[43 FR 25687, June 14, 1978, as amended at 46 FR 3884, Jan. 16, 1981; 51 FR 40677, Nov. 7, 1986]

§ 52.231 Regulations: Sulfur oxides.

(a) [Reserved]

(b) The deletion of the following rules or portions of rules is disapproved, since an adequate control strategy demonstration has not been submitted indicating that the deletions of the control requirements contained in those rules would not interfere with the attainment or maintenance of the National Ambient Air Quality Standard for Sulfur Oxides.

(1) Lake County Intrastate Region.

(i) Lake County, APCD.

(A) Section 3(F), *Sulfur* of Part V, *Prohibitions and Standards*, submitted on October 23, 1974 and previously approved under 40 CFR 52.223, is retained as applicable to sources other than sulfur recovery units.

[43 FR 34464, 34466, Aug. 4, 1978, as amended at 46 FR 3884, Jan. 16, 1981; 46 FR 42461, Aug. 21, 1981]

§ 52.232 Part D conditional approval.

(a) The following portions of the California SIP contain deficiencies with respect to Part D of the Clean Air Act which must be corrected by meeting the indicated conditions of Part D plan approval.

(1) [Reserved]

(2) North Central Coast Air Basin for ozone.

(i) By May 7, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 and 40 CFR 51.18, ''Review of new sources and modifications.'' In revising the Monterey Bay Unified APCD's NSR rules, the State/APCD must address (*a*) any new requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (August 7, 1980, 45 FR 52676) which the APCD rules do not now satisfy and (*b*) those deficiencies with respect to the September 5, 1979 notice cited in EPA's Evaluation Report Addendum (contained in Document File NAP–CA–14 at the EPA Library in Washington, DC and the Region IX office).

(ii) By March 4, 1981, one of the following must be submitted as an SIP revision: (*a*) Adequate justification that the cutback asphalt rule represents RACT, (*b*) amendment of the cutback asphalt rule to conform with the controls recommended in the CTG document for cutback asphalt, or (*c*) adequate documentation that the cutback asphalt rule will result in emission reductions which are within 5 percent of the reductions achievable with the controls recommended in the cutback asphalt CTG document.

(3) South Coast Air Basin.

(i)(A) By May 7, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 of the Clean Air Act and 40 CFR 51.18, ''Review of new sources and modifications.'' In revising the South Coast AQMD's NSR rules, the State/AQMD must address (*1*) any new requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the AQMD rules do not currently satisfy and (*2*) those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in Document File NAP–CA–9 at the EPA Library in Washington, DC and the Regional Office).

(4) San Diego Air Basin.

(i) For ozone, CO, TSP, and NO_2:

(A) By May 7, 1981, the NSR rules submitted on March 17, 1980 must be revised and submitted as an SIP revision. In revising the NSR rules, the State/APCD must address (*1*) any new requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980, 45 FR 31307; and August 7, 1980, 45 FR 52676) which the APCD rules do not currently satisfy and (*2*) the deficiencies cited in EPA's *Evaluation Report Addendum* which still apply despite EPA's new NSR requirements. The *Evaluation Report Addendum* is contained in document file NAP–CA–19 and available at the EPA Region IX Office and the EPA Library in Washington, DC

(5) The Kern County APCD.

(i) For PM:

(A) By November 19, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy section 173 of the Clean Air Act and 40 CFR Subpart I, ''Review of new sources and modifications.'' In revising Kern County's NSR rules, the State/APCD must address all the requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the APCD rules do not currently satisfy including those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in document File NAP–CA–07 at the EPA Library in Washington, DC and the Regional Office).

(ii) [Reserved]

(6) [Reserved]

(7) San Francisco Bay Area Air Basin.

(i) For ozone and CO:

(A) By June 17, 1982, submittal of implementation commitments and schedules and additional commitments to provide annually the financial and personnel resources necessary to carry out the plan for transportation sources.

(8) [Reserved]

(9) The Santa Barbara County nonattainment areas.

(i) For O_3, TSP, and CO by (90 days from the date of publication of this notice).

(A) The new source review (NSR) rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) and submitted as an SIP revision.

(ii) For O_3 by (90 days from the date of publication of this notice), a revised cutback asphalt paving materials rule which does not allow for indefinite compliance date extensions and submitted as an SIP revision.

(10)–(11) [Reserved]

(12) Butte, Sutter and Yuba County APCDs.

(i) For Ozone:

(A) By August 2, 1982, the NSR rules for the counties discussed in this notice must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980, 45 FR 31307 and August 7, 1980, 45 FR 52676).

(13) Los Angeles and Riverside portions of the Southeast Desert Air Basin.

(i) For Ozone:

(A) By August 9, 1982, the new source review rules for the three county areas must be revised to meet the requirements in EPA's amended regulations under section 173 (May 13, 1980, (45 FR 31307), August 7, 1980, (45 FR 52676), and October 14, 1981, (46 FR 50766)).

(B) By August 9, 1982, the State must provide adopted regulations for degreasing operations in the Los Angeles County portion of the SEDAB which represent RACT.

(14)–(15) [Reserved]

(16) San Bernardino County portion of the Southeast Desert Air Basin.

(i) For ozone:

(A) By October 30, 1985, the NSR rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980 (45 FR 31307), August 7, 1980 (45 FR 52676), and October 14, 1981 (46 FR 50766)).

(17) Yolo and Solano Counties.

(i) For ozone and CO in those portions of Yolo and Solano Counties that are part of the Sacramento Metropolitan Area:

(A) By October 30, 1985, the NSR rules must be revised to meet the requirements in EPA's amended regulations for NSR under section 173 of the Clean Air Act (May 13, 1980 (45 FR 31307), August 7, 1980 (45 FR 52676), and October 14, 1981 (46 FR 50766)).

(ii) For ozone:

By November 1, 1982, the State must provide either (A) an adequate demonstration that the following regulations represent RACT, (B) amend the regulations so that they are consistent with the CTG, or (C) demonstrate that the regulations will result in VOC emission reductions which are within five percent of the reductions which would be achieved through the implementation of the CTG recommendations:

Yolo-Solano County APCD

Rule 2.24, ''Solvent Cleaning Operations (Degreasing).''

[45 FR 74485, Nov. 10, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.232, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.233 Review of new sources and modifications.

(a) The following regulations are disapproved because they are not consistent with Clean Air Act requirements.

(1) [Reserved]

(2) Monterey Bay Unified APCD.

(i) Subparagraph B.5. of Rule 207, *Standards for Permit to Construct,* submitted March 17, 1980.

(3) South Coast AQMD.

(i) In Rule 1306(a)(i), submitted on April 3, 1980, sentence 3 is disapproved.

(ii) In Rule 1306(d)(1)(B)(ii), submitted on April 3, 1980, the following portion of the rule is disapproved: ''Which have occurred during the highest three years of the last five year period, divided by three, provided the applicant demonstrates that such permit units have been operated at least 90 days during each of such three years.''

(iii) In Rule 1307(a) submitted on April 3, 1980, the following portion of the rule is disapproved: ''Greater than 68 kilograms (150 pounds) per day except carbon monoxide, for which the value is an increase greater than 340 kilograms (750 pounds) per day.''

(4) Kern County APCD.

(i) Those portions of paragraph (3)(E) of Rule 210.1, submitted on April 15, 1980, which allow new sources and modifications to be exempt from LAER.

(b) [Reserved]

(c) The requirements of § 51.160(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations of the APCD's do not provide the means to prevent construction of sources which would violate applicable portions of the control strategy or would interfere with the attainment or maintenance of a national standard.

(1) Mariposa County APCD.

(2) Santa Barbara County APCD.

(d) The requirements of § 51.160(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations of the APCD's do

not include a means to prevent construction or modification if such construction or modification would interfere with the attainment or maintenance of a national standard.

(1) Amador County APCD.

(2) Calaveras County APCD.

(3) El Dorado County APCD (Mountain Counties Intrastate portion).

(4) [Reserved]

(5) Glenn County APCD.

(6) Humboldt County APCD.

(7)–(8) [Reserved]

(9) Lake County APCD.

(10) Lassen County APCD.

(11) [Reserved]

(12) [Reserved]

(13) [Reserved]

(14) Modoc County APCD.

(15) Monterey Bay Unified APCD.

(16) Nevada County APCD.

(17) [Reserved]

(18) [Reserved]

(19) Plumas County APCD.

(20) [Reserved]

(21) Shasta County APCD.

(22) Sierra County APCD.

(23) Siskiyou County APCD.

(24) [Reserved]

(25) Sutter County APCD.

(26) [Reserved]

(27) Tuolumne County APCD.

(e) [Reserved]

(f) *Regulation for review of new sources and modifications.* (1) The requirements of this paragraph are applicable to:

(i) Any stationary source in the APCD's listed below, the construction or modification of which is commenced after the effective date of this regulation.

(*a*) Mariposa County APCD.

(*b*) [Reserved]

(*c*) Santa Barbara County APCD.

(ii) Any stationary source subject to the requirements of §§ 52.226(c), 52.227(c), 52.228(b), or 52.230(b), the construction or modification of which is commenced after the effective date of this regulation.

(2) No owner or operator shall commence construction or modification of a stationary source after the effective date of this regulation without first obtaining approval from the Administrator of the location and design of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator, or by other means prescribed by the Administrator.

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, plans, descriptions, specifications, and drawings showing the design of the source, the nature and amount of emissions, and the manner in which it will be operated and controlled.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant shows to the satisfaction of the Administrator that:

(i) The source will be operated without causing a violation of any local, State, or Federal regulations which are part of the applicable plan.

(ii) The source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (f)(4)(ii) of this section, shall be the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(*a*) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(*b*) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other materials, if any, considered by the Administrator in making his preliminary determination; and

(*c*) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this paragraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Administrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on the application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and shall set forth his reasons for ocnditional approval or denial. Such notification shall be made available for public inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (f)(4)(ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may impose any reasonable conditions upon an approval, including conditions requiring the source to be provided with:

(i) Sampling ports of a size, number, and location as the Administrator may require,

(ii) Safe access to each port,

(iii) Instrumentation to monitor and record emission data, and

(iv) Any other sampling and testing facilities.

(6) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(7) Any owner or operator subject to the provisions of this regulation shall furnish the Administrator written notification as follows:

(i) A notification of the anticipated date or initial startup of the source not more than 60 days or less than 30 days prior to such date.

(ii) A notification of the actual date of initial startup of the source within 15 days after such date.

(8) Within 60 days after achieving the maximum production rate at which the source will be operated but not later than 180 days after initial startup of such source the owner or operator of such source shall conduct a performance test(s) in accordance with methods and under operating conditions approved by the Administrator and furnish the Administrator a written report of the results of such performance test.

(i) Such test shall be at the expense of the owner or operator.

(ii) The Administrator may monitor such test and may also conduct performance tests.

(iii) The owner or operator of a source shall provide the Administrator 15 days prior notice of the performance test to afford the Administrator the opportunity to have an observer present.

(iv) The Administrator may waive the requirement for performance tests if the owner or operator of a source has demonstrated by other means to the Administrator's satisfaction that the source is being operated in compliance with all local, State and Federal regulations which are part of the applicable plan.

(9) Approval to construct or modify shall not be required for:

(i) The installation or alteration of an air pollutant detector, air pollutants recorder, combustion controller, or combustion shutoff.

(ii) Air-conditioning or ventilating systems not designed to remove air pollutants generated by or released from equipment.

(iii) Fuel burning equipment, other than smokehouse generators which has a heat input of not more than 250 MBtu/h (62.5 billion g-cal/h) and burns only gaseous fuel containing not more than 0.5 grain H_2 S per 100 $stdft^3$ (5.7 g/100 $stdm^3$); has a heat input of not more than 1 MBtu/h (250 Mg-cal/h) and burns only distillate oil; or has a heat input of not more than 350,000 Btu/h (88.2 Mg-cal/h) and burns any other fuel.

(iv) Mobile internal combustion engines.

(v) Laboratory equipment used exclusively for chemical or physical analyses.

(vi) Other sources of minor significance specified by the Administrator.

(10) Approval to construct or modify shall not relieve any person of the responsibility to comply with any local, State, or Federal regulation which is part of the applicable plan.

(11) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for any receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(g) *Regulation for review of new sources and modifications.* (1) The requirements of this paragraph are applicable to any stationary source in the APCD's listed below, the construction or modification of which is commenced after the effective date of this regulation.

(i) Amador County APCD.

(ii) Calaveras County APCD.

(iii) El Dorado County APCD (Mountain Counties Intrastate portion).

(iv) [Reserved]

(v) Glenn County APCD.

(vi) Humboldt County APCD.

(vii)–(viii) [Reserved]

(ix) Lassen County APCD.

(x) Madera County APCD.

(xi) Mendocino County APCD.

(xii) Merced County APCD.

(xiii) Modoc County APCD.

(xiv) Monterey Bay Unified APCD.

(xv) Nevada County APCD.

(xvi) [Reserved]

(xvii) Plumas County APCD.

(xviii) San Joaquin County APCD.

(xix) Shasta County APCD.

(xx) Sierra County APCD.

(xxi) Siskiyou County APCD.

(xxii) Stanislaus County APCD.

(xxiii) Sutter County APCD.

(xxiv) Tulare County APCD.

(xxv) Tuolumne County APCD.

(2) No owner or operator shall commence construction or modification of any new source after the effective date of this regulation without first obtaining approval from the Administrator of the location of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator, or by other means prescribed by the Administrator.

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, stack data, and the nature and amount of emissions. Such information shall be sufficient to enable the Administrator to make any determination pursuant to paragraph (g)(3) of this section.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant shows to the satisfaction of the Administrator that the source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (g)(4)(ii) of this section, shall be the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(*a*) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(*b*) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other materials, if any, considered by the Administrator in making his preliminary determination; and

(*c*) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this subparagraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Administrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on an application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and shall set forth his reasons for conditional approval or denial. Such notification shall be made available for public inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (g)(4) (ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(6) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with any local, State, or Federal regulation which is part of the applicable plan.

(7) Approval to construct or modify shall not be required for:

(i) The installation or alteration of an air pollutant detector, air pollutants recorder, combustion controller, or combustion shutoff.

(ii) Air-conditioning or ventilating systems not designed to remove air pollutants generated by or released from equipment.

(iii) Fuel burning equipment, other than smokehouse generators, which has a heat input of not more than 250 MBtu/h (62.5 billion g-cal/h) and burns only gaseous fuel containing not more than 20.0 grain H_2 S per 100 $stdft^3$ (54.8 g/100 $stdm^3$); has a heat input of not more than 1 MBtu/h (250 Mg-cal/h) and burns only distillate oil; or has a heat input of not more than 350,000 Btu/h (88.2 Mg-cal/h) and burns any other fuel.

(iv) Mobile internal combustion engines.

(v) Laboratory equipment used exclusively for chemical or physical analyses.

(vi) Other sources of minor significance specified by the Administrator.

(8) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for and receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(h)–(i) [Reserved]

(j) *Delegation of authority.* (1) The Administrator shall have the authority to delegate responsibility for implementing the procedures for conducting source review pursuant to this section in accordance with paragraphs (j) (2), (3), and (4) of this section.

(2) Where the Administrator delegates the responsibility for implementing the procedures for conducting source review pursuant to this section to any Agency, other than a Regional Office of the Environmental Protection Agency, a copy of the notice pursuant to paragraphs (f)(4)(iii) and (g)(4)(iii) of this section shall be sent to the Administrator through the appropriate Regional Office.

(3) In accordance with Executive Order 11752, the Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be delegated, other than to a Regional Office of the Environmental Protection Ands; except that, with respect to the latter category, where new or modified sources are constructed or operated on Federal lands pursuant to leasing or other Federal agreements, the Federal Land Manager may at his discretion, to the extent permissible under applicable statutes and regulations, require the lessee or permittee to be subject to new source review requirements which have been delegated to a state or local agency pursuant to this paragraph.

(4) The Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be redelegated, other than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are located in Indian reservations except where the State has assumed jurisdiction over such land under other laws, in which case the Administrator may delegate his authority to the States in accordance with paragraphs (j) (2), (3), and (4) of this section.

(k) *Conditions on steam production.* (1) Notwithstanding any provisions to the contrary in the California State Implementation Plan, the Watson petroleum refinery owned by Atlantic Richfield Company, located at 1801 East Sepulveda Boulevard, Carson, California, shall operate under the following conditions listed in paragraphs (k)(2) through (6) of this section.

(2) The total steam load comprised of the steam purchased from Watson Energy Systems and the amount generated by boilers #31, #32, #33, #42, #51, and #52 at the ARCO Watson Refinery shall not exceed 1,355,000 pounds per hour at 680 °F, 600 psig.

(3) Continuous written records of steam purchased from Watson Energy Systems and of the steam produced by boilers #31, #32, #42, #51, or #52 at the ARCO Watson Refinery, during receipt of steam from Watson Energy Systems, shall be maintained and made available for inspection by the EPA and the South Coast Air Quality Management District. These records shall be kept in terms of pounds per hour of steam at 680 °F, 600 psig.

(4) The steam purchased from the Watson Energy Systems facility shall be used as a ''first-on, last-off'' source of steam for the ARCO Watson Refinery, except for steam produced by waste heat or as part of the refining process, or as required to maintain fired boilers in service for emergency use.

(5) Any proposed changes in equipment or fuel that would increase the oil fired steam generating capacity or decrease oil fired steam generating efficiency of boilers #31, #32, #33, #42, #51, and #52 at the ARCO Watson Refinery must be reviewed and approved by the EPA prior to implementation of the proposed changes.

(6) ARCO shall maintain written records of oil consumption at boilers #31, #32, #33, #42, #51, and #52 during receipt of steam from Watson Energy Systems. These records shall be available for inspection by the South Coast Air Quality Management District and the EPA. The total oil consumption of these boilers shall not exceed a monthly average of 226,000 gallons per day when receiving steam from the Watson Energy systems plant at a rate of 350,000 pounds per hour. When receiving steam at a lower rate, ARCO shall be allowed to increase its boiler fuel oil consumption to achieve a total steam load not to exceed the limit of condition two (2).

(l) The following rules and regulations are disapproved because they do

not meet the requirements of sections 110, 172, and 173 of the Clean Air Act, since they exempt certain source categories from the offset requirements of the Act:

(1) South Coast Air Quality Management District.

(i) Rule 1304(e), Resource Conservation and Energy Projects, submitted on April 3, 1980, but only with respect to projects whose application for a permit is complete after January 1, 1986,

(ii) Rule 1304(b)(2), Resource and Energy Conservation Projects, submitted on November 8, 1982, but only with respect to projects whose application for a permit is complete after January 1, 1986,

(m) Revised South Coast Regulation XIII, submitted on November 8, 1982, is not approved inasmuch as action on it is temporarily deferred.

[37 FR 19813, Sept. 22, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.233, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.234 Source surveillance.

(a) Except in the Air Pollution Control Districts (APCDs) listed in this paragraph, the requirements of § 51.211 of this chapter are not met since the plan does not provide for recordkeeping and periodic reporting of emission data by sources.

(1) Amador County APCD.
(2) Bay Area AQMD.
(3) Calaveras County APCD.
(4) Del Norte County APCD.
(5) El Dorado County APCD.
(6) Humboldt County APCD.
(7) Imperial County APCD.
(8) Lake County APCD.
(9) Mariposa County APCD.
(10) Mendocino County APCD.
(11) Nevada County APCD.
(12) Northern Sonoma County APCD.
(13) Placer County APCD.
(14) Plumas County APCD.
(15) Sierra County APCD.
(16) Trinity County APCD.
(17) Ventura County APCD.

(b) The requirements of § 51.212 of this chapter are not met since the plan does not adequately provide for periodic testing and inspection of stationary sources within the Bay Area Air Pollution Control District portion of the San Francisco Bay Area Intrastate Region.

(c) The requirements of § 51.212 of this chapter are not met since the system for detecting violations through enforcement of visible emission regulations and complaint handling is not adequately described.

(d) *Regulation for source recordkeeping and reporting.* (1) The owner or operator of any stationary source in the State of California, except for those APCD's specified in paragraph (a) of this section, shall, upon notification from the Administrator, maintain records of the nature and amounts of emissions from such source and/or any other information as may be deemed necessary by the Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures.

(2) The information recorded shall be summarized and reported to the Administrator, on forms furnished by the Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31, except that the initial reporting period shall commence on the date the Administrator issues notification of the recordkeeping requirements.

(3) Information recorded by the owner or operator and copies of the summarizing reports submitted to the Administrator shall be retained by the owner or operator for 2 years after the date on which the pertinent report is submitted.

(e) The requirements of § 51.214 of this chapter are not met in the following air pollution control districts (APCD's) since all of the applicable requirements of Appendix P of part 51 are not included in the district regulations.

(1) Amador County APCD.
(2) Bay Area AQMD
(3) Calaveras County APCD.
(4) El Dorado County APCD.
(5) Imperial County APCD.
(6) Kern County APCD.
(7) Kings County APCD.
(8) Los Angeles County APCD.
(9) Mariposa County APCD.
(10) Monterey Bay Unified APCD.
(11) Nevada County APCD.

(12) Placer County APCD.
(13) Plumas County APCD.
(14) San Bernardino County Desert APCD.
(15) San Diego County APCD.
(16) San Joaquin County APCD.
(17) San Luis Obispo County APCD.
(18) Santa Barbara County APCD.
(19) Sierra County APCD.
(20) South Coast AQMD.
(21) Stanislaus County APCD.
(22) Tulare County APCD.
(23) Ventura County APCD.

[37 FR 10850, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.234, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.235 Control strategy for ozone: Oxides of nitrogen.

EPA is approving an exemption request submitted by the Monterey Bay Unified Air Pollution Control District on April 26, 1994 for the Monterey Bay ozone nonattainment area from the NO_X RACT requirements contained in section 182(f) of the Clean Air Act. This approval exempts the area from implementing the oxides of nitrogen (NO_X) requirements for reasonably available control technology (RACT), new source review (NSR), the related requirements of general and transportation conformity regulations, and applicable inspection and maintenance (I/M). The exemption is based on ambient air monitoring data and lasts for only as long as the area's monitoring efforts continue to demonstrate attainment without NO_X reductions from major stationary sources.

[60 FR 20237, Apr. 25, 1995]

§ 52.236 Rules and regulations.

(a) Since the following Air Pollution Control District (APCD) rules do not define the term ''agricultural operations,'' the rules are disapproved because they could render certain emission limitations rules unenforceable.

(1) Imperial County APCD.

(i) Rule 114.5, submitted on November 10, 1976.

(ii) Rule 148.D(3), submitted on November 10, 1976.

(b) The following Air Pollution Control District (APCD) rules are disapproved because they contain the term ''agricultural operations'' and/or the term ''other equipment in agricultural operations,'' both of which are either undefined or inadequately defined, thus rendering certain emission control rules unenforceable:

(1) San Luis Obispo County APCD.

(i) Rules 401(B)(4) and 401(B)(6), submitted on November 10, 1976.

(2) Sacramento County APCD.

(i) Rule 7(b)(5), submitted on November 4, 1977.

(3) Glenn County APCD.

(i) Section 77(e), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(4) Mariposa County APCD.

(i) Rule 203(G), submitted on June 6, 1977.

(5) Kern County APCD.

(i) Rules 402(c) and 402(e), submitted on; November 10, 1976.

(6) Fresno County APCD.

(i) Rules 402(c) and 402(e), submitted on October 23, 1974.

(ii) Rules 402(c) and 402(e), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(7) Tulare County APCD.

(i) Section 402(c), submitted on November 10, 1976, and previously approved under 40 CFR 52.223 (42 FR 47556).

(8) Madera County APCD.

(i) Rules 402(c) and 402(e), submitted on January 10, 1975, and previously approved under 40 CFR 52.223 (42 FR 42219).

(9) Amador County APCD.

(i) Rules 203(G), submitted on October 15, 1979, and 205(G), submitted on June 30, 1972.

(c) Since the following Air Pollution Control Districts have deleted definitions which could allow a relaxation of emission limitations, the deletions are disapproved:

(1) Merced County APCD.

(i) Rule 102(hh), submitted on June 30, 1972, previously approved under 40 CFR 52.223, and deleted by the August 2, 1976 submittal, is retained.

(2) El Dorado County APCD.

(i) Rule 102(LL), submitted on November 4, 1977, previously approved at

43 FR 51632, and deleted by the May 23, 1979 submittal, is retained.

(d) The following rules or portions of rules are disapproved since they contain provisions which are inconsistent with 40 CFR part 58, Ambient Air Quality Surveillance.

(1) Lake County APCD.

(i) Section 224, *Equivalent Method*, and Table V, *Table of Standards, Applicable Statewide*, submitted on February 10, 1977.

(ii) Table V, *Concentrations and Methods*, submitted on January 2, 1979, and Table V, submitted on February 10, 1976 and previously approved at 42 FR 42224.

(e) Since the following air pollution control districts have revised definitions so as to render the associated emission control requirements less stringent without a control strategy demonstration, the revisions are disapproved.

(1) Mendocino County APCD.

(i) Rule 130(p4), submitted on November 10, 1976. (Part III–49, previously submitted on February 21, 1972, and approved in 40 CFR 52.223, is retained).

(ii) Rule 130(s3), submitted on November 10, 1976. (Part III–55, previously submitted on February 21, 1972, and approved in 40 CFR 52.233, is retained).

(2) Shasta County APCD.

(i) The definition of ''modification'' in Rule 1:2, *Definitions*, submitted on October 13, 1977, is disapproved.

(3) San Bernardino County Desert APCD.

(i) Rule 103, *Definition of Terms*, submitted on November 4, 1977, is disapproved with respect to the deletion of the following terms: ''Distilling type heater'', ''Noncomplying orchard heater'', ''Pipe line systems'', and ''Return stack heater''. (Rule 2, *Definitions*, submitted on February 21, 1972 and approved in 40 CFR 52.223, is retained for the above terms.)

(4) Southeast Desert Intrastate Region.

(i) San Bernardino County Desert APCD.

(A) Rule 102, *Definition of Terms*, submitted November 4, 1977 is disapproved with respect to the deletion of the following terms: Distilling type heater, Non-complying orchard heater, Pipe line systems, and Return stack heater. Rule 2, *Definitions*, submitted February 21, 1972 and approved in 40 CFR 52.223, is retained for the above terms.

(f) The following APCD rules are disapproved because they exempt some portions of the districts from the existing air pollution control regulations without setting forth substitute rules for the exempted areas.

(1) El Dorado County APCD.

(i) Rule 201, submitted on November 4, 1977, is disapproved. (The previously approved Rule 49, submitted on June 30, 1972, is retained for Federal enforcement purposes.)

(g) The following Air Pollution Control District (APCD) rules are disapproved pursuant to section 110(a)(2)(K) of the Clean Air Act because they could allow recovery of legal expenses associated with permit enforcement actions.

(1) Monterey Bay Unified APCD.

(i) Rule 300 (i)(1), *Permit Fee*, submitted on December 17, 1979.

(2) El Dorado County APCD.

(i) Rule 104, submitted on May 23, 1979.

[42 FR 39664, Aug. 5, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.236, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.237 Part D disapproval.

(a) The following portions of the California SIP are disapproved because they do not meet the requirements of Part D of the Clean Air Act.

(1) The ozone and CO attainment demonstrations for the South Coast Air Basin. No major stationary source, or major modification of a stationary source, of carbon monoxide or volatile organic compounds may be constructed in the South Coast Air Basin unless the construction permit application is complete on or before August 30, 1988.

(2) The ozone attainment demonstration for Ventura County. No major stationary source, or major modification of a stationary source, of volatile organic compounds may be constructed in the Ventura County nonattainment area unless the construction permit application is complete on or before November 4, 1988.

(3) The ozone attainment demonstration for the Sacramento AQMA. No

major stationary source, or major modification of a stationary source, of volatile organic compounds may be constructed in the Sacramento nonattainment area unless the construction permit application is complete on or before January 3, 1989.

(4) The ozone attainment demonstration for the Fresno County APCD.

(5) The ozone attainment demonstration for the Kern County APCD.

(6) The attainment assessment, motor vehicle emissions budgets, and Reasonably Available Control Measure (RACM) portions of the San Francisco Bay Area Ozone Attainment Plan for the 1–Hour National Ozone Standard, June 1999.

(7) [Reserved]

(8) The contingency measure portion of the 2008 $PM_{2.5}$ Plan for attainment of the 1997 $PM_{2.5}$ standards in the San Joaquin Valley (June 2013).

(b) The following Reasonably Available Control Technology (RACT) determinations are disapproved because they do not meet the requirements of Part D of the Clean Air Act.

(1) Sacramento Air Quality Management District.

(i) RACT Determinations for the Pharmaceutical Products Manufacturing Source Category and the Kiefer Landfill (volatile organic compounds only), in the submittal titled ''Reasonably Available Control Technology (RACT) as Applicable to the 8-Hour Ozone Standard,'' dated October 26, 2006, as adopted on October 26, 2006 and submitted on July 11, 2007.

(ii) [Reserved]

(2) [Reserved]

[46 FR 5979, Jan. 21, 1981, as amended at 48 FR 53118, Nov. 25, 1983; 50 FR 35798; Sept. 4, 1985; 53 FR 1781, Jan. 22, 1988; 53 FR 39088, Oct. 5, 1988; 53 FR 48537, Dec. 1, 1988; 55 FR 9878, 9880, Mar. 16, 1990; 56 FR 2853, Jan. 25, 1991; 66 FR 48347, Sept. 20, 2001; 81 FR 22032, Apr. 14, 2016; 81 FR 29501, May 12, 2016; 81 FR 53283, Aug. 12, 2016; 83 FR 5927, Feb. 12, 2018]

§ 52.238 Commitment to undertake rulemaking.

(a) The Administrator shall undertake rulemaking, after the South Coast mobile source public consultative process, to promulgate any VOC and NO_X mobile source controls which are determined to be appropriate for EPA and needed for ozone attainment in the Los Angeles-South Coast Air Basin Area.

(b) [Reserved]

[62 FR 1187, Jan. 8, 1997]

§ 52.239 Alternate compliance plans.

(a) Alternative compliance plans (bubble plans) developed under the District rules listed below must be submitted to EPA by the State of California as SIP revisions. The emission limits contained in the District rule will continue to be enforceable by EPA and private citizens under sections 113 and 304(a) of the Act until the alternative compliance plans are approved by EPA for inclusion in the SIP.

(1) Bay Area AQMD.

(i) Rule 4 of Regulation 8, submitted on February 7, 1980.

(b) Alternative compliance plans (bubble plans) developed under the District rules listed below are considered the applicable requirements in the SIP which are enforceable by EPA and private citizens under section 113 and 304(a) of the Act. Alternative compliance plans must be submitted to EPA after their approval by the District. The District rules do not apply to or supersede the conditions that a source must meet under nonattainment or PSD permit programs, new source performance standards, or national emission standards for hazardous air pollutants.

(1) Bay Area AQMD.

(i) Rules 11, 13 and 19 of Regulation 8, submitted on February 7, 1980.

[47 FR 11870, Mar. 19, 1982]

§ 52.240 Compliance schedules.

(a) The requirements of § 51.262(a) of this chapter are not met in the following Air Pollution Control Districts since the regulations cited do not provide increments to progress toward compliance.

(1) Rules 50–A, 52–A, 53–A(a), 53–A(b), 53–A(c), 53.2, 53.3, 54.A, 58.A, 62.1, 68, 69, 70, and 71 of the San Bernardino County APCD.

(2) Rules 53, 72.1, and 72.2 of the Riverside County APCD.

(3) Rules 53, 66.c, and 68.a of the Orange County APCD.

(4) Rule 39.1 of the Santa Barbara County APCD.

(5) Rule 59 of the Ventura County APCD.

(6) Rule 66(c) of the Los Angeles County APCD.

(7) Rule 4.5 of the Siskiyou County APCD.

(8) Rule 64(c) of the Northern Sonoma County APCD.

(9) Rule 409 of the Tulare County APCD.

(b) The requirements of §51.261 are not met since Rule 68.a of the Orange County Air Pollution Control District does not provide for compliance within 3 years after the Administrator's approval of the plan.

(c) Federal compliance schedule. (1) Except as provided in paragraph (c)(2) of this section, the owner or operator of any stationary source subject to Rule 68.a of the Orange County Air Pollution Control District shall comply with such rule or regulation on or before January 31, 1974.

(i) Any owner or operator in compliance with this rule on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this paragraph.

(ii) Any owner or operator who achieves compliance with such rule or regulation after the effective date of this regulation shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(2) Any owner or operator of a stationary source subject to paragraph (c)(1) of this section may, not later than 120 days following the effective date of this paragraph, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the rules and regulations specified in paragraph (c)(1) of this section as expeditiously as practicable but no later than July 31, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: Submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emissioncontrol equipment or process modification; and final compliance.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(d) Regulation for increments of progress. (1) The requirements of this paragraph are applicable to any stationary source in the following Air Pollution Control Districts subject to the indicated regulations.

(i) Rules 50–A, 52–A, 53–A(a), 53–A(b), 53–A(c), 53.2, 53.3, 54.A, 58.A, 62.1, 68, 69, 70, and 71 of the San Bernardino County APCD.

(ii) Rules 53, 72.1, and 72.2 of the Riverside County APCD.

(iii) Rules 53 and 66.c of the Orange County APCD.

(iv) Rule 39.1 of the Santa Barbara County APCD.

(v) Rule 59 of the Ventura County APCD.

(vi) Rules 66(c) and 68 of the Los Angeles County APCD.

(vii) Rule 4.5 of the Siskiyou County APCD.

(viii) Rule 64(c) of the Northern Sonoma County APCD.

(ix) Rule 409 of the Tulare County APCD.

(2) Except as provided in paragraph (3) of this section, the owner or operator of any stationary source shall, no later than 120 days following the effective date of this paragraph, submit to the Administrator for approval, a proposed compliance schedule that demonstrates compliance with the applicable regulations as expeditiously as practicable but no later than the final compliance date specified by such applicable regulation. The compliance schedule shall provide for periodic increments of progress toward compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but

not be limited to: Submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(3) Where any such owner or operator demonstrates to the satisfaction of the Administrator that compliance with the applicable regulations will be achieved on or before January 31, 1974, no compliance schedule shall be required.

(4) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(5) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(e) [Reserved]

(f) State compliance schedules. (1) [Reserved]

(2) The compliance schedules for the sources identified below are disapproved as not meeting the requirements of Subpart N of this chapter. All regulations cited are air pollution control regulations of the county in which the source is located, unless otherwise indicated.

Source	Location (county)	Rule or regulation involved	Date of adoption	Effective date	Final compliance date
Simpson Lee Paper Co. (Order No. 72–V–7)	Shasta ..	3.2	Oct. 31, 1973.	Immediately	Jan. 15, 1976.
Monolith Portland Cement Co. (Order No. 73–6 as amended Mar. 11, 1974).	Kern	401(b), 404.1, 406 ..	Dec. 31, 1973.	.....do	July 1, 1976.

[37 FR 19814, Sept. 22, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.240, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.241 Inspection and maintenance program.

(a) [Reserved]

(b) *Approval.* On June 5, 2009, the California Air Resources Board submitted a revision to the California Motor Vehicle Inspection and Maintenance Program (2009 I/M Revision) to satisfy the requirements for basic and enhanced motor vehicle inspection and maintenance (I/M) in applicable ozone nonattainment areas. On October 28, 2009, the California Air Resources Board amended the 2009 I/M Revision to include revised enhanced performance program evaluations for six nonattainment areas. Approved elements of the 2009 I/M Revision, as amended on October 28, 2009, include a discussion of each of the required design elements of the I/M program; description of the current geographic coverage of the program; I/M-related statutes and regulations; enhanced I/M performance standard evaluations for the urbanized areas within six California ozone nonattainment areas (South Coast Air Basin, San Joaquin Valley, Sacramento Metro, Coachella Valley, Ventura County, and Western Mojave Desert); basic I/M performance standard evaluation for the urbanized area within the San Francisco Bay Area ozone nonattainment area; and emission analyzer specifications and test procedures, including BAR–97 specifications. The 2009 I/M Revision, as amended on October 28, 2009, meets the requirements of sections 182(a)(2)(B) and 182(c)(3) of the Clean Air Act, as amended in 1990, and 40 CFR part 51, subpart S and is approved as a revision to the California State Implementation Plan.

[75 FR 38026, July 1, 2010]

§ 52.242 Disapproved rules and regulations.

(a) The following Air Pollution Control District rules are disapproved because they do not meet the requirements of section 110 of the Clean Air Act.

(1) South Coast Air Quality Management District.

(i) Rule 1623, Credits for Lawn and Garden Equipment, submitted on August 28, 1996 and adopted on May 10, 1996.

(ii) Rule 118, Emergencies, submitted on May 21, 1998.

(iii) Rule 1175, ''Control of Emissions from the Manufacturing of Polymeric Cellular (Foam) Products,'' submitted on March 7, 2008 and adopted on September 7, 2007.

(iv) Rule 511.1, ''Subpoenas,'' submitted on February 7, 1989.

(v) Rule 503.1, ''Ex Parte Petitions for Variances,'' submitted on February 7, 1989.

(vi) Rule 504, ''Rules from which Variances Are Not Allowed,'' submitted on May 13, 1991.

(vii) Rule 1610, ''Old-Vehicle Scrapping,'' submitted on June 3, 1997.

(viii) Rule 2202, ''On-Road Motor Vehicle Mitigation Options,'' submitted on June 3, 1999.

(2) Antelope Valley Air Pollution Control District.

(i) Rule 118, Emergencies, submitted on March 10, 1998.

(3) Imperial County Air Pollution Control District.

(i) Rule 401, Opacity of Emissions submitted on May 26, 2000. Rule 401 submitted on June 9, 1987, is retained.

(4) San Joaquin Valley Unified Air Pollution Control District.

(i) Rule 4101, Visible Emissions, submitted on December 6, 2001 and adopted on November 15, 2001.

(5) Kern County Air Pollution Control District.

(i) Rule 203, Transfer, submitted on July 23, 1996 and amended on May 2, 1996. Rule 203, submitted on June 30, 1972, is retained.

(6) Monterey Bay Unified Air Pollution Control District

(i) Rule 400, Visible Emissions, submitted on March 7, 2008. Rule 400 submitted on January 15, 2004, is retained.

[65 FR 10717, Feb. 29, 2000, as amended at 66 FR 49297, Sept. 27, 2001; 67 FR 62385, Oct. 7, 2002; 69 FR 1273, Jan. 8, 2004; 72 FR 63110, Nov. 8, 2007; 75 FR 25778, May 10, 2010; 75 FR 37730, June 30, 2010; 81 FR 4891, Jan. 28, 2016]

§ 52.243 Interim approval of the Carbon Monoxide plan for the South Coast.

The Carbon Monoxide plan for the Los Angeles-South Coast Air Basin is approved as meeting the provisions of sections 171(1), 172(c)(2), and 187(a)(7) for quantitative milestones and reasonable further progress, and the provisions of section 187(a)(7) for attainment demonstration. This approval expires on August 7, 1998, or earlier if by such earlier date the State has submitted as a SIP revision a demonstration that the carbon monoxide emission reduction credits for the enhanced motor vehicle inspection and maintenance program are appropriate and that the program is otherwise in compliance with the Clean Air Act and EPA takes final action approving that revision, as provided by section 348(c) of the National Highway System Designation Act (Public Law 104–59).

[63 FR 19662, Apr. 21, 1998]

§ 52.244 Motor vehicle emissions budgets.

(a) Approval of the motor vehicle emissions budgets for the following ozone rate-of-progress and attainment SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

(1) Antelope Valley, approved January 8, 1997;

(2) Coachella, approved January 8, 1997;

(3) Kern, approved January 8, 1997;

(4) Mojave, approved January 8, 1997;

(5) Sacramento, approved January 8, 1997;

(6) South Coast, approved April 10, 2000;

(7) Ventura, approved January 8, 1997.

(8) South Coast, approved October 31, 2019.

(9) Ventura County, approved March 30, 2020.

(10) Imperial, approved March 30, 2020.

(b) Approval of the motor vehicle emissions budgets for the following ozone maintenance SIP will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

(1) Monterey, approved January 17, 1997.

(2) [Reserved]

(c) Approval of the motor vehicle emissions budgets for the following carbon monoxide maintenance SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

(1) Bakersfield, approved March 31, 1998;

(2) Chico, approved March 31, 1998;

(3) Fresno, approved March 31, 1998;

(4) Lake Tahoe-North, approved March 31, 1998;

(5) Lake Tahoe-South, approved March 31, 1998;

(6) Modesto, approved March 31, 1998;

(7) Sacramento, approved March 31, 1998;

(8) San Diego, approved March 31, 1998;

(9) San Francisco Bay Area, approved March 31, 1998;

(10) Stockton, approved March 31, 1998.

(d) Approval of the motor vehicle emissions budgets for the following nitrogen dioxide maintenance SIP will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

(1) South Coast, approved on July 24, 1998.

(2) [Reserved]

(e) Approval of the motor vehicle emissions budgets for the following PM–10 reasonable further progress and attainment SIPs will apply for transportation conformity purposes only until new budgets based on updated planning data and models have been submitted and EPA has found the budgets to be adequate for conformity purposes.

(1) South Coast, approved April 18, 2003.

(2) Coachella Valley, approved April 18, 2003.

[67 FR 69146, Nov. 15, 2002, as amended at 68 FR 19317, 19319, Apr. 18, 2003; 84 FR 52015, Oct. 1, 2019; 85 FR 11817, 11822, Feb. 27, 2020]

§ 52.245 New Source Review rules.

(a) Approval of the New Source Review rules for the San Joaquin Valley Unified Air Pollution Control District Rules 2020 and 2201 as approved on May 17, 2004 in § 52.220(c)(311)(i)(B)(*1*), and in effect for Federal purposes from June 16, 2004 through June 10, 2010, is limited, as it relates to agricultural sources, to the extent that the permit requirements apply:

(1) To agricultural sources with potential emissions at or above a major source applicability threshold; and

(2) To agricultural sources with actual emissions at or above 50 percent of a major source applicability threshold.

(b) Approval of the New Source Review rules for the San Joaquin Valley Unified Air Pollution Control District Rules 2020 and 2201 as approved on May 17, 2004 in § 52.220(c)(311)(i)(B)(*1*), and in effect for Federal purposes from June 16, 2004 through June 10, 2010, is limited, as it relates to agricultural sources, to the extent that the emission offset requirements apply to major agricultural sources and major modifications of such sources.

(c) By May 7, 2016, the New Source Review rules for $PM_{2.5}$ for the San Joaquin Valley Unified Air Pollution Control District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 1997 $PM_{2.5}$ NAAQS.

(d) By August 14, 2017, the New Source Review rules for $PM_{2.5}$ for the South Coast Air Quality Management District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections

189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 2006 $PM_{2.5}$ NAAQS.

(e) By February 21, 2017, the New Source Review rules for $PM_{2.5}$ for the San Joaquin Valley Unified Air Pollution Control District must be revised and submitted as a SIP revision. The rules must satisfy the requirements of sections 189(b)(3) and 189(e) and all other applicable requirements of the Clean Air Act for implementation of the 2006 $PM_{2.5}$ NAAQS.

[78 FR 46514, Aug. 1, 2013, as amended at 80 FR 18533, Apr. 7, 2015; 81 FR 1520, Jan. 13, 2016; 81 FR 3000, Jan. 20, 2016]

§ 52.246 Control of dry cleaning solvent vapor losses.

(a) For the purpose of this section, ''dry cleaning operation'' means that process by which an organic solvent is used in the commercial cleaning of garments and other fabric materials.

(b) This section is applicable in the Metropolitan Los Angeles, Sacramento Valley, and San Joaquin Valley Intrastate Air Quality Control Regions (the ''Regions''), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

(ii) Placer County APCD (Mountain Counties Air Basin portion).

(iii) Yuba County APCD.

(iv) Sutter County APCD.

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded:

(i) Ventura County APCD.

(3) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded:

(i) San Joaquin County APCD.

(ii) Stanislaus County APCD.

(iii) Tulare County APCD.

(iv) Fresno County APCD.

(c) Any dry cleaning establishment that uses solvents containing 4 percent or more by volume of any reactive organic material listed under paragraphs (k) (1), (2), and (3) of §52.254 except perchloroethylene or any saturated halogenated hydrocarbon shall reduce the emissions of the discharged organics by 90 percent by use of activated carbon adsorption, or other appropriate means, not later than January 1, 1975.

(d) If incineration is used as a control technique, 90 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide.

[38 FR 31246, Nov. 12, 1973, as amended at 42 FR 41122, Aug. 15, 1977; 42 FR 42226, Aug. 22, 1977; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 26385, June 18, 1982; 47 FR 28622, July 1, 1982; 47 FR 29670, July 8, 1982; 47 FR 50865, Nov. 10, 1982]

§ 52.247 Control Strategy and regulations: Fine Particle Matter.

(a) *Determination of Attainment:* Effective February 8, 2013, EPA has determined that, based on 2009 to 2011 ambient air quality data, the San Francisco Bay Area $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour $PM_{2.5}$ NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 $PM_{2.5}$ NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(b) *Determination of Attainment:* Effective February 11, 2013, EPA has determined that, based on 2009 to 2011 ambient air quality data, the Yuba City-Marysville $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour $PM_{2.5}$ NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 $PM_{2.5}$ NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(c) *Determination of Attainment:* Effective August 14, 2013, EPA has determined that, based on 2010 to 2012 ambient air quality data, the Sacramento $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour $PM_{2.5}$ NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour $PM_{2.5}$ NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(d) *Determination of Attainment:* Effective October 10, 2013, EPA has determined that, based on 2010 to 2012 ambient air quality data, the Chico $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour $PM_{2.5}$ NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour $PM_{2.5}$ NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(e) By August 14, 2017, California must adopt and submit a Serious Area plan to provide for attainment of the 2006 $PM_{2.5}$ NAAQS in the South Coast $PM_{2.5}$ nonattainment area. The Serious Area plan must include emissions inventories, an attainment demonstration, best available control measures, a reasonable further progress plan, quantitative milestones, contingency measures, and such other measures as may be necessary or appropriate to provide for attainment of the 2006 $PM_{2.5}$ NAAQS by the applicable attainment date, in accordance with the requirements of subparts 1 and 4 of part D, title I of the Clean Air Act.

(f) By August 21, 2017, California must adopt and submit a Serious Area plan to provide for attainment of the 2006 $PM_{2.5}$ NAAQS in the San Joaquin Valley $PM_{2.5}$ nonattainment area. The Serious Area plan must include emissions inventories, an attainment demonstration, best available control measures, a reasonable further progress plan, quantitative milestones, contingency measures, and such other measures as may be necessary or appropriate to provide for attainment of the 2006 $PM_{2.5}$ NAAQS by the applicable attainment date, in accordance with the requirements of subparts 1 and 4 of part D, title I of the Clean Air Act.

(g) *Determination of Attainment:* Effective August 24, 2016, the EPA has determined that, based on 2011 to 2013 ambient air quality data, the South Coast $PM_{2.5}$ nonattainment area has attained the 1997 annual and 24-hour $PM_{2.5}$ NAAQS. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures and other planning SIPs related to attainment for as long as this area continues to attain the 1997 annual and 24-hour $PM_{2.5}$ NAAQS. If the EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 1997 $PM_{2.5}$ NAAQS, the corresponding determination of attainment for the area shall be withdrawn.

(h) *Determination of Failure to Attain:* Effective December 23, 2016, the EPA has determined that the San Joaquin Valley Serious $PM_{2.5}$ nonattainment area failed to attain the 1997 annual and 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. This determination triggers the requirements of CAA sections 179(d) and 189(d) for the State of California to submit a revision to the California SIP for the San Joaquin Valley to the EPA by December 31, 2016. The SIP revision must, among other elements, demonstrate expeditious attainment of the 1997 $PM_{2.5}$ NAAQS within the time period provided under CAA section 179(d) and that provides for annual reduction in the emissions of direct $PM_{2.5}$ or a $PM_{2.5}$ plan precursor pollutant within the area of not less than five percent until attainment.

(i) *Determination of attainment.* Effective May 12, 2017, EPA has determined that, based on 2013 to 2015 ambient air quality data, the Imperial County $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS. Under the provisions of EPA's $PM_{2.5}$ implementation rule (see 40 CFR 51.1015), this determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment for as long as this area continues to attain the 2006 24-hour $PM_{2.5}$ NAAQS. If EPA determines, after notice-and-comment rulemaking, that this area no longer meets the 2006 24-hour $PM_{2.5}$ NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(j) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Chico, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Chico, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(k) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Imperial County, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Imperial County, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(l) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the Sacramento, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the Sacramento, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

(m) *Determination of attainment.* Effective June 9, 2017, the EPA has determined that, based on 2013 to 2015 ambient air quality data, the San Francisco Bay, CA $PM_{2.5}$ nonattainment area has attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date of December 31, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 188(b)(2) to determine whether the area attained the standard. The EPA also has determined that the San Francisco Bay, CA nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 188(b)(2).

[78 FR 1761, Jan. 9, 2013, as amended at 78 FR 2213, Jan. 10, 2013; 78 FR 42021, July 15, 2013; 78 FR 55228, Sept. 10, 2013; 81 FR 1520, Jan. 13, 2016; 81 FR 42264, June 29, 2016; 81 FR 48355, July 25, 2016; 81 FR 84483, Nov. 23, 2016; 82 FR 13398, Mar. 13, 2017; 82 FR 21715, May 10, 2017]

§ 52.248 Identification of plan—conditional approval.

(a) The EPA is conditionally approving a California State Implementation Plan (SIP) revision submitted on November 13, 2015 updating the motor vehicle emissions budgets for nitrogen oxides (NO_X) and coarse particulate matter (PM_{10}) for the 1987 24-hour PM_{10} standard for the San Joaquin Valley PM_{10} maintenance area. The conditional approval is based on a commitment from the State to submit a SIP revision that demonstrates full implementation of the contingency provisions of the 2007 PM_{10} Maintenance Plan and Request for Redesignation (September 20, 2007). If the State fails to meet its commitment by June 1, 2017, the approval is treated as a disapproval.

(b) The EPA is conditionally approving portions of the California SIP revisions submitted on January 31, 2007 and

October 23, 2015, demonstrating control measures in the Antelope Valley portion of the Los Angeles-San Bernardino Counties (West Mojave Desert) nonattainment area implement RACT for the 1997 and 2008 ozone standards. The conditional approval is based on a commitment from the state to submit new or revised rules that will correct deficiencies in the rules listed in paragraphs (b)(1) through (4) of this section by November 9, 2018. If the State fails to meet its commitment by November 9, 2018, the conditional approval is treated as a disapproval.

(1) [Reserved]

(2) Rule 1110.2, *Emissions from Stationary, Non-road & Portable Internal Combustion Engines*;

(3) Rule 1151, *Motor Vehicle and Mobile Equipment Coating Operations*; and

(4) [Reserved]

(c) [Reserved]

(d)(1) The EPA is conditionally approving portions of the California SIP revisions submitted on July 11, 2007 and September 9, 2015, demonstrating control measures in the Mojave Desert portion of the Los Angeles-San Bernardino Counties (West Mojave Desert) nonattainment area implement RACT for the 1997 and 2008 ozone standards. The conditional approval is based on a commitment from the state to submit new or revised rules that will correct deficiencies in the following rules for the Mojave Desert Air Quality Management District:

(i)–(vi) [Reserved]

(vii) Rule 1157, *Boilers and Process Heaters;*

(viii) Rule 1160, *Internal Combustion Engines;*

(ix) Rule 1161, *Portland Cement Kilns;* and

(x) [Reserved]

(2) If the State fails to meet its commitment by January 31, 2019, the conditional approval is treated as a disapproval.

(e) The EPA is conditionally approving California State Implementation Plan (SIP) revisions submitted on June 17, 2016, updating New Source Review permitting rules for the San Diego Air Pollution Control District (SDAPCD). The conditional approval is based on a commitment from the State to submit a SIP revision that will correct identified deficiencies in the following rules for the SDAPCD:

(1) Rule 20.1, ''New Source Review—General Provisions'';

(2) Rule 20.2, ''New Source Review—Non-Major Stationary Sources'' (except subsections (d)(2)(i)(B), (d)(2)(v), (d)(2)(vi)(B) and (d)(3));

(3) Rule 20.3, ''New Source Review—Major Stationary Sources and PSD Stationary Sources'' (except subsections (d)(1)(vi), (d)(2)(i)(B), (d)(2)(v), (d)(2)(vi)(B) and (d)(3));

(4) Rule 20.4, ''New Sources Review—Portable Emission Units'' (except subsections (b)(2), (b)(3), (d)(1)(iii), (d)(2)(i)(B), (d)(2)(iv), (d)(2)(v)(B), (d)(3) and (d)(5)); and

(5) Rule 20.6, ''Standards for Permit to Operate Air Quality Analysis.'' If the State fails to meet its commitment by July 31, 2019, the conditional approval is treated as a disapproval.

(f) The EPA is conditionally approving a California State Implementation Plan (SIP) revision submitted on May 8, 2017, updating Rule 1325—Federal $PM_{2.5}$ New Source Review Program, for the South Coast Air Quality Management District. The conditional approval is based on a commitment from the State to submit a SIP revision that will correct the identified deficiencies. If the State fails to meet its commitment by December 30, 2019, the conditional approval is treated as a disapproval.

(g) The EPA is conditionally approving the California State Implementation Plan (SIP) for San Joaquin Valley for the 2008 ozone NAAQS with respect to the contingency measure requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the San Joaquin Valley Unified Air Pollution Control District (District) dated October 18, 2018 to adopt specific rule revisions, and a commitment from the California Air Resources Board (CARB) dated October 30, 2018 to submit the amended District rule to the EPA within 12 months of the effective date of the final conditional approval. If the District or CARB fail to meet their commitment within one year of the effective date of the final conditional approval, the conditional approval is treated as a disapproval.

(h) The EPA is conditionally approving the California State Implementation Plan (SIP) for the South Coast for the 2008 ozone NAAQS with respect to the reasonable further progress (RFP) contingency measure requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the South Coast Air Quality Management District (District) in a letter dated January 29, 2019, and clarified in a letter dated May 2, 2019, to adopt specific rule revisions, and a commitment from the California Air Resources Board (CARB) dated February 13, 2019 to submit the amended District rule or rules to the EPA within 12 months of the effective date of the final conditional approval. If the District or CARB fail to meet their commitments within one year of the effective date of the final conditional approval, the conditional approval is treated as a disapproval.

(i) The EPA is conditionally approving a portion of the California SIP revision submitted on November 14, 2017 demonstrating that control measures in the Imperial County Air Pollution Control District implement RACT for the 2008 8-hour National Ambient Air Quality Standards. The conditional approval is based on a commitment from the state to submit new or revised rules that will correct deficiencies in Rule 415, *Transfer and Storage of Gasoline* to establish RACT-level controls for sources covered by the Control Techniques Guidelines source category Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals (EPA–450/2–77–026). If the State fails to meet it commitment by one year from the date of this conditional approval, the conditional approval is treated as a disapproval.

[82 FR 46926, Oct. 10, 2017, as amended at 82 FR 57135, Dec. 4, 2017; 83 FR 5923, Feb. 12, 2018; 83 FR 23374, May 21, 2018; 83 FR 50010, Oct. 4, 2018; 83 FR 61552, Nov. 30, 2018; 84 FR 11207, Mar. 25, 2019; 84 FR 19682, May 3, 2019; 84 FR 31684, 31686, July 2, 2019; 84 FR 52015, Oct. 1, 2019; 85 FR 8185, Feb. 13, 2020; 85 FR 11814, Feb. 27, 2020; 85 FR 25295, May 1, 2020]

EFFECTIVE DATE NOTE: At 85 FR 38086, June 25, 2020, §52.248 was amended by adding paragraph (j), effective July 27, 2020. For the convenience of the user, the added text is set forth as follows:

§52.248 Identification of plan—conditional approval.

* * * * *

(j) The EPA is conditionally approving the California State Implementation Plan (SIP) for Ventura County for the 2008 ozone NAAQS with respect to the contingency measures requirements of CAA sections 172(c)(9) and 182(c)(9). The conditional approval is based on a commitment from the Ventura County Air Pollution Control District (District) in a letter dated August 16, 2019, to adopt a specific rule revision, and a commitment from the California Air Resources Board (CARB) dated August 30, 2019, to submit the amended District rule to the EPA within 12 months of the effective date of the final conditional approval. If the District or CARB fail to meet their commitments within one year of the effective date of the final conditional approval, the conditional approval is treated as a disapproval.

§§52.249–52.251 [Reserved]

§52.252 Control of degreasing operations.

(a) ''Degreasing'' means any operation using an organic solvent as a surface cleaning agent prior to fabricating, surface coating, electroplating, or any other process.

(b) This section is applicable in the Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (the ''Regions''), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

(ii) Placer County APCD (Mountain Counties Air Basin portion).

(iii) Yuba County APCD.

(iv) Sutter County APCD.

(c) Any organic emissions discharged from degreasing operations must either be reduced by at least 85 percent, or the degreasing solvent must be classified as non-photochemically reactive as defined by paragraph (k) of §52.254 not later than January 1, 1975. This regulation shall not be construed as lessening any emission control requirement specified under EPA approved regulations or §52.254. Degreasing operations using perchloroethylene or saturated halogenated hydrocarbons shall

be exempt from the requirements of this section.

[38 FR 31249, Nov. 12, 1973, as amended at 42 FR 42226, Aug. 22, 1977; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 19332, May 5, 1982; 47 FR 28622, July 1, 1982]

§ 52.253 Metal surface coating thinner and reducer.

(a) All terms defined in § 52.254 are used herein with the meanings so defined.

(b) This section is applicable in the Metropolitan Los Angeles, San Diego, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (the ''Regions''), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the Sacramento Valley Intrastate Region, this section is either fully rescinded or partially rescinded subject to the conditions specified as follows:

(i) Sacramento County APCD.

(ii) Placer County APCD (Mountain Counties Air Basin portion).

(iii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Yolo-Solano County Rule 2.25 submitted on February 25, 1980.

(iv) Yuba County APCD.

(v) Sutter County APCD.

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is either fully rescinded or partially rescinded subject to the conditions specified as follows:

(i) This section is fully rescinded for the Ventura County APCD.

(ii) This section is rescinded for magnet wire insulators, can and coil coaters, metal parts coaters, and auto assembly line coaters which are subject to and in full compliance with Rules 1107, 1115, 1125, and 1126 in the South Coast AQMD.

(iii) This section is rescinded for metal parts coaters that are subject to and in full compliance with Rule 330 submitted on October 18, 1979, in the Santa Barbara County APCD.

(3) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded for certain sources subject to the conditions specified:

(i) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Kern County Rule 410.4, submitted on October 15, 1979.

(ii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Madera County APCD's Rule 410.4 submitted on October 10, 1980.

(iii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Merced County Rule 409.4 submitted on October 10, 1980.

(iv) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with San Joaquin County Rule 409.4 submitted on October 10, 1980.

(v) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Stanislaus County Rule 410.4 submitted on October 10, 1980.

(vi) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Tulare County Rule 410.4 submitted on October 10, 1980.

(vii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Kings County Rule 410.4 submitted on October 10, 1980.

(viii) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with Fresno County Rule 409.4 submitted on October 15, 1979.

(4) In the San Francisco Bay Area Intrastate Region this section is rescinded for certain operations, subject to the conditions specified below:

(i) This section is rescinded for metal container, closure and coil coating operations, light and medium-duty motor vehicle assembly plants, large appliance and metal furniture coaters, and miscellaneous metal parts and products coating operations, which are subject to and in full compliance with Rules 11, 13, 14, and 19 of Regulation 8 in the Bay Area AQMD.

(5) In the San Diego Intrastate Region, this section is rescinded:

(i) This section is rescinded for metal parts and products coaters which are subject to and in full compliance with

San Diego APCD Rule 67.3, submitted on October 25, 1979.

(c) The composition of the organics in all metal surface coating thinners and reducers that are manufactured after January 1, 1975, and are used in the Regions, shall conform to paragraph (k) of § 52.254 so as to be defined as a nonphotochemically reactive solvent.

(d) After July 1975, the composition of the organics in all metal surface coating thinners and reducers that are used in the Regions, shall conform to paragraph (k) of § 52.254 so as to be defined as a non-photochemically reactive solvent.

(e) If there is an inadequate supply of necessary solvent ingredients needed in the manufacture of metal surface coating thinners and reducers for the purpose of meeting the composition requirements of this section in the time constraint required by this section; then evidence of such a supply inadequacy must be presented to the Administrator by the manufacturers of the metal surface coating thinners and reducers, so that the Administrator may grant to the industry an appropriate implementation time extension for meeting the requirements of this section, if and as warranted by the evidence presented.

[38 FR 31249, Nov. 12, 1973, as amended at 42 FR 28123, June 2, 1977; 46 FR 5979, Jan. 21, 1981; 46 FR 42461, Aug. 21, 1981; 47 FR 11870, Mar. 19, 1982; 47 FR 15586, Apr. 12, 1982; 47 FR 18856, May 3, 1982; 47 FR 19332, May 5, 1982; 47 FR 19698, May 7, 1982; 47 FR 24308, June 4, 1982; 47 FR 28622, July 1, 1982]

§ 52.254 Organic solvent usage.

(a) This section is applicable in the Sacramento Valley, San Francisco Bay Area, and San Joaquin Valley Intrastate Air Quality Control Regions (the ''Regions''), as described in 40 CFR part 81, dated July 1, 1979, except as follows:

(1) In the following portions of the San Joaquin Valley Region, only the hourly emission limitations contained in paragraphs (b), (c), and (d) of this section are in effect; the following paragraphs, needed for interpretation are also in effect: Paragraphs (e) through (l) and (o) through (q) of this section. In addition, this section is entirely rescinded for specific operations for some of the counties noted below:

(i) This section is rescinded entirely for metal parts and products coaters which are subject to and in full compliance with Rule 409.4 for the Fresno County APCD, Rule 410.4 for the Kings County APCD, Rule 410.4 for the Madera County APCD, Rule 409.4 for the Merced County APCD, Rule 409.4 for the San Joaquin County APCD, Rule 409.4 for the Stanislaus County APCD, and Rule 410.4 for the Tulare County APCD.

(ii) Kern County APCD. This section is rescinded entirely for metal parts and product coaters which are subject to and in full compliance with Rule 410.4.

(iii) Fresno County APCD.

(iv) San Joaquin County APCD.

(v) Madera County APCD.

(vi) Merced County APCD.

(2) In the following portions of the San Joaquin Valley Region, only the hourly emission limitations contained in paragraphs (b), (c), and (d) of this section and the architectural coatings and solvent disposal emission limitations contained in paragraphs (m) and (n) of this section are in effect; the following paragraphs, needed for interpretation and enforcement of these emission limitations, are also in effect: Paragraphs (e) through (l) and (o) through (q) of this section.

(i) Kings County APCD.

(3) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

(ii) Yolo-Solano APCD.

(iii) Shasta County APCD.

(iv) Placer County APCD (Mountain Counties Air Basin portion).

(v) Yuba County APCD.

(vi) Sutter County APCD.

(vii) El Dorado County (Mountain Counties Air Basin portion).

(4) This section is rescinded for the San Francisco Bay Area Intrastate Region except for paragraph (d), which is retained until December 31, 1982 for sources constructed prior to October 2, 1974. The following paragraphs, needed for interpretation and enforcement of paragraph (d) are also in effect: Paragraphs (e) through (l) and (o) through (q) of this section.

(5) In the following portions of the Sacramento Valley Intrastate Region, paragraph (m) of this section is rescinded.

(i) Butte County APCD.

(ii) Sutter County APCD.

(b) No person shall discharge into the atmosphere more than 15 pounds of organic materials in any 1 day or more than 3 pounds in any 1 hour from any article, machine, equipment, or other contrivance in which any organic solvent or any material containing organic solvent comes into contact with flame or is baked, heat-cured, or heat-polymerized in the presence of oxygen, unless said discharge has been reduced by at least 85 percent. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing continuous web, strip, or wire that emit organic materials in the course of using operations described in this section shall be collectively subject to compliance with this section.

(c) A person shall not discharge to the atmosphere more than 40 pounds of organic materials in any 1 day or more than 8 pounds in any 1 hour from any article, machine, equipment, or other contrivance used under conditions other than those described in paragraph (b) of this section for employing or applying any photochemically reactive solvent, as defined in paragraph (k) of this section, or material containing such photochemically reactive solvent, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air- or heated-drying of products for the first 12 hours after their removal from any article, machine, or other contrivance described in this section shall be included in determining compliance with this paragraph. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing a continuous web, strip, or wire that emit organic materials in the course of using operations described in this section shall be collectively subject to compliance with this section.

(d) A person shall not, after August 31, 1976, discharge into the atmosphere more than 3,000 pounds of organic materials in any 1 day or more than 450 pounds in any 1 hour from any article, machine, equipment, or other contrivance in which any non-photochemically reactive organic solvent or any material containing such a solvent is employed or applied, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air- or heated-drying of products for the first 12 hours after their removal from any article, machine, equipment, or other contrivance described in this section shall be included in determining compliance with this section. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing a continuous web, strip, or wire that emit organic materials in the course of using operations described in this section shall be collectively subject to compliance with this section.

(e) Emissions of organic materials to the atmosphere from the cleaning with photochemically reactive solvent, as defined in paragraph (k) of this section, of any article, machine, equipment, or other contrivance described in paragraph (b), (c), or (d) of this section, shall be included with the other emissions of organic materials for determining compliance with this rule.

(f) Emissions of organic materials into the atmosphere required to be controlled by paragraph (b), (c), or (d) of this section, shall be reduced by:

(1) Incineration, provided that 90 percent or more of the carbon in the organic material being incinerated is oxidized to carbon dioxide, or

(2) Adsorption, or

(3) Processing in a manner determined by the Administrator to be not less effective than the methods outlined in paragraph (f) (1) or (2) of this section.

(g) A person incinerating, adsorbing, or otherwise processing organic materials pursuant to this section shall provide, properly install and maintain in calibration, in good working order and in operation, devices as specified in the authority to construct or permit to operate, or as specified by the Administrator, for indicating temperatures, pressures, rates of flow, or other operating conditions necessary to determine the degree and effectiveness of air pollution control.

(h) Any person using organic solvents or any materials containing organic solvents shall supply the Administrator upon request and in the manner and form prescribed by him, written evidence of the chemical composition, physical properties, and amount consumed for each organic solvent used.

(i) The provisions of this section shall not apply to:

(1) The manufacture of organic solvents, or the transport or storage of organic solvents or materials containing organic solvents.

(2) The use of equipment for which other requirements are specified by rules or which are exempted from air pollution control requirements by applicable rules affecting the storage of petroleum products, effluent oil-water separators, and the transfer of gasoline.

(3) The spraying or other employment of insecticides, pesticides, or herbicides.

(4) The employment, application, evaporation, or drying of saturated halogenated hydrocarbons or perchloroethylene.

(5) The use of any material in any article, machine, equipment, or other contrivance described in paragraph (b), (c), (d), or (e) of this section, if:

(i) The volatile content of such materials consists only of water and organic solvent, and

(ii) The organic solvents comprise not more than 20 percent by volume of said volatile content, and

(iii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame. This last stipulation applies only for those articles, machines, equipment, or contrivances that are constructed or modified after the effective date of this section.

(6) The use of any material in any article, machine, equipment or other contrivance described in paragraph (b), (c), (d), or (e) of this section, if:

(i) The organic solvent content of such material does not exceed 30 percent by volume of said material; this to be effective until January 1, 1977. After January 1, 1977, the organic solvent content of such material must not exceed 20 percent by volume of said material.

(ii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame. This last stipulation applies only for those articles, machines, equipment, or contrivances that are constructed or modified after the effective date of this section.

(j) For the purposes of this section, organic solvents include diluents, thinners, and reducers and are defined as organic materials that are liquids at standard conditions and are used as dissolvers, viscosity reducers, or cleaning agents, except that such materials exhibiting a boiling point higher than 220 °F at 0.5 millimeter mercury absolute pressure or having an equivalent vapor pressure shall not be considered to be solvents unless exposed to temperatures exceeding 220 °F.

(k) For the purpose of this section, a photochemically reactive solvent is any solvent with an aggregate of more than 20 percent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

(1) A combination of hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones having an olefinic or cycloolefinic type of unsaturation; 5 percent;

(2) A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene,

phenyl acetate, and methyl benzoate; 8 percent;

(3) A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene: 20 percent.

Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is, that group having the least allowable percent of the total volume of solvents.

(l) For the purpose of this section, organic materials are defined as chemical compounds of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbonates, and ammonium carbonate.

(m) Architectural coatings and their use shall conform to the following requirements, on or before January 1, 1975:

(1) A person shall not sell or offer for sale or use in the areas in which this section applies, in containers of 1-quart capacity or larger, any architectural coating containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(2) A person shall not employ, apply, evaporate, or dry in the areas in which this section applies, any architectural coating purchased in containers of 1–quart capacity or larger containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(3) A person shall not thin or dilute any architectural coating with a photochemically reactive solvent, as defined in paragraph (k) of this section.

(4) For the purpose of this section, an architectural coating is defined as a coating used for residential or commercial buildings and their appurtenances, or for industrial buildings.

(n) A person shall not during any one day dispose of a total of more than 1.5 gallons of any photochemically reactive solvent as defined in paragraph (k) of this section, or of any material containing more than 1.5 gallons of any such photochemically reactive solvent by any means that will permit the evaporation of such solvent into the atmosphere.

(o) *Compliance schedule.* (1) Except where other final compliance dates are provided in this section, the owner or operator of any stationary source subject to this section shall comply with this section on or before March 31, 1974. In any event:

(i) Any owner or operator in compliance with this section on the effective date of this section shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(ii) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(p) Any owner or operator of a stationary source subject to paragraph (o)(1) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions in paragraph (o)(1) of this section as expeditiously as practicable but no later than July 31, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to:

Submittal of a final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification and final compliance.

(q) Any owner or operator who submits a compliance schedule pursuant to this section shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

[38 FR 31249, Nov. 12, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.254, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.255 Gasoline transfer vapor control.

(a) ''Gasoline'' means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Los Angeles and Sacramento Valley Intrastate Air Quality Control Regions, as described in 40 CFR part 81, dated July 1, 1979, with the following exceptions:

(1) The control requirements of this section are limited to facilities with a total throughput less than 20,000 gallons per day, the refilling of delivery vessels at these facilities, and storage containers serviced by these facilities for those air pollution control districts identified below.

(i) Ventura County APCD.

(2) The control requirements of this section are rescinded in the following air pollution control districts.

(i) South Coast AQMD.

(ii) Santa Barbara County APCD.

(iii) Placer County APCD (Mountain Counties Air Basin portion).

(iv) Sacramento County APCD.

(v) Yolo-Solano County APCD.

(vi) Butte County APCD.

(vii) Glenn County APCD.

(viii) El Dorado County APCD (Mountain Counties Air Basin portion).

(3) The control requirements of this section are rescinded in the following air pollution control districts:

(i) South Coast AQMD.

(ii)–(viii) [Reserved]

(ix) Santa Barbara County APCD.

(x) Placer County APCD (Mountain Counties Air Basin portion).

(xi) Sacramento County APCD.

(xii) Yolo-Solano County APCD.

(xiii) Butte County APCD.

(xiv) Glenn County APCD.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight return line from the storage container to the delivery vessel and a system that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) If a ''vapor-tight vapor return'' system is used to meet the requirements of this section, the system shall be so constructed as to be readily adapted to retrofit with an adsorption system, refrigeration-condensation system, or equivalent vapor removal system, and so constructed as to anticipate compliance with § 52.256.

(3) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling.

(iii) Facilities that do not have more than a 20,000 gallon per day throughput, and distribute less than 10% of daily volume to delivery vehicles that in turn service storage tanks that are required to have a vapor return or balance system, will not be required to comply with the provisions of paragraph (c) of this section before May 31, 1977. Facilities that service delivery vehicles that in turn deliver not more than 500,000 gallons per year to storage tanks that are required to comply with the provisions of paragraph (c) of this section will not be required to comply with the provisions of paragraph (c) of this section before January 1, 1977. Facilities that exclusively service storage tanks that do not have a required

vapor return or balance system, will not be required to have a vapor recovery system.

(iv) Gasoline storage compartments of 1,000 gallons or less in gasoline delivery vehicles presently in use on the promulgation date of this regulation will not be required to be retrofitted with a vapor return system until May 31, 1977.

(v) Storage containers served by delivery vessels filled at distribution facilities with extended compliance dates will not be required to comply with the provisions of paragraph (c) of this section until May 31, 1977.

(d) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Storage containers used primarily for the fueling of implements of husbandry, if such container is equipped by May 31, 1977 with a permanent submerged fill pipe, or at the time of installation for containers installed after this date.

(2) Any storage container having a capacity of 2,000 gallons or less and installed prior to July 1, 1975, if such container is equipped with a permanent submerged fill pipe by May 31, 1977.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(4) Storage containers installed after July 1, 1975 in Kings County.

(5) Storage containers installed after January 1, 1975 in Madera County.

(e) Compliance schedule:

(1) June 1, 1974—Submit to the Administrator a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the provisions of paragraph (c) of this section.

(2) March 1, 1975—Negotiate and sign all necessary contracts for emission control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975—Initiate on-site construction or installation of emission control equipment.

(4) February 1, 1976—Complete on-site construction or installation of emission control equipment.

(5) July 1, 1976—Assure final compliance with the provisions of paragraph (c) of this section.

(6) Any owner or operator of sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(f) Paragraph (e) of this section shall not apply:

(1) To a source which is presently in compliance with the provisions of paragraph (c) of this section and which has certified such compliance to the Administrator by June 1, 1974. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by June 1, 1974, a proposed alternative schedule. No such schedule may provide for compliance after March 1, 1976. If promulgated by the Administrator, such schedule shall satisfy the requirements of this section for the affected source.

(g) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (e) of this section fails to satisfy the requirements of §§ 51.261 and 51.262(a) of this chapter.

(h) Any gasoline-dispensing facility subject to this section that installs a storage tank after the effective date of this section shall comply with the requirements of paragraph (c) of this section by March 1, 1976 and prior to that date shall comply with paragraph (e) of this section as far as possible. Any facility subject to this section that installs a storage tank after March 1, 1976, shall comply with the requirements of paragraph (c) of this section at the time of installation.

[38 FR 31251, Nov. 12, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.255, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.256 Control of evaporative losses from the filling of vehicular tanks.

(a) ''Gasoline'' means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Los Angeles and Sacramento Valley Intrastate Air Quality Control Regions, except as follows:

(1) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded.

(i) South Coast AQMD.

(ii) Santa Barbara County APCD.

(2) In the following portions of the San Joaquin Valley Intrastate Region, this section is rescinded.

(i) Kings County APCD.

(3) In the following portion of the Sacramento Valley Intrastate Region, this section is rescinded.

(i) Sacramento County APCD.

(ii) El Dorado County APCD (Mountain Counties Air Basin portion).

(iii) Placer County APCD (Mountain Counties Air Basin portion).

(c) A person shall not transfer gasoline to an automotive fuel tank from a gasoline dispensing system unless the transfer is made through a fill nozzle designed to:

(1) Prevent discharge of hydrocarbon vapors to the atmosphere from either the vehicle filler neck or dispensing nozzle;

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered; and

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle/filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, refrigeration-condensation system or its equivalent.

(e) Components of the systems required by paragraph (c) of § 52.255 can be used for compliance with paragraph (c) of this section.

(f) If it is demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of vehicle fill neck configuration, location, or other design features for a class of vehicles, the provisions of this paragraph shall not apply to such vehicles. However, in no case shall such configuration exempt any gasoline dispensing facility from installing and using in the most effective manner a system required by paragraph (c) of this section.

(g) Compliance schedule:

(1) January 1, 1975—Submit to the Administrator a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the provisions of paragraph (c) of this section.

(2) March 1, 1975—Negotiate and sign all necessary contracts for emission control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975—Initiate on-site construction or installation of emission control equipment. Compliance with the requirements of paragraph (c) of this section shall be as soon as practicable, but no later than specified in paragraphs (g) (4) and (5)of this section.

(4) May 1, 1977—Complete on-site construction or installation of emission control equipment or process modification.

(5) May 31, 1977—Assure final compliance with the provisions of paragraph (c) of this section.

(6) Any owner or operator of sources subject to the compliance schedule in this paragraph (g) shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(h) Paragraph (g) of this section shall not apply:

(1) To a source which is presently in compliance with the provisions of paragraph (c) of this section and which has certified such compliance to the Administrator by January 1, 1975. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by June 1, 1974, a proposed alternative

schedule. No such schedule may provide for compliance after May 31, 1977. If promulgated by the Administrator, such schedule shall satisfy the requirements of this section for the affected source.

(i) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (g) of this section fails to satisfy the requirements of §§ 51.261 and 51.262(a) of this chapter.

(j) Any gasoline dispensing facility subject to this section that installs a gasoline dispensing system after the effective date of this section shall comply with the requirements of paragraph (c) of this section by May 31, 1977, and prior to that date shall comply with paragraph (g) of this section as far as possible. Any facility subject to this section that installs a gasoline dispensing system after May 31, 1977, shall comply with the requirements of paragraph (c) of this section at the time of installation.

[38 FR 31251, Nov. 12, 1973, as amended at 39 FR 4881, Feb. 8, 1974; 39 FR 21053, June 18, 1974; 46 FR 5979, Jan. 21, 1981; 46 FR 60203, Dec. 9, 1981; 47 FR 19332, May 5, 1982; 47 FR 19698, May 7, 1982; 47 FR 28622, July 1, 1982; 47 FR 29538, July 7, 1982; 51 FR 40676, Nov. 7, 1986]

§§ 52.257–52.262 [Reserved]

§ 52.263 Priority treatment for buses and carpools—Los Angeles Region.

(a) *Definitions:*

(1) ''Carpool'' means a vehicle containing three or more persons.

(2) ''Bus/carpool lane'' means a lane on a street or highway open only to buses (or to buses and carpools), whether constructed especially for that purpose or converted from existing lanes.

(3) ''Preferential treatment'' for any class of vehicles, means either the setting aside of one traffic lane for the exclusive use of such vehicles or other measures (for example, access metering or setting aside the entire street), which the Administrator finds would be at least equal in VMT reduction effect to the establishment of such a lane.

(b) This regulation is applicable in the Metropolitan Los Angeles Intrastate Air Quality Control Region (the ''Region'').

(c) On or before May 31, 1974, the State of California, through the State Department of Transportation or through other agencies to which legal authority has been delegated, shall establish the following system of bus/carpool lanes.

(1) Ventura/Hollywood Corridor—a concurrent flow exclusive bus/carpool lane from Topanga Canyon Boulevard, Woodland Hills (U.S. 101) to junction of the Hollywood Freeway, and contraflow on the Hollywood Freeway (U.S. 101) from the junction with Ventura Freeway in North Hollywood to Vermont Avenue, and bus preferential treatment on arterial surface streets from Vermont Avenue to the Los Angeles central business district (CBD).

(2) Harbor Freeway Corridor—contraflow on Harbor Freeway (California 11) from vicinity of Pacific Coast Highway, in Wilmington, to junction of Santa Monica Freeway (I–10), then by surface street preferential treatment to LA/CBD.

(3) Wilshire Corridor—surface street preferential bus treatment from vicinity of San Vincente Boulevard, to LA/CBD.

(4) San Bernardino Freeway Corridor–Bus/carpool lane, either contraflow, or concurrent flow on San Bernardino Freeway from El Monte terminus of existing San Bernardino Freeway bus lane (I–10), to vicinity of Ontario Airport.

(5) Priority Treatment in CBD—provide preferential treatment in CBD on surface streets to connect Wilshire and San Bernardino corridors.

(d) On or before May 31, 1976, the State of California, through the State Department of Transportation or other agencies to which legal authority has been delegated, shall establish the following system of bus and bus/carpool lanes:

(1) Contraflow lane on the Golden State Freeway (I–5) from junction of Ventura Freeway (California 134) in Los Angeles to San Bernardino Freeway (I–10).

(2) Contraflow on Pasadena Freeway (California 11) from terminus in City of Pasadena to Hollywood Freeway (U.S. 101).

(3) Contraflow on Pomona Freeway from San Gabriel Freeway (I–605) to Santa Ana Freeway (I–5).

(4) Concurrent flow in San Diego Freeway (I–405) from Ventura Freeway (U.S. 101) in Sherman Oaks to Newport Freeway (California 55), Costa Mesa.

(5) Concurrent flow on Long Beach Freeway (California 7) from Santa Ana Freeway (I–5), City of Commerce to San Diego Freeway (I–405), Long Beach.

(6) Artesia Freeway (California 91) from Santa Ana Freeway (I–5) to Long Beach Freeway (California 7), Long Beach.

(e) State III will include specific routes in other portions of the Region.

(f) On or before December 31, 1973, the State of California shall submit to the Administrator a compliance schedule showing the steps it will take to establish the system of bus/carpool lanes required by paragraphs (c) and (d) of this section, with each schedule to include the following:

(1) A schedule for the establishment of the lanes. The schedule for the lanes required by paragraph (d) of this section shall provide for the first such lane to be set aside no later than June 1, 1974.

(2) Bus/carpool lanes must be prominently indicated by overhead signs at appropriate intervals and at each intersection of entry ramps.

(3) Bus/carpool lanes must be prominently indicated by distinctive painted, pylon, or physical barriers.

(4) Vehicles using a bus/carpool lane shall have the right of way when crossing other portions of the road to enter or leave such lanes.

(5) At a minimum, the bus/carpool lanes so set aside shall operate from 6:30 a.m. to 9:30 a.m. and from 3:30 to 6:30 a.m. each weekday.

(g) No deviation from the system of bus/carpool lanes required under paragraphs (c) and (d) of this section shall be permitted except upon application made by the State of California to the Administrator at the time of submittal of compliance schedules and approved by him, which application must contain a satisfactory designation of alternate routes for the establishment of such lanes.

[38 FR 31254, Nov. 12, 1973]

§§ 52.264–52.268 [Reserved]

§ 52.269 Control strategy and regulations: Photochemical oxidants (hydrocarbons) and carbon monoxide.

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for photochemical oxidants (hydrocarbons) and carbon monoxide in the San Francisco Bay Area, San Diego, Sacramento Valley, San Joaquin Valley, and Southeast Desert Intrastate Regions by May 31, 1975.

(b) The following regulatory changes represent a relaxation of previously submitted regulations, and an adequate control strategy demonstration has not been submitted showing that the relaxation would not interfere with the attainment and maintenance of the national standards for photochemical oxidants.

(1) Mountain Counties Intrastate Region.

(i) Calaveras County APCD.

(A) The revocation of Rule 412, Organic Liquid Loading, is disapproved. Rule 412 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 413, Effluent Oil Water Separators, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(ii) Tuolumne County APCD.

(A) The revocation of Rule 413, Organic Liquid Loading, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 414, Effluent Oil Water Separators, is disapproved; and Rule 414 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(C) The revocation of Rule 413, Organic Liquid Loadings, submitted February 10, 1977, is disapproved; and the previously approved Rule 413 submitted on June 30, 1972 remains in effect.

(D) The revocation of Rule 414, Effluent Oil Water Separators, submitted on February 10, 1977, is disapproved; and the previously approved Rule 414 submitted on June 30, 1972, remains in effect.

(1–1) San Joaquin Valley Intrastate Region.

(i) Stanislaus County APCD.

(A) Rule 411.1, submitted on November 4, 1977, is disapproved. Rule 411.1 submitted on April 21, 1976 remains in effect.

(ii) Merced County APCD.

(A) Rule 411.1, submitted on November 4, 1977, is disapproved. Rule 411.1, submitted on August 2, 1976, remains in effect.

(iii) Fresno County APCD.

(A) Rules 411.1, Gasoline Transfer Into Vehicle Fuel Tanks, submitted on November 4, 1977, is disapproved; and Rule 411.1 submitted on April 21, 1976, and previously approved under 40 CFR 52.223, is retained.

(iv) Tulare County APCD.

(A) Section 412.1, Transfer of Gasoline Into Vehicle Fuel Tanks, submitted on October 13, 1977, is disapproved; and Section 412.1, submitted on April 21, 1976, and previously approved under 40 CFR 52.223, is retained.

(v) Madera County APCD.

(A) Rule 412.1, Transfer of Gasoline Into Stationary Storage Containers, submitted on October 13, 1977, is disapproved; and Rules 411, Gasoline Storage and 411.1, Transfer of Gasoline Into Stationary Storage Containers, submitted on June 30, 1972, and April 10, 1976, respectively, and previously approved under 40 CFR 52.223 are retained.

(vi) San Joaquin County APCD.

(A) Rule 411.2, Transfer of Gasoline Into Vehicle Fuel Tanks, submitted on November 4, 1977, is disapproved; and rule 411.2, submitted on February 10, 1976 and previously approved under 40 CFR 52.223, is retained.

(2) Sacramento Valley intrastate region:

(i) Sacramento County APCD.

(A) Rule 13 submitted on November 4, 1977, is disapproved.

(ii) Placer County APCD.

(A) Rule 218, Architectural Coatings, adopted on May 20, 1985 and submitted to EPA on February 10, 1986 is disapproved. The version of this rule by the same number and title submitted on July 19, 1983 and approved by EPA on May 3, 1984 is retained.

(iii) Sutter County APCD.

(A) Rule 3.15, Architectural Coatings, adopted on October 15, 1985 and submitted to EPA on February 10, 1986 is disapproved. The version of this rule by the same number and title submitted on January 1, 1981 and approved by EPA on May 3, 1982 is retained.

(3) Southeast Desert Intrastate AQCR.

(i) Los Angeles County APCD.

(A) Regulation IV, rule 465, Vacuum Producing Devices or Systems, submitted on June 6, 1977, is disapproved. Rule 74 with the same title, submitted on June 6, 1977, is disapproved. Rule 69 with the same title, submitted on June 30, 1972 and approved under 40 CFR 52.223, is retained.

(ii) Riverside County APCD.

(A) Regulation IV, rule 465, Vacuum Producing Devices or Systems, submitted on June 6, 1977, is disapproved. Rule 74 with the same title, submitted on June 30, 1972 and approved under 40 CFR 52.223, is retained.

(B) Rule 461, Gasoline Transfer and Dispensing, submitted November 4, 1977, is disapproved. The version of this rule submitted on April 21, 1977 (same number and title), which was previously approved in 40 CFR 52.223, is retained.

(iii) Antelope Valley APCD.

(A) Rule 461, Gasoline Transfer and Dispensing, submitted on May 13, 1999, is disapproved. The version of this rule submitted on January 31, 1996 (same title and number), which was previously approved in 40 CFR 52.220, is retained.

(4) Great Basin Valleys Intrastate Region.

(i) Great Basin Unified APCD.

(A) Rule 418 submitted on November 4, 1977, is disapproved. Rule 418 submitted on April 21, 1976 remains in effect.

(B) Rule 419, Gasoline Loading into Stationary Tanks, submitted on June 22, 1978, is disapproved, and rule 419, submitted April 21, 1976, and previously approved in 40 CFR 52.223, is retained.

(c) The following rules and regulations are disapproved because they represent a relaxation of promulgated EPA regulations, and an adequate control strategy demonstration has not

been submitted showing that the relaxation would not interfere with the attainment and maintenance of the national standrds for photochemical oxidants:

(1) Sacramento Valley Intrastate AQCR.

(i) Yolo-Solano APCD.

(A) Rules 2.21(b)(1), 2.21(b)(2), 2.21(b)(4), 2.21(b)(5) and 2.21(b)(6), submitted on June 6, 1977.

(d) Imperial County APCD Rule 415, Gasoline Loading from Tank Trucks and Trailers, submitted by the State on November 4, 1977 is approved as applicable to facilities installed after July 1, 1977. District Rule 125, Gasoline Loading into Tank Trucks and Trailers and Rule 129, Gasoline loading into Tanks, submitted on February 21, 1972 and previously approved under 40 CFR 52.223 are retained as part of the State implementation plan, as applicable to facilities installed prior to July 1, 1977.

(e) The emission reduction credits for the following control measures contained in Ventura County's 1982 Ozone nonattainment area plan, submitted by the Governor's designee on December 31, 1982, are disapproved since the control measures are of an intermittent and voluntary nature and are therefore not approvable under Sections 110(a)(2)(F)(v) and 123 of the Clean Air Act: R–38/N–16, ''No Use Day''; R–39/N–17, ''No Drive Day''; R–40, ''No Spray Day''; R–41/N–18 ''Stationary Source Curtailments.''

[38 FR 16564, June 22, 1973. Redesignated at 40 FR 3767, Jan. 24, 1975]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.269, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.270 Significant deterioration of air quality.

(a) With the exception of the areas listed in paragraph (b) of this section:

(1) The requirements of Sections 160 through 165 of the Clean Air Act are not met in California.

(2) The plan does not include approvable procedures for preventing the significant deterioration of air quality.

(3) The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of California.

(b) *District PSD Plans.* (1) The PSD rules for Sacramento County Air Pollution Control District are approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the Sacramento County Air Pollution Control District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use ''dispersion techniques'' as defined in § 51.1.

(iii) Sources for which EPA has issued permits under § 52.21, including the following permit and any others for which applications are received by June 19, 1985.

Procter & Gamble, SAC 83–01, 5/6/83.

(2) The PSD rules for North Coast Unified Air Quality Management District are approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the North Coast Unified Air Quality Management District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources of major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use ''dispersion techniques'' as defined in § 51.1.

(iii) Sources for which EPA has issued permits under § 52.21, including the following permits and any others for which applications are received by July 31, 1985;

(A) Arcata Lumber Co. (NC 78–01; November 8, 1979),

(B) Northcoast Paving (NC 79–03; July 5, 1979),

(C) PG&E Buhne Pt. (NC 77–05).

(iv) Those projects which are major stationary sources or major modifications for nitrogen oxides as precursors to ozone under § 52.21.

(v) Those projects that are major stationary sources or major modifications for emissions of $PM_{2.5}$ or its precursors under § 52.21, and those projects that are major stationary sources under § 52.21 with the potential to emit $PM_{2.5}$ or its precursors at a rate that would meet or exceed the rates specified at § 52.21(b)(23)(i).

(3) The PSD program for Mendocino County Air Quality Management District, as incorporated by reference in § 52.220(c)(489) is approved under Part C, Subpart 1, of the Clean Air Act. However, EPA is retaining authority to apply § 52.21 in certain cases. The provisions of § 52.21 except for paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the Mendocino County Air Quality Management District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use ''dispersion techniques'' as defined in § 51.1.

(iii) Any sources for which EPA has issued permits under § 52.21, including any permits for which applications are received by July 31, 1985.

(4) The PSD program for Northern Sonoma County Air Pollution Control District, as incorporated by reference in § 52.220(c)(481) is approved under Part C, Subpart 1, of the Clean Air Act. The provisions of § 52.21 except paragraph (a)(1) are therefore incorporated and made a part of the State plan for California for the Northern Sonoma County Air Pollution Control District for:

(i) Those cogeneration and resource recovery projects which are major stationary sources or major modifications under § 52.21 and which would cause violations of PSD increments.

(ii) Those projects which are major stationary sources or major modifications under § 52.21 and which would either have stacks taller than 65 meters or would use ''dispersion techniques'' as defined in § 51.1.

(iii) Any sources for which EPA has issued permits under § 52.21, including any permits for which applications are received by July 31, 1985.

(5) Rule 2410, ''Prevention of Significant Deterioration,'' adopted on June 16, 2011, for the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) is approved under Part C, Subpart 1, of the Clean Air Act, based, in part, on the clarifications provided in a May 18, 2012 letter from the San Joaquin Valley Unified Air Pollution Control District described in § 52.220(c)(415). For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the SJVUAPCD, this approval includes the authority for the SJVUAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits, except for:

(i) Those specific sources within the SJVUAPCD that have submitted PSD permit applications to EPA and for which EPA has issued a proposed PSD permit decision, but for which final agency action and/or the exhaustion of all administrative and judicial appeals processes (including any associated remand actions) have not yet been concluded or completed by November 26, 2012. The SJVUAPCD will assume full responsibility for the administration and implementation of such PSD permits immediately upon notification from EPA to the SJVUAPCD that any and all administrative and judicial appeals processes (and any associated remand actions) have been completed or concluded for any such permit decision. Prior to the date of such notification, EPA is retaining authority to apply § 52.21 for such permit decisions, and the provisions of § 52.21, except paragraph (a)(1), are therefore incorporated and made a part of the State plan for California for the SJVUAPCD for such

permit decisions during the identified time period.

(ii) [Reserved]

(6) The PSD program for the Placer County Air Pollution Control District (PCAPCD), as incorporated by reference in § 52.220(c)(497)(i)(B)(*2*), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the PCAPCD, this approval includes the authority for the PCAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(7) The PSD program for the Imperial County Air Pollution Control District, as incorporated by reference in § 52.220(c)(411), is approved under part C, Subpart 1, of the Clean Air Act.

(8) The PSD program for the Eastern Kern Air Pollution Control District (EKAPCD), as incorporated by reference in § 52.220(c)(419), is approved under part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the EKAPCD, this approval includes the authority for the EKAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(9) The PSD program for the Yolo-Solano Air Quality Management District, as incorporated by reference in § 52.220(c)(420), is approved under part C, Subpart 1, of the Clean Air Act.

(10) The PSD program for greenhouse gases (GHGs) in Rule 1714 for the South Coast Air Quality Management District (SCAQMD), as incorporated by reference in § 52.220(c)(421), is approved under part C, Subpart 1, of the Clean Air Act. This approval is limited to sources subject to the PSD program for GHGs. The provisions of § 52.21 (except paragraph (a)(1)) continue to apply to the SCAQMD for all pollutants subject to regulation, as defined in § 52.21, except for GHGs.

(11) The PSD program for the Great Basin Unified Air Pollution Control District (GBUAPCD), as incorporated by reference in § 52.220(c)(428), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the GBUAPCD, this approval includes the authority for the GBUAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(12) The PSD program for the Butte County Air Quality Management District (BCAQMD), as incorporated by reference in § 52.220(c)(428), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the BCAQMD, this approval includes the authority for the BCAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(13) The PSD program for the Feather River Air Quality Management District (FRAQMD), as incorporated by reference in § 52.220(c)(429), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the FRAQMD, this approval includes the authority for the FRAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(14) The PSD program for the San Luis Obispo County Air Pollution Control District (SLOAPCD), as incorporated by reference in § 52.220(c)(441), is approved under Part C, Subpart 1, of the Clean Air Act.

(15) The PSD program for the Santa Barbara County Air Pollution Control District (SBAPCD), as incorporated by reference in § 52.220(c)(442), is approved under Part C, Subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the SBAPCD, this approval includes the authority for the

SBAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(16) The PSD program for the Bay Area Air Quality Management District (BAAQMD), as incorporated by reference in § 52.220(c)(429)(i)(E)(*2*), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the BAAQMD, this approval includes the authority for the BAAQMD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(17) The PSD program for the Ventura County Air Pollution Control District (VCAPCD), as incorporated by reference in § 52.220(c)(474)(i)(D)(*1*), is approved under part C, subpart 1, of the Clean Air Act. For PSD permits previously issued by EPA pursuant to § 52.21 to sources located in the VCAPCD, this approval includes the authority for the VCAPCD to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

[50 FR 25419, June 19, 1985, as amended at 50 FR 30943, July 31, 1985; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003; 76 FR 48008, Aug. 8, 2011; 77 FR 65310, Oct. 26, 2012; 77 FR 73322, Dec. 10, 2012; 77 FR 73320, Dec. 10, 2012; 80 FR 69882, Nov. 12, 2015; 81 FR 50342, Aug. 1, 2016; 81 FR 69392, Oct. 6, 2016; 82 FR 13245, Mar. 10, 2017; 82 FR 14611, Mar. 22, 2017; 82 FR 30773, July 3, 2017; 83 FR 43766, Aug. 28, 2018]

§ 52.271 Malfunction, startup, and shutdown regulations.

(a) The following regulations are disapproved because they would permit the exemption of sources from the applicable emission limitations and therefore do not satisfy the enforcement imperatives of section 110 of the Clean Air Act.

(1) Amador County APCD.

(i) Rule 404, submitted on April 21, 1976.

(ii) Rule 4f, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(2) Bay Area APCD.

(i) Regulation 2, Section 3212, and Regulation 3, Section 3203, submitted on April 21, 1976.

(ii) Regulation 2, Section 3212, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(3) Calaveras County APCD.

(i) Rules 110 and 402(f), submitted on July 25, 1973.

(ii) Rule 404, submitted on October 13, 1977.

(4) Colusa County APCD.

(i) Rule 4.4g, submitted on July 25, 1973, and Rule 4.4g, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(5) Del Norte County APCD.

(i) Rule 540, submitted on November 10, 1976.

(ii) Rule 45, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(6) Fresno County APCD.

(i) Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.

(ii) Rules 110 and 402(f), submitted on October 23, 1974.

(7) Glenn County APCD.

(i) Rules 95.2 and 95.3, submitted on January 10, 1975.

(8) Great Basin Unified APCD.

(i) Rule 403, submitted on June 6, 1977.

(ii) Rule 617, submitted on November 4, 1977.

(9) Humboldt County APCD.

(i) Rule 540, Submitted on November, 10, 1976.

(ii) Rule 59, Submitted on February 21, 1972 and previously approved under 40 CFR 52.223 (37 FR 10842).

(10) Kern County APCD.

(i) Rule 111, submitted on July 19, 1974.

(11) Kings County APDC.

(i) Rule 111, submitted on July 25, 1973, and Rule 111, submitted on July 30, 1972, and previously approved under 40 CFR 52.223.

(ii) Rule 111, submitted on November 4, 1977.

(12) Lake County APCD.

(i) Chapter III, Article I, Section 500, and Article II, Sections 510 and 511, submitted on February 10, 1977.

(ii) Part VI, Sections 1 and 2, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.

(13) Los Angeles County APCD.

(i) Rule 430, submitted on June 6, 1977.

(14) Madera County APCD.

(i) Rule 402(f), submitted on January 10, 1975, and Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223.

(ii) Rule 110, submitted on January 10, 1975.

(15) Mariposa County APCD.

(i) Rule 203(j), submitted on January 10, 1975, and Rule 4.3(g), submitted on February 21, 1972, and previously approved under 40 CFR 52.223.

(ii) Rule 404, submitted on June 6, 1977.

(16) Mendocino County APCD.

(i) Rule 540, submitted on November 10, 1976.

(ii) Sections 1 and 2 of Part VI, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(17) Merced County APCD.

(i) Rule 109, submitted on August 2, 1976.

(ii) Rule 109, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(18) Nevada County APCD.

(i) Rule 55(f), submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(19) Northern Sonoma County APCD.

(i) Rule 540, submitted on November 10, 1976.

(20) Placer County APCD.

(i) Rule 55(f), submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(ii) Rule 404, submitted on October 13, 1977.

(21) Plumas County APCD.

(i) Rule 203(j), submitted on January 10, 1975.

(ii) Rule 404, submitted on June 6, 1977.

(22) Riverside County APCD.

(i) Rule 430, submitted on June 6, 1977.

(23) San Bernardino County APCD.

(i) Rule 430, submitted on June 6, 1977.

(ii) Rule 55, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(24) San Joaquin County APCD.

(i) Rule 110, submitted on October 23, 1974, and Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(25) San Luis Obispo County APCD.

(i) Rule 107, submitted on November 10, 1976.

(ii) Rule 102, submitted on February 21, 1972, and previously approved under 40 CFR 52.223 (37 FR 10842).

(26) Shasta County APCD.

(i) Rule 3:10, submitted on July 19, 1974.

(ii) Rule 3:10, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(27) Sierra County APCD.

(i) Rule 51, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812), and Rule 203(j), submitted on January 10, 1975, and previously approved under 40 CFR 52.223 (42 FR 23805).

(ii) Rule 404, submitted on June 6, 1977.

(28) Southern California APCD.

(i) Rule 430, submitted on February 10, 1977.

(29) Stanislaus County APCD.

(i) Rule 110, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812), and Rule 110, submitted on July 19, 1974.

(30) Tehama County APCD.

(i) Rule 417, submitted on July 19, 1974.

(ii) Rule 4:1g, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(31) Trinity County APCD.

(i) Rule 540, submitted on November 10, 1976.

(ii) Rule 44, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(32) Tulare County APCD.

(i) Rules 111 and 402(f), submitted on November 10, 1976.

(33) Tuolumne County APCD.

(i) Rule 404, submitted on February 10, 1977, and Rule 402(f), submitted on June 30, 1972, and previously approved under 40 CFR 52.223.

(34) Ventura County APCD.

(i) Rule 32, submitted on July 19, 1974.

(ii) Rule 32, submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(35) Yuba County APCD.

(i) Rule 4.5, submitted on July 25, 1973.

(b) The following regulations are disapproved since they lack explicit provisions to assure that that NAAQS will not be exceeded while equipment breakdown periods are in effect.

(1) Fresno County APCD.

(i) Rules 110(B), *Variance Required*, and 519, *Emergency Variance*, submitted on January 2, 1979.

(2) Kern County APCD.

(i) Rules 111 (b), *Equipment Breakdown*, and 519, *Emergency Variance*, submitted on January 2, 1979.

(3) Modoc County APCD.

(i) Rule 2:15, *Breakdown Conditions; Emergency Variances*, submitted on May 7, 1979.

(4) Imperial County APCD.

(i) Rule 111 (B), *Equipment Breakdown*, submitted on December 24, 1979.

(ii) Rule 517, *Emergency Variance*, submitted on December 24, 1979.

(5) Butte County AQMD.

(i) Rule 275, Reporting Procedures for Excess Emissions, submitted on May 10, 1996.

(6) Shasta County AQMD.

(i) Rule 3:10, Excess Emissions, submitted on May 10, 1996.

(7) Monterey Bay Unified Air Pollution Control District.

(i) Rule 214, Breakdown Condition, submitted on October 30, 2001.

(c) The following regulations are disapproved because they exempt sources from applicable emissions limitations during malfunctions and/or fail to sufficiently limit startup and shutdown exemptions to those periods where it is technically infeasible to meet emissions limitations.

(1) South Coast Air Quality Management District.

(i) Rule 429, submitted on January 28, 1992.

(d) The following regulations are disapproved because they merely describe how state agencies intend to apply their enforcement discretion and thus, if approved, the regulations would have no effect on the State Implementation Plan.

(1) Antelope Valley AQMD.

(i) Rule 430, Breakdown Provisions, submitted on February 16, 1999.

(2) Kern County APCD.

(i) Rule 111, Equipment Breakdown, submitted on July 23, 1996.

(3) Mojave Desert AQMD.

(i) Rule 430, Breakdown Provisions, submitted on January 24, 1995.

[43 FR 3277, Jan. 24, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.271, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.272 Research operations exemptions.

(a) The requirements of § 51.281 of this chapter are not met because the following regulations allow exemptions to be granted from the applicable emission limitations, thereby potentially rendering the applicable limitations unenforceable. Furthermore, the regulations are inconsistent with the Clean Air Act, because the regulations could permit violations of the National Ambient Air Quality Standards under some circumstances. Therefore, the following regulations are disapproved:

(1) Bay Area APCD.

(i) Regulation 2, Division 1, sections 1214 to 1214.3, submitted on July 25, 1973.

(ii) Regulation 3, Division 1, sections 1205 to 1205.3, submitted on July 25, 1973.

(2) El Dorado County APCD.

(i) Rule 203(D), submitted on November 4, 1977.

(3) Great Basin Unified APCD.

(i) Rule 423, submitted on November 4, 1977.

(4) Los Angeles County APCD.

(i) Rule 441, submitted on June 6, 1977.

(5) Placer County APCD.

(i) Rule 203(D), submitted on October 13, 1977.

(6) Riverside County APCD.

(i) Rule 441, submitted on June 6, 1977.

(7) Sacramento County APCD.

(i) Rule 30, submitted on January 22, 1974.

(8) San Bernardino County APCD.

(i) Rule 441, submitted on June 6, 1977.

(9) Southern California APCD.

(i) Rule 441, submitted on August 2, 1976.

[42 FR 42226, Aug. 22, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.272, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.273 Open burning.

(a) The following rules or portions of rules are disapproved because they contain exemptions to open burning (including open agricultural burning) prohibitions, that do not satisfy the requirements of section 110 of the Clean Air Act:

(1) Amador County APCD.

(i) Rules 308 and 312, submitted on April 21, 1976.

(ii) Rule 304, submitted on October 13, 1977.

(iii) Rules 302(G) and 322, submitted on October 15, 1979.

(2) Calaveras County APCD.

(i) Rules 304 and 322, submitted on October 13, 1977.

(3) Del Norte County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(4) El Dorado County APCD.

(i) Rules 302(C), 304, 307, 319, and 322, submitted on November 4, 1977.

(ii) Rules 302 (C), 318, and 321, submitted on May 23, 1979.

(5) Fresno County APCD.

(i) Rules 416.1(e)(1), (e)(3), and (e)(4), submitted on October 23, 1974.

(ii) Rule 416.1(c)(1), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(6) Humboldt County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(ii) (A)–(C) [Reserved]

(7) Kern County APCD.

(i) Rule 417(I)(A), submitted on November 10, 1976.

(8) Madera County APCD.

(i) Rules 416.1(e)(1), (e)(3), and (e)(4), submitted on January 10, 1975.

(ii) Rule 416.1(c)(1), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(9) Mariposa County APCD.

(i) Rules 302(C), 304, 319, and 322, submitted on June 6, 1977.

(10) Mendocino County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(11) Merced County APCD.

(i) Rule 416(h), submitted on August 2, 1976.

(ii) Rules 416.1(III)(A), (V)(A), (V)(B), (V)(C), and (V)(D), submitted on August 2, 1976. (Rule 416.1(c)(2), submitted on June 30, 1972, and previously approved, is retained. Rule 416.1(a)(1), submitted on June 30, 1972, and previously approved, is retained for the purpose of enforcing Rule 416.1(c)(2).)

(12) Monterey Bay Unified APCD.

(i) Rules 409(a), 409(a)(5), and 410(b)(1), submitted on January 10, 1975.

(13) Nevada County APCD.

(i) Rules 302(C), 307, 314, and 322, submitted on April 10, 1975.

(ii) Rules 304 and 319, submitted on June 6, 1977.

(iii) Rule 307, submitted on October 15, 1979.

(14) Northern Sonoma County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(15) Placer County APCD.

(i) Rules 302(C), 302(G), 304, 307, 314, 319, and 322, submitted on October 13, 1977.

(ii) Rules 303, 306, and 322, submitted on October 15, 1979.

(16) Plumas County APCD.

(i) Rule 314, submitted on January 10, 1975.

(ii) Rules 302(C), 304, 307, 319, and 322, submitted on June 6, 1977.

(17) Sacramento County APCD.

(i) Rule 96(a), submitted on November 10, 1976.

(ii) Rule 96(a), submitted on November 4, 1977.

(18) San Joaquin County APCD.

(i) Rule 402(e), submitted on November 10, 1976.

(ii) Rule 416.1(c)(1), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(iii) Rules 416.1(D)(1) and (D)(2), submitted on October 23, 1974.

(19) Santa Barbara County APCD.

(i) Rules 40(4)(a) and 40(4)(1), submitted on July 25, 1973. (The analogous Rules 40(4)(a) and 40(4)(g), previously approved in the February 21, 1972 submittal, are retained.) Rule 40(4)(c), submitted on July 25, 1973, is also disapproved.

(ii) Rule 22, submitted on January 22, 1974. (The analogous Rule 22, previously approved in the February 21, 1972 submittal, is retained.) Rules 24.1 and 24.2, submitted on January 22, 1974, are also disapproved.

(iii) Rules 312 (B) and (C), and 401 (D.1) and (D.2).

(20) Shasta County APCD.

(i) Rule 2:6, sections (1)(b)(iii) (a, b, and d), (1)(c)(viii), 2(c), 3(f), 4(e), 5(c), and 5(d). (Previously approved Rule 2:6, sections (2)(c), (3)(f), and (4)(e), submitted on July 19, 1974, are retained.)

(21) Sierra County APCD.

(i) Rules 302(C), 319, and 322, submitted on June 6, 1977.

(22) Trinity County APCD.

(i) Rule 410(c)(2) and the following portions of Regulation 2: General prohibitions (all of page 1), paragraph (f) of Article I, paragraphs (f) and (g) of Article V, and paragraph (f) of Article VI, submitted on November 10, 1976.

(23) Tulare County APCD.

(i) Rule 402(e), submitted on November 10, 1976.

(ii) Section 417(III)(A), submitted on June 30, 1972, and previously approved under 40 CFR 52.223 (37 FR 19812).

(iii) Section 417.1(e)(1), (e)(3), and (e)(4), submitted on January 10, 1975.

(24) Tuolumne County APCD.

(i) Rule 322, submitted on February 10, 1977.

(25) Yolo-Solano APCD.

(i) Rules 2.8(c) (4) and (5), 6.3, and 6.5(a), submitted on July 25, 1973.

(ii) Rules 6.1(a), (e)(6), and (g), submitted on January 10, 1975. (Rules 4.1 (a) and (g), submitted on February 21, 1972, and previously approved under 40 CFR 52.223, are retained.)

(b) The following rules or portions of rules are disapproved because they relax the control on open burning (including agricultural burning) without accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards:

(1) Del Norte County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(2) Fresno County APCD.

(i) Rule 416.1(c)(1), submitted on October 23, 1974.

(ii) Rule 416.1(g), submitted on November 4, 1977.

(3) Humboldt County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(4) Imperial County APCD.

(i) Rule 422, submitted on November 4, 1977. (The requirements of Rule 115, submitted on February 21, 1972, and previously approved under 40 CFR 52.223, are retained as applicable to the burning of wood waste.)

(ii) Regulation VII (Rules 701 to 706), submitted on November 4, 1977. (Regulation VII (Rules 200 to 206), submitted on July 25, 1973 and previously approved under 40 CFR 52.223, is retained.)

(5) Kings County APCD.

(i) Rules 416.1 and 417.1, submitted on November 4, 1977.

(6) Lake County APCD.

(i) Sections 435, 436, 1003, and 1200(A), submitted on February 10, 1977.

(ii) Section 435, submitted on January 2, 1979.

(7) Los Angeles County APCD.

(i) Rule 444, submitted on June 6, 1977. (Rules 57.1, 57.2, 57.3, and 57.4, submitted on June 30, 1972, and previously approved under 40 CFR 52.223, are retained.)

(8) Madera County APCD.

(i) Rule 416.1(c)(1), submitted on January 10, 1975.

(9) Mendocino County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(10) Merced County APCD.

(i) Rule 416.1(I)(A)(2), submitted on August 2, 1976.

(11) Northern Sonoma County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(12) San Bernardino County Desert APCD.

(i) Rule 444 and the definition of ''Agricultural Burning'' in Rule 102, submitted on November 4, 1977. (Rule 57, submitted on February 21, 1972, and previously approved under 40 CFR 52.223, is retained.)

(13) San Diego County APCD.

(i) Rules 102(e) and 103(g), submitted on October 13, 1977.

(14) San Luis Obispo County APCD.

(i) Rule 501(B), submitted on November 10, 1976, and Rule 501(A)(7), submitted on November 4, 1977. (Previously approved Rule 115(2), submitted on February 21, 1972, is retained.)

(15) Santa Barbara County APCD.

(i) Rules 2(b), 40(3), and 40(4)(e), submitted on July 25, 1973. (Analogous Rules 2(b), 40(3), and 40(4)(c), submitted on February 21, 1972, and previously approved, are retained.)

(16) Shasta County APCD.

(i) Rule 2:8, submitted on October 13, 1977. (Rule 2:8, submitted on July 19, 1974, and July 22, 1975, and previously approved, is retained.)

(17) Siskiyou County APCD.

(i) Rule 4.3(2), submitted on January 2, 1979.

(18) Trinity County APCD.

(i) Regulation 2, Article I, paragraph (e), submitted on November 10, 1976.

(ii) Rule 410(c)(2), submitted on May 7, 1979.

(19) Placer County APCD.

(i) Rule 316, submitted on August 21, 1979.

(ii) Rules 318 and 323, submitted on October 15, 1979.

[42 FR 41122, Aug. 15, 1977]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.273, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.274 California air pollution emergency plan.

(a) Since the California Air Pollution Emergency Plan does not provide complete, implementable provisions for taking emission control actions necessary to prevent ambient pollutant concentrations from reaching significant harm levels, the requirements of subpart H of this chapter for Priority I and II areas are not met, except in the following areas:

(1) South Coast Air Quality Management District (SCAQMD).

(2) Sacramento County Air Pollution Control District.

(3) Monterey Bay Unified APCD (MBUAPCD).

(4) Santa Barbara Air Quality Management Area portion of the Santa Barbara County Air Pollution Control District.

(5) Bay Area Air Quality Management District.

(6) Ventura County Air Pollution Control District.

(7) San Diego County APCD.

(8) Los Angeles County Air Pollution Control District.

(9) Riverside County Air Pollution Control District.

(10) San Bernardino County Desert Air Pollution Control District.

(11) Imperial County Air Pollution Control District.

(12) Fresno County Air Pollution Control District.

(13) Kern County Air Pollution Control District.

(b) The requirements of subpart H of this chapter are met in the SCAQMD with the following exceptions: SCAQMD Regulation VII has no schedule to assure that the emission control actions are fully implementable; does not provide specific emission control actions for interdistrict coordination; has no provisions for nitrogen dioxide, particulate matter, and sulfur dioxide and particulate matter combined episodes; has no criteria or provisions to protect the eight-hour averaged carbon monoxide significant harm level; and has no provisions for implementation of abatement plans for stage 2 or 3 carbon monoxide or oxidant episodes that are attained without being predicted.

(c) Regulation for prevention of air pollution emergency episodes—plan

scheduling, interdistrict coordination, episode criteria, and declaration.

(1) The requirements of this paragraph are applicable in the SCAQMD.

(2) The owner or operator of any governmental, industrial, business, or commercial activity listed in Rules 708.1 and 708.3 of Regulation VII of the SCAQMD, as revised on May 6, 1977, shall submit a Stationary Source Curtailment Plan and/or Traffic Abatement Plan to the Administrator within sixty days after the effective date of this paragraph.

(3) The plans submitted pursuant to the requirements of this paragraph, shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons (HC) or nitrogen oxides (NO_X) greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of HC or NO_X greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For sources or establishments other than those addressed in paragraphs (c)(3) (i) through (ii) of this section, within 180 days after receipt.

(4) The owner or operator of an industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within thirty days after the plan has been evaluated if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of the receipt of the notice of disapproval.

(5) In the event specific sources or source areas within the SCAQMD are determined to significantly contribute to a declared air pollution episode in a nearby Air Pollution Control District, emission control actions specified in Regulation VII of the SCAQMD, as revised on May 6, 1977, for that declared episode stage shall be taken in the SCAQMD to abate that episode.

(6) For the purposes of this paragraph, the following episode criteria shall apply to carbon monoxide concentrations averaged over eight hours:

(i) For stage 1, 15 parts per million.

(ii) For stage 2, 30 parts per million.

(iii) For stage 3, 40 parts per million.

