

\* \* \* \* \*

**§ 17.12 Endangered and threatened plants.**

(a) The list in paragraph (h) of this section contains the plant species determined by the Service or the National Marine Fisheries Service (NMFS) of the Department of Commerce's National Oceanic and Atmospheric Administration (hereafter in this section referred to as "the Services") to be endangered species or threatened species. It also contains the plant species treated as endangered or threatened because they are similar in appearance to and may be confused with endangered or threatened species (see §§ 17.50 through 17.52). The "Common name," "Scientific name," "Where listed," and "Status" columns provide regulatory information; together, they identify listed plant species within the meaning of the Act and describe where they are protected. When a taxon has more than one entry, the "Where listed" or "Status" column will identify its status in each relevant geographic area. The listing of a particular taxon includes all lower taxonomic units.

(b) "Scientific name" column. The Services use the most recently accepted scientific name. In cases where confusion might arise, one or more synonyms are provided in parentheses within the "Scientific name" column. The Services will rely to the extent prac-

ticable on the Integrated Taxonomic Information System (ITIS) to determine a species' scientific name. ITIS incorporates the naming principles established by the *International Code of Nomenclature for algae, fungi, and plants* (see paragraph (g) of this section). If the scientific name in ITIS differs from the scientific name adopted for use under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), the CITES nomenclature will be provided in brackets "[ ]" within the "Scientific name" column following the ITIS nomenclature.

(c) "Common name" column. Although common names are included, they cannot be relied upon for identification of any specimen, since they may vary greatly in local usage. In cases where confusion might arise, one or more synonyms are provided in parentheses within the "Common name" column.

(d) "Where listed" column. The "Where listed" column sets forth the geographic area where the species is listed for purposes of the Act. Except when providing a geographic description of an experimental population designation, "Wherever found" will be used to indicate the Act's protections apply to all individuals of the species, wherever found.

(e) "Status" column. Within the "Status" column, the following abbreviations are used:

Abbreviation	Regulatory status the abbreviation represents
E .....	Endangered species.
T .....	Threatened species.
E (S/A) .....	Endangered based on similarity of appearance to an existing listed species.
T (S/A) .....	Threatened based on similarity of appearance to an existing listed species.
XE .....	Essential experimental population (See subpart H of this part).
XN .....	Nonessential experimental population (See subpart H of this part).

(f) "Listing Citations and Applicable Rules" column. The "Listing Citations and Applicable Rules" column is non-regulatory in nature and is provided for informational and navigational purposes only. Please note that the sections of part 17 that include designations of critical habitat for plants are organized by family name. A link to the Integrated Taxonomic Information System (ITIS), which displays the taxonomic hierarchy of a species, includ-

ing its family name, is provided on each species' profile page accessible through the Service's Web site (<http://www.fws.gov/endangered/>) or information is available directly through the ITIS (<http://www.itis.gov/>).

(1) Within the "Listing Citations and Applicable Rules" column, the following superscripts are used:

Superscript	Description of citation or rule
N .....	NMFS listing citation (NMFS Lead).
J .....	Both FWS and NMFS listing citation (Joint Jurisdiction).
CH .....	Critical habitat rule.
4d .....	Species-specific “4(d)” rule (a rule issued under the authority of section 4(d) of the Act).
10j .....	Species-specific “10(j)” rule (a rule issued under the authority of section 10(j) of the Act).

(2) Listing citations contain the volume, document starting page number, and publication date of the FEDERAL REGISTER publication(s) in which a species’ status was assessed. At least since 1973, these documents have included a statement indicating the basis for the listing or reclassification, as well as the effective date(s) of the listing or other rules that changed how the species was identified in the list in paragraph (h) of this section.

(3) “Critical habitat” and “Species-specific” rules superscripts provide cross-references to other sections in part 17 or part 222, 223, or 226 of chapter II of this title where critical habitat and species-specific rules are found. The species-specific superscripts also identify experimental populations. Experimental populations (superscript “10j”) are a separate citation, with one of the following symbols in the “Status” column: “XE” for an essential ex-

perimental population and “XN” for a nonessential experimental population.

(4) This column is for reference and navigational purposes only. All other appropriate rules in part 17, parts 217 through 226 of chapter II of this title, and part 402 of chapter IV of this title apply, if no species-specific rules are referenced. In addition, other rules in this title could relate to such species (for example, port-of-entry requirements). The references in the “Listing Citations and Applicable Rules” column do not comprise a comprehensive list of all regulations that the Services might apply to the species or to the regulations of other Federal agencies or State or local governments.

(g) The Services will rely to the extent practicable on ITIS (<http://www.itis.gov>) and standard references adopted for CITES (<http://cites.org>).

