enforcement efforts pursuant to section 309, has addressed concerns that requests by testing entities for documentation regarding the existence of an individual's disability and need for a modification or auxiliary aid or service were often inappropriate and burdensome. The Department proposed language stating that while it may be appropriate for a testing entity to request that an applicant provide documentation supporting the existence of a disability and the need for a modification, accommodation, or auxiliary aid or service, the request by the testing entity for such documentation must be reasonable and limited. The NPRM proposed that testing entities should narrowly tailor requests for documentation, limiting those requests to materials that will allow the testing entities to ascertain the nature of the disability and the individual's need for the requested modification, accommodation, or auxiliary aid or service.

This proposal codified the 1991 rule's preamble language regarding testing entities' requests for information supporting applicants' requests for testing modifications or accommodations.

Overall, most commenters supported this addition to the regulation. These commenters generally agreed that documentation sought by testing entities to support requests for modifications and testing accommodations should be reasonable and tailored. Commenters noted, for example, that the proposal to require reasonable and tailored documentation requests ''is not objectionable. Indeed, it largely tracks DOJ's longstanding informal guidance that 'requests for documentation must be reasonable and limited to the need for the modification or aid requested.' ''

Commenters including disability rights groups, State governments, professional associations, and individuals made it clear that, in addition to the proposed regulatory change, other significant problems remain for individuals with disabilities who seek necessary modifications to examinations and courses. These problems include detailed questions about the nature of documentation materials submitted by candidates, testing entities' questioning of documentation provided by qualified professionals with expertise in the particular disability at issue, and lack of timeliness in determining whether to provide requested accommodations or modifications. Several commenters expressed enthusiasm for the preamble language addressing some of these issues, and some of these commenters recommended the incorporation of portions of this preamble language into the regulatory text. Some testing entities expressed concerns and uncertainty about the language in the preamble and sought clarifications about its meaning. These commenters focused most of their attention on the following language from the NPRM preamble:

> Generally, a testing entity should accept without further inquiry documentation provided by a qualified professional who has made an individualized assessment of the applicant. Appropriate documentation may include a letter from a qualified professional or evidence of a prior diagnosis, or accommodation, or classification, such as eligibility for a special education program. When an applicant's documentation is recent and demonstrates a consistent history of a diagnosis, there is no need for further inquiry into the nature of the disability. A testing entity should consider an applicant's past use of a particular auxiliary aid or service.

73 FR 34508, 34539 (June 17, 2008).

Professional organizations, State governments, individuals, and disability rights groups fully supported the Department's preamble language and recommended further modification of the regulations to encompass the issues raised in the preamble. A disability rights group recommended that the Department incorporate the preamble language into the regulations to ensure that ''documentation demands are strictly limited in scope and met per se when documentation of previously provided accommodations or aids is provided.'' One professional education organization noted that many testing corporations disregard the documented diagnoses of qualified professionals, and instead substitute their own, often unqualified diagnoses of individuals with disabilities. Commenters confirmed that testing entities sometimes ask for unreasonable information that is either impossible, or extremely onerous, to provide. A disability rights organization supported the Department's proposals and noted that private testing companies impose burdensome documentation requirements upon applicants with disabilities seeking accommodations and that complying with the documentation requests is frequently so difficult, and negotiations over the requests so prolonged, that test applicants ultimately forgo taking the test. Another disability rights group urged the Department to ''expand the final regulatory language to ensure that regulations accurately provide guidance and support the comments made about reducing the burden of documenting the diagnosis and existence of a disability.''

Testing entities, although generally supportive of the proposed regulatory amendment, expressed concern regarding the Department's proposed preamble language. The testing entities provided the Department with lengthy comments in which they suggested that the Department's rationale delineated in the preamble potentially could limit them from gathering meaningful and necessary documentation to determine whether, in any given circumstance, a disability is presented, whether modifications are warranted, and which modifications would be most appropriate. Some testing entities raised concerns about individuals skewing testing results by falsely claiming or feigning disabilities as an improper means of seeking advantage on an examination. Several testing entities raised concerns about and sought clarification regarding the Department's use of certain terms and concepts in the preamble, including ''without further inquiry,'' ''appropriate documentation,'' ''qualified professional,'' ''individualized assessment,'' and ''consider.'' These entities discussed the preamble language at length, noting that testing entities need to be able to question some aspects of testing applicants' documentation or to request further documentation from some candidates when the initial documentation is unclear or incomplete. One testing entity expressed

concern that the Department's preamble language would require the acceptance of a brief note on a doctor's prescription pad as adequate documentation of a disability and the need for an accommodation. One medical examination organization stated that the Department's preamble language would result in persons without disabilities receiving accommodations and passing examinations as part of a broad expansion of unwarranted accommodations, potentially endangering the health and welfare of the general public. Another medical board ''strenuously objected'' to the ''without further inquiry'' language. Several of the testing entities expressed concern that the Department's preamble language might require testing companies to accept documentation from persons with temporary or questionable disabilities, making test scores less reliable, harming persons with legitimate entitlements, and resulting in additional expense for testing companies to accommodate more test takers.

It remains the Department's view that, when testing entities receive documentation provided by a qualified professional who has made an individualized assessment of an applicant that supports the need for the modification, accommodation, or aid requested, they shall generally accept such documentation and provide the accommodation.

Several commenters sought clarifications on what types of documentation are acceptable to demonstrate the existence of a disability and the need for a requested modification, accommodation, or aid. The Department believes that appropriate documentation may vary depending on the nature of the disability and the specific modification or aid requested, and accordingly, testing entities should consider a variety of types of information submitted. Examples of types of information to consider include recommendations of qualified professionals familiar with the individual, results of psychoeducational or other professional evaluations, an applicant's history of diagnosis, participation in a special education program, observations by educators, or the applicant's past use of testing accommodations. If an applicant has been granted accommodations post-high school by a standardized testing agency, there is no need for reassessment for a subsequent examination.

Some commenters expressed concern regarding the use of the term ''letter'' in the proposed preamble sentence regarding appropriate documentation. The NPRM preamble language stated that ''[a]ppropriate documentation may include a letter from a qualified professional or evidence of a prior diagnosis, accommodation, or classification, such as eligibility for a special education program.'' 73 FR 34508, 34539 (June 17, 2008). Some testing entities posited that the preamble language would require them to accept a brief letter from a doctor or even a doctor's note on a prescription pad indicating ''I've been treating (student) for ADHD and he/she is entitled to extend time on the ACT.'' The Department's reference in the NPRM preamble to letters from physicians or other professionals was provided in order to offer examples of some types of acceptable documentation that may be considered by testing entities in evaluating the existence of an applicant's disability and the need for a certain modification, accommodation, or aid. No one piece of evidence may be dispositive in make a testing accommodation determination. The significance of a letter or other communication from a doctor or other qualified professional would depend on the professional's relationship with the candidate and the specific content of the communication, as well as how the letter fits in with the totality of the other factors used to determine testing accommodations under this rule. Similarly, an applicant's failure to provide results from a specific test or evaluation instrument should not of itself preclude approval of requests for modifications, accommodations, or aids if the documentation provided by the applicant, in its entirety, is sufficient to demonstrate that the individual has a disability and requires a requested modification, accommodation, or aid on the relevant examination. This issue is discussed in more detail below.

One disability rights organization noted that requiring a 25-year old who was diagnosed in junior high school with a learning disability and accommodated ever since ''to produce elementary school report cards to demonstrate symptomology before the age of seven is unduly burdensome.'' The same organization commented that requiring an individual with a long and early history of disability to be assessed within three years of taking the test in question is similarly burdensome, stating that ''[t]here is no scientific evidence that learning disabilities abate with time, nor that Attention Deficits abate with time * * *.'' This organization noted that there is no justification for repeatedly subjecting people to expensive testing regimens simply to satisfy a disbelieving industry. This is particularly true for adults with, for example, learning disabilities such as dyslexia, a persistent condition without the need for retesting once the diagnosis has been established and accepted by a standardized testing agency.

Some commenters from testing entities sought clarification regarding who may be considered a ''qualified professional.'' Qualified professionals are licensed or otherwise properly credentialed and possess expertise in the disability for which modifications or accommodations are sought. For example, a podiatrist would not be considered to be a qualified professional to diagnose a learning

disability or support a request for testing accommodations on that basis. Types of professionals who might possess the appropriate credentials and expertise are doctors (including psychiatrists), psychologists, nurses, physical therapists, occupational therapists, speech therapists, vocational rehabilitation specialists, school counselors, and licensed mental health professionals. Additionally, while testing applicants should present documentation from qualified professionals with expertise in the pertinent field, it also is critical that testing entities that review documentation submitted by prospective examinees in support of requests for testing modifications or accommodations ensure that their own reviews are conducted by qualified professionals with similarly relevant expertise.

Commenters also sought clarification of the term individualized assessment. The Department's intention in using this term is to ensure that documentation provided on behalf of a testing candidate is not only provided by a qualified professional, but also reflects that the qualified professional has individually and personally evaluated the candidate as opposed to simply considering scores from a review of documents. This is particularly important in the learning disabilities context, where proper diagnosis requires face-to-face evaluation. Reports from experts who have personal familiarity with the candidate should take precedence over those from, for example, reviewers for testing agencies, who have never personally met the candidate or conducted the requisite assessments for diagnosis and treatment.

Some testing entities objected to the NPRM preamble's use of the phrase ''without further inquiry.'' The Department's intention here is to address the extent to which testing entities should accept documentation provided by an applicant when the testing entity is determining the need for modifications, accommodations, or auxiliary aids or services. The Department's view is that applicants who submit appropriate documentation, *e.g.*, documentation that is based on the careful individual consideration of the candidate by a professional with expertise relating to the disability in question, should not be subjected to unreasonably burdensome requests for additional documentation. While some testing commenters objected to this standard, it reflects the Department's longstanding position. When an applicant's documentation demonstrates a consistent history of a diagnosis of a disability, and is prepared by a qualified professional who has made an individualized evaluation of the applicant, there is little need for further inquiry into the nature of the disability and generally testing entities should grant the requested modification, accommodation, or aid.

After a careful review of the comments, the Department has decided to maintain the proposed regulatory language on the scope of appropriate documentation in §36.309(b)(1)(iv). The Department has also added new regulatory language at §36.309(b)(1)(v) that provides that testing entities shall give considerable weight to documentation of past modifications, accommodations, or auxiliary aids or services received in similar testing situations as well as such modifications, accommodations, or related aids and services provided in response to an Individualized Education Program (IEP) provided under the Individuals with Disabilities Education Act (IDEA) or a plan providing services pursuant to section 504 of the Rehabilitation Act of 1973, as amended (often referred to as a Section 504 Plan). These additions to the regulation are necessary because the Department's position on the bounds of appropriate documentation contained in Appendix B, 28 CFR part 36, app. B (2009), has not been implemented consistently and fully by organizations that administer tests.

The new regulatory language clarifies that an applicant's past use of a particular modification, accommodation, or auxiliary aid or service in a similar testing setting or pursuant to an IEP or Section 504 Plan provides critical information in determining those examination modifications that would be applicable in a given circumstance. The addition of this language and the appropriate weight to be accorded it is seen as important by the Department because the types of accommodations provided in both these circumstances are typically granted in the context of individual consideration of a student's needs by a team of qualified and experienced professionals. Even though these accommodations decisions form a common sense and logical basis for testing entities to rely upon, they are often discounted and ignored by testing entities.

For example, considerable weight is warranted when a student with a Section 504 Plan in place since middle school that includes the accommodations of extra time and a quiet room for testing is seeking these same accommodations from a testing entity covered by section 309 of the Act. In this example, a testing entity receiving such documentation should clearly grant the request for accommodations. A history of test accommodations in secondary schools or in post-secondary institutions, particularly when determined through the rigors of a process required and detailed by Federal law, is as useful and instructive for determining whether a specific accommodation is required as accommodations provided in standardized testing situations.

It is important to note, however, that the inclusion of this weight does not suggest that individuals without IEPs or Section 504

Plans are not also entitled to receive testing accommodations. Indeed, it is recommended that testing entities must consider the entirety of an applicant's history to determine whether that history, even without the context of a IEP or Section 504 Plan, indicates a need for accommodations. In addition, many students with learning disabilities have made use of informal, but effective accommodations. For example, such students often receive undocumented accommodations such as time to complete tests after school or at lunchtime, or being graded on content and not form or spelling of written work. Finally, testing entities shall also consider that because private schools are not subject to the IDEA, students at private schools may have a history of receiving accommodations in similar settings that are not pursuant to an IEP or Section 504 Plan.

Some testing entities sought clarification that they should only be required to consider particular use of past modifications, accommodations, auxiliary aids or services received by testing candidates for prior testing and examination settings. These commenters noted that it would be unhelpful to consider the classroom accommodations for a testing candidate, as those accommodations would not typically apply in a standardized test setting. The Department's history of enforcement in this area has demonstrated that a recent history of past accommodations is critical to an understanding of the applicant's disability and the appropriateness of testing accommodations.

The Department also incorporates the NPRM preamble's ''timely manner'' concept into the new regulatory language at §36.309(b)(1)(vi). Under this provision, testing entities are required to respond in a timely manner to requests for testing accommodations in order to ensure equal opportunity for persons with disabilities. Testing entities are to ensure that their established process for securing testing accommodations provides applicants with a reasonable opportunity to supplement the testing entities' requests for additional information, if necessary, and still be able to take the test in the same testing cycle. A disability rights organization commented that testing entities should not subject applicants to unreasonable and intrusive requests for information in a process that should provide persons with disabilities effective modifications in a timely manner, fulfilling the core objective of title III to provide equal access. Echoing this perspective, several disability rights organizations and a State government commenter urged that testing entities should not make unreasonably burdensome demands for documentation, particularly where those demands create impediments to receiving accommodations in a timely manner. Access to examinations should be offered to persons with disabilities in as timely a manner as it is offered to persons without disabilities. Failure by a testing entity to act in a timely manner, coupled with seeking unnecessary documentation, could result in such an extended delay that it constitutes a denial of equal opportunity or equal treatment in an examination setting for persons with disabilities.

Section 36.311 Mobility Devices

Section 36.311 of the NPRM clarified the scope and circumstances under which covered entities are legally obligated to accommodate various ''mobility devices.'' Section 36.311 set forth specific requirements for the accommodation of mobility devices, including wheelchairs, manually-powered mobility aids, and other power-driven mobility devices.

In both the NPRM and the final rule, §36.311(a) states the general rule that in any areas open to pedestrians, public accommodations shall permit individuals with mobility disabilities to use wheelchairs and manually-powered mobility aids, including walkers, crutches, canes, braces, or similar devices. Because mobility scooters satisfy the definition of ''wheelchair'' (*i.e.*, ''a manually-operated or power-driven device designed primarily for use by an individual with a mobility disability for the main purpose of indoor, or of both indoor and outdoor locomotion''), the reference to them in §36.311(a) of the final rule has been omitted to avoid redundancy.

Most business commenters expressed concern that permitting the use of other power-driven mobility devices by individuals with mobility disabilities would make such devices akin to wheelchairs and would require them to make physical changes to their facilities to accommodate their use. This concern is misplaced. If a facility complies with the applicable design requirements in the 1991 Standards or the 2010 Standards, the public accommodation will not be required to exceed those standards to accommodate the use of wheelchairs or other power-driven mobility devices that exceed those requirements.

Legal standard for other power-driven mobility devices. The NPRM version of §36.311(b) provided that a public accommodation ''shall make reasonable modifications in its policies, practices, and procedures to permit the use of other power-driven mobility devices by individuals with disabilities, unless the public accommodation can demonstrate that the use of the device is not reasonable or that its use will result in a fundamental alteration in the nature of the public accommodation's goods, services, facilities, privileges, advantages, or accommodations.'' 73 FR 34508, 34556 (June 17, 2008). In other words,

public accommodations are by default required to permit the use of other power-driven mobility devices; the burden is on them to prove the existence of a valid exception.

Most commenters supported the notion of assessing whether the use of a particular device is reasonable in the context of a particular venue. Commenters, however, disagreed about the meaning of the word ''reasonable'' as it is used in §36.311(b) of the NPRM. Virtually every business and industry commenter took the use of the word ''reasonable'' to mean that a general reasonableness standard would be applied in making such an assessment. Advocacy and nonprofit groups almost universally objected to the use of a general reasonableness standard with regard to the assessment of whether a particular device should be allowed at a particular venue. They argued that the assessment should be based on whether reasonable modifications could be made to allow a particular device at a particular venue, and that the only factors that should be part of the calculus that results in the exclusion of a particular device are undue burden, direct threat, and fundamental alteration.

A few commenters opposed the proposed provision requiring public accommodations to assess whether reasonable modifications can be made to allow other power-driven mobility devices, preferring instead that the Department issue guidance materials so that public accommodations would not have to incur the cost of such analyses. Another commenter noted a ''fox guarding the hen house''-type of concern with regard to public accommodations developing and enforcing their own modification policy.

In response to comments received, the Department has revised §36.311(b) to provide greater clarity regarding the development of legitimate safety requirements regarding other power-driven mobility devices. The Department has not retained the proposed NPRM language stating that an other power-driven mobility device can be excluded if a public accommodation can demonstrate that the use of the device is not reasonable or that its use fundamentally alters the nature of the goods, services, facilities, privileges, advantages, or accommodations offered by the public accommodation because the Department believes that these exceptions are covered by the general reasonable modification requirement contained in §36.302.

Assessment factors. Section 36.311(c) of the NPRM required public accommodations to ''establish policies to permit the use of other power-driven mobility devices'' and articulated four factors upon which public accommodations must base decisions as to whether a modification is reasonable to allow the use of a class of other power-driven mobility devices by individuals with disabilities in specific venues (*e.g.*, doctors' offices, parks, commercial buildings, etc.). 73 FR 34508, 34556 (June 17, 2008).

The Department has relocated and modified the NPRM text that appeared in §36.311(c) to new paragraph §36.311(b)(2) to clarify what factors the public accommodation shall use in determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification. Section 36.311(b)(2) now states that ''[i]n determining whether a particular other power-driven mobility device can be allowed in a specific facility as a reasonable modification under (b)(1), a public accommodation shall consider'' certain enumerated factors. The assessment factors are designed to assist public accommodations in determining whether allowing the use of a particular other power-driven mobility device in a specific facility is reasonable. Thus, the focus of the analysis must be on the appropriateness of the use of the device at a specific facility, rather than whether it is necessary for an individual to use a particular device.

The NPRM proposed the following specific assessment factors: (1) The dimensions, weight, and operating speed of the mobility device in relation to a wheelchair; (2) the potential risk of harm to others by the operation of the mobility device; (3) the risk of harm to the environment or natural or cultural resources or conflict with Federal land management laws and regulations; and (4) the ability of the public accommodation to stow the mobility device when not in use, if requested by the user.

Factor 1 was designed to help public accommodations assess whether a particular device was appropriate, given its particular physical features, for a particular location. Virtually all commenters said the physical features of the device affected their view of whether a particular device was appropriate for a particular location. For example, while many commenters supported the use of an other power-driven mobility device if the device were a Segway® PT, because of environmental and health concerns they did not offer the same level of support if the device were an off-highway vehicle, all-terrain vehicle (ATV), golf car, or other device with a fuel-powered or combustion engine. Most commenters noted that indicators such as speed, weight, and dimension really were an assessment of the appropriateness of a particular device in specific venues and suggested that factor 1 say this more specifically.

The term ''in relation to a wheelchair'' in the NPRM's factor 1 apparently created some concern that the same legal standards that apply to wheelchairs would be applied to other power-driven mobility devices. The Department has omitted the term ''in relation to a wheelchair'' from §36.311(b)(2)(i) to

clarify that if a facility that is in compliance with the applicable provisions of the 1991 Standards or the 2010 Standards grants permission for an other power-driven mobility device to go on-site, it is not required to exceed those standards to accommodate the use of other power-driven mobility devices.

In response to requests that NPRM factor 1 state more specifically that it requires an assessment of an other power-driven mobility device's appropriateness under particular circumstances or in particular venues, the Department has added several factors and more specific language. In addition, although the NPRM made reference to the operation of other power-driven mobility devices in ''specific venues,'' the Department's intent is captured more clearly by referencing ''specific facility'' in paragraph (b)(2). The Department also notes that while speed is included in factor 1, public accommodations should not rely solely on a device's top speed when assessing whether the device can be accommodated; instead, public accommodations should also consider the minimum speeds at which a device can be operated and whether the development of speed limit policies can be established to address concerns regarding the speed of the device. Finally, since the ability of the public accommodation to stow the mobility device when not in use is an aspect of its design and operational characteristics, the text proposed as factor 4 in the NPRM has been incorporated in paragraph (b)(2)(iii).

The NPRM's version of factor 2 provided that the ''potential risk of harm to others by the operation of the mobility device'' is one of the determinants in the assessment of whether other power-driven mobility devices should be excluded from a site. With this language, the Department intended to incorporate the safety standard found in §36.301(b), which provides that public accommodations may ''impose legitimate safety requirements that are necessary for safe operation'' into the assessment. However, several commenters indicated that they read this language, particularly the phrase ''potential risk of harm'' to mean that the Department had adopted a concept of risk analysis different from that which is in the existing standards. The Department did not intend to create a new standard and has changed the language in paragraphs (b)(1) and (b)(2) to clarify the applicable standards, thereby avoiding the introduction of new assessments of risk beyond those necessary for the safe operation of the public accommodation.

While all applicable affirmative defenses are available to public accommodations in the establishment and execution of their policies regarding other power-driven mobility devices, the Department did not explicitly incorporate the direct threat defense into the assessment factors because §36.301(b) provides public accommodations the appropriate framework with which to assess whether legitimate safety requirements that may preclude the use of certain other power-driven mobility devices are necessary for the safe operation of the public accommodation. In order to be legitimate, the safety requirement must be based on actual risks and not mere speculation regarding the device or how it will be operated. Of course, public accommodations may enforce legitimate safety rules established for the operation of other-power driven mobility devices (*e.g.*, reasonable speed restrictions). Finally, NPRM factor 3 concerning environmental resources and conflicts of law has been relocated to paragraph (b)(2)(v).

As a result of these comments and requests, NPRM factors 1, 2, 3, and 4 have been revised and renumbered within paragraph 36.311(b)(2) in the final rule.

Several commenters requested that the Department provide guidance materials or more explicit concepts of which considerations might be appropriate for inclusion in a policy that allows the use of other power-driven mobility devices. A public accommodation that has determined that reasonable modifications can be made in its policies, practices, or procedures to allow the use of other power-driven mobility devices should develop a policy that clearly states the circumstances under which the use of other power-driven mobility devices by individuals with a mobility disability will be permitted. It also should include clear, concise statements of specific rules governing the operation of such devices. Finally, the public accommodation should endeavor to provide individuals with disabilities who use other power-driven mobility devices with advanced notice of its policy regarding the use of such devices and what rules apply to the operation of these devices.

For example, the U.S. General Services Administration (GSA) has developed a policy allowing the use of the Segway® PT and other EPAMDs in all Federal buildings under GSA's jurisdiction. *See* General Services Administration, *Interim Segway® Personal Transporter Policy* (Dec. 3, 2007), available at *http://www.gsa.gov/graphics/pbs/Interim__Segway__Policy__121007.pdf* (last visited June 24, 2010). The GSA policy defines the policy's scope of coverage by setting out what devices are and are not covered by the policy. The policy also sets out requirements for safe operation, such as a speed limit, prohibits the use of EPAMDs on escalators, and provides guidance regarding security screening of these devices and their operators.

A public accommodation that determines that it can make reasonable modifications to permit the use of an other power-driven mobility device by an individual with a mobility disability might include in its policy the procedure by which claims that the other

power-driven mobility device is being used for a mobility disability will be assessed for legitimacy (*i.e.*, a credible assurance that the device is being used for a mobility disability, including a verbal representation by the person with a disability that is not contradicted by observable fact, or the presentation of a disability parking space placard or card, or State-issued proof of disability); the type or classes of other power-driven mobility devices are permitted to be used by individuals with mobility disabilities; the size, weight, and dimensions of the other power-driven mobility devices that are permitted to be used by individuals with mobility disabilities; the speed limit for the other power-driven mobility devices that are permitted to be used by individuals with mobility disabilities; the places, times, or circumstances under which the use of the other power-driven mobility devices is or will be restricted or prohibited; safety, pedestrian, and other rules concerning the use of the other power-driven mobility devices; whether, and under which circumstances, storage for the other power-driven mobility devices will be made available; and how and where individuals with a mobility disability can obtain a copy of the other power-driven mobility device policy.

Public accommodations also might consider grouping other power-driven mobility devices by type (*e.g.*, EPAMDs, golf cars, gasoline-powered vehicles, and other devices). For example, an amusement park may determine that it is reasonable to allow individuals with disabilities to use EPAMDs in a variety of outdoor programs and activities, but that it would not be reasonable to allow the use of golf cars as mobility devices in similar circumstances. At the same time, the entity may address its concerns about factors such as space limitations by disallowing use of EPAMDs by members of the general public who do not have mobility disabilities.

The Department anticipates that in many circumstances, public accommodations will be able to develop policies that will allow the use of other power-driven mobility devices by individuals with mobility disabilities without resulting in a fundamental alteration of a public accommodation's goods, services, facilities, privileges, advantages, or accommodations. Consider the following examples:

Example 1: Although individuals who do not have mobility disabilities are prohibited from operating EPAMDs at a theme park, the park has developed a policy allowing individuals with mobility disabilities to use EPAMDs as their mobility device at the park. The policy states that EPAMDs are allowed in all areas of the theme park that are open to pedestrians as a reasonable modification to its general policy on EPAMDs. The public accommodation has determined that the facility provides adequate space for a taller device, such as an EPAMD, and that it does not fundamentally alter the nature of the theme park's goods and services. The theme park's policies do, however, require that EPAMDs be operated at a safe speed limit. A theme park employee may inquire at the ticket gate whether the device is needed due to the user's disability or may request the presentation of a valid, State-issued, disability parking placard (though presentation of such a placard is not necessary), or other State-issued proof of disability or a credible assurance that the use of the EPAMD is for the individual's mobility disability. The park employee also may inform an individual with a disability using an EPAMD that the theme park's policy requires that it be operated at or below the park's designated speed limit.

Example 2: A shopping mall has developed a policy whereby EPAMDs may be operated by individuals with mobility disabilities in the common pedestrian areas of the mall if the operator of the device agrees to the following: to operate the device no faster than the speed limit set by the policy; to use the elevator, not the escalator, to transport the EPAMD to different levels; to yield to pedestrian traffic; not to leave the device unattended unless it can stand upright and has a locking system; to refrain from using the device temporarily if the mall manager determines that the volume of pedestrian traffic is such that the operation of the device would interfere with legitimate safety requirements; and to present the mall management office with a valid, State-issued, disability parking placard (though presentation of such a placard is not necessary), or State-issued proof of disability, as a credible assurance that the use of the EPAMD is for the individual's mobility disability, upon entry to the mall.

Inquiry into the use of other power-driven mobility device. Section 36.311(d) of the NPRM provided that a ''public accommodation may ask a person using a power-driven mobility device if the mobility device is required because of the person's disability. A public accommodation shall not ask a person using a mobility device questions about the nature and extent of the person's disability.'' 73 FR 34508, 34556 (June 17, 2008).

While business commenters did not take issue with applying this standard to individuals who use wheelchairs, they were not satisfied with the application of this standard to other power-driven mobility devices. Business commenters expressed concern about people feigning mobility disabilities to be able to use other power-driven mobility devices in public accommodations in which

their use is otherwise restricted. These commenters felt that a mere inquiry into whether the device is being used for a mobility disability was an insufficient mechanism by which to detect fraud by other power-driven mobility device users who do not have mobility disabilities. These commenters believed they should be given more latitude to make inquiries of other power-driven mobility device users claiming a mobility disability than they would be given for wheelchair users. They sought the ability to establish a policy or method by which public accommodations may assess the legitimacy of the mobility disability. They suggested some form of certification, sticker, or other designation. One commenter suggested a requirement that a sticker bearing the international symbol for accessibility be placed on the device or that some other identification be required to signal that the use of the device is for a mobility disability. Other suggestions included displaying a disability parking placard on the device or issuing EPAMDs, like the Segway® PT, a permit that would be similar to permits associated with parking spaces reserved for those with disabilities.

Advocacy, nonprofit, and several individual commenters balked at the notion of allowing any inquiry beyond whether the device is necessary for a mobility disability and encouraged the Department to retain the NPRM's language on this topic. Other commenters, however, were empathetic with commenters who had concerns about fraud. At least one Segway® PT advocate suggested it would be permissible to seek documentation of the mobility disability in the form of a simple sign or permit.

The Department has sought to find common ground by balancing the needs of businesses and individuals with mobility disabilities wishing to use other power-driven mobility devices with the Department's longstanding, well-established policy of not allowing public accommodations or establishments to require proof of a mobility disability. There is no question that public accommodations have a legitimate interest in ferreting out fraudulent representations of mobility disabilities, especially given the recreational use of other power-driven mobility devices and the potential safety concerns created by having too many such devices in a specific facility at one time. However, the privacy of individuals with mobility disabilities and respect for those individuals are also vitally important.

Neither §36.311(d) of the NPRM nor §36.311(c) of the final rule permits inquiries into the nature of a person's mobility disability. However, the Department does not believe it is unreasonable or overly intrusive for an individual with a mobility disability seeking to use an other power-driven mobility device to provide a credible assurance to verify that the use of the other power-driven mobility device is for a mobility disability. The Department sought to minimize the amount of discretion and subjectivity exercised by public accommodations in assessing whether an individual has a mobility disability and to allow public accommodations to verify the existence of a mobility disability. The solution was derived from comments made by several individuals who said they have been admitted with their Segway® PTs into public entities and public accommodations that ordinarily do not allow these devices on-site when they have presented or displayed State-issued disability parking placards. In the examples provided by commenters, the parking placards were accepted as verification that the Segway® PTs were being used as mobility devices.

Because many individuals with mobility disabilities avail themselves of State programs that issue disability parking placards or cards and because these programs have penalties for fraudulent representations of identity and disability, utilizing the parking placard system as a means to establish the existence of a mobility disability strikes a balance between the need for privacy of the individual and fraud protection for the public accommodation. Consequently, the Department has decided to include regulatory text in §36.311(c)(2) of the final rule that requires public accommodations to accept the presentation of a valid, State-issued disability parking placard or card, or State-issued proof of disability, as verification that an individual uses the other power-driven mobility device for his or her mobility disability. A ''valid'' disability placard or card is one that is presented by the individual to whom it was issued and is otherwise in compliance with the State of issuance's requirements for disability placards or cards. Public accommodations are required to accept a valid, State-issued disability parking placard or card, or State-issued proof of disability, as a credible assurance, but they cannot demand or require the presentation of a valid disability placard or card, or State-issued proof of disability, as a prerequisite for use of an other power-driven mobility device, because not all persons with mobility disabilities have such means of proof. If an individual with a mobility disability does not have such a placard or card, or State-issued proof of disability, he or she may present other information that would serve as a credible assurance of the existence of a mobility disability.

In lieu of a valid, State-issued disability parking placard or card, or State-issued proof of disability, a verbal representation, not contradicted by observable fact, shall be accepted as a credible assurance that the other power-driven mobility device is being used because of a mobility disability. This

does not mean, however, that a mobility disability must be observable as a condition for allowing the use of an other power-driven mobility device by an individual with a mobility disability, but rather that if an individual represents that a device is being used for a mobility disability and that individual is observed thereafter engaging in a physical activity that is contrary to the nature of the represented disability, the assurance given is no longer credible and the individual may be prevented from using the device.

Possession of a valid, State-issued disability parking placard or card or a verbal assurance does not trump a public accommodation's valid restrictions on the use of other power-driven mobility devices. Accordingly, a credible assurance that the other power-driven mobility device is being used because of a mobility disability is not a guarantee of entry to a public accommodation because notwithstanding such a credible assurance, use of the device in a particular venue may be at odds with the legal standard in §36.311(b)(1) or with one or more of the §36.311(b)(2) factors. Only after an individual with a disability has satisfied all of the public accommodation's policies regarding the use of other power-driven mobility devices does a credible assurance become a factor in allowing the use of the device. For example, if an individual seeking to use an other power-driven mobility device fails to satisfy any of the public accommodation's stated policies regarding the use of other power-driven mobility devices, the fact that the individual legitimately possesses and presents a valid, State-issued disability parking placard or card, or State-issued proof of disability, does not trump the policy and require the public accommodation to allow the use of the device. In fact, in some instances, the presentation of a legitimately held placard or card, or State-issued proof of disability, will have no relevance or bearing at all on whether the other power-driven mobility device may be used, because the public accommodation's policy does not permit the device in question on-site under any circumstances (*e.g.,* because its use would create a substantial risk of serious harm to the immediate environment or natural or cultural resources). Thus, an individual with a mobility disability who presents a valid disability placard or card, or State-issued proof of disability, will not be able to use an ATV as an other power-driven mobility device in a mall or a restaurant if the mall or restaurant has adopted a policy banning their use for any or all of the above-mentioned reasons.

However, an individual with a mobility disability who has complied with a public accommodation's stated policies cannot be refused use of the other power-driven mobility device if he or she has provided a credible assurance that the use of the device is for a mobility disability.

SUBPART D—NEW CONSTRUCTION AND ALTERATIONS

Subpart D establishes the title III requirements applicable to new construction and alterations. The Department has amended this subpart to adopt the 2004 ADAAG, set forth the effective dates for implementation of the 2010 Standards, and make related revisions as described below.

Section 36.403 Alterations: Path of Travel

In the NPRM, the Department proposed one change to §36.403 on alterations and path of travel by adding a path of travel safe harbor. Proposed §36.403(a)(1) stated that if a private entity has constructed or altered required elements of a path of travel in accordance with the 1991 Standards, the private entity is not required to retrofit such elements to reflect incremental changes in the 2010 Standards solely because of an alteration to a primary function area served by that path of travel.

A substantial number of commenters objected to the Department's creation of a safe harbor for alterations to required elements of a path of travel that comply with the current 1991 Standards. These commenters argued that if a public accommodation already is in the process of altering its facility, there should be a legal requirement that individuals with disabilities are entitled to increased accessibility provided by the 2004 ADAAG for path of travel work. These commenters also stated that they did not believe there was a statutory basis for ''grandfathering'' facilities that comply with the 1991 Standards. Another commenter argued that the updates incorporated into the 2004 ADAAG provide very substantial improvements for access, and that since there already is a 20 percent cost limit on the amount that can be expended on path of travel alterations, there is no need for a further limitation.

Some commenters supported the safe harbor as lessening the economic costs of implementing the 2004 ADAAG for existing facilities. One commenter also stated that without the safe harbor, entities that already have complied with the 1991 Standards will have to make and pay for compliance twice, as compared to those entities that made no effort to comply in the first place. Another commenter asked that the safe harbor be revised to include pre-ADA facilities that have been made compliant with the 1991 Standards to the extent ''readily achievable'' or, in the case of alterations, ''to the maximum extent feasible,'' but that are not in full compliance with the 1991 Standards.

The final rule retains the safe harbor for required elements of a path of travel to altered primary function areas for private entities that already have complied with the 1991 Standards with respect to those required elements. As discussed with respect to §36.304, the Department believes that this safe harbor strikes an appropriate balance between ensuring that individuals with disabilities are provided access to buildings and facilities and mitigating potential financial burdens on existing places of public accommodation that are undertaking alterations subject to the 2010 Standards. This safe harbor is not a blanket exemption for facilities. If a private entity undertakes an alteration to a primary function area, only the required elements of a path of travel to that area that already comply with the 1991 Standards are subject to the safe harbor. If a private entity undertakes an alteration to a primary function area and the required elements of a path of travel to the altered area do not comply with the 1991 Standards, then the private entity must bring those elements into compliance with the 2010 Standards.

Section 36.405 Alterations: Historic Preservation

In the 1991 rule, the Department provided guidance on making alterations to buildings or facilities that are eligible for listing in the National Register of Historic Places under the National Historic Preservation Act or that are designated as historic under State or local law. That provision referenced the 1991 Standards. Because those cross-references to the 1991 Standards are no longer applicable, it is necessary in this final rule to provide new regulatory text. No substantive change in the Department's approach in this area is intended by this revision.

Section 36.406 Standards for New Construction and Alterations

Applicable standards. Section 306 of the ADA, 42 U.S.C. 12186, directs the Attorney General to issue regulations to implement title III that are consistent with the guidelines published by the Access Board. As described in greater detail elsewhere in this Appendix, the Department is a statutory member of the Access Board and was involved significantly in the development of the 2004 ADAAG. Nonetheless, the Department has reviewed the standards and has determined that additional regulatory provisions are necessary to clarify how the Department will apply the 2010 Standards to places of lodging, social service center establishments, housing at a place of education, assembly areas, and medical care facilities. Those provisions are contained in §36.406(c)–(g). Each of these provisions is discussed below.

Section 36.406(a) adopts the 2004 ADAAG as part of the 2010 Standards and establishes the compliance date and triggering events for the application of those standards to both new construction and alterations. Appendix B of this final rule (Analysis and Commentary on the 2010 ADA Standards for Accessible Design) provides a description of the major changes in the 2010 Standards (as compared to the 1991 ADAAG) and a discussion of the public comments that the Department received on specific sections of the 2004 ADAAG. A number of commenters asked the Department to revise certain provisions in the 2004 ADAAG in a manner that would reduce either the required scoping or specific technical accessibility requirements. As previously stated, the ADA requires the Department to adopt standards consistent with the guidelines adopted by the Access Board. The Department will not adopt any standards that provide less accessibility than is provided under the guidelines contained in the 2004 ADAAG because the guidelines adopted by the Access Board are ''minimum guidelines.'' 42 U.S.C. 12186(c).

In the NPRM, the Department specifically proposed amending §36.406(a) by dividing it into two sections. Proposed §36.406(a)(1) specified that new construction and alterations subject to this part shall comply with the 1991 Standards if physical construction of the property commences less than six months after the effective date of the rule. Proposed §36.406(a)(2) specified that new construction and alterations subject to this part shall comply with the proposed standards if physical construction of the property commences six months or more after the effective date of the rule. The Department also proposed deleting the advisory information now published in a table at §36.406(b).

Compliance date. When the ADA was enacted, the compliance dates for various provisions were delayed in order to provide time for covered entities to become familiar with their new obligations. Titles II and III of the ADA generally became effective on January 26, 1992, six months after the regulations were published. *See* 42 U.S.C. 12131 note; 42 U.S.C. 12181 note. New construction under title II and alterations under either title II or title III had to comply with the design standards on that date. *See* 42 U.S.C. 12131 note; 42 U.S.C. 12183(a)(2). For new construction under title III, the requirements applied to facilities designed and constructed for first occupancy after January 26, 1993—18 months after the 1991 Standards were published by the Department. *See* 42 U.S.C. 12183(a)(1).

The Department received numerous comments on the issue of effective date, many of them similar to those received in response to the ANPRM. A substantial number of commenters advocated a minimum of 18 months

from publication of the final rule to the effective date for application of the standards to new construction, consistent with the time period used for implementation of the 1991 Standards. Many of these commenters argued that the 18-month period was necessary to minimize the likelihood of having to redesign projects already in the design and permitting stages at the time that the final rule is published. According to these commenters, large projects take several years from design to occupancy, and can be subject to delays from obtaining zoning, site approval, third-party design approval (*i.e.*, architectural review), and governmental permits. To the extent the new standards necessitate changes in any previous submissions or permits already issued, businesses might have to expend significant funds and incur delays due to redesign and resubmission.

Some commenters also expressed concern that a six-month period would be hard to implement given that many renovations are planned around retail selling periods, holidays, and other seasonal concerns. For example, hotels plan renovations during their slow periods, retail establishments avoid renovations during the major holiday selling periods, and businesses in certain parts of the country cannot do any major construction during parts of the winter.

Some commenters argued that chain establishments need additional time to redesign their ''master facility'' designs for replication at multiple locations, taking into account both the new standards and applicable State and local accessibility requirements.

Other commenters argued for extending the effective date from six months to a minimum of 12 months for many of the same reasons, and one commenter argued that there should be a tolling of the effective date for those businesses that are in the midst of the permitting process if the necessary permits are delayed due to legal challenges or other circumstances outside the business's control.

Several commenters took issue with the Department's characterization of the 2004 ADAAG and the 1991 Standards as two similar rules. These commenters argued that many provisions in the 2004 ADAAG represent a ''substantial and significant'' departure from the 1991 Standards and that it will take a great deal of time and money to identify all the changes and implement them. In particular, they were concerned that small businesses lacked the internal resources to respond quickly to the new changes and that they would have to hire outside experts to assist them. One commenter expressed concern that regardless of familiarity with the 2004 ADAAG, since the 2004 ADAAG standards are organized in an entirely different manner from the 1991 Standards, and contain, in the commenter's view, extensive changes, it will make the shift from the old to the new standards quite complicated.