(7) The provisions of SCAQMD Regulation VII, as revised on May 6, 1977, relating to carbon monoxide episodes averaged over 12 hours shall apply to carbon monoxide episodes averaged over 8 hours except that the Administrator shall provide for declaration, notification, source inspections, and termination of the episodes.

(8) Whenever the Administrator has determined that the stage 2 or 3 episode level for oxidant or carbon monoxide as specified in Rule 703 of Regulation VII of the SCAQMD, as amended May 6, 1977, is being attained or has been attained, and is predicted to remain at such level for 12 or more hours, or increase, or in the case of oxidant to reoccur within the next 24 hours, unless control actions are taken, the existence of the appropriate episode level and the location of the source-receptor areas shall be declared, and the actions specified in Rules 710(b)(1), 710(b)(2), 711(b)(1), or 711(b)(2) shall be taken by the Administrator.

(d) Regulation for prevention of air pollution emergency episodes—nitrogen dioxide, particulate matter, and sulfur dioxide and particulate matter combined.

(1) The requirements of this paragraph are applicable in the SCAQMD.

(2) For the purposes of this regulation the following definitions apply:

(i) ''Ppm'' means parts per million by volume.

(ii) ''COH'' means coefficient of haze.

(iii) ''Ugm^3'' means micrograms per cubic meter.

(iv) ''Administrator'' means the Administrator of the Environmental Protection Agency or his authorized representative.

(v) ''Major National Holiday'' means a holiday such as Christmas, New Year's Day, or Independence Day.

(vi) ''Source/Receptor Areas'' are defined for each episode occurrence based on air monitoring, geographical, and meteorological factors: Source area is that area in which contaminants are

discharged and a receptor area is that area in which the contaminants accumulate and are measured.

(vii) ''Air Contaminants'' means nitrogen dioxide, particulate matter, and/or sulfur dioxide and particulate matter combined.

(3) For the purposes of this regulation, the following episode criteria shall apply:

Contaminants	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Nitrogen dioxide	1	0.6 ppm	1.2 ppm	1.6 ppm.
	24	0.15 ppm	0.3 ppm	0.4 ppm.
Particulate matter	24	3.0 COH	5.0 COH	7.0 COH.
	24	375 ugm^{-3}	625 ugm^{-3}	875 ugm^{-3}.
Sulfur dioxide and particulate matter combined	24	0.2[1]	0.8[1]	1.2[1].
	24	65,000[2]	261,000[2]	393,000[2].

[1] Product of sulfur dioxide (ppm) and particulate matter (COH).
[2] Product of sulfur dioxide (ugm^{-3}) and particulate matter (ugm^{-3}).

(4) Whenever the Administrator has determined that any episode level specified in paragraph (d)(3) of this section is being attained or has been attained, and is predicted to remain at such level for 12 or more hours, or increase, unless control actions are taken, the existence of the appropriate episode level and the location of the source-receptor areas shall be declared.

(5) Whenever the available scientific and meteorological data indicate that any episode level declared by paragraph (d)(4) of this section is no longer occurring and is not predicted to immediately increase again to episode levels, such episode shall be declared terminated.

(6) The following shall be notified by the Administrator whenever an episode is predicted, attained or terminated: (i) Public officials; (ii) persons operating any facility or activity named in paragraph (d)(8) of this section; (iii) public health, safety, and emergency agencies; (iv) news media.

(7) Upon request of the Administrator, persons operating any facility or activity named in paragraph (d)(8) of this section shall install, properly maintain, and operate radio-receiving equipment with decoding device capable of receiving broadcasts of the declaration and termination of episodes required under this paragraph and instructions as to the actions to be taken.

(8) Stationary source curtailment plans and traffic abatement plans shall be prepared by industrial, business, commercial, and governmental establishments as follows:

(i) The owner or operator of any industrial, business, commercial, or governmental activity listed below shall submit to the Administrator plans to curtail operations causing stationary source air contaminants in such activity:

(A) Petroleum refinery emitting 23 metric tons (25 tons) or more per year of air contaminants.

(B) Metal-melting plant requiring molten metal temperatures in excess of 540 °C (1,000 °F) or metal-refining plant or metal-smelting plant, in which a total of 1,135 kilograms (2,500 pounds) or more of metal are in a molten state at any one time or are poured in any 1 hour.

(C) Fossil fuel-fired electric generating facility having a total rated capacity of 50 megawatts or more.

(D) Any facility or plant emitting 91 metric tons (100 tons) or more per year of air contaminants.

(ii) The plans required by paragraph (d)(8)(i) of this section shall include the following:

(A) A list of equipment which emits nitrogen oxides, particulate matter, and/or sulfur dioxide, including the SCAQMD permit number, the daily amount of air contaminants emitted, and a statement of the minimum time and recommended time to implement the abatement actions for each episode stage for the equipment listed and the percent reduction in emissions at each episode stage.

(B) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(C) The normal amount of electricity used on a normal weekday and on a major national holiday.

(D) The actions to inform employees of the procedures to be taken in the event of an episode declaration.

(E) The name and telephone numbers of the facility's episode action coordinator and alternate, who are responsible for implementation of the plan.

(F) For stage 1 episodes:

(*1*) The measures to voluntarily curtail equipment emitting air contaminants.

(*2*) The measures to curtail or postpone electrically intensive industrial operations, where feasible.

(*3*) The measures for electric utilities to import power from outside the basin to the extent feasible.

(G) For stage 2 episodes:

(*1*) The measures to curtail as much as possible, without upsetting production, equipment operations which emit air contaminants.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(*3*) For fossil fuel-fired combustion sources, including electric utilities, with a heat input greater than 50 million BTU per hour:

(*i*) The measures to burn natural gas.

(*ii*) To the extent that natural gas is not available, the measures to burn fuel oil with a sulfur content of not more than 0.25 percent by weight or the measures to reduce air contaminant emissions to equivalent discharge. Any combustion source may be exempt from the provisions of this paragraph upon demonstration that fuel oil with the specified sulfur content is not available.

(*4*) For electric utilities the measures, in addition to those in paragraph (d)(8)(ii)(F)(*3*) of this section, to:

(*i*) Shift oil burning power generation to non-source areas to the maximum extent consistent with the public health, safety, and welfare.

(*ii*) Shift oil burning power generation to combined cycle gas turbine generating equipment burning fuel oil containing less than 0.15 percent sulfur to the maximum extent consistent with the public health, safety, and welfare.

(*5*) For refineries and chemical plants the measures to be taken to reduce air contaminant emissions by 20 percent without jeopardizing the public health or safety, without causing an increase in the emissions of other air contaminants, withoutdamaging the equipment or without reducing production by more than 20 percent.

(*6*) The measures in paragraph (d)(8)(ii)(F) of this section.

(H) For stage 3 nitrogen dioxide episodes:

(*1*) The measures for petroleum refineries to reduce emissions of nitrogen dioxide by 33 percent, without damaging the equipment or increasing the emissions of other air contaminants.

(*2*) The measures in paragraph (d)(8)(ii)(G) of this section.

(*3*) A list of equipment and the permit numbers of such equipment not operated on a major national holiday.

(*4*) A statement as to whether or not the facility operates on a major national holiday.

(I) For stage 3 particulate matter episodes:

(*1*) The measures for petroleum refineries to reduce emissions of particulate matter by 33 percent, without damaging the equipment or increasing the emissions of other air contaminants.

(*2*) The measures described in paragraph (d)(8)(ii)(G) of this section.

(*3*) The measures for any facility or plant, except electrical generating facilities and petroleum refineries, normally emitting 91 metric tons (100 tons) or more per year of particulate matter to eliminate such emissions by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(*4*) The measures for metal melting, refining, or smelting plants to eliminate emissions of particulate matter by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipmen

(J) For stage 3 sulfur dioxide and particulate matter combined episodes:

(*1*) The measures described in paragraphs (d)(8)(ii) (G) and (I) of this section.

(*2*) The measures for petroleum refineries to reduce emissions of sulfur dioxide by 33 percent, without damaging

the equipment or increasing the emissions of other air contaminants.

(*3*) The measures for any facility or plant, except electrical generating facilities and petroleum refineries, normally emitting 91 metric tons (100 tons) or more per year of sulfur dioxide to eliminate such emissions by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(K) An estimate of the resultant reduction in air contaminant emissions.

(iii) The owner or operator of any industrial, business, commercial, or governmental activity listed below shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use:

(A) Operators of 50 or more fleet vehicles.

(B) Industrial, business, commercial, or governmental establishments employing more than 100 persons per shift at one business address.

(iv) The plans required by paragraph (d)(8)(iii) of this paragraph shall include the following:

(A) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(B) The number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(*1*) By the company on company business on a normal weekday and on a major national holiday.

(*2*) By employees commuting from home to the place of business on a normal weekday and on a major national holiday.

(C) The number of parking spaces used on a normal weekday and on a major national holiday.

(D) The minimum number of motor vehicles to be operated that are necessary to protect public health or safety.

(E) The actions to inform employees of the procedures to be taken in the event of an episode declaration.

(F) The name and telephone numbers of the facility's episode action coordinator and alternate, who are responsible for implementation of the plan.

(G) For stage 1 episodes, the methods by which employers will encourage the utilization of car pools or otherwise reduce employee motor vehicle travel.

(H) For stage 2 and 3 episodes, the measures within the reasonable control of the employer to reduce the number of vehicle miles driven by employees in commuting to and from work.

(I) An estimate of the reduction in vehicle miles traveled as a result of the measures in this paragraph.

(v) Each owner or operator required to submit a plan by this paragraph shall submit to the Administrator such plan within 60 days of the effective date of this paragraph.

(vi) The plans submitted in accordance with the provisions of this paragraph shall be approved or disapproved by the Administrator according to the following schedule:

(A) For sources with emissions of air contaminants greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(B) For sources with emissions of air contaminants greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(C) For sources with emissions of air contaminants less than 91 metric tons (100 tons) per year, or for establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(vii) The owner or operator required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to

(viii) A copy of the plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this section.

(9) The following actions shall be taken in the source and receptor areas upon declaration of a stage 1 episode:

(i) The notifications required by paragraph (d)(6) of this section.

(ii) The Administrator shall advise the public that those individuals with

special health problems should follow the precautions recommended by their physicians and health officials.

(iii) The Administrator shall advise school officials to cancel, postpone, or reschedule programs which require outdoor physical activity.

(iv) The Administrator shall request the public to stop all unnecessary driving.

(v) The Administrator shall request the public to operate all privately owned vehicles on a pool basis.

(vi) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (8) for the declared stage 1 episode and air contaminant(s).

(10) The following actions shall be taken in the source and receptor areas upon declaration of a stage 2 episode:

(i) The actions described in paragraphs (d)(9) (i) through (v) of this section.

(ii) The Administrator shall request suspension of programs that involve physical exertion by participants using public parks or public recreational facilities located in receptor areas.

(iii) The burning of combustible refuse shall be postponed until the episode has been terminated.

(iv) The Administrator shall request the public to reduce the use of electricity by 10 percent.

(v) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (d)(8) of this section for the declared stage 2 episode and air contaminant(s).

(11) The following actions shall be taken in the source and receptor areas upon declaration of a stage 3 episode:

(i) The actions described in paragraphs (d)(10) (i) through (iii) of this section.

(ii) The Administrator shall request the public to reduce the use of electricity by 40 percent.

(iii) Persons operating any facility or activity named in paragraph (d)(8) of this section shall implement the appropriate plans specified in paragraph (d)(8) of this section for the declared stage 3 episode and air contaminant(s).

(iv) For nitrogen dioxide, the general public, schools, industrial, business, commercial, and governmental activities throughout the District shall operate as though the day were a major national holiday.

(v) For particulate matter and/or sulfur dioxide and particulate matter combined, the Administrator shall request the public to reduce as much as possible activities causing dust emissions including agricultural operations, off-road vehicle use, anddriving on unpaved roads. Construction and demolition operation shall be postponed until the episode has been terminated.

(12) In the event specific sources or source areas within the SCAQMD are determined to significantly contribute to a declared air pollution episode in a nearby Air Pollution Control District, emission control actions specified in this paragraph for that declared episode stage shall be taken in the SCAQMD to abate that episode.

(13) A source inspection plan shall be implemented by the Administrator upon the declaration of any episode stage.

(14) The Administrator shall provide for daily acquisition of forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts at least every 12 hours.

(15) Any source that violates any requirement of this section shall be subject to enforcement action under section 113 of the Act.

(16) All submittals or notifications required to be submitted to the Administrator by this section shall be sent to:

Environmental Protection Agency, Air and Hazardous Materials Division (A–4), Attn: Air Programs Branch, 215 Fremont Street, San Francisco, Calif. 94105.

(e) The requirements of subpart H of this chapter are met in the Sacramento County Air Pollution Control District with the following exceptions: There are no episode criteria levels, declaration procedures, notification procedures, source inspections, emission control actions or episode termination procedures for carbon monoxide episodes based on 4- and 8-hour averaging times; communication procedures for transmitting status reports and orders as to emission control actions to be taken during an episode stage are not provided for; there are no provisions

for the inspection of those sources covered under Rule 122; there is no time schedule for the Air Pollution Control Officer to initiate the call for the submittal of individual abatement plans; the requirements for the content of the abatement plans are not sufficiently specific to ensure that adequate plans are submitted; no provisions exist for the daily acquisition of atmospheric stagnation conditions; a Priority II particulate matter episode contingency plan is not provided for in the regulation.

(f) Regulation for prevention of air pollution emergency episodes—4- and 8-hour carbon monoxide criteria levels, public announcement, source inspections, preplanned abatement strategies, acquisition of atmospheric stagnation forecasts.

(1) The requirements of this paragraph are applicable in the Sacramento County Air Pollution Control District.

(2) For the purposes of this regulation the following definitions apply:

(i) ''Administrator'' means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) ''ppm'' means parts per million by volume.

(iii) ''ug/m^3'' means micrograms per cubic meter.

(3) For the purposes of this paragraph, the following episode criteria shall apply:

Pollutant	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Carbon monoxide	4	[1] 25	[1] 45	[1] 60
	8	[1] 15	[1] 30	[1] 40

[1] Parts per million by volume.

(4) The provisions of the Sacramento County Air Pollution Control District's Regulation IX, as submitted on November 4, 1977, relating to carbon monoxide episodes averaged over 1 hour shall apply to carbon monoxide episodes averaged over 4 and 8 hours except that the Administrator shall insure that declaration, notification, source inspections, and termination of such episodes will occur.

(5) Stationary source curtailment plans shall be prepared by business, commercial, industrial, and governmental establishments as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants in such activity:

(A) Stationary sources which can be expected to emit 100 tons or more per year of hydrocarbons or carbon monoxide.

(ii) The plans required by paragraph (f)(5)(i)(A) of this section shall include the following information:

(A) The information requested by Regulation IX, Rule 125, section d, as submitted to the EPA on November 4, 1977.

(B) The total number of employees at the facility during each shift on a normal weekday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(*1*) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant episodes, the equipment operations that emit hydrocarbons.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(*1*) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in air contaminant emissions.

(*2*) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the air contaminant emissions from such equipment.

(iii) Copies of the stationary source curtailment plans approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(6) The owner or operator of any governmental, business, commercial, or

industrial activity or facility listed in paragraph (f)(5) of this section shall submit a stationary source curtailment plan to the Administrator within 60 days after promulgation of final rulemaking.

(7) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons and carbon monoxide greater than or equal to 454 metric tons (500 tons) per year, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons and carbon monoxide greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, within 90 days after receipt.

(iii) For sources with emissions of hydrocarbons and carbon monoxide less than 91 metric tons (100 tons) per year, within 180 days after receipt.

(8) The owner or operator of any industrial, business, governmental, or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(9) A source inspection plan shall be implemented by the Administrator upon the declaration of any episode stage, and the following facilities shall be inspected to ensure compliance:

(i) Those sources covered under Rule 122, as submitted to the EPA on November 4, 1977, as appropriate.

(10) The Administrator shall insure that forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts are acquired.

(11) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Clean Air Act.

(12) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A–4–3) Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(g) Regulation for the prevention of air pollution emergency episodes—Priority II particulate matter emergency episode contingency plan.

(1) The requirements of this paragraph are applicable in the Sacramento County Air Pollution Control District.

(2) For the purposes of this paragraph the following episode criteria shall apply:

Pollutant	Averaging time (hours)	Stage 1	Stage 2	Stage 3
Particulate matter	24	[1] 375	[1] 625	[1] 875

[1] Micrograms per cubic meter.

(3) Whenever it is determined that any episode level specified in paragraph (g)(2) of this section is predicted to be attained, is being attained, or has been attained and is expected to remain at such levels for 12 or more hours, the appropriate episode level shall be declared.

(4) Whenever the available scientific and meteorological data indicate that any episode level specified in paragraph (g)(2) of this section is no longer being attained and is not predicted to increase again to episode levels, such episode shall be declared terminated.

(5) The following shall be notified whenever an episode is predicted, attained, or terminated:

(i) Public officials.

(ii) Public health, safety, and emergency agencies.

(iii) News media.

(h) The requirements of Subpart H of this chapter are met in the MBUAPCD which the following exceptions: There is no time schedule to assure that stationary source and traffic curtailment plans are submitted and reviewed in a timely manner; curtailment plans are not sufficiently specific; there are no provisions for the acquisition of forecasts of atmospheric stagnation conditions; and adequate mandatory emission control actions are not specified for Third-Stage oxidant episodes.

(i) Regulation for prevention of oxidant air pollution emergency episodes within the MBUAPCD.

(1) The requirements of this paragraph are applicable in the MBUAPCD.

(2) For the purposes of this regulation the following definitions apply:

(i) ''Administrator'' means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) ''Major national holiday'' means a holiday such as Christmas, New Year's Day or Independence Day.

(iii) ''Regulation VII'' in this paragraph means Regulation VII, ''Emergencies'', of the MBUAPCD, adopted May 25, 1977, and submitted to the Environmental Protection Agency as a revision to the California State Implementation Plan by the California Air Resources Board on November 4, 1977.

(3) The plans required by Rule 705(a) of Regulation VII shall include the following information in addition to that required in Rule 705(b) of Regulation VII, and shall be submitted and processed as follows:

(i) Stationary sources.

(A) The total number of employees at the facility during each shift:

(*1*) On a normal weekday.

(*2*) On a major national holiday.

(B) The amount and type of fuel used:

(*1*) On a normal weekday.

(*2*) On a major national holiday.

(C) For Third-Stage episodes:

(*1*) A list of equipment and the permit numbers of such equipment not operated on a major national holiday.

(*2*) A statement as to whether or not the facility operates on a major national holiday.

(ii) Indirect sources.

(A) The total number of employees at the facility during each shift:

(*1*) On a normal weekday.

(*2*) On a major national holiday.

(B) The number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(*1*) By the company, on company business, on a normal weekday and on a major national holiday.

(*2*) By employees commuting between home and the place of business on a normal weekday and on a major national holiday.

(C) The number of parking spaces:

(*1*) Available.

(*2*) Normally used on a weekday.

(*3*) Normally used on a major national holiday.

(D) The minimum number of motor vehicles to be operated that are necessary to protect the public health or safety.

(E) For Third-Stage episodes, a statement as to whether or not the facility operates on a major national holiday.

(iii) Each owner or operator required to submit a plan as specified under Rule 705(a) of Regulation VII shall submit such plans within 60 days after promulgation of the final rulemaking.

(iv) The plans submitted in accordance with the provisions of this paragraph shall be approved or disapproved by the Administrator within 120 days after receipt.

(v) Each owner or operator required to submit a plan as specified under Rule 705(a) of Regulation VII shall be notified within 90 days after the Administrator's decision.

(vi) Any plan disapproved by the Administrator shall be modified to overcome this disapproval and resubmitted to the Administrator within 30 days of the notice of disapproval.

(vii) A copy of the plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this section.

(4) The following actions shall be implemented by the Administrator upon declaration of a Third-Stage oxidant episode: the general public, schools, industrial, business, commercial, and governmental activities throughout the MBUAPCD shall operate as though the day were a major national holiday.

(5) The Administrator shall ensure the acquisition of forecasts of atmospheric stagnation conditions during any episode stage and updating of such forecasts.

(j)–(o) [Reserved]

(p) Regulation for prevention of air pollution emergency episodes—requirements for stationary source curtailment plans and particulate matter episodes.

(1) The requirements of this paragraph are applicable in the Los Angeles County, Riverside County, San Bernardino County Desert and Imperial County Air Pollution Control Districts.

(2) For the purposes of this regulation, the following definitions apply:

(i) ''Administrator'' means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) ''ug/m^3'' means micrograms per cubic meter.

(iii) ''Major national holiday'' means a holiday such as Christmas or New Year's Day.

(3) Stationary source curtailment plans shall be prepared by major stationary sources, as defined by section 169(1) of the Act:

(i) The plans required by this paragraph shall include the following information:

(A) The information requested in the California Air Resources Board's Criteria for Approval of Air Pollution Emergency Abatement Plans (Executive Order G–63).

(B) The total number of employees at the facility during each work shift on a normal weekday and on a major national holiday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday and on a major national holiday.

(D) For first-stage episodes:

(*1*) The measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(*1*) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(*1*) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in hydrocarbons, nitrogen oxides, and particulate matter emissions.

(*2*) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the hydrocarbons, nitrogen oxides and particulate matter emissions from such equipment.

(4) A copy of the stationary source curtailment plan approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(5) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in paragraph (p)(3) of this section shall submit a stationary source curtailment plan to the Administrator within 60 days after promulgation of final rulemaking.

(6) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator within 90 days.

(7) The owner or operator of any major stationary source required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated as to whether the plan has been approved or disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(8) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A–4–3), Environmental Protection Agency, 215 Fremont Street, San Francisco CA 94105.

(9) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Act.

(10) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes:

Pollutant	Averaging time (hours)	µg/m^3		
		Stage 1	Stage 2	Stage 3
Particulate matter	24	375	625	875

(q) The requirements of Subpart H of this chapter are met in the Fresno County Air Pollution Control District, with the following exceptions: There

are no episode criteria levels, declaration procedures, notification procedures, source inspection procedures, emission control actions, or episode termination procedures for carbon monoxide episodes based on 4- and 8-hour averaging times, or for particulate matter emergency episodes based on 24-hour averaging times; there is no time schedule to initiate the call for the submittal of individual abatement plans; the requirements for the content of the abatement plans are not sufficiently specific to ensure the adequate plans are submitted; there are no provisions for requiring abatement plans from operations which attract large numbers of motor vehicles with their related emissions; the Stage 3 photochemical oxidants (ozone) criterion level equals the Federal significant harm level; there are no provisions for adequate mandatory emission control actions.

(r) Regulation for prevention of air pollution emergency episodes—4- and 8-hour carbon monoxide criteria levels, mandatory emission control actions, preplanned abatement strategies, and a Priority I particulate matter emergency episode contingency plan.

(1) The requirements of this paragraph are applicable in the Fresno County Air Pollution Control District.

(2) For the purposes of this regulation the following definitions apply:

(i) ''Administrator'' means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) ''ppm'' means parts per million by volume.

(iii) ''$\mu g/m^3$'' means micrograms per cubic meter.

(iv) ''Major national holiday'' means a holiday such as Christmas or New Year's Day.

(3) For the purposes of this regulation, the following episode criteria shall apply to carbon monoxide episodes:

Pollutant	Averaging time (hours)	Stage 1 (ppm)	Stage 2 (ppm)	Stage 3 (ppm)
Carbon monoxide	4	25	45	60
	8	15	30	40

(4) The provisions of the Fresno County Air Pollution Control District's Regulation VI, as submitted on October 23, 1974, relating to carbon monoxide episodes averaged over 1 hour shall apply to carbon monoxide episodes averaged over 4 and 8 hours except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(5) Stationary source curtailment plans and traffic abatement plans shall be prepared by business, commercial, industrial, and governmental establishments in Fresno County as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental stationary source which can be expected to emit 100 tons or more per year of carbon monoxide, hydrocarbons, or particulate matter shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants in such activity:

(ii) The plans required by paragraph (r)(5)(i) of this section shall include the following information:

(A) The information requested in the California Air Resources Board's ''Criteria for Approval of Air Pollution Emergency Abatement Plans'' (Executive Order G–63).

(B) The total number of employees at the facility during each shift on a normal weekday and on a major national holiday.

(C) The amount of energy (gas, fuel oil, and electricity) used on a normal weekday and on a major national holiday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(*1*) The measures to curtail, as much as possible, equipment operations that emit air pollutants specific to the type of episode and, in the case of oxidant episodes, the equipment operations that emit hydrocarbons or nitrogen oxides.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(F) For third-stage episodes:

(*1*) A list of equipment, with permit numbers if applicable, which can be

shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in carbon monoxide, hydrocarbons, nitrogen oxides, and particulate matter emissions.

(*2*) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the carbon monoxide, hydrocarbons, nitrogen oxides, and particulate matter emissions from such equipment.

(iii) The owner or operator of any industrial, business, commercial, or governmental facility or activity employing more than 100 persons per shift at any one business address shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use.

(iv) The plans required by paragraph (r)(5)(iii) of this section shall include the following information:

(A) The information requested in the California Air Resources Board's ''Criteria for Approval of Air Pollution Emergency Abatement Plans'' (Executive Order G–63).

(B) The total number of employees at the facility during each shift.

(C) The total number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(*1*) By the company on company business on a normal weekday and a major national holdiay.

(*2*) By employees commuting between home and the place of business on a normal weekday and a major national holiday.

(*3*) The minimum number of motor vehicles to be operated that are necessary to protect public health or safety.

(6) A copy of the stationary source curtailment and/or traffic abatement plans approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(7) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in paragraph (r)(5) of this section shall submit a stationary source curtailment plan and/or traffic abatement plan to the Administrator within 60 days after promulgation of final rulemaking.

(8) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons, carbon monoxide, or particulate matter greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons, carbon monoxide, or particulate matter greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(9) The owner or operator of any industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator within 30 days after the plan has been evaluated as to whether the plan has been approved or disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(10) Any source that violates any requirement of this regulation shall be subject to enforcement action under section 113 of the Act.

(11) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, ATTN: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A–4–3), Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(12) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes and Stage 3 photochemical oxidants episodes:

Pollutant	Averaging time (hours)	µg/m³		
		Stage 1	Stage 2	Stage 3
Particulate matter	24	375	625	875
Photochemical oxidants	1	.....	.....	[1] 0.5

[1] Parts per million.

(13) The Fresno County Air Pollution Control District's Regulation VI, as submitted on October 23, 1974, relating to episodes for carbon monoxide and photochemical oxidants averaged over 1 hour, shall apply to particular matter episodes averaged over 24 hours, except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(14) The Administrator shall insure that the following actions will be taken in the source and receptor areas on the declaration of a Stage 1, Stage 2 or Stage 3 episode:

(i) For a Stage 1 or Stage 2 episode:

(A) Persons operating any facility or activity named in paragraph (r)(5) of this section shall implement the appropriate plans submitted in accordance with subparagraph (5) of the declared Stage 1 or Stage 2 episode for the appropriate air contaminant(s).

(ii) For a Stage 3 episode:

(A) The general public, schools, industrial, business, commercial, and governmental activities throughout Fresno County shall operate as though the day were a major national holiday.

[43 FR 22721, May 26, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.274, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.275 Particulate matter control.

(a) The following rules or portions of rules are retained because they control emissions of particulate matter, and because there is no demonstration that their deletion would not interfere with the attainment and maintenance of the national standards for particulate matter:

(1) Lake County APCD.

(i) Part III–50 and Part V–1B, submitted on October 23, 1974, and previously approved under 40 CFR 52.223.

(2) San Luis Obispo County APCD.

(i) Rule 113, submitted on February 21, 1972, and previously approved under 40 CFR 52.223.

(b) The following regulations are disapproved because they relax the control on particulate matter emissions without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) Amador County APCD.

(i) Rules 211 and 212, submitted on April 21, 1976. (Regulation V, Rules 13 and 14, submitted on June 30, 1972, and previously approved, are retained.)

(ii) Rules 207 and 212, submitted on October 13, 1977. (The analogous Rules 10 and 14 of Regulation V, submitted on June 30, 1972, and previously approved, are retained and shall remain in effect for Federal enforcement purposes.)

(2) Calaveras County APCD.

(i) Rule 211, submitted on October 13, 1977. (Rule 211, submitted on July 22, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(3) Del Norte County APCD.

(i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.

(ii) Rules 420(e) and (f), submitted on November 4, 1977.

(4) El Dorado County APCD.

(i) Rule 212, submitted on April 10, 1975, and Rule 211, submitted on August 2, 1976. (The analogous Rule 55, submitted on February 21, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(5) Humbolt County APCD.

(i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.

(ii) Rules 420(e) and (f), submitted on November 4, 1977.

(6) Mariposa County APCD.

(i) Rule 211, submitted on June 6, 1977. (Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(7) Mendocino County APCD.

(i) Rule 410(c)(7), submitted on November 10, 1976.

(ii) Rules 420(e) and (f), submitted on November 4, 1977.

(8) Nevada County APCD.

(i) Rule 212, submitted on April 10, 1975, and Rule 211, submitted on April 21, 1976. (Rule 52.1, submitted on June 30, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(9) Northern Sonoma County APCD.

(i) Rule 420(e), submitted on November 10, 1976.

(ii) Rules 420(e) and (f), submitted on October 13, 1977.

(10) Placer County APCD.

(i) Rule 211, submitted on October 13, 1977. (The analogous Rule 61, submitted on June 30, 1972, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(ii) Rules 202, 207, and 211, submitted on October 15, 1979; and Section 61, and Rules 202 and 207, previously approved in the June 30, 1972, January 10, 1975, and October 13, 1977 submittals, are retained.

(11) Plumas County APCD.

(i) Rule 211, submitted on June 6, 1977. (The analogous Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(12) San Luis Obispo County APCD.

(i) Rule 403, submitted on November 10, 1976.

(13) Sierra County APCD.

(i) Rule 211, submitted on June 6, 1977. (The analogous Rule 211, submitted on January 10, 1975, and previously approved, is retained and shall remain in effect for Federal enforcement purposes.)

(14) Trinity County APCD.

(i) Rules 410(c)(7) and 420(e), submitted on November 10, 1976.

(ii) Rules 420(e) and (f), submitted on November 4, 1977.

(c) The following regulations are disapproved because they relax the control on visible emissions without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards or any other applicable requirement of the Clean Air Act.

(1) South Coast Air Quality Management District.

(i) Rule 401, submitted on January 12, 1999.

[43 FR 25675, June 14, 1978]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.275, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.276 Sulfur content of fuels.

(a) The following rules or portions of rules are disapproved since they represent a relaxation of previously submitted regulations and an adequate control strategy demonstration has not been submitted showing that the relaxation will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards:

(1) North Central Coast Intrastate Region:

(i) Monterey Bay Unified APCD.

(A) Rule 412(a)(8), *Sulfur Content of Fuels*, submitted on October 23, 1974.

(b) The deletion of the following rules from the State implementation plan is disapproved since their deletion represents a relaxation of the control strategy, and an adequate demonstration showing that the relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards has not been submitted:

(1) Southeast Desert Intrastate Region:

(i) Imperial County APCD.

(A) Rule 126, Sulfur Contents of Fuels, submitted on June 30, 1972 and previously approved under 40 CFR 52.223.

[42 FR 56606, Oct. 27, 1977, as amended at 43 FR 35695, Aug. 11, 1978]

§ 52.277 Oxides of nitrogen, combustion gas concentration limitations.

(a) The following rules are being retained to the extent that the new rules are less stringent than the previously approved rules:

(1) North Central Coast Intrastate Region:

(i) Monterey Bay Unified APCD.

(A) Rule 404(c) submitted on February 21, 1972 by the Monterey-Santa Cruz Unified APCD and previously approved as part of the SIP, is being retained for sources combusting gaseous fuels. Rule 404(c) will be in effect for

Monterey and Santa Cruz Counties only. Rule 404(c), submitted on November 10, 1976 by the Monterey Bay Unified APCD, will only be in effect for sources combusting liquid or solid fuels with heat input rates greater than 1½ billion BTU per hour in the Monterey and Santa Cruz portions of the Unified APCD.

(B) Rule 408(b), submitted on February 21, 1972 by the San Benito County APCD and previously approved as part of the SIP, is being retained for sources combusting liquid, solid, or gaseous fuels with heat input rates less than 1½ billion BTU per hour. Rule 408(b) will be in effect for San Benito County only. Rule 404(c), submitted on November 10, 1976 by the Monterey Bay unified APCD, will only be in effect for sources combusting liquid, solid, or gaseous fuels with heat input rates greater than 1½ billion BTU per hour in the San Benito County portion of the Unified APCD.

[42 FR 56606, Oct. 27, 1977]

§ 52.278 Oxides of nitrogen control.

(a) The following regulations are disapproved because they relax the control of nitrogen oxides emissions without an accompanying analysis demonstrating that this relaxation will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) South central coast intrastate AQCR.

(i) San Luis Obispo County APCD.

(A) Rule 405(A)(1), *Nitrogen Oxides Emission Standards Limitations and Prohibitions* submitted on November 10, 1976, is disapproved; and Rule 114(4), *Gaseous Contaminants Oxides of Nitrogen* submitted on February 21, 1972 and previously approved in 40 CFR 52.223, is retained.

[43 FR 34467, Aug. 4, 1978]

§ 52.279 Food processing facilities.

(a) The following regulations are disapproved because they conflict with the requirements of 40 CFR Subpart I [formerly §51.18], ''Review of new sources and modifications,'' and relax the control on emissions from food processing facilities without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) Merced County APCD Rules 210.1–II–J, 210.1–VII–F, 408–C (new sentences two and three), adopted on August 21, 1984, and submitted on October 5, 1984.

(2) Bay Area Air Quality Management District sections 2–2–119, 2–2–120. Adopted on September 19, 1984, and submitted on October 5, 1984.

[52 FR 3646, Feb. 5, 1987, as amended at 55 FR 31835, Aug. 6, 1990]

§ 52.280 Fuel burning equipment.

(a) The following rules and regulations are disapproved because they relax the control on emissions from fuel burning equipment without any accompanying analyses demonstrating that these relaxations will not interfere with the attainment and maintenance of the National Ambient Air Quality Standards.

(1) Mountain Counties Intrastate AQCR:

(i) Amador County APCD.

(A) Rules 209, submitted on April 21, 1976 and October 15, 1979, are disapproved; and Regulation V, Rule 19, previously approved in the June 30, 1972 submittal, is retained.

(B) Rule 210(B)(1), submitted on October 15, 1979, is disapproved; and Rules 11 and 210, previously approved in the June 30, 1972 and April 21, 1976 submittals, are retained.

(ii) Calaveras County APCD.

(A) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on October 13, 1977, is disapproved; and Rule 408, Fuel Burning Equipment, previously approved in the June 30, 1972, submittal, is retained and shall remain in effect for Federal enforcement purposes.

(iii) Tuolumne County APCD.

(A) Rule 210, submitted on October 15, 1979, is disapproved; and Rule 407, previously approved in the June 30, 1972 submittal, is retained.

(iv) Placer County APCD.

(A) Rule 210, submitted on October 15, 1979, is disapproved, and Rule 210, previously approved in the October 13, 1977 submittal, is retained.

(2) Sacramento Valley Intrastate AQCR:

(i) Yolo-Solano APCD.

(A) Rule 2.16, *Fuel Burning Heat or Power Generators*, submitted on July 19, 1974 is disapproved; and Rule 2.16, *Fuel Burning Equipment*, submitted on June 30, 1972 and previously approved as part of the SIP in 40 CFR 52.223, is retained.

(3) Southeast Desert Intrastate AQCR.

(i) San Bernardino County Desert APCD.

(A) Rule 474, *Fuel Burning Equipment—Oxides of Nitrogen*, submitted November 4, 1977, is disapproved. Rule 68 (same title) submitted June 30, 1972 and approved in 40 CFR 52.223 is retained.

(b) The deletion of the following rules or portions of rules from the State implementation plan is disapproved since their deletion represents a relaxation of the control strategy and an adequate demonstration showing that the relaxation will not interfere with the attainment and maintenance of the national ambient air quality standards has not been submitted:

(1) Southeast Desert Intrastate Region:

(i) Imperial County APCD.

(A) Rule 131, Fuel Burning Equipment, submitted on February 21, 1972 and previously approved under 40 CFR 52.223.

(ii) San Bernardino County.

(A) Rule 67, Fuel Burning Equipment as applied to new sources. The emission limit of Rule 67 is retained and is applicable only to existing sources already granted a permit.

(c) The emission limits of Rules 67 and 72 are partially retained, applicable only to (existing) sources granted permits prior to June 17, 1981.

(1) South Coast Air Quality Management District.

(i) Rules 67, *Fuel Burning Equipment*, and 72, *Fuel Burning Equipment*, submitted on November 19, 1979.

[43 FR 25677, 25684 June 14, 1978, as amended at 43 FR 35696, Aug. 11, 1978; 43 FR 51774, Nov. 7, 1978; 43 FR 59490, Dec. 21, 1978; 44 FR 5664, Jan. 29, 1979; 46 FR 3889, Jan. 16, 1981; 46 FR 27116, 27118, May 18, 1981; 47 FR 25016, June 9, 1982]

§ 52.281 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b) [Reserved]

(c) Regulations for visibility new source review. The provisions of § 52.27 are hereby incorporated and made part of the applicable plan for the State of California only with respect to:

(1) Mendocino County air pollution control district,

(2) Monterey County air pollution control district,

(3) North Coast Unified air quality management district,

(4) Northern Sonoma County air pollution control district, and

(5) Sacramento County air pollution control district.

(d) The provisions of § 52.28 are hereby incorporated and made part of the applicable plan for the State of California, except for:

(1) Monterey County air pollution control district, and

(2) Sacramento County air pollution control district.

(e) [Reserved]

(f) *Approval.* On March 16, 2009, the California Air Resources Board submitted the ''California Regional Haze Plan'' (''CRHP''). The CRHP, as amended and supplemented on September 8, 2009 and June 9, 2010, meets the requirements of Clean Air Act section 169B and the Regional Haze Rule in 40 CFR 51.308.

(g) *Approval.* On June 16, 2014, the California Air Resources Board submitted the ''California Regional Haze Plan 2014 Progress Report'' (''Progress Report''). The Progress Report meets the requirements of Clean Air Act sections 169A and 169B and the Regional Haze Rule in 40 CFR 51.308.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45138, Nov. 24, 1987; 76 FR 34611, June 14, 2011; 80 FR 17331, Apr. 1, 2015; 82 FR 3129, Jan. 10, 2017]

§ 52.282 Control strategy and regulations: Ozone.

(a) *Attainment determination.* EPA has determined that the Ventura County severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of

November 15, 2005. EPA also has determined that the Ventura County severe 1-hour ozone nonattainment area is not subject to the requirements of section 185 of the Clean Air Act (CAA) for the 1-hour standard and that the State is not required to submit a SIP under Section 182(d)(3) of the CAA to implement a section 185 program for the 1-hour standard in this area. In addition, the requirements of section 172(c)(9) (contingency measures) for the 1-hour standard do not apply to the area.

(b) *Approval.* On December 19, 2007, the California Air Resources Board submitted a maintenance plan for the 1997 8-hour ozone NAAQS for the Monterey Bay Area as required by section 110(a)(1) of the Clean Air Act, as amended in 1990, and 40 CFR 51.905(a)(4). Elements of the section 110(a)(1) maintenance plan for ozone include a base year (2002) attainment emissions inventory for ozone, a demonstration of maintenance of the ozone NAAQS with projected emissions inventories through the year 2014 for ozone, a plan to verify continued attainment, and a contingency plan. The maintenance plan meets the Federal requirements of Clean Air Act section 110(a)(1) and 40 CFR 51.905(a)(4) and is approved as a revision to the California State Implementation Plan for the above mentioned area.

(c) *Determination of attainment.* Effective January 4, 2010, EPA is determining that the Imperial County, California 8-hour ozone nonattainment area has attained the 1997 8-hour ozone standard. Under the provisions of EPA's ozone implementation rule (see 40 CFR 51.918), this determination suspends the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act for as long as the area does not monitor any violations of the 8-hour ozone standard. If a violation of the 1997 ozone NAAQS is monitored in the Imperial County, California 8-hour ozone nonattainment area, this determination shall no longer apply.

(d) *Determinations that Certain Areas Did Not Attain the 1-Hour Ozone NAAQS.* EPA has determined that the Los Angeles-South Coast Air Basin Area and the San Joaquin Valley Area extreme 1-hour ozone nonattainment areas did not attain the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2010 and that the Southeast Desert Modified Air Quality Maintenance Area severe-17 1-hour ozone nonattainment area did not attain the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2007. These determinations bear on the areas' obligations with respect to the one-hour ozone standard anti-backsliding requirements whose implementation is triggered by a determination of failure to attain by the applicable attainment date: section 172(c)(9) contingency measures for failure to attain and sections 182(d)(3) and 185 major stationary source fee programs.

(e) *Determinations of attainment.* Effective June 3, 2016.

(1) *Approval of applications for extensions of applicable attainment dates.* Under section 181(a)(5) of the Clean Air Act, the EPA is approving the applications submitted by the California Air Resources Board dated June 1, 2015, referencing the District's letter of May 19, 2015, for extensions of the applicable attainment date for the San Luis Obispo (Eastern San Luis Obispo), CA 2008 8-hour ozone nonattainment areas from July 20, 2015 to July 20, 2016.

(2) *Determinations of attainment.* The EPA has determined that the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California have attained the 2008 8-hour ozone standard by the July 20, 2015 applicable attainment date, based upon complete quality-assured data for 2012–2014. Therefore, the EPA has met its obligation pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. As a result of these determinations, the Calaveras County, Chico (Butte County), San Francisco Bay Area and Tuscan Buttes 2008 8-hour ozone nonattainment areas in California will not be reclassified for failure to attain by their July 20, 2015, applicable attainment date under section 181(b)(2)(A).

(3) *Determinations of attainment.* EPA is determining that the Amador and

Calaveras Counties, Chico, Kern County, Mariposa and Tuolumne Counties, Nevada County, Sutter County and Ventura County 8-hour ozone nonattainment areas have attained the 1997 8-hour ozone standard, based upon complete quality-assured data for 2009–2011. Under the provisions of EPA's ozone implementation rule (see 40 CFR 51.918), these determinations suspend the attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures, and other planning SIPs related to attainment for as long as the areas continue to attain the 1997 8-hour ozone standard. If EPA determines, after notice-and-comment rulemaking, that any of these areas no longer meets the 1997 ozone NAAQS, the corresponding determination of attainment for that area shall be withdrawn.

(f) *Determination of attainment.* EPA has determined that, as of November 19, 2012, the Sacramento Metro 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon complete, quality-assured and certified ambient air quality monitoring data for 2007–2009.

(g) *Determination of attainment.* EPA has determined that, as of May 15, 2015, the Southeast Desert 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon complete, quality-assured and certified ambient air quality monitoring data for 2011–2013.

(h) *Determination of attainment.* EPA has determined that, as of August 17, 2016, the San Joaquin Valley 1-hour ozone nonattainment area has attained the 1-hour ozone standard, based upon sufficient, quality-assured and certified ambient air quality monitoring data for 2012–2014.

(i) *Determination of attainment.* The EPA has determined that, as of January 20, 2017, the San Luis Obispo (Eastern San Luis Obispo) 2008 8-hour ozone nonattainment area in California has attained the 2008 ozone standard by the July 20, 2016 applicable attainment date, based upon complete, quality-assured and certified data for 2013–2015. Therefore, the EPA has met its obligation pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. As a result of this determination, the San Luis Obispo (Eastern San Luis Obispo) 2008 ozone nonattainment area in California will not be reclassified for failure to attain by the July 20, 2016 applicable attainment date under section 181(b)(2)(A).

(j) *Determination of attainment.* The EPA has determined that, as of February 21, 2017, the Mariposa County 2008 8-hour ozone nonattainment area in California has attained the 2008 ozone standard, based upon complete, quality-assured and certified data for 2013–2015. Under the provisions of the EPA's ozone implementation rule (see 40 CFR 51.1118), this determination suspends the requirements for the area to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures for failure to attain or make reasonable further progress and other planning SIPs related to attainment of the 2008 ozone standard for as long as the area continues to attain the 2008 ozone standard. If the EPA determines, after notice-and-comment rulemaking, that the Mariposa County ozone nonattainment area no longer meets the 2008 ozone standard, the corresponding determination of attainment for this area shall be withdrawn.

(k) *Determination of attainment by the attainment date.* Effective September 23, 2019. The EPA has determined that the Mariposa County Moderate nonattainment area in California attained the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS) by the applicable attainment date of July 20, 2018, based upon complete quality-assured and certified data for the calendar years 2015–2017.

[74 FR 25156, May 27, 2009, as amended at 74 FR 66921, Dec. 17, 2009; 74 FR 63310, Dec. 3, 2009; 76 FR 82146, Dec. 30, 2011; 77 FR 64039, Oct. 18, 2012; 77 FR 71555, Dec. 3, 2012; 80 FR 20167, Apr. 15, 2015; 81 FR 26708, May 4, 2016; 81 FR 46612, July 18, 2016; 81 FR 93621, 93627, Dec. 21, 2016; 84 FR 44249, Aug. 23, 2019]

§ 52.283 Interstate Transport.

(a) *Approval.* On November 16, 2007, the California Air Resources Board submitted the ''Interstate Transport

State Implementation Plan (SIP) for the 1997 8-hour Ozone Standard and $PM_{2.5}$ to satisfy the Requirements of Clean Air Act section 110(a)(2)(D)(i) for the State of California (September 21, 2007)'' (''2007 Transport SIP''). The 2007 Transport SIP and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 1997 8-hour ozone and 1997 $PM_{2.5}$ NAAQS (''1997 standards'').

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility for the 1997 standards are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(2) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 1997 standards in any other State and interference with maintenance of the 1997 standards by any other State.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in ths paragraph.

(i) Amador County APCD

(ii) Butte County AQMD

(iii) Calaveras County APCD

(iv) Feather River AQMD

(v) Northern Sierra AQMD

(vi) Mariposa County APCD

(vii) Tuolumne County APCD

(viii) North Coast Unified AQMD

(ix) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(b) [Reserved]

(c) *2006 $PM_{2.5}$ NAAQS* and *2012 $PM_{2.5}$ NAAQS:* The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2006 $PM_{2.5}$ NAAQS and 2012 $PM_{2.5}$ NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_X as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2006 $PM_{2.5}$ NAAQS and 2012 $PM_{2.5}$ NAAQS in any other state and interference with maintenance of the 2006 $PM_{2.5}$ NAAQS and 2012 $PM_{2.5}$ NAAQS by any other state.

(d) *2008 ozone NAAQS:* The 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2008 ozone NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_X as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2008 ozone NAAQS in any other State and interference with maintenance of the 2010 ozone NAAQS by any other State.

(e) *2008 Pb NAAQS:* The 2011 Pb Infrastructure SIP, submitted on September 22, 2011, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2008 Pb NAAQS.

(1) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2008 Pb NAAQS in any other State and interference with maintenance of the 2008 Pb NAAQS by any other State.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_X as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(f) *2010 NO_2 NAAQS:* The 2012 NO_2 Infrastructure SIP, submitted on November 15, 2012, and the 2014 Multi-pollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2010 NO_2 NAAQS.

(1) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2010 NO_2 NAAQS in any other State and interference with maintenance of the 2010 NO_2 NAAQS by any other State.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_X as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(3) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8

(Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(g) *2010 SO_2 NAAQS:* The 2014 Multipollutant Infrastructure SIP, submitted on March 6, 2014, and the additional plan elements listed below meet the following specific requirements of Clean Air Act section 110(a)(2)(D)(i) for the 2010 SO_2 NAAQS.

(1) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with any other state's measures required under title I, part C of the Clean Air Act to prevent significant deterioration of air quality, except that these requirements are not fully met in the Air Pollution Control Districts (APCDs) or Air Quality Management Districts (AQMDs) listed in this paragraph.

(i) [Reserved]

(ii) North Coast APCD (PSD requirements for the regulation of $PM_{2.5}$, $PM_{2.5}$ precursors, condensable $PM_{2.5}$, $PM_{2.5}$ increments, and NO_X as an ozone precursor, only)

(iii) [Reserved]

(iv) South Coast AQMD (PSD requirements for the NAAQS, only).

(v) All other areas in California that are subject to the Federal PSD program as provided in 40 CFR 52.270.

(2) The requirements of section 110(a)(2)(D)(i)(II) regarding interference with other states' measures to protect visibility are met by chapter 3 (Emissions Inventory), chapter 4 (California 2018 Progress Strategy), and chapter 8 (Consultation) of the ''California Regional Haze Plan,'' adopted January 22, 2009.

(3) The requirements of CAA section 110(a)(2)(D)(i)(I) regarding significant contribution to nonattainment of the 2010 SO_2 NAAQS in any other State and interference with maintenance of the 2010 SO_2 NAAQS by any other State.

[76 FR 34611, June 14, 2011, as amended at 76 FR 34876, June 15, 2011; 76 FR 48006, Aug. 8, 2011; 81 FR 18780, Apr. 1, 2016; 81 FR 69392, Oct. 6, 2016; 82 FR 30773, July 3, 2017; 83 FR 14756, Apr. 6, 2018; 83 FR 65101, Dec. 19, 2018]

Subpart G—Colorado

§ 52.320 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan for Colorado under section 110 of the Clean Air Act, 42 U.S.C. 7410 and 40 CFR part 51 to meet national ambient air quality standards or other requirements under the Clean Air Act.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to June 1, 2015, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as submitted by the state to EPA, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries for paragraphs (c) and (d) of this section with EPA approval dates after June 1, 2015, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 8 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the State Implementation Plan as of June 1, 2015.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 8, 1595 Wynkoop Street, Denver, Colorado, 80202–1129; Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, West Building, 1301 Constitution Ave. NW., Washington, DC 20460; and, the National Archives and Records Administration (NARA). For information on the availability of materials from the docket in the EPA Headquarters Library, please call the Office of Air and Radiation (OAR) at (202) 566–1742. For information on the availability of this material at NARA, call (202) 741–6030, or go to *http://www.archives.gov/federal-register/cfr/ibr-locations.html*. Copies of the Colorado regulations we have approved are also available at *http://www.epa.gov/region8/air/sip.html*.

(c) *EPA-approved regulations.*

Comanche Intrastate	III	III	III	III	III
San Isabel Intrastate	I	III	III	III	III
San Luis Intrastate	III	III	III	III	III
Four Corners Interstate	IA	IA	III	III	III
Grand Mesa Intrastate	III	III	III	III	III
Yampa Intrastate	III	III	III	III	III

[37 FR 10855, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 44 FR 57409, Oct. 5, 1979; 74 FR 47891, Sept. 18, 2009]

§ 52.322 Extensions.

The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, extends for one year (until December 31, 1995) the attainment date for the Denver, Colorado, PM–10 nonattainment area.

[60 FR 52315, Oct. 6, 1995]

§ 52.323 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Colorado's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of Part D, Title 1, of the Clean Air Act as amended in 1977, except as noted below.

(b)(1) Insofar as the Prevention of Significant Deterioration (PSD) provisions found in this subpart apply to stationary sources of greenhouse gas (GHGs) emissions, the Administrator approves that application only to the extent that GHGs are ''subject to regulation'', as provided in this paragraph (b), and the Administrator takes no action on that application to the extent that GHGs are not ''subject to regulation.''

(2) Beginning January 2, 2011, the pollutant GHGs is subject to regulation if:

(i) The stationary source is a new major stationary source for a regulated NSR pollutant that is not GHGs, and also will emit or will have the potential to emit 75,000 tpy CO_2e or more; or

(ii) The stationary source is an existing major stationary source for a regulated NSR pollutant that is not GHGs, and also will have an emissions increase of a regulated NSR pollutant, and an emissions increase of 75,000 tpy CO_2e or more; and

(3) Beginning July 1, 2011, in addition to the provisions in paragraph (b)(2) of this section, the pollutant GHGs shall also be subject to regulation:

(i) At a new stationary source that will emit or have the potential to emit 100,000 tpy CO_2e; or

(ii) At an existing stationary source that emits or has the potential to emit 100,000 tpy CO_2e, when such stationary source undertakes a physical change or change in the method of operation that will result in an emissions increase of 75,000 tpy CO_2e or more.

(4) For purposes of this paragraph (b)—

(i) the term greenhouse gas shall mean the air pollutant defined in 40 CFR 86.1818–12(a) as the aggregate group of six greenhouse gases: Carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

(ii) the term tpy CO_2 equivalent emissions (CO_2e) shall represent an amount of GHGs emitted, and shall be computed as follows:

(A) Multiplying the mass amount of emissions (tpy), for each of the six greenhouse gases in the pollutant GHGs, by the gas's associated global warming potential published at Table A–1 to subpart A of 40 CFR part 98—Global Warming Potentials.

(B) Sum the resultant value from paragraph (b)(4)(ii)(A) of this section for each gas to compute a tpy CO_2e.

(iii) the term emissions increase shall mean that both a significant emissions increase (as calculated using the procedures in paragraphs I.A.2.

through I.A.3, and I.B of Part D of Colorado's Air Quality Commission's Regulation Number 3) and a significant net emissions increase (as defined in paragraphs II.A.26 and II.A.42.a of Part D of Colorado's Air Quality Commission's Regulation Number 3) occur. For the pollutant GHGs, an emissions increase shall be based on tpy CO_2e, and shall be calculated assuming the pollutant GHGs is a regulated NSR pollutant, and ''significant'' is defined as 75,000 tpy CO_2e instead of applying the value in paragraph II.A.42.b of Part D of Colorado's Air Quality Commission's Regulation Number 3.

[75 FR 82553, Dec. 30, 2010]

§ 52.324 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since the State lacks the authority to require owners or operators of stationary sources to install, maintain, and use emission monitoring devices and to make periodic reports to the State on the nature and amounts of emissions from such stationary sources.

(b) Delegation of authority: Pursuant to section 114 of the Act, Colorado requested a delegation of authority to enable it to require sources to install and maintain monitoring equipment and to report periodically on the nature and amount of their emissions. The Administrator has determined that Colorado is qualified to receive a delegation of the authority it requested. Accordingly, the Administrator delegates to Colorado his authority under section 114(a)(1)(B) and (C) of the Act, i.e., authorityto require sources within the State of Colorado to install and maintain monitoring equipment and to report periodically on the nature and amount of their emissions.

[37 FR 10855, May 31, 1972, as amended at 46 FR 24182, Apr. 30, 1981; 51 FR 40676, Nov. 7, 1986; 62 FR 2914, Jan. 21, 1997]

§ 52.325 [Reserved]

§ 52.326 Area-wide nitrogen oxides (NO_X) exemptions.

The Denver Regional Council of Governments (DRCOG) submitted a NO_X exemption petition to the EPA on May 25, 1994 and submitted supporting documentation via a letter dated August 1, 1994. This petition requested that the Denver metropolitan area, a transitional ozone nonattainment area, be exempted from the requirement to meet the NO_X provisions of the Federal transportation and general conformity rule with respect to ozone. The exemption request was based on monitoring data which demonstrated that the National Ambient Air Quality Standard for ozone had been attained in this area for the 3 years prior to the petition. The EPA approved this exemption request on July 28, 1995.

[60 FR 40291, Aug. 8, 1995]

§§ 52.327–52.328 [Reserved]

§ 52.329 Rules and regulations.

(a) On January 14, 1993, the Governor of Colorado submitted revisions to the State's nonattainment new source review permitting regulations to bring the State's regulations up to date with the 1990 Amendments to the Clean Air Act. With these revisions, the State's regulations satisfy the part D new source review permitting requirements for the following nonattainment areas: the Canon City, Lamar, Pagosa Springs, Aspen, Telluride, and Steamboat Springs moderate PM_{10} nonattainment areas, the Denver/Metro Boulder, Longmont, Colorado Springs, and Fort Collins moderate carbon monoxide nonattainment areas, the Greeley not classified carbon monoxide nonattainment area, and the Denver transitional ozone nonattainment area.

(b) On January 14, 1993 and on August 25, 1994, the Governor of Colorado submitted revisions to the State's nonattainment new source review permitting regulations to bring the State's regulations up to date with the 1990 Amendments to the Clean Air Act. With these revisions, the State's regulations satisfy the part D new source review permitting requirements for the Denver metropolitan moderate PM–10 nonattainment area.

(c) A revision to the State Implementation Plan was submitted by the State of Colorado on July 31, 2002. The submittal revises the Common Provisions regulation by adding affirmative defense provisions for source owners and operators for excess emissions during periods of startup and shutdown. The

affirmative defense provisions are contained in section II.J. As indicated in 40 CFR 52.320(c)(109), EPA approved the affirmative defense provisions contained in sections II.J.1 through II.J.4 of the Common Provisions regulation, adopted August 16, 2001 and effective September 30, 2001. Section II.J.5 of the Common Provisions regulation, adopted August 16, 2001 and effective September 30, 2001, is disapproved.

(d) On August 7, 2007, the Colorado submitted two packages with revisions to Colorado's Regulation 3 Regulation, 5 CCR 1001–5, Part A. One change adopts language to treat nitrogen dioxide as an ozone precursor. The State also adopted an increase in fees used to pay for the State's increased workload from the processing of Air Pollutant Emission Notices (APENs) and permits. Annual and permit processing fees shall be $16.54 for regulated pollutants and $114.96 for Hazardous Air Pollutants. One grammatical change was made to the text of Part A, Section 1.B.9.d:

(1) Regulation 3, 5 CCR 1001–5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section I, Applicability, Section I.B.9.d, Applicable Requirement, effective October 2006: Any standard or other requirement under section 112 of the Federal Act (hazardous air pollutants, including any requirement concerning accident prevention under section 112(r)(7) of the Federal Act) (Regulation No. 8) but not including the contents of any risk management plan required under section 112(r) of the Federal Act.

(2) Regulation 3, 5 CCR 1001–5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section I, Applicability, Section I.B.16, Criteria Pollutants, effective October 2006:

(i) Those pollutants for which the U.S. EPA has established national ambient air quality standards, including: carbon monoxide, nitrogen dioxide (direct emissions and as a precursor to ozone), sulfur dioxide, PM10, total suspended particulate matter, ozone, volatile organic compounds (as a precursor to ozone), and lead.

(ii) For the purpose of Air Pollutant Emission Notice reporting, criteria pollutants shall also include nitrogen oxides, fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, reduced sulfur compounds, municipal waste combustor organics, municipal waste combustor metals, and municipal waste combustor acid gases.

(3) Regulation 3, 5 CCR 1001–5, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Section VI Fees; Section VI.D.1, Fee Schedule, effective February 2007: Annual and permit processing fees shall be charged in accordance with and in the amounts specified in the provisions of Colorado Revised Statues section 25–7–114.7. Annual fees for regulated pollutants shall be $16.54. Annual fees for hazardous air pollutants shall be $114.96.

(e) The State of Colorado submitted revisions on September 16, 1997, June 20, 2003, July 11, 2005, August 8, 2006 and August 1, 2007 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part A, Section II. One of the revisions deleted two provisions from Section II and moved them to Section I of Regulation Number 3, Part A. The revised regulatory provisions read as follows:

(1) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section I, *Applicability*, Section I.B.16, *Criteria Pollutants,;* effective June 30, 2004:

(i) Those pollutants for which the U.S. EPA has established national ambient air quality standards, including: carbon monoxide, nitrogen dioxide, sulfur dioxide, PM_{10}, total suspended particulate matter, ozone, volatile organic compounds (as a precursor to ozone), and lead. For the purposes of Air Pollutant Emission Notice reporting, criteria pollutants shall also include nitrogen oxides, fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, reduced sulfur compounds, municipal waste combustor organics, municipal waste combustor metals, and municipal waste combustor acid gases.

(2) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part

A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section I, *Applicability*, Section I.B.43, *Uncontrolled Actual Emissions;* effective June 30, 2004:

(i) The annual emission rate corresponding to the annual process rate listed on the Air Pollutant Emission Notice form, without consideration of any emission control equipment or procedures. The division may allow a source to forego calculating or estimating its uncontrolled actual emissions of hazardous air pollutants upon a showing by the source and a determination by the division that the creation of such data is unreasonably costly, technically impractical or not reasonably related to information necessary for making regulatory decisions with respect to that source. The division's final determination may be appealed to the commission by the source.

(f) On August 8, 2006, Dennis E. Ellis, Executive Director of the Colorado Department of Public Health and Environment, and on behalf of the Governor, submitted revisions to 5 CCR 1001–13, Colorado's Regulation Number 11—Motor Vehicle Emissions Inspection Program, part F, section III.A.2. These revisions removed from Colorado's Regulation Number 11 the light duty vehicle emission testing limits that went into effect on January 1, 2006 for 1996 and newer model year vehicles. These revisions were adopted on November 17, 2005, and became state-effective on January 30, 2006. The revised version of section III.A.2, as approved by EPA, reads as follows:

(1) The following emissions standards shall apply to those tests performed on model year 1996 and newer vehicles, on and after January 1, of the dates specified:

Calendar year	HC	CO	NO_x
2002	1.2	20	3.0
2003	1.2	20	3.0

[59 FR 64336, Dec. 14, 1994, as amended at 62 FR 2914, Jan. 21, 1997; 62 FR 68195, Dec. 31, 1997; 71 FR 8961, Feb. 22, 2006; 76 FR 51905, Aug. 19, 2011; 76 FR 61056, Oct. 3, 2011; 77 FR 75390, Dec. 20, 2012]

§ 52.330 Control strategy: Total suspended particulates.

(a) *Part D—Conditional Approval:* The Pueblo plan is approved assuming the State demonstrates by December 31, 1981, through air quality modeling, attainment of the 24-hour and annual standards, while considering emissions from all sources in the nonattainment area. In addition, the State must repromulgate Regulation No. 1 to satisfy reasonably available control technology requirements in accordance with the following schedule:

(1) The Commission will consider and adopt for public hearing any changes or additions to Regulation No. 1 by February 15, 1981.

(2) The proposed regulations will be published in the Colorado Register by March 10, 1981.

(3) Public hearing will be held by May 14, 1981.

(4) Regulations will be approved with an effective date no later than July 1, 1981, and submitted to EPA by the same date.

[46 FR 26302, May 12, 1981]

§ 52.331 Committal SIP for the Colorado Group II PM_{10}. areas.

On April 14, 1989, the Governor submitted a Committal SIP for the Colorado Group II PM_{10} areas. The SIP commits the State to continue to monitor for PM_{10}, report data and to submit a full SIP if a violation of the PM_{10} National Ambient Air Quality Standards is detected.

[54 FR 43178, Oct. 23, 1989]

§ 52.332 Control strategy: Particulate matter.

(a) On April 9, 1992, the Governor of Colorado submitted the moderate PM–10 nonattainment area plan for the Canon City area. The submittal was made to satisfy those moderate PM–10 nonattainment area SIP requirements which were due for Canon City on November 15, 1991.

(b)(1) On February 24, 1992, and December 9, 1993, the Governor of Colorado submitted the moderate PM–10 nonattainment area plan for the Pagosa Springs area. The submittal was made to satisfy those moderate

PM–10 nonattainment area SIP requirements which were due for Pagosa Springs on November 15, 1991.

(2) On August 2, 1996, the Governor of Colorado submitted minor revisions to the Pagosa Springs Element of the Colorado PM–10 SIP.

(c) On May 27, 1993, the Governor of Colorado submitted the moderate PM–10 nonattainment area plan for the Lamar area. The submittal was made to satisfy those moderate PM–10 nonattainment area SIP requirements which were due for Lamar on November 15, 1991.

(d) On December 9, 1993, the Governor of Colorado submitted PM_{10} contingency measures for the moderate PM_{10} nonattainment areas of Canon City, Lamar, and Pagosa Springs. The submittal was made to satisfy the moderate PM_{10} nonattainment area requirements for contingency measures due for Canon City, Lamar, and Pagosa Springs on November 15, 1993.

(e)(1) On January 15, 1992, March 17, 1993, and December 9, 1993, the Governor of Colorado submitted the moderate PM–10 nonattainment area plan for the Aspen area. The submittals were made to satisfy those moderate PM–10 nonattainment area SIP requirements which were due for Aspen on November 15, 1991. The December 9, 1993 submittal was also made to satisfy the PM–10 contingency measure requirements which were due for Aspen on November 15, 1993.

(2) On March 13, 1995, the Governor of Colorado submitted minor revisions to the Aspen Element of the Colorado PM–10 SIP.

(f) On March 30, 1995, and November 17, 1995, the Governor of Colorado submitted the moderate PM_{10} nonattainment area plan for the Denver area. The March 30, 1995 submittal was made to satisfy those moderate PM_{10} nonattainment area SIP requirements due for the Denver PM_{10} nonattainment area on November 15, 1991. The November 17, 1995 submittal was also made to satisfy the PM_{10} contingency measure requirements which were due for Denver on November 15, 1993.

(g) On March 17, 1993, December 9, 1993, and April 22, 1996, the Governor of Colorado submitted the moderate PM_{10} nonattainment area plan for Telluride. The submittals were made to satisfy those moderate PM_{10} nonattainment area SIP requirements which were due for Telluride on November 15, 1991. The December 9, 1993 submittal was also made to satisfy the PM_{10} contingency measure requirements which were due for Telluride on November 15, 1993.

(h) On September 16, 1997 the Governor of Colorado submitted the moderate PM_{10} nonattainment area plan for Steamboat Springs. The submittal was made to satisfy those moderate PM_{10} nonattainment area SIP requirements which were due for Steamboat Springs on July 20, 1995.

(i) On September 22, 1997, the State of Colorado submitted a maintenance plan for the Canon City PM10 nonattainment area and requested that the area be redesignated to attainment for the PM10 National Ambient Air Quality Standards. An April 24, 2000 letter from Margie Perkins, Director, Colorado Air Pollution Control Division, to Richard Long, Director, EPA Region VIII Air and Radiation Program, was sent to clarify the requirements of the contingency plan section of the Canon City maintenance plan. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(j) On May 10, 2000, the State of Colorado submitted maintenance plans for the Telluride and Pagosa Springs PM_{10} nonattainment areas and requested that these areas be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation requests and maintenance plans satisfy all applicable requirements of the Clean Air Act.

(k) *Determination*—EPA has determined that the Steamboat Springs PM_{10} ''moderate'' nonattainment area attained the PM_{10} national ambient air quality standard by December 31, 2000. This determination is based on air quality monitoring data from 1998, 1999, and 2000.

(l) On July 30, 2001, the State of Colorado submitted a maintenance plan for the Denver PM_{10} nonattainment area (''PM–10 Redesignation Request and Maintenance Plan For the Denver Metropolitan Area,'' Chapter 4: ''Maintenance Plan,'' adopted April 19, 2001 by

the Colorado Air Quality Control Commission and effective April 19, 2001) and requested that the area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(m) On November 9, 2001, the State of Colorado submitted a maintenance plan for the Aspen PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(n) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Steamboat Springs PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfies all applicable requirements of the Clean Air Act.

(o) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Lamar PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(p) *Revisions to the Colorado State Implementation Plan,* PM10 Revised Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor's designee on September 25, 2006. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(q) Revisions to the Colorado State Implementation Plan, PM_{10} Revised Maintenance Plan for Cañon City, as adopted by the Colorado Air Quality Control Commission on November 20, 2008, State effective on December 30, 2008, and submitted by the Governor's designee on June 18, 2009. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(r) Revisions to the Colorado State Implementation Plan, PM_{10} Revised Maintenance Plan for Aspen, as adopted by the Colorado Air Quality Control Commission on December 16, 2010, State effective on March 1, 2011, and submitted by the Governor's designee on May 25, 2011. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(s) Revisions to the Colorado State Implementation Plan, PM_{10} Revised Maintenance Plan for Telluride, as adopted by the Colorado Air Quality Control Commission on November 19, 2009, State effective on December 30, 2009, and submitted by the Governor's designee on March 31, 2010. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(t) Revisions to the Colorado State Implementation Plan, Final Revised PM_{10} Maintenance Plan for the Pagosa Springs Attainment/Maintenance Area, as adopted by the Colorado Air Quality Control Commission on November 19, 2009, and submitted by the Governor's designee on March 31, 2010. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

(u) Revisions to the Colorado State Implementation Plan, PM_{10} Revised Maintenance Plan for Steamboat Springs, as adopted by the Colorado Air Quality Control Commission on December 15, 2011, State effective on January 30, 2012, and submitted by the Governor's designee on May 11, 2012. The revised maintenance plan satisfies all applicable requirements of the Clean Air Act.

[58 FR 68038, Dec. 23, 1993]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.332, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§§ 52.333–52.342 [Reserved]

§ 52.343 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met for the following categories of sources for preventing the significant deterioration of air quality:

(1) Sources locating on Indian lands.

(2) Sources locating on Indian Reservations.

(3) Sources which constructed prior to September 2, 1986 and which have

not otherwise subjected themselves to Colorado's PSD permitting regulations after September 2, 1986, either through application to Colorado for a PSD permit (in the case of those sources which improperly constructed without obtaining a PSD permit) or through application to Colorado for a major modification to the source.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Colorado for the sources identified in paragraph (a) of this section as not meeting the requirements of sections 160–165 of the Clean Air Act.

(c) The State of Colorado has clarified the generalized language contained in the Colorado Air Quality Control Regulations on the use of ''applicable air quality models.'' In a letter to Douglas M. Skie, EPA, dated May 19, 1989, Bradley J. Beckham, Director of the Air Pollution Control Division stated:

* * * All PSD permits reviewed by the Division will use the revised modeling guideline mentioned above [Guideline on Air Quality Models (Revised), EPA 450/2–78–027R including Supplement A (July 1987)] for determining if the air quality models, data bases, and other requirements are generally approved by EPA. Any future revisions (including appendices or supplement) will be incorporated into the Division's protocol for reviewing modeling for PSD permits.

[51 FR 31126, Sept. 2, 1986, and 52 FR 4622, Feb. 13, 1987, as amended at 52 FR 22638, June 15, 1987; 54 FR 27881, July 3, 1989; 57 FR 27000, June 17, 1992; 59 FR 42506, Aug. 18, 1994; 62 FR 2914, Jan. 21, 1997; 62 FR 13336, Mar. 20, 1997; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.344 Visibility protection.

(a) A revision to the SIP was submitted by the Governor on December 21, 1987, for visibility general plan requirements, monitoring, and long-term strategies.

(b) The Visibility NSR regulations are approved for industrial source categories regulated by the NSR and PSD regulations which have previously been approved by EPA. However, Colorado's NSR and PSD regulations have been disapproved for certain sources as listed in 40 CFR 52.343(a)(1). The provisions of 40 CFR 52.28 are hereby incorporated and made a part of the applicable plan for the State of Colorado for these sources.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45137, Nov. 24, 1987; 53 FR 30431, Aug. 12, 1988; 53 FR 48539, Dec. 1, 1988; 59 FR 51379, Oct. 11, 1994; 82 FR 3129, Jan. 10, 2017]

§ 52.345 Stack height regulations.

The State of Colorado has committed to revise its stack height regulations should EPA complete rulemaking to respond to the decision in *NRDC* v. *Thomas*, 838 F. 2d 1224 (DC Cir. 1988). In a letter to Mr. Douglas M. Skie, EPA, dated May 9, 1988, Bradley J. Beckham, Director of the Colorado Air Pollution Control Division stated:

* * * We are submitting this letter to allow EPA to continue to process our current SIP submittal with the understanding that if EPA's response to the NRDC remand modified the July 8, 1985, regulations, EPA will notify the state of the rules that must be changed to comply with the EPA's modified requirements. The State of Colorado agrees to make appropriate changes.

[54 FR 24340, June 7, 1989]

§ 52.346 Air quality monitoring requirements.

In a letter and submittal dated July 7, 1993, from the Governor of Colorado to the EPA Region VIII Administrator, the State submitted a revised Air Quality Monitoring State Implementation Plan. The plan was adopted by the State on March 18, 1993, and completely replaces the previous version of the Air Quality Monitoring plan as identified at 40 CFR 52.320 (c)(17). The revisions updated the plan to bring it into conformance with the Federal requirements for air quality monitoring as found in 40 CFR part 58. The State commits to meet these Federal requirements.

[58 FR 49435, Sept. 23, 1993]

§ 52.347 [Reserved]

§ 52.348 Emission inventories.

(a) The Governor of the State of Colorado submitted the 1990 carbon monoxide base year emission inventories for the Colorado Springs, Denver/

Longmont, and Fort Collins nonattainment areas on December 31, 1992, as a revision to the State Implementation Plan (SIP). The Governor submitted revisions to the Colorado Springs and Fort Collins inventories by a letter dated March 23, 1995. The Governor submitted revisions to the Denver/Longmont inventory by letters dated July 11, 1994, and October 21, 1994. The inventories address emissions from point, area, on-road mobile, and non-road sources. These 1990 base year carbon monoxide inventories satisfy the requirements of section 187(a)(1) of the Clean Air Act for each of these nonattainment areas.

(b) On September 16, 1997, the Governor of Colorado submitted the 1993 Carbon Monoxide Periodic Emission Inventories for Colorado Springs, Denver, Fort Collins, and Longmont as revisions to the Colorado State Implementation Plan. These inventories address carbon monoxide emissions from stationary point, area, non-road mobile, and on-road mobile sources.

(c) On September 16, 1997, the Governor of Colorado submitted the 1990 Carbon Monoxide Base Year Emission Inventory for Greeley as a revision to the Colorado State Implementation Plan. This inventory addresses carbon monoxide emissions from stationary point, area, non-road, and on-road mobile sources.

(d) On May 10, 2000, the Governor of Colorado submitted the 1996 Carbon Monoxide Periodic Emission Inventories for Denver and Fort Collins, as a revision to the Colorado State Implementation Plan. The inventories address carbon monoxide emissions from stationary point, area, non-road mobile, and on-road mobile sources.

[61 FR 67469, Dec. 23, 1996, as amended at 63 FR 38089, July 15, 1998; 64 FR 11782, Mar. 10, 1999; 65 FR 63548, Oct. 24, 2000]

§ 52.349 Control strategy: Carbon monoxide.

(a) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Greeley, as adopted by the Colorado Air Quality Control Commission on September 19, 1996, State effective November 30, 1996, and submitted by the Governor on September 16, 1997.

(b) On June 25, 1996, the Governor of Colorado submitted a revision to the Colorado Springs element of the carbon monoxide (CO) portion of the Colorado State Implementation Plan (SIP). The revision to the Colorado Springs element was submitted to satisfy certain requirements of part D and section 110 of the Clean Air Act (CAA) as amended 1990. The revision substitutes Colorado's oxygenated gasoline program for the Colorado Springs bus purchase program as a source of emissions reductions credits in the Colorado Springs CO element of the SIP. This revision removes the bus purchase program from the EPA-approved SIP. EPA originally approved the bus purchase program as part of the Colorado Springs CO element of the SIP on December 12, 1983 (48 FR 55284).

(c) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on January 15, 1998, State effective March 30, 1998, and submitted by the Governor on August 19, 1998. The Maintenance Plan removes the Clean Air Campaign from the SIP. The Clean Air Campaign was approved into the SIP at 40 CFR 52.320(c)(43)(i)(A).

(d) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Redesignation Request and Maintenance Plan for Longmont, as adopted by the Colorado Air Quality Control Commission on December 18, 1997, State effective March 2, 1998, and submitted by the Governor on August 19, 1998.

(e) Revisions to the Colorado State Implementation Plan, Carbon Monoxide Revised Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on February 17, 2000, State effective April 30, 2000, and submitted by the Governor on May 10, 2000.

(f) *Determination.* EPA has determined that the Denver carbon monoxide ''serious'' nonattainment area attained the carbon monoxide national ambient air quality standard by December 31, 2000. This determination is

based on air quality monitoring data from 1998, 1999, and 2000.

(g) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS Redesignation Request and Maintenance Plan for Denver entitled ''Carbon Monoxide Redesignation Request and Maintenance Plan for the Denver Metropolitan Area, ''excluding Chapter 1, Chapter 2, and Appendix C, as adopted by the Colorado Air Quality Control Commission on January 10, 2000, State effective March 1, 2000, and submitted by the Governor on May 10, 2000.

(h) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS Redesignation Request and Maintenance Plan for Fort Collins entitled ''Carbon Monoxide Redesignation Request and Maintenance Plan for the Fort Collins Area,'' excluding Part I—Chapter 1 and Part I—Chapter 2, as adopted by the Colorado Air Quality Control Commission on July 18, 2002, State effective September 30, 2002, and submitted by the Governor on August 9, 2002.

(i) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on June 19, 2003, State effective on August 30, 2003, and submitted by the Governor on October 15, 2003.

(j) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, revised maintenance plan for Colorado Springs entitled ''Revised Carbon Monoxide Maintenance Plan for the Colorado Springs Attainment/Maintenance Area'', as adopted by the Colorado Air Quality Control Commission on December 18, 2003, State effective March 1, 2004, and submitted by the Governor on April 12, 2004.

(k) Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, revised maintenance plan for Longmont entitled ''Revised Carbon Monoxide Maintenance Plan for the Longmont Attainment/Maintenance Area'', as adopted by the Colorado Air Quality Control Commission on December 18, 2003, State effective March 1, 2004, and submitted by the Governor on April 12, 2004.

(l) Revisions to the Colorado State Implementation Plan entitled ''Revised Carbon Monoxide Maintenance Plan for the Greeley Attainment/Maintenance Area,'' as adopted by the Colorado Air Quality Control Commission on December 19, 2002, and submitted by the Governor on June 20, 2003.

(m) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Denver, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor's designee on September 25, 2006.

(n) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Longmont, as adopted by the Colorado Air Quality Control Commission on December 15, 2005, State effective on March 2, 2006, and submitted by the Governor's designee on September 25, 2006.

(o) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Colorado Springs, as adopted by the Colorado Air Quality Control Commission on December 17, 2009 and submitted by the Governor's designee on March 31, 2010.

(p) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Greeley, as adopted by the Colorado Air Quality Control Commission on December 17, 2009 and submitted by the Governor's designee on March 31, 2010.

(q) Revisions to the Colorado State Implementation Plan, revised Carbon Monoxide Maintenance Plan for Fort Collins, as adopted by the Colorado Air Quality Control Commission on December 16, 2010 and submitted by the Governor's designee on May 25, 2011.

[64 FR 11782, Mar. 10, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.349, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.350 Control strategy: Ozone.

(a) Revisions to the Colorado State Implementation Plan, 1-hour ozone NAAQS Redesignation Request and

Maintenance Plan for Denver entitled ''Ozone Redesignation Request and Maintenance Plan for the Denver Metropolitan Area,'excluding Chapter 1 and Appendix B, as adopted by the Colorado Air Quality Control Commission on January 11, 2001, State effective March 4, 2001, and submitted by the Governor on May 7, 2001.

(b) Revisions to the Colorado State Implementation Plan, 8-hour ozone NAAQS Early Action Compact plan for the metropolitan Denver area entitled ''Early Action Compact Ozone Action Plan,'' excluding sections entitled ''Introduction'' and ''Ozone Monitoring Information,'' as adopted by the Colorado Air Quality Control Commission on March 12, 2004, and submitted by the Governor to us on July 21, 2004.

(c) Revisions to the Colorado State Implementation Plan for the 1997 8-hour ozone NAAQS entitled ''Denver Metro Area & North Front Range 8–Hour Ozone Attainment Plan,'' excluding the last paragraph on page IV–1, the first paragraph on page IV–2, the words ''federally enforceable'' in the second to last paragraph on page V–6, and the reference to Attachment A in the Table of Contents and on page IV–3, as adopted by the Colorado Air Quality Control Commission on December 12, 2008, and submitted by the Governor to EPA on June 18, 2009.

[66 FR 47092, Sept. 11, 2001, as amended at 70 FR 48654, Aug. 19, 2005; 76 FR 47451, Aug. 5, 2011]

§ 52.351 United States Postal Service substitute Clean Fuel Fleet Program.

Revisions to the Colorado State Implementation Plan, carbon monoxide NAAQS, United States Postal Service substitute clean-fuel vehicle program, as allowed under section 182(c)(4)(B) of the Clean Air Act, to address the requirements of section 246 of the Clean Air Act for the Denver Metropolitan carbon monoxide nonattainment area. The revisions were adopted by the Colorado Air Quality Control Commission on March 16, 2000, State effective May 30, 2000, and submitted by the Governor on May 7, 2001. Administrative corrections to the Governor's May 7, 2001, submittal were submitted by the Colorado Attorney General's office on May 30, 2001.

[66 FR 64758, Dec. 14, 2001]

§ 52.352 Interstate transport.

(a) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport regarding the 1997 8-Hour Ozone Standard for the ''significant contribution,'' the ''interference with maintenance'' requirements, and the addition of ''interference with visibility protection'' requirements regarding the 1997 8-Hour Ozone and $PM_{2.5}$ Standards, submitted by the Governor's designee on June 18, 2009 and March 31, 2010.

(b) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding the 1997 8-Hour Ozone and 1997 $PM_{2.5}$ Standards for the ''interference with prevention of significant deterioration'' requirement, and the addition of the ''significant contribution'' and ''interference with maintenance'' requirements regarding the 1997 $PM_{2.5}$ Standards, submitted by the Governor's designee on March 31, 2010.

(c) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2006 $PM_{2.5}$ Standards for all four of the CAA section 110(a)(2)(D)(i) requirements submitted by the Governor's designee on May 11, 2012.

(d) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2008 Ozone Standards for both of the CAA section 110(a)(2)(D)(i)(I) requirements submitted to EPA on December 31, 2012.

(e) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2012 $PM_{2.5}$ Standards, submitted to EPA on December 1, 2015, for both elements of CAA section 110(a)(2)(D)(i)(I) for the 2012 $PM_{2.5}$ NAAQS.

(f) Addition to the Colorado State Implementation Plan of the Colorado Interstate Transport SIP regarding 2010 Standards, submitted to EPA on July 17, 2013, and February 16, 2018, for both elements of CAA section

110(a)(2)(D)(i)(I) for the 2010 SO_2 NAAQS.

[77 FR 1039, Jan. 9, 2012, as amended at 80 FR 47864, Aug. 10, 2015; 81 FR 7708, Feb. 16, 2016; 83 FR 31329, July 5, 2018; 83 FR 44503, Aug. 31, 2018]

§ 52.353 Section 110(a)(2) infrastructure requirements.

(a) On January 7, 2008, James B. Martin, Executive Director of the Colorado Department of Public Health and Environment for the state of Colorado, submitted a certification letter which provides the state of Colorado's SIP provisions for meeting the requirements of CAA Section 110(a)(1) and (2) relevant to the 1997 8-hour ozone NAAQS. The State's 1997 Ozone Infrastructure SIP is approved with respect to the requirements of the following elements of section 110(a)(2) of the CAA for the 1997 8-hour ozone NAAQS: (A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).

(b) On April 4, 2008 James B. Martin, Executive Director, Colorado Department of Public Health and Environment, provided a submission to meet the infrastructure requirements for the State of Colorado for the 1997 $PM_{2.5}$ NAAQS. On June 4, 2010, Martha E. Rudolph, Executive Director, Colorado Department of Public Health and Environment, provided a submission to meet the infrastructure requirements for the State of Colorado for the 2006 $PM_{2.5}$ NAAQS. The State's Infrastructure SIP is approved with respect to the 1997 and 2006 $PM_{2.5}$ NAAQS with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (B), (C) with respect to PSD and minor NSR requirements, (E), (F), (G), (H), (J) with respect to PSD requirements and the requirements of sections 121 and 127 of the Act, (K), (L), and (M).

(c) The Colorado Department of Public Health and Environment provided submissions to meet infrastructure requirements for the State of Colorado for the 2008 ozone, 2008 lead, and 2010 NO_2 NAAQS were received on December 31, 2012, July 26, 2012, and March 7, 2013, respectively. The State's Infrastructure SIP is approved with respect to the 2008 ozone, 2008 lead, and 2010 NO_2 NAAQS with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (C) with respect to minor NSR and PSD requirements, (D)(i)(II) elements 3 and 4, (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M); (B) for the 2008 Pb and 2008 ozone NAAQS and conditional approval of (B) for the 2010 NO_2 NAAQS; and D(i)(I) elements 1 and 2 for the 2008 Pb and 2010 NO_2 NAAQS.

(d) The Colorado Department of Public Health and Environment provided submissions to meet infrastructure requirements for the State of Colorado for the 2010 SO_2 and 2012 $PM_{2.5}$ NAAQS were received on July 10, 2013 and December 1, 2015, respectively. The State's Infrastructure SIP for the 2010 SO_2 and 2012 $PM_{2.5}$ NAAQS is approved with respect to section (110)(a)(1) and the following elements of section (110)(a)(2): (A), (B), (C) with respect to minor NSR and PSD requirements, (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).

(e) The Colorado Department of Environmental Quality submitted certification of Colorado's infrastructure SIP for the 2015 O_3 NAAQS on September 17, 2018. Colorado's infrastructure certification demonstrates how the State, where applicable, has plans in place that meet the requirements of section 110 for the 2015 O_3 NAAQS. The State's Infrastructure SIP for 2015 O_3 NAAQS is approved with respect to CAA section 110(a)(1) and (2).

[77 FR 21452, Apr. 10, 2012, as amended at 78 FR 58188, Sept. 23, 2013; 80 FR 50206, Aug. 19, 2015; 82 FR 39031, Aug. 17, 2017; 85 FR 20178, Apr. 10, 2020]

§ 52.354 Original identification of plan.

(a) This section identifies the original ''Air Implementation Plan for the State of Colorado'' and all revisions submitted by Colorado that were federally approved prior to June 1, 2015.

(b) The plan was officially submitted on January 26, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Request for legal authority submitted February 14, 1972, by the Governor.

(2) Request for 110(e) extensions submitted March 20, 1972, by the Governor.

(3) Statements by State Air Pollution Control Commission (APCC) related to public inspection of emission

data, emergency episodes, and transportation control submitted May 1, 1972, by the APCC. (Non-regulatory)

(4) List of sources under compliance schedules submitted May 1, 1972, by the State Department of Health.

(5) Transportation Control Plans submitted June 4, 1973, by the Governor.

(6) Statements relating to transportation control plans submitted July 16, 1973, by the Governor. (Non-regulatory)

(7) Plan revisions submitted November 21, 1973, by the Governor which delete Section III of Regulation No. 1 only as it relates to existing sources in Appendix P concerning SO_2.

(8) On June 7, 1974, the Governor submitted five Air Quality Maintenance Area designations.

(9) Supplemental information about the Air Quality Maintenance Areas was submitted by the Governor on January 29, 1975.

(10) Procedural rules for all proceedings before the Air Pollution Control Commission, submitted May 5, 1977, by the Governor.

(11) On January 2, 1979, the Governor submitted the nonattainment area plan for all areas designated nonattainment as of March 3, 1978. EPA is taking no action on areas for which the Governor has requested redesignations (Larimer-Weld TSP and ozone; El Paso County ozone).

(i) Regulation 9, ''Trip Reduction,'' previously approved on October 5, 1979, and now deleted without replacement.

(12) Extension request for attainment of CO and O_3 was submitted by the Governor on January 5, 1979.

(13) On July 5, 1979, the governor submitted the Air Pollution Control Commission's final comment on our May 11, 1979, proposal. This included a clarification that the ''No-Drive Day'' was not part of the State Implementation Plan and transportation control measures schedules for Larimer-Weld.

(14) On July 18, 1979, the Commission committed to revising Regulation 7.

(15) On July 23, 1979, the Governor submitted House Bill 1090 and Senate Bill 1 as part of the plan.

(16) On July 27, 1979, the Governor submitted the Denver Regional Council of Governments schedules for implementing the transportation control strategies, and clarified that the Transportation Development Plan was part of the plan.

(17) On March 4, 1980, the Governor submitted a plan revision to meet the requirements of Air Quality Monitoring 40 CFR part 58, subpart C, § 58.20.

(18) On May 29, 1980, the Governor submitted written evidence of the State's legal authority to implement and enforce an automobile emissions control program as well as schedules for implementing that program and a demonstration that it will achieve a 25% reduction in exhaust emissions by 1987.

(19) On January 22 and February 6, 1980 the Governor submitted schedules for the implementation of transportation control measures for Denver and Larimer-Weld elements of the State Implementation Plan, respectively.

(20) On April 21, 1980, the Governor submitted a plan revision to meet the data reporting requirements of section 127 of the Clean Air Act.

(21) On June 22, 1980, the Governor submitted the following amended rules:

REPEAL AND REPROMULGATION OF REGULATION NO. 3 ''A Regulation Requiring Air Pollutant Emission Notice, Emission Permits and Fees.''

REVISIONS TO COMMON PROVISIONS REGULATION as they relate to changes in Regulation No. 3.

(22) On June 5, 1980, the Governor submitted the following rules:

REPEAL AND REPROMULGATION OF REGULATION NO. 7 ''A Regulations to Control Emissions of Volatile Organic Compounds'' and revisions to the Common Provisions Regulations as they relate to changes in Regulation No. 7.

(23) On August 25, 1980, the Governor of Colorado submitted a site specific revision to the State Implementation Plan for Coors Container Corporation, Paper Packaging Division, in regard to alternative volatile organic compound emissions reduction for its printing presses.

(24) Provisions to meet the requirements of sections 110 and 172 of the Clean Air Act, as amended in 1977, regarding control of Group II VOC sources were submitted on January 6, 1981, and the supplemental information received on August 20, 1981.

(25) On December 29, 1980, the Governor submitted the following rule:

Regulation No. 11, covering procedures for garage licensing (including mechanic testing and licensing), equipment requirements (including standards and specifications for exhaust gas analyzers), requirements for inspections, and emission standards as part of the Colorado motor vehicle inspection program.

(26) On March 23, 1981, the Governor submitted revised regulations limiting sulfur dioxide emissions from certain oil shale production facilities.

(27) On April 12, 1982, the Governor submitted the plan revisions to show attainment of the lead National Ambient Air Quality Standard.

(28) Regulation Number 7 is part of the plan.

(29) Provisions to meet the requirements of Part D of the Clean Air Act for carbon monoxide in Colorado Springs, Fort Collins, and Greeley and ozone in Denver were submitted on June 24, 1982, and supplemented by information submitted on May 4, 1983,by the Colorado Air Quality Control Commission.

(30) Revisions to Air Pollution Control Commission Regulation No. 1 related to fugitive particulate emissions, were submitted by the Governor on June 22, 1982; on December 6, 1982; and on March 23, 1983, with a technical clarification dated August 5, 1982. Included is approval of requirements for continuous emission monitoring (CEM) of sulfur dioxide on fossil fuel fired steam generator with greater than 250 million BTU per hour heat input. Also addressed is the reinstatement of the 40% opacity limitation for wigwam waste-wood burners into Regulation No. 1. With this is the addition of operation and maintenance (O&M) requirements to promote improved operation of the wigwam burners.

(i) *Incorporation by reference.* (A) Emission Control Regulations for Particulates, Smokes and Sulfur Oxides for the State of Colorado, Regulation No. 1.II (Smoke and Opacity); III (Particulates); IV (Continuous Emission Monitoring Requirements for Existing Sources; VII (Statements of Basis and Purpose); and Appendices A and B; which were effective on May 30, 1982.

(B) Colorado Air Quality Control Commission Common Provisions Regulation which was effective on May 30, 1982.

(C) Letter of August 5, 1982, from the State of Colorado to EPA. Clarification of the SIP Re: Continuous Emission Requirements for Oxides of Sulfur from Fossil Fueled Steam Generators.

(31) Revisions to Air Pollution Control Commission Regulation No. 11 related to the Colorado Inspection and Maintenance (I/M) program for exhaust emission inspection of motor vehicles, submitted by the Governor on December 10, 1984.

(32) Revisions to Air Pollution Control Commission Regulation No. 1, section II.A.6 and III.C.2 (a) and (b), submitted by the Governor on April 9, 1985.

(i) *Incorporation by reference.* (A) Revisions to Air Pollution Control Commission Regulation No. 1, ''Emission Control Regulation for Particulates, Smokes, and Sulfur Oxides for the State of Colorado,'' sections II.A.6 and III.C.2 (a) and (b), effective March 2, 1985.

(33) A revision to Regulation No. 4, ''Regulation on the Sale of New Woodstoves'', to control emissions from new woodstoves was submitted by the Governor on October 24, 1986.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 4, ''Regulation on the Sale of New Woodstoves'' (Section III.A., E., F., G. and Section VI.B. and C.) adopted June 27, 1985.

(34) [Reserved]

(35) Colorado Air Pollution Control Commission Regulation No. 4, ''Regulation on the Sale of New Wood Stoves'', submitted by the Governor on July 18, 1985.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 4., ''Regulation on the Sale of New Wood Stoves'', adopted June 27, 1985.

(36) ''Revisions to Colorado Regulation No. 3 Requiring Air Contaminant Emission Notices, Emission Permits and Fees as it Relates to the Prevention of Significant Deterioration'' and ''Revisions to Common Provision Regulation as Related to Regulation 3.'' Changes submitted April 18, 1983, by the Governor.

(37) Supplemental information submitted on December 16, 1985, by the

Colorado Department of Health concerning compliance with EPA's stack height regulations in issuing PSD permits.

(i) *Incorporation by reference.* (A) Revisions to Regulation 3 and Common Provisions Regulation adopted March 10, 1983, by the Colorado Air Quality Control Commission.

(B) Supplemental information submitted on December 16, 1985, by the Colorado Department of Health concerning compliance with EPA's stack height regulation in issuing PSD permits.

(38) Revisions to Regulation 1 to control emissions from alfalfa dehydrators were submitted by the Governor on July 29, 1987.

(i) *Incorporation by reference.* (A) Section II.A.6 and introductory text of Section III.C.2.a of Regulation 1 adopted by the Colorado Air Quality Control Commission on January 15, 1987, effective on March 2, 1987.

(39) Regulation 12, to control emissions from diesel fleets with nine or more vehicles over 7,500 pounds empty weight, registered in the AIR Program area (the Colorado I/M program), was submitted by the Governor on December 21, 1987.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, Regulation No. 12, adopted December 18, 1986, and effective January 30, 1987.

(40) A revision to the Colorado SIP was submitted by the Governor on May 8, 1986, for Visibility New Source Review.

(i) *Incorporation by reference.* (A) Revision to the Colorado State Implementation Plan regarding Revision to Regulation No. 3, Section XIV was submitted by the Governor on April 18, 1983, and was adopted on March 10, 1983.

(B) Revision to the Colorado State Implementation Plan regarding Revision to Regulation No. 3, Section IV was submitted by the Governor on May 8, 1986, and was adopted on March 20, 1986.

(41) A revision to the SIP was submitted by the Governor on December 21, 1987, for visibility general plan requirements, monitoring, and long-term strategies.

(i) *Incorporation by reference.* (A) Letter dated December 21, 1987, from Governor Roy Romer submitting the Colorado Visibility SIP revision.

(B) The visibility SIP revision, Regulation No. 3, ''Regulation requiring an air contaminant emission notice, Emission Permit Fees'', section XV, adopted by the Colorado Air Quality Control Commission on November 19, 1987.

(42) Revisions to Air Pollution Control Regulation No. 1, requiring reasonably available control technology RACT for carbon monoxide control on petroleum refinery catalytic cracking units were submitted by the Governor on May 8, 1986.

(i) *Incorporation by reference.* (A) Revisions to Section IV., paragraphs IV.A., IV.D.2. and IV.E., and Section VII., Regulation No. 1, emission control regulations for particulates, smokes, carbon monoxide, and sulfur oxides for the State of Colorado requiring CEM and RACT on petroleum refinery catalytic cracking units in the metro Denver area effective on April 30, 1986.

(43) On June 15, 1988, the Governor submitted revisions to the CO SIP for Colorado Springs. The revisions contain a new measure, the Clean Air Campaign. EPA considers all other aspects of the submittal to be surplus.

(i) *Incorporation by reference.* (A) Clean Air Campaign portion of the Carbon Monoxide State Implementation Plan for the Colorado Springs urbanized area, revised August 12, 1987.

(44) A revision to Regulation No. 4 of the Colorado SIP which exempts certain woodburning devices from the certification requirements of Regulation No. 4 was submitted by the Governor of Colorado on September 10, 1988.

(i) *Incorporation by reference.* (A) In a letter dated September 10, 1988, Roy Romer, Governor of Colorado, submitted a revision to Regulation No. 4 of the Colorado SIP.

(B) Paragraph (I)(A)(10)–(13) and (II)(C), revisions to Regulation No. 4, ''Regulation on the Sale of New Woodstoves,'' of the Colorado SIP became effective on June 30, 1988.

(45) In a letter dated May 8, 1986, the Governor submitted revisions to the Colorado Regulation No. 3 (Regulation Requiring an Air Contaminant Emission Notice, Emission Permit Fees) of

the Colorado SIP modifying stack evaluations. The changes consisted of (1) new definitions of dispersion techniques, good engineering practice, nearby, and excessive concentrations (Section XII.D.) and (2) rules clarifying technical modeling and monitoring requirements (Section XII.C.).

(i) *Incorporation by reference.* (A) Revisions to the Colorado Regulation No. 3 (Regulation Requiring and Air Contaminant Emission Notice, Emission Permit Fees), Section XII, adopted March 20, 1986, by the Colorado Air Quality Control Commission.

(46) On July 29, 1987, the Governor submitted:

(1) Amendments to Colorado Regulation No. 11 (Inspection/Maintenance (I/M) program) and

(2) Regulation No. 13 (oxygenated fuels program).

(i) *Incorporation by reference.* (A) Regulation No. 11, revised January 15, 1987, effective March 2, 1987.

(B) Regulation No. 13, adopted June 29, 1987, effective July 30, 1987.

(47) In a letter dated October 23, 1985, the Director of the Air Pollution Control Division submitted the stack height demonstration analysis. Supplemental information was submitted on June 20, 1986, December 4, 1986, February 3, 1987, March 3, 1988, March 15, 1988, July 6, 1988 and August 16, 1988.

(i) *Incorporation by reference.* Stack height demonstration analyses submitted by the State on October 23, 1985, June 20, 1986, December 4, 1986, February 3, 1987, March 3, 1988, March 15, 1988, July 6, 1988 and August 16, 1988.

(48) [Reserved]

(49) A revision to Regulation No. 4 of the Colorado SIP submitted on June 29, 1990, prohibits persons from operating a wood-burning stove or fireplace during a high pollution day in specified areas.

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 4, ''Regulation on the Sale of New Woodstoves,'' effective on June 30, 1990.

(50) [Reserved]

(51) On June 29, 1990, the Governor of Colorado submitted revisions to the plan. The revisions include amendments to the Common Provisions Regulation and Regulation No. 3 for emission permit fees and prevention of significant deterioration of air quality (PSD) regulations to incorporate the nitrogen dioxide (NO_2) increments.

(i) *Incorporation by reference.* (A) Revisions to the Colorado Air Quality Control Regulations, Common Provisions Regulation and Regulation No. 3, which were effective on June 30, 1990.

(ii) *Additional material.* (A) October 22, 1990 letter from Douglas Skie, EPA, to Bradley Beckham, Director, Air Pollution Control Division.

(B) November 5, 1990 letter from Bradley Beckham, Director, Air Pollution Control Division, to Douglas Skie, EPA.

(52) [Reserved]

(53) Revisions to the Colorado State Implementation Plan were submitted by the Governor of Colorado on July 13, 1990. The revision adds a voluntary educational Better Air Campaign to the Ft. Collins Carbon Monoxide element of the Colorado SIP.

(i) *Incorporation by reference.* (A) The Fort Collins Better Air Campaign as defined in Exhibit ''A'' and adopted on September 5, 1989, through Resolution 89–161.

(54) On November 17, 1988 the Governor submitted revisions to Regulation No. 3 and the Common Provisions Regulation which included:

Provisions for the review of new sources to protect the PM–10 national ambient air quality standards (NAAQS) and for consistency with EPA requirements;

Amendments to address deficiencies and previous EPA disapprovals as identified in the May 26, 1988 SIP Call;

Provisions for the certification and trading of emission offset credits; and

Amendments to increase permit processing and annual fees.

(i) *Incorporation by reference.* (A) Regulation No. 3: Sections I.B.2.c.(i)–(vi), I.B.3.a., II.B.1.d & e, II.B.3.c., II.C.1.h., II.C.3., III.A.1., IV.C.4.e., IV.C.4.f.(i) & (iv)–(v), IV.C.6–10, IV.D.1.e., IV.D.2.a.(iv), IV.D.2.b., IV.D.2.c.(i) & (ii), IV.D.3.a.(vi), IV.D.3.b.(i)(D), IV.D.3.b.(iii)(A)(3), (5), (7), & (11), IV.D.3.d.(ii), IV.D.3.e., IV.G.3., IV.H.7., V.C–I, VI.A.2., VI.C.1., VI.D., VII.A., VIII.D., IX.K., XIII.B., XIV.B.1, XIV.B.4.c.; and the Common Provisions Regulation: Section I.G., definitions of ''Best Available Control Technology,''

''Complete,'' ''Construction,'' ''Enforceable,'' ''Fixed Capital Cost,'' ''Lowest Achievable Emission Rate (LAER),'' ''Modification,'' Net Emissions Increase,'' ''Particulate Matter,'' ''Particulate Matter Emissions,'' ''PM10,'' ''PM10 Emissions,'' ''Reconstruction,'' ''Significant,'' ''Total Suspended Particulate;'' revised August 18, 1988, effective September 30, 1988.

(ii) *Additional material.* (A) Letter dated April 29, 1991 from the Colorado Air Pollution Control Division to EPA.

(55) [Reserved]

(56) Revisions to the Colorado State Implementation Plan were submitted by the Governor in letters dated October 25, 1989, and October 30, 1991. The revisions consist of amendments to Regulation No. 12, ''Reduction of Diesel Vehicle Emissions.''

(i) *Incorporation by reference.* (A) Regulation No. 12 revisions adopted on July 20, 1989, and effective on August 30, 1989, as follows: Part A (Diesel Fleet Self-Certification Program): I.B.2.; I.C.1.; I.D.; II.A.2.b., c.; all of IV. except those sections noted below; and add new Parts B (Diesel Opacity Inspection Program) and C (Standards for Visible Pollutants from Diesel Engine Powered Vehicles—Operating on Roads, Streets and Highways), except those sections noted below. Regulation No. 12 revisions adopted on September 19, 1991, and effective on October 30, 1991, as follows: Part A: I.A.; I.B.3–18.; I.C.2.; II.A.1.; II.A.2.d., f., g., III.A.; IV.A.2.; IV.C.1.c., g.; IV.C.2.c., h.; IV.C.3.f., i.; IV.C.4.k.; IV.C.5.a.iv.; IV.C.5.b.; V.; VI.; VII.; VIII.; Part B: I.B.2., 7., 19., 30.–37., 40., 50., 51.; I.C.2.; I.D.; I.E.3.; II.C.1.b.iv.; II.E.2.c., e.; II.E.8.; III.A.; III.B.4.; III.C.4.b.viii.–ix.; III.D.3.b.vi., xi.; III.D.3.c.viii., xiii.; V.; VI.; and Part C: A.–F.

(57) Revision to the State Implementation Plan for Carbon Monoxide: Greeley Element.

(i) *Incorporation by reference.* (A) Letter and submittal dated November 25, 1987, from the Governor of Colorado to the EPA Region VIII Administrator, to revise the SIP to include the Greeley Element. The revision was adopted by the State on September 17, 1987.

(58) On November 17, 1988, the Governor submitted an amendment to Colorado Regulation No. 1, Section II.A.9., to exempt the destruction of Pershing missiles under the Intermediate-Range Nuclear Forces (INF) Treaty from meeting the opacity limits.

(i) *Incorporation by reference.* (A) Regulation No. 1, Section II.A.9., adopted September 15, 1988, effective October 30, 1988.

(59) Revisions to the State's new source review and prevention of significant deterioration permitting rules in the Common Provisions Regulation and Regulation No. 3, which were submitted by the Governor on April 9, 1992.

(i) *Incorporation by reference.* (A) Regulation No. 3: Sections I.A., I.B.2.c. through e., I.B.3.e. and f., II.B.1., II.B.2., II.C., III.A.1., III.B., III.D., IV.B.2., IV.C.4., IV.C.7., IV.C.9, IV.D.1., IV.D.2.a.(ii) and (iv), IV.D.2.b.(i), IV.D.3.a.(iii) and (vi), IV.D.3.b.(iv), IV.H., IV.I., V.A., V.C.1., V.C.3., V.D.1., V.D.2., V.D.4., V.D.5., V.D.11., V.E.1., V.E.5., V.F.10., V.F.11., V.F.13., V.G.7., V.G.8., V.H.3., V.H.7. and 8., V.I.3., VI.A.1., VI.C.2., IX.D., XII.D., XIII.B.4., XIII.B.6., and XV.D.2.; and the Common Provisions Regulation: Sections I.D.2., I.F., II.C.1., II.C.4., IV., and Section I.G.- definitions of ''best available control technology,'' ''commenced construction,'' ''complete,'' ''federally enforceable,'' ''modification,'' ''potential to emit,'' ''reasonable further progress,'' and ''stationary source;'' revised October 17, 1991, effective November 30, 1991.

(ii) Common Provisions Regulation, 5 CCR 1001–2, Section III., Smoking Gasoline Powered Motor Vehicle Control Region, is deleted without replacement, effective September 30, 2002, as described in (c)(118) below.

(60) Revisions to the Long-Term Strategy of the Colorado State Implementation Plan for Class I Visibility Protection were submitted by the Governor in a letter dated November 18, 1992. The submittal completely replaces the previous version of the Long-Term Strategy and includes amendments to Air Quality Control Commission Regulation No. 3, ''Air Contaminant Emissions Notices.''

(i) *Incorporation by reference.* (A) Revisions to the Visibility Chapter of Regulation No. 3 as follows: XV.F.1.c. as adopted on August 20, 1992, and effective on September 30, 1992.

(61) The Governor of Colorado submitted a portion of the requirements for the moderate nonattainment area PM_{10} State Implementation Plan (SIP) for Denver, Colorado with a letter dated June 7, 1993, and subsequent submittals dated September 3, 1993, and October 20, 1993, fulfilling most of the commitments made in the June 7, 1993, letter. The submittals were made to satisfy those moderate PM_{10} nonattainment area SIP requirements due for the Denver PM_{10} nonattainment area on November 15, 1991. EPA is approving, for the limited purpose of strengthening the SIP, the control measures contained in the SIP revisions identified above. (EPA is not approving, at this time, the control measures limiting the emissions from Purina Mills and Electron Corporation.)

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 4, ''Regulation on the Sale of New Woodstoves and the Use of Certain Woodburning Appliances During High Pollution Days,'' as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993, as follows: insert new Section VIII and recodification of References Section. This revision pertains to local jurisdiction implementation and enforcement of ordinances and resolutions restricting wood burning on high pollution days.

(B) Regulation No. 16, ''Concerning Material Specifications for, Use of, and Clean-up of Street Sanding Material,'' as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993, as follows: recodification of Regulation and addition of Sections II and III, which regulate emissions from street sanding and sweeping in the Denver PM_{10} nonattainment area.

(C) Revisions to Regulation No. 1, ''Emission Control Regulations for Particulates, Smokes, Carbon Monoxide, and Sulfur Oxides for the State of Colorado,'' as adopted by the Air Quality Control Commission on August 19, 1993, effective October 30, 1993, as follows: insert new Sections VII and VIII and recodification of the two following Sections, ''Emission Regulations Concerning Areas Which are Nonattainment for Carbon Monoxide—Refinery Fluid Bed Catalytic Cracking Units'', and ''Statements of Basis and Purpose'' Sections. The revisions pertain to restrictions on the use of oil as a back-up fuel for certain sources and set new emission limits at the following Public Service Company Power Plants: Cherokee, Arapahoe, and Valmont.

(D) Coors Glass Plant allowable emission limitations on three furnaces.

1. Permit 92JE129–1, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #1.

2. Permit 92JE129–2, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #2.

3. Permit 92JE129–3, effective date January 19, 1993, regulating emissions at the KTG glass melting furnace #3.

(E) Conoco Refinery allowable emission limitations from the refinery.

1. Permit 90AD524, effective date March 20, 1991, regulating a Tulsa natural gas fired 20MMbtu/hour heater equipped with low-Nox burners.

2. Permit 90AD053, effective date March 20, 1991, regulating process heaters H–10, H–11 and H–27 and process boilers B4, B6, and B8 all burning fuel gas only.

3. Permit 91AD180–3, effective December 28, 1992, regulating the three stage Claus sulfur recovery unit with tail gas recovery unit.

(ii) *Additional material.* (A) Regional Air Quality Council, ''Guidelines for Reducing Air Pollution from Street Sanding'' sets voluntary guidelines for public works departments to follow to reduce the amount of street sand applied, and includes recommendations for increasing the effectiveness of street cleaning operations.

(B) Adolph Coors Company Brewery permit emission limitations on five boilers. Permits: C–12386–1&2, C–12386–3, C–10660, C–11199, and C–11305.

(62) On February 24, 1993, and December 9, 1993, the Governor of Colorado submitted revisions to the Colorado State implementation plan (SIP) to satisfy those moderate PM–10 nonattainment area SIP requirements for Pagosa Springs, Colorado due to be submitted by November 15, 1991. Included in the December 9, 1993 submittal were PM–10 contingency measures for Pagosa Springs to satisfy the requirements of section 172(c)(9) of the

Act due to be submitted by November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, section I. ''Pagosa Springs Nonattainment Area,'' adopted on November 19, 1992, effective on December 30, 1992, with revisions adopted on November 12, 1993, effective on December 30, 1993.

(63) On November 18, 1992, the Governor of Colorado submitted a plan for the establishment and implementation of a Small Business Assistance Program to be incorporated into the Colorado State Implementation Plan as required by section 507 of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Revised Statutes, Sections 25–7–109.2 and 25–7–114.7, to establish and fund a small business stationary source technical and environmental compliance assistance program, effective July 1, 1992.

(ii) *Additional materials.* (A) November 18, 1992 letter from the Governor of Colorado submitting a Small Business Assistance Program plan to EPA.

(B) The State of Colorado plan for the establishment and implementation of a Small Business Assistance Program, adopted by the Colorado Air Quality Control Commission on October 15, 1992, effective October 15, 1992.

(64) On December 9, 1993, the Governor of Colorado submitted PM_{10} contingency measures for the moderate nonattainment PM_{10} areas of Canon City and Lamar, Colorado. The submittal was made to satisfy the moderate PM_{10} nonattainment area requirements for contingency measures due for Canon City and Lamar on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Area Regulation, Section IV. ''Lamar Nonattainment Area,'' and Section V. ''Canon City Nonattainment Area—PM–10,'' adopted on November 12, 1993, and effective December 30, 1993.

(65) On January 15, 1992, March 17, 1993, and December 9, 1993, the Governor of Colorado submitted revisions to the Colorado State implementation plan (SIP) to satisfy those moderate PM–10 nonattainment area SIP requirements for Aspen, Colorado due to be submitted by November 15, 1991. Included in the December 9, 1993 submittal were PM–10 contingency measures for Aspen to satisfy the requirements of section 172(c)(9) of the Act due to be submitted by November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, all of Section III. ''Aspen/Pitkin County PM–10 Nonattainment Area'' except Section III.C.6., adopted on January 21, 1993 effective on March 2, 1993, with revisions adopted on November 12, 1993, effective on December 30, 1993.

(66) On January 14, 1993, the Governor of Colorado submitted revisions to the new source review and prevention of significant deterioration requirements in the Common Provisions Regulation and Regulation No. 3, as well as a revision to Regulation No. 7 pertaining to volatile organic compounds of negligible photochemical reactivity.

(i) *Incorporation by reference.* (A) Air Quality Control Commission Common Provisions Regulation, Section I.C. and Section I.G., definitions of ''adverse environmental effect,'' ''air pollutant,'' ''best available control technology,'' ''federal act,'' ''federally enforceable,'' ''hazardous air pollutant,'' paragraph h. in ''net emissions increase,'' ''ozone depleting compound,'' and ''significant;'' revised 11/19/92, effective 12/30/92.

(B) Air Quality Control Commission Regulation No. 3 Air Contaminant Emission Notices, Sections I.B.1., I.B.2.c-e., I.B.3.e-f., IV.B.3–5, IV.D.2.a.(iii), IV.D.2.c., IV.D.3., IV.D.4., IV.E., IV.F., IV.H., V.E.9., VI.B.1., VI.B.4., VI.B.5., VI.C., VII.C., VIII.A., VIII.C.1., XI.A., and XIII.A. and B.; revised 11/19/92, effective 12/30/92.

(C) Air Quality Control Commission Regulation No. 7 Emissions of Volatile Organic Compounds, Section II.B.; revised 11/19/92, effective 12/30/92.

(67) On November 27, 1992, the Governor of Colorado, submitted a revision to the Colorado SIP. This revision replaces previous versions of Regulation No. 13 with the amended Regulation No. 13 (oxygenated gasoline program) adopted September 17, 1992. Regulation No. 13 requires the oxygenated gasoline programs to be implemented in the Fort Collins-Loveland, Colorado

Springs, and Boulder-Denver Metropolitan Statistical Areas (MSA) as required by Section 211(m) of the Clean Air Act Amendments of 1990.

(i) *Incorporation by reference.* (A) Revision to Regulation No. 13, ''Oxygenated Gasoline Program,'' as adopted by the Colorado Air Quality Control Commission on September 17, 1992, effective October 10, 1992, as follows: entire Regulation revision. This regulation supersedes and replaces all previous revisions to Regulation No. 13, (40 CFR, 52.320(46)(2)).

(68) The Governor of Colorado submitted a portion of the requirements for the moderate nonattainment area PM_{10} State Implementation Plan (SIP) for Telluride, Colorado with a letter dated March 17, 1993. The submittal was made to satisfy those moderate PM_{10} nonattainment area SIP requirements due for Telluride on November 15, 1991; however, the submittal did not contain quantitative milestones to provide for maintenance of the PM_{10} National Ambient Air Quality Standards through December 1997. The Governor of Colorado submitted moderate PM_{10} nonattainment area contingency measures for Telluride with a letter dated December 9, 1993. This submittal was intended to satisfy the requirements of section 172(c)(9) of the Clean Air Act due on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, Section II., Telluride Nonattainment Area, adopted January 21, 1993 and effective on March 2, 1993, with revisions adopted November 12, 1993 and effective December 30, 1993.

(ii) *Additional material.* (A) The commitment and schedule for the adoption and implementation of PM_{10} control measures that are necessary to demonstrate maintenance of the 24-hour PM_{10} standard in Telluride, which were submitted in an April 21, 1994 letter from Thomas Getz, Air Pollution Control Division, to Douglas M. Skie, EPA.

(69) On January 14, 1994 and on June 24, 1994, Roy Romer, the Governor of Colorado, submitted SIP revisions to the Implementation Plan for the Control of Air Pollution. This revision establishes and requires the implementation of an enhanced motor vehicle inspection and maintenance program in the Denver and Boulder urbanized areas as required by section 187(a)(6) of the Clean Air Act Amendments of 1990. This material is being incorporated by reference for the enforcement of Colorado's enhanced I/M program only.