(h) The “List of Endangered and Threatened Plants” is provided in the table in this paragraph (h):

Scientific name	Common name	Where listed	Status	Listing citations and applicable rules
FLOWERING PLANTS				
<i>Abronia macrocarpa</i> .....	Large-fruited sand-ver-bena.	Wherever found .....	E	53 FR 37975, 9/28/1988.
<i>Abutilon eremitopetalum</i> ....	No common name .....	Wherever found .....	E	56 FR 47686, 9/20/1991.
<i>Abutilon menziesii</i> .....	Ko’oloa’ula .....	Wherever found .....	E	51 FR 34412, 9/26/1986.
<i>Abutilon sandwicense</i> .....	No common name .....	Wherever found .....	E	56 FR 55770, 10/29/1991; 50 CFR 17.99(i). <sup>CH</sup>
<i>Acaena exigua</i> .....	Liliwai .....	Wherever found .....	E	57 FR 20772, 5/15/1992; 50 CFR 17.99(e)(1). <sup>CH</sup>
<i>Acanthomintha ilicifolia</i> .....	San Diego thornmint .....	Wherever found .....	T	63 FR 54938, 10/13/1998; 50 CFR 17.96(a). <sup>CH</sup>
<i>Acanthomintha obovata</i> ssp. <i>duttonii</i> .	San Mateo thornmint .....	Wherever found .....	E	50 FR 37858, 9/18/1985.
<i>Achyranthes mutica</i> .....	No common name .....	Wherever found .....	E	61 FR 53108, 10/10/1996; 50 CFR 17.99(k). <sup>CH</sup>
<i>Achyranthes splendens</i> var. <i>rotundata</i> .	Round-leaved chaff-flower	Wherever found .....	E	51 FR 10518, 3/26/1986; 50 CFR 17.99(i). <sup>CH</sup>
<i>Acmispon dendroideus</i> var. <i>traskiae</i> .	San Clemente Island lotus	Wherever found .....	T	42 FR 40685, 8/11/1977.
<i>Aconitum noveboracense</i> ..	Northern wild monkshood	Wherever found .....	T	43 FR 17910, 4/26/1978.
<i>Aeschynomene virginica</i> ....	Sensitive joint-vetch .....	Wherever found .....	T	57 FR 21569, 5/20/1992.
<i>Agalinis acuta</i> .....	Sandplain gerardia .....	Wherever found .....	E	53 FR 34701, 9/7/1988.
<i>Agave eggersiana</i> .....	No common name .....	Wherever found .....	E	79 FR 53303, 9/9/2014; 50 CFR 17.96(a). <sup>CH</sup>
<i>Alectryon macrococcus</i> .....	Mahoe .....	Wherever found .....	E	57 FR 20772, 5/15/1992; 50 CFR 17.99(a)(1). <sup>CH</sup> 50 CFR 17.99(c). <sup>CH</sup> 50 CFR 17.99(e). <sup>CH</sup> 50 CFR 17.99(i). <sup>CH</sup>

**Subpart C—Endangered Wildlife**

**§ 17.21 Prohibitions.**

(a) Except as provided in subpart A of this part, or under permits issued pursuant to § 17.22 or § 17.23, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit or to cause to be committed, any of the acts described in paragraphs (b) through (f) of this section in regard to any endangered wildlife.

(b) *Import or export.* It is unlawful to import or to export any endangered wildlife. Any shipment in transit through the United States is an importation and an exportation, whether or not it has entered the country for customs purposes.

(c) *Take.* (1) It is unlawful to take endangered wildlife within the United States, within the territorial sea of the United States, or upon the high seas. The high seas shall be all waters seaward of the territorial sea of the United States, except waters officially recognized by the United States as the territorial sea of another country, under international law.

(2) Notwithstanding paragraph (c)(1) of this section, any person may take endangered wildlife in defense of his own life or the lives of others.

(3) Notwithstanding paragraph (c)(1) of this section, any employee or agent of the Service, any other Federal land management agency, the National Marine Fisheries Service, or a State conservation agency, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take endangered wildlife without a permit if such action is necessary to:

(i) Aid a sick, injured or orphaned specimen; or

(ii) Dispose of a dead specimen; or  
 (iii) Salvage a dead specimen which may be useful for scientific study; or

(iv) Remove specimens which constitute a demonstrable but nonimmediate threat to human safety, provided that the taking is done in a humane manner; the taking may involve killing or injuring only if it has not been reasonably possible to eliminate such threat by live-capturing and releasing the specimen unharmed, in a remote area.

(4) Any taking under paragraphs (c)(2) and (3) of this section must be reported in writing to the Office of Law Enforcement, at the address provided at 50 CFR 2.1(b), within 5 days. The specimen may only be retained, disposed of, or salvaged under directions from the Office of Law Enforcement.

(5) Notwithstanding paragraph (c)(1) of this section, any qualified employee or agent of a State Conservation Agency which is a party to a Cooperative Agreement with the Service in accordance with section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties take those endangered species which are covered by an approved cooperative agreement for conservation programs in accordance with the Cooperative Agreement, provided that such taking is not reasonably anticipated to result in:

(i) The death or permanent disabling of the specimen;

(ii) The removal of the specimen from the State where the taking occurred;

(iii) The introduction of the specimen so taken, or of any progeny derived from such a specimen, into an area beyond the historical range of the species; or