Several commenters also took issue with the Department's proffered rationale that by adopting a six-month effective date, the Department was following the precedent of other Federal agencies that have adopted the 2004 ADAAG for facilities whose accessibility they regulate. These commenters argued that the Department's title III regulation applies to a much broader range and number of facilities and programs than the other Federal agencies (*i.e.*, Department of Transportation and the General Services Administration) and that those agencies regulate accessibility primarily in either governmental facilities or facilities operated by quasi-governmental authorities.

Several commenters representing the travel, vacation, and golf industries argued that the Department should adopt a two-year effective date for new construction. In addition to many of the arguments made by commenters in support of an 18-month effective date, these commenters also argued that a two-year time frame would allow States with DOJ-certified building codes to have the time to amend their codes to meet the 2004 ADAAG so that design professionals can work from compatible codes and standards.

Several commenters recommended treating alterations differently than new construction, arguing for a one-year effective date for alterations. Another commenter representing building officials argued that a minimum of a six-month phase-in for alterations was sufficient, since a very large percentage of alteration projects ''are of a scale that they should be able to accommodate the phase-in.''

In contrast, many commenters argued that the proposed six-month effective date should be retained in the final rule.

The Department has been persuaded by concerns raised by some of the commenters that the six month compliance date proposed in the NPRM for application of the 2010 Standards may be too short for certain projects that are already in the midst of the design and permitting process. The Department has determined that for new construction and alterations, compliance with the 2010 Standards will not be required until 18 months from the date the final rule is published. This is consistent with the amount of time given when the 1991 regulation was published. Since many State and local building codes contain provisions that are consistent with 2004 ADAAG, the Department has decided that public accommodations that choose to comply with the 2010 Standards as defined in §36.104 before the compliance date will still be considered in compliance with the ADA. However, public accommodations that choose to comply with the 2010 Standards in lieu of the 1991 Standards prior to the compliance date described in this rule must choose one or the other standard, and may

not rely on some of the requirements contained in one standard and some of the requirements contained in the other standard.

Triggering event. In the NPRM, the Department proposed using the start of physical construction as the triggering event for applying the proposed standards to new construction under title III. This triggering event parallels that for the alterations provisions (*i.e.*, the date on which construction begins), and would apply clearly across all types of covered public accommodations. The Department also proposed that for prefabricated elements, such as modular buildings and amusement park rides and attractions, or installed equipment, such as ATMs, the start of construction means the date on which the site preparation begins. Site preparation includes providing an accessible route to the element.

The Department's NPRM sought public comment on how to define the start of construction and the practicality of applying commencement of construction as a triggering event. The Department also requested input on whether the proposed definition of the start of construction was sufficiently clear and inclusive of different types of facilities. The Department also sought input about facilities subject to title III for which commencement of construction would be ambiguous or problematic.

The Department received numerous comments recommending that the Department adopt a two-pronged approach to defining the triggering event. In those cases where permits are required, the Department should use ''date of permit application'' as the effective date triggering event, and if no permit is required, the Department should use ''start of construction.'' A number of these commenters argued that the date of permit application is appropriate because the applicant would have to consider the applicable State and Federal accessibility standards in order to submit the designs usually required with the application. Moreover, the date of permit application is a typical triggering event in other code contexts, such as when jurisdictions introduce an updated building code. Some commenters expressed concern that using the date of ''start of construction'' was problematic because the date can be affected by factors that are outside the control of the owner. For example, an owner can plan construction to start before the new standards take effect and therefore use the 1991 Standards in the design. If permits are not issued in a timely manner, then the construction could be delayed until after the effective date, and then the project would have to be redesigned. This problem would be avoided if the permit application date was the triggering event. Two commenters expressed concern that the term ''start of construction'' is ambiguous, because it is unclear whether start of construction means the razing of structures on the site to make way for a new facility or means site preparation, such as regrading or laying the foundation.

One commenter recommended using the ''signing date of a construction contract,'' and an additional commenter recommended that the new standards apply only to ''buildings permitted after the effective date of the regulations.''

One commenter stated that for facilities that fall outside the building permit requirements (ATMs, prefabricated saunas, small sheds), the triggering event should be the date of installation, rather than the date the space for the facility is constructed.

The Department is persuaded by the comments to adopt a two-pronged approach to defining the triggering event for new construction and alterations. The final rule states that in those cases where permits are required, the triggering event shall be the date when the last application for a building permit application or permit extension is certified to be complete by a State, county, or local government, or in those jurisdictions where the government does not certify completion of applications, the date when the last application for a building permit or permit extension is received by the State, county, or local government. If no permits are required, then the triggering event shall be the ''start of physical construction or alterations.'' The Department has also added clarifying language related to the term ''start of physical construction or alterations'' to make it clear that ''start of physical construction or alterations'' is not intended to mean the date of ceremonial groundbreaking or the date a structure is razed to make it possible for construction of a facility to take place.

Amusement rides. Section 234 of the 2010 Standards provides accessibility guidelines for newly designed and constructed amusement rides. The amusement ride provisions do not provide a ''triggering event'' for new construction or alteration of an amusement ride. An industry commenter requested that the triggering event of ''first use'' as noted in the Advisory note to section 234.1 of the 2004 ADAAG be included in the final rule. The Advisory note provides that ''[a] custom designed and constructed ride is new upon its first use, which is the first time amusement park patrons take the ride.'' The Department declines to treat amusement rides differently than other types of new construction and alterations and under the final rule, they are subject to §36.406(a)(3). Thus, newly constructed and altered amusement rides shall comply with the 2010 Standards if the start of physical construction or the alteration is on or after 18 months from the publication date of this rule. The Department also notes that section 234.4.2 of the 2010 Standards only applies where the structural or

operational characteristics of an amusement ride are altered. It does not apply in cases where the only change to a ride is the theme.

Noncomplying new construction and alterations. The element-by-element safe harbor referenced in §36.304(d)(2) has no effect on new or altered elements in existing facilities that were subject to the 1991 Standards on the date that they were constructed or altered, but do not comply with the technical and scoping specifications for those elements in the 1991 Standards. Section 36.406(a)(5) of the final rule sets forth the rules for noncompliant new construction or alterations in facilities that were subject to the requirements of this part. Under those provisions, noncomplying new construction and alterations constructed or altered after the effective date of the applicable ADA requirements and before March 15, 2012 shall, before March 15, 2012, be made accessible in accordance with either the 1991 Standards or the 2010 Standards. Noncomplying new construction and alterations constructed or altered after the effective date of the applicable ADA requirements and before March 15, 2012, shall, on or after March 15, 2012, be made accessible in accordance with the 2010 Standards.

Section 36.406(b) Application of Standards to Fixed Elements

The final rule contains a new §36.406(b) that clarifies that the requirements established by this section, including those contained in the 2004 ADAAG, prescribe the requirements necessary to ensure that fixed or built-in elements in new or altered facilities are accessible to individuals with disabilities. Once the construction or alteration of a facility has been completed, all other aspects of programs, services, and activities conducted in that facility are subject to the operational requirements established elsewhere in this final rule. Although the Department has often chosen to use the requirements of the 1991 Standards as a guide to determining when and how to make equipment and furnishings accessible, those coverage determinations fall within the discretionary authority of the Department.

The Department is also clarifying that the advisory notes, appendix notes, and figures that accompany the 1991 and 2010 Standards do not establish separately enforceable requirements unless otherwise specified in the text of the standards. This clarification has been made to address concerns expressed by ANPRM commenters who mistakenly believed that the advisory notes in the 2004 ADAAG established requirements beyond those established in the text of the guidelines (*e.g.*, Advisory 504.4 suggests, but does not require, that covered entities provide visual contrast on stair tread nosings to make them more visible to individuals with low vision). The Department received no comments on this provision in the NPRM.

Section 36.406(c) Places of Lodging

In the NPRM, the Department proposed a new definition for public accommodations that are ''places of lodging'' and a new §36.406(c) to clarify the scope of coverage for places of public accommodation that meet this definition. For many years the Department has received inquiries from members of the public seeking clarification of ADA coverage of rental accommodations in timeshares, condominium hotels, and mixed-use and corporate hotel facilities that operate as places of public accommodation (as that term is now defined in §36.104). These facilities, which have attributes of both residential dwellings and transient lodging facilities, have become increasingly popular since the ADA's enactment in 1990 and make up the majority of new hotel construction in some vacation destinations. The hybrid residential and lodging characteristics of these new types of facilities, as well as their ownership characteristics, complicate determinations of ADA coverage, prompting questions from both industry and individuals with disabilities. While the Department has interpreted the ADA to encompass these hotel-like facilities when they are used to provide transient lodging, the regulation previously has specifically not addressed them. In the NPRM, the Department proposed a new §36.406(c), entitled ''Places of Lodging,'' which was intended to clarify that places of lodging, including certain timeshares, condominium hotels, and mixed-use and corporate hotel facilities, shall comply with the provisions of the proposed standards, including, but not limited to, the requirements for transient lodging in sections 224 and 806 of the 2004 ADAAG.

The Department's NPRM sought public input on this proposal. The Department received a substantial number of comments on these issues from industry representatives, advocates for persons with disabilities, and individuals. A significant focus of these comments was on how the Department should define and regulate vacation rental units in timeshares, vacation communities, and condo-hotels where the units are owned and controlled by individual owners and rented out some portion of time to the public, as compared to traditional hotels and motels that are owned, controlled, and rented to the public by one entity.

Scoping and technical requirements applicable to ''places of lodging.'' In the NPRM, the Department asked for public comment on its proposal in §36.406(c) to apply to places of lodging the scoping and technical requirements for transient lodging, rather than the scoping and technical requirements for residential dwelling units.

Commenters generally agreed that the transient lodging requirements should apply to places of lodging. Several commenters stated that the determination as to which requirements apply should be made based on the intention for use at the time of design and construction. According to these commenters, if units are intended for transient rentals, then the transient lodging standards should apply, and if they are intended to be used for residential purposes, the residential standards should apply. Some commenters agreed with the application of transient lodging standards to places of lodging in general, but disagreed about the characterization of certain types of facilities as covered places of lodging.

The Department agrees that the scoping and technical standards applicable to transient lodging should apply to facilities that contain units that meet the definition of ''places of lodging.''

Scoping for timeshare or condominium hotels. In the NPRM, the Department sought comment on the appropriate basis for determining scoping for a timeshare or condominium-hotel. A number of commenters indicated that scoping should be based on the usage of the facility. Only those units used for short-term stays should be counted for application of the transient lodging standards, while units sold as residential properties should be treated as residential units not subject to the ADA. One commenter stated that scoping should be based on the maximum number of sleeping units available for public rental. Another commenter pointed out that unlike traditional hotels and motels, the number of units available for rental in a facility or development containing individually owned units is not fixed over time. Owners have the right to participate in a public rental program some, all, or none of the time, and individual owner participation changes from year to year.

The Department believes that the determination for scoping should be based on the number of units in the project that are designed and constructed with the intention that their owners may participate in a transient lodging rental program. The Department cautions that it is not the number of owners that actually exercise their right to participate in the program that determines the scoping. Rather it is the units that could be placed into an on-site or off-site transient lodging rental program. In the final rule, the Department has added a provision to §36.406(c)(3), which states that units intended to be used exclusively for residential purposes that are contained in facilities that also meet the definition of place of lodging are not covered by the transient lodging standards. Title III of the ADA does not apply to units designed and constructed with the intention that they be rented or sold as exclusively residential units. Such units are covered by the Fair Housing Act (FHAct), which contains requirements for certain features of accessible and adaptable design both for units and for public and common use areas. All units designed and constructed with the intention that they may be used for both residential and transient lodging purposes are covered by the ADA and must be counted for determining the required number of units that must meet the transient lodging standards in the 2010 Standards. Public use and common use areas in facilities containing units subject to the ADA also must meet the 2010 Standards. In some developments, units that may serve as residential units some of the time and rental units some of the time will have to meet both the FHAct and the ADA requirements. For example, all of the units in a vacation condominium facility whose owners choose to rent to the public when they are not using the units themselves would be counted for the purposes of determining the appropriate number of units that must comply with the 2010 Standards. In a newly constructed condominium that has three floors with units dedicated to be sold solely as residential housing and three floors with units that may be used as residences or hotel units, only the units on the three latter floors would be counted for applying the 2010 Standards. In a newly constructed timeshare development containing 100 units, all of which may be made available to the public through an exchange or rental program, all 100 units would be counted for purposes of applying the 2010 Standards.

One commenter also asked the Department for clarification of how to count individually owned ''lock-off units.'' Lock-off units are units that are multi-bedroom but can be ''locked off'' into two separate units, each having individual external access. This commenter requested that the Department state in the final rule that individually owned lock-off units do not constitute multiple guest rooms for purposes of calculating compliance with the scoping requirements for accessible units, since for the most part the lock-off units are used as part of a larger accessible unit, and portions of a unit not locked off would constitute both an accessible one-bedroom unit or an accessible two-bedroom unit with the lock-off unit.

It is the Department's view that lock-off units that are individually owned that can be temporarily converted into two units do not constitute two separate guest rooms for purposes of calculating compliance with the scoping requirements.

One commenter asked the Department how developers should scope units where buildings are constructed in phases over a span of years, recommending that the scoping be based on the total number of units expected to be constructed at the project and not on a building-by-building basis or on a phase-

by-phase basis. The Department does not think scoping should be based on planned number of units, which may or may not be actually constructed over a period of years. However, the Department recognizes that resort developments may contain buildings and facilities that are of all sizes from single-unit cottages to facilities with hundreds of units. The Department believes it would be appropriate to allow designers, builders, and developers to aggregate the units in facilities with 50 or fewer units that are subject to a single permit application and that are on a common site or that are constructed at the same time for the purposes of applying the scoping requirements in table 224.2. Facilities with more than 50 units should be scoped individually in accordance with the table. The regulation has been revised to reflect this application of the scoping requirements.

One commenter also asked the Department to use the title III regulation to declare that timeshares subject to the transient lodging standards are exempt from the design and construction requirements of the FHAct. The coverage of the FHAct is set by Congress and interpreted by regulations issued by the Department of Housing and Urban Development. The Department has no authority to exempt anyone from coverage of the FHAct.

Application of ADA to places of lodging that contain individually owned units. The Department believes that regardless of ownership structure for individual units, rental programs (whether they are on- or off-site) that make transient lodging guest rooms available to the public must comply with the general nondiscrimination requirements of the ADA. In addition, as provided in §36.406(c), newly constructed facilities that contain accommodations intended to be used for transient lodging purposes must comply with the 2010 Standards.

In the NPRM, the Department asked for public comment on several issues related to ensuring the availability of accessible units in a rental program operated by a place of lodging. The Department sought input on how it could address a situation in which a new or converted facility constructs the required number of accessible units, but the owners of those units choose not to participate in the rental program; whether the facility has an obligation to encourage or require owners of accessible units to participate in the rental program; and whether the facility developer, the condominium association, or the hotel operator has an obligation to retain ownership or control over a certain number of accessible units to avoid this problem.

In the NPRM, the Department sought public input on how to regulate scoping for a timeshare or condominium-rental facility that decides, after the sale of units to individual owners, to begin a rental program that qualifies the facility as a place of lodging, and how the condominium association, operator, or developer should determine which units to make accessible.

A number of commenters expressed concerns about the ability of the Department to require owners of accessible units to participate in the rental program, to require developers, condo associations, or homeowners associations to retain ownership of accessible units, and to impose accessibility requirements on individual owners who choose to place inaccessible units into a rental program after purchase. These commenters stated that individuals who purchase accessible vacation units in condominiums, individual vacation homes, and timeshares have ownership rights in their units and may choose lawfully to make their units available to the public some, all, or none of the time. Commenters advised the Department that the Securities and Exchange Commission takes the position that if condominium units are offered in connection with participation in a required rental program for any part of the year, require the use of an exclusive rental agent, or impose conditions otherwise restricting the occupancy or rental of the unit, then that offering will be viewed as an offering of securities in the form of an investment (rather than a real estate offering). SEC Release No. 33–5347, Guidelines as to the Applicability of the Federal Securities Laws to Offers and Sales of Condominiums or Units in a Real Estate Development (Jan. 4, 1973). Consequently, most condominium developers do not impose such restrictions at the time of sale. Moreover, owners who choose to rent their units as a short-term vacation rental can select any rental or management company to lease and manage their unit, or they may rent them out on their own. They also may choose never to lease those units. Thus, there are no guarantees that at any particular time, accessible units will be available for rental by the public. According to this commenter, providing incentives for owners of accessible units to place their units in the rental program will not work, because it does not guarantee the availability of the requisite number of rooms dispersed across the development, and there is not any reasonable, identifiable source of funds to cover the costs of such incentives.

A number of commenters also indicated that it potentially is discriminatory as well as economically infeasible to require that a developer hold back the accessible units so that the units can be maintained in the rental program year-round. One commenter pointed out that if a developer did not sell the accessible condominiums or timeshares in the building inventory, the developer would be subject to a potential ADA or FHAct complaint because persons with disabilities who wanted to buy accessible units rather than rent them each year would not

have the option to purchase them. In addition, if a developer held back accessible units, the cost of those units would have to be spread across all the buyers of the inaccessible units, and in many cases would make the project financially infeasible. This would be especially true for smaller projects. Finally, this commenter argued that requiring units to be part of the common elements that are owned by all of the individual unit owners is infeasible because the common ownership would result in pooled rental income, which would transform the owners into participants in a rental pool, and thus turn the sale of the condominiums into the sale of securities under SEC Release 33–5347.

Several commenters noted that requiring the operator of the rental program to own the accessible units is not feasible either because the operator of the rental program would have to have the funds to invest in the purchase of all of the accessible units, and it would not have a means of recouping its investment. One commenter stated that in Texas, it is illegal for on-site rental programs to own condominium units. Another commenter noted that such a requirement might lead to the loss of on-site rental programs, leaving owners to use individual third-party brokers, or rent the units privately. One commenter acknowledged that individual owners cannot be required to place their units in a rental pool simply to offer an accessible unit to the public, since the owners may be purchasing units for their own use. However, this commenter recommended that owners who choose to place their units in a rental pool be required to contribute to a fund that would be used to renovate units that are placed in the rental pool to increase the availability of accessible units. One commenter argued that the legal entity running the place of lodging has an obligation to retain control over the required number of accessible units to ensure that they are available in accordance with title III.

A number of commenters also argued that the Department has no legal authority to require individual owners to engage in barrier removal where an existing development adds a rental program. One commenter stated that Texas law prohibits the operator of on-site rental program from demanding that alterations be made to a particular unit. In addition, under Texas law, condominium declarations may not require some units and not others to make changes, because that would lead to unequal treatment of units and owners, which is not permissible.

One commenter stated that since it was not possible for operators of rental programs offering privately owned condominiums to comply with accessible scoping, the Department should create exemptions from the accessible scoping, especially for existing facilities. In addition, this commenter stated that if an operator of an on-site rental program were to require renovations as a condition of participation in the rental program, unit owners might just rent their units through a different broker or on their own, in which case such requirements would not apply.

A number of commenters argued that if a development decides to create a rental program, it must provide accessible units. Otherwise the development would have to ensure that units are retrofitted. A commenter argued that if an existing building is being converted, the Department should require that if alterations of the units are performed by an owner or developer prior to sale of the units, then the alterations requirements should apply, in order to ensure that there are some accessible units in the rental pool. This commenter stated that because of the proliferation of these type of developments in Hawaii, mandatory alteration is the only way to guarantee the availability of accessible units in the long run. In this commenter's view, since conversions almost always require makeover of existing buildings, this will not lead to a significant expense.

The Department agrees with the commenters that it would not be feasible to require developers to hold back or purchase accessible units for the purposes of making them available to the public in a transient lodging rental program, nor would it be feasible to require individual owners of accessible units to participate in transient lodging rental programs.

The Department recognizes that places of lodging are developed and financed under myriad ownership and management structures and agrees that there will be circumstances where there are legal barriers to requiring compliance with either the alterations requirements or the requirements related to barrier removal. The Department has added an exception to §36.406(c), providing that in existing facilities that meet the definition of places of lodging, where the guest rooms are not owned or substantially controlled by the entity that owns, leases, or operates the overall facility and the physical features of the guest room interiors are controlled by their individual owners, the units are not subject to the alterations requirement, even where the owner rents the unit out to the public through a transient lodging rental program. In addition, the Department has added an exception to the barrier removal requirements at §36.304(g) providing that in existing facilities that meet the definition of places of lodging, where the guest rooms are not owned or substantially controlled by the entity that owns, leases, or operates the overall facility and the physical features of the guest room interiors are controlled by their individual owners, the units are not subject to the barrier removal requirement. The Department notes, however,

that there are legal relationships for some timeshares and cooperatives where the ownership interests do not convey control over the physical features of units. In those cases, it may be the case that the facility has an obligation to meet the alterations or barrier removal requirements or to maintain accessible features.

Section 36.406(d) Social Service Center Establishments

In the NPRM, the Department proposed a new §36.406(d) requiring group homes, halfway houses, shelters, or similar social service center establishments that provide temporary sleeping accommodations or residential dwelling units to comply with the provisions of the 2004 ADAAG that apply to residential facilities, including, but not limited to, the provisions in sections 233 and 809.

The NPRM explained that this proposal was based on two important changes in the 2004 ADAAG. First, for the first time, residential dwelling units are explicitly covered in the 2004 ADAAG in section 233. Second, the 2004 ADAAG eliminates the language contained in the 1991 Standards addressing scoping and technical requirements for homeless shelters, group homes, and similar social service center establishments. Currently, such establishments are covered in section 9.5 of the transient lodging section of the 1991 Standards. The deletion of section 9.5 creates an ambiguity of coverage that must be addressed.

The NPRM explained the Department's belief that transferring coverage of social service center establishments from the transient lodging standards to the residential facilities standards would alleviate conflicting requirements for social service providers. The Department believes that a substantial percentage of social service providers are recipients of Federal financial assistance from the Department of Housing and Urban Development (HUD). The Department of Health and Human Services (HHS) also provides financial assistance for the operation of shelters through the Administration for Children and Families programs. As such, they are covered both by the ADA and section 504. UFAS is currently the design standard for new construction and alterations for entities subject to section 504. The two design standards for accessibility—the 1991 Standards and UFAS—have confronted many social service providers with separate, and sometimes conflicting, requirements for design and construction of facilities. To resolve these conflicts, the residential facilities standards in the 2004 ADAAG have been coordinated with the section 504 requirements. The transient lodging standards, however, are not similarly coordinated. The deletion of section 9.5 of the 1991 Standards from the 2004 ADAAG presented two options: (1) Require coverage under the transient lodging standards, and subject such facilities to separate, conflicting requirements for design and construction; or (2) require coverage under the residential facilities standards, which would harmonizes the regulatory requirements under the ADA and section 504. The Department chose the option that harmonizes the regulatory requirements: coverage under the residential facilities standards.

In the NPRM, the Department expressed concern that the residential facilities standards do not include a requirement for clear floor space next to beds similar to the requirement in the transient lodging standards; as a result, the Department proposed adding a provision that would require certain social service center establishments that provide sleeping rooms with more than 25 beds to ensure that a minimum of 5 percent of the beds have clear floor space in accordance with section 806.2.3 of the 2004 ADAAG.

The Department requested information from providers who operate homeless shelters, transient group homes, halfway houses, and other social service center establishments, and from the clients of these facilities who would be affected by this proposed change. In the NPRM, the Department asked to what extent conflicts between the ADA and section 504 have affected these facilities and what the effect would be of applying the residential dwelling unit requirements to these facilities, rather than the requirements for transient lodging guest rooms.

Many of the commenters supported applying the residential facilities requirements to social service center establishments stating that even though the residential facilities requirements are less demanding, in some instances, the existence of one clear standard will result in an overall increased level of accessibility by eliminating the confusion and inaction that are sometimes caused by the current existence of multiple requirements. One commenter stated that the residential facilities guidelines were more appropriate because individuals housed in social service center establishments typically stay for a prolonged period of time, and guests of a transient lodging facility typically are not housed to participate in a program or receive services.

One commenter opposed to the proposed section argued for the application of the transient lodging standards to all social service center establishments except those that were ''intended as a person's place of abode,'' referencing the Department's question related to the definition of place of lodging in the title III NPRM. A second commenter stated that the use of transient lodging guidelines would lead to greater accessibility.

The Department continues to be concerned about alleviating the challenges for social

service providers that are also subject to section 504 and that would likely be subject to conflicting requirements if the transient lodging standard were applied. Thus, the Department has retained the requirement that social service center establishments comply with the residential dwelling standards. The Department did not receive comments regarding adding a requirement for bathing options, such as a roll-in shower, in social service center establishments operated by public accommodations. The Department did, however, receive comments in support of adding such a requirement regarding public entities under title II. The Department believes that social service center establishments that provide emergency shelter to large transient populations should be able to provide bathing facilities that are accessible to persons with mobility disabilities who need roll-in showers. Because of the transient nature of the population of these large shelters, it will not be feasible to modify bathing facilities in a timely manner when faced with a need to provide a roll-in shower with a seat when requested by an overnight visitor. As a result, the Department has added a requirement that social service center establishments with sleeping accommodations for more than 50 individuals must provide at least one roll-in shower with a seat that complies with the relevant provisions of section 608 of the 2010 Standards. Transfer-type showers are not permitted in lieu of a roll-in shower with a seat, and the exceptions in sections 608.3 and 608.4 for residential dwelling units are not permitted. When separate shower facilities are provided for men and for women, at least one roll-in shower must be provided for each group. This supplemental requirement to the residential facilities standards is in addition to the supplemental requirement that was proposed in the NPRM for clear floor space in sleeping rooms with more than 25 beds.

The Department also notes that while dwelling units at some social service center establishments are also subject to FHAct design and construction requirements that require certain features of adaptable and accessible design, FHAct units do not provide the same level of accessibility that is required for residential facilities under the 2010 Standards. The FHAct requirements, where also applicable, should not be considered a substitute for the 2010 Standards. Rather, the 2010 Standards must be followed in addition to the FHAct requirements.

The Department also notes that while in the NPRM the Department used the term ''social service establishment,'' the final rule uses the term ''social service center establishment.'' The Department has made this editorial change so that the final rule is consistent with the terminology used in the ADA. *See* 42 U.S.C. 12181(7)(K).

Section 36.406(e) Housing at a Place of Education

The Department of Justice and the Department of Education share responsibility for regulation and enforcement of the ADA in postsecondary educational settings, including architectural features. Housing types in educational settings range from traditional residence halls and dormitories to apartment or townhouse-style residences. In addition to title III of the ADA, universities and schools that are recipients of Federal financial assistance also are subject to section 504, which contains its own accessibility requirements currently through the application of UFAS. Residential housing, including housing in an educational setting, is also covered by the FHAct, which requires newly constructed multifamily housing to include certain features of accessible and adaptable design. Covered entities subject to the ADA must always be aware of, and comply with, any other Federal statutes or regulations that govern the operation of residential properties.

Although the 1991 Standards mention dormitories as a form of transient lodging, they do not specifically address how the ADA applies to dormitories and other types of residential housing provided in an educational setting. The 1991 Standards also do not contain any specific provisions for residential facilities, allowing covered entities to elect to follow the residential standards contained in UFAS. Although the 2004 ADAAG contains provisions for both residential facilities and transient lodging, the guidelines do not indicate which requirements apply to housing provided in an educational setting, leaving it to the adopting agencies to make that choice. After evaluating both sets of standards, the Department concluded that the benefits of applying the transient lodging standards outweighed the benefits of applying the residential facilities standards. Consequently, in the NPRM, the Department proposed a new §36.406(e) that provided that residence halls or dormitories operated by or on behalf of places of education shall comply with the provisions of the proposed standards for transient lodging, including, but not limited to, the provisions in sections 224 and 806 of the 2004 ADAAG.

Private universities and schools covered by title III as public accommodations are required to make their programs and activities accessible to persons with disabilities. The housing facilities that they provide have varied characteristics. College and university housing facilities typically provide housing for up to one academic year, but may be closed during school vacation periods. In the summer, they often are used for short-term stays of one to three days, a week, or several months. Graduate and faculty housing often

is provided year-round in the form of apartments, which may serve individuals or families with children. These housing facilities are diverse in their layout. Some are double-occupancy rooms with a shared toilet and bathing room, which may be inside or outside the unit. Others may contain cluster, suite, or group arrangements where several rooms are located inside a defined unit with bathing, kitchen, and similar common facilities. In some cases, these suites are indistinguishable in features from traditional apartments. Universities may build their own housing facilities or enter into agreements with private developers to build, own, or lease housing to the educational institution or to its students. Academic housing may be located on the campus of the university or may be located in nearby neighborhoods.

Throughout the school year and the summer, academic housing can become program areas in which small groups meet, receptions and educational sessions are held, and social activities occur. The ability to move between rooms—both accessible rooms and standard rooms—in order to socialize, to study, and to use all public use and common use areas is an essential part of having access to these educational programs and activities. Academic housing also is used for short-term transient educational programs during the time students are not in regular residence and may be rented out to transient visitors in a manner similar to a hotel for special university functions.

The Department was concerned that applying the new construction requirements for residential facilities to educational housing facilities could hinder access to educational programs for students with disabilities. Elevators generally are not required under the 2004 ADAAG residential facilities standards unless they are needed to provide an accessible route from accessible units to public use and common use areas, while under the 2004 ADAAG as it applies to other types of facilities, multistory private facilities must have elevators unless they meet very specific exceptions. In addition, the residential facilities standards do not require accessible roll-in showers in bathrooms, while the transient lodging requirements require some of the accessible units to be served by bathrooms with roll-in showers. The transient lodging standards also require that a greater number of units have accessible features for persons with communication disabilities. The transient lodging standards provide for installation of the required accessible features so that they are available immediately, but the residential facilities standards allow for certain features of the unit to be adaptable. For example, only reinforcements for grab bars need to be provided in residential dwellings, but the actual grab bars must be installed under the transient lodging standards. By contrast, the residential facilities standards do require certain features that provide greater accessibility within units, such as usable kitchens and an accessible route throughout the dwelling. The residential facilities standards also require 5 percent of the units to be accessible to persons with mobility disabilities, which is a continuation of the same scoping that is currently required under UFAS and is therefore applicable to any educational institution that is covered by section 504. The transient lodging standards require a lower percentage of accessible sleeping rooms for facilities with large numbers of rooms than is required by UFAS. For example, if a dormitory has 150 rooms, the transient lodging standards would require 7 accessible rooms, while the residential standards would require 8. In a large dormitory with 500 rooms, the transient lodging standards would require 13 accessible rooms, and the residential facilities standards would require 25. There are other differences between the two sets of standards, including requirements for accessible windows, alterations, kitchens, an accessible route throughout a unit, and clear floor space in bathrooms allowing for a side transfer.

In the NPRM, the Department requested public comment on how to scope educational housing facilities, and it asked whether the residential facilities requirements or the transient lodging requirements in the 2004 ADAAG would be more appropriate for housing at places of education and asked how the different requirements would affect the cost of building new dormitories and other student housing. *See* 73 FR 34508, 34545 (June 17, 2008).

The Department received several comments on this issue under title III. One commenter stated that the Department should adopt the residential facilities standards for housing at a place of education. In the commenter's view, the residential facilities standards are congruent with overlapping requirements imposed by HUD, and the residential facilities requirements would ensure dispersion of accessible features more effectively. This commenter also argued that while the increased number of required accessible units for residential facilities as compared to transient lodging may increase the cost of construction or alteration, this cost would be offset by a reduced need later to adapt rooms if the demand for accessible rooms exceeds the supply. The commenter also encouraged the Department to impose a visitability (accessible doorways and necessary clear floor space for turning radius) requirement for both the residential facilities and transient lodging requirements to allow students with mobility impairments to interact and socialize in a fully integrated fashion. Another commenter stated that while dormitories should be treated like residences as opposed to transient lodging, the

Department should ensure that ''all floors are accessible,'' thus ensuring community integration and visitability. Another commenter argued that housing at a place of education is comparable to residential housing, and that most of the housing types used by schools do not have the same amenities and services or function like transient lodging and should not be treated as such.

Several commenters focused on the length of stay at this type of housing and suggested that if the facilities are subject to occupancy for greater than 30 days, the residential standards should apply. Another commenter supported the Department's adoption of the transient lodging standards, arguing this will provide greater accessibility and therefore increase opportunities for students with disabilities to participate. One commenter, while supporting the use of transient lodging standards in this area, argued that the Department also should develop regulations relating to the usability of equipment in housing facilities by persons who are blind or visually impaired. Another commenter argued that the Department should not impose the transient lodging requirements on K–12 schools because the cost of adding elevators can be prohibitive, and because there are safety concerns related to evacuating students in wheelchairs living on floors above the ground floor in emergencies causing elevator failures.

The Department has considered the comments recommending the use of the residential facilities standards and acknowledges that they require certain features that are not included in the transient lodging standards and that should be required for housing provided at a place of education. In addition, the Department notes that since educational institutions often use their academic housing facilities as short-term transient lodging in the summers, it is important that accessible features be installed at the outset. It is not realistic to expect that the educational institution will be able to adapt a unit in a timely manner in order to provide accessible accommodations to someone attending a one-week program during the summer.

The Department has determined that the best approach to this type of housing is to continue to require the application of transient lodging standards but, at the same time, to add several requirements drawn from the residential facilities standards related to accessible turning spaces and work surfaces in kitchens, and the accessible route throughout the unit. This will ensure the maintenance of the transient lodging standard requirements related to access to all floors of the facility, roll-in showers in facilities with more than 50 sleeping rooms, and other important accessibility features not found in the residential facilities standards, but also will ensure usable kitchens and access to all the rooms in a suite or apartment.

The Department has added a new definition to §36.104, ''Housing at a Place of Education,'' and has revised §36.406(e) to reflect the accessible features that now will be required in addition to the requirements set forth under the transient lodging standards. The Department also recognizes that some educational institutions provide some residential housing on a year-round basis to graduate students and staff that is comparable to private rental housing but contains no facilities for educational programming. Section 36.406(e)(3) exempts from the transient lodging standards apartments or townhouse facilities that are provided with a lease on a year-round basis exclusively to graduate students or faculty and that do not contain any public use or common use areas available for educational programming; instead, such housing must comply with the requirements for residential facilities in sections 233 and 809 of the 2010 Standards.

The regulatory text uses the term ''sleeping room'' in lieu of the term ''guest room,'' which is the term used in the transient lodging standards. The Department is using this term because it believes that for the most part, it provides a better description of the sleeping facilities used in a place of education than ''guest room.'' The final rule states in §36.406(e) that the Department intends the terms to be used interchangeably in the application of the transient lodging standards to housing at a place of education.

Section 36.406(f) Assembly Areas

In the NPRM, the Department proposed §36.406(f) to supplement the assembly area requirements of the 2004 ADAAG, which the Department is adopting as part of the 2010 Standards. The NPRM proposed at §36.406(f)(1) to require wheelchair spaces and companion seating locations to be dispersed to all levels of the facility that are served by an accessible route. The Department received no significant comments on this paragraph and has decided to adopt the proposed language with minor modifications.

Section 36.406(f)(1) ensures that there is greater dispersion of wheelchair spaces and companion seats throughout stadiums, arenas, and grandstands than would otherwise be required by sections 221 and 802 of the 2004 ADAAG. In some cases, the accessible route may not be the same route that other individuals use to reach their seats. For example, if other patrons reach their seats on the field by an inaccessible route (*e.g.*, by stairs), but there is an accessible route that complies with section 206.3 of the 2004 ADAAG that could be connected to seats on the field, wheelchair spaces and companion seats must be placed on the field even if that route is not generally available to the public.

Regulatory language that was included in the 2004 ADAAG advisory, but that did not appear in the NPRM, has been added by the Department in §36.406(f)(2). Section 36.406(f)(2) now requires an assembly area that has seating encircling, in whole or in part, a field of play or performance area, such as an arena or stadium, to place wheelchair spaces and companion seats around the entire facility. This rule, which is designed to prevent a public accommodation from placing wheelchair spaces and companion seats on one side of the facility only, is consistent with the Department's enforcement practices and reflects its interpretation of section 4.33.3 of the 1991 Standards.

In the NPRM, the Department proposed §36.406(f)(2), which prohibits wheelchair spaces and companion seating locations from being ''located on (or obstructed by) temporary platforms * * *.'' 73 FR 34508, 34557 (June 17, 2008). Through its enforcement actions, the Department discovered that some venues place wheelchair spaces and companion seats on temporary platforms that, when removed, reveal conventional seating underneath, or cover the wheelchair spaces and companion seats with temporary platforms on top of which they place risers of conventional seating. These platforms cover groups of conventional seats and are used to provide groups of wheelchair seats and companion seats.

Several commenters requested an exception to the prohibition of the use of temporary platforms for public accommodations that sell most of their tickets on a season-ticket or other multi-event basis. Such commenters argued that they should be able to use temporary platforms because they know, in advance, that the patrons sitting in certain areas for the whole season do not need wheelchair spaces and companion seats. The Department declines to adopt such an exception. As it explained in detail in the NPRM, the Department believes that permitting the use of movable platforms that seat four or more wheelchair users and their companions have the potential to reduce the number of available wheelchair seating spaces below the level required, thus reducing the opportunities for persons who need accessible seating to have the same choice of ticket prices and amenities that are available to other patrons in the facility. In addition, use of removable platforms may result in instances where last minute requests for wheelchair and companion seating cannot be met because entire sections of accessible seating will be lost when a platform is removed. *See* 73 FR 34508, 34546 (June 17, 2008). Further, use of temporary platforms allows facilities to limit persons who need accessible seating to certain seating areas, and to relegate accessible seating to less desirable locations. The use of temporary platforms has the effect of neutralizing dispersion and other seating requirements (*e.g.*, line of sight) for wheelchair spaces and companion seats. *Cf. Independent Living Resources* v. *Oregon Arena Corp.*, 1 F. Supp. 2d 1159, 1171 (D. Or. 1998) (holding that while a public accommodation may ''infill'' wheelchair spaces with removable seats when the wheelchair spaces are not needed to accommodate individuals with disabilities, under certain circumstances ''[s]uch a practice might well violate the rule that wheelchair spaces must be dispersed throughout the arena in a manner that is roughly proportionate to the overall distribution of seating''). In addition, using temporary platforms to convert unsold wheelchair spaces to conventional seating undermines the flexibility facilities need to accommodate secondary ticket market exchanges as required by §36.302(f)(7) of the final rule.

As the Department explained in the NPRM, however, this provision was not designed to prohibit temporary seating that increases seating for events (*e.g.*, placing temporary seating on the floor of a basketball court for a concert). Consequently, the final rule, at §36.406(f)(3), has been amended to clarify that if an entire seating section is on a temporary platform for a particular event, then wheelchair spaces and companion seats may also be in that seating section. However, adding a temporary platform to create wheelchair spaces and companion seats that are otherwise dissimilar from nearby fixed seating and then simply adding a small number of additional seats to the platform would not qualify as an ''entire seating section'' on the platform. In addition, §36.406(f)(3) clarifies that facilities may fill in wheelchair spaces with removable seats when the wheelchair spaces are not needed by persons who use wheelchairs.

The Department has been responsive to assembly areas' concerns about reduced revenues due to unused accessible seating. Accordingly, the Department has reduced scoping requirements significantly—by almost half in large assembly areas—and determined that allowing assembly areas to infill unsold wheelchair spaces with readily removable temporary individual seats appropriately balances their economic concerns with the rights of individuals with disabilities. *See* section 221.1 of the 2010 Standards.

For stadium-style movie theaters, in §36.406(f)(4) of the NPRM the Department proposed requiring placement of wheelchair seating spaces and companion seats on a riser or cross-aisle in the stadium section of the theater that satisfies at least one of the following criteria: (1) It is located within the rear 60 percent of the seats provided in the auditorium; or (2) It is located within the area of the auditorium where the vertical viewing angles are between the 40th and 100th percentile of vertical viewing angles for all seats in that theater as ranked from

the first row (1st percentile) to the back row (100th percentile). The vertical viewing angle is the angle between a horizontal line perpendicular to the seated viewer's eye to the screen and a line from the seated viewer's eye to the top of the screen.

The Department proposed this bright-line rule for two reasons: (1) the movie theater industry petitioned for such a rule; and (2) the Department has acquired expertise in the design of stadium-style theaters during its litigation with several major movie theater chains. *See United States.* v. *AMC Entertainment, Inc.*, 232 F. Supp.2d 1092 (C.D. Cal. 2002), *rev'd in part,* 549 F.3d 760 (9th Cir. 2008); *United States* v. *Cinemark USA, Inc.*, 348 F.3d 569 (6th Cir. 2003). Two industry commenters—at least one of whom otherwise supported this rule—requested that the Department explicitly state that this rule does not apply retroactively to existing theaters. Although this provision on its face applies to new construction and alterations, these commenters were concerned that the rule could be interpreted to apply retroactively because of the Department's statements in the NPRM and ANPRM that this bright line rule, although newly articulated, is not a new standard but ''merely codifi[es] longstanding Department requirement[s],'' 73 FR 34508, 34534 (June 17, 2008), and does not represent a ''substantive change from the existing line-of-sight requirements'' of section 4.33.3 of the 1991 Standards, 69 FR 58768, 58776 (Sept. 30, 2004).