(i) *Incorporation by reference.* (A) Colo. Rev. Stat. Sections 42–4–306.5—42–4–316 adopted June 8, 1993 as House Bill 93–1340, effective July 1, 1993.

(B) Regulation No. 11 (Inspection/Maintenance Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on March 17, 1994.

(ii) *Additional materials.* (A) SIP narrative and technical appendices 1–20 as corrected and approved by the AQCC on June 21, 1994. The narrative is entitled ''State of Colorado Motor Vehicle Inspection and Maintenance State Implementation Plan'', dated December 16, 1993 with technical corrections.

(70) Revisions to the Colorado State Implementation Plan were submitted by the Governor on September 27, 1989, and August 30, 1990. The revisions consist of amendments to the Ozone provisions in Regulation No. 7, ''Regulation To Control Emissions of Volatile Organic Compounds.''

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 7, Sections 7.I (Applicability), 7.II (General Provisions), 7.III (General Requirements for Storage and Transfer of Volatile Organic Compounds), 7.IV (Storage of Highly Volatile Organic Compounds), 7.V (Disposal of Volatile Organic Compounds), 7.VI (Storage and Transfer of Petroleum Liquid), 7.VIII (Petroleum Processing and Refining), 7.IX (Surface Coating Operations), 7.X (Use of Solvents for Degreasing and Cleaning), 7.XI (Use of Cutback Asphalt), 7.XII (Control of VOC Emissions from Dry Cleaning Facilities Using Perchloroethylene as a Solvent), 7.XIII (Graphic Arts), 7.XIV (Pharmaceutical Synthesis), 7.XV (Control of Volatile Organic Compound Leaks from Vapor Collection Systems Located at Gasoline Terminals, Bulk Plants, and Gasoline Dispensing Facilities), and Appendices A (Criteria for Control of Vapors from Gasoline Transfer to Storage Tanks), B (Criteria for Control of Vapors from Gasoline Transfer at Bulk Plants-Vapor Balance System), and D

(Test Procedures for Annual Pressure/Vacuum Testing of Gasoline Transport Trucks). The following new emission sources and appendices were added to Regulation No. 7: 7.IX.A.7 (Fugitive Emission Control), 7.IX.M (Flat Wood Paneling Coating), 7.IX.N. (Manufacture of Pneumatic Rubber Tires), and Appendix E (Emission Limit Conversion Procedure). These revisions became effective on October 30, 1989, and August 30, 1990.

(ii) *Additional material.* (A) February 5, 1992, letter from John Leary, Acting Director, Colorado Air Pollution Control Division, to Douglas Skie, EPA. This letter contained the State's commitment to conduct capture efficiency testing using the most recent EPA capture efficiency protocols, and the commitment to adopt federal capture efficiency test methods after they are officially promulgated by EPA.

(71) The Governor of Colorado submitted carbon monoxide contingency measures for Colorado Springs and Fort Collins with a letter dated February 18, 1994. This submittal was intended to satisfy the requirements of section 172(c)(9) of the Clean Air Act for contingency measures which were due on November 15, 1993.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas regulation, 5 CCR 1001–20, Section VI, City of Fort Collins Nonattainment Area, and Section VII, Colorado Springs Nonattainment Area, adopted on November 12, 1993, effective on December 30, 1993.

(72) On November 12, 1993, August 25, 1994, September 29, 1994, November 17, 1994, and January 29, 1996, the Governor of Colorado submitted revisions to the State's construction permitting requirements in Regulation No. 3 and the Common Provisions Regulation. These revisions included nonattainment new source review permitting requirements for new and modified major sources of PM–10 precursors locating in the Denver moderate PM–10 nonattainment area, changing from the dual source definition to the plantwide definition of source in nonattainment new source review permitting, other changes to Regulation No. 3 to make the construction permitting program more compatible with the State's title V operating permit program, and correction of deficiencies. In addition, the Governor submitted revisions to the Common Provisions Regulation on April 9, 1992 and January 14, 1993.

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001–2, Section I.G., definitions of ''baseline area'' and ''reconstruction;'' adopted 10/17/91, effective 11/30/91.

(B) Common Provisions Regulation, 5 CCR 1001–2, Section I.G., definitions of ''net emissions increase'' and ''stationary source;'' adopted 8/20/92, effective 9/30/92.

(C) Common Provisions Regulation, 5 CCR 1001–2, Section I.A. and Section I.G., definitions of ''emission control regulation'' and ''volatile organic compound;'' adopted 11/19/92, effective 12/30/92.

(D) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001–5, revisions adopted 8/18/94, effective 9/30/94, as follows: Part A (with the exception of the last sentence in the definition of ''Federally enforceable'' in Section I.B.22 and with the exception of Section IV.C.) and Part B (with the exception of Sections V.B. and VII.A.5.). This version of Regulation No. 3, as incorporated by reference here, supersedes and replaces all versions of Regulation No. 3 approved by EPA in previous actions.

(E) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001–5, revisions adopted on 3/16/95, effective 5/30/95, as follows: Part A: Sections I.B.12., I.B.31., I.B.32., I.B.35.B., I.B.36., I.B.37., I.B.41., I.B.50., I.B.57., I.B.66., II.D.5.c., II.D.5.d., V.B., V.C.6., V.C.10., V.E.1.c., V.E.1.d., V.H.4. through V.H.8., V.I.1., VI.C.1.f., and VII.A.; Part B: Sections III.D.2., III.D.3., IV.B.4., IV.C.1., IV.D.1.a., IV.D.2.c.(i)(E), IV.D.4.a., and IV.J.

(F) Previously approved in paragraph (c)(72)(i)(D) under Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001–5. These sections are now deleted without replacement: II.B.7., II.B.8., II.B.9., II.B.10., and II.D.7, effective October 30, 2006.

(G) 1001–5, Colorado Regulation No. 3, Air Contaminant Emissions Notices, Part A, Concerning General Provisions Applicable to Reporting and Permitting, Sections II.D.1.m, II.D.1.ee,

II.D.1.uu, II.D.1.ddd, and II.D.1.eeee, previously approved in paragraph (c)(72)(i)(D) of this section, were repealed by the State of Colorado effective January 30, 2009 and are removed without replacement.

(ii) *Additional material.* (A) July 3, 1995 letter from Martha E. Rudolph, First Assistant Attorney General, Colorado Office of the Attorney General, to Jonah Staller, EPA.

(73) On January 14, 1994 and on June 24, 1994, Roy Romer, the Governor of Colorado, submitted SIP revisions to the State Implementation Plan for the Control of Air Pollution. This revisions requires the implementation of a basic motor vehicle inspection and maintenance program in the urbanized areas of El Paso (Colorado Springs), Larimer (Fort Collins), and Weld (Greeley) Counties meeting the requirements of the Clean Air Act Amendments of 1990. This material is being incorporated by reference for the enforcement of Colorado's basic I/M program only.

(i) *Incorporation by reference.* (A) Colo. Rev. Stat. §§ 42–4–306.5—42–4–316 adopted June 8, 1993 as House Bill 93–1340, effective July 1, 1993.

(B) Regulation No. 11 (Inspection/Maintenance Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on March 17, 1994, effective April 30, 1994.

(74) The Governor of Colorado submitted PM_{10} contingency measures for Denver, Colorado in a letter dated November 17, 1995.

(i) *Incorporation by reference.* (A) Section IV. of Regulation No. 16, Street Sanding Emissions, adopted March 16, 1995, effective May 30, 1995.

(75) The Governor of Colorado submitted revisions to the PM_{10} moderate nonattainment area State Implementation Plan (SIP) for Telluride, Colorado with a letter dated April 22, 1996. The submittal was made to satisfy the State's commitment to adopt additional control measures necessary to demonstrate continued maintenance of the PM_{10} National Ambient Air Quality Standards through 1997. Due to the satisfaction of this commitment, the SIP now adequately meets the quantitative milestone requirement.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission State Implementation Plan-Specific Regulation for Nonattainment Areas, 5 CCR 1001–20, Section II.C., Telluride Nonattainment Area Street Sanding Requirements, adopted August 17, 1995 and effective October 30, 1995.

(76) The Governor of Colorado submitted the moderate nonattainment area PM_{10} State Implementation Plan (SIP) for Steamboat Springs, Colorado with a letter dated September 16, 1997. The submittal was made to satisfy those moderate PM_{10} nonattainment area SIP requirements due for Steamboat Springs on July 20, 1995, including among other things, control measures, technical analyses, quantitative milestones, and contingency measures. The September 16, 1997 submittal also included the Steamboat Springs emergency episode plan.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Nonattainment Areas, 5 CCR 1001–20, Section VIII., Steamboat Springs PM_{10} Nonattainment Area, adopted October 17, 1996 and effective on December 30, 1996.

(ii) *Additional material.* (A) An October 29, 1997 letter from Margie M. Perkins, APCD, to Richard R. Long, EPA, clarifying that the regulation entitled ''Ambient Air Quality Standards for the State of Colorado'' was included in the September 16, 1997 Steamboat Springs SIP submittal for informational purposes only.

(77) On September 29, 1995, Roy Romer, the Governor of Colorado, submitted a SIP revision to the State Implementation Plan for the Control of Air Pollution. This revision provides a replacement Regulation No. 11, Inspection/Maintenance Program which limits dealer self-testing. This material is being incorporated by reference for the enforcement of Colorado's I/M program.

(i) *Incorporation by reference.* (A) Department of Health, Air Quality Control Commission, Regulation No. 11 (Motor Vehicle Emissions Inspection Program) as adopted by the Colorado Air Quality Control Commission (AQCC) on September 22, 1994, effective November 30, 1994.

(78) Revisions to the Colorado State Implementation Plan were submitted

by the Governor of the State of Colorado on August 25, 1995, and October 16, 1995. The revisions consist or amendments to Regulation No. 3, ''Air Contaminant Emissions Notices'' and to Regulation No. 7, ''Regulation To Control Emissions of Volatile Organic Compounds.'' These revisions involve source-specific State Implementation Plan requirements for emission trading for Pioneer Metal Finishing Inc. and crossline averaging for Lexmark International Inc.

(i) *Incorporation by reference.* (A) Revisions to Regulation No. 3, 5 CCR 1001–5, sections V.A. (Purpose), V.C.1 , V.C.3, V.C.5 (Definitions), V.D.6, V.D.7, V.D.9 (Procedure for Certification of Emissions Reductions and Approval of Transactions), V.E. (Criteria for Certification of Emissions Reductions), V.F., V.F.5, V.F.7, V.F.8.l, V.F.14, and V.F.15 (Criteria for Approval of all Transactions) and Revisions to Regulation No. 7, 5 CCR 1001–9, section II.D.1.a (Alternative Control Plans and Test Methods) became effective on December 30, 1994. The new section IX.L.2.c through IX.L.2.c.xv (Manufactured Metal Parts and Metal Products) to Regulation No. 7, 5 CCR 1001–9, applicable to Pioneer Metal Finishing Inc., became effective on April 30, 1995. The new section IX.A.12 through IX.A.12.a.(xi) (General Provisions) to Regulation No. 7, 5 CCR 1001–9, applicable to Lexmark International Inc., became effective July 30, 1995.

(79) On August 23, 1996, the Governor of Colorado submitted a revision to the long-term strategy portion of Colorado's State Implementation Plan (SIP) for Class I Visibility Protection. The revision was made to incorporate into the SIP, among other things, emissions reduction requirements for the Hayden Station (a coal-fired steam generating plant located near the town of Hayden, Colorado) that are based on a consent decree addressing numerous air pollution violations at the plant. This SIP revision replaces the previous existing impairment portion of the long-term strategy as it relates to the Mt. Zirkel Wilderness Area.

(i) *Incorporation by reference.* (A) Long-Term Strategy Review and Revision of Colorado's State Implementation Plan for Class I Visibility Protection Part I: Hayden Station Requirements, as follows: Section VI., effective on August 15, 1996.

(80) On July 11, 1994, July 13, 1994, September 29, 1995, and December 22, 1995, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan (SIP) to satisfy those CO nonattainment area SIP requirements for Denver and Longmont, Colorado due to be submitted by November 15, 1992, and further revisions to the SIP to shorten the effective period of the oxygenated fuels program. EPA is not taking action on the SIP provision submitted on July 11, 1994 that calls for a prohibition of the reregistration of abandoned and impounded vehicles.

(i) *Incorporation by reference.* (A) Regulation No. 11, Motor Vehicle Emissions Inspection Program, 5 CCR 1001–13, as adopted on September 22, 1994, effective November 30, 1994. Regulation No. 13, Oxygenated Fuels Program, 5 CCR 1001–16, as adopted on October 19, 1995, effective December 20, 1995.

(81) On August 1, 1996, the Governor of Colorado submitted revisions to the prevention of significant deterioration regulations in Regulation No. 3 to incorporate changes in the Federal PSD permitting regulations for PM–10 increments and to make other minor administrative revisions.

(i) *Incorporation by reference.* (A) Regulation No. 3, Air Contaminant Emissions Notices, 5 CCR 1001–5, revisions adopted 8/17/95, effective 10/30/95, as follows: Part A, Section I.B., as follows: the definition of ''baseline area'' in subsection 10, the definition of ''minor source baseline date'' in subsection 35, and the definition of ''net emissions increase'' in subsection 37; Part A: Sections IV.B., V.C.1., and V.D.11.c.; Part B: Sections IV.D.3.b.(v), VII.A.1., and X.D.

(82) The Governor of Colorado submitted the Denver moderate nonattainment area PM_{10} State Implementation Plan (SIP) with a letter dated March 30, 1995. The Governor submitted revisions to Regulation No. 13, one of the control measures relied on in the PM_{10} SIP, on December 22, 1995. These submittals as well as support documentation submittals made on June 8, 1993, June 10, 1993, June 25, 1993, July 19,

1993, August 5, 1993, September 3, 1993, September 21, 1993, October 20, 1993, December 12, 1993, January 19, 1994, December 23, 1994, March 3, 1995, and November 8, 1995 satisfy those moderate PM_{10} nonattainment area SIP requirements due for the Denver PM_{10} nonattainment area on November 15, 1991. EPA is approving the SIP. This approval replaces the previous limited approval at 40 CFR 52.320(c)(61).

(i) *Incorporation by reference.* (A) Regulation No. 4, ''Regulation on the Sale of New Woodstoves and the Use of Certain Woodburning Appliances During High Pollution Days,'' 5 CCR 1001–6, as adopted by the Air Quality Control Commission on June 24, 1993, effective August 30, 1993.

(B) Local woodburning ordinances and resolutions.

(*1*) Arvada, Colorado. Ordinance number 2451, effective November 2, 1987, regarding woodburning restrictions.

(*2*) Aurora, Colorado. Ordinance numbers 87–118 and 92–14, effective May 22, 1987 and May 22, 1992, respectively, regarding woodburning restrictions.

(*3*) Boulder, Colorado. Ordinance numbers 5007 and 5445, adopted November 25, 1986 and April 21, 1992, respectively, regarding woodburning restrictions.

(*4*) Broomfield, Colorado. Ordinance number 794, effective November 24, 1988, regarding woodburning restrictions.

(*5*) Denver, Colorado. Ordinance numbers 293 and 1018, approved May 30, 1990 and December 16, 1993, respectively, regarding woodburning restrictions.

(*6*) Douglas County, Colorado. Resolution number 991–128, adopted November 14, 1991, regarding woodburning restrictions.

(*7*) Englewood, Colorado. Ordinance numbers 31 and 39, passed on July 20, 1992, regarding woodburning restrictions.

(*8*) Federal Heights, Colorado. Ordinance number 565, adopted January 5, 1988, regarding woodburning restrictions.

(*9*) Glendale, Colorado. Ordinance numbers 2 and 14, adopted January 5, 1988 and effective on October 20, 1992, respectively, regarding woodburning restrictions.

(*10*) Greenwood Village, Colorado. Ordinance numbers 17 and 9, effective July 9, 1988 and March 25, 1992, respectively, regarding woodburning restrictions.

(*11*) Jefferson County, Colorado. Resolution numbers CC89–873 and CC90–617, dated December 29, 1989 and August 7, 1990, respectively, regarding woodburning restrictions.

(*12*) Lafayette, Colorado. Ordinance number 24; series 1988, effective November 15, 1988, regarding woodburning prohibitions.

(*13*) Lakewood, Colorado. Ordinance numbers 0–86–113 and 0–92–61, effective December 1, 1986 and November 28, 1992, respectively, regarding woodburning restrictions.

(*14*) Littleton, Colorado. Ordinance numbers 51 and 26, passed on December 6, 1988 and August 18, 1992, respectively, regarding woodburning restrictions.

(*15*) Longmont, Colorado. Ordinance number 0–89–1, adopted December 27, 1988, regarding woodburning restrictions.

(*16*) Mountain View, Colorado. Ordinance number 90–5, approved on January 7, 1991, regarding woodburning restrictions.

(*17*) Sheridan, Colorado. Ordinance numbers 22 and 1, approved October 25, 1988 and February 9, 1993, respectively, regarding woodburning restrictions.

(*18*) Thornton, Colorado. Ordinance numbers 2120 and 2194, adopted October 28, 1991 and September 28, 1992, respectively, regarding woodburning restrictions.

(*19*) Westminster, Colorado. Ordinance numbers 1742 and 2092, enacted on November 9, 1987 and December 28, 1992, respectively, regarding woodburning restrictions.

(C) Regulation No. 16, ''Concerning Material Specifications for, Use of, and Clean-up of Street Sanding Material,'' 5 CCR 1001–18, as adopted by the Air Quality Control Commission on September 22, 1994, effective November 30, 1994.

(D) Regulation No. 1, ''Emission Control Regulations for Particulates, Smokes, Carbon Monoxide, and Sulfur Oxides for the State of Colorado,'' 5 CCR 1001–3, Sections I–IV and VI–IX, and Appendices A and B, as adopted by the Air Quality Control Commission on

August 19, 1993, effective October 20, 1993; with revisions to Sections VII and VIII, adopted by the Air Quality Control Commission on September 22, 1994, effective November 30, 1994.

(E) Public Service Company Cherokee facility SO_2 emission limitations for the power facility.

(*1*) Permit 86AD352(1), effective date November 13, 1986, regulates SO_2 emissions at Unit #1.

(*2*) Permit 86AD352–2, effective date April 30, 1992, regulates SO_2 emissions at Unit #4.

(F) Purina Mills Inc. total PM_{10} emissions limitations at the animal feed manufacturing facility.

(*1*) Permit 93AD1008–1, effective date October 19, 1993, regulating emissions at the finished product loadout facility.

(*2*) Permit 93AD1008–2, effective date October 19, 1993, regulating emissions at the grain receiving facility.

(G) Electron Corporation total PM_{10} emission limitations at the gray iron foundry.

(*1*) Permit 93AR1363–1, effective date January 12, 1994, regulating emissions at the Table shot blaster and associated baghouse.

(*2*) Permit 93AR1363–2, effective date January 12, 1994, regulating emissions at the five grinding booths-stand and associated baghouse.

(*3*) Permit 93AR1363–3, effective date January 12, 1994, regulating emissions at the five grinding booths-hand and associated baghouse.

(*4*) Permit 93AR1363–4, effective date January 12, 1994, regulating emissions at the Muller-25 sand system and associated baghouse.

(*5*) Permit 93AR1363–5, effective date January 12, 1994, regulating emissions at the Coleman core oven-sand.

(*6*) Permit 93AR1363–6, effective date January 12, 1994, regulating emissions at the Spinner wheelabrator and associated baghouse.

(*7*) Permit 93AR1363–7, effective date January 12, 1994, regulating emissions at the Sand sile-core room and associated baghouse.

(*8*) Permit 93AR1363–8, effective date January 12, 1994, regulating emissions from pouring of molten iron (casting) and castings cooling.

(*9*) Permit 93AR1363–9 effective date January 12, 1994, regulating emissions at three tumble blast machines and associated baghouse.

(*10*) Permit 93AR1363–10, effective date January 12, 1994, regulating emissions at two mullers-80A and associated baghouse.

(*11*) Permit 93AR1363–11, effective date January 12, 1994, regulating emissions at the Casting shakeout hood and associated baghouse.

(*12*) Permit 93AR1363–12, effective date January 12, 1994, regulating emissions at the Casting-disamatic mold and associated baghouse.

(*13*) Permit 93AR1363–13, effective date January 12, 1994, regulating emissions at the Sand silo-disamatic and associated baghouse.

(*14*) Permit 93AR1363–14, effective date January 12, 1994, regulating emissions at the Sand silo-air set room and associated baghouse.

(*15*) Permit 93AR1363–15, effective date January 12, 1994, regulating emissions at two electric induction furnaces and associated baghouse.

(*16*) Permit 93AR1363–16, effective date January 12, 1994, regulating emissions at two Inducto-Therm electric induction furnaces model #2000/4, serial nos. 40102 and 40103, and associated baghouse.

(*17*) Permit 93AR1363–17, effective date January 12, 1994, regulating emissions from chemicals used in core making process.

(*18*) Permit 93AR1363–18, effective date January 12, 1994, regulating emissions at the Loop shakeout and associated baghouse.

(*19*) Permit 93AR1363–19, effective date January 12, 1994, regulating emissions at the Floor shakeout and associated baghouse.

(*20*) Permit 93AR1363–20, effective date January 12, 1994, regulating emissions at the Reclaim sand and associated baghouse.

(*21*) Permit 93AR1363–21 effective date January 12, 1994, regulating emissions at the Sand heater/cooler and associated baghouse.

(*22*) Permit 93AR1363–22, effective date January 12, 1994, regulating emissions at the Paint spray booth.

(H) TRIGEN-Colorado Energy Corporation permit emissions limitations at two boilers.

(*1*) Permit 10JE660, effective date February 25, 1997, regulating emissions at the #4 boiler: tangential fired cogeneration steam boiler.

(*2*) Permit 11JE305–1, effective date February 19, 1997, regulating emissions at the #5 boiler: tangential fired cogeneration steam boiler.

(I) Rocky Mountain Bottle Company emission limitations on three furnaces.

(*1*) Permit 92JE129–1, effective date June 29, 1995, regulating emissions at the KTG glass melting furnaces #1, #2 and #3.

(J) Conoco Refinery allowable emission limitations from the refinery.

(*1*) Permit 90AD524, effective date March 20, 1991, regulating a Tulsa natural gas fired 20MMbtu/hour heater equipped with low-NO_X burners.

(*2*) Permit 90AD053, effective date March 20, 1991, regulating process heaters H–10, H–11 and H–27 and process boilers B4, B6, and B8 all burning fuel gas only.

(*3*) Permit 91AD180–3, effective December 28, 1992, regulating the three stage Claus sulfur recovery unit with tail gas recovery unit.

(ii) *Additional material.* (A) Regional Air Quality Council, ''Guidelines for Reducing Air Pollution from Street Sanding'' sets voluntary guidelines for public works departments to follow to reduce the amount of street sand applied, and includes recommendations for increasing the effectiveness of street cleaning operations.

(83) A revision to the Colorado State Implementation Plan was submitted by the Governor of the State of Colorado on April 22, 1996. The revision consists of an amendment to Colorado Air Quality Control Commission Regulation No. 7, ''Regulation To Control Emissions of Volatile Organic Compounds,'' to provide an exemption for beer production and associated beer container storage and transfer operations involving volatile organic compounds under 1.5 psia from certain bottom or submerged filling requirements that Regulation No. 7 otherwise imposes. The revision consists of the addition of paragraph C to section III, ''General Requirements for Storage and Transfer of Volatile Organic Compounds,'' of Regulation No. 7.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission Regulation No. 7, 5 CCR 1001–9, section III, paragraph C, adopted by the Colorado Air Quality Control Commission on March 16, 1995, State effective May 30, 1995.

(84) The Governor of Colorado submitted the Denver PM10 mobile source emissions budget State Implementation Plan (SIP) with a letter dated July 18, 1995. The Governor submitted the Denver NO_X mobile source emissions budget State Implementation Plan (SIP) with a letter dated April 22, 1996. The PM10 and NO_X mobile source emissions budgets and other provisions in these SIP submittals are used to assess conformity of transportation plans, transportation improvement programs, and transportation projects.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, ''Ambient Air Quality Standards'' regulation 5CCR 1001–14, Section A.1. Budgets for the Denver Nonattainment Area (Modeling Domain) PM10, Sections A.2. and A.3., and Sections B and C, adopted on February 16, 1995, effective April 30, 1995, as amended by the Colorado General Assembly through enactment of Colorado Senate Bill 95–110, which Bill was enacted on May 5, 1995 and signed by the Governor of Colorado on May 31, 1995. (See paragraph (c)(84)(i)(B) of this section).

(B) Colo. Rev. Stat. section 25–7–105(1)(a)(III), enacted by the Colorado General Assembly on May 5, 1995 as part of Colorado Senate Bill 95–110 and signed by the Governor of Colorado on May 31, 1995.

(C) Colorado Air Quality Control Commission ''Ambient Air Quality Standards'' regulation 5CCR 1001–14, Section A.1. Budgets for the Denver Nonattainment Area (Modeling Domain) Nitrogen Oxides, as adopted June 15, 1995, effective August 30, 1995.

(85) On September 16, 1997, the Governor of Colorado submitted revisions to Regulation No. 10 ''Criteria for Analysis of Conformity'' that incorporate the General Conformity requirements of 40 CFR part 51, Subpart W into State regulation.

(i) *Incorporation by reference.* (A) Regulation No. 10 ''Criteria for Analysis of Conformity'', 5 CCR 1001–12, as adopted on October 17, 1996, effective December 30, 1996.

(86) On October 1, 1998, the Governor of Colorado submitted revisions to Regulation No. 13 ''Oxygenated Fuels Program'' that shortened the effective time period of the oxygenated fuels program for Denver/Boulder, Colorado Springs, Fort Collins, and Longmont carbon monoxide nonattainment areas and also reduced the required oxygen content during certain periods.

(i) *Incorporation by reference.* (A) Regulation No. 13 ''Oxygenated Fuels Program'', 5 CCR 1001–16, as adopted on January 16, 1998, effective March 30, 1998.

(87) On September 16, 1997, the Governor of Colorado submitted revisions to Regulations No. 3 and 7 and the Common Provisions Regulation to update the State's list of negligibly reactive volatile organic compounds (VOCs) and to consolidate the list of negligibly reactive VOCs from Regulations No. 3 and 7 into the Common Provisions Regulation. The Governor also submitted revisions to Parts A and B of Regulation No. 3 on September 16, 1997 to amend the definition of ''applicable requirement'' and to correct typographical errors. On August 19, 1998, the Governor submitted revisions to the Common Provisions Regulation to update its list of negligibly reactive VOCs. The Governor also submitted revisions to Regulation No. 7 to repeal the requirements for control of VOC emissions from dry cleaning facilities using perchloroethylene as a solvent.

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001–2, Section I.G., definition of ''negligibly reactive VOCs (NRVOCs)'' and subsection h. of the definition of ''net emissions increase,'' adopted 12/21/95, effective 3/1/96.

(B) Regulation No. 3, ''Air Contaminant Emission Notices,'' 5 CCR 1001–5, adopted 12/21/95, effective 3/1/96, as follows: Part A, subsection h. of the definition of ''net emissions increase'' in Section I.B.37.; and Part B, Section IV.D.4.

(C) Regulation No. 7, ''Emissions of Volatile Organic Compounds,'' 5 CCR 1001–9, Section II.B., adopted 12/21/95, effective 3/1/96.

(D) Regulation No. 3, ''Air Contaminant Emission Notices,'' 5 CCR 1001–5, adopted 6/20/96, effective 8/30/96, as follows: Part A, definition of ''applicable requirement'' in Section I.B.9., definition of ''major source (for the purposes of Part C—operating permits)'' in Section I.B.59., and Section V.C.12; and Part B, Section III.D.2.

(E) Common Provisions Regulation, 5 CCR 1001–2, Section I.G., definition of ''negligibly reactive VOCs (NRVOCs)'' adopted 11/21/96, effective 1/30/97.

(F) Regulation No. 7, ''Emissions of Volatile Organic Compounds,'' 5 CCR 1001–9, Section XII., adopted 11/21/96, effective 1/30/97.

(88) On April 26, 1996, the Governor of Colorado submitted revisions to Regulation No. 3 to allow a source to voluntarily request a permit to limit potential to emit and to require that such permits be subject to public participation.

(i) *Incorporation by reference.* (A) Regulation No. 3, ''Air Contaminant Emissions Notices,'' 5 CCR 1001–5, revisions adopted 5/18/95, effective 7/30/95, as follows: part B, sections III.A.4, III.A.7, and IV.C.4.

(89) On May 10, 2000, the Governor of Colorado submitted revisions to Regulation No. 13 ''Oxygenated Fuels Program'' that eliminated the Oxygenated Fuels Program for El Paso County and the Colorado Springs CO attainment/maintenance area.

(i) *Incorporation by reference.* (A) Regulation No. 13 ''Oxygenated Fuels Program'', 5 CCR 1001–16, as adopted on February 17, 2000, effective April 30, 2000, as follows: Sections I.D.19, II.A, II.A.1, II.A.2, II.C.1.a, II.C.1.b., and II.C.1.c.

(90) On May 10, 2000, the State of Colorado submitted maintenance plans for the Telluride and Pagosa Springs PM_{10} nonattainment areas and requested that these areas be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation requests and maintenance plans satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, ''State Implementation Plan Specific

Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements),'' 5 CCR 1001–20, revisions adopted 3/16/00, effective 5/30/00, as follows: Section I., Pagosa Springs Attainment/Maintenance Area and Section II., Telluride Attainment/Maintenance Area.

(ii) *Additional material.* (A) January 24, 2001 letter from Margie Perkins, Director, Colorado Air Pollution Control Division, to Richard Long, Director, EPA Region VIII Air and Radiation Program, clarifying the commitments of the Verification of Continued Attainment section of the Telluride and Pagosa Springs maintenance plans.

(91) On May 10, 2000, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan consisting of: Revisions to Regulation 12 to remove the ''Reduction of Diesel Vehicle Emissions'' program from areas outside the Denver PM_{10} non-attainment area, and Regulation 9 ''Trip Reduction,'' effective on January 30, 1979, is rescinded.

(i) *Incorporation by reference.* (A) Revisions to Colorado Air Quality Control Commission Regulation No. 12, 5 CCR 1001–15, adopted by the Colorado Air Quality Control Commission on March 16, 2000, State effective May 30, 2000.

(92) On May 11, 2012, Colorado submitted a revision to its State Implementation Plan (SIP) that addresses updates to Colorado's Regulation Number 10, *Criteria for Analysis of Conformity*, of the Colorado SIP. EPA is approving the May 11, 2012 revisions to Regulation No. 10 that update sections I, II, III, IV, and V so as to meet federal transportation conformity consultation requirements. EPA is also approving the removal of former Part A, *Determining Conformity of General Federal Actions to State or Federal Implementation Plans*, from the SIP.

(i) Incorporation by reference.

(A) Colorado's Regulation Number 10, *Criteria for Analysis of Conformity*, except section VI, *Statements of Basis, Specific Statutory Authority, and Purpose*, as adopted by the Colorado Air Quality Control Commission on December 15, 2011 and state effective on January 30, 2012.

(93) On June 7, 2001, the Governor of Colorado submitted a revision to the long-term strategy portion of Colorado's State Implementation Plan (SIP) for Class I Visibility Protection. The revision was made to incorporate into the SIP emissions reduction requirements for the Craig Station (a coal-fired steam generating plant located near the town of Craig, Colorado). This SIP revision is expected to remedy Craig Station's contribution to visibility impairment in the Mt. Zirkel Wilderness Area.

(i) *Incorporation by reference.* (A) Revision of Colorado's State Implementation Plan for Class I Visibility Protection: Craig Station Units 1 and 2 Requirements, Section III, effective on April 19, 2001.

(94) On August 8, 1996, the Governor of Colorado submitted revisions to Regulation No. 3, ''Air Contaminant Emissions Notices,'' that exempt gasoline stations located in ozone attainment areas from construction permit requirements, with the exception of those gasoline stations located in the Denver Metro ozone attainment maintenance area. The Governor also submitted revisions to Regulation No. 7, ''Emissions of Volatile Organic Compounds,'' that state the provisions of Regulation No. 7 shall apply only to ozone nonattainment areas and the Denver Metro Attainment Maintenance Area with the exception of Section V, Paragraphs VI.B.1 and 2., and Subsection VII.C., which shall apply statewide.

(i) *Incorporation by reference.* (A) Part B, section III. D.1.f of Regulation No. 3 ''Air Contaminant Emissions Notices'', 5 CCR 1001–5, as adopted on March 21, 1996, effective May 30, 1996.

(B) Section I.A.1 of Regulation No. 7 ''Emissions of Volatile Organic Compounds'', 5 CCR 1001–9, as adopted on March 21, 1996, effective May 30, 1996.

(95) On July 30, 2001, the State of Colorado submitted a maintenance plan for the Denver PM_{10} nonattainment area and requested that the area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The maintenance plan deletes from the SIP Regulation No. 12, ''Diesel Inspection/Maintenance Program'' and permits for six stationary sources incorporated by reference in paragraphs (c)(91)(i)(A) and (c)(82)(i)(E)

through (J), of this section respectively. In conjunction with the maintenance plan, Colorado revised previously approved regulations and requirements to control particulate matter (Regulation No. 1 and Regulation No. 16.) Among other changes, the revision to Regulation No. 1 includes the deletion of section VII.B of Regulation No. 1 from the SIP. Among other changes, the revision to Regulation No. 16 includes the deletion of sections III and IV of Regulation No. 16 from the SIP. The redesignation request, maintenance plan, and revisions to Regulations Nos. 1 and 16 satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Section VII and VIII.A of Regulation No. 1, ''Emission Control for Particulates, Smokes, Carbon Monoxide, & Sulfur Oxides,'' 5 CCR 1001–3, as adopted August 16, 2001 and effective September 30, 2001. (See paragraph (c)(95)(ii)(I) of this section regarding clerical error in section VIII.A of Regulation No. 1.)

(B) Sections I and II, Regulation No. 16, ''Street Sanding Emissions,'' 5 CCR 1001–18, as adopted April 19, 2001, effective June 30, 2001.

(ii) *Additional material.* (A) Letter dated September 5, 2001 from Casey Shpall, Colorado Office of the Attorney General to Cindy Rosenberg, EPA Region 8, clarifying that public notice was given of the proposed changes and transmitting the appropriate documentation.

(B) Fax dated September 6, 2001 from Doug Lempke, Colorado Department of Public Health and Environment, to Cindy Rosenberg, EPA Region 8, submitting Colorado Attorney General's opinion concerning revisions to Regulation No. 16.

(C) Letter dated September 10, 2001 from Kevin Briggs, Colorado Department of Public Health and Environment, to Kevin Golden, EPA Region 8, transmitting model input files for maintenance demonstration.

(D) Letter dated September 13, 2001 from Casey Shpall, Colorado Office of the Attorney General to Cindy Rosenberg, EPA Region 8, explaining that an error occurred in the publication of Colorado Regulation No. 1.

(E) Letter dated November 27, 2001 from Margie Perkins, Colorado Department of Public Health and Environment, to Richard Long, EPA Region 8, transmitting the justification for the revised street sweeping credits used in the PM_{10} maintenance plan.

(F) Letter dated April 5, 2002 from Margie Perkins, Colorado Department of Public Health and Environment, to Richard Long, EPA Region 8, transmitting a supplement to the Technical Support Documentation correcting the emission rates used in the PM_{10} maintenance plan for Conoco and Ultramar Diamond Shamrock.

(G) Complaint and Consent Decree in *United States* v. *Conoco Inc.*, entered by the United States District Court for the Southern District of Texas on April 29, 2002.

(H) July 31, 2002 memorandum from Cindy Rosenberg, EPA Region 8, to the Denver PM_{10} Redesignation and Maintenance Plan Docket, regarding the August 16, 2001 version of Regulation No. 1, ''Emission Control for Particulates, Smokes, Carbon Monoxide, & Sulfur Oxides.''

(I) Letter dated July 31, 2002 from Frank R. Johnson, Assistant Attorney General, Colorado Department of Law, to Jonah Staller, EPA Region 8, explaining a clerical error in the version of Regulation No. 1 referenced in paragraph (c)(95)(i)(A) of this section, assuring the continued enforceability of section VIII.A of Regulation No. 1 regardless of the air quality classification of the Denver area, and indicating that the clerical error will be promptly remedied.

(96) On May 10, 2000, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'' that supersede and replace all earlier versions of the Regulation (except Appendices A and B of Regulation No. 11 as approved in paragraph (c)(80)) and make several changes to the motor vehicle inspection and maintenance requirements including the implementation of a remote sensing device (RSD) program for the Denver metropolitan area. On May 10, 2000, the Governor also submitted SIP revisions to Colorado's Regulation No. 13 : ''Oxygenated

Fuels Program'' that supersede and replace all earlier versions of the Regulation and modify the oxygenated fuel requirements for the Denver metropolitan area.

(i) *Incorporation by reference.* (A) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'', 5 CCR 1001–13, as adopted on January 10, 2000, effective March 1, 2000, as follows: Part A, Part B, Part C, Part D, Part E, and Part F.

(B) Regulation No. 13 ''Oxygenated Fuels Program'', 5 CCR 1001–16, as adopted on January 10, 2000, effective March 1, 2000, as follows: Sections I.A., I.B., I.C., I.D., I.E., II.A, II.B., II.C., II.D., II.E., II.F., II.G., and II.H.

(97) On November 9, 2001, the State of Colorado submitted a maintenance plan for the Aspen PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Pollution Control Division, ''State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Areas),'' 5 CCR 1001–20, revisions adopted January 11, 2001, effective February 28, 2001 as follows: Section III, which is titled ''Aspen/Pitkin County PM_{10} Attainment/Maintenance Area,'' and which supersedes and replaces all prior versions of Section III.

(98) On November 5, 1999 the Governor of Colorado submitted a revision to Regulation No. 1, ''Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Dioxide.'' The November 5, 1999 submittal exempts military training exercises at the United States Army Installation Fort Carson and United States Army Pinon Canon Maneuver Site (PCMS) from opacity limits. A new subsection D to Regulation No. 1, section II, has been approved into the SIP.

(i) *Incorporation by reference.* (A) Colorado Regulation No. 1, section II, subsection D effective September 30, 1998.

(99) On August 9, 2002, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'' that eliminate the requirement in the SIP for the implementation of a motor vehicle inspection and maintenance program in Larimer County (which includes the Fort Collins area) after January 1, 2004. On August 9, 2002, the Governor also submitted SIP revisions to Colorado's Regulation No. 13 ''Oxygenated Fuels Program'' that eliminate the oxygenated fuel requirements for Larimer County (which includes the Fort Collins area) after January 1, 2004, and make changes to sections I.D., II.A., II.B., II.C., II.D., II.E., II.F., II.G., and II.H. On August 9, 2002, the Governor also submitted SIP revisions to Colorado's State Implementation Plan Specific Regulations for Nonattainment and Attainment/Maintenance Areas (Local Elements) that eliminate Clean Air Act section 172(c)(9) carbon monoxide contingency measures for the Fort Collins area. We originally approved these contingency measures on December 23, 1997, and our approval was codified in paragraph (c)(71) of this section.

(i) *Incorporation by reference.* (A) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'', 5 CCR 1001–13, Part A.I, as adopted on July 18, 2002, and effective September 30, 2002.

(B) Regulation No. 13 ''Oxygenated Fuels Program'', 5 CCR 1001–16, except for section III, the last sentence in Section II.C.1.c.v., ''This Section II.C.1.c.v. is repealed effective February 1, 2019 and is replaced by the requirements in Section II.C.1.c.vi. below beginning November 1, 2019.,'' and Section II.C.1.c.vi., as adopted on July 18, 2002, effective September 30, 2002, which supersedes and replaces all prior versions of Regulation No. 13.

(100) EPA is approving a SIP revision submitted by the Governor of Colorado on July 31, 2002, concerning the use of credible evidence for determining compliance and establishing violations. The July 31, 2002 submittal revises Colorado Air Quality Control Commission (AQCC) Common Provisions Regulation by adding Section II.I, Compliance Certifications. Section II.I of Colorado AQCC Common Provisions Regulation is approved into the SIP.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission

Common Provisions Regulation, Section II.I, effective September 30, 2001.

(101) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Steamboat Springs PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfies all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, ''State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements),'' 5 CCR 1001–20, revisions adopted November 15, 2001, effective December 30, 2001 as follows: Section VIII., titled ''Steamboat Springs PM_{10} Attainment/Maintenance Area'' and supersedes and replaces all prior versions of Section VIII.

(102) [Reserved]

(103) On April 12, 2004, the Governor of Colorado submitted revisions to Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'' that eliminated the Federal applicability of the Basic I/M program for El Paso County and the Colorado Springs CO attainment/maintenance area.

(i) *Incorporation by reference.* (A) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'', 5 CCR 1001–13, as adopted on December 18, 2003, effective March 1, 2004, as follows: Part A.I., ''Applicability,'' final sentence of paragraph 2.

(104) On June 20, 2003, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'' that eliminate the requirement in the SIP to implement a motor vehicle inspection and maintenance program in Weld County (which includes the Greeley area) after January 1, 2004. On June 20, 2003, the Governor also submitted SIP revisions to Colorado's Regulation No. 13 ''Oxygenated Fuels Program'' that eliminate the oxygenated fuel requirements for Weld County (which includes the Greeley area) after January 1, 2004.

(i) *Incorporation by reference.* (A) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'', 5 CCR 1001–13, Part A.I, second sentence that reads, ''The provisions of this regulation applicable to Larimer and Weld counties shall not be included in the state implementation plan after January 1, 2004.'', as adopted on December 19, 2002, and effective March 2, 2003.

(B) Regulation No. 13 ''Reduction of Carbon Monoxide Emissions from Gasoline Powered Motor Vehicles through the use of Oxygenated Gasolines,'' 5 CCR 1001–16, Part I.D.15, Part II.A, Part II.C, as adopted on December 19, 2002, and effective March 2, 2003.

(105) Revisions to the Long-Term Strategy of Colorado's State Implementation Plan for Class I Visibility Protection (Visibility SIP), as submitted by the Governor on April 12, 2004. The revisions update strategies, activities, and plans that constitute reasonable progress toward the National visibility goal.

(i) *Incorporation by reference.* (A) ''Revision of the Long-Term Strategy,'' (Part II of the January 31, 2002 document entitled ''Long-Term Strategy Review and Revision of Colorado's State Implementation Plan for Class I Visibility Protection,'') effective on February 21, 2002.

(106) On July 31, 2002, the State of Colorado submitted a maintenance plan for the Lamar PM_{10} nonattainment area and requested that this area be redesignated to attainment for the PM_{10} National Ambient Air Quality Standards. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* (A) Colorado Air Quality Control Commission, ''State Implementation Plan—Specific Regulations for Nonattainment—Attainment/Maintenance Areas (Local Elements),'' 5 CCR 1001–20, revisions adopted November 15, 2001, effective December 30, 2001 as follows: Section IV, titled ''Lamar Attainment/Maintenance Area,'' and which supersedes and replaces all prior versions of Section IV.

(ii) *Additional material.* (A) Colorado Department of Public Health and Environment, ''Natural Events Action Plan for High Wind Events, Lamar, Colorado,'' submitted to EPA on February 9, 1998 and subsequently approved by

EPA, June 5, 1998 and Lamar's revised 2003 ''Natural Events Action Plan for High Wind Events, Lamar, Colorado,'' submitted to EPA on April 16, 2003 and subsequently approved by EPA, February 9, 2004.

(107) On July 21, 2004, the Governor submitted revisions to the Colorado State Implementation Plan for Colorado's Common Provisions Regulation that contained a definition for condensate. On July 21, 2004, and on March 24, 2005, the Governor also submitted revisions to the Colorado State Implementation Plan for Colorado's Regulation No. 7 ''Emissions of Volatile Organic Compounds'' that made several changes and additions to sections I.A., I.B., II.A and added new sections XII and XVI. The March 24, 2005 version of Regulation No. 7 superceded and replaced portions of the July 21, 2004 version of Regulation No. 7. On June 20, 2003, April 12 2004, and July 21, 2004, the Governor of Colorado submitted revisions to the Colorado State Implementation Plan for Colorado's Regulation No. 11 ''Motor Vehicle Emissions Inspection Program.''

(i) *Incorporation by reference.* (A) Common Provisions Regulation, 5 CCR 1001–2, as adopted on March 12, 2004, effective on May 30, 2004, as follows: Section I.G, definition of ''Condensate.''

(B) Regulation No. 7 ''Emissions of Volatile Organic Compounds,'' 5 CCR 1001–9, as adopted on March 12, 2004, effective on May 31, 2004, as follows: Sections I.A.1, I.A.1.a, I.A.1.b, I.A.1.c, I.B.1.b, and I.B.2.f. As adopted on December 16, 2004, effective March 2, 2005, as follows: Sections I.A.2, II.A.16, II.A.17, XII, and XVI.

(C) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program,'' 5 CCR 1001–13, with changes most recently adopted on March 12, 2004, effective May 31, 2004, as follows: Part A, Part B, Part C, Part D, Part E, Part F, and Appendices A and B, except for the following sentence in Part A.I, which is being acted on separately: ''The provisions of this regulation applicable to Larimer and Weld counties shall not be included in the state implementation plan after January 1, 2004.'' On August 8, 2006, Colorado submitted revisions to Colorado's Regulation Number 11—Motor Vehicle Emissions Inspection Program, part F, section III.A.2, that EPA approved and that superseded the version of section III.A.2 that EPA incorporated by reference in this paragraph. See § 52.329(f).

(ii) *Additional material.* (A) March 22, 2005, letter from Margie Perkins, Director, Air Pollution Control Division, Colorado Department of Public Health and Environment, to Richard Long, Director, Air and Radiation Program, EPA Region VIII. This letter contained commitments from the State to adhere to and address the continuing planning process requirements contained in the ''Maintenance for Growth'' provisions of EPA's ''Protocol for Early Action Compacts Designed to Achieve and Maintain the 8–Hour Ozone Standards.''

(108) Revisions to the Long-Term Strategy of Colorado's State Implementation Plan for Class I Visibility Protection (Visibility SIP), as submitted by the Governor on March 24, 2005. The revisions update strategies, activities, and monitoring plans that constitute reasonable progress toward the National visibility goal.

(i) *Incorporation by reference.* (A) ''Revision of the Long-Term Strategy,'' Part II of the November 18, 2004 document entitled ''Long-Term Strategy Review and Revision of Colorado's State Implementation Plan for Class I Visibility Protection,'' effective November 18, 2004.

(B) Colorado Air Quality Control Commission Regulation No. 3, ''Stationary Source Permitting and Air Pollutant Emission Notice Requirements,'' 5 CCR 1001–5, Part D, Section XIV, Visibility, Subsections A through F, effective April 16, 2004.

(C) Colorado Air Quality Control Commission, Regulation Number 3, 5 CCR 1001–5, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration,* Section XIV.F, *Long Term Strategy,* subsection XIV.F.1. introductory text and XIV.F.1.c; adopted January 7, 2011; effective February 14, 2011.

(109) A revision to the State Implementation Plan was submitted by the State of Colorado on July 31, 2002. The

submittal revises the Common Provisions regulation by adding affirmative defense provisions for source owners and operators for excess emissions during periods of startup and shutdown.

(i) Incorporation by reference.

(A) Common Provisions Regulation, 5 CCR 1001–2, sections II.J.1 through II.J.4, adopted August 16, 2001, effective September 30, 2001.

(110) A Revision to the State Implementation Plan was submitted by the State of Colorado on April 12, 2004. The revision corrects a clerical error in Section VIII.A of Regulation No. 1.

(i) Incorporation by reference.

(A) Colorado Regulation No. 1, 5CCR 1001–3, Section VIII.A, adopted June 19, 2003, effective August 31, 2003.

(111) On August 8, 2006, the Governor of Colorado submitted SIP revisions to Colorado's Regulation No. 11 ''Motor Vehicle Emissions Inspection Program'' that repeals the basic vehicle emissions inspection program in the Fort Collins and Greeley areas.

(i) Incorporation by reference.

(A) Regulation No. 11 ''Motor Vehicle Emissions Inspection Program,'' 5CCR1001–13, Part A.1 and Part A.IV, as adopted on November 17, 2005, and effective January 30, 2006.

(112) On August 3, 2007, the Governor of Colorado submitted revisions to the Colorado's Regulation No. 7 ''Emissions of Volatile Organic Compounds'' that made several changes and additions to Section XII, ''Volatile Organic Compound Emissions From Oil and Gas Operations.''

(i) Incorporation by reference.

(A) Regulation No. 7 ''Emissions of Volatile Organic Compounds,'' 5 CCR 1001–9, Section XII, ''Volatile Organic Compound Emissions From Oil and Gas Operations,'' effective on March 4, 2007.

(113) On August 1, 2007, the State of Colorado submitted revisions to Colorado's Common Provisions Regulation, 5 CCR 1001–2, that made changes and additions to Section I, ''Definitions, Statement of Intent, and General Provisions Applicable to All Emission Control Regulations Adopted by the Colorado Air Quality Control Commission,'' and Section II, ''General.''

(i) Incorporation by reference.

(A) Common Provisions Regulation, 5 CCR 1001–2, Section I.G, ''Definitions,'' effective on March 4, 2007.

(*1*) The submittal revises Section I.G by removing the definition of ''upset conditions'' and replacing it with the definition of ''malfunction.''

(B) Common Provisions Regulation, 5 CCR 1001–2, Section II.E, ''Affirmative Defense Provision for Excess Emissions During Malfunctions,'' effective on March 4, 2007.

(*2*) The submittal revises Section II.E by removing language which provided an exemption for excess emissions during upset conditions and breakdowns and replacing it with an affirmative defense provision for source owners and operators for excess emissions during malfunctions.

(114) On August 1, 2007, the State of Colorado submitted revisions to Colorado Regulation Number 1 to be incorporated into the Colorado SIP. The submittal revised Section III.B.2. by adding ''and air curtain destructors subject to 40 CFR 60'' to the first sentence of Section III.B.2.

(i) Incorporation by reference.

(A) 5 CCR 1001–3, Code of Colorado Regulations, Regulation Number 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, PARTICULATE MATTER, Section III.B.2, ''Incinerators,'' effective on November 30, 2006, published in Colorado Register, Volume 29, Number 11.

(115) On July 31, 2003, the State of Colorado submitted revisions to Colorado's 5 CCR 1001–3, Regulation 1, that deleted Sections II.A.6, A.7, A.9 and C.3, regarding, respectively, alfalfa dehydrating plant drum dryers, wigwam burners, the static firing of Pershing missiles and a notice regarding waste materials. The State also deleted emission limitations for alfalfa plant drum dyers by removing Section III.C.2. Colorado's deletion of Sections II. A6, A.7 and A.9 and Section III.C.2 will cause a numbering change of subsequent paragraphs within Sections II.A and III.C. EPA is adopting the new numbering scheme for sections II.A. and III C. Section II.C.2.d. regarding agricultural open burning is modified to include the burning of diseased animal carcasses to prevent a public health emergency. Section III.A.1.d is

modified for incorporation of new State's method for calculating emissions from multiple fuel burning units ducted to a common stack. Section V is added regarding emission standards for electric arc furnaces, except for the director's discretion provision provided for in Section V.A.2. Sections VI.A.3.e, VI.A.3.f, VI.B.4.e, and VI.B.4.g(ii) are modified regarding the methods used for the averaging of emissions over a 24 hour period.

(i) Incorporation by reference.

(A) 5 CCR 1001–3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section II, Smoke and Opacity, Section II.C.2.d, effective March 2, 2002.

(B) 5 CCR 1001–3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section III, Particulate Matter, Fuel Burning Equipment, Section III.A.1.d, effective September 30, 2001.

(C) 5 CCR 1001–3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section V, Emission Standard for Existing Iron and Steel Plant Operations, effective September 30, 2001.

(*1*) The submittal contains Section V.A.2 with the language:

''Emissions from gas-cleaning device shall not exceed a mass emission rate of 0.00520 gr/dscf of filterable particulates maximum two-hour average, as measured by EPA Methods 1–4 and the front half of Method 5 (40 CFR 60.275, and Appendix A, Part 60), or by other credible method approved by the Division. This particulate emissions standard does not include condensable emissions, or the back half emissions of Method 5''. The language ''or by other credible method approved by the Division'' is disapproved. The language ''Appendix A, Part 60'' is changed to ''appendices A1 through A3, Part 60'' in order to comply with the current nomenclature of Part 60.

(D) 5 CCR 1001–3, Regulation 1, Emission Control for Particulates, Smokes, Carbon Monoxide and Sulfur Oxides, Section VI, Sulfur Dioxide Emission Regulations, Sections VI.A.3.e, VI.A.3.f, VI.B.4.e, and VI.B.4.g(ii), effective September 30, 2001.

(*1*) Sections VI.B.4.e and VI.B.4.g(ii) list an emission rate of 0.7 lbs. sulfur dioxide, for the sum of all SO_2 emissions from a given refinery per barrel of oil processed, per day. This emission rate is disapproved. The emission rate remains unchanged at 0.3 lbs. All remaining language within Sections VI.B.4.e and VI.B.4.g(ii) is approved.

(116) On June 20, 2003, the State of Colorado submitted revisions to Colorado's Regulation 3 Regulation, 5 CCR 1001–5, that place restrictions on increment consumption, add innovative control technology as an alternative to BACT requirements, and changed or deleted numerous definitions in Part A. The State in Part B revised construction permit review requirements regarding RACT for minor sources in attainment/maintenance areas. The State made the restrictions on maximum allowable increases of sulfur dioxide concentrations over baseline concentrations in Class I areas also applicable to certain Class II areas, such as certain National Monuments that are not Class I areas. Increment consumption restrictions were added to limit major stationary sources from consuming more than 75 percent of an applicable increment. The State added the use of innovative control technology by a source in lieu of BACT requirements in order to encourage the use of such technology. The revisions to both Parts and B also included minor changes designed to fix ambiguous language, to make the definitions more readable or to delete obsolete or duplicative definitions. On April 12, 2004, the State of Colorado submitted a minor revision to Part A, Section I.A regarding the availability of material incorporated by reference.

(i) Incorporation by reference.

(A) Regulation 3, 5 CCR 1001–5, AIR CONTAMINANT EMISSIONS NOTICES, Part A, Concerning General Provisions Applicable to Construction Permits and Operating Permits, effective December 2002 and April 2003 with the following exceptions:

(*1*) Section I.B.36.b.(iii)(G) provisions related to Pollution Control Projects

(*2*) Section I.B.40.c.(ii) Submittal of an application for a nonroad engine permit, State-only requirement

(*3*) Section IV. C., Emissions Trading under Permit Caps

(*4*) Section V.F.5, Criteria for Approval of all Transactions, deleting the requirement that trading transactions may not be used inconsistently with or to circumvent requirements of LAER

(B) Regulation 3, 5 CCR 1001–5, AIR CONTAMINANT EMISSIONS NOTICES, Part B, Concerning Construction Permits including Regulations for the Prevention of Significant Deterioration (PSD), Area Classifications, Part B, Section V.B., effective December 2002 with the following exceptions:

(*1*) Section III.D.1.c(iii), Exemption from Construction Permit Requirements, Uncontrolled Emissions

(*2*) Section IV.B.2, Application for a Construction Permit, and Section IV.H.8, Application for a Final Permit, regarding operating and maintenance plans and recordkeeping formats.

(117) On June 18, 2009, the State of Colorado submitted an 8–Hour Ozone Attainment Plan for the Denver Metro Area/North Front Range area to meet the requirements of 40 CFR 81.300(e)(3)(ii)(D) for the 1997 8-hour ozone NAAQS. On the same date, the State of Colorado also submitted revisions to portions of Part A, ''Concerning General Provisions Applicable to Reporting and Permitting,'' and Part B, ''Concerning Construction Permits,'' of Colorado's Regulation No. 3, ''Air Contaminant Emissions Notices,'' and to Sections I through XVI of Colorado's Regulation No. 7, ''Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides).'' EPA is approving the Ozone Attainment Plan except for the last paragraph on page IV–1 and the first paragraph on page IV–2, the words ''federally enforceable'' in the second to last paragraph on page V–6, and the reference to Attachment A in the Table of Contents and on page IV–3. EPA is disapproving the excepted language from the Ozone Attainment Plan. EPA is approving the revisions to portions of Parts A and B of Colorado's Regulation No. 3. For purposes of this action, Colorado Regulation No. 3, Part B, Sections II.D.1.k, l, m, and n, as incorporated below, should be considered an addition to and as immediately following Colorado Regulation Number 3, Part B, Sections III.D.1.a through j, as previously approved by EPA. EPA is approving the revisions to Sections I through XI and XIII through XVI of Colorado's Regulation No. 7, except for Colorado's repeal of section II.D. EPA is disapproving Colorado's repeal of Section II.D and Colorado's revisions to Section XII of Regulation No. 7. EPA is not acting on the provisions in Regulation No. 7 that are designated ''State Only.''

(i) *Incorporation by reference.*

(A) 5 CCR 1001–5, Colorado Regulation No. 3, ''Air Contaminant Emissions Notices,'' Part A, ''Concerning General Provisions Applicable to Reporting and Permitting,'' Sections II.D.1.m, II.D.1.ee, II.D.1.uu, II.D.1.ccc, II.D.1.ddd, II.D.1.uuu, and II.D.1.eeee, effective January 30, 2009.

(B) 5 CCR 1001–5, Colorado Regulation No. 3, ''Air Contaminant Emissions Notices,'' Part B, ''Concerning Construction Permits,'' Sections II.D.1.k, l, m, and n, effective January 30, 2009.

(C) Letter dated November 18, 2009 from the Office of the Colorado Attorney General, signed by Jerry Goad, to Candy Herring, Office of the Colorado Secretary of State, regarding clerical errors in Regulation No. 7, and those portions of 5 CCR 1001–9, Colorado Regulation No. 7, ''Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides),'' Section II.C.1 that accompanied such letter, except for the following: the parenthetical phrase ''(State Only: Located in any Ozone Nonattainment Area or Attainment Maintenance Area)'' at II.C.1; Section II.C.1.a.(v); Section II.C.1.c; and Section II.C.1.d.

(D) 5 CCR 1001–9, Colorado Regulation No. 7, ''Control of Ozone Via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides),'' Sections I through XI and XIII through XVI, effective January 30, 2009, except for the following: Section I.A.1.b; Section I.B.1.b; Section I.B.2.b; Section I.B.2.d; Section II.A.12; Section II.C.1; and the repeal of Section II.D.

(118) On June 20, 2003, the State of Colorado submitted revisions to Colorado's Common Provisions Regulation, 5 CCR 1001–2, that revised the definitions of continuous monitoring system,

emergency power generator, enforceable, federally enforceable, manufacturing process or process equipment, and volatile organic compounds. Deleted definitions included but were not limited to actual emissions, Best Available Control Technology (BACT), Lowest Achievable Emission Rate (LAER), and what conditions determine the modification of a source. These definitions were deleted in the Common Provisions because they appear in Colorado's Regulation 3. The State clarified that fuel burning equipment emissions are considered a part of the manufacturing process emissions when the emissions are vented through a common stack.

However, fuel burning equipment emissions vented from a separate stack are subject to regulations unique to fuel burning equipment. In addition, the State deleted and reserved Section III of the Common Provisions regarding smoking gasoline powered motor vehicles. The provisions regarding smoking gasoline powered motor vehicles were considered by the State to be obsolete. The revisions to the Common Provisions also included minor changes designed to fix ambiguous language, to make the definitions more readable or to delete obsolete or duplicative definitions.

(i) Incorporation by reference.

(A) 5 CCR 1001–2, COMMON PROVISIONS REGULATION, Section 1., Definitions, Statement of Intent, and General Provisions Applicable to all Emission Control Regulations Adopted by the Colorado Air Quality Control Commission, except I.G, the definitions for ''Construction'' and ''Day''; Section II, General, except II.E, II.I, and II.J; effective on September 30, 2002.

(119) The State of Colorado submitted revisions on September 16, 1997, June 20, 2003, July 11, 2005, August 8, 2006 and August 1, 2007 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part A, Section II. The August 1, 2007 submittal included a renumbering of sections in II.B and II.D. The incorporation by reference in (c)(119)(i)(A) reflects the renumbered provisions as of the August 1, 2007 submittal. Additionally, the State of Colorado deleted sections II.B.7., II.B.8., II.B.9., II.B.10., and II.D.7. without replacement. The deletion of these provisions has been incorporated by reference at (c)(72)(i)(F) of this section, the paragraph containing the original incorporation by reference of the provisions.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, Section II, *Air Pollutant Emission Notice (APEN) Requirements*, Sections II.A, *Air Pollutant Emission Notices for New, Modified, and Existing Sources;* II. B, *General;* II.B.1, *Emission Estimate;* II.B.1.b, *Other engineering calculations;* II.B.2, *Air Pollutant Emission Notice Term;* II.B.3, *APEN Applicability;* II.B.3.a, *Criteria Pollutants;* II.B.4.a; II.B.4.b; II.B.4.c; II.B.4.d; II.B.4.e; II.B.4.f; the undesignated text immediately following II.B.4.f and preceding II.B.5; II.B.5; II.B.6; II.C, *Revised Air Pollutant Emission Notices;* II.C.1; II.C.1.a; II.C.1.h; II.C.2; II.C.2.b; II.C.3; II.D, *Exemptions from Air Pollutant Emission Notice Requirements;* II.D.1; the undesignated text immediately following II.D.1 and preceding II.D.1.a; II.D.1.a; II.D.1.f; II.D.1.g; II.D.1.h; II.D.1.i (excluding subprovisions); II.D.1.j; II.D.1.k; II.D.1.n; II.D.1.x; II.D.1.y; II.D.1.aa; II.D.1.bb; II.D.1.kk; II.D.1.nn; II.D.1.oo; II.D.1.aaa; II.D.1.bbb; II.D.1.ccc; II.D.1.fff; II.D.1.ggg; II.D.1.lll; the undesignated text immediately following II.D.1.lll and preceding II.D.1.mmm; II.D.1.nnn., II.D.1.ooo; II.D.1.ppp; II.D.1.qqq; II.D.1.rrr; II.D.1.vvv; II.D.1.www; II.D.1.yyy; II.D.1.zzz; II.D.1.aaaa; II.D.1.bbbb; II.D.1.cccc; II.D.1.dddd; II.D.2; II.D.3; II.D.4; II.D.5; II.D.6; effective October 30, 2006.

(120) The State of Colorado submitted revisions on October 25, 2005 and August 1, 2007 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part D. The October 25, 2005 submittal included a renumbering of Regulation Number 3. The incorporation by reference in paragraph (c)(120)(i)(A) on this section reflects the renumbered sections as of the October 25, 2005 submittal. Sections were removed from Part D between the October 25, 2005 and August 1, 2007 submittal. The incorporation by reference

in paragraph (c)(120)(i)(B) of this section reflects the numbering of the sections as of the August 1, 2007 submittal.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration,* adopted April 16, 2004 and effective June 30, 2004:

(*1*) Section I, *Applicability,* Sections I.A., *General Applicability;* I.A.1;

(*2*) Section II, *Definitions,*

(*i*) II.A;

(*ii*) II.A.1, *Actual Emissions;* II.A.1.a (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.1.b; II.A.1.c; II.A.1.e;

(*iii*) II.A.3, *Air Quality Related Value;*

(*iv*) II.A.5, *Baseline Area;*

(*v*) II.A.6, *Baseline Concentration;*

(*vi*) II.A.8, *Best Available Control Technology* (*BACT*) (the language that appears in plain or underlined text but not language that appears as italicized text, with the following exception—EPA is incorporating italicized text and is not incorporating underlined text when the combined effect of that action is to replace the phrase ''air pollutant regulated under the Federal Act'' (or an equivalent phrase) with the term ''regulated NSR pollutant'');

(*vii*) II.A.12, *Complete;*

(*viii*) II.A.16, *Federal Land Manager (FLM);*

(*ix*) II.A.19, *Innovative Control Technology;*

(*x*) II.A.21, *Lowest Achievable Emission Rate (LAER);* II.A.21.a; II.A.21.b (only the language that appears in plain or underlined text and not the language that appears as italicized text);

(*xi*) II.A.23, *Major Modification* (the language that appears in plain or underlined text but not language that appears as italicized text, with the following exception—EPA is incorporating italicized text and is not incorporating underlined text when the combined effect of that action is to replace the phrase ''air pollutant regulated under the Federal Act'' (or an equivalent phrase) with the term ''regulated NSR pollutant''); II.A.23.b; II.A.23.c; II.A.23.d; II.A.23.d(i); II.A.23.d(ii); II.A.23.d(iv); II.A.23.d.(v); II.A.23.d.(vi); II.A.23.d.(vii); II.A.23.d.(ix); II.A.23.f;

(*xii*) II.A.24, *Major Source Baseline Date;*

(*xiv*) II.A.26, *Minor Source Baseline Date;*

(*xv*) II.A.27, *Net Emissions Increase;* II.A.27.a; (the language that appears in plain or underlined text and the addition of the italicized phrase ''With respect to any regulated NSR pollutant emitted by any major stationary source''); II.A.27.a.(i) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.a.(ii) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.b (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.c; II.A.27.c.(i); II.A.27.c(ii); II.A.27.c(iii); II.A.27.d; II.A.27.e; II.A.27.f; II.A.27.g; II.A.27.g.(i); II.A.27.g.(ii); II.A.27.g.(iii) (only the language that appears in plain or underlined text and not the language that appears as italicized text); II.A.27.g.(iv); II.A.27.h; II.A.27.j; II.A.27.k, *Creditable Decreases for Fuel Switching;*

(*xvi*) II.A.40, *Regulated NSR Pollutant;* II.A.40.a; II.A.40.b; II.A.40.d; II.A.40.e;

(*xvii*) II.A.43, *Secondary Emissions* (only the language that appears in plain or underlined text and not the language that appears as italicized text);

(*xviii*) II.A.44, *Significant;* II.A.44.b; II.A.44.c;

(*xix*) II.A.45, *Significant Emissions Increase;*

(*3*) Section III, *Permit Review Procedures;*

(*4*) Section IV, *Public Comment Requirements;*

(*5*) Section V, *Requirements Applicable to Nonattainment Areas,* Sections V.A, *Major Stationary Sources;* V.A.1; V.A.2; V.A.3; V.A.3.d; V.A.4; V.A.5; V.A.6; V.A.7, *Applicability of Certain Nonattainment Area Requirements;* V.A.7.a; V.A.7.b; V.A.8, *Exemptions from certain nonattainment area requirements;*

(*6*) Section VI, *Requirements applicable to attainment and unclassifiable areas*

and pollutants implemented under section 110 of the Federal Act (Prevention of Significant Deterioration Program), Sections VI.A, *Major Stationary Sources and Major Modifications;* VI.A.1, *Control Technology Review;* VI.A.1.a; VI.A.1.b; VI.A.1.c (only the language that appears in plain or underlined text and not the language that appears as italicized text); VI.A.2, *Source Impact Analysis;* VI.A.3, *Pre-construction Monitoring and Analysis;* VI.A.4, *Post-Construction Monitoring;* VI.A.5, *Operation of Monitoring Stations;* VI.A.6, *Additional Impact Analysis* (only the language that appears in plain or underlined text and not the language that appears as italicized text); VI.B, *Applicability of Certain PSD Requirements;* VI.B.1 through VI.B.4; VI.B.7; VI.C, *Notice to the U.S. EPA;* VI.D, *Major Stationary Sources in attainment areas affecting nonattainment areas;*

(*7*) Section VII, *Negligibly Reactive Volatile Organic Compounds (NRVOCs);*

(*8*) Section VIII, *Area Classifications*, Sections VIII.A; VIII.C; VIII.D;

(*9*) Section IX, *Redesignation;*

(*10*) Section X, *Air Quality Limitations*, Sections X.A, *Ambient Air Increments;* X.A.1, X.A.2; X.A.3; X.A.4, *Periodic Review;*

(*11*) Section XI, *Exclusions From Increment Consumption;*

(*12*) Section XII, *Innovative Control Technology;*

(*13*) Section XIII, *Federal Class I Areas;* adopted April 16, 2004 and effective June 30, 2004.

(B) Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, Section II, *Definitions;* Sections II.A; II.A.22.a; II.A.24.d; II.A.38.c; II.A.42.a; adopted August 17, 2006 and effective October 30, 2006.

(121) On August 8, 2006, the State of Colorado submitted revisions to Colorado's 5 CCR 1001–3, Regulation 1, that allows for the use of obscurants during military exercises at the Fort Carson Military Base and Pinón Canyon Maneuver Site in Colorado while precautionary steps are taken during the exercise to maintain air quality. The State modified the equipment requirements and work practices (abatement and control measures) in Regulation 1 intended to control the emissions of particulates, smokes and SO_2 from new and existing stationary sources. Consistent with its use of the term elsewhere, the State added the attainment/maintenance nomenclature. The revision also provides a new numbering scheme for each section of the regulation.

The State adopted EPA test method 9 (part 60 of this title, Appendix A–4) as it is applied to Standards of Performance for Steel Plants (§ 60.275a of this title). The State revised manufacturing process emission rates, to clarify that the applicability of the section is to process equipment with a design rate of 30 tons per hour or less. The averaging time for emission standards of all existing sources of SO_2 shall be a three hour rolling average. New sources of SO_2 not specifically regulated within Regulation 1 are limited to two tons per day and are subject to BACT.

(i) Incorporation by reference.

(A) 5 CCR 1001–3, Regulation 1, Emission Control for Particulate Matter, Smoke, Carbon Monoxide, and Sulfur Oxides, Section I., *Applicability: Referenced Federal Regulations;* Section II., *Smoke and Opacity;* Section III., *Particulate Matter* (except Subsection III.A.1.d.); Section IV., *Continuous Emission Monitoring Requirements for New or Existing Sources;* Section V., *Emission Standards for Existing Iron and Steel Plant Operations;* Section VI., *Sulfur Dioxide Emission Regulations;* Section VII., *Emission Regulations for Certain Electric Generating Stations Owned and Operated by the Public Service Company of Colorado;* Section VIII., *Restrictions On The Use of Oil as a Backup Fuel;* effective October 2, 2005.

(122) The State of Colorado submitted revisions October 25, 2005 to Colorado's 5 CCR 1001–5 Regulation Number 3, Part A and Colorado's 5 CCR 1001–5 Regulation Number 3, Part D. The October 25, 2005 submittal included language changes and renumbering of Regulation Number 3. The incorporation by reference in ((i)(A) and (i)(B) reflects the renumbered sections and language changes as of the October 25, 2005 submittal.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, adopted April 16, 2004 and effective June 30, 2004:

Section I, *Applicability*, Sections I.B, *Definitions;* I.B.7, *Allowable Emissions;* I.B.13, *Continuous Emissions Monitoring System (CEMS);* I.B.14, *Continuous Emissions Rate Monitoring Systems (CERMS);* I.B.15, *Continuous Parameter Monitoring System (CPMS);* I.B.33, *Pollution Prevention;* I.B.35, *Potential to Emit;* I.B.36, *Predictive Emissions Monitoring System (PEMS);* adopted April 16, 2004 and effective June 30, 2004.

(B) 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, adopted April 16, 2004 and effective June 30, 2004:

(*1*) Section I, *Applicability*,

(*i*) I.A., *General Applicability;* I.A.2; I.A.3;

(*ii*) I.B, *Applicability Tests;* I.B.1; I.B.2; I.B.4 (except the final sentence beginning, ''For example''); I.B.5;

(*iii*) I.C;

(*2*) Section II, *Definitions*,

(*i*) II.A;

(*ii*) II.A; II.A.1, *Actual Emissions;* II.A.1.a (only the language that appears as plain or italicized text); II.A.1.c (only the language that appears as plain text); II.A.1.d;

(*iii*) II.A.2, *Actuals PAL;*

(*iv*) II.A.4, *Baseline Actual Emissions;*

(*v*) II.A.7, *Begin Actual Construction;*

(*vi*) II.A.9, *Clean Coal Technology;*

(*vii*) II.A.10, *Clean Coal Technology Demonstration Project;*

(*viii*) II.A.13, *Construction;*

(*ix*) II.A.14, *Emissions Unit;*

(*x*) II.A.15, *Electric Utility Steam Generating Unit;*

(*xi*) II.A.17, *High Terrain;*

(*xii*) II.A.18, *Hydrocarbon Combustion Flare;*

(*xxii*) II.A.31, *PAL Major Modification;*

(*xxiii*) II.A.32, *PAL Permit;*

(*xxiv*) II.A.33, *PAL Pollutant;*

(*xxv*) II.A.34, *Plantwide Applicability Limitation (PAL);*

(*xxvi*) II.A.36, *Prevention of Significant Deterioration (PSD) Permit;*

(*xxvii*) II.A.37, *Project;*

(*xxviii*) II.A.38, *Projected Actual Emissions;*

(*xxvix*) II.A.39, *Reactivation of Very Clean Coal-fired Electric Utility Steam Generating Unit;*

(*xxx*) II.A.41, *Replacement Unit;*

(*xxxi*) II.A.42, *Repowering;*

(*xxxii*) II.A.43, *Secondary Emissions;*

(*xxxiii*) II.A.46, *Significant Emissions Unit;*

(*xxxiv*) II.A.47, *Small Emissions Unit;*

(*xxxv*) II.A.48, *Temporary Clean Coal Technology Demonstration Project;*

(*3*) Section V, *Requirements Applicable to Nonattainment Areas*, V.A.7.c (except for the phrases, ''a Clean Unit or at'', ''a reasonable possibility that'', and ''may result in a significant emissions increase''); V.A.7.d;

(*4*) Section VI, *Requirements applicable to attainment and unclassifiable areas and pollutants implemented under section 110 of the Federal Act (Prevention of Significant Deterioration Program)*, Sections VI.A.1.c (only the language that appears as plain or italicized text); VI.B.5 (except for the phrases, ''a Clean Unit or at'', ''a reasonable possibility that'', and ''may result in a significant emissions increase''); VI.B.6;

(*5*) Section XVII, *Actuals PALs;* adopted April 16, 2004 and effective June 30, 2004.

(123) Colorado adopted revisions to its procedural rules on January 16, 1998 and submitted part of the revised procedural rules to EPA on November 5, 1999. Colorado's procedural rules govern all procedures and hearings before the Air Quality Control Commission (Commission) and certain procedures and hearings before the Air Pollution Control Division within the Colorado Department of Public Health and Environment. The revision to the Commission's procedural rules was intended to bring the Commission current with all applicable procedural requirements for their official actions. The submitted portion of the revision consisted of changes to Section 1.11.0 of the procedural rules. The section addresses requirements under section 128 of the CAA regarding the composition of the Commission and disclosure by its members of potential conflicts of interest.

(i) Incorporation by reference.

(A) Department of Public Health and Environment, Air Quality Control Commission, Procedural Rules, 5 CCR 1001–1, Section 1.11.0, *State Implementation Plan*, adopted on January 16, 1998 and effective on March 30, 1998.

(ii) [Reserved]

(124) On May 25, 2011 the State of Colorado submitted revisions to its State Implementation Plan to address the requirements of EPA's regional haze rule. On December 31, 2012, EPA issued a final rule approving this submittal and responding to public comments. On May 26, 2015 EPA reissued the final rule with respect to the nitrogen oxides (NO_X) best available retrofit technology (BART) determination for the Comanche Generating Station to provide additional responses to public comments.

(i) Incorporation by reference.

(A) Colorado Air Quality Control Commission, Regulation Number 3, 5 CCR 1001–5, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part F, *Regional Haze Limits—Best Available Retrofit Technology (BART) and Reasonable Progress (RP)*, Section VI, *Regional Haze Determinations*, and Section VII, *Monitoring, Recordkeeping, and Reporting for Regional Haze Limits;* adopted January 7, 2011; effective February 14, 2011.

(B) Colorado Air Quality Control Commission, Regulation Number 7, 5 CCR 1001–9, *Control of Ozone via Ozone Precursors (Emissions of Volatile Organic Compounds and Nitrogen Oxides)*, Section XVII, *(State Only, except Section XVII.E.3.a. which was submitted as part of the Regional Haze SIP) Statewide Controls for Oil and Gas Operations and Natural Gas-Fired Reciprocating Internal Combustion Engines*, subsection E.3.a, *(Regional Haze SIP) Rich Burn Reciprocating Internal Combustion Engines;* adopted January 7, 2011; effective February 14, 2011.

(125) On August 21, 2006, the State of Colorado submitted revisions to 5 CCR 1001–5, Regulation Number 3, *Air Pollution Emission Notice and Permitting Requirements*. The August 21, 2006, submittal included renumbering and deletions of Regulation Number 3. The incorporation by reference in paragraphs (c)(125)(i)(A) and (B) of this section reflect the renumbered sections, deletions and reference changes as of the August 21, 2006, submittal.

(i) Incorporation by reference

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part C, *Concerning Operating Permits*, Section I, *Applicability*, I.A., *Definitions;* I.A.7.j., adopted December 15, 2005 and effective March 2, 2006.

(B) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Contaminant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, adopted December 15, 2005 and effective March 2, 2006:

(*1*) Section I, *Applicability*, I.A., *General Applicability;* I.A.2., I.B., *Applicability Tests;* I.B.3., I.B.4.

(*2*) Section II, *Definitions;* II.A.; II.A.1., *Actual Emissions;* II.A.1.d.; II.A.11., *Complete;* II.A.12., *Construction;* II.A.13., *Emissions Unit;* II.A.14., *Electric Utility Steam Generating Unit;* II.A.15., *Federal Land Manager (FLM);* II.A.16., *High Terrain;* II.A.17., *Hydrocarbon combustion flare;* II.A.18., *Innovative Control Technology;* II.A.19., *Low Terrain;* II.A.20., *Lowest Achievable Emission Rates (LAER)* (excluding underlined text); II.A.21., *Major Emissions Unit;* II.A.22., *Major Modification* (excluding

II.A.22.a. and underlined text); II.A.23., *Major Source Baseline Date;* II.A.24., *Major Stationary Source* (excluding II.A.24.d. and underlined text); II.A.25., *Minor Source Baseline Date;* II.A.26., *Net Emissions Increase* (excluding underlined text); II.A.27., *Nonattainment Major New Source Review (NSR) Program;* II.A.28., *PAL Effective Date;* II.A.29., *PAL Effective Period;* II.A.30., *PAL Major Modification;* II.A.31., *PAL Permit;* II.A.32., *PAL Pollutant;* II.A.33., *Plantwide Applicability Limitation (PAL);* II.A.34., *Prevention of Significant Deterioration (PSD) Permit;* II.A.35., *Project;* II.A.36., *Projected Actual Emissions;* II.A.37., *Reactivation of Very Clean Coal-fired Electric Utility Steam Generating Unit;* II.A.38., *Regulated NSR Pollutant* (excluding II.A.38.c.); II.A.39., *Replacement Unit;* II.A.40., *Repowering* (excluding underlined text); II.A.41., *Secondary Emissions;* II.A.42., *Significant* (excluding II.A.42.a.) ; II.A.43., *Significant Emissions Increase;* II.A.44., *Significant Emissions Unit;* II.A.45., *Small Emissions Unit;* II.A.46., *Temporary Clean Coal Technology Demonstration Project;* XV., *Actual PALs.*

(ii) Additional material.

(A) Notice of Final Adoption, dated 12/15/2005, signed by Douglas A. Lempke, Administrator, for revisions made to Regulation Number 3, *Air Pollution Emission Notice and Permitting Requirements.*

(126) On May 11, 2012 and May 13, 2013 the State of Colorado submitted revisions to the State Implementation Plan that incorporate the required elements of the 2008 $PM_{2.5}$ NSR Implementation Rule and the 2010 $PM_{2.5}$ Increment Rule.

(i) Incorporation by reference

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration,* Section II, *Definitions,* Section II.A.5, *Baseline Area,* II.A.5.a. and II.A.5.b.; Section II.A.23., *Major Source Baseline Date,* II.A.23.a. and II.A.23.b.; II.A.25., *Minor Source Baseline Date,* II.A.25.a., II.A.25.b. introductory text, and II.A.25.b.(i); II.A.38, *Regulated NSR Pollutant,* II.A.38.c., II.A.38.g.; II.A.42., *Significant,* II.A.42.a.; Section X, *Air Quality Limitations,* X.A., *Ambient Air Increments,* X.A.1., effective on 12/15/11.

(B) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration,* Section II, *Definitions,* II.A.23., *Major Source Baseline Date,* II.A.23.c., effective on 2/15/13.

(127) On June 11, 2008, June 18, 2009, and May 25, 2011 the State of Colorado submitted revisions to 5 CCR 1001–5, Regulation 3, Parts A, B, and D. The June 11, 2008 and June 18, 2009 submittals incorporated changes to fee amounts which the State charges for the processing and annual renewal of air emission permits. These fees support Colorado's construction and operating permit programs. EPA is approving fees submitted by the State on June 18, 2009, which superseded changes submitted on June 11, 2008, to the extent that the fees support the construction permit program. EPA is also approving revisions made to 5 CCR 1001–5, Regulation 3, Parts A, B, and D submitted by the State on May 25, 2011 for Parts A, B and D.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part A, *Concerning General Provisions Applicable to Reporting and Permitting,* VI. *Fees,* VI.D. *Fee Schedule,* VI.D.1.; adopted September 18, 2008 and effective October 30, 2008.

(B) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part A, *Concerning General Provisions Applicable to Reporting and Permitting,* except Section II., *Air Pollutant Emission Notice (APEN) Requirements,* II.D., *Exemptions from Air Pollutant Emission Notice Requirements,* Section II.D.1.sss, II.D.1.ttt, II.D.1.xxx, and II.D.1.ffff; and Section VI., *Fees,* VI.D., *Fee Schedule,* VI.D.1., adopted February 21, 2008 and effective April 30, 2008.

(C) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements,* Part B, *Concerning Construction Permits;* adopted February 21, 2008 and effective April 30, 2008.

(D) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration;* adopted February 21, 2008 and effective April 30, 2008:

(*1*) Excluding underlined text in Section II, *Definitions*, Section II.A.1., *Actual Emissions*, II.A.1.a., II.A.1.c., and II.A.1.e.; II.A.8., *Best Available Control Technology (BACT)*, first paragraph; II.A.20., *Lowest Achievable Emissions Rate (LAER)*, II.A.20.b.; II.A.22., *Major Modification*, introductory paragraph; II.A.24., *Major Stationary Source*, II.A.24.b.; II.A.26., *Net Emissions Increase*, II.A.26.a.(i) and II.A.26.g.(iii); II.A.40.5, *Representative Actual Annual Emissions*, introductory paragraph and II.A.40.5(a); and, VI. *Requirements applicable to attainment and unclassifiable areas and pollutants implemented under Section 110 of the Federal Act (Prevention of Significant Deterioration Program)*, VI.A. *Major Stationary Sources and Major Modifications*, VI.A.1., *Control Technology Review*, VI.A.1.c.; and

(*2*) With the following exceptions: Section II, *Definitions*, Section II.A.5., *Baseline Area*, II.A.5.a. and II.A.5.b.; Section II.A.23., *Major Source Baseline Date;* II.A.25., *Minor Source Baseline Date*, II.A.25.a., II.A.25.b., introductory text, and II.A.25.b(i); II.A.38, *Regulated NSR Pollutant*, II.A.38.c.; II.A.42., *Significant*, II.A.42.a.; Section X, *Air Quality Limitations*, X.A., *Ambient Air Increments*, X.A.1.

(128) On May 25, 2011, the State of Colorado submitted revisions to 5 CCR 1001–5, Regulation 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, parts A, B, and D. The May 25, 2011 submittal addresses the permitting of sources of greenhouse gases (GHGs). The revisions to portions of parts A, B, and D incorporate the provisions of the Prevention of Significant Deterioration (PSD) and Title V Greenhouse Gas Tailoring Rule. The revisions establish thresholds for determining which new stationary sources and modifications to existing stationary sources become subject to Colorado's PSD permitting requirements for their GHG emissions. These revisions are consistent with federal requirements for PSD permitting.

(i) Incorporation by reference.

(A) 5 CCR 1001–5, Regulation Number 3, *Stationary Source Permitting and Air Pollutant Emission Notice Requirements*, Part A, *Concerning General Provisions Applicable to Reporting and Permitting*, I.B., *Definitions*, I.B.10, *Carbon Dioxide Equivalent (CO2e);* I.B.23., *Greenhouse Gas (GHG);* I.B.25., *Major Source*, I.B.25b; and I.B.44., *Subject to Regulation;* VI., *Fees*, VI.D., *Fee Schedule;* Part B, *Concerning Construction Permits*, II.A.4. and II.A.7; Part D, *Concerning Major Stationary Source New Source Review and Prevention of Significant Deterioration*, II., *Definitions*, II.A., introductory paragraph, II.A.8, *Best Available Control Technology (BACT);* II.A.22., *Major Modification;* II.A.24., *Major Stationary Source;* II.A.24.a., introductory paragraph, II.A.24.a.(ii); II.A.24.b.; II.A.38., *Regulated NSR Pollutant*, II.A.38.e. and II.A.38.f.; adopted October 21, 2010 and effective December 15, 2010.

[37 FR 10855, May 31, 1972. Redesignated and amended at 80 FR 58209, Sept. 28, 2015]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.354, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

Subpart H—Connecticut

§ 52.369 [Reserved]

§ 52.370 Identification of plan.

(a) Title of plan: ''State of Connecticut Air Implementation Plan.''

(b) The plan was officially submitted on March 3, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Miscellaneous non-regulatory addition to the plan and addition of amendment to Chapter 360 of General Statutes which provides authority for delegation of enforcement authority submitted on March 21, 1972, by the Connecticut Department of Environmental Protection.

(2) Miscellaneous non-regulatory additions to the plan submitted on April 6, 1972, by the Connecticut Department of Environmental Protection.

(3) Attainment dates submitted on August 10, 1972, by the Connecticut Department of Environmental Protection.

(4) Regulation 19–508–100 requiring a review of indirect sources submitted on January 9, 1974, by the Connecticut Department of Environmental Protection.

(5) AQMA identification material submitted on April 15, 1974, by the Connecticut Department of Environmental Protection.

(6) Indirect Source Review Regulation 19–508–100 resubmitted on August 26, 1974, by the Connecticut Department of Environmental Protection.

(7) [Reserved]

(8) Revision to Chapter 8, Air Quality Surveillance, submitted on June 30, 1977, by the Governor.

(9) Revision to Indirect Source Review Regulation 19–508–100 submitted on June 13, 1977, by the Connecticut Department of Environmental Protection.

(10) A revision to Regulation 19–508–19(a)(2)(i) submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 16, 1979, granting a variance until April 1, 1981, to Northeast Utilities.

(11) State Implementation Plan revisions to meet the requirements of part D of the Clean Air Act, as amended in 1977, were submitted on June 22, 1979, and received on June 27, 1979; submitted on December 18, 1979 and received on December 28, 1979; submitted on January 28, 1980, and received on February 1, 1980; submitted and received on May 1, 1980; submitted and received on June 5, 1980; submitted on September 2, 1980, and received on September 8, 1980; and submitted and received on November 12, 1980. Included are plans to attain: The primary TSP standard in Greenwich and Waterbury and the carbon monoxide and ozone standards statewide. A program was also submitted for the review of construction and operation of new and modified major stationary sources of pollution in non-attainment areas. Certain miscellaneous provisions are also included.

(12) A revision to Regulation 19–508–19(a)(2)(i), submitted by the Commissioner of the Connecticut Department of Environmental Protection on September 8, 1980, granting a variance until March 27, 1983, to the Federal Paperboard Company, Inc.

(13) A comprehensive air quality monitoring plan, intended to meet requirements of 40 CFR part 58, was submitted by the Connecticut Department of Environmental Protection Commission on June 9, 1980, and November 17, 1980.

(14) Non-regulatory additions to the plan which were submitted on December 19, 1980, and amended on March 11, 1981, by the Connecticut Department of Environmental Protection amending the sulfur control strategy to include an ''Air Pollution Control/Energy Trade Option'' except for submittal attachments #1 and #2, ''Sulfur Dioxide'' and ''Transport of Sulfur Dioxide'' and the section of attachment #3 ''Control of Sulfur Oxides'' entitled ''Sample Analysis of a Btu Bubble Application''.

(15) Non-regulatory addition to the plan of the state *New Source Ambient Impact Analysis Guideline*, for use in State program actions, submitted on December 19, 1980, and amended on March 11, 1981, and July 15, 1981.

(16) Revisions to regulation 19–508–4 (source monitoring requirements) and regulation 19–508–5 (stack emissions testing) submitted on November 7, 1977, by the Commissioner of the Connecticut Department of Environmental Protection.

(17) A revision to Regulation 19–508–19(a)(2)(i), submitted by the Commissioner of the Connecticut Department of Environmental Protection on June 23, 1981, granting a temporary variance to Uniroyal Chemical, Division of Uniroyal, Inc.

(18) Revisions to Regulation 19–508–19 (Control of Sulfur Compound Emissions), Regulation 19–508–24 (Connecticut Primary and Secondary Standards), and accompanying narrative submitted by the Commissioner of the Connecticut Department of Environmental Protection on October 23, 1981, and November 4, 1981.

(19) Revisions submitted by the Commissioner of the Connecticut Department of Environmental Protection on November 16, 1981. These provisions supersede portions of the revisions identified under paragraph (c)(18).

(20) Revisions to meet the requirements of part D and certain other sections of the Clean Air Act, as amended, were submitted on December 15, 1980, May 29, 1981, and May 5, 1982. Included are changes to the State Ozone Control Plan involving adoption of Regulation 19–508–20(k) controlling the use of cutback asphalt, the approval of the RFP demonstration for ozone attainment, a refined inventory of miscellaneous stationary sources of Volatile Organic Compounds, changes to Regulation 19–508–3(1) dealing with review of new and modified stationary sources, and an amendment to the State's Smoke and Opacity monitoring requirements.

(21) [Reserved]

(22) Revisions to the narrative and State Regulation 19–508–18, subparts (d), f(1), f(2), and part of f(3), governing total suspended particulate emissions, submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 8, 1982.

(23) Regulation 19–508–20(cc), Alternative Emission Reductions as it applies to Regulation 19–508–20: (m), can coating; (n), coil coating; (o), fabric and vinyl coating; (p), metal furniture coating; (q), paper coating; (r), wire coating; (s), miscellaneous metal parts; (t), manufacture of synthesized pharmaceutical products and (v), graphic arts—rotogravure and flexography, was submitted on December 15, 1980, and January 11, 1982, by the Commissioner of the Department of Environmental Protection.

(24) Revision for Sikorsky Aircraft Division of United Technologies received from the Commissioner of the Connecticut Department of Environmental Protection on June 2 and July 16, 1982. This provision supersedes a portion of the revisions identified under (c)(18).

(25) Revisions to meet ozone attainment requirements of Part D (Group II CTG regulations), the adoption of a lead standard and the revision of the ozone standard, submitted on December 15, 1980, are approved as follows: Regulations 19–508–20 (s), (t), (v), (w), (aa), (bb), and (dd), Regulation 19–508–8 and Regulation 19–508–24(i)(l).

(26) Revision for Dow Chemical U.S.A. in Gale's Ferry submitted by the Commissioner of the Connecticut Department of Environmental Protection on December 20, 1982, including state order 7002B signed on May 27, 1982. This provision supersedes a portion of the revisions identified under paragraph (c)(18).

(27) Revision for Lydall and Foulds Division of Lydall, Inc., submitted by the Commissioner of the Connecticut Department of Environmental Protection on December 17, 1982, and January 5, 1983, allowing the facility to burn higher sulfur oil under the State Energy Trade Program.

(28) Revision for Simkins Industries, Inc., in New Haven submitted by the Commissioner of the Connecticut Department of Environmental Protection on January 19, 1983, allowing the facility to burn higher sulfur oil under the Sulfur Energy Trade Program.

(29) Attainment plan revisions to meet the requirements of Part D for ozone were submitted by the Department of Environmental Protection on December 10, 1982, and May 19, 1983. These revisions control volatile organic compound (VOC) emissions from solvent metal cleaners through emission limitations contained in Regulation 19–508–20(*l*) and supporting narrative committing the DEP to implement an educational program for automobile repair facilities. Approval of these revisions allowed EPA to rescind the moratorium on construction and modification of major sources of VOCs which had been in effect since October 1982.

(30) Revision for Loomis Institute in Windsor, submitted by the Commissioner of the Connecticut Department of Environmental Protection on March 30 and July 13, 1983, allowing the facility to burn 2.0 percent sulfur oil under the Sulfur Energy Trade Program.

(31) Revisions demonstrating the attainment and maintenance of the lead standard were submitted on October 18, 1983.

(32) Attainment plan revisions to meet the requirements of part D for ozone and carbon monoxide were submitted by the Department of Environmental Protection on December 10, 1982, January 7, 1983, January 21, 1983, May 19, 1983, June 15, 1983, September

19, 1983, and December 15, 1983. The revisions control volatile organic compound (VOC) and carbon monoxide emissions through a mix of stationary and mobile source controls. EPA approval includes the following regulatory provisions:

(i) Regulation 22a–174–20(ee) limiting emissions from major nonCTG source categories, and

(ii) Regulations 22a–174–27 and 14–164c describing the requirements for Connecticut's motor vehicle Inspection and Maintenance Program.

(33) Revision to Regulation 19–508–20(cc), ''Alternative Emission Reductions'' [made part of the SIP under paragraph (c)(23) of this section] to add Regulation 19–508–20(ee) to the list of VOC regulations that may be met by bubbling under Connecticut's generic rule after source-specific RACT determinations have been made part of the SIP. Revisions requiring sources subject to Regulation 19–508–20(ee) to comply with 19–508–20 (aa), (bb), and (dd). These revisions were submitted by the Connecticut Department of Environmental Protection on September 20, 1983.

(34) Revisions to the Ozone Attainment Plan were submitted by the Commissioner of the Connecticut Department of Environmental Protection on April 22, 1985.

(i) *Incorporation by reference.* (A) Amendments to Regulation 22a–174–1, Definitions; Regulation 22a–174–20(a), Storage of Volatile Organic Compounds; Regulation 22a–174–20(b), Loading of Gasoline and Other Volatile Organic Compounds; and Regulation 22a–174–20(k), Restrictions on Cutback Asphalt, effective December 17, 1984.

(ii) *Additional material.* (A) *Source Test Guidelines and Procedures.*

(B) *Workshop Manual for Gasoline Tank Truck Certification.*

(C) Appendix B of *Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems* (EPA–450/2–78–051).

(35) Revisions to the State Implementation Plan were submitted December 15, 1980, and May 16, 1985, by the Commissioner of the Department of Environmental Protection.

(i) *Incorporation by reference.* (A) Amendments to Department of Environmental Protection Regulation 19–508–24(a)(4), ''Acceptable Method'' adopted by the State on October 8, 1980.

(ii) *Additional material.* (A) A letter dated May 16, 1985, certifying that an ''Acceptable Method'' shall be interpreted to mean that any monitoring method used to collect ambient air pollution data used for attainment status evaluation or designation must be approved by EPA.

(36) Revision to the State Implementation Plan submitted on April 18, 1986, by the Commissioner of the Department of Environmental Protection.

(i) *Incorporated by reference.* (A) State Order No. 943 for Connecticut Charcoal Co., effective April 18, 1986, establishing and requiring reasonably available control technology for the control of volatile organic compounds from this facility.

(37) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 18, 1986, and February 3, 1987.

(i) *Incorporation by reference.* (A) State Order No. 944 for King Industries, Inc. dated April 18, 1986, which establishes and requires reasonably available control technology for the control of volatile organic compounds from this facility.

(B) A letter from the Connecticut Department of Environmental Protection dated February 3, 1987, which states that the effective date of State Order No. 944 is May 28, 1986.

(38) Revisions to the State Implementation Plan were submitted by the Connecticut Department of Environmental Protection (DEP) on April 14, 1987.

(i) *Incorporation by reference.* (A) Letter dated April 14, 1987, from the Connecticut Department of Environmental Protection submitting revisions to the State Implementation Plan for EPA approval.

(B) Letter dated April 1, 1987, from the Secretary of State of Connecticut to EPA.

(C) Section 22a–174–20(x) of Connecticut's Regulations for the Abatement of Air Pollution titled, ''Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical & Polymer Manufacturing Equipment,'' effective April 1, 1987.

(D) Section 22a–174–20(y) of Connecticut's Regulations for the Abatement of Air Pollution titled, ''Manufacture of Polystyrene Resins,'' effective April 1, 1987.

(E) Amendments to subsection 22a–174–20(bb) of Connecticut's Regulations for the Abatement of Air Pollution titled, ''Compliance Methods,'' effective April 1, 1987.

(ii) *Additional material.* (A) Letter from the Connecticut DEP dated July 3, 1986, committing the Connecticut DEP to use only EPA approved test methods when requiring the testing of sources emitting volatile organic compound emissions.

(B) Letter from the Connecticut DEP dated May 29, 1987, certifying that there are no polypropylene or high-density polyethylene manufacturers in the State of Connecticut.

(39) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 24, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated August 24, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8007 for Belding Corticelli Thread Company dated July 13, 1987.

(40) [Reserved]

(41) Revision to the Connecticut State Implementation Plan submitted by the Commissioner of the Department of Environmental Protection on February 3, 1987.

(i) *Incorporation by reference.* (A) A letter from the Connecticut Department of Environmental Protection dated February 3, 1987, which states that the effective date of State Order No. 943, approved previously, for Connecticut Charcoal Co. is May 28, 1986.

(42) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 27, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated October 27, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8013 and attached Compliance Timetable for Raymark Industries, Incorporated in Stratford, Connecticut effective on September 24, 1987.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(43) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 5, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 5, 1988, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8012 and attached Compliance Timetable, Appendix A (allowable limits on small, uncontrolled vents), and Appendix B (fugitive leak detection program) for American Cyanamid Company in Wallingford, Connecticut. State Order No. 8012 was effective on January 6, 1988.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(44) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 31, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated August 31, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8008 and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Spongex International, Ltd. in Shelton, Connecticut. State Order No. 8008 was effective on August 21, 1987.

(ii) *Additional materials.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably

available control technology determination imposed on the facility.

(45) [Reserved]

(46) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 26, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated July 26, 1988, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8023 and attached Compliance Timetable for New Departure Hyatt, Division of General Motors Corporation in Bristol, Connecticut. State Order No. 8023 was effective on July 8, 1988.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(47) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 5, 1987.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated November 5, 1987, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8001 and attached Compliance Timetable for Frismar, Incorporated in Clinton, Connecticut. State Order No. 8001 was effective on October 20, 1987.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the alternative reasonably available control technology determination imposed on the facility.

(48) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 5, 1988.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 5, 1988, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8011 and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Dow Chemical, U.S.A. in Gales Ferry, Connecticut. State Order No. 8011 was effective on October 27, 1988.

(C) State Order No. 8011, which was approved in paragraph (c)(48)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(C).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonable available control technology determination imposed on the facility.

(49) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 11, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 11, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8010 and attached Compliance Timetable for Stanadyne, Incorporated in Windsor, Connecticut. State Order No. 8018 was effective on January 3, 1989.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(50) Revisions to federally approved section 22a-174-20(a) of the Regulations of Connecticut State Agencies, submitted on January 27, 1989, by the Department of Environmental Protection, limiting the volatility of gasoline from May 1 through September 15, beginning 1989 and continuing every year thereafter, including any waivers to such limitations that Connecticut may grant. In 1989, the control period will begin on June 30.

(51) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection (DEP) on April 7, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut DEP dated April 7, 1989, submitting a revision to

the Connecticut State Implementation Plan.

(B) State Order No. 8014 and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in East Hartford, Connecticut. State Order No. 8014 was effective on March 22, 1989.

(C) State Order No. 8027 and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in North Haven, Connecticut. State Order No. 8027 was effective on March 31, 1989.

(D) State Order No. 8014, which was approved in paragraph (c)(51)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(D).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Pratt and Whitney's East Hartford facility.

(B) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Pratt and Whitney's North Haven facility.

(52) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 7 and August 30, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 7, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8021 and attached Compliance Timetable, and Appendix A (allowable limits on small, uncontrolled vents and allowable outlet gas temperatures for surface condensers) for Pfizer, Incorporated in Groton, Connecticut. State Order No. 8021, Compliance Timetable and Appendix A were effective on December 2, 1988.

(C) Letter from the Connecticut Department of Environmental Protection dated August 30, 1989, and reorganized Appendix C (fugitive leak detection program) and Appendix D (operation and maintenance program for pollution abatement equipment) to State Order No. 8021. Appendices C and D were effective on December 2, 1988.

(D) State Order No. 8021, which was approved in paragraph (c)(52)(i)(B), and appendices C and D to State Order No. 8021, which were approved in paragraph (c)(52)(C), are removed without replacement; see paragraph (c)(115)(i)(E).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(53) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 8, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated September 8, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8009 and attached Compliance Timetable, Appendix A, Appendix B, and Appendix C for Uniroyal Chemical Company, Inc. in Naugatuck, Connecticut. State Order No. 8009 was effective on September 5, 1989.

(C) State Order No. 8009, which was approved in paragraph (c)(53)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(F).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut Department of Environmental Protection providing a complete description of the reasonably available control technology determination imposed on the facility.

(54) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 22, 1989.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 22, 1989, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8029, attached Compliance Timetable, and Tables A through I for Hamilton Standard Division of United Technologies Corporation in Windsor Locks, Connecticut.

State Order No. 8029 was effective on November 29, 1989.

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on Hamilton Standard.

(55) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 10, 1990.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 10, 1990, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8032 and attached Compliance Timetable for the Heminway & Bartlett Manufacturing Company in Watertown, Connecticut. State Order No. 8032 was effective on November 29, 1989.

(C) State Order No. 8032, which was approved in paragraph (c)(55)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(G).

(ii) *Additional material.* (A) Technical Support Document prepared by the Connecticut DEP providing a complete description of the reasonably available control technology determination imposed on The Heminway & Bartlett Manufacturing Company.

(56) Revisions of the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 19, 1989, July 28, 1989, and January 26, 1990 (with attached letter of November 28, 1989).

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated January 19, 1989, July 28, 1989, and January 26, 1990, (with attached letter of November 28, 1989) submitting revisions to the Connecticut State Implementation Plan.

(B) Section 22a–174–1 of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled ''Definitions,'' effective in the State of Connecticut on October 3, 1989.

(C) Subsection 22a–174–3(k) of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled ''Requirements for the Prevention of Significant Deterioration (PSD) Program,'' effective in the State of Connecticut on October 3, 1989.

(D) Section 22a–174–2, subsections 22a–174–3(a) through (j) and (l), subsection 22a–174–8(c), subsection 22a–174–20(ee), and subsection 22a–174–4(d) of the Regulations of the Connecticut State Agencies Concerning Abatement of Air Pollution entitled ''Permits to Construct and Permits to Operate Stationary Sources or Modifications,'' effective in the State of Connecticut on February 1, 1989.

(E) Connecticut's Ambient Impact Analysis Guideline dated July 1989 as revised by letter on January 26, 1990.

(ii) *Additional materials.* (A) State Implementation Plan narrative entitled ''New Source Review.''

(B) Letter from the Connecticut Department of Environmental Protection regarding implementation of BACT.

(C) Nonregulatory portions of the State Submittal.

(57) [Reserved]

(58) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 9, 1989, and September 12, 1991.

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated November 9, 1989, and September 12, 1991, submitting revisions to the Connecticut State Implementation Plan.

(B) Section 22a–174–20 of the Regulations of the Connecticut Department of Environmental Protection Concerning Abatement of Air Pollution, effective October 31, 1989, except for the last sentence of 22a–174–20(aa)(7).

(59) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 24 and April 23, 1992.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated April 14, 1992, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 1073B and attached compliance timetable for the Stone Connecticut Paperboard Corporation of Uncasville, CT. State Order

No. 1073B was effective on February 14, 1992.

(C) Letter from the Connecticut Department of Environmental Protection dated March 24, 1992, submitting a revision to the Connecticut State Implementation Plan.

(D) State Order No. 7016A and attached compliance timetable for the Hartford Hospital of Hartford, CT. State Order No. 7016A was effective on February 5, 1992.

(ii) *Additional materials.* (A) Memorandum dated August 17, 1989, approving the modeling analysis for the Stone Container Co.

(B) Modeling Study dated August 9, 1989, for the Stone Container Co.

(C) State Order No 1073A, dated June 12, 1990, and effective July 9, 1990.

(D) Memorandum dated January 3, 1990, approving the modeling analysis for the Hartford Hospital.

(E) Modeling study dated December 28, 1989, for the Hartford Hospital.

(60) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 16, 1996.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 16, 1996, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8010 dated October 25, 1989 for Sikorsky Aircraft Corporation, effective on January 29, 1990, as well as Addendum A and Addendum B to Order No. 8010, effective on February 7, 1996 and September 29, 1995, respectively. The State order and two addenda define and impose RACT on certain VOC emissions at Sikorsky Aircraft Corporation in Stratford, Connecticut

(C) State Order No. 8010, which was approved in paragraph (c)(60)(i)(B), is removed without replacement; see paragraph (c)(115)(i)(H).

(61) Revisions to the State Implemetation Plan submitted by the Connecticut Department of Environmental Protection on February 28, 1991.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated February 28, 1991, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 7017 and attached compliance timetable for the Connecticut Light and Power Company of Montville, Connecticut. State Order No. 7017 was effective on February 25, 1991.

(ii) *Additional materials.* (A) Memorandum dated September 14, 1990, approving the modeling analysis for Connecticut Light and Power.

(B) Letter dated April 23, 1991, confirming that the revised configuration approved by State Order No. 7017 will not lead to violations.

(C) Modeling Study dated January 26, 1990, for Connecticut Light and Power.

(62) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 12, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection, dated January 12, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Section 22a–174–30 of the Connecticut Regulations for the Abatement of Air Pollution, entitled ''Dispensing of Gasoline/Stage II Vapor Recovery,'' dated November 1992.

(C) Letter from the Connecticut Secretary of State's office indicating that the regulation entitled ''Dispensing of Gasoline/Stage II Vapor Recovery'' became effective on November 24, 1992.

(ii) *Additional materials.* (A) Nonregulatory portions of the submittal.

(B) Connecticut Department of Environmental Protection document entitled ''Narrative of SIP Revision: Stage II Vapor Recovery,'' dated January 1993.

(63) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 11, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 11, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Connecticut State Order No 7019 dated March 11, 1993, and effective in the State of Connecticut on February 19, 1993.

(ii) *Additional materials.* (A) Air Quality Modeling Analysis to Demonstrate SO_2 CAAQS/NAAQS Compliance at the Hamilton Standard Division of United Technologies Corporation Windsor Locks CT; June 1991.

(64) [Reserved]

(65) Revisions to the State Implementation Plan establishing a Small Business Stationary Source Technical and Environmental Compliance Assistance Program were submitted by the Connecticut Department of Environmental Protection on January 12 and August 9, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 12, 1993, submitting a revision to the Connecticut State Implementation Plan.

(B) Revisions to the State Implementation Plan for the Small Business Stationary Source Technical and Environmental Compliance Assistance Program dated January 1993 and effective on January 12, 1993.

(C) Letter from the Connecticut Department of Environmental Protection dated August 9, 1993, clarifying and updating the January 12, 1993, submittal.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated April 6, 1994, clarifying the January 12, 1993, submittal.

(B) Other non-regulatory portions of the State's submittal.

(66) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 12, 1993.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 12, 1993 submitting a revision to the Connecticut State Implementation Plan.

(B) Section 22a–174–4(c)(1) of Connecticut Regulations for the Abatement of Air Pollution, under the section entitled ''Recordkeeping and Reporting.'' Section 22a–174–4(c)(1) was previously numbered as 19–508–4(c)(1) in Connecticut's SIP. 19–508–4(c)(1) in Connecticut's SIP. 19–508–4 became effective in the State of Connecticut on October 31, 1977. Connecticut developed an emission statement program using the existing regulatory authority given by section 22a–174–4(c)(1) under the section entitled ''Reporting and Recordkeeping''.

(ii) *Additional information.* (A) State implementation Plan narrative entitled ''Revision to State Implementation Plan for Air Quality Emission Statements'' which addresses emission statement requirements not discussed specifically in Section 22a–174–4(c)(1).

(B) Nonregulatory portions of the submittal.

(67) [Reserved]

(68) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 24, 1994, May 20, 1994, and March 4, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 24, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Environmental Protection dated May 20, 1994 submitting a supplemental revision to the Connecticut State Implementation Plan.

(C) State Order No. 8073: State of Connecticut vs. City of New Haven (effective September 24, 1993) and attached plan titled ''Remedial Action Plan for Prevention of Airborne Particulate Matter and Fugitive Discharge of Visible Emissions in the Alabama Street/East Shore Parkway Area of New Haven.''

(D) State Order No. 8074: State of Connecticut vs. Waterfront Enterprises, Inc. (effective November 5, 1993) and attached plan titled ''Proposed Operation Plan in Response to Unilateral Order (September 20, 1993).''

(E) State Order No. 8075: State of Connecticut vs. Laydon Construction, (effective September 21, 1993) and attached plan titled ''Plan for Control of Fugitive Emissions of PM10 (September 21, 1993).''

(F) State Order No. 8076: State of Connecticut vs. United Illuminating Company (effective December 2, 1993) and attached plan titled ''Remediation Plan for Fugitive Emissions: Alabama Street and Connecticut Avenue, New Haven, Connecticut (November 19, 1993).''

(G) State Order No. 8076c: State of Connecticut vs. M. J. Metals, Inc. (effective June 18, 1993).

(H) State Order No. 8078: State of Connecticut vs. New Haven Terminal, Inc. (effective November 15, 1993) and attached plan titled ''Fugitive Dust Control Plan (Revised January 19, 1994).''

(I) State Order No. 8079: State of Connecticut vs. Yankee Gas Services Company (effective September 24, 1993) and attached plan titled ''Revised Compliance Plan for Consent Order No. 8079 (August 31, 1993).''

(J) Letter from the Connecticut Department of Environmental Protection dated March 4, 1994 (received March 16, 1995) submitting two amendments to the Regulations of Connecticut State Agencies concerning abatement of air pollution: amended Sections 22a–174–24(f) and –24(g) ''Connecticut primary and secondary ambient air quality standards for particulate matter'' and amended Sections 22a–174–6(a) and –6(b) '' 'Air Pollution' emergency episode procedures'' (both effective July 7, 1993).

(K) Amended Regulations of Connecticut State Agencies: amended Sections 22a–174–24(f) and –24(g) ''Connecticut primary and secondary ambient air quality standards for particulate matter'' and amended Sections 22a–174–6(a) and –6(b) '' 'Air Pollution' emergency episode procedures'' (both effective July 7, 1993).

(ii) *Additional materials.* (A) An attainment plan and demonstration which outlines Connecticut's control strategy and for attainment and maintenance of the PM10 NAAQS, implements and meets RACM and RACT requirements, and provides contingency measures for New Haven.

(B) Nonregulatory portions of the submittal.

(69) Connecticut submitted the Oxygenated Gasoline Program and revisions on January 11, 1993, January 12, 1993, January 14, 1993, and August 1, 1995. This submittal satisfied the requirements of section 211(m) of the Clean Air Act, as amended.

(i) *Incorporation by reference.* (A) Letters dated January 11, 1993 and January 12, 1993 which included the oxygenated gasoline program, Regulations of Connecticut State Agencies (RCSA) Section 22a–174–28, with an effective date of November 2, 1992.

(B) A letter dated January 14, 1993 requesting that the RCSA Section 22a–174–28, as submitted on January 11, 1993 and January 12, 1993, be adopted as part of Connecticut's SIP.

(C) A letter dated August 1, 1995, requesting that a revision to RCSA Section 22a–174–28(a), with an effective date of July 26, 1995, be approved and adopted as part of Connecticut's SIP.

(ii) *Additional materials.* (A) The Technical Support Document for the Redesignation of the Hartford Area as Attainment for Carbon Monoxide submitted on September 30, 1994.

(B) Nonregulatory portions of submittals.

(70) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 13, 1995.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 13, 1995 submitting a revision to the Connecticut State Implementation Plan.

(B) Amended Regulation of Connecticut State Agencies: amended Subsection 22a–174–3(k) ''Abatement of air pollution—New Source Review'' (effective December 2, 1994).

(ii) *Additional materials.* (A) Nonregulatory portions of the submittal.

(71) Revisions to the Connecticut State Implementation Plan (SIP) for carbon monoxide concerning the control of carbon monoxide from mobile sources, dated January 12, 1993, January 14, 1993, April 7, 1994, and August 1, 1995 submitted by the Connecticut Department of Environmental Protection (CT DEP).

(i) *Incorporation by reference.* (A) Letter dated August 1, 1995 which included the amendments and revisions to the Regulation of Connecticut State Agencies (RCSA), Section 22a-174–28(a) regarding the definition for the Southwestern Control Area and that portion of the definition of ''control period'' that applies to the Southwestern Control Area with an effective date of July 26, 1995.

(ii) *Additional materials.* (A) January 12, 1993 and April 7, 1994, VMT forecasts

beginning with the year 1993 and including all subsequent years up to the year of attainment (1995).

(B) January 12, 1993 and April 7, 1994, Carbon Monoxide Attainment Demonstration and Contingency Measures.

(72) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on: May 18, 1995; August 21, 1995; January 17, 1996; January 30, 1996; January 30, 1996; January 30, 1996; January 30, 1996; June 17, 1996; June 20, 1996; June 24, 1996; July 9, 1996; July 11, 1996; February 18, 1997; March 20, 1997; March 24, 1997; March 24, 1997; March 24, 1997; March 24, 1997; March 24, 1997; April 22, 1997; April 22, 1997; May 19, 1997; May 19, 1997; and May 20, 1997.

(i) *Incorporation by reference.* (A) Twenty-four letters from the Connecticut Department of Environmental Protection dated: May 18, 1995; August 21, 1995; January 17, 1996; June 24, 1996; January 30, 1996; January 30, 1996; January 30, 1996; January 30, 1996; June 20, 1996; June 17, 1996; July 11, 1996; July 9, 1996; March 24, 1997; May 19, 1997; March 24, 1997; March 20, 1997; March 24, 1997; February 18, 1997; May 19, 1997; March 24, 1997; March 24, 1997; May 20, 1997; April 22, 1997; and April 22, 1997; submitting revisions to the Connecticut State Implementation Plan.

(B) Connecticut Trading Agreement and Order no. 8092 issued to United Illuminating Company's Station #3 in Bridgeport, effective on May 18, 1995.

(C) Connecticut Trading Agreement and No. 8095 issued to American Ref-Fuel Company of Southeastern Connecticut in Preston, effective on June 2, 1995.

(D) Connecticut Trading Agreement and Order no. 8093 issued to Pfizer, Inc., in Groton, effective on July 19, 1995.

(E) Connecticut Trading Agreement and Order no. 8096 issued to Food Ingredients Company in New Milford, effective on August 25, 1995.

(F) Connecticut Trading Agreement and Order no. 8106 issued to Connecticut Light and Power Company in Middletown, effective on October 10, 1995.

(G) Connecticut Trading Agreement and Order no. 8107 issued to Northeast Nuclear Energy Company in Waterford, effective on October 13, 1995.

