used, use charges must be assessed to those activities. For real property or equipment, the use charges must be at rates equivalent to those for which comparable real property or equipment may be leased.

(2) After Federal funding for the project ceases, or if, as may be determined by the contracting officer, the real property or equipment is no longer needed for the purposes of the project, or if the recipient suspends work on the project, the recipient may use the real property or equipment for other projects, if:

(i) There are Federally sponsored projects for which the real property or equipment may be used;

(ii) The recipient obtains written approval from the contracting officer to do so. The contracting officer must ensure that there is a formal change of accountability for the real property or equipment to a currently funded Federal award; and

(iii) The recipient’s use of the real property or equipment for other projects is in the same order of priority as described in paragraph (e)(1) of this section.

(iv) If the only use for the real property or equipment is for projects that have no Federal sponsorship, the recipient must proceed with disposition of the real property or equipment in accordance with paragraph (g) of this section.

(g) Disposition. (1) If, as determined by the contracting officer, an item of real property or equipment is no longer needed for Federally sponsored projects, or if the recipient has suspended work on the project, the recipient has the following options:

(i) If the property is equipment with a current per unit fair market value of less than $5,000, it may be retained, sold, or otherwise disposed of with no further obligation to DOE.

(ii) If the property is equipment (rather than real property) and with the written approval of the contracting officer, the recipient may replace it with an item that is needed currently for the project by trading in or selling to offset the costs of the replacement equipment.

(iii) The recipient may elect to retain title, without further obligation to the Federal Government, by compensating the Federal Government for that percentage of the current fair market value of the real property or equipment that is attributable to the Federal participation in the project.

(iv) If the recipient does not elect to retain title to real property or equipment or does not request approval to use equipment as trade-in or offset for replacement equipment, the recipient must request disposition instructions from the responsible agency.

(2) If a recipient requests disposition instructions, the contracting officer must:

(i) For either real property or equipment, issue instructions to the recipient for disposition of the property no later than 120 calendar days after the recipient’s request. The contracting officer’s options for disposition are to direct the recipient to:

(A) Transfer title to the real property or equipment to the Federal Government or to a third party designated by the contracting officer provided that, in such cases, the recipient is entitled to compensation for its attributable percentage of the current fair market value of the real property or equipment, plus any reasonable shipping or interim storage costs incurred; or

(B) Sell the real property or equipment and pay the Federal Government for that percentage of the current fair market value of the property that is attributable to the Federal participation in the project (after deducting actual and reasonable selling and fix-up expenses, if any, from the sale proceeds). If the recipient is authorized or required to sell the real property or equipment, the recipient must use competitive procedures that result in the highest practicable return.

(3) If the contracting officer fails to issue disposition instructions within 120 calendar days of the recipient’s request, the recipient must dispose of the real property or equipment through the option described in paragraph (g)(2)(1)(B) of this section.

[80 FR 53237, Sept. 3, 2015]

§ 910.362 Intellectual property.

(a) Scope. This section sets forth the policies with regard to disposition of
§ 910.362 2 CFR Ch. IX (1–1–18 Edition)

rights to data and to inventions conceived or first actually reduced to practice in the course of, or under, a grant or cooperative agreement made to a For-Profit entity by DOE.

(b) Patents right—small business concerns. In accordance with 35 U.S.C. 202, if the recipient is a small business concern and receives a grant, cooperative agreement, subaward, or contract for research, developmental, or demonstration activities, then, unless there are “exceptional circumstances” as described in 35 U.S.C. 202(e), the award must contain the standard clause in appendix A to this subpart, entitled “Patents Rights (Small Business Firms and Nonprofit Organizations” which provides to the recipient the right to elect ownership of inventions made under the award.

(c) Patent rights—other than small business concerns, e.g., large businesses—

(1) No Patent Waiver. Except as provided by paragraph (c)(2) of this section, if the recipient is a for-profit organization other than a small business concern, as defined in 35 U.S.C. 201(h) and receives an award or a subaward for research, development, and demonstration activities, then, pursuant to statute, the award must contain the standard clause in appendix A to this subpart, entitled “Patent Rights (Large Business Firms)—No Waiver” which provides that DOE owns the patent rights to inventions made under the award.

(2) Patent Waiver Granted. Paragraph (c)(1) of this section does not apply if:

(i) DOE grants a class waiver for a particular program under 10 CFR part 784;

(ii) The applicant requests and receives an advance patent waiver under 10 CFR part 784; or

(iii) A subaward is covered by a waiver granted under the prime award.