Although the Department intends for §36.406(f)(4) of this rule to apply prospectively to new construction and alterations, this rule is not a departure from, and is consistent with, the line-of-sight requirements in the 1991 Standards. The Department has always interpreted the line-of-sight requirements in the 1991 Standards to require viewing angles provided to patrons who use wheelchairs to be comparable to those afforded to other spectators. Section 36.406(f)(4) merely represents the application of these requirements to stadium-style movie theaters.

One commenter from a trade association sought clarification whether §36.406(f)(4) applies to stadium-style theaters with more than 300 seats, and argued that it should not since dispersion requirements apply in those theaters. The Department declines to limit this rule to stadium-style theaters with 300 or fewer seats; stadium-style theaters of all sizes must comply with this rule. So, for example, stadium-style theaters that must vertically disperse wheelchair spaces and companion seats must do so within the parameters of this rule.

The NPRM included a provision that required assembly areas with more than 5,000 seats to provide at least five wheelchair spaces with at least three companion seats for each of those five wheelchair spaces. The Department agrees with commenters who asserted that group seating is better addressed through ticketing policies rather than design and has deleted that provision from this section of the final rule.

Section 36.406(g) Medical Care Facilities

In the 1991 title III regulation, there was no provision addressing the dispersion of accessible sleeping rooms in medical care facilities. The Department is aware, however, of problems that individuals with disabilities face in receiving full and equal medical care when accessible sleeping rooms are not adequately dispersed. When accessible rooms are not fully dispersed, a person with a disability is often placed in an accessible room in an area that is not medically appropriate for his or her condition, and is thus denied quick access to staff with expertise in that medical specialty and specialized equipment. While the Access Board did not establish specific design requirements for dispersion in the 2004 ADAAG, in response to extensive comments in support of dispersion it added an advisory note, Advisory 223.1 General, encouraging dispersion of accessible rooms within the facility so that accessible rooms are more likely to be proximate to appropriate qualified staff and resources.

In the NPRM, the Department sought additional comment on the issue, asking whether it should require medical care facilities, such as hospitals, to disperse their accessible sleeping rooms, and if so, by what method (by specialty area, floor, or other criteria). All of the comments the Department received on this issue supported dispersing accessible sleeping rooms proportionally by specialty area. These comments from individuals, organizations, and a building code association, argued that it would not be difficult for hospitals to disperse rooms by specialty area, given the high level of regulation to which hospitals are subject and the planning that hospitals do based on utilization trends. Further, comments suggest that without a requirement, it is unlikely that hospitals would disperse the rooms. In addition, concentrating accessible rooms in one area perpetuates segregation of individuals with disabilities, which is counter to the purpose of the ADA.

The Department has decided to require medical care facilities to disperse their accessible sleeping rooms in a manner that is proportionate by type of medical specialty. This does not require exact mathematical proportionality, which at times would be impossible. However, it does require that medical care facilities disperse their accessible rooms by medical specialty so that persons with disabilities can, to the extent practical, stay in an accessible room within the wing or ward that is appropriate for their medical needs. The language used in this rule (''in a

manner that is proportionate by type of medical specialty'') is more specific than that used in the NPRM (''in a manner that enables patients with disabilities to have access to appropriate specialty services'') and adopts the concept of proportionality proposed by the commenters. Accessible rooms should be dispersed throughout all medical specialties, such as obstetrics, orthopedics, pediatrics, and cardiac care.

SUBPART F—CERTIFICATION OF STATE LAWS OR LOCAL BUILDING CODES

Subpart F contains procedures implementing section 308(b)(1)(A)(ii) of the ADA, which provides that on the application of a State or local jurisdiction, the Attorney General may certify that a State or local building code or similar ordinance meets or exceeds the minimum accessibility requirements of the Act. In enforcement proceedings, this certification will constitute rebuttable evidence that the law or code meets or exceeds the ADA's requirements. In its NPRM, the Department proposed three changes in subpart F that would streamline the process for public entities seeking certification, all of which are adopted in this final rule.

First, the Department proposed deleting the existing §36.603, which establishes the obligations of a submitting authority that is seeking certification of its code, and issue in its place informal regulatory guidance regarding certification submission requirements. Due to the deletion of §36.603, §§36.604 through 36.608 are renumbered, and §36.603 in the final rule is modified to indicate that the Assistant Attorney General for the Civil Rights Division (Assistant Attorney General) shall make a preliminary determination of equivalency after ''receipt and review of all information relevant to a request filed by a submitting official for certification of a code.'' Second, the Department proposed that the requirement in renumbered §36.604 (previously §36.605) that an informal hearing be held in Washington, DC, if the Assistant Attorney General makes a preliminary determination of equivalency be changed to a requirement that the hearing be held in the State or local jurisdiction charged with administration and enforcement of the code. Third, the Department proposed adding language to renumbered §36.606 (previously §36.607) to explain the effect of the 2010 Standards on the codes of State or local jurisdictions that were determined in the past to meet or exceed the 1991 Standards. Once the 2010 Standards take effect, certifications issued under the 1991 Standards would not have any future effect, and States and local jurisdictions with codes certified under the 1991 Standards would need to reapply for certification under the 2010 Standards. With regard to elements of existing buildings and facilities constructed in compliance with a code when a certification of equivalency was in effect, the final rule requires that in any enforcement action this compliance would be treated as rebuttable evidence of compliance with the standards then in effect. The new provision added to §36.606 may also have implications in determining an entity's eligibility for the element-by-element safe harbor.

No substantive comments were received regarding the Department's proposed changes in subpart F, and no other changes have been made to this subpart in the final rule. The Department did receive several comments addressing other issues raised in the NPRM that are related to subpart F. Because the 2010 Standards include specific design requirements for recreation facilities and play areas that may be new to many title III facilities, the Department sought comments in the NPRM about how the certification review process would be affected if the State or local jurisdiction allocates the authority to implement the new requirements to State or local agencies that are not ordinarily involved in administering building codes. One commenter, an association of building owners and managers, suggested that because of the increased scope of the 2010 Standards, it is likely that parts of covered elements in the new standards will be under the jurisdiction of multiple State or local agencies. In light of these circumstances, the commenter recommended that the Department allow State or local agencies to seek certification even if only one State or local regulatory agency requests certification. For example, if a State agency that regulates buildings seeks certification of its building code, it should be able to do so, even if another State agency that regulates amusement rides and miniature golf courses does not seek certification.

The Department's discussion of this issue in the NPRM contemplated that all of a State or local government's accessibility requirements for title III facilities would be the subject of a request for certification. Any other approach would require the Department to certify only part of a State or local government's accessibility requirements as compared to the entirety of the revised ADA standards. As noted earlier, the Attorney General is authorized by section 308(b)(1)(A)(ii) of the ADA to certify that a State or local building code meets or exceeds the ADA's minimum accessibility requirements, which are contained in this regulation. The Department has concluded that this is a decision that must be made on a case-by-case basis because of the wide variety of enforcement schemes adopted by the States. Piecemeal certification of laws or codes that do not contain all of the minimum accessibility requirements could fail

to satisfy the Attorney General's responsibility to ensure that a State or local building code meets or exceeds the minimum accessibility requirements of the Act before granting certification. However, the Department wants to permit State and local code administrators to have maximum flexibility, so the Department will leave open the possibility for case-by-case review to determine if a State has successfully met the burden of demonstrating that its accessibility codes or other laws meet or exceed the ADA requirements.

The commenter representing building owners and managers also urged the Department to extend the proposed effective date for the final rule. The commenter explained that a six-month phase-in period is inadequate for States to begin and complete a code amendment process. The commenter asserted that the inadequate phase-in period will place entities undertaking new construction and alterations, particularly in those States with certified codes, in a difficult position because State officials will continue to enforce previously certified State or local accessibility requirements that may be in conflict with the new 2010 Standards. The Department received numerous comments on the issue of the effective date, many of them similar to the concerns expressed above, in response to both the NPRM and the ANPRM. *See* Appendix A discussion of compliance dates for new construction and alterations (§36.406). The Department has been persuaded by the concerns raised by many commenters addressing the time and costs related to the design process for both new construction and alterations, and has determined that for new construction and alterations, compliance with the 2010 Standards will not be required until 18 months from the date the final rule is published. For more information on the issue of the compliance date, refer to subpart D—New Construction and Alterations.

One commenter, an association of theater owners, recommended that the Department establish a training program for State building inspectors for those States that receive certification to ensure more consistent ADA compliance and to facilitate the review of builders' architectural plans. The commenter also recommended that State building inspectors, once trained, review architectural plans, and after completion and inspection of facilities, be authorized to certify that the inspected building or facility meets both the certified State and the Federal accessibility requirements. Although supportive of the idea of additional training for State and local building code officials regarding ADA compliance, the Department believes that the approach suggested by the commenter of allowing State and local code officials to determine if a covered facility is in compliance with Federal accessibility requirements is not consistent with or permissible under the statutory enforcement scheme established by the ADA. As the Department stated in the NPRM, certification of State and local codes serves, to some extent, to mitigate the absence of a Federal mechanism for conducting at the national level a review of all architectural plans and inspecting all covered buildings under construction to ensure compliance with the ADA. In this regard, certification operates as a bridge between the obligation to comply with the 1991 Standards in new construction and alterations, and the administrative schemes of State and local governments that regulate the design and construction process. By ensuring consistency between State or local codes and Federal accessibility standards, certification has the additional benefit of streamlining the regulatory process, thereby making it easier for those in the design and construction industry to satisfy both State and Federal requirements. The Department notes, however, that although certification has the potential to increase compliance with the ADA, this result, however desirable, is not guaranteed. The ADA contemplated that there could be enforcement actions brought even in States with certified codes, and it provided some protection in litigation to builders who adhered to the provisions of the code certified to be ADA-equivalent. The Department's certification determinations make it clear that to get the benefit of certification, a facility must comply with the applicable code requirements—without relying on waivers or variances. The certified code, however, remains within the authority of the adopting State or local jurisdiction to interpret and enforce: Certification does not transform a State's building code into Federal law. Nor can certification alone authorize State and local building code officials implementing a certified code to do more than they are authorized to do under State or local law, and these officials cannot acquire authority through certification to render binding interpretations of Federal law. Therefore, the Department, while understanding the interest in obtaining greater assurance of compliance with the ADA through the interpretation and enforcement of a certified code by local code officials, declined in the NPRM to confer on local officials the authority not granted to them under the ADA to certify the compliance of individual facilities. The Department in the final rule finds no reason to alter its position on this issue in response to the comments that were received.

The commenter representing theater owners also urged the Department to provide a safe harbor to facilities constructed in compliance with State or local building codes certified under the 1991 Standards. With regard to elements of facilities constructed in compliance with a certified code prior to the

effective date of the 2010 Standards, and during the period when a certification of equivalency was in effect, the Department noted in the NPRM that its approach would be consistent with the approach to the safe harbor discussed in subpart C, §36.304 of the NPRM, with respect to elements in existing facilities constructed in compliance with the 1991 Standards. For example, elements in existing facilities in States with codes certified under the 1991 Standards would be eligible for a safe harbor if they were constructed in compliance with an ADA-certified code. In this scenario, compliance with the certified code would be treated as evidence of compliance with the 1991 Standards for purposes of determining the application of the safe harbor provision to those elements. For more information on safe harbor, refer to subpart C, §36.304 of the final rule.

One commenter, an advocacy group for the blind, suggested that, similar to the procedures for certifying a State or local building code, the Department should establish a program to certify an entity's obligation to make its goods and services accessible to persons with sensory disabilities. The Department believes that this commenter was suggesting that covered entities should be able to request that the Department review their business operations to determine if they have met their ADA obligations. As noted earlier, subpart F contains procedures implementing section 308(b)(1)(A)(ii) of the ADA, which provides that on the application of a State or local jurisdiction, the Attorney General may certify that a State or local building code or similar ordinance meets or exceeds the minimum accessibility requirements of the ADA. The only mechanism through which the Department is authorized to ensure a covered entity's compliance with the ADA is the enforcement scheme established under section 308(b)(1)(A)(i) of the ADA. The Department notes, however, that title III of the ADA and its implementing regulation, which includes the standards for accessible design, already require existing, altered, and newly constructed places of public accommodation, such as retail stores, hotels, restaurants, movie theaters, and stadiums, to make their facilities readily accessible to and usable by individuals with disabilities, which includes individuals with sensory disabilities, so that individuals with disabilities have a full and equal opportunity to enjoy the benefits of a public accommodation's goods, services, facilities, privileges and advantages.

OTHER ISSUES

Questions Posed in the NPRM Regarding Costs and Benefits of Complying With the 2010 Standards

In the NPRM, the Department requested comments on various cost and benefit issues related to eight requirements in the Department's Initial RIA, that were projected to have incremental costs that exceeded monetized benefits by more than $100 million when using the 1991 Standards as a comparative baseline, *i.e.,* side reach, water closet clearances in single-user toilet rooms with in-swinging doors, stairs, elevators, location of accessible routes to stages, accessible attorney areas and witness stands, assistive listening systems, and accessible teeing grounds, putting greens, and weather shelters at golf courses. 73 FR 34508, 34512 (June 17, 2008). The Department was particularly concerned about how these costs applied to alterations. The Department noted that pursuant to the ADA, the Department does not have statutory authority to modify the 2004 ADAAG and is required instead to issue regulations implementing the ADA that are consistent with the Board's guidelines. In that regard, the Department also requested comment about whether any of these eight elements in the 2010 Standards should be returned to the Access Board for further consideration, in particular as applied to alterations. Many of the comments received by the Department in response to these questions addressed both titles II and III. As a result, the Department's discussion of these comments and its response are collectively presented for both titles.

Side reach. The 1991 Standards at section 4.2.6 establish a maximum side-reach height of 54 inches. The 2010 Standards at section 308.3.1 reduce that maximum height to 48 inches. The 2010 Standards also add exceptions for certain elements to the scoping requirement for operable parts.

The vast majority of comments the Department received were in support of the lower side-reach maximum of 48 inches in the 2010 Standards. Most of these comments, but not all, were received from individuals of short stature, relatives of individuals of short stature, or organizations representing the interests of persons with disabilities, including individuals of short stature. Comments from individuals with disabilities and disability advocacy groups stated that the 48-inch side reach would permit independence in performing many activities of daily living for individuals with disabilities, including individuals of short stature, persons who use wheelchairs, and persons who have limited upper body strength. In this regard, one commenter who is a business owner pointed out that as a person of short stature there were many occasions when he was unable to exit a public restroom independently because he could not reach the door handle. The commenter said that often elevator control buttons are out of his reach, and, if he is alone, he often must wait for someone else to enter the elevator so that he can ask that person to press a floor button for him. Another commenter, who is also a person of

short stature, said that he has on several occasions pulled into a gas station only to find that he was unable to reach the credit card reader on the gas pump. Unlike other customers who can reach the card reader, swipe their credit or debit cards, pump their gas, and leave the station, he must use another method to pay for his gas. Another comment from a person of short stature pointed out that as more businesses take steps to reduce labor costs—a trend expected to continue—staffed booths are being replaced with automatic machines for the sale, for example, of parking tickets and other products. He observed that the ''ability to access and operate these machines becomes ever more critical to function in society,'' and, on that basis, urged the Department to adopt the 48-inch side-reach requirement. Another individual commented that persons of short stature should not have to carry with them adaptive tools in order to access building or facility elements that are out of their reach, any more than persons in wheelchairs should have to carry ramps with them in order to gain access to facilities.

Many of the commenters who supported the revised side-reach requirement pointed out that lowering the side-reach requirement to 48 inches would avoid a problem sometimes encountered in the built environment when an element was mounted for a parallel approach at 54 inches, only to find afterwards that a parallel approach was not possible. Some commenters also suggested that lowering the maximum unobstructed side reach to 48 inches would reduce confusion among design professionals by making the unobstructed forward and side-reach maximums the same (the unobstructed forward reach in both the 1991 and 2010 Standards is 48 inches maximum). These commenters also pointed out that the ICC/ANSI A117.1 Standard, which is a private sector model accessibility standard, has included a 48-inch maximum high side-reach requirement since 1998. Many jurisdictions have already incorporated this requirement into their building codes, which these commenters believed would reduce the cost of compliance with the 2010 Standards. Because numerous jurisdictions have already adopted the 48-inch side-reach requirement, the Department's failure to adopt the 48-inch side-reach requirement in the 2010 Standards, in the view of many commenters, would result in a significant reduction in accessibility, and would frustrate efforts that have been made to harmonize private sector model construction and accessibility codes with Federal accessibility requirements. Given these concerns, they overwhelmingly opposed the idea of returning the revised side-reach requirement to the Access Board for further consideration.

The Department also received comments in support of the 48-inch side-reach requirement from an association of professional commercial property managers and operators and from State governmental entities. The association of property managers pointed out that the revised side-reach requirement provided a reasonable approach to ''regulating elevator controls and all other operable parts'' in existing facilities in light of the manner in which the safe harbor, barrier removal, and alterations obligations will operate in the 2010 Standards. One governmental entity, while fully supporting the 48-inch side-reach requirement, encouraged the Department to adopt an exception to the lower reach range for existing facilities similar to the exception permitted in the ICC/ANSI A117.1 Standard. In response to this latter concern, the Department notes that under the safe harbor, existing facilities that are in compliance with the 1991 Standards, which required a 54-inch side-reach maximum, would not be required to comply with the lower side-reach requirement, unless there is an alteration. *See* §36.304(d)(2)(i).

A number of commenters expressed either concern with, or opposition to, the 48-inch side-reach requirement and suggested that it be returned to the Access Board for further consideration. These commenters included trade and business associations, associations of retail stores, associations of restaurant owners, retail and convenience store chains, and a model code organization. Several businesses expressed the view that the lower side-reach requirement would discourage the use of their products and equipment by most of the general public. In particular, concerns were expressed by a national association of pay phone service providers regarding the possibility that pay telephones mounted at the lower height would not be used as frequently by the public to place calls, which would result in an economic burden on the pay phone industry. The commenter described the lower height required for side reach as creating a new ''barrier'' to pay phone use, which would reduce revenues collected from pay phones and, consequently, further discourage the installation of new pay telephones. In addition, the commenter expressed concern that phone service providers would simply decide to remove existing pay phones rather than incur the costs of relocating them at the lower height. With regard to this latter concern, the commenter misunderstood the manner in which the safe harbor and barrier removal obligations under §36.304 will operate in the revised title III regulation for elements that comply with the 1991 Standards. The Department does not anticipate that wholesale relocation of pay telephones in existing facilities will be required under the final rule where the telephones in existing facilities already are in compliance with the 1991 Standards. If the pay phones comply with the 1991 Standards, the adoption of the 2010 Standards does not

require retrofitting of these elements to reflect incremental changes in the 2010 Standards. *See* §36.304(d)(2). However, pay telephones that were required to meet the 1991 Standards as part of new construction or alterations, but do not in fact comply with those standards, will need to be brought into compliance with the 2010 Standards as of 18 months from the publication date of this final rule. *See* §36.406(a)(5).

The Department does not agree with the concerns expressed by the commenter about reduced revenues from pay phones mounted at lower heights. The Department believes that while given the choice some individuals may prefer to use a pay phone that is at a higher height, the availability of some phones at a lower height will not deter individuals from making needed calls.

The 2010 Standards will not require every pay phone to be installed or moved to a lowered height. The table accompanying section 217.2 of the 2010 Standards makes clear that where one or more telephones are provided on a floor, level, or an exterior site, only one phone per floor, level, or exterior site must be placed at an accessible height. Similarly, where there is one bank of phones per floor, level, or exterior site, only one phone per floor, level, or exterior site must be accessible. And if there are two or more banks of phones per floor, level, or exterior site, only one phone per bank must be placed at an accessible height.

Another comment in opposition to the lower reach range requirement was submitted on behalf of a chain of convenience stores with fuel stops. The commenter expressed the concern that the 48-inch side reach ''will make it uncomfortable for the majority of the public,'' including persons of taller stature who would need to stoop to use equipment such as fuel dispensers mounted at the lower height. The commenter offered no objective support for the observation that a majority of the public would be rendered uncomfortable if, as required in the 2010 Standards, at least one of each type of fuel dispenser at a facility was made accessible in compliance with the lower reach range. Indeed, the Department received no comments from any individuals of tall stature expressing concern about accessible elements or equipment being mounted at the 48-inch height.

Several retail, convenience store, restaurant, and amusement park commenters expressed concern about the burden the lower side-reach requirement would place on their businesses in terms of self-service food stations and vending areas if the 48-inch requirement were applied retroactively. The cost of lowering counter height, in combination with the lack of control businesses exercise over certain prefabricated service or vending fixtures, outweighed, they argued, any benefits to persons with disabilities. For this reason, they suggested the lower side-reach requirement be referred back to the Access Board.

These commenters misunderstood the safe harbor and barrier removal obligations that will be in effect under the 2010 Standards. Those existing self-service food stations and vending areas that already are in compliance with the 1991 Standards will not be required to satisfy the 2010 Standards unless they engage in alterations. With regard to prefabricated vending machines and food service components that will be purchased and installed in businesses after the 2010 Standards become effective, the Department expects that companies will design these machines and fixtures to comply with the 2010 Standards in the future, as many have already done in the 10 years since the 48-inch side-reach requirement has been a part of the model codes and standards used by many jurisdictions as the basis for their construction codes.

A model code organization commented that the lower side-reach requirement would create a significant burden if it required entities to lower the mounting height for light switches, environmental controls, and outlets when an alteration did not include the walls where these elements were located, such as when ''an area is altered or as a path of travel obligation.'' The Department believes that the final rule adequately addresses those situations about which the commenter expressed concern by not requiring the relocation of existing elements, such as light switches, environmental controls, and outlets, unless they are altered. Moreover, under §36.403 of the 1991 rule, costs for altering the path of travel to an altered area of primary function that exceed 20 percent of the overall costs of the alteration will continue to be deemed disproportionate.

The Department has determined that the revised side-reach requirement should not be returned to the Access Board for further consideration based in large part on the views expressed by a majority of the commenters regarding the need for, and importance of, the lower side-reach requirement to ensure access for persons with disabilities.

Alterations and water closet clearances in single-user toilet rooms with in-swinging doors. The 1991 Standards allow a lavatory to be placed a minimum of 18 inches from the water closet centerline and a minimum of 36 inches from the side wall adjacent to the water closet, which precludes side transfers. The 1991 Standards do not allow an in-swinging door in a toilet or bathing room to overlap the required clear floor space at any accessible fixture. To allow greater transfer options, section 604.3.2 of the 2010 Standards prohibits lavatories from overlapping the clear floor space at water closets, except in certain residential dwelling units. Section 603.2.3 of the 2010 Standards maintains the

prohibition on doors swinging into the clear floor space or clearance required for any fixture, except that they permit the doors of toilet or bathing rooms to swing into the required turning space, provided that there is sufficient clearance space for the wheelchair outside the door swing. In addition, in single-user toilet or bathing rooms, exception 2 of section 603.2.3 of the 2010 Standards permits the door to swing into the clear floor space of an accessible fixture if a clear floor space that measures at least 30 inches by 48 inches is available outside the arc of the door swing.

The majority of commenters believed that this requirement would increase the number of toilet rooms accessible to individuals with disabilities who use wheelchairs or mobility scooters, and will make it easier for them to transfer. A number of commenters stated that there was no reason to return this provision to the Access Board. Numerous commenters noted that this requirement is already included in other model accessibility standards and many State and local building codes and that the adoption of the 2010 Standards is an important part of harmonization efforts.

Other commenters, mostly trade associations, opposed this requirement, arguing that the added cost to the industry outweighs any increase in accessibility. Two commenters stated that these proposed requirements would add two feet to the width of an accessible single-user toilet room; however, another commenter said the drawings in the proposed regulation demonstrated that there would be no substantial increase in the size of the toilet room. Several commenters stated that this requirement would require moving plumbing fixtures, walls, or doors at significant additional expense. Two commenters wanted the permissible overlap between the door swing and clearance around any fixture eliminated. One commenter stated that these new requirements will result in fewer alterations to toilet rooms to avoid triggering the requirement for increased clearances, and suggested that the Department specify that repairs, maintenance, or minor alterations would not trigger the need to provide increased clearances. Another commenter requested that the Department exempt existing guest room bathrooms and single-user toilet rooms that comply with the 1991 Standards from complying with the increased clearances in alterations.

After careful consideration of these comments, the Department believes that the revised clearances for single-user toilet rooms will allow safer and easier transfers for individuals with disabilities, and will enable a caregiver, aide, or other person to accompany an individual with a disability into the toilet room to provide assistance. The illustrations in Appendix B to this final rule, ''Analysis and Commentary on the 2010 ADA Standards for Accessible Design,'' describe several ways for public entities and public accommodations to make alterations while minimizing additional costs or loss of space. Further, in any isolated instances where existing structural limitations may entail loss of space, the public entity and public accommodation may have a technical infeasibility defense for that alteration. The Department has, therefore, decided not to return this requirement to the Access Board.

Alterations to stairs. The 1991 Standards only require interior and exterior stairs to be accessible when they provide access to levels that are not connected by an elevator, ramp, or other accessible means of vertical access. In contrast, section 210.1 of the 2010 Standards requires all newly constructed stairs that are part of a means of egress to be accessible. However, exception 2 of section 210.1 of the 2010 Standards provides that in alterations, stairs between levels connected by an accessible route need not be accessible, except that handrails shall be provided. Most commenters were in favor of this requirement for handrails in alterations, and stated that adding handrails to stairs during alterations was not only feasible and not cost prohibitive, but also provided important safety benefits. One commenter stated that making all points of egress accessible increased the number of people who could use the stairs in an emergency. A majority of the commenters did not want this requirement returned to the Access Board for further consideration.

The International Building Code (IBC), which is a private sector model construction code, contains a similar provision, and most jurisdictions enforce a version of the IBC as their building code, thereby minimizing the impact of this provision on public entities and public accommodations. The Department believes that by requiring only the addition of handrails to altered stairs where levels are connected by an accessible route, the costs of compliance for public entities and public accommodations are minimized, while safe egress for individuals with disabilities is increased. Therefore, the Department has decided not to return this requirement to the Access Board.

Alterations to elevators. Under the 1991 Standards, if an existing elevator is altered, only that altered elevator must comply with the new construction requirements for accessible elevators to the maximum extent feasible. It is therefore possible that a bank of elevators controlled by a single call system may contain just one accessible elevator, leaving an individual with a disability with no way to call an accessible elevator and thus having to wait indefinitely until an accessible elevator happens to respond to the call system. In the 2010 Standards, when an element in one elevator is altered, section

206.6.1 will require the same element to be altered in all elevators that are programmed to respond to the same call button as the altered elevator. Almost all commenters favored the proposed requirement. This requirement, according to these commenters, is necessary so a person with a disability need not wait until an accessible elevator responds to his or her call. One commenter suggested that elevator owners also could comply by modifying the call system so the accessible elevator could be summoned independently. One commenter suggested that this requirement would be difficult for small businesses located in older buildings, and one commenter suggested that this requirement be sent back to the Access Board.

After considering the comments, the Department agrees that this requirement is necessary to ensure that when an individual with a disability presses a call button, an accessible elevator will arrive. The IBC contains a similar provision, and most jurisdictions enforce a version of the IBC as their building code, minimizing the impact of this provision on public entities and public accommodations. Public entities and small businesses located in older buildings need not comply with this requirement where it is technically infeasible to do so. Further, as pointed out by one commenter, modifying the call system so the accessible elevator can be summoned independently is another means of complying with this requirement in lieu of altering all other elevators programmed to respond to the same call button. Therefore, the Department has decided not to return this requirement to the Access Board.

Location of accessible routes to stages. The 1991 Standards, at section 4.33.5, require an accessible route to connect the accessible seating and the stage, as well as other ancillary spaces used by performers. The 2010 Standards, at section 206.2.6, provide in addition that where a circulation path directly connects the seating area and the stage, the accessible route must connect directly the accessible seating and the stage, and, like the 1991 Standards, an accessible route must connect the stage with the ancillary spaces used by performers.

In the NPRM, the Department asked operators of auditoria about the extent to which auditoria already provide direct access to stages and whether there were planned alterations over the next 15 years that included accessible direct routes to stages. The Department also asked how to quantify the benefits of this requirement for persons with disabilities, and invited commenters to provide illustrative anecdotal experiences about the requirement's benefits.

The Department received many comments regarding the costs and benefits of this requirement. Although little detail was provided, many industry and governmental entity commenters anticipated that the costs of this requirement would be great and that it would be difficult to implement. They noted that premium seats may have to be removed and that load-bearing walls may have to be relocated. These commenters suggested that the significant costs would deter alterations to the stage area for a great many auditoria. Some commenters suggested that ramps to the front of the stage may interfere with means of egress and emergency exits. Several commenters requested that the requirement apply to new construction only, and one industry commenter requested an exemption for stages used in arenas or amusement parks where there is no audience participation or where the stage is a work area for performers only. One commenter requested that the requirement not apply to temporary stages.

The final rule does not require a direct accessible route to be constructed where a direct circulation path from the seating area to the stage does not exist. Consequently, those commenters who expressed concern about the burden imposed by the revised requirement (*i.e.*, where the stage is constructed with no direct circulation path connecting the general seating and performing area) should note that the final rule will not require the provision of a direct accessible route under these circumstances. The final rule applies to permanent stages, as well as ''temporary stages,'' if there is a direct circulation path from the seating area to the stage. However, the Department recognizes that in some circumstances, such as an alteration to a primary function area, the ability to provide a direct accessible route to a stage may be costly or technically infeasible, and the auditorium owner is not precluded by the revised requirement from asserting defenses available under the regulation. In addition, the Department notes that since section 4.33.5 of the 1991 Standards requires an accessible route to a stage, the safe harbor will apply to existing facilities whose stages comply with the 1991 Standards.

Several governmental entities supported accessible auditoria and the revised requirement. One governmental entity noted that its State building code already required direct access, that it was possible to provide direct access, and that creative solutions had been found to do so.

Many advocacy groups and individual commenters strongly supported the revised requirement, discussing the acute need for direct access to stages, as such access has an impact on a great number of people at important life events, such as graduations and awards ceremonies, at collegiate and competitive performances and other school events, and at entertainment events that include audience participation. Many commenters expressed the belief that direct access is essential for integration mandates to

be satisfied, and that separate routes are stigmatizing and unequal. The Department agrees with these concerns.

Commenters described the impact felt by persons in wheelchairs who are unable to access the stage at all when others are able to do so. Some of these commenters also discussed the need for the performers and production staff who use wheelchairs to have direct access to the stage, and they provided a number of examples that illustrated the importance of the rule proposed in the NPRM. Personal anecdotes were provided in comments and at the Department's public hearing on the NPRM. One mother spoke passionately and eloquently about the unequal treatment experienced by her daughter, who uses a wheelchair, at awards ceremonies and band concerts. Her daughter was embarrassed and ashamed to be carried by her father onto a stage at one band concert. When the venue had to be changed for another concert to an accessible auditorium, the band director made sure to comment that he was unhappy with the switch. Rather than endure the embarrassment and indignities, her child dropped out of band the following year.

Another father commented about how he was unable to speak from the stage at a PTA meeting at his child's school. Speaking from the floor limited his line of sight and his participation. Several examples were provided of children who could not participate on stage during graduation, awards programs, or special school events, such as plays and festivities. One student did not attend his college graduation because he would not be able to get on stage. Another student was unable to participate in the class Christmas programs or end-of-year parties unless her father could attend and lift her onto the stage. These commenters did not provide a method to quantify the benefits that would accrue by having direct access to stages. One commenter stated, however, that ''the cost of dignity and respect is without measure.''

Many industry commenters and governmental entities suggested that the requirement be sent back to the Access Board for further consideration. One industry commenter mistakenly noted that some international building codes do not incorporate the requirement and that, therefore, there is a need for further consideration. However, the Department notes that both the 2003 and 2006 editions of the IBC include scoping provisions that are almost identical to this requirement and that these editions of the model code are the most frequently used. Many individuals and advocacy group commenters requested that the requirement be adopted without further delay. These commenters spoke of the acute need for direct access to stages and the amount of time it would take to resubmit the requirement to the Access Board. Several commenters noted that the 2004 ADAAG tracks recent model codes, and that there is thus no need for further consideration. The Department agrees that no further delay is necessary and therefore has decided it will not return the requirement to the Access Board for further consideration.

Assistive listening systems. The 1991 Standards at sections 4.33.6 and 4.33.7 require assistive listening systems (ALS) in assembly areas and prescribe general performance standards for ALS systems. In the NPRM, the Department proposed adopting the technical specifications in the 2004 ADAAG for ALS that are intended to ensure better quality and effective delivery of sound and information for persons with hearing impairments, especially those using hearing aids. The Department noted in the NPRM that since 1991, advancements in ALS and the advent of digital technology have made these systems more amenable to uniform standards, which, among other things, should ensure that a certain percentage of required ALS systems are hearing-aid compatible. 73 FR 34508, 34513 (June 17, 2008). The 2010 Standards at section 219 provide scoping requirements and at section 706 address receiver jacks, hearing aid compatibility, sound pressure level, signal-to-noise ratio, and peak clipping level. The Department requested comments specifically from arena and assembly area administrators on the cost and maintenance issues associated with ALS, and asked generally about the costs and benefits of ALS, and asked whether, based upon the expected costs of ALS, the issue should be returned to the Access Board for further consideration.

Commenters from advocacy organizations noted that persons who develop significant hearing loss often discontinue their normal routines and activities, including meetings, entertainment, and large group events, due to a sense of isolation caused by the hearing loss or embarrassment. Individuals with longstanding hearing loss may never have participated in group activities for many of the same reasons. Requiring ALS may allow individuals with disabilities to contribute to the community by joining in government and public events, and through increased economic activity associated with community activities and entertainment. Making public events and entertainment accessible to persons with hearing loss also brings families and other groups that include persons with hearing loss into more community events and activities, thus exponentially increasing the benefit from ALS.

Many commenters noted that when a person has significant hearing loss, that person may be able to hear and understand information in a quiet situation with the use of hearing aids or cochlear implants; however, as background noise increases and the distance between the source of the sound and the listener grows, and especially where

there is distortion in the sound, an ALS becomes essential for basic comprehension and understanding. Commenters noted that among the 31 million Americans with hearing loss, and with a projected increase to over 78 million Americans with hearing loss by 2030, the benefit from ALS is huge and growing. Advocates for persons with disabilities and individuals commented that they appreciated the improvements in the 2004 ADAAG standards for ALS, including specifications for the ALS systems and performance standards. They noted that providing neckloops that translate the signal from the ALS transmitter to a frequency that can be heard on a hearing aid or cochlear implant are much more effective than separate ALS system headsets, which sometimes create feedback, often malfunction, and may create distractions for others seated nearby. Comments from advocates and users of ALS systems consistently noted that the Department's regulation should, at a minimum, be consistent with the 2004 ADAAG. Although there were requests for adjustments in the scoping requirements from advocates seeking increased scoping requirements, and from large venue operators seeking fewer requirements, there was no significant concern expressed by commenters about the technical specifications for ALS in the 2004 ADAAG.

Some commenters from trade associations and large venue owners criticized the scoping requirements as too onerous, and one commenter asked for a remand to the Access Board for new scoping rules. However, one State agency commented that the 2004 ADAAG largely duplicates the requirements in the 2006 IBC and the 2003 ANSI codes, which means that entities that comply with those standards would not incur additional costs associated with ADA compliance.

According to one State office of the courts, the costs to install either an infrared system or an FM system at average-sized facilities, including most courtrooms covered by title II, would be between $500 and $2,000, which the agency viewed as a small price in comparison to the benefits of inclusion. Advocacy organizations estimated wholesale costs of ALS systems at about $250 each, and individual neckloops to link the signal from the ALS transmitter to hearing aids or cochlear implants at less than $50 per unit. Many commenters pointed out that if a facility already is using induction neckloops, it would already be in compliance already and would not have any additional installation costs. One major city commented that annual maintenance is about $2,000 for the entire system of performance venues in the city. A trade association representing very large venues estimated annual maintenance and upkeep expenses, including labor and replacement parts, to be at most about $25,000 for a very large professional sports stadium.

One commenter suggested that the scoping requirements for ALS in the 2004 ADAAG were too stringent and that the Department should refer them back to the Access Board for further review and consideration. Others commented that the requirement for new ALS systems should mandate multichannel receivers capable of receiving audio description for persons who are blind, in addition to a channel for amplification for persons who are hard of hearing. Some commenters suggested that the Department should require a set schedule and protocol of mandatory maintenance. Department regulations already require maintenance of accessible features at §36.211(a) of the title III regulation, which obligates a title III entity to maintain ALS in good working order. The Department recognizes that maintenance of ALS is key to its usability. Necessary maintenance will vary dramatically from venue to venue based upon a variety of factors including frequency of use, number of units, quality of equipment, and other items. Accordingly, the Department has determined that it is not appropriate to mandate details of maintenance, but notes that failure to maintain ALS would violate §36.211(a) of this rule.

The NPRM asked whether the Department should return the issue of ALS requirements to the Access Board for further review. The Department has received substantial feedback on the technical and scoping requirements for ALS and is convinced that these requirements are reasonable—especially in light of the fact that the requirements largely duplicate those in the 2006 IBC and the 2003 ANSI codes already adopted in many States—and that the benefits justify the requirements. In addition, the Department believes that the new specifications will make ALS work more effectively for more persons with disabilities, which, together with a growing population of new users, will increase demand for ALS, thus mooting criticism from some large venue operators about insufficient demand. Thus, the Department has determined that it is unnecessary to refer this issue back to the Access Board for reconsideration.

Accessible teeing grounds, putting greens, and weather shelters. The Department's NPRM sought public input on the proposed requirements for accessible golf courses. These requirements specifically relate to accessible routes within the boundaries of the courses, as well as the accessibility of golfing elements (*e.g.,* teeing grounds, putting greens, weather shelters).

In the NPRM, the Department sought information from the owners and operators of golf courses, both public and private, on the extent to which their courses already have golf car passages, and, if so, whether they intended to avail themselves of the proposed accessible route exception for golf car passages. 73 FR 34508, 34513 (June 17, 2008).

Most commenters expressed support for the adoption of an accessible route requirement that includes an exception permitting golf car passage as all or part of an accessible route. Comments in favor of the proposed standard came from golf course owners and operators, individuals, organizations, and disability rights groups, while comments opposing adoption of the golf course requirements generally came from golf courses and organizations representing the golf course industry.

The majority of commenters expressed the general viewpoint that nearly all golf courses provide golf cars and have either well-defined paths or permit golf cars to drive on the course where paths are not present—and thus meet the accessible route requirement. Several commenters disagreed with the assumption in the Initial RIA that virtually every tee and putting green on an existing course would need to be regraded in order to provide compliant accessible routes. According to one commenter, many golf courses are relatively flat with little slope, especially those heavily used by recreational golfers. This commenter concurred with the Department that it is likely that most existing golf courses have a golf car passage to tees and greens, thereby substantially minimizing the cost of bringing an existing golf course into compliance with the proposed standards. One commenter reported that golf course access audits found that the vast majority of public golf courses would have little difficulty in meeting the proposed golf course requirements. In the view of some commenters, providing access to golf courses would increase golf participation by individuals with disabilities.

The Department also received many comments requesting clarification of the term ''golf car passage.'' For example, one commenter requesting clarification of the term ''golf car passage'' argued that golf courses typically do not provide golf car paths or pedestrian paths onto the actual teeing grounds or greens, many of which are higher or lower than the car path. This commenter argued that if golf car passages were required to extend onto teeing grounds and greens in order to qualify for an exception, then some golf courses would have to substantially regrade teeing grounds and greens at a high cost.

After careful consideration of the comments, the Department has decided to adopt the 2010 Standards specific to golf facilities. The Department believes that in order for individuals with mobility disabilities to have an opportunity to play golf that is equal to golfers without disabilities, it is essential that golf courses provide an accessible route or accessible golf car passage to connect accessible elements and spaces within the boundary of the golf course, including teeing grounds, putting greens, and weather shelters.

Public Comments on Other NPRM Issues

Equipment and furniture. Equipment and furniture are covered under the Department's ADA regulations, including under the provision requiring modifications in policies, practices, and procedures and the provision requiring barrier removal. *See* 28 CFR 36.302, 36.304. The Department has not issued specific regulatory guidance on equipment and furniture, but proposed such regulations in 1991. The Department decided not to establish specific equipment requirements at that time because the requirements could be addressed under other sections of the regulation and because there were no appropriate accessibility standards applicable to many types of equipment at that time. *See* 28 CFR part 36, app. B (2009) (''Proposed Section 36.309 Purchase of Furniture and Equipment'').

In the NPRM, the Department announced its intention not to regulate equipment, proposing instead to continue with the current approach. The Department received numerous comments objecting to this decision and urging the Department to issue equipment and furniture regulations. Based on these comments, the Department has decided that it needs to revisit the issuance of equipment and furniture regulations, and it intends to do so in future rulemaking.