(H) Connecticut Trading Agreement and Order no. 8105 issued to Electric Boat Division of General Dynamics in Groton, effective on October 31, 1995.

(I) Connecticut Trading Agreement and Order no. 8100 issued to Bridgeport RESCO Company in Bridgeport, effective on November 2, 1995.

(J) Connecticut Trading Agreement and Order no. 8102 issued to United Illuminating's auxiliary boiler in New Haven, effective on December 15, 1995.

(K) Connecticut Trading Agreement and Order no. 8103 issued to United Illuminating Company's Station #4 in New Haven, effective on February 14, 1996.

(L) Connecticut Trading Agreement and Order no. 8119 issued to the City of Norwich, Department of Public Utilities, effective on March 4, 1996.

(M) Connecticut Trading Agreement and Order no. 8118 issued to South Norwalk Electric Works, South Norwalk, effective on March 19, 1996.

(N) Connecticut Trading Agreement and Order no. 8101 issued to the State of Connecticut Department of Mental Health and Addiction Services, effective on July 16, 1996.

(O) Connecticut Trading Agreement and Order no. 8110 issued to Yale University, effective on July 29, 1996.

(P) Connecticut Trading Agreement and Order no. 8132 issued to Bridgeport Hospital, effective on September 10, 1996.

(Q) Connecticut Trading Agreement and Order no. 1494 issued to Connecticut Light and Power, involving Branford, Cos Cob, Devon, Franklin Drive, Montville, Middletown, South Meadow, Torrington, Tunnel Road, and Norwalk Harbor Stations, effective on October 15, 1996.

(R) Connecticut Trading Agreement and Order no. 8130 issued to the State of Connecticut Department of Public Works, effective on October 18, 1996.

(S) Connecticut Trading Agreement and Order no. 8115 issued to the University of Connecticut in Storrs, effective on November 19, 1996.

(T) Connecticut Trading Agreement and Order no. 8113 issued to Simkins Industries, effective on November 19, 1996.

(U) Connecticut Trading Agreement and Order no. 8135 issued to Bridgeport

Hydraulic Company, effective on December 24, 1996.

(V) Connecticut Trading Agreement and Order no. 8141 issued to the Town of Wallingford Department of Public Utilities, effective on December 27, 1996.

(W) Regulations 22a–174–22 ''Control of Nitrogen Oxides Emissions,'' adopted on January 23, 1997, which establishes reasonably available control technology requirements for major stationary sources of nitrogen oxides.

(X) Connecticut Trading Agreement and Order no. 8123 issued to the Algonquin Gas Transmission Company, effective on April 18, 1997.

(Y) Connecticut Trading Agreement and Order no. 8116 issued to the Connecticut Resource Recovery Authority, effective on April 22, 1997.

(ii) *Additional materials.* (A) Letter, dated June 18, 1996, from Carmine DiBattista, Chief of the Bureau of Air Management for the Connecticut DEP, to Susan Studlien, Deputy Director of the Office of Ecosystem Protection at U.S. EPA, Region I.

(B) SIP narrative materials, dated May 1995, submitted with Connecticut Trading Agreement and Order no. 8092 for United Illuminating Company's Station #3 in New Haven.

(C) SIP narrative materials, dated August 3, 1995, submitted with Connecticut Trading Agreement and Order no. 8095 for American Ref-Fuel Company of Southeastern Connecticut in Preston.

(D) SIP narrative materials, dated December 1995, submitted with Connecticut Trading Agreement and Order no. 8093 issued to Pfizer, Inc., in Groton.

(E) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order no. 8096 issued to Food Ingredients Company in New Milford.

(F) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order no. 8106 issued to Connecticut Light and Power Company in Middletown.

(G) SIP narrative materials, dated November 1995, submitted with Connecticut Trading Agreement and Order no. 8107 issued to Northeast Nuclear Energy Company in Waterford.

(H) SIP narrative materials, dated October 6, 1995, submitted with Connecticut Trading Agreement and Order no. 8105 issued to Electric Boat Division of General Dynamics in Groton.

(I) SIP narrative materials, dated September 29, 1995, submitted with Connecticut Trading Agreement and Order no. 8100 issued to Bridgeport RESCO Company in Bridgeport.

(J) SIP narrative materials, dated December 1995, submitted with Connecticut Trading Agreement and Order no. 8102 issued to United Illuminating's auxiliary boiler in New Haven.

(K) SIP narrative materials, dated March 1996, submitted with Connecticut Trading Agreement and Order no. 8103 issued to United Illuminating Company's Station #4 in Bridgeport.

(L) SIP narrative materials, dated May 31, 1995, submitted with Connecticut Trading Agreement and Order no. 8119 issued to the City of Norwich, Department of Public Utilities.

(M) SIP narrative materials, dated May 31, 1995, submitted with Connecticut Trading Agreement and Order no. 8118 issued to South Norwalk Electric Works, South Norwalk.

(N) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8101 issued to the State of Connecticut Department of Mental Health and Addiction Services.

(O) SIP narrative materials, dated May 1997, submitted with Connecticut Trading Agreement and Order no. 8110 issued to Yale University.

(P) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8132 issued to Bridgeport Hospital.

(Q) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 1494 issued to Connecticut Light and Power, involving Branford, Cos Cob, Devon, Franklin Drive, Montville, Middletown, South Meadow, Torrington, Tunnel Road, and Norwalk Harbor Stations.

(R) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8130 issued to the State of Connecticut Department of Public Works.

(S) SIP narrative materials, dated February 1996, submitted with Connecticut Trading Agreement and Order no. 8115 issued to the University of Connecticut in Storrs.

(T) SIP narrative materials, dated May 1997, submitted with Connecticut Trading Agreement and Order no. 8113 issued to Simkins Industries.

(U) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8135 issued to Bridgeport Hydraulic Company.

(V) SIP narrative materials, dated March 1997, submitted with Connecticut Trading Agreement and Order no. 8141 issued to the Town of Wallingford Department of Public Utilities.

(W) SIP narrative materials, dated April 1997, submitted with Connecticut Trading Agreement and Order no. 8123 issued to the Algonquin Gas Transmission Company.

(X) SIP narrative materials, dated April 1997, submitted with Connecticut Trading Agreement and Order no. 8116 issued to the Connecticut Resource Recovery Authority.

(73) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 3, 1996.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated June 3, 1996, submitting a revision to the Connecticut State Implementation Plan.

(B) State Order No. 8036, dated May 6, 1996, for Risdon Corporation, effective on that date. The State order define and impose alternative RACT on certain VOC emissions at Risdon Corporation in Danbury, Connecticut.

(74) A revision to the Connecticut SIP regarding ozone monitoring. Connecticut will modify its SLAMS and its NAMS monitoring systems to include a PAMS network design and establish monitoring sites. Connecticut's SIP revision satisfies 40 CFR 58.20(f) PAMS requirements.

(i) *Incorporation by reference.* (A) PAMS SIP Commitment Narrative, which incorporates PAMS into the ambient air quality monitoring network of State or Local Air Monitoring Stations (SLAMS) and National Air Monitoring Stations (NAMS).

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated March 2, 1995 submitting a revision to the Connecticut State Implementation Plan.

(75) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 5, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 5, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulations sections 22a–174–20(s), ''Miscellaneous Metal Parts and Products,'' sections 22a–174–20(v), ''Graphic Arts Rotogravures and Flexography,'' sections 22a–174–20(ee), ''Reasonably Available Control Technology for Large Sources,'' adopted and effective on November 18, 1993, which establish reasonably available control technology requirements for major stationary sources of volatile organic compounds.

(76) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 5, 1994.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated January 5, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulation section 22a–174–32, ''Reasonably Available Control Technology for Volatile Organic Compounds,'' adopted and effective on November 18, 1993, which establishes reasonably available control technology requirements for major stationary sources of volatile organic compounds.

(ii) *Additional materials.* (A) Letter from Connecticut dated June 27, 1994 clarifying language in section 22a–174–32(A).

(77) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 30, 1994, and May 8, 1998. This revision is for the purpose of satisfying the rate-of-progress requirement of section 182(b) and the

contingency measure requirements of sections 172(c)(9) and 182(c)(9) of the Clean Air Act, for the Greater Hartford serious ozone nonattainment area, and the Connecticut portion of the NY–NJ–CT severe ozone nonattainment area.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 30, 1994, submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Environmental Protection dated May 8, 1998, submitting a revision to the Connecticut State Implementation Plan.

(78) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 24, 1998.

(i) *Incorporation by reference.* (A) State of Connecticut Regulation of Department of Environmental Protection Section 22a–174–27, Emission Standards for Periodic Motor Vehicle Inspection and Maintenance as revised on March 26, 1998.

(B) State of Connecticut Regulation of Department of Motor Vehicles Concerning Periodic Motor Vehicle Emissions Inspection and Maintenance Section 14–164c as revised on April 7, 1998.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated June 24, 1998 submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from Connecticut Department of Environmental Protection dated November 13, 1998, submitting a revision to the Connecticut State Implementation Plan.

(79) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 7, 1996 and February 18, 1999.

(i) *Incorporation by reference.* (A) Connecticut regulation section 22a–174–36, entitled ''Low Emission Vehicles'' as dated and effective by determination of the Secretary of State on December 23, 1994.

(B) Connecticut regulation section 22a–174–36(g), entitled ''Alternative Means of Compliance via the National Low Emission Vehicle (LEV) Program'' as dated and effective by determination of the Secretary of State on January 29, 1999.

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated February 7, 1996 submitting a revision to the Connecticut State Implementation Plan for the Low Emission Vehicle program.

(B) Letter from the Connecticut Department of Environmental Protection dated February 18, 1999 submitting a revision to the Connecticut State Implementation Plan for the National Low Emission Vehicle program to be a compliance option under the State's Low Emission Vehicle Program.

(80) Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 26, 1999.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated March 26, 1999, submitting a revision to the Connecticut State Implementation Plan.

(B) Regulation section 22a–174–22a, ''The Nitrogen Oxides (NO_X) Budget Program'' adopted on December 15, 1998, and effective on March 3, 1999. As of January 24, 2008, Section 22a–174–22a is superseded and shall have no prospective effect. Violations of Section 22a–174–22a that occur prior to January 24, 2008 shall continue to be subject to enforcement, including on or after January 24, 2008, in accordance with applicable law.

(ii) *Additional materials.* (A) Nonregulatory portions of the submittals.

(81) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on May 12, 1994.

(i) *Incorporation by reference.* (A) ''Clean Fuel Fleet Substitute Plan,'' prepared by the Connecticut Department of Environmental Protection, dated May 12, 1994.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated May 12, 1994 submitting a revision to the Connecticut State Implementation Plan.

(82) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 11, 1997, September 12, 1997, and December 8, 1997.

(i) *Incorporation by reference.* (A) Letters from the Connecticut Department of Environmental Protection dated July 11, 1997, September 12, 1997, and December 8, 1997, submitting revisions to the Connecticut State Implementation Plan.

(B) Trading Agreement and Order Number 8137 issued to AlliedSignal, Inc., and U.S. Army Tank-Automotive and Armaments Command in Stratford, effective on November 19, 1996.

(C) Trading Agreement and Order Number 8138 issued to Connecticut Natural Gas Corporation in Rocky Hill, effective on November 19, 1996.

(D) Trading Agreement and Order Number 8114 issued to Cytec Industries, Inc., in Wallingford, effective on December 20, 1996.

(E) Modification to Trading Agreement and Order Number 8138 issued to Connecticut Natural Gas Corporation effective June 25, 1997.

(F) Modification to Trading Agreement and Order Number 8137 issued to AlliedSignal, Inc., and U.S. Army Tank-Automotive and Armaments Command in Stratford, effective July 8, 1997.

(G) Trading Agreement and Order Number 8094 issued to Ogden Martin Systems of Bristol, Inc., in Bristol, effective on July 23, 1997.

(ii) *Additional materials.* (A) Nonregulatory portions of the submittals.

(B) Policy materials concerning the use of emission credits from New Jersey at Connecticut sources.

(83) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 7, 1999 to discontinue the oxygenated gasoline program in the Connecticut portion of the New York—N. New Jersey—Long Island Area.

(i) *Incorporation by reference.* (A) CTDEP; ''Abatement of Air Pollution: Oxygenated Gasoline,''

State Regulation 22a–174–28.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated October 7, 1999 submitting a revision to the Connecticut State Implementation Plan.

(84) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 15, 1997, April 20, 1998, and September 2, 1999.

(i) *Incorporation by reference.* (A) Section 22a–174–1(97) of the Regulation of the Connecticut State Agencies, definition of the term ''Volatile organic compound'' or ''VOC,'' effective in the State of Connecticut on December 22, 1997.

(B) Section 22a–174–20(b) of the Regulation of the Connecticut State Agencies, entitled ''Loading of gasoline and other volatile organic compounds,'' effective in the State of Connecticut on April 1, 1998.

(C) Section 22a–174–20(l) of the Regulation of the Connecticut State Agencies, entitled ''Metal cleaning,'' effective in the State of Connecticut on August 23, 1996.

(D) Section 22a–174–20(s) of the Regulation of the Connecticut State Agencies, ''Miscellaneous metal parts and products,'' effective in the State of Connecticut on March 1, 1995.

(E) Section 22a–174–32 of the Regulation of the Connecticut State Agencies, entitled ''Reasonably Available Control Technology (RACT) for volatile organic compounds,'' effective in the State of Connecticut on August 27, 1999.

(ii) *Additional materials.* (A) Letters from the Connecticut Department of Environmental Protection dated April 15, 1997, April 20, 1998, and September 2, 1999 submitting revisions to the Connecticut State Implementation Plan.

(85) [Reserved]

(86) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 30, 1999.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Section 22a–174–22b, State of Connecticut Regulation of Department of Environmental Protection Concerning The Post-2002 Nitrogen Oxides (NO_X) Budget Program, which became effective on September 29, 1999.

(ii) *Additional materials.* (A) Letter from Connecticut Department of Environmental Protection dated September 30, 1999 submitting Regulations of Connecticut State Agencies, Section 22a–174–22b and associated administrative materials as a revision to the Connecticut State Implementation Plan.

(B) The SIP narrative ''Connecticut State Implementation Plan Revision to Implement the NO_X SIP Call,'' dated September 30, 1999.

(C) Letter from Connecticut Department of Environmental Protection dated August 1, 2002.

(D) The SIP narrative ''Connecticut State Implementation Plan Revision to Revise the State's NO_X Emissions Budget,'' dated July 22, 2002.

(iii) Section 22a–174–22b, State of Connecticut Regulation of Department of Environmental Protection Concerning The Post-2002 Nitrogen Oxides (NO_X) Budget Program, is fully enforceable up to and including April 30, 2010. As of May 1, 2010, Section 22a–174–22b is superseded and shall have no prospective effect. Violations of Section 22a–174–22b that occur prior to May 1, 2010 shall be subject to enforcement, including on or after May 1, 2010, in accordance with applicable law.

(87) [Reserved]

(88) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on May 19, 2000.

(i) *Incorporation by reference.* (A) Connecticut Trading Agreement and Order No. 8177 issued to Wisvest Bridgeport Harbor's Unit No. 3 in Bridgeport on May 31, 2000.

(B) Connecticut Trading Agreement and Order No. 8187 issued to Wisvest Bridgeport Harbor's Unit No. 2 on January 12, 2000.

(C) Connecticut Trading Agreement and Order No. 8094, Modification No. 2, issued to Ogden Martin Systems of Bristol, Inc. on May 22, 2000.

(D) Connecticut Trading Agreement and Order No. 8095, Modification No. 2, issued to American Ref-Fuel Company of Southeastern Connecticut in Preston on May 22, 2000.

(E) Connecticut Trading Agreement and Order No. 8100, Modification No. 2, issued to Bridgeport Resco Company, Limited Partnership in Bridgeport on May 22, 2000.

(F) Connecticut Trading Agreement and Order No. 8116, Modification No. 2, issued to the Connecticut Resources Recovery Authority in Hartford on May 22, 2000.

(G) Connecticut Trading Agreement and Order No. 8178 issued to Wisvest's New Haven Harbor's auxiliary boiler in New Haven on May 22, 2000.

(H) Connecticut Trading Agreement and Order No. 8179 issued to Wisvest's Bridgeport Harbor's Unit No. 4 on May 22, 2000.

(I) Connecticut Trading Agreement and Order No. 8176, issued to Wisvest's New Haven Harbor Station's Unit No. 1 in New Haven on May 31, 2000.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated May 19, 2000, submitting a revision to the Connecticut State Implementation Plan.

(B) SIP narrative materials, dated December 1999, submitted with Connecticut Trading Agreement and Order Nos. 8176, 8177, 8178, 8179, and 8187.

(89) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 16, 1999.

(i) *Incorporation by reference.* (A) Subsection (b) of Section 14–164c-11a of the Regulations of Connecticut State Agencies Concerning Emissions Repairs Expenditure Requirement to Receive Waiver, adopted and effective June 24, 1999.

(ii) *Additional materials.* (A) Letter from Connecticut Department of Environmental Protection dated November 19, 1999 submitting a revision to the Connecticut State Implementation Plan.

(B) Narrative portion of the Revision to State Implementation Plan for Enhanced Motor Vehicle Inspection and Maintenance Program, dated October 7, 1999.

(90) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 15, 2001, to incorporate the nitrogen oxide limits and related regulatory provisions of regulation 22a–174–38, Municipal Waste Combustors.

(i) *Incorporation by reference.* (A) The nitrogen oxide emission limits and related regulatory provisions of State of Connecticut Regulation of Department of Environmental Protection Section 22a–174–38, Municipal Waste Combustors effective October 26, 2000, included in sections 22a–174–38 (a), (b), (c), (d), (i), (j), (k), (l), and (m).

(B) Section 22a–174–38, subsections (a), (c), (d), (i), (j), (k), and (l) were revised as published in the Connecticut Law Journal, volume 78, no. 17, on October 25, 2016. Subsection (d) is removed from the SIP without replacement. See paragraph (116)(i)(A).

(ii) *Additional material.* (A) Letter from the Connecticut Department of Environmental Protection dated October 15, 2001, submitting a revision to the Connecticut State Implementation Plan.

(91) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on June 14, 2002.

(i) *Incorporation by reference.* (A) Connecticut's amendments to Section 22a–174–1, *Definitions* except for the following sections: (4), (18), (20), (29), (44), (45), (60), (111), (112) and, (117). These regulations are effective in the state of Connecticut on March 15, 2002.

(B) Connecticut's new Section 22a–174–2a, *Procedural Requirements for New Source Review and Title V Permitting* except for the following sections: (a)(1) through (6); (b)(1) through (4); introduction to (b)(5); (b)(5)(D), (F) and, the last sentence of (G); (b)(9); (c)(2); clause after first comma '' * * * or order pursuant to section 22a–174–33(d) of regulations of Connecticut State Agency * * * '' in the introduction to (c)(6); (c)(6)(B) and (C); clause after first comma '' * * * or order pursuant to section 22a–174–33(d) of Regulations of Connecticut State Agencies * * * '' in (c)(9); reference to ''Title V'' in title of (d); (d)(4)(A) through (D); (d)(7)(A) through (D); (d)(8)(A) and (B); reference to ''Title V'' in title of (e); (e)(2)(A) and (B); (e)(3)(D); (e)(5)(A) through (F); reference to ''Title V permit'' in (e)(6); reference to ''22a–174–33'' in first clause of introduction to (f)(2); (f)(2)(F); (f)(5); (f)(6); (g)(1) and (2); (h)(1) through (3) and; (i)(1) through (3). These regulations are effective in the state of Connecticut on March 15, 2002.

(C) Connecticut's new Section 22a–174–3a, *Permit to Construct and Operate Stationary Sources* except for the following sections: (a)(1)(C); (c)(1)(H); (d)(3)(J) and (M); references to ''Dioxin,'' ''PCDDs'' and, ''PCDFs'' in Table 3a(i)–1 of (i)(1) and; (m)(1) through (8). These regulations are effective in the state of Connecticut on March 15, 2002.

(ii) *Additional materials.* (A) Letter from the Connecticut Department of Environmental Protection dated June 14, 2002 submitting a revision to the Connecticut State Implementation Plan.

(92)–(94) [Reserved]

(95) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 1, 2004 and April 4, 2006.

(i) *Incorporation by reference.* (A) Section 22a–174–30 of the Connecticut Regulations for the Abatement of Air Pollution, entitled ''Dispensing of Gasoline/Stage I and Stage II Vapor Recovery,'' effective in the State of Connecticut on May 10, 2004, with the exception of subsection (c)(5), which Connecticut did not submit as part of the SIP revision.

(B) Section 22a–174–3b of the Connecticut Regulations for the Abatement of Air Pollution, entitled ''Exemptions from Permitting for Construction and Operation of External Combustion Units, Automotive Refinishing Operations, Emergency Engines, Nonmettalic Mineral Processing Equipment and Surface Coating Operations,'' effective in the State of Connecticut on April 4, 2006, except for the following subsections which Connecticut did not submit as part of the SIP revision: (a)(1), (5), (6), (7), (10), (11), (12), (15), (17); (b)(1) for an external combustion unit, nonmetallic mineral processing equipment, an emergency engine or a surface coating operation; (b)(2) for an external combustion unit, nonmetallic mineral processing equipment, an emergency engine or a surface coating operation; (c) External combustion

unit; (e) Emergency engine; (f) Nonmetallic mineral processing equipment; (g) Surface coating operation; and (h) Fuel sulfur content.

(C) [Reserved]

(D) Regulation 22a–174–30, which was approved in paragraph (c)(95)(i)(A), is removed and replaced by Regulation 22a–174–30a, see paragraph (c)(117)(i)(B).

(ii) *Additional materials.* (A) Pressure Vacuum Vent Cap Test Procedures

(B) Table 1 showing the emission reductions resulting from the measures Connecticut adopted to meet the shortfall identified in the Connecticut one-hour ozone attainment demonstration.

(C) Nonregulatory portions of the submittal.

(96) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 30, 2002, and October 17, 2002.

(i) *Incorporation by reference.* (A) Consent Order No. 8229A issued by the Connecticut Department of Environmental Protection to Hitchcock Chair Company, Ltd., on April 15, 2002.

(B) Consent Order No. 8190 issued by the Connecticut Department of Environmental Protection to Kimberly Clark Corporation on April 23, 2002.

(C) Consent Order No. 8200 issued by the Connecticut Department of Environmental Protection to Watson Laboratories, Inc., on October 3, 2002.

(D) Consent Order No. 8237 issued by the Connecticut Department of Environmental Protection to Ross & Roberts, Inc., on October 4, 2002.

(E) State Order No. 8200, which was approved in paragraph (c)(96)(i)(C), is removed without replacement; see paragraph (c)(115)(i)(I).

(ii) *Additional materials.* (A) Nonregulatory portions of the submittal.

(97) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on April 26, 2007 and September 12, 2007.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) section 22a–174–22c entitled ''The Clean Air Interstate Rule (CAIR) Nitrogen Oxides (NO_X) Ozone Season Trading Program,'' effective in the State of Connecticut on September 4, 2007.

(B) Section 22a–174–22c, subsection (g)(3) is removed from the SIP without replacement effective December 22, 2016. See paragraph (116)(i)(B).

(98) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 19, 2007.

(i) *Incorporation by reference.* (A)(*1*) Connecticut Department of Environmental Protection Regulations entitled ''Emission standards and on-board diagnostic II test requirements for periodic motor vehicle inspection and maintenance'' at section 22a–174–27 (effective in the State of Connecticut on August 25, 2004).

(*2*) In revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 22, 2010 section 22a–174–27 (e) was repealed by the State of Connecticut effective August 10, 2009. Section 22a–174–27 (e), which was approved in paragraph (c)(98)(i)(A)(*1*), is removed from the SIP without replacement; see paragraph (c)(105)(i)(B) of this section.

(B) Connecticut Department of Motor Vehicles Regulation entitled ''Periodic Motor Vehicle Emissions Inspection and Maintenance'' at section 14–164c–1a to Section 14–164c–18a (effective in the State of Connecticut on May 28, 2004).

(99) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 9, 2011.

(i) *Incorporation by reference.* (A) The additions of subsections (21) and (49) to Section 22a–174–1, effective January 28, 2011.

(B) The revisions to Sections 22a–174–3a(a)(1)(H) through (J), Sections 22a–174–3a(d)(3)(H), Sections 22a–174–3a(j)(1)(E) through (I), Sections 22a–174–3a(k)(1) through (k)(2), and Sections 22a–174–3a(k)(4), effective January 28, 2011.

(100) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 1, 2008 and January 8, 2009.

(i) *Incorporation by reference.* (A) State of Connecticut Regulation, Section 22a–174–20(k), Restrictions on VOC Emissions from Cutback and Emulsified Asphalt (excluding the text

that appears in brackets), effective in the state of Connecticut on January 1, 2009.

(B) A letter from Barbara Sladeck, RLS Assistant Coordinator, Office of the Secretary of the State, State of Connecticut, to Hon. Gina McCarthy, Commissioner, Department of Environmental Protection, dated July 26, 2007, stating that the effective date of the Amendment of Section 22a–174–20(l), Metal Cleaning, and Adoption of Section 22a–174–41, pertaining to Architectural and Industrial Maintenance Products, is July 26, 2007.

(C) State of Connecticut Regulation, Section 22a–174–20(l), Metal Cleaning, effective in the state of Connecticut on July 26, 2007, revisions to the following provisions (including the text that appears in underline and excluding the text that appears in brackets): Sections 22a–174–20(l)(1)(A) through (C) and(J) through (L), Sections 22–a–174–20(l)(3), (A) through (D), (F) through (H), and (J) through (L), Sections 22a–174–20(l)(5) introductory text, (B), (E), and (M), and Section 22a–174–20(l)(6); and addition of Sections 22a–174–20(l)(7) through (9).

(D) State of Connecticut Regulation, Section 22a–174–41, Architectural and Industrial Maintenance Products, effective in the state of Connecticut on July 26, 2007.

(101) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on July 20, 2007, consisting of orders establishing reasonably available control technology for volatile organic compound emissions for Sumitomo Bakelite North America, Cyro Industries, and Curtis Packaging.

(i) *Incorporation by reference.* (A) State of Connecticut vs. Sumitomo Bakelite North America, Inc., Consent Order No. 8245, issued as a final order on October 11, 2006.

(B) State of Connecticut and Cyro Industries, Consent Order No. 8268, issued as a final order on February 28, 2007.

(C) State of Connecticut vs. Curtis Packaging Corporation, Consent Order No. 8270, issued as a final order on May 1, 2007.

(102) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 18, 2008, April 29, 2010, and November 21, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) Section 22a–174–20, as published in the Connecticut Law Journal on May 18, 2010, effective April 6, 2010:

(*1*) The amendment of subdivision (f)(9);

(*2*) The withdrawal of subsection (g);

(*3*) The amendment of subdivisions (l)(1) and (l)(2);

(*4*) The amendment of subsections (p) Metal furniture coatings, (q) Paper, film, and foil coating;

(*5*) The amendment of subparagraph (s)(2)(B);

(*6*) The amendment of subsection (ee) Reasonably available control technology for large sources;

(*7*) The addition of subsection (ff) Flexible package printing, with the exception of the phrases ''or other method approved by the commissioner'' in subparagraph (ff)(1)(K) and ''or alternative method as approved by the commissioner'' in clause (ff)(5)(B)(vi);

(*8*) The addition of subsection (gg) Offset lithographic printing and letterpress printing, with the exception of the phrases ''or other method approved by the commissioner'' in subparagraph (gg)(1)(O) and ''or alternative method as approved by the commissioner'' in clause (gg)(7)(B)(vi);

(*9*) The addition of subsection (hh) Large appliance coatings, with the exception of the phrases ''or other method approved by the commissioner'' in subparagraph (hh)(1)(CC) and ''or alternative method as approved by the commissioner'' in clause (hh)(7)(B)(vi);

(*10*) The addition of (ii) Industrial solvent cleaning, with the exception of the phrases ''or other method approved by the commissioner'' in subparagraph (ii)(1)(I) and ''or alternative method as approved by the commissioner'' in clause (ii)(6)(B)(vi); and

(*11*) The addition of (jj) Spray application equipment cleaning, with the exception of the phrase ''or other method approved by the commissioner'' in subparagraph (jj)(1)(H), the exception of subparagraph (jj)(3)(D), and the exception of the phrase ''or alternative method as approved by the commissioner'' in clause (JJ)(6)(B)(vii).

(B) Regulations of Connecticut State Agencies (RCSA) Section 22a–174–20, as published in the Connecticut Law Journal on December 4, 2012, effective October 31, 2012:

(*1*) The amendment of subsection(s) Miscellaneous metal parts and products;

(*2*) The amendment of subdivisions (aa)(1), (cc)(2), and (cc)(3);

(*3*) The amendment of subparagraph (ii)(3)(A); and

(*4*) The addition of subdivision (kk) Pleasure craft coatings.

(C) Regulations of Connecticut State Agencies (RCSA) Section 22a–174–40 entitled ''Consumer Products,'' with the exception of subdivisions (4) through (7) in subsection (c) and the exception of subparagraphs (C) and (D) in subdivision (f)(2), effective July 26, 2007.

(D) Regulations of Connecticut State Agencies (RCSA) section 22a–174–44, entitled ''Adhesives and Sealants,'' effective October 3, 2008.

(103) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on November 18, 2009, and Connecticut Department of Energy and Environmental Protection on March 12, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Department of Environmental Protection Section 22a–174, effective December 28, 2000; as published in the Connecticut Law Journal on January 23, 2001.

(*1*) Section 22a–174–19a, ''Control of sulfur dioxide emissions from power plants and other large stationary sources of air pollution,'' with the following exceptions which Connecticut did not submit as part of the SIP revision because they are not applicable to the Connecticut Alternative to Best Available Retrofit Technology (BART) program:

(*i*) Section 22a–174–19a(a)(5);

(*ii*) Section 22a–174–19a(a)(8);

(*iii*) Section 22a–174–19a(a)(11);

(*iv*) In Section 22a–174–19a(a)(13); the sentence ''Early reduction credits shall qualify as SO_2 DERCs.'';

(*v*) Section 22a–174–19a(d);

(*vi*) Section 22a–174–19a(e)(4);

(*vii*) Section 22a–174–19a(f) through 19a(h); and

(*viii*) In Section 22a–174–19a(i)(2), the reference to ''or (e)(4).''

(*2*) Section 22a–174–19a(c) which was approved in paragraph (c)(103)(i)(A)(1), is removed without replacement; see paragraph (c)(111)(i)(B).

(*3*) Section 22a–174–22, ''Control of nitrogen oxide emissions,'' subsection (e)(3).

(B) Connecticut General Statute, Title 16a ''Planning and Energy Policy,'' Chapter 296 ''Operation of Fuel Supply Business,'' Section 16a–21a, ''Sulfur content of home heating oil and off-road diesel fuel. Suspension of requirements for emergency,'' effective June 2, 2008, as published in the State of Connecticut General Statutes, Revision of 1958, Revised to 2009.

(C) Connecticut General Statute Section16a–21a, which was approved in paragraph (c)(103)(i)(B) of this section, is removed and replaced by Connecticut General Statute 16a–21a, see paragraph (c)(118)(i)(A) of this section.

(ii) *Additional materials.* (A) The Connecticut Department of Environmental Protection document, ''Connecticut Regional Haze SIP Revision, Final, November 2009.''

(B) The Connecticut Department of Energy and Environmental Protection letter ''Clarification of Connecticut's 2008 $PM_{2.5}$ Attainment Demonstration,'' dated March 12, 2012, signed by Anne Gobin.

(C) The Connecticut Department of Energy and Environmental Protection letter ''Regional Haze State Implementation Plan,'' dated February 24, 2012, signed by Anne Gobin.

(D) The Connecticut Department of Energy and Environmental Protection letter ''Withdrawal of Request for Parallel Processing,'' dated November 23, 2012, signed by Anne R. Gobin.

(104) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 1, 2004.

(i) *Incorporation by reference.* (A) Letter from the Connecticut Department of Environmental Protection dated December 1, 2004 submitting a revision to the Connecticut State Implementation Plan.

(B) Regulations of Connecticut State Agencies, Section 22a–174, Abatement

of Air Pollution Regulations, amended April 1, 2004:

(*1*) Section 22a–174–4 ''Source monitoring, recordkeeping and reporting.''

(*2*) Section 22a–174–7 ''Air pollution control equipment and monitoring equipment operation.''

(*3*) Section 22a–174–18 ''Control of particulate matter and visible emissions,'' with the exception of the phrase ''or malfunction'' in Section 22a–174–18(j)(1) and all of Section 22a–174–18(j)(2), which CT DEEP withdrew from the SIP submittal.

(ii) *Additional materials.* (A) Letter from CT DEEP dated January 14, 2013, entitled ''Information to Support EPA's Approval of Connecticut's Requirements for Opacity.''

(B) Letter from CT DEEP dated July 8, 2013, withdrawing from CT DEEP's December 1, 2004 SIP revision the phrase ''and malfunction'' from Subsection (j)(1) of RCSA Section 22a–174–18.

(C) Letter from CT DEEP dated March 27, 2014, withdrawing from CT DEEP's December 1, 2004 SIP revision Section 22a–174–18(j)(2).

(105) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on January 22, 2010.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies (RCSA) section 22a–174–36b entitled ''Low Emission Vehicles II Program,''

(*1*) Regulations of Connecticut State Agencies (RCSA) section 22a–174–36b entitled ''Low Emission Vehicles II Program,'' effective December 22, 2005, revisions to the following provisions (including the text that appears in underline): Sections 22a–174–36b (a), (b), (d), (f) through (j), (l), (m), (n), and (o).

(*2*) Regulations of Connecticut State Agencies (RCSA) section 22a–174–36b entitled ''Low Emission Vehicles II Program,'' effective August 10, 2009, revisions to the following provisions: Sections 22a–174–36b (c), (e), and (k), as published in the Connecticut Law Journal on September 8, 2009.

(B) Regulations of Connecticut State Agencies (RCSA) section 22a–174–27 entitled ''Emission standards and onboard diagnostic II test requirements for periodic motor vehicle inspection and maintenance,'' effective August 10, 2009, revisions to Section 22a–174–27 (b), as published in the Connecticut Law Journal on September 8, 2009.

(106) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 22, 2014.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–1(10) and (88), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(B) Regulations of Connecticut State Agencies Section 22a–174–3a(k)(5), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(C) Regulations of Connecticut State Agencies Section 22a–174–24, ''Connecticut primary and secondary ambient air quality standards,'' with the exceptions of subsections (a), (c), (g), (j), and (m), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(D) Regulations of Connecticut State Agencies (RCSA) Section 22a–174–28 (a)(5), as published in the Connecticut Law Journal on July 1, 2014, effective April 15, 2014.

(107) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 27, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–2a(b)(5) introductory text and Section 22a–174–2a(b)(5)(E), as published in the Connecticut Law Journal on October 23, 2012, effective September 10, 2012.

(B) Regulations of Connecticut State Agencies Section 22a–174–2a(b)(6), as published in the Connecticut Law Journal on October 23, 2012, effective September 10, 2012.

(108) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 9, 2012.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–1(62), as published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(B) Regulations of Connecticut State Agencies Section 22a–174–3a(i), Table 3a(i)–1, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(C) Regulations of Connecticut State Agencies revisions to Section 22a–174–3a(k), Table 3a(k)–1, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(D) Regulations of Connecticut State Agencies revisions to Section 22a–174–3a(k), Table 3a(k)–2, published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(E) Regulations of Connecticut State Agencies revisions to Section 22a–174–3a (*l*)(1), published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(F) Regulations of Connecticut State Agencies revisions to Section 22a–174–3a(*l*)(4)(B) introductory text and Section 22a–174–3a(*l*)(4)(B)(iv), published in the Connecticut Law Journal on October 16, 2012, effective September 10, 2012.

(109) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 31, 2012.

(i) *Incorporation by reference.* (A) Connecticut Trading Agreement and Order No. 8187, Modification 1 issued to PSEG Power Connecticut LLC on July 16, 2012.

(B) Connecticut Trading Agreement and Order No. 8242, Modification 1 issued to PSEG Power Connecticut LLC on July 16, 2012.

(110) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 8, 2014.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, revisions to Section 22a-174–20(a), as published in the Connecticut Law Journal on May 6, 2014, effective March 7, 2014:

(*1*) 22a–174–20(a);

(*2*) 22a–174–20(b)(2), (b)(3), (b)(4), and (b)(17);

(*3*) 22a–174–20(c); and

(*4*) 22a–174–20(x)(12).

(B) Regulations of Connecticut State Agencies, Subsection (b)(1) of Section 22a-174–20 is removed without replacement, as published in the Connecticut Law Journal on May 6, 2014, effective March 7, 2014.

(111) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on April 22, 2014.

(i) *Incorporation by reference.* (A) Amendments to Regulations of Connecticut State Agencies (RCSA) as published in the Connecticut Law Journal on June 24, 2014, effective April 15, 2014.

(1) Revised Section 22a–174–19.

(2) Revised Section 22a–174–19a(e).

(3) Revised Section 22a–174–19a(i).

(4) Section 22a–174–19b with the exception of subsection (e), which was not submitted by the State.

(5) Revised Section 22a–174–5(b)(1).

(B) RCSA Section 22a–174–19a(c) which was approved in paragraph (c)(103)(i)(A)(1), is removed without replacement.

(ii) *Additional materials.* [Reserved]

(112) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on December 28, 2007; September 4, 2008; September 18, 2009; October 13, 2011; December 28, 2012; January 2, 2013; and May 30, 2013.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, ''Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and (2) for the 8-Hour Ozone National Ambient Air Quality Standard Program Infrastructure,'' Final, December 28, 2007.

(B) The Connecticut Department of Energy and Environmental Protection document, ''Adequacy Determination of the Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 1997 National Ambient Air Quality Standard for Fine Particulate Matter,'' Final, September 4, 2008.

(C) The Connecticut Department of Energy and Environmental Protection document, ''Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and (2) for the 2006

Fine Particulate Matter National Ambient Air Quality Standard,'' Final, September 18, 2009.

(D) The Connecticut Department of Energy and Environmental Protection document, ''Request to Withdraw a Portion of Connecticut's $PM_{2.5}$ Infrastructure Adequacy Determination,'' January 7, 2011.

(E) The Connecticut Department of Energy and Environmental Protection document, ''Addendum to the CAA § 110(a)(2)(D)(i)(I) Portion of Connecticut's Infrastructure Submittal for the 2006 $PM_{2.5}$ NAAQS,'' August 19, 2011.

(F) The Connecticut Department of Energy and Environmental Protection document, ''Adequacy Determination of the Connecticut State Implementation Plan with Regard to Clean Air Act Section 110(a)(1) and

(2) for the 2008 Lead National Ambient Air Quality Standard,'' Final, October 13, 2011.

(G) The Connecticut Department of Energy and Environmental Protection document, ''Update to Connecticut $PM_{2.5}$ Infrastructure Submittals,'' June 15, 2012.

(H) The Connecticut Department of Energy and Environmental Protection document, ''Connecticut State Implementation Plan with Regard to the Infrastructure Requirements of Clean Air Act Section 110(a)(1) and 110(s)(2) for the 2008 Ozone National Ambient Air Quality Standards, Final, December 28, 2012.

(I) The Connecticut Department of Energy and Environmental Protection document, ''Connecticut State Implementation Plan with Regard to the Infrastructure Requirements of Clean Air Act Section 110(a)(1) and 110(a)(2) for the 2010 Nitrogen Dioxide National Ambient Air Quality Standards, Final, January 2, 2013.

(J) The Connecticut Department of Energy and Environmental Protection document, ''Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 2010 Sulfur Dioxide National Ambient Air Quality Standard, Final, May 30, 2013.

(K) The Connecticut Department of Energy and Environmental Protection letter, ''Supplement to Infrastructure State Implementation Plan (SIP) Revisions,'' August 5, 2015.

(113) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on November 19, 2012 and December 14, 2015.

(i) *Incorporation by reference.* (A) Section 19–508–17, ''Control of Open Burning,'' which was approved in the March 1972 plan (see paragraph (b)) is removed and replaced with the following:

(*1*) Connecticut General Statute, Title 22A ''Environmental Protection,'' Chapter 446c ''Air Pollution Control,'' Section 22a–174 ''(Formerly Sec. 19–508). Powers of the commissioner. Regulations. Fees. Exemptions. General permits. Appeal of commissioner's action re permit applications,'' paragraph (f), effective March 30, 2000, as published in the General Statutes of Connecticut, revision of 1958, revised to January 1, 2015, volume 8.

(*2*) Regulations of Connecticut State Agencies (RCSA) section 22a-174–1 entitled ''Definitions,'' revisions to Section 22a-174–1(19), as published in the Connecticut Law Journal on July 1, 2014.

(B) [Reserved]

(ii) *Additional materials.* [Reserved]

(114) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 27, 2016 and August 18, 2016.

(i) *Incorporation by reference.* (A) General Permit to Limit Potential to Emit from Major Stationary Sources, issuance date November 9, 2015, except for the provisions listed below, related to greenhouse gases which Connecticut withdrew from consideration as part of the SIP.

(*1*) In Section 2, the definitions for ''Carbon Dioxide Equivalent Emissions'' or ''CO_2'', ''Greenhouse Gases'' or ''GHG'', ''Hydroflourocarbon'' or ''HFC'', and ''Perfluorocarbon'' or ''PFCs'' in paragraph (a);

(*2*) In Sections 4 and 5, the words ''excluding GHG which are limited to less than 100% of Title V source threshold as defined in section 22a–174–33(a)(10)(F)(iv) of the Regulations of Connecticut State Agencies'' in paragraphs (4)(c)(2)(E)(i) and (ii), 4(c)(2)(J), 4(d)(1), and 4(g)(5)(A) and (B); and 5(a)(1) and (2);

(*3*) In Section 5, the words ''excluding GHG which are limited to less than 100% of Title V source threshold'' in the introductory paragraph;

(*4*) In Section 5, paragraphs 5(b)(2)(A)(vi) and 5(b)(2)(B)(i);

(*5*) In Section 5, the words ''and (vi)'' in paragraph 5(b)(2)(A)(vii); and

(*6*) In Section 5, the words ''other than GHG'' in paragraphs 5(b)(2)(B)(ii) and (iii).

(115) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on July 1, 2004, January 13, 2006, November 15, 2011, and July 15, 2016.

(i) *Incorporation by reference.* (A) State of Connecticut vs. Mallace Industries Corporation, Consent Order No. 8258, issued as a final order on September 13, 2005.

(B) State of Connecticut vs. Hamilton Sundstrand, a United Technologies Company, Order No. 8029A, issued as a final order on September 3, 2009.

(C) State Order No. 8011, and attached Compliance Timetable and Appendix A (allowable limits by product classification) for Dow Chemical, U.S.A. in Gales Ferry, Connecticut, issued as State Order No. 8011, effective on October 27, 1988, and approved in paragraph (c)(48(i)(B) is removed without replacement.

(D) State Order No. 8014, and attached Compliance Timetable for Pratt & Whitney Division of United Technologies Corporation in East Hartford, Connecticut, issued as State Order No. 8014, effective on March 22, 1989, and approved in paragraph (c)(51)(i)(B) is removed without replacement.

(E) State Order No. 8021, and attached Compliance Timetable, and Appendix A (allowable limits on small, uncontrolled vents and allowable outlet gas temperatures for surface condensers) for Pfizer, Incorporated in Groton, Connecticut, issued as State Order No. 8021, effective on December 2, 1988, and approved in paragraph (c)(52)(i)B) is removed without replacement.

(F) State Order No. 8009, and attached Compliance Timetable, Appendix A, Appendix B, and Appendix C for Uniroyal Chemical Company, Inc. in Naugatuck, Connecticut, issued as State Order No. 8009, effective on September 5, 1989, and approved in paragraph (c)(53)(i)(B), is removed without replacement.

(G) State Order No. 8032, and attached Compliance Timetable for the Heminway & Bartlett Manufacturing Company in Watertown, Connecticut, issued as State Order No. 8032, effective on November 29, 1989, and approved in paragraph (c)(55)(i)(B), is removed without replacement.

(H) State Order No. 8010, for Sikorsky Aircraft Corporation, effective on January 29, 1990, as well as Addendum A and Addendum B to Order No. 8010, effective on February 7, 1996 and September 29, 1995, respectively, issued as State Order No. 8010, and two addenda, define and impose RACT on certain VOC emissions at Sikorsky Aircraft Corporation in Stratford, Connecticut, and approved in paragraph (c)(60)(i)(B) is removed without replacement.

(I) State Order No. 8200, issued by the Connecticut Department of Environmental Protection to Watson Laboratories, Inc., effective October 3, 2002, and approved in paragraph (c)(96)(i)(C) is removed without replacement.

(ii) *Additional materials.* [Reserved]

(116) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 16, 2016, and January 24, 2017.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Administrative Regulation of the Department of Energy and Environmental Protection, Municipal Waste Combustors, revisions to section 22a–174–38 as published in the Connecticut Law Journal, volume 78, no. 17, on October 25, 2016.

(*1*) Subsection (c), subdivision (8);

(*2*) Subsection (c), subdivisions (16), and (17);

(*3*) Subsection (d);

(*4*) Subsection (i), subdivisions (4)(E) and (J);

(*5*) Subsection (i), subdivision (5);

(*6*) Subsection (j), subdivision (4);

(*7*) Subsection (k), subdivision (9) with the exceptions of the phrase ''particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive

ash and'' and the sentence ''The maximum demonstrated municipal waste combustor unit load and maximum demonstrated particulate matter control device temperature shall be recorded for the initial performance test for dioxin/furan emissions for each particulate matter control device.''; and subdivision (10), with the exceptions of the phrase ''for particulate matter, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive ash and'' and the sentence ''The maximum demonstrated municipal waste combustor unit load and maximum demonstrated particulate matter control device temperature (for each particulate matter control device) shall be recorded for the initial performance test for dioxin/furan emissions.''

(*8*) Subsection (l), subdivision (3)(A)(i) with the exception of the phrase ''particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride, fugitive ash and''; (3)(A)(ii), with the exceptions of the term ''sulfur dioxide'' and the phrase ''carbon monoxide, municipal waste combustor unit load, particulate matter control device inlet temperature and''; (3)(A)(iv); (3)(A)(v), with the exceptions of the term ''sulfur dioxide'' the phrase ''carbon monoxide, municipal waste combustor unit load, particulate matter control device temperature and'' and the phrase ''carbon mass feed rate and''; (3)(A)(vi), with the exceptions of the term ''sulfur dioxide'' the phrase ''carbon monoxide, municipal waste combustor unit load, particulate matter control device temperature and'' and the phrase ''carbon mass feed rate and''; (B), with the exception of the phrase ''and (A)(iii)''; and (C).

(*9*) Subsection (l), subdivision (6), with the exceptions of the phrase ''particulate matter, opacity, cadmium, lead, mercury, dioxin/furan emissions, hydrogen chloride'' and the term ''or fugitive ash''.

(*10*) Subsection (a).

(B) Regulation of the Department of Energy and Environmental Protection Concerning NO_X Emissions from Fuel-Burning Emission Units, effective December 22, 2016.

(*1*) Section 22a–174–22e, Control of nitrogen oxides emissions from fuel-burning equipment at major stationary sources of nitrogen oxides, with the exception of, within paragraph (l)(7), the phrase ''or under procedures in RCSA section 22a–174–5(d).'';

(*2*) Section 22a–174–22f, High daily NO_X emitting units at non-major sources of NO_X;

(*3*) Section 22a–174–18,, revised subsection (j)(6);

(*4*), Section 22a–174–8(b)(2);

(*5*) Section 22a–174–22c, subsection (g)(3);

(*6*) Section 22a–174–38, revised subsections (b)(1) through (6).

(117) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on September 14, 2015.

(i) *Incorporation by reference.* (A) ''Control of Organic Compound Emissions,'' Regulation 22a–174–20, the sections listed below, effective July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(*1*) Section 20(a)(7);

(*2*) Section (b)(10);

(*3*) Sections (b)(12) through (b)(16);

(*4*) Section (20)(ee)

(B) ''Control of Organic Compound Emissions,'' Regulation 22a–174–30a ''Stage I Vapor Recovery,'' effective July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(C) ''Control of Organic Compound Emissions,'' Regulation 22a–174–32(b)(3), effective July 8, 2015, as published in the Connecticut Law Journal on November 24, 2015.

(D) House Bill No. 6534, Public Act No. 13–120, ''An Act Concerning Gasoline Vapor Recovery Systems,'' approved June 18, 2013.

(ii) Additional materials.

(A) Letter from the Connecticut Department of Energy and Environmental Protection, dated September 14, 2015, submitting a revision to the Connecticut State Implementation Plan.

(118) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on August 19, 2011, December 14, 2015, and October 18, 2017.

(i) *Incorporation by reference.* (A) ''Definitions,'' Regulation 22a–174–1(71),

the definition of ''Minor source baseline date,'' amended October 5, 2017.

(B) ''Permit to Construct and Operate Stationary Sources,'' Regulation 22a–174–3a(k)(1)(C), amended October 5, 2017.

(C) Connecticut General Statute, Title 16a, ''Planning and Energy Policy,'' Chapter 296, ''Operation of Fuel Supply Business,'' Section 16a–21a, ''Sulfur content of home heating oil and off-road diesel fuel. Suspension of requirements for emergency. Enforcement,'' effective July 1, 2015, as published in the State of Connecticut General Statutes, Revision of 1958, Revised to January 1, 2017.

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, ''Addendum to the CAA §110(a)(2)(D)(i)(I) Portion of Connecticut's Infrastructure Submittal for the 2006 $PM_{2.5}$ NAAQS,'' August 19, 2011.

(B) The Connecticut Department of Energy and Environmental Protection document, ''Connecticut State Implementation Plan for Clean Air Act Section 110(a) Infrastructure Elements: 2012 $PM_{2.5}$ NAAQS,'' December 14, 2015.

(C) The Connecticut Department of Energy and Environmental Protection document, State Implementation Plan Revision Concerning the Consumer Products, Architectural and Industrial Maintenance Coatings and Prevention of Significant Deterioration Permit Programs,'' October 18, 2017.

(119) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on October 18, 2017.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies Section 22a–174–40, entitled ''Consumer Products,'' effective Oct 5, 2017.

(B) Regulations of Connecticut State Agencies Section 22a–174–41, entitled ''Architectural and Industrial Maintenance Products—Phase 1,'' effective Oct 5, 2017.

(C) Regulations of Connecticut State Agencies Section 22a–174–41a, entitled ''Architectural and Industrial Maintenance Products—Phase 2,'' effective Oct 5, 2017.

(120) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on February 28, 2018.

(i) *Incorporation by reference.* (A) Regulations of Connecticut State Agencies, Section 22a-174–3a, ''Permit to Construct and Operate Stationary Sources,'' amended February 8, 2018:

(*1*) 22a–174–3a(a)(1), ''Applicability and Exemptions,'' except (a)(1)(C) and (G);

(*2*) 22a–174–3a(j)(1), ''Best Available Control Technology (BACT);'' and

(*3*) 22a–174–3a(k)(1) and (2), ''Permit Requirements for Attainment Areas: Prevention of Significant Deterioration of Air Quality (PSD) Program.''

(121) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 30, 2015.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document ''Regional Haze 5-Year Progress Report,'' Final July 8, 2015.

(B) [Reserved]

(122) Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on June 15, 2015.

(i) [Reserved]

(ii) *Additional materials.* (A) The Connecticut Department of Energy and Environmental Protection document, ''Demonstration that Connecticut Complies with the Good Neighbor Requirements of Clean Air Act Section 110(a)(2)(D)(i)(I) for the 2008 Ozone National Ambient Air Quality Standard'' Final, June 11, 2015.

(B) [Reserved]

[37 FR 10855, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.370, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

EFFECTIVE DATE NOTE: At 82 FR 18870, June 23, 2017, §52.370 was amended by adding paragraph (c)(114), effective June 23, 2017, until Nov. 8, 2020.

§ 52.371 Classification of regions.

The Connecticut plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
New Jersey-New York-Connecticut Interstate	I	I	I	I	I
Hartford-New Haven-Springfield Interstate	I	I	III	I	I
Northwestern Intrastate	III	III	III	III	III
Eastern Intrastate	II	III	III	III	III

[37 FR 10855, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 45 FR 84787, Dec. 23, 1980]

§ 52.372 Extensions.

(a) [Reserved]

(b) The Administrator hereby extends until December 31, 1996, the attainment date for particulate matter for the New Haven PM10 nonattainment area, as requested by the State of Connecticut on March 22, 1996 and based on monitored air quality data for the national ambient air quality standard for PM10 during the years 1993–95.

[61 FR 56900, Nov. 5, 1996, as amended at 62 FR 14331, Mar. 26, 1997; 64 FR 67192, Dec. 1, 1999]

§ 52.373 Approval status.

(a) The Administrator approves the general procedures of the state's sulfur control regulations (19–508–19) and accompanying narrative submitted on October 23, 1981, and November 4, 1981 and identified under § 52.370(c)(18), provided that any individual source approvals granted by the state under the Air Pollution Control/Energy Trade Option and solid fuel burning permitting system are submitted to EPA as SIP revisions.

(b) The Administrator approves the total suspended particulate regulation for foundry sand processes as submitted and identified under paragraph (c)(22) of this section. This includes only the requirement to remove ninety percent of the particulate matter and not the requirement to emit not more than 0.75 pounds of particulate per ton of material cast, a provision which may be found in state regulation 19–508–18(f)(3).

[61 FR 38576, July 25, 1996]

§ 52.374 Attainment dates for national standards.

The following table presents the latest dates by which the national standards are to be attained. The dates reflect the information presented in Connecticut's plan.

Air quality control region	Pollutant					
	SO_2		PM_{10}	NO_2	CO	O_3
	Primary	Secondary				
AQCR 41: Eastern Connecticut Intrastate (See 40 CFR 81.183)	(a)	(b)	(a)	(a)	(a)	(d)
AQCR 42: Hartford-New Haven-Springfield Interstate Area (See 40 CFR 81.26).						
All portions except City of New Haven	(a)	(b)	(a)	(a)	(a)	(d)
City of New Haven	(a)	(b)	(c)	(a)	(a)	(d)
AQCR 43: New Jersey-New York-Connecticut Interstate Area (See 40 CFR 81.13)	(a)	(a)	(a)	(a)	(a)	(d)
AQCR 44: Northwestern Connecticut Intrastate (See 40 CFR 81.184)	(a)	(b)	(a)	(a)	(a)	(d)

a. Air quality levels presently below primary standards or area is unclassifiable.
b. Air quality levels presently below secondary standards or area is unclassifiable.
c. December 31, 1996 (two 1-year extensions granted).
d. November 15, 2007.

[45 FR 84787, Dec. 23, 1980, as amended at 61 FR 38576, July 25, 1996; 62 FR 14331, Mar. 26, 1997; 64 FR 12013, Mar. 10, 1999; 66 FR 663, Jan. 3, 2001]

§ 52.375 Certification of no sources.

The State of Connecticut has certified to the satisfaction of EPA that no sources are located in the state which are covered by the following Control Technique Guidelines:

(a) Large Petroleum Dry Cleaners.

(b) In its December 8, 2006 submittal to EPA pertaining to reasonably available control technology requirements for the 1997 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:

(1) Automobile Coatings;

(2) Large Petroleum Dry Cleaners;

(3) Large Appliance Coating;

(4) Natural Gas and Gas Processing Plants;

(5) Flat Wood Paneling Coatings; and

(6) Control of VOC Leaks from Petroleum Refineries.

(c) Air Oxidation Processes/SOCMI.

(d) Manufacturers of High-density Polyethylene and Polypropylene Resins.

(e) Synthetic organic chemical manufacturing industry (SOCMI) distillation.

(f) Synthetic organic chemical manufacturing industry (SOCMI) reactor vessels.

(g) In its April 29, 2010 submittal to EPA pertaining to reasonably available control technology requirements for the 1997 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:

(1) Flat wood paneling coating;

(2) Fiberglass boat manufacturing; and

(3) Automobile and light duty truck assembly coating.

(h) In its July 18, 2014 submittal to EPA pertaining to reasonably available control technology requirements for the 2008 8-hour ozone standard, the State of Connecticut certified to the satisfaction of EPA that no sources are located in the state that are covered by the following Control Technique Guidelines:

(1) Automobile coatings;

(2) Large petroleum dry cleaners;

(3) Fiberglass boat manufacturing;

(4) Equipment leaks from natural gas and gasoline processing plants;

(5) Petroleum refineries;

(6) Control of refinery vacuum producing systems;

(7) Wastewater separators and process unit turnarounds; and

(8) Flatwood paneling coatings.

[50 FR 37178, Sept. 12, 1985, as amended at 53 FR 17936, May 19, 1988; 65 FR 62623, Oct. 19, 2000; 78 FR 38591, June 27, 2013; 79 FR 32875, June 9, 2014; 82 FR 35456, July 31, 2017]

§ 52.376 Control strategy: Carbon monoxide.

(a) Approval—On January 12, 1993, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan for the 1990 base year emission inventory. The inventory was submitted by the State of Connecticut to satisfy Federal requirements under sections 172(c)(3) and 187(a)(1) of the Clean Air Act as amended in 1990, as a revision to the carbon monoxide State Implementation Plan for the Hartford/New Britain/Middletown carbon monoxide nonattainment area, the New Haven/Meriden/Waterbury carbon monoxide nonattainment area, and the Connecticut Portion of the New York-N. New Jersey-Long Island carbon monoxide nonattainment area.

(b) Approval—On September 30, 1994, the Connecticut Department of Environmental Protection submitted a request to redesignate the Hartford/New Britain/Middletown Area carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 1995–2005 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(c) Approval—On January 12, 1993 and April 7, 1994, the Connecticut Department of Environmental Protection submitted revisions to the carbon monoxide State Implementation Plan for VMT forecasts, contingency measures, and attainment demonstration for CO. These VMT forecasts, contingency measures, and attainment demonstration were submitted by Connecticut to satisfy Federal requirements under sections 187(a)(2)(A), 187(a)(3) and 187(a)(7) of the Clean Air Act, as amended in 1990, as revisions to the carbon monoxide State Implementation Plan.

(d) Approval—On January 17, 1997, the Connecticut Department of Environmental Protection submitted a request to redesignate the New Haven/Meriden/Waterbury carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 1998–2008 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(e) Approval—In December, 1996, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan for the 1993 periodic emission inventory. The inventory was submitted by the State of Connecticut to satisfy Federal requirements under section 187(a)(5) of the Clean Air Act as amended in 1990, as a revision to the carbon monoxide State Implementation Plan.

(f) Approval—On May 29, 1998, the Connecticut Department of Environmental Protection submitted a request to redesignate the Connecticut portion of the New York-N. New Jersey-Long Island carbon monoxide nonattainment area to attainment for carbon monoxide. The redesignation request and the 2000–2010 initial ten-year maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(g) Approval—On October 7, 1999, the Connecticut Department of Environmental Protection submitted a revision to the carbon monoxide State Implementation Plan that removes the oxygenated fuel requirement for the Connecticut portion of the New York—N. New Jersey—Long Island area and converts the program to a contingency measure. If a violation of the carbon monoxide ambient air quality standard were to occur, the State would be required to reimplement the program.

(h) Approval—On June 28, 2004, the Connecticut Department of Environmental Protection (CT DEP) submitted a request to establish limited maintenance plans for the Hartford-New Britain-Middletown Connecticut carbon monoxide attainment area, the New Haven-Meriden-Waterbury Connecticut carbon monoxide attainment area, and the Connecticut portion of the New York-Northern New Jersey-Long Island carbon monoxide attainment area for the remainder of the individual area's initial ten-year maintenance plan. As part of the maintenance plan request, CT DEP also requested approval of a second follow-on ten-year carbon monoxide maintenance plan for the Hartford-New Britain-Middletown carbon monoxide attainment area (period 2006 to 2015), for the New Haven-Meriden-Waterbury carbon monoxide attainment area (period 2009 to 2018), and for the Connecticut portion of the New York-Northern New Jersey-Long Island carbon monoxide attainment area (period 2011 to 2020). The State of Connecticut has committed to: maintain a continuous carbon monoxide monitoring network in each carbon monoxide maintenance area; implement contingency measures in the event of an exceedance of the carbon monoxide National Ambient Air Quality Standard (NAAQS) in any of the three maintenance areas; coordinate with EPA in the event the carbon monoxide design value(s) in any maintenance area(s) exceed 7.65 ppm, to verify the validity of the data and, if warranted based on the data review, develop a full maintenance plan(s) for the affected maintenance area(s); and, ensure that project-level carbon monoxide evaluations of transportation projects in each area are carried out as part of environmental reviews or Connecticut's indirect source permitting program. The limited maintenance plans satisfy all applicable requirements of section 175A of the Clean Air Act. Approval of a

Limited Maintenance Plan is conditioned on maintaining levels of ambient carbon monoxide levels below the required limited maintenance plan 8-hour carbon monoxide design value criterion of 7.65 parts per million. If the Limited Maintenance Plan criterion is no longer satisfied, Connecticut must develop a full maintenance plan to meet Clean Air Act requirements.

[60 FR 55320, Oct. 31, 1995, as amended at 61 FR 38577, July 25, 1996; 63 FR 53286, Oct. 5, 1998; 64 FR 12014, Mar. 10, 1999; 64 FR 67192, Dec. 1, 1999; 69 FR 50073, Aug. 13, 2004]

§ 52.377 Control strategy: Ozone.

(a) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on December 30, 1997 and January 7, 1998. These revisions are for the purpose of satisfying the rate of progress requirement of section 182(c)(2) through 1999, and the contingency measure requirements of sections 172(c)(9) and 182(c)(9) of the Clean Air Act, for the Greater Hartford serious ozone nonattainment area, and the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area.

(b) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 16, 1998, February 8, 2000 and June 17, 2003. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Clean Air Act for the Greater Connecticut serious ozone nonattainment area. The revision establishes an attainment date of November 15, 2007 for the Greater Connecticut serious ozone nonattainment area. Connecticut commits to conduct a mid-course review to assess modeling and monitoring progress achieved toward the goal of attainment by 2007, and submit the results to EPA by December 31, 2004. The June 17, 2003 revision establishes MOBILE6-based motor vehicle emissions budgets for 2007 of 51.9 tons per day of volatile organic compounds (VOC) and 98.4 tons per day of nitrogen oxides (NO_X) to be used in transportation conformity in the Greater Connecticut serious ozone nonattainment area.

(c) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 15, 2001 and June 17, 2003. These revisions are for the purpose of satisfying the rate of progress requirement of section 182 (c)(2)(B) through 2007, and the contingency measure requirements of section 182 (c)(9) of the Clean Air Act, for the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The October 15, 2001 revision establishes motor vehicle emissions budgets for 2002 of 15.20 tons per day of VOC and 38.39 tons per day of NO_X to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The June 17, 2003 revision establishes motor vehicle emissions budgets for 2005 of 19.5 tons per day of VOC and 36.8 tons per day of NO_X to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area.

(d) Approval—Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on September 16, 1998, February 8, 2000, October 15, 2001 and June 17, 2003. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Clean Air Act for the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. The June 17, 2003 revision establishes MOBILE6-based motor vehicle emissions budgets for 2007 of 16.4 tons per day of VOC and 29.7 tons per day of NO_X to be used in transportation conformity in the Connecticut portion of the NY-NJ-CT severe ozone nonattainment area. Connecticut commits to adopt and submit by October 31, 2001, additional necessary regional control measures to offset the emission reduction shortfall in order to attain the one-hour ozone standard by November 2007. Connecticut commits to adopt and submit by October 31, 2001, additional necessary intrastate control measures to offset the emission reduction shortfall in order to attain the one-hour ozone standard by November 2007. Connecticut commits to adopt and submit

additional restrictions on VOC emissions from mobile equipment and repair operations; and requirements to reduce VOC emissions from certain consumer products. Connecticut also commits to conduct a mid-course review to assess modeling and monitoring progress achieved toward the goal of attainment by 2007, and submit the results to EPA by December 31, 2004.

(e) Commitment Fulfillment—Connecticut has fulfilled the commitment in section 52.377(d), to adopt additional NO_X and VOC control measures to meet the emission reduction shortfall in its 1-hour severe ozone nonattainment area.

(f) Determination of Attainment. Effective September 30, 2010, EPA is determining that the Greater Connecticut 8-hour ozone nonattainment area has attained the 1997 8-hour ozone standard. Under the provisions of EPA's ozone implementation rule (*see* 40 CFR 51.918), this determination suspends the reasonable further progress and attainment demonstration requirements of section 182(b)(1) and related requirements of section 172(c)(9) of the Clean Air Act for as long as the area does not monitor any violations of the 1997 8-hour ozone standard. If a violation of the 1997 ozone NAAQS is monitored in the Greater Connecticut 8-hour ozone nonattainment area, this determination shall no longer apply. In addition, this area met its June 15, 2010 attainment deadline for the 1997 ozone standard.

(g) Approval—Submittal from the Connecticut Department of Environmental Protection, dated December 28, 2007, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 ozone National Ambient Air Quality Standard (NAAQS). This submittal satisfies the requirements of CAA sections 110(a)(2)(A), (B), (C), (E), (F), (G), (H), (J), (K), (L), and (M).

(h) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated December 28, 2007, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 ozone National Ambient Air Quality Standard (NAAQS). On May 2, 2011, the State of Connecticut supplemented this submittal with a commitment to address the requirements of section 110(a)(2)(D)(ii) of the CAA that requires notification of affected states for Prevention of Significant Deterioration purposes. EPA is conditionally approving Connecticut's submittal with respect to CAA section 110(a)(2)(D)(ii).

(i) Determination of Attainment for the One-Hour Ozone Standard. Effective April 16, 2012, EPA is determining that the Greater Connecticut one-hour ozone nonattainment area did not meet its applicable one-hour ozone attainment date of November 15, 2007, based on 2005–2007 complete, quality-assured ozone monitoring data. Separate from and independent of this determination, EPA is determining that the Greater Connecticut one-hour ozone nonattainment area met the one-hour ozone standard, based on 2008–2010 complete, quality-assured ozone monitoring data at all monitoring sites in the area. EPA's review of the ozone data shows that the area began attaining the one-hour ozone standard during the 2006–2008 monitoring period, and has continued attaining the one-hour standard through the 2007–2009 and 2008–2010 monitoring periods.

(j) Determination of Attainment for the One-Hour Ozone Standard. Effective July 18, 2012, EPA is determining that the New York-Northern New Jersey-Long Island (NY-NJ-CT) one-hour ozone nonattainment area did not meet its applicable one-hour ozone attainment date of November 15, 2007, based on 2005–2007 complete, quality-assured and certified ozone monitoring data. Separate from and independent of this determination, EPA is determining that the New York-Northern New Jersey-Long Island (NY-NJ-CT) one-hour ozone nonattainment area has attained the one-hour ozone standard, based on 2008–2010 complete, quality-assured and certified ozone monitoring data at all monitoring sites in the area and data showing the area continued to attain through 2011.

(k) Determination of Attainment for the Eight-Hour Ozone Standard. Effective July 18, 2012 EPA is determining, that complete, quality-assured and certified ozone monitoring data for 2007–2009 show the NY-NJ-CT eight-hour ozone nonattainment area attained the

1997 eight-hour ozone standard by its June 15, 2010 attainment deadline. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. EPA also determined that the NY-NJ-CT nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A). EPA is also determining that the NY-NJ-CT eight-hour ozone nonattainment area currently continues to attain the eight-hour ozone NAAQS, based on complete, quality-assured and certified data for 2008–2010 and data through 2011. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS.

(l) Approval—Revisions to the Connecticut State Implementation Plan (SIP) submitted on December 8, 2006. The SIP revision satisfies the requirement to implement reasonably available control technology (RACT) for sources of volatile organic compounds (VOC) and oxides of nitrogen (NO_X) for purposes of the 1997 8-hour ozone standard. Specifically, the following sections of the Regulations of Connecticut State Agencies are approved for this purpose: For VOC RACT, 22a–174–20, Control of Organic Compound Emissions, 22a–174–30, Dispensing of Gasoline/Stage I and Stage II Vapor Recovery, and 22a–174–32, RACT for Organic Compounds; for NO_X RACT, 22a–174–22, Control of Nitrogen Oxide Emissions, and 22a–174–38, Municipal Waste Combustors.

(m) *Approval.* (1) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on August 18, 2000, December 12, 2002, July 1, 2004, January 13, 2006. The revisions consist of 148 single source emission trading orders necessary for satisfying Reasonable Available Control Technology requirements for nitrogen oxides during specific time periods. All trading orders expired before January 1, 2013, with the exception of Trading Agreement and Order 8242, in paragraph (m)(1)(xlii) of this section, issued to PSEG Power Connecticut, LLC in Bridgeport, Connecticut on February 12, 2003. Trading Agreement and Order 8242 was issued to reflect a change in ownership at the source.

(i) Trading Agreement and Order No. 8116 Modification No. 1 issued to the Connecticut Resources Recovery Authority in Hartford on April 29, 1999.

(ii) Trading Agreement and Order No. 1494A issued to the Connecticut Resources Recovery Authority in Hartford on May 4, 2001.

(lxxxix) Trading Agreement and Order No. 8306 issued to NRG Energy, Inc., Middletown Power LLC, NRG Middletown Operations Inc., Montville Power LLC, NRG Montville Operations Inc., Norwalk Power LLC, and NRG Norwalk Harbor Operations Inc. in Middletown, Montville, and Norwalk.

(xc) Trading Agreement and Order No. 8110A issued to Yale University in New Haven.

(n) Approval—An attainment demonstration for the 1997 8-hour ozone standard to satisfy requirements of section 182(c)(2)(A) of the Clean Air Act, and a Reasonably Available Control Measure (RACM) analysis to satisfy requirements of section 172(c)(1) of the Clean Air Act for the Greater Connecticut ozone nonattainment area, submitted by the Connecticut Department of Energy and Environmental Protection on February 1, 2008.

(o) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on February 1, 2008. These revisions are for the purpose of satisfying the rate of progress requirement of section 182(b)(1) from 2002 through 2008, and the contingency measure requirement of sections 172(c)(9) and of the Clean Air Act, for the Greater Connecticut moderate 8-hour ozone nonattainment area, and the Connecticut portion of the New York-New Jersey-Long Island moderate 8-hour ozone nonattainment area. These revisions establish motor vehicle emission budgets for 2008 of 29.7 tons per day of volatile organic compounds (VOCs) and 60.5 tons per day of nitrogen oxides (NOx) to be used in transportation conformity in the Connecticut portion of the New York-New Jersey-Long Island moderate 8-hour ozone nonattainment area. These revisions also establish motor vehicle emission budgets for 2008 for the Greater Connecticut moderate 8-hour ozone nonattainment area of 28.5 tons per day for VOCs, and 54.3 tons per day for NOx.

(p) *Rescission of clean data determination for the 1997 eight-hour ozone standard.* Effective June 3, 2016, the EPA is determining that complete quality-assured and certified ozone monitoring data for 2012–2014 show the NY-NJ-CT 1997 eight-hour ozone nonattainment area did not meet 1997 eight-hour ozone standard. Therefore, the EPA is rescinding the clean data determination for the 1997 eight-hour ozone standard only. The prior determination (*see* paragraph k of this section) is in accordance with 40 CFR 51.918. The prior determination suspended the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual eight-hour ozone NAAQS. This rescission of

the clean data determination will result in a SIP Call for a new ozone attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard, for this area only. If the revised plan is approved by the EPA as demonstrating reasonable further progress and attainment for the more stringent 2008 NAAQS by the Moderate area attainment date, and is approved by the EPA as containing adequate contingency measures for the 2008 NAAQS, then the plan would be deemed to have also satisfied requirements of the SIP Call associated with violations for the 1997 NAAQS.

(q) Approval—Revisions to the Connecticut State Implementation Plan (SIP) submitted on July 18, 2014. The SIP revision satisfies the requirement to implement reasonably available control technology (RACT) for sources of volatile organic compounds (VOC) and oxides of nitrogen (NO_X) for purposes of the 2008 ozone standard. Specifically, the following sections of the Regulations of Connecticut State Agencies are approved for this purpose: For VOC RACT, 22a–174–20, Control of Organic Compound Emissions, 22a–174–30, Dispensing of Gasoline/Stage I and Stage II Vapor Recovery, and 22a–174–32, RACT for Organic Compounds; for NO_X RACT, 22a–174–22, Control of nitrogen oxide emissions, 22a–174–22e, Control of nitrogen oxide emissions from fuel burning equipment at major sources, 22a–174–22f, High daily NO_X emitting units at non-major sources of nitrogen oxides, and 22a–174–38, Municipal Waste Combustors.

(r) *Approval*—Submittal from the Connecticut Department of Energy and Environmental Protection dated March 9, 2017, to address the nonattainment new source review requirements for the 2008 8-hour ozone NAAQS for the Greater Connecticut and the New York-N. New Jersey-Long Island, NY–NJ–CT ozone nonattainment areas, as it meets the requirements for both the State's marginal and moderate classifications.

(s) *Approval*—An attainment demonstration for the 1997 8-hour ozone standard to satisfy requirements of section 182(c)(2)(A) of the Clean Air Act, and a Reasonably Available Control Measure (RACM) analysis to satisfy requirements of section 172(c)(1) of the Clean Air Act for the New York-Northern New Jersey-Long Island (NY-NJ-CT) ozone nonattainment area, submitted by the Connecticut Department of Energy and Environmental Protection. This rulemaking addresses the EPA's obligations to act on Connecticut's February 1, 2008 SIP revision for the 1997 ozone NAAQS, as well as the attainment demonstration and RACM analysis portion of the August 8, 2017 SIP submittal for the 1997 ozone NAAQS for the Connecticut portion of the NY-NJ-CT area.

(t) *Approval.* Revisions to the State Implementation Plan submitted by the Connecticut Department of Energy and Environmental Protection on January 17, 2017, September 5, 2017, and August 8, 2017, to meet, in part, requirements of the 2008 ozone NAAQS. These revisions satisfy the rate of progress requirement of section 182(b) through 2017, the motor vehicle inspection and maintenance requirements of section 182(b), the contingency measure requirements of section 182(c)(9), the emission statement requirements of section 182(a)(3)(B), and the reasonably available control measure requirement of section 172(c)(1) for the Connecticut portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT area, and the Greater Connecticut moderate ozone nonattainment areas. The January 17, 2017 revision establishes motor vehicle emissions budgets for 2017 of 15.9 tons per day of VOC and 22.2 tons per day of NO_X to be used in transportation conformity in the Greater Connecticut moderate ozone nonattainment area. The August 8, 2017 revision establishes motor vehicle emissions budgets for 2017 of 17.6 tons per day of VOC and 24.6 tons per day of NO_X to be used in transportation conformity in the Connecticut portion of the New York–Northern New Jersey–Long Island, NY–NJ–CT moderate ozone nonattainment area.

[65 FR 62626, Oct. 19, 2000]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.377, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 52.378 Control strategy: PM_{10}.

(a) Approval—On June 23, 2005, the Connecticut Department of Environmental Protection submitted a request to redesignate the City of New Haven PM_{10} nonattainment area to attainment for PM_{10}. The redesignation request and the initial ten-year maintenance plan (2006–2015) meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990, respectively.

(b) Approval—On June 23, 2005, the Connecticut Department of Environmental Protection (CT DEP) submitted a request to establish a Limited Maintenance Plan (LMP) for the City of New Haven PM_{10} attainment area for the area's initial ten-year maintenance plan (2006–2015). The State of Connecticut has committed to: maintain a PM_{10} monitoring network in the New Haven PM_{10} maintenance area; implement contingency measures in the event of an exceedance of the PM_{10} National Ambient Air Quality Standards (NAAQS) in the maintenance area; coordinate with EPA in the event the PM_{10} design value in the maintenance area exceeds 98 μgm/m³ for the 24-hour PM_{10} NAAQS or 40 μgm/m³ for the annual PM_{10} NAAQS; and to verify the validity of the data and, if warranted based on the data review, develop a full maintenance plan for the maintenance area. The LMP satisfies all applicable requirements of section 175A of the Clean Air Act. Approval of the LMP is conditioned on maintaining levels of ambient PM_{10} below a PM_{10} design value criteria of 98 μgm/m³ for the 24-hour PM_{10} NAAQS and 40 μgm/m³ for the annual PM_{10} NAAQS. For the Criscuolo Park site, Connecticut still qualifies for the LMP option if, based on five years of site data, the average design values (ADVs) of the continuous PM_{10} monitor are less than the site-specific critical design value (CDV). If the LMP criteria are no longer satisfied, Connecticut must develop a full maintenance plan to meet Clean Air Act requirements.

[70 FR 59663, Oct. 13, 2005]

§ 52.379 Control strategy: $PM_{2.5}$.

(a) Approval—Revision to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection (DEP) on April 17, 2007. the revision is for the purpose of establishing early fine particulate ($PM_{2.5}$) transportation conformity emission budgets for the Connecticut portion of the New York–Northern New Jersey–Long Island, NY-NJ-CT $PM_{2.5}$ nonattainment area. The April 17, 2007 revision establishes $PM_{2.5}$ motor vehicle emission budgets for 2009 of 360 tons per year of direct $PM_{2.5}$ emissions and 18,279 tons per year of NO_X emissions to be used in transportation conformity in the Connecticut portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT $PM_{2.5}$ nonattainment area.

(b) *Determination of Attainment.* EPA has determined, as of December 15, 2010, that the New York-Northern New Jersey-Long Island, NY-NJ-CT fine particle ($PM_{2.5}$) nonattainment area has attained the 1997 $PM_{2.5}$ National Ambient Air Quality Standard. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 1997 $PM_{2.5}$ NAAQS.

(c) Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 4, 2008, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS). This submittal is approved as meeting the requirements of sections 110(a)(2)(B), (C) (enforcement program only), (E)(i), (E)(iii), (F), (G), (H), (J) (consultation and public notification only), (K), (L), and (M).

(d) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 4, 2008, to address the Clean Air Act (CAA) infrastructure requirements for the 1997 $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS). EPA is conditionally approving Connecticut's submittal with respect to CAA sections 110(a)(2)(A), (C) only as it related to the PSD program, (D)(ii), (E)(ii), and (J)

only as it relates to the PSD program. This conditional approval is contingent upon Connecticut taking actions to meet requirements of these elements within one year of conditional approval, as committed to in letters from the state to EPA Region 1 dated June 15, 2012, and July 11, 2012.

(e) Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 18, 2009, with supplements submitted on January 7, 2011, and August 19, 2011, to address the Clean Air Act (CAA) infrastructure requirements for the 2006 $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS). This submittal is approved as meeting the requirements of sections 110(a)(2)(B), (C) (enforcement program only), (E)(i), (E)(iii), (F), (G), (H), (J) (consultation and public notification only), (K), (L), and (M).

(f) Conditional Approval—Submittal from the Connecticut Department of Environmental Protection, dated September 18, 2009, with supplements submitted on January 7, 2011, and August 19, 2011, to address the Clean Air Act (CAA) infrastructure requirements for the 2006 $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS). EPA is conditionally approving Connecticut's submittal with respect to CAA sections 110(a)(2)(A), (C) only as it related to the PSD program, (D)(ii), (E)(ii), and (J) only as it relates to the PSD program. This conditional approval is contingent upon Connecticut taking actions to meet requirements of these elements within one year of conditional approval, as committed to in letters from the state to EPA Region 1 dated June 15, 2012, and July 11, 2012.

(g) *Determination of Attainment.* EPA has determined, as of December 31, 2012, that the New York-N. New Jersey-Long Island, NY-NJ-CT fine particle ($PM_{2.5}$) nonattainment area has attained the 2006 $PM_{2.5}$ National Ambient Air Quality Standard. This determination suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 2006 $PM_{2.5}$ NAAQS.

(h) Approval—EPA is approving a request to redesignate the Connecticut portion of the New York-N. New Jersey-Long Island, NY-NJ-CT fine particle ($PM_{2.5}$) area (i.e., New Haven and Fairfield Counties or the Southwestern CT Area) from nonattainment to attainment for the 1997 annual and 2006 24-hour $PM_{2.5}$ standards. Connecticut submitted this request on June 22, 2012. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175A maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision as required by the Clean Air Act. The $PM_{2.5}$ maintenance plan also establishes 2017 and 2025 Motor Vehicle Emission Budgets (MVEBs) for the Area. Connecticut is establishing 2017 MVEBs of 575.8 tons per year (tpy) for direct $PM_{2.5}$ and 12,791.8 tpy for NO_X, and 2025 MVEBs of 516 tpy for direct $PM_{2.5}$ and 9,728.1 tpy for NO_X, for the Southwestern CT Area for maintenance of the 1997 annual and 2006 24-hour $PM_{2.5}$ standards. The 2017 and 2025 MVEBs were prepared with the MOVES model. Previously SIP-approved 2009 MVEBs prepared with MOBILE6.2 are being withdrawn. Finally, EPA is also approving a comprehensive 2007 emission inventory for this Area.

[72 FR 50063, Aug. 30, 2007, as amended at 75 FR 69577, Nov. 15, 2010; 77 FR 63232, Oct. 16, 2012; 77 FR 76871, Dec. 31, 2012; 78 FR 58469, Sept. 24, 2013]

§ 52.380 Rules and regulations.

(a) All facilities owned, operated or under contract with the Connecticut Transportation Authority shall comply in all respects with Connecticut Regulations for the Abatement of Air Pollution sections 19–508–1 through 19–508–25 inclusive, as approved by the Administrator.

(b) For the purposes of paragraph (a) of this section the word ''Administrator'' shall be substituted for the word ''Commissioner'' wherever that word appears in Connecticut Regulations for the Abatement of Air Pollution sections 19–508–1 through 19–508–25 inclusive, as approved by the Administrator.

(c) The June 27 and December 28, 1979, February 1, May 1, September 8 and November 12, 1980, revisions are approved as satisfying Part D requirements under the following conditions:

(1)–(2) [Reserved]

(d) Non-Part D-No Action: EPA is neither approving nor disapproving the following elements of the revisions:

(1)–(2) [Reserved]

(3) The program to review new and modified major stationary sources in attainment areas (prevention of significant deterioration).

(4) Permit fees

(5) Stack height regulations

(6) Interstate pollution requirements

(7) Monitoring requirements

(8) Conflict of interest provisions.

(9) Use of 1 percent sulfur content fuel by the following residual oil burning sources, identified under § 52.370, paragraph (c)(18).

(i) Northeast Utilities, HELCO Power Station in Middletown,

(10) Emergency Fuel Variance provisions of Regulation 19–508–19 (a)(2)(ii) identified under § 52.370 paragraph (c)(18).

(e) *Disapprovals.* (1) Regulation 19–508–19(a)(9) concerning coal use at educational and historical exhibits and demonstrations, identified under § 52.370, (c)(18).

(2) Regulation 19–508–19, subsection (a)(4)(iii)(C) and (a)(4)(iii)(E) concerning fuel merchants, identified under § 52.370, paragraph (c)(18).

NOTE 1 TO PARAGRAPHS (f) THROUGH (g): ''state'' means the state of Connecticut.

(f) *Connecticut General Statutes Section 1–85. (Formerly Sec. 1–68). Interest in conflict with discharge of duties:* A public official, including an elected state official, or state employee has an interest which is in substantial conflict with the proper discharge of his duties or employment in the public interest and of his responsibilities as prescribed in the laws of this state, if he has reason to believe or expect that he, his spouse, a dependent child, or a business with which he is associated will derive a direct monetary gain or suffer a direct monetary loss, as the case may be, by reason of his official activity. A public official, including an elected state official, or state employee does not have an interest which is in substantial conflict with the proper discharge of his duties in the public interest and of his responsibilities as prescribed by the laws of this state, if any benefit or detriment accrues to him, his spouse, a dependent child, or a business with which he, his spouse or such dependent child is associated as a member of a profession, occupation or group to no greater extent than any other member of such profession, occupation or group. A public official, including an elected state official or state employee who has a substantial conflict may not take official action on the matter.

(g) *Connecticut General Statutes Section 22a–171. (Formerly Sec. 19–507). Duties of Commissioner of Energy and Environmental Protection:* The Commissioner of Energy and Environmental Protection of the State of Connecticut shall:

(1) Initiate and supervise programs for the purposes of determining the causes, effect and hazards of air pollution;

(2) Initiate and supervise state-wide programs of air pollution control education;

(3) Cooperate with and receive money from the Federal Government and, with the approval of the Governor, from any other public or private source;

(4) Adopt, amend, repeal and enforce regulations as provided in Connecticut General Statutes Section 22a–174 and do any other act necessary to enforce the provisions of Connecticut General Statutes Chapter 446c and Connecticut General Statutes Section 14–164c;

(5) Advise and consult with agencies of the United States, agencies of the state, political subdivisions and industries and any other affected groups in furtherance of the purposes of Connecticut General Statutes Chapter 446c.

(h) [Reserved]

[40 FR 23280, May 29, 1975, as amended at 45 FR 84787, Dec. 23, 1980; 46 FR 34801, July 6, 1981; 46 FR 56615, Nov. 18, 1981; 46 FR 62062, Dec. 22, 1981; 47 FR 763, Jan. 7, 1982; 47 FR 36823, Aug. 24, 1982; 47 FR 41959, Sept. 23, 1982; 47 FR 49646, Nov. 2, 1982; 47 FR 51129, Nov. 12, 1982; 48 FR 5724, Feb. 8, 1983; 50 FR 50907, Dec. 13, 1985; 65 FR 62623, Oct. 19, 2000; 81 FR 35639, June 3, 2016; 83 FR 37439, Aug. 1, 2018]

§ 52.381 Requirements for state implementation plan revisions relating to new motor vehicles.

Connecticut must comply with the requirements of § 51.120.

[60 FR 4737, Jan. 24, 1995]

§ 52.382 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable provisions for the NO_2 increments under the prevention of significant deterioration program.

(b) The increments for nitrogen dioxide promulgated on October 17, 1988 (53 FR 40671), and related requirements in 40 CFR 52.21 except paragraph (a)(1), are hereby incorporated and made part of the applicable implementation plan for the State of Connecticut.

[58 FR 10964, Feb. 23, 1993, as amended at 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.383 Stack height review.

The State of Connecticut has declared to the satisfaction of EPA that no existing emission limitations have been affected by stack height credits greater than good engineering practice or any other prohibited dispersion techniques as defined on EPA's stack height regulations as revised on July 8, 1985. Such declarations were submitted to EPA on February 21, 1986, and May 27, 1986.

[52 FR 49407, Dec. 31, 1987]

§ 52.384 Emission inventories.

(a) The Governor's designee for the State of Connecticut submitted the 1990 base year emission inventories for the Connecticut portion of the New York-New Jersey-Connecticut severe ozone nonattainment area and the Greater Hartford serious ozone nonattainment area on January 13, 1994 as revisions to the State's SIP. Revisions to the inventories were submitted on February 3, 1994, February 16, 1995, and December 30, 1997. The 1990 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas.

(b) The inventories are for the ozone precursors which are volatile organic compounds, nitrogen oxides, and carbon monoxide. The inventories covers point, area, non-road mobile, on-road mobile, and biogenic sources.

(c) Taken together, the Connecticut portion of the New York-New Jersey-Connecticut severe nonattainment area and the Hartford serious nonattainment area encompass the entire geographic area of the State.

(d) The state of Connecticut submitted base year emission inventories representing emissions for calendar year 2002 from the Connecticut portion of the NY-NJ-CT moderate 8-hour ozone nonattainment area and the Greater Connecticut moderate 8-hour ozone nonattainment area on February 1, 2008 as revisions to the State's SIP. The 2002 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas. The inventories consist of emission estimates of volatile organic compounds and nitrogen oxides, and cover point, area, non-road mobile, on-road mobile and biogenic sources. The inventories were submitted as revisions to the SIP in partial fulfillment of obligations for nonattainment areas under EPA's 1997 8-hour ozone standard.

(e) The State of Connecticut submitted base year emission inventories representing emissions for calendar year 2011 from the Connecticut portion of the NY-NJ-CT moderate 8-hour ozone nonattainment area and the Greater Connecticut moderate 8-hour ozone nonattainment area on March 9, 2016, as revisions to the State's SIP. The 2011 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for these areas. The inventories consist of emission estimates of volatile organic compounds and nitrogen oxides, and cover point, area, non-road mobile, on-road mobile and biogenic sources. The inventories were submitted as revisions to the SIP in partial fulfillment of obligations for nonattainment areas under EPA's 2008 8-hour ozone standard.

[62 FR 55340, Oct. 24, 1997, as amended at 65 FR 62626, Oct. 19, 2000; 77 FR 50600, Aug. 22, 2012; 83 FR 49298, Oct. 1, 2018]

§ 52.385 EPA-approved Connecticut regulations.

The following table identifies the State regulations which have been submitted to and approved by EPA as revisions to the Connecticut State Implementation Plan. This table is for informational purposes only and does not have any independent regulatory effect. To determine regulatory requirements for a specific situation, consult the plan identified in § 52.370. To the extent that this table conflicts with § 52.370, § 52.370 governs.

TABLE 52.385—EPA-APPROVED REGULATIONS

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
19–508	Connecticut Air Implementation Plan.	3/3/72	5/31/72	37 FR 10842	(c) 1&2	State of CT Air Implementation Plan.
		8/10/1972	5/14/1973	38 FR 12696	(c) 3	Correction to submission dates for supplemental information.
		4/9/1974	6/2/1975	40 FR 23746	(c) 5	Identification of Air Quality Maintenance Areas.
		8/10/1976	11/29/1977	42 FR 60753	(c) 7	Adds carbon monoxide/oxidant control strategy and regulations.
		6/30/1977	9/29/1978	43 FR 44840	(c) 8	Describes air quality surveillance program.
22a–171	Small Business Assistance.	1/12/1993	5/19/1994	59 FR 26123	(c) 65	Established small business compliance and technical assistance program.
22a–174–1	Definitions	3/15/2002	2/27/2003	68 FR 9011	Adopting definitions applicable to PSD/NSR program..	
22a–174–1	Definitions	4/7/2014	6/24/2015	80 FR 36242	(c)(106)	Amendment of subdivisions (10) ambient air quality standard and (88) PM 10.
22a–174–1	Definitions	9/10/2012	7/24/2015	80 FR 43960	(c)(108)	Modified definition of ''major source baseline date'' for purposes of adding $PM_{2.5}$.
22a–174–1	Definitions	2/1/2010	9/1/2016	81 FR 60274	(c)(113)	Approved 22a–174–1(19) definition of ''brush'' for purposes of Connecticut General Statutes (CGS) Section 22a–174(f); see paragraph (c)(113)(A) of this section.
22a–174–1	Definitions	10/5/2017	8/1/2017	83 FR 37437	c (118)	Modified definition of ''minor source baseline date'' for purposes of adding $PM_{2.5}$.
22a–174–2	Registration requirements for existing stationary sources of air pollutants.	4/4/1972	5/31/1972	37 FR 23085	(b).	

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
		8/31/1979	12/23/1980	45 FR 84769 ...	(c) 11	In tandem with changes to Regulation 3, sources existing prior to 1972 must register.
22a–174–2a	Procedural Requirements for New Source Review and Title V Permitting.	3/15/2002	2/27/2003	68 FR 9011	Provisions applicable to PSD/NSR in consolidated permit procedural requirements..	
22a–174–2a	Procedural Requirements for New Source Review and Title V Permitting.	9/10/2012	7/24/2015	80 FR 43960 ...	(c)(107)	Only sections 22a–174–2a(b)(5)(E) and (b)(6) are being approved.
22a–174–3	Permits for construction and operation of stationary sources.	4/4/1972	5/31/1972	37 FR 23085 ...	(b)	Conditional approval of NSR program.
		8/30/1979	12/23/1980	45 FR 84769 ...	(c)11	EPA conditionally approved changes to meet federal New Source Review (NSR) requirements. CT did not submit Prevention of Significant Determination program.
		8/31/1979	1/7/1982	47 FR 762	(c) 20	Final approval of NSR Rules removing conditions of 12/23/80.
		10/10/1980	1/7/1982	47 FR 762	(c) 20	Allows conditional exemption of resource recovery facilities from offset transactions.
		10/10/1980	1/7/1982	47 FR 762	(c) 20	Replaces the word "actual" with word "allowable".
		12/27/1988	2/23/1993	58 FR 10957 ...	(c) 56	Changes to NSR and PSD requirements.
22a–174–3a	Permit to Construct and Operate Stationary Sources.	3/15/2002	2/27/2003	68 FR 9011	PSD/NSR program requirements as revised by the CAAA..	
22a–174–3a	Permit to Construct and Operate Stationary Sources.	4/7/2014	6/24/2015	80 FR 36242 ...	(c)(106)	Amendment of subsection (k)(5) Ambient Monitoring.

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
22a–174–3a	Permit to Construct and Operate Stationary Sources.	9/10/2012	7/24/2015	80 FR 43960 ...	(c)(108)	Added Ambient Impact values for $PM_{2.5}$ in Table 3a(i)–1, Significant Emission Rate Thresholds for $PM_{2.5}$ emissions and its precursors in Table 3a(k)–1, $PM_{2.5}$ increment added to Table 3a(k)–2, and $PM_{2.5}$ added to section 22a–174–3a(*l*)(4)(B)(iv). Revised section 22a–174–3a(*l*)(1).
22a–174–3a	Permit to Construct and Operate Stationary Sources.	10/5/2017	8/1/2017	83 FR 37437 ...	c (118)	Amendment of subsection (k)(1)(C).
22a–174–3a	Permit to Construct and Operate Stationary Sources.	2/8/2018	2/15/2019	84 FR 4338	(c)(120)	Revised section 22a–174–3a(a)(1) entitled ''Applicability,'' section 22a–174–3a(j)(1) for when control technology applies, and sections 22a–174–3a(k)(1) and (2) regarding applicability of GHGs for major stationary sources and major modifications.
22a–174–3b	Permits for construction and operation of stationary sources.	4/4/2006	8/31/2006	71 FR 51761 ...	(c)(95)	Only the automotive refinishing requirements of 22a–174–3b are being approved. Connecticut did not submit the other subsections of the rule as part of its SIP revision.
22a–174–4	Source monitoring, record keeping, reporting and authorization of inspection of air pollution sources.	4/4/1972	5/31/1972	37 FR 23085 ...	(b).	
		10/31/1977	12/23/1980	45 FR 84769 ...	(c) 11	Clarifies record keeping and reporting requirements and rescinds smoke monitoring requirements for small sources.
		12/15/1980	8/24/1982	47 FR 36822 ...	(c) 20	Rescinded requirements for smoke monitors on sources less than 250 mmBtu.
		12/27/1988	2/23/1993	58 FR 10957 ...	(c) 56	Changes to opacity continuous emission monitoring (CEM) requirements.

		Date adopted by State	Date approved by EPA			
22a–174–14	Compliance with regulation no defense to nuisance claim.	4/4/1972	5/31/1972	37 FR 10842 ...	(b).	
22a–174–15	Severability	4/4/1972	5/31/1972	37 FR 10842 ...	(b).	
22a–174–16	Responsibility to comply with applicable regulations.	4/4/1972	5/31/1972	37 FR 10842 ...	(b).	
22a–174–17	Control of open burning.	4/4/1972	5/31/1972	37 FR 10842 ...	(b).	
22a–174–17 (formerly 19–508–17).	Control of Open Burning.	4/4/1972	9/1/2016	81 FR 60274 ...	(b)(2)	DEEP regulation to control open burning. Paragraph (b) was revised 9/1/16 by redesignating paragraph (b) as (b)(1) and adding paragraph (b)(2) to read as follows: This rule, formerly known as Section 19–508–17, which was approved in paragraph (b)(1), is removed from the SIP and replaced by Connecticut General Statute (CGS) section 22a–174(f) and RCSA section 22a–174–1(19); see paragraph (c)(113)(A) of this section.
22a–174–18	Control of particulate emissions.	4/4/72	5/31/72	37 FR 10842 ...	(b).	
		11/30/1973	4/16/1974	39 FR 13651 ...	52.375	Allowed Hartford Electric Light & Connecticut Light & Power Supplies to use nonconforming fuel from 12/3/1973 to 1/1/1974.
		7/11/1981	9/23/1982	47 FR 41958 ...	(c) 22	Defines TSP RACT for fuel burning equipment and process sources including cupolas, foundries, and hot mix asphalt plants.

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
22a–174–18	Control of particulate matter and visible emissions.	4/1/2004	7/16/2014	79 FR 41427 ...	(c)(104)	All of Section 22a–174–18 is approved, with the exception of the phrase ''or malfunction'' in Section 22a–174–18(j)(1) and all of Section 22a–174–18(j)(2), which CT DEEP withdrew from the SIP submittal. Because Connecticut withdrew Section 22a–174–18(j)(2) from its SIP submission, stationary sources subject to a federal NSPS will remain subject to the opacity limits contained in ''Control of particulate emissions'' under the SIP (See 37 FR 10842). See Section 19–508–18, ''Control of Particulate Emissions'' posted at *http://www.epa.gov/region1/topics/air/sips/sips_ct.html*.
22a–174–18	Control of particulate emissions.	12/22/2016	7/31/2017	82 FR 35454 ...	(c)(116)	Minor edit to update citation.
22a–174–19	Control of sulfur compound emissions.	4/4/1972	5/31/1972	37 FR 23085 ...	(b).	
		11/30/1973	4/16/1974	39 FR 13651 ...	52.375	Allowed Hartford Electric Light and Connecticut Power and Light to use nonconforming fuel.
		4/3/1979	7/30/1979	44 FR 44498 ...	(c) 10	Allowed Northeast Utilities to purchase, store, and burn nonconforming fuel.
		9/8/1980	4/27/1981	46 FR 23412 ...	(c) 12	Variance for Federal Paperboard, Inc.
		12/19/1980 & 3/11/1981	8/28/1981	46 FR 43418 ...	(c) 14	Amends sulfur control strategy.
		3/11/1981 & 7/15/1981	8/28/1981	46 FR 43418 ...	(c) 15	Amends New Source Ambient Impact Analysis Guideline.
		3/17/1981	10/23/1981	46 FR 51914 ...	(c) 17	Variance for Uniroyal, Inc.
		11/2/1981	11/18/1981	46 FR 56612 ...	(c) 18	Approval State Energy Trade program.

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
		11/14/1975	11/18/1981	46 FR 56612 ...	52.380 (e)(1)	EPA disapproval revision which allows exemption for home heating with coal, historic demonstrations, and other small sources.
		11/12/1981	12/22/1981	46 FR 62062 ...	(c) 19	Variances for United Technologies Corp., Pratt & Whitney Aircraft Division facilities in New Haven and Middletown.
		7/7/1981	11/12/1982	47 FR 51129 ...	(c) 24	Variance for Sikorsky Aircraft—approved under the State Energy Trade Program.
		5/27/1982	2/8/1983	48 FR 5723	(c) 26	Variance for Dow Chemical—approved under the State Energy Trade Program.
		12/15/1982	5/4/1983	48 FR 20051 ...	(c) 27	Variance for Lydall, Inc.—approved under the State Energy trade (SET) Program.
		11/1/1982	6/28/1983	48 FR 29689 ...	(c) 28	Simkins Industries—approved under the State Energy Trade Program.
		3/28/1983	12/20/1983	48 FR 56218 ...	(c) 30	Variance for Loomis Institute—approved under the State Energy Trade Program.
		2/19/1993	1/18/1994	59 FR 2531	(c) 63	Changes requirements at Himilton Standard Division of UTC.
22a–174–19	Control of Sulfur Compound Emissions.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Revises section 22a–174–19.
22a–174–19a ...	Control of sulfur dioxide emissions from power plants and other large stationary sources of air pollution.	12/28/2000	7/10/2014	79 FR 39322 ...	(c)(103)	Approves the sulfur dioxide emission standards and fuel sulfur limits for units subject to the CT NO_X Budget program. The following sections were not submitted as part of the SIP: Sections (a)(5); (a)(8); (a)(11); (d); (e)(4); (f); (g); (h); and in (i)(2) reference to (e)(4).

TABLE 52.385—EPA-APPROVED REGULATIONS—Continued

Connecticut State citation	Title/subject	Dates		FEDERAL REGISTER citation	Section 52.370	Comments/description
		Date adopted by State	Date approved by EPA			
						Section 22a–174–19a(c) was repealed by the State of Connecticut effective April 15, 2014 and removed from the SIP without replacement effective May 25, 2016.
22a–174–19a ...	Control of sulfur dioxide emissions from power plants and other stationary sources of air pollution.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Withdraws section 22a–174–19a(c) previously approved in paragraph 52.370(c)(103) and revises sections 22a–174–19a(e) and 22a–174–19a(i).
22a–174–19b ...	Fuel Sulfur Content Limitations for Stationary Sources.	4/15/2014	5/25/2016	81 FR 33134 ...	(c)(111)	Addition of a new regulation with the exception of subsection (e) which was not submitted by the State.
22a–174–20	Control of organic compound emissions.	4/4/1972	5/31/1972	37 FR 23085 ...	(b).	
		8/31/1979	12/23/1980	45 FR 84769 ...	(c) 11	Requirements for certain Group I CTG source categories. Conditionally approved cutback asphalt and solvent metal cleaning categories.
		10/10/1980	1/17/1982	47 FR 762	(c) 20	Requirements for cutback asphalt (Group I—CTG).
		10/10/1980	2/17/1982	47 FR 6827	(c) 25	Requirements for Group II CTGs exclusive of controlling gasoline tank truck leaks, petroleum liquid storage external floating roof tanks, manufacture of vegetable oil, pneumatic rubber tire categories. Other VOC rules.
		10/10/1980	6/7/1982	47 FR 24452 ...	(c) 23	Alternative emission reduction provisions.
		12/10/1982	2/1/1984	49 FR 3989	(c) 29	Requirements for small open top degreasers (Group I—CTG).
		9/24/1983	2/1/1984	49 FR 3989	(c) 29	Exempts colds cleaners at auto repair facilities.

[62 FR 52022, Oct. 6, 1997; 62 FR 65224, Dec. 11, 1997]

EDITORIAL NOTES: 1. For FEDERAL REGISTER citations affecting § 52.385, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

2. At 79 FR 39329, July 10, 2014, § 52.385 was amended; however, portions of the amendment could not be incorporated due to inaccurate amendatory instruction.

§ 52.386 Section 110(a)(2) infrastructure requirements.

(a) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIPs on these dates: 2008 Pb NAAQS—October 13, 2011; 2008 ozone NAAQS—December 28, 2012; 2010 NO_2 NAAQS—January 2, 2013; and 2010 SO_2 NAAQS—May 30, 2013. These infrastructure SIPs are approved, with the exception of certain elements within 110(a)(2)(C)(ii), D(i)(II), and J(iii), which are conditionally approved. Connecticut submitted infrastructure SIPs for the 1997 and 2006 $PM_{2.5}$ NAAQS on September 4, 2008, and September 18, 2009, respectively, and elements 110(a)(2)(A), D(ii), and E(ii), which were previously conditionally approved, are now approved. Also with respect to the 1997 and 2006 $PM_{2.5}$ NAAQS, elements related to PSD, which include 110(a)(2)C(ii), D(i)(II), and J(iii) are newly conditionally approved. Connecticut also submitted an Infrastructure SIP for the 1997 8-hour ozone NAAQS on December 28, 2007, and element 110(a)(2)(D)(ii), which was previously conditionally approved, is now approved.

(b) On May 30, 2013, the State of Connecticut submitted a State Implementation Plan (SIP) revision addressing the Section 110(a)(2)(D)(i)(I) interstate transport requirements of the Clean Air Act for the 2010 SO_2 National Ambient Air Quality Standards (NAAQS). EPA has found that Connecticut's May 30, 2013 submittal meets the requirements of Section 110(a)(2)(D)(i)(I) for the 2010 SO_2 NAAQS.

(c) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure

SIPs on these dates: 2006 $PM_{2.5}$ NAAQS—August 19, 2011 (CAA section 110(a)(2)(D)(i)(I) transport provisions), and 2012 $PM_{2.5}$ NAAQS—December 14, 2015. These infrastructure SIPs are approved. Also with respect to the 1997 and 2006 $PM_{2.5}$, 1997 and 2008 ozone, 2008 lead, 2010 nitrogen dioxide, and 2010 sulfur dioxide NAAQS, elements related to PSD, which are in CAA section 110(a)(2)(C), (D)(i)(II), and (J) and were previously conditionally approved, are now approved.

(d) The Connecticut Department of Energy and Environmental Protection submitted the following infrastructure SIP on this date: 2008 ozone NAAQS—June 15, 2015 (CAA section 110(a)(2)(D)(i)(I) transport provisions). This infrastructure SIP is approved.

[81 FR 35640, June 3, 2016, as amended at 82 FR 37015, Aug. 8, 2017; 83 FR 37440, Aug. 1, 2018; 85 FR 8406, Feb. 14, 2020]

§ 52.387 Interstate Transport for the 1997 8-hour ozone and $PM_{2.5}$ NAAQS.

On March 13, 2007, the State of Connecticut submitted a State Implementation Plan (SIP) revision addressing the Section 110(a)(2)(D)(i) interstate transport requirements of the Clean Air Act for the 1997 8-hour ozone and $PM_{2.5}$ National Ambient Air Quality Standards (NAAQS). There are four distinct elements related to the impact of interstate transport of air pollutants. These include prohibiting significant contribution to downwind nonattainment of the NAAQS, interference with maintenance of the NAAQS, interference with plans in another state to prevent significant deterioration of air quality, and interference with efforts of other states to protect visibility. EPA has found that Connecticut's March 13, 2007 submittal adequately addresses these four distinct elements and has approved the submittal as meeting the requirements of Section 110(a)(2)(D)(i) for the 1997 8-hour ozone and $PM_{2.5}$ NAAQS.

[73 FR 25518, May 7, 2008]

(c) *EPA approved regulations.*

Subpart I—Delaware

§ 52.420 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Delaware under section 110 of the Clean Air Act, 42 U.S.C. 7410, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to May 25, 2018, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after May 25, 2018 for the State of Delaware have been approved by EPA for inclusion in the State implementation plan and for incorporation by reference into the plan as it is contained in this section, and will be considered by the Director of the Federal Register for approval in the next update to the SIP compilation.

(2) EPA Region III certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference into the State implementation plan may be inspected at the Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. To obtain the material, please call the Regional Office at (215) 814–3376. You may also inspect the material with an EPA approval date prior to May 25, 2018 for the State of Delaware at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
1101 Definitions and Administrative Principles				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566	Revised format for all definitions which EPA has previously approved as part of the SIP.
Section 2.0	Definitions	9/10/2009	5/31/2019, 84 FR 25183	Updated definition of Volatile Organic Compound. Previous approval 8/11/2010.
Section 2.0	Definitions	12/11/2016	12/12/2019, 84 FR 67873	Updated definition of volatile organic compound. Previous approval 5/31/2019.
Section 3.0	Administrative Principles	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Abbreviations	9/11/2008	8/11/2010, 75 FR 48566.	
1102 Permits				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Application/Registration Prepared by Interested Party.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Cancellation of Construction Permits.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Action on Applications	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Denial, Suspension or Revocation of Operating Permits.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Transfer of Permit/Registration Prohibited.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Availability of Permit/Registration	9/11/2008	8/11/2010, 75 FR 48566.	
Section 9.0	Registration Submittal	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Source Category Permit Application	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Permit Application	9/11/2008	8/11/2010, 75 FR 48566.	
Section 12.0	Public Participation	9/11/2008	8/11/2010, 75 FR 48566.	
Section 13.0	Department Records	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix A	[List of Permits Exemptions]	1/11/2006 9/11/2008	12/4/2012, 77 FR 71700	Addition of paragraphs 32.0 and 33.0 (formerly gg. and hh. respectively).
1103 Ambient Air Quality Standards				
Section 1.0	General Provisions	1/11/2014	6/17/2014, 79 FR 34441	Revised sections
Section 2.0	General Restrictions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Suspended Particulates	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Sulfur Dioxide	1/11/2014	6/17/2014, 79 FR 34441	Revised sections
Section 5.0	Carbon Monoxide	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Ozone	1/11/2014	6/17/2014, 79 FR 34441	Revised sections
Section 8.0	Nitrogen Dioxide	1/11/2014	6/17/2014, 79 FR 34441	Revised sections.
Section 10.0	Lead	1/11/2014	6/17/2014, 79 FR 34441	Revised sections.
Section 11.0	PM_{10} and $PM_{2.5}$ Particulates	1/11/2014	6/17/2014, 79 FR 34441	Revised sections
1104 Particulate Emissions from Fuel Burning Equipment				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Emission Limits	9/11/2008	8/11/2010, 75 FR 48566.	
1105 Particulate Emissions from Industrial Process Operations				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	General Restrictions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Restrictions on Hot Mix Asphalt Batching Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Restrictions on Secondary Metal Operations.	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 5.0	Restrictions on Petroleum Refining Operations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Restrictions on Prill Tower Operation.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Control of Potentially Hazardous Particulate Matter.	9/11/2008	8/11/2010, 75 FR 48566.