(3) Special Provision. Normally, an award will not include a background patent and data provision. However, under special circumstances, in order to provide heightened assurance of commercialization, a provision providing for a right to require licensing of third parties to background inventions, limited rights data and/or restricted computer software, may be included. Inclusion of a background patent and/or a data provision to assure commercialization will be done only with the written concurrence of the DOE program official setting forth the need for such assurance. An award may include the right to license the Government and third party contractors for special Government purposes when future availability of the technology would also benefit the government, e.g., clean-up of DOE facilities. The scope of any such background patent and/or data licensing provision is subject to negotiation.

(d) Rights in data—general rule. (1) Subject to paragraphs (d)(2) and (3) of this section, and except as otherwise provided by paragraphs (e) and (f) of this section or other law, any award under this subpart must contain the standard clause in appendix A to this subpart, entitled “Rights in Data—General”.

(2) Normally, an award will not require the delivery of limited rights data or restricted computer software. However, if the contracting officer, in consultation with DOE patent counsel and the DOE program official, determines that delivery of limited rights data or restricted computer software is necessary, the contracting officer, after negotiation with the applicant, may insert in the award the standard clause as modified by Alternates I and/or II set forth in appendix A to this subpart.

(3) If software is specified for delivery to DOE, or if other special circumstances exist, e.g., DOE specifying “open-source” treatment of software, then the contracting officer, after negotiation with the recipient, may include in the award special provisions requiring the recipient to obtain written approval of the contracting officer prior to asserting copyright in the software, modifying the retained Government license, and/or otherwise altering the copyright provisions.

(e) Rights in data—programs covered under special protected data statutes. (1) If a statute, other than those providing for the Small Business Innovation Research (SBIR) and Small Business Technology Transfer Research (STTR) programs, provides for a period of time, typically up to five years, during which
data produced under an award for research, development, and demonstration may be protected from public disclosure, then the contracting officer must insert in the award the standard clause in appendix A to this subpart entitled “Rights in Data—Programs Covered Under Special Protected Data Statutes” or, as determined in consultation with DOE patent counsel and the DOE program official, a modified version of such clause which may identify data or categories of data that the recipient must make available to the public.

(2) An award under paragraph (e)(1) of this section is subject to the provisions of paragraphs (d)(2) and (3) of this section.

(f) Rights in data—SBIR/STTR programs. If an applicant receives an award under the SBIR or STTR program, then the contracting officer must insert in the award the standard data clause in the General Terms and Conditions for SBIR Grants, entitled “Rights in Data—SBIR Program”.

(g) Authorization and consent. (1) Work performed by a recipient under a grant is not subject to authorization and consent to the use of a patented invention, and the Government assumes no liability for patent infringement by the recipient under 28 U.S.C. 1498.

(2) Work performed by a recipient under a cooperative agreement is subject to authorization and consent to the use of a patented invention consistent with the principles set forth in 48 CFR 27.201–1.

(3) The contracting officer, in consultation with patent counsel, may also include clauses in the cooperative agreement addressing other patent matters related to authorization and consent, such as patent indemnification of the Government by recipient and notice and assistance regarding patent and copyright infringement. The policies and clauses for these other patent matters will be the same or consistent with those in 48 CFR part 927.

§910.364 Reporting on utilization of subject inventions.

(a) Unless otherwise instructed, a recipient that obtains title to an invention made under an award shall submit annual reports on the utilization or efforts to obtain utilization of the invention for at least 10 years from the date the invention was first disclosed to DOE (Utilization Reports). Utilization Reports shall include at least the following information:

1. Status of development;
2. Date of first commercial sale or use;
3. Gross royalties received by the recipient;
4. The location of any manufacture of products embodying the subject invention; and
5. Any such other data and information as DOE may reasonably specify.

(b) To the extent data or information supplied in a Utilization Report is considered by the recipient to be privileged and confidential and is so marked by the recipient, DOE agrees that, to the extent permitted by law, it shall not disclose such information to persons outside the Government.

§910.366 Export Control and U.S. Manufacturing and Competitiveness.

(a) Export Control. Any recipient of any award for research, development and/or demonstration must comply with all applicable U.S. laws regarding export control.

(b) U.S. Manufacturing and Competitiveness. It is the policy of DOE to ensure that DOE-funded research, development, and/or demonstration projects foster domestic manufacturing. Funding announcements (FOAs), therefore, may require that applicants submit a “U.S. Manufacturing Plan” in their applications. Such FOAs may encourage U.S. Manufacturing Plans to include proposals by recipients and any sub-recipients to manufacture DOE-funded technologies in the United States; however, the FOAs will also state that these plans should not include requirements regarding the source of inputs used during the manufacturing process. Regardless of whether such plans will be part of the merit review criteria or a program policy factor, and to the extent legally permissible, all awards subject to this subpart, including subawards, for research, development, and/or demonstration, must include a provision that provides...