Among the commenters' key concerns, many from the disability community objected to the Department's earlier decision not to issue equipment regulations, especially for medical equipment. These groups recommended that the Department list by name certain types of medical equipment that must be accessible, including exam tables (that lower to 15 inches above the floor or lower), scales, medical and dental chairs, and radiologic equipment (including mammography equipment). These commenters emphasized that the provision of medically-related equipment and furniture also should be specifically regulated since they are not included in the 2004 ADAAG (while depositories, change machines, fuel dispensers, and ATMs are) and because of their crucial role in the provision of healthcare. Commenters described how the lack of accessible medical equipment negatively affects the health of individuals with disabilities. For example, some individuals with mobility disabilities do not get thorough medical care because their health providers do not have accessible examination tables or scales.

Commenters also said that the Department's stated plan to assess the financial impact of free-standing equipment on businesses was not necessary, as any regulations could include a financial-balancing test. Other commenters representing persons who

are blind or have low vision urged the Department to mandate accessibility for a wide range of equipment—including household appliances (stoves, washers, microwaves, and coffee makers), audiovisual equipment (stereos and DVD players), exercise machines, vending equipment, ATMs, computers at Internet cafes or hotel business centers, reservations kiosks at hotels, and point-of-sale devices—through speech output and tactile labels and controls. They argued that modern technology allows such equipment to be made accessible at minimal cost. According to these commenters, the lack of such accessibility in point-of-sale devices is particularly problematic because it forces blind individuals to provide personal or sensitive information (such as personal identification numbers) to third parties, which exposes them to identity fraud. Because the ADA does not apply directly to the manufacture of products, the Department lacks the authority to issue design requirements for equipment designed exclusively for use in private homes. *See* Department of Justice, Americans with Disabilities Act, *ADA Title III Technical Assistance Manual Covering Public Accommodations and Commercial Facilities*, III–4.4200, available at *http://www.ada.gov/taman3.html*. To the extent that equipment intended for such use is used by a covered entity to facilitate a covered service or activity, that covered entity must make the equipment accessible to the extent that it can. *See id.:* 28 CFR part 36, app. B (2009) (''Proposed Section 36.309 Purchase of Furniture and Equipment'').

Some commenters urged the Department to require swimming pool operators to provide aquatic wheelchairs for the use of persons with disabilities when the swimming pool has a sloped entry. If there is a sloped entry, a person who uses a wheelchair would require a wheelchair designed for use in the water in order to gain access to the pool since taking a personal wheelchair into water would rust and corrode the metal on the chair and damage any electrical components of a power wheelchair. Providing an aquatic wheelchair made of non-corrosive materials and designed for access into the water will protect the water from contamination and avoid damage to personal wheelchairs or other mobility aids.

Additionally, many commenters urged the Department to regulate the height of beds in accessible hotel guest rooms and to ensure that such beds have clearance at the floor to accommodate a mechanical lift. These commenters noted that in recent years, hotel beds have become higher as hotels use thicker mattresses, thereby making it difficult or impossible for many individuals who use wheelchairs to transfer onto hotel beds. In addition, many hotel beds use a solid-sided platform base with no clearance at the floor, which prevents the use of a portable lift to transfer an individual onto the bed. Consequently, individuals who bring their own lift to transfer onto the bed cannot independently get themselves onto the bed. Some commenters suggested various design options that might avoid these situations.

The Department intends to provide specific guidance relating to both hotel beds and aquatic wheelchairs in a future rulemaking. For the present, the Department reminds covered entities that they have the obligation to undertake reasonable modifications to their current policies and procedures and to undertake barrier removal or provide alternatives to barrier removal to make their facilities accessible to persons with disabilities. In many cases, providing aquatic wheelchairs or adjusting hotel bed heights may be necessary to comply with those requirements.

Commenters from the business community objected to the lack of clarity from the NPRM as to which equipment must be accessible and how to make it accessible. Several commenters urged the Department to clarify that equipment located in a public accommodation need not meet the technical specifications of ADAAG so long as the service provided by the equipment can be provided by alternative means, such as an employee. For example, the commenters suggested that a self-service check-in kiosk in a hotel need not comply with the reach range requirement so long as a guest can check in at the front desk nearby. Several commenters argued that the Department should not require that point-of-sale devices be accessible to individuals who are blind or have low vision (although complying with accessible route and reach range was acceptable), especially until the Department adopts specific standards governing such access.

The Department has decided not to add specific scoping or technical requirements for equipment and furniture in this final rule. Other provisions of the regulation, including those requiring reasonable modifications of policies, practices, or procedures, readily achievable barrier removal, and effective communication will require the provision of accessible equipment in appropriate circumstances. Because it is clear that many commenters want the Department to provide additional specific requirements for accessible equipment, the Department plans to initiate a rulemaking to address these issues in the near future.

Accessible golf cars. An accessible golf car means a device that is designed and manufactured to be driven on all areas of a golf course, is independently usable by individuals with mobility disabilities, has a hand-operated brake and accelerator, carries golf clubs in an accessible location, and has a seat that both swivels and raises to put the

golfer in a standing or semi-standing position. The 1991 regulation contained no language specifically referencing accessible golf cars. After considering the comments addressing the ANPRM's proposed requirement that golf courses make at least one specialized golf car available for the use of individuals with disabilities, and the safety of accessible golf cars and their use on golf course greens, the Department stated in the NPRM that it would not issue regulations specific to golf cars.

The Department received many comments in response to its decision to propose no new regulation specific to accessible golf cars. The majority of commenters urged the Department to require golf courses to provide accessible golf cars. These comments came from individuals, disability advocacy and recreation groups, a manufacturer of accessible golf cars, and representatives of local government. Comments supporting the Department's decision not to propose a new regulation came from golf course owners, associations, and individuals.

Many commenters argued that while the existing title III regulation covered the issue, the Department should nonetheless adopt specific regulatory language requiring golf courses to provide accessible golf cars. Some commenters noted that many local governments and park authorities that operate public golf courses have already provided accessible golf cars. Experience indicates that such golf cars may be used without damaging courses. Some argued that having accessible golf cars would increase golf course revenue by enabling more golfers with disabilities to play the game. Several commenters requested that the Department adopt a regulation specifically requiring each golf course to provide one or more accessible golf cars. Other commenters recommended allowing golf courses to make ''pooling'' arrangements to meet demands for such cars. A few commenters expressed support for using accessible golf cars to accommodate golfers with and without disabilities. Commenters also pointed out that the Departments of the Interior and Defense have already mandated that golf courses under their jurisdictional control must make accessible golf cars available unless it can be demonstrated that doing so would change the fundamental nature of the game.

While an industry association argued that at least two models of accessible golf cars meet the specifications recognized in the field, and that accessible golf cars cause no more damage to greens or other parts of golf courses than players standing or walking across the course, other commenters expressed concerns about the potential for damage associated with the use of accessible golf cars. Citing safety concerns, golf organizations recommended that an industry safety standard be developed.

Although the Department declines to add specific scoping or technical requirements for golf cars to this final rule, the Department expects to address requirements for accessible golf cars in future rulemaking. In the meantime, the Department believes that golfers with disabilities who need accessible golf cars are protected by other existing provisions in the title III regulation, including those requiring reasonable modifications of policies, practices, or procedures, and readily achievable barrier removal.

Web site accessibility. Many commenters expressed disappointment that the NPRM did not specifically require title III-covered entities to make their Web sites, through which they offer goods and services, accessible to individuals with disabilities. Commenters urged the Department to require specifically that entities that provide goods or services on the Internet make their Web sites accessible, regardless of whether or not these entities also have a ''bricks and mortar'' location. The commenters explained that such clarification was needed because of the current ambiguity caused by court decisions as to whether web-only businesses are covered under title III. Commenters argued that the cost of making Web sites accessible through Web site design is minimal, yet critical, to enabling individuals with disabilities to benefit from the goods and services an entity offers through its Web site. The Internet has become an essential tool for many Americans and, when accessible, provides individuals with disabilities great independence. Commenters recommended that, at a minimum, the Department require covered entities to meet the Electronic and Information Technology Accessibility Standards issued pursuant to section 508. Under section 508 of the Rehabilitation Act of 1973, Federal agencies are required to make their Web sites accessible. 29 U.S.C. 794(d); 36 CFR Part 1194.

The Department agrees that the ability to access the goods and services offered on the Internet through the Web sites of public accommodations is of great importance to individuals with disabilities, particularly those who are blind or who have low vision. When the ADA was enacted in 1990, the Internet was unknown to most of the public. Today, the Internet plays a critical role in daily life for personal, civic, commercial, and business purposes. In light of the growing importance of eBcommerce, ensuring nondiscriminatory access to the goods and services offered through the Web sites of covered entities can play a significant role in fulfilling the goals of the ADA.

Although the language of the ADA does not explicitly mention the Internet, the Department has taken the position that title III covers access to Web sites of public accommodations. The Department has issued guidance on the ADA as applied to the Web sites of public entities, which includes the

availability of standards for Web site accessibility. *See Accessibility of State and Local Government Websites to People with Disabilities* (June 2003), available at *www.ada.gov/websites2.htm.* As the Department stated in that publication, an agency (and similarly a public accommodation) with an inaccessible Web site also may meet its legal obligations by providing an accessible alternative for individuals to enjoy its goods or services, such as a staffed telephone information line. However, such an alternative must provide an equal degree of access in terms of hours of operation and range of options and programs available. For example, if retail goods or bank services are posted on an inaccessible Web site that is available 24 hours a day, 7 days a week to individuals without disabilities, then the alternative accessible method must also be available 24 hours a day, 7 days a week. Additional guidance is available in the Web Content Accessibility Guidelines (WCAG), available at *http://www.w3.org/TR/WAI-WEBCONTENT* (last visited June 24, 2010), which are developed and maintained by the Web Accessibility Initiative, a subgroup of the World Wide Web Consortium (W3C®).

The Department did not issue proposed regulations as part of its NPRM, and thus is unable to issue specific regulatory language on Web site accessibility at this time. However, the Department expects to engage in rulemaking relating to Web site accessibility under the ADA in the near future.

Multiple chemical sensitivities. The Department received comments from a number of individuals asking the Department to add specific language to the final rule addressing the needs of individuals with chemical sensitivities. These commenters expressed concern that the presence of chemicals interferes with their ability to participate in a wide range of activities. These commenters also urged the Department to add multiple chemical sensitivities to the definition of a disability.

The Department has determined not to include specific provisions addressing multiple chemical sensitivities in the final rule. In order to be viewed as a disability under the ADA, an impairment must substantially limit one or more major life activities. An individual's major life activities of respiratory or neurological functioning may be substantially limited by allergies or sensitivity to a degree that he or she is a person with a disability. When a person has this type of disability, a covered entity may have to make reasonable modifications in its policies and practices for that person. However, this determination is an individual assessment and must be made on a case-by-case basis.

[AG Order No. 3181–2010, 75 FR 56258, Sept. 15, 2010; 76 FR 13287, Mar. 11, 2011]

APPENDIX B TO PART 36—ANALYSIS AND COMMENTARY ON THE 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN

APPENDIX B TO PART 36

Analysis and Commentary on the 2010 ADA Standards for Accessible Design

The following is a discussion of substantive changes in the scoping and technical requirements for new construction and alterations resulting from the adoption of new ADA Standards for Accessible Design (2010 Standards) in the final rules for title II (28 CFR part 35) and title III (28 CFR part 36) of the Americans with Disabilities Act (ADA). The full text of the 2010 Standards is available for review at *http://www.ada.gov.*

In the Department's revised ADA title II regulation, 28 CFR 35.104 Definitions, the Department defines the term ''2010 Standards'' to mean the 2010 ADA Standards for Accessible Design. The 2010 Standards consist of the 2004 ADA Accessibility Guidelines (ADAAG) and the requirements contained in 28 CFR 35.151.

In the Department's revised ADA title III regulation, 28 CFR 36.104 Definitions, the Department defines the term ''2010 Standards'' to mean the 2010 ADA Standards for Accessible Design. The 2010 Standards consist of the 2004 ADA Accessibility Guidelines (ADAAG) and the requirements contained in 28 CFR part 36 subpart D.

This summary addresses selected substantive changes between the 1991 ADA Standards for Accessible Design (1991 Standards) codified at 28 CFR part 36, app. A (2009) and the 2010 Standards.

Editorial changes are not discussed. Scoping and technical requirements are discussed together, where appropriate, for ease of understanding the requirements. In addition, this document addresses selected public comments received by the Department in response to its September 2004 Advance Notice of Proposed Rulemaking (ANPRM) and its June 2008 Notice of Proposed Rulemaking (NPRM).

The ANPRM and NPRM issued by the Department concerning the proposed 2010 Standards stated that comments received by the Access Board in response to its development of the ADAAG upon which the 2010 Standards are based would be considered in the development of the final Standards. Therefore, the Department will not restate here all of the comments and responses to them issued by the Access Board. The Department is supplementing the Access Board's comments and responses with substantive comments and responses here. Comments and responses addressed by the Access Board that also were separately submitted to

the Department will not be restated in their entirety here.

SECTION-BY-SECTION ANALYSIS WITH PUBLIC COMMENTS

Application and Administration

102 Dimensions for Adults and Children

Section 2.1 of the 1991 Standards stated that the specifications were based upon adult dimensions and anthropometrics. The 1991 Standards did not provide specific requirements for children's elements or facilities.

Section 102 of the 2010 Standards states that the technical requirements are based on adult dimensions and anthropometrics. In addition, technical requirements are also provided based on children's dimensions and anthropometrics for drinking fountains, water closets and other elements located in toilet compartments, lavatories and sinks, dining surfaces, and work surfaces.

103 Equivalent Facilitation

This section acknowledges that nothing in these requirements prevents the use of designs, products, or technologies as alternatives to those prescribed, provided that the alternatives result in substantially equivalent or greater accessibility and usability.

A commenter encouraged the Department to include a procedure for determining equivalent facilitation. The Department believes that the responsibility for determining and demonstrating equivalent facilitation properly rests with the covered entity. The purpose of allowing for equivalent facilitation is to encourage flexibility and innovation while still ensuring access. The Department believes that establishing potentially cumbersome bureaucratic provisions for reviewing requests for equivalent facilitation is inappropriate.

104 Conventions

Dimensions. Section 104.1 of the 2010 Standards notes that dimensions not stated as a ''maximum'' or ''minimum'' are absolute. Section 104.1.1 of the 2010 Standards provides that all dimensions are subject to conventional industry tolerances except where the requirement is stated as a range with specific minimum and maximum end points. A commenter stated that the 2010 Standards restrict the application of construction tolerances only to those few requirements that are expressed as an absolute dimension.

This is an incorrect interpretation of sections 104.1 and 104.1.1 of the 2010 Standards. Construction and manufacturing tolerances apply to absolute dimensions as well as to dimensions expressed as a maximum or minimum. When the requirement states a specified range, such as in section 609.4 where grab bars must be installed between 33 inches and 36 inches above the finished floor, that range provides an adequate tolerance. Advisory 104.1.1 gives further guidance about tolerances.

Section 104.2 of the 2010 Standards provides that where the required number of elements or facilities to be provided is determined by calculations of ratios or percentages and remainders or fractions result, the next greater whole number of such elements or facilities shall be provided. Where the determination of the required size or dimension of an element or facility involves ratios or percentages, rounding down for values less than one-half is permissible.

A commenter stated that it is customary in the building code industry to round up rather than down for values less than one-half. As noted here, where the 2010 Standards provide for scoping, any resulting fractional calculations will be rounded to the next whole number. The Department is retaining the portion of section 104.2 that permits rounding down for values less than one-half where the determination of the required size or dimension of an element or facility involves ratios or percentages. Such practice is standard with the industry, and is in keeping with model building codes.

105 Referenced Standards

Section 105 lists the industry requirements that are referenced in the 2010 Standards. This section also clarifies that where there is a difference between a provision of the 2010 Standards and the referenced requirements, the provision of the 2010 Standards applies.

106 Definitions

Various definitions have been added to the 2010 Standards and some definitions have been deleted.

One commenter asked that the term public right-of-way be defined; others asked that various terms and words defined by the 1991 Standards, but which were eliminated from the 2010 Standards, plus other words and terms used in the 2010 Standards, be defined.

The Department believes that it is not necessary to add definitions to this text because section 106.3 of the 2010 Standards provides that the meanings of terms not specifically defined in the 2010 Standards, in the Department's ADA regulations, or in referenced standards are to be defined by collegiate dictionaries in the sense that the context implies. The Department believes that this provision adequately addresses these commenters' concerns.

Scoping and Technical Requirements

202 Existing Buildings and Facilities

Alterations. Under section 4.1.6(1)(c) of the 1991 Standards if alterations to single elements, when considered together, amount to

an alteration of a room or space in a building or facility, the entire room or space would have to be made accessible. This requirement was interpreted to mean that if a covered entity chose to alter several elements in a room there would come a point when so much work had been done that it would be considered that the entire room or space would have to be made accessible. Under section 202.3 of the 2010 Standards entities can alter as many elements within a room or space as they like without triggering a requirement to make the entire room or space accessible based on the alteration of individual elements. This does not, however, change the requirement that if the intent was to alter the entire room or space, the entire room or space must be made accessible and comply with the applicable requirements of Chapter 2 of the 2010 Standards.

Alterations to Primary Function Areas. Section 202.4 restates a current requirement under title III, and therefore represents no change for title III facilities or for those title II facilities that have elected to comply with the 1991 Standards. However, under the revised title II regulation, state and local government facilities that have previously elected to comply with the Uniform Federal Accessibility Standards (UFAS) instead of the 1991 Standards will no longer have that option, and thus will now be subject to the path of travel requirement. The path of travel requirement provides that when a primary function area of an existing facility is altered, the path of travel to that area (including restrooms, telephones, and drinking fountains serving the area) must also be made accessible, but only to the extent that the cost of doing so does not exceed twenty percent (20%) of the cost of the alterations to the primary function area. The UFAS requirements for a substantial alteration, though different, may have covered some of the items that will now be covered by the path of travel requirement.

Visible Alarms in Alterations to Existing Facilities. The 1991 Standards, at sections 4.1.3(14) and 4.1.6(1)(b), and sections 202.3 and 215.1 of the 2010 Standards require that when existing elements and spaces of a facility are altered, the alterations must comply with new construction requirements. Section 215.1 of the 2010 Standards adds a new exception to the scoping requirement for visible alarms in existing facilities so that visible alarms must be installed only when an existing fire alarm system is upgraded or replaced, or a new fire alarm system is installed.

Some commenters urged the Department not to include the exception and to make visible alarms a mandatory requirement for all spaces, both existing and new. Other commenters said that the exception will make the safety of individuals with disabilities dependent upon the varying age of existing fire alarm systems. Other commenters suggested that including this requirement, even with the exception, will result in significant cost to building owners and operators.

The Department believes that the language of the exception to section 215.1 of the 2010 Standards strikes a reasonable balance between the interests of individuals with disabilities and those of the business community. If undertaken at the time a system is installed, whether in a new facility or in a planned system upgrade, the cost of adding visible alarms is reasonable. Over time, existing facilities will become fully accessible to individuals who are deaf or hard of hearing, and will add minimal costs to owners and operators.

203 General Exceptions

Limited Access Spaces and Machinery Spaces. The 1991 Standards, at section 4.1.1, contain an exception that exempts ''non-occupiable'' spaces that have limited means of access, such as ladders or very narrow passageways, and that are visited only by service personnel for maintenance, repair, or occasional monitoring of equipment, from all accessibility requirements. Sections 203.4 and 203.5 of the 2010 Standards expand this exception by removing the condition that the exempt spaces be ''non-occupiable,'' and by separating the other conditions into two independent exceptions: one for spaces with limited means of access, and the other for machinery spaces. More spaces are exempted by the exception in the 2010 Standards.

203, 206 and 215 Employee Work Areas

Common Use Circulation Paths in Employee Work Areas. The 1991 Standards at section 4.1.1(3), and the 2010 Standards at section 203.9, require employee work areas in new construction and alterations *only* to be designed and constructed so that individuals with disabilities can approach, enter, and exit the areas. Section 206.2.8 of the 2010 Standards requires accessible common use circulation paths within employee work areas unless they are subject to exceptions in sections 206.2.8, 403.5, 405.5, and 405.8. The ADA, 42 U.S.C. 12112 (b)(5)(A) and (B), requires employers to make reasonable accommodations in the workplace for individuals with disabilities, which may include modifications to work areas when needed. Providing increased access in the facility at the time of construction or alteration will simplify the process of providing reasonable accommodations when they are needed.

The requirement for accessible common use circulation paths will not apply to existing facilities pursuant to the readily achievable barrier removal requirement. The Department has consistently taken the position that barrier removal requirements do not apply to areas used exclusively by employees because the purpose of title III is to

ensure that access is provided to clients and customers. *See* Appendix B to the 1991 regulation implementing title III, 28 CFR part 36.

Several exceptions to section 206.2.8 of the 2010 Standards exempt common use circulation paths in employee work areas from the requirements of section 402 where it may be difficult to comply with the technical requirements for accessible routes due to the size or function of the area:

• Employee work areas, or portions of employee work areas, that are less than 300 square feet and are elevated 7 inches or more above the ground or finish floor, where elevation is essential to the function of the space, are exempt.

• Common use circulation paths within employee work areas that are less than 1,000 square feet and are defined by permanently installed partitions, counters, casework, or furnishings are exempt. Kitchens in quick service restaurants, cocktail bars, and the employee side of service counters are frequently covered by this exception.

• Common use circulation paths within exterior employee work areas that are fully exposed to the weather are exempt. Farms, ranches, and outdoor maintenance facilities are covered by this exception.

The 2010 Standards in sections 403.5 and 405.8 also contain exceptions to the technical requirements for accessible routes for circulation paths in employee work areas:

• Machinery and equipment are permitted to reduce the clear width of common use circulation paths where the reduction is essential to the function of the work performed. Machinery and equipment that must be placed a certain way to work properly, or for ergonomics or to prevent workplace injuries are covered by this exception.

• Handrails are not required on ramps, provided that they can be added in the future.

Commenters stated that the requirements set out in the 2010 Standards for accessible common use circulation paths in employee work areas are inappropriate, particularly in commercial kitchens, storerooms, and behind cocktail bars where wheelchairs would not be easily accommodated. These commenters further urged the Department not to adopt a requirement that circulation paths in employee work areas be at least 36 inches wide, including those at emergency exits.

These commenters misunderstand the scope of the provision. Nothing in the 2010 Standards requires all circulation paths in non-exempt areas to be accessible. The Department recognizes that building codes and fire and life safety codes, which are adopted by all of the states, require *primary* circulation paths in facilities, including employee work areas, to be at least 36 inches wide for purposes of emergency egress. Accessible routes also are at least 36 inches wide. Therefore, the Department anticipates that covered entities will be able to satisfy the requirement to provide accessible circulation paths by ensuring that their required *primary* circulation paths are accessible.

Individual employee work stations, such as a grocery checkout counter or an automobile service bay designed for use by one person, do not contain common use circulation paths and are not required to comply. Other work areas, such as stockrooms that typically have narrow pathways between shelves, would be required to design only one accessible circulation path into the stockroom. It would not be necessary to make each circulation path in the room accessible. In alterations it may be technically infeasible to provide accessible common use circulation paths in some employee work areas. For example, in a stock room of a department store significant existing physical constraints, such as having to move walls to avoid the loss of space to store inventory, may mean that it is technically infeasible (*see* section 106.5 ''Defined Terms'' of the 2010 Standards) to make even the primary common use circulation path in that stock room wide enough to be accessible. In addition, the 2010 Standards include exceptions for common use circulation paths in employee work areas where it may be difficult to comply with the technical requirements for accessible routes due to the size or function of the areas. The Department believes that these exceptions will provide the flexibility necessary to ensure that this requirement does not interfere with legitimate business operations.

Visible Alarms. Section 215.3 of the 2010 Standards provides that where employee work areas in newly constructed facilities have audible alarm coverage they are required to have wiring systems that are capable of supporting visible alarms that comply with section 702 of the 2010 Standards. The 1991 Standards, at section 4.1.1(3), require visible alarms to be provided where audible fire alarm systems are provided, but do not require areas used only by employees as work areas to be equipped with accessibility features. As applied to office buildings, the 1991 Standards require visible alarms to be provided in public and common use areas such as hallways, conference rooms, break rooms, and restrooms, where audible fire alarm systems are provided.

Commenters asserted that the requirements of section 215.3 of the 2010 Standards would be burdensome to meet. These commenters also raised concerns that all employee work areas within existing buildings and facilities must be equipped with accessibility features.

The commenters' concerns about section 215.3 of the 2010 Standards represent a misunderstanding of the requirements applicable to employee work areas.

Newly constructed buildings and facilities merely are required to provide wiring so that

visible alarm systems can be added as needed to accommodate employees who are deaf or hard of hearing. This is a minimal requirement without significant impact.

The other issue in the comments represents a misunderstanding of the Department's existing regulatory requirements. Employee common use areas in covered facilities (*e.g.,* locker rooms, break rooms, cafeterias, toilet rooms, corridors to exits, and other common use spaces) were required to be accessible under the 1991 Standards; areas in which employees actually perform their jobs are required to enable a person using a wheelchair or mobility device to approach, enter, and exit the area. The 2010 Standards require increased access through the accessible common use circulation path requirement, but neither the 1991 Standards nor the 2010 Standards require employee work stations to be accessible. Access to specific employee *work stations* is governed by title I of the ADA.

205 and 309 Operable Parts

Section 4.1.3, and more specifically sections 4.1.3(13), 4.27.3, and 4.27.4 of the 1991 Standards, require operable parts on accessible elements, along accessible routes, and in accessible rooms and spaces to comply with the technical requirements for operable parts, including height and operation. The 1991 Standards, at section 4.27.3, contain an exception, ''* * * where the use of special equipment dictates otherwise or where electrical and communications systems receptacles are not normally intended for use by building occupants,'' from the technical requirement for the height of operable parts. Section 205.1 of the 2010 Standards divides this exception into three exceptions covering operable parts intended only for use by service or maintenance personnel, electrical or communication receptacles serving a dedicated use, and floor electrical receptacles. Operable parts covered by these new exceptions are exempt from all of the technical requirements for operable parts in section 309. The 2010 Standards also add exceptions that exempt certain outlets at kitchen counters; heating, ventilating and air conditioning diffusers; redundant controls provided for a single element, other than light switches; and exercise machines and equipment from all of the technical requirements for operable parts. Exception 7, in section 205.1 of the 2010 Standards, exempts cleats and other boat securement devices from the accessible height requirement. Similarly, section 309.4 of the 2010 Standards exempts gas pump nozzles, but only from the technical requirement for activating force.

Reach Ranges. The 1991 Standards set the maximum height for side reach at 54 inches above the floor. The 2010 Standards, at section 308.3, lower that maximum height to 48 inches above the finish floor or ground. The 2010 Standards also add exceptions, as discussed above, to the scoping requirement for operable parts for certain elements that, among other things, will exempt them from the reach range requirements in section 308.

The 1991 Standards, at sections 4.1.3, 4.27.3, and 4.2.6, and the 2010 Standards, at sections 205.1, 228.1, 228.2, 308.3, and 309.3, require operable parts of accessible elements, along accessible routes, and in accessible rooms and spaces to be placed within the forward or side-reach ranges specified in section 308. The 2010 Standards also require at least five percent (5%) of mailboxes provided in an interior location and at least one of each type of depository, vending machine, change machine, and gas pump to meet the technical requirements for a forward or a side reach.

Section 4.2.6 of the 1991 Standards specifies a maximum 54-inch high side reach and a minimum 9-inch low side reach for an unobstructed reach depth of 10 inches maximum. Section 308.3.1 of the 2010 Standards specifies a maximum 48-inch high side reach and a minimum 15-inch low side reach where the element being reached for is unobstructed. Section 308.3.1, Exception 1, permits an obstruction that is no deeper than 10 inches between the edge of the clear floor or ground space and the element that the individual with a disability is trying to reach. Changes in the side-reach range for new construction and alterations in the 2010 Standards will affect a variety of building elements such as light switches, electrical outlets, thermostats, fire alarm pull stations, card readers, and keypads.

Commenters were divided in their views about the changes to the unobstructed side-reach range. Disability advocacy groups and others, including individuals of short stature, supported the modifications to the proposed reach range requirements. Other commenters stated that the new reach range requirements will be burdensome for small businesses to comply with. These comments argued that the new reach range requirements restrict design options, especially in residential housing.

The Department continues to believe that data submitted by advocacy groups and others provides compelling evidence that lowered reach range requirements will better serve significantly greater numbers of individuals with disabilities, including individuals of short stature, persons with limited upper body strength, and others with limited use of their arms and fingers. The change to the side-reach range was developed by the Access Board over a prolonged period in which there was extensive public participation. This process did not produce any significant data to indicate that applying the new unobstructed side-reach range requirement in new construction or during alterations would impose a significant burden.

206 and Chapter 4 Accessible Routes

Slope. The 2010 Standards provide, at section 403.3, that the cross slope of walking surfaces not be steeper than 1:48. The 1991 Standards' cross slope requirement was that it not exceed 1:50. A commenter recommended increasing the cross slope requirement to allow a maximum of ½ inch per foot (1:24) to prevent imperfections in concrete surfaces from ponding water. The Department continues to believe that the requirement that a cross slope not be steeper than 1:48 adequately provides for water drainage in most situations. The suggested changes would double the allowable cross slope and create a significant impediment for many wheelchair users and others with a mobility disability.

Accessible Routes from Site Arrival Points and Within Sites. The 1991 Standards, at sections 4.1.2(1) and (2), and the 2010 Standards, at sections 206.2.1 and 206.2.2, require that at least one accessible route be provided within the site from site arrival points to an accessible building entrance and that at least one accessible route connect accessible facilities on the same site. The 2010 Standards also add two exceptions that exempt site arrival points and accessible facilities within a site from the accessible route requirements where the only means of access between them is a vehicular way that does not provide pedestrian access.

Commenters urged the Department to eliminate the exception that exempts site arrival points and accessible facilities from the accessible route requirements where the only means of access between them is a vehicular way not providing pedestrian access. The Department declines to accept this recommendation because the Department believes that its use will be limited. If it can be reasonably anticipated that the route between the site arrival point and the accessible facilities will be used by pedestrians, regardless of whether a pedestrian route is provided, then this exception will not apply. It will apply only in the relatively rare situations where the route between the site arrival point and the accessible facility dictates vehicular access—for example, an office complex on an isolated site that has a private access road, or a self-service storage facility where all users are expected to drive to their storage units.

Another commenter suggested that the language of section 406.1 of the 2010 Standards is confusing because it states that curb ramps on accessible routes shall comply with 406, 405.2 through 405.5, and 405.10. The 1991 Standards require that curb ramps be provided wherever an accessible route crosses a curb.

The Department declines to change this language because the change is purely editorial, resulting from the overall changes in the format of the 2010 Standards. It does not change the substantive requirement. In the 2010 Standards all elements on a required accessible route must be accessible; therefore, if the accessible route crosses a curb, a curb ramp must be provided.

Areas of Sport Activity. Section 206.2.2 of the 2010 Standards requires at least one accessible route to connect accessible buildings, facilities, elements, and spaces on the same site. Advisory section 206.2.2 adds the explanation that an accessible route must connect the boundary of each area of sport activity (*e.g.,* courts and playing fields, whether indoor or outdoor). Section 206.2.12 of the 2010 Standards further requires that in court sports the accessible route must directly connect both sides of the court.

Limited-Use/Limited-Application Elevators, Destination-Oriented Elevators and Private Residence Elevators. The 1991 Standards, at section 4.1.3(5), and the 2010 Standards, at sections 206.2 and 206.6, include exceptions to the scoping requirement for accessible routes that exempt certain facilities from connecting each story with an elevator. If a facility is exempt from the scoping requirement, but nonetheless installs an elevator, the 1991 Standards require the elevator to comply with the technical requirements for elevators. The 2010 Standards add a new exception that allows a facility that is exempt from the scoping requirement to install a limited-use/limited-application (LULA) elevator. LULA elevators are also permitted in the 1991 Standards and the 2010 Standards as an alternative to platform lifts. The 2010 Standards also add a new exception that permits private residence elevators in multistory dwelling and transient lodging units. The 2010 Standards contain technical requirements for LULA elevators at section 408 and private residence elevators at section 409.

Section 407.2.1.4 of the 2010 Standards includes an exception to the technical requirements for locating elevator call buttons for destination-oriented elevators. The advisory at section 407.2.1.4 describes lobby controls for destination-oriented elevator systems. Many elevator manufacturers have recently developed these new ''buttonless'' elevator control systems. These new, more efficient elevators are usually found in high-rise buildings that have several elevators. They require passengers to enter their destination floor on an entry device, usually a keypad, in the elevator lobby. The system then sends the most efficient car available to take all of the passengers going to the sixth floor, for example, only to the sixth floor, without making stops at the third, fourth, and fifth floors on the way to the sixth floor. The challenge for individuals who are blind or have low vision is how to know which elevator car to enter, after they have entered their destination floor into the keypad.

Commenters requested that the Department impose a moratorium on the installation of destination-oriented elevators arguing that this new technology presents wayfinding challenges for persons who are blind or have low vision.

Section 407.2.1.5 of the 2010 Standards allows destination-oriented elevators to not provide call buttons with visible signals to indicate when each call is registered and when each call is answered *provided* that visible and audible signals, compliant with 407.2.2 of the 2010 Standards, indicating which elevator car to enter, are provided. This will require the responding elevator car to automatically provide audible and visible communication so that the system will always verbally and visually indicate which elevator car to enter.

As with any new technology, all users must have time to become acquainted with how to use destination-oriented elevators. The Department will monitor the use of this new technology and work with the Access Board so that there is not a decrease in accessibility as a result of permitting this new technology to be installed.

Accessible Routes to Tiered Dining Areas in Sports Facilities. The 1991 Standards, at sections 4.1.3(1) and 5.4, and section 206.2.5 of the 2010 Standards require an accessible route to be provided to all dining areas in new construction, including raised or sunken dining areas. The 2010 Standards add a new exception for tiered dining areas in sports facilities. Dining areas in sports facilities are typically integrated into the seating bowl and are tiered to provide adequate lines of sight for individuals with disabilities. The new exception requires accessible routes to be provided to at least 25 percent (25%) of the tiered dining areas in sports facilities. Each tier must have the same services and the accessible routes must serve the accessible seating.

Accessible Routes to Press Boxes. The 1991 Standards, at sections 4.1.1(1) and 4.1.3(1), cover all areas of newly constructed facilities required to be accessible, and require an accessible route to connect accessible entrances with all accessible spaces and elements within the facility. Section 201.1 of the 2010 Standards requires that all areas of newly designed and constructed buildings and facilities and altered portions of existing buildings and facilities be accessible. Sections 206.2.7(1) and (2) of the 2010 Standards add two exceptions that exempt small press boxes that are located in bleachers with entrances on only one level, and small press boxes that are free-standing structures elevated 12 feet or more above grade, from the accessible route requirement when the aggregate area of all press boxes in a sports facility does not exceed 500 square feet. The Department anticipates that this change will significantly reduce the economic impact on smaller sports facilities, such as those associated with high schools or community colleges.

Public Entrances. The 1991 Standards, at sections 4.1.3(8) and 4.1.6(1)(h), require at least fifty percent (50%) of public entrances to be accessible. Additionally, the 1991 Standards require the number of accessible public entrances to be equivalent to the number of exits required by applicable building and fire codes. With very few exceptions, building and fire codes require at least two exits to be provided from spaces within a building and from the building itself. Therefore, under the 1991 Standards where two public entrances are planned in a newly constructed facility, both entrances are required to be accessible.

Instead of requiring accessible entrances based on the number of public entrances provided or the number of exits required (whichever is greater), section 206.4.1 of the 2010 Standards requires at least sixty percent (60%) of public entrances to be accessible. The revision is intended to achieve the same result as the 1991 Standards. Thus, under the 2010 Standards where two public entrances are planned in a newly constructed facility, both entrances must be accessible.

Where multiple public entrances are planned to serve different site arrival points, the 1991 Standards, at section 4.1.2(1), and section 206.2.1 of the 2010 Standards require at least one accessible route to be provided from each type of site arrival point provided, including accessible parking spaces, accessible passenger loading zones, public streets and sidewalks, and public transportation stops, to an accessible public entrance that serves the site arrival point.

Commenters representing small businesses recommended retaining the 1991 requirement for fifty percent (50%) of public entrances of covered entities to be accessible. These commenters also raised concerns about the impact upon existing facilities of the new sixty percent (60%) requirement.

The Department believes that these commenters misunderstand the 1991 Standards. As explained above, the requirements of the 1991 Standards generally require more than fifty percent (50%) of entrances in small facilities to be accessible. Model codes require that most buildings have more than one means of egress. Most buildings have more than one entrance, and the requirements of the 1991 Standards typically resulted in these buildings having more than one accessible entrance. Requiring at least sixty percent (60%) of public entrances to be accessible is not expected to result in a substantial increase in the number of accessible entrances compared to the requirements of the 1991 Standards. In some very large facilities this change may result in fewer accessible entrances being required by the 2010 Standards. However, the Department believes that

the realities of good commercial design will result in more accessible entrances being provided for the convenience of all users.

The 1991 Standards and the 2010 Standards also contain exceptions that limit the number of accessible entrances required in alterations to existing facilities. When entrances to an existing facility are altered and the facility has an accessible entrance, the entrance being altered is not required to be accessible, unless a primary function area also is altered and then an accessible path of travel must be provided to the primary function area to the extent that the cost to do so is not disproportionate to the overall cost of the alteration.

Alterations to Existing Elevators. When a single space or element is altered, the 1991 Standards, at sections 4.1.6(1)(a) and (b), require the space or element to be made accessible. When an element in one elevator is altered, the 2010 Standards, at section 206.6.1, require the same element to be altered in all elevators that are programmed to respond to the same call button as the altered elevator.

The 2010 Standards, at sections 407.2.1–407.4.7.1.2, also contain exceptions to the technical requirements for elevators when existing elevators are altered that minimize the impact of this change.

Commenters expressed concerns about the requirement that when an element in one elevator is altered, the 2010 Standards, at section 206.6.1, will require the same element to be altered in all elevators that are programmed to respond to the same call button as the altered elevator. Commenters noted that such a requirement is burdensome and will result in costly efforts without significant benefit to individuals with disabilities.

The Department believes that this requirement is necessary to ensure that when an individual with a disability presses a call button, an accessible elevator will arrive. Without this requirement, individuals with disabilities would have to wait unnecessarily for an accessible elevator to make its way to them arbitrarily. The Department also believes that the effort required to meet this provision is minimal in the majority of situations because it is typical to upgrade all of the elevators in a bank at the same time.

Accessible Routes in Dwelling Units with Mobility Features. Sections 4.34.1 and 4.34.2 of the UFAS require the living area, kitchen and dining area, bedroom, bathroom, and laundry area, where provided, in covered dwelling units with mobility features to be on an accessible route. Where covered dwelling units have two or more bedrooms, at least two bedrooms are required to be on an accessible route.

The 2010 Standards at sections 233.3.1.1, 809.1, 809.2, 809.2.1, and 809.4 will require all spaces and elements within dwelling units with mobility features to be on an accessible route. These changes exempt unfinished attics and unfinished basements from the accessible route requirement. Section 233.3.5 of the 2010 Standards also includes an exception to the dispersion requirement that permits accessible single-story dwelling units to be constructed, where multi-story dwelling units are one of the types of units provided.

Location of Accessible Routes. Section 4.3.2(1) of the 1991 Standards requires accessible routes connecting site arrival points and accessible building entrances to coincide with general circulation paths, to the maximum extent feasible. The 2010 Standards require all accessible routes to coincide with or be located in the same general area as general circulation paths. Additionally, a new provision specifies that where a circulation path is interior, the required accessible route must also be located in the interior of the facility. The change affects a limited number of buildings. Section 206.3 of the 2010 Standards requires all accessible routes to coincide with or be located in the same general area as general circulation paths. Designing newly constructed interior accessible routes to coincide with or to be located in the same area as general circulation paths will not typically present a difficult design challenge and is expected to impose limited design constraints. The change will have no impact on exterior accessible routes. The 1991 Standards and the 2010 Standards also require accessible routes to be located in the interior of the facility where general circulation paths are located in the interior of the facility. The revision affects a limited number of buildings.

Location of Accessible Routes to Stages. The 1991 Standards at section 4.33.5 require an accessible route to connect the accessible seating and the performing area. Section 206.2.6 of the 2010 Standards requires the accessible route to directly connect the seating area and the accessible seating, stage, and all areas of the stage, where a circulation path directly connects the seating area and the stage. Both the 1991 Standards and the 2010 Standards also require an accessible route to connect the stage and ancillary areas, such as dressing rooms, used by performers. The 2010 Standards do not require an additional accessible route to be provided to the stage. Rather, the changes specify where the accessible route to the stage, which is required by the 1991 Standards, must be located.

207 Accessible Means of Egress

General. The 1991 Standards at sections 4.1.3(9); 4.1.6(1)(g); and 4.3.10 establish scoping and technical requirements for accessible means of egress. Section 207.1 of the 2010 Standards reference the International Building Code (IBC) for scoping and technical requirements for accessible means of egress.