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 3.0	Minimum Emission Monitoring Requirements for Existing Sources.	9/11/2008	8/2/2019, 84 FR 37772	Revise 3.2 so that it reads, ''3.2 Fuel Burning Equipment—Fuel burning equipment except as provided in 3.2 through 3.4 of this regulation . . .'' And remove 3.5, ''Electric arc furnaces—See 7 DE Admin. Code 1123.''
Section 4.0	Performance Specifications	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Minimum Data Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Data Reduction	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Emission Statement	9/11/2008	8/11/2010, 75 FR 48566.	
1124 Control of Volatile Organic Compound Emissions				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	4/11/2010	9/25/2012, 77 FR 58953	Amended to add definitions.
Section 3.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Compliance Certification, Recordkeeping, and Reporting Requirements for Coating Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Compliance Certification, Recordkeeping, and Reporting Requirements for Non-Coating Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	General Recordkeeping	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Circumvention	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Handling, Storage, and Disposal of Volatile Organic Compounds (VOCs).	3/11/2011	4/13/2012, 77 FR 22224.	
Section 9.0	Compliance, Permits, Enforceability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Aerospace Coatings	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Mobile Equipment Repair and Refinishing.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 12.0	Surface Coating of Plastic Parts	10/11/2011	9/25/2012, 77 FR 58953.	
Section 13.0	Automobile and Light-Duty Truck Coating Operations.	3/11/2011	4/13/2012, 77 FR 22224.	
Section 14.0	Can Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 15.0	Coil Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 16.0	Paper Coating	3/11/2011	4/13/2012, 77 FR 22224	Amended to add ''film and foil coating'' to the regulated category.
Section 17.0	Fabric Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 18.0	Vinyl Coating	9/11/2008	8/11/2010, 75 FR 48566.	
Section 19.0	Coating of Metal Furniture	10/11/2011	9/25/2012, 77 FR 58953.	
Section 20.0	Coating of Large Appliances	10/11/2011	9/25/2012, 77 FR 58953.	
Section 21.0	Coating of Magnet Wire	9/11/2008	8/11/2010, 75 FR 48566.	
Section 22.0	Coating of Miscellaneous Metal Parts.	10/11/2011	9/25/2012, 77 FR 58953.	
Section 23.0	Coating of Flat Wood Panelling	3/11/2011	4/13/2012, 77 FR 22224.	
Section 24.0	Bulk Gasoline Plants	9/11/2008	8/11/2010, 75 FR 48566.	
Section 25.0	Bulk Gasoline Terminals	9/11/2008	8/11/2010, 75 FR 48566.	
Section 26.0	Gasoline Dispensing Facility—Stage I Vapor Recovery.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 27.0	Gasoline Tank Trucks	9/11/2008	8/11/2010, 75 FR 48566.	
Section 28.0	Petroleum Refinery Sources	9/11/2008	8/11/2010, 75 FR 48566.	
Section 29.0	Leaks from Petroleum Refinery Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 30.0	Petroleum Liquid Storage in External Floating Roof Tanks.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 31.0	Petroleum Liquid Storage in Fixed Roof Tanks.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 32.0	Leaks from Natural Gas/Gasoline Processing Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 33.0	Solvent Metal Cleaning and Drying	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 34.0	Cutback and Emulsified Asphalt	9/11/2008	8/11/2010, 75 FR 48566.	
Section 35.0	Manufacture of Synthesized Pharmaceutical Products.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 36.0	Stage II Vapor Recovery	9/11/2008	8/11/2010, 75 FR 48566.	
Section 37.0	Graphic Arts Systems	3/11/2011	4/13/2012 77 FR 22224	Amended to add ''flexible packaging printing'' to the regulated category.
Section 38.0	Petroleum Solvent Dry Cleaners	9/11/2008	8/11/2010, 75 FR 48566.	
Section 40.0	Leaks from Synthetic Organic Chemical, Polymer, and Resin Manufacturing Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 41.0	Manufacture of High-Density Polyethylene, Polypropylene and Polystyrene Resins.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 42.0	Air Oxidation Processes in the Synthetic Organic Chemical Manufacturing Industry.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 43.0	Bulk Gasoline Marine Tank Vessel Loading Facilities.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 44.0	Batch Processing Operations	9/11/2008	8/11/2010, 75 FR 48566.	
Section 45.0	Industrial Cleaning Solvents	3/11/2011	4/13/2012, 77 FR 22224.	
Section 46.0	Crude Oil Lightering Operations	9/11/2008	8/11/2010, 75 FR 48566.	
Section 47.0	Offset Lithographic Printing and Letterpress Printing.	4/11/2011	11/25/2011, 76 FR 72626	Amendments to Sections 47.1 through 47.6 to include control requirements for letterpress printing.
Section 48.0	Reactor Processes and Distillation Operations in the Synthetic Organic Chemical Manufacturing Industry.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 49.0	Control of Volatile Organic Compound Emissions from Volatile Organic Liquid Storage Vessels.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 50.0	Other Facilities that Emit Volatile Organic Compounds (VOCs).	9/11/2008	8/11/2010, 75 FR 48566	The SIP effective date for former Sections 50(a)(5) and 50(b)(3) is 5/1/98.
Appendix A	Test Methods and Compliance Procedures: General Provisions.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix B	Test Methods and Compliance Procedures: Determining the Volatile Organic Compound (VOC) Content of Coatings and Inks.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix C	Test Methods and Compliance Procedures: Alternative Compliance Methods for Surface Coating.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix D	Test Methods and Compliance Procedures: Emission Capture and Destruction or Removal Efficiency and Monitoring Requirements.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix E	Test Methods and Compliance Procedures: Determining the Destruction or Removal Efficiency of a Control Device.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix F	Test Methods and Compliance Procedures: Leak Detection Methods for Volatile Organic Compounds (VOCs).	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix G	Performance Specifications for Continuous Emissions Monitoring of Total Hydrocarbons.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix H	Quality Control Procedures for Continuous Emission Monitoring Systems (CEMS).	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Appendix I	Method to Determine Length of Rolling Period for Liquid/Liquid Material Balance.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix K	Emission Estimation Methodologies	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix L	Method to Determine Total Organic Carbon for Offset Lithographic Solutions.	9/11/2008	8/11/2010, 75 FR 48566.	
Appendix M	Test Method for Determining the Performance of Alternative Cleaning Fluids.	9/11/2008	8/11/2010, 75 FR 48566.	
1125 Requirements for Preconstruction Review				
Section 1.0	General Provisions	8/11/2012	2/28/2013, 78 FR 13496	Added definitions of ''GHG'' and ''Subject to Regulation'' under Section 1.9. Note: In section 1.9, the previous SIP-approved baseline dates for sulfur dioxide, particulate matter, and nitrogen dioxide in the definition of ''Baseline Date'' remain part of the SIP.
Section 2.0	Emission Offset Provisions (EOP) including sections 1.0 through 3.16.4.	2/11/12	10/2/12, 77 FR 60053	Added Section 2.2.5, 2.4.3.3 and 2.5.7.
	Sections 2.5.5 and 2.5.6	9/11/2013	10/20/2016, 81 FR 72529	Disapproval. See 40 CFR 52.433(a).
Section 3.0	Prevention of Significant Deterioration of Air Quality.	1/11/2020	5/1/2020, 85 FR 25307	Docket #: 2019–0663. Revised 3.10.1 and 3.10.2. Note: Previous Section 3.0 approval October 2, 2012.
1126 Motor Vehicle Emissions Inspection Program				
Section 1.0	Applicability and General Provisions	9/11/2008	8/11/2010, 75 FR 48566	Regulation 1126 provisions apply to Sussex County only, effective November 1, 1999.
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Registration Requirement	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Exemptions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Enforcement	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Compliance, Waivers, Extensions of Time.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Inspection Facility Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Certification of Motor Vehicle Officers.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 9.0	Calibration and Test Procedures and Approved Equipment.	9/11/2008	8/11/2010, 75 FR 48566.	
Technical Memorandum 1.	Delaware Division of Motor Vehicles Vehicle Exhaust Emissions Test.	9/11/2008	8/11/2010, 75 FR 48566.	
Technical Memorandum 2.	(Motor Vehicle Inspection and Maintenance Program Emission Limit Determination).	9/11/2008	8/11/2010, 75 FR 48566.	
1127 Stack Heights				
Section 1.0	General Provisions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions Specific to this Regulation.	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 3.0	Requirements for Existing and New Sources.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Public Notification	9/11/2008	8/11/2010, 75 FR 48566.	
Regulation No. 31 Low Enhanced Inspection and Maintenance Program				
Section 1	Applicability	10/11/2001	11/27/2003, 68 FR 66343.	
Section 2	Low Enhanced I/M Performance Standard.	10/11/2001	1/27/2003, 68 FR 66343.	
Section 3	Network Type and Program Evaluation.	10/11/2001	11/27/2003, 68 FR 66343.	
Section 4	Test Frequency and Convenience	6/11/1999	9/30/1999, 64 FR 52657.	
Section 5	Vehicle Coverage	10/11/2001	1/27/2003, 68 FR 66343.	
Section 6	Test Procedures and Standards	10/11/2001	11/27/2003, 68 FR 66343.	
Section 7	Waivers and Compliance via Diagnostic Inspection.	10/11/2001	11/27/2003, 68 FR 66343.	
Section 8	Motorist Compliance Enforcement	10/11/2001	11/27/2003, 68 FR 66343.	
Section 9	Enforcement Against Operators and Motor Vehicle Technicians.	10/11/2001	11/27/2003, 68 FR 66343.	
Section 10	Improving Repair Effectiveness	8/13/1998	9/30/1999, 64 FR 52657.	
Section 11	Compliance with Recall Notices	8/13/1998	9/30/1999, 64 FR 52657.	
Section 12	On-Road Testing	8/13/1998	9/30/1999, 64 FR 52657.	
Section 13	Implementation Deadlines	10/11/2001	11/27/2003, 68 FR 66343.	
Appendix 1(d)	Commitment to Extend the I/M Program to the Attainment Date From Secretary Tulou to EPA Administrator W. Michael McCabe.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 3(a)(7)	Exhaust Emission Limits According to Model Year.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 3(c)(2)	VMASTM Test Procedure	6/11/1999	9/30/1999, 64 FR 52657.	
Appendix 4(a)	Sections from Delaware Criminal and Traffic Law Manual.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 5(a)	Division of Motor Vehicles Policy on Out of State Renewals.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 5(f)	New Model Year Clean Screen	10/11/2001	11/27/2003, 68 FR 66343.	
Appendix 6(a)	Idle Test Procedure	10/11/2001	1/27/2003, 68 FR 66343.	
Appendix 6(a)(5)	Vehicle Emission Repair Report Form.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 6(a)(8)	Evaporative System Integrity (Pressure) Test.	10/11/2001	11/27/2003, 68 FR 66343.	
Appendix 6(a)(9)	On-board Diagnostic Test Procedure OBD II Test Procedure.	10/11/2001	11/27/2003, 68 FR 66343.	
Appendix 7(a)	Emission Repair Technician Certification Process.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 8(a)	Registration Denial System Requirements Definition.	8/13/1998	9/30/1999, 64 FR 52657.	
Appendix 9(a)	Enforcement Against Operators and Inspectors.	10/11/2001	11/27/2003, 68 FR 66343.	
1132 Transportation Conformity				
Introductory Paragraph.	[No Title]	9/11/2008	8/11/2010, 75 FR 48566	Replaces the Prologue.
Section 1.0	Purpose	11/11/2007	4/22/2008, 73 FR 21538.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Consultation	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Written Commitments For Control and Mitigation Measures.	9/11/2008	8/11/2010, 75 FR 48566.	
1135 Conformity of General Federal Actions to the State Implementation Plans				
Section 1.0	Purpose	9/11/2008	8/11/2010, 75 FR 48566.	
Section 2.0	Definitions	9/11/2008	8/11/2010, 75 FR 48566.	
Section 3.0	Applicability	9/11/2008	8/11/2010, 75 FR 48566.	
Section 4.0	Conformity Analysis	9/11/2008	8/11/2010, 75 FR 48566.	
Section 5.0	Reporting Requirements	9/11/2008	8/11/2010, 75 FR 48566.	
Section 6.0	Public Participation and Consultation.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 7.0	Frequency of Conformity Determinations.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 8.0	Criteria for Determining Conformity of General Federal Actions.	9/11/2008	8/11/2010, 75 FR 48566.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DELAWARE SIP—Continued

State regulation (7 DNREC 1100)	Title/subject	State effective date	EPA approval date	Additional explanation
Section 9.0	Procedures for Conformity Determinations of General Federal Actions.	9/11/2008	8/11/2010, 75 FR 48566.	
Section 10.0	Mitigation of Air Quality Impacts	9/11/2008	8/11/2010, 75 FR 48566.	
Section 11.0	Savings Provision	9/11/2008	8/11/2010, 75 FR 48566.	
Regulation No. 37 NO_X Budget Program				
Section 1	General Provisions	12/11/1999	3/9/2000, 65 FR 12481.	
Section 2	Applicability	12/11/1999	3/9/2000, 65 FR 12481.	
Section 3	Definitions	12/11/99	3/9/00 65 FR 12481.	
Section 4	Allowance Allocation	12/11/1999	3/9/2000, 65 FR 12481.	
Section 5	Permits	12/11/1999	3/9/2000, 65 FR 12481.	
Section 6	Establishment of Compliance Accounts.	12/11/1999	3/9/2000, 65 FR 12481.	
Section 7	Establishment of General Accounts	12/11/1999	3/9/2000, 65 FR 12481.

Maintenance plan contained in ''Delaware Redesignation Request and Maintenance Plan Under the 1997 Annual $PM_{2.5}$ National Ambient Air Quality Standard For the New Castle County Portion of the Philadelphia-Wilmington, PA–NJ–DE Nonattainment Area for Fine Particles,'' dated November 27, 2012.	New Castle County	12/12/2012	8/5/2014, 79 FR 45350	See § 52.427(d).
Maintenance plan contained in ''Delaware Redesignation Request and Maintenance Plan Under the 2006 Daily $PM_{2.5}$ National Ambient Air Quality Standard For the New Castle County Portion of the Philadelphia-Wilmington, PA–NJ–DE Nonattainment Area for Fine Particles,'' dated November 27, 2012.	New Castle County	12/12/2012	8/5/2014, 79 FR 45350	See § 52.427(e).
2011 Base Year Inventories for the 2008 8-Hour Ozone National Ambient Air Quality Standard.	New Castle and Sussex Counties.	4/23/2015	10/1/2015, 80 FR 59052	§ 52.423(e).
Reasonably Available Control Technology under 2008 8-hour ozone National Ambient Air Quality Standard.	Statewide	5/4/2015	12/8/2017, 82 FR 57849.	
Emissions Statements Rule Certification for the 2008 Ozone NAAQS.	Delaware's portions of the Philadelphia-Wilmington-Atlantic City, PA–NJ–MD–DE 2008 ozone NAAQS nonattainment area (i.e. New Castle County) and the Seaford 2008 ozone NAAQS nonattainment area (i.e. Sussex County).	6/29/2018	7/5/2019, 84 FR 32068	Certification that Delaware's SIP-approved regulations under 7 DE Administrative Code 1117 Section 7.0 Emission Statement meet the emissions statements requirements of CAA section 182(a)(3)(B) for the 2008 ozone NAAQS.
Negative Declaration for the 2016 Oil and Gas Control Technology Guidelines.	Statewide	6/28/2018	7/9/2019, 84 FR 32624.	
2008 8-Hour Ozone Certification for Nonattainment New Source Review (NNSR).	Delaware portion of the Philadelphia-Wilmington-Atlantic City, nonattainment area and the Seaford, Delaware nonattainment area.	6/29/2018	8/12/2019, 84 FR 39758.	
Section 110(a)(2) Infrastructure Requirements for the 2015 Ozone NAAQS.	Statewide	10/11/2018	5/1/2020, 85 FR 25307	Docket #: 2019–0663. This action addresses CAA section 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M).

[63 FR 67410, Dec. 7, 1998]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.420, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.421 Classification of regions.

The Delaware plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Philadelphia Interstate	I	I	III	I	I
Southern Delaware Intrastate	III	III	III	III	III

[37 FR 10856, May 31, 1972, as amended at 39 FR 16345, May 8, 1974]

§ 52.422 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Delaware's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) Letter of February 26, 1993, from the Delaware Department of Natural Resources and Environmental Control transmitting a commitment to adopt either the Federal clean fuel fleet program or an alternative substitute program by May 15, 1994.

[45 FR 14558, Mar. 6, 1980, as amended at 58 FR 50848, Sept. 29, 1993; 78 FR 33984, June 6, 2013]

§ 52.423 Base year emissions inventory.

EPA approves as a revision to the Delaware State Implementation Plan the 1990 base year emission inventories for the Delaware ozone nonattainment areas submitted by the Secretary of the Department of Natural Resources and Environmental Control on May 27, 1994. This submittal consists of the 1990 base year point, area, non-road mobile, biogenic and on-road mobile source emission inventories in area for the following pollutants: volatile organic compounds (VOC), carbon monoxide (CO), and oxides of nitrogen (NO_X).

(a) [Reserved]

(b) EPA approves as a revision to the Delaware State Implementation Plan the 2002 base year emissions inventories for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area submitted by the Secretary of the Department of Natural Resources and Environmental Control on June 13, 2007. This submittal consists of the 2002 base year point, area, non-road mobile, and on-road mobile source inventories in area for the following pollutants: Volatile organic compounds (VOC), carbon monoxide (CO) and nitrogen oxides (NO_X).

(c) EPA approves as a revision to the Delaware State Implementation Plan for the 2002 base year emissions inventory for the Delaware 1997 annual fine particulate matter ($PM_{2.5}$) nonattainment area submitted by the Delaware Department of Natural Resources and Environmental Control on April 3, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_X), volatile organic compounds (VOCs), $PM_{2.5}$, coarse particles (PM_{10}), ammonia (NH_3), and sulfur dioxide (SO_2).

(d) EPA approves as a revision to the Delaware State Implementation Plan the comprehensive emissions inventory for the Delaware portion of the Philadelphia-Wilmington, PA–NJ–DE 2006 24-hour fine particulate matter ($PM_{2.5}$)

nonattainment area submitted by the Delaware Department of Natural Resources and Environmental Control on December 12, 2012. The 2007 year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources for New Castle County, Delaware. The pollutants that comprise the inventory are nitrogen oxides (NO_X), volatile organic compounds (VOCs), $PM_{2.5}$, ammonia (NH_3), and sulfur dioxide (SO_2).

(e) EPA approves as a revision to the Delaware State Implementation Plan the 2011 base year emissions inventory for New Castle and Sussex Counties for the 2008 8-hour ozone national ambient air quality standard submitted by the Delaware Department of the Natural Resources and Environmental Control on April 23, 2015. The 2011 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, nonroad mobile sources, area sources, onroad mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_X), volatile organic compounds (VOC), and carbon monoxide (CO).

[61 FR 1841, Jan. 24, 1996, as amended at 75 FR 17865, Apr. 8, 2010; 78 FR 14022, Mar. 4, 2013; 79 FR 45353, Aug. 5, 2014; 80 FR 59054, Oct. 1, 2015]

§ 52.424 Conditional approval.

(a)–(d) [Reserved]

[62 FR 27197, May 19, 1997, as amended at 63 FR 1368, Jan. 9, 1998; 63 FR 16435, Apr. 3, 1998; 64 FR 32189, June 16, 1999; 64 FR 52660, Sept. 30, 1999; 64 FR 55141, Oct. 12, 1999; 66 FR 9211, Feb. 7, 2001; 66 FR 32234, June 14, 2001]

§ 52.425 Determinations of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2008 to 2010, EPA determined that Philadelphia-Wilmington-Atlantic City, PA–NJ–MD–DE 8-hour ozone moderate nonattainment area (the Philadelphia Area) attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of June 15, 2011. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia Area nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Philadelphia-Wilmington, PA-NJ-DE fine particle ($PM_{2.5}$) nonattainment area attained the 1997 annual $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia-Wilmington, PA-NJ-DE $PM_{2.5}$ nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Seaford, DE 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Seaford nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

(d) Based upon EPA's review of the air quality data for the 3-year period 2013 to 2015, Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE marginal ozone nonattainment area has attained the 2008 8-hour ozone national ambient air quality standard (NAAQS) by the applicable attainment date of July 20, 2016. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE marginal ozone

nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

[77 FR 17343, Mar. 26, 2012, as amended at 77 FR 28784, May 16, 2012; 81 FR 26709, May 4, 2016; 82 FR 50819, Nov. 2, 2017]

§ 52.426 Control strategy plans for attainment and rate-of-progress: ozone.

(a) EPA fully approves, as a revision to the Delaware State Implementation Plan, the 15 Percent Rate of Progress Plan for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment, namely Kent and New Castle Counties, submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on February 17, 1995.

(b)(1) EPA approves revisions to the Delaware State Implementation Plan consisting of the Post 1996 ROP plans for milestone years 1999, 2002, and 2005 for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area, namely Kent and New Castle Counties. These revisions were submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on December 29, 1997, and revised on June 17, 1999, February 3, 2000, and December 20, 2000.

(2) EPA approves Delaware's contingency plans for failure to meet ROP in the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area, namely Kent and New Castle Counties, for milestone years 1999, 2002 and 2005. These revisions were submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on December 29, 1997, June 17, 1999, February 3, 2000, and December 20, 2000.

(c) EPA approves the attainment demonstration SIP for the Philadelphia-Wilmington-Trenton area submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on May 22, 1998, and amended October 8, 1998, January 24, 2000, December 20, 2000, and October 9, 2001 including its RACM analysis and determination. EPA is approving the enforceable commitments made to the attainment plan for the Philadelphia-Wilmington-Trenton severe ozone nonattainment area submitted by the Secretary of Delaware Department of Natural Resources and Environmental Control on January 24, 2000 and December 20, 2000. The enforceable commitments are to:

(1) Submit measures by October 31, 2001 for additional emission reductions as required in the attainment demonstration test, and to revise the SIP and motor vehicle emissions budgets by October 31, 2001 if the additional measures affect the motor vehicle emissions inventory,

(2) [Reserved]

(3) Perform a mid-course review by December 31, 2003.

(d) EPA is approving the following mobile budgets, explicitly quantified as sub-budgets for each of Kent and New Castle Counties, of the Post 1996 ROP Plans and the 1–Hour Ozone Attainment Demonstration Plan:

TRANSPORTATION CONFORMITY EMISSION BUDGETS FOR THE DELAWARE PORTION OF THE PHILADELPHIA AREA

Type of control strategy SIP	Year	Kent County		New Castle County		Effective date of adequacy determination or SIP approval
		VOC	NO_X	VOC	NO_X	
Post-1996 ROP Plan	1999	7.55	11.17	22.49	29.41	April 29, 1999, (64 FR 31217, published June 10, 1999).
Post-1996 ROP Plan	2002	6.30	9.81	18.44	27.29	June 23, 2000, (65 FR 36440, published June 8, 2000).
Post-1996 ROP Plan	2005	4.84	7.90	14.76	22.92	May 2, 2001, (66 FR 19769, published April 17, 2001).
Attainment Demonstration	2005	5.14	8.42	15.08	21.28	SIP approval on December 5, 2003; Effective on February 3, 2004.

(1)–(2) [Reserved]

(e) EPA approves Delaware's revised 2005 VOC and NO_X motor vehicle emission budgets for the 1-hour ozone attainment plan for the Delaware portion of the Philadelphia-Wilmington-Trenton severe ozone nonattainment area as a SIP revision. The revisions were submitted by the Delaware Department of Natural Resources and Environmental Control on September 2, 2003. Submittal of these revised MOBILE6-based motor vehicle emissions budgets was a requirement of EPA's approval of the attainment demonstration under paragraph (c) of this section.

(f) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Philadelphia-Wilmington-Trenton severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

(g) EPA approves revisions to the Delaware State Implementation Plan consisting of the 2008 reasonable further progress (RFP) plan, reasonably available control measures, and contingency measures for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area submitted by the Secretary of the Department of Natural Resources and Environmental Control on June 13, 2007.

(h) EPA approves the following 2008 RFP motor vehicle emissions budgets (MVEBs) for the Delaware portion of the Philadelphia 1997 8-hour ozone moderate nonattainment area submitted by the Secretary of the Department of Natural Resources and Environmental Control on June 13, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE DELAWARE PORTION OF THE PHILADELPHIA AREA FOR THE 2008 RATE OF PROGRESS PLAN

County	2008 Emissions (tons per day)		Effective date of adequacy determination or SIP approval
	VOC	NO_X	
Kent	4.14	9.68	January 5, 2009, (73 FR 77682), published December 19, 2008.
New Castle	10.61	21.35	
Sussex	7.09	12.86	
State Total	21.84	43.89	

(i) *Determination of attainment.* EPA has determined, as of March 26, 2012, that based on 2008 to 2010 ambient air quality data, Philadelphia-Wilmington-Atlantic City, PA–NJ–MD–DE 8-hour ozone moderate nonattainment area has attained the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual 8-hour ozone NAAQS.

[64 FR 55141, Oct. 12, 1999, as amended at 66 FR 54614, Oct. 29, 2001; 68 FR 67952, Dec. 5, 2003; 73 FR 43361, July 25, 2008; 75 FR 17865, Apr. 8, 2010; 77 FR 17343, Mar. 26, 2012]

§ 52.427 Control strategy: Particulate matter.

(a) *Determination of attainment.* EPA has determined, as of *May 16, 2012*, that based on 2007 to 2009 and 2008 to 2010 ambient air quality data, the Philadelphia-Wilmington, PA-NJ-DE nonattainment area has attained the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(*b*) *Determination of Attainment.* EPA has also determined, as of January 7,

2013, that based on 2008 to 2010 and 2009 to 2011 ambient air quality data, the Philadelphia-Wilmington, PA-NJ-DE fine particulate matter ($PM_{2.5}$) nonattainment area has attained the 2006 24-hour $PM_{2.5}$ national ambient air quality standards (NAAQS). This determination suspends the requirements for the State of DE to submit, for the Philadelphia-Wilmington, PA-NJ-DE $PM_{2.5}$ nonattainment area, an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 2006 24-hour $PM_{2.5}$ NAAQS.

(c) EPA approves the attainment plan for the 1997 annual fine particulate matter ($PM_{2.5}$) national ambient air quality standard (NAAQS) for the Philadelphia-Wilmington, Pennsylvania-New Jersey-Delaware nonattainment area submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on April 3, 2008, as amended on April 25, 2012. The attainment plan includes the attainment demonstration and motor vehicle emission budgets in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware. The attainment plan also includes an analysis of reasonably available control measures and reasonably available control technology, contingency measures and the 2002 base year emissions inventory. The 2002 base year emissions inventory was approved in a separate rulemaking action on March 4, 2013 (78 FR 10420).

DELAWARE'S MOTOR VEHICLE EMISSION BUDGETS FOR THE 1997 ANNUAL $PM_{2.5}$ NAAQS

Type of control strategy SIP	Year	VOC	NO_X
Attainment Plan (Milestone Year)	2009	257	8,448
Attainment Plan (Out Year)	2012	199	6,273

(d) EPA approves the maintenance plan for the Delaware portion of the Philadelphia-Wilmington, PA–NJ–DE $PM_{2.5}$ Nonattainment Area (New Castle County) for the 1997 annual fine particulate matter ($PM_{2.5}$) national ambient air quality standard (NAAQS) submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on December 12, 2012. The maintenance plans include motor vehicle emission budgets in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware.

NEW CASTLE COUNTY MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 1997 ANNUAL $PM_{2.5}$ NAAQS

[tpy]

Type of control strategy SIP	Year	NO_X	$PM_{2.5}$	Effective date of SIP approval
Maintenance Plan	2017 Interim Budget	6,273	199	9/4/2014
	2025 Final Budget	6,273	199	

(e) EPA approves the maintenance plan for the Delaware portion of the Philadelphia-Wilmington, PA–NJ–DE $PM_{2.5}$ Nonattainment Area (New Castle County) for the 2006 24-hour fine particulate matter ($PM_{2.5}$) national ambient air quality standard (NAAQS) submitted by the Secretary of the Delaware Department of Natural Resources and Environmental Control on December 12, 2012. The maintenance plans include motor vehicle emission budgets in tons per year (tpy) used for transportation conformity purposes for New Castle County, Delaware.

NEW CASTLE COUNTY MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 2006 24-HOUR $PM_{2.5}$ NAAQS

[tpy]

Type of control strategy SIP	Year	NO_X	$PM_{2.5}$	Effective date of SIP approval
Maintenance Plan	2017 Interim Budget	6,273	199	9/4/2014
	2025 Final Budget	6,273	199	

[77 FR 28784, May 16, 2012, as amended at 78 FR 885, Jan. 7, 2013; 78 FR 76211, Dec. 17, 2013; 79 FR 45353, Aug. 5, 2014]

§§ 52.428–52.429 [Reserved]

§ 52.430 Photochemical Assessment Monitoring Stations (PAMS) Program.

On March 24, 1994 the Delaware Department of Natural Resources & Environmental Control submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the Delaware SIP. As with all components of the SIP, Delaware must implement the program as submitted and approved by EPA.

[60 FR 47084, Sept. 11, 1995]

§ 52.431 [Reserved]

§ 52.432 Significant deterioration of air quality.

(a) [Reserved]

(b) Regulation for preventing significant deterioration of air quality. The provisions of 52.21(p) are hereby incorporated and made a part of the applicable State plan for the State of Delaware.

(c) All applications submitted as of that date and supporting information required pursuant to § 52.21 from sources located in the State of Delaware shall be submitted to: Delaware Department of Natural Resources and Environmental Control, Air Resources Section, Division of Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19901.

[78 FR 33984, June 6, 2013]

§ 52.433 Nonattainment new source review.

(a) *Disapproval.* EPA is disapproving Delaware's October 15, 2013 submittal of revisions to 7 DNREC 1125, sections 2.5.5 and 2.5.6 because it does not meet Clean Air Act (CAA) requirements which establish the criteria under which the owner or operator of a new or modified major stationary source must obtain the required emission offsets for the nonattainment new source review (NSR) preconstruction permitting program and because Delaware exercises authorities that are reserved for EPA under section 107 of the CAA. Delaware's Federally-approved nonattainment NSR preconstruction program in 7 DNREC 1125, sections 1.0 through 3.16.4, effective in Delaware on February 11, 2012, was fully-approved by EPA on October 2, 2012 and continues to apply.

(b) [Reserved]

[81 FR 72537, Oct. 20, 2016]

§ 52.440 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the State of Delaware and for which requirements are set forth under the Federal CAIR NO_X Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan (SIP) as meeting the requirements of CAIR for $PM_{2.5}$ relating to NO_X under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_X allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X allowances for those years.

(b)(1) The owner and operator of each NO_X source located within the State of Delaware and for which requirements are set forth under the Federal CAIR NO_X Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_X under §51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under §51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_X Ozone Season allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_X annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR NO_X allowances or CAIR NO_X Ozone Season allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_X Allowance Tracking System accounts all CAIR NO_X allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_X Ozone Season Allowance Tracking System accounts all CAIR NO_X Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

[72 FR 62344, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.441 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each SO_2 source located within the State of Delaware and for which requirements are set forth under the Federal CAIR SO_2 Trading Program in subparts AAA through III of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Delaware State Implementation Plan as meeting the requirements of CAIR for $PM_{2.5}$ relating to SO_2 under §51.124 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under §51.124(r) of this chapter.

(b) Notwithstanding any provisions of paragraph (a) of this section and subparts AAA through III of part 97 of this chapter and any State's SIP to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions of paragraph (a) of this section relating to SO_2 emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AAA

through III of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR SO_2 allowances allocated for 2015 or any year thereafter.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.460 Small business stationary source technical and environmental compliance assistance program.

(a) On January 11, 1993, the Director of the Delaware Department of Natural Resources and Environmental Control submitted a plan for the establishment and implementation of a Small Business Stationary Source Technical and Environmental Compliance Assistance Program as a State Implementation Plan revision, as required by title V of the Clean Air Act. EPA approved the Small Business Stationary Source Technical and Environmental Compliance Assistance Program on May 17, 1994, and made it a part of the Delaware SIP. As with all components of the SIP, Delaware must implement the program as submitted and approved by EPA.

[59 FR 25572, May 17, 1994]

§ 52.465 Original identification of plan section.

(a) This section identifies the original ''Air Implementation Plan for the State of Delaware'' and all revisions submitted by Delaware that were federally approved prior to July 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[78 FR 33984, June 6, 2013]

Subpart J—District of Columbia

§ 52.470 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for the District of Columbia under section 110 of the Clean Air Act (42 U.S.C. 7401) and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to May 14, 2018, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after May 14, 2018 for the District of Columbia, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region III certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of the dates referenced in paragraph (b)(1) of this section. No additional revisions were made to paragraph (d) of this section between July 1, 2016 and May 14, 2018.

(3) Copies of the materials incorporated by reference into the State implementation plan may be inspected at the Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. To obtain the material, please call the Regional Office at (215) 814–3376. You may also inspect the material with an EPA approval date prior to July 1, 2016 for the District of Columbia at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

(c) *EPA-approved regulations.*

EPA-APPROVED REGULATIONS AND STATUTES IN THE DISTRICT OF COLUMBIA SIP

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
District of Columbia Municipal Regulations (DCMR), Title 20—Environment				
Chapter 1 General				
Section 100	Purpose, Scope and Construction.	12/30/2011	4/29/2013, 78 FR 24992	Paragraph 100.4 is revised.
Section 101	Inspection	3/15/1985	8/28/1995, 60 FR 44431.	
Section 102	Orders for Compliance	3/15/1985	8/28/1995, 60 FR 44431.	
Section 104	Hearings	3/15/1985	8/28/1995, 60 FR 44431.	
Section 105	Penalty	3/15/1985	8/28/1995, 60 FR 44431.	
Section 106	Confidentiality of Reports	3/15/1985	8/28/1995, 60 FR 44431.	
Section 107	Control Devices or Practices	3/15/1985	8/28/1995, 60 FR 44431.	
Section 199	Definitions and Abbreviations	12/14/2018	2/24/2020, 85 FR 10295	Revised Sections 199.1 and 199.2. Added six definitions to Section 199.1 and an abbreviation for ''ppmvd'' to read ''(Parts Per Million by Volume Dry Basis)'' to Section 199.2. Prior Approval was 5/1/2017.
Section 8–2: 702 ..	Definitions; Definition of ''stack''	7/7/1972	9/22/1972, 37 FR 19806.	
Section 8–2: 724 ..	Variances	7/7/1972	9/22/1972, 37 FR 19806.	
Chapter 2 General and Non-attainment Area Permits				
Section 200	General Permit Requirements ...	11/16/2012	3/19/2015, 80 FR 14310.	
Section 201	General Requirements for Permit Issuance.	4/29/1997	7/31/1997, 62 FR 40937.	
Section 202	Modification, Revocation and Termination of Permits.	4/29/1997	7/31/1997, 62 FR 40937.	
Section 204	Permit Requirements for Sources Affecting Non-attainment Areas.	11/16/2012	3/19/2015, 80 FR 14310	Previous version of Section 204 is replaced in its entirety
Section 208	Plantwide Applicability Limit (PAL) Permits for Major Sources.	11/16/2012	3/19/2015, 80 FR 14310	Added
Section 210	Notice and Comment Prior to Permit Issuance.	11/16/2012	3/19/2015, 80 FR 14310	Added
Section 299	Definitions and Abbreviations	11/16/2012	3/19/2015, 80 FR 14310.	
Section 8–2:720(c)	Permits to Construct or Modify; Permits to Operate.	7/7/1972	9/22/1972, 37 FR 19806	Requirement for Operating Permit.
Chapter 3 Operating Permits				
Section 307	Enforcement for Severe Ozone Nonattainment Areas.	4/16/2004	12/28/2004, 69 FR 77639	Provision allowing for the District to collect penalty fees from major stationary sources if the nonattainment area does not attain the ozone standard by the statutory attainment date.
Chapter 4 Ambient Monitoring, Emergency Procedures, and Chemical Accident Prevention				
Section 400	Air Pollution Reporting Index	3/15/1985	8/28/1995, 60 FR 44431.	
Section 401	Emergency Procedures	3/15/1985	8/28/1995, 60 FR 44431.	
Section 499	Definitions and Abbreviations	3/15/1985	8/28/1995, 60 FR 44431.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DISTRICT OF COLUMBIA SIP—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Chapter 5 Source Monitoring and Testing				
Sections 500.1 through 500.3.	Records and Reports	3/15/1985	8/28/1995, 60 FR 44431.	
Sections 500.4, 500.5.	Records and Reports	9/30/1993	6/12/2019, 84 FR 27202	Approved into the SIP on January 26, 1995. Administrative updates.
Section 500.6	Records and Reports	9/30/1993	6/12/2019, 84 FR 27202	Approved into the SIP on January 26, 1995. Administrative updates.
Section 500.7	Records and Reports	9/30/1993	6/12/2019, 84 FR 27202	Approved into the SIP on January 26, 1995. Administrative updates.
Section 500.8	Records and Reports	9/3/1993	6/12/2019, 84 FR 27202	Approved into the SIP on October 27, 1999. Administrative updates.
Section 500.9	Records and Reports—Emissions Statements.	9/30/1993	6/12/2019, 84 FR 27202	Approved into the SIP on May 26, 1995. Administrative updates.
Section 501	Monitoring Devices	3/15/1985	8/28/1995, 60 FR 44431.	
Sections 502.1 through 502.15.	Sampling, Tests, and Measurements.	8/16/2015	5/1/2017, 82 FR 20270	Updates to sampling and testing practices for fuel oils. Exceptions: Paragraphs 502.11, 502.12 and 502.14 are not part of the SIP.
Section 502.17	Sampling Tests, and Measurements.	9/30/1993	10/27/1999, 64 FR 57777.	
Section 502.18	Sampling, Tests and Measurements.	12/8/2000	5/9/2001, 66 FR 23614.	
Section 599	Definitions and Abbreviations	9/30/1993	10/27/1999, 64 FR 57777.	
Chapter 6 Particulates				
Section 600	Fuel-Burning Particulate Emissions.	4/16/2004	12/28/2004, 69 FR 77645	Revision to paragraph 600.1.
Section 601	Rotary Cup Burners	3/15/1985	8/28/1995, 60 FR 44431.	
Section 602	Incinerators	3/15/1985	8/28/1995, 60 FR 44431.	
Section 603	Particulate Process Emissions	3/15/1985	8/28/1995, 60 FR 44431.	
Section 604	Open Burning	3/15/1985	8/28/1995, 60 FR 44431.	
Section 605	Control of Fugitive Dust	3/15/1985	8/28/1995, 60 FR 44431.	
Section 606	Visible Emissions	3/15/1985	8/28/1995, 60 FR 44431.	
Section 699	Definitions and Abbreviations	3/15/1985	8/28/1995, 60 FR 44431.	
Chapter 7 Volatile Organic Compounds				
Section 700	Miscellaneous Volatile Organic Compounds.	12/30/2011	4/29/2013, 78 FR 24992	Title changed.
Section 701.1 through 701.13.	Storage of Petroleum Products	3/15/1985	10/27/1999, 64 FR 57777.	
Section 702	Control of Volatile Organic Compound Leaks from Petroleum Refinery Equipment.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 703.2, 703.3.	Terminal Vapor Recovery—Gasoline or Volatile Organic Compound.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 703.1, 703.4 through 703.7.	Terminal Vapor Recovery—Gasoline or Volatile Organic Compound.	9/30/1993	10/27/1999, 64 FR 57777.	

EPA-APPROVED REGULATIONS AND STATUTES IN THE DISTRICT OF COLUMBIA SIP—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Section 704	Stage I Vapor Recovery	3/15/1985	10/27/1999, 64 FR 57777.	
Section 705.1 through 705.3.	Stage II Vapor Recovery	9/30/1993	10/27/1999, 64 FR 57777.	
Section 705.4 through 705.14.	Stage II Vapor Recovery	3/15/1985	10/27/1999, 64 FR 57777.	
Section 706	Petroleum Dry Cleaners	3/15/1985	10/27/1999, 64 FR 57777.	
Section 709	Asphalt Operations	3/15/1985	10/27/1999, 64 FR 57777.	
Section 710	Intaglio, Flexographic, and Rotogravure Printing.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 711	Pumps and Compressors	3/15/1985	10/27/1999, 64 FR 57777.	
Section 712	Waste Gas Disposal from Ethylene Producing Plant.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 713	Waste Gas Disposal from Vapor Blow-down Systems.	3/15/1985	10/27/1999, 64 FR 57777.	
Section 714	Control Techniques Guidelines	12/9/2016	9/10/2019, 84 FR 47437	Revised.
Section 715	Major Source and Case-By-Case Reasonably Available Control Technology (RACT).	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 716	Offset Lithography and Letterpress Printing.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 718	Motor Vehicle and Mobile Equipment Non-Assembly Line Coating Operations.	12/9/2016	9/10/2019, 84 FR 47437	Title Changed. Revised.
Section 719	Consumer Products—General Requirements.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 720	Consumer Products—VOC Standards.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 721	Consumer Products—Exemptions from VOC Standards.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 722	Consumer Products—Registered Under FIFRA.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 723	Consumer Products—Products Requiring Dilution.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 724	Consumer Products—Ozone Depleting Compounds.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 725	Consumer Products—Aerosol Adhesives.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 726	Consumer Products—Antiperspirants Or Deodorants.	12/30/2011	4/29/2013, 78 FR 24992.	
Section 727	Consumer Products—Contact Adhesives, Electronic Cleaners, Footwear And Leather Care Products, And General Purpose Degreasers.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 728	Consumer Products—Adhesive Removers, Electrical Cleaners, And Graffiti Removers.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 729	Consumer Products—Solid Air Fresheners And Toilet/Urinal Care Products.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 730	Consumer Products—Charcoal Lighter Materials.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 731	Consumer Products—Floor Wax Strippers.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 732	Consumer Products—Labeling Of Contents.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 733	Consumer Products—Reporting Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 734	Consumer Products—Test Methods.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 735	Consumer Products—Alternative Control Plans.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 736	Consumer Products—Innovative Products Exemption.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 737	Consumer Products—Variance Requests.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 743	Adhesives and Sealants—General Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 744	Adhesives and Sealants—VOC Standards.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.

Section 753	Portable Fuel Containers and Spouts—Exemptions.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 754	Portable Fuel Containers and Spouts—Labeling Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Title Changed.
Section 755	Portable Fuel Containers and Spouts—Certification and Compliance Test Procedures.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 756	Portable Fuel Containers and Spouts—Enforcement.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 757	Portable Fuel Containers and Spouts—Innovative Product Exemption.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 758	Portable Fuel Containers and Spouts—Variance.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 763	Solvent Cleaning—General Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 764	Solvent Cleaning—Cold Cleaning.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 765	Solvent Cleaning—Batch Vapor Cleaning.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 766	Solvent Cleaning—In-Line Vapor Cleaning.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 767	Solvent Cleaning—Airless and Air-Tight Cleaning.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 768	Solvent Cleaning—Alternative Compliance.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 769	Solvent Cleaning—Recordkeeping and Monitoring.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 770	Miscellaneous Industrial Solvent Cleaning Operations.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 771	Miscellaneous Cleaning and VOC Materials Handling Standards.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 773	Architectural and Industrial Maintenance Coating—General Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 774	Architectural and Industrial Maintenance Coating—Standards.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 775	Architectural and Industrial Maintenance Coating—Exemptions.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 776	Architectural and Industrial Maintenance Coating—Labeling Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 777	Architectural and Industrial Maintenance Coating—Reporting Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.
Section 778	Architectural and Industrial Maintenance Coating—Testing Requirements.	12/30/2011	4/29/2013, 78 FR 24992	Section Added.

EPA-APPROVED REGULATIONS AND STATUTES IN THE DISTRICT OF COLUMBIA SIP—Continued

State citation	Title/subject	State effective date	EPA approval date	Additional explanation
Section 799	Definitions	12/9/2016	9/10/2019, 84 FR 47437	Revised. Previous Approval dated 4/29/13.
Chapter 8 Asbestos, Sulfur and Nitrogen Oxides				
Section 801	Sulfur Content of Fuel Oils	8/16/2015	5/1/2017, 82 FR 20270 ...	Updates to the sulfur content of No. 2 and No.4 fuel oils and the prohibition of the use of No. 5 fuel oil.
Section 802	Sulfur Content of Coal	3/15/1985	8/28/1995, 60 FR 44431.	
Section 803	Sulfur Process Emissions	3/15/1985	8/28/1995, 60 FR 44431.	
Section 804	Nitrogen Oxide Emissions	3/15/1985	8/28/1995, 60 FR 44431.	
Section 805	Reasonably Available Control Technology for Major Stationary Sources of Oxides of Nitrogen.	12/14/2018	2/24/2020, 85 FR 10295	Revised paragraphs 805.1(a), 805.1(a)(1), 805.1(a)(2) and 805.4(b). Added paragraphs 805.1(a)(3) through (7).
Section 899	Definitions and Abbreviations	8/16/2015	5/1/2017, 82 FR 20270 ...	Addition of new definitions that relate to the handling and storage of fuel oil.
Chapter 9 Motor Vehicle Pollutants, Lead, Odors, and Nuisance Pollutants				
Section 904	Oxygenated Fuels	7/25/1997	5/9/2001, 66 FR 23614 ...	Addition of subsection 904.3 to make the oxygenated gasoline program a CO contingency measure.
Section 915	National Low Emissions Vehicle Program.	2/11/2000	7/20/2000, 65 FR 44981.

EPA-APPROVED DISTRICT OF COLUMBIA SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit number	State effective date	EPA approval date	Additional explanation
General Services Administration Central Heating and Refrigeration Plant and West Heating Plant.	N/A—it is the operating permit issued to GSA by the District of Columbia on October 17, 1997.	10/17/1997	9/30/1999, 64 FR 52654	The following portions of GSA's operating permit are not included in the SIP: The portion of Condition 3 referring to Table 1; Table 1; Condition 4; Table 3; and Condition 17.
Blue Plains Advanced Wastewater Treatment Plant.	No. 6372–C2/O	4/20/2018	2/24/2020, 85 FR 10295	See § 52.479(a) for further explanation.

(e) *EPA-approved non-regulatory and quasi-regulatory material.*

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
1990 Base Year Emissions Inventory.	Washington, DC carbon monoxide maintenance area.	1/13/1994, 10/12/1995	1/30/1996, 61 FR 2931	52.474(a) CO.
1990 Base Year Emissions Inventory.	Metropolitan Washington ozone nonattainment area.	1/13/1994	4/23/1997, 62 FR 19676	52.474(b) VOC, NO_x, CO.

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
1990 Base Year Emissions Inventory.	Metropolitan Washington ozone nonattainment area.	11/3/1997	7/8/1998, 63 FR 36854	52.474(c) VOC, NO_X.
15% Rate of Progress Plan.	Metropolitan Washington Ozone Nonattainment Area.	4/16/1998	8/5/1999, 64 FR 42600	52.476(a).
Negative Declarations—VOC Source Categories.	Metropolitan Washington ozone nonattainment area.	4/8/1993, 9/4/1997	10/27/1999, 64 FR 57777	52.478(a), 52.478(b).
Negative Declarations—VOC Source Categories.	Metropolitan Washington ozone nonattainment area.	1/26/2010, 3/24/2011	4/29/2013, 78 FR 24992	52.478(c).
Photochemical Assessment Monitoring Stations (PAMS) Program.	Metropolitan Washington ozone nonattainment area.	1/14/1994	9/11/1995, 60 FR 47081	52.480.
Small Business stationary source technical and environmental compliance assistance program.	Statewide	10/22/1993	8/17/1994, 59 FR 42165	52.510.
Establishment of air quality monitoring Network.	Statewide	5/16/1979	8/31/1981, 46 FR 43676	Subpart I, section 52.465(c)(18).
Lead (Pb) SIP	Washington, DC	10/7/1982	8/18/1983, 48 FR 37401	52.515(c)(22).
Plan for public notification of air quality.	Metropolitan Washington ozone nonattainment area.	12/5/1983	6/1/1984, 49 FR 22810	52.515(c)(23).
Carbon Monoxide Maintenance Plan.	Washington, DC	10/12/1995, 3/9/2004	1/30/1996, 61 FR 2931 4/4/2002, 70 FR 16958	52.515(c)(36) Revised Carbon Monoxide Maintenance Plan Base Year Emissions Inventory using MOBILE6.
1996–1999 Rate-of-Progress plan SIP.	Washington 1-hour ozone nonattainment area.	11/3/1997, 5/25/1999	5/13/2005, 70 FR 25688	1999 motor vehicle emissions budgets of 128.5 tons per day (tpy) of VOC and 196.4 tpy of NOx, effective 6/13/05.
1990 Base Year inventory Revisions.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
1999-2005 Rate-of-Progress Plan SIP Revision and the Transportation Control Measures (TCMs) in Appendix J.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Only the TCMs in Appendix J of the 2/25/2004 revision, 2002 motor vehicle emissions budgets (MVEBs) of 125.2 tons per day (tpy) for VOC and 290.3 tpy of NOx, and, 2005 MVEBs of 97.4 tpy for VOC and 234.7 tpy of NOx, effective 6/13/2005.
VMT Offset SIP Revision	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
Contingency Measure Plan.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	Effective date: 6/13/2005.
1-hour Ozone Modeled Demonstration of Attainment and Attainment Plan.	Washington 1-hour ozone nonattainment area.	9/5/2003, 2/25/2004	5/13/2005, 70 FR 25688	2005 motor vehicle emissions budgets of 97.4 tons per day (tpy) for VOC and 234.7 tpy of NOx, effective 6/13/2005.
RACT under the 8-Hour ozone NAAQS.	District of Columbia	9/22/2008	6/16/2009, 74 FR 28447	
Section 110(a)(2) Infrastructure Requirements for the 1997 8-Hour Ozone NAAQS.	District of Columbia	12/06/2007, 1/11/2008	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
Section 110(a)(2) Infrastructure Requirements for the 1997 $PM_{2.5}$ NAAQS.	District of Columbia	8/25/2008, 9/22/2008	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2006 $PM_{2.5}$ NAAQS.	District of Columbia	9/21/2009	4/12/2011, 76 FR 20237	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Reasonable Further Progress Plan (RFP), Reasonably Available Control Measures, and Contingency Measures.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
2002 Base Year Inventory for VOC, NO_X, and CO.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
2008 RFP Transportation Conformity Budgets.	Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area.	6/12/2007	9/20/2011, 76 FR 58116	
Regional Haze Plan	District of Columbia	10/27/2011	2/2/2012, 77 FR 5191	
2002 Base Year Emissions Inventory for the 1997 fine particulate matter ($PM_{2.5}$) standard.	District of Columbia portion of the Washington DC–MD–VA 1997 $PM_{2.5}$ nonattainment area.	4/2/2008	10/30/2012, 77 FR 65630	§ 52.474(e)
Section 110(a)(2) Infrastructure Requirements for the 2008 Lead NAAQS.	District of Columbia	7/18/2013	10/22/2013, 78 FR 62455	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M), or portions thereof.
CAA section 128 requirements in relation to State Boards.	District of Columbia	7/18/2013	10/22/2013, 78 FR 62455	
Maintenance plan for the District of Columbia Portion of the Washington, DC–MD–VA Nonattainment Area for the 1997 annual fine particulate matter ($PM_{2.5}$) National Ambient Air Quality Standard.	District of Columbia	6/3/2013, 7/22/2013	10/6/2014, 79 FR 60081	See § 52.477(b).
Attainment Demonstration Contingency Measure Plan.	Washington, DC-MD-VA 1997 8-Hour Ozone Nonattainment Area.	6/12/2007	4/10/2015, 80 FR 19206	2010 motor vehicle emissions budgets of 144.3 tons per day (tpd) NO_X.
8-hour Ozone Modeled Demonstration of Attainment and Attainment Plan for the 1997 ozone national ambient air quality standards.	Washington, DC-MD-VA 1997 8-Hour Ozone Nonattainment Area.	6/12/2007	4/10/2015, 80 FR 19206	2009 motor vehicle emissions budgets of 66.5 tons per day (tpd) for VOC and 146.1 tpd of NO_X.
Section 110(a)(2) Infrastructure Requirements for the 2010 NO_2 NAAQS.	District of Columbia	6/9/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
Section 110(a)(2) Infrastructure Requirements for the 2008 Ozone NAAQS.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Section 110(a)(2) Infrastructure Requirements for the 2008 Ozone NAAQS.	District of Columbia	6/13/2014	8/31/2018, 83 FR 44498	This action addresses CAA element 110(a)(2)(D)(i)(I).
Section 110(a)(2) Infrastructure Requirements for the 2010 SO_2 NAAQS.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Section 110(a)(2) Infrastructure Requirements for the 2010 SO_2 NAAQS.	District-wide	7/18/2014	4/3/2018, 83 FR 14175	This action addresses CAA section. 110(a)(2)(D)(i)(I) for the 2010 SO_2 NAAQS.
Emergency Air Pollution Plan.	District of Columbia	6/13/2014	4/13/2015, 80 FR 19538	This action addresses the requirements of 40 CFR 51, subpart H for particulate matter, sulfur oxides (SOX), carbon monoxide (CO), and ozone, as well as section 110(a)(2)(G) of the CAA for the 2008 ozone, 2010 SO_2, and 2010 NO2 NAAQS.
2011 Base Year Emissions Inventory for the 2008 8-hour ozone standard.	District of Columbia portion of the Washington, DC-MD-VA 2008 ozone nonattainment area.	7/17/2014	5/13/2015, 80 FR 27255	§ 52.474(f).
Section 110(a)(2) Infrastructure Requirements for the 2006 $PM_{2.5}$ NAAQS.	District of Columbia	7/16/2015	8/21/2015, 80 FR 50789	This action addresses the following CAA elements, or portions thereof: 110(a)(2)(D)(i)(I).
Interstate Pollution Transport Requirements for the 2010 NO_2 NAAQS.	District of Columbia	6/6/2014	2/19/2016, 81 FR 8406	This action addresses the infrastructure element of CAA section 110(a)(2)(D)(i)(I), or the good neighbor provision, for the 2010 NO2 NAAQS.
Section 110(a)(2) Infrastructure Requirements for the 2012 $PM_{2.5}$ NAAQS.	District of Columbia	12/28/2015	8/16/2016, 81 FR 54504	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(I), D(i)(II), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by FIP in 40 CFR 52.499.
Regional Haze Five-Year Progress Report.	District of Columbia	3/2/2016	8/10/2017, 82 FR 37305	Addresses requirements of 40 CFR 51.308(g) and (h) for Regional Haze Five-Year Progress Report.

Name of non-regulatory SIP revision	Applicable geographic area	State submittal date	EPA approval date	Additional explanation
Maintenance plan for the District of Columbia portion of the Washington, DC-MD-VA Nonattainment Area for the 2008 8-hour ozone National Ambient Air Quality Standard.	District of Columbia	3/12/2018	4/15/2019, 84 FR 15108	§ 52.476(j).
Emissions Statements Rule Certification for the 2008 Ozone NAAQS.	District of Columbia portion of the Washington, DC–MD–VA nonattainment area for the 2008 ozone NAAQS (*i.e.,* the District of Columbia).	5/25/2018	6/12/2019, 84 FR 27202	Certification that the District's SIP-approved regulations at 20 DCMR § 500.9 meet the emissions statements requirements of CAA section 182(a)(3)(B) for the 2008 ozone NAAQS.
2008 8-Hour Ozone Certification for Nonattainment New Source Review (NNSR).	The District of Columbia ..	5/23/2018	7/5/2019, 84 FR 32072	
VOC RACT and Negative Declarations—VOC Source Categories under the 2008 8-Hour ozone NAAQS.	District of Columbia	8/29/2018	10/10/2019, 84 FR 54507	
Section 110(a)(2) Infrastructure Requirements for the 2015 Ozone NAAQS.	District of Columbia	8/24/2018	1/31/2020, 85 FR 5570	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(I), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M). PSD related portions are addressed by the FIP in 40 CFR 52.499.
Negative Declaration for the 2016 Oil and Natural Gas CTG.	District of Columbia	7/17/2019	3/6/2020, 85 FR 13055	Docket 2019-0552.

[63 FR 67417, Dec. 7, 1998]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.470, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.471 Classification of regions.

The District of Columbia plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
National Capital Interstate	I	I	III	I	I

[37 FR 10857, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 46 FR 61263, Dec. 16, 1981]

§ 52.472 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves the District of Columbia's plan for the attainment and maintenance of the national standards.

(b) [Reserved]

(c) With the exceptions set forth in this subpart, the Administrator approves the District of Columbia's plan for the attainment and maintenance of the national standards under section

110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of Part D, Title 1, of the Clean Air Act as amended in 1977.

(d) Section 710 of title 20 of the District of Columbia Regulations is approved with the following condition: Any alternative controls or exemptions under section 710.8 approved or granted by the District of Columbia are subject to a public notice and public hearing requirements and must be submitted to EPA as SIP revisions. Such alternatives or exemptions are not effective until approved as SIP revisions by EPA.

(e)–(f) [Reserved]

[38 FR 33709, Dec. 6, 1973, as amended at 46 FR 61263, Dec. 16, 1981; 57 FR 34251, Aug. 4, 1992; 60 FR 5136, Jan. 26, 1995; 60 FR 15486, Mar. 24, 1995; 61 FR 2936, Jan. 30, 1996; 78 FR 33984, June 6, 2013]

§ 52.473 [Reserved]

§ 52.474 Base Year Emissions Inventory.

(a) EPA approves as a revision to the District of Columbia Implementation Plan the 1990 base year emission inventory for the Washington Metropolitan Statistical Area, submitted by Director, District of Columbia Consumer and Regulatory Affairs, on January 13, 1994 and October 12, 1995. This submittal consist of the 1990 base year stationary, area and off-road mobile and on-road mobile emission inventories in the Washington Statistical Area for the pollutant, carbon monoxide (CO).

(b) EPA approves as a revision to the District of Columbia State Implementation Plan the 1990 base year emission inventory for the District's portion of the Metropolitan Washington DC ozone nonattainment area submitted by the Director, DCRA, on January 13, 1994. This submittal consists of the 1990 base year point, area, highway mobile, nonroad and biogenic source emission inventories in the area for the following pollutants: Volatile organic compounds (VOC), carbon monoxide (CO), and oxides of nitrogen (NO_X).

(c) EPA approves as a revision to the District of Columbia State Implementation Plan an amendment to the 1990 base year emission inventories for the District's portion of the Metropolitan Washington, D.C. ozone nonattainment area submitted by the Director, Department of Consumer and Regulatory Affairs, on November 3, 1997. This submittal consists of amendments to the 1990 base year point, area, highway mobile, and non-road source emission inventories in the area for the following pollutants: volatile organic compounds (VOC), and oxides of nitrogen (NO_X).

(d) EPA approves as a revision to the District of Columbia State Implementation Plan the 2002 base year emissions inventories for the Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007. This submittal consists of the 2002 base year point, area, non-road mobile, and on-road mobile source inventories in area for the following pollutants: volatile organic compounds (VOC), carbon monoxide (CO) and nitrogen oxides (NO_X).

(e) EPA approves as a revision to the District of Columbia State Implementation Plan the 2002 base year emissions inventory for the District of Columbia portion of the Washington DC–MD–VA 1997 fine particulate matter ($PM_{2.5}$) nonattainment area submitted by the District Department of the Environment on April 2, 2008. The 2002 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road mobile sources, and biogenic sources. The pollutants that comprise the inventory are nitrogen oxides (NO_X), volatile organic compounds (VOCs), $PM_{2.5}$, coarse particles (PM_{10}), ammonia (NH_3), and sulfur dioxide (SO_2).

(f) EPA approves as a revision to the District of Columbia State Implementation Plan the 2011 base year emissions inventory for the District of Columbia portion of the Washington, DC-MD-VA 2008 8-hour ozone nonattainment area submitted by the District Department of the Environment on July 17, 2014. The 2011 base year emissions inventory includes emissions estimates that cover the general source categories of point sources, non-road mobile sources, area sources, on-road

mobile sources, and biogenic sources. The pollutants that comprise the inventory are carbon monoxide (CO), nitrogen oxides (NO_X) and volatile organic compounds (VOC).

[61 FR 2936, Jan. 30, 1996, as amended at 62 FR 19679, Apr. 23, 1997; 63 FR 36858, July 8, 1998; 76 FR 58118, Sept. 20, 2011; 77 FR 65631, Oct. 30, 2012; 80 FR 27258, May 13, 2015; 80 FR 43628, July 23, 2015]

§ 52.475 Determinations of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, EPA determined that the Metropolitan Washington, District of Columbia-Maryland-Virginia (DC-MD-VA) fine particle ($PM_{2.5}$) nonattainment area attained the 1997 annual $PM_{2.5}$ National Ambient Air Quality Standard (NAAQS) by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Metropolitan Washington, DC-MD-VA nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, Washington, DC-MD-VA moderate nonattainment area has attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2010. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Washington, DC-MD-VA moderate nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

(c) Based upon EPA's review of the air quality data for the 3-year period 2013 to 2015, the Washington, DC-MD-VA marginal ozone nonattainment area has attained the 2008 8-hour ozone national ambient air quality standard (NAAQS) by the applicable attainment date of July 20, 2016. Therefore, EPA has met the requirement pursuant to Clean Air Act section 181(b)(2)(A) to determine, based on the area's air quality as of the attainment date, whether the area attained the standard. EPA also determined that the Washington, DC-MD-VA marginal nonattainment area will not be reclassified for failure to attain by its applicable attainment date pursuant to section 181(b)(2)(A).

[77 FR 1413, Jan. 10, 2012, as amended at 77 FR 11741, Feb. 28, 2012; 82 FR 52655, Nov. 14, 2017]

§ 52.476 Control strategy: ozone.

(a) EPA approves as a revision to the District of Columbia State Implementation Plan the 15 Percent Rate of Progress Plan for the District of Columbia's portion of the Metropolitan Washington, D.C. ozone nonattainment area, submitted by the Director of the District of Columbia Department of Health on April 16, 1998.

(b)–(c) [Reserved]

(d) Based upon EPA's review of the air quality data for the 3-year period 2003 to 2005, EPA has determined that the Washington severe 1-hour ozone nonattainment area attained the 1-hour ozone NAAQS by the applicable attainment date of November 15, 2005. EPA also has determined that the Washington severe 1-hour ozone nonattainment area is not subject to the imposition of the section 185 penalty fees.

(e) EPA approves revisions to the District of Columbia State Implementation Plan consisting of the 2008 reasonable further progress (RFP) plan, reasonably available control measures, and contingency measures for the Washington DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007.

(f) EPA approves the following 2008 RFP motor vehicle emissions budgets (MVEBs) for the Washington, DC–MD–VA 1997 8-hour ozone moderate nonattainment area submitted by the Director of the Virginia Department of Environment Quality on June 12, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO_X (TPD)	Effective date of adequacy determination or SIP approval
Rate of Progress Plan	2008	70.8	159.8	September 21, 2009 (74 FR 45853), published September 4, 2009.

(g) *Determination of attainment.* EPA has determined, as of February 28, 2012, that based on 2007 to 2009 and 2008 to 2010 ambient air quality data, the Washington, DC-MD-VA moderate nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 8-hour ozone NAAQS.

(h) EPA approves revisions to the District of Columbia State Implementation Plan consisting of the attainment demonstration required under 40 CFR 51.908 demonstrating attainment of the 1997 ozone NAAQS by the applicable attainment date of June 15, 2010 and the failure to attain contingency measures for the Washington, DC-MD-VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007.

(i) EPA approves the following 2009 attainment demonstration and 2010 motor vehicle emissions budgets (MVEBs) for the Washington, DC-MD-VA 1997 8-hour ozone moderate nonattainment area submitted by the Acting Director of the District of Columbia Department of the Environment on June 12, 2007:

TRANSPORTATION CONFORMITY EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO_X (TPD)	Effective date of adequacy determination or SIP approval
Attainment Demonstration	2009	66.5	146.1	February 22, 2013 (78 FR 9044), published February 7, 2013.
Contingency Measures Plan	2010	.....	144.3	February 22, 2013 (78 FR 9044), published February 7, 2013.

(j) EPA approves the maintenance plan for the District of Columbia portion of the Washington, DC-MD-VA nonattainment area for the 2008 8-hour ozone NAAQS submitted by the Director of the District of Columbia Department of Energy and Environment on March 12, 2018. The maintenance plan includes 2014, 2025, and 2030 motor vehicle emission budgets (MVEBs) for VOC and NO_X to be applied to all future transportation conformity determinations and analyses for the entire Washington, DC-MD-VA area for the 2008 8-hour ozone NAAQS. The maintenance plan includes two sets of VOC and NO_X MVEBs: The MVEBs without transportation buffers are effective as EPA has determined them adequate for transportation conformity purposes; the MVEBs with transportation buffers will be used only as needed in situations where the conformity analysis must be based on different data, models, or planning assumptions, including, but not limited to, updates to demographic, land use, or project-related assumptions, than were used to create the set of MVEBs without transportation buffers. The technical analyses used to demonstrate compliance with the MVEBs and the need, if any, to use transportation buffers will be fully documented in the conformity analysis and follow the Transportation Planning Board's (TPB) interagency consultation procedures.

TABLE 3 TO PARAGRAPH (j)—MOTOR VEHICLE EMISSIONS BUDGETS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO_X (TPD)	Effective date of adequacy determination of SIP approval
Maintenance Plan	2014	61.3	136.8	5/15/2019.
	2025	33.2	40.7	
	2030	24.1	27.4	

TABLE 4 TO PARAGRAPH (j)—MOTOR VEHICLE EMISSIONS BUDGETS WITH TRANSPORTATION BUFFERS FOR THE WASHINGTON, DC-MD-VA AREA

Type of control strategy SIP	Year	VOC (TPD)	NO_X (TPD)	Effective date of adequacy determination of SIP approval
Maintenance Plan	2014	61.3	136.8	Contingent and effective upon interagency consultation.

	2030	28.9	32.9	

[64 FR 42602, Aug. 5, 1999, as amended at 66 FR 631, Jan. 3, 2001; 69 FR 43522, July 21, 2004; 73 FR 43361, July 25, 2008; 76 FR 58118, Sept. 20, 2011; 77 FR 11741, Feb. 28, 2012; 80 FR 19218, Apr. 10, 2015; 84 FR 15115, Apr. 15, 2019]

§ 52.477 Control strategy: Particular matter.

(a) *Determination of Attainment.* EPA has determined, as of January 12, 2009, that the District of Columbia portion of the Metropolitan Washington, DC–MD–VA nonattainment area for the 1997 $PM_{2.5}$ NAAQS has attained the 1997 $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration and associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as the area continues to attain the 1997 $PM_{2.5}$ NAAQS.

(b) *Maintenance Plan and Transportation Conformity Budgets.* EPA approves the maintenance plan for the District of Columbia portion of the Washington, DC–MD–VA nonattainment area for the 1997 annual $PM_{2.5}$ NAAQS submitted by the District of Columbia for the entire Area on June 3, 2013 and supplemented on July 22, 2013. The MVEBs are based on a tiered approach: Tier 1 MVEBs are effective as EPA has determined them adequate for transportation conformity purposes; Tier 2 mobile budgets will become effective upon the completion of the interagency consultation process and fully documented within the first conformity analysis that uses the Tier 2 MVEBs.

WASHINGTON, DC–MD–VA $PM_{2.5}$ AREA'S TIER 1 MOTOR VEHICLE EMISSIONS BUDGETS FOR THE 1997 ANNUAL $PM_{2.5}$ NAAQS, (TPY)

[79 FR 60084, Oct. 6, 2014]

§ 52.478 Rules and Regulations.

(a) On April 8, 1993, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District belonging to the following VOC categories:

(1) Automobile and light-duty truck manufacturing;

(2) Coating of cans, coils, paper, fabric and vinyl, metal furniture, large appliances, magnet wire, miscellaneous metal parts and products, and flatwood paneling;

(3) Storage of petroleum liquids in fixed-roof tanks and external floating-roof tanks;

(4) Bulk gasoline plants and terminals;

(5) Petroleum refinery sources;

(6) Petroleum refinery equipment leaks;

(7) Manufacture of synthesized pharmaceutical products, pneumatic rubber tires, vegetable oil, synthetic organic chemicals (fugitive VOCs and air oxidation), and high density polyethylene, polypropylene and polystyrene resins;

(8) Graphic arts systems;

(9) Storage, transportation and marketing of VOCs (fugitive VOCs from oil and gas production and natural gas and gasoline processing).

(b) On September 4, 1997, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District which belong to the following VOC categories:

(1) Coating of plastic parts (business machines and other);

(2) Aerospace;

(3) Shipbuilding and repair;

(4) Automobile refinishing;

(5) Industrial wastewater;

(6) Distillation or reactor or batch processes in the synthetic organic chemical manufacturing industry;

(7) Volatile organic storage;

(8) Wood furniture coatings;

(9) Offset lithography;

(10) Clean-up solvents.

(c) On March 24, 2011, the District of Columbia submitted a letter to EPA declaring that there are no sources located in the District which belong to the following VOC categories:

(1) Auto and Light-duty Truck Assembly Coatings;

(2) Fiberglass Boat Manufacturing Materials;

(3) Paper, Film and Foil Coatings;

(4) Flatwood Paneling.

[64 FR 57781, Oct. 27, 1999, as amended at 78 FR 24997, Apr. 29, 2013]

§ 52.479 Source-specific requirements.

(a) Approval of source-specific requirements for the Blue Plains Advanced Wastewater Treatment Plant includes EPA incorporating by reference into § 52.470(d) certain redacted portions of Permit No. 6372–C2/0 approved by the District of Columbia on April 20, 2018 to Construct and Operate New Biosolids Handling Facilities issued to the District of Columbia Water and Sewer Authority and as approved on March 25, 2020.

(1) Specifically, EPA is incorporating by reference into § 52.470(d) certain portions of Permit No. 6372–C2/O to Construct and Operate New Biosolids Handling Facilities issued to District of Columbia Water and Sewer Authority as redacted by the District of Columbia:

(i) The first paragraph citing the pertinent permitting regulations and listing (redacted) the following significant components: One (1) Auxiliary Boiler (AB) rated at 62.52 mmBTU per hour (HHV) heat input, firing DG, One (1) Siloxane Destruction Flare (SF) rated at 6.14 MMBTU per hour heal input, firing DG; and Two (2) Emergency Flares rated at 126 mmBTU per hour heat input each, firing DG.

(ii) The NO_X emissions limits listed in the table found in permit condition ''j.'' for the Auxiliary Boiler (AB), Siloxane Destruction Flare (SF) and Two (2) Emergency Flares. The hourly NO_X emission limits for the Auxiliary Boiler (AB), Siloxane Destruction Flare (SF) and Two (2) Emergency Flares listed in Table 2 (as redacted) found under Condition III.

(iii) Conditions III.b.1.A.; III.b.3. A. and B.; III.b.3. C.i., iii and iv.; III.b.3.D.; III.b.3.E. except that relating to carbon monoxide/CO; III.b.3.F. except ''and CO''; III.b.3.G, iv. and v. except the provision ''Failure to demonstrate compliance through the testing may result in enforcement action.''; III.b.4.A.; III.b.4.B. iv. and v.; III.b.5. as redacted to strike ''in addition to complying

with Condition II(f)''; III.d., III.d.1.A; III.d.2.D; III.d.3.A. only the portion ''Within 60 days of initial startup and once every five years thereafter, the Permittee shall conduct a Department-approved compliance source test at multiple loads of EF-1, EF–2, and SF in accordance with 40 CFR 60.8 or a similar protocol acceptable to the Department, to demonstrate compliance with the emissions limitations contained in Condition III(d)(1) of this permit;'' III.d.3.B as redacted to exclude ''though additional testing may be required at other times pursuant to Condition II(d)(2)''; III.d.3.C. (i), (iii) and (iv); III.d.3.D.; III.d.3.H.(iv); III.d.3.H.(v) except ''Failure to demonstrate compliance through the test may result in enforcement action.''; III.d.4.A. except ''including records of visual inspections,''; III.d.4.B. (ii) except ''and CO''; III.d.4.B. (iv); and, III.d.5.A. as redacted to exclude ''in addition to complying with Condition II(f)''.

(2) This permit was issued April 20, 2018.

(b) [Reserved]

[85 FR 10300, Feb. 24, 2020]

§ 52.480 Photochemical Assessment Monitoring Stations (PAMS) Program.

On January 14, 1994 the District of Columbia's Department of Consumer and Regulatory Affairs submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the District of Columbia SIP. As with all components of the SIP, the District of Columbia must implement the program as submitted and approved by EPA.

[60 FR 47084, Sept. 11, 1995]

§§ 52.481–52.483 [Reserved]

§ 52.484 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the District of Columbia and for which requirements are set forth under the Federal CAIR NO_X Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan (SIP) as meeting the requirements of CAIR for $PM_{2.5}$ relating to NO_X under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at the time of such approval of the District of Columbia's SIP, the Administrator has already allocated CAIR NO_X allowances to sources in the District of Columbia for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X allowances for those years.

(b)(1) The owner and operator of each NO_X source located within the District of Columbia and for which requirements are set forth under the Federal CAIR NO_X Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_X under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or

conditional or unless such approval is under § 51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the District of Columbia's SIP, the Administrator has already allocated CAIR NO_X Ozone Season allowances to sources in the District of Columbia for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_X annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR NO_X allowances or CAIR NO_X Ozone Season allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_X Allowance Tracking System accounts all CAIR NO_X allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_X Ozone Season Allowance Tracking System accounts all CAIR NO_X Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§ 52.485 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each SO_2 source located within the District of Columbia and for which requirements are set forth under the Federal CAIR SO_2 Trading Program in subparts AAA through III of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the District of Columbia State Implementation Plan as meeting the requirements of CAIR for $PM_{2.5}$ relating to SO_2 under § 51.124 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.124(r) of this chapter.

(b) Notwithstanding any provisions of paragraph (a) of this section and subparts AAA through III of part 97 of this chapter and any State's SIP to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions of paragraph (a) of this section relating to SO_2 emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AAA through III of part 97 of this chapter; and

(2) The Administrator will not deduct for excess emissions any CAIR SO_2 allowances allocated for 2015 or any year thereafter.

[72 FR 62345, Nov. 2, 2007, as amended at 76 FR 48362, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014]

§§ 52.486–52.498 [Reserved]

§ 52.499 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are

not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the District of Columbia.

[43 FR 26410, June 19, 1978, as amended at 45 FR 52741, Aug. 7, 1980; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.510 Small business assistance program.

On October 22, 1993, the Administrator of the District of Columbia Environmental Regulation Administration submitted a plan for the establishment and implementation of a Small Business Technical and Environmental Compliance Assistance Program as a state implementation plan revision (SIP), as required by title V of the Clean Air Act. EPA approved the Small Business Technical and Environmental Compliance Assistance Program on August 17, 1994 and made it part of the District of Columbia SIP. As with all components of the SIP, the District of Columbia must implement the program as submitted and approved by EPA.

[59 FR 42168, Aug. 17, 1994]

§ 52.515 Original identification of plan section.

(a) This section identifies the original ''Air Implementation Plan for the District of Columbia'' and all revisions submitted by the District of Columbia that were federally approved prior to July 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) edition revised as of July 1, 2012.

[78 FR 33984, June 6, 2013]

Subpart K—Florida

§ 52.519 [Reserved]

§ 52.520 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Florida under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to October 1, 2017, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after October 1, 2017, for Florida will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 4 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 4 EPA Office at 61 Forsyth Street SW, Atlanta, GA 30303. To obtain the material, please call (404) 562–9022. You may inspect the material with an EPA approval date prior to October 1, 2017, for Florida at the National Archives and Records Administration. For information on the availability of this material at NARA go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Chapter 62–204 Air Pollution Control—General Provisions				
62–204.100	Purpose and Scope	3/13/1996	6/16/1999, 64 FR 32353.	
62–204.200	Definitions	2/12/2006	6/27/2008, 73 FR 36435.	
62–204.220	Ambient Air Quality Protection.	3/13/1996	6/16/1999, 64 FR 32346.	
62–204.240	Ambient Air Quality Standards.	3/13/1996	6/16/1999, 64 FR 32346.	
62–204.260	Prevention of Significant Deterioration Maximum Allowable Increases (PSD Increments).	2/12/2006	6/27/2008, 73 FR 36435.	
62–204.320	Procedures for Designation and Redesignation of Areas.	3/13/1996	6/16/1999, 64 FR 32346.	
62–204.340	Designation of Attainment, Nonattainment, and Maintenance Areas.	3/13/1996	6/16/1999, 64 FR 32346.	
62–204.360	Designation of Prevention of Significant Deterioration Areas.	3/13/1996	6/16/1999, 64 FR 32346.	
62–204.400	Public Notice and Hearing Requirements for State Implementation Plan Revisions.	11/30/1994	6/16/1999, 64 FR 32353.	
62–204.500	Conformity	8/31/1998	8/11/2003, 68 FR 47468	Except for the incorporation by reference of 40 CFR 93.104(e) of the Transportation Conformity Rule.
Chapter 62–210 Stationary Sources—General Requirements				
62–210.200	Definitions	3/28/2012	10/6/2017, 82 FR 46682	Selected definitions are approved into the SIP.
62–210.220	Small Business Assistance Program.	10/6/08	7/3/2017, 82 FR 30767.	
62–210.300	Permits Required	5/9/2007	6/1/2009, 63 FR 26103.	
62–210.310	Air General Permits	6/29/2011	10/6/2017, 82 FR 46682.	
62–210.350	Public Notice and Comment.	10/12/2008	10/6/2017, 82 FR 46682	Excludes revisions state effective February 11, 1999, which added 62–210.350(1)(c) avs 62–210.350(4)(a)2, and revised 62–210.350(4)(b).
62–210.360	Administrative Permit Corrections.	11/23/1994	6/16/1999, 64 FR 32346.	
62–210.370	Emissions Computation and Reporting.	2/2/2006	6/27/2008, 73 FR 36435.	
62–210.550	Stack Height Policy	11/23/1994	6/16/1999, 64 FR 32346.	
62–210.650	Circumvention	10/15/1992	10/20/1994, 59 FR 52916.	
62–210.700	Excess Emissions	11/23/1994	6/16/1999, 64 FR 32346.	
62–210.900	Forms and Instructions	2/9/1993	11/7/1994, 59 FR 46157.	
Chapter 62–212 Stationary Sources—Preconstruction Review				
62–212.300	General Preconstruction Review Requirements.	6/29/2009	4/12/2011, 76 FR 20239.	
62–212.400	Prevention of Significant Deterioration.	3/28/2012	9/19/2012, 77 FR 58027	As of September 19, 2012, 61–212.400 does not include Florida's revision to adopt the $PM_{2.5}$ SILs threshold and provisions (as promulgated in the October 20, 2010, $PM_{2.5}$ PSD Increment-SILs-SMC Rule at 40 CFR 52.21(k)(2)).
62–212.500	Preconstruction Review for Nonattainment Areas.	2/2/2006	6/27/2008, 73 FR 36435.	

EPA APPROVED FLORIDA REGULATIONS—Continued

State citation (section)	Title/subject	State effective date	EPA approval date	Explanation
62–212.720	Actuals Plantwide Applicability Limits (PALs).	12/17/2013	7/3/2017, 82 FR 30767.	
Chapter 62–243 Tampering With Motor Vehicle Air Pollution Control Equipment				
62–243.100	Purpose and Scope	5/29/1990	6/9/1992, 57 FR 24370.	
62–243.200	Definitions	1/2/1991	6/9/1992, 57 FR 24378.	
62–243.300	Exemptions	1/2/1991	6/9/1992, 57 FR 24378.	
62–243.400	Prohibitions	1/2/1991	6/9/1992, 57 FR 24378.	
62–243.500	Certification	1/2/1991	6/9/1992, 57 FR 24378.	
62–243.600	Enforcement	1/2/1991	6/9/1992, 57 FR 24378.	
62–243.700	Penalties	5/29/1990	6/9/1992, 57 FR 24370.	
Chapter 62–244 Visible Emissions From Motor Vehicles				
62–244.100	Purpose and Scope	2/21/1990	6/9/1992, 57 FR 24370.	
62–244.200	Definitions	2/21/1990	6/9/1992, 57 FR 24370.	
62–244.300	Exemptions	2/21/1990	6/9/1992, 57 FR 24370.	
62–244.400	Prohibitions	2/21/1990	6/9/1992, 57 FR 24370.	
62–244.500	Enforcement	2/21/1990	6/9/1992, 57 FR 24370.	
62–244.600	Penalties	2/21/1990	6/9/1992, 57 FR 24370.	
Chapter 62–252 Gasoline Vapor Control				
62–252.300	Gasoline Dispensing Facilities Stage I Vapor Recovery.	5/1/2015	8/12/2015, 80 FR 48259.	
Chapter 62–256 Open Burning and Frost Protection Fires				
62–256.100	Declaration and Intent	12/09/1975	11/1/1977, 42 FR 57124.	
62–256.200	Definitions	11/30/1994	6/16/1999, 64 FR 32346.	
62–256.300	Prohibitions	11/30/1994	6/16/1999, 64 FR 32346.	
62–256.400	Agricultural and Silvicultural Fires.	7/1/1971	5/31/1972, 37 FR 10842.	
62–256.450	Burning for Cold or Frost Protection.	6/27/1991	9/9/1994, 59 FR 46552.	
62–256.500	Land Clearing	11/30/1994	6/16/1999, 64 FR 32346.	
62–256.600	Industrial, Commercial, Municipal, and Research Open Burning.	7/1/1971	5/31/1972, 37 FR 10842.	
62–256.700	Open Burning Allowed	11/30/1994	6/16/1999, 64 FR 32346.	
62–256.800	Effective Date	7/1/1971	5/31/1972, 37 FR 10842.	
Chapter 62–296 Stationary Sources—Emission Standards				
62–296.100	Purpose and Scope	10/6/2008	10/6/2017, 82 FR 46682.	
62–296.320	General Pollutant Emission Limiting Standards.	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.340	Best Available Retrofit Technology.	1/31/2007	8/29/2013, 78 FR 53250.	
62–296.401	Incinerators	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.402	Sulfuric Acid Plants	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.403	Phosphate Processing	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.404	Kraft (Sulfate) Pulp Mills and Tall Oil Plants.	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.405	Fossil Fuel Steam Generators with more than 250 million Btu per Hour Heat Input.	3/2/1999	10/6/2017, 82 FR 46682.	
62–296.406	Fossil Fuel Steam Generator with less than 250 million Btu per Hour Heat Input, New and Existing Emissions Units.	3/2/1999	10/6/2017, 82 FR 46682.	
62–296.408	Nitric Acid Plants	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.409	Sulfur Recovery Plants	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.410	Carbonaceous Fuel Burning Equipment.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.412	Dry Cleaning Facilities	3/11/2010	10/6/2017, 82 FR 46682.	
62–296.414	Concrete Batching Plants	1/10/2007	10/6/2017, 82 FR 46682.	

EPA APPROVED FLORIDA REGULATIONS—Continued

State citation (section)	Title/subject	State effective date	EPA approval date	Explanation
62–296.415	Soil Thermal Treatment Facilities.	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.418	Bulk Gasoline Plants	3/11/2010	10/6/2017, 82 FR 46682.	
62–296.470	Implementation of Federal Clean Air Interstate Rule.	4/1/2007	10/12/07, 72 FR 58016.	
62–296.500	Reasonably Available Control Technology (RACT)—Volatile Organic Compounds (VOC) and Nitrogen Oxides (NO_X) Emitting Facilities.	3/11/2010	10/6/2017, 82 FR 46682.	
62–296.501	Can Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.502	Coil Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.503	Paper Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.504	Fabric and Vinyl Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.505	Metal Furniture Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.506	Surface Coating of Large Appliances.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.507	Magnet Wire Coating	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.508	Petroleum Liquid Storage	10/6/2008	10/6/2017, 82 FR 46682	Amendments effective 10/6/08.
62–296.510	Bulk Gasoline Terminals	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.511	Solvent Metal Cleaning	6/5/1996	01/16/2003, 68 FR 2204.	
62–296.512	Cutback Asphalt	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.513	Surface Coating of Miscellaneous Metal Parts and Products.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.514	Surface Coating of Flat Wood Paneling.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.515	Graphic Arts Systems	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.516	Petroleum Liquid Storage Tanks with External Floating Roofs.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.570	Reasonably Available Control Technology (RACT)—Requirements for Major VOC and NO_X—Emitting Facilities.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.600	Reasonably Available Control Technology (RACT)—Lead.	3/13/1996	6/16/1999, 64 FR 32346.	
62–296.601	Lead Processing Operations in General.	8/8/1994	9/18/1996, 61 FR 49064.	
62–296.602	Primary Lead Acid Battery Manufacturing Operations.	3/13/1996	9/18/1996, 61 FR 49064.	
62–296.603	Secondary Lead Smelting Operations.	8/8/1994	9/18/1996, 61 FR 49064.	
62–296.604	Electric Arc Furnace Equipped Secondary Steel Manufacturing Operations.	8/8/1994	9/18/1996, 61 FR 49064.	
62–296.605	Lead Oxide Handling Operations.	8/8/1994	9/18/1996, 61 FR 49064.	
62–296.700	Reasonably Available Control Technology (RACT)—Particulate Matter.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.701	Portland Cement Plants	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.702	Fossil Fuel Steam Generators.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.703	Carbonaceous Fuel Burners.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.704	Asphalt Concrete Plants	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.705	Phosphate Processing operations.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.706	Glass Manufacturing Process.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.707	Electric Arc Furnaces	11/23/1994	6/16/1999, 64 FR 32346.	

EPA APPROVED FLORIDA REGULATIONS—Continued

State citation (section)	Title/subject	State effective date	EPA approval date	Explanation
62–296.708	Sweat of Pot Furnaces	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.709	Lime Kilns	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.710	Smelt Dissolving Tanks	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.711	Materials Handling, Sizing, Screening, Crushing and Grinding operations.	11/23/1994	6/16/1999, 64 FR 32346.	
62–296.712	Miscellaneous Manufacturing Process Operations.	11/23/1994	6/16/1999, 64 FR 32346.	
Chapter 62–297 Stationary Sources—Emissions Monitoring				
62–297.310	General Emissions Test Requirements.	3/9/2015	10/6/2017, 82 FR 46682.	
62–297.440	Supplementary Test Procedures.	7/10/2014	4/2/2018, 83 FR 13875.	
62–297.450	EPA VOC Capture Efficiency Test Procedures.	7/10/2014	4/2/2018, 83 FR 13875.	
62–297.620	Exceptions and Approval of Alternate Procedures and Requirements.	11/23/1994	6/16/1999, 64 FR 32346.	
State Statutes				
112.3143(4)	Voting Conflict	4/19/2012	7/30/2012, 77 FR 44485	To satisfy the requirements of sections 128 and 110(a)(2)(E)(ii).
112.3144	Full and Public Disclosure of Financial Interests.	4/19/2012	7/30/2012, 77 FR 44485	To satisfy the requirements of sections 128 and 110(a)(2)(E)(ii).
403.131	Injunctive relief, remedies	4/19/2012	7/30/2012, 77 FR 44485	To satisfy the requirements of section 110(a)(2)(G).
120.569	Decisions which affect substantial interests.	4/19/2012	7/30/2012, 77 FR 44485	To satisfy the requirements of section 110(a)(2)(G).

(d) *EPA-approved State Source-specific requirements.*

EPA-APPROVED FLORIDA SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit No.	State effective date	EPA approval date	Explanation
Harry S Truman, animal import center.	NA	11/26/1996	1/19/2000, 65 FR 2882.	
Martin Gas Sales, Inc	0570477–007–AC	1/17/2003	5/1/2003, 68 FR 23209.	
Broward County Aviation Department.		8/15/2003	6/17/2003, 69 FR 33862	Order Granting Variance from Rule 62–252.400.
Lockheed Martin Aeronautics Company.		4/16/2005	11/28/2006, 71 FR 68745	Requirement that Lockheed Martin Aeronautics Company comply with EPA's Aerospace CTG at its Pinellas County facility.
Combs Oil Company		7/31/2009	9/25/2015, 80 FR 57727	Order Granting Variance from Rule 62–296.418(2)(b)2.
Mosaic Fertilizer, LLC	Air Permit No. 0570008–080–AC.	1/15/2015	7/3/2017, 82 FR 30749	Specific Conditions pertaining to: EU004; EU005; and EU006.
Rayonier Performance Fibers, LLC.	Air Permit No. 0890004–036–AC.	4/12/2012	7/3/2017, 82 FR 30749	Specific Conditions pertaining to: EU005; EU006; and EU022.
Tampa Electric Company—Big Bend Station.	Air Permit No. 0570039–074–AC.	2/26/2015	7/3/2017, 82 FR 30749	Only Section 3, Subsection B, Condition 5.

EPA-APPROVED FLORIDA SOURCE-SPECIFIC REQUIREMENTS—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanation
WestRock, LLC	Air Permit No. 0890003–046–AC.	1/9/2015	7/3/2017, 82 FR 30749	Specific Conditions pertaining to: EU006; EU015; EU007 and EU011.
Tampa Electric Company-Big Bend Station.	Air Permit No. 0570039–120–AC.	12/14/2018	11/12/2019, 84 FR 60927	Only Section 2, Condition 4; the "SO_2 Emissions Cap" provision from Section 3, Condition 4; the "SO_2 CEMS" provision from Section 3, Condition 4; and the "Methods of Operation" for Units 1 and 2 provision from Section 3, Condition 6.
Mosaic Fertilizer, LLC—Bartow Facility.	Air Permit No. 1050046–050–AC.	7/3/2017	2/20/2020, 85 FR 9666	Section III, Subsection A, Specific Condition 3 (as administratively corrected by Permit No. 1050046–063–AC with an effective date of January 11, 2019); Condition 4; and Condition 5.
Mosaic Fertilizer, LLC—New Wales Facility.	Air Permit No. 1050059–106–AC.	10/30/2017	2/20/2020, 85 FR 9666	Section III, Subsection A, Specific Condition 3 (as administratively corrected by Permit No. 1050059–114–AC with an effective date of January 11, 2019); Condition 4; and Condition 5.

(e) *EPA-approved Florida non-regulatory provisions.*

EPA-APPROVED FLORIDA NON-REGULATORY PROVISIONS

Provision	State effective date	EPA approval date	FEDERAL REGISTER, notice	Explanation
Revision to Maintenance Plan for Southeast Florida Area.	12/20/2002	2/13/2004	69 FR 7132	10 year update.
Revision to Maintenance Plan for the Tampa, Florida Area.	12/20/2002	3/29/2004	69 FR 16172	10 year update.
Revision to Maintenance Plan Update for Jacksonville Area, Florida.	12/20/2002	7/22/2003	68 FR 43315	
110(a)(1) Maintenance Plan for the Southeast Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) Maintenance Plan for the Tampa, Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) Maintenance Plan for the Jacksonville, Florida Area.	7/2/2009	7/26/2010	75 FR 29671	110(a)(1) maintenance plan for 1997 8-hour ozone NAAQS.
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	12/13/2007	7/30/2012	77 FR 44485	
Section 128 Requirements	5/24/2012	7/30/2012	77 FR 44485	
Sections 110(a)(2)(E)(ii) and (G) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	5/24/2012	7/30/2012	77 FR 44485	

EPA-APPROVED FLORIDA NON-REGULATORY PROVISIONS—Continued

Provision	State effective date	EPA approval date	FEDERAL REGISTER, notice	Explanation
110(a)(2)(D)(i)(I) Infrastructure Requirements for the 2006 24-hour $PM_{2.5}$ NAAQS.	9/23/2009	10/11/2012	77 FR 61724	EPA partially disapproved this SIP submission to the extent that it relied on the Clean Air Interstate Rule to meet the 110(a)(2)(D)(i)(I) requirements for the 2006 24-hour $PM_{2.5}$ NAAQS.
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	4/18/2008	11/8/2012	77 FR 66927	With the exception of section 110(a)(2)(D)(i).
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	9/23/2009	11/8/2012	77 FR 66927	With the exception of section 110(a)(2)(D)(i).
Portion of Regional Haze Plan Amendment submitted on September 17, 2012.	9/17/2012	11/29/2012	77 FR 71111	Only the BART determinations approved in 77 FR 71111 are incorporated.
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	4/18/2008	4/3/2013	78 FR 19998	EPA disapproved the State's prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	9/23/2009	4/3/2013	78 FR 19998	EPA disapproved the State's prong 3 of section 110(a)(2)(D)(i) as it relates to GHG PSD permitting requirements.
Initial Regional Haze Plan	3/19/2010	8/29/2013	78 FR 53250	
Regional Haze Plan Amendment 1	8/31/2010	8/29/2013	78 FR 53250	
Regional Haze Plan Amendment 2	9/17/2012	8/29/2013	78 FR 53250	Remaining Portion of Regional Haze Plan Amendment not approved on November 29, 2012.
Progress Energy Permit (Air Permit No. 0170004–038–AC).	10/15/2012	8/29/2013	78 FR 53250	
Update to October 15, 2013, Progress Energy Permit (Air Permit No. 0170004–038–AC).	5/2/2013	8/29/2013	78 FR 53250	
110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	10/31/2011	11/1/2013	78 FR 65559	With the exception of section 110(a)(2)(D)(i)(I) concerning interstate transport; section 110(a)(2)(D)(i)(II) concerning visibility requirements; and the portions of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) related to the regulation of GHG emissions, which are being disapproved.
RVP Update for Florida 1997 8-hour Ozone Maintenance Plans.	8/15/2013	1/6/2014	79 FR 573	
110(a)(1) and (2) Infrastructure Requirements for the 1997 Fine Particulate Matter National Ambient Air Quality Standards.	4/18/2008	8/25/2014	79 FR 50554	Addressing prong 4 of section 110(a)(2)(D)(i) only.
110(a)(1) and (2) Infrastructure Requirements for the 2006 Fine Particulate Matter National Ambient Air Quality Standards.	9/23/2009	8/25/2014	79 FR 50554	Addressing prong 4 of section 110(a)(2)(D)(i) only.
110(a)(1) and (2) Infrastructure Requirements for the 2008 Ozone National Ambient Air Quality Standards.	10/31/2011	8/25/2014	79 FR 50554	Addressing prong 4 of section 110(a)(2)(D)(i) only.
110(a)(1) and (2) Infrastructure Requirements for the 2008 Lead NAAQS.	10/14/2011	3/18/2015	80 FR 14019	Addressing the PSD permitting requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) only.

[64 FR 32348, June 16, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.520, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.521 Classification of regions.

The Florida plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Mobile (Alabama)-Pensacola-Panama City (Florida)-Southern Mississippi Interstate	I	I	III	III	I
Jacksonville (Florida)-Brunswick (Georgia) Interstate	I	II	III	III	I
West Central Florida Intrastate	I	I	III	III	III
Central Florida Intrastate	II	III	III	III	III
Southwest Florida Intrastate	III	III	III	III	III
Southeast Florida Intrastate	II	III	III	III	III

[37 FR 10858, May 31, 1972, as amended 39 FR 16346, May 8, 1974]

§ 52.522 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Florida's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) *Disapproval.* Submittal from the State of Florida, through the Florida Department of Environmental Protection (FDEP) on October 31, 2011, to address the Clean Air Act (CAA) sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), and 110(a)(2)(J) for the 2008 8-hour Ozone National Ambient Air Quality Standards related to prevention of significant deterioration (PSD) requirements for the regulation of greenhouse gas emissions. EPA is disapproving FDEP's submittal with respect to the PSD requirements of CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), and 110(a)(2)(J) for the 2008 8-hour Ozone National Ambient Air Quality Standards related to PSD requirements for the regulation of greenhouse gas emissions.

[45 FR 17143, Mar. 18, 1980, as amended at 78 FR 65561, Nov. 1, 2013; 79 FR 30050, May 27, 2014]

§ 52.523 Control strategy: Ozone

(*a) Disapproval.* EPA is disapproving portions of Florida's infrastructure SIP for the 1997 8-hour ozone NAAQS regarding the State's ability to provide adequate legal authority for the implementation of a Greenhouse Gas Prevention of Significant Deterioration program, specifically with respect to sections 110(a)(2)(C) and 110(a)(2)(J). A FIP is currently in place and approved for Florida at 40 CFR 52.37 for these requirements.

(b) [Reserved]

[77 FR 44488, July 30, 2012]

§ 52.524 Compliance schedule.

(a) The information in this section is available in the 40 CFR, part 52 edition

revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.525 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal authority to provide for public availability of emission data is inadequate.

(b) Regulation for public availability of emission data. (1) Any person who cannot obtain emission data from the Agency responsible for making emission data available to the public, as specified in the applicable plan, concerning emissions from any source subject to emission limitations which are part of the approved plan may request that the appropriate Regional Administrator obtain and make public such data. Within 30 days after receipt of any such written request, the Regional Administrator shall require the owner or operator of any such source to submit information within 30 days on the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the applicable plan.

(2) Commencing after the initial notification by the Regional Administrator pursuant to paragraph (b)(1) of this section, the owner or operator of the source shall maintain records of the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the plan. The information recorded shall be summarized and reported to the Regional Administrator, on forms furnished by the Regional Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31.

(3) Information recorded by the owner or operator and copies of this summarizing report submitted to the Regional Administrator shall be retained by the owner or operator for 2 years after the date on which the pertinent report is submitted.

(4) Emission data obtained from owners or operators of stationary sources will be correlated with applicable emission limitations and other control measures that are part of the applicable plan and will be available at the appropriate regional office and at other locations in the state designated by the Regional Administrator.

[39 FR 34536, Sept. 26, 1974, as amended at 40 FR 55328, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986]

§ 52.526 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met, since section 403.111 of the Florida Statutes could, in some circumstances, prohibit the disclosure of emission data to the public. Therefore, section 403.111 is disapproved.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.527 [Reserved]

§ 52.528 Control strategy: Sulfur oxides and particulate matter.

(a) In a letter dated October 10, 1986, the Florida Department of Environmental Regulation certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules.

(b) The variance granted to the Turkey Point and Port Everglades plants of Florida Power and Light Company from the particulate emission limits of the plan is disapproved because the relaxed limits would cause violation of the Class I increment for sulfur dioxide in the Everglades National Park. These plants must meet the 0.1#/MMBTU particulate limit of the plan.

[48 FR 33868, July 26, 1983, as amended at 54 FR 25455, June 15, 1989]

§ 52.529 [Reserved]

§ 52.530 Significant deterioration of air quality.

(a) EPA approves the Florida Prevention of Significant Deterioration program, as incorporated into this chapter, for power plants subject to the Florida Power Plant Siting Act.

(b) Pursuant to part C, subpart 1 of the Clean Air Act, EPA is approving a December 19, 2013 SIP revision submitted by the State of Florida, through the Florida Department of Environmental Protection (FDEP), Division of Air Resource Management that establishes prevention of significant deterioration (PSD) applicability thresholds for greenhouse gas (GHG) emissions at the same emissions thresholds and in the same timeframes as those specified by EPA in the GHG Tailoring Rule. This approval gives FDEP the authority to regulate GHG-emitting sources and issue GHG PSD permits. FDEP's December 19, 2013 SIP revision also includes a GHG PSD Permit Transition Plan which governs the transition from EPA administering GHG PSD permitting requirements for Florida sources under a Federal Implementation Plan (FIP) to the State administering GHG PSD permitting requirements under its approved SIP. Under this GHG PSD Permit Transition Plan, FDEP will administer and enforce GHG PSD permits issued by EPA to Florida sources under the GHG PSD FIP. FDEP's authority over these existing EPA-issued GHG PSD permits includes the authority for FDEP to conduct general administration of these existing permits, authority to process and issue any and all subsequent permit actions relating to such permits, and authority to enforce such permits.

(c) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Florida shall be submitted to the State agency, Florida Department of Environmental Protection, Division of Air Resources Management, 2600 Blair Stone Road, MS 5500, Tallahassee, Florida 32399–2400, rather than to EPA's Region 4 office.

(d) The requirements of sections 160 through 165 of the Clean Air Act are not met since the Florida plan, as submitted, does not apply to certain sources. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated by reference and made a part of the Florida plan for:

(1) Sources proposing to locate on Indian reservations in Florida; and

(2) Permits issued by EPA prior to approval of the Florida PSD rule.

[45 FR 52741, Aug. 7, 1980, as amended at 46 FR 17020, Mar. 17, 1981; 48 FR 52716, Nov. 22, 1983; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003; 72 FR 29276, May 25, 2007; 73 FR 36442, June 27, 2008; 74 FR 55143, Oct. 27, 2009; 79 FR 28612, May 19, 2014]

§ 52.532 [Reserved]

§ 52.533 Source surveillance.

The plan lacks test methods for several source categories. As required by § 52.12(c)(1) of this part, EPA test methods (found at 40 CFR part 60) will be used by EPA to determine compliance with the following emission limiting standards:

(a) Particulate emissions from citrus plants controlled by a scrubber and subject to the process weight table (submitted as 17–2.05(2) and reformatted as 17–2.610(1)1.a).

(b) TRS emissions from recovery furnaces at kraft pulp mills (submitted as 17–2.05(6)D and reformatted as 17–2.600(4)1).

(c) Sulfur dioxide emissions from fossil fuel steam sources (submitted as 17–2.05(6)E and reformatted as 17–2.600 (5) and (6)).

(d) Emissions from portland cement plants (submitted as 17–2.05(6)F and reformatted as 17–2.600(7)).

(e) Particulate and visible emissions from carbonaceous fuel burning equipment (submitted as 17–2.05(6)I and reformatted as 17–2.600(10)).

[47 FR 32116, July 26, 1982]

§ 52.534 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met because the plan does not include approvable procedures meeting the requirements of 40 CFR 51.305 and 51.307 for protection of visibility in mandatory Class I Federal areas.

(b) Regulations for visibility new source review. The provisions of § 52.28 are hereby incorporated and made part

of the applicable plan for the State of Florida.

[51 FR 5505, Feb. 13, 1986]

§ 52.536 Original identification of plan section.

(a) This section identified the original ''Air Implementation Plan for the State of Florida'' and all revisions submitted by Florida that were federally approved prior to July 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b)–(c) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.540 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a) The owner and operator of each source and each unit located in the State of Florida and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(b) [Reserved]

[76 FR 48362, Aug. 8, 2011, as amended at 81 FR 74594, Oct. 26, 2016]

Subpart L—Georgia

§ 52.569 Conditional approval.

Georgia submitted a letter to EPA on November 14, 2019, with a commitment to address the State Implementation Plan deficiencies regarding the PSD-related requirements of CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (Prong 3), and 110(a)(2)(J) for the 2015 8-hour ozone NAAQS. EPA conditionally approved these portions of Georgia's September 24, 2018 infrastructure SIP submission in an action published in the FEDERAL REGISTER on April 15, 2020. If Georgia fails to meet its commitment by April 15, 2021, the conditional approval will become a disapproval on that date and EPA will issue a notification to that effect.

[85 FR 20838, Apr. 15, 2020]

§ 52.570 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Georgia under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to October 1, 2018, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraph (c) and (d) of this section with EPA approval dates after October 1, 2018, for Georgia will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 4 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 4 EPA Office at 61 Forsyth Street SW, Atlanta, GA 30303. To obtain the material, please call (404) 562–9022. You may inspect the material with an EPA approval date prior to October 1, 2018, for Georgia at the National Archives and Records Administration. For information on the availability of this material at NARA go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

(c) *EPA Approved Georgia Regulations.*

EPA APPROVED GEORGIA REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanation
391–3–1–.02(7)	Prevention of Significant Deterioration of Air Quality (PSD).	7/20/2017	12/14/2018, 83 FR 64285	Except for the automatic rescission clause at 391–3–1–.02(7)(a)(2)(iv), which EPA disapproved on March 4, 2016. Except for portions of Rule 391–3–1–.02(7) incorporating by reference 40 CFR 52.21(b)(1)(i)(a), 40 CFR 52.21(b)(1)(iii)(t), 40 CFR 52.21(b)(2)(v), and 40 CFR 52.21(b)(3)(iii)(*c*), because those CFR provisions were indefinitely stayed by the Fugitive Emissions Rule in the March 30, 2011 rulemaking and have not been approved into the Georgia SIP. Except for portions of Rule 391–3–1–.02(7) incorporating by reference the exemption of ethanol production facilities that produce ethanol by natural fermentation from the requirement to include fugitive emissions in determining major source applicability at 40 CFR 52.21(b)(1)(i)(*a*) and 40 CFR 52.21(b)(1)(iii)(*f*). Those provisions have not been approved into the Georgia SIP.

(e) *EPA-Approved Georgia non-regulatory provisions.*

EPA-APPROVED GEORGIA NON-REGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanation
High Occupancy Vehicle (HOV) lane on I–85 from Chamblee-Tucker Road to State Road 316. High Occupancy Toll (HOT) lane on I–85 from Chamblee-Tucker Road to State Road 316.	Atlanta Metropolitan Area ..	11/15/1993 and amended on 6/17/1996 and 2/5/2010	3/18/1999, 4/26/1999 and 11/5/2009.	
Clean Fuel Vehicles Revolving Loan Program.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Regional Commute Options Program and HOV Marketing Program.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
HOV lanes on I–75 and I–85	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Two Park and Ride Lots: Rockdale County-Sigman at I–20 and Douglas County-Chapel Hill at I–20.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
MARTA Express Bus routes (15 buses).	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Signal preemption for MARTA routes #15 and #23.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Improve and expand service on MARTA's existing routes in southeast DeKalb County.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Acquisition of clean fuel buses for MARTA and Cobb County Transit.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	

EPA-APPROVED GEORGIA NON-REGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanation
ATMS/Incident Management Program on I–75/I–85 inside I–285 and northern ARC of I–285 between I–75 and I–85.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
Upgrading, coordination and computerizing intersections.	Atlanta Metropolitan Area ..	6/17/1996	4/26/1999.	
[Reserved]				
Atlantic Steel Transportation Control Measure.	Atlanta Metropolitan Area ..	3/29/2000	8/28/2000.	
Procedures for Testing and Monitoring Sources of Air Pollutants.	Atlanta Metropolitan Area ..	7/31/2000	7/10/2001.	
Enhanced Inspection/Maintenance Test Equipment, Procedures and Specifications.	Atlanta Metropolitan Area ..	9/20/2000	7/10/2001.	
Preemption Waiver Request for Low-RVP, Low-Sulfur Gasoline Under Air Quality Control Rule 391–3–1–.02(2)(bbb).	Atlanta Metropolitan Area ..	5/31/2000	2/22/2002.	
Technical Amendment to the Georgia Fuel Waiver Request of May 31, 2000.	Atlanta Metropolitan Area ..	11/9/2001	2/22/2002.	
Georgia's State Implementation Plan for the Atlanta Ozone Nonattainment Area.	Atlanta Metropolitan Area ..	7/17/2001	5/7/2002.	
Post-1999 Rate of Progress Plan.	Atlanta Metropolitan Area ..	12/24/2003	7/19/2004, 69 FR 42884.	
Severe Area Vehicle Miles Traveled (VMT SIP) for the Atlanta 1-hour severe ozone nonattainment area.	Atlanta 1-hour ozone severe nonattainment area.	6/30/2004	6/14/2005, 70 FR 34358.	
Atlanta 1-hour ozone attainment area 2015 maintenance plan.	Atlanta severe 1-hour ozone maintenance area.	2/1/2005	6/14/2005, 70 FR 34660.

[64 FR 27701, May 21, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.570, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

EFFECTIVE DATE NOTE: At 85 FR 37568, June 23, 2020, § 52.570 was amended by adding an entry at the end of the table, effective July 23, 2020. For the convenience of the user, the added text is set forth as follows:

§ 52.570 Identification of plan.

* * * * *

(e) * * *

EPA-APPROVED GEORGIA NON-REGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/effective date	EPA approval date	Explanation
* *	*	*	*	* *
110(a)(1) and (2) Infrastructure Requirements for the 2010 1-hour SO_2 NAAQS.	Georgia	1/9/2019	6/23/2020, 85 FR 37565 ..	Addressing Prongs 1 and 2 of section 110(a)(2)(D)(i) only.

§ 52.571 Classification of regions.

The Georgia plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Augusta (Georgia)-Aiken (South Carolina) Interstate	I	II	III	III	III
Metropolitan Atlanta Intrastate	I	I	III	III	III
Chattanooga Interstate	I	II	III	III	III
Columbus (Georgia)-Phenix City (Alabama) Interstate	I	III	III	III	III
Central Georgia Intrastate	I	I	III	III	III
Jacksonville (Florida)-Brunswick (Georgia) Interstate	I	II	III	III	I
Northeast Georgia Intrastate	II	III	III	III	III
Savannah (Georgia)-Beaufort (South Carolina) Interstate	I	I	III	III	III
Southwest Georgia Intrastate	II	II	III	III	III

[37 FR 10859, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.572 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Georgia's plans for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds the plans satisfy all requirements of Part D, Title I, of the Clean Air Act as amended in 1977.

(b) *Disapproval.* Submittal from the State of Georgia, through the Georgia's Department of Natural Resources Environmental Protection Division (EPD) on January 13, 2011, that would allow for the automatic rescission of federal permitting-related requirements in certain circumstances. EPA is disapproving a portion of the SIP submittal related to a provision (at 391–3–1–.02(7)(a)(2)(iv)) that would automatically rescind portions of Georgia's State Implementation Plan in the wake of certain court decisions or other triggering events (the automatic rescission clause).

[76 FR 55577, Sept. 8, 2011, as amended at 81 FR 11445, Mar. 4, 2016]

§ 52.573 Control strategy: General.

The generic rules and procedures for emission trades (bubbles), submitted on October 27, 1982, by the Georgia Department of Natural Resources, are disapproved because they do not meet the requirements of the Clean Air Act.

[49 FR 44464, Nov. 7, 1984]

§§ 52.574–52.575 [Reserved]

§ 52.576 Compliance schedules.

(a) [Reserved]

(b) The extended compliance schedule for the General Motors Lakewood Assembly Plant submitted on July 30, 1982, is disapproved because the State has failed to show that the schedule would not interfere with the attainment of the ozone standard in the Atlanta nonattainment area.

[40 FR 3413, Jan. 22, 1975, as amended at 40 FR 18432, Apr. 28, 1975; 40 FR 42352, Sept. 12, 1975; 51 FR 3778, Jan. 30, 1986; 51 FR 40675, 40676, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§ 52.577 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Chattanooga, Alabama-Georgia-Tennessee $PM_{2.5}$ nonattainment area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Chattanooga, Alabama-Georgia-Tennessee $PM_{2.5}$ nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Macon, Georgia $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Macon, Georgia $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Rome, Georgia $PM_{2.5}$ nonattainment area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Rome, Georgia $PM_{2.5}$ nonattainment area is not subject to the consequences of failing to attain pursuant to section 179(d).

(d) Based upon EPA's review of the air quality data for the 3-year period 2008–2010, EPA determined that the Atlanta, Georgia, 1997 8-hour ozone nonattainment Area attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2011. Therefore, EPA has met the requirement pursuant to CAA section 181(b)(2) to determine, based on the Area's air quality as of the attainment date,

whether the Area attained the standard. EPA also determined that the Atlanta, Georgia, 1997 8-hour ozone nonattainment Area is not subject to the consequences of failing to attain pursuant to section 181(b)(2).

[76 FR 55575, Sept. 8, 2011, as amended at 76 FR 55577, Sept. 8, 2011; 77 FR 13492, Mar. 7, 2012]

§ 52.578 Control Strategy: Sulfur oxides and particulate matter.

In a letter dated March 26, 1987, the Georgia Department of Natural Resources certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules. This certification does not apply to Georgia Power plants; Hammond (Coosa), McDonough (Smyrna), Arkwright (Macon), Branch (Milledgeville), Wansley (Roopville), Scherer (Juliette), and Yates (Newnan), Savannah Electric Plants McIntosh (Rincon) and Port Wentworth (Port Wentworth); Inland (Rome); Buckeye Cellulose (Oglethorpe); Georgia Kraft (Macon), Union Camp (Savannah); and Stone Container (Savannah).

(a) Determination of Attaining Data. EPA has determined, as of April 5, 2011, the Rome, Georgia, nonattainment area has attaining data for the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(b) *Determination of Attaining Data.* EPA has determined, as of May 31, 2011, the Chattanooga, Tennessee, nonattainment area has attaining data for the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(c) *Determination of Attaining Data.* EPA has determined, as of June 2, 2011, the Macon, Georgia, nonattainment area has attaining data for the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(d) *Disapproval.* EPA is disapproving portions of Georgia's Infrastructure SIP for the 2006 24-hour $PM_{2.5}$ NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(e) *Determination of Attaining Data.* EPA has determined, as of April 5, 2011, the Atlanta, Georgia, nonattainment area has attaining data for the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

[54 FR 40002, Sept. 29, 1989, as amended at 76 FR 18651, Apr. 5, 2011; 76 FR 31241, May 31, 2011; 76 FR 31859, June 2, 2011; 76 FR 43167, July 20, 2011; 76 FR 76622, Dec. 8, 2011]

§ 52.579 Economic feasibility considerations.

Section 88–906(h), (i), (k), (o) and (q) of the Georgia Code is disapproved, since consideration of economic feasibility could, in some cases, conflict, with the requirements of the Act that primary standards be attained as expeditiously as practicable, but in no case later than July 1975.

[39 FR 34536, Sept. 26, 1974]

§ 52.580 [Reserved]

§ 52.581 Significant deterioration of air quality.

(a) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Georgia shall be submitted to the State agency, Georgia Department of Natural Resources, Environmental Protection Division, Air Protection Branch, 4244 International Parkway, Suite 120, Atlanta, Georgia 30354 rather than to EPA's Region 4 office.

(b) [Reserved]

[77 FR 23398, Apr. 19, 2012]

§ 52.582 Control strategy: Ozone.

(a) Approval—The Administrator approves the incorporation of the photochemical assessment ambient monitoring system submitted by Georgia on November 8, 1993, into the Georgia State Implementation Plan. This submittal satisfies 40 CFR 58.20(f) which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS).

(b) On August 29, 1997, Harold F. Reheis, Director, Georgia Department of Natural Resources submitted to John Hankinson, Regional Administrator, United States Environmental Protection Agency Region IV, a State Implementation Plan revision including the following transportation control measures.

(1) *HOV Lane*—This project referred to as AR 073B is the addition of HOV lanes on I–85 from Chamblee-Tucker Road to State Route 316.

(2) *Ridershare Program*—This project is referred to as AR–220 and is a lump sum eligible to all colleges and universities with the 10 county ARC region.

(3) *Transportation Management Associations*—Referred to as project AR 221 is to set up a ''pot'' of funds set aside specially to assist in the development of transportation management associations and start-up ridershare services in the areas that are considered to be highly congested throughout the Region.

(4) *MARTA Transit Incentives Program*—This project is referred to as AR–231.

(5) *Alternative Fuel Refueling Station/Park and Ride Transportation Center*—This project is referred to as DO–AR–211.

(c) EPA is giving final interim approval to the Georgia Inspection and Maintenance (I/M) Program submitted on March 27, 1996, with supplemental information submitted on January 31, 1997, until November 11, 1999.

(d) *Determination of attaining data.* EPA has determined, as of June 23, 2011, the Atlanta, Georgia nonattainment area has attaining data for the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this area continues to meet the 1997 8-hour ozone NAAQS.

(e) *Determination of attaining data.* EPA has determined, as of July 14, 2016, that the Atlanta, Georgia nonattainment area has attaining data for the 2008 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.1118, suspends the requirements for this area to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures for failure to attain or make reasonable progress, and other planning SIPs related to attainment of the 2008 ozone NAAQS, or for any prior NAAQS for which the determination has been made, until such time as: The area is redesignated to attainment for that NAAQS or a redesignation substitute is approved as appropriate, at which time the requirements no longer apply; or EPA determines that the area has violated that NAAQS, at which time the area is again required to submit such plans.

[59 FR 46178, Sept. 7, 1994, as amended at 63 FR 23390, Apr. 29, 1998; 63 FR 34302, June 24, 1998; 64 FR 4570, Jan. 29, 1999; 76 FR 36875, June 23, 2011; 81 FR 45421, July 14, 2016]

§ 52.583 Additional rules and regulations.

Section 391–3–1–.02(2)(e), Particulate Emissions from Manufacturing Processes, is hereby approved only to the extent that it provides for the establishment, as permit conditions, of emission limits more stringent than those otherwise applicable under the currently approved Georgia regulations. Any application of this regulation which would result in permit provisions less stringent than those otherwise required by the State's regulations must be formally submitted to EPA for prior approval as a plan revision pursuant to section 110(a) of the Clean Air Act.

[41 FR 35185, Aug. 20, 1976]

§ 52.584 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (b)(1) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (b)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 1 allowances under subpart BBBBB of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart BBBBB of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48363, Aug. 8, 2011, as amended at 81 FR 74586 and 74594, Oct. 26, 2016]

§ 52.585 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Georgia and for which requirements are set forth under the CSAPR SO_2 Group 2 Trading Program in subpart DDDDD of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Georgia's State Implementation Plan (SIP) as

correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39, except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Georgia's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 2 allowances under subpart DDDDD of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart DDDDD of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48363, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

§ 52.590 Original identification of plan section.

(a) This section identified the original ''Air Implementation Plan for the State of Georgia'' and all revisions submitted by Georgia that were federally approved prior to December 1, 1998. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b)–(c) [Reserved]

[79 FR 30050, May 27, 2014]

(c) *EPA approved regulations.*

Subpart M—Hawaii

§ 52.620 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for State of Hawaii under section 110 of the Clean Air Act, 42 U.S.C. 7401–7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraph (c) and (d) of this section with an EPA approval date prior to May 1, 2012, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after May 1, 2012, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region IX certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State implementation plan as of May 1, 2012.

(3) Copies of the materials incorporated by reference may be inspected at the Region IX EPA Office at 75 Hawthorne Street, San Francisco, CA 94105; Air and Radiation Docket and Information Center, EPA Headquarters Library, Infoterra Room (Room Number 3334), EPA West Building, 1301 Constitution Ave. NW., Washington, DC; or the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to:*http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Hawaii State Department of Health 5-Year Regional Haze Progress Report for Federal Implementation Plan, excluding Appendix H, I and J.	State-wide	10/20/2017	8/12/2019, 84 FR 39754.	

EPA APPROVED HAWAII NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
State of Hawaii Air Pollution Control Implementation Plans for Nitrogen Dioxide, Ozone, $PM_{2.5}$, and Lead				
State of Hawaii Air Pollution Control Implementation Plan for Lead.	Statewide	10/29/82	8/18/83, 48 FR 37402	Excluding section II (''Notice of Public Hearing''); Hawaii Statute on Environmental Quality, Chapter 342, Hawaii Revised Statutes, section 342–7 (see 74 FR 11037 (March 16, 2009); and section IV (''Control Regulations''). The statutory provisions in Section III (''Legal Authority'') superseded statutory provisions approved at 37 FR 10842 (May 31, 1972) and at 38 FR 30876 (November 8, 1973) and were, with few exceptions, superseded by approval of more recent statutory provisions at 77 FR 47530 (August 9, 2012). Statutory provisions that remain in the current applicable SIP are listed separately in the table in paragraph (e).
State Implementation Plan Revision, Clean Air Act Section 110(a)(2), 1997 Ozone National Ambient Air Quality Standard and 1997 and 2006 $PM_{2.5}$ National Ambient Air Quality Standards.	Statewide	12/14/11	8/9/12, 77 FR 47530	Approval excludes appendix A (''Hawaii Revised Statutes, Chapter 84, Standards of Conduct, Chapter 342B, Air Pollution Control''), appendix B, (''Hawaii Administrative Rules, Title 11, Chapter 60.1, Air Pollution Control''), appendix D (''SIP Public Comment Proceedings''), and appendix E (''Public Proceedings for Hawaii Administrative Rules, Chapter 11–60.1''). Approved statutory provisions included in appendix A are listed separately in the table in paragraph (e). In separate rulemakings, EPA has taken action to approve certain regulations included in appendix B. Approved regulations are listed separately in the table in paragraph (c).

EPA APPROVED HAWAII NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
Hawaii State Implementation Plan Revision for 2008 Lead National Ambient Air Quality Standard, Clean Air Act Section 110(a)(1) & (2), excluding attachment 6, and appendices A, B, C, F.	Statewide	2/13/13	79 FR 19012, 4/7/2014	Approved SIP revision excludes attachment 6 (''Summary of Public Participation Proceedings''), appendix A (''Hawaii Revised Statutes Chapter 342A, Air Pollution Control''), appendix B (''Hawaii Revised Statutes Chapter 84, Standards of Conduct''), appendix C (''Hawaii Administrative Rules Chapter 11–60.1, Air Pollution Control''), and appendix F (''Approval and Public Participation Proceedings from the Most Recent Amendment and Public Comment for HAR 11–60.1–90: September 15, 2001 version''). The statutory provisions in appendices A and B were previously approved and are listed separately in the table under paragraph (e). EPA-approved regulations contained in appendix C are listed separately in the table under paragraph (c). This action addresses the following CAA elements or portions thereof for the 2008 Pb NAAQS: 110(a)(2)(A), (B), (C), (D)(i)(I), (E), (F), (G), (H), (J), (K), (L), and (M).