The 1991 Standards require the same number of accessible means of egress to be provided as the number of exits required by applicable building and fire codes. The IBC requires at least one accessible means of egress and at least two accessible means of egress where more than one means of egress is required by other sections of the building code. The changes in the 2010 Standards are expected to have minimal impact since the model fire and life safety codes, which are adopted by all of the states, contain equivalent requirements with respect to the number of accessible means of egress.

The 1991 Standards require areas of rescue assistance or horizontal exits in facilities with levels above or below the level of exit discharge. Areas of rescue assistance are spaces that have direct access to an exit, stair, or enclosure where individuals who are unable to use stairs can go to call for assistance and wait for evacuation. The 2010 Standards incorporate the requirements established by the IBC. The IBC requires an evacuation elevator designed with standby power and other safety features that can be used for emergency evacuation of individuals with disabilities in facilities with four or more stories above or below the exit discharge level, and allows exit stairways and evacuation elevators to be used as an accessible means of egress in conjunction with areas of refuge or horizontal exits. The change is expected to have minimal impact since the model fire and life safety codes, adopted by most states, already contain parallel requirements with respect to evacuation elevators.

The 1991 Standards exempt facilities equipped with a supervised automatic sprinkler system from providing areas of rescue assistance, and also exempt alterations to existing facilities from providing an accessible means of egress. The IBC exempts buildings equipped with a supervised automatic sprinkler system from certain technical requirements for areas of refuge, and also exempts alterations to existing facilities from providing an accessible means of egress.

The 1991 and 2010 Standards require signs that provide direction to or information about functional spaces to meet certain technical requirements. The 2010 Standards, at section 216.4, address exit signs. This section is consistent with the requirements of the IBC. Signs used for means of egress are covered by this scoping requirement. The requirements in the 2010 Standards require tactile signs complying with sections 703.1, 703.2 and 703.5 at doors at exit passageways, exit discharge, and at exit stairways. Directional exit signs and signs at areas of refuge required by section 216.4.3 must have visual characters and features complying with section 703.5.

Standby Power for Platform Lifts. The 2010 Standards at section 207.2 require standby power to be provided for platform lifts that are permitted to serve as part of an accessible means of egress by the IBC. The IBC permits platform lifts to serve as part of an accessible means of egress in a limited number of places where platform lifts are allowed in new construction. The 1991 Standards, at 4.1.3(5) Exception 4(a) through (d), and the 2010 Standards, at sections 206.7.1 through 206.7.10, similarly limit the places where platform lifts are allowed in new construction.

Commenters urged the Department to reconsider provisions that would require standby power to be provided for platform lifts. Concerns were raised that ensuring standby power would be too burdensome. The Department views this issue as a fundamental life safety issue. Lift users face the prospect of being trapped on the lift in the event of a power failure if standby power is not provided. The lack of standby power could be life-threatening in situations where the power failure is associated with a fire or other emergency. The use of a platform lift is generally only one of the options available to covered entities. Covered entities that are concerned about the costs associated with maintaining standby power for a lift may wish to explore design options that would incorporate the use of a ramp.

208 and 502 Parking Spaces

General. Where parking spaces are provided, the 1991 Standards, at sections 4.1.2(5)(a) and (7) and 7(a), and the 2010 Standards, at section 208.1, require a specified number of the parking spaces to be accessible. The 2010 Standards, at section 208, include an exception that exempts parking spaces used exclusively for buses, trucks, delivery vehicles, law enforcement vehicles, or for purposes of vehicular impound, from the scoping requirement for parking spaces, provided that when these lots are accessed by the public the lot has an accessible passenger loading zone.

The 2010 Standards require accessible parking spaces to be identified by signs that display the International Symbol of Accessibility. Section 216.5, Exceptions 1 and 2, of the 2010 Standards exempt certain accessible parking spaces from this signage requirement. The first exception exempts sites that have four or fewer parking spaces from the signage requirement. Residential facilities where parking spaces are assigned to specific dwelling units are also exempted from the signage requirement.

Commenters stated that the first exception, by allowing a small parking lot with four or fewer spaces not to post a sign at its one accessible space, is problematic because

it could allow all drivers to park in accessible parking spaces. The Department believes that this exception provides necessary relief for small business entities that may otherwise face the prospect of having between twenty-five percent (25%) and one hundred percent (100%) of their limited parking area unavailable to their customers because they are reserved for the exclusive use of persons whose vehicles display accessible tags or parking placards. The 2010 Standards still require these businesses to ensure that at least one of their available parking spaces is designed to be accessible.

A commenter stated that accessible parking spaces must be clearly marked. The Department notes that section 502.6 of the 2010 Standards provides that accessible parking spaces must be identified by signs that include the International Symbol of Accessibility. Also, section 502.3.3 of the 2010 Standards requires that access aisles be marked so as to discourage parking in them.

Access Aisle. Section 502.3 of the 2010 Standards requires that an accessible route adjoin each access aisle serving accessible parking spaces. The accessible route connects each access aisle to accessible entrances.

Commenters questioned why the 2010 Standards would permit an accessible route used by individuals with disabilities to coincide with the path of moving vehicles. The Department believes that the 2010 Standards appropriately recognize that not all parking facilities provide separate pedestrian routes. Section 502.3 of the 2010 Standards provides the flexibility necessary to permit designers and others to determine the most appropriate location of the accessible route to the accessible entrances. If all pedestrians using the parking facility are expected to share the vehicular lanes, then the ADA permits covered entities to use the vehicular lanes as part of the accessible route. The advisory note in section 502.3 of the 2010 Standards, however, calls attention to the fact that this practice, while permitted, is not ideal. Accessible parking spaces must be located on the shortest accessible route of travel to an accessible entrance. Accessible parking spaces and the required accessible route should be located where individuals with disabilities do not have to cross vehicular lanes or pass behind parked vehicles to have access to an accessible entrance. If it is necessary to cross a vehicular lane because, for example, local fire engine access requirements prohibit parking immediately adjacent to a building, then a marked crossing running perpendicular to the vehicular route should be included as part of the accessible route to an accessible entrance.

Van Accessible Parking Spaces. The 1991 Standards, at sections 4.1.2(5)(b), 4.6.3, 4.6.4, and 4.6.5, require one in every eight accessible parking spaces to be van accessible. Section 208.2.4 of the 2010 Standards requires one in every six accessible parking spaces to be van accessible.

A commenter asked whether automobiles other than vans may park in van accessible parking spaces. The 2010 Standards do not prohibit automobiles other than vans from using van accessible parking spaces. The Department does not distinguish between vehicles that are actual ''vans'' versus other vehicles such as trucks, station wagons, sport utility vehicles, etc. since many vehicles other than vans may be used by individuals with disabilities to transport mobility devices.

Commenters' opinions were divided on this point. Facility operators and others asked for a reduction in the number of required accessible parking spaces, especially the number of van accessible parking spaces, because they claimed these spaces often are not used. Individuals with disabilities, however, requested an increase in the scoping requirements for these parking spaces.

The Department is aware that a strong difference of opinion exists between those who use such spaces and those who must provide or maintain them. Therefore, the Department did not increase the total number of accessible spaces required. The only change was to increase the proportion of spaces that must be accessible to vans and other vehicles equipped to transport mobility devices.

Direct Access Entrances From Parking Structures. Where levels in a parking garage have direct connections for pedestrians to another facility, the 1991 Standards, at section 4.1.3(8)(b)(i), require at least one of the direct connections to be accessible. The 2010 Standards, at section 206.4.2, require all of these direct connections to be accessible.

209 and 503 Passenger Loading Zones and Bus Stops

Passenger Loading Zones at Medical Care and Long-Term Care Facilities. Sections 6.1 and 6.2 of the 1991 Standards and section 209.3 of the 2010 Standards require medical care and long-term care facilities, where the period of stay exceeds 24 hours, to provide at least one accessible passenger loading zone at an accessible entrance. The 1991 Standards also require a canopy or roof overhang at this passenger loading zone. The 2010 Standards do not require a canopy or roof overhang.

Commenters urged the Department to reinstate the requirement for a canopy or roof overhang at accessible passenger loading zones at medical care and long-term care facilities. While the Department recognizes that a canopy or roof overhang may afford useful protection from inclement weather conditions to everyone using a facility, it is not clear that the absence of such protection would impede access by individuals with disabilities. Therefore, the Department declined to reinstate that requirement.

Passenger Loading Zones. Where passenger loading zones are provided, the 1991 Standards, at sections 4.1.2(5) and 4.6.6, require at least one passenger loading zone to be accessible. Sections 209.2.1 and 503 of the 2010 Standards, require facilities such as airport passenger terminals that have long, continuous passenger loading zones to provide one accessible passenger loading zone in every continuous 100 linear feet of loading zone space. The 1991 Standards and the 2010 Standards both include technical requirements for the vehicle pull-up space (96 inches wide minimum and 20 feet long minimum). Accessible passenger loading zones must have an access aisle that is 60 inches wide minimum and extends the full length of the vehicle pull-up space. The 1991 Standards permit the access aisle to be on the same level as the vehicle pull-up space, or on the sidewalk. The 2010 Standards require the access aisle to be on the same level as the vehicle pull-up space and to be marked so as to discourage parking in the access aisle.

Commenters expressed concern that certain covered entities, particularly airports, cannot accommodate the requirements of the 2010 Standards to provide passenger loading zones, and urged a revision that would require one accessible passenger loading zone located in reasonable proximity to each building entrance served by the curb.

Commenters raised a variety of issues about the requirements at section 503 of the 2010 Standards stating that the requirements for an access aisle, width, length, and marking of passenger loading zones are not clear, do not fully meet the needs of individuals with disabilities, may run afoul of state or local requirements, or may not be needed because many passenger loading zones are typically staffed by doormen or valet parkers. The wide range of opinions expressed in these comments indicates that this provision is controversial. However, none of these comments provided sufficient data to enable the Department to determine that the requirement is not appropriate.

Valet Parking and Mechanical Access Parking Garages. The 1991 Standards, at sections 4.1.2(5)(a) and (e), and sections 208.2, 209.4, and 209.5 of the 2010 Standards require parking facilities that provide valet parking services to have an accessible passenger loading zone. The 2010 Standards extend this requirement to mechanical access parking garages. The 1991 Standards contained an exception that exempted valet parking facilities from providing accessible parking spaces. The 2010 Standards eliminate this exception. The reason for not retaining the provision is that valet parking is a service, not a facility type.

Commenters questioned why the exception for valet parking facilities from providing accessible parking spaces was eliminated. The provision was eliminated because valet parkers may not have the skills necessary to drive a vehicle that is equipped to be accessible, including use of hand controls, or when a seat is not present to accommodate a driver using a wheelchair. In that case, permitting the individual with a disability to self-park may be a required reasonable modification of policy by a covered entity.

210 and 504 Stairways

The 1991 Standards require stairs to be accessible only when they provide access to floor levels not otherwise connected by an accessible route (*e.g.*, where the accessible route is provided by an elevator, lift, or ramp). The 2010 Standards, at sections 210.1 and 504, require all newly constructed stairs that are part of a means of egress to comply with the requirements for accessible stairs, which include requirements for accessible treads, risers, and handrails. In existing facilities, where floor levels are connected by an accessible route, only the handrail requirement will apply when the stairs are altered. Exception 2 to section 210.1 of the 2010 Standards permits altered stairs to not comply with the requirements for accessible treads and risers where there is an accessible route between floors served by the stairs.

Most commenters were in favor of this requirement for handrails in alterations and stated that adding handrails to stairs during alterations would be feasible and not costly while providing important safety benefits. The Department believes that it strikes an appropriate balance by focusing the expanded requirements on new construction. The 2010 Standards apply to stairs which are part of a required means of egress. Few stairways are not part of a means of egress. The 2010 Standards are consistent with most building codes which do not exempt stairways when the route is also served by a ramp or elevator.

211 and 602 Drinking Fountains

Sections 4.1.3(10) and 4.15 of the 1991 Standards and sections 211 and 602 of the 2010 Standards require drinking fountains to be provided for persons who use wheelchairs and for others who stand. The 1991 Standards require wall and post-mounted cantilevered drinking fountains mounted at a height for wheelchair users to provide clear floor space for a forward approach with knee and toe clearance and free standing or built-in drinking fountains to provide clear floor space for a parallel approach. The 2010 Standards require drinking fountains mounted at a height for wheelchair users to provide clear floor space for a forward approach with knee and toe clearance, and include an exception for a parallel approach for drinking fountains installed at a height to accommodate very small children. The 2010 Standards also include a technical requirement for drinking fountains for standing persons.

212 and 606 Kitchens, Kitchenettes, Lavatories, and Sinks

The 1991 Standards, at sections 4.24, and 9.2.2(7), contain technical requirements for sinks and only have specific scoping requirements for sinks in transient lodging. Section 212.3 of the 2010 Standards requires at least five percent (5%) of sinks in each accessible space to comply with the technical requirements for sinks. The technical requirements address clear floor space, height, faucets, and exposed pipes and surfaces. The 1991 Standards, at section 4.24, and the 2010 Standards, at section 606, both require the clear floor space at sinks to be positioned for a forward approach and knee and toe clearance to be provided under the sink. The 1991 Standards, at section 9.2.2(7), allow the clear floor space at kitchen sinks and wet bars in transient lodging guest rooms with mobility features to be positioned for either a forward approach with knee and toe clearance or for a parallel approach.

The 2010 Standards include an exception that permits the clear floor space to be positioned for a parallel approach at kitchen sinks in any space where a cook top or conventional range is not provided, and at a wet bar.

A commenter stated that it is unclear what the difference is between a sink and a lavatory, and that this is complicated by requirements that apply to sinks (five percent (5%) accessible) and lavatories (at least one accessible). The term ''lavatory'' generally refers to the specific type of plumbing fixture required for hand washing in toilet and bathing facilities. The more generic term ''sink'' applies to all other types of sinks located in covered facilities.

A commenter recommended that the mounting height of sinks and lavatories should take into consideration the increased use of three-wheeled scooters and some larger wheelchairs. The Department is aware that the use of three-wheeled scooters and larger wheelchairs may be increasing and that some of these devices may require changes in space requirements in the future. The Access Board is funding research to obtain data that may be used to develop design guidelines that provide access to individuals using these mobility devices.

213, 603, 604, and 608 Toilet and Bathing Facilities, Rooms, and Compartments

General. Where toilet facilities and bathing facilities are provided, they must comply with section 213 of the 2010 Standards.

A commenter recommended that all accessible toilet facilities, toilet rooms, and compartments should be required to have signage indicating that such spaces are restricted solely for the use of individuals with disabilities. The Department believes that it is neither necessary nor appropriate to restrict the use of accessible toilet facilities. Like many other facilities designed to be accessible, accessible toilet facilities can and do serve a wide range of individuals with and without disabilities.

A commenter recommended that more than one wheelchair accessible compartment be provided in toilet rooms serving airports and train stations because these compartments are likely to be occupied by individuals with luggage and persons with disabilities often take longer to use them. The Access Board is examining airport terminal accessibility as part of an ongoing effort to facilitate accessibility and promote effective design. As part of these efforts, the Access Board will examine requirements for accessible toilet compartments in larger airport restrooms. The Department declines to change the scoping for accessible toilet compartments at this time.

Ambulatory Accessible Toilet Compartments. Section 213.3.1 of the 2010 Standards requires multi-user men's toilet rooms, where the total of toilet compartments and urinals is six or more, to contain at least one ambulatory accessible compartment. The 1991 Standards count only toilet stalls (compartments) for this purpose. The 2010 Standards establish parity between multi-user women's toilet rooms and multi-user men's toilet rooms with respect to ambulatory accessible toilet compartments.

Urinals. Men's toilet rooms with only one urinal will no longer be required to provide an accessible urinal under the 2010 Standards. Such toilet rooms will still be required to provide an accessible toilet compartment.

Commenters urged that the exception be eliminated. The Department believes that this change will provide flexibility to many small businesses and it does not alter the requirement that all common use restrooms must be accessible.

Multiple Single-User Toilet Rooms. Where multiple single-user toilet rooms are clustered in a single location, fifty percent (50%), rather than the one hundred percent (100%) required by the 1991 Standards, are required to be accessible by section 213.2, Exception 4 of the 2010 Standards. Section 216.8 of the 2010 Standards requires that accessible single-user toilet rooms must be identified by the International Symbol of Accessibility where all single-user toilet rooms are not accessible.

Hospital Patient Toilet Rooms. An exception was added in section 223.1 of the 2010 Standards to allow toilet rooms that are part of critical or intensive care patient sleeping rooms to no longer be required to provide mobility features.

Water Closet Location and Rear Grab Bar. Section 604.2 of the 2010 Standards allows greater flexibility for the placement of the centerline of wheelchair accessible and ambulatory accessible water closets. Section

604.5.2, Exception 1 permits a shorter grab bar on the rear wall where there is not enough wall space due to special circumstances (*e.g.*, when a lavatory or other recessed fixture is located next to the water closet and the wall behind the lavatory is recessed so that the lavatory does not overlap the required clear floor space at the water closet). The 1991 Standards contain no exception for grab bar length, and require the water closet centerline to be exactly 18 inches from the side wall, while the 2010 Standards requirement allows the centerline to be between 16 and 18 inches from the side wall in wheelchair accessible toilet compartments and 17 to 19 inches in ambulatory accessible toilet compartments.

Water Closet Clearance. Section 604.3 of the 2010 Standards represents a change in the accessibility requirements where a lavatory is installed adjacent to the water closet. The 1991 Standards allow the nearest side of a lavatory to be placed 18 inches minimum from the water closet centerline and 36 inches minimum from the side wall adjacent to the water closet. However, locating the lavatory so close to the water closet prohibits many individuals with disabilities from using a side transfer. To allow greater transfer options, including side transfers, the 2010 Standards prohibit lavatories from overlapping the clear floor space at water closets, except in covered residential dwelling units.

A majority of commenters, including persons who use wheelchairs, strongly agreed with the requirement to provide enough space for a side transfer. These commenters believed that the requirement will increase the usability of accessible single-user toilet rooms by making side transfers possible for many individuals who use wheelchairs and would have been unable to transfer to a water closet using a side transfer even if the water closet complied with the 1991 Standards. In addition, many commenters noted that the additional clear floor space at the side of the water closet is also critical for those providing assistance with transfers and personal care for persons with disabilities. Numerous comments noted that this requirement is already included in other model accessibility standards and many state and local building codes and its adoption in the 2010 Standards is a important part of harmonization efforts. The Department agrees that the provision of enough clear floor space to permit side transfers at water closets is an important feature that must be provided to ensure access for persons with disabilities in toilet and bathing facilities. Furthermore, the adoption of this requirement closely harmonizes with the model codes and many state and local building codes.

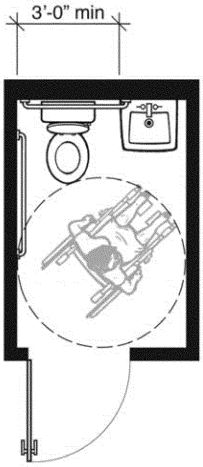
Other commenters urged the Department not to adopt section 604.3 of the 2010 Standards claiming that it will require single-user toilet rooms to be two feet wider than the 1991 Standards require, and this additional requirement will be difficult to meet. Multiple commentators also expressed concern that the size of single-user toilet rooms would be increased but they did not specify how much larger such toilet rooms would have to be in their estimation. In response to these concerns, the Department developed a series of single-user toilet room floor plans demonstrating that the total square footage between representative layouts complying with the 1991 Standards and the 2010 Standards are comparable. The Department believes the floor plan comparisons clearly show that size differences between the two Standards are not substantial and several of the 2010 Standards-compliant plans do not require additional square footage compared to the 1991 Standards plans. These single-user toilet room floor plans are shown below.

Several commenters concluded that alterations of single-user toilet rooms should be exempt from the requirements of section 604.3 of the 2010 Standards because of the significant reconfiguration and reconstruction that would be required, such as moving plumbing fixtures, walls, and/or doors at significant additional expense. The Department disagrees with this conclusion since it fails to take into account several key points. The 2010 Standards contain provisions for inswinging doors, 603.2.3, Exception 2, and recessed fixtures adjacent to water closets, 604.5.2, Exception 1. These provisions give flexibility to create more compact room designs and maintain required clearances around fixtures. As with the 1991 Standards, any alterations must comply to the extent that it is technically feasible to do so.

The requirements at section 604.3.2 of the 2010 Standards specify how required clearance around the water closet can overlap with specific elements and spaces. An exception that applies only to covered residential dwelling units permits a lavatory to be located no closer than 18 inches from the centerline of the water closet. The requirements at section 604.3.2 of the 2010 Standards increase accessibility for individuals with disabilities. One commenter expressed concern about other items that might overlap the clear floor space, such as dispensers, shelves, and coat hooks on the side of the water closet where a wheelchair would be positioned for a transfer. Section 604.3.2 of the 2010 Standards allows items such as associated grab bars, dispensers, sanitary napkin disposal units, coat hooks, and shelves to overlap the clear floor space. These are items that typically do not affect the usability of the clear floor space.

Toilet Room Doors. Sections 4.22.2 and 4.22.3 of the 1991 Standards and Section 603.2.3 of the 2010 Standards permit the doors of all toilet or bathing rooms with in-swinging doors to swing into the required turning

space, but not into the clear floor space required at any fixture. In single-user toilet rooms or bathing rooms, Section 603.2.3 Exception 2 of the 2010 Standards permits the door to swing into the clear floor space of an accessible fixture if a clear floor space that measures at least 30 inches by 48 inches is provided outside of the door swing.



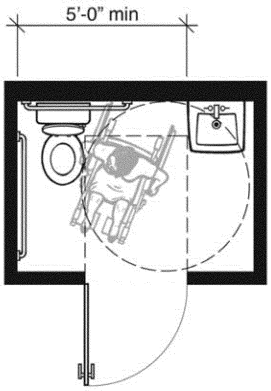
Several commenters expressed reservations about Exception 2 of Section 603.2.3. Concerns were raised that permitting doors of single-user toilet or bathing rooms with in-swinging doors to swing into the clearance around any fixture will result in inaccessibility to individuals using larger wheelchairs and scooters. Additionally, a commenter stated that the exception would require an unacceptable amount of precision maneuvering by individuals who use standard size wheelchairs. The Department believes that this provision achieves necessary flexibility while providing a minimum standard for maneuvering space. The standard does permit additional maneuvering space to be provided, if needed.

In the NPRM, the Department provided a series of plan drawings illustrating comparisons of the minimum size single-user toilet rooms. These floor plans showed typical examples that met the minimum requirements of the proposed ADA Standards. A commenter was of the opinion that the single-user toilet plans shown in the NPRM demonstrated that the new requirements will not result in a substantial increase in room size. Several other commenters representing industry offered criticisms of the single-user toilet floor plans to support their assertion that a 2010 Standards-compliant single-user toilet room will never be smaller and will likely be larger than such a toilet room required under the 1991 Standards. Commenters also asserted that the floor plans prepared by the Department were of a very basic design which could be accommodated in a minimal sized space whereas the types of facilities their customers demand would require additional space to be added to the rooms shown in the floor plans. The Department recognizes that there are many design choices that can affect the size of a room or space. Choices to install additional features may result in more space being needed to provide sufficient clear floor space for that additional feature to comply. However, many facilities that have these extra features also tend to have ample space to meet accessibility requirements. Other commenters asserted that public single-user toilet rooms always include a closer and a latch on the entry door, requiring a larger clear floor space than shown on the push side of the door shown in Plan 1B. The Department acknowledges that in instances where a latch is provided and a closer is required by other regulations or codes, the minimum size of a room with an out-swinging door may be slightly larger than as shown in Plan 1C.

Additional floor plans of single-user toilet rooms are now included in further response to the commentary received.

Comparison of Single-User Toilet Room Layouts

1991 Standards



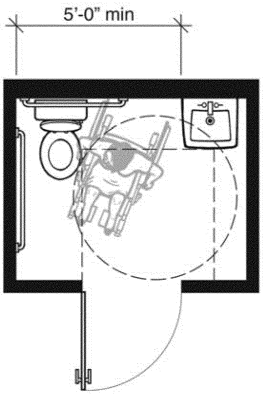
Plan-1A: 1991 Standards Minimum with Out-Swinging Door

5'-0" x 7'-3" • 36.25 Square Feet

This plan shows a typical example of a single-user toilet room that meets the minimum requirements of the 1991 Standards. The size of this space is determined by the minimum width required for the water closet and lavatory between the side walls, the minimum wheelchair turning space, and the space required for the out-swinging door. A lavatory with knee space can overlap the clear floor space required for the water closet provided that at least 36 inches of clearance is maintained between the side wall next to the water closet and the lavatory (see section 4.16.2 and Fig. 28 of the 1991 Standards). A wheelchair turning space meeting section 4.2.3 of the 1991 Standards must be provided. The size of this room requires that the entry door swing out. The room would be larger if the door were in-swinging.

2010 Standards

Plan-1B: 2010 Standards Minimum with Out-Swinging Door



7'-0" x 5'-0" • 35.00 Square Feet

This plan shows a typical example of a single-user toilet room that meets the minimum requirements of the 2010 Standards. Features include: five-foot minimum width between the side wall of the water closet and the lavatory; 60-inch minimum circular wheelchair turning space; and 36-inch by 48-inch clear maneuvering space for the out-swinging entry door. Section 604.3.1 of the 2010 Standards requires a floor clearance at a water closet that is a minimum of 60 inches wide by 56 inches deep regardless of approach. Section 604.3.2 prohibits any other plumbing fixtures from being located in this clear space, except in residential dwelling units. The 2010 Standards, at section 304.3, allows the turning space to extend into toe and knee space provided beneath fixtures and other elements. Required maneuvering space for the entry door (inside the room) must be clear of all fixtures. If the door had both a closer and latch, section 404.2.4.1 and Figure 404.2.4.1(c) require additional space on the latch side.

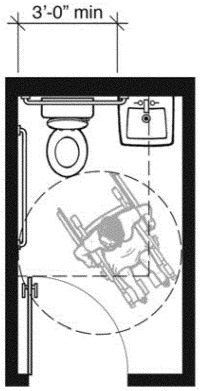
This layout is three point five percent (3.5%) smaller than the accompanying Plan-1A: 1991 Standards Minimum with Out-Swinging Door example.

Comparison of Single-User Toilet Room Layouts

2010 Standards

Plan-1C: 2010 Standards Minimum with Out-Swinging Door

(entry door has both closer and latch)



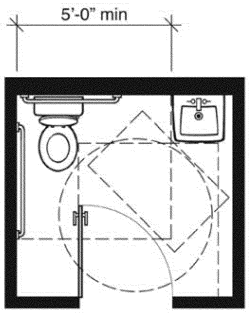
7'-0" x 5'-6" • 38.50 Square Feet

This plan shows the same typical features of a single-user toilet room that meets the minimum requirements of the 2010 Standards as Plan-1B does except the entry door has both a closer and latch. Because the door has both a closer and latch, a minimum additional foot of maneuvering space is required on the latch side (see section 404.2.4.1 and Figure 404.2.4.1(c) of the 2010 Standards).

This layout is six point two percent (6.2%) larger than the accompanying Plan-1A: 1991 Standards Minimum with Out-Swinging Door example.

Comparison of Single-User Toilet Room Layouts

1991 Standards



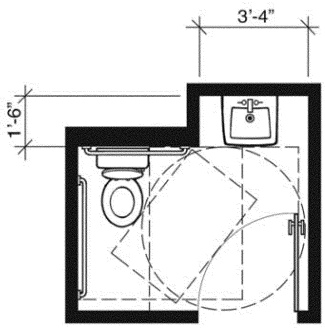
Plan-2A: 1991 Standards Minimum with In-Swinging Door

5'-0" x 8'-6" • 42.50 Square Feet

This plan shows a typical example of a single-user toilet room that meets the minimum requirements of the 1991 Standards. Depending on the width of the hallway and other circulation issues, it can be preferable to swing the entry door into the toilet room. Businesses and public entities typically prefer to have an in-swinging door. The in-swinging door increases overall room size because it cannot swing over the required clear floor space at any accessible fixture, (see section 4.22.2 of the 1991 Standards). This increases the room depth from Plan-1A. The door is permitted to swing over the required turning space shown as a 60-inch circle.

2010 Standards

Plan-2B: 2010 Standards Minimum with In-Swinging Door



7'-0" x 6'-6" • 45.50 Square Feet

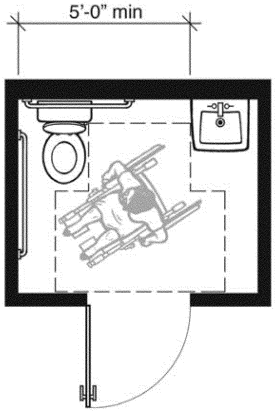
This plan shows a typical example of a single-user toilet room that meets the minimum requirements of the 2010 Standards when the entry door swings into the room. In the 2010 Standards an exception allows the entry door to swing over the clear floor spaces and clearances required at the fixtures if a clear floor space complying with section 305.3 (minimum 30 inches by 48 inches) is provided outside the arc of the door swing, section 603.3.3 exception 2. The required maneuvering space for the door, section 404.2.4.1 and Figure 404.2.4.1(a), also is a factor in room size. This clear space cannot be obstructed by the plumbing fixtures. Note that this layout provides more space for turning when the door is closed than Plan-1B.

This layout is seven percent (7%) larger than the accompanying Plan-2A: 1991 Standards Minimum with In-Swinging Door example.

Comparison of Single-User Toilet Room Layouts

2010 Standards

Plan-2C: 2010 Standards Minimum with In-Swinging Door



7'-0" x 6'-6" • 40.00 Square Feet
(plumbing chase not included)

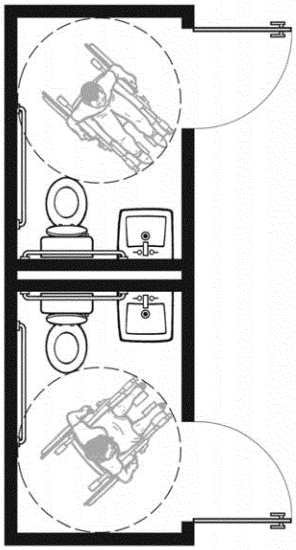
This plan shows the same typical features of a single-user toilet room that meets the minimum requirements of the 2010 Standards as Plan-2B when the entry door swings into the room. Note that this layout also provides more space for turning when the door is closed than Plan-1B.

This layout is six point two five percent (6.25%) smaller than the accompanying Plan-2A: 1991 Standards Minimum with In-Swinging Door example.

Comparison of Single-User Toilet Room Layouts

1991 Standards and 2010 Standards

Plan-3: Meets Both 1991 Standards and 2010 Standards

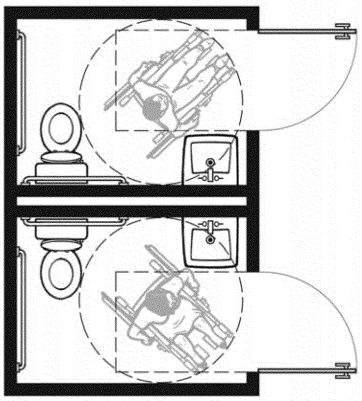


7'-0" x 5'-9" • 40.25 Square Feet

This plan shows an example of a single-user toilet room that meets the minimum requirements of both the 1991 Standards and 2010 Standards. A T-shaped turning space has been used (see Fig. 3(a) of the 1991 Standards and Figure 304.3.2 of the 2010 Standards) to maintain a compact room size. An out-swinging door also minimizes the overall layout depth and cannot swing over the required clear floor space or clearance at any accessible plumbing fixture.

This layout is eleven percent (11%) larger than the Plan-1A: 1991 Standards Minimum with Out-Swinging Door example shown at the beginning of these plan comparisons.

Comparison of Single-User Toilet Room "Pairs" With Fixtures Side-by-Side

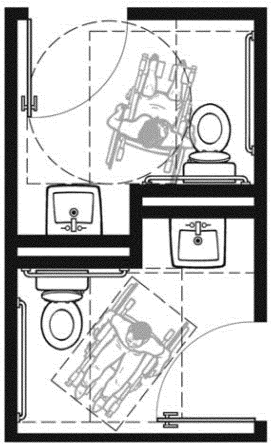


1991 Standards

Plan-1A Pair: 1991 Standards with Out-Swinging Doors

Two 5'-0" x 7'-3" Rooms – 72.50 Square Feet Total

2010 Standards



Plan-1B Pair: 2010 Standards with Out-Swinging Doors

Two 7'-0" x 5'-0" Rooms – 70.00 Square Feet Total

These plans show men's/women's room configurations using Plans 1A and 1B.

Comparison of Single-User Toilet Room "Pairs" With Fixtures Side-by-Side

2010 Standards

Plan-2C Pair: 2010 Standards with In-Swinging Doors

Two 7'-2" x 6'-6" Rooms - 82.00 Square Feet Total

This plan shows a men's/women's room configuration using Plan 2C.

Toilet Paper Dispensers. The provisions for toilet paper dispensers at section 604.7 of the 2010 Standards require the dispenser to be located seven inches minimum and nine inches maximum in front of the water closet measured to the centerline of the dispenser. The paper outlet of the dispenser must be located 15 inches minimum and 48 inches maximum above the finish floor. In the 1991 Standards the location of the toilet paper dispenser is determined by the centerline and forward edge of the dispenser. In the 2010 Standards

the mounting location of the toilet paper dispenser is determined by the centerline of the dispenser and the location of the outlet for the toilet paper.

One commenter discussed the difficulty of using large roll toilet paper dispensers and dispensers with two standard size rolls stacked on top of each other. The size of the large dispensers can block access to the grab bar and the outlet for the toilet paper can be too low or too high to be usable. Some dispensers also control the delivery of the toilet paper which can make it impossible to get the toilet paper. Toilet paper dispensers that control delivery or do not allow continuous paper flow are not permitted by the 1991 Standards or the 2010 Standards. Also, many of the large roll toilet paper dispensers do not comply with the 2010 Standards since their large size does not allow them to be mounted 12 inches above or 1½ inches below the side grab bar as required by section 609.3.

Shower Spray Controls. In accessible bathtubs and shower compartments, sections 607.6 and 608.6 of the 2010 Standards require shower spray controls to have an on/off control and to deliver water that is 120 °F (49 °C) maximum. Neither feature was required by the 1991 Standards, but may be required by plumbing codes. Delivering water that is no hotter than 120 °F (49 °C) will require controlling the maximum temperature at each accessible shower spray unit.

Shower Compartments. The 1991 Standards at sections 4.21 and 9.1.2 and the 2010 Standards at section 608 contain technical requirements for transfer-type and roll-in shower compartments. The 2010 Standards provide more flexibility than the 1991 Standards as follows:

• Transfer-type showers are exactly 36 inches wide by 36 inches long.

• The 1991 Standards and the 2010 Standards permit a ½-inch maximum curb in transfer-type showers. The 2010 Standards add a new exception that permits a 2-inch maximum curb in transfer-type showers in alterations to existing facilities, where recessing the compartment to achieve a ½-inch curb will disturb the structural reinforcement of the floor slab.

• Roll-in showers are 30 inches wide minimum by 60 inches long minimum. Alternate roll-in showers are 36 inches wide by 60 inches long minimum, and have a 36-inch minimum wide opening on the long side of the compartment. The 1991 Standards require alternate roll-in showers in a portion of accessible transient lodging guest rooms, but provision of this shower type in other facilities is generally permitted as an equivalent facilitation. The 1991 Standards require a seat to be provided adjacent to the opening; and require the controls to be located on the side adjacent to the seat. The 2010 Standards permit alternate roll-in showers to be used in any facility, only require a seat in transient lodging guest rooms, and allow location of controls on the back wall opposite the seat as an alternative.

Commenters raised concerns that adding a new exception that permits a 2-inch maximum curb in transfer-type showers in alterations to existing facilities, where recessing the compartment to achieve a ½-inch curb will disturb the structural reinforcement of the floor slab, will impair the ability of individuals with disabilities to use transfer-type showers.

The exception in section 608.7 of the 2010 Standards permitting a 2-inch maximum curb in transfer-type showers is allowed only in existing facilities where provision of a ½-inch high threshold would disturb the structural reinforcement of the floor slab. Whenever this exception is used the least high threshold that can be used should be provided, up to a maximum height of 2 inches. This exception is intended to provide some flexibility where the existing structure precludes full compliance.

Toilet and Bathing Rooms. Section 213 of the 2010 Standards sets out the scoping requirements for toilet and bathing rooms.

Commenters recommended that section 213, Toilet Facilities and Bathing Facilities, of the 2010 Standards include requirements that unisex toilet and bathing rooms be provided in certain facilities. These commenters suggested that unisex toilet and bathing rooms are most useful as companion care facilities.

Model plumbing and building codes require single-user (unisex or family) toilet facilities in certain occupancies, primarily assembly facilities, covered malls, and transportation facilities. These types of toilet rooms provide flexibility for persons needing privacy so that they can obtain assistance from family members or persons of the opposite sex. When these facilities are provided, both the 1991 Standards and 2010 Standards require that they be accessible. The 2010 Standards do not scope unisex toilet facilities because plumbing codes generally determine the number and type of plumbing fixtures to be provided in a particular occupancy and often determine whether an occupancy must provide separate sex facilities in addition to single-user facilities. However, the scoping at section 213.2.1 of the 2010 Standards coordinates with model plumbing and building code requirements which will permit a small toilet room with two water closets or one water closet and one urinal to be considered a single-user toilet room provided that the room has a privacy latch. In this way, a person needing assistance from a person of the opposite sex can lock the door to use the facility while temporarily inconveniencing only one other potential user. These provisions strike a reasonable balance and impose less impact on covered entities.

A commenter recommended that in shower compartments rectangular seats as provided in section 610.3.1 of the 2010 Standards should not be permitted as a substitute for L-shaped seats as provided in 610.3.2.

The 2010 Standards do not indicate a preference for either rectangular or L-shaped seats in shower compartments. L-shaped seats in transfer and certain roll-in showers have been used for many years to provide users with poor balance additional support because they can position themselves in the corner while showering.

214 and 611 Washing Machines and Clothes Dryers

Sections 214.2 (washing machines) and 214.3 (clothes dryers) of the 2010 Standards specify the number of each type of these machines required to be accessible (one to two depending upon the total number of machines provided) and section 611 specifies the technical requirements. An exception will permit the maximum height for the tops of these machines to be 2 inches higher than the general requirement for maximum high reach over an obstruction.

A commenter objected to the scoping provision for accessible washing machines and clothes dryers stating that the probability is low that more than one accessible machine would be needed at the same time in the laundry facility of a place of transient lodging.

The scoping in this provision is based on the relative size of the facility. The Department assumes that the size of the facility (and, therefore, the number of accessible machines provided) will be determined by the covered entity's assessment of the demand for laundry facilities. The Department declines to assume that persons with disabilities will have less use for accessible facilities in transient lodging than in other public accommodations.

216 and 703 Signs

The following types of signs, though they are not specifically subject to the 1991 Standards requirement for signs, will now be explicitly exempted by sections 216 and 703 of the 2010 Standards. These types of signs include: seat and row designations in assembly areas; occupant names, building addresses; company names and logos; signs in parking facilities (except those identifying accessible parking spaces and means of egress); and exterior signs identifying permanent rooms and spaces that are not located at the door to the space they serve. This requirement also clarifies that the exception for temporary signs applies to signs used for seven days or less.

The 2010 Standards retain the option to provide one sign where both visual and tactile characters are provided or two signs, one with visual, and one with tactile characters.

217 and 704 Telephones

Drive-up Public Telephones. Where public telephones are provided, the 1991 Standards, at section 4.1.3(17)(a), and section 217.2 of the 2010 Standards, require a certain number of telephones to be wheelchair accessible. The 2010 Standards add a new exception that exempts drive-up public telephones.

Text Telephones (TTY). Section 4.1.3(17) of the 1991 Standards requires a public TTY to be provided if there are four or more public pay telephones at a site and at least one is in an interior location. Section 217.4.2 of the 2010 Standards requires that a building or facility provide a public TTY on each floor that has four or more public telephones, and in each telephone bank that has four or more telephones. Additionally, section 217.4.4 of the 2010 Standards requires that at least one public TTY be installed where four or more public pay telephones are provided on an exterior site. Section 217.4.5 of the 2010 Standards also requires that a public TTY be provided where at least one public pay telephone is provided at a public rest stop, emergency roadside stop, or service plaza. Section 217.4.6 of the 2010 Standards also requires that a public TTY be provided at each location where at least one public pay telephone is provided serving a hospital emergency room, a hospital recovery room, or a hospital waiting room. Section 217.4.7 of the 2010 Standards also requires that, in addition to the requirements for a public TTY to be provided at each location where at least four or more public pay telephones are provided at a bank of pay telephones and where at least one public pay telephone is provided on a floor or in a public building, where at least one public pay telephone serves a particular entrance to a bus or rail facility at least one public TTY must serve that entrance. In airports, in addition to the requirements for the provision of a public TTY at phone banks, on floors, and in public buildings with pay phones, where four or more public pay phones are located in a terminal outside the security areas, in a concourse within the security areas, or a baggage claim area in a terminal at least one public TTY must be provided. Section 217.4.8 of the 2010 Standards also requires that a TTY be provided in at least one secured area where at least one pay telephone is provided in a secured area used only by detainees or inmates and security personnel in detention and correctional facilities.

Wheelchair Accessible Telephones

Section 217.2 of the 2010 Standards requires that where public telephones are provided wheelchair accessible telephones complying

with section 704.2 must be provided in accordance with Table 217.2.

A commenter stated that requiring installation of telephones within the proposed reach range requirements would adversely impact public and telephone owners and operators. According to the commenter, individuals without disabilities will not use telephones that are installed within the reach range requirements because they may be inconvenienced by having to stoop to operate these telephones, and, therefore, owners and operators will lose revenue due to less use of public telephones.

This comment misunderstands the scoping requirements for wheelchair accessible telephones. Section 217.2 of the 2010 Standards provides that where one or more single units are provided, only one unit per floor, level, or exterior site is required to be wheelchair accessible. However, where banks of telephones are provided, only one telephone in each bank is required to be wheelchair accessible. The Department believes these scoping requirements for wheelchair accessible telephones are reasonable and will not result in burdensome obligations or lost revenue for owners and operators.

218 and 810 Transportation Facilities

Detectable Warnings. Detectable warnings provide a distinctively textured surface of truncated domes. The 1991 Standards at sections 4.1.3(15), 4.7.7, 4.29.2, 4.29.5, 4.29.6, and 10.3.1(8) require detectable warnings at curb ramps, hazardous vehicular areas, reflecting pools, and transit platform edges. The 2010 Standards at sections 218, 810.5, 705.1, and 705.2 only require detectable warnings at transit platform edges. The technical specifications for the diameter and spacing of the truncated domes have also been changed. The 2010 Standards also delete the requirement for the material used to contrast in resiliency or sound-on-cane contact from adjoining walking surfaces at interior locations.

The 2010 Standards apply to detectable warnings on developed sites. They do not apply to the public right-of-way. Scoping for detectable warnings at all locations other than transit platform edges has been eliminated from the 2010 Standards. However, because detectable warnings have been shown to significantly benefit individuals with disabilities at transit platform edges, the 2010 Standards provide scoping and technical requirements for detectable warnings at transit platform edges.

219 and 706 Assistive Listening Systems

Signs. Section 216.10 of the 2010 Standards requires each covered assembly area to provide signs at each auditorium to inform patrons that assistive listening systems are available. However, an exception to this requirement permits assembly areas that have ticket offices or ticket windows to display the required signs at the ticket window.

A commenter recommended eliminating the exception at 216.10 because, for example, people who buy tickets through the mail, by subscription, or on-line may not need to stop at a ticket office or window upon arrival at the assembly area. The Department believes that an individual's decision to purchase tickets before arriving at a performance does not limit the discretion of the assembly operator to use the ticket window to provide other services to its patrons. The Department retained the exception at 216.10 to permit the venue operator some flexibility in determining how to meet the needs of its patrons.

Audible Communication. The 1991 Standards, at section 4.1.3(19)(b), require assembly areas, where audible communication is integral to the use of the space, to provide an assistive listening system if they have an audio amplification system or an occupant load of 50 or more people and have fixed seating. The 2010 Standards at section 219 require assistive listening systems in spaces where communication is integral to the space and audio amplification is provided and in courtrooms.

The 1991 Standards require receivers to be provided for at least four percent (4%) of the total number of fixed seats. The 2010 Standards, at section 219.3, revise the percentage of receivers required according to a table that correlates the required number of receivers to the seating capacity of the facility. Small facilities will continue to provide receivers for four percent (4%) of the seats. The required percentage declines as the size of the facility increases. The changes also require at least twenty-five percent (25%), but no fewer than two, of the receivers to be hearing-aid compatible. Assembly areas served by an induction loop assistive listening system will not have to provide hearing-aid compatible receivers.

Commenters were divided in their opinion of this change. The Department believes that the reduction in the required number of assistive listening systems for larger assembly areas will meet the needs of individuals with disabilities. The new requirement to provide hearing-aid compatible receivers should make assistive listening systems more usable for people who have been underserved until now.

Concerns were raised that the requirement to provide assistive listening systems may have an adverse impact on restaurants. This comment misunderstands the scope of coverage. The 2010 Standards define the term ''assembly area'' to include facilities used for entertainment, educational, or civic gatherings. A restaurant would fall within

this category only if it is presenting programs to educate or entertain diners, and it provides an audio amplification system.

Same Management or Building. The 2010 Standards add a new exception that allows multiple assembly areas that are in the same building and under the same management, such as theaters in a multiplex cinema and lecture halls in a college building, to calculate the number of receivers required based on the total number of seats in all the assembly areas, instead of each assembly area separately, where the receivers are compatible with the assistive listening systems used in each of the assembly areas.

Mono Jacks, Sound Pressure, Etc. Section 4.33.7 of the 1991 Standards does not contain specific technical requirements for assistive listening systems. The 2010 Standards at section 706 require assistive listening systems to have standard mono jacks and will require hearing-aid compatible receivers to have neck loops to interface with telecoils in hearing aids. The 2010 Standards also specify sound pressure level, signal-to-noise ratio, and peak clipping level. Currently available assistive listening systems typically meet these technical requirements.

220 and 707 Automatic Teller Machines and Fare Machines

Section 707 of the 2010 Standards adds specific technical requirements for speech output, privacy, tactilely-discernible input controls, display screens, and Braille instructions to the general accessibility requirements set out in the 1991 Standards. Machines shall be speech enabled and exceptions are provided that cover when audible tones are permitted, when advertisements or similar information are provided, and where speech synthesis cannot be supported. The 1991 Standards require these machines to be accessible to and independently usable by persons with visual impairments, but do not contain any technical specifications.

221 Assembly Areas

Wheelchair Spaces/Companion Seats. Owners of large assembly areas have historically complained to the Department that the requirement for one percent (1%) of seating to be wheelchair seating is excessive and that wheelchair seats are not being sold. At the same time, advocates have traditionally argued that persons who use wheelchairs will increasingly participate in activities at assembly areas once they become accessible and that at least one percent (1%) of seats should be accessible.

The 1991 Standards, at sections 4.1.3(19)(a) and 4.33.3, require assembly areas to provide wheelchair and companion seats. In assembly areas with a capacity of more than five hundred seats, accessible seating at a ratio of one percent (1%) (plus one seat) of the number of traditional fixed seats must be provided. The 2010 Standards, at section 221.2, require assembly areas with 501 to 5000 seats to provide at least six wheelchair spaces and companion seats plus one additional wheelchair space for each additional 150 seats (or fraction thereof) between 501 through 5000. In assembly areas with more than 5000 seats at least 36 wheelchair spaces and companion seats plus one additional wheelchair space for each 200 seats (or fraction thereof) more than 5000 are required. See sections 221.1 and 221.2 of the 2010 Standards.

Commenters questioned why scoping requirements for large assembly areas are being reduced. During the development of the 2004 ADAAG, industry providers, particularly those representing larger stadium-style assembly areas, supplied data to the Access Board demonstrating the current scoping requirements for large assembly areas often exceed the demand. Based on the data provided to the Access Board, the Department believes the reduced scoping requirements will adequately meet the needs of individuals with disabilities, while balancing concerns of the industry.

Commenters representing assembly areas supported the reduced scoping. One commenter asked that scoping requirements for larger assembly areas be reduced even further. Although the commenter referenced data demonstrating that wheelchair spaces in larger facilities with seating capacities of 70,000 or more may not be used by individuals with disabilities, the data was not based on actual results, but was calculated at least in part based on probability assumptions. The Department is not convinced that further reductions should be made based upon those projections and that further reductions would not substantially limit accessibility at assembly areas for persons who use wheelchairs.

Section 221.2.1.3 of the 2010 Standards clarifies that the scoping requirements for wheelchair spaces and companion seats are to be applied separately to general seating areas and to each luxury box, club box, and suite in arenas, stadiums, and grandstands. In assembly areas other than arenas, stadiums, and grandstands, the scoping requirements will not be applied separately. Thus, in performing arts facilities with tiered boxes designed for spatial and acoustical purposes, the scoping requirement is to be applied to the seats in the tiered boxes. The requisite number of wheelchair spaces and companion seats required in the tiered boxes are to be dispersed among at least twenty percent (20%) of the tiered boxes. For example, if a performing arts facility has 20 tiered boxes with 10 fixed seats in each box, for a total of 200 seats, at least five wheelchair spaces and companion seats must be provided in the

boxes, and they must be dispersed among at least four of the 20 boxes.

Commenters raised concerns that the 2010 Standards should clarify requirements for scoping of seating areas and that requiring accessible seating in each luxury box, club box, and suite in arenas, stadiums and grandstands could result in no wheelchair and companion spaces available for individuals with disabilities in the general seating area(s). These comments appear to misunderstand the requirements. The 2010 Standards require each luxury box, club box, and suite in an arena, stadium or grandstand to be accessible and to contain wheelchair spaces and companion seats as required by sections 221.2.1.1, 221.2.1.2 and 221.3. In addition, the remaining seating areas not located in boxes must also contain the number of wheelchair and companion seating locations specified in the 2010 Standards based on the total number of seats in the entire facility excluding luxury boxes, club boxes and suites.

Wheelchair Space Overlap in Assembly Areas. Section 4.33.3 of the 1991 Standards and the 2010 Standards, at sections 402, 403.5.1, 802.1.4, and 802.1.5, require walkways that are part of an accessible route to have a 36-inch minimum clear width. Section 802.1.5 of the 2010 Standards specifically prohibits accessible routes from overlapping wheelchair spaces. This change is consistent with the technical requirements for accessible routes, since the clear width of accessible routes cannot be obstructed by any object. The 2010 Standards also specifically prohibit wheelchair spaces from overlapping circulation paths. An advisory note clarifies that this prohibition applies only to the circulation path width required by applicable building codes and fire and life safety codes since the codes prohibit obstructions in the required width of assembly aisles.

Section 802.1.5 of the 2010 Standards provides that where a main circulation path is located in front of a row of seats that contains a wheelchair space and the circulation path is wider than required by applicable building codes and fire and life safety codes, the wheelchair space may overlap the ''extra'' circulation path width. Where a main circulation path is located behind a row of seats that contains a wheelchair space and the wheelchair space is entered from the rear, the aisle in front of the row may need to be wider in order not to block the required circulation path to the other seats in the row, or a mid-row opening may need to be provided to access the required circulation path to the other seats.

Line of Sight and Dispersion of Wheelchair Spaces in Assembly Areas. Section 4.33.3 of the 1991 Standards requires wheelchair spaces and companion seats to be an integral part of any fixed seating plan in assembly areas and to provide individuals with disabilities a choice of admission prices and lines of sight comparable to those available to other spectators. Section 4.33.3 also requires wheelchair spaces and companion seats to be dispersed in assembly areas with more than 300 seats. Under the 1991 Standards, sports facilities typically located some wheelchair spaces and companion seats on each accessible level of the facility. In 1994, the Department issued official guidance interpreting the requirement for comparable lines of sight in the 1991 Standards to mean wheelchair spaces and companion seats in sports stadia and arenas must provide patrons with disabilities and their companions with lines of sight over standing spectators to the playing field or performance area, where spectators were expected to stand during events. See ''Accessible Stadiums,'' *www.ada.gov/stadium.pdf.* The Department also interpreted the section 4.33.3 comparable lines of sight requirement to mean that wheelchair spaces and companion seats in stadium-style movie theaters must provide patrons with disabilities and their companions with viewing angles comparable to those provided to other spectators.

Sections 221.2.3 and 802.2 of the 2010 Standards add specific technical requirements for providing lines of sight over seated and standing spectators and also require wheelchair spaces and companion seats (per section 221.3) to provide individuals with disabilities choices of seating locations and viewing angles that are substantially equivalent to, or better than, the choices of seating locations and viewing angles available to other spectators. This applies to all types of assembly areas, including stadium-style movie theaters, sports arenas, and concert halls. These rules are expected to have minimal impact since they are consistent with the Department's longstanding interpretation of the 1991 Standards and technical assistance.

Commenters stated that the qualitative viewing angle language contained in section 221.2.3 is not appropriate for an enforceable regulatory standard unless the terms of such language are defined. Other commenters requested definitions for viewing angles, an explanation for precisely how viewing angles are measured, and an explanation for precisely how to evaluate whether one viewing angle is better than another viewing angle. The Department is convinced that the regulatory language in the 2010 Standards is sufficient to provide a performance-based standard for designers, architects, and other professionals to design facilities that provide comparable lines of sight for wheelchair seating in assembly areas, including viewing angles. The Department believes that as a general rule, the vast variety of sizes and configurations in assembly areas requires it

to establish a performance standard for designers to adapt to the specific circumstances of the venue that is being designed. The Department has implemented more explicit requirements for stadium-style movie theaters in 28 CFR 36.406(f) and 35.151(g) of the final regulations based on experience and expertise gained after several major enforcement actions.

Another commenter inquired as to what determines whether a choice of seating locations or viewing angles is better than that available to all other spectators. The answer to this question varies according to each assembly area that is being designed, but designers and venue operators understand which seats are better and that understanding routinely drives design choices made to maximize profit and successful operation of the facility, among other things. For example, an ''equivalent or better'' line of sight in a major league football stadium would be different than for a 350-seat lecture hall. This performance standard is based upon the underlying principle of equal opportunity for a good viewing experience for everyone, including persons with disabilities. The Department believes that for each specific facility that is designed, the owner, operator, and design professionals will be able to distinguish easily between seating locations and the quality of the associated lines of sight from those seating locations in order to decide which ones are better than others. The wheelchair locations do not have to be exclusively among the seats with the very best lines of sight nor may they be exclusively among the seats with the worst lines of sight. Rather, wheelchair seating locations should offer a choice of viewing experiences and be located among the seats where most of the audience chooses to sit.

Section 4.33.3 of the 1991 Standards requires wheelchair spaces and companion seating to be offered at a choice of admission prices, but section 221.2.3.2 of the 2010 Standards no longer requires wheelchair spaces and companion seats to be dispersed based on admission prices. Venue owners and operators commented during the 2004 ADAAG rulemaking process that pricing is not always established at the design phase and may vary from event to event within the same facility, making it difficult to determine where to place wheelchair seats during the design and construction phase. Their concern was that a failure by the venue owner or operator to provide a choice of ticket prices for wheelchair seating as required by the 1991 Standards governing new construction could somehow unfairly subject parties involved in the design and construction to liability unknowingly.

Sections 221.2.3.2 and 221.3 of the 2010 Standards require wheelchair spaces and companion seats to be vertically dispersed at varying distances from the screen, performance area, or playing field. The 2010 Standards, at section 221.2.3.2, also require wheelchair spaces and companion seats to be located in each balcony or mezzanine served by an accessible route. The final regulations at 28 CFR 35.151(g)(1) and 36.406(f)(1) also require assembly areas to locate wheelchair spaces and companion seats at all levels of the facility that include seating and that are served by an accessible route. The Department interprets that requirement to mean that wheelchair and companion seating must be provided in a particular area even if the accessible route may not be the same route that other individuals use to reach their seats. For example, if other patrons reach their seats on the field by an inaccessible route (e.g., by stairs), but there is an accessible route that complies with section 206.3 that could be connected to seats on the field, accessible seats must be placed on the field even if that route is not generally available to the public. The 2010 Standards, at section 221.2.3.2, provide an exception for vertical dispersion in assembly areas with 300 or fewer seats if the wheelchair spaces and companion seats provide viewing angles that are equivalent to, or better than, the average viewing angle provided in the facility.

Section 221.3 of the 2010 Standards requires wheelchair spaces and companion seats to be dispersed horizontally. In addition, 28 CFR 35.151(g)(2) and 36.406(f)(2) require assembly areas that have seating around the field of play or performance area to place wheelchair spaces and companion seating all around that field of play or performance area.

Stadium-Style Movie Theaters

Pursuant to 28 CFR 35.151(g) and 36.406(f), in addition to other obligations, stadium-style movie theaters must meet horizontal and vertical dispersion requirements set forth in sections 221.2.3.1 and 221.2.3.2 of the 2010 Standards; placement of wheelchair and companion seating must be on a riser or cross-aisle in the stadium section of the theater; and placement of such seating must satisfy at least one of the following criteria: (i) It is located within the rear sixty percent (60%) of the seats provided in the auditorium; or (ii) it is located within the area of the auditorium where the vertical viewing angles are between the 40th and 100th percentile of vertical viewing angles for all seats in that theater as ranked from the first row (1st percentile) to the back row (100th percentile). The line-of-sight requirements recognize the importance to the movie-going experience of viewing angles, and the final regulations ensure that movie patrons with disabilities are provided views of the movie screen comparable to other theater patrons. Some commenters supported regulatory language that would require stadium-style theaters to meet standards of accessibility equal

to those of non-stadium-style theaters, with larger theaters being required to provide accessible seating locations and viewing angles equal to those offered to individuals without disabilities.

One commenter noted that stadium-style movie theaters, sports arenas, music venues, theaters, and concert halls each pose unique conditions that require separate and specific standards to accommodate patrons with disabilities, and recommended that the Department provide more specific requirements for sports arenas, music venues, theaters, and concert halls. The Department has concluded that the 2010 Standards will provide sufficient flexibility to adapt to the wide variety of assembly venues covered.

Companion Seats. Section 4.33.3 of the 1991 Standards required at least one fixed companion seat to be provided next to each wheelchair space. The 2010 Standards at sections 221.3 and 802.3 permit companion seats to be movable. Several commenters urged the Department to ensure that companion seats are positioned in a manner that places the user at the same shoulder height as their companions using mobility devices. The Department recognizes that some facilities have created problems by locating the wheelchair space and companion seat on different floor elevations (often a difference of one riser height). Section 802.3.1 of the 2010 Standards addresses this problem by requiring the wheelchair space and the companion seat to be on the same floor elevation. This solution should prevent any vertical discrepancies that are not the direct result of differences in the sizes and configurations of wheelchairs.

Designated Aisle Seats. Section 4.1.3(19)(a) of the 1991 Standards requires one percent (1%) of fixed seats in assembly areas to be designated aisle seats with either no armrests or folding or retractable armrests on the aisle side of the seat. The 2010 Standards, at sections 221.4 and 802.4, base the number of required designated aisle seats on the total number of aisle seats, instead of on all of the seats in an assembly area as the 1991 Standards require. At least five percent (5%) of the aisle seats are required to be designated aisle seats and to be located closest to accessible routes. This option will almost always result in fewer aisle seats being designated aisle seats compared to the 1991 Standards. The Department is aware that sports facilities typically locate designated aisle seats on, or as near to, accessible routes as permitted by the configuration of the facility.

One commenter recommended that section 221.4, Designated Aisle Seats, be changed to require that aisle seats be on an accessible route, and be integrated and dispersed throughout an assembly area. Aisle seats, by their nature, typically are located within the general seating area, and integration occurs almost automatically. The issue of dispersing aisle seats or locating them on accessible routes is much more challenging. During the separate rulemaking on the 2004 ADAAG the Access Board specifically requested public comment on the question of whether aisle seats should be required to be located on accessible routes. After reviewing the comments submitted during the 2004 Access Board rulemaking, the Access Board concluded that this could not be done without making significant and costly changes in the design of most assembly areas. However, section 221.4 of the 2004 ADAAG required that designated aisle seats be the aisle seats closest to accessible routes. The Department proposed the same provision and concurs in the Access Board's conclusion and declines to implement further changes.

Team or Player Seating Areas. Section 221.2.1.4 of the 2010 Standards requires that at least one wheelchair space compliant with section 802.1 be provided in each team or player seating area serving areas of sport activity. For bowling lanes, the requirement for a wheelchair space in player seating areas is limited to lanes required to be accessible.

Lawn Seating. The 1991 Standards, at section 4.1.1(1), require all areas of newly constructed facilities to be accessible, but do not contain a specific scoping requirement for lawn seating in assembly areas. The 2010 Standards, at section 221.5, specifically require lawn seating areas and exterior overflow seating areas without fixed seats to connect to an accessible route.

Aisle Stairs and Ramps in Assembly Areas. Sections 4.1.3 and 4.1.3(4) of the 1991 Standards require that interior and exterior stairs connecting levels that are not connected by an elevator, ramp, or other accessible means of vertical access must comply with the technical requirements for stairs set out in section 4.9 of the 1991 Standards. Section 210.1 of the 2010 Standards requires that stairs that are part of a means of egress shall comply with section 504's technical requirements for stairs. The 1991 Standards do not contain any exceptions for aisle stairs in assembly areas. Section 210.1, Exception 3 of the 2010 Standards adds a new exception that exempts aisle stairs in assembly areas from section 504's technical requirements for stairs, including section 505's technical requirements for handrails.

Section 4.8.5 of the 1991 Standards exempts aisle ramps that are part of an accessible route from providing handrails on the side adjacent to seating. The 2010 Standards, at section 405.1, exempt aisle ramps adjacent to seating in assembly areas and not serving elements required to be on an accessible route, from complying with all of section 405's technical requirements for ramps. Where aisle ramps in assembly areas serve elements required to be on an accessible route, the 2010 Standards require that the

aisle ramps comply with section 405's technical requirements for ramps. Sections 505.2 and 505.3 of the 2010 Standards provide exceptions for aisle ramp handrails. Section 505.2 states that in assembly areas, a handrail may be provided at either side or within the aisle width when handrails are not provided on both sides of aisle ramps. Section 505.3 states that, in assembly areas, handrails need not be continuous in aisles serving seating.

222 and 803 Dressing, Fitting, and Locker Rooms

Dressing rooms, fitting rooms, and locker rooms are required to comply with the accessibility requirements of sections 222 and 803 of the 2010 Standards. Where these types of rooms are provided in clusters, five percent (5%) but at least one room in each cluster must comply. Some commenters stated that clothing and retail stores would have to expand and reconfigure accessible dressing, fitting and locker rooms to meet the changed provision for clear floor space alongside the end of the bench. Commenters explained that meeting the new requirement would result in a loss of sales and inventory space. Other commenters also expressed opposition to the changed requirement in locker rooms for similar reasons.

The Department reminds the commenters that the requirements in the 2010 Standards for the clear floor space to be beside the short axis of the bench in an accessible dressing, fitting, or locker room apply only to new construction and alterations. The requirements for alterations in the 2010 Standards at section 202.3 do not include the requirement from the 1991 Standards at section 4.1.6(1)(c) that if alterations to single elements, when considered together, amount to an alteration of a room or space in a building or facility, the entire space shall be made accessible. Therefore, under the 2010 Standards, the alteration requirements only apply to specific elements or spaces that are being altered. So providing the clear floor space at the end of the bench as required by the 2010 Standards instead of in front of the bench as is allowed by the 1991 Standards would only be required when the bench in the accessible dressing room is altered or when the entire dressing room area is altered.

224 and 806 Transient Lodging Guest Rooms

Scoping. The minimum number of guest rooms required to be accessible in transient lodging facilities is covered by section 224 of the 2010 Standards. Scoping requirements for guest rooms with mobility features and guest rooms with communication features are addressed at section 224.2 and section 224.4, respectively. Under the 1991 Standards all newly constructed guest rooms with mobility features must provide communication features. Under the 2010 Standards, in section 224.5, at least one guest room with mobility features must also provide communication features. Additionally, not more than ten percent (10%) of the guest rooms required to provide mobility features and also equipped with communication features can be used to satisfy the minimum number of guest rooms required to provide communication features.

Some commenters opposed requirements for guest rooms accessible to individuals with mobility disabilities stating that statistics provided by the industry demonstrate that all types of accessible guest rooms are unused. They further claimed that the requirements of the 2010 Standards are too burdensome to meet in new construction, and that the requirements will result in a loss of living space in places of transient lodging. Other commenters urged the Department to increase the number of guest rooms required to be accessible. The number of guest rooms accessible to individuals with mobility disabilities and the number accessible to persons who are deaf or who are hard of hearing in the 2010 Standards are consistent with the 1991 Standards and with the IBC. The Department continues to receive complaints about the lack of accessible guest rooms throughout the country. Accessible guest rooms are used not only by individuals using mobility devices such as wheelchairs and scooters, but also by individuals with other mobility disabilities including persons who use walkers, crutches, or canes.

Data provided by the Disability Statistics Center at the University of California, San Francisco demonstrated that the number of adults who use wheelchairs has been increasing at the rate of six percent (6%) per year from 1969 to 1999; and by 2010, it was projected that two percent (2%) of the adult population would use wheelchairs. In addition to persons who use wheelchairs, three percent (3%) of adults used crutches, canes, walkers, and other mobility devices in 1999; and the number was projected to increase to four percent (4%) by 2010. Thus, in 2010, up to six percent (6%) of the population may need accessible guest rooms.

Dispersion. The 2010 Standards, in section 224.5, set scoping requirements for dispersion in facilities covered by the transient lodging provisions. This section covers guest rooms with mobility features and guest rooms with communication features and applies in new construction and alterations. The primary requirement is to provide choices of types of guest rooms, number of beds, and other amenities comparable to the choices provided to other guests. An advisory in section 224.5 provides guidance that ''factors to be considered in providing an equivalent range of options may include, but are not limited to, room size, bed size, cost, view, bathroom fixtures such as hot tubs and spas, smoking

and nonsmoking, and the number of rooms provided.''

Commenters asked the Department to clarify what is meant by various terms used in section 224.5 such as ''classes,'' ''types,'' ''options,'' and ''amenities.'' Other commenters asked the Department to clarify and simplify the dispersion requirements set forth in section 224.5 of the 2010 Standards, in particular the scope of the term ''amenities.'' One commenter expressed concern that views, if considered an amenity, would further complicate room categories and force owners and operators to make an educated guess. Other commenters stated that views should only be a dispersion criteria if view is a factor for pricing room rates.

These terms are not to be considered terms of art, but should be used as in their normal course. For example, ''class'' is defined by Webster's Dictionary as ''a division by quality.'' ''Type'' is defined as ''a group of * * * things that share common traits or characteristics distinguishing them as an identifiable group or class.'' Accordingly, these terms are not intended to convey different concepts, but are used as synonyms. In the 2010 Standards, section 224.5 and its advisory require dispersion in such a varied range of hotels and lodging facilities that the Department believes that the chosen terms are appropriate to convey what is intended. Dispersion required by this section is not ''one size fits all'' and it is imperative that each covered entity consider its individual circumstance as it applies this requirement. For example, a facility would consider view as an amenity if some rooms faced mountains, a beach, a lake, or other scenery that was considered to be a premium. A facility where view was not marketed or requested by guests would not factor the view as an amenity for purposes of meeting the dispersion requirement.

Section 224.5 of the 2010 Standards requires that guest rooms with mobility features and guest rooms with communication features ''shall be dispersed among the various classes of guest rooms, and shall provide choices of types of guest rooms, number of beds, and other amenities comparable to the choices provided to other guests. When the minimum number of guest rooms required is not sufficient to allow for complete dispersion, guest rooms shall be dispersed in the following priority: guest room type, number of beds and amenities.''

This general dispersion requirement is intended to effectuate Congress' directive that a percentage of each class of hotel rooms is to be fully accessible to persons with disabilities. See H.R. Rep. No. 101–485 (II) at 391. Accordingly, the promise of the ADA in this instance is that persons with disabilities will have an equal opportunity to benefit from the various options available to hotel guests without disabilities, from single occupancy guest rooms with limited features (and accompanying limited price tags) to luxury suites with lavish features and choices. The inclusion of section 224.5 of the 2010 Standards is not new. Substantially similar language is contained in section 9.1.4 of the 1991 Standards.

Commenters raised concerns that the factors included in the advisory to section 224.5 of the 2010 Standards have been expanded. The advisory provides: ''[f]actors to be considered in providing an equivalent range of options may include, but are not limited to, room size, bed size, cost, view, bathroom fixtures such as hot tubs and spas, smoking and nonsmoking, and the number of rooms provided.''

As previously discussed, the advisory materials provided in the 2010 Standards are meant to be illustrative and do not set out specific requirements. In this particular instance, the advisory materials for section 224.5 set out some of the common types of amenities found at transient lodging facilities, and include common sense concepts such as view, bathroom fixtures, and smoking status. The intention of these factors is to indicate to the hospitality industry the sorts of considerations that the Department, in its enforcement efforts since the enactment of the ADA, has considered as amenities that should be made available to persons with disabilities, just as they are made available to guests without disabilities.

Commenters offered several suggestions for addressing dispersion. One option included the flexibility to use an equivalent facilitation option similar to that provided in section 9.1.4(2) of the 1991 Standards.

The 2010 Standards eliminated all specific references to equivalent facilitation. Since Congress made it clear that each class of hotel room is to be available to individuals with disabilities, the Department declines to adopt such a specific limitation in favor of the specific requirement for new construction and alterations found in section 224.5 of the 2010 Standards.

In considering the comments of the hospitality industry from the ANPRM and the Department's enforcement efforts in this area, the Department sought comment in the NPRM on whether the dispersion requirements should be applied proportionally, or whether the requirements of section 224.5 of the 2010 Standards would be complied with if access to at least one guest room of each type were to be provided.

One commenter expressed concern about requiring different guest room types to be proportionally represented in the accessible guest room pool as opposed to just having each type represented. Some commenters also expressed concern about accessible guest rooms created in pre-1993 facilities and they requested that such accessible guest rooms be safe harbored just as they are safe

harbored under the 1991 Standards. In addition, one commenter requested that the proposed dispersion requirements in section 224.5 of the 2010 Standards not be applied to pre-1993 facilities even when they are altered. Some commenters also offered a suggestion for limitations to the dispersion requirements as an alternative to safe harboring pre-1993 facilities. The suggestion included: (1) Guest rooms' interior or exterior footprints may remain unchanged in order to meet the dispersion requirements; (2) Dispersion should only be required among the types of rooms affected by an alteration; and (3) Subject to (1) and (2) above and technical feasibility, a facility would need to provide only one guest room in each guest room type such as single, double and suites. One commenter requested an exception to the dispersion criteria that applies to both existing and new multi-story timeshare facilities. This requested exception waives dispersion based on views to the extent that up to eight units may be vertically stacked in a single location.

Section 224.1.1 of the 2010 Standards sets scoping requirements for alterations to transient lodging guest rooms. The advisory to section 224.1.1 further explains that compliance with 224.5 is more likely to be achieved if all of the accessible guest rooms are not provided in the same area of the facility, when accessible guest rooms are added as a result of subsequent alterations.

Some commenters requested a specific exemption for small hotels of 300 or fewer guest rooms from dispersion regarding smoking rooms. The ADA requires that individuals with disabilities be provided with the same range of options as persons without disabilities, and, therefore, the Department declines to add such an exemption. It is noted, however, that the existence of this language in the advisory does not require a place of transient lodging that does not offer smoking guest rooms at its facility to do so only for individuals with disabilities.

Guest Rooms with Mobility Features. Scoping provisions for guest rooms with mobility features are provided in section 224.2 of the 2010 Standards. Scoping requirements for alterations are included in 224.1.1. These scoping requirements in the 2010 Standards are consistent with the 1991 Standards.

One commenter expressed opposition to the new scoping provisions for altered guest rooms, which, according to the commenter, require greater numbers of accessible guest rooms with mobility features.

Section 224.1.1 of the 2010 Standards provides scoping requirements for alterations to guest rooms in existing facilities. Section 224.1.1 modifies the scoping requirements for new construction in section 224 by limiting the application of section 224 requirements only to those guest rooms being altered or added until the number of such accessible guest rooms complies with the minimum number required for new construction in section 224.2 of the 2010 Standards. The minimum required number of accessible guest rooms is based on the total number of guest rooms altered or added instead of the total number of guest rooms provided. These requirements are consistent with the requirements in the 1991 Standards. Language in the 2010 Standards clarifies the provision of section 104.2 of the 2010 Standards which requires rounding up values to the next whole number for calculations of percentages in scoping.

Guest Rooms with Communication Features. The revisions at section 224.4 of the 2010 Standards effect no substantive change from the 1991 Standards with respect to the number of guest rooms required to provide communication features. The scoping requirement is consolidated into a single table, instead of appearing in three sections as in the 1991 Standards. The revised provisions also limit the overlap between guest rooms required to provide mobility features and guest rooms required to provide communication features. Section 224.5 of the 2010 Standards requires that at least one guest room providing mobility features must also provide communications features. At least one, but not more than ten percent (10%), of the guest rooms required to provide mobility features can also satisfy the minimum number of guest rooms required to provide communication features.

Commenters suggested that the requirements for scoping and dispersion of guest rooms for persons with mobility impairments and guest rooms with communication features are too complex for the industry to effectively implement.

The Department believes the requirements for guest rooms with communications features in the 2010 Standards clarify the requirements necessary to provide equal opportunity for travelers with disabilities. Additional technical assistance will be made available to address questions before the rule goes into effect.

Visible Alarms in Guest Rooms with Communication Features. The 1991 Standards at sections 9.3.1 and 4.28.4 require transient lodging guest rooms with communication features to provide either permanently installed visible alarms that are connected to the building fire alarm system or portable visible alarms that are connected to a standard 110-volt electrical outlet and are both activated by the building fire alarm system and provide a visible alarm when the single station smoke detector is activated. Section 215.4 of the 2010 Standards no longer includes the portable visible alarm option and instead requires that transient lodging guest rooms with communication features be equipped with a fire alarm system which includes permanently installed audible and visible

alarms in accordance with NFPA 72 National Fire Alarm Code (1999 or 2002 edition). Such guest rooms with communication features are also required by section 806.3.2 of the 2010 Standards to be equipped with visible notification devices that alert room occupants of incoming telephone calls and a door knock or bell.

The 2010 Standards add a new exception for alterations to existing facilities that exempts existing fire alarm systems from providing visible alarms, unless the fire alarm system itself is upgraded or replaced, or a new fire alarm system is installed. Transient lodging facilities that alter guest rooms are not required to provide permanently installed visible alarms complying with the NFPA 72 if the existing fire alarm system has not been upgraded or replaced, or a new fire alarm system has not been installed.

Commenters representing small providers of transient lodging raised concerns about the proposed changes to prohibit the use of portable visible alarms used in transient lodging guest rooms. These commenters recommended retaining requirements that allow the use of portable visible alarms.

Persons who are deaf or hard of hearing have reported that portable visible alarms used in transient lodging guest rooms are deficient because the alarms are not activated by the building fire alarm system, and the alarms do not work when the building power source goes out in emergencies. The 2010 Standards are consistent with the model building, fire, and life safety codes as applied to newly constructed transient lodging facilities. One commenter sought confirmation of its understanding of visible alarm requirements from the Department. This commenter interpreted the exception to section 215.1 of the 2010 Standards and the Department's commentary to the NPRM to mean that if a transient lodging facility does not have permanently installed visible alarms in its communication accessible guest rooms, it will not be required to provide such alarms until such time that its fire alarm system is upgraded or replaced, or a new fire alarm system is installed. In addition, this commenter also understood that, if a hotel already has permanently installed visible alarms in all of its mobility accessible guest rooms, it would not have to relocate such visible alarms and other communication features in those rooms to other guest rooms to comply with the ten percent (10%) overlap requirement until the alarm system is upgraded or replaced.

This commenter's interpretation and understanding are consistent with the Department's position in this matter. Section 215.4 of the 2010 Standards requires that guest rooms required to have communication features be equipped with a fire alarm system complying with section 702. Communication accessible guest rooms are required to have all of the communication features described in section 806.3 of the 2010 Standards including a fire alarm system which provides both audible and visible alarms. The exception to section 215.1 of the 2010 Standards, which applies only to fire alarm requirements for guest rooms with communication features in existing facilities, exempts the visible alarm requirement until such time as the existing fire alarm system is upgraded or replaced, or a new fire alarm system is installed. If guest rooms in existing facilities are altered and they are required by section 224 of the 2010 Standards to have communication features, such guest rooms are required by section 806.3 to have all other communication features including notification devices.

Vanity Counter Space. Section 806.2.4.1 of the 2010 Standards requires that if vanity countertop space is provided in inaccessible transient lodging guest bathrooms, comparable vanity space must be provided in accessible transient lodging guest bathrooms.

A commenter questioned whether in existing facilities vanity countertop space may be provided through the addition of a shelf. Another commenter found the term ''comparable'' vague and expressed concern about confusion the new requirement would cause. This commenter suggested that the phrase ''equal area in square inches'' be used instead of comparable vanity space.

In some circumstances, the addition of a shelf in an existing facility may be a reasonable way to provide a space for travelers with disabilities to use their toiletries and other personal items. However, this is a determination that must be made on a case-by-case basis. Comparable vanity countertop space need not be one continuous surface and need not be exactly the same size as the countertops in comparable guest bathrooms. For example, accessible shelving within reach of the lavatory could be stacked to provide usable surfaces for toiletries and other personal items.

Shower and Sauna Doors in Transient Lodging Facilities. Section 9.4 of the 1991 Standards and section 206.5.3 of the 2010 Standards both require passage doors in transient lodging guest rooms that do not provide mobility features to provide at least 32 inches of clear width. Congress directed this requirement to be included so that individuals with disabilities could visit guests in other rooms. See H. Rept. 101–485, pt. 2, at 118 (1990); S. Rept. 101–116, at 70 (1989). Section 224.1.2 of the 2010 Standards adds a new exception to clarify that shower and sauna doors in such inaccessible guest rooms are exempt from the requirement for passage doors to provide at least 32 inches of clear width. Two commenters requested that saunas and steam rooms in existing facilities be exempt from the section 224.1.2 requirement and that the requirement be made applicable to new construction only.

The exemption to the section 224.1.2 requirement for a 32-inch wide clearance at doors to shower and saunas applies only to those showers and saunas in guest rooms which are not required to have mobility features. Showers and saunas in other locations, including those in common use areas and guest rooms with mobility features, are required to comply with the 32-inch clear width standard as well as other applicable accessibility standards. Saunas come in a variety of types: portable, pre-built, pre-cut, and custom-made. All saunas except for custom-made saunas are made to manufacturers' standard dimensions. The Department is aware that creating the required 32-inch clearance at existing narrower doorways may not always be technically feasible. However, the Department believes that owners and operators will have an opportunity to provide the required doorway clearance, unless doing so is technically infeasible, when an alteration to an existing sauna is undertaken. Therefore, the Department has retained these requirements.

Platform Lifts in Transient Lodging Guest Rooms and Dwelling Units. The 1991 Standards, at section 4.1.3(5), exception 4, and the 2010 Standards, at sections 206.7 and 206.7.6, both limit the locations where platform lifts are permitted to be used as part of an accessible route. The 2010 Standards add a new scoping requirement that permits platform lifts to be used to connect levels within transient lodging guest rooms and dwelling units with mobility features.

806 Transient Lodging Guest Rooms

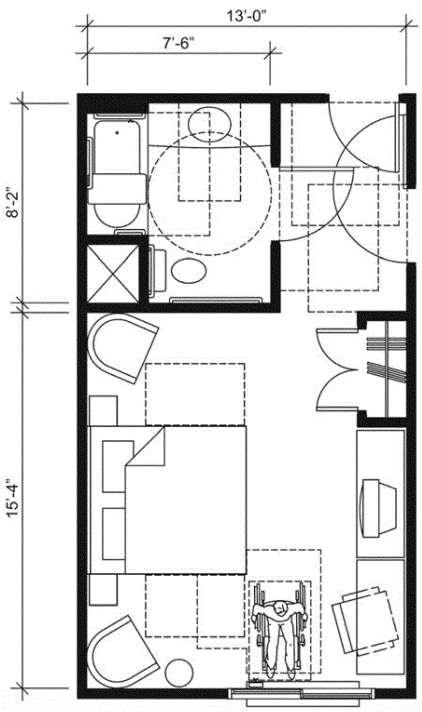
In the NPRM, the Department included floor plans showing examples of accessible guest rooms and bathrooms designs with mobility features to illustrate how compliance with the 2010 Standards could be accomplished with little or no additional space compared to designs that comply with the 1991 Standards.

Commenters noted that the Department's plans showing accessible transient lodging guest rooms compliant with the 2010 Standards were not common in the transient lodging industry and also noted that the plans omitted doors at sleeping room closets.

The Department agrees that the configuration of the accessible bathrooms is somewhat different from past designs used by the industry, but this was done to meet the requirements of the 2010 Standards. The plans were provided to show that, with some redesign, the 2010 Standards do not normally increase the square footage of an accessible sleeping room or bathroom with mobility features in new construction. The Department has also modified several accessible guest room plans to show that doors can be installed on closets and comply with the 2010 Standards.

A commenter stated that the Department's drawings suggest that the fan coil units for heat and air conditioning are overhead, while the typical sleeping room usually has a vertical unit, or a packaged terminal air conditioning unit within the room. The Department's drawings are sample plans, showing the layout of the space, relationship of elements to each other, and required clear floor and turning spaces. It was not the intent of the Department to provide precise locations for all elements, including heating and air conditioning units.