EPA APPROVED HAWAII NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
Hawaii State Implementation Plan Revision, National Ambient Air Quality Standards for 2008 Ozone and 2010 Nitrogen Dioxide, Clean Air Act Section 110(a)(1) & (2), excluding attachment 3, and appendices A, B, and C.	Statewide	4/4/14	8/21/14, 79 FR 49454	Approved SIP revision excludes attachment 3 (''Summary of Public Participation Proceedings''), appendix A (''Hawaii Revised Statutes, Title 19, Health, Chapter 342B, Air Pollution Control Sections 4 and 5''); appendix B (''Hawaii Administrative Rules, Title 11, Department of Health, Chapter 11–60.1, Air Pollution Control, Section 31;), appendix C (''Approvals & Public Participation Proceedings for HAR § 11–60.1–31: November 26, 1993 version''). The statutory provisions in appendix A are listed separately in the table under paragraph (e). The regulations in appendix B are listed separately in the table under paragraph (c). This action addresses the following CAA elements or portions thereof for the 2008 Ozone and 2010 Nitrogen Dioxide NAAQS: 110(a)(2)(A), (B), (C), (E), (F), (G), (H), (J), (K), (L), and (M).
Hawaii State Implementation Plan Revision to Address CAA Section 110(a)(2)(D)(i)(I) for the 2008 Ozone National Ambient Air Quality Standard, excluding Attachment 3.	Statewide	8/6/2015	8/14/2019, 84 FR 40266	Approved SIP revision excludes Attachment 3 (''Summary of Public Participation Proceedings'').

§ 52.621 Classification of regions.

The Hawaii plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
State of Hawaii	II	III	III	III	III

[37 FR 10860, May 31, 1972]

§ 52.622 Original identification of plan.

(a) This section identified the original ''State of Hawaii Air Pollution Control Implementation Plan'' and all revisions submitted by the State of Hawaii that were federally approved prior to June 1, 2005.

(b) The plan was officially submitted on January 28, 1972.

(1) Previously approved on May 31, 1972 in paragraph (b) of this section and now deleted from the SIP without replacement Air Pollution Control Law, Hawaii Revised Statutes, chapter 322, part V, section 322–68 and Public Health Regulations, chapter 43, section 20.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Certification that the plan was adopted submitted on April 4, 1972, by the Department of Health.

(2) Telegram and letters (Non-regulatory) clarifying the plan submitted on May 8, 1972, by the Governor.

(3) Telegram (Non-regulatory) clarifying the particulate matter control strategy submitted on May 22, 1972, by the Governor.

(4) Letter (Non-regulatory) clarifying disapproval of the plan submitted on June 15, 1972, by the Governor.

(i) Previously approved on November 8, 1973 in paragraph (c)(4) of this section and now deleted from the SIP without replacement S.B. No. 1382–72, Act 100, section 7.

(ii) [Reserved]

(5) Revised regulations (in their entirety) for the State of Hawaii submitted on November 21, 1972, by the Governor.

(i) Previously approved on May 14, 1973 in paragraph (c)(5) of this section and now deleted from the SIP without replacement chapter 43, section 20.

(ii) [Reserved]

(6) Regulations establishing a permit system for agricultural burning submitted on May 15, 1973, by the Governor.

(7) Compliance schedule submitted on July 27, 1973, by the Governor.

(8) 18-month extension plan for particulate matter submitted on August 15, 1973, by the Governor.

(9) Date for attainment of the national ambient air quality standards for particulate matter submitted on April 25, 1974, by the Governor.

(10) Previously approved on April 23, 1979 and now deleted without replacement: A variance to the Hawaii Public Health Regulations, chapter 43, section 7(b)(5) submitted on September 12, 1978, by the Governor.

(11) A variance to the Hawaii Public Health Regulations, Chapter 43, Section 7(b)(5) submitted on February 22, 1979 by the Governor.

(12) The following amendments to the plan were submitted on August 21, 1980, by the Governor.

(i) XII. Air Quality Surveillance Network.

(13) A variance to the Hawaii Public Health Regulations, Chapter 43, section 8 (b)(1) submitted on November 25, 1980 by the Governor.

(14) Previously approved on September 30, 1982 and now deleted without replacement: A variance of the Hawaii Public Health Regulations, chapter 43, section 8(b)(1) submitted on April 6, 1982, by the Governor.

(15) Hawaii State Lead SIP Revision submitted on October 29, 1982, by the State.

(i) Previously approved on August 18, 1983 in paragraph (c)(15) of this section and now deleted from the SIP without replacement Hawaii Statute on Environmental Quality, Hawaii Revised Statutes, chapter 342, section 342–7.

(ii) [Reserved]

(16) The following amendments to the plan were submitted on December 20, 1982 by the State.

(i) Title 11—Department of Health, Chapter 60, Air Pollution Control.

(A) Amended sections 11–60–01 thru 11–60–29, 11–60–35 thru 11–60–38.

(B) Previously approved on August 18, 1983 and now deleted without replacement section 11–60–36.

(17) The following amendment to the plan was submitted on September 14, 1988, by the Governor's designee.

(i) *Incorporation by reference.* (A) Hawaii Department of Health.

(*1*) Section XII, Air Quality Surveillance Network adopted on August 16, 1988.

[37 FR 10861, May 31, 1972, as amended at 41 FR 8959, Mar. 2, 1976; 44 FR 23828, Apr. 23, 1979; 44 FR 46274, Aug. 7, 1979; 46 FR 40513, Aug. 10, 1981; 47 FR 3111, Jan. 22, 1982; 48 FR 37403, Aug. 18, 1983; 62 FR 34648, June 27, 1997; 69 FR 41432, July 9, 2004. Redesignated and amended at 70 FR 44854, Aug. 4, 2005; 74 FR 11040, Mar. 16, 2009]

§ 52.623 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Hawaii's plan for attainment and maintenance of the national standards. The State included various provisions in its plan to provide for the attainment of the State ambient air quality standards. As described in the Governor's letters of January 28, May 8, and May 22, 1972, these provisions were included for information purposes only and were not to be considered a part of the plan to implement national standards. Accordingly, these additional provisions are not considered a part of the applicable plan.

(b) *1997 8-hour ozone NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is disapproved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

(c) *1997 $PM_{2.5}$ NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is disapproved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

(d) *2006 $PM_{2.5}$ NAAQS:* The SIP submitted on December 14, 2011 is partially disapproved for Clean Air Act (CAA) elements 110(a)(2)(C) and (J), and is disapproved for CAA elements 110(a)(2)(D)(i)(II) and (D)(ii).

[79 FR 17874, Mar. 31, 2014]

§ 52.624 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal authority to provide for public availability of emission data is inadequate.

(b) *Regulation for public availability of emission data.* (1) Any person who cannot obtain emission data from the Agency responsible for making emission data available to the public, as specified in the applicable plan, concerning emissions from any source subject to emission limitations which are part of the approved plan may request that the appropriate Regional Administrator obtain and make public such data. Within 30 days after receipt of any such written request, the Regional Administrator shall require the owner or operator of any such source to submit information within 30 days on the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the applicable plan.

(2) Commencing after the initial notification by the Regional Administrator pursuant to paragraph (b)(1) of this section, the owner or operator of the source shall maintain records of the nature and amounts of emissions from such source and any other information as may be deemed necessary by the Regional Administrator to determine whether such source is in compliance with applicable emission limitations or other control measures that are part of the plan. The information recorded shall be summarized and reported to the Regional Administrator, on forms furnished by the Regional Administrator, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 to June 30 and July 1 to December 31.

(3) Information recorded by the owner or operator and copies of this summarizing report submitted to the Regional Administrator shall be retained by the owner or operator for 2

years after the date on which the pertinent report is submitted.

(4) Emission data obtained from owners or operators of stationary sources will be correlated with applicable emission limitations and other control measures that are part of the applicable plan and will be available at the appropriate regional office and at other locations in the state designated by the Regional Administrator.

[39 FR 34536, Sept. 26, 1974, as amended at 40 FR 55329, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986]

§ 52.625 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met, since sections 322–64(5) and 322–66 of the Hawaii Revised Statutes could, in some circumstances, prohibit the disclosure of emission data to the public. Therefore, sections 322–64(5) and 322–66 are disapproved.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.626 Compliance schedules.

(a) [Reserved]

(b) The compliance schedules for the sources identified below are disapproved as not meeting the requirements of Subpart N of this chapter. The regulations cited are air pollution control regulations of the State.

Source	Location	Regulation sections involved	Date of adoption
Nanakuli Paving & Rock Co., Ltd.	Molokai	8, 13	7/27/73.
Kohala Corp	Halaula	8, 12	Do.

[39 FR 16348, May 8, 1974, as amended at 51 FR 40676, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§§ 52.627–52.631 [Reserved]

§ 52.632 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Hawaii.

[43 FR 26410, June 19, 1978, as amended at 45 FR 52741, Aug. 7, 1980; 68 FR 11322, Mar. 10, 2003; 68 FR 74488, Dec. 24, 2003]

§ 52.633 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b) Regulations for visibility monitoring and new source review. The provisions of §§ 52.27 and 52.28 are hereby incorporated and made part of the applicable plan for the State of Hawaii.

(c) [Reserved]

(d) *Regional Haze Plan Provisions—(1) Applicability—* This paragraph (d) applies to following electric generating units (EGUs) and boilers: Kanoelehua Hill Generating Station, Hill 5 and Hill 6; Puna Power Plant, Boiler 1; Shipman Power Plant, Boiler S–3 and Boiler S–4.

(2) *Definitions.* Terms not defined below shall have the meaning given to them in the Clean Air Act or EPA's regulations implementing the Clean Air Act. For purposes of this paragraph (d):

Owner/operator means any person who owns, leases, operates, controls, or supervises an EGU or boiler identified in paragraph (d)(1) of this section.

SO_2 means sulfur dioxide.

Unit means any of the EGUs or boilers identified in paragraph (d)(1) of this section.

(3) *Emissions cap.* The EGUs identified in paragraph (d)(1) of this section shall not emit or cause to be emitted SO_2 in excess of a total of 3,550 tons per year, calculated as the sum of total SO_2 emissions for all five units over a rolling 12-month period.

(4) *Compliance date.* Compliance with the emissions cap and other requirements of this section is required at all times on and after December 31, 2018.

(5) *Monitoring, recordkeeping and reporting requirements.*

(i) All records, including support information, required by paragraph (d)(5) of this section shall be maintained for

at least five (5) years from the date of the measurement, test or report. These records shall be in a permanent form suitable for inspection and made available to EPA, the Hawaii Department of Health or their representatives upon request.

(ii) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall maintain records of fuel deliveries identifying the delivery dates and the type and amount of fuel received. The fuel to be fired in the boilers shall be sampled and tested in accordance with the most current American Society for Testing and Materials (ASTM) methods.

(iii) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall analyze a representative sample of each batch of fuel received for its sulfur content and heat value following ASTM D4057. The samples shall be analyzed for the total sulfur content of the fuel using ASTM D129, or alternatively D1266, D1552, D2622, D4294, or D5453.

(iv) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall calculate on a monthly basis the SO_2 emissions for each unit for the preceding month based on the sulfur content, heat value and total gallons of fuel burned.

(v) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall calculate on a monthly basis the total emissions for all units for the preceding twelve (12) months.

(vi) The owners and operators of the EGUs identified in paragraph (d)(1) of this section shall notify the Hawaii Department of Health and EPA Region 9 of any exceedance of the emission cap in paragraph (d)(3) of this section within thirty (30) days of such exceedance.

(vii) By March 1, 2019 and within sixty (60) days following the end of each calendar year thereafter, the owners and operators of the EGUs identified in paragraph (d)(1) of this section shall report to the Hawaii Department of Health and EPA Region 9 the total tons of SO_2 emitted from all units for the preceding calendar year by month and the corresponding rolling 12-month total emissions for all units.

(viii) Any document (including reports) required to be submitted by this rule shall be certified as being true, accurate, and complete by a responsible official and shall be mailed to the following addresses: Clean Air Branch, Environmental Management Division, State of Hawaii Department of Health, P.O. Box 3378, Honolulu, HI 96801–3378 and Director of Enforcement Division, U.S. EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

(e) *Approval.* On October 20, 2017, the Hawaii Department of Health submitted the ''Hawaii State Department of Health 5-Year Regional Haze Progress Report for Federal Implementation Plan'' (''Progress Report''). The Progress Report meets the requirements of the Regional Haze Rule in 40 CFR 51.308.

[50 FR 28553, July 12, 1985, as amended at 52 FR 45137, Nov. 24, 1987; 77 FR 61506, Oct. 9, 2012; 82 FR 3129, Jan. 10, 2017; 84 FR 39756, Aug. 12, 2019]

§ 52.634 Particulate matter (PM–10) Group III SIP.

(a) On September 14, 1988, the Governor of Hawaii submitted a revision to the State Implementation Plan (SIP) for implementing the required monitoring activities and other tasks necessary to satisfy the requirements of the PM–10 Group III SIP.

(b) The Hawaii Department of Health has committed to meet the ongoing requirements for PM–10 Group III areas.

[55 FR 18110, May 1, 1990]

Subpart N—Idaho

§ 52.670 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for Idaho under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed as incorporated by reference in paragraphs (c) and (d) was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The material incorporated is as it exists on the date of the approval, and notice of any change in the

material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates on or after January 15, 2015, will be incorporated by reference in the next update to the SIP compilation.

(2)(i) EPA Region 10 certifies that the rules and regulations provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules and regulations which have been approved as part of the State implementation plan as of January 15, 2015.

(ii) EPA Region 10 certifies that the source-specific requirements provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated source-specific requirements which have been approved in the notebook ''40 CFR 52.670(d)—Source Specific Requirements'' as part of the State implementation plan as of January 15, 2015.

(3) Copies of the materials incorporated by reference may be inspected at the EPA Region 10 Office of Air, Waste, and Toxics (AWT–150), 1200 Sixth Avenue, Seattle, Washington 98101; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal__register/code__of__federal__regulations/ibr__locations.html.*

(c) *EPA approved regulations.*

Kerr McGee, Soda Springs, ID.	13–0420–0002–00	7/18/1979 (date issued)	7/28/1982, 47 FR 32530	Soda Springs TSP Nonattainment Area Plan.
J.R. Simplot, Pocatello, Idaho.	Air Pollution Operating Permit No. T1–9507–114–1; Facility Number No. 077–00006	4/5/2004	7/13/2006, 71 FR 39574	The following conditions: Cover page, facility identification information only, #300 Sulfuric Acid Plant, Permit Conditions 16.1, 16.10, 16.11, #400 Sulfuric Acid Plant, Permit Condition 17.1, 17.7, 17.10, 17.11, Phosphoric acid plant, Permit Condition 12.3, 12.13, Granulation No. 3 Process, Permit Condition 9.2.1, Granulation No. 3 stack, 9.17 (except 9.17.1 through 9.17.6), Reclaim Cooling Towers, Permit Condition 14.2, 14.6.1, Babcock & Wilcox Boiler, Permit Condition 6.4, 6.12, HPB&W Boiler, Permit Condition 5.3, 5.13 through 5.18, 5.21.

EPA APPROVED IDAHO SOURCE-SPECIFIC REQUIREMENTS [1]—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanation
J.R. Simplot, Pocatello, Idaho.	Compliance Agreement & Voluntary Order Idaho Code 39–116A	4/16/2004	7/13/2006, 71 FR 39574	The following conditions: No. 300 Sulfuric Acid Plant; Condition 8 and 9. No. 400 Sulfuric Acid Plant; Condition 10, 11, and 12. Granulation No. 1 Plant; Condition 14. Granulation No. 2 Plant; Condition 15. Compliance and Performance Testing; Condition 16.
The Amalgamated Sugar Company LLC—Nampa Factory, Nampa, Idaho.	T2–2009.0105	12/23/2011 (date issued)	4/28/2014, 79 FR 23273	The following conditions: 1.2, including the table of Regulated Emission Point Sources Table, 3.2, 3.3 (first paragraph only), 3.4, 3.5, 3.6, 3.7, 3.8, 3.9, 3.11, 3.13, 3.14, 3.15, 3.16, and 4.1.
P4 Production, L.L.C., Soda Springs, Idaho.	T2–2009.0109	11/17/2009 (date issued)	6/22/2011, 76 FR 36329	The following conditions: 1.2 (including Table 1.1), 2.3, 2.4, 2.5, 2.6, 2.7, and 2.8. (Regional Haze SIP Revision).

[1] EPA does not have the authority to remove these source-specific requirements in the absence of a demonstration that their removal would not interfere with attainment or maintenance of the NAAQS, violate any prevention of significant deterioration increment or result in visibility impairment. Idaho Department of Environmental Quality may request removal by submitting such a demonstration to EPA as a SIP revision.

[2] Only a small portion of this facility is located on State lands. The vast majority of the facility is located in Indian Country. It is EPA's position that unless EPA has explicitly approved a program as applying in Indian country, State or local regulations or permits are not effective within the boundaries of that Indian country land for purposes of complying with the CAA. 68 FR 2217, 2220 (January 16, 2003).

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Chapter I—Introduction ...	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter II—Administration.	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter III—Emission Inventory.	State-wide	1/15/1980, 2/14/1980	7/28/1982, 47 FR 32530.	
Chapter IV—Air Quality Monitoring.	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter V—Source Surveillance.	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter VI—Emergency Episode Plan.	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter VIII—Nonattainment Area Plans				
Chapter VIII-a	Silver Valley TSP Nonattainment Area Plan.	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter VIII-b	Lewiston TSP Nonattainment Area Plan.	1/15/1980, 12/4/1980, and 2/5/1981.	7/28/1982, 47 FR 32530.	
Chapter VIII-c	Transportation Control Plan for carbon monoxide, Ada County.	5/24/1984, 1/3/1985, 3/25/1985, and 6/29/1994.	7/28/1982, 47 FR 32530, 6/6/1985, 50 FR 23810, and 12/1/1994, 59 FR 61546.	
Chapter VIII-d	Pocatello TSP Nonattainment Area Plan.	3/7/1980 and 2/5/1981.	7/28/1982, 47 FR 32530.	
Chapter VIII-e	Soda Springs TSP Nonattainment Area Plan.	1/15/1980	7/28/1982, 47 FR 32530.	
Chapter VIII-f	Pinehurst PM–10 Nonattainment Area Plan.	4/14/1992	8/25/1994, 59 FR 43745.	
Chapter VIII-g	Northern Ada County PM10 Nonattainment Area Plan.	11/14/1991, 12/30/1994, and 7/13/1995.	5/30/1996, 61 FR 27019.	
Chapter VIII-h	Sandpoint PM10 Nonattainment Area Plan.	8/16/1996	6/26/2002, 67 FR 43006.	

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Chapter VIII-i	Northern Ada County CO Limited Maintenance Plan.	1/17/2002	10/28/2002, 67 FR 65713.	
Chapter VIII-j	Ada County/Boise Idaho PM–10 Maintenance Plan.	9/27/2002, 7/10/2003, and 7/21/2003.	10/27/2003, 68 FR 61106.	
Chapter IX—Reserved.				
Chapter X—Plan for Maintenance of National Ambient Air Quality Standards for Lead.	State-wide	2/3/1984	6/4/1984 (EPA effective date).	
Small Business Assistance Program.	State-wide	1/3/1994	9/19/1994, 59 FR 47801.	
Appendix A—Legal Authority and Other Administrative Matters.	State-wide	1/15/1980	7/28/1982, 47 FR 32530.	
Appendix A.2—Idaho Environmental Protection and Health Act, Idaho Code Section 39–101 et seq.	State-wide	3/15/2001	1/16/2003, 68 FR 2217.	
Four sections of Appendix A.3—Rules and Regulations for Control of Air Pollution in Idaho—that were approved but not incorporated by reference in section (c).	State-wide	5/17/1994	1/16/2003, 68 FR 2217	IDAPA 58.01.01000 (legal authority), 58.01.01002 (written interpretations), 58.01.01003 (administrative appeals), and 58.01.01128 (confidential business information).
Open Burning of Crop Residue State Implementation Plan Revision.	State-wide	5/28/2008	8/1/2008, 73 FR 44915.	
Interstate Transport State Implementation Plan, May 11, 2010 (see comments).	State-wide	6/28/2010	11/26/2010, 75 FR 72705.	For the 1997 8-hour ozone NAAQS and the 1997 $PM_{2.5}$ NAAQS. See docket EPA–R10–OAR–2010–0669.
Regional Haze SIP Revision.	State-wide	10/25/2010	6/22/2011, 76 FR 36329	The portion of the Regional Haze SIP revision relating to BART, the calculation of baseline and natural conditions, and the statewide inventory of emissions of pollutants that are reasonably anticipated to cause or contribute to visibility impairment in any mandatory Class I Federal Area.
Section 110(a)(2) Infrastructure Requirements for the 1997 8-hour Ozone NAAQS.	Statewide	9/15/2008, 6/24/2010	7/17/2012, 77 FR 41916	This action addresses following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(ii), (E)(i), (E)(iii), (F), (G), (H), (J), (K), (L), and (M).

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Northern Ada County Air Quality Maintenance Area Second 10-year Carbon Monoxide Limited Maintenance Plan.	State-wide	2/10/2011	8/2/2012, 77 FR 45962.	
Regional Haze SIP Revision.	State-wide	10/25/2010	11/8/2012, 77 FR 66929	The remaining portion of the regional haze SIP elements as proposed in the May 22, 2012 notice. 77 FR 30248.
Sandpoint PM_{10} Nonattainment Area Limited Maintenance Plan.	Bonner County: Sandpoint Area.	12/14/2011	4/3/2013, 78 FR 20001	
Idaho State Board SIP Revision; Executive Order 2013–06; dated June 26, 2013.	State-wide	9/16/2013	10/24/2013, 78 FR 63394.	To satisfy the requirements of CAA section 128(a)(1) and CAA section 110(a)(2)(E)(ii) for all criteria pollutants. Renewed on December 14, 2016, expiring December 14, 2020, unless renewed by subsequent Executive Order. *See* Executive Order 2016–07.
Idaho State Board SIP Revision; Idaho Code §§ 59–701 through 705; Ethics in Government Act.	Statewide	9/16/2013	10/24/2013, 78 FR 63394.	To satisfy the requirements of CAA section 128(a)(2) and CAA section 110(a)(2)(E)(ii) for all criteria pollutants.
Idaho Department of Environmental Quality letter dated October 18, 2013 supplementing the May 9, 2013 SIP Submittal.	State-wide	10/24/2013	3/3/2014, 79 FR 11711.	
Letter of Intent PM 2.5 Reduction, Franklin County Road Department to Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT–ID $PM_{2.5}$ Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201	Fine Particulate Matter Control Measures; Franklin County.
Road Sanding Agreement, Idaho Transportation Department to Idaho Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT–ID $PM_{2.5}$ Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201	Fine Particulate Matter Control Measures; Franklin County.
Regional Haze SIP Revision.	State-wide	6/29/2012	4/28/2014, 79 FR 23273	The portion of the Regional Haze SIP relating to BART for the TASCO, Nampa facility,
Section 110(a)(2) Infrastructure Requirements for the 2008 Pb NAAQS.	State-wide	2/14/2012	5/22/2014, 79 FR 29358	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M).

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Section 110(a)(2) Infrastructure Requirements for the 1997 $PM_{2.5}$ NAAQS.	State-wide	9/15/2008; 6/28/2010	7/14/2014, 79 FR 40662	This action addresses the following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2006 $PM_{2.5}$ NAAQS.	State-wide	6/28/2010; 8/10/2011	7/14/2014, 79 FR 40662	This action addresses the following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2008 Ozone NAAQS.	State-wide	6/28/2010	7/14/2014, 79 FR 40662	This action addresses the following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Fine Particulate Matter Baseline Emissions Inventory.	Franklin County, Logan UT–ID $PM_{2.5}$ Nonattainment Area.	12/19/2012	7/18/2014, 79 FR 41904	Fine Particulate Matter; Franklin County.
Section 110(a)(2) Infrastructure Requirements for the 2010 NO_2 NAAQS.	State-wide	9/16/2013	8/11/2014, 79 FR 46708	This action addresses the following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2010 SO_2 NAAQS.	State-wide	9/16/2013	8/11/2014, 79 FR 46708	This action addresses the following CAA elements or portions thereof: 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Portneuf Valley PM_{10} Nonattainment Area Plan and Maintenance Plan	Portneuf Valley	7/13/2006	71 FR 39574.	
Portneuf Valley PM_{10} Maintenance Plan—Revision.	Portneuf Valley	4/21/2014	7/17/2014, 79 FR 41647	
Northern Ada County PM_{10} Second Ten-Year Maintenance Plan.	Northern Ada County	3/11/2013	10/2/2014, 79 FR 59435.	
Pinehurst PM_{10} Contingency Measures.	Pinehurst/Shoshone County.	7/13/1995	10/2/2014, 79 FR 59435.	
Interstate Transport Requirements for the 2006 24-hour $PM_{2.5}$ NAAQS.	State-wide	6/28/2010	4/17/2015, 80 FR 21181	This action addresses the following CAA elements: 110(a)(2)(D)(i)(I).
Interstate Transport Requirements for the 2008 Ozone NAAQS.	State-wide	6/28/2010	12/18/2015, 80 FR 78981.	This action addresses the following CAA elements: 110(a)(2)(D)(i)(I).

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Interstate Transport Requirements for the 2010 NO_2 NAAQS.	State-wide	12/24/2015	5/5/2016, 81 FR 27017	This action addresses the following CAA elements: 110(a)(2)(D)(i)(I).
Section 110(a)(2) Infrastructure Requirements—2012 $PM_{2.5}$ NAAQS.	State-wide	12/23/2015	12/4/2017, 82 FR 57132	Approves SIP for purposes of CAA sections 110(a)(2)(A), (B), (C), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M) for the 2012 $PM_{2.5}$ NAAQS.
Open Burning of Crop Residue State Implementation Plan Revisions.	State-wide	9/22/2017, 10/23/2017.	6/19/2018, 83 FR 28382	Original submission and supplemental modeling analyses
Pinehurst PM_{10} Limited Maintenance Plan.	Shoshone County; Pinehurst Expansion Area and City of Pinehurst.	9/29/2017	9/11/2018, 83 FR 45830.	
Interstate Transport Requirements for the 2012 $PM_{2.5}$ NAAQS.	State-wide	12/23/2015	9/24/2018, 83 FR 48240	This action addresses CAA 110(a)(2)(D)(i)(I).
Regional Haze 5-Year Progress Report.	State-wide	6/28/2016	7/15/2019, 84 FR 33697.	
Cache Valley Fine Particulate Matter Attainment Plan.	Franklin County, Logan UT-ID $PM_{2.5}$ Nonattainment Area.	12/19/2012, 12/24/2014, 7/31/2018.	1/4/2017, 82 FR 729; 8/8/2017, 82 FR 37025; 2/20/2020, 85 FR 9664.	

[70 FR 3481, Jan. 25, 2005]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.670, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.671 Classification of regions.

The Idaho plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutants				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Eastern Idaho Intrastate	I	II	III	III	III.
Eastern Washington Northern Idaho Interstate (Idaho)	I	II	III	III	III.
Idaho Intrastate	I	III	III	III	III.
Metropolitan Boise Intrastate	II	III	III	I	III.

[37 FR 10861, May 31, 1972, as amended at 45 FR 70261, Oct. 23, 1980; 47 FR 32534, July 28, 1982]

§ 52.672 Approval of plans.

(a) *Carbon Monoxide.* (1) EPA approves as a revision to the Idaho State Implementation Plan, the Limited Maintenance Plan for the Northern Ada County Carbon Monoxide Not-Classified Nonattainment Area, submitted by the State on January 17, 2002.

(2) EPA approves as a revision to the Idaho State Implementation Plan, the Northern Ada County Air Quality Maintenance Area Second 10-year Carbon Monoxide Limited Maintenance Plan submitted by the State on February 10, 2011.

(b) *Lead.* [Reserved]

(c) *Nitrogen Dioxide.* [Reserved]

(d) *Ozone.* [Reserved]

(e) *Particulate Matter.* (1) EPA approves as a revision to the Idaho State Implementation Plan, the Northern

Ada County PM_{10} SIP Maintenance Plan, adopted by the State on September 26, 2002.

(2) EPA approves as a revision to the Idaho State Implementation Plan, the Northern Ada County PM_{10} Second Ten-Year Maintenance Plan adopted by the State on March 11, 2013.

(3) EPA approves as a revision to the Idaho State Implementation Plan, the Pinehurst PM_{10} Contingency Measures, adopted by the State on July 13, 1995.

(f) *Sulfur Dioxide.* [Reserved]

(g) *Visibility protection.* (1) EPA approves portions of a Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on October 25, 2010, as meeting the requirements of Clean Air Act section 169A and 40 CFR 51.308(e) regarding Best Available Retrofit Technology. The SIP revision also meets the requirements of 40 CFR 51.308(d)(2) and (4)(v) regarding the calculation of baseline and natural conditions for Craters of the Moon National Monument, Sawtooth Wilderness Area, and Selway-Bitterroot Wilderness Area and the statewide inventory of emissions of pollutants that are reasonably anticipated to cause or contribute to visibility impairment in any mandatory Class I Federal Area. The SIP revision also meets the requirements of Clean Air Act section 110(a)(2)(D)(i)(II) as it applies to visibility for the 1997 8-hour ozone NAAQS and 1997 PM2.5 NAAQS.

(2) EPA approves the remaining portions of the Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on October 25, 2010, as meeting the requirements of the Clean Air Act section 169A and 169B and 40 CFR 51.308.

(3) The EPA is vacating its approval of Idaho's NO_X and SO_X BART determination for the Riley boiler at The Amalgamated Sugar Company, LLC Nampa facility, published June 22, 2011.

(4) The EPA approves a Regional Haze SIP revision submitted by the Idaho Department of Environmental Quality on June 29, 2012, as meeting the requirements of Clean Air Act section 169A and 40 CFR 51.308(e) regarding Best Available Retrofit Technology for The Amalgamated Sugar Company LLC, facility located in Nampa, Idaho. The EPA is approving a revised NO_X BART determination and revised emission limit for NO_X, a revised emission limit for PM, and a SO_2 BART Alternative for The Amalgamated Sugar Company, LLC, Nampa facility.

[67 FR 65718, Oct. 28, 2002, as amended at 68 FR 61110, Oct. 27, 2003; 76 FR 36339, June 22, 2011; 77 FR 45965, Aug. 2, 2012; 77 FR 66934, Nov. 8, 2012; 79 FR 23278, Apr. 28, 2014; 79 FR 41649, July 17, 2014; 79 FR 59438, Oct. 2, 2014]

§ 52.673 Approval status.

With the exceptions set forth in this subpart, the Administrator approves Idaho's plan for the attainment and maintenance of the national standards.

§ 52.674 [Reserved]

§ 52.675 Control strategy: Sulfur oxides—Eastern Idaho Intrastate Air Quality Control Region.

(a)(1) Regulation R of the Rules and Regulations for the Control of Air Pollution in Idaho, which is part of the sulfur dioxide (SO_2) control strategy, is disapproved since it is inconsistent with the purposes and provisions of subpart G of this chapter. These requirements are not met by Regulation R in that the SO_2 control strategy contained therein is not adequate for the attainment and maintenance of SO_2 national ambient air quality standards (NAAQS).

(2) Rules 1–1801 through 1–1804 (Rules for Control of Sulfur Oxide Emissions from Sulfuric Acid Plants) of the ''Rules and Regulations for the Control of Air Pollution in Idaho'' are inadequate to ensure attainment and maintenance of Sulfur Dioxide National Ambient Air Quality Standards in the Eastern Idaho Intrastate Air Quality Control Region. Special limits have previously been established for certain existing acid plants in this Air Quality Control Region (§§ 52.670(c)(15) and 52.675(b)). Therefore, Rules 1–1801 through 1–1804 are approved except as they apply to existing acid plants with approved or promulgated emission limits that are more stringent than the limit found in 1–1802.

(b) Regulation for control of sulfur dioxide (SO_2) emissions: Sulfuric Acid Plants. (1) The provisions of this paragraph shall apply to the owner(s) and

operator(s) of The J. R. Simplot Company's Minerals and Chemical Division, located in Power County, Idaho, in the Eastern Idaho Intrastate Air Quality Control Region.

(2) The owner(s) and operator(s) of The J. R. Simplot Company facility shall utilize best engineering techniques in the operation of their plant to prevent fugitive SO losses. Such techniques shall include but are not limited to:

(i) Operating and maintaining all conducts, flues, and stacks in a leakfree condition.

(ii) Operating and maintaining all process equipment and gas collection systems in such a fashion that leakage of SO_2 gases will be prevented to the maximum extent possible.

(3) The owner(s) and operator(s) of The J. R. Simplot Company facility shall limit SO_2 emissions from their sulfuric acid plants per the following:

(i) The combined SO_2 emissions from the designated 100 and 200 sulfric acid plants shall not exceed 2 kilograms (kg) per metric ton (4 pounds per ton) of 100 percent sulfuric acid produced.

(ii) The SO_2 emissions from the designated 300 sulfuric acid plant and stack shall not exceed 994 kg per hour (2190 pounds per hour).

(4) (i) The owner(s) and operator(s) of The J. R. Simplot Company shall achieve compliance with the requirements specified in paragraphs (b)(2) and (b)(3) of this section in accordance with the following schedule:

(A) Advise EPA as to status of contract(s) and construction schedules for pollution abatement projects within 30 days of the effective date of this regulation.

(B) Attain final compliance by July 31, 1976.

(ii) A performance test of the 300 acid plant shall be necessary to determine whether compliance has been achieved with the requirements of paragraph (b)(3) of this section. Such test must be completed within 15 days of the final compliance date specified in paragraph (b)(4)(i) of this section. Notice must be given to the Administrator at least 10 days prior to such a test to afford him an opportunity to have an observer present.

(iii) Within 60 days after achieving the maximum production rate at which the 100 and 200 acid plant will be operated, but not later than 180 days after initial start-up of these plants and at such other times as may be required by the Administrator under section 114 of the Clean Air Act, the owner(s) and operator(s) of the facility shall conduct performance test(s) in accordance with the requirements of 40 CFR 60.8.

(iv) If the owner(s) and operator(s) of the J. R. Simplot Company facility are presently in compliance with the requirements of paragraphs (b)(2) and (b)(3) of this section or in compliance with a portion of these requirements, such compliance shall be certified to the Administrator within 15 days following the date of the publication of these requirements as a final regulation in the FEDERAL REGISTER. If the owner(s) or operator(s) of The J. R. Simplot Company achieve compliance prior to July 31, 1976, such compliance shall be certified to the Administrator within 15 days of the date of achieving compliance. The Administrator may request whatever supporting information he considers necessary to determine the validity of the certification.

(5) (i) By no later than September 30, 1976, the owner(s) and operator(s) of The J. R. Simplot Company facility shall install, calibrate, maintain and operate measurement system(s) for:

(A) Continuously monitoring and recording SO_2 concentration rates in each sulfuric acid plant discharge stack per the requirements of 40 CFR 60.13 and 60.84.

(B) Continuously monitoring and recording gas volumetric flow rates in the exhaust stack of the designated 300 sulfuric acid plant.

(ii) By no later than October 30, 1976, and at such other times following that date as the Administrator may specify, the SO_2 concentration measurement system(s) and stack gas volumetric flow rate system(s) installed and used pursuant to this paragraph shall be demonstrated to meet the measurement system performance specifications prescribed in 40 CFR 60.13 and Appendix E to this part, respectively. The Administrator shall be notified at least 10 days prior to the start of this field test period to afford the Administrator

the opportunity to have an observer present.

(iii) The sampling point for monitoring the concentration of SO_2 emissions shall be in the duct at the centroid of the cross section of the discharge stack if the cross sectional area is less than 4.65 m^2 (50 ft^2) or at a point no closer to the wall than 0.91 m (3 ft) if the cross sectional area is 4.65 m^2 (50 ft^2) or more. The monitor sample point shall be representative of the average concentration in the duct.

(iv) The measurement system(s) shall be maintained, operated and calibrated in accordance with the methods prescribed by the manufacturers. Records of maintenance and/or calibration shall be kept and submitted to the Administrator upon request. These records shall clearly show instrument readings before and after such calibration and/or maintenance.

(v) The owner(s) and operator(s) of The J. R. Simplot Company facility shall maintain a daily record of three hour average emission rate measurements for each sulfuric acid plant. Three hour average emission rates shall be calculated for each day beginning at midnight. For the 100 and 200 acid plants, the calculations shall be in conformance with 40 CFR 60.84. For the 300 acid plant, average SO_2 emission rates expressed in kg SO_2 per hour shall be calculated. The results of these calculations for each month shall be submitted to the Administrator within 15 days following the end of each month. Such submission shall identify each period of excess emissions that occurred and the nature and cause of any malfunction (if known), the corrective action taken or preventative measures adopted. The records of such measurements including strip charts and other appropriate raw data shall be retained for a minimum of two years following the date of such measurements.

(vi) The continuous monitoring and recordkeeping requirements of paragraph (b)(5) of this section shall become applicable September 30, 1976.

(6)(i) Compliance with the requirements set forth in paragraph (b)(3) of this section shall be determined using the emission rates measured by the continuous measurement system(s) installed, calibrated, maintained and operated in accordance with the requirements of paragraph (b)(5) of this section.

(ii) At the Administrator's discretion, compliance may also be determined using the manual source test methods per 40 CFR 60.85 and Appendix A to part 60 of this title. Emission rates for each stack shall be expressed in units consistent with those in paragraph (b)(3) of this section.

(iii) A violation of the requirements of paragraph (b)(3) of this section shall occur whenever the SO_2 emission rates determined according to paragraph (b)(6)(i) or (b)(6)(ii) of this section exceed the corresponding SO_2 emission rates specified in paragraph (b)(3) of this section.

(7) The owner(s) and operator(s) of The J. R. Simplot Company facility shall by September 30, 1976, install, calibrate, maintain and operate a network for continuously monitoring ground level ambient SO_2 concentrations and wind speed and direction.

(i) The monitoring network shall consist of at least four ambient SO_2 monitoring stations and one meteorological station placed at locations approved by the Administrator.

(ii) The SO_2 monitoring network shall be consistent with automated equivalent methods for measurement of ambient concentrations of SO_2 as defined in part 53 of this chapter.

(iii) The monitoring network installed and used pursuant to this subparagraph shall be maintained, operated and calibrated in accordance with the methods prescribed by the manufacturers. Records of maintenance and/or calibration shall be kept and submitted to the Administrator upon request. These records shall clearly show instrument readings before and after such calibration and/or maintenance.

(iv) The owner(s) and operator(s) of The J. R. Simplot Company facility shall maintain a daily record of all measurements required by this subparagraph. Strip charts and other raw data from the monitoring network shall be retained for a minimum of two years following the date of such measurement.

(v) The owner(s) and operator(s) of The J. R. Simplot Company shall calculate hourly average ambient SO_2

concentrations, wind speed, and wind direction from each monitoring station and submit such values to the Administrator within 15 days following the end of each month.

(vi) The continuous monitoring and recordkeeping requirements of paragraph (b)(7) of this section shall become applicable September 30, 1976 and shall remain applicable until such time as the Administrator declares that an adequate ambient air data base has been established, which shall be no earlier than at least one calendar year.

(vii) Within 90 days of the Administrator's declaration of an adequate data base, Simplot shall submit to the Administrator a technical analysis of the degree of permanent control required on the 300 acid plant to ensure attainment and maintenance of NAAQS.

(8) Nothing in paragraph (b) of this section shall be construed to relieve the owner(s) and operator(s) of The J. R. Simplot Company to comply with any applicable requirements of part 60 of this title. In the event of conflicting requirements or interpretations between part 60 of this title and this paragraph, the more restrictive interpretation or requirement shall apply.

(9) In the event that measurement systems cannot be installed and operational by the date specified in this section, The J. R. Simplot Company shall propose the earliest possible date by which such requirements can be met. Such proposal shall include adequate justification and supporting documentation.

[41 FR 23202, June 9, 1976, as amended at 47 FR 32534, July 28, 1982; 51 FR 40676, Nov. 7, 1986]

§ 52.676 [Reserved]

§ 52.677 Original identification of plan section.

(a) This section identifies the original ''Idaho Air Quality Implementation Plan'' and all revisions submitted by Idaho that were federally approved prior to November 12, 2004.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Miscellaneous additions (compliance schedules and non-regulatory provisions) to the plan submitted on February 23, 1972, by the Idaho Air Pollution Control Commission.

(2) Request for delegation of legal authority submitted on March 2, 1972, by the Governor.

(3) Compliance schedules submitted on April 12, 1972, by the Governor.

(4) Request for an 18-month extension for particulate matter in all AQCR's submitted on May 5, 1972, by the Governor.

(5) Miscellaneous additions (Non-regulatory) to the plan submitted on May 26, 1972, by the Idaho Air Pollution Control Commission.

(6) Appendices D and E of the plan submitted on June 9, 1972, by the Governor.

(7) Revisions to the Rules and Regulations for the Control of Air Pollution in Idaho submitted on February 15, 1973, by the Governor.

(8) Compliance schedules submitted on July 23, 1973, by the Governor.

(9) Amendment to Chapter IX of the plan to provide for review of indirect sources and a new Chapter XIV which sets forth the control strategy for attaining secondary particulate matter standards on October 16, 1973, by the Governor.

(10) Revisions to 1972 Session Laws, Chapter 347; 1973 Session Laws, Chapter 87, 136, 137, 138, 139, and 143; Chapters 18 and 52, Idaho Code; and the accompanying Attorney General's opinion submitted August 15, 1973, by the Governor.

(11) A new section 4 of Regulation A (General Provisions) and revised Regulation T (Air Pollution Sources Permits) of the Rules and Regulations for the Control of Air Pollution in Idaho (Chapter VII of the plan), an addition to Chapter XI of the plan to include administrative procedures for indirect source review, and compliance schedules submitted on July 1, 1974, by the Governor.

(12) Air quality maintenance area designation submitted on June 11, 1974, by the Idaho Department of Environmental and Community Services.

(13) An amendment to Regulation C (Ambient Air Quality Standards) and Regulation S (Control of Sulfur Oxide

Emissions from Combined Lead/Zinc Smelters) of the Rules and Regulations for the Control of Air Pollution in Idaho and revisions to Chapter IV and Appendix F of the Implementation Plan submitted on January 10, 1975, by the Governor.

(14) Revised sections 2 and 6 of Regulation A (General Provisions) of the Rules and Regulations for the Control of Air Pollution in Idaho submitted on January 24, 1975, by the Governor.

(15) Consent Order for Beker Industries submitted on July 28, 1975 by the Governor.

(16) On January 15, 1980 the Governor submitted the transportation portion of the Boise-Ada County carbon monoxide plan.

(17) On July 1, 1980 the Governor submitted a SIP revision containing a variance from the indirect source regulation for an urban renewal project located in downtown Boise, as well as an adjustment to the TCP which had been submitted to EPA in January 1980.

(18) On February 14, 1980 the State of Idaho Department of Health and Welfare submitted a plan revision to meet the requirements of Air Quality Monitoring 40 CFR part 58, subpart C, § 58.20.

(19) Revisions to the ''Implementation Plan for the Control of Air Pollution in the State of Idaho'' submitted by the Governor of Idaho on January 15, 1980: Chapter I ''Introduction;'' Chapter II ''General Administration;'' Chapter III ''Emissions Inventory;'' Chapter IV ''Air Quality Monitoring;'' Chapter V ''Source Surveillance;'' Chapter VI ''Emergency Episode Plan;'' Chapter VII ''Approval Procedures for New and Modified Sources;'' Chapter VIII ''Non-Attainment Area Plans;'' Chapter VIII-a ''Silver Valley Non-Attainment Plan;'' Chapter VIII-e ''Soda Springs Non-Attainment Plan;'' Appendix A.2 Legal Authority (Section 39–100, *Idaho Code);* Appendix A.3, Title I, Chapter I, Rules and Regulations for the Control of Air Pollution in Idaho, except indirect source review provisions (1–1002.37, 1–1002.76 and 1–1004), variance provisions (1–1007 and 1–1904) and ''Sulfur Dioxide Emission Limitations for Combined Zinc and Lead Smelters'' (1–1851 through 1–1868); Appendix B ''Emission Inventory, Ada County Carbon Monoxide Non-Attainment Area;'' Appendix G ''Permits—Silver Valley'' (six permits); and Appendix K ''Permits—Soda Springs'' (four permits).

(20) Chapter VIII-b ''Lewiston Non-Attainment Plan'' submitted by the Governor of Idaho on January 15, 1980. On December 4, 1980, the Governor submitted revised pages 31–39, an operating permit for a kraft pulp and paper mill (Appendix H.1), operating permits for two grain loading terminals (Appendices H.3 and H.4), and an operating permit for an asphalt plant (Appendix H.5). On February 5, 1981 the Governor further revised the nonattainment area plan by submitting a permit for a wood products operation (Appendix H.2).

(21) Chapter VIII-d ''Pocatello TSP Non-Attainment Plan'' submitted by the Governor of Idaho on March 7, 1980. This submittal included operating permits for an elemental phosphorus plant (Appendix J.1), a phosphate fertilizer manufacturing plant (Appendix J.2), and a Portland cement plant (Appendix J.3). On February 5, 1981, the Governor submitted a revised Chapter VIII-d.

(22) On February 3, 1984 the State of Idaho Department of Health and Welfare submitted a revision to add a lead maintenance strategy to the Idaho Implementation Plan.

(23) On May 29, 1984, the State of Idaho Department of Health and Welfare submitted the Boise-Ada County carbon monoxide attainment plan as an official State Implementation Plan revision. The submittal was then supplemented on January 3, 1985.

(24) A revised Chapter VII *Approval Procedures for New and Modified Facilities;* revised sections 1–1002, 1–1012, 1–1013, 1–1014, and 1–1101 of Appendix A. 3 ''Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual;''* and the repeal of sections 1–1003, 1–1102 through 1–1112, and 1–1900 through 1–1906 of Appendix A. 3 ''Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual;''* of the Implementation Plan for the Control of Air Pollution in the State of Idaho, submitted by the Director of the State of Idaho Department of Health and Welfare on April 19, 1985. (Sections 1–1003, 1–1102 through 1–1112, and 1–1900 through 1–1906 of Appendix A. 3 ''Title 1, Chapter 1, *Rules*

and Regulations for the Control of Air Pollution in Idaho Manual'' were previously approved by EPA at 40 CFR 52.670(c)(19).) An April 3, 1986, commitment letter from the Director of the State of Idaho Department of Health and Welfare regarding stack height provisions.

(i) *Incorporation by reference.* (A) Revised sections 1–1002, 1–1012, 1–1013, 1–1014, and 1–1101 of Appendix A. 3, ''Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho Manual''* of the Implementation Plan for the Control of Air Pollution in the State of Idaho, as adopted by the Idaho Board of Health and Welfare on November 1, 1984. An April 3, 1986, commitment letter from the Director of the State of Idaho Department of Health and Welfare regarding stack height provisions.

(ii) *Other materials.* (A) Revised Chapter VII *Approval Procedures for New and Modified Facilities* of the Implementation Plan for the Control of Air Pollution in the State of Idaho, submitted by the Director of the Idaho Department of Health and Welfare on April 19, 1985. (This revised chapter replaces an earlier version which was approved by EPA and incorporated by reference at 40 CFR 52.670(c)(19).)

(B) Sections 1–1003, 1–1102 through 1–1112, and 1–1900 through 1–1906 of Appendix A. 3 ''Title 1, Chapter 1, *Rules and Regulations for the Control of Air Pollution in Idaho,''* of the Implementation Plan for the Control of Air Pollution in the State of Idaho, repealed by the Idaho Board of Health and Welfare on November 1, 1984. (These sections, noted as repealed, replace the earlier versions which were approved by EPA and incorporated by reference at 40 CFR 52.670(c)(19).)

(25) On March 27, 1987, the State of Idaho Department of Health and Welfare submitted revised rules regulating the use of stack heights and dispersion techniques (section 16.01.1002.94 and section 16.01.1014) as revisions to the Idaho state implementation plan. Additional revisions included clarifications to section 16.01.1009 (Total Compliance), and section 16.01.1201.03 (Visible Emissions-Exception).

(i) *Incorporation by reference.* (A) March 27, 1987 letter from the State of Idaho Department of Health and Welfare to EPA, Region 10.

(B) Section 16.01.1002.94 (Stack), section 16.01.1014 (Stack Heights and Dispersion Techniques), section 16.01.1009 (Total Compliance) and section 16.01.1201.03 (Visible Emissions-Exception) adopted by the State of Idaho Department of Health and Welfare on February 11, 1987.

(26) On June 15, 1990, the Administrator of the Idaho Department of Health and Welfare submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho Manual as revisions to the Idaho state implementation plan as follows: Idaho Administrative Procedures Act, Section 16.01.01002 Definitions, Section 16.01.01012 Procedures and Requirements for Permits to Construct and Operating Permits, and Section 16.01.01101 Air Quality Standards and Area Classification.

(27) On September 4, 1992, the Administrator of the Idaho Department of Health and Welfare submitted a revised and recodified Rules and Regulations for the Control of Air Pollution in Idaho Manual (Idaho Administrative Procedures Act Sections 16.01.01000 through 16.01.01999) as a revision to the Idaho state implementation plan.

(i) *Incorporation by reference.* (A) June 15, 1990, letter from the Administrator of the Idaho Department of Health and Welfare to EPA Region 10 submitting amendments to the Idaho state implementation plan.

(B) September 4, 1992, letter from the Administrator of the Idaho Department of Health and Welfare to EPA Region 10 submitting amendments to the Idaho state implementation plan.

(C) Idaho's Rules and Regulations for the Control of Air Pollution in Idaho Manual (except for sections IDAPA 16.01.01007 Variances, IDAPA 16.01.01853 through 16.01.01856 Combined Zinc and Lead Smelters, IDAPA 16.01.0951 through 16.01.01968 Regulation of Standards of Performance for New Stationary Sources, and IDAPA 16.01.01997 Confidentiality of Records) as adopted by the Board of the Idaho Department of Health and Welfare on July 30, 1992, and effective on August 21, 1992.

(28) On April 14, 1992, the State of Idaho submitted a revision to the SIP

for Pinehurst, ID, for the purpose of bringing about the attainment of the national ambient air quality standards for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers. This submittal includes an additional area in Shoshone County adjacent to the City of Pinehurst which EPA designated nonattainment and moderate for PM–10 on January 20, 1994.

(i) *Incorporation by reference.* (A) April 7, 1992 letter from Idaho Department of Health and Welfare to EPA Region 10 submitting the Pinehurst Particulate Air Quality Improvement Plan as a revision to the Implementation Plan for the Control of Air Pollution in the State of Idaho. The plan has been adopted in accordance with the authorities and requirements of the Federal Clean Air Act and the Idaho Environmental Protection and Health Act (Idaho Code section 39–10/*et seq*).

(B) SIP revision for Pinehurst Particulate Air Quality Improvement Plan, February 5, 1992 (adopted on April 7, 1992).

(29) On June 29, 1994, the Idaho Department of Health and Welfare submitted a CO State Implementation Plan for Northern Ada County, Idaho.

(i) *Incorporation by reference.* (A) June 29, 1994 letter from Idaho Department of Health and Welfare to EPA Region 10 submitting the CO SIP for Northern Ada County, Idaho.

(B) Minor Revision of the Northern Ada County, Idaho 1984 State Implementation Plan for CO, June 1994 (including Ada County Ordinance 228, City of Boise Ordinance 5273, City of Meridian Ordinance 547, City of Garden City Ordinance 558, and City of Eagle Ordinance 177), as adopted by the Idaho Department of Health and Welfare on June 28, 1994.

(30) On January 7, 1994, the Administrator for the Idaho Department of Health and Welfare, Division of Environmental Quality, submitted the State PROGRAM as a revision to the Idaho SIP.

(i) *Incorporation by reference.* (A) The January 3, 1994 letter from the Administrator of the Idaho Department of Health and Welfare, Division of Environmental Quality, submitting the PROGRAM to EPA.

(B) The State Implementation Plan Revision to Establish a State Small Business Stationary Source Technical and Environmental Compliance Assistance Program (which includes the text of Idaho Code 39–118E, Small Business Assistance, signed into law Senate bill 1236 by Idaho Governor, Cecil D. Andrus, on March 29, 1993), dated December 29, 1993, and adopted on January 3, 1994.

(31) On November 14, 1991, and on December 30, 1994, the Idaho Department of Health and Welfare (IDHW) submitted revisions to the Idaho State Implementation Plan (SIP) for the Northern Ada County/Boise Particulate (PM_{10}) Air Quality Improvement Plan.

(i) *Incorporation by reference.* (A) November 14, 1991, letter from the IDHW Administrator to the EPA Region 10 Regional Administrator submitting a revision to the Idaho SIP for the Northern Ada County/Boise Particulate Air Quality Improvement Plan; The Northern Ada County Boise Particulate (PM_{10}) Air Quality Improvement Plan adopted on November 14, 1991.

(B) December 30, 1994, letter from the IDHW Administrator to the EPA Region 10 Regional Administrator including a revision to the Idaho SIP for the Northern Ada County/Boise PM_{10} Air Quality Improvement Plan; Appendix C–1, Supplemental Control Strategy Documentation, Northern Ada County/Boise PM_{10} Air Quality Improvement Plan, adopted December 30, 1994, with the following attachments: Garden City Ordinances #514 (May 14, 1987), #533 (January 10, 1989) and #624 (September 13, 1994); Meridian Ordinance #667 (August 16, 1994); Eagle Ordinance #245 (April 26, 1994); Ada County Ordinance #254 (November 3, 1992); and Table Ordinance-1 (December 30, 1994).

(32) On December 6, 2000, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows: sections 58.01.01.563 through 58.01.01.574.

(i) *Incorporation by reference.* (A) Section 58.01.01.563 Transportation Conformity, Section 58.01.01.564 Incorporation by Reference, Section 58.01.01.565

Abbreviations, Section 58.01.01.566 Definitions for the Purpose of Sections 563 Through 574 and 582, Section 58.01.01.567 Agencies Affected by Consultation, Section 58.01.01.568 ICC Member Roles in Consultation, Section 58.01.01.569 ICC Member Responsibilities in Consultation, Section 58.01.01.570 General Consultation Process, Section 58.01.01.571 Consultation Procedures, Section 58.01.01.572 Final Conformity Determinations by USDOT, Section 58.01.01.573 Resolving Conflicts, Section 58.01.01.574 Public Consultation Procedures.

(33) On February 9, 2001, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows:

Section 58.01.01.582

(i) *Incorporation by reference.* (A) Section 58.01.01.582 Interim Conformity Provisions for Northern Ada County Former Nonattainment Area for PM–10.

(34) On February 9, 2001, the Idaho Department of Environmental Quality submitted amendments to State of Idaho's Rules and Regulations for the Control of Air Pollution in Idaho as revisions to the Idaho state implementation plan as follows: Section 58.01.01.204.

(i) *Incorporation by reference.* (A) IDAPA 58.01.01.204 Permit Requirements for New Major Facilities or Major Modifications in Nonattainment Areas and in the Former PM–10 Northern Ada County Nonattainment Area (as Defined in Section 582), state adopted January 26, 2001.

(35) On August 16, 1996, the State of Idaho adopted and submitted a revision to the SIP for Sandpoint, Idaho, for the purpose of bringing about the attainment of the national ambient air quality standards for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers.

(i) *Incorporation by reference.* (A) Ordinance No. 939, Material Specifications for Street Sanding Material, as adopted by the City of Sandpoint on February 22, 1994.

(B) Ordinance No. 965, Solid Fuel Heating Appliance Ordinance, as adopted by the City of Sandpoint on February 21, 1995.

(C) The following terms and conditions limiting particulate matter emissions in the following permits:

(*1*) State of Idaho Air Pollution Operating Permit for Lake Pre-Mix concrete, Permit No. 777–00182, issued May 17, 1996, the following conditions for the cement silo vent: 1.1, 2.1.1, 2.1.2, 3.1.1, and 3.1.2.

(*2*) State of Idaho Air Pollution Operating Permit for Interstate Concrete & Asphalt, Permit No. 017–00048, issued August 2, 1999, the following conditions: for the asphalt plant, 2.2, 3.1.1, 4.1, 4.1.1, 4.1.2, 4.2.1 (as it applies to the hourly PM_{10} emission limit in Appendix A), 4.2.2, 4.2.2.1, 4.2.2.2, and 4.2.2.3; for the concrete batch plant, 2.1, 3.1.1, 4.1, 4.1.1, and 4.1.2; Appendix A (as it applies to PM_{10} emission rates after 7/1/96) and Appendix B (as it applies after 7/1/96).

(*3*) State of Idaho Department of Environmental Quality Air Quality Tier II Operating Permit for Louisiana-Pacific Corporation, Permit No. 017–00003, issued October 31, 2001, the following conditions: for the Kipper and Sons Hog Fuel Boiler, 2.3 (as it applies to PM_{10}), 2.5, 2.7, 2.13, 2.14, 2.17, 2.19; Cleaver-Brooks Natural Gas-Fired Boilers, 3.2 (as it applies to PM_{10}); Pneumatic Conveyance System, 4.2, 4.4, 4.7; Drying Kilns, 5.2, 5.4, 5.5; Fugitive Emission Sources, 6.5, 6.7, 6.13; and the Appendix (as it applies to PM_{10}).

(ii) *Additional materials.* (A) Sandpoint PM_{10} Air Quality Improvement Plan, adopted August 16, 1996.

(36) [Reserved]

(37) On May 17, 1994, May 11, 1995, November 21, 1996, February 28, 1997, December 18, 1997, April 9, 1998, May 5, 1999, December 5, 2000, and May 30, 2002, the Idaho Department of Environmental Quality submitted amendments to State of Idaho Rules for Control of Air Pollution in Idaho (IDAPA 58.01.01) as revisions to the Idaho State implementation plan.

(i) *Incorporation by reference.* (A) IDAPA 58.01.01 as in effect on March 30, 2001 except for the following provisions:

section 000; section 002; section 003; section 008; section 009; section 010; subsections 107.03; section 128; sections 140 through 149; section 161; subsection 203.03; section 209; section 210; section 214; subsection 222.03; section 223; sections 300 through 387; subsection 401.01.a. and 401.04; sections 440 and 441; sections 525 through 538; sections 552, 553, 556, 558, and 561; subsection 577.06; sections 585, 586, 587, 590 and 591; section 700; section 710; sections 750 and 751; sections 775 and 776; section 818; section 819; section 820; subsection 824.01; sections 835 through 839; and sections 855 through 862.

(B) IDAPA 58.01.01 sections 209 and 700 as in effect on April 5, 2000.

(C) IDAPA 58.01.01 sections 552, 553, 556, 558, and 561 as in effect on March 15, 2002.

(38) The Idaho Department of Environmental Quality (Idaho DEQ, the State, or Idaho) submitted a PM_{10} maintenance plan and redesignation request for the Ada County/Boise, Idaho area on September 27, 2002, and provided supplemental information on July 10, 2003 and July 21, 2003.

(i) *Incorporation by reference.* (A) The following terms and conditions limiting particulate matter emissions in the following permits:

(*1*) State of Idaho Air Pollution Operating Permit for LP Wood Polymers, Inc. Permit No. 001–00115, issued July 12, 2002, the following conditions: 1.1, 1.3, 3.1, and the Appendix.

(*2*) State of Idaho Air Pollution Operating Permit for Consolidated Concrete Company, Permit No. 001–00046, issued December 03, 2001, the following conditions: 1.1, 1.3, 2.3, 3.1, 3.2, and the Appendix.

(*3*) State of Idaho Air Pollution Operating Permit for Crookham Company, Permit No. 027–00020, issued January 18, 2002, the following conditions: 1.1, 1.3, 2.1, 2.3, 3.1, 3.1.1, 3.1.2, 3.2, and the Appendix.

(*4*) State of Idaho Air Pollution Operating Permit for Double D Service Center, Permit No. 001–00168, issued February 4, 2002, the following conditions: 1.1, 1.3, 3.1, 3.2.1, 3.2.2, 3.2.3, and the Appendix.

(*5*) State of Idaho Air Pollution Operating Permit for Plum Creek Northwest Lumber, Inc., Permit No. 001–00091, issued July 12, 2002, the following conditions: 1.1, 1.3, 2.1.2, 3.1, and the Appendix.

(*6*) State of Idaho Air Pollution Operating Permit for C. Wright Construction, Inc., Permit No. T2–000033, issued July 08, 2003, the following conditions: 2 (heading only), 2.5, (2.12, Table 2.2 as it applies to PM_{10}), 2.14, 3 (heading only), 3.3, Table 3.2, 3.4, 3.5, 3.6, 3.7, 3.8, 3.10, 4 (heading only), 4.2, 4.3, 4.4, 4.7, 5, and Table 5.1.

(*7*) State of Idaho Air Pollution Operating Permit for Nelson Construction Co., Permit No. T2–020029, issued July 21, 2003, the following conditions: 2 (heading only), 2.12, 2.14, 3 (heading only, 3.3, 3.4, 3.6, 3.7, 3.9, 3.10, 3.11, 3.12, 4 (heading only), 4.3, 4.4, 4.5, 4.6, 5, and Table 5.1.

(*8*) State of Idaho Air Pollution Operating Permit for Mike's Sand and Gravel, Permit No. 001–00184, issued July 12, 2002, the following conditions: 1.1, 1.3, 2.2.1, 3.1, and the Appendix.

(*9*) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No. T2–020031, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(*10*) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No T2–020032, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(*11*) State of Idaho Air Pollution Operating Permit for Idaho Concrete Co., Permit No. T2–020033, issued July 8, 2003, the following conditions: 2 (heading only), 2.5, 2.13, 3 (heading only), 3.3, 3.4, 3.6, 3.7, 3.8, 4 (heading only), and Table 4.1.

(*12*) State of Idaho Air Pollution Operating Permit for The Amalgamated Sugar Company LLC, Permit No. 027–00010, issued September 30, 2002, the following conditions: 2 (heading only), (2.7, Table 2.2 as it applies to PM_{10}), 2.10, 2.10.1, 2.10.2, 2.11, 2.11.1, 2.11.2, 2.11.3, 2.11.4, 2.11.5, 2.12, 2.12.1, 2.12.2, 2.12.3, 2.13, 2.13.1, 2.13.2, 2.13.3, 2.14, 2.14.1, 2.14.2, 2.16, 3 (heading only), (3.3, Table 3.2 as it applies to PM_{10}), 3.5, 3.7, 3.8, 3.8.1, 3.8.2, 3.8.3, 3.8.4, 3.8.5, 3.8.6, 3.8.7, 3.8.8, 3.9, 4 (heading only), (4.3,

Table 4.1 as it applies to PM_{10}), 4.5, 4.6, 4.7, 5 (heading only), (5.3, Table 5.3 as it applies to PM_{10}), 5.5, 5.9, 5.9.1, 5.9.2, 5.9.3, 5.9.4, 5.9.5, 5.9.6, 5.9.7, 5.9.8, 5.9.9, 5.10, 5.11, 6 (heading only), 6.3, Table 6.1, 6.5, 6.6, 6.7, 6.7.1, 6.7.2, 6.8, 7 (heading only), (7.3, Table 7.1 as it applies to PM_{10}), 7.5, 7.7, 7.7.1, 7.7.2, 7.8, 8 (heading only), 8.3, Table 8.1, 8.5, 8.7, 8.7.1, 8.7.2, 8.8, 9 (heading only), 9.3, Table 9.1, 9.5, 9.7, 9.7.1, 9.7.2, 9.8, 10 (heading only), 10.3, Table 10.1, 10.6, 10.8, 10.8.1, 10.8.2, 10.9, 11 (heading only), 11.3, Table 11.2, 11.6, 11.8, 11.8.1, 11.8.2, 11.9, 12 (heading only), 12.3, Table 12.1, 12.5, 12.7, 12.7.1, 12.7.2, 12.8, 13 (heading only), 13.1 (except as it applies to conditions 13.3, 13.3.1, 13.3.2, 13.5, 13.5.1, 13.5.2, 13.5.3, 13.6, 13.6.1, 13.6.2 and 13.9), Table 13.1 (except conditions 13.3, 13.5 and 13.6), (13.2, Table 13.2 as it applies to PM_{10}), 13.2.1, 13.4, 13.4.1, 13.4.2, 13.4.3, 13.7, 13.7.1, 13.7.2, 13.8, 13.8.1, 13.8.2, 13.8.3, 13.10, and 13.11.

[37 FR 10861, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.677, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§§ 52.678–52.680 [Reserved]

§ 52.681 Permits to construct and tier II operating permits.

(a) Except as otherwise provided in paragraph (b) of this section, emission limitations and other provisions contained in Permits to Construct and Tier II Operating Permits issued by the Idaho Department of Environmental Quality in accordance with the Federally-approved State of Idaho Rules for Control of Air Pollution in Idaho, incorporated by reference in section 52.670 (IDAPA 58.01.01.200 through 222, IDAPA 58.01.01.400 through 406), shall be applicable requirements of the Federally-approved Idaho SIP (in addition to any other provisions) for the purposes of section 113 of the Clean Air Act and shall be enforceable by EPA and by any person in the same manner as other requirements of the SIP.

(b) Operating Permits authorizing the use of alternative emission limits (bubbles) under IDAPA 58.01.01.401.01.a, 58.01.01.440, and 58.01.01.441 (including the use of banked emission reduction credits in a bubble pursuant to IDAPA 58.01.01.461), and Tier II Operating Permits authorizing compliance schedule extensions under IDAPA 58.01.01.401.04 must be submitted to EPA for approval as revisions to the Idaho SIP before they become applicable requirements of the Idaho SIP.

[68 FR 2225, Jan. 16, 2003]

§ 52.682 [Reserved]

§ 52.683 Significant deterioration of air quality.

(a) The State of Idaho Rules for Control of Air Pollution in Idaho, specifically, IDAPA 58.01.01.005 through 007 (definitions), IDAPA 58.01.01.107.03.a, .b, .c (incorporations by reference), IDAPA 58.01.01.200 through 222 (permit to construct rules); IDAPA 58.01.01.510 through 516 (stack height rules); and IDAPA 58.01.01.575 through 581 (standards, increments and area designations) (except IDAPA 58.01.01.577), are approved as meeting the requirements of title I, part C, subpart 1 of the Clean Air Act for preventing significant deterioration of air quality.

(b) The requirements of sections 160 through 165 of the Clean Air Act are not met for Indian reservations since the plan does not include approvable procedures for preventing significant deterioration of air quality on Indian reservations. Therefore, the provisions of §52.21 except paragraph (a)(1) are hereby incorporated and made part of the applicable plan for Indian reservations in the State of Idaho.

(c) The requirements of section 165 of the Clean Air Act are not met for sources subject to prevention of significant deterioration requirements prior to August 22, 1986, the effective date of EPA's approval of the rules cited in paragraph (a) of this section. Therefore, the provisions of §52.21 except paragraph (a)(1) are hereby incorporated and made part of the applicable plan for sources subject to §52.21 prior to August 22, 1986.

[68 FR 2226, Jan. 16, 2003, as amended at 68 FR 20072, Apr. 24, 2003; 68 FR 74489, Dec. 24, 2003; 77 FR 76419, Dec. 28, 2012; 79 FR 11713, Mar. 3, 2014; 80 FR 18528, Apr. 7, 2015; 81 FR 53294, Aug. 12, 2016]

§§ 52.684–52.689 [Reserved]

§ 52.690 Visibility protection.

(a) The requirements of section 169A of the Clean Air Act are not met, because the plan does not include approvable procedures for protection of visibility in mandatory Class I Federal areas.

(b)–(c) [Reserved]

[50 FR 28553, July 12, 1985; 51 FR 23759, July 1, 1986, as amended at 52 FR 45137, Nov. 24, 1987; 82 FR 3129, Jan. 10, 2017]

§ 52.691 Extensions.

(a) The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, hereby extends for one year (until December 31, 1995) the attainment date for the Power-Bannock Counties PM–10 nonattainment area and the Sandpoint PM–10 nonattainment area.

(b) The Administrator, by authority delegated under section 188(d) of the Clean Air Act, as amended in 1990, hereby grants a second one-year extension (until December 31, 1996) to the attainment date for the Power-Bannock Counties PM–10 nonattainment area.

[61 FR 20732, May 8, 1996, as amended at 61 FR 66606, Dec. 18, 1996]

Subpart O—Illinois

§ 52.719 [Reserved]

§ 52.720 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State implementation plan for the State of Illinois under section 110 of the Clean Air Act, 42 U.S.C. 7401–7671q and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2016, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Entries in paragraphs (c) and (d) of this section with the EPA approval dates after December 31, 2016, have been approved by EPA for inclusion in the State implementation plan and for incorporation by reference into the plan as it is contained in this section, and will be considered by the Director of the Federal Register for approval in the next update to the SIP compilation.

(2) EPA Region 5 certifies that the materials provided by EPA at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the state implementation plan as of the dates referenced in paragraph (b)(1).

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 5, Air Programs Branch, 77 West Jackson Boulevard, Chicago, IL 60604, or the National Archives and Records Administration. For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

(c) *EPA approved regulations.*

201.158	Incomplete Applications	6/23/1998	1/3/2000, 65 FR 14.	
201.159	Signatures	6/23/1998	1/3/2000, 65 FR 14.	
201.160	Standards for Issuance	6/23/1998	1/3/2000, 65 FR 14.	
201.161	Conditions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(b)(7).
201.162	Duration	12/1/2010	4/7/2014, 79 FR 18997.	
201.163	Joint Construction and Operating Permits.	6/23/1998	1/3/2000, 65 FR 14.	
201.164	Design Criteria	6/23/1998	1/3/2000, 65 FR 14.	
201.165	Hearings	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(e).
201.166	Revocation	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(f).
201.167	Revisions to Permits	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(g).
201.168	Appeals From Conditions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 103(k).
Subpart F: CAAPP Permits				
201.207	Applicability	6/23/1998	1/3/2000, 65 FR 14.	
Subpart H: Compliance Programs and Project Completion Schedules				
201.241	Contents of Compliance Program	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(b)(1).
201.242	Contents of Project Completion Schedule.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(b)(2, 3).
201.243	Standards for Approval	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(c).
201.244	Revisions	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(d).
201.245	Effects of Approval	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(e).
201.246	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 104(f).
Subpart I: Malfunctions, Breakdowns or Startups				
201.261	Contents of Request for Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(b).
201.262	Standards for Granting Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(c).
201.263	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(d).
201.264	Continued Operation or Startup Prior to Granting of Operating Permit.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(e).
201.265	Effect of Granting of Permission To Operate During a Malfunction, Breakdown or Startup.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 105(f).
Subpart J: Monitoring and Testing				
201.281	Permit Monitoring Equipment Requirements.	2/3/1989	4/6/1993, 58 FR 17780.	
201.282	Testing	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 106(b).
201.283	Records and Reports	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 106(c).
Subpart K: Records and Reports				
201.301	Records	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 107(a).
201.302	Reports	12/23/2013	3/13/2015, 80 FR 13248.	
Subpart L: Continuous Monitoring				
201.401	Continuous Monitoring Requirements	2/3/1989	4/6/1993, 58 FR 17780.	
201.402	Alternative Monitoring	2/3/1989	4/6/1993, 58 FR 17780.	
201.403	Exempt Sources	2/3/1989	4/6/1993, 58 FR 17780.	
201.404	Monitoring System Malfunction	2/3/1989	4/6/1993, 58 FR 17780.	
201.405	Excess Emission Reporting	2/3/1989	4/6/1993, 58 FR 17780.	
201.406	Data Reduction	2/3/1989	4/6/1993, 58 FR 17780.	
201.407	Retention of Information	2/3/1989	4/6/1993, 58 FR 17780.	
201.408	Compliance Schedules	2/3/1989	4/6/1993, 58 FR 17780.	
Subpart M: Permit By Rule (PBR)—General Provisions				
201.500	Purpose	3/24/2017	10/10/2018, 83 FR 50854.	
201.505	Applicability	3/24/2017	10/10/2018, 83 FR 50854.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
201.510	Notice of Intent to Be Covered By a PBR (Notification).	3/24/2017	10/10/2018, 83 FR 50854.	
201.515	Commencing Construction or Modification.	3/24/2017	10/10/2018, 83 FR 50854.	
201.520	Modification or Change in Status of an Emission Unit Covered by a PBR.	3/24/2017	10/10/2018, 83 FR 50854.	
201.525	Standard Conditions for PBR	3/24/2017	10/10/2018, 83 FR 50854.	
201.530	Recordkeeping and Reporting	3/24/2017	10/10/2018, 83 FR 50854.	
201.535	Authority to Operate	3/24/2017	10/10/2018, 83 FR 50854.	
201.540	Enforcement Authority	3/24/2017	10/10/2018, 83 FR 50854.	
Subpart N: Permit By Rule (PBR)—Boilers Less Than Or Equal To 100 MMBtu/hr				
201.600	Applicability	3/24/2017	10/10/2018, 83 FR 50854.	
201.605	Boiler Notice of Intent to Be Covered by a PBR (Notification) 201.610.	3/24/2017	10/10/2018, 83 FR 50854.	
201.615	Opacity Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
201.620	Requirements for Use of Diesel Fuel and Refinery Fuel Gas 201.625.	3/24/2017	10/10/2018, 83 FR 50854.	
201.625	Carbon Monoxide (CO) Requirements.	3/24/2017	10/10/2018, 83 FR 50854.	
201.630	Nitrogen Oxide (NO_X) Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
201.635	PBR Boiler Reporting Requirements	3/24/2017	10/10/2018, 83 FR 50854.	
Part 203: Major Stationary Sources Construction and Modification				
Subpart A: General Provisions				
203.101	Definitions	4/30/1993	9/27/1995, 60 FR 49778.	
203.103	Actual Construction	3/22/1988	12/17/1992, 57 FR 59928.	
203.104	Actual Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.107	Allowable Emissions	4/30/1993	9/27/1995, 60 FR 49778.	
203.110	Available Growth Margin	4/30/1993	9/27/1995, 60 FR 49778.	
203.112	Building, Structure and Facility	4/30/1993	9/27/1995, 60 FR 49778.	
203.113	Commence	3/22/1988	12/17/1992, 57 FR 59928.	
203.116	Construction	3/22/1988	12/17/1992, 57 FR 59928.	
203.117	Dispersion Enhancement Techniques	3/22/1988	12/17/1992, 57 FR 59928.	
203.119	Emission Baseline	7/22/1983	12/17/1992, 57 FR 59928.	
203.121	Emission Offset	4/30/1993	9/27/1995, 60 FR 49778.	
203.122	Emissions Unit	4/30/1993	9/27/1995, 60 FR 49778.	
203.123	Federally Enforceable	4/30/1993	9/27/1995, 60 FR 49778.	
203.124	Fugitive Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.125	Installation	3/22/1988	12/17/1992, 57 FR 59928.	
203.126	Lowest Achievable Emission Rate	4/30/1993	9/27/1995, 60 FR 49778.	
203.127	Nonattainment Area	3/22/1988	12/17/1992, 57 FR 59928.	
203.128	Potential To Emit	4/30/1993	9/27/1995, 60 FR 49778.	
203.131	Reasonable Further Progress	3/22/1988	12/17/1992, 57 FR 59928.	
203.134	Secondary Emissions	3/22/1988	12/17/1992, 57 FR 59928.	
203.136	Stationary Source	3/22/1988	12/17/1992, 57 FR 59928.	
203.150	Public Participation	4/30/1993	9/27/1995, 60 FR 49778.	
Subpart B: Major Stationary Sources in Nonattainment Areas				
203.201	Prohibition	4/30/1993	9/27/1995, 60 FR 49778.	
203.202	Coordination With Permit Requirement and Application Pursuant to 35 Ill. Adm. Code 201.	3/22/1988	12/17/1992, 57 FR 59928.	
203.203	Construction Permit Requirement and Application.	4/30/1993	9/27/1995, 60 FR 49778.	
203.205	Effect of Permits	3/22/1988	12/17/1992, 57 FR 59928.	
203.206	Major Stationary Source	3/10/1998	5/13/2003, 68 FR 25504.	
203.207	Major Modification of a Source	3/10/1998	5/13/2003, 68 FR 25504.	
203.208	Net Emission Determination	4/30/1993	9/27/1995, 60 FR 49778.	
203.209	Significant Emissions Determination	4/30/1993	9/27/1995, 60 FR 49778.	
203.210	Relaxation of a Source-Specific Limitation.	3/22/1988	12/17/1992, 57 FR 59928.	
203.211	Permit Exemption Based on Fugitive Emissions.	3/22/1988	12/17/1992, 57 FR 59928.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas				
203.301	Lowest Achievable Emission Rate	3/10/1998	5/13/2003, 68 FR 25504.	
203.302	Maintenance of Reasonable Further Progress and Emission Offsets.	4/30/1993	9/27/1995, 60 FR 49778.	
203.303	Baseline and Emission Offsets Determination.	4/30/1993	9/27/1995, 60 FR 49778.	
203.305	Compliance by Existing Sources	3/22/1988	12/17/1992, 57 FR 59928.	
203.306	Analysis of Alternatives	4/30/1993	9/27/1995, 60 FR 49778.	
Subpart F: Operation of a Major Stationary Source or Major Modification				
203.601	Lowest Achievable Emission Rate Compliance Requirement.	3/22/1988	12/17/1992, 57 FR 59928.	
203.602	Emission Offset Maintenance Requirement.	3/22/1988	12/17/1992, 57 FR 59928.	
Subpart G: General Maintenance of Emission Offsets				
203.701	General Maintenance of Emission Offsets.	3/22/1988	12/17/1992, 57 FR 59928.	
Subpart H: Offsets for Emission Increases From Rocket Engines and Motor Firing				
203.801	Offsetting by Alternative or Innovative Means.	5/14/1993	9/27/1995, 60 FR 49778.	
Subchapter c: Emission Standards and Limitations for Stationary Sources				
Part 211: Definitions and General Provisions				
Subpart A: General Provisions				
211.101	Incorporations by Reference	1/28/2013	10/6/2014, 79 FR 60070.	
211.102	Abbreviations and Conversion Factors.	9/14/2010	3/23/2012, 77 FR 16940.	
Subpart B: Definitions				
211.121	Other Definitions	9/27/1993	9/9/1994, 59 FR 46562.	
211.130	Accelacota	9/27/1993	9/9/1994, 59 FR 46562.	
211.150	Accumulator	9/27/1993	9/9/1994, 59 FR 46562.	
211.170	Acid Gases	9/27/1993	9/9/1994, 59 FR 46562.	
211.200	Acrylonitrile Butadiene Styrene (ABS) Welding.	9/14/2010	3/23/2012, 77 FR 16940.	
211.210	Actual Heat Input	9/27/1993	9/9/1994, 59 FR 46562.	
211.230	Adhesive	9/27/1993	9/9/1994, 59 FR 46562.	
211.233	Adhesion Primer	9/14/2010	3/23/2012, 77 FR 16940.	
211.235	Adhesive Primer	9/14/2010	3/23/2012, 77 FR 16940.	
211.240	Adhesion Promoter	5/9/1995	7/25/1996, 61 FR 38577.	
211.250	Aeration	9/27/1993	9/9/1994, 59 FR 46562.	
211.260	Aerosol Adhesive and Adhesive Primer.	9/14/2010	3/23/2012, 77 FR 16940.	
211.270	Aerosol Can Filling Line	1/18/1994	10/21/1996, 61 FR 54556.	
211.290	Afterburner	9/27/1993	9/9/1994, 59 FR 46562.	
211.310	Air Contaminant	9/27/1993	9/9/1994, 59 FR 46562.	
211.330	Air Dried Coatings	9/27/1993	9/9/1994, 59 FR 46562.	
211.350	Air Oxidation Process	9/27/1993	9/9/1994, 59 FR 46562.	
211.370	Air Pollutant	9/27/1993	9/9/1994, 59 FR 46562.	
211.390	Air Pollution	9/27/1993	9/9/1994, 59 FR 46562.	
211.410	Air Pollution Control Equipment	9/27/1993	9/9/1994, 59 FR 46562.	
211.430	Air Suspension Coater/Dryer	9/27/1993	9/9/1994, 59 FR 46562.	
211.450	Airless Spray	9/27/1993	9/9/1994, 59 FR 46562.	
211.470	Air Assisted Airless Spray	9/27/1993	9/9/1994, 59 FR 46562.	
211.474	Alcohol	5/9/1995	11/8/1995, 60 FR 56238.	
211.481	Ammunition Sealant	9/14/2010	3/23/2012, 77 FR 16940.	
211.490	Annual Grain Through Put	9/27/1993	9/9/1994, 59 FR 46562.	
211.492	Antifoulant Coating	9/14/2010	3/23/2012, 77 FR 16940.	
211.493	Antifouling Sealer/Tie Coat	7/27/2011	3/23/2012, 77 FR 16940.	
211.495	Anti-Glare/Safety Coating	5/9/1995	7/25/1996, 61 FR 38577.	
211.510	Application Area	9/27/1993	9/9/1994, 59 FR 46562.

212.126	Adjusted Opacity Standards Procedures.	7/13/1988	12/29/1992, 57 FR 61834.	
Subpart D: Particulate Matter Emissions From Incinerators				
212.181	Limitations for Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.182	Aqueous Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.183	Certain Wood Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.184	Explosive Waste Incinerators	6/4/1980	11/27/1981, 46 FR 57893.	
212.185	Continuous Automatic Stoking Animal Pathological Waste Incinerators.	12/30/1986	9/15/1993, 58 FR 48312.	
Subpart E: Particulate Matter Emissions From Fuel Combustion Emission Units				
212.201	Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located in the Chicago Area.	7/9/1986	12/29/1992, 57 FR 61834.	
212.202	Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located Outside the Chicago Area.	7/9/1986	12/29/1992, 57 FR 61834.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
212.203	Controlled Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively.	7/9/1986	12/29/1992, 57 FR 61834.	
212.204	Emission Units for Which Construction or Modification Commenced on or After April 14, 1972, Using Solid Fuel Exclusively.	7/9/1986	12/29/1992, 57 FR 61834.	
212.205	Coal-Fired Industrial Boilers for Which Construction or Modification Commenced Prior to April 14, 1972, Equipped With Flue Gas Desulfurization Systems.	10/19/1981	2/22/1984, 49 FR 6490.	
212.206	Emission Units Using Liquid Fuel Exclusively.	4/14/1972	5/31/1972, 37 FR 10842.	
212.207	Emission Units Using More Than One Type of Fuel.	4/14/1972	5/31/1972, 37 FR 10842.	
212.208	Aggregation of Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972.	4/14/1972	5/31/1972, 37 FR 10842.	
212.210	Emissions Limitations for Certain Fuel Combustion Emission Units Located in the Vicinity of Granite City.	5/22/1996	7/14/1999, 64 FR 37847.	
Subpart K: Fugitive Particulate Matter				
212.301	Fugitive Particulate Matter	10/26/1979	2/21/1980, 45 FR 11472.	
212.302	Geographical Areas of Application	5/22/1996	7/14/1999, 64 FR 37847.	
212.304	Storage Piles	10/26/1979	4/26/1982, 47 FR 17814.	
212.305	Conveyor Loading Operations	10/26/1979	4/26/1982, 47 FR 17814.	
212.306	Traffic Areas	10/26/1979	2/21/1980, 45 FR 11472.	
212.307	Materials Collected by Pollution Control Equipment.	10/26/1979	2/21/1980, 45 FR 11472.	
212.308	Spraying or Choke-Feeding Required	10/26/1979	2/21/1980, 45 FR 11472.	
212.309	Operating Program	5/22/1996	7/14/1999, 64 FR 37847.	
212.310	Minimum Operating Program	10/26/1979	2/21/1980, 45 FR 11472.	
212.312	Amendment to Operating Program	10/26/1979	2/21/1980, 45 FR 11472.	
212.313	Emission Standard for Particulate Collection Equipment.	10/26/1979	2/21/1980, 45 FR 11472.	
212.314	Exception for Excess Wind Speed	10/26/1979	2/21/1980, 45 FR 11472.	
212.315	Covering for Vehicles	10/26/1979	2/21/1980, 45 FR 11472.	
212.316	Emissions Limitations for Emission Units in Certain Areas.	5/22/1996	7/14/1999, 64 FR 37847.	
Subpart L: Particulate Matter Emissions From Process Emission Units				
212.321	Process Emission Units for Which Construction or Modification Commenced on or After April 14, 1972.	9/28/1979	2/21/1980, 45 FR 11472.	
212.322	Process Emission Units for Which Construction or Modification Commenced Prior to April 14, 1972.	9/28/1979	2/21/1980, 45 FR 11472.	
212.323	Stock Piles	9/28/1979	2/21/1980, 45 FR 11472.	
212.324	Process Emission Units in Certain Areas.	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart N: Food Manufacturing				
212.361	Corn Wet Milling Processes	9/28/1979	2/21/1980, 45 FR 11472.	
212.362	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart O: Petroleum Refining, Petrochemical and Chemical Manufacturing				
212.381	Catalyst Regenerators of Fluidized Catalytic Converters.	9/28/1979	2/21/1980, 45 FR 11472.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Subpart Q: Stone, Clay, Glass and Concrete Manufacturing				
212.421	Portland Cement Processes for Which Construction or Modification Commenced on or After April 14, 1972.	4/14/1972	5/31/1972, 37 FR 10842.	
212.422	Portland Cement Manufacturing Processes.	9/28/1979	2/21/1980, 45 FR 11472.	
212.423	Emission Limits for the Portland Cement Manufacturing Plant Located in LaSalle County, South of the Illinois River.	10/4/1991	10/21/1993, 58 FR 54291.	
212.424	Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located in LaSalle County, South of the Illinois River.	5/15/1992	1/12/1993, 58 FR 3844.	
212.425	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart R: Primary and Fabricated Metal Products and Machinery Manufacture				
212.441	Steel Manufacturing Processes	9/28/1979	2/21/1980, 45 FR 11472.	
212.442	Beehive Coke Ovens	9/28/1979	2/21/1980, 45 FR 11472.	
212.443	Coke Plants	5/15/1992	1/12/1993, 58 FR 3844.	
212.444	Sinter Processes	9/28/1979	9/3/1981, 46 FR 44172.	
212.445	Blast Furnace Cast Houses	5/15/1992	1/12/1993, 58 FR 3844.	
212.446	Basic Oxygen Furnaces	5/22/1996	3/11/1998, 63 FR 11842.	
212.447	Hot Metal Desulfurization Not Located in the BOF.	9/28/1979	9/3/1981, 46 FR 44172.	
212.448	Electric Arc Furnaces	9/28/1979	9/3/1981, 46 FR 44172.	
212.449	Argon-Oxygen Decarburization Vessels.	9/28/1979	9/3/1981, 46 FR 44172.	
212.450	Liquid Steel Charging	9/28/1979	9/3/1981, 46 FR 44172.	
212.451	Hot Scarfing Machines	9/28/1979	9/3/1981, 46 FR 44172.	
212.455	Highlines on Steel Mills	10/26/1979	2/21/1980, 45 FR 11472.	
212.456	Certain Small Foundries	9/28/1979	2/21/1980, 45 FR 11472.	
212.457	Certain Small Iron-Melting Air Furnaces.	9/28/1979	7/12/1982, 47 FR 30057.	
212.458	Emission Units in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart S: Agriculture				
212.461	Grain-Handling and Drying in General.	9/28/1979	2/21/1980, 45 FR 11472.	
212.462	Grain-Handling Operations	9/28/1979	2/21/1980, 45 FR 11472.	
212.463	Grain Drying Operations	9/28/1979	2/21/1980, 45 FR 11472.	
212.464	Sources in Certain Areas	5/22/1996	3/11/1998, 63 FR 11842.	
Subpart T: Construction and Wood Products				
212.681	Grinding, Woodworking, Sandblasting and Shotblasting.	4/14/1972	5/31/1972, 37 FR 10842.	
Subpart U: Additional Control Measures				
212.700	Applicability	7/11/1994	7/13/1995, 60 FR 36060.	
212.701	Contingency Measure Plans, Submittal and Compliance Date.	7/11/1994	7/13/1995, 60 FR 36060.	
212.702	Determination of Contributing Sources.	7/11/1994	7/13/1995, 60 FR 36060.	
212.703	Contingency Measure Plan Elements	7/11/1994	7/13/1995, 60 FR 36060.	
212.704	Implementation	7/11/1994	7/13/1995, 60 FR 36060.	
212.705	Alternative Implementation	7/11/1994	7/13/1995, 60 FR 36060.	
212.Appendix C:	Past Compliance Dates	4/14/1972	5/31/1972, 37 FR 10842	Approved as Rules 202(e), 203(c), 203(d)(3)(A) & (B), 203(d)(5)(L) & (M), 203(d)(8)(J), 203(f)(3) Preamble, 203(f)(3)(F) Preamble, and 203(i).

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Part 214: Sulfur Limitations				
Subpart A: General Provisions				
214.101	Measurement Methods	12/7/2015	2/1/2018, 83 FR 4591.	
214.102	Abbreviations and Units	12/7/2015	2/1/2018, 83 FR 4591.	
214.103	Definitions	12/7/2015	2/1/2018, 83 FR 4591.	
214.104	Incorporations by Reference	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart B: New Fuel Combustion Emission Sources				
214.121	Large Sources	12/7/2015	2/1/2018, 83 FR 4591.	
214.122	Small Sources	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart C: Existing Solid Fuel Combustion Emission Sources				
214.141	Sources Located in Metropolitan Areas.	3/28/1983	9/3/1992, 57 FR 40333 ...	thru (a).
214.141	Sources Located in Metropolitan Areas.	5/20/1986	9/2/1992, 57 FR 40126 ...	(b), (c), and (d).
214.142	Small Sources Located Outside Metropolitan Areas.	4/14/1972	5/31/1972, 37 FR 10842	Approved as Rule 204(c)(1)(B).
214.143	Large Sources Located Outside Metropolitan Areas.	2/3/1979	2/21/1980, 45 FR 11472.	
Subpart D: Existing Liquid or Mixed Fuel Combustion Emission Sources				
214.161	Liquid Fuel Burned Exclusively	12/7/2015	2/1/2018, 83 FR 4591.	
214.162	Combination of Fuels	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart E: Aggregation of Sources Outside Metropolitan Areas				
214.181	Dispersion Enhancement Techniques	2/3/1979	2/21/1980, 45 FR 11472.	
214.182	Prohibition	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e) (intro).
214.183	General Formula	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(1).
214.184	Special Formula	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(2).
214.185	Alternative Emission Rate	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(3).
214.186	New Operating Permits	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(e)(4).
Subpart F: Alternative Standards for Sources Inside Metropolitan Areas				
214.201	Alternative Standards for Sources in Metropolitan Areas.	12/7/2015	2/1/2018, 83 FR 4591.	
214.202	Dispersion Enhancement Techniques	3/28/1983	9/3/1992, 57 FR 40333.	
Subpart K: Process Emission Sources				
214.300	Scope	12/7/2015	2/1/2018, 83 FR 4591.	
214.301	General Limitation	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(f)(1)(A).
214.302	Exception for Air Pollution Control Equipment.	4/14/1972	5/31/1972, 37 FR 10842	Approved as Rule 204(f)(1)(C).
214.303	Use of Sulfuric Acid	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(f)(2)(B).
214.305	Fuel Sulfur Content Limitations	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart O: Petroleum Refining, Petrochemical and Chemical Manufacturing				
214.381	Sulfuric Acid Manufacturing	2/3/1979	2/21/1980, 45 FR 11472	Only (a) and (b). Approved as Rule 204(f)(1)(B) and (f)(2)(A).
214.382	Petroleum and Petrochemical Processes.	12/5/1988	1/28/1994, 59 FR 4001.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
214.383	Chemical Manufacturing	2/3/1979	2/21/1980, 45 FR 11472	Approved as Rule 204(f)(1)(E).
Subpart Q: Primary and Secondary Metal Manufacturing				
214.421	Combination of Fuels at Steel Mills in Metropolitan Areas.	12/7/2015	2/1/2018, 83 FR 4591.	
Subpart X: Utilities				
214.560	Scope	5/20/1986	9/2/1992, 57 FR 40126.	
214.561	E. D. Edwards Electric Generating Station.	7/11/2003	11/10/2008, 73 FR 66555.	
Subpart AA: Requirements for Certain SO_2 Sources				
214.600	Definitions	12/7/2015	2/1/2018, 83 FR 4591.	
214.601	Applicability	12/7/2015	2/1/2018, 83 FR 4591.	
214.602	Compliance Deadline	12/7/2015	2/1/2018, 83 FR 4591.	
214.603	Emission Limitations	12/7/2015	2/1/2018, 83 FR 4591.	
214.604	Monitoring and Testing	12/7/2015	2/1/2018, 83 FR 4591.	
214.605	Recordkeeping and Reporting	12/7/2015	2/1/2018, 83 FR 4591.	
214.Appendix C:	Compliance Dates	4/14/1972	5/31/1972, 37 FR 10842	Approved as Rule 204(e)(1).
Part 215: Organic Material Emission Standards and Limitations				
Subpart A: General Provisions				
215.101	Clean-Up and Disposal Operations	7/28/1979	2/21/1980, 45 FR 11472.	
215.102	Testing Methods	5/14/1991	8/18/1992, 57 FR 37100.	
215.104	Definitions	1/28/2013	10/6/2014, 79 FR 60070.	
215.105	Incorporation by Reference	1/28/2013	10/6/2014, 79 FR 60070.	
215.108	Measurement of Vapor Pressures	5/14/1991	8/18/1992, 57 FR 37100.	
215.109	Monitoring for Negligibly-Reactive Compounds.	6/19/1998	1/15/1999, 64 FR 2581.	
Subpart B: Organic Emissions From Storage and Loading Operations				
215.121	Storage Containers	7/28/1979	2/21/1980, 45 FR 11472.	
215.122	Loading Operations	7/28/1979	2/21/1980, 45 FR 11472.	
215.123	Petroleum Liquid Storage Tanks	7/28/1979	2/21/1980, 45 FR 11472.	
215.124	External Floating Roofs	1/21/1983	6/29/1990, 55 FR 26814.	
215.125	Compliance Dates and Geographical Areas.	1/21/1983	6/29/1990, 55 FR 26814.	
215.126	Compliance Plan	1/21/1983	6/29/1990, 55 FR 26814.	
Subpart C: Organic Emissions From Miscellaneous Equipment				
215.141	Separation Operations	7/28/1979	2/21/1980, 45 FR 11472.	
215.142	Pumps and Compressors	7/28/1979	2/21/1980, 45 FR 11472.	
215.143	Vapor Blowdown	7/28/1979	2/21/1980, 45 FR 11472.	
215.144	Safety Relief Valves	7/28/1979	2/21/1980, 45 FR 11472.	
Subpart E: Solvent Cleaning				
215.181	Solvent Cleaning in General	7/28/1979	2/21/1980, 45 FR 11472.	
215.182	Cold Cleaning	7/28/1979	2/21/1980, 45 FR 11472.	
215.183	Open Top Vapor Degreasing	7/28/1979	2/21/1980, 45 FR 11472.	
215.184	Conveyorized Degreasing	7/28/1979	2/21/1980, 45 FR 11472.	
Subpart F: Coating Operations				
215.202	Compliance Schedules	7/28/1979	2/21/1980, 45 FR 11472.	
215.204	Emission Limitations for Manufacturing Plants.	6/19/1998	1/15/1999, 64 FR 2581.	
215.205	Alternative Emission Limitations	6/19/1998	1/15/1999, 64 FR 2581.	
215.206	Exemptions From Emission Limitations.	6/19/1998	1/15/1999, 64 FR 2581.	
215.207	Compliance by Aggregation of Emission Units.	6/19/1998	1/15/1999, 64 FR 2581.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
215.208	Testing Methods for Volatile Organic Material Content.	7/28/1979	2/21/1980, 45 FR 11472.

215.886	Emissions Testing	9/30/1987	6/29/1990, 55 FR 26814.	
215.Appendix C:	Past Compliance Dates	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rules 104(a), 104(g), 104(h), 205(j), and 205(m).
Part 216: Carbon Monoxide Emissions				
Subpart A: General Provisions				
216.101	Measurement Methods	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(f).
Subpart B: Fuel Combustion Emission Sources				
216.121	Fuel Combustion Emission Sources	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(a).
Subpart C: Incinerators				
216.141	Incinerators	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(b).
216.142	Exceptions	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(b)(1,2).
Subpart N: Petroleum Refining and Chemical Manufacture				
216.361	Petroleum and Petrochemical Processes.	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(c).
216.362	Polybasic Organic Acid Partial Oxidation Manufacturing Processes.	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(h).
Subpart O: Primary and Fabricated Metal Products				
216.381	Cupolas	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(e).
216.382	Exception, General Motor's Ferrous Foundry in Vermilion County.	11/13/1992	8/4/1994, 59 FR 39686.	
216.Appendix C:	Compliance Dates	7/28/1979	2/21/1980, 45 FR 11472	Approved as Rule 206(g).
Part 217: Nitrogen Oxides Emissions				
Subpart A: General Provisions				
217.101	Measurement Methods	9/25/2007	6/26/2009, 74 FR 30466.	
217.102	Abbreviations and Units	9/25/2007	6/26/2009, 74 FR 30466.	
217.104	Incorporations by Reference	9/25/2007	6/26/2009, 74 FR 30466.	
Subpart B: New Fuel Combustion Emission Sources				
217.121	New Emission Sources	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 207(a)(1)–(4), 207(a)(5)(A).
Subpart C: Existing Fuel Combustion Emission Sources				
217.141	Existing Emission Sources in Major Metropolitan Areas.	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 207(b) and (c).
Subpart K: Process Emission Sources				
217.301	Industrial Processes	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 207(e).
Subpart O: Chemical Manufacture				
217.381	Nitric Acid Manufacturing Processes	4/14/1972	5/31/1972, 37 FR 10862	Approved as Rule 207(d).

218.109	Vapor Pressure of Volatile Organic Liquids.	9/27/1993	9/9/1994, 59 FR 46562.	
218.110	Vapor Pressure of Organic Material or Solvent.	9/27/1993	9/9/1994, 59 FR 46562.	
218.111	Vapor Pressure of Volatile Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
218.112	Incorporations by Reference	12/23/2013	3/13/2015, 80 FR 13248.	
218.114	Compliance With Permit Conditions	1/24/1994	10/21/1996, 61 FR 54556.	
Subpart B: Organic Emissions From Storage and Loading Operations				
218.119	Applicability for VOL	11/15/1994	8/8/1996, 61 FR 41338.	
218.120	Control Requirements for Storage Containers of VOL.	11/15/1994	8/8/1996, 61 FR 41338.	
218.121	Storage Containers	9/27/1993	9/9/1994, 59 FR 46562.	
218.122	Loading Operations	9/27/1993	9/9/1994, 59 FR 46562.	
218.123	Petroleum Liquid Storage Tanks	9/27/1993	9/9/1994, 59 FR 46562.	
218.124	External Floating Roofs	9/27/1993	9/9/1994, 59 FR 46562.	
218.125	Compliance Dates	11/15/1994	8/8/1996, 61 FR 41338.	
218.127	Testing VOL Operations	11/15/1994	8/8/1996, 61 FR 41338.	
218.128	Monitoring VOL Operations	1/28/2013	10/6/2014, 79 FR 60070.	
218.129	Recordkeeping and Reporting for VOL Operations.	11/15/1994	8/8/1996, 61 FR 41338.	
Subpart C: Organic Emissions From Miscellaneous Equipment				
218.141	Separation Operations	9/27/1993	9/9/1994, 59 FR 46562.	
218.142	Pumps and Compressors	8/16/1991	9/9/1994, 59 FR 46562.	
218.143	Vapor Blowdown	9/27/1993	9/9/1994, 59 FR 46562.	
218.144	Safety Relief Valves	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart E: Solvent Cleaning				
218.181	Solvent Cleaning Degreasing Operations.	6/25/2010	3/23/2012, 77 FR 16940.	
218.182	Cold Cleaning	6/9/1997	11/26/1997, 62 FR 62951.	
218.183	Open Top Vapor Degreasing	9/27/1993	9/9/1994, 59 FR 46562.

218.435	Recordkeeping and Reporting Requirements.	5/9/1995	3/23/1998, 63 FR 13784.	
218.436	Compliance Date	5/9/1995	3/23/1998, 63 FR 13784.	
Subpart R: Petroleum Refining and Related Industries; Asphalt Materials				
218.441	Petroleum Refinery Waste Gas Disposal.	9/27/1993	9/9/1994, 59 FR 46562.	
218.442	Vacuum Producing Systems	8/16/1991	9/9/1994, 59 FR 46562.	
218.443	Wastewater (Oil/Water) Separator	9/27/1993	9/9/1994, 59 FR 46562.	
218.444	Process Unit Turnarounds	8/16/1991	9/9/1994, 59 FR 46562.	
218.445	Leaks: General Requirements	9/27/1993	9/9/1994, 59 FR 46562.	
218.446	Monitoring Program Plan for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.447	Monitoring Program for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.448	Recordkeeping for Leaks	8/16/1991	9/9/1994, 59 FR 46562.	
218.449	Reporting for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.450	Alternative Program for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.451	Sealing Device Requirements	8/16/1991	9/9/1994, 59 FR 46562.	
218.452	Compliance Schedule for Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart S: Rubber and Miscellaneous Plastic Products				
218.461	Manufacture of Pneumatic Rubber Tires.	9/27/1993	9/9/1994, 59 FR 46562.	
218.462	Green Tire Spraying Operations	9/27/1993	9/9/1994, 59 FR 46562.	
218.463	Alternative Emission Reduction Systems.	9/27/1993	9/9/1994, 59 FR 46562.	
218.464	Emission Testing	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart T: Pharmaceutical Manufacturing				
218.480	Applicability	8/26/2008	11/3/2010, 75 FR 67623.	
218.481	Control of Reactors, Distillation Units, Crystallizers, Centrifuges and Vacuum Dryers.	9/27/1993	9/9/1994, 59 FR 46562.	
218.482	Control of Air Dryers, Production Equipment Exhaust Systems and Filters.	9/27/1993	9/9/1994, 59 FR 46562.	
218.483	Material Storage and Transfer	9/27/1993	9/9/1994, 59 FR 46562.	
218.484	In-Process Tanks	8/16/1991	9/9/1994, 59 FR 46562.	
218.485	Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.486	Other Emission Units	9/27/1993	9/9/1994, 59 FR 46562.	
218.487	Testing	9/27/1993	9/9/1994, 59 FR 46562.	
218.488	Monitoring for Air Pollution Control Equipment.	8/16/1991	9/9/1994, 59 FR 46562.	
218.489	Recordkeeping for Air Pollution Control Equipment.	9/27/1993	9/9/1994, 59 FR 46562.

Subpart V: Batch Operations and Air Oxidation Processes				
218.500	Applicability for Batch Operations	5/22/1995	4/2/1996, 61 FR 14484.	
218.501	Control Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
218.502	Determination of Uncontrolled Total Annual Mass Emissions and Average Flow Rate Values for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
218.503	Performance and Testing Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
218.504	Monitoring Requirements for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
218.505	Reporting and Recordkeeping for Batch Operations.	5/22/1995	4/2/1996, 61 FR 14484.	
218.506	Compliance Date	5/22/1995	4/2/1996, 61 FR 14484.	
218.520	Emission Limitations for Air Oxidation Processes.	11/15/1994	9/27/1995, 60 FR 49770.	
218.522	Savings Clause	11/15/1994	9/27/1995, 60 FR 49770.	
218.523	Compliance	11/15/1994	9/27/1995, 60 FR 49770.	
218.524	Determination of Applicability	11/15/1994	9/27/1995, 60 FR 49770.	
218.525	Emission Limitations for Air Oxidation Processes.	11/15/1994	9/27/1995, 60 FR 49770.	
218.526	Testing and Monitoring	8/16/1991	9/9/1994, 59 FR 46562.	
Subpart W: Agriculture				
218.541	Pesticide Exception	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart X: Construction				
218.561	Architectural Coatings	8/16/1991	9/9/1994, 59 FR 46562.	
218.562	Paving Operations	9/27/1993	9/9/1994, 59 FR 46562.	
218.563	Cutback Asphalt	8/16/1991	9/9/1994, 59 FR 46562.	
Subpart Y: Gasoline Distribution				
218.581	Bulk Gasoline Plants	9/27/1993	9/9/1994, 59 FR 46562.	
218.582	Bulk Gasoline Terminals	9/27/1993	9/9/1994, 59 FR 46562.	
218.583	Gasoline Dispensing Operations—Storage Tank Filling Operations.	12/23/2013	3/13/2015, 80 FR 13248.	
218.584	Gasoline Delivery Vessels	9/27/1993	9/9/1994, 59 FR 46562.	
218.586	Gasoline Dispensing Operations—Motor Vehicle Fueling Operations.	12/23/2013	3/13/2015, 80 FR 13248.	
Subpart Z: Dry Cleaners				
218.607	Standards for Petroleum Solvent Dry Cleaners.	8/16/1991	9/9/1994, 59 FR 46562.	
218.608	Operating Practices for Petroleum Solvent Dry Cleaners.	9/27/1993	9/9/1994, 59 FR 46562.	
218.609	Program for Inspection and Repair of Leaks.	9/27/1993	9/9/1994, 59 FR 46562.	
218.610	Testing and Monitoring	9/27/1993	9/9/1994, 59 FR 46562.	
218.611	Applicability for Petroleum Solvent Dry Cleaners.	1/24/1994	10/21/1996, 61 FR 54556.	
Subpart AA: Paint and Ink Manufacturing				
218.620	Applicability	1/24/1994	10/21/1996, 61 FR 54556.	
218.621	Exemption for Waterbase Material and Heatset Offset Ink.	9/27/1993	9/9/1994, 59 FR 46562.	
218.624	Open Top Mills, Tanks, Vats or Vessels.	9/27/1993	9/9/1994, 59 FR 46562.	
218.625	Grinding Mills	8/16/1991	9/9/1994, 59 FR 46562.	
218.626	Storage Tanks	8/16/1991	9/9/1994, 59 FR 46562.	
218.628	Leaks	9/27/1993	9/9/1994, 59 FR 46562.	
218.630	Clean Up	8/16/1991	9/9/1994, 59 FR 46562.	
218.636	Compliance Schedule	9/27/1993	9/9/1994, 59 FR 46562.	
218.637	Recordkeeping and Reporting	9/27/1993	9/9/1994, 59 FR 46562.

219.110	Vapor Pressure of Organic Material or Solvent.	9/27/1993	9/9/1994, 59 FR 46562.	
219.111	Vapor Pressure of Volatile Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
219.112	Incorporations by Reference	12/23/2013	3/13/2015, 80 FR 13248.	
Subpart B: Organic Emissions From Storage and Loading Operations				
219.119	Applicability for VOL	11/15/1994	8/8/1996, 61 FR 41338.	
219.120	Control Requirements for Storage Containers of VOL.	11/15/1994	8/8/1996, 61 FR 41338.	
219.121	Storage Containers of VPL	9/27/1993	9/9/1994, 59 FR 46562.	
219.122	Loading Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.123	Petroleum Liquid Storage Tanks	9/27/1993	9/9/1994, 59 FR 46562.	
219.124	External Floating Roofs	9/27/1993	9/9/1994, 59 FR 46562.	
219.125	Compliance Dates	11/15/1994	8/8/1996, 61 FR 41338.	
219.127	Testing VOL Operations	11/15/1994	8/8/1996, 61 FR 41338.	
219.128	Monitoring VOL Operations	1/28/2013	10/6/2014, 79 FR 60070.	
219.129	Recordkeeping and Reporting for VOL Operations.	11/15/1994	8/8/1996, 61 FR 41338.	
Subpart C: Organic Emissions From Miscellaneous Equipment				
219.141	Separation Operations	9/27/1993	9/9/1994, 59 FR 46562.	
219.142	Pumps and Compressors	8/16/1991	9/9/1994, 59 FR 46562.	
219.143	Vapor Blowdown	9/27/1993	9/9/1994, 59 FR 46562.	
219.144	Safety Relief Valves	9/27/1993	9/9/1994, 59 FR 46562.	
Subpart E: Solvent Cleaning				
219.181	Solvent Cleaning Degreasing Operations.	6/25/2010	3/23/2012, 77 FR 16940.	
219.182	Cold Cleaning	6/9/1997	11/26/1997, 62 FR 62951.	
219.183	Open Top Vapor Degreasing	9/27/1993	9/9/1994, 59 FR 46562.	
219.184	Conveyorized Degreasing	9/27/1993	9/9/1994, 59 FR 46562.	
219.186	Test Methods	9/27/1993	9/9/1994, 59 FR 46562.	
219.187	Other Industrial Solvent Cleaning Operations.	7/27/2011	3/23/2012, 77 FR 16940.	
Subpart F: Coating Operations				
219.204	Emission Limitations	7/27/2011	3/23/2012, 77 FR 16940.	
219.205	Daily-Weighted Average Limitations	9/14/2010	3/23/2012, 77 FR 16940.	
219.206	Solids Basis Calculation	9/27/1993	9/9/1994, 59 FR 46562.	
219.207	Alternative Emission Limitations	7/27/2011	3/23/2012, 77 FR 16940.	
219.208	Exemptions From Emission Limitations.	10/25/2011	4/19/2013, 78 FR 23495.	
219.209	Exemption From General Rule on Use of Organic Material.	9/27/1993	9/9/1994, 59 FR 46562.	
219.210	Compliance Schedule	9/14/2010	3/23/2012, 77 FR 16940.	
219.211	Recordkeeping and Reporting	7/27/2011	3/23/2012, 77 FR 16940.	
219.212	Cross-Line Averaging To Establish Compliance for Coating Lines.	9/14/2010	3/23/2012, 77 FR 16940.	
219.213	Recordkeeping and Reporting for Cross-Line Averaging Participating Coating Lines.	5/9/1995	2/13/1996, 61 FR 5511.	
219.214	Changing Compliance Methods	5/9/1995	2/13/1996, 61 FR 5511.	
219.215	Wood Furniture Coating Averaging Approach.	2/2/1998	5/19/1998, 63 FR 27489.	
219.216	Wood Furniture Coating Add-On Control Use.	2/2/1998	5/19/1998, 63 FR 27489.	
219.217	Wood Furniture Coating and Flat Wood Paneling Coating Work Practice Standards.	7/27/2011	3/23/2012, 77 FR 16940.	
219.218	Work Practice Standards for Paper Coatings, Metal Furniture Coatings, and Large Appliance Coatings.	3/23/2010	3/23/2012, 77 FR 16940.

219.903	Monitoring Requirements	7/27/2011	3/23/2012, 77 FR 16940.	
219.904	Recordkeeping and Reporting Requirements.	7/27/2011	3/23/2012, 77 FR 16940.	
Subpart PP: Miscellaneous Fabricated Product Manufacturing Processes				
219.920	Applicability	9/27/1993	5/7/1996, 61 FR 20455.	
219.923	Permit Conditions	9/27/1993	5/7/1996, 61 FR 20455.	
219.926	Control Requirements	5/9/1995	5/7/1996, 61 FR 20455.	
219.927	Compliance Schedule	9/27/1993	5/7/1996, 61 FR 20455.	
219.928	Testing	9/27/1993	5/7/1996, 61 FR 20455.	
Subpart QQ: Miscellaneous Formulation Manufacturing Processes				
219.940	Applicability	9/27/1993	5/7/1996, 61 FR 20455.	
219.943	Permit Conditions	9/27/1993	5/7/1996, 61 FR 20455.	
219.946	Control Requirements	5/9/1995	5/7/1996, 61 FR 20455.	
219.947	Compliance Schedule	9/27/1993	5/7/1996, 61 FR 20455.	
219.948	Testing	9/27/1993	5/7/1996, 61 FR 20455.	
Subpart RR: Miscellaneous Organic Chemical Manufacturing Processes				
219.960	Applicability	9/27/1993	5/7/1996, 61 FR 20455.	
219.963	Permit Conditions	9/27/1993	5/7/1996, 61 FR 20455.	
219.966	Control Requirements	5/9/1995	5/7/1996, 61 FR 20455.	
219.967	Compliance Schedule	9/27/1993	5/7/1996, 61 FR 20455.	
219.968	Testing	9/27/1993	5/7/1996, 61 FR 20455.	
Subpart TT: Other Emission Units				
219.980	Applicability	5/9/1995	3/12/1997, 62 FR 11327.	
219.983	Permit Conditions	9/27/1993	5/7/1996, 61 FR 20455.	
219.986	Control Requirements	5/9/1995	5/7/1996, 61 FR 20455.	
219.987	Compliance Schedule	9/27/1993	5/7/1996, 61 FR 20455.	
219.988	Testing	9/27/1993	5/7/1996, 61 FR 20455.	
Subpart UU: Recordkeeping and Reporting				
219.990	Exempt Emission Units	9/27/1993	5/7/1996, 61 FR 20455.	
219.991	Subject Emission Units	9/27/1993	5/7/1996, 61 FR 20455.	
219.Appendix A:	List of Chemicals Defining Synthetic Organic Chemical and Polymer Manufacturing.	9/27/1993	9/9/1994, 59 FR 46562.	
219.Appendix B:	VOM Measurement Techniques for Capture Efficiency (Repealed).	9/27/1993	9/9/1994, 59 FR 46562.	
219.Appendix C:	Reference Methods and Procedures	9/27/1993	9/9/1994, 59 FR 46562.	
219.Appendix D:	Coefficients for the Total Resource Effectiveness Index (TRE) Equation.	9/27/1993	9/9/1994, 59 FR 46562.	
219.Appendix E:	List of Affected Marine Terminals	2/15/1996	4/3/1995, 60 FR 16801.	
219.Appendix G:	TRE Index Measurements for SOCMI Reactors and Distillation Units.	5/9/1995	3/23/1998, 63 FR 13784.	
219.Appendix H:	Baseline VOM Content Limitations for Subpart F, Section 219.212 Cross-Line Averaging.	5/9/1995	2/13/1996, 61 FR 5511.	
Part 223: Standards and Limitations for Organic Material Emissions for Area Sources				
Subpart A: General Provisions				
223.100	Severability	6/8/2009	5/6/2013, 78 FR 26258.	
223.105	Abbreviations and Acronyms	6/8/2009	5/6/2013, 78 FR 26258.	
223.120	Incorporations by Reference	6/8/2009	5/6/2013, 78 FR 26258.

Subpart B: Consumer and Commercial Products				
223.200	Purpose	6/8/2009	5/6/2013, 78 FR 26258.	
223.201	Applicability	5/4/2012	5/6/2013, 78 FR 26258.	
223.203	Definitions for Subpart B	5/4/2012	5/6/2013, 78 FR 26258.	
223.205	Standards	5/4/2012	5/6/2013, 78 FR 26258.	
223.206	Diluted Products	6/8/2009	5/6/2013, 78 FR 26258.	
223.207	Products Registered Under FIFRA	5/4/2012	5/6/2013, 78 FR 26258.	
223.208	Requirements for Aerosol Adhesives	5/4/2012	5/6/2013, 78 FR 26258.	
223.209	Requirements for Floor Wax Strippers.	6/8/2009	5/6/2013, 78 FR 26258.	
223.210	Products Containing Ozone-Depleting Compounds.	6/8/2009	5/6/2013, 78 FR 26258.	
223.211	Requirements for Adhesive Removers, Aerosol Adhesives, Contact Adhesives, Electrical Cleaners, Electronic Cleaners, Footwear or Leather Care Products, General Purpose Degreasers, and Graffiti Removers.	5/4/2012	5/6/2013, 78 FR 26258.	
223.220	Requirements for Charcoal Lighter Material.	6/8/2009	5/6/2013, 78 FR 26258.	
223.230	Exemptions	6/8/2009	5/6/2013, 78 FR 26258.	
223.240	Innovative Product Exemption	6/8/2009	5/6/2013, 78 FR 26258.	
223.245	Alternative Compliance Plans	6/8/2009	5/6/2013, 78 FR 26258.	
223.250	Product Dating	6/8/2009	5/6/2013, 78 FR 26258.	
223.255	Additional Product Dating Requirements.	6/8/2009	5/6/2013, 78 FR 26258.	
223.260	Most Restrictive Limit	6/8/2009	5/6/2013, 78 FR 26258.	
223.265	Additional Labeling Requirements for Aerosol Adhesives, Adhesive Removers, Electronic Cleaners, Electrical Cleaners, Energized Electrical Cleaners, and Contact Adhesives.	6/8/2009	5/6/2013, 78 FR 26258.	
223.270	Reporting Requirements	6/8/2009	5/6/2013, 78 FR 26258.	
223.275	Special Recordkeeping Requirements for Consumer Products That Contain Perchloroethylene or Methylene Chloride.	6/8/2009	5/6/2013, 78 FR 26258.	
223.280	Calculating Illinois Sales	6/8/2009	5/6/13, 78 FR 26258.	
223.285	Test Methods	6/8/2009	5/6/2013, 78 FR 26258.	
Subpart C: Architectural and Industrial Maintenance Coatings				
223.300	Purpose	6/8/2009	5/6/2013, 78 FR 26258.	
223.305	Applicability	5/4/2012	5/6/2013, 78 FR 26258.	
223.307	Definitions for Subpart C	6/8/2009	5/6/2013, 78 FR 26258.	
223.310	Standards	6/8/2009	5/6/2013, 78 FR 26258.	
223.320	Container Labeling Requirements	6/8/2009	5/6/2013, 78 FR 26258.	
223.330	Reporting Requirements	6/8/2009	5/6/2013, 78 FR 26258.	
223.340	Compliance Provisions and Test Methods.	6/8/2009	5/6/2013, 78 FR 26258.

226.175	Emissions Testing	4/21/2014	3/28/2018, 83 FR 13198.	
226.185	Recordkeeping and Reporting	4/21/2014	3/28/2018, 83 FR 13198.	
Subchapter i: Open Burning				
Part 237: Open Burning				
Subpart A: General Provisions				
237.101	Definitions	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 401.
237.102	Prohibitions	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 402.
237.103	Explosive Wastes	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 405.
237.110	Local Enforcement	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 406.
237.120	Exemptions	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 403.
Subpart B: Permits				
237.201	Permits	9/7/1971	5/31/1972, 37 FR 10862	Approved as Rule 404.
Subchapter k: Emission Standards and Limitations for Mobile Sources				
Part 240: Mobile Sources				
Subpart A: Definitions and General Provisions				
240.101	Preamble	12/20/1994	8/13/2014, 79 FR 47377.	
240.102	Definitions	2/1/2012	8/13/2014, 79 FR 47377.	
240.103	Prohibitions	4/14/1972	8/13/2014, 79 FR 47377.	
240.104	Inspection	2/1/2012	8/13/2014, 79 FR 47377.	
240.105	Penalties	2/1/2012	8/13/2014, 79 FR 47377.	
240.106	Determination of Violation	2/1/2012	8/13/2014, 79 FR 47377.	
240.107	Incorporations by Reference	3/18/2011	8/13/2014, 79 FR 47377.	
Subpart B: Emissions				
240.121	Smoke Emissions	2/1/2012	8/13/2014, 79 FR 47377.	
240.122	Diesel Engine Emissions Standards for Locomotives.	4/7/1992	8/13/2014, 79 FR 47377.	
240.123	Liquid Petroleum Gas Fuel Systems	2/1/2012	8/13/2014, 79 FR 47377.	
Subpart C: Smoke Opacity Standards and Test Procedures for Diesel-Powered Heavy Duty Vehicles				
240.140	Applicability	2/26/2001	8/13/2014, 79 FR 47377.	

EPA-APPROVED ILLINOIS REGULATIONS AND STATUTES—Continued

Illinois citation	Title/subject	State effective date	EPA approval date	Comments
240.141	Smoke Opacity Standards and Test Procedures for Diesel-Powered Heavy Duty Vehicles.	2/26/2001	8/13/2014, 79 FR 47377.	
Subpart D: Steady-State Idle Mode Test Emission Standards				
240.151	Applicability	2/1/2012	8/13/2014, 79 FR 47377.	
240.152	Steady-State Idle Mode Vehicle Exhaust Emission Standards.	3/18/2011	8/13/2014, 79 FR 47377.	
240.153	Compliance Determination	3/18/2011	8/13/2014, 79 FR 47377.	
Subpart F: Evaporative Test Standards				
240.171	Applicability	2/1/2012	8/13/2014, 79 FR 47377.	
240.172	Evaporative System Integrity Test Standards.	7/13/1998	8/13/2014, 79 FR 47377.	
Subpart G: On-Road Remote Sensing Test Emission Standards				
240.181	Applicability	3/18/2011	8/13/2014, 79 FR 47377.	
240.182	On-Road Remote Sensing Emission Standards.	3/18/2011	8/13/2014, 79 FR 47377.	
240.183	Compliance Determination	7/13/1998	8/13/2014, 79 FR 47377.	
Subpart H: On-Board Diagnostic Test Standards				
240.191	Applicability	3/18/2011	8/13/2014, 79 FR 47377.	
240.192	On-Board Diagnostic Test Standards	12/18/2001	8/13/2014, 79 FR 47377.	
240.193	Compliance Determination	12/18/2001	8/13/2014, 79 FR 47377.	
Subpart I: Visual Inspection Test Standards				
240.201	Applicability	2/1/2012	8/13/2014, 79 FR 47377.	
240.202	Visual Inspection Test Standards	2/1/2012	8/13/2014, 79 FR 47377.	
240.203	Compliance Determination	2/1/2012	8/13/2014, 79 FR 47377.	
240.Appendix A:	Rule Into Section Table	2/1/2012	8/13/2014, 79 FR 47377.	
240.Appendix B:	Section Into Rule Table	2/1/2012	8/13/2014, 79 FR 47377.	
Part 241: Clean Fuel Fleet Program				
Subpart A: General Provisions				
241.101	Other Definitions	9/11/1995	3/19/1996, 61 FR 11139.	
241.102	Definitions	9/11/1995	3/19/1996, 61 FR 11139.	
241.103	Abbreviations	9/11/1995	3/19/1996, 61 FR 11139.	
241.104	Incorporations by Reference	9/11/1995	3/19/1996, 61 FR 11139.	
Subpart B: General Requirements				
241.110	Applicability	9/11/1995	3/19/1996, 61 FR 11139.	
241.111	Exemptions	9/11/1995	3/19/1996, 61 FR 11139.	
241.112	Registration of Fleet Owners or Operators.	9/11/1995	3/19/1996, 61 FR 11139.	
241.113	Control Requirements	11/25/1997	2/17/1999, 64 FR 7788.	
241.114	Conversions	9/11/1995	3/19/1996, 61 FR 11139.	
241.115	Operating Requirements	9/11/1995	3/19/1996, 61 FR 11139.	
Subpart C: Credits				
241.130	Clean Fuel Fleet Credit Program	11/25/1997	2/17/1999, 64 FR 7788.	
241.131	Credit Provisions	9/11/1995	3/19/1996, 61 FR 11139.	
Subpart D: Recordkeeping and Reporting				
241.140	Reporting Requirements	11/25/1997	2/17/1999, 64 FR 7788.	
241.141	Recordkeeping Requirements	9/11/1995	3/19/1996, 61 FR 11139.	
241.142	Report of Credit Activities	9/11/1995	3/19/1996, 61 FR 11139.	
241.Appendix A:	Emission Standards for Clean Fuel Vehicles.	9/11/1995	3/19/1996, 61 FR 11139.	
241.Appendix B:	Credit Values	11/25/1997	2/17/1999, 64 FR 7788.

Subchapter I: Air Quality Standards and Episodes				
Part 243: Air Quality Standards				
Subpart A: General Provisions				
243.101	Definitions	10/23/2017	12/21/2018, 83 FR 65537.	
243.103	Applicability	7/29/2013	5/20/2015, 80 FR 28835.	
243.104	Nondegradation	10/25/2011	5/23/2013, 78 FR 30770.	
243.105	Air Quality Monitoring Data Influenced by Exceptional Events.	10/23/2017	12/21/2018, 83 FR 65537.	
243.106	Monitoring	4/14/1972	2/21/1980, 45 FR 11472.	
243.107	Reference Conditions	11/27/2013	6/10/2016, 81 FR 37517.	
243.108	Incorporation by Reference	2/19/2019	11/5/2019, 84 FR 59527.	
Subpart B: Standards and Measurement Methods				
243.120	PM_{10} and $PM_{2.5}$	2/19/2019	11/5/2019, 84 FR 59527.	
243.122	Sulfur Oxides (Sulfur Dioxide)	2/19/2019	11/5/2019, 84 FR 59527.	
243.123	Carbon Monoxide	7/29/2013	5/20/2015, 80 FR 28835.	
243.124	Nitrogen Oxides (Nitrogen Dioxide as Indicator).	1/23/2017	7/18/2017, 82 FR 32771.	
243.125	Ozone	2/19/2019	11/5/2019, 84 FR 59527.	
243.126	Lead	2/19/2019	11/5/2019, 84 FR 59527.	
Part 244: Episodes				
Subpart A: Definitions and General Provisions				
244.101	Definitions	5/15/1992	1/12/1993, 58 FR 3844.	
244.102	Responsibility of the Agency	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
244.103	Determination of Required Actions	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
244.104	Determination of Atmospheric Conditions.	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
244.105	Determination of Expected Contaminant Emissions.	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
244.106	Monitoring	5/15/1992	1/12/1993, 58 FR 3844.	
244.107	Determination of Areas Affected	5/15/1992	1/12/1993, 58 FR 3844.	
244.108	Failure To Comply With Episode Requirements.	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
244.109	Sealing of Offenders	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 402.
Subpart B: Local Agency Responsibilities				
244.121	Local Agency Responsibilities	5/15/1992	1/12/1993, 58 FR 3844.	
Subpart C: Episode Action Plans				
244.141	Requirement for Plans	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 404.
244.142	Facilities for Which Action Plans Are Required.	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 404.
244.143	Submission of Plans	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 404.
244.144	Contents of Plans	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 404.
244.145	Processing Procedures	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 404.
Subpart D: Episode Stages				
244.161	Advisory, Alert and Emergency Levels.	5/15/1992	1/12/1993, 58 FR 3844.	
244.162	Criteria for Declaring an Advisory	5/15/1992	1/12/1993, 58 FR 3844.	
244.163	Criteria for Declaring a Yellow Alert	5/15/1992	1/12/1993, 58 FR 3844.	
244.164	Criteria for Declaring a Red Alert	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 405(e).
244.165	Criteria for Declaring an Emergency	8/18/1972	2/21/1980, 45 FR 11472	Approved as Rule 405(e).
244.166	Criteria for Terminating Advisory, Alert and Emergency.	5/15/1992	1/12/1993, 58 FR 3844.	
244.167	Episode Stage Notification	5/15/1992	1/12/1993, 58 FR 3844.	
244.168	Contents of Episode Stage Notification.	5/15/1992	1/12/1993, 58 FR 3844.	
244.169	Actions During Episode Stages	5/15/1992	1/12/1993, 58 FR 3844.	
244.Appendix D:	Required Emission Reduction Actions.	5/15/1992	1/12/1993, 58 FR 3844.

Chapter II: Environmental Protection Agency				
Part 252: Public Participation in the Air Pollution Permit Program for Major Sources in Nonattainment Areas				
Subpart A: Introduction				
252.101	Purpose	6/1/1984	9/25/1985, 50 FR 38803.	
252.102	Applicability	6/1/1984	9/25/1985, 50 FR 38803.	
252.103	Definitions	6/1/1984	9/25/1985, 50 FR 38803.	
Subpart B: Procedures for Public Review				
252.201	Notice and Opportunity To Comment	6/1/1984	9/25/1985, 50 FR 38803.	
252.202	Draft Permit and Denial Letter	6/1/1984	9/25/1985, 50 FR 38803.	
252.203	Availability of Documents	6/1/1984	9/25/1985, 50 FR 38803.	
252.204	Opportunity for Public Hearing	6/1/1984	9/25/1985, 50 FR 38803.	
Part 254: Annual Emissions Report				
Subpart A: General Provisions				
254.101	Purpose	7/17/2001	5/15/2002, 67 FR 34614.	
254.102	Applicability	4/20/2012	7/3/2013, 67 FR 40013.	
254.103	Definitions	7/17/2001	5/15/2002, 67 FR 34614.	
254.120	Applicable Pollutants for Annual Emissions Reporting.	7/17/2001	5/15/2002, 67 FR 34614.	
254.132	Failure To File a Complete Report	7/17/2001	5/15/2002, 67 FR 34614.	
254.133	Voluntary Submittal of Data	5/14/1993	5/15/2002, 67 FR 34614.	
254.134	Retention of Records	7/17/2001	5/15/2002, 67 FR 34614.	
254.135	Reporting of Errors	7/17/2001	5/15/2002, 67 FR 34614.	
254.136	Confidentiality and Trade Secret Protection.	7/17/2001	5/15/2002, 67 FR 34614.	
254.137	Reporting Schedule	7/17/2001	5/15/2002, 67 FR 34614.	
254.138	Issuance of Source Inventory Report	7/17/2001	5/15/2002, 67 FR 34614.	
Subpart B: Reporting Requirements for Large Sources				
254.203	Contents of Subpart B Annual Emissions Report.	7/17/2001	5/15/2002, 67 FR 34614.	
254.204	Complete Reports	7/17/2001	5/15/2002, 67 FR 34614.	
Subpart C: Reporting Requirements for Other Sources				
254.303	Contents of Subpart C Annual Emissions Report.	7/17/2001	5/15/2002, 67 FR 34614.	
254.306	Complete Reports	7/17/2001	5/15/2002, 67 FR 34614.	
Subpart E: Seasonal Emissions Report Under ERMS				
254.501	Contents of a Seasonal Emissions Report.	7/17/2001	5/15/2002, 67 FR 34614.	
Part 255: General Conformity: Criteria and Procedures				
255.100	Purpose	3/6/1997	12/23/1997, 62 FR 67000.	
255.110	Federal Requirement	3/6/1997	12/23/1997, 62 FR 67000.	
255.120	Applicability	3/6/1997	12/23/1997, 62 FR 67000.	
255.140	Definitions	3/6/1997	12/23/1997, 62 FR 67000.	
255.150	Abbreviations	3/6/1997	12/23/1997, 62 FR 67000.	
255.160	Incorporations by Reference	3/6/1997	12/23/1997, 62 FR 67000.	
255.170	Activities Exempt From Conformity Analysis.	3/6/1997	12/23/1997, 62 FR 67000.	
255.180	Conformity Analysis	3/6/1997	12/23/1997, 62 FR 67000.	
255.190	Reporting Requirements	3/6/1997	12/23/1997, 62 FR 67000.	
255.200	Public Participation	3/6/1997	12/23/1997, 62 FR 67000.	
255.210	Frequency of Conformity Determinations.	3/6/1997	12/23/1997, 62 FR 67000.	
255.220	Criteria for Determining Conformity of General Federal Actions.	3/6/1997	12/23/1997, 62 FR 67000.	
255.230	Procedures for Conformity Determinations of General Federal Actions.	3/6/1997	12/23/1997, 62 FR 67000.

Emissions inventories—2008 (NO_X, primary $PM_{2.5}$, SO_2, ammonia, and VOC).	St. Louis area	12/6/2018	5/28/2019, 84 FR 24395.	
Emission inventory—2011 (2008 8-hour ozone).	Chicago and St. Louis areas.	9/3/2014	3/7/2016, 81 FR 11671.	
Emission inventory—2012 (2008 Lead).	Chicago and Granite City areas.	9/22/2016	3/28/2018, 83 FR 13198.	

EPA-APPROVED ILLINOIS NONREGULATORY AND QUASI-REGULATORY PROVISIONS—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
Moderate Area & Above Ozone Requirements				
15 percent rate-of-progress and 3 percent contingency plans.	Chicago and St. Louis areas.	11/15/1993	12/18/1997, 62 FR 66279.	
Negative declaration—Natural gas/gasoline processing plants.	State-wide	11/14/1985	11/24/1986, 51 FR 42221.	
Negative declaration—Aerospace manufacturing and rework industry.	Chicago and St. Louis areas.	10/11/1996	2/11/1997, 62 FR 6127.	
Negative declaration—Industrial cleaning solvents category.	St. Louis area	10/2/1998	1/6/1999, 64 FR 756.	
Negative declaration—Industrial cleaning solvents category.	Chicago area	12/23/1999	2/7/2001, 66 FR 9206.	
Negative declaration—Industrial wastewater category.	Chicago area	12/23/1999	4/27/2001, 66 FR 21096.	
Negative declaration—Industrial wastewater category.	St. Louis area	10/2/1998	1/6/1999, 64 FR 756.	
Negative declaration—Shipbuilding and ship repair industry.	Chicago and St. Louis areas.	10/11/1996	2/11/1997, 62 FR 6126.	
NO_X RACT waiver (1997 8-hour ozone).	Chicago and St. Louis areas.	7/29/2010	2/22/2011, 76 FR 9655.	
NO_X waiver—RACT, NSR, vehicle I/M, and general conformity.	Chicago severe nonattainment area.	7/13/1994	1/26/1996, 61 FR 2428	does not cover the exemption of NO_X transportation conformity requirements.
NO_X waiver—transportation conformity requirements.	Chicago severe nonattainment area.	6/20/1995	2/12/1996, 61 FR 5291.	
Photochemical assessment ambient monitoring system (PAMS).	.....	11/4/1993	2/25/1994, 59 FR 9091.	
Post–1996 Rate Of Progress Plan.	Chicago area	12/18/1997, 12/17/1999, 1/14/2000, 1/21/2000, and 2/17/2000	12/18/2000, 65 FR 78961	Includes Contingency measure plan and Transportation Control Measures (TCMs).
Transportation control measures as part of the 15 percent rate-of-progress and 3 percent contingency plans.	St. Louis area	11/15/1993	12/18/1997, 62 FR 66279	Work trip reductions; transit improvements; and traffic flow improvements.
Vehicle miles traveled (VMT) SIP and, transportation control measures (TCMs) as part of the 15 percent rate-of-progress plan.	Chicago area	7/14/1994	9/21/1995, 60 FR 48896.	
Section 110(a)(2) Infrastructure Requirements				
1997 8-hour Ozone NAAQS Infrastructure Requirements.	Statewide	12/12/2007	7/13/2011, 76 FR 41075 ..	CAA elements 110(a)(2)(A), (B), (C) with respect to enforcement, (D)(ii), (E) through (H), (J) except for prevention of significant deterioration (PSD), and (K) through (M) have been approved. CAA elements 110(a)(2)(C) and (J) with respect to PSD have been disapproved.

EPA-APPROVED ILLINOIS NONREGULATORY AND QUASI-REGULATORY PROVISIONS—Continued

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
1997 $PM_{2.5}$ NAAQS Infrastructure Requirements.	Statewide	12/12/2007	7/13/2011, 76 FR 41075 ..	CAA elements 110(a)(2)(A), (B), (C) with respect to enforcement, (D)(ii), (E) through (H), (J) except for prevention of significant deterioration (PSD), and (K) through (M) have been approved. CAA elements 110(a)(2)(C) and (J) with respect to PSD have been disapproved.
2006 24-hour $PM_{2.5}$ NAAQS Infrastructure Requirements.	Statewide	8/9/2011, supplemented on 8/25/2011, 6/27/2012, and 7/5/2017	9/23/2019, 84 FR 49671 ..	All CAA infrastructure elements under 110(a)(2) have been approved except (D)(i)(I) [Prongs 1 and 2], (D)(ii), and the PSD portions of (C), (D)(i)(II) [Prong 3], and (J), which have been disapproved. The disapproved elements have Federal Implementation Plans (FIP) in place and no further action is needed.
2008 Lead NAAQS Infrastructure Requirements.	Statewide	12/31/2012 and 7/5/2017	9/23/2019, 84 FR 49671 ..	All CAA infrastructure elements under 110(a)(2) have been approved except (D)(ii), and the PSD portions of (C), (D)(i)(II) [Prong 3], and (J), which have been disapproved. The disapproved elements have Federal Implementation Plans (FIP) in place and no further action is needed.
2008 Ozone NAAQS Infrastructure Requirements.	Statewide	12/31/2012 and 7/5/2017	9/23/2019, 84 FR 49671 ..	All CAA infrastructure elements under 110(a)(2) have been approved except (D)(i)(I) [Prongs 1 and 2], (D)(ii), and the PSD portions of (C), (D)(i)(II) [Prong 3], and (J), which have been disapproved. The disapproved elements have Federal Implementation Plans (FIP) in place and no further action is needed.
2010 NO_2 NAAQS Infrastructure Requirements.	Statewide	12/31/2012 and 7/5/2017	9/23/2019, 84 FR 49671 ..	All CAA infrastructure elements under 110(a)(2) have been approved except (D)(ii), and the PSD portions of (C), (D)(i)(II) [Prong 3], and (J), which have been disapproved. The disapproved elements have Federal Implementation Plans (FIP) in place and no further action is needed.

The disapproved elements have Federal Implementation Plans (FIP) in place and no further action is needed.
2012 $PM_{2.5}$ NAAQS Infrastructure Requirements.	Statewide	9/29/2017	6/20/2019, 84 FR 28745 ..	Fully approving CAA transport requirements of (D)(i)(I).

[82 FR 30638, June 30, 2017, as amended at 82 FR 31915, July 11, 2017; 82 FR 32774, July 18, 2017; 83 FR 4593, Feb. 1, 2018; 83 FR 8615, Feb. 28, 2018; 83 FR 8757, Mar. 1, 2018; 83 FR 13201, Mar. 28, 2018; 83 FR 15746, Apr. 12, 2018; 83 FR 24407, May 29, 2018; 83 FR 24032, May 24, 2018; 83 FR 50855, Oct. 10, 2018; 83 FR 65540, Dec. 21, 2018; 84 FR 2067, Feb. 6, 2019; 84 FR 24397, May 28, 2019; 84 FR 28747, June 20, 2019; 84 FR 49673, Sept. 23, 2019; 84 FR 59528, Nov. 5, 2019; 84 FR 63806, Nov. 19, 2019; 84 FR 67195, Dec. 9, 2019; 85 FR 4233, Jan. 24, 2020; 85 FR 31381, May 26, 2020]

EDITORIAL NOTE: At 83 FR 50855, Oct. 10, 2018, § 52.720(c) was amended in part by revising entries for 201.103, 201.104, and 211.4720; however, the revisions could not be completed because those entries did not exist.

§ 52.721 Classification of regions.

The Illinois plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Burlington-Keokuk Interstate	I	I	III	III	III
East Central Illinois Intrastate	III	II	III	III	III
Metropolitan Chicago Interstate (Indiana-Illinois)	I	I	I	I	I
Metropolitan Dubuque Interstate	I	III	III	III	III
Metropolitan Quad Cities Interstate	I	III	III	III	III
Metropolitan St. Louis Interstate (Missouri-Illinois)	I	I	III	I	I
North Central Illinois Intrastate	II	IA	III	III	III
Paducah (Kentucky)-Cairo (Illinois) Interstate	I	II	III	III	III
Rockford (Illinois)-Janesville-Beloit (Wisconsin) Interstate	II	III	III	III	III
Southeast Illinois Intrastate	III	II	III	III	III
West Central Illinois Intrastate	I	IA	III	III	III

[37 FR 10862, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 45 FR 11493, Feb. 21, 1980]

§ 52.722 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approved Illinois' plan for the attainment and maintenance of the National Ambient Air Quality Standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds the plan satisfies all requirements of part D, title I of the Clean Air Act as amended in 1977, except as noted below. In addition, continued satisfaction of the requirements of part D for the ozone portion of the SIP depends on the adoption and submittal of RACT requirements by July 1, 1980, for the sources covered by CTGs between January 1978 and

January 1979 and adoption and submittal by each subsequent January of additional RACT requirements for sources covered by CTGs issued by the previous January.

(b) The Administrator finds that the transportation control plans for the East St. Louis and Chicago areas submitted on December 3, 1982, satisfy the related requirements of part D, title I of the Clean Air Act, as amended in 1977.

(c) The Administrator finds that the carbon monoxide control strategy submitted on May 4, 1983, satisfies all requirements of part D, title I of the Clean Air Act, as amended in 1977, except for section 172(b)(6).

[55 FR 40661, Oct. 4, 1990]

§ 52.723 [Reserved]

§ 52.724 Control strategy: Sulfur dioxide.

(a) Part D—Conditional Approval—The Illinois plan is approved provided that the following condition is satisfied:

(1) The plan includes a reanalysis of the Pekin, Illinois area, a submittal of the analysis results to USEPA, the proposal of any additional regulations to the Illinois Pollution Control Board necessary to insure attainment and maintenance of the sulfur dioxide standard, and the promulgation of any necessary regulations. The State must complete the reanalysis, submit the results to USEPA and submit any necessary, additional regulations to the Illinois Pollution Control Board by September 30, 1980. Any necessary regulation must be finally promulgated by the State and submitted to USEPA by September 30, 1981.

(2) Extension of Condition—USEPA approves the date of July 1, 1984 for submitting the draft sulfur dioxide rule revisions and supporting documentation as required in (a)(1) for Peoria, Hollis and Groveland Townships in Illinois. The State must complete final rule adoption as expeditiously as possible but no later than December 31, 1985.

(b) Part D—Disapproval—USEPA disapproves Rules 204(c)(1)(B), Rule 204(c)(1)(C), Rule 204(e)(1) and Rule 204(e)(2) for those sources for which these rules represent a relaxation of the federally enforceable State Implementation Plan. Rule 204(c)(1)(B), Rule 204(c)(1)(C), Rule 204(e)(1) and Rule 204(e)(2) are approved as not representing relaxations of the State Implementation Plan for the following sources:

SOURCES OF 10 MILLION BTU PER HOUR OR MORE NOT INCREASING ALLOWABLE SULFUR DIOXIDE EMISSIONS AS A RESULT OF RECORD RULES 204(c) AND 204(e) BECAUSE NEW ALLOWABLE EMISSIONS RATE IS SAME AS OR LESS THAN OLD ALLOWABLE RATE POUNDS PER HOUR (POUNDS PER MILLION BTU)

County	Name	Emissions formerly allowable [1]	Emissions now allowable without new permit application [2]
Boone	Chrysler	1,760 (4.4)	1,760 (4.4)
Champaign	Chanute Air Base	1,317 (3.0)	1,317 (3.0)
Crawford	CIPS	8,242 (5.1)	8,242 (5.1)
Douglas	USI Chemicals	8,022 (5.3)	8,022 (5.3)
Fulton	Freeman Coal	22.2 (1.2)	22.2 (1.2)
La Salle	Del Monte	296 (3.9)	296 (3.9)
Massac	EEI Joppa	36,865 (3.6)	36,865 (3.6)
Montgomery	CIPS	55,555 (5.8)	55,555 (5.8)
Morgan	.....do	24,000 (6.0)	20,800 (5.2)
Putnam	Illinois Power	17,051 (5.8)	17,051 (5.8)
Randolph	.....do [3]	81,339 (4.6)	81,339 (4.6)
Rock Island	International Harvester	1,643 (4.35)	1,643 (4.35)
Williamson	Marion Correctional	396 (5.7)	396 (5.7)

[1] 6.0 lbs/MMBTU of existing coal fired capacity or total 204(e)(2) emissions less actual oil fired and NSPS emissions, whichever is lower.

[2] Maximum allowable emissions for existing coal fired capacity according to revised rules 204(c) and 204(e) consolidated, usually equally equalling total emissions as given by 204(e)(2) less actual oil fired NSPS emissions. (In the one case wherein the new allowable limit is less than that given by 204(e)(2) the allowable emissions were determined by 204(e)(1) with which the source is required to comply.)

[3] Source is in compliance per 204(e)(3).

CIPS = Central Illinois Public Service.
EEI = Electric Energy Incorporated.

This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(1).

(c) Disapproval—USEPA disapproves Rule 204(e)(4) as not being adequate to protect the NAAQS. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(d) Disapproval—USEPA disapproves Rule 204(f)(1)(D) as completely deregulating SO_2 emissions from existing processes without providing an assessment of the ambient air quality impact or a showing that increasing the allowable emissions from these sources will not cause or contribute to violations of the NAAQS or PSD increments. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(e) Disapproval—USEPA disapproves Rule 204(h) for those sources for which USEPA has disapproved rules 204(c) and 204(e). This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(f) Approval—USEPA approves rule 204(e)(3) for those sources able to show that the proposed emission rate will not cause or contribute to a violation of the NAAQS. The State must submit these emission limitations, along with the technical support to USEPA for approval.

(g) Part D—Approval—The State plan for Alton Township, Madison County, which consists of a federally Enforceable State Operating Permit controlling sulfur dioxide emissions from the boilers and reheat furnaces at Laclede Steel, which was submitted on November 18, 1993, is approved.

(h) Approval—On November 10, 1994, the Illinois Environmental Protection Agency submitted a sulfur dioxide redesignation request and maintenance plan for Peoria and Hollis Townships in Peoria County and Groveland Township in Tazewell County to redesignate the townships to attainment for sulfur dioxide. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(d) of the Clean Air Act (Act) as amended in 1990.

[45 FR 62806, 62809, Sept. 22, 1980, as amended at 50 FR 5250, Feb. 7, 1985; 59 FR 18753, Apr. 20, 1994; 60 FR 17001, Apr. 4, 1995]

§ 52.725 Control strategy: Particulates.

(a) [Reserved]

(b) Part D—Disapproval. (1) U.S. EPA disapproves the provisions of Rule 203(f) which allow the use of an equivalent method without review and approval of that method. Any source subject to Rule 203(f) which chooses to use an equivalent method must have that equivalent method submitted to U.S. EPA and approved as a SIP revision.

(2) U.S. EPA disapproves the following portions of Rule 203(d)(5) which regulate the control of particulate matter from specific sources within the iron and steel industry: Rule 205(d)(5)(B)(ii), Rule 205(d)(5)(B)(iii), Rule 205(d)(5)(D), and Rule 205(d)(5)(K).

(3) USEPA disapproves a proposed SIP revision submitted by the State on May 12, 1982, in the form of a May 18, 1981 Consent Decree (Civil Action 81–3009) to which USEPA, Illinois Environmental Protection Agency and National Steel Corporation are parties and a draft Alternative Control Strategy Permit. This submission was modified by the State, September 30, 1982, with the submission of a separate document embodying the elements of the Alternative Control Strategy. This separate document was intended to become an enforceable part of the SIP.

(c) Approval—On September 28, 1988, the State of Illinois submitted a committal SIP for particulate matter with an aerodynamic diameter equal to or less than 10 micrometers (PM_{10}) for the Illinois Group II areas of concern in DuPage, Will, Rock Island, Macon, Randolph, and St. Clair Counties. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM_{10} at 52 FR 24681.

(d) Approval—On June 2, 1995, and January 9, 1996, the State of Illinois submitted a maintenance plan for the particulate matter nonattainment portion of LaSalle County, and requested

that it be redesignated to attainment of the National Ambient Air Quality Standard for particulate matter. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(e) Approval—On March 19, 1996, and October 15, 1996, Illinois submitted requests to redesignate the Granite City Particulate Matter (PM) nonattainment area to attainment status for the PM National Ambient Air Quality Standards (NAAQS), as well as a maintenance plan for the Granite City area to ensure continued attainment of the NAAQS. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(f) On November 14, 1995, May 9, 1996, and June 14, 1996, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (SE Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the SIP revision request as it applies to the McCook PM nonattainment area. For the McCook PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal have been corrected.

(g) Approval—On May 5, 1992, November 14, 1995, May 9, 1996, June 14, 1996, February 3, 1997, October 16, 1997, October 21, 1997, February 1, 1999, and May 19, 1999, Illinois submitted SIP revision requests to meet the Part D particulate matter (PM) nonattainment plan requirements for the Lake Calumet, Granite City and McCook moderate PM nonattainment areas. The submittals include federally enforceable construction permit, application number 93040047, issued on January 11, 1999, to Acme Steel Company. The part D plans for these areas are approved.

(h) Approval—On August 2, 2005, the State of Illinois submitted a request to redesignate the Lyons Township (McCook), Cook County particulate matter nonattainment area to attainment of the NAAQS for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM–10). In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Illinois PM SIP. The redesignation request and maintenance plan meet the redesignation requirements of the Clean Air Act.

(i) Approval—On August 2, 2005, and as supplemented on September 8, 2005, the State of Illinois submitted a request to redesignate the Lake Calumet (Southeast Chicago), Cook County particulate matter nonattainment area to attainment of the NAAQS for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM–10). In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Illinois PM SIP. The redesignation request and maintenance plan meet the redesignation requirements of the Clean Air Act.

(j) *Determination of Attainment.* EPA has determined, as of November 27, 2009, that the Chicago-Gary-Lake County, IL-IN $PM_{2.5}$ nonattainment area has attained the 1997 $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standard for as long as this area continues to meet the 1997 $PM_{2.5}$ NAAQS.

(k) Determination of attainment. EPA has determined, as of May 23, 2011, that the St. Louis (MO-IL) metropolitan 1997 $PM_{2.5}$ nonattainment area has attained the 1997 $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 51.1004(c), suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 $PM_{2.5}$ NAAQS. In addition, based upon review of the air quality data for the 3-year period 2007 to 2009, EPA has determined that the St. Louis (MO-IL) $PM_{2.5}$ nonattainment area has attained the 1997 $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010.

(l) Approval—The 1997 annual $PM_{2.5}$ maintenance plan for the Illinois portion of the Chicago-Gary-Lake County, IL–IN nonattainment area (including Cook, DuPage, Kane, Lake, McHenry and Will Counties, Aux Sable and Goose Lake Townships in Grundy County, and Oswego Township in Kendall County) has been approved as submitted on October 15, 2010, and supplemented on September 16, 2011, and May 6, 2013. The maintenance plan establishes 2008 and 2025 motor vehicle emissions budgets for this area of 127,951 tons per year for NO_X and 5,100 tons per year for primary $PM_{2.5}$ in 2008 and 44,224 tons per year for NO_X and 2,377 tons per year for primary $PM_{2.5}$ in 2025.

(m) Illinois' 2002 NO_X, primary $PM_{2.5}$, SO_2, ammonia, and VOC emission inventories, as submitted on October 15, 2010, and supplemented on May 6, 2013, satisfy the emission inventory requirements of section 172(c)(3) of the Clean Air Act for the Chicago area.

[45 FR 11493, Feb. 21, 1980, as amended at 46 FR 44185, Sept. 3, 1981; 47 FR 26620, June 21, 1982; 48 FR 45246, Oct. 4, 1983; 49 FR 1905, Jan. 16, 1984; 55 FR 20266, May 16, 1990; 61 FR 41345, Aug. 8, 1996; 63 FR 11846, Mar. 11, 1998; 63 FR 47434, Sept. 8, 1998; 64 FR 37851, July 14, 1999; 70 FR 55545, 55549, Sept. 22, 2005; 74 FR 62249, Nov. 27, 2009; 76 FR 29656, May 23, 2011; 77 FR 38184, June 27, 2012; 78 FR 60706, Oct. 2, 2013]

§ 52.726 Control strategy: Ozone.

(a) Part D—Conditional Approval—The Illinois plan is approved provided that the following conditions are satisfied:

(1) [Reserved]

(2) The State conducts a study to demonstrate that the 75 percent overall control efficiency requirement in Rule 205(n) represents RACT, submits the results of the study to USEPA, and submits any necessary regulations representing RACT to the Illinois Pollution Control Board. The State must comply with these conditions by February 28, 1981. Any necessary regulations must be finally promulgated by the State and submitted to USEPA by February 28, 1982.

(3) Extension of Condition—USEPA approves the date of July 31, 1984 for the State of Illinois to satisfy the condition of approval to the ozone State Implementation Plan listed in paragraph (a)(2) of this section.

(b) Disapproval—USEPA disapproves the compliance schedule in Rule 205(j) as it applies to loading rack controls for all emission sources subject to Rule 205(b)(1), as approved by USEPA on May 31, 1972 which were required to be in compliance by December 31, 1973. This disapproval does not in and of itself result in the growth restrictions of section 110(a)(2)(I).

(c) *Negative Declarations—Stationary Source Categories.* The State of Illinois has certified to the satisfaction of USEPA that no sources are located in the nonattainment areas of the State which are covered by the following Control Technique Guidelines:

(1) High density polyethylene and polypropylene manufacturers.

(2) Vegetable oil processing sources with volatile organic compound emissions equal to or greater than 100 tons per year.

(d) Part D Disapproval—The Administrator finds that Illinois' ozone plan for Cook, Lake, DuPage and Kane Counties, which was required to be submitted by July 1, 1982, does not satisfy all the requirements of Part D, Title I of the Clean Air Act and, thus, is disapproved. No major new stationary source, of major modification of a stationary source, or volatile organic compounds may be constructed in Cook, Lake, DuPage or Kane Counties, unless the construction permit application is complete on or before November 16, 1988. This disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Illinois' ozone plan, and they remain approved.

(e) Disapproval—The Administrator finds that the following State rules have not been demonstrated to be consistent with the reasonably available control technology requirements of section 172 of the Clean Air Act, as amended in 1977, and thus, are disapproved: subpart F, section 215.204(c); subpart F, section 215.206(b); subpart F, section 215.204(j)(4); subpart I; subpart AA; subpart PP; subpart QQ; subpart RR; subpart A, section 215.102; subpart T; subpart H, section 215.245; subpart F, section 215.207; and subpart A, section 215.107, all of title 35; Environmental Protection; subtitle B: Air Pollution; Chapter 1: Pollution Control Board of

the Illinois Administrative Code (June 1989).

(f) On September 30, 1992, the State submitted rules regulating volatile organic compound emissions from gasoline dispensing facilities' motor vehicle fuel operations (Stage II vapor recovery rules) in the Chicago ozone nonattainment area. The Illinois Environmental Protection Agency Bureau of Air must as part of the program conduct inspections of facilities subject to this rule to ensure compliance with the applicable rules. These inspections will be conducted on an annual basis or an alternative schedule as approved in the USEPA Fiscal Year Inspection Program Plan.

(g) Approval—The Administrator approves the incorporation of the photochemical assessment ambient monitoring system submitted by Illinois on November 4, 1993, into the Illinois State Implementation Plan. This submittal satisfies 40 CFR 58.20(f) which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS) by November 12, 1993.

(h) Approval—On November 12, 1993, the Illinois Environmental Protection Agency submitted an ozone redesignation request and maintenance plan for Jersey County ozone nonattainment area and requested that Jersey County be redesignated to attainment for ozone. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(d) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Illinois ozone State Implementation Plan for Jersey County.

(i) The base year (1990) ozone emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for the following Illinois ozone nonattainment areas: the Chicago nonattainment area—Cook, DuPage, Kane, Lake, Will and McHenry Counties, Aux Sable and Gooselake Townships in Grundy County, and Oswego Township in Kendall County; the Metro-East St. Louis nonattainment area—Madison, Monroe, and St. Clair Counties; and Jersey County.

(j) Approval—On July 14, 1994, Illinois submitted two of three elements required by section 182(d)(1)(A) of the Clean Air Amendments of 1990 to be incorporated as part of the vehicle miles traveled (VMT) State Implementation Plan intended to offset any growth in emissions from a growth in vehicle miles traveled. These elements are the offsetting of growth in emissions attributable to growth in VMT which was due November 15, 1992, and, transportation control measures (TCMs) required as part of Illinois' 15 percent reasonable further progress (RFP) plan which was due November 15, 1993. Illinois satisfied the first requirement by projecting emissions from mobile sources and demonstrating that no increase in emissions would take place. Illinois satisfied the second requirement by submitting the TCMs listed in Table 1 which are now approved into the Illinois SIP.

(k) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_X) reasonably available control technology (RACT), new source review (NSR), vehicle inspection/maintenance (I/M), and general conformity exemptions for the Illinois portion of the Chicago-Gary-Lake County severe ozone nonattainment area as requested by the States of Illinois, Indiana, Michigan, and Wisconsin in a July 13, 1994 submittal. This approval does not cover the exemption of NO_X transportation conformity requirements of section 176(c) for this area. Approval of these exemptions is contingent on the results of the final ozone attainment demonstration expected to be submitted in mid-1997. The approval will be modified if the final attainment demonstration demonstrates that NO_X emission controls are needed in the nonattainment area to attain the ozone standard in the Lake Michigan Ozone Study modeling domain.

(l) Approval—The United States Environmental Protection Agency is approving under section 182(b)(1) of the Clean Air Act the exemption of the Chicago severe, ozone nonattainment area from the build/no-build and less than-1990 interim transportation conformity oxides of nitrogen requirements as requested by the State of Illinois in a June 20, 1995 submittal. In light of the modeling completed thus far and considering the importance of the OTAG process and attainment plan

modeling efforts, USEPA grants this NO_X waiver on a contingent basis. As the OTAG modeling results and control recommendations are completed in 1996, this information will be incorporated into attainment plans being developed by the LADCO States. When these attainment plans are submitted to USEPA in mid-1997, these new modeling analyses will be reviewed to determine if the NO_X waiver should be continued, altered, or removed. USEPA's rulemaking action to reconsider the initial NO_X waiver may occur simultaneously with rulemaking action on the attainment plans. The USEPA also reserves the right to require NO_X emission controls for transportation sources under section 110(a)(2)(D) of the Act if future ozone modeling demonstrates that such controls are needed to achieve the ozone standard in downwind areas. The Chicago severe ozone nonattainment area includes the Counties of Cook, DuPage, Grundy (Aux Sable and Gooselake Townships), Kane, Kendall (Oswego Township), Lake, McHenry, and Will.

(m) [Reserved]

(n) Negative declaration—Shipbuilding and ship repair industry. On October 11, 1996, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the shipbuilding and ship repair industry are located in the Chicago, Illinois ozone nonattainment area which is comprised of Cook, DuPage, Kane, Lake, McHenry, Will Counties and Aux Sable and Goose Lake Townships in Grundy County and Oswego Township in Kendall County or the Metro-East, Illinois ozone nonattainment area which is comprised of Madison, Monroe, and St. Clair Counties.

(o) Negative declaration—Aerospace manufacturing and rework industry. On October 11, 1996, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Aerospace Manufacturing and Rework Industry are located in the Chicago, Illinois ozone nonattainment area which is comprised of Cook, DuPage, Kane, Lake, McHenry, Will Counties and Aux Sable and Goose Lake Townships in Grundy County and Oswego Township in Kendall County or the Metro-East, Illinois ozone nonattainment area which is comprised of Madison, Monroe, and St. Clair Counties.

(p) Approval—On November 15, 1993, Illinois submitted 15 percent rate-of-progress and 3 percent contingency plans for the Chicago ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. These plans satisfy sections 182(b)(1), 172(c)(9), and 182(c)(9) of the Clean Air Act, as amended in 1990.

(q) Approval—On November 15, 1993, Illinois submitted 15 percent rate-of-progress and 3 percent contingency plans for the Metro-East St. Louis ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. These plans satisfy sections 182(b)(1) and 172(c)(9) of the Clean Air Act, as amended in 1990.

(r) Approval—On November 15, 1993, Illinois submitted the following transportation control measures as part of the 15 percent rate-of-progress and 3 percent contingency plans for the Metro-East ozone nonattainment area: Work trip reductions; transit improvements; and traffic flow improvements.

(s) On October 10, 1997, Illinois submitted a site-specific revision to the State Implementation Plan, in the form of a letter from Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency. This October 10, 1997, letter requests a change in regulatory status for Riverside Laboratories, Inc.'s Kane County facility, to reflect that the Federal site-specific rule for Riverside (40 CFR 52.741(e)(10)) has been superseded by the State of Illinois regulations, including the emission limits in 35 Illinois Administrative Code 218.204(c) and the associated control requirements, test methods and recordkeeping requirements in Part 218 and the associated definitions in part 211. These State regulations shall become the federally approved regulations applicable to Riverside on August 31, 1998. The site-specific rule, applicable to Riverside, promulgated by the Environmental Protection Agency on August 21, 1995 (40 CFR 52.741(e)(10)), remains in effect and is enforceable after

August 31, 1998 for the period before August 31, 1998.

(t) The Illinois volatile organic compound (VOC) rules that apply to the Stepan Company Millsdale Plant for volatile organic liquid storage (35 Ill. Admin. Code Part 218, Subpart B), batch processing (35 Ill. Admin. Code Parts 218 and 219, Subpart V) and continuous reactor and distillation processes (35 Ill. Admin. Code Part 218, Subpart Q) were approved by the United States Environmental Protection Agency (USEPA) on August 8, 1996, April 2, 1996, and June 17, 1997, respectively. Because these rules have been approved into the State Implementation Plan and represent reasonably available control technology for VOC, USEPA revokes the June 29, 1990 Federal Implementation Plan as it applies to Stepan and replaces it with Illinois' volatile organic liquid storage, batch process, and continuous reactor and distillation process rules.

(u) Negative declaration—Industrial wastewater category. On October 2, 1998, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial wastewater category are located in the Metro-East ozone nonattainment area (Metro-East). The Metro-East area is comprised of Madison, Monroe and St. Clair Counties which are located in southwest Illinois, adjacent to St. Louis, Missouri.

(v) Negative declaration—Industrial cleaning solvents category. On October 2, 1998, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial cleaning solvents category are located in the Metro-East ozone nonattainment area (Metro-East). The Metro-East area is comprised of Madison, Monroe and St. Clair Counties which are located in southwest Illinois, adjacent to St. Louis, Missouri.

(w) *Approval*—On December 18, 1997, December 17, 1999, January 14, 2000, and January 21, 2000, Illinois submitted a post-1996 Rate Of Progress Plan for the Chicago ozone nonattainment area as a requested revision to the Illinois State Implementation Plan. This plan reduces ozone precursor emissions by 9 percent from 1990 baseline emissions by November 15, 1999. This plan also supports a mobile source emissions budget of 279.3 tons/day of volatile organic compounds for transportation conformity purposes.

(x) *Approval*—On December 18, 1997, Illinois submitted a contingency measure plan as part of the Chicago Area post-1996 Rate of Progress Plan. This plan reduces volatile organic compound emissions in the Chicago ozone nonattainment area by 3 percent from 1990 baseline emissions by November 15, 1999.

(y) *Approval*—On December 18, 1997, Illinois submitted Transportation Control Measures (TCMs) as part of the post-1996 Rate Of Progress Plan for the Chicago ozone nonattainment area. The TCMs being approved are listed in the following documents published by the Chicago Area Transportation Study: ''Transportation Control Measures Contribution to the Post-1996 Rate-Of-Progress State Implementation Plan,'' March 22, 1996; ''Transportation Control Measures Contribution to the 9 percent Control Strategy State Implementation Plan,'' June 11, 1998; and ''1999 Transportation Control Measures Contribution to the 9 percent Rate of Progress Control Strategy State Implementation Plan,'' December 9, 1999.

(z) Negative declaration—Industrial cleaning solvents category. On December 23, 1999, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the industrial cleaning solvents category are located in the Chicago ozone nonattainment area. The Chicago ozone nonattainment area includes Cook County, DuPage County, Aux Sable and Goose Lake Townships in Grundy County, Kane County, Oswego Township in Kendall County, Lake County, McHenry County and Will County.

(aa) Negative declaration—Industrial wastewater category. On December 23, 1999, the State of Illinois certified to the satisfaction of the United States Environmental Protection Agency that no major sources categorized as part of the Industrial Wastewater Category

are located in the Chicago ozone nonattainment area. The Chicago ozone nonattainment area includes Cook County, DuPage County, Aux Sable and Goose Lake Townships in Grundy County, Kane County, Oswego Township in Kendall County, Lake County, McHenry County and Will County.

(bb) Approval—Revisions to the SIP submitted by Illinois on November 15, 1999; February 10, 2000; April 13, 2001; and April 30, 2001. The revisions are for the purpose of satisfying the attainment demonstration requirements of section 182(c)(2)(A) of the Act for the Metro-East St. Louis area. The revision establishes an attainment date of November 15, 2004, for the St. Louis moderate ozone nonattainment area. This revision establishes MVEBs for 2004 of 26.62 TPD of VOC and 35.52 TPD of NO_X to be used in transportation conformity in the Metro-East St. Louis area until revised budgets pursuant to MOBILE6 are submitted and found adequate. In the revision, Illinois commits to revise its VOC and NO_X transportation conformity budgets within two years of the release of MOBILE6. No conformity determinations will be made during the second year following the release of MOBILE6 unless and until the MVEBs have been recalculated using MOBILE6 and found adequate by EPA. EPA is granting a waiver for the Metro East St. Louis area to the state of Illinois from the NO_X RACT requirements of the Act and disapproving the request for a waiver from the NO_X NSR and NO_X general conformity requirements. EPA is finding that the Contingency Measures identified by Illinois are adequate to meet the requirements of the Act. EPA finds that the Illinois SIP meets the requirements pertaining to RACM under the Act for the Metro-East St. Louis area.

(cc) Approval—Illinois has adopted and USEPA has approved sufficient NO_X emission regulations to assure that it will achieve the level of NO_X emissions budgeted for the State by USEPA. USEPA has made two minor budget revisions requested by Illinois, adding a boiler owned by LTV Steel and deleting a boiler owned by the University of Illinois from the inventory of large NO_X sources.

(dd) Chicago Ozone Attainment Demonstration Approval—On December 26, 2000, Illinois submitted a one-hour ozone attainment demonstration plan as a requested revision to the Illinois State Implementation Plan. This plan includes: A modeled demonstration of attainment and associated attainment year conformity emission budgets; a plan to reduce ozone precursor emissions by 3 percent per year from 2000 to 2007 (a post-1999 rate-of-progress plan), and associated conformity emission budgets; a contingency measures plan for both the ozone attainment demonstration and the post-1999 rate-of-progress plan; a commitment to conduct a Mid-Course Review of the ozone attainment demonstration by the end of 2004; a demonstration that Illinois has implemented all reasonably available control measures; and a commitment to revise motor vehicle emission budgets within two years after the U.S. Environmental Protection Agency officially releases the MOBILE6 emission factor model.

(ee) Approval of the Maintenance Plan for the Illinois Portion of the St. Louis Area—On December 30, 2002 Illinois submitted Maintenance Plan for the Illinois portion of the St. Louis Nonattainment Area. The plan includes 2014 On-Road Motor Vehicle Emission Budget of 10.13 tons per ozone season weekday of VOCs and 18.72 tons per ozone season weekday NO_X to be used in transportation conformity.

(ff) Approval—On April 11, 2003, Illinois submitted a revision to the ozone attainment plan for the Chicago severe 1-hour ozone nonattainment area. This plan revised the 2005 and 2007 Motor Vehicle Emissions Budgets (MVEB) recalculated using the emissions factor model MOBILE6. The approved motor vehicle emissions budgets are 151.11 tons per day VOC for 2005 and 127.42 tons per day VOC and 280.4 tons per day NO_X for 2007.

(gg) Approval—On January 30, 2007, the Illinois Environmental Protection Agency (IEPA) requested that EPA find that the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) nonattainment area, attained the revoked 1-hour ozone National Ambient Air Quality Standard

(NAAQS). After review of this submission, EPA approves this finding.

(hh) *Disapproval.* EPA is disapproving 35 Illinois Administrative Code part 217, subpart X, Voluntary NO_X Emissions Reduction Program, as a revision to the Illinois SIP.

(ii) *Approval.* EPA is approving a July 29, 2010, request from the State of Illinois for a waiver from the Clean Air Act requirement for Oxides of Nitrogen (NOx) Reasonably Available Control Technology (RACT) in the Illinois portions of the Chicago-Gary-Lake County, Illinois-Indiana (Cook, DuPage, Kane, Lake, McHenry, and Will Counties, and portions of Grundy (Aux Sable and Goose Lake Townships) and Kendall (Oswego Township) Counties in Illinois) and St. Louis, Missouri-Illinois (Jersey, Madison, Monroe, and St. Clair Counties in Illinois) 1997 8-hour ozone nonattainment areas.

(jj) *Determination of attainment.* On June 5, 2009, the state of Indiana requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). After review of Indiana's submission and 2006–2008 ozone air quality data for this ozone nonattainment area, EPA finds that the entire Chicago-Gary-Lake County, IL-IN area has attained the 1997 8-hour ozone NAAQS. Therefore, EPA has determined, as of March 12, 2010, that Cook, DuPage, Kane, Lake, McHenry, and Will Counties, and portions of Grundy County (Aux Sable and Goose Lake Townships) and Kendall County (Oswego Township) in Illinois have attained the 1997 8-hour ozone standard.

(kk) *Determination of attainment.* EPA has determined, as of June 9, 2011, that the St. Louis (MO-IL) metropolitan 1997 8-hour ozone nonattainment area has attained the 1997 8-hour ozone NAAQS. This determination, in accordance with 40 CFR 51.918, suspends the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 Ozone NAAQS. In addition, based upon EPA's review of the air quality data for the 3-year period 2007 to 2009, the St. Louis (MO-IL) ozone nonattainment area has attained the 1997 8-hour ozone NAAQS by the applicable attainment date of June 15, 2010.

(ll) *Approval*—On May 26, 2010, and September 16, 2011, Illinois submitted a request to redesignate the Illinois portion of the St. Louis, MO–IL area to attainment of the 1997 8-hour ozone standard. The St. Louis area includes Jersey, Madison, Monroe, and St. Clair Counties in Illinois and St. Louis City and Franklin, Jefferson, St. Charles and St. Louis Counties in Missouri. As part of the redesignation request, the State submitted a plan for maintaining the 1997 8-hour ozone standard through 2025 in the area as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes 2008 motor vehicle emissions budgets for the Illinois portion of the St. Louis area of 17.27 tpd for volatile organic compounds (VOC) and 52.57 tpd for nitrogen oxides (NO_X). In addition the maintenance plan establishes 2025 motor vehicle emissions budgets for the Illinois portion of the St. Louis area of 5.68 tpd for VOC and 15.22 tpd for NO_X.

(mm) *Emissions inventories for the 1997 8-hour ozone standard—*

(1) *Approval*—Illinois' 2002 emissions inventory satisfies the emissions inventory requirements of section 182(a)(1) of the Clean Air Act for the Illinois portion of the St. Louis, MO–IL area under the 1997 8-hour ozone standard.

(2) Approval—Illinois' 2002 volatile organic compounds and nitrogen oxides emission inventories satisfy the emissions inventory requirements of section 182(a)(1) of the Clean Air Act for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area under the 1997 8-hour ozone standard.

(nn) Approval—On July 23, 2009, and September 16, 2011, Illinois submitted a request to redesignate the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area to attainment of

the 1997 8-hour ozone standard. The Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area includes Cook, DuPage, Kane, Lake, McHenry, and Will Counties and portions of Grundy (Aux Sable and Goose Lake Townships) and Kendall (Oswego Township) Counties. As part of the redesignation request, the State submitted a plan for maintaining the 1997 8-hour ozone standard through 2025 in the area as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes 2008 motor vehicle emissions budgets for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area of 117.23 tons per day (tpd) for volatile organic compounds (VOC) and 373.52 tpd for nitrogen oxides (NO_X). In addition, the maintenance plan establishes 2025 motor vehicle emissions budgets for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area of 48.13 tpd for VOC and 125.27 tpd for NO_X.

(oo) Approval—On March 28, 2014, the State of Illinois submitted a revision to its State Implementation Plan for the Illinois portion of the Chicago-Gary-Lake County, Illinois-Indiana area (the Greater Chicago Area). The submittal established new Motor Vehicle Emissions Budgets (MVEB) for Volatile Organic Compounds (VOC) and Oxides of Nitrogen (NO_X) for the year 2025. The MVEBs for the Illinois portion of the Greater Chicago Area are: 60.13 tons/day of VOC emissions and 150.27 tons/day of NO_X emissions for the year 2025.

(pp) On September 3, 2014, Illinois submitted 2011 volatile organic compounds and oxides of nitrogen emission inventories for the Illinois portions of the Chicago-Naperville, Illinois-Indiana-Wisconsin and St. Louis, Missouri-Illinois nonattainment areas for the 2008 ozone national ambient air quality standard as a revision of the Illinois state implementation plan. The emission inventories are approved as a revision of the state's implementation plan.

(qq) *Determination of attainment.* As required by section 181(b)(2)(A) of the Clean Air Act, EPA has determined that the St. Louis, MO-IL marginal 2008 ozone nonattainment area has attained the NAAQS by the applicable attainment date of July 20, 2016.

[45 FR 55197, Aug. 19, 1980]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.726, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.727 [Reserved]

§ 52.728 Control strategy: Nitrogen dioxide. [Reserved]

§ 52.729 [Reserved]

§ 52.730 Compliance schedules.

(a) The requirements of § 51.262(a) of this chapter are not met since compliance schedules with adequate increments of progress have not been submitted for every source for which they are required.

(b) Federal compliance schedules. (1) Except as provided in paragraph (b)(3) of this section, the owner or operator of any stationary source subject to the following emission limiting regulations in the Illinois implementation plan shall comply with the applicable compliance schedule in paragraph (b)(2) of this section: Illinois Air Pollution Control Regulations Rule 203(d)(4), 203(d)(6)(B)(ii)(bb), 203(g)(1)(B), 203(g)(2), 203(g)(3), 203(g)(4), 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(2) *Compliance schedules.* (i) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulation Rule 203(d)(4) shall take the following actions with respect to the source no later than the date specified.

(*a*) September 30, 1973—Advertise for bids for purchase and construction or installation of equipment, or for materials requisite for process modification sufficient to control particulate emissions from the source.

(*b*) November 15, 1973—Award contracts for emission control systems or process modification, or issue orders for the purchase of component parts to accomplish emission control or process modification.

(*c*) May 31, 1974—Initiate onsite construction or installation of emission control system or process modification.

(*d*) March 31, 1975—Complete onsite construction or installation of emission system or process modification.

(*e*) May 31, 1975—Complete shakedown operation and performance test on source, submit performance test results to the Administrator; achieve full compliance with State agency regulation.

(ii) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulation Rule 203(d)(6)(B)(ii)(bb) shall take the following actions with respect to the source no later than the date specified.

(*a*) September 30, 1973—Advertise for bids for purchase and construction or for modification of equipment sufficient to control particulate emissions from the source.

(*b*) November 15, 1973—Award contracts for emissions control systems or process modification, or issue orders for the purchase of component parts to accomplish emission control or process modification.

(*c*) March 31, 1974—Initiate onsite construction or installation of emission control system.

(*d*) October 31, 1974—Complete onsite construction or installation of emission control system.

(*e*) December 31, 1974—Achieve final compliance with Illinois Air Pollution Control Regulations Rule 203(d)(6)(B)(ii)(bb).

(iii) (*a*) The owner or operator of any boiler or furnace of more than 250 million BTU per hour heat input subject to Illinois Air Pollution Control Regulation Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e) shall notify the Administrator, no later than October 1, 1973, of his intent to utilize either low-sulfur fuel or stack gas desulfurization to the requirements of said regulation.

(*b*) Any owner or operator of a stationary source subject to paragraph (b)(2)(iii)(*a*) of this section who elects to utilize low sulfur fuel shall take the following actions with respect to the source no later than the date specified.

(*1*) November 1, 1973—Submit to the Administrator a projection of the amount of fuel, by types, that will be substantially adequate to enable compliance with Illinois Air Pollution Control Regulations Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e) on May 31, 1975, and for at least one year thereafter.

(*2*) December 31, 1973—Sign contracts with fuel suppliers for fuel requirements as projected above.

(*3*) January 31, 1974—Submit a statement as to whether boiler modifications will be required. If modifications will be required, submit plans for such modifications.

(*4*) March 15, 1974—Let contracts for necessary boiler modifications, if applicable.

(*5*) June 15, 1974—Initiate onsite modifications, if applicable.

(*6*) March 31, 1975—Complete onsite modifications, if applicable.

(*7*) May 31, 1975—Final compliance with the emission limitation of Rules 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(*c*) Any owner or operator of a fuel combustion source subject to paragraph (b)(2)(iii)(*a*) of this section who elects to utilize stack gas desulfurization shall take the following actions with respect to the source no later than the date specified.

(*1*) November 1, 1973—Let necessary contracts for construction.

(*2*) March 31, 1974—Initiate onsite construction.

(*3*) March 31, 1975—Complete onsite construction.

(*4*) May 31, 1975—Complete shakedown operations and performance test on source, submit performance test results to the Administrator; achieve full compliance with Rule 204(c)(1)(A), 204(c)(2), 204(d), and 204(e).

(iv) (*a*) The owner or operator of any stationary source subject to Illinois Air Pollution Control Regulations Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4) shall notify the Administrator, no later than October 1, 1973, of his intent to utilize either low ash fuel or a stack gas cleaning system to meet the requirements of said regulation.

(*b*) Any owner or operator of a stationary source subject to paragraph (b)(2)(iv)(*a*) of this section who elects to utilize low ash fuel shall take the following actions with respect to the source no later than the date specified.

(*1*) November 1, 1973—Submit to the Administrator a projection of the amount of fuel, by types, that will be

substantially adequate to enable compliance with Illinois Air Pollution Control Regulations Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4) on May 31, 1975, and for at least one year thereafter.

(*2*) December 31, 1973—Sign contracts with fuel suppliers for fuel requirements as projected above.

(*3*) January 31, 1974—Submit a statement as to whether boiler modifications will be required. If modifications will be required, submit plans for such modifications.

(*4*) March 15, 1974—Let contracts for necessary boiler modifications, if applicable.

(*5*) June 15, 1974—Initiate onsite modifications, if applicable.

(*6*) March 31, 1975—Complete onsite modifications, if applicable.

(*7*) May 31, 1975—Final compliance with the emission limitation of Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4).

(*c*) Any owner or operator of a stationary source subject to paragraph (b)(2)(iv)(*a*) of this section who elects to utilize a stack gas cleaning system shall take the following actions with respect to the source no later than the date specified.

(*1*) January 15, 1974—Let necessary contracts for construction.

(*2*) April 1, 1974—Initiate onsite construction.

(*3*) April 1, 1975—Complete onsite construction.

(*4*) May 31, 1975—Complete shakedown operations and performance tests on source, submit performance test results to the Administrator; achieve full compliance with Rule 203(g)(1)(B), 203(g)(2), 203(g)(3), and 203(g)(4).

(v) Ten days prior to the conduct of any performance test required by this paragraph, the owner or operator of the affected source shall give notice of such test to the Administrator to afford him the opportunity to have an observer present.

(vi) Any owner or operator subject to a compliance schedule above shall certify to the Administrator, within five days after the deadline for each increment of progress in that schedule, whether or not the increment has been met.

(3)(i) None of the above paragraphs shall apply to a source which is presently in compliance with applicable regulations and which has certified such compliance to the Administrator by October 1, 1973. The Administrator may request whatever supporting information he considers necessary for proper certification.

(ii) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(iii) Any owner or operator subject to a compliance schedule in this paragraph may submit to the Administrator no later than October 1, 1973, a proposed alternative compliance schedule. No such compliance schedule may provide for final compliance after the final compliance date in the applicable compliance schedule of this paragraph. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(4) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraph (b)(2) of this section fail to satisfy the requirements of §§ 51.261 and 51.262(a) of this chapter.

(c) [Reserved]

(d) The compliance schedules for the sources identified below are disapproved as not meeting the requirements of subpart N of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

§ 52.731 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is

the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

(3) Notwithstanding the provisions of paragraph (b)(2) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (b)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[77 FR 75384, Dec. 20, 2012, as amended at 81 FR 74586 and 74594, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.732 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Illinois and for which requirements are set forth under the CSAPR SO_2 Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Illinois' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39, except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Illinois' SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011. Redesignated at 77 FR 10334, Feb. 21, 2012, as amended at 81 FR 74586, Oct. 26, 2016]

§§ 52.733–52.735 [Reserved]

§ 52.736 Review of new sources and modifications.

(a) [Reserved]

(b) The rules submitted by the State on March 24, 1988, to satisfy the requirements of the Clean Air Act are approved. These rules are part 203: Major Stationary Sources Construction and Modification as effective March 22, 1991. The moratorium on construction and modification of new sources in nonattainment areas as provided in section 110(a)(2)(I) of the Clean Air Act is revoked.

[57 FR 59935, Dec. 17, 1992]

§ 52.737 Operating permits.

Emission limitation and other provisions contained in operating permits issued by the State in accordance with the provisions of the federally approved permit program shall be the applicable requirements of the federally approved Illinois SIP for the purpose of section 113 of the Clean Air Act and shall be enforceable by USEPA and by any person in the same manner as other requirements of the SIP. USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures, and be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations.

[57 FR 59936, Dec. 17, 1992]

§ 52.738 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) *Regulations for preventing significant deterioration of air quality.* The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Illinois.

(c) All applications and other information required pursuant to § 52.21 from sources located in the State of Illinois shall be submitted to the state agency, Illinois Environmental Protection Agency, 1021 North Grand Avenue East, Springfield, Illinois 62794.

[45 FR 52741, Aug. 7, 1980, as amended at 46 FR 9584, Jan. 29, 1981; 68 FR 11323, Mar. 10, 2003; 68 FR 74489, Dec. 24, 2003; 75 FR 55275, Sept. 10, 2010]

§ 52.739 Permit fees.

(a) The requirements of section 110(a)(2)(K) of the Clean Air Act as amended in 1977 are not met since the state has not submitted to EPA, as a part of its State Implementation Plan, provisions for a permit fee system.

[46 FR 23237, Apr. 24, 1981]

§ 52.740 Interstate pollution.

(a) The requirements of section 126(a)(2) of the Clean Air Act as amended in 1977 are not met since the state has not submitted to EPA, as a part of its State Implementation Plan, the procedures on which the state is relying to notify nearby states of any proposed major stationary source which may significantly contribute to levels of air pollution in excess of the National Ambient Air Quality Standards in that state.

[46 FR 23237, Apr. 24, 1981]

§ 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will Counties.

(a) *General Provisions*—(1) *Abbreviations and conversion factors.* (i) The following abbreviations are used in § 52.741:

ASTM American Society for Testing and Materials
bbl barrels (42 gallons)
°C degrees Celsius or centigrade
cm centimeters
cu in. cubic inches
°F degrees Fahrenheit
FIP Federal implementation plan
ft feet
ft^2 square feet
g grams
gpm gallons per minute
g/mole grams per mole

sq cm square centimeters
sq in square inches
USEPA United States Environmental Protection Agency
VOC volatile organic compounds
VOL volatile organic liquids
VOM volatile organic materials

(ii) The following conversion factors are used in § 52.741.

English	Metric
1 gal	3.785 l.
1,000 gal	3,785 l or 3.785 m^3.
1 psia	6.897 kPa (51.71 mm Hg).
2.205 lbs	1 kg.
1 bbl	159.0 l.
1 cu in	16.39 ml.
1 lb/gal	119,800 mg/l.
1 ton	0.907 Mg.

(2) *Applicability.* (i) Any source that received a stay, as indicated in § 218.103(a)(2), remains subject to the stay if still in effect, or (if the stay is no longer in effect) the federally-promulgated or federally-approved rule applicable to such source.

(ii)(A) Effective November 20, 1996 Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, and Part 218: Organic Material Emission Standards and Limitations for the Chicago Area replace the requirements of 40 CFR 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will County as the federally enforceable control measures in these counties for the major non-Control Technique Guideline (CTG) sources in the Chicago area, previously subject to paragraph u, v, w, or x because of the applicability criteria in these paragraphs.

(B) In accordance with § 218.101(b), for the major non-CTG sources subject to paragraphs u, v, w, or x because of the applicability criteria of those paragraphs, the requirements of paragraphs u, v, w, and x, and the recordkeeping requirements in paragraph y and any related parts of § 52.741 necessary to implement these paragraphs (including, but not limited to, those paragraphs containing test methods and definitions), shall remain in effect and are enforceable after November 20, 1996 for the period from July 30, 1990 until November 20, 1996.

(iii)(A) Except as provided in paragraphs (a)(2) (i) and (ii) of this section, effective October 11, 1994, Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, and Part 218: Organic Material Emission Standards and Limitations for the Chicago Area replace the requirements of this § 52.741 Control strategy: Ozone control measures for Cook, DuPage, Kane, Lake, McHenry and Will County as the federally enforceable control measures in these counties.

(B) In accordance with § 218.101(b), the requirements of § 52.741 shall remain in effect and are enforceable after October 11, 1994, for the period from July 30, 1990, to October 11, 1994.

(3) *Definitions.* The following terms are defined for the purpose of § 52.741.

NOTE: The Federal definitions supersede the State definitions for these terms, which were previously approved by USEPA as part of the SIP. The federally approved definitions for all other terms remain in effect and applicable to these Federal rules.

Accelacota means a pharmaceutical coating operation which consists of a horizontally rotating perforated drum in which tablets are placed, a coating is applied by spraying, and the coating is dried by the flow of air across the drum through the perforations.

Accumulator means the reservoir of a condensing unit receiving the condensate from a surface condenser.

Actual emissions means the actual quantity of VOM emissions from an emission source during a particular time period.

Adhesive means any substance or mixture of substances intended to serve as a joining compound.

Administrator means the Administrator of the USEPA or that person's designee.

Afterburner means a control device in which materials in gaseous effluent are combusted.

Air contaminant means any solid, liquid, or gaseous matter, any odor, or any form of energy, that is capable of being released into the atmosphere from an emission source.

Air dried coatings means any coatings that dry by use of air or forced air at temperatures up to 363.15 K (194 °F).

Air pollution means the presence in the atmosphere of one or more air contaminants in sufficient quantities and of such characteristics and duration as to be injurious to human, plant, or animal life, to health, or to property, or to unreasonably interfere with the enjoyment of life or property.

Air pollution control equipment means any equipment or facility of a type intended to eliminate, prevent, reduce or control the emission of specified air contaminants to the atmosphere.

Air suspension coater/dryer means a pharmaceutical coating operation which consists of vertical chambers in which tablets or particles are placed, and a coating is applied and then dried while the tablets or particles are kept in a fluidized state by the passage of air upward through the chambers.

Air-assisted airless spray means a spray coating method which combines compressed air with hydraulic pressure to atomize the coating material into finer droplets than is achieved with pure airless spray. Lower hydraulic pressure is used than with airless spray.

Airless spray means a spray coating method in which the coating is atomized by forcing it through a small opening at high pressure. The coating liquid is not mixed with air before exiting from the nozzle.

Allowable emissions means the quantity of VOM emissions during a particular time period from a stationary source calculated using the maximum rated capacity of the source (unless restricted by federally enforceable limitations on operating rate, hours of operation, or both) and the most stringent of:

(A) The applicable standards in 40 CFR parts 60 and 61:

(B) The applicable implementation plan; or

(C) A federally enforceable permit.

Ambient air quality standards means those standards designed to protect the public health and welfare codified in 40 CFR part 50 and promulgated from time to time by the USEPA pursuant to authority contained in Section 108 of the Clean Air Act, 42 U.S.C. 7401 *et seq.*, as amended from time to time.

Applicator means a device used in a coating line to apply coating.

As applied means the exact formulation of a coating during application on or impregnation into a substrate.

Asphalt means the dark-brown to black cementitious material (solid, semisolid, or liquid in consistency) of which the main constituents are bitumens which occur naturally or as a residue of petroleum refining.

Automobile means a motor vehicle capable of carrying no more than 12 passengers.

Automobile or light-duty truck assembly plant means a facility where parts are assembled or finished for eventual inclusion into a finished automobile or light-duty truck ready for sale to vehicle dealers, but not including customizers, body shops, and other repainters.

Automobile or light-duty truck refinishing means the repainting of used automobiles and light-duty trucks.

Baked coatings means any coating which is cured or dried in an oven where the oven air temperature exceeds 90 °C (194 °F).

Binders means organic materials and resins which do not contain VOM's.

Bituminous coatings means black or brownish coating materials which are soluble in carbon disulfide, which consist mainly of hydrocarbons, and which are obtained from natural deposits or as residues from the distillation of crude oils or of low grades of coal.

Brush or wipe coating means a manual method of applying a coating using a brush, cloth, or similar object.

Bulk gasoline plant means a gasoline storage and distribution facility with an average throughput of 76,000 l (20,000 gal) or less on a 30-day rolling average that distributes gasoline to gasoline dispensing facilities.

Can means any metal container, with or without a top, cover, spout or handles, into which solid or liquid materials are packaged.

Can coating means any coating applied on a single walled container that is manufactured from metal sheets thinner than 29 gauge (0.0141 in.).

Can coating facility means a facility that includes one or more can coating line(s).

Can coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of cans or can components.

Capture means the containment or recovery of emissions from a process for direction into a duct which may be exhausted through a stack or sent to a control device. The overall abatement of emissions from a process with an add-on control device is a function both of the capture efficiency and of the control device.

Capture device means a hood, enclosed room floor sweep or other means of collecting solvent or other pollutants into a duct. The pollutant can then be directed to a pollution control device such as an afterburner or carbon adsorber. Sometimes the term is used loosely to include the control device.

Capture efficiency means the fraction of all VOM generated by a process that are directed to an abatement or recovery device.

Capture system means all equipment (including, but not limited to, hoods, ducts, fans, ovens, dryers, etc.) used to contain, collect and transport an air pollutant to a control device.

Clean Air Act means the Clean Air Act of 1963, as amended, including the Clean Air Act Amendments of 1977, (42 U.S.C. 7401 *et seq.*).

Clear coating means coatings that lack color and opacity or are transparent using the undercoat as a reflectant base or undertone color.

Clear topcoat means the final coating which contains binders, but not opaque pigments, and is specifically formulated to form a transparent or translucent solid protective film.

Closed vent system means a system that is not open to the atmosphere and is composed of piping, connections, and, if necessary, flow inducing devices that transport gas or vapor from an emission source to a control device.

Coating means a material applied onto or impregnated into a substrate for protective, decorative, or functional purposes. Such materials include, but are not limited to, paints, varnishes, sealers, adhesives, thinners, diluents, and inks.

Coating applicator means equipment used to apply a coating.

Coating line means an operation consisting of a series of one or more coating applicators and any associated flash-off areas, drying areas, and ovens wherein a surface coating is applied, dried, or cured. (It is not necessary for an operation to have an oven, or flash-off area, or drying area to be included in this definition.)

Coating plant means any plant that contains one or more coating line(s).

Coil means any flat metal sheet or strip that is rolled or wound in concentric rings.

Coil coating means any coating applied on any flat metal sheet or strip that comes in rolls or coils.

Coil coating facility means a facility that includes one or more coil coating line(s).

Coil coating line means a coating line in which any protective, decorative or functional coating is applied onto the surface of flat metal sheets, strips, rolls, or coils for industrial or commercial use.

Cold cleaning means the process of cleaning and removing soils from surfaces by spraying, brushing, flushing, or immersion while maintaining the organic solvent below its boiling point.

Wipe cleaning is not included in this definition.

Component means, with respect to synthetic organic chemical and polymer manufacturing equipment, and petroleum refining and related industries, any piece of equipment which has the potential to leak VOM including, but not limited to, pump seals, compressor seals, seal oil degassing vents, pipeline valves, pressure relief devices, process drains, and open ended pipes. This definition excludes valves which are not externally regulated, flanges, and equipment in heavy liquid service. For purposes of paragraph (i) of this section, this definition also excludes bleed ports of gear pumps in polymer service.

Concrete curing compounds means any coating applied to freshly poured concrete to retard the evaporation of water.

Condensate means volatile organic liquid separated from its associated gases, which condenses due to changes in the temperature or pressure and remains liquid at standard conditions.

Continuous process means, with respect to polystyrene resin, a method of manufacture in which the styrene raw material is delivered on a continuous basis to the reactor in which the styrene is polymerized to polystyrene.

Control device means equipment (such as an afterburner or adsorber) used to remove or prevent the emission of air pollutants from a contaminated exhaust stream.

Control device efficiency means the ratio of pollution prevented by a control device and the pollution introduced to the control device, expressed as a percentage.

Conveyorized degreasing means the continuous process of cleaning and removing soils from surfaces utilizing either cold or vaporized solvents.

Crude oil means a naturally occurring mixture which consists of hydrocarbons and sulfur, nitrogen, or oxygen derivatives of hydrocarbons and which is a liquid at standard conditions.

Crude oil gathering means the transportation of crude oil or condensate after custody transfer between a production facility and a reception point.

Custody transfer means the transfer of produced petroleum and/or condensate after processing and/or treating in the producing operations, from storage tanks or automatic transfer facilities to pipelines or any other forms of transportation.

Daily-weighted average VOM content means the average VOM content of two or more coatings as applied on a coating line during any day, taking into account the fraction of total coating volume that each coating represents, as calculated with the following equation:

$$VOM_w = \left[\frac{\sum_{i=1}^{n} V_i C_i}{V_T} \right]$$

Where:

VOM_w = The average VOM content of two or more coatings as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

n = The number of different coatings as applied each day on a coating line,

V_i = The volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of l (gal).

C_i = The VOM content of each coating as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

V_T = The total volume of all coatings (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of l (gal).

Day means the consecutive 24 hours beginning at 12 a.m. (midnight) local time.

Degreaser means any equipment or system used in solvent cleaning.

Delivery vessel means any tank truck or trailer equipped with a storage tank that is used for the transport of gasoline to a stationary storage tank at a gasoline dispensing facility, bulk gasoline plant, or bulk gasoline terminal.

Dip coating means a method of applying coatings in which the part is submerged in a tank filled with the coating.

Drum means any cylindrical metal shipping container of 13- to 110-gallon capacity.

Electrostatic bell or disc spray means an electrostatic spray coating method in which a rapidly-spinning bell- or disc-shaped applicator is used to create a fine mist and apply the coating with high transfer efficiency.

Electrostatic spray means a spray coating method in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the object due to the electrostatic potential between them.

Emission source and source mean any facility from which VOM is emitted or capable of being emitted into the atmosphere.

Enamel means a coating that cures by chemical cross-linking of its base resin. Enamels can be distinguished from lacquers because enamels are not readily resoluble in their original solvent.

Enclose means to cover any VOL surface that is exposed to the atmosphere.

End sealing compound coat means a compound applied to can ends which functions as a gasket when the end is assembled onto the can.

Excessive release means a discharge of more than 295 g (0.65 lbs) of mercaptans and/or hydrogen sulfide into the atmosphere in any 5-minute period.

Exterior base coat means a coating applied to the exterior of a can body, or flat sheet to provide protection to the metal or to provide background for any lithographic or printing operation.

Exterior end coat means a coating applied to the exterior end of a can to provide protection to the metal.

External-floating roof means a cover over an open top storage tank consisting of a double deck or pontoon single deck which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

Extreme environmental conditions means exposure to any or all of the following: ambient weather conditions; temperatures consistently above 95 °C (203 °F); detergents; abrasive and scouring agents; solvents; or corrosive atmospheres.

Extreme performance coating means any coating which during intended use is exposed to extreme environmental conditions.

Fabric coating means any coating applied on textile fabric. Fabric coating includes the application of coatings by impregnation.

Fabric coating facility means a facility that includes one or more fabric coating lines.

Fabric coating line means a coating line in which any protective, decorative, or functional coating or reinforcing material is applied on or impregnated into a textile fabric.

Federally enforceable means all limitations and conditions which are enforceable by the Administrator including those requirements developed pursuant to 40 CFR parts 60 and 61; requirements within any applicable implementation plan; and any permit requirements established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR part 51 subpart I and 40 CFR 51.166.

Final repair coat means the repainting of any topcoat which is damaged during vehicle assembly.

Firebox means the chamber or compartment of a boiler or furnace in which materials are burned, but not the combustion chamber or afterburner of an incinerator.

Fixed-roof tank means a cylindrical shell with a permanently affixed roof.

Flexographic printing means the application of words, designs, and pictures to a substrate by means of a roll printing technique in which the pattern to be applied is raised above the printing roll and the image carrier is made of elastomeric materials.

Flexographic printing line means a printing line in which each roll printer uses a roll with raised areas for applying an image such as words, designs, or pictures to a substrate. The image carrier on the roll is made of rubber or other elastome

Floating roof means a roof on a stationary tank, reservoir, or other container which moves vertically upon change in volume of the stored material.

Fountain solution means the solution which is applied to the image plate to

maintain hydrophilic properties of the non-image areas.

Fuel combustion emission source means any furnace, boiler, or similar equipment used for the primary purpose of producing heat or power by indirect heat transfer.

Fuel gas system means a system for collection of refinery fuel gas including, but not limited to, piping for collecting tail gas from various process units, mixing drums and controls, and distribution piping.

Gas/gas method means either of two methods for determining capture which rely only on gas phase measurements. The first method requires construction of a temporary total enclosure (TTE) to ensure that all would-be fugitive emissions are measured. The second method uses the building or room which houses the facility as an enclosure. The second method requires that all other VOM sources within the room be shut down while the test is performed, but all fans and blowers within the room must be operated according to normal procedures.

Gas service means that the component contains process fluid that is in the gaseous state at operating conditions.

Gasoline means any petroleum distillate or petroleum distillate/alcohol blend having a Reid vapor pressure of 27.6 kPa or greater which is used as a fuel for internal combustion engines.

Gasoline dispensing facility means any site where gasoline is transferred from a stationary storage tank to a motor vehicle gasoline tank used to provide fuel to the engine of that motor vehicle.

Gross vehicle weight means the manufacturer's gross weight rating for the individual vehicle.

Gross vehicle weight rating means the value specified by the manufacturer as the maximum design loaded weight of a single vehicle.

Heated airless spray means an airless spray coating method in which the coating is heated just prior to application.

Heatset means a class of web-offset lithography which requires a heated dryer to solidify the printing inks.

Heatset-web-offset lithographic printing line means a lithographic printing line in which a blanket cylinder is used to transfer ink from a plate cylinder to a substrate continuously fed from a roll or an extension process and an oven is used to solidify the printing inks.

Heavy liquid means liquid with a true vapor pressure of less than 0.3 kPa (0.04 psi) at 294.3 K (70 °F) established in a standard reference text or as determined by ASTM method D2879–86 (incorporated by reference as specified in 40 CFR 52.742); or which has 0.1 Reid Vapor Pressure as determined by ASTM method D323–82 (incorporated by reference as specified in 40 CFR 52.742); or which when distilled requires a temperature of 421.95 K (300 °F) or greater to recover 10 percent of the liquid as determined by ASTM method D86–82 (incorporated by reference as specified in 40 CFR 52.742).

Heavy off-highway vehicle products means, for the purpose of paragraph (e) of this section, heavy construction, mining, farming, or material handling equipment; heavy industrial engines; diesel-electric locomotives and associated power generation equipment; and the components of such equipment or engines.

Heavy off-highway vehicle products coating facility means a facility that includes one or more heavy off-highway vehicle products coating line(s).

Heavy off-highway vehicle products coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of heavy off-highway vehicle products.

High temperature aluminum coating means a coating that is certified to withstand a temperature of 537.8 °C (1000 °F) for 24 hours.

Hood means a partial enclosure or canopy for capturing and exhausting, by means of a draft, the organic vapors or other fumes rising from a coating process or other source.

Hood capture efficiency means the emissions from a process which are captured by the hood and directed into a control device, expressed as a percentage of all emissions.

Hot well means the reservoir of a condensing unit receiving the condensate from a barometric condenser.

Hour means a block period of 60 minutes (*e.g.*, 1 a.m. to 2 a.m.).

In vacuum service means, for the purpose of paragraph (i) of this section, equipment which is operating at an internal pressure that is at least 5 kPa (0.73 psia) below ambient pressure.

In-process tank means a container used for mixing, blending, heating, reacting, holding, crystallizing, evaporating or cleaning operations in the manufacture of pharmaceuticals.

Incinerator means a combustion apparatus in which refuse is burned.

Indirect heat transfer means transfer of heat in such a way that the source of heat does not come into direct contact with process materials.

Ink means a coating used in printing, impressing, or transferring an image onto a substrate.

Interior body spray coat means a coating applied by spray to the interior of a can body.

Internal-floating roof means a cover or roof in a fixed-roof tank which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

Lacquers means any clear wood finishes formulated with nitrocellulose or synthetic resins to dry by evaporation without chemical reaction, including clear lacquer sanding sealers.

Large appliance means any residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dish washers, trash compactors, air conditioners, and other similar products.

Large appliance coating means any coating applied to the component metal parts (including, but not limited to, doors, cases, lids, panels, and interior support parts) of residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dish washers, trash compactors, air conditioners, and other similar products.

Large appliance coating facility means a facility that includes one or more large appliance coating line(s).

Large appliance coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of large appliances.

Light liquid means VOM in the liquid state which is not defined as heavy liquid.

Light-duty truck means any motor vehicle rated at 3,850 kg gross vehicle weight or less, designed mainly to transport property.

Liquid/gas method means either of two methods for determining capture which require both gas phase and liquid phase measurements and analysis. The first method requires construction of a TTE. The second method uses the building or room which houses the facility as an enclosure. The second method requires that all other VOM sources within the room be shut down while the test is performed, but all fans and blowers within the room must be operated according to normal procedures.

Liquid service means that the equipment or component contains process fluid that is in a liquid state at operating conditions.

Lithographic printing line means a printing line, except that the substrate is not necessarily fed from an unwinding roll, in which each roll printer uses a roll where both the image and non-image areas are essentially in the same plane (planographic).

Magnet wire means aluminum or copper wire formed into an electromagnetic coil.

Magnet wire coating means any coating or electrically insulating varnish or enamel applied to magnet wire.

Magnet wire coating facility means a facility that includes one or more magnet wire coating line(s).

Magnet wire coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of a magnet wire.

Malfunction means any sudden and unavoidable failure of air pollution control equipment, process equipment, or a process to operate in a normal or usual manner. Failures that are caused entirely or in part by poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions.

Manufacturing process means a method whereby a process emission source or series of process emission sources is used to convert raw materials, feed

stocks, subassemblies, or other components into a product, either for sale or for use as a component in a subsequent manufacturing process.

Maximum theoretical emissions means the quantity of volatile organic material emissions that theoretically could be emitted by a stationary source before add-on controls based on the design capacity or maximum production capacity of the source and 8760 hours per year. The design capacity or maximum production capacity includes use of coating(s) or ink(s) with the highest volatile organic material content actually used in practice by the source.

Metal furniture means a furniture piece including, but not limited to, tables, chairs, waste baskets, beds, desks, lockers, benches, shelving, file cabinets, lamps, and room dividers.

Metal furniture coating means any non-adhesive coating applied to any furniture piece made of metal or any metal part which is or will be assembled with other metal, wood, fabric, plastic or glass parts to form a furniture piece including, but not limited to, tables, chairs, waste baskets, beds, desks, lockers, benches, shelving, file cabinets, lamps, and room dividers. This definition shall not apply to any coating line coating miscellaneous metal parts or products.

Metal furniture coating facility means a facility that includes one or more metal furniture coating line(s).

Metal furniture coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of metal furniture.

Metallic shoe-type seal means a primary or secondary seal constructed of metal sheets (shoes) which are joined together to form a ring, springs, or levers which attach the shoes to the floating roof and hold the shoes against the tank wall, and a coated fabric which is suspended from the shoes to the floating roof.

Miscellaneous fabricated product manufacturing process means:

(A) A manufacturing process involving one or more of the following applications, including any drying and curing of formulations, and capable of emitting VOM:

(*1*) Adhesives to fabricate or assemble components or products.

(*2*) Asphalt solutions to paper or fiberboard.

(*3*) Asphalt to paper or felt.

(*4*) Coatings or dye to leather.

(*5*) Coatings to plastic.

(*6*) Coatings to rubber or glass.

(*7*) Disinfectant material to manufactured items.

(*8*) Plastic foam scrap or ''fluff'' from the manufacture of foam containers and packaging material to form resin pallets.

(*9*) Resin solutions to fiber substances.

(*10*) Viscose solutions for food casings.

(B) The storage and handling of formulations associated with the process described above, and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Miscellaneous formulation manufacturing process means:

(A) A manufacturing process which compounds one or more of the following and is capable of emitting VOM:

(*1*) Adhesives.

(*2*) Asphalt solutions.

(*3*) Caulks, sealants, or waterproofing agents.

(*4*) Coatings, other than paint and ink.

(*5*) Concrete curing compounds.

(*6*) Dyes.

(*7*) Friction materials and compounds.

(*8*) Resin solutions.

(*9*) Rubber solutions.

(*10*) Viscose solutions.

(B) The storage and handling of formulations associated with the process described above, and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Miscellaneous metal parts or products means any metal part or metal product, even if attached to or combined with a nonmental part or product, except cans, coils, metal furniture, large appliances, magnet wire, automobiles, ships, and airplane bodies.

Miscellaneous metal parts and products coating means any coating applied to

any metal part or metal product, even if attached to or combined with a nonmetal part or product, except cans, coils, metal furniture, large appliances, and magnet wire. Prime coat, prime surfacer coat, topcoat, and final repair coat for automobiles and light-duty trucks are not miscellaneous metal parts and products coatings. However, underbody anti-chip (*e.g.*, underbody plastisol) automobile, and light-duty truck coatings are miscellaneous metal parts and products coatings. Also, automobile or light-duty truck refinishing coatings, coatings applied to the exterior of marine vessels, coatings applied to the exterior of airplanes, and the customized topcoating of automobiles and trucks if production is less than 35 vehicles per day are not miscellaneous metal parts and products coatings.

Miscellaneous metal parts or products coating facility means a facility that includes one or more miscellaneous metal parts or products coating lines.

Miscellaneous metal parts or products coating line means a coating line in which any protective, decorative, or functional coating is applied onto the surface of miscellaneous metal parts or products.

Miscellaneous organic chemical manufacturing process means:

(A) A manufacturing process which produces by chemical reaction, one or more of the following organic compounds or mixtures of organic compounds and which is capable of emitting VOM:

(*1*) Chemicals listed in appendix A of this section.

(*2*) Chlorinated and sulfonated compounds.

(*3*) Cosmetic, detergent, soap, or surfactant intermediaries or specialties and products.

(*4*) Disinfectants.

(*5*) Food additives.

(*6*) Oil and petroleum product additives.

(*7*) Plasticizers.

(*8*) Resins or polymers.

(*9*) Rubber additives.

(*10*) Sweeteners.

(*11*) Varnishes.

(B) The storage and handling of formulations associated with the process described above and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition.

Monitor means to measure and record.

Multiple package coating means a coating made from more than one different ingredient which must be mixed prior to using and has a limited pot life due to the chemical reaction which occurs upon mixing.

Offset means, with respect to printing and publishing operations, use of a blanket cylinder to transfer ink from the plate cylinder to the surface to be printed.

Opaque stains means all stains that are not semi-transparent stains.

Open top vapor depressing means the batch process of cleaning and removing soils from surfaces by condensing hot solvent vapor on the colder metal parts.

Open-ended valve means any valve, except pressure relief devices, having one side of the valve in contact with process fluid and one side open to the atmosphere, either directly or through open piping.

Organic compound means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.

Organic material means any chemical compound of carbon including diluents and thinners which are liquids at standard conditions and which are used as dissolvers, viscosity reducers, or cleaning agents, but excluding methane, carbon monoxide, carbon dioxide, carbonic acid, metallic carbonic acid, metallic carbide, metallic carbonates, and ammonium carbonate.

Organic vapor means the gaseous phase of an organic material or a mixture of organic materials present in the atmosphere.

Oven means a chamber within which heat is used for one or more of the following purposes: Dry, bake, cure, or polymerize a coating or ink.

Overall control means the product of the capture efficiency and the control device efficiency.

Overvarnish means a transparent coating applied directly over ink or coating.

Owner or operator means any person who owns, operates, leases, controls, or supervises an emission source or air pollution control equipment.

Packaging rotogravure printing means rotogravure printing upon paper, paper board, metal foil, plastic film, and other substrates, which are, in subsequent operations, formed into packaging products or labels for articles to be sold.

Packaging rotogravure printing line means a rotogravure printing line in which surface coatings are applied to paper, paperboard, foil, film, or other substrates which are to be used to produce containers, packaging products, or labels for articles.

Pail means any cylindrical metal shipping container of 1- to 12-gallon capacity and constructed of 29-gauge and heavier metal.

Paint manufacturing plant means a plant that mixes, blends, or compounds enamels, lacquers, sealers, shellacs, stains, varnishes, or pigmented surface coatings.

Paper coating means any coating applied on paper, plastic film, or metallic foil to make certain products, including (but not limited to) adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, or pressure sensitive tapes. Paper coating includes the application of coatings by impregnation and/or saturation.

Paper coating facility means a facility that includes one or more paper coating lines.

Paper coating line means a coating line in which any protective, decorative, or functional coating is applied on, saturated into, or impregnated into paper, plastic film, or metallic foil to make certain products, including (but not limited to) adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, and pressure sensitive tapes.

Parts per million (volume) means a volume/volume ratio which expresses the volumetric concentration of gaseous air contaminant in a million unit volume of gas.

Person means any individual, corporation, partnership, association, State, municipality, political subdivision of a State; any agency, department, or instrumentality of the United States; and any officer, agent, or employee thereof.

Petroleum means the crude oil removed from the earth and the oils derived from tar sands, shale, and coal.

Petroleum refinery means any facility engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, or other products through distillation of petroleum, or through redistillation, cracking, or reforming of unfinished petroleum derivatives.

Pharmaceutical means any compound or mixture, other than food, used in the prevention, diagnosis, alleviation, treatment, or cure of disease in man and animal.

Pharmaceutical coating operation means a device in which a coating is applied to a pharmaceutical, including air drying or curing of the coating.

Pigmented coatings means opaque coatings containing binders and colored pigments which are formulated to conceal the wood surface either as an undercoat or topcoat.

Plant means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control), except the activities of any marine vessel. Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same ''Major Group'' (*i.e.*, which have the same two-digit code) as described in the ''Standard Industrial Classification Manual, 1987'' (incorporated by reference as specified in 40 CFR 52.742).

Plasticizers means a substance added to a polymer composition to soften and add flexibility to the product.

Prime coat means the first of two or more coatings applied to a surface.

Prime surfacer coat means a coating used to touch up areas on the surface of automobile or light-duty truck bodies not adequately covered by the prime coat before application of the top coat. The prime surfacer coat is applied between the prime coat and topcoat. An anti-chip coating applied to main body parts (*e.g.*, rocker panels,

bottom of doors and fenders, and leading edge of roof) is a prime surfacer coat.

Primers means any coatings formulated and applied to substrates to provide a firm bond between the substrate and subsequent coats.

Printing means the application of words, designs, and pictures to a substrate using ink.

Printing line means an operation consisting of a series of one or more roll printers and any associated roll coaters, drying areas, and ovens wherein one or more coatings are applied, dried, and/or cured.

Process means any stationary emission source other than a fuel combustion emission source or an incinerator.

Production equipment exhaust system means a system for collecting and directing into the atmosphere emissions of volatile organic material from reactors, centrifuges, and other process emission sources.

Publication rotogravure printing line means a rotogravure printing line in which coatings are applied to paper which is subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements, or other types of printed material.

Reactor means a vat, vessel, or other device in which chemical reactions take place.

Refiner means any person who owns, leases operates, controls, or supervises a refinery.

Refinery unit, process unit or unit means a set of components which are a part of a basic process operation such as distillation, hydrotreating, cracking, or reforming of hydrocarbons.

Refrigerated condenser means a surface condenser in which the coolant supplied to the condenser has been cooled by a mechanical device, other than by a cooling tower or evaporative spray cooling, such as refrigeration unit or steam chiller unit.

Repair coatings means coatings used to correct imperfections or damage to furniture surface.

Repaired means, for the purpose of paragraph (i) of this section, that equipment component has been adjusted, or otherwise altered, to eliminate a leak.

Roll coater means an apparatus in which a uniform layer of coating is applied by means of one or more rolls across the entire width of a moving substrate.

Roll printer means an apparatus used in the application of words, designs, or pictures to a substrate, usually by means of one or more rolls each with only partial coverage.

Roll printing means the application of words, designs, and pictures to a substrate usually by means of a series of hard rubber or metal rolls each with only partial coverage.

Roller coating means a method of applying a coating to a sheet or strip in which the coating is transferred by a roller or series of rollers.

Rotogravure printing means the application of words, designs, and pictures to a substrate by means of a roll printing technique in which the pattern to be applied is recessed relative to the non-image area.

Rotogravure printing line means a printing line in which each roll printer uses a roll with recessed areas for applying an image to a substrate.

Safety relief valve means a valve which is normally closed and which is designed to open in order to relieve excessive pressures within a vessel or pipe.

Sanding sealers means any coatings formulated for and applied to bare wood for sanding and to seal the wood for subsequent application of varnish. To be considered a sanding sealer a coating must be clearly labelled as such.

Sealer means a coating containing binders which seals wood prior to the application of the subsequent coatings.

Semi-transparent stains means stains containing dyes or semi-transparent pigments which are formulated to enhance wood grain and change the color of the surface but not to conceal the surface, including, but not limited to, sap stain, toner, non-grain raising stains, pad stain, or spatter stain.

Set of safety relief valves means one or more safety relief valves designed to open in order to relieve excessive pressures in the same vessel or pipe.

Sheet basecoat means a coating applied to metal when the metal is in

sheet form to serve as either the exterior or interior of a can for either two-piece or three-piece cans.

Side-seam spray coat means a coating applied to the seam of a three-piece can.

Single coat means one coating application applied to a metal surface.

Solvent means a liquid substance that is used to dissolve or dilute another substance.

Solvent cleaning means the process of cleaning soils from surfaces by cold cleaning, open top vapor degreasing, or conveyorized degreasing.

Specified air contaminant means any air contaminant as to which this Section contains emission standards or other specific limitations.

Splash loading means a method of loading a tank, railroad tank car, tank truck, or trailer by use of other than a submerged loading pipe.

Standard conditions means a temperature of 70 °F and a pressure of 14.7 psia.

Standard cubic foot (scf) means the volume of one cubic foot of gas at standard conditions.

Standard Industrial Classification Manual means the Standard Industrial Classification Manual (1987), Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (incorporated by reference as specified in 40 CFR 52.742).

Start-up means the setting in operation of an emission source for any purpose.

Stationary emission source and *Stationary source* mean an emission source which is not self-propelled.

Storage tank or storage vessel means any stationary tank, reservoir or container used for the storage of VOL's.

Submerged loading pipe means any discharge pipe or nozzle which meets either of the following conditions:

(A) Where the tank is filled from the top, the end of the discharge pipe or nozzle must be totally submerged when the liquid level is 15 cm (6 in.) above the bottom of the tank.

(B) Where the tank is filled from the side, the discharge pipe or nozzle must be totally submerged when the liquid level is 46 cm (18 in.) above the bottom of the tank.

Substrate means the surface onto which a coating is applied or into which a coating is impregnated.

Surface condenser means a device which removes a substance from a gas stream by reducing the temperature of the stream, without direct contact between the coolant and the stream.

Tablet coating operation means a pharmaceutical coating operation in which tablets are coated.

Thirty-day rolling average means any value arithmetically averaged over any consecutive thirty-days.

Three-piece can means a can which is made from a rectangular sheet and two circular ends.

Topcoat means a coating applied in a multiple coat operation other than prime coat, final repair coat, or prime surfacer coat.

Topcoat operation means all topcoat spray booths, flash-off areas, and bake ovens at a facility which are used to apply, dry, or cure the final coatings (except final off-line repair) on components of automobile or light-duty truck bodies.

Transfer efficiency means the ratio of the amount of coating solids deposited onto a part or product to the total amount of coating solids used.

True vapor pressure means the equilibrium partial pressure exerted by a volatile organic liquid as determined in accordance with methods described in American Petroleum Institute Bulletin 2517, ''Evaporation Loss From Floating Roof Tanks,'' second edition, February 1980 (incorporated by reference as specified in 40 CFR 52.742).

Two-piece can means a can which is drawn from a shallow cup and requires only one end to be attached.

Undercoaters means any coatings formulated for and applied to substrates to provide a smooth surface for subsequent coats.

Unregulated safety relief valve means a safety relief valve which cannot be actuated by a means other than high pressure in the pipe or vessel which it protects.

Vacuum producing system means any reciprocating, rotary, or centrifugal blower or compressor or any jet ejector or device that creates suction from a pressure below atmospheric and discharges against a greater pressure.

Valves not externally regulated means valves that have no external controls, such as in-line check valves.

Vapor balance system means any combination of pipes or hoses which creates a closed system between the vapor spaces of an unloading tank and a receiving tank such that vapors displaced from the receiving tank are transferred to the tank being unloaded.

Vapor collection system means all piping, seals, hoses, connections, pressure-vacuum vents, and other possible sources between the gasoline delivery vessel and the vapor processing unit and/or the storage tanks and vapor holder.

Vapor control system means any system that limits or prevents release to the atmosphere of organic material in the vapors displaced from a tank during the transfer of gasoline.

Vapor recovery system means a vapor gathering system capable of collecting all VOM vapors and gases discharged from the storage tank and a vapor disposal system capable of processing such VOM vapors and gases so as to prevent their emission to the atmosphere.

Vehicle means a device by which any person or property may be propelled, moved, or drawn upon a highway, excepting a device moved exclusively by human power or used exclusively upon stationary rails or tracks.

Vinyl coating means any topcoat or printing ink applied to vinyl coated fabric or vinyl sheets. Vinyl coating does not include plastisols.

Vinyl coating facility means a facility that includes one or more vinyl coating line(s).

Vinyl coating line means a coating line in which any protective, decorative or functional coating is applied onto vinyl coated fabric or vinyl sheets.

Volatile organic liquid means any substance which is liquid at storage conditions and which contains volatile organic compounds.

Volatile organic material (VOM) or volatile organic compounds (VOC) is as defined in §51.100(s) of this chapter.

Wash coat means a coating containing binders which seals wood surfaces, prevents undesired staining, and controls penetration.

Web means a substrate which is printed in continuous roll-fed presses.

Wood furniture means room furnishings including cabinets (kitchen, bath, and vanity), tables, chairs, beds, sofas, shutters, art objects, wood paneling, wood flooring, and any other coated furnishings made of wood, wood composition, or fabricated wood materials.

Wood furniture coating facility means a facility that includes one or more wood furniture coating line(s).

Wood furniture coating line means a coating line in which any protective, decorative, or functional coating is applied onto wood furniture.

Woodworking means the shaping, sawing, grinding, smoothing, polishing, and making into products of any form or shape of wood.

(4) *Testing methods and procedures*—(i) Coatings, inks and fountain solutions. The following test methods and procedures shall be used to determine compliance of as applied coatings, inks, and fountain solutions with the limitations set forth in §52.741.

(A) *Sampling*. Samples collected for analyses shall be one-liter taken into a one-liter container at a location and time such that the sample will be representative of the coating as applied (i.e., the sample shall include any dilution solvent or other VOM added during the manufacturing process). The container must be tightly sealed immediately after the sample is taken. Any solvent or other VOM added after the sample is taken must be measured and accounted for in the calculations in paragraph (a)(4)(i)(C) of this section. For multiple package coatings, separate samples of each component shall be obtained. A mixed sample shall not be obtained as it will cure in the container. Sampling procedures shall follow the guidelines presented in:

(*1*) ASTM D3925–81 (Reapproved 1985) Standard Practice for Sampling Liquid Paints and Related Pigment Coating. This practice is incorporated by reference as specified in 40 CFR 52.742.

(*2*) ASTM E300–86 Standard Practice for Sampling Industrial Chemicals. This practice is incorporated by reference as specified in 40 CFR 52.742.

(B) *Analyses*. The applicable analytical methods specified below shall be

used to determine the composition of coatings, inks, or fountain solutions as applied.

(*1*) Method 24 of 40 CFR part 60, appendix A, shall be used to determine the VOM content and density of coatings. If it is demonstrated to the satisfaction of the Administrator that plant coating formulation data are equivalent to Method 24 results, formulation data may be used. In the event of any inconsistency between a Method 24 test and a facility's formulation data, the Method 24 test will govern.

(*2*) Method 24A of 40 CFR part 60, appendix A, shall be used to determine the VOM content and density of rotogravure printing inks and related coatings. If it is demonstrated to the satisfaction of the Administrator that the plant coating formulation data are equivalent to Method 24A results, formulation data may be used. In the event of any inconsistency between a Method 24A test and a facility's formulation data, the Method 24A test will govern.

(*3*) The following ASTM methods are the analytical procedures for determining VOM:

(*i*) ASTM D1475–85: Standard Test Method for Density of Paint, Varnish, Lacquer and Related Products. This test method is incorporated by reference as specified in 40 CFR 52.742.

(*ii*) ASTM D2369–87: Standard Test Method for Volatile Content of Coatings. This test method is incorporated by reference as specified in 40 CFR 52.742.

(*iii*) ASTM D3792–86: Standard Test Method for Water Content of Water-reducible Paints by Direct Injection into a Gas Chromatograph. This test method is incorporated by reference as specified in 40 CFR 52.742.

(*iv*) ASTM D4017–81 (Reapproved 1987): Standard Test Method for Water in Paints and Paint Materials by the Karl Fischer Method. This test method is incorporated by reference as specified in 40 CFR 52.742.

(*v*) ASTM D4457–85: Standard Test Method for Determination of Dichloromethane and 1,1,1-Trichloroethane in Paints and Coatings by Direct Injection into a Gas Chromatograph. (The procedure delineated above can be used to develop protocols for any compounds specifically exempted from the definition of VOM.) This test method is incorporated by reference as specified in 40 CFR 52.742.

(*vi*) ASTM D2697–86: Standard Test Method for Volume Non-Volatile Matter in Clear or Pigmented Coatings. This test method is incorporated by reference as specified in 40 CFR 52.742.

(*vii*) ASTM D3980–87: Standard Practice for Interlaboratory Testing of Paint and Related Materials. This practice is incorporated by reference as specified in 40 CFR 52.742.

(*viii*) ASTM E180–85: Standard Practice for Determining the Precision of ASTM Methods for Analysis of and Testing of Industrial Chemicals. This practice is incorporated by reference as specified in 40 CFR 52.742.

(*ix*) ASTM D2372–85: Standard Method of Separation of Vehicle from Solvent-reducible Paints. This method is incorporated by reference as specified in 40 CFR 52.742.

(*4*) Use of an adaptation to any of the analytical methods specified in paragraphs (a)(4)(i)(B)(*1*), (*2*) and (*3*) may be approved by the Administrator on a case-by-case basis. An owner or operator must submit sufficient documentation for the Administrator to find that the analytical methods specified in paragraphs (a)(4)(i)(B)(*1*), (*2*) and (*3*) will yield inaccurate results and that the proposed adaptation is appropriate.

(C) *Calculations.* Calculations for determining the VOM content, water content and the content of any compounds which are specifically exempted from the definition of VOM of coatings, inks and fountain solutions as applied shall follow the guidance provided in the following documents.

(*1*) ''A Guide for Surface Coating Calculation'' EPA–340/1–86–016 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*2*) ''Procedures for Certifying Quantity of Volatile Organic Compounds Emitted by Paint, Ink and Other Coatings'' (revised June 1986) EPA–450/3–84–019 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*3*) ''A Guide for Graphic Arts Calculations'' August 1988 EPA–340/1–88–003 (which is available from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(ii) *Automobile or light-duty truck test protocol.* The protocol for testing, including determining the transfer efficiency, of coating applicators at topcoat coating operations at an automobile assembly facility shall follow the procedure in: ''Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Topcoat Operations'' December 1988 EPA–450/3–88–018 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(iii) *Capture system efficiency test protocols*—(A) *Applicability.* The requirements of paragraphs (a)(4)(iii)(B) of this section shall apply to all VOM emitting processes employing capture equipment (*e.g.*, hoods, ducts), except those cases noted below.

(*1*) If a source installs a permanent total enclosure (PTE) that meets USEPA specifications, and which directs all VOM to a control device, then the source is exempted from the requirements described in paragraph (B). The USEPA specifications to determine whether a structure is considered a PTE are given in Procedure T of appendix B of this section. In this instance, the capture efficiency is assumed to be 100 percent and the source is still required to measure control efficiency using appropriate test methods as specified in (a)(4)(iv) of this section.

(*2*) If a source uses a control device designed to collect and recover VOM (*e.g.*, carbon adsorber), an explicit measurement of capture efficiency is not necessary provided that the conditions given below are met. The overall control of the system can be determined by directly comparing the input liquid VOM to the recovered liquid VOM. The general procedure for use in this situation is given in 40 CFR 60.433, with the following additional restrictions:

(*i*) The source must be able to equate solvent usage with solvent recovery on a 24-hour (daily) basis, rather than a 30-day weighted average, within 72 hours following the 24-hour period. In addition, one of the following two criteria must be met:

(*ii*) The solvent recovery system (i.e., capture and control system) must be dedicated to a single process line (*e.g.*, one process line venting to a carbon adsorber system), or

(*iii*) If the solvent recovery system controls multiple process lines, then the source must be able to demonstrate that the overall control (*i.e.*, the total recovered solvent VOM divided by the sum of liquid VOM input to all process lines venting to the control system) meets or exceeds the most stringent standard applicable for any process line venting to the control system.

(B) *Specific requirements.* The capture efficiency of a process line shall be measured using one of the four protocols given below. Any error margin associated with a test protocol may not be incorporated into the results of a capture efficiency test. If these techniques are not suitable for a particular process, then the source must present an alternative capture efficiency protocol and obtain approval for it by the Administrator as a SIP or FIP revisions.

(*1*) Gas/gas method using temporary total enclosure (TTE). The USEPA specifications to determine whether a temporary enclosure is considered a TTE are given in Procedure T of appendix B of this section. The capture efficiency equation to be used for this protocol is:

$$CE = Gw / (GW + Fw)$$

Where:

CE = capture efficiency, decimal fraction.
Gw = mass of VOM captured and delivered to control device using a TTE.
Fw = mass of fugitive VOM that escapes from a TTE.

Procedure G.2 contained in appendix B of this section is used to obtain Gw. Procedure F.1 in appendix B of this section is used to obtain Fw.

(*2*) *Liquid/gas method using TTE.* The USEPA specifications to determine whether a temporary enclosure is considered a TTE are given in Procedure T

of appendix B of this section. The capture efficiency equation to be used for this protocol is:

$$CE = (L - F) / L$$

Where:

CE = capture efficiency, decimal fraction.
L = mass of liquid VOM input to process.
Fw = mass of fugitive VOM that escapes from a TTE.

Procedure L contained in appendix B of this section is used to obtain L. Procedure F.1 in appendix B of this section is used to obtain Fw.

(*3*) Gas/gas method using the building or room (building or room enclosure) in which the affected source is located as the enclosure and in which ''F'' and ''G'' are measured while operating only the affected facility. All fans and blowers in the building or room must be operated as they would under normal production. The capture efficiency equation to be used for this protocol is:

$$CE = G / (G + F_B)$$

Where:

CE = capture efficiency, decimal fraction.
G = mass of VOM captured and delivered to control device.
F_B = mass of fugitive VOM that escapes from building enclosure.

Procedure G.2 contained in appendix B of this section is used to obtain G. Procedure F.2 in appendix B of this section is used to obtain F_B.

(*4*) Liquid/gas method using the building or room (building or room enclosure) in which the affected source is located as the enclosure and in which ''F'' and ''L'' are measured while operating only the affected facility. All fans and blowers in the building or room must be operated as they would under normal production. The capture efficiency equation to be used for this protocol is:

$$CE = (L - F_B) / L$$

Where:

CE = capture efficiency, decimal fraction.
L = mass of liquid VOM input to process.
F_B = mass of fugitive VOM that escapes from building enclosure.

Procedure L contained in appendix B of this section is used to obtain L. Procedure F.2 in appendix B of this section is used to obtain F_B.

(C) *Recordkeeping and reporting.* (*1*) All affected facilities must maintain a copy of the capture efficiency protocol submitted to USEPA on file. All results of the appropriate test methods and capture efficiency protocols must be reported to USEPA within sixty (60) days of the test date. A copy of the results must be kept on file with the source for a period of three (3) years.

(*2*) If any changes are made to capture or control equipment, then the source is required to notify USEPA of these changes and a new test may be required by USEPA.

(*3*) The source must notify the Administrator 30 days prior to performing any capture efficiency or control test. At that time, the source must notify the Administrator which capture efficiency protocol and control device test methods will be used.

(*4*) Sources utilizing a PTE must demonstrate that this enclosure meets the requirement given in Procedure T (in appendix B of this section) for a PTE during any testing of their control device.

(*5*) Sources utilizing a TTE must demonstrate that their TTE meets the requirements given in Procedure T (in appendix B of this section) for a TTE during testing of their control device. The source must also provide documentation that the quality assurance criteria for a TTE have been achieved.

(iv) *Control device efficiency testing and monitoring.* (A) The control device efficiency shall be determined by simultaneously measuring the inlet and outlet gas phase VOM concentrations and gas volumetric flow rates in accordance with the gas phase test methods specified in paragraph (a)(4)(vi) of this section.

(B) Any owner or operator that uses an afterburner or carbon adsorber to comply with any paragraph of § 52.741 shall use USEPA approved continuous monitoring equipment which is installed, calibrated, maintained, and operated according to vendor specifications at all times the afterburner or carbon adsorber is in use. The continuous monitoring equipment must monitor the following parameters:

(*1*) Combustion chamber temperature of each afterburner.

(*2*) Temperature rise across each catalytic afterburner bed or VOM concentration of exhaust.

(*3*) The VOM concentration of each carbon adsorption bed exhaust.

(v) *Overall efficiency*. (A) The overall efficiency of the emission control system shall be determined as the product of the capture system efficiency and the control device efficiency or by the liquid/liquid test protocol as specified in 40 CFR 60.433 (and revised by paragraph (a)(4)(iii)(A)(*2*) of this section for each solvent recovery system. In those cases in which the overall efficiency is being determined for an entire line, the capture efficiency used to calculate the product of the capture and control efficiency is the total capture efficiency over the entire line.

(B) For coating lines which are both chosen by the owner or operator to comply with paragraphs (e)(2)(ii), (e)(2)(iii), (e)(2)(iv), (e)(2)(v), or (e)(2)(vi) of this section by the alternative in paragraph (e)(2)(i)(B) of this section and meet the criteria allowing them to comply with paragraph (e)(2) of this section instead of paragraph (e)(1) of this section, the overall efficiency of the capture system and control device, as determined by the test methods and procedures specified in paragraphs (a)(4) (iii), (iv) and (v)(A) of this section, shall be no less than the equivalent overall efficiency which shall be calculated by the following equation:

$$E = ([VOM_a - VOM_1]/VOM_a) \times 100$$

Where:

E = Equivalent overall efficiency of the capture system and control device as a percentage,

VOM_a = Actual VOM content of a coating, or the daily-weighted average VOM content of two or more coatings (if more than one coating is used), as applied to the subject coating line as determined by the applicable test methods and procedures specified in paragraph (a)(4)(i) of this section in units of kg VOM/l (lb VOM/gal) of coating solids as applied,

VOM_l = The VOM emission limit specified in paragraph (e)(2) (i) or (ii) of this section in units of kg VOM/l (lb VOM/gal) of coating solids as applied.