Commenters noted that in guest rooms with two beds, each bed was positioned close to a wall, reducing access on one side. Another commenter stated that additional housekeeping time is needed to clean the room when beds are placed closer to walls. The 2010 Standards require that, when two beds are provided, there must be at least 36 inches of clear space between the beds. The plans provided in the NPRM showed two bed arrangements with adequate clear width complying with the 1991 Standards and the 2010 Standards. Additional space can be provided on the other side of the beds to facilitate housekeeping as long as the clear floor space between beds is at least 36 inches wide.



Commenters stated that chases in sleeping room bathrooms that route plumbing and other utilities can present challenges when modifying existing facilities. In multi-story facilities, relocating or re-routing these elements may not be possible, limiting options for providing access. The Department recognizes that relocating mechanical chases in multi-story facilities may be difficult or impossible to accomplish. While these issues do not exist in new facilities, altered existing facilities must comply with the 2010 Standards to the extent that it is technically feasible to do so. When an alteration cannot fully comply because it is technically infeasible to do so, the alteration must still be designed to comply to the greatest extent feasible.

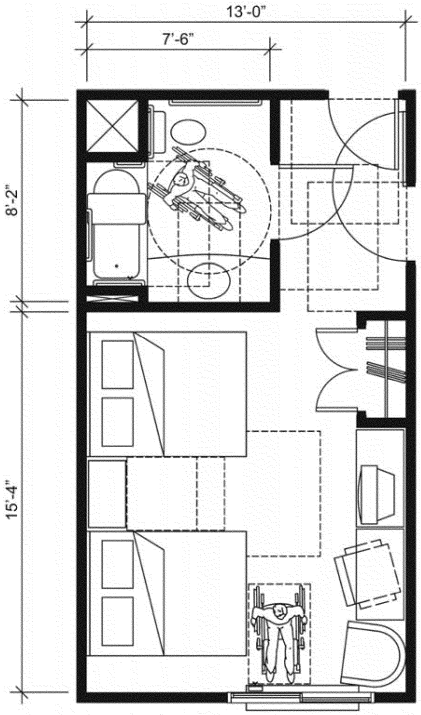
Commenters noted that on some of the Department's plans where a vanity is located adjacent to a bathtub, the vanity may require more maintenance due to exposure to water. The Department agrees that it would be advisable that items placed next to a bathtub or shower be made of materials that are not susceptible to water damage.

Transient Lodging Guest Room Floor Plans and Related Text. The Department has included the following floor plans showing application of the requirements of the 2010 Standards without significant loss of guest room living space in transient lodging compared to the 1991 Standards.

Plan 1A: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a standard bathtub with a seat, comparable vanity, clothes closet with swinging doors, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Bathtub with a lavatory at the control end (section 607.2);
- Removable bathtub seat (section 607.3);
- Clearance in front of the bathtub extends its full length and is 30 inches wide min. (section 607.2);
- Recessed bathtub location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

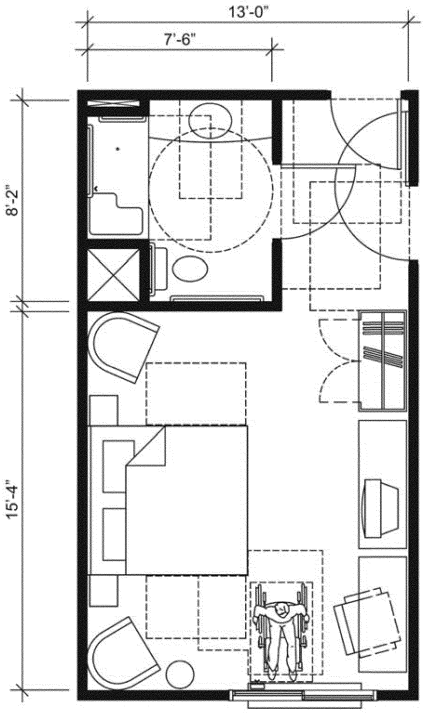
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 1B: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a standard bathtub with a seat, comparable vanity, clothes closet with swinging doors, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Bathtub with a lavatory at the control end (section 607.2);
- Removable bathtub seat (section 607.3);
- Clearance in front of the bathtub extends its full length and is 30 inches wide min. (section 607.2);
- Recessed bathtub location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3);

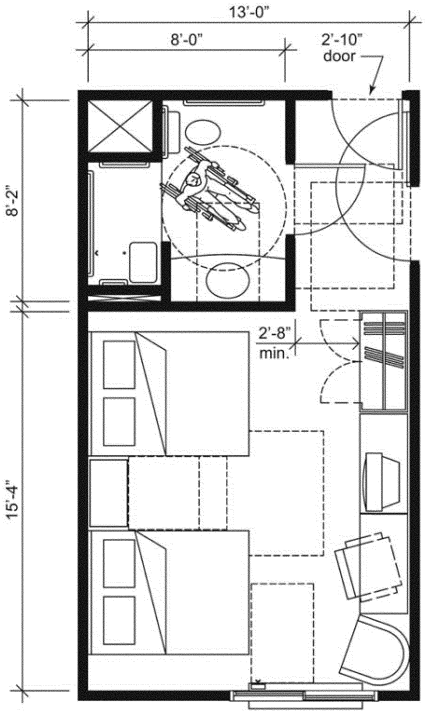
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 2A: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a standard roll-in shower with a seat, comparable vanity, wardrobe, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Standard roll-in type shower with folding seat (section 608.2.2);
- Recessed roll-in shower location permits shorter rear grab bar at water closet (section 604.5.2);
- Clear floor space adjacent to shower min. 30 inches wide by 60 inches long (section 608.2.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

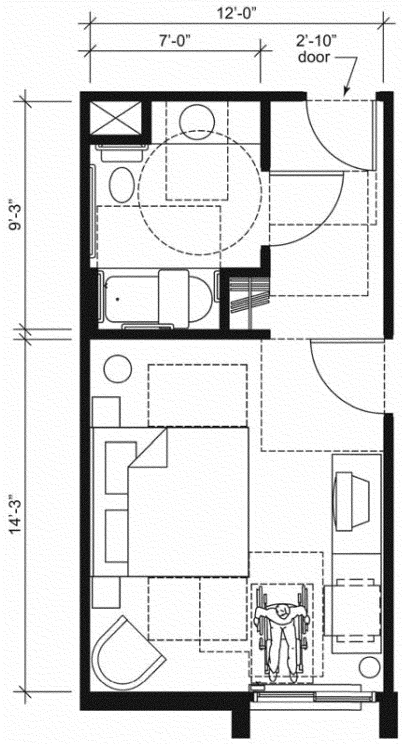
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 2B: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include an alternate roll-in shower with a seat, comparable vanity, wardrobe, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Alternate roll-in type shower with folding seat is 36 inches deep and 60 inches wide (section 608.2.3);
- Alternate roll-in shower has a 36-inch wide entry at one end of the long side of the compartment (section 608.2.3);
- Recessed alternate roll-in shower location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

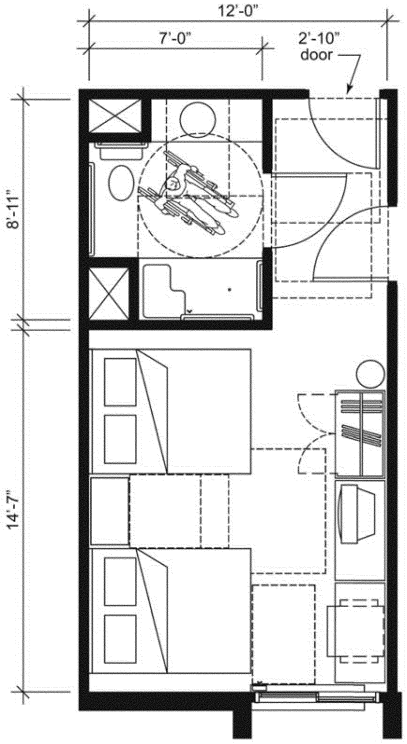
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 3A: 12-Foot Wide Accessible Guest Room

This drawing shows an accessible 12-foot wide guest room with features that comply with the 2010 Standards. Features include a bathtub with a seat, comparable vanity, open clothes closet, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Bathtub (section 607.2);
- Removable bathtub seat (section 607.3);
- Clearance in front of the bathtub extends its full length and is 30 inches wide min. (section 607.2);
- Recessed lavatory with vanity countertop permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

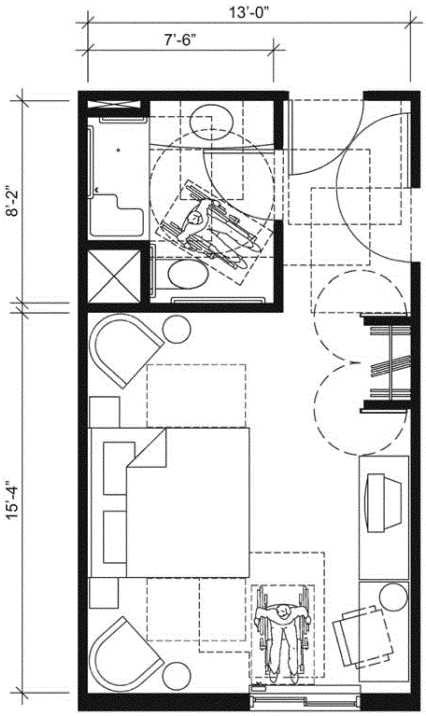
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 3B: 12-Foot Wide Accessible Guest Room

This drawing shows an accessible 12-foot wide guest room with features that comply with the 2010 Standards. Features include a standard roll-in shower with a seat, comparable vanity, wardrobe, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Standard roll-in type shower with folding seat (section 608.2.2);
- Recessed lavatory with vanity counter top permits shorter rear grab bar at water closet (section 604.5.2);
- Clear floor space adjacent to shower min. 30 inches wide by 60 inches long (section 608.2.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

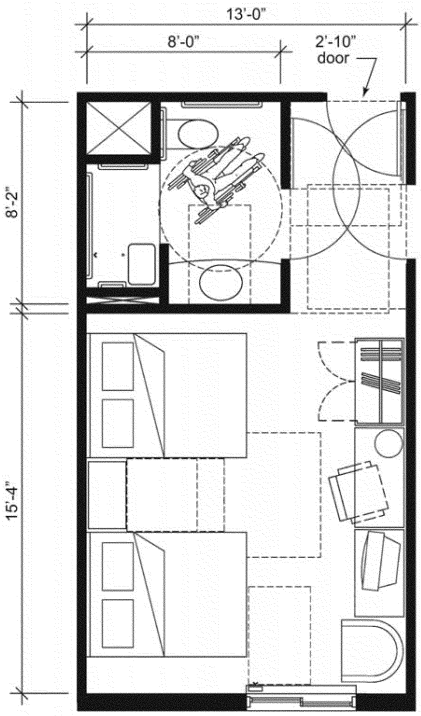
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 4A: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a standard roll-in shower with a seat, comparable vanity, clothes closet with swinging doors, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Standard roll-in type shower with folding seat (section 608.2.2);
- Clear floor space adjacent to shower min. 30 inches wide by 60 inches long (section 608.2.2);
- Recessed roll-in shower location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).
- 30-inch wide by 48-inch long minimum clear floor space provided beyond the arc of the swing of the entry door (section 603.2.3 exception 2).

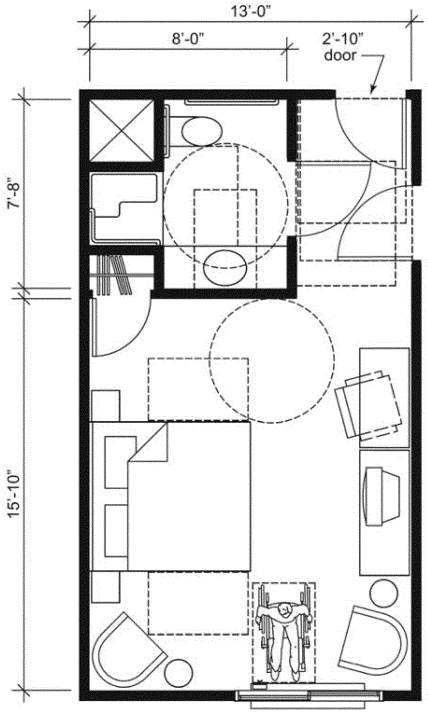
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 4B: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include an alternate roll-in shower with a seat, comparable vanity, wardrobe, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Alternate roll-in type shower with folding seat is 36 inches deep and 60 inches wide (section 608.2.3);
- Alternate roll-in shower has a 36-inch wide entry at one end of the long end of the compartment (section 608.2.3);
- Recessed alternate roll-in shower location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Turning space includes knee and toe clearance at lavatory (section 304.3);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

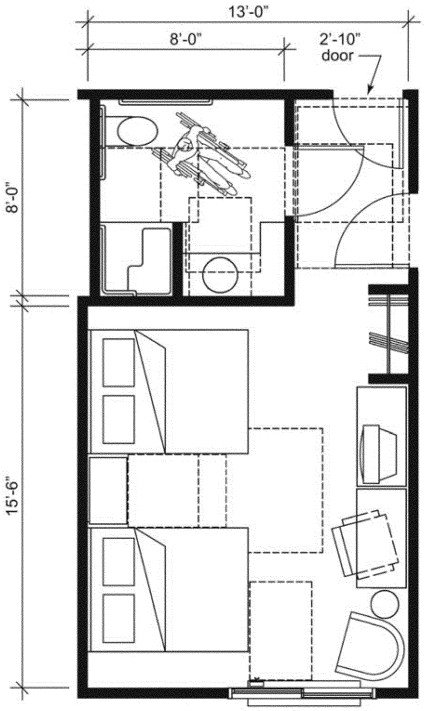
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 309); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 5A: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a transfer shower, comparable vanity, clothes closet with swinging door, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Transfer shower (section 603.2);
- Shower seat (section 610.3);
- Clearance in front of the shower extends beyond the seat and is 36 inches wide min. (section 607.2);
- Recessed transfer shower location permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

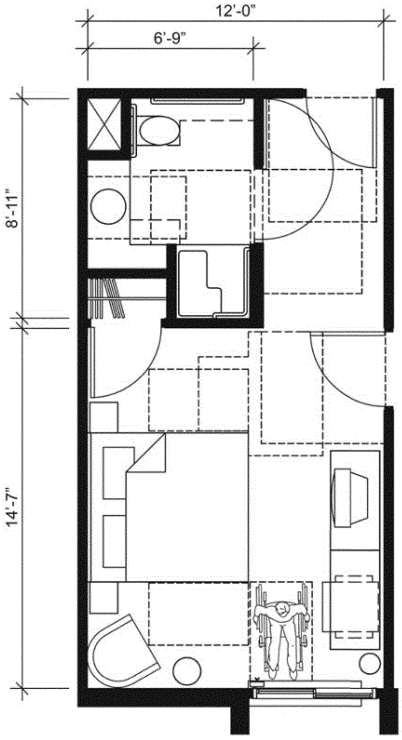
The following accessible features are provided in the living area:

- Circular turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 229); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 5B: 13-Foot Wide Accessible Guest Room

This drawing shows an accessible 13-foot wide guest room with features that comply with the 2010 Standards. Features include a transfer shower, comparable vanity, open clothes closet, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Transfer shower (section 603.2);
- Shower seat (section 610.3);
- Clearance in front of the shower extends beyond the seat and is 36 inches wide min. (section 607.2);
- Lavatory with vanity counter top recessed to permit shorter rear grab bar at water closet (section 604.5.2);
- T-shaped turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16-18 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

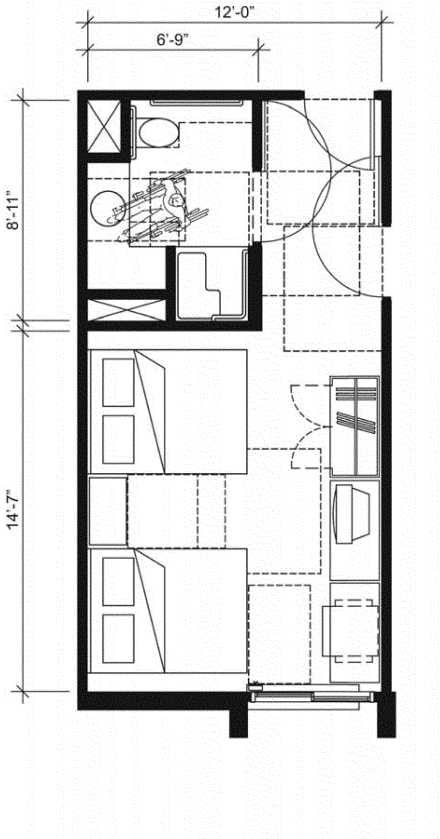
The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 229); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 6A: 12-Foot Wide Accessible Guest Room

This drawing shows an accessible 12-foot wide guest room with features that comply with the 2010 Standards. Features include a transfer shower, water closet length (rim to rear wall) 24 inches maximum, comparable vanity, clothes closet with swinging door, and door connecting to adjacent guest room. Furnishings include a king bed and additional seating.

The following accessible features are provided in the bathroom:



- Comparable vanity counter top space (section 806);
- Transfer shower (section 603.2);
- Shower seat (section 610.3);
- Clearance in front of the shower extends beyond the seat and is 36 inches wide min. (section 607.2);
- Recessed lavatory with vanity counter top permits shorter rear grab bar at water closet (section 604.5.2);
- T-shaped turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

The following accessible features are provided in the living area:

- T-shaped turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space on both sides of the bed (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 229); and
- Accessible controls for the heat and air conditioning (section 309).

Plan 6B: 12-Foot Wide Accessible Guest Room

This drawing shows an accessible 12-foot wide guest room with features that comply with the 2010 Standards. Features include a transfer shower, water closet length (rim to rear wall) 24 inches maximum, comparable vanity, wardrobe, and door connecting to adjacent guest room. Furnishings include two beds.

The following accessible features are provided in the bathroom:

- Comparable vanity counter top space (section 806);
- Transfer shower (section 603.2);
- Shower seat (section 610.3);
- Clearance in front of the shower extends beyond the seat and is 36 inches wide min. (section 607.2);
- Recessed lavatory with vanity counter top permits shorter rear grab bar at water closet (section 604.5.2);
- Circular turning space in room (section 603.2.1);
- Required clear floor spaces at fixtures and turning space overlap (section 603.2.2);
- Water closet clearance is 60 inches at back wall and 56 inches deep (section 604.3);
- Centerline of the water closet at 16 inches from side wall (section 604.2); and
- No other fixtures or obstructions located within required water closet clearance (section 604.3).

The following accessible features are provided in the living area:

- Circular turning space (section 304.3.2);
- Accessible route (section 402);
- Clear floor space between beds (section 806.2.3);
- Maneuvering clearances at all doors (section 404.2);
- Accessible operable window (section 229); and
- Accessible controls for the heat and air conditioning (section 309).

225 and 811 Storage

Section 225 of the 2010 Standards provides that where storage is provided in accessible spaces, at least one of each type shall comply with the 2010 Standards. Self-service shelving is required to be on an accessible route, but is not required to comply with the reach range requirements. These requirements are consistent with the 1991 Standards.

Section 225.3 adds a new scoping requirement for self-storage facilities. Facilities with 200 or fewer storage spaces will be required to make at least five percent (5%) of the storage spaces accessible. Facilities with more than 200 storage spaces will be required to provide ten accessible storage spaces, plus two percent (2%) of the total storage spaces over 200.

Sections 225.2.1 and 811 of the 2010 Standards require lockers to meet accessibility requirements. Where lockers are provided in clusters, five percent (5%) but at least one locker in each cluster will have to comply. Under the 1991 Standards, only one locker of each type provided must be accessible.

Commenters recommended that the Department adopt language requiring public accommodations to provide access to all self-service shelves and display areas available to

customers. Other commenters opposed this requirement as too burdensome to retail and other entities and claimed that significant revenue would be lost if this requirement were to be implemented.

Other commenters raised concerns that section 225.2.2 of the 2010 Standards scopes only self-service shelving whereas section 4.1.3(12)(b) of the 1991 Standards applies to both ''shelves or display units.''

Although ''display units'' were not included in the 2010 Standards under the belief that displays are not to be touched and therefore by definition cannot be ''self-service,'' both the 2010 Standards and the 1991 Standards should be read broadly to apply to all types of shelves, racks, hooks, and similar self-service merchandising fittings, including self-service display units. Such fixtures are permitted to be installed above or below the reach ranges possible for many persons with disabilities so that space available for merchandising is used as efficiently as possible.

226 and 902 Dining Surfaces and Work Surfaces

Section 226.1 of the 2010 Standards require that where dining surfaces are provided for the consumption of food or drink, at least five percent (5%) of the seating spaces and standing spaces at the dining surfaces comply with section 902. Section 902.2 requires the provision of accessible knee and toe clearance.

Commenters stated that basing accessible seating on seating spaces and standing spaces potentially represents a significant increase in scoping, particularly given the ambiguity in what represents a ''standing space'' and urged a return to the 1991 Standard of requiring accessible seating based on fixed dining tables. The scoping change merely takes into account that tables may vary in size so that basing the calculation on the number of tables rather than on the number of individuals that may be accommodated by the tables could unnecessarily restrict opportunities for persons with disabilities. The revised scoping permits greater flexibility by allowing designers to disperse accessible seating and standing spaces throughout the dining area. Human factors data, which is readily available to designers, provides information about the amount of space required for both eating and drinking while seated or standing.

227 and 904 Sales and Service

Check-Out Aisles and Sales and Service Counters. The 1991 Standards, at section 7.2, and the 2010 Standards, at section 904.4, contain technical requirements for sales and service counters. The 1991 Standards generally require sales and service counters to provide an accessible portion at least 36 inches long and no higher than 36 inches above the finish floor. The nondiscrimination requirements of the ADA regulations require the level of service provided at the accessible portion of any sales and service counter to be the same as the level of service provided at the inaccessible portions of the counter.

The 2010 Standards specify different lengths for the accessible portion of sales and service counters based on the type of approach provided. Where a forward approach is provided, the accessible portion of the counter must be at least 30 inches long and no higher than 36 inches, and knee and toe space must be provided under the counter. The requirement that knee and toe space be provided where only clear floor space for a forward approach to a sales and service counter is provided is not a new requirement. It is a clarification of the ongoing requirement that part of the sales and service counter be accessible. This requirement applies to the entire accessible part of sales and service counters and requires that the accessible clear floor or ground space adjacent to those counters be kept clear of merchandise, equipment, and other items so that the accessible part of the counter is readily accessible to and usable by individuals with disabilities. The accessible part of the counter must also be staffed and provide an equivalent level of service as that provided to all customers.

Where clear floor space for a parallel approach is provided, the accessible portion of the counter must be at least 36 inches long and no higher than 36 inches above the finish floor. A clear floor or ground space that is at least 48 inches long × 30 inches wide must be provided positioned for a parallel approach adjacent to the 36-inch minimum length of counter.

Section 904.4 of the 2010 Standards includes an exception for alterations to sales and service counters in existing facilities. It permits the accessible portion of the counter to be at least 24 inches long, where providing a longer accessible counter will result in a reduction in the number of existing counters at work stations or existing mailboxes, provided that the required clear floor or ground space is centered on the accessible length of the counter.

Section 904.4 of the 2010 Standards also clarifies that the accessible portion of the counter must extend the same depth as the sales or service counter top. Where the counter is a single-height counter, this requirement applies across the entire depth of the counter top. Where the counter is a split-height counter, this requirement applies only to the customer side of the counter top. The employee-side of the counter top may be higher or lower than the customer-side of the counter top.

Commenters recommended that the Department consider a regulatory alternative exempting small retailers from the new knee and toe clearance requirement and retaining existing wheelchair accessibility standards for sales and service counters. These commenters believed that the knee and toe clearance requirements will cause a reduction in the sales and inventory space at check-out aisles and other sales and service counters.

Both the 1991 and the 2010 Standards permit covered entities to determine whether they will provide a forward or a parallel approach to sales and service counters. So any facility that does not wish to provide the knee or toe clearance required for a front approach to such a counter may avoid that option. However, the Department believes that permitting a forward approach without requiring knee and toe clearance is not adequate to provide accessibility because the person using a wheelchair will be prevented from coming close enough to the counter to see the merchandise or to transact business with a degree of convenience that is comparable to that provided to other customers.

A parallel approach to sales and service counters also can provide the accessibility required by the 2010 Standards. Individuals using wheelchairs can approach sales and service counters from the side, and, assuming the necessary elements, features, or merchandise necessary to complete a business transaction are within the reach range requirements for a side approach, the needs of individuals with disabilities can be met effectively.

Section 227 of the 2010 Standards clarifies the requirements for food service lines. Queues and waiting lines serving counters or check-out aisles, including those for food service, must be accessible to individuals with disabilities.

229 Windows

A new requirement at section 229.1 of the 2010 Standards provides that if operable windows are provided for building users, then at least one window in an accessible space must be equipped with controls that comply with section 309.

Commenters generally supported this provision but some commenters asked whether the maximum five-pounds (5 lbs.) of force requirement of section 309 applies to the window latch itself or only to the force required to open the window. Section 309 applies to all controls and operating mechanisms, so the latch must comply with the requirement to operate with no more than five pounds of force (5 lbf).

230 and 708 Two-Way Communication Systems

New provisions of the 2010 Standards at sections 230.1 and 708 require two-way communications systems to be equipped with visible as well as audible signals.

231 and 808 Judicial Facilities and Courtrooms

Section 231 of the 2010 Standards adds requirements for accessible courtrooms, holding cells, and visiting areas.

Accessible Courtroom Stations. Sections 231.2, 808, 304, 305, and 902 of the 2010 Standards provide increased accessibility at courtroom stations. Clear floor space for a forward approach is required for all courtroom stations (judges' benches, clerks' stations, bailiffs' stations, deputy clerks' stations, court reporters' stations, and litigants' and counsel stations). Other applicable specifications include accessible work surface heights and toe and knee clearance.

Accessible Jury Boxes, Attorney Areas, and Witness Stands. Section 206.2.4 of the 2010 Standards requires, in new construction and alterations, at least one accessible route to connect accessible building or facility entrances with all accessible spaces and elements within the building or facility that are connected by a circulation path unless they are exempted by Exceptions 1–7 of section 206.2.3. Advisory 206.2.4 Spaces and Elements Exception 1 explains that the exception allowing raised courtroom stations to be used by court employees, such as judge's benches, to be adaptable does not apply to areas of the courtroom likely to be used by members of the public such as jury areas, attorney areas, or witness stands. These areas must be on an accessible route at the time of initial construction or alteration.

Raised Courtroom Stations Not for Members of the Public. Section 206.2.4, Exception 1 of the 2010 Standards provides that raised courtroom stations that are used by judges, clerks, bailiffs, and court reporters will not have to provide full vertical access when first constructed or altered if they are constructed to be easily adaptable to provide vertical accessibility.

One commenter suggested that a sufficient number of accessible benches for judges with disabilities, in addition to requiring accessible witness stands and attorney areas, be required. The Department believes that the requirements regarding raised benches for judges are easily adaptable to provide vertical access in the event a judge requires an accessible bench. Section 206.2.4 of the 2010 Standards provides that raised courtroom stations used by judges and other judicial staff do not have to provide full vertical access when first constructed or altered as long as the required clear floor space, maneuvering space, and electrical service,

where appropriate, is provided at the time of new construction or can be achieved without substantial reconstruction during alterations.

A commenter asserted that there is nothing inherent in clerks' stations, jury boxes, and witness stands that require them to be raised. While it would, of course, be easiest to provide access by eliminating height differences among courtroom elements, the Department recognizes that accessibility is only one factor that must be considered in the design process of a functioning courtroom. The need to ensure the ability of the judge to maintain order, the need to ensure sight lines among the judge, the witness, the jury, and other participants, and the need to maintain the security of the participants all affect the design of the space. The Department believes that the 2010 Standards have been drafted in a way that will achieve accessibility without unduly constraining the ability of a designer to address the other considerations that are unique to courtrooms.

Commenters argued that permitting courtroom stations to be adaptable rather than fully accessible at the time of new construction likely will lead to discrimination in hiring of clerks, court reporters, and other court staff. The Department believes that the provisions will facilitate, not hinder, the hiring of court personnel who have disabilities. All courtroom work stations will be on accessible routes and will be required to have all fixed elements designed in compliance with the 2010 Standards. Elevated work stations for court employees may be designed to add vertical access as needed. Since the original design must provide the proper space and electrical wiring to install vertical access, the change should be easily accomplished.

232 Detention Facilities and Correctional Facilities

Section 232 of the 2010 Standards establishes requirements for the design and construction of cells, medical care facilities, and visiting areas in detention facilities and in correctional facilities. Section 35.151(k) of the Department's title II rule provides scoping for newly constructed general holding cells and general housing cells requiring mobility features compliant with section 807.2 of the 2010 Standards in a minimum of three percent (3%) of cells, but no fewer than one cell. Section 232.2 of the 2010 Standards provides scoping for newly constructed cells with communications features requiring a minimum of two percent (2%) of cells, but at least one cell, to have communication features.

The Department's title II rule at §35.151(k) also specifies scoping for alterations to detention and correctional facilities. Generally a minimum of three percent (3%), but no fewer than one, of the total number of altered cells must comply with section 807.2 of the 2010 Standards and be provided within each facility. Altered cells with mobility features must be provided in each classification level, including administrative and disciplinary segregation, each use and service area, and special program. The Department notes that the three percent (3%), but no fewer than one, requirement is a minimum. As corrections systems plan for new facilities or alterations, the Department urges planners to include in their population estimates a projection of the numbers of inmates with disabilities so as to have sufficient numbers of accessible cells to meet inmate needs.

233 Residential Facilities

Homeless Shelters, Group Homes, and Similar Social Service Establishments. Section 233 of the 2010 Standards includes specific scoping and technical provisions that apply to new construction and alteration of residential facilities. In the 1991 Standards scoping and technical requirements for homeless shelters, group homes, and similar social service establishments were included in section 9 Transient Lodging. These types of facilities will be covered by section 233 of the 2010 Standards and by 28 CFR 35.151(e) and 36.406(d) and will be subject to requirements for residential facilities rather than the requirements for transient lodging. This approach will harmonize federal accessibility obligations under both the ADA and section 504 of the Rehabilitation Act of 1973, as amended. In sleeping rooms with more than 25 beds that are covered by §36.406(d) a minimum of five percent (5%) of the beds must have clear floor space compliant with section 806.2.3 of the 2010 Standards. In large facilities with more than 50 beds, at least one roll-in shower compliant with section 608.2.2 or section 608.2.3 of the 2010 Standards must be provided. Where separate shower facilities are provided for men and for women, at least one roll-in shower must be provided for each gender.

Housing Operated By or On Behalf of Places of Education. Housing at a place of education includes: Residence halls, dormitories, suites, apartments, or other places of residence operated by or on behalf of places of education. Residence halls or dormitories operated by or on behalf of places of education are covered by the provisions in sections 224 and 806 of the 2010 Standards. The Department has included in the title III rule at §36.406(e) requirements that apply to housing at places of education that clarify requirements for residence halls and dormitories and other types of student housing. Requirements for housing at a place of education covered by the title II rule are included at §35.151(f).

Kitchens and Kitchenettes. Section 4.34.2 of the UFAS requires a clear turning space at least 60 inches in diameter or an equivalent T-shaped turning space in kitchens. Section 4.34.6 requires a clearance between opposing base cabinets, counters, appliances, or walls of at least 40 inches except in a U-shaped kitchen where the minimum clearance is 60 inches.

Section 804 of the 2010 Standards provides technical requirements for kitchens and kitchenettes. Section 804.2.1 requires that pass through kitchens, which have two entries and counters, appliances, or cabinets on two opposite sides or opposite a parallel wall, provide at least 40 inches minimum clearance. Section 804.2.2 requires that U-shaped kitchens, which are enclosed on three continuous sides, provide at least 60 inches minimum clearance between all opposing base cabinets, countertops, appliances, or walls within kitchen work areas. Kitchens that do not have a cooktop or conventional range are exempt from the clearance requirements but still must provide an accessible route.

If a kitchen does not have two entries, the 2010 Standards require the kitchen to have 60 inches minimum clearance between the opposing base cabinets, counters, appliances, or walls.

One commenter supported the provisions of section 804 of the 2010 Standards but sought clarification whether this section applies to residential units only, or to lodging and office buildings as well. Section 212 makes section 804 applicable to all kitchens and kitchenettes in covered buildings.

Residential Facilities. Section 4.1.4(11) of the UFAS contains scoping requirements for the new construction of housing. Under the 1991 title II regulation, state and local governments had the option of complying with the UFAS or the 1991 Standards. After the compliance date for the 2010 Standards, state and local governments will no longer have the option of complying with the UFAS, but will have to use the 2010 Standards for new construction and alterations.

Sections 233.1, 233.2, 233.3, 233.3.1, and 233.3.2 of the 2010 Standards differentiate between entities subject to the United States Department of Housing and Urban Development (HUD) regulations implementing section 504 of the Rehabilitation Act of 1973 and entities not subject to the HUD regulations. The HUD regulations apply to recipients of federal financial assistance through HUD, and require at least five percent (5%) of dwelling units in multi-family projects of five or more dwelling units to provide mobility features and at least two percent (2%) of the dwelling units to provide communication features. The HUD regulations define a project unique to its programs as ''one or more residential structures which are covered by a single contract for federal financial assistance or application for assistance, or are treated as a whole for processing purposes, whether or not located on a common site.'' To avoid any potential conflicts with the HUD regulations, the 2010 Standards require residential dwelling units subject to the HUD regulations to comply with the scoping requirements in the HUD regulations, instead of the scoping requirements in the 2010 Standards.

For entities not subject to the HUD regulations, the 2010 Standards require at least five percent (5%) of the dwelling units in residential facilities to provide mobility features, and at least two percent (2%) of the dwelling units to provide communication features. The 2010 Standards define facilities in terms of buildings located on a site. The 2010 Standards permit facilities that contain 15 or fewer dwelling units to apply the scoping requirements to all the dwelling units that are constructed under a single contract, or are developed as whole, whether or not located on a common site.

Alterations to Residential Facilities. Section 4.1.6 of the UFAS requires federal, state, and local government housing to comply with the general requirements for alterations to facilities. Applying the general requirements for alterations to housing can result in partially accessible dwelling units where single elements or spaces in dwelling units are altered.

The 2010 Standards, at sections 202.3 Exception 3, 202.4, and 233.3, contain specific scoping requirements for alterations to dwelling units. Dwelling units that are not required to be accessible are exempt from the general requirements for alterations to elements and spaces and for alterations to primary function areas.

The scoping requirements for alterations to dwelling units generally are based on the requirements in the UFAS:

- Where a building is vacated for purposes of alterations and has more than 15 dwelling units, at least five percent (5%) of the altered dwelling units are required to provide mobility features and at least two percent (2%) of the dwelling units are required to provide communication features.
- Where a bathroom or a kitchen is substantially altered in an individual dwelling unit and at least one other room is also altered, the dwelling unit is required to comply with the scoping requirements for new construction until the total number of dwelling units in the facility required to provide mobility features and communication features is met.

As with new construction, the 2010 Standards permit facilities that contain 15 or fewer dwelling units to apply the scoping requirements to all the dwelling units that are altered under a single contract, or are developed as a whole, whether or not located on a common site. The 2010 Standards also permit

a comparable dwelling unit to provide mobility features where it is not technically feasible for the altered dwelling unit to comply with the technical requirements.

234 and 1002 Amusement Rides

New and Altered Permanently Installed Amusement Rides. Section 234 of the 2010 Standards sets out scoping requirements and section 1002 sets out the technical requirements for the accessibility of permanently installed amusement rides. These requirements apply to newly designed and constructed amusement rides and used rides when certain alterations are made.

A commenter raised concerns that smaller amusement parks tend to purchase used rides more frequently than new rides, and that the conversion of a used ride to provide the required accessibility may be difficult to ensure because of the possible complications in modifying equipment to provide accessibility.

The Department agrees with this commenter. The Department notes, however, that the 2010 Standards will require modifications to existing amusement rides when a ride's structural and operational characteristics are altered to the extent that the ride's performance differs from that specified by the manufacturer or the original design. Such an extensive alteration to an amusement ride may well require that new load and unload areas be designed and constructed. When load and unload areas serving existing amusement rides are newly designed and constructed they must be level, provide wheelchair turning space, and be on an accessible route compliant with Chapter 4 of the 2010 Standards except as modified by section 1002.2 of the 2010 Standards.

Mobile or Portable Amusement Rides. The exception in section 234.1 of the 2010 Standards exempts mobile or portable amusement rides, such as those set up for short periods of time at carnivals, fairs or festivals, from having to comply with the 2010 Standards. However, even though the mobile/portable ride itself is not subject to the Standards, these facilities are still subject to the ADA's general requirement to ensure that individuals with disabilities have an equal opportunity to enjoy the services and amenities of these facilities.

Subject to these general requirements, mobile or portable amusement rides should be located on an accessible route and the load and unload areas serving a ride should provide a level wheelchair turning space to provide equal opportunity for individuals with disabilities to be able to participate on the amusement ride to the extent feasible.

One commenter noted that the exception in Section 234.1 of the 2010 Standards for mobile or portable amusement rides limits the opportunities of persons with disabilities to participate on amusement rides because traveling or temporary amusement rides by their nature come to their customers' town or a nearby town rather than the customer having to go to them and so are less expensive than permanent amusement parks. While the Department understands the commenter's concerns, the Department notes that most amusement rides are too complex to be reasonably modified or re-engineered to accommodate the majority of individuals with disabilities and that additional complexities and safety concerns are added when the rides are mobile or portable.

A commenter asked that section 234 of the 2010 Standards make clear that the requirements for accessible routes include the routes leading up to and including the loading and unloading areas of amusement rides. Sections 206.2.9 and 1002.2 of the 2010 Standards clarify that the requirements for accessible routes include the routes leading up to and including the loading and unloading areas of amusement rides.

A commenter requested that the final rule specifically allow for wheelchair access through the exit or other routes, or alternate means of wheelchair access routes to amusement rides. The commenter stated that the concept of wheelchair access through the exit or alternate routes was a base assumption for the 2010 Standards. The commenter noted that the concept is apparent in the signage and load/unload area provisions in Section 216.12 (" * * * where accessible unload areas also serve as accessible load areas, signs indicating the location of the accessible load and unload areas shall be provided at entries to queues and waiting lines"). The Department agrees with the commenter that accessible load and unload areas may be the same where signs that comply with section 216.12 are provided.

Wheelchair Space or Transfer Seat or Transfer Device. Sections 234.3 and 1002.4–1002.6 of the 2010 Standards provide that each new and altered amusement ride, except for mobile/portable rides and a few additional excepted rides, will be required to provide at least one type of access by means of one wheelchair space or one transfer seat or one transfer device (the design of the transfer device is not specified).

Commenters urged the Department to revise the requirements for wheelchair spaces and transfer seats and devices because most amusement rides are too complex to be reasonably modified or re-engineered to accommodate the majority of individuals with disabilities. They argued that the experience of amusement rides will be significantly reduced if the proposed requirements are implemented.

The 2004 ADAAG, which the Department adopted as part of the 2010 Standards, was developed with the assistance of an advisory committee that included representation from the design staffs of major amusement

venues and from persons with disabilities. The Department believes that the resulting 2004 ADAAG reflected sensitivity to the complex problems posed in adapting existing rides by focusing on new rides that can be designed from the outset to be accessible.

To permit maximum design flexibility, the 2010 Standards permit designers to determine whether it is more appropriate to permit individuals who use wheelchairs to remain in their chairs on the ride, or to provide for transfer access.

Maneuvering Space in Load and Unload Areas. Sections 234.2 and 1002.3 of the 2010 Standards require that a level wheelchair turning space be provided at the load and unload areas of each amusement ride. The turning space must comply with sections 304.2 and 304.3.

Signs Required at Waiting Lines to Amusement Rides. Section 216.12 of the 2010 Standards requires signs at entries to queues and waiting lines identifying type and location of access for the amusement ride.

235 and 1003 Recreational Boating Facilities

These sections require that accessible boat slips and boarding piers be provided. Most commenters approved of the requirements for recreational boating facility accessibility and urged the Department to keep regulatory language consistent with those provisions. They commented that the requirements appropriately reflect industry conditions. Individual commenters and disability organizations agreed that the 2010 Standards achieve acceptable goals for recreational boating facility access.

Accessible Route. Sections 206.2.10 and 1003.2 of the 2010 Standards require an accessible route to all accessible boating facilities, including boat slips and boarding piers at boat launch ramps. Section 1003.2.1 provides a list of exceptions applicable to structures such as gangways, transition plates, floating piers, and structures containing combinations of these elements that are affected by water level changes. The list of exceptions specifies alternate design requirements applicable to these structures which, because of water level variables, cannot comply with the slope, cross slope, and handrail requirements for fixed ramps contained in sections 403.3, 405.2, 405.3, 405.6, and 405.7 of the 2010 Standards. Exceptions 3 and 4 in Section 1003.2.1, which permit a slope greater than that specified in Section 405.2, are available for structures that meet specified length requirements. Section 206.7.10 permits the use of platform lifts as an alternative to gangways that are part of accessible routes.

Commenters raised concerns that because of water level fluctuations it may be difficult to provide accessible routes to all accessible boating facilities, including boat slips and boarding piers at boat launch ramps. One of the specific concerns expressed by several commenters relates to the limits for running slope permitted on gangways that are part of an accessible route as gangways may periodically have a steeper slope than is permitted for a fixed ramp. The exceptions contained in section 1003.2 of the 2010 Standards modify the requirements of Chapter 4. For example, where the total length of a gangway or series of gangways serving as an accessible route is 80 feet or more an exception permits the slope on gangways to exceed the maximum slope in section 405.2.

Some commenters suggested that permissible slope variations could be reduced further by introducing a formula that ties required gangway length to anticipated water level fluctuations. Such a formula would incorporate predictions of tidal level changes such as those issued by the National Oceanographic and Atmospheric Administration (NOAA) and the United States Geologic Survey (USGS). This suggested approach would be an alternative to the gangway length exceptions and limits in section 1003.2.1 of the 2010 Standards. These commenters noted that contemporary building materials and techniques make gangways of longer length and alternative configurations achievable. These commenters provided at least one example of a regional regulatory authority using this type of formula. While this approach may be successfully implemented and consistent with the goals of the ADA, the example provided was applied in a highly developed area containing larger facilities. The Department has considered that many facilities do not have sufficient resources available to take advantage of the latest construction materials and design innovations. Other commenters supported compliance exceptions for facilities that are subject to extreme tidal conditions. One commenter noted that if a facility is located in an area with limited space and extreme tidal variations, a disproportionately long gangway might intrude into water travel routes. The Department has considered a wide range of boating facility characteristics including size, water surface areas, tidal fluctuations, water conditions, variable resources, whether the facility is in a highly developed or remote location, and other factors. The Department has determined that the 2010 Standards provide sufficient flexibility for such broad application. Additionally, the length requirement for accessible routes in section 1003.2.1 provides an easily determinable compliance standard.

Accessible Boarding Piers. Where boarding piers are provided at boat launch ramps, sections 235.3 and 1003.3.2 of the 2010 Standards require that at least five percent (5%) of boarding piers, but at least one, must be accessible.

Accessible Boat Slips. Sections 235.2 and 1003.3.1 of the 2010 Standards require that a

specified number of boat slips in each recreational boating facility meet specified accessibility standards. The number of accessible boat slips required by the 2010 Standards is set out in a chart in section 235.2. One accessible boat slip is required for facilities containing 25 or fewer total slips. The number of required accessible boat slips increases with the total number of slips at the facility. Facilities containing more than one thousand (1000) boat slips are required to provide twelve (12) accessible boat slips plus one for each additional one hundred slips at the facility.

One commenter asserted the need for specificity in the requirement for dispersion of accessible slips. Section 235.2.1 of the 2010 Standards addresses dispersion and requires that boat slips ''shall be dispersed throughout the various types of boat slips provided.'' The commenter was concerned that if a marina could not put accessible slips all on one pier, it would have to reconstruct the entire facility to accommodate accessible piers, gangways, docks and walkways. The provision permits required accessible boat slips to be grouped together. The Department recognizes that economical and structural feasibility may produce this result. The 2010 Standards do not require the dispersion of the physical location of accessible boat slips. Rather, the dispersion must be among the various types of boat slips offered by the facility. Section 235.2.1 of the 2010 Standards specifies that if the required number has been met, no further dispersion is required. For example, if a facility offers five different 'types' of boat slips but is only required to provide three according to the table in Section 235.2, that facility is not required to provide more than three accessible boat slips, but the three must be varied among the five 'types' of boat slips available at the facility.

236 and 1004 Exercise Machines and Equipment

Accessible Route to Exercise Machines and Equipment. Section 206.2.13 of the 2010 Standards requires an accessible route to serve accessible exercise machines and equipment.

Commenters raised concerns that the requirement to provide accessible routes to serve accessible exercise machines and equipment will be difficult for some facilities to provide, especially some transient lodging facilities that typically locate exercise machines and equipment in a single room. The Department believes that this requirement is a reasonable one in new construction and alterations because accessible exercise machines and equipment can be located so that an accessible route can serve more than one piece of equipment.

Exercise Machines and Equipment. Section 236 of the 2010 Standards requires at least one of each type of exercise machine to meet clear floor space requirements of section 1004.1. Types of machines are generally defined according to the muscular groups exercised or the kind of cardiovascular exercise provided.

Several commenters were concerned that existing facilities would have to reduce the number of available exercise equipment and machines in order to comply with the 2010 Standards. One commenter submitted prototype drawings showing equipment and machine layouts with and without the required clearance specified in the 2010 Standards. The accessible alternatives all resulted in a loss of equipment and machines. However, because these prototype layouts included certain possibly erroneous assumptions about the 2010 Standards, the Department wishes to clarify the requirements.

Section 1004.1 of the 2010 Standards requires a clear floor space ''positioned for transfer or for use by an individual seated in a wheelchair'' to serve at least one of each type of exercise machine and equipment. This requirement provides the designer greater flexibility regarding the location of the clear floor space than was employed by the commenter who submitted prototype layouts. The 2010 Standards do not require changes to exercise machines or equipment in order to make them more accessible to persons with disabilities. Even where machines or equipment do not have seats and typically are used by individuals in a standing position, at least one of each type of machine or equipment must have a clear floor space. Therefore, it is reasonable to assume that persons with disabilities wishing to use this type of machine or equipment can stand or walk, even if they use wheelchairs much of the time. As indicated in Advisory 1004.1, ''the position of the clear floor space may vary greatly depending on the use of the equipment or machine.'' Where exercise equipment or machines require users to stand on them, the clear floor space need not be located parallel to the length of the machine or equipment in order to provide a lateral seat-to-platform transfer. It is permissible to locate the clear floor space for such machines or equipment in the aisle behind the device and to overlap the clear floor space and the accessible route.

Commenters were divided in response to the requirement for accessible exercise machines and equipment. Some supported requirements for accessible machines and equipment; others urged the Department not to require accessible machines and equipment because of the costs involved. The Department believes that the requirement strikes an appropriate balance in ensuring that persons with disabilities, particularly those who use wheelchairs, will have the opportunity to use the exercise equipment. Providing access to exercise machines and equipment recognizes the need and desires of

individuals with disabilities to have the same opportunity as other patrons to enjoy the advantages of exercise and maintaining health.

237 and 1005 Fishing Piers and Platforms

Accessible Route. Sections 206.2.14 and 1005.1 of the 2010 Standards require an accessible route to each accessible fishing pier and platform. The exceptions described under Recreational Boating above also apply to gangways and floating piers. All commenters supported the requirements for accessible routes to fishing piers and platforms.

Accessible Fishing Piers and Platforms. Sections 237 and 1005 of the 2010 Standards require at least twenty-five percent (25%) of railings, guards, or handrails (if provided) to be at a 34-inch maximum height (so that a person seated in a wheelchair can cast a fishing line over the railing) and to be located in a variety of locations on the fishing pier or platform to give people a variety of locations to fish. An exception allows a guard required to comply with the IBC to have a height greater than 34 inches. If railings, guards, or handrails are provided, accessible edge protection and clear floor or ground space at accessible railings are required. Additionally, at least one turning space complying with section 304.3 of the 2010 Standards is required to be provided on fishing piers and platforms.

Commenters expressed concerns about the provision for fishing piers and platforms at the exception in section 1005.2.1 of the 2010 Standards that allows a maximum height of 42 inches for a guard when the pier or platform is covered by the IBC. Two commenters stated that allowing a 42-inch guard or railing height for facilities covered by another building code would be difficult to enforce. They also thought that this would hinder access for persons with disabilities because the railing height would be too high for a person seated in a wheelchair to reach over with their fishing pole in order to fish. The Department understands these concerns but believes that the railing height exception is necessary in order to avoid confusion resulting from conflicting accessibility requirements, and therefore has retained this exception.

238 and 1006 Golf Facilities

Accessible Route. Sections 206.2.15, 1006.2, and 1006.3 of the 2010 Standards require an accessible route to connect all accessible elements within the boundary of the golf course and, in addition, to connect golf car rental areas, bag drop areas, teeing grounds, putting greens, and weather shelters. An accessible route also is required to connect any practice putting greens, practice teeing grounds, and teeing stations at driving ranges that are required to be accessible. An exception permits the accessible route requirements to be met, within the boundaries of the golf course, by providing a ''golf car passage'' (the path typically used by golf cars) if specifications for width and curb cuts are met.

Most commenters expressed the general viewpoint that nearly all golf courses provide golf cars and have either well-defined paths or permit the cars to drive on the course where paths are not present, and thus meet the accessible route requirement.

The Department received many comments requesting clarification of the term ''golf car passage.'' Some commenters recommended additional regulatory language specifying that an exception from a pedestrian route requirement should be allowed only when a golf car passage provides unobstructed access onto the teeing ground, putting green, or other accessible element of the course so that an accessible golf car can have full access to those elements. These commenters cautioned that full and equal access would not be provided if a golfer were required to navigate a steep slope up or down a hill or a flight of stairs in order to get to the teeing ground, putting green, or other accessible element of the course.

Conversely, another commenter requesting clarification of the term ''golf car passage'' argued that golf courses typically do not provide golf car paths or pedestrian paths up to actual tee grounds or greens, many of which are higher or lower than the car path. This commenter argued that if golf car passages were required to extend onto teeing grounds and greens in order to qualify for an exception, then some golf courses would have to substantially regrade teeing grounds and greens at a high cost.

Some commenters argued that older golf courses, small nine-hole courses, and executive courses that do not have golf car paths would be unable to comply with the accessible route requirements because of the excessive cost involved. A commenter noted that, for those older courses that have not yet created an accessible pedestrian route or golf car passage, the costs and impacts to do so should be considered.

A commenter argued that an accessible route should not be required where natural terrain makes it infeasible to create an accessible route. Some commenters cautioned that the 2010 Standards would jeopardize the integrity of golf course designs that utilize natural terrain elements and elevation changes to set up shots and create challenging golf holes.

The Department has given careful consideration to the comments and has decided to adopt the 2010 Standards requiring that at least one accessible route connect accessible elements and spaces within the boundary of the golf course including teeing grounds, putting greens, and weather shelters, with an exception provided that golf car passages

shall be permitted to be used for all or part of required accessible routes. In response to requests for clarification of the term ''golf car passage,'' the Department points out that golf car passage is merely a pathway on which a motorized golf car can operate and includes identified or paved paths, teeing grounds, fairways, putting greens, and other areas of the course. Golf cars cannot traverse steps and exceedingly steep slopes. A nine-hole golf course or an executive golf course that lacks an identified golf car path but provides golf car passage to teeing grounds, putting greens, and other elements throughout the course may utilize the exception for all or part of the accessible pedestrian route. The exception in section 206.2.15 of the 2010 Standards does not exempt golf courses from their obligation to provide access to necessary elements of the golf course; rather, the exception allows a golf course to use a golf car passage for part or all of the accessible pedestrian route to ensure that persons with mobility disabilities can fully and equally participate in the recreational activity of playing golf.

Accessible Teeing Grounds, Putting Greens, and Weather Shelters. Sections 238.2 and 1006.4 of the 2010 Standards require that golf cars be able to enter and exit each putting green and weather shelter. Where two teeing grounds are provided, the forward teeing ground is required to be accessible (golf car can enter and exit). Where three or more teeing grounds are provided, at least two, including the forward teeing ground, must be accessible.

A commenter supported requirements for teeing grounds, particularly requirements for accessible teeing grounds, noting that accessible teeing grounds are essential to the full and equal enjoyment of the golfing experience.

A commenter recommended that existing golf courses be required to provide access to only one teeing ground per hole. The majority of commenters reported that most public and private golf courses already provide golf car passage to teeing grounds and greens. The Department has decided that it is reasonable to maintain the requirement. The 2010 Standards provide an exception for existing golf courses with three or more teeing grounds not to provide golf car passage to the forward teeing ground where terrain makes such passage infeasible.

Section 1006.3.2 of the 2010 Standards requires that where curbs or other constructed barriers prevent golf cars from entering a fairway, openings 60 inches wide minimum shall be provided at intervals not to exceed 75 yards.

A commenter disagreed with the requirement that openings 60 inches wide minimum be installed at least every 75 yards, arguing that a maximum spacing of 75 yards may not allow enough flexibility for terrain and hazard placements. To resolve this problem, the commenter recommended that the standards be modified to require that each golf car passage include one 60-inch wide opening for an accessible golf car to reach the tee, and that one opening be provided where necessary for an accessible golf car to reach a green. The requirement for openings where curbs or other constructed barriers may otherwise prevent golf cars from entering a fairway allows the distance between openings to be less than every 75 yards. Therefore, the Department believes that the language in section 1006.3.2 of the 2010 Standards allows appropriate flexibility. Where a paved path with curbs or other constructed barrier exists, the Department believes that it is essential that openings be provided to enable golf car passages to access teeing grounds, fairways and putting greens, and other required elements. Golf car passage is not restricted to a paved path with curbs. Golf car passage also includes fairways, teeing grounds, putting greens, and other areas on which golf cars operate.

Accessible Practice Putting Greens, Practice Teeing Grounds, and Teeing Stations at Driving Ranges. Section 238.3 of the 2010 Standards requires that five percent (5%) but at least one of each of practice putting greens, practice teeing grounds, and teeing stations at driving ranges must permit golf cars to enter and exit.

239 and 1007 Miniature Golf Facilities

Accessible Route to Miniature Golf Course Holes. Sections 206.2.16, 239.3, and 1007.2 of the 2010 Standards require an accessible route to connect accessible miniature golf course holes and the last accessible hole on the course directly to the course entrance or exit. Accessible holes are required to be consecutive with an exception permitting one break in the sequence of consecutive holes provided that the last hole on the miniature golf course is the last hole in the sequence.

Many commenters supported expanding the exception from one to multiple breaks in the sequence of accessible holes. One commenter noted that permitting accessible holes with breaks in sequence would enable customers with disabilities to enjoy the landscaping, water and theme elements of the miniature golf course. Another commenter wrote in favor of allowing multiple breaks in accessible holes with a connecting accessible route.

Other commenters objected to allowing multiple breaks in the sequence of miniature golf holes. Commenters opposed to this change argued that allowing any breaks in the sequence of accessible holes at a miniature golf course would disrupt the flow of play for persons with disabilities and create a less socially integrated experience. A commenter noted that multiple breaks in sequence would not necessarily guarantee the

provision of access to holes that are most representative of those with landscaping, water elements, or a fantasy-like experience.

The Department has decided to retain the exception without change. Comments did not provide a sufficient basis on which to conclude that allowing multiple breaks in the sequence of accessible holes would necessarily increase integration of accessible holes with unique features of miniature golf courses. Some designs of accessible holes with multiple breaks in the sequence might provide equivalent facilitation where persons with disabilities gain access to landscaping, water or theme elements not otherwise represented in a consecutive configuration of accessible holes. A factor that might contribute to equivalent facilitation would be an accessible route designed to bring persons with disabilities to a unique feature, such as a waterfall, that would otherwise not be served by an accessible route connecting consecutive accessible holes.

Specified exceptions are permitted for accessible route requirements when located on the playing surfaces near holes.

Accessible Miniature Golf Course Holes. Sections 239.2 and 1007.3 of the 2010 Standards require at least fifty percent (50%) of golf holes on miniature golf courses to be accessible, including providing a clear floor or ground space that is 48 inches minimum by 60 inches minimum with slopes not steeper than 1:48 at the start of play.

240 and 1008 Play Areas

Section 240 of the 2010 Standards provides scoping for play areas and section 1008 provides technical requirements for play areas. Section 240.1 of the 2010 Standards sets requirements for play areas for children ages 2 and over and covers separate play areas within a site for specific age groups. Section 240.1 also provides four exceptions to the requirements that apply to family child care facilities, relocation of existing play components in existing play areas, amusement attractions, and alterations to play components where the ground surface is not altered.

Ground Surfaces. Section 1008.2.6 of the 2010 Standards provides technical requirements for accessible ground surfaces for play areas on accessible routes, clear floor or ground spaces, and turning spaces. These ground surfaces must follow special rules, incorporated by reference from nationally recognized standards for accessibility and safety in play areas, including those issued by the American Society for Testing and Materials (ASTM).

A commenter recommended that the Department closely examine the requirements for ground surfaces at play areas. The Department is aware that there is an ongoing controversy about play area ground surfaces arising from a concern that some surfaces that meet the ASTM requirements at the time of installation will become inaccessible if they do not receive constant maintenance. The Access Board is also aware of this issue and is working to develop a portable field test that will provide more relevant information on installed play surfaces. The Department would caution covered entities selecting among the ground surfacing materials that comply with the ASTM requirements that they must anticipate the maintenance costs that will be associated with some of the products. Permitting a surface to deteriorate so that it does not meet the 2010 Standards would be an independent violation of the Department's ADA regulations.

Accessible Route to Play Components. Section 206.2.17 of the 2010 Standards provides scoping requirements for accessible routes to ground level and elevated play components and to soft contained play structures. Sections 240.2 and 1008 of the 2010 Standards require that accessible routes be provided for play components. The accessible route must connect to at least one ground level play component of each different type provided (e.g., for different experiences such as rocking, swinging, climbing, spinning, and sliding). Table 240.2.1.2 sets requirements for the number and types of ground level play components required to be on accessible routes. When elevated play components are provided, an accessible route must connect at least fifty percent (50%) of the elevated play components. Section 240.2.1.2, provides an exception to the requirements for ground level play components if at least fifty percent (50%) of the elevated play components are connected by a ramp and at least three of the elevated play components connected by the ramp are different types of play components.

The technical requirements at section 1008 include provisions where if three or fewer entry points are provided to a soft contained play structure, then at least one entry point must be on an accessible route. In addition, where four or more entry points are provided to a soft contained play structure, then at least two entry points must be served by an accessible route.

If elevated play components are provided, fifty percent (50%) of the elevated components are required to be accessible. Where 20 or more elevated play components are provided, at least twenty five percent (25%) will have to be connected by a ramp. The remaining play components are permitted to be connected by a transfer system. Where less than 20 elevated play components are provided, a transfer system is permitted in lieu of a ramp.

A commenter noted that the 2010 Standards allow for the provision of transfer steps to elevated play structures based on the

number of elevated play activities, but asserted that transfer steps have not been documented as an effective means of access.

The 2010 Standards recognize that play structures are designed to provide unique experiences and opportunities for children. The 2010 Standards provide for play components that are accessible to children who cannot transfer from their wheelchair, but they also provide opportunities for children who are able to transfer. Children often interact with their environment in ways that would be considered inappropriate for adults. Crawling and climbing, for example, are integral parts of the play experience for young children. Permitting the use of transfer platforms in play structures provides some flexibility for creative playground design.

Accessible Play Components. Accessible play components are required to be on accessible routes, including elevated play components that are required to be connected by ramps. These play components must also comply with other accessibility requirements, including specifications for clear floor space and seat heights (where provided).

A commenter expressed concerns that the general requirements of section 240.2.1 of the 2010 Standards and the advisory accompanying section 240.2.1 conflict. The comment asserts that section 240.2.1 of the 2010 Standards provides that the only requirement for integration of equipment is where there are two or more required ground level play components, while the advisory appears to suggest that all accessible components must be integrated.

The commenter misinterprets the requirement. The ADA mandates that persons with disabilities be able to participate in programs or activities in the most integrated setting appropriate to their needs. Therefore, all accessible play components must be integrated into the general playground setting. Section 240.2.1 of the 2010 Standards specifies that where there is more than one accessible ground level play component, the components must be both dispersed and integrated.

241 and 612 Saunas and Steam Rooms

Section 241 of the 2010 Standards sets scoping for saunas and steam rooms and section 612 sets technical requirements including providing accessible turning space and an accessible bench. Doors are not permitted to swing into the clear floor or ground space for the accessible bench. The exception in section 612.2 of the 2010 Standards permits a readily removable bench to obstruct the required wheelchair turning space and the required clear floor or ground space. Where they are provided in clusters, five percent (5%) but at least one sauna or steam room in each cluster must be accessible.

Commenters raised concerns that the safety of individuals with disabilities outweighs the usefulness in providing accessible saunas and steam rooms. The Department believes that there is an element of risk in many activities available to the general public. One of the major tenets of the ADA is that individuals with disabilities should have the same opportunities as other persons to decide what risks to take. It is not appropriate for covered entities to prejudge the abilities of persons with disabilities.

242 and 1009 Swimming Pools, Wading Pools, and Spas

Accessible Means of Entry to Pools. Section 242 of the 2010 Standards requires at least two accessible means of entry for larger pools (300 or more linear feet) and at least one accessible entry for smaller pools. This section requires that at least one entry will have to be a sloped entry or a pool lift; the other could be a sloped entry, pool lift, a transfer wall, or a transfer system (technical specifications for each entry type are included at section 1009).

Many commenters supported the scoping and technical requirements for swimming pools. Other commenters stated that the cost of requiring facilities to immediately purchase a pool lift for each indoor and outdoor swimming pool would be very significant especially considering the large number of swimming pools at lodging facilities. One commenter requested that the Department clarify what would be an ''alteration'' to a swimming pool that would trigger the obligation to comply with the accessible means of entry in the 2010 Standards.

Alterations are covered by section 202.3 of the 2010 Standards and the definition of ''alteration'' is provided at section 106.5. A physical change to a swimming pool which affects or could affect the usability of the pool is considered to be an alteration. Changes to the mechanical and electrical systems, such as filtration and chlorination systems, are not alterations. Exception 2 to section 202.3 permits an altered swimming pool to comply with applicable requirements to the maximum extent feasible if full compliance is technically infeasible. ''Technically infeasible'' is also defined in section 106.5 of the 2010 Standards.

The Department also received comments suggesting that it is not appropriate to require two accessible means of entry to wave pools, lazy rivers, sand bottom pools, and other water amusements where there is only one point of entry. Exception 2 of Section 242.2 of the 2010 Standards exempts pools of this type from having to provide more than one accessible means of entry provided that the one accessible means of entry is a swimming pool lift compliant with section 1009.2, a sloped entry compliant with section 1009.3, or a transfer system compliant with section 1009.5 of the 2010 Standards.

Accessible Means of Entry to Wading Pools. Sections 242.3 and 1009.3 of the 2010 Standards

require that at least one sloped means of entry is required into the deepest part of each wading pool.

Accessible Means of Entry to Spas. Sections 242.4 and 1009.2, 1009.4, and 1009.5 of the 2010 Standards require spas to meet accessibility requirements, including an accessible means of entry. Where spas are provided in clusters, five percent (5%) but at least one spa in each cluster must be accessible. A pool lift, a transfer wall, or a transfer system will be permitted to provide the required accessible means of entry.

243 Shooting Facilities with Firing Positions

Sections 243 and 1010 of the 2010 Standards require an accessible turning space for each different type of firing position at a shooting facility if designed and constructed on a site. Where firing positions are provided in clusters, five percent (5%), but at least one position of each type in each cluster must be accessible.

Additional Technical Requirements

302.1 Floor or Ground Surfaces

Both section 4.5.1 of the 1991 Standards and section 302.2 of the 2010 Standards require that floor or ground surfaces along accessible routes and in accessible rooms and spaces be stable, firm, slip-resistant, and comply with either section 4.5 in the case of the 1991 Standards or section 302 in the case of the 2010 Standards.

Commenters recommended that the Department apply an ASTM Standard (with modifications) to assess whether a floor surface is ''slip resistant'' as required by section 302.1 of the 2010 Standards. The Department declines to accept this recommendation since, currently, there is no generally accepted test method for the slip-resistance of all walking surfaces under all conditions.

304 Turning Space

Section 4.2.3 of the 1991 Standards and Section 304.3 of the 2010 Standards allow turning space to be either a circular space or a T-shaped space. Section 304.3 permits turning space to include knee and toe clearance complying with section 306. Section 4.2.3 of the 1991 Standards did not specifically permit turning space to include knee and toe clearance. Commenters urged the Department to retain the turning space requirement, but exclude knee and toe clearance from being permitted as part of this space. They argued that wheelchairs and other mobility devices are becoming larger and that more individuals with disabilities are using electric three and four-wheeled scooters which cannot utilize knee clearance.

The Department recognizes that the technical specifications for T-shaped and circular turning spaces in the 1991 and 2010 Standards, which are based on manual wheelchair dimensions, may not adequately meet the needs of individuals using larger electric scooters. However, there is no consensus about the appropriate dimension on which to base revised requirements. The Access Board is conducting research to study this issue in order to determine if new requirements are warranted. For more information, see the Access Board's Web site at *http://www.access-board.gov/research/current-projects.htm#suny*. The Department plans to wait for the results of this study and action by the Access Board before considering any changes to the Department's rules. Covered entities may wish to consider providing more than the minimum amount of turning space in confined spaces where a turn will be required. Appendix section A4.2.3 and Fig. A2 of the 1991 Standards provide guidance on additional space for making a smooth turn without bumping into surrounding objects.

404 Doors, Doorways, and Gates

Automatic Door Break Out Openings. The 1991 Standards do not contain any technical requirement for automatic door break out openings. The 2010 Standards at sections 404.1, 404.3, 404.3.1, and 404.3.6 require automatic doors that are part of a means of egress and that do not have standby power to have a 32-inch minimum clear break out opening when operated in emergency mode. The minimum clear opening width for automatic doors is measured with all leaves in the open position. Automatic bi-parting doors or pairs of swinging doors that provide a 32-inch minimum clear break out opening in emergency mode when both leaves are opened manually meet the technical requirement. Section 404.3.6 of the 2010 Standards includes an exception that exempts automatic doors from the technical requirement for break out openings when accessible manual swinging doors serve the same means of egress.

Maneuvering Clearance or Standby Power for Automatic Doors. Section 4.13.6 of the 1991 Standards does not require maneuvering clearance at automatic doors. Section 404.3.2 of the 2010 Standards requires automatic doors that serve as an accessible means of egress to either provide maneuvering clearance or to have standby power to operate the door in emergencies. This provision has limited application and will affect, among others, in-swinging automatic doors that serve small spaces.

Commenters urged the Department to reconsider provisions that would require maneuvering clearance or standby power for automatic doors. They assert that these requirements would impose unreasonable financial and administrative burdens on all

covered entities, particularly smaller entities. The Department declines to change these provisions because they are fundamental life-safety issues. The requirement applies only to doors that are part of a means of egress that must be accessible in an emergency. If an emergency-related power failure prevents the operation of the automatic door, a person with a disability could be trapped unless there is either adequate maneuvering room to open the door manually or a back-up power source.

Thresholds at Doorways. The 1991 Standards, at section 4.13.8, require the height of thresholds at doorways not to exceed ½ inch and thresholds at exterior sliding doors not to exceed ¾ inch. Sections 404.1 and 404.2.5 of the 2010 Standards require the height of thresholds at all doorways that are part of an accessible route not to exceed ½ inch. The 1991 Standards and the 2010 Standards require raised thresholds that exceed ¼ inch in height to be beveled on each side with a slope not steeper than 1:2. The 2010 Standards include an exception that exempts existing and altered thresholds that do not exceed ¾ inch in height and are beveled on each side from the requirement.

505 Handrails

The 2010 Standards add a new technical requirement at section 406.3 for handrails along walking surfaces.

The 1991 Standards, at sections 4.8.5, 4.9.4, and 4.26, and the 2010 Standards, at section 505, contain technical requirements for handrails. The 2010 Standards provide more flexibility than the 1991 Standards as follows:

• Section 4.26.4 of the 1991 Standards requires handrail gripping surfaces to have edges with a minimum radius of ⅛ inch. Section 505.8 of the 2010 Standards requires handrail gripping surfaces to have rounded edges.

• Section 4.26.2 of the 1991 Standards requires handrail gripping surfaces to have a diameter of 1¼ inches to 1½ inches, or to provide an equivalent gripping surface. Section 505.7 of the 2010 Standards requires handrail gripping surfaces with a circular cross section to have an outside diameter of 1¼ inches to 2 inches. Handrail gripping surfaces with a non-circular cross section must have a perimeter dimension of 4 inches to 6¼ inches, and a cross section dimension of 2¼ inches maximum.

• Sections 4.8.5 and 4.9.4 of the 1991 Standards require handrail gripping surfaces to be continuous, and to be uninterrupted by newel posts, other construction elements, or obstructions. Section 505.3 of the 2010 Standards sets technical requirements for continuity of gripping surfaces. Section 505.6 requires handrail gripping surfaces to be continuous along their length and not to be obstructed along their tops or sides. The bottoms of handrail gripping surfaces must not be obstructed for more than twenty percent (20%) of their length. Where provided, horizontal projections must occur at least 1½ inches below the bottom of the handrail gripping surface. An exception permits the distance between the horizontal projections and the bottom of the gripping surface to be reduced by ⅛ inch for each ½ inch of additional handrail perimeter dimension that exceeds 4 inches.

• Section 4.9.4 of the 1991 Standards requires handrails at the bottom of stairs to continue to slope for a distance of the width of one tread beyond the bottom riser nosing and to further extend horizontally at least 12 inches. Section 505.10 of the 2010 Standards requires handrails at the bottom of stairs to extend at the slope of the stair flight for a horizontal distance at least equal to one tread depth beyond the last riser nosing. Section 4.1.6(3) of the 1991 Standards has a special technical provision for alterations to existing facilities that exempts handrails at the top and bottom of ramps and stairs from providing full extensions where it will be hazardous due to plan configuration. Section 505.10 of the 2010 Standards has a similar exception that applies in alterations.

A commenter noted that handrail extensions are currently required at the top and bottom of stairs, but the proposed regulations do not include this requirement, and urged the Department to retain the current requirement. Other commenters questioned the need for the extension at the bottom of stairs.

Sections 505.10.2 and 505.10.3 of the 2010 Standards require handrail extensions at both the top and bottom of a flight of stairs. The requirement in the 1991 Standards that handrails extend horizontally at least 12 inches beyond the width of one tread at the bottom of a stair was changed in the 2004 ADAAG by the Access Board in response to public comments. Existing horizontal handrail extensions that comply with 4.9.4(2) of the 1991 Standards should meet or exceed the requirements of the 2010 Standards.

Commenters noted that the 2010 Standards will require handrail gripping surfaces with a circular cross section to have an outside diameter of 2 inches, and that this requirement would impose a physical barrier to individuals with disabilities who need the handrail for stability and support while accessing stairs.

The requirement permits an outside diameter of 1¼ inches to 2 inches. This range allows flexibility in meeting the needs of individuals with disabilities and designers and architects. The Department is not aware of any data indicating that an outside diameter of 2 inches would pose any adverse impairment to use by individuals with disabilities.

Handrails Along Walkways. The 1991 Standards do not contain any technical requirement for handrails provided along walkways

that are not ramps. Section 403.6 of the 2010 Standards specifies that where handrails are provided along walkways that are not ramps, they shall comply with certain technical requirements. The change is expected to have minimal impact.

[AG Order No. 3181–2010, 75 FR 56317, Sept. 15, 2010]

APPENDIX C TO PART 36—GUIDANCE ON ADA REGULATION ON NONDISCRIMINATION ON THE BASIS OF DISABILITY BY PUBLIC ACCOMMODATIONS AND IN COMMERCIAL FACILITIES ORIGINALLY PUBLISHED ON JULY 26, 1991

NOTE: For the convenience of the reader, this appendix contains the text of the preamble to the final regulation on nondiscrimination on the basis of disability by public accommodations and in commercial facilities beginning at the heading ''Section-by-Section Analysis and Response to Comments'' and ending before ''List of Subjects in 28 CFR part 36'' (56 FR 35546, July 26, 1991).

SECTION-BY-SECTION ANALYSIS AND RESPONSE TO COMMENTS

Subpart A—General

Section 36.101 Purpose

Section 36.101 states the purpose of the rule, which is to effectuate title III of the Americans with Disabilities Act of 1990. This title prohibits discrimination on the basis of disability by public accommodations, requires places of public accommodation and commercial facilities to be designed, constructed, and altered in compliance with the accessibility standards established by this part, and requires that examinations or courses related to licensing or certification for professional or trade purposes be accessible to persons with disabilities.

Section 36.102 Application

Section 36.102 specifies the range of entities and facilities that have obligations under the final rule. The rule applies to any public accommodation or commercial facility as those terms are defined in §36.104. It also applies, in accordance with section 309 of the ADA, to private entities that offer examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes. Except as provided in §36.206, ''Retaliation or coercion,'' this part does not apply to individuals other than public accommodations or to public entities. Coverage of private individuals and public entities is discussed in the preamble to §36.206.

As defined in §36.104, a public accommodation is a private entity that owns, leases or leases to, or operates a place of public accommodation. Section 36.102(b)(2) emphasizes that the general and specific public accommodations requirements of subparts B and C obligate a public accommodation only with respect to the operations of a place of public accommodation. This distinction is drawn in recognition of the fact that a private entity that meets the regulatory definition of public accommodation could also own, lease or lease to, or operate facilities that are not places of public accommodation. The rule would exceed the reach of the ADA if it were to apply the public accommodations requirements of subparts B and C to the operations of a private entity that do not involve a place of public accommodation. Similarly, §36.102(b)(3) provides that the new construction and alterations requirements of subpart D obligate a public accommodation only with respect to facilities used as, or designed or constructed for use as, places of public accommodation or commercial facilities.

On the other hand, as mandated by the ADA and reflected in §36.102(c), the new construction and alterations requirements of subpart D apply to a commercial facility whether or not the facility is a place of public accommodation, or is owned, leased, leased to, or operated by a public accommodation.

Section 36.102(e) states that the rule does not apply to any private club, religious entity, or public entity. Each of these terms is defined in §36.104. The exclusion of private clubs and religious entities is derived from section 307 of the ADA; and the exclusion of public entities is based on the statutory definition of public accommodation in section 301(7) of the ADA, which excludes entities other than private entities from coverage under title III of the ADA.

Section 36.103 Relationship to Other Laws

Section 36.103 is derived from sections 501 (a) and (b) of the ADA. Paragraph (a) provides that, except as otherwise specifically provided by this part, the ADA is not intended to apply lesser standards than are required under title V of the Rehabilitation Act of 1973, as amended (29 U.S.C. 790–794), or the regulations implementing that title. The standards of title V of the Rehabilitation Act apply for purposes of the ADA to the extent that the ADA has not explicitly adopted a different standard from title V. Where the ADA explicitly provides a different standard from section 504, the ADA standard applies to the ADA, but not to section 504. For example, section 504 requires that all federally assisted programs and activities be readily accessible to and usable by individuals with

handicaps, even if major structural alterations are necessary to make a program accessible. Title III of the ADA, in contrast, only requires alterations to existing facilities if the modifications are ''readily achievable,'' that is, able to be accomplished easily and without much difficulty or expense. A public accommodation that is covered under both section 504 and the ADA is still required to meet the ''program accessibility'' standard in order to comply with section 504, but would not be in violation of the ADA unless it failed to make ''readily achievable'' modifications. On the other hand, an entity covered by the ADA is required to make ''readily achievable'' modifications, even if the program can be made accessible without any architectural modifications. Thus, an entity covered by both section 504 and title III of the ADA must meet both the ''program accessibility'' requirement and the ''readily achievable'' requirement.

Paragraph (b) makes explicit that the rule does not affect the obligation of recipients of Federal financial assistance to comply with the requirements imposed under section 504 of the Rehabilitation Act of 1973.

Paragraph (c) makes clear that Congress did not intend to displace any of the rights or remedies provided by other Federal laws or other State or local laws (including State common law) that provide greater or equal protection to individuals with disabilities. A plaintiff may choose to pursue claims under a State law that does not confer greater substantive rights, or even confers fewer substantive rights, if the alleged violation is protected under the alternative law and the remedies are greater. For example, assume that a person with a physical disability seeks damages under a State law that allows compensatory and punitive damages for discrimination on the basis of physical disability, but does not allow them on the basis of mental disability. In that situation, the State law would provide narrower coverage, by excluding mental disabilities, but broader remedies, and an individual covered by both laws could choose to bring an action under both laws. Moreover, State tort claims confer greater remedies and are not preempted by the ADA. A plaintiff may join a State tort claim to a case brought under the ADA. In such a case, the plaintiff must, of course, prove all the elements of the State tort claim in order to prevail under that cause of action.

A commenter had concerns about privacy requirements for banking transactions using telephone relay services. Title IV of the Act provides adequate protections for ensuring the confidentiality of communications using the relay services. This issue is more appropriately addressed by the Federal Communications Commission in its regulation implementing title IV of the Act.

Section 36.104 Definitions

''Act.'' The word ''Act'' is used in the regulation to refer to the Americans with Disabilities Act of 1990, Pub. L. 101–336, which is also referred to as the ''ADA.''

''Commerce.'' The definition of ''commerce'' is identical to the statutory definition provided in section 301(1) of the ADA. It means travel, trade, traffic, commerce, transportation, or communication among the several States, between any foreign country or any territory or possession and any State, or between points in the same State but through another State or foreign country. Commerce is defined in the same manner as in title II of the Civil Rights Act of 1964, which prohibits racial discrimination in public accommodations.

The term ''commerce'' is used in the definition of ''place of public accommodation.'' According to that definition, one of the criteria that an entity must meet before it can be considered a place of public accommodation is that its operations affect commerce. The term ''commerce'' is similarly used in the definition of ''commercial facility.''

The use of the phrase ''operations affect commerce'' applies the full scope of coverage of the Commerce Clause of the Constitution in enforcing the ADA. The Constitution gives Congress broad authority to regulate interstate commerce, including the activities of local business enterprises (e.g., a physician's office, a neighborhood restaurant, a laundromat, or a bakery) that affect interstate commerce through the purchase or sale of products manufactured in other States, or by providing services to individuals from other States. Because of the integrated nature of the national economy, the ADA and this final rule will have extremely broad application.

''Commercial facilities'' are those facilities that are intended for nonresidential use by a private entity and whose operations affect commerce. As explained under §36.401, ''New construction,'' the new construction and alteration requirements of subpart D of the rule apply to all commercial facilities, whether or not they are places of public accommodation. Those commercial facilities that are not places of public accommodation are not subject to the requirements of subparts B and C (e.g., those requirements concerning auxiliary aids and general nondiscrimination provisions).

Congress recognized that the employees within commercial facilities would generally be protected under title I (employment) of the Act. However, as the House Committee on Education and Labor pointed out, ''[t]o the extent that new facilities are built in a manner that make[s] them accessible to all individuals, including potential employees,

there will be less of a need for individual employers to engage in reasonable accommodations for particular employees.'' H.R. Rep. No. 485, 101st Cong., 2d Sess., pt. 2, at 117 (1990) [hereinafter ''Education and Labor report'']. While employers of fewer than 15 employees are not covered by title I's employment discrimination provisions, there is no such limitation with respect to new construction covered under title III. Congress chose not to so limit the new construction provisions because of its desire for a uniform requirement of accessibility in new construction, because accessibility can be accomplished easily in the design and construction stage, and because future expansion of a business or sale or lease of the property to a larger employer or to a business that is a place of public accommodation is always a possibility.

The term ''commercial facilities'' is not intended to be defined by dictionary or common industry definitions. Included in this category are factories, warehouses, office buildings, and other buildings in which employment may occur. The phrase, ''whose operations affect commerce,'' is to be read broadly, to include all types of activities reached under the commerce clause of the Constitution.

Privately operated airports are also included in the category of commercial facilities. They are not, however, places of public accommodation because they are not terminals used for ''specified public transportation.'' (Transportation by aircraft is specifically excluded from the statutory definition of ''specified public transportation.'') Thus, privately operated airports are subject to the new construction and alteration requirements of this rule (subpart D) but not to subparts B and C. (Airports operated by public entities are covered by title II of the Act.) Places of public accommodation located within airports, such as restaurants, shops, lounges, or conference centers, however, are covered by subparts B and C of this part.

The statute's definition of ''commercial facilities'' specifically includes only facilities ''that are intended for nonresidential use'' and specifically exempts those facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968, as amended (42 U.S.C. 3601–3631). The interplay between the Fair Housing Act and the ADA with respect to those facilities that are ''places of public accommodation'' was the subject of many comments and is addressed in the preamble discussion of the definition of ''place of public accommodation.''

''Current illegal use of drugs.'' The phrase ''current illegal use of drugs'' is used in §36.209. Its meaning is discussed in the preamble for that section.

''Disability.'' The definition of the term ''disability'' is comparable to the definition of the term ''individual with handicaps'' in section 7(8)(B) of the Rehabilitation Act and section 802(h) of the Fair Housing Act. The Education and Labor Committee report makes clear that the analysis of the term ''individual with handicaps'' by the Department of Health, Education, and Welfare in its regulations implementing section 504 (42 FR 22685 (May 4, 1977)) and the analysis by the Department of Housing and Urban Development in its regulation implementing the Fair Housing Amendments Act of 1988 (54 FR 3232 (Jan. 23, 1989)) should also apply fully to the term ''disability'' (Education and Labor report at 50).