(vi) *Volatile organic material gas phase source test methods.* The methods in 40 CFR part 60, appendix A, delineated below shall be used to determine control device efficiencies.

(A) 40 CFR part 60, appendix A, Method 18, 25 or 25A, as appropriate to the conditions at the site, shall be used to determine VOM concentration. Method selection shall be based on consideration of the diversity of organic species present and their total concentration and on consideration of the potential presence of interfering gases. Except as indicated in paragraphs (a)(4)(vi)(A)(*1*) and (*2*) of this section, the test shall consist of three separate runs, each lasting a minimum of 60 min, unless the Administrator determines that process variables dictate shorter sampling times.

(*1*) When the method is to be used to determine the efficiency of a carbon adsoption system with a common exhaust stack for all the individual adsorber vessels, the test shall consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all the individual adsorber vessels.

(*2*) When the method is to be used to determine the efficiency of a carbon adsorption system with individual exhaust stacks for each adsorber vessel, each adsorber vessel shall be tested individually. The test for each adsorber vessel shall consist of three separate runs. Each run shall coincide with one or more complete adsorption cycles.

(B) 40 CFR part 60, appendix A, Method 1 or 1A shall be used for sample and velocity traverses.

(C) 40 CFR part 60, appendix A, Method 2, 2A, 2C or 2D shall be used for velocity and volumetric flow rates.

(D) 40 CFR part 60, appendix A, Method 3 shall be used for gas analysis.

(E) 40 CFR part 60, appendix A, Method 4 shall be used for stack gas moisture.

(F) 40 CFR part 60, appendix A, Methods 2, 2A, 2C, 2D, 3 and 4 shall be performed, as applicable, at least twice during each test run.

(G) Use of an adaptation to any of the test methods specified in paragraphs (a)(4)(vi) (A), (B), (C), (D), (E), and (F) of this section may be approved by the Administrator on a case-by-case basis. An owner or operator must submit sufficient documentation for the Administrator to find that the test

methods specified in paragraphs (a)(4)(vi) (A), (B), (C), (D), (E), and (F) of this section will yield inaccurate results and that the proposed adaptation is appropriate.

(vii) *Leak detection methods for volatile organic material.* Owners or operators required by the various subparts of this regulation to carry out a leak detection monitoring program shall comply with the following requirements:

(A) *Leak detection monitoring.* (*1*) Monitoring shall comply with 40 CFR part 60, appendix A. Method 21.

(*2*) The detection instrument shall meet the performance criteria of Method 21.

(*3*) The instrument shall be calibrated before use on each day of its use by the methods specified in Method 21.

(*4*) Calibration gases shall be:

(*i*) Zero air (less than 10 ppm of hydrocarbon in air); and

(*ii*) A mixture of methane or n-hexane and air at a concentration of approximately, but no less than, 10,000 ppm methane or n-hexane.

(*5*) The instrument probe shall be traversed around all potential leak interfaces as close to the interface as possible as described in Method 21.

(*B*) When equipment is tested for compliance with no detectable emissions as required, the test shall comply with the following requirements:

(*1*) The requirements of paragraphs (a)(4) (vii)(A)(*1*) through (vii)(A)(*5*) of this section shall apply.

(*2*) The background level shall be determined as set forth in Method 21.

(*C*) Leak detection tests shall be performed consistent with:

(*1*) ''APTI Course SI 417 controlling Volatile Organic Compound Emissions from Leaking Process Equipment'' EPA–450/2–82–015 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*2*) ''Portable Instrument User's Manual for Monitoring VOC Sources'' EPA–340/1–86–015 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*3*) ''Protocols for Generating Unit-Specific Emission Estimates for Equipment Leaks of VOC and VHAP'' EPA–450/3–88–010 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*4*) ''Petroleum Refinery Enforcement Manual'' EPA–340/1–80–008 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(viii) *Bulk gasoline delivery system test protocol.* (A) The method for determining the emissions of gasoline from a vapor recovery system are delineated in 40 CFR part 60, subpart XX, § 60.503.

(B) Other tests shall be performed consistent with:

(*1*) ''Inspection Manual for Control of Volatile Organic Emissions from Gasoline Marketing Operations: Appendix D'' EPA–340/1–80–012 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(*2*) ''Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals: Appendix A'' EPA–450/2–77–026 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161)

(5) *Compliance dates.* Compliance with the requirements of all rules is required by July 1, 1991, unless otherwise indicated by compliance dates contained in specific rules. This paragraph shall not operate to provide additional time for compliance under section 113(d) of the Act, 42 U.S.C. 7413(d), for sources subject to compliance upon promulgation.

(6) *Afterburners.* The operation of any natural gas fired afterburner and capture system used to comply with § 52.741 is not required during the period of November 1 of any year to April 1 of the following year provided that the operation of such devices is not required for purposes of occupational safety or health, or for the control of toxic substances, odor nuisances, or other regulated pollutants.

(7) *Exemptions, variances, and alternative means of control or compliance determinations.* Notwithstanding the provisions of any other paragraphs of this section, any exemptions, variances or alternatives to the control requirements, emission limitations, or test methods in the Illinois SIP or FIP can

only be allowed if approved by the Administrator as a SIP or FIP revision.

(8) *Vapor pressure of volatile organic liquids.* (i) If the VOL consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, ''The Vapor Pressure of Pure Substances,'' Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986–87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the VOL is a mixture, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or by the following equation:

$$P_{vol} = \sum_{i=1}^{n} P_i X_i$$

Where:

P_{vol} = Total vapor pressure of the mixture,
n = Number of components in the mixture,
i = Subscript denoting an individual component,
P_i = Vapor pressure of a component determined in accordance with paragraph (a) of this section
X_i = Mole fraction of the component in the total mixture.

(9) *Vapor pressure of organic material or solvent.* (i) If the organic material or solvent consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, ''The Vapor Pressure of Pure Substances,'' Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986–87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the organic material or solvent is in a mixture made up of both organic material compounds and compounds which are not organic material, the vapor pressure shall be determined by the following equation:

$$P_{om} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

Where:

P_{om} = Total vapor pressure of the portion of the mixture which is composed of organic material,
n = Number of organic material components in the mixture,
i = Subscript denoting an individual component,
P_i = Vapor pressure of an organic material component determined in accordance with paragraph (a) of this section,
X_i = Mole fraction of the organic material component of the total mixture.

(iii) If the organic material or solvent is in a mixture made up of only organic material compounds, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or by the above equation.

(10) *Vapor pressure of volatile organic material.* (i) If the VOM consists of only a single compound, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or the vapor pressure may be obtained from a published source such as: Boublik, T., V. Fried and E. Hala, ''The Vapor Pressure of Pure Substances,'' Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986–87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

(ii) If the VOM is in a mixture made up of both VOM compounds and compounds which are not VOM, the vapor pressure shall be determined by the following equation:

$$P_{vom} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

Where:

P_{vom} = Total vapor pressure of the portion of the mixture which is composed of VOM,
n = Number of VOM components in the mixture,
i = Subscript denoting an individual component,
P_i = Vapor pressure of a VOM component determined in accordance with paragraph (a) of this section,
X_i = Mole fraction of the VOM component of the total mixture.

(iii) If the VOM is in a mixture made up of only VOM compounds, the vapor pressure shall be determined by ASTM Method D2879–86 (incorporated by reference as specified in 40 CFR 52.742) or by the above equation.

(b)–(c) [Reserved]

(d) *Solvent cleaning*—(1) *Solvent cleaning in general.* The requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall apply to all cold cleaning, open top vapor degreasing, and conveyorized degreasing operations.

NOTE: For Federal purposes, paragraph (d)(1) supersedes subpart E (section 215.181) of 35 Ill. Adm. Code 215.)

(2) *Compliance schedule.* Every owner or operator of an emission source which was previously exempt from the requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) because it satisfied the criteria in either (d)(a)(i) or (d)(2)(ii) of this section, shall comply with the requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) on and after July 1, 1991. A source which did not satisfy the criteria in either (d)(a)(i) or (d)(2)(ii) of this section, shall comply with the requirements of subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) upon promulgation.

(i) If emissions of VOM exceed neither 6.8 kg (15 lbs) in any one day, nor 1.4 kg (3 lbs) in any one hour, or

(ii) If the source is used exclusively for chemical or physical analysis or for determination of product quality and commercial acceptance, provided that the operation of the source is not an integral part of the production process, the emissions of VOM from the source do not exceed 363 kg (800 lbs) in any calendar month, and the exemption had been approved in writing by the Illinois Environmental Protection Agency.

(3) *Test methods.* The following test methods shall be used to demonstrate compliance with subpart E (sections 215.182–215.184) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742):

(i) Vapor pressures shall be determined by using the procedure specified in paragraph (a)(9) of this section.

(ii) Exhaust ventilation rates shall be determined by using the procedures specified in paragraph (a)(4)(vi)(C) of this section.

(iii) The performance of control devices shall be determined by using the procedures specified in paragraph (a)(4)(vi) of this section.

(e) *Coating operations*—(1) *Emission limitations for manufacturing plants.* (i) Except as provided in paragraph (e)(3) of this section, no owner or operator of a coating line shall apply at any time any coating in which the VOM content exceeds the following emission limitations for the specified coating. The following emission limitations are expressed in units of VOM per volume of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator, except where noted. Compounds which are specifically exempted from the definition of VOM should be treated as water for the purpose of calculating the ''less water'' part of the coating composition. Compliance with this paragraph must be demonstrated through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (e)(6)(ii) of this

section. As an alternative to compliance with this paragraph, the owner or operator of a coating line may meet the requirements of paragraph (e)(1)(ii) or paragraph (e)(2) of this section. The equation presented in paragraph (e)(1)(iii) of this section shall be used to calculate emission limitations for determining compliance by add-on controls, credits for transfer efficiency, emissions trades and cross-line averaging.

	kg/l	lb/gal
(A) Automobile or Light-Duty Truck Coating		
(*1*) Prime coat	0.14	(1.2)
(*2*) Prime surfacer coat	0.34	(2.8)
NOTE: The prime surfacer coat limitation is based upon a transfer efficiency of 30 percent. Transfer efficiency credits can only be allowed if approved by the Administrator as a SIP or FIP revision.		
(*3*) Topcoat	1.81	(15.1)
NOTE: The topcoat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation shall be based on the daily-weighted average VOM content from the entire topcoat operation (all topcoat spray booths, flash-off areas and bake ovens). Compliance shall be demonstrated in accordance with the topcoat protocol for automobiles and light-duty trucks referenced in paragraph (a)(4)(ii) of this section. Paragraph (e)(1)(ii) of this section does not apply to the topcoat limitation.) At least 180 days prior to the initial compliance date, the owner or operator of a coating line subject to the topcoat limitation shall submit to the Administrator a detailed proposal specifying the method of demonstrating compliance with the protocol. The proposal shall include, at a minimum, a comprehensive plan (including a rationale) for determining the transfer efficiency at each booth through the use of in-plant, or pilot testing; the selection of coatings to be tested (for the purpose of determining transfer efficiency) including the rationale for coating groupings; and the method for determining the analytic VOM content of as applied coatings and the formulation solvent content of as applied coatings. Upon approval of the protocol by the Administrator, the source may proceed with the compliance demonstration.		
(*4*) Final repair coat	0.58	(4.8)
(B) Can Coating		
(*1*) Sheet basecoat and overvarnish	0.34	(2.8)
(*2*) Exterior basecoat and overvarnish	0.34	(2.8)
(*3*) Interior body spray coat	0.51	(4.2)
(*4*) Exterior end coat	0.51	(4.2)
(*5*) Side seam spray coat	0.66	(5.5)
(*6*) End sealing compound coat	0.44	(3.7)
(C) Paper Coating	0.35	(2.9)
NOTE: The paper coating limitation shall not apply to any owner or operator of any paper coating line on which printing is performed if the paper coating line complies with the emissions limitations in paragraph (h)(1) of this section: Printing and Publishing.		
(D) Coil Coating	0.31	(2.6)
(E) Fabric Coating	0.35	(2.9)
(F) Vinyl Coating	0.45	(3.8)
(G) Metal Furniture Coating	0.36	(3.0)
(H) Large Appliance Coating	0.34	(2.8)
NOTE: The limitation shall not apply to the use of quick-drying lacquers for repair of scratches and nicks that occur during assembly, provided that the volume of coating does not exceed 0.95 l (1 quart) in any one rolling eight-hour period.		
(I) Magnet Wire Coating	0.20	(1.7)
(J) Miscellaneous Metal Parts and Products Coating		
(*1*) Clear coating	0.52	(4.3)
(*2*) Air-dried coating	0.42	(3.5)
(*3*) Extreme performance coating	0.42	(3.5)
(*4*) Steel pail and drum interior coating	0.52	(4.3)
(*5*) All other coatings	0.36	(3.0)

	kg/l	lb/gal
(K) Heavy Off-Highway Vehicle Products Coating		
(*1*) Extreme performance prime coat	0.42	(3.5)
(*2*) Extreme performance top-coat (air dried)	0.42	(3.5)
(*3*) Final repair coat (air dried)	0.42	(3.5)
(*4*) All other coatings are subject to the emission limitations for miscellaneous metal parts and products coatings in paragraph (e)(1)(i)(J) of this section.		
(L) Wood Furniture Coating		
(*1*) Clear topcoat	0.67	(5.6)
(*2*) Opaque stain	0.56	(4.7)
(*3*) Pigmented coat	0.60	(5.0)
(*4*) Repair coat	0.67	(5.6)
(*5*) Sealer	0.67	(5.6)
(*6*) Semi-transparent stain	0.79	(6.6)
(*7*) Wash coat	0.73	(6.1)

	kg/l	lb/gal
NOTE: An owner or operator of a wood furniture coating operation subject to this paragraph shall apply all coatings, with the exception of no more than 37.8 l (10 gal) of coating per day used for touch-up and repair operations, using one or more of the following application systems: airless spray application system, air-assisted airless spray application system, electrostatic spray application system, electrostatic bell or disc spray application system, heated airless spray application system, roller coating, brush or wipe coating application system, or dip coating application system.		
(M) Existing Diesel-Electric Locomotive Coating Lines in Cook County		
(*1*) Extreme performance prime coat	0.42	(3.5)
(*2*) Extreme performance top-coat (air dried)	0.42	(3.5)
(*3*) Final repair coat (air dried)	0.42	(3.5)
(*4*) High-temperature aluminum coating	0.72	(6.0)
(*5*) All other coatings	0.36	(3.0)

(ii) *Daily-weighted average limitations.* No owner or operator of a coating line subject to the limitations of paragraph (e)(1)(i) of this section and complying by means of paragraph (e)(1)(ii) of this section shall operate the subject coating line unless the owner or operator has demonstrated compliance with paragraph (e)(1) (ii)(A), (ii)(B), (ii)(C), (ii)(D), (ii)(E) or (ii)(F) of this section (depending upon the source category) through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (e)(6)(iii) of this section.

(A) No owner or operator of a coating line subject to only one of the limitations from among paragraph (e)(1)(i)(A)(*1*), (i)(A)(*2*), (i)(A)(*4*), (i)(C), (i)(D), (i)(E), (i)(F), (i)(G), (i)(H), or (i)(I) of this section shall apply coating on any such coating line, during any day, whose daily-weighted average VOM content exceeds the emission limitation to which the coatings are subject.

(B) No owner or operator of a miscellaneous metal parts and products coating line subject to the limitations of paragraph (e)(1)(i)(J) of this section shall apply coatings to miscellaneous metal parts or products on the subject coating line unless the requirements in paragraph (e)(1)(ii)(B) (*1*) or (*2*) of this section are met.

(*1*) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(J) of this section, during the same day (*e.g.*, all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(*2*) For each coating line which applies coatings from more than one of the four coating categories in paragraph (e)(1)(i)(J) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(C) No owner or operator of a can coating facility subject to the limitations of paragraph (e)(1)(i)(B) of this section shall operate the subject coating facility using a coating with a VOM content in excess of the limitations specified in paragraph (e)(1)(i)(B) of this section unless all of the following requirements are met:

(*1*) An alternative daily emission limitation shall be determined according to paragraph (e)(1)(ii)(C)(*2*) of this section. Actual daily emissions shall never exceed the alternative daily emission limitation and shall be calculated by use of the following equation.

$$E_d = \sum_{i=1}^{n} V_i C_i$$

Where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day),

i = Subscript denoting a specific coating applied,

n = Total number of coatings applied in the can coating operation,

V_i = Volume of each coating applied for the day in units of l/day (gal/day) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

(*2*) The alternative daily emission limitation (A_d) shall be determined on a daily basis as follows:

$$A_d = \sum_{i=1}^{n} \frac{V_i L_i \left(D_i - C_i\right)}{\left(D_i - L_i\right)}$$

Where:

A_d = The VOM emissions allowed for the day in units of kg/day (lbs/day),

i = Subscript denoting a specific coating applied,

n = Total number of surface coatings applied in the can coating operation,

C_i = The VOM content of each surface coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

D_i = The density of VOM in each coating applied. For the purposes of calculating A_d, the density is 0.882 kg VOM/l VOM (7.36 lbs VOM/gal VOM),

V_i = Volume of each surface coating applied for the day in units of l (gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

L_i = The VOM emission limitation for each surface coating applied as specified in paragraph (e)(1)(i)(B) of this section in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

(D) No owner or operator of a heavy off-highway vehicle products coating line subject to the limitations of paragraph (e)(1)(i)(K) of this section shall apply coatings to heavy off-highway vehicle products on the subject coating line unless the requirements of paragraph (e)(1)(ii)(D) (*1*) or (*2*) of this section are met.

(*1*) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(K) of this section, during the same day (*e.g.*, all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(*2*) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(K) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(E) No owner or operator of a wood furniture coating line subject to the limitations of paragraph (e)(1)(i)(L) of this section shall apply coatings to wood furniture on the subject coating line unless the requirements of paragraph (e)(1)(ii)(E) (*1*) or (*2*) of this section, in addition to the requirements specified in the note to paragraph (e)(1)(i)(L) of this section, are met.

(*1*) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(L) of this section, during the same day (e.g., all coatings used on the line are subject to 0.67 kg/l [5.6 lbs/gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(*2*) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(L) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(F) No owner or operator of an existing diesel-electric locomotive coating line in Cook County, subject to the limitations of paragraph (e)(1)(i)(M) of this section shall apply coatings to diesel-electric locomotives on the subject coating line unless the requirements of paragraph (e)(1)(ii)(F) (*1*) or (*2*) of this section are met.

(*1*) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(M) of this section, during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/

gal]), the daily-weighted average VOM content shall not exceed the coating VOM content limit corresponding to the category of coating used, or

(*2*) For each coating line which applies coatings subject to more than one numerical emission limitation in paragraph (e)(1)(i)(M) of this section, during the same day, the owner or operator shall submit to and receive approval from the Administrator for a site-specific FIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy) must be satisfied.

(iii) Limitations in terms of kg (lbs) of VOM emissions per l (gal) of solids as applied at each coating applicator shall be determined by the following equation:

$$S = \frac{C}{1 - \left(\frac{C}{D}\right)}$$

Where:

S = The limitation on VOM emissions in terms of kg VOM/l (lbs VOM/gal) of solids,

C = The limitation on VOM emissions in terms of kg/l (lbs/gal) of coating (minus water and any compounds which are specifically excluded from the definition of VOM) specified in paragraph (e)(1)(i) of this section,

D = The density of VOM in the coating. For the purposes of calculating S, the density is 0.882 kg VOM/l VOM (7.36 lbs VOM/gal VOM).

(2) *Alternative emission limitations.* Any owner or operator of a coating line subject to paragraph (e)(1) of this section may comply with this paragraph, rather than with paragraph (e)(1) of this section, if a capture system and control device are operated at all times and the owner or operator demonstrates compliance with paragraphs (e)(2) (ii), (iii), (iv), (v), (vi) or (vii) of this section (depending upon the source category) through the applicable coating analysis and capture system and control device efficiency test methods and procedures specified in paragraph (a)(4) of this section and the recordkeeping and reporting requirements specified in paragraph (e)(6)(iv) of this section; and the control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use. The use of a capture system and control device, which does not demonstrate compliance with paragraph (e)(2) (ii), (iii), (iv), (v), (vi), or (vii), may only be used as an alternative to compliance with paragraph (e)(1) of this section if approved as a FIP revision.

(i) *Alternative add-on control methodologies.* (A) The coating line is equipped with a capture system and control device that provides 81 percent reduction in the overall emissions of VOM from the coating line and the control device has a 90 percent efficiency, or

(B) The system used to control VOM from the coating line is demonstrated to have an overall efficiency sufficient to limit VOM emissions to no more than what is allowed under paragraph (e)(1) of this section. Use of any control system other than an afterburner, carbon absorption, condensation, or absorption scrubber system can only be allowed if approved by the Administrator as a SIP or FIP revision. Transfer efficiency credits can only be allowed if approved by the Administrator as a SIP or FIP revision. Baseline transfer efficiencies and transfer efficiency test methods must be approved by the Administrator.

Such overall efficiency is to be determined as follows:

(*1*) Obtain the emission limitation from the appropriate paragraph in (e)(1) of this section,

(*2*) Calculate ''S'' according to the equation in paragraph (e)(1)(iii) of this section,

(*3*) Calculate the overall efficiency required according to paragraph (a)(4)(v) of this section. For the purposes of calculating this value, according to the equation in (a)(4)(v)(B) of this section VOM_I is equal to the value of ''S'' as determined above in (i)(B)(*2*).

(ii) No owner or operator of a coating line subject to only one of the emission limitations from among paragraph (e)(1)(i)(A)(*1*), (e)(1)(i)(A)(*2*), (e)(1)(i)(A)(*4*), (e)(1)(i)(C), (e)(1)(i)(D),

(e)(1)(i)(E), (e)(1)(i)(F), (e)(1)(i)(G), (e)(1)(i)(H), or (e)(1)(i)(I) of this section and equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met. No owner or operator of a coating line subject to paragraph (e)(1)(i)(A)(*3*) of this section and equipped with a capture system and control device shall operate the coating line unless the owner or operator demonstrates compliance with the topcoat limitation in accordance with the topcoat protocol for automobile or light-duty trucks referenced in paragraph (a)(4)(ii) of this section.

(iii) No owner or operator of a miscellaneous metal parts and products coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(J) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(iv) No owner or operator of a heavy off-highway vehicle products coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(K) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gal]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(v) No owner or operator of an existing diesel-electric locomotive coating line in Cook County which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(M) of this section (e.g., all coatings used on the line are subject to 0.42 kg/l [3.5 lbs/gals]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met.

(vi) No owner or operator of a wood furniture coating line which applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within paragraph (e)(1)(i)(L) (*e.g.*, all coatings used on the line are subject to 0.67 kg/l [5.6 lbs/gal]), and which is equipped with a capture system and control device shall operate the subject coating line unless the requirements in paragraph (e)(2)(i) (A) or (B) of this section are met. If compliance is achieved by meeting the requirements in paragraph (e)(2)(i)(B) of this section, then the provisions in the note to paragraph (e)(1)(i)(L) of this section must also be met.

(vii) No owner or operator of a can coating facility and equipped with a capture system and control device shall operate the subject coating facility unless the requirements in paragraph (e)(2)(vii) (A) or (B) of this section are met.

(A) An alternative daily emission limitation shall be determined according to paragraph (e)(1)(ii)(C)(*2*) of this section. Actual daily emissions shall never exceed the alternative daily emission limitation and shall be calculated by use of the following equation:

$$E_d = \sum_{i=1}^{n} V_i C_i \left(1 - F_i\right)$$

Where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day),

i = Subscript denoting the specific coating applied,

n = Total number of surface coatings as applied in the can coating operation,

V_i = Volume of each coating as applied for the day in units of l/day (gal/day) of coating (minus water and any compounds which are specifically exempted from the definition of VOM),

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM), and

F_i = Fraction, by weight, of VOM emissions from the surface coating, reduced or prevented from being emitted to the ambient air. This is the overall efficiency of the capture system and control device.

(B) The coating line is equipped with a capture system and control device

that provide 75 percent reduction in the overall emissions of VOM from the coating line and the control device has a 90 percent efficiency.

(3) *Exemptions from emission limitations*—(i) *Exemptions for all source categories except wood furniture coating.* The limitations of paragraph (e) of this section shall not apply to coating lines within a facility, that otherwise would be subject to the same subparagraph of paragraph (e)(1)(i) of this section (because they belong to the same source category, e.g. can coating), provided that combined actual emissions of VOM from all lines at the facility subject to that subparagraph never exceed 6.8 kg/day (15 lbs/day) before the application of capture systems and control devices. (For example, can coating lines within a plant would not be subject to the limitations of subparagraph (e)(1)(i)(B) of this section if the combined actual emissions of VOM from the can coating lines never exceed 6.8 kg/day (15 lbs/day) before the application of capture systems and control devices.) Volatile organic material emissions from heavy off-highway vehicle products coating lines must be combined with VOM emissions from miscellaneous metal parts and products coating lines to determine applicability. Any owner or operator of a coating facility shall comply with the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (e)(6)(i) of this section if total VOM emissions from the subject coating lines are always less than or equal to 6.8 kg/day (15 lbs/day) before the application of capture systems and control devices and, therefore, are not subject to the limitations of paragraph (e)(1) of this section. Once a category of coating lines at a facility is subject to the limitations in paragraph (e)(1) of this section, the coating lines are always subject to the limitations in paragraph (e)(1) of this section.

(ii) *Applicability for wood furniture coating.* (A) The limitations of paragraph (e) of this section shall apply to a plant's wood furniture coating lines if the plant contains process emission sources, not regulated by paragraphs (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1), or subparts B, Q (excluding sections 215.432 and 215.436), R (excluding sections 215.447, 215.450, and 215.452), S, V, X, Y (sections 215.582–215.584), or Z of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), which as a group both:

(*1*) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(*2*) Are not limited to less than 91 Mg (100 tons) of VOM per calendar year if no air pollution control equipment were used, through production or capacity limitations contained in a federally enforceable construction permit or SIP or FIP version.

(B) If a plant ceases to fulfill the criteria of paragraph (e)(3)(ii)(A) of this section, the limitations of paragraph (e)(1)(i)(L) of this section shall continue to apply to any wood furniture coating line which was ever subject to the limitations of paragraph (e)(1)(i)(L) of this section.

(C) For the purposes of paragraph (e)(3)(ii) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules), section, or paragraph if it is subject to the limitations of that subpart (of the Illinois rules), section, or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules), section, or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(D) Any owner or operator of a wood furniture coating line to which the limitations of paragraph (e) of this section are not applicable due to the criteria in paragraph (e)(3)(ii) of this section shall, upon request by the Administrator, submit records to the Administrator within 30 calendar days from the date of the request that document that the coating line is exempt from the limitations of paragraph (e) of this section.

(4) *Exemption from general rule on use of organic material.* No owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section is required to meet the limitations of subpart K (section 215.301 or

215.302) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), after the date by which the coating line is required to meet paragraph (e)(1) of this section.

(5) *Compliance schedule.* Except as specified in paragraph (e)(7) of this section, every owner or operator of a coating line (of a type included within paragraph (e)(1)(i) of this section) shall comply with the requirements of paragraph (e)(1),(e)(2) or (e)(3) of this section and paragraph (e)(6) of this section in accordance with the appropriate compliance schedule as specified in paragraph (e)(5)(i),(ii),(iii) or (iv) of this section.

(i) No owner or operator of a coating line which is exempt from the limitations of paragraph (e)(1) of this section because of the criteria in paragraph (e)(3)(i) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraph (e)(6)(i) of this section. Wood furniture coating lines are not subject to paragraph (e)(6)(i) of this section.

(ii) No owner or operator of a coating line complying by means of paragraph (e)(1)(i) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(i) and (e)(6)(ii) of this section.

(iii) No owner or operator of a coating line complying by means of paragraph (e)(1)(ii) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(ii) and (e)(6)(iii) of this section.

(iv) No owner or operator of a coating line complying by means of paragraph (e)(2) of this section shall operate said coating line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(2) and (e)(6)(iv) of this section.

(6) *Recordkeeping and reporting.* The VOM content of each coating and the efficiency of each capture system and control device shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (e)(6) of this section.

(i) Any owner or operator of a coating line which is exempted from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section shall comply with the following:

(A) By July 1, 1991, the owner or operator of a facility referenced in paragraph (e)(6)(i) of this section shall certify to the Administrator that the facility is exempt under the provisions of paragraph (e)(3)(i) of this section. Such certification shall include:

(*1*) A declaration that the facility is exempt from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section; and

(*2*) Calculations which demonstrate that the combined VOM emissions from all coating lines at the facility never exceed 6.8 kg (15 lbs) per day before the application of capture systems and control devices. The following equation shall be used to calculate total VOM emissions:

$$T_e = \sum_{j=1}^{m} \sum_{i=1}^{n} (A_i B_i) j$$

Where:

T_e = Total VOM emissions from coating lines at a facility each day before the application of capture systems and control devices in units of kg/day (lbs/day),

m = Number of coating lines at the facility,

j = Subscript denoting an individual coating line,

n = Number of different coatings as applied each day on each coating line at the facility,

i = Subscript denoting an individual coating,

A_i = Weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line at the facility in units of kg VOM/l (lbs VOM/gal), and

B_i = Volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line at the facility in units of l/day (gal/day). The instrument or method by which the owner or operator accurately measured or calculated the volume of each coating as applied on each coating line each day shall be described in the certification to the Administrator.

(B) On and after July 1, 1991, the owner or operator of a facility referenced in paragraph (e)(6)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating as applied on each coating line.

(*2*) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(C) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (e)(1) of this section because of paragraph (e)(3)(i) of this section shall notify the Administrator of any record showing that total VOM emissions from the coating facility exceed 6.8 kg (15 lbs) in any day before the application of capture systems and control devices shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(ii) Any owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(i) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance from an existing subject coating line from paragraph (e)(1)(ii) or paragraph (e)(2) to paragraph (e)(1)(i) of this section; the owner or operator of a subject coating line shall certify to the Administrator that the coating line will be in compliance with paragraph (e)(1)(i) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(*1*) The name and identification number of each coating as applied on each coating line.

(*2*) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*3*) For coating lines subject to paragraph (e)(1)(i)(A)(*3*) of this section, certification shall include:

(*i*) The name and identification number of each coating line which will comply by means of paragraph (e)(1)(i)(A)(*3*) of this section,

(*ii*) The name and identification number of each coating as applied on each coating line,

(*iii*) The weight of VOM per volume of each coating as applied on each coating line,

(*iv*) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line,

(*v*) The method by which the owner or operator will create and maintain records each day as required in paragraph (e)(6)(ii)(B) of this section for coating lines subject to paragraph (e)(1)(i)(A)(*3*) of this section,

(*vi*) An example format in which the records required in paragraph (e)(6)(ii)(B) of this section for coating lines subject to paragraph (e)(1)(i)(A)(*3*) of this section.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating as applied on each coating line.

(*2*) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*3*) For coating lines subject to paragraph (e)(1)(i)(A)(*3*) of this section, the owner or operator shall maintain all records necessary to calculate the daily-weighted average VOM content from the coating line in accordance with the proposal submitted, and approved by the Administrator, pursuant to paragraph (e)(1)(A)(*3*) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating

line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of paragraph (e)(1)(i) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation, except that any record showing a violation of paragraph (e)(1)(i)(A)(*3*) of this section shall be reported by sending a copy of such record to the Administrator within 15 days from the end of the month in which the violation occurred.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (e)(1) of this section from paragraph (e)(1)(i) to paragraph (e)(1)(ii) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6) (iii)(A) or (iv)(A) of this section, respectively. Upon changing the method of compliance with paragraph (e)(1) of this section from paragraph (e)(1)(i) to paragraph (e)(1)(ii) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6) (iii) or (iv) of this section, respectively.

(*3*) For coating lines subject to paragraph (e)(1)(i)(A)(*3*) of this section, the owner or operator shall notify the Administrator of any change to the topcoating operation at least 30 days before the change is effected. The Administrator shall determine whether or not recertification testing is required. If the Administrator determines that recertification testing is required, then the owner or operator shall submit a proposal to the Administrator to test within 30 days and retest within 30 days of the Administrator's approval of the proposal.

(iii) Any owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(ii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance for an existing subject coating line from paragraph (e)(1)(i) or paragraph (e)(2) to paragraph (e)(1)(ii) of this section; the owner or operator of the subject coating line shall certify to the Administrator that the coating line will be in compliance with paragraph (e)(1)(ii) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(*1*) The name and identification number of each coating line which will comply by means of paragraph (e)(1)(ii) of this section.

(*2*) The name and identification number of each coating as applied on each coating line.

(*3*) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*4*) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line.

(*5*) The method by which the owner or operator will create and maintain records each day as required in paragraph (e)(6)(iii)(B) of this section.

(*6*) An example of the format in which the records required in paragraph (e)(6)(iii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(1) of this section and complying by means of paragraph (e)(1)(ii) of this section, shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating as applied on each coating line.

(*2*) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*3*) The daily-weighted average VOM content of all coatings as applied on each coating line as defined in paragraph (a)(3) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of paragraph (e)(1)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (e) from paragraph (e)(1)(ii) to paragraph (e)(1)(i) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii)(A) or (iv)(A), respectively. Upon changing the method of compliance with paragraph (e) from paragraph (e)(1)(ii) to paragraph (e)(1)(i) or paragraph (e)(2) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii) or (iv), respectively.

(iv) Any operator or owner of a coating line subject to the limitations of paragraph (e)(2) of this section and complying by means of paragraph (e)(2)(ii), (iii), (iv), (v), (vi) or (vii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new coating line, or upon changing the method of compliance for an existing coating line from paragraph (e)(1) (i) or (ii) to paragraph (e)(2) of this section; the owner or operator of the subject coating line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject coating line will be in compliance with paragraph (e)(2) of this section on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a coating line subject to the limitations of paragraph (e)(2) of this section and complying by means of paragraph (e)(2) (ii), (iii), (iv), (v), (vi) or (vii) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The weight of VOM per volume of coating solids as applied each day on each coating line, if complying pursuant to paragraph (e)(2)(i)(B) of this section.

(*2*) Control device monitoring data.

(*3*) A log operating time for the capture system, control device, monitoring equipment and the associated coating line.

(*4*) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of paragraph (e)(2) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (e) from paragraph (e)(2) to paragraph (e)(1)(i) or paragraph (e)(1)(ii) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii)(A) or (iii)(A) of this section, respectively. Upon changing the method of compliance with paragraph (e) from paragraph (e)(2) to paragraph (e)(1)(i) or paragraph (e)(1)(ii) of this section, the owner or operator shall comply with all requirements of paragraph (e)(6)(ii) or (iii) of this section, respectively.

(7) *Compliance schedule for diesel electric locomotive coatings.* Notwithstanding any other provision of this subpart, the compliance date for the emission limitations and standards for ''topcoat'' and ''final repair coat'' operations only as applied to General Motors Corporation at their diesel electric locomotive coating lines in Cook County, Illinois, codified at 40 CFR 52.741(e)(1)(i)(M) (*2*) and (*3*) is specified in this paragraph (e)(7). Compliance with the requirements of paragraph (e)(1), (e)(2) or (e)(3) of this section and paragraph (e)(6) of this section must be in accordance with the appropriate compliance schedule as specified in paragraph (e)(7)(i),(ii),(iii), or (iv) of this section.

(i) No owner or operator of a coating line which is exempt from the limitations of paragraph (e)(1) of this section because of the criteria in paragraph

(e)(3)(i) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraph (e)(6)(i) of this section.

(ii) No owner or operator of a coating line complying by means of paragraph (e)(1)(i) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraph (e)(1)(i) and (e)(6)(ii) of this section.

(iii) No owner or operator of a coating line complying by means of paragraph (e)(1)(ii) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(1)(ii) and (e)(6)(iii) of this section.

(iv) No owner or operator of a coating line complying by means of paragraph (e)(2) of this section shall operate said coating line on or after March 25, 1995, unless the owner or operator has complied with, and continues to comply with, paragraphs (e)(2) and (e)(6)(iv) of this section.

(8) The control requirements in this paragraph apply to the wood coating line, which coats wooden globe stand components, at Replogle Globes, Inc. (Replogle) Broadview facility in Cook County, Illinois, instead of the control requirements in paragraphs (e)(1) and (e)(2) of this section. Compliance with this paragraph must be demonstrated through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section.

(i) After October 6, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 6.59 pounds (lbs) Volatile Organic Material (VOM) per gallon of stain (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such stain consists of #9250 Walnut NGR Stain (RGI # W06000100), #9974 Cherry NGR Stain (RGI # W06003500) and #9943 Ash NGR Stain (RGI # W06003600). The Administrator must be notified at least ten (10) days prior to the use of any replacement stains.

(B) 5.53 lbs VOM per gallon of Sanding Sealer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such sealer consists of #15304 High Build Sanding Sealer (RGI # W06003700). The Administrator must be notified at least ten (10) days prior to the use of any replacement sanding sealer.

(C) 5.20 lbs VOM per gallon of lacquer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat wooden globe stand components. Such lacquer consists of #15352 High Build Lacquer (RGI # W06003300). The Administrator shall be notified at least ten (10) days prior to the use of any replacement lacquer.

(ii) After October 6, 1991, the volume of coatings used shall not exceed the following:

(A) 5,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(A) of this section. The yearly volume of coatings used are to be calculated as follows:

(*1*) Compute the volume of specified coating used each month by the 15th of the following month.

(*2*) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) 4,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(B) of this section. The yearly volume of the coatings used are to be calculated as specified in paragraphs (e)(8)(ii)(A)(1) and (e)(8)(ii)(A)(2) of this section.

(C) 5,000 gallons per year total for all coatings specified in paragraph (e)(8)(i)(C) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (e)(8)(ii)(A)(1) and (e)(8)(ii)(A)(2) of this section.

(iii) Beginning on October 6, 1991, the owner and operator of the Replogle Globes, Inc. plant in Broadview, Illinois shall keep the following records for each month. All records shall be retained at Replogle Globes, Inc. for three (3) years and shall be made available to the Administrator on request.

(A) the name and identification number of each coating as applied on any wood coating line.

(B) The weight of VOM per volume (determined in accordance with the procedures in paragraph (a)(4)(i) of this section) and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any wood coating line.

(9) [Reserved]

(10) Until December 31, 1996, the control and recordkeeping requirements in this paragraph apply to the three solvent-based polyester paper coating lines (Lines C, D and E) at Riverside Laboratories' Kane County, Illinois facility, instead of the control requirements in paragraphs (e)(1) and (e)(2) of this section and the recordkeeping requirements in paragraph (e)(6) of this section. Compliance with this paragraph must be demonstrated through the applicable coating analysis test methods and procedures specified in paragraph (a)(4)(i) of this section. The requirements in paragraphs (e)(1), (e)(2), and (e)(6) of this section shall apply to Riverside on and after December 31, 1996.

(i) After December 21, 1995, no coatings shall at any time be applied on Lines C, D or E which exceed 3.5 pounds (lbs.) volatile organic material (VOM) per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM), except as provided in paragraph (e)(10)(ii) of this section.

(ii) After December 21, 1995, the following specifically identified coatings may exceed 3.5 lbs. VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) only if they are applied on Line E and they do not exceed the limits indicated below (minus water and any compounds which are specifically exempted from the definition of VOM):

EXP–5027—4.34 lbs./gallon
PD 75 CLR—4.19 lbs./gallon
PD 75 BRN—4.18 lbs./gallon
SQZ–54—3.88 lbs./gallon
SPX–34GL—3.51 lbs./gallon

(iii) That portion of Riverside's polyester production which is manufactured with the use of any VOC, from Lines C, D, and E, may not exceed the following levels: 35 million square feet per year during and after 1992, 29 million square feet per year during and after 1994, and 25 million square feet during 1996. Compliance with this requirement shall be determined by adding the polyester production from any 12 consecutive months during and after the years indicated, through 1996. That is, the polyester production for any 12 consecutive months starting with January 1992 cannot exceed 35 million square feet; the polyester production from any 12 consecutive months starting with January 1994 cannot exceed 29 million square feet; and the polyester production for the twelve months from January through December 1996 cannot exceed 25 million square feet. Only those square feet of polyester whose production involves the use of VOC need to be restricted by the production levels in this paragraph (e)(10)(iii) of this section.

(iv) By December 21, 1995, Riverside shall certify to the Administrator that its polyester coating operations will be in compliance with paragraphs (e)(10)(i), (e)(10)(ii), and (e)(10)(iii) of this section. Such certification shall include the following:

(A) The name and identification number of each coating as applied on coating lines C, D and E.

(B) The weight of VOM per volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on each coating line.

(v) The Administrator must be notified at least 10 days prior to the use of any polyester coating not previously identified pursuant to paragraph (e)(10)(iv) of this section. This notification must include the information specified in paragraphs (e)(10)(iv)(A) and (e)(10)(iv)(B) of this section.

(vi) On and after December 21, 1995, Riverside shall collect and record all of the following information each day for each coating and maintain the information at the facility for a period of 3 years:

(A) The name and identification number of each coating as applied.

(B) The weight of VOM per volume of each coating (minus water and any

compounds which are specifically exempted from the definition of VOM) as applied each day.

(C) Any record showing a VOM content in excess of the emission limits in paragraph (e)(10)(i) or (e)(10)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following its collection.

(D) Any VOM besides acetone used in any coating must be identified.

(vii) Starting with the first full month after December 21, 1995, Riverside shall collect and record the figures on polyester production (in square feet), for each month and maintain the information at the facility for a period of at least 3 years.

(viii) Regardless of any other provision of paragraph (e)(10) of this section, after August 21, 1995 no coating which contains any VOM other than acetone shall at any time be applied on Line C, D, or E which exceeds 2.9 lbs. VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM).

(f)–(g) [Reserved]

(h) *Printing and publishing*—(1) *Flexographic and rotogravure printing.* (i) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line shall apply at any time any coating or ink unless the VOM content does not exceed the limitation specified in either paragraph (h)(1)(i)(A) or (B) of this section. Compliance with this paragraph must be demonstrated through the applicable coating or ink analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (h)(4)(ii) of this section. As an alternative to compliance with paragraph (h)(1)(i) of this section, a subject printing line may meet the requirements of paragraph (h)(1)(ii) or (iii) of this section.

(A) Forty percent VOM by volume of the coating and ink (minus water and any compounds which are specifically exempted from the definition of VOM), or

(B) Twenty-five percent VOM by volume of the volatile content in the coating and ink.

(ii) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line shall apply coatings or inks on the subject printing line unless the weighted average, by volume, VOM content of all coatings and inks as applied each day on the subject printing line does not exceed the limitation specified in either paragraph (h)(1)(i)(A) (as determined by paragraph (h)(1)(ii)(A) or (h)(1)(i)(B) (as determined by paragraph (h)(1)(ii)(B) of this section. Compliance with this paragraph must be demonstrated through the applicable coating or ink analysis test methods and procedures specified in paragraph (a)(4)(i) of this section and the recordkeeping and reporting requirements specified in paragraph (h)(4)(iii) of this section.

(A) The following equation shall be used to determine if the weighted average VOM content of all coatings and inks as applied each day on the subject printing line exceeds the limitation specified in paragraph (h)(1)(i)(A) of this section.

$$VOM_{(i)(A)} = \frac{\sum_{i=1}^{n} C_i L_i \left(V_{si} + V_{VOMi}\right)}{\sum_{i=1}^{n} L_i \left(V_{si} + V_{VOMi}\right)}$$

Where:

$VOM_{(i)(A)}$ = The weighted average VOM content in units of percent VOM by volume of all coatings and inks (minus water and any compounds which are specifically exempted from the definition of VOM) used each day,

i = Subscript denoting a specific coating or ink as applied,

n = The number of different coatings and/or inks as applied each day on a printing line,

C_i = The VOM content in units of percent VOM by volume of each coating or ink as applied (minus water and any compounds which are specifically exempted from the definition of VOM),

L_i = The liquid volume of each coating or ink as applied in units of l (gal),

V_{si} = The volume fraction of solids in each coating or ink as applied, and

V_{VOMi} = The volume fraction of VOM in each coating or ink as applied.

(B) The following equation shall be used to determine if the weighted average VOM content of all coatings and inks as applied each day on the subject printing line exceeds the limitation specified in paragraph (h)(1)(i)(B) of this section.

$$VOM_{(i)(B)} = \frac{\sum_{i=1}^{n} C_i L_i V_{VMi}}{\sum_{i=1}^{n} L_i V_{VMi}}$$

Where:

$VOM_{(i)(B)}$ = The weighted average VOM content in units of percent VOM by volume of the volatile content of all coatings and inks used each day,

i = Subscript denoting a specific coating or ink as applied,

n = The number of different coatings and/or inks as applied each day on each printing line,

C_i = The VOM content in units of percent VOM by volume of the volatile matter in each coating or ink as applied,

L_i = The liquid volume of each coating or ink as applied in units of l (gal), and

V_{VMi} = The volume fraction of volatile matter in each coating or ink as applied.

(iii) No owner or operator of a subject flexographic, packaging rotogravure or publication rotogravure printing line equipped with a capture system and control device shall operate the subject printing line unless the owner or operator meets the requirements in paragraph (h)(1)(iii) (A), (B) or (C) and paragraphs (h)(1)(iii) (D), (E) and (F) of this section.

(A) A carbon adsorption system is used which reduces the captured VOM emissions by at least 90 percent by weight, or

(B) An incineration system is used which reduces the captured VOM emissions by at least 90 percent by weight, or

(C) An alternative VOM emission reduction system is demonstrated to have at least a 90 percent control device efficiency and the alternative emission reduction system is approved by the Administrator as a SIP or FIP revisions, and

(D) The printing line is equipped with a capture system and control device that provides an overall reduction in VOM emissions of at least:

(*1*) 75 percent where a publication rotogravure printing line is employed, or

(*2*) 65 percent where a packaging rotogravure printing line is employed, or

(*3*) 60 percent where a flexographic printing line is employed, and

(E) The control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv)(B) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use, and

(F) The capture system and control device are operated at all times when the subject printing line is in operation. The owner or operator shall demonstrate compliance with this paragraph by using the applicable capture system and control device test methods and procedures specified in paragraphs (a)(4) (iii) through (vi) of this section and by complying with the recordkeeping and reporting requirements specified in paragraph (h)(4)(iv) of this section.

(2) *Applicability*. (i) The limitations of paragraph (h)(1) of this section apply to all flexographic and rotogravure printing lines at a subject facility. All facilities with flexographic and/or rotogravure printing lines are subject facilities unless:

(A) Total maximum theoretical emissions of VOM from all flexographic and rotogravure printing line(s) at the facility never exceed 90.7 Mg (100 tons) per calendar year before the application of capture systems and control devices, or

(B) A federally enforceable construction permit or SIP or FIP revision for all flexographic and rotogravure printing line(s) at a facility requires the owner or operator to limit production or capacity of these printing line(s) to reduce total VOM emissions from all flexographic and rotogravure printing line(s) to 90.7 Mg (100 tons) or less per calendar year before the application of capture systems and control devices.

(ii) Upon achieving compliance with paragraph (h) of this section, the emission source is not required to meet subpart K (sections 215.301 or 215.302) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742).

Emission sources exempt from paragraph (h) of this section are subject to subpart K (sections 215.301 or 215.302). Rotogravure or flexographic equipment used for both roll printing and paper coating are subject to paragraph (h) of this section.

(iii) Once subject to the limitations of paragraph (h)(1) of this section, a flexographic or rotogravure printing line is always subject to the limitations of paragraph (h)(1) of this section.

(iv) Any owner or operator of any flexographic or rotogravure printing line that is exempt from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section is subject to the recordkeeping and reporting requirements specified in paragraph (h)(4)(i) of this section.

(3) *Compliance schedule.* Every owner or operator of a flexographic and/or rotogravure printing line shall comply with the applicable requirements of paragraph (h)(1) of this section and paragraph (h)(4) of this section in accordance with the applicable compliance schedule specified in paragraph (h)(3) (i), (ii), (iii) or (iv) of this section.

(i) No owner or operator of a flexographic or rotogravure printing line which is exempt from the limitations of paragraph (h)(1) of this section because the criteria in paragraph (h)(2) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraph (h)(4)(i) of this section.

(ii) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(i) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(i) and (h)(4)(ii) of this section.

(iii) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(ii) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(ii) and (h)(4)(iii) of this section.

(iv) No owner or operator of a flexographic or rotogravure printing line complying by means of paragraph (h)(1)(iii) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(1)(iii) and (h)(4)(iv) of this section.

(4) *Recordkeeping and reporting.* The VOM content of each coating and ink and the efficiency of each capture system and control device shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (h)(4) of this section.

(i) Any owner or operator of a printing line which is exempted from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section shall comply with the following:

(A) By July 1, 1991, the owner or operator of a facility to which paragraph (h)(4)(i) of this section is applicable shall certify to the Administrator that the facility is exempt under the provisions of paragraph (h)(2) of this section. Such certification shall include:

(*1*) A declaration that the facility is exempt from the limitations of the criteria in paragraph (h)(1) of this section because of paragraph (h)(2) of this section, and

(*2*) Calculations which demonstrate that total maximum theoretical emissions of VOM from all flexographic and rotogravure printing lines at the facility never exceed 90.7 Mg (100 tons) per calendar year before the application of capture systems and control devices. Total maximum theoretical emissions of VOM for a flexograhpic or rotogravure printing facility is the sum of maximum theoretical emissions of VOM from each flexographic and rotogravure printing line at the facility. The following equation shall be used to calculate total maximum theoretical emissions of VOM per calendar year before the application of capture systems and control devices for each flexographic and rotogravure printing line at the facility:

$$E_p = A \times B$$

Where:

E_p = Total maximum theoretical emissions of VOM from one flexographic or rotogravure printing line in units of kg/year (lbs/year),

A = Weight of VOM per volume of solids of the coating or ink with the highest VOM content as applied each year on the printing line in units of kg VOM/l (lbs VOM/gal) of coating or ink solids, and

B = Total volume of solids for all coatings and inks that can potentially be applied each year on the printing line in units of l/year (gal/year). The instrument and/or method by which the owner or operator accurately measured or calculated the volume of each coating and ink as applied and the amount that can potentially be applied each year on the printing line shall be described in the certification to the Administrator.

(B) On and after July 1, 1991, the owner or operator of a facility referenced in paragraph (h)(4)(i) of this section shall collect and record all of the following information each year for each printing line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating and ink as applied on each printing line.

(*2*) The VOM content and the volume of each coating and ink as applied each year on each printing line.

(C) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (h)(1) of this section because of the criteria in paragraph (h)(2) of this section shall notify the Administrator of any record showing that total maximum theoretical emissions of VOM from all printing lines exceed 90.7 Mg (100 tons) in any calendar year before the application of capture systems and control devices, shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(ii) Any owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(i) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance from an existing subject printing line from paragraph (h)(1) (ii) or (iii) of this section to paragraph (h)(1)(i) of this section, the owner or operator of a subject printing line shall certify to the Administrator that the printing line will be in compliance with paragraph (h)(1)(i) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(*1*) The name and identification number of each coating and ink as applied on each printing line.

(*2*) The VOM content of each coating and ink as applied each day on each printing line.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(i) of this section shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating and ink as applied on each printing line.

(*2*) The VOM content of each coating and ink as applied each day on each printing line.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of paragraph (h)(1)(i) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) of this section from paragraph (h)(1)(i) of this section to paragraph (h)(1) (ii) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (iii)(A) or (iv)(A) of this section respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(i) to paragraph (h)(1) (ii) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (iii) or (iv) of this section, respectively.

(iii) Any owner or operator of a printing line subject to the limitations of

paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(ii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing subject printing line from paragraph (h)(1) (i) or (iii) of this section to paragraph (h)(1)(ii) of this section, the owner or operator of the subject printing line shall certify to the Administrator that the printing line will be in compliance with paragraph (h)(1)(ii) of this section on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(*1*) The name and identification number of each printing line which will comply by means of paragraph (h)(1)(ii) of this section.

(*2*) The name and identification number of each coating and ink available for use on each printing line.

(*3*) The VOM content of each coating and ink as applied each day on each printing line.

(*4*) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating and ink as applied each day on each printing line.

(*5*) The method by which the owner or operator will create and maintain records each day as required in paragraph (h)(4)(iii)(B) of this section.

(*6*) An example of the format in which the records required in paragraph (h)(4)(iii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(ii) of this section shall collecting line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating and ink as applied on each printing line.

(*2*) The VOM content and the volume of each coating and ink as applied each day on each printing line.

(*3*) The daily-weighted average VOM content of all coatings and inks as applied on each printing line.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of paragraph (h)(1)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) of this section from paragraph (h)(1)(ii) to paragraph (h)(1)(i) or (iii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4)(ii)(A) or (iv)(A), respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(ii) to paragraph (h)(1)(i) or (iii), the owner or operator shall comply with all requirements of paragraph (h)(4)(ii) or (iv) of this section, respectively.

(iv) Any owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(iii) of this section shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(1)(i) or (ii) of this section to paragraph (h)(1)(iii) of this section, the owner or operator of the subject printing line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(1)(iii) of this section on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(1) of this section and complying by means of paragraph (h)(1)(iii) of this section shall collect and record all of the following information each day for each printing line and maintain the information at the facility for a period of three years:

(*1*) Control device monitoring data.

(*2*) A log of operating time for the capture system, control device, monitoring equipment and the associated printing line.

(*3*) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administration in the following instances:

(*1*) Any record showing violation of paragraph (h)(1)(iii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(iii) to paragraph (h)(1) (i) or (ii), the owner or operator shall comply with all requirements of paragraph (h)(4) (ii)(A) or (iii)(A) of this section, respectively. Upon changing the method of compliance with paragraph (h)(1) from paragraph (h)(1)(iii) to paragraph (h)(1) (i) or (ii) of this section, the owner or operator shall comply with all requirements of paragraph (h)(4) (ii) or (iii) of this section, respectively.

(5) *Heatset-web-offset lithographic printing*—(i) *Applicability*. (A) The limitations of paragraph (h)(5)(ii) of this section apply to all heatset-web-offset lithographic printing lines at a subject facility. All facilities with heatset-web-offset lithographic printing lines are subject facilities unless:

(*1*) Total maximum theoretical emissions of VOM from all heatset-web-offset lithographic printing lines at the facility never exceed 90.7 Mg (100 tons) per calendar year in the absence of air pollution control equipment, or

(*2*) A federally enforceable construction permit or SIP or FIP revision for all heatset-web-offset lithographic printing line(s) at a facility requires the owner or operator to limit production or capacity of these printing line(s) to reduce total VOM emissions from all heatset-web-offset lithographic printing line(s) to 90.7 Mg (100 tons) per calendar year or less in the absence of air pollution control equipment, and

(B) Any owner or operator of any heatset-web-offset lithographic printing line that is exempt from the limitations in paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i)(A) of this section shall be subject to the recordkeeping and reporting requirements in paragraph (h)(5)(iii)(A) of this section.

(ii) *Specific provisions*. No owner or operator of a subject heatset-web-offset printing line may cause or allow the operation of the subject heatset-web-offset printing line unless the owner or operator meets the requirements in paragraph (h)(5)(ii) (A) or (B) of this section and the requirements in paragraphs (h)(5)(ii) (C) and (D) of this section.

(A) An afterburner system is installed and operated that reduces 90 percent of the VOM emissions from the dryer exhaust, or

(B) The fountain solution contains no more than 8 percent, by weight, of VOM and a condensation recovery system is installed and operated that removes at least 75 percent of the non-isopropyl alcohol organic materials from the dryer exhaust, and

(C) The control device is equipped with the applicable monitoring equipment specified in paragraph (a)(4)(iv)(B) of this section and the monitoring equipment is installed, calibrated, operated and maintained according to vendor specifications at all times the control device is in use, and

(D) The control device is operated at all times when the subject printing line is in operation. The owner or operator shall demonstrate compliance with paragraph (h)(5) of this section by using the applicable test methods and procedures specified in paragraphs (a)(4) (i), (iv), and (vi) of this section and by complying with the recordkeeping and reporting requirements specified in paragraph (h)(5)(iii) of this section.

(iii) *Recordkeeping and reporting*. The VOM content of each fountain solution and ink and the efficiency of each control device shall be determined by the applicable test methods and procedures

specified in paragraph (a)(4) of this section to establish the records required under paragraph (h)(5)(iii) of this section.

(A) Any owner or operator of a printing line which is exempted from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall comply with the following:

(*1*) By July 1, 1991, the owner or operator of a facility to which paragraph (h)(5)(iii)(A) of this section is applicable shall certify to the Administrator that the facility is exempt under the provisions of paragraph (h)(5)(i) of this section. Such certification shall include:

(*i*) A declaration that the facility is exempt from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section, and

(*ii*) Calculations which demonstrate that total maximum theoretical emissions of VOM from all heatset-web-offset lithographic printing lines at the facility never exceed 90.7 Mg (100 tons) per calendar year before the application of air pollution control equipment. Total maximum theoretical emissions of VOM for a heatset-web-offset lithographic printing facility is the sum of maximum theoretical emissions of VOM from each heatset-web-offset lithographic printing line at the facility. The following equation shall be used to calculate total maximum theoretical emissions of VOM per calendar year in the absence of air pollution control equipment for each heatset-web-offset lithographic printing line at the facility.

$$E_p = (A \times B) + \frac{(C \times D)}{100}$$

Where:

E_p = Total maximum theoretical emissions of VOM from one heatset-web-offset printing line in units of kg/year (lbs/year),

A = Weight of VOM per volume of solids of ink with the highest VOM content as applied each year on the printing line in units of kg VOM/l (lbs VOM/gal) of solids, and

B = Total volume of solids for all inks that can potentially be applied each year on the printing line in units of l/year (gal/year). The instrument or method by which the owner or operator accurately measured or calculated the volume of each ink as applied and the amount that can potentially be applied each year on the printing line shall be described in the certification to the Administrator.

C = The weight percent VOM of the fountain solution with the highest VOM content.

D = The total volume of fountain solution that can potentially be used each year on the printing line in units of l/year (gal/year). The instrument and/or method by which the owner or operator accurately measured or calculated the volume of each fountain solution used and the amount that can potentially be used each year on the printing line shall be described in the certification to the Administrator.

(*2*) On and after July 1, 1991, the owner or operator of a facility to which paragraph (h)(5)(iii)(A) of this section is applicable shall collect and record all of the following information each year for each printing line and maintain the information at the facility for a period of three years:

(*i*) The name and identification of each fountain solution and ink as applied on each printing line.

(*ii*) The VOM content and the volume of each fountain solution and ink as applied each year on each printing line.

(*3*) On and after July 1, 1991, the owner or operator of a facility exempted from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall notify the Administrator of any record showing that total maximum theoretical emissions of VOM from all printing lines exceed 90.7 Mg (100 tons) in any calendar year in the absence of air pollution control equipment shall be reported by sending a copy of such record to the Administrator within 30 days after the exceedance occurs.

(B) Any owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(A) of this section shall comply with the following:

(*1*) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(5) (ii)(B) to (ii)(A) of this section, the owner or operator of the subject printing line shall perform all

tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(5)(ii)(A) of this section on and after July 1, 1991, or on and after the initial start-up date.

(*2*) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(A) of this section shall collect and record the following information each day for each printing line and maintain the information at the facility for a period of three years:

(*i*) Control device monitoring data.

(*ii*) A log of operating time for the control device, monitoring equipment and the associated printing line.

(*iii*) A maintenance log for the control device and monitoring equipment detailing all routine and nonroutine maintenance performed including dates and duration of any outages.

(*3*) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(*i*) Any record showing violation of paragraph (h)(5)(ii)(A) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*ii*) At least 30 calendar days before changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5) (ii)(A) to (ii)(B), the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(C)(*1*) of this section. Upon changing the method of compliance with paragraph (h)(5)(ii) from paragraph (h)(5) (ii)(A) to (ii)(B) of this section the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(C) of this section.

(C) Any owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(B) of this section shall comply with the following:

(*1*) By July 1, 1991, or upon initial start-up of a new printing line, or upon changing the method of compliance for an existing printing line from paragraph (h)(5) (ii)(A) to (ii)(B) of this section, the owner or operator of the subject printing line shall perform all tests and submit to the Administrator the results of all tests and calculations necessary to demonstrate that the subject printing line will be in compliance with paragraph (h)(5)(ii)(B) of this section on and after July 1, 1991, or on and after the initial start-up date.

(*2*) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a printing line subject to the limitations of paragraph (h)(5)(ii) of this section and complying by means of paragraph (h)(5)(ii)(B) of this section shall collect and record the following information each day for each printing line and maintain the information at the facility for a period of three years:

(*i*) The VOM content of the fountain solution used each day on each printing line.

(*ii*) A log of operating time for the control device and the associated printing line.

(*iii*) A maintenance log for the control device detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(*3*) On and after July 1, 1991, the owner or operator of a subject printing line shall notify the Administrator in the following instances:

(*i*) Any record showing violation of paragraph (h)(5)(ii)(B) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*ii*) At least 30 calendar days before changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5)(ii)(B) to (h)(5)(ii)(A) of this section, the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(B)(*1*) of this section. Upon changing the method of compliance with paragraph (h)(5)(ii) of this section from paragraph (h)(5)(ii)(B) to (h)(5)(ii)(A) of this section, the owner or operator shall comply with all requirements of paragraph (h)(5)(iii)(B) of this section.

(iv) *Compliance schedule.* Every owner or operator of a heatset-web-offset lithographic printing line shall comply with the applicable requirements of paragraphs (h)(5) (ii) and (iii) of this section in accordance with the applicable compliance schedule specified in paragraph (h)(5)(iv) (A), (B) or (C) of this section.

(A) No owner or operator of a heatset-web-offset lithographic printing line which is exempt from the limitations of paragraph (h)(5)(ii) of this section because of the criteria in paragraph (h)(5)(i) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(5)(iii)(A) and (h)(5)(ii)(A) of this section.

(B) No owner or operator of a heatset-web-offset lithographic printing line complying by means of paragraph (h)(5)(ii)(A) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraphs (h)(5)(iii)(B) and (h)(5)(ii)(B) of this section.

(C) No owner or operator of a heatset-web-offset lithographic printing line complying by means of paragraph (h)(5)(ii)(B) of this section shall operate said printing line on or after July 1, 1991, unless the owner or operator has complied with, and continues to comply with, paragraph (h)(5)(iii)(C) of this section.

(6) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the rotogravure and flexographic presses at General Packaging Products, Inc.'s (GPP) plant in Chicago, Illinois, instead of the requirements in 40 CFR 52.741(h)(1) through 40 CFR 52.741(h)(5).

(i) After July 1, 1992, no inks or other volatile organic material (VOM) containing materials shall at any time be applied or used which have a higher percent VOM by weight than the following:

(A) 8 percent VOM by weight for waterbased inks as applied on GPP's presses.

(B) 82 percent VOM by weight for solvent based inks as applied on GPP's presses.

(C) 100 percent VOM by weight for all other VOM containing materials (besides inks) as used on GPP's presses.

(ii) After July 1, 1992, the weight of ink and other VOM containing materials used shall not exceed the following:

(A) 200,000 pounds per year total for all waterbased inks, as applied (including dilution material). The yearly weight of waterbased inks used is to be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(B) 100,008 pounds per year total for all solvent based inks, as applied (including dilution material). The yearly weight of solvent based inks used is to be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(C) 100,000 pounds per year total (based upon the formulation of the material as it is used on the presses) for all other VOM containing materials (besides inks). The yearly weight of other VOM containing materials is to be calculated according to the procedure in paragraph (h)(6)(iii) of this section.

(iii) The yearly weight of ink/material used is to be calculated as follows:

(A) Compute the weight of ink/material used each month by the 15th of the following month.

(B) By the 15th of each month, add the monthly ink/material usage for the 12 previous months (to obtain the yearly weight of ink/material used).

(iv) Beginning on July 1, 1992, the owner and operator of GPP's plant in Chicago, Illinois, shall keep the following records for each month. All records shall be retained at GPP for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each waterbased ink, each solvent based ink, and each other VOM containing material as applied or used on any press.

(B) The pounds of waterbased ink as applied on all presses for each month and the percent VOM by weight for each waterbased ink as applied on any press for each month.

(C) The pounds of solvent based ink as applied on all presses for each month and the percent VOM by weight for each solvent based ink as applied on any press for each month.

(D) The pounds of other (non-ink) VOM containing material used on all presses for each month and the percent VOM by weight for each (non-ink) VOM containing material as used on any press for each month.

(v) Any record showing a violation of paragraph (h)(6)(i) or (h)(6)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(vi) To determine compliance with paragraphs (h)(6)(i) and (h)(6)(ii) of this section and to establish the records required under paragraph (h)(6)(iv) of this section the percent VOM by weight of each ink and other VOM containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(i) *Leaks from synthetic organic chemical and polymer manufacturing equipment*—(1) *Inspection program for leaks.* The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to paragraph (i) and subpart Q (sections 215.430, 215.431, 215.433, 215.434, 215.435, and 215.437) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall, for the purposes of detecting leaks, conduct a component inspection program using the test methods specified in Method 21, 40 CFR part 60, appendix A, consistent with the following provisions:

(i) Test annually those components operated near extreme temperature or pressure such that they would be unsafe to routinely monitor and those components which would require the elevation of monitoring personnel higher than two meters above permanent worker access structures or surfaces.

(ii) Test quarterly all other pressure relief valves in gas service, pumps in light liquid service, valves in light liquid service and in gas service, and compressors.

(iii) If less than or equal to 2 percent of the valves in light liquid service and in gas service tested pursuant to paragraph (i)(1)(ii) of this section are found not to leak for five consecutive quarters, no leak tests shall be required for three consecutive quarters. Thereafter, leak tests shall resume for the next quarter. If that test shows less than or equal to 2 percent of the valves in light liquid service and in gas service are leaking, then no tests are required for the next three quarters. If more than 2 percent are leaking, then tests are required for the next five quarters.

(iv) Observe visually all pump seals weekly.

(v) Test immediately any pump seal from which liquids are observed dripping.

(vi) Test any relief valve within 24 hours after it has vented to the atmosphere.

(vii) Routine instrument monitoring of valves which are not externally regulated, flanges, and equipment in heavy liquid service, is not required. However, any valve which is not externally regulated, flange or piece of equipment in heavy liquid service that is found to be leaking on the basis of sight, smell or sound shall be repaired as soon as practicable but no later than 30 days after the leak is found.

(viii) Test immediately after repair any component that was found leaking.

(ix) Within one hour of its detection, a weatherproof, readily visible tag, in bright colors such as red or yellow, bearing an identification number and the date on which the leak was detected must be affixed on the leaking component and remain in place until the leaking component is repaired.

(x) The following components are exempt from the monitoring requirements in paragraph (i)(1) of this section:

(A) Any component that is in vacuum service, and

(B) Any pressure relief valve that is connected to an operating flare header or vapor recovery device.

(2) *Alternative program for leaks.* The Administrator shall approve an alternative program of monitoring, recordkeeping, or reporting to that prescribed in paragraph (i) and subpart Q (sections 215.430, 215.431, 215.433, 215.434, 215.435, and 215.437) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), upon a demonstration

by the owner or operator of such plant that the alternative program will provide plant personnel and USEPA personnel with an equivalent ability to identify and repair leaking components. Any alternative program can only be allowed if approved by the Administrator as a SIP or FIP revision.

(j) *Petroleum refining and related industries: asphalt materials*—(1) *Monitoring program for leaks.* (i) The owner or operator of a petroleum refinery subject to subpart R (section 215.445) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) shall, for the purpose of detecting leaks, conduct a component monitoring program consistent with the following provisions:

(A) Test once between March 1 and June 1 of each year, by methods referenced in paragraph (a)(4)(vii) of this section, all pump seals, pipeline valves in liquid service and process drains.

(B) Test once each quarter of each calendar year, by methods referenced in paragraph (a)(4)(vii) of this section, all pressure relief valves in gaseous service, pipeline valves in gaseous service and compressor seals.

(C) Inaccessible valves may be tested once each calendar year instead of once each quarter of each calendar year.

(D) Observe visually all pump seals weekly.

(E) Test immediately any pump seal from which liquids are observed dripping,

(F) Test any relief valve within 24 hours after it has vented to the atmosphere, and

(G) Test immediately after repair any component that was found leaking.

(ii) Storage tank valves and pressure relief devices connected to an operating flare header or vapor recovery device are exempt from the monitoring requirements in paragraph (j)(1)(i) of this section.

(iii) The Administrator may require more frequent monitoring than would otherwise be required by paragraph (j)(1)(i) of this section for components which are demonstrated to have a history of leaking.

(2) *Alternative program for leaks.* The Administrator may approve an alternative program of monitoring, recordkeeping or reporting to that prescribed in paragraph (j)(1) of this section and subpart R (sections 215.446, 215.448, and 215.449) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), upon a demonstration by the owner or operator of a petroleum refinery that the alternative program will provide refinery and USEPA personnel with an equivalent ability to identify and repair leaking components. Any alternative program can only be allowed if approved by the Administrator as a SIP or FIP revision.

(3) *Compliance schedule for leaks.* The owner or operator of a petroleum refinery shall adhere to the increments of progress contained in the following schedule:

(i) Submit to the Administrator a monitoring program consistent with subpart R (section 215.446) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) prior to September 1, 1990.

(ii) Submit to the Administrator the first monitoring report pursuant to subpart R (section 215.449) of Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) prior to October 1, 1990.

(k)–(l) [Reserved]

(m) *Pharmaceutical manufacturing*—(1) *Applicability.* (i) The rules of paragraph (m) of this section, except for paragraphs (m)(4) through (m)(6) of this section, apply to all emission sources of VOM, including but not limited to reactors, distillation units, dryers, storage tanks for VOL, equipment for the transfer of VOL, filters, crystallizers, washers, laboratory hoods, pharmaceutical coating operations, mixing operations and centrifuges used in manufacturing, including packaging, of pharmaceuticals, and emitting more than 6.8 kg/day (15 lbs/day) and more than 2,268 kg/year (2.5 tons/year) of VOM. If an emission source emits less than 2,268 kg/year (2.5 tons/year) of VOM, the requirements of this paragraph still apply to the emission source if VOM emissions from the emission source exceed 45.4 kg/day (100 lbs/day).

(ii) Notwithstanding paragraph (m)(1)(i) of this section, the air suspension coater/dryer, fluid bed dryers, tunnel dryers, and Accelacotas located in Libertyville Township, Lake County, Illinois shall be exempt from the rules

of paragraph (m) of this section, except for paragraphs (m)(4) through (m)(6) of this section, if emissions of VOM not vented to air pollution control equipment do not exceed the following levels:

(A) For the air suspension coater/dryer: 2,268 kg/year (2.5 tons/year);

(B) For each fluid bed dryer: 4,535 kg/year (5.0 tons/year);

(C) For each tunnel dryer: 6,803 kg/year (7.5 tons/year); and

(D) For each Accelacota: 6,803 kg/year (7.5 tons/year).

(iii) Paragraphs (m)(4) through (m)(6) of this section apply to a plant having one or more emission sources that:

(A) Are used to manufacture pharmaceuticals, and

(B) Emit more than 6.8 kg/day (15 lbs/day) of VOM and more than 2,268 kg/year (2.5 tons/year) of VOM, or, if less than 2,268 kg/year (2.5 tons/year), these paragraphs still apply if emissions from one or more sources exceed 45.4 kg/day (100 lbs/day).

(iv) No owner or operator shall violate any condition in a permit when the condition results in exclusion of an emission source from paragraph (m) of this section.

(v) Any pharmaceutical manufacturing source that becomes subject to the provisions of paragraph (m) of this section at any time shall remain subject to the provisions of paragraph (m) of this section at all times.

(vi) Emissions subject to paragraph (m) of this section shall be controlled at all times consistent with the requirements set forth in paragraph (m) of this section.

(vii) Control devices required pursuant to paragraph (m) of this section shall be operated at all times when the source it is controlling is operated.

(viii) Determinations of daily and annual emissions for purposes of paragraph (m)(1) of this section shall be made using both data on the hourly emission rate (or the emissions per unit of throughput) and appropriate daily and annual data from records of emission source operation (or material throughput or material consumption data). In the absence of representative test data pursuant to paragraph (m)(8) of this section for the hourly emission rate (or the emissions per unit of throughput), such items shall be calculated using engineering calculations, including the methods described in appendix B of ''Control of Volatile Organic Emissions from Manufacturing of Synthesized Pharmaceutical Products'' (EPA–450/2–78–029). (This subparagraph shall not affect the Administrator's authority to require emission tests to be performed pursuant to paragraph (m)(8) of this section.)

(2) *Control of reactors, distillation units, crystallizers, centrifuges and vacuum dryers.* (i) The owner or operator shall equip all reactors, distillation units, crystallizers, centrifuges and vacuum dryers that are used to manufacture pharmaceuticals with surface condensers or other air pollution control equipment listed in paragraph (m)(2)(i)(B) of this section.

(A) If a surface condenser is used, it shall be operated such that the condenser outlet gas temperature does not exceed:

(*1*) 248.2 K (−13 °F) when condensing VOM of vapor pressure greater than 40.0kPa (5.8 psi) at 294.3K (70 °F), or

(*2*) 258.2 K (5 °F) when condensing VOM of vapor pressure greater than 20.0 kPa (2.9 psi) at 294.3 K (70 °F), or

(*3*) 273.2 K (32 °F) when condensing VOM of vapor pressure greater than 10.0 kPa (1.5 psi) at 294.3 K (70 °F), or

(*4*) 283.2 K (50 °F) when condensing VOM of vapor pressure greater than 7.0 kPa (1.0 psi) at 294.3 K (70 °F), or

(*5*) 298.2 K (77 °F) when condensing VOM of vapor pressure greater than 3.45 kPa (0.5 psi) at 294.3 K (70 °F).

(B) If a scrubber, carbon adsorption, thermal afterburner, catalytic afterburner, or other air pollution control equipment other than a surface condenser is used, such equipment shall provide a reduction in the emissions of VOM of 90 percent or more.

(ii) The owner or operator shall enclose all centrifuges used to manufacture pharmaceuticals and that have an exposed VOL surface, where the VOM in the VOL has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294.3 K (70 °F), except as production, sampling, maintenance, or inspection procedures require operator access.

(3) *Control of air dryers, production equipment exhaust systems and filters.* (i) The owner or operator of an air dryer

or production equipment exhaust system used to manufacture pharmaceuticals shall control the emissions of VOM from such emission sources by air pollution control equipment which reduces by 90 percent or more the VOM that would otherwise be emitted into the atmosphere.

(ii) The owner or operator shall enclose all rotary vacuum filters and other filters used to manufacture pharmaceuticals and that have an exposed VOL surface, where the VOM in the VOL has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294 K (70 °F), except as production, sampling, maintenance, or inspection procedures require operator access.

(4) *Material storage and transfer.* The owner or operator of a pharmaceutical manufacturing plant shall:

(i) Provide a vapor balance system that is at least 90 percent effective in reducing VOM emissions from truck or railcar deliveries to storage tanks with capacities equal to or greater than 7.57 m^3 (2,000 gal) that store VOL with vapor pressures greater than 28.0 kPa (4.1 psi) at 294.3 K (70 °F), and

(ii) Install, operate, and maintain pressure/vacuum conservation vents set at 0.2 kPa (0.03 psi) or greater on all storage tanks that store VOL with vapor pressures greater than 10 kPa (1.5 psi) at 294.3 K (70 °F).

(5) *In-process tanks.* The owner or operator shall install covers on all in-process tanks used to manufacture pharmaceuticals and containing a VOL at any time. These covers must remain closed, except as production, sampling, maintenance or inspection procedures require operator access.

(6) *Leaks.* The owner or operator of a pharmaceutical manufacturing plant shall repair any component from which a leak of VOL can be observed. The repair shall be completed as soon as practicable but no later than 15 days after the leak is found. If the leaking component cannot be repaired until the process unit is shut down, the leaking component must then be repaired before the unit is restarted.

(7) *Other emission sources.* The owner or operator of a washer, laboratory hood, tablet coating operation, mixing operation or any other process emission source not subject to paragraphs (m)(2) through (m)(6) of this section, and used to manufacture pharmaceuticals shall control the emissions of VOM from such emission sources by:

(i) Air pollution control equipment which reduces by 81 percent or more the VOM that would otherwise be emitted to the atmosphere, or

(ii) A surface condenser which captures all the VOM which would otherwise be emitted to the atmosphere and which meets the requirements of paragraph (m)(2)(i) of this section.

(8) *Testing.* (i) Upon request by the Administrator, the owner or operator of any VOM emission source subject to paragraph (m) or exempt from paragraph (m) of this section by virtue of the provisions of paragraph (m)(1) of this section shall, at his own expense, demonstrate compliance to the Administrator by the methods or procedures listed in paragraph (a)(vi)(A) of this section.

(ii) A person planning to conduct a VOM emissions test to demonstrate compliance with paragraph (m) of this section shall notify the Administrator of that intent not less than 30 calendar days before the planned initiation of the test.

(9) *Monitoring and recordkeeping for air pollution control equipment*—(i) *Monitoring.* (A) At a minimum, continuous monitors for the following parameters shall be installed on air pollution control equipment used to control sources subject to paragraph (m) of this section:

(*1*) Destruction device combustion temperature.

(*2*) Temperature rise across a catalytic afterburner bed.

(*3*) VOM concentration on a carbon absorption unit to determine breakthrough.

(*4*) Outlet gas temperature of a refrigerated condenser.

(*5*) Temperature of a non-refrigerated condenser coolant supply system.

(B) Each monitor shall be equipped with a recording device.

(C) Each monitor shall be calibrated quarterly.

(D) Each monitor shall operate at all times while the associated control equipment is operating.

(ii) *Recordkeeping.* (A) The owner or operator of a pharmaceutical manufacturing facility shall maintain the following records:

(*1*) Parameters listed in paragraph (m)(9)(i)(A) of this section shall be recorded.

(*2*) For sources subject to paragraph (m)(2) of this section, the vapor pressure of VOM being controlled shall be recorded for every process.

(B) For any leak subject to paragraph (m)(6) of this section which cannot be readily repaired within one hour after detection, the following records shall be kept:

(*1*) The name of the leaking equipment,

(*2*) The date and time the leak is detected,

(*3*) The action taken to repair the leak, and

(*4*) The data and time the leak is repaired.

(C) The following records shall be kept for emission sources subject to paragraph (m)(5) of this section which contain VOL:

(*1*) For maintenance and inspection:

(*i*) The date and time each cover is opened,

(*ii*) The length of time the cover remains open, and

(*iii*) The reason why the cover is opened.

(*2*) For production and sampling, detailed written procedures or manufacturing directions specifying the circumstances under which covers may be opened and the procedures for opening covers.

(D) For each emission source used in the manufacture of pharmaceuticals for which the owner or operator of a pharmaceutical manufacturing plant claims emission standards are not applicable, because the emissions are below the applicability cutoffs in paragraph (m)(1)(i) of this section or paragraph (m)(1)(ii) of this section the owner or operator shall:

(*1*) Maintain a demonstration including detailed engineering calculations of the maximum daily and annual emissions for each such emission source showing that the emissions are below the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate, for the current and prior calendar years;

(*2*) Maintain appropriate operating records for each such emission source to identify whether the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate, are ever exceeded; and

(*3*) Provide written notification to the Administrator within 30 days of a determination that such an emission source has exceeded the applicability cutoffs in paragraph (m)(1)(i) or paragraph (m)(1)(ii) of this section, as appropriate.

(E) Records required under paragraph (m)(9)(ii)(A) of this section shall be maintained by the owner or operator for a minimum of two years after the date on which they are made.

(F) Copies of the records shall be made available to the Administrator upon verbal or written request.

(n)–(p) [Reserved]

(q) *Gasoline distribution—(*1) *Bulk gasoline plants.* (i) Subject to paragraph (q)(1)(v) of this section, no person may cause or allow the transfer of gasoline from a delivery vessel into a stationary storage tank located at a bulk gasoline unless:

(A) The delivery vessel and the stationary storage tank are each equipped with a vapor collection system that meets the requirements of paragraph (q)(1)(iv)(D) of this section,

(B) Each vapor collection system is operating,

(C) The delivery vessel displays the appropriate sticker pursuant to the requirements of sections 215.584 (b) or (d) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742),

(D) The pressure relief valve(s) on the stationary storage tank and the delivery vessel are set to release at no less than 0.7 psi or the highest pressure allowed by state or local fire codes or the guidelines of the National Fire Prevention Association, and

(E) The stationary storage tank is equipped with a submerged loading pipe.

(ii) Subject to paragraph (q)(1)(vi) of this section, no person may cause or allow the transfer of gasoline from a stationary storage tank located at a

bulk gasoline plant into a delivery vessel unless:

(A) The requirements set forth in paragraphs (q) (1)(i)(A) through (1)(i)(D) of this section are met, and

(B) Equipment is available at the bulk gasoline plant to provide for the submerged filling of the delivery vessel or the delivery vessel is equipped for bottom loading.

(iii) Subject to paragraph (q)(1)(v) of this section, each owner of a stationary storage tank located at a bulk gasoline plant shall:

(A) Equip each stationary storage tank with a vapor control system that meets the requirements of paragraph (q) (1)(i) or (1)(ii) of this section, whichever is applicable,

(B) Provide instructions to the operator of the bulk gasoline plant describing necessary maintenance operations and procedures for prompt notification of the owner in case of any malfunction of a vapor control system, or

(C) Repair, replace or modify any worn out or malfunctioning component or element of design.

(iv) Subject to paragraph (q)(1)(v) of this section, each operator of a bulk gasoline plant shall:

(A) Maintain and operate each vapor control system in accordance with the owner's instructions,

(B) Promptly notify the owner of any scheduled maintenance or malfunction requiring replacement or repair of a major component of a vapor control system,

(C) Maintain gauges, meters or other specified testing devices in proper working order, and

(D) Operate the bulk plant vapor collection system and gasoline loading equipment in a manner that prevents:

(*1*) Gauge pressure from exceeding 45.7 cm (18 in.) of water and vacuum from exceeding 15.2 cm (6 in.) of water, as measured as close as possible to the vapor hose connection,

(*2*) A reading equal to or greater than 100 percent of the lower explosive limit (LEL measured as propane) when tested in accordance with the procedure described in ''Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems'', Appendix B, EPA 450/2–78–051 (which is available for purchase from the National Technical Information Services, 5285 Port Royal Road, Springfield, VA 22161), and

(*3*) Avoidable leaks of liquid during loading or unloading operations.

(E) Provide a pressure tap or equivalent on the bulk plant vapor collection system in order to allow the determination of compliance with paragraph (q)(1)(iv)(D)(*1*) of this section, and

(F) Within 15 business days after discovery of any leak by the owner, operator, or the Administrator, repair and retest a vapor collection system which exceeds the limits of paragraph (q)(1)(iv)(D) (*1*) or (*2*) of this section.

(v) The requirements of paragraphs (q) (1)(i), (1)(iii) and (1)(iv) of this section, shall not apply to:

(A) Any stationary storage tank with a capacity of less than 2,177 l (575 gal), or

(B) Any bulk gasoline plant whose daily gasoline throughtput is less than 15,140 l (4,000 gal/day) on a thirty-day rolling average.

(vi) The requirements of paragraph (q)(1)(ii) of this section shall only apply to bulk gasoline plants:

(A) Whose daily gasoline throughput is greater than or equal to 15,140 l (4,000 gal/day) on a thirty-day rolling average, and

(B) That either distribute gasoline to gasoline dispensing facilities subject to the requirements of section 215.583(a)(2) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742) or that are in Cook, DuPage, Kane, Lake, McHenry or Will County.

(vii) Any bulk gasoline plant which is ever subject to paragraph (q)(1) (i), (ii), (iii) or (iv) of this section shall always be subject to these paragraphs.

(2) [Reserved]

(r) [Reserved]

(s) *Paint and ink manufacturing*—(1) *Applicability*. (i) Paragraph (s) shall apply to all paint and ink manufacturing plants which:

(A) Include process emission sources not subject to subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or

to paragraphs (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; and which as a group both:

(*1*) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(*2*) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision, or

(B) Produce more than 7,570,820 l (2,000,000 gal) per calendar year of paint or ink formulations, which contain less than 10 percent (by weight) water, and ink formulations not containing as the primary solvents water, Magie oil or glycol.

(ii) For the purposes of paragraph (s) of this section, uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Exemption for waterbase material and heatset-offset ink.* The requirements of paragraphs (s)(4) and (s)(5) of this section and paragraph (s)(7)(i) of this section shall not apply to equipment while it is being used to produce either:

(i) Paint or ink formulations which contain 10 percent or more (by weight) water, or

(ii) Inks containing Magie oil and glycol as the primary solvent.

(3) *Permit conditions.* No person shall violate any condition in a federally enforceable permit when the condition results in exclusion of the plant or an emission source from paragraph (s).

(4) *Open-top mills, tanks, vats or vessels.* No person shall operate an open-top mill, tank, vat or vessel with a volume of more than 45 l (12 gal) for the production of paint or ink unless:

(i) The mill, tank, vat or vessel is equipped with a cover which completely covers the mill, tank, vat or vessel opening except for an opening no larger than necessary to allow for safe clearance for a mixer shaft. Such cover shall extend at least 1.27 cm (0.5 in.) beyond the outer rim of the opening or be attached to the rim.

(ii) The cover remains closed except when production, sampling, maintenance or inspection procedures require access.

(iii) The cover is maintained in good condition such that, when in place, it maintains contact with the rim of the opening for at least 90 percent of the circumference of the rim.

(5) *Grinding mills.* (i) No person shall operate a grinding mill for the production of paint or ink which is not maintained in accordance with the manufacturer's specifications.

(ii) No person shall operate a grinding mill fabricated or modified after the effective date of paragraph (s) which is not equipped with fully enclosed screens.

(iii) The manufacturer's specifications shall be kept on file at the plant by the owner or operator of the grinding mill and be made available to any person upon verbal or written request during business hours.

(6) *Storage tanks.* (i) The owner or operator shall equip tanks storing VOL with a vapor pressure greater than 10 kPa (1.5 psi) at 20 °C (68 °F) with pressure/vacuum conservation vents set as a minimum at + /–0.2 kPa (0.029 psi). These controls shall be operated at all times. An alternative air pollution control system may be used if it results in a greater emission reduction than these controls. Any alternative control system can only be allowed if approved by the Administrator as a SIP or FIP revision.

(ii) Stationary VOL storage containers with a capacity greater than 946 l (250 gal) shall be equipped with a submerged-fill pipe or bottom fill. These controls shall be operated at all times. An alternative control system can only be allowed if approved by the Administrator as a SIP or FIP revision.

(7) *Leaks.* The owner or operator of a paint or ink manufacturing plant shall, for the purpose of detecting leaks, conduct an equipment monitoring program as set forth below:

(i) Each pump shall be checked by visual inspection each calendar week for indications of leaks, that is, liquids dripping from the pump seal. If there are indications of liquids dripping from

the pump seal, the pump shall be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

(ii) Any pump, valve, pressure relief valve, sampling connection, open-ended valve and flange or connector containing a fluid which is at least 10 percent VOM by weight which appears to be leaking on the basis of sight, smell or sound shall be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

(iii) A weather proof, readily visible tag, in bright colors such as red or yellow, bearing an identification number and the date on which the leak was detected shall be attached to leaking equipment. The tag may be removed upon repair, that is, when the equipment is adjusted or otherwise altered to allow operation without leaking.

(iv) When a leak is detected, the owner or operator shall record the date of detection and repair and the record shall be retained at the plant for at least two years from the date of each detection or each repair attempt. The record shall be made available to any person upon verbal or written request during business hours.

(8) *Clean up.* (i) No person shall clean paint or ink manufacturing equipment with organic solvent unless the equipment being cleaned is completely covered or enclosed except for an opening no larger than necessary to allow safe clearance for proper operation of the cleaning equipment, considering the method and materials being used.

(ii) No person shall store organic wash solvent in other than closed containers, unless closed containers are demonstrated to be a safety hazard, or dispose of organic wash solvent in a manner such that more than 20 percent by weight is allowed to evaporate into the atmosphere.

(9) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (s) of this section shall comply with the requirements of paragraph (s) of this section on and after July 1, 1991.

(10) *Recordkeeping and reporting.* (i) Upon request by the Administrator, the owner or operator of an emission source which claims to be exempt from the requirements of paragraph (s) of this section shall submit records to the Administrator within 30 calendar days from the date of the request which document that the emission source is in fact exempt from paragraph (s) of this section. These records shall include (but are not limited to) the percent water (by weight) in the paint or ink being produced and the quantity of Magie oil, glycol and other solvents in the ink being produced.

(ii) Every owner or operator of an emission source which is subject to the requirements of paragraph (s) of this section shall maintain all records necessary to demonstrate compliance with those requirements at the facility for three years.

(t) [Reserved]

(u) *Miscellaneous fabricated product manufacturing processes*—(1) *Applicability.* (i) The requirements of paragraph (u) of this section shall apply to a plant's miscellaneous fabricated product manufacturing process emission sources which are not included within any of the source categories specified in subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (u) of this section. A plant is subject to paragraph (u) of this section if it contains process emission sources, not regulated by subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (u)(1)(i) of this section, the requirements of paragraph (u) of this section shall continue to apply to a miscellaneous fabricated products manufacturing process emission source which was ever subject to the control requirements of paragraph (u)(3) of this section.

(iii) No limits under paragraph (u) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 0.91 Mg (1.0 ton) per calendar year if the total emissions from such sources not complying with paragraph (u)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (u) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (u) of this section, uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (u) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (u) of this section shall comply with the requirements of paragraph (u)(3) (i), (ii) or (iii) of this section:

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) For coating lines, the daily-weighted average VOM content shall not exceed 0.42 kg VOM/l (3.5 lbs VOM/gal) of coating as applied (minus water and any compounds which are specifically exempted from the definition of VOM) during any day. Owners and Code 215 (incorporated by reference as specified in 40 CFR 52.742), or

(iii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (u) of this section shall comply with the requirements of paragraph (u) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (u) of this section shall demonstrate compliance with paragraph (u)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the adhesive globe coating operations at Replogle's Broadview facility in Cook County, Illinois, instead of the control requirements in paragraph (u)(3) of this section.

(i) After October 6, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 7.0 lbs VOM per gallon of adhesive coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat globes. Such coating consists of #7879446 Methylene Chloride (RGI #01004100). The Administrator shall be notified at least ten (10) days prior to the use of any replacement adhesive for coating globes.

(B) [Reserved]

(ii) After October 6, 1991, the volume of coatings used shall not exceed the following:

(A) 572 gallons per year total for all coatings specified in paragraph (u)(6)(i)(A) of this section. The yearly volume of coatings used are to be calculated as follows:

(*1*) Compute the volume of specified coating used each month by the 15th of the following month.

(*2*) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) [Reserved]

(iii) Beginning on October 6, 1991, the owner and operator of the Replogle Globes, Inc. plant in Broadview, Illinois shall keep the following records for each month. All records shall be retained at Replogle Globes, Inc. for three (3) years and shall be made available to the Administrator on request:

(A) The name and identification number of each coating as applied on any adhesive globe coating line.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any adhesive globe coating line.

(7) The control requirements in this paragraph apply to the glass candle container coating line(s) and silk screening machines at the Candle Corporation of America (CCA), Chicago, Illinois facility, instead of the control requirements in paragraph (u)(3) of this section.

(i) After June 1, 1992, no coatings or inks shall at any time be applied, at any coating or ink applicator, which exceed the following emission limitations for the specified coating or ink.

(A) 6.04 pounds (lbs) volatile organic material (VOM) per gallon of clear lacquer/varnish (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such clear lacquer/varnish (multicolor) is identified as LP3500. The Administrator must be notified at least 10 days prior to the use of any replacement clear lacquers/varnishes.

(B) 5.23 lbs VOM per gallon of translucent coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such translucent coating (multi-color) is identified as LP3603. The Administrator must be notified at least 10 days prior to the use of any replacement translucent coatings.

(C) 5.84 lbs VOM per gallon of white lacquer (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to coat glass candle containers. Such white lacquer is identified as LP3507. The Administrator must be notified at least 10 days prior to the use of any replacement white lacquers.

(D) 3.40 lbs VOM per gallon of fast dry enamel silk screen printing ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied to print onto glass candle containers.

(ii) After June 1, 1992, the volume of coating and ink used shall not exceed the following:

(A) 2,164 gallons per month total for all coatings specified in paragraph (u)(7)(i)(A) of this section.

(B) 369 gallons per month total for all coatings specified in paragraph (u)(7)(i)(B) of this section.

(C) 49 gallons per month total for all coatings specified in paragraph (u)(7)(i)(C) of this section.

(D) 50 gallons per month total for all inks specified in paragraph (u)(7)(i)(D) of this Section.

(iii) Beginning on June 1, 1992, the owner and operator of CCA's plant in Chicago, Illinois, shall keep the following records for each month. All records shall be retained at CCA for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating and ink as applied on any glass candle container coating line or silk screening machine.

(B) The weight of VOM per volume and the volume of each coating and ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any glass candle container coating line or silk screening machine.

(iv) After June 1, 1992, no more than 100 gallons per month of cleaning solvent is allowed to be used on the glass candle container coating line(s) at CCA. The only cleaning solvents allowed for use are acetone (identified as LP3525) and methyl ethyl ketone (identified as LP3520). Beginning on June 1, 1992, CCA shall keep monthly records of the type and volume of all cleaning solvents used. All such records shall be

retained at CCA for 3 years and shall be made available to the Administrator on request.

(v) After June 1, 1992, no more than 50 gallons per month of cleaning solvent is allowed to be used on the glass candle container silk screening machines at CCA. The only cleaning solvent allowed for use is petroleum naphtha (identified as light aromatic naphtha with 7.28 lbs VOM per gallon, minus water and any compounds which are specifically exempted from the definition of VOM). Beginning on June 1, 1992, CCA shall keep monthly records of the type and volume and the weight of VOM per volume (minus water and any compounds which are specifically exempted from the definition of VOM) of all cleaning solvents used on the glass candle container silk screening machines. All such records shall be retained at CCA for 3 years and shall be made available to the Administrator on request.

(8) The control, recordkeeping and reporting requirements in this paragraph apply to the cellulose food casing manufacturing operations at the Viskase Corporation plant in Bedford Park, Illinois (Cook County) instead of the requirements in paragraph (v) of this section, the other parts of paragraph (u) of this section, and the recordkeeping requirements in paragraph (y) of this section. Unless otherwise stated, the following requirements must be met by Viskase on and after November 21, 1995.

(i) VOM emissions shall never exceed 3.30 tons per day.

(ii) VOM emissions shall not exceed 2.22 tons per day, on a monthly average, during June, July, and August.

(iii) VOM emissions shall not exceed 2.44 tons per day during June, July, and August.

(iv) Compliance with the emission limits in paragraphs (u)(8) (i) through (iii) of this section, and the records in paragraph (u)(8)(v) of this section, shall be determined using an emission factor of ''0.72 pounds of VOM emissions per pound of carbon disulfide consumed.''

(v) Viskase must keep the following daily records:

(A) The pounds of carbon disulfide per charge for its Fibrous process. If charges with different levels of carbon disulfide per charge are used the same day, a separate record must be kept for each level of carbon disulfide per charge.

(B) The pounds of carbon disulfide per charge for its NOJAX process. If charges with different levels of carbon disulfide per charge are used the same day, a separate record must be kept for each level of carbon disulfide per charge.

(C) The number of charges per day, for each level of carbon disulfide per charge, used in Viskase's Fibrous process.

(D) The number of charges per day, for each level of carbon disulfide per charge, used in Viskase's NOJAX process.

(E) The total quantity of carbon disulfide used per day in Viskase's Fibrous process, the total quantity of carbon disulfide used per day in Viskase's NOJAX process, and the daily VOM emissions resulting from use of the carbon disulfide.

(F) The monthly use of carbon disulfide, and the monthly VOM emissions resulting from use of the carbon disulfide, during June, July, and August.

(vi) Any violation of the emission limits in paragraphs (u)(8) (i) through (iii) of this section must be reported to USEPA within 30 days of its occurrence.

(vii) In order to determine daily and monthly VOM emissions, the test methods in paragraph (a)(4) of this section may be used in addition to, and take precedence over, the emission factor cited in paragraph (u)(8)(iv) of this section. Method 15 is to be used instead of Methods 18, 25, and 25A when the test methods in paragraph (a)(4) of this section are used to determine VOM emissions from Viskase's cellulose food casing facility.

(v) *Miscellaneous formulation manufacturing processes*—(1) *Applicability*. (i) The requirements of paragraph (v) of this section shall apply to a plant's miscellaneous formulation manufacturing process emission sources, which are not included within any of the source categories specified in subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452),(S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or

(Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (v) of this section. A plant is subject to paragraph (v) of this section if it contains process emission sources, not regulated by subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (v)(1)(i) of this section, the requirements of paragraph (v) of this section shall continue to apply to a miscellaneous formulation manufacturing process emission source which was ever subject to the control requirements of paragraph (v)(3) of this section.

(iii) No limits under paragraph (v) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 2.3 Mg (2.5 tons) per calendar year if the total emissions from such sources not complying with paragraph (v)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (v) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (v) of this section uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (v) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (v) of this section shall comply with the requirements of paragraph (v)(3) (i) or (ii) of this section.

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (v) of this section shall comply with the requirements of paragraph (v) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (v) of this section shall demonstrate compliance with paragraph (v)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the 7 blenders and 3 moguls of the adhesive coating solution formulation (compounding) operations at the Minnesota Mining and Manufacturing Corporation's (3M) Bedford Park facility in Cook County, Illinois, instead of the control requirements in paragraph (v)(3) of this section.

(i) After September 1, 1991, the following operating restrictions shall apply to 3M's Bedford Park, Illinois, compounding operations.

(A) The combined operating hours for all blenders shall not exceed 8,400 hours per quarter (rolled on a monthly basis). The combined quarterly operating

hours of all blenders are to be calculated as follows:

(*1*) By the 15th of each month, compute the combined monthly operating hours of all blenders during the previous month.

(*2*) By the 15th of each month, add the monthly operating hours of all blenders for the 3 previous months (to obtain the combined quarterly operating hours of all blenders).

(B) The combined operating hours for all moguls shall not exceed 4,200 hours per quarter (rolled on a monthly basis). The quarterly operating hours of all moguls are to be calculated as follows:

(*1*) By the 15th of each month, compute the combined monthly operating hours of all moguls during the previous month.

(*2*) By the 15th of each month, add the monthly operating hours of all moguls for the 3 previous months (to obtain the combined quarterly operating hours of all moguls).

(ii) Beginning on September 1, 1991, the owner and operator of the 3M Bedford Park Plant in Bedford Park, Illinois, shall keep the following records. These records shall be compiled on a monthly basis, be retained at the 3M facility for a period of 3 years, and be made available to the Administrator upon request.

(A) Separate monthly records for each of the 7 blenders identifying each batch and the length of each batch as well as the total monthly hours of operation for all blenders.

(B) Separate monthly records for each of the 3 moguls identifying each batch and the length of each batch as well as the total monthly hours of operation for all moguls.

(w) *Miscellaneous organic chemical manufacturing processes*—(1) *Applicability.* (i) The requirements of paragraph (w) of this section shall apply to a plant's miscellaneous organic chemical manufacturing process emission sources which are not included within any of the source categories specified in subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), or (q)(1) of this section; if the plant is subject to paragraph (w) of this section. A plant is subject to paragraph (w) of this section if it contains process emission sources, not regulated by subparts (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP or FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (w)(1)(i) of this section, the requirements of paragraph (w) of this section shall continue to apply to a miscellaneous organic chemical manufacturing process emission source which was ever subject to the control requirements of paragraph (w)(3) of this section.

(iii) No limits under paragraph (w) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 0.91 Mg (1.0 ton) per calendar year if the total emissions from such sources not complying with paragraph (w)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (w) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph if its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) For the purposes of paragraph (w) of this section, uncontrolled VOM emissions are the emissions of VOM which would result if no air pollution control equipment were used.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusions of the plant or an emission source from paragraph (w) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (w) of this section shall comply with the requirements of paragraph (w)(3)(i) or (ii) of this section.

(i) Emission capture and control techniques which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emission source subject to the control requirements of paragraph (w) of this section shall comply with the requirements of paragraph (w) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (w) shall demonstrate compliance with paragraph (w)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(x) *Other emission sources*—(1) *Applicability.* (i) The requirements of paragraph (x) of this section shall apply to a plant's VOM emission sources, which are not included within any of the source categories specified in subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or specified in paragraph (d), (e), (h), (i), (j), (q)(1), (s), (u), (v) or (w) of this section; if the plant is subject to paragraph (x) of this section. A plant is subject to paragraph (x) of this section if it contains process emission sources, not regulated by subpart (B), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), or (Z) of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or by paragraph (d), (e) of this section (excluding paragraph (e)(1)(i)(L)), (h) (excluding paragraph (h)(5)), (i), (j), or (q)(1) of this section; which as a group both:

(A) Have maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used, and

(B) Are not limited to less than 91 Mg (100 tons) of VOM emissions per calendar year in the absence of air pollution control equipment, through production or capacity limitations contained in a federally enforceable construction permit or a SIP of FIP revision.

(ii) If a plant ceases to fulfill the criteria of paragraph (x)(1)(i) of this section, the requirements of paragraph (x) of this section shall continue to apply to an emission source which was ever subject to the control requirements of paragraph (x)(3) of this section.

(iii) No limits under paragraph (x) of this section shall apply to emission sources with emissions of VOM to the atmosphere less than or equal to 2.3 Mg (2.5 tons) per calendar year if the total emissions from such sources not complying with paragraph (x)(3) of this section does not exceed 4.5 Mg (5.0 tons) per calendar year.

(iv) For the purposes of paragraph (x) of this section, an emission source shall be considered regulated by a subpart (of the Illinois rules) or paragraph if it is subject to the limits of that subpart (of the Illinois rules) or paragraph. An emission source is not considered regulated by a subpart (of the Illinois rules) or paragraph of its emissions are below the applicability cutoff level or if the source is covered by an exemption.

(v) The control requirements in paragraphs (u), (v), (w), and (x) of this section shall not apply to sewage treatment plants, vegetable oil processing plants, coke ovens (including by-product recovery plants), fuel combustion sources, bakeries, barge loading facilities, jet engine test cells, pharmaceutical manufacturing, production of polystyrene foam insulation board (including storage and extrusion of scrap

where blowing agent is added to the polystyrene resin at the plant), production of polystyrene foam packaging (*not* including storage and extrusion of scrap where blowing agent is added to the polystyrene resin at the plant), and iron and steel production.

(2) *Permit conditions.* No person shall violate any condition in a permit when the condition results in exclusion of the plant or an emission source from paragraph (x) of this section.

(3) *Control requirements.* Every owner or operator of an emission source subject to paragraph (x) of this section shall comply with the requirements of paragraph (x)(3) (i), (ii) or (iii) of this section.

(i) Emission capture and control equipment which achieve an overall reduction in uncontrolled VOM emissions of at least 81 percent, or

(ii) For coating lines, the daily-weighted average VOM content shall not exceed 0.42 kg VOM/l (3.5 lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied during any day. Owners and operators complying with this paragraph are not required to comply with section 215.301 of 35 Ill. Adm. Code 215 (incorporated by reference as specified in 40 CFR 52.742), or

(iii) An alternative control plan which has been approved by the Administrator as a SIP or FIP revision.

(4) *Compliance schedule.* Every owner or operator of an emissions source which is subject to paragraph (x) of this section shall comply with the requirements of paragraph (x) of this section on and after July 1, 1991.

(5) *Testing.* Any owner or operator of a VOM emission source which is subject to paragraph (x) of this section shall demonstrate compliance with paragraph (x)(3) of this section by using the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(6) The control requirements in this paragraph apply to the varnish operations at the General Motors Corporation, Electro-Motive Division Plant (GMC Electro-Motive), LaGrange, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) After July 1, 1991, no coatings shall at any time be applied which exceed the following emission limitations for the specified coating.

(A) 8.0 lbs VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator to coat Nomex rings. Such coating consists of Monsanto Skybond 705 Polyamide Resin (EMD P/N 9088817) and diluents. The Administrator must be notified at least 10 days prior to the use of any replacement coating(s) and/or diluents for coating Nomex rings.

(B) 6.8 lbs VOM per gallon of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator for any coatings not specified in paragraph (x)(6)(i)(A) of this section.

(ii) After July 1, 1991, the volume of coatings used shall not exceed the following:

(A) 600 gallons per year total for all coatings specified in paragraph (x)(6)(i)(A) of this section. The yearly volume of coatings used are to be calculated as follows:

(1) Compute the volume of specified coating used each month by the 15th of the following month.

(2) By the 15th of each month, add the monthly coating use for the 12 previous months (to obtain the yearly volume of coatings used).

(B) 28,500 gallons per year total for all coatings other than those specified in paragraph (x)(6)(i)(A) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (x)(6)(ii)(A)(1) and (x)(6)(ii)(A)(2) of this section.

(iii) Beginning on July 1, 1991, the owner and operator of the General Motors Corporation Electro-Motive Division Plant in LaGrange, Illinois shall keep the following records for each month. All records shall be retained at General Motors for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating as applied on any coating line within the varnish operation.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any coating line within the varnish operation.

(7) The control, recordkeeping, and monitoring requirements in this paragraph apply to the aluminum rolling mills at the Reynolds Metals Company's McCook Sheet & Plate Plant in McCook, Illinois (Cook County) instead of the control requirements and test methods in the other parts of paragraph (x), and the recordkeeping requirements in paragraph (y) of this section. All of the following requirements must be met by Reynolds on and after July 7, 1995.

(i) Only organic lubricants with initial and final boiling points between 460 degrees F and 635 degrees F, as determined by a distillation range test using ASTM method D86–90, are allowed to be used at Reynolds' aluminum sheet cold rolling mills numbers 1 and 7. All incoming shipments of organic lubricant for the number 1 and 7 mills must be sampled and each sample must undergo a distillation range test to determine the initial and final boiling points using ASTM method D86–90. A grab rolling lubricant sample shall be taken from each operating mill on a monthly basis and each sample must undergo a distillation range test, to determine the initial and final boiling points, using ASTM method D86–90.

(ii) An oil/water emulsion, with no more than 15 percent by weight of petroleum-based oil and additives, shall be the only lubricant used at Reynolds' aluminum sheet and plate hot rolling mills, 120 inch, 96 inch, 80 inch, and 145 inch mills. A grab rolling lubricant sample shall be taken from each operating mill on a monthly basis and each sample shall be tested for the percent by weight of petroleum-based oil and additives by ASTM Method D95–83.

(iii) The temperature of the inlet supply of rolling lubricant for aluminum sheet cold rolling mills numbers 1 and 7 shall not exceed 150 °F, as measured at or after (but prior to the lubricant nozzles) the inlet sump. The temperature of the inlet supply of rolling lubricant for the aluminum sheet and plate hot rolling mills, 120 inch, 96 inch, 80 inch, and 145 inch mills shall not exceed 200 °F, as measured at or after (but prior to the lubricant nozzles) the inlet sump. Coolant temperatures shall be monitored at all the rolling mills by use of thermocouple probes and chart recorders or electronic data recorders.

(iv) All distillation test results for cold mill lubricants, all percent oil test results for hot mill lubricants, all coolant temperature recording charts and/or temperature data obtained from electronic data recorders, and all oil/water emulsion formulation records, shall be kept on file, and be available for inspection by USEPA, for three years.

(8) The control and recordkeeping requirements in this paragraph apply to the silk screen presses and associated ovens, cleaning operations and laminators at Parisian's Novelty Company (Parisian), Chicago, Illinois, facility, instead of the control requirements in paragraphs (x)(8) (u)(3) and (x)(3) of this section and the recordkeeping requirements in paragraph (x)(8)(y) of this section.

(i) After March 1, 1993, no coatings or inks shall at any time be applied, at any coating or ink applicator, which exceed the following emission limitations for the specified coating or ink.

(A) 6.65 pounds (lbs) volatile organic material (VOM) per gallon of ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on Parisian's silk screen presses.

(B) 6.4 lbs VOM per gallon of adhesive coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on Parisian's laminators. Such adhesive is identified as MIX #963.

(ii) After March 1, 1993, the volume of coating and ink used shall not exceed the following:

(A) 2,556 gallons per year total for all inks. The yearly volume of inks used is to be calculated as follows:

(*1*) Compute the volume of ink used each month by the 15th of the following month.

(*2*) By the 15th of each month, add the monthly ink usage for the 12 previous months (to obtain the yearly volume of ink used).

(B) 780 gallons per year total for all coatings specified in paragraph (x)(8)(i)(B) of this section. The yearly volume of coatings used are to be calculated as specified in paragraphs (x)(8)(ii)(A)(*1*) and (x)(8)(ii)(A)(*2*) of this section.

(iii) Beginning on March 1, 1993, the owner and operator of Parisian's plant in Chicago, Illinois, shall keep the following records for each month. All records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(A) The name and identification number of each coating as applied on any laminator.

(B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any laminator.

(C) The weight of VOM per volume and the volume of each type of ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month on any screen press.

(iv) After March 1, 1993, no more than 84 gallons per year of denatured alcohol may be used for cleaning labels at Parisian. The yearly volume of denatured alcohol used is to be calculated as specified in paragraphs (x)(8)(ii)(A)(*1*) and (x)(8)(ii)(A)(*2*) of this section. Beginning on March 1, 1993, Parisian shall keep monthly records of the type, volume, and VOM content of all solvents used for label cleaning. These records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(v) After March 1, 1993, no more than 7,932 gallons per year of screen wash #956 may be used on Parisian's screen cleaner. The yearly volume of screen wash #956 used is to be calculated as specified in paragraphs (x)(8)(ii)(A)(*1*) and (x)(8)(ii)(A)(*2*) of this section. Beginning on March 1, 1993, Parisian shall keep monthly records of the type, volume, and VOM content of all cleaning compounds used on Parisian's screen cleaner. These records shall be retained at Parisian for 3 years and shall be made available to the Administrator on request.

(vi) After March 1, 1993, only those cleaners specifically identified in paragraphs (x)(8)(iv) and (x)(8)(v) of this section may be used at Parisian.

(9) The control requirements in this paragraph apply to the process sources listed in paragraph (x)(9)(i)(A) of this section at the Nalco Chemical Company facility in Bedford Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.*

(A) On and after October 1, 1992, the maximum volatile organic compound (VOC) emissions per batch, the 12-month rolling average number of batches per year, and the peak limit of batches per month shall not exceed the following limits:

Source	Maximum VOC emissions, lb/batch	12-mo. rolling average limit batch/yr	Peak batch limit, batch/month
(*1*) System 1 charge	0.16	280	33
System 1 purge	1.35.

[a] Assumed value.
[b] Based on monitoring data.

(B) The following equation shall be used to calculate maximum VOC emissions per batch for the process sources listed in paragraphs (x)(9)(i)(A)(*1*) (charge only and (*2*) through (*28*) and (*53*) of this section:

Where:

ER = VOC emission rate;

Q_o = Quantity of organic per batch or charge rate;

$$ER(\text{lb/batch}) = \frac{Q_O(\text{gal/batch}) \times M_V(\text{lb/mole}) \times P(\text{mmHg})}{\text{constant}_1([\text{gal}][\text{mmHg}]/\text{mole})}$$

M_v = Molecular weight of the volatile component;

P = Partial pressure of the volatile component for mixtures of liquid made up with more than one chemical; or vapor pressure for pure liquids made up of only one organic chemical; and

Constant $_1$ = (7.45 gal/ft^3) × (385 ft^3/mole)x(760 mmHg).

(C) The following equation shall be used to calculate the VOC emissions per batch from the process sources listed in paragraph (x)(9)(i)(A)(*1*) of this section (purge only) and (*29*) through (*32*) of this section:

$$ER(lb/batch) = \frac{PR(ft^3/batch) \times M_V(lb/mole) \times P(mmHg)}{constant_2([ft^3][mmHg]/mole)}$$

Where:

PR = Nitrogen purge rate; and

$Constant_2$ = (385 ft^3/mole) × (760 mmHg).

(D) The following equation shall be used to calculate the VOC emissions per batch from the drum station listed at paragraph (x)(9)(i)(A)(*33*) of this section:

ER(1b/batch) = (0.40 × [$ER_{28\text{-}T\text{-}217\text{-}218}$]) + (0.60 × [$ER_{28\text{-}T\text{-}214\text{-}216}$])

(E) The following equation shall be used to calculate the VOC emissions per batch from the V–4SAC listed at paragraph (x)(9)(i)(A)(*34*) of this section:

$$ER(lb/batch) = \frac{FR_{1mmHg}(lb/batch) \times M_V(lb/mole) \times P_{V2}(mmHg)}{M_a(lb/mole) \times (760 - P_{V2})(mmHg)}$$

Where:

FR_{1mmHg} = Maximum air flow rate to maintain 1 mmHg;

M_a = Molecular weight of air; and

P_{v2} = Vapor pressure of organic at 65 °F and 760 mmHg.

(F) The following equation shall be used to calculate the VOC emissions per batch from 20–CT–155 listed at paragraph (x)(9)(i)(A)(*35*) of this section:

$$ER(lb/batch) = \left[ER_{tot}(lb/hr) - ER_{V-4SAC}(lb/hr)\right] \times hr/batch$$

Where:

ER_{tot} = Total system emission rate calculated using the following equation:

$$ER_{tot}(lb/hr) = \frac{FR_{1mmHg}(lb/hr) \times M_V(lb/mole) \times P_{V1}(mmHg)}{M_a(lb/mole) \times (350 - P_{V1})(mmHg)}$$

Where:

P_{v1} = Vapor pressure of organic at 200 °F and 350 mmHg.

(G) The following equation shall be used to calculate the VOC emissions per hour from 12–SE–100 listed at paragraph (x)(9)(i)(A)(*36*) of this section:

ER(lb/hr) = Evap (gm/cm^2 sec) × area (cm^2) × 3600 sec/hr

Where:

Evap = Evaporation rate from a surface 8.93 cm × 8.9 cm (lb/[cm^2] [sec]) calculated using the following equation:

Evap = 10^{-7} M_v0.71 × [0.034 (P_e − P_d)$^{1.25}$ + 156 (P_e − P_d)]

Where:

P_e = Partial pressure of the component from the spilled liquid;

P_d = Partial pressure of the component in the incident air stream, assumed to be 0 mmhg; and

Area = Surface area of the liquid.

(H) The following equation shall be used to calculate the VOC emissions per batch from the drum exhaust hood A listed at paragraph (x)(9)(i)(A)(*37*) of this section:

$$ER(lb/batch) = \frac{FR(ft^3/batch) \times M_V(lb/mole) \times P(mmHg)}{constant_2\left([ft^3][mmHg]/mole\right)}$$

Where:

FR = Air flow rate.

(I) The following equation shall be used to calculate the VOC emissions per batch from 24–T–230 listed at paragraph (x)(9)(i)(A)(*38*) of this section:

$$ER(lb/batch) = \frac{(V_H - V_A) \times M_V \times PP_{135°F} \times 0.5}{constant_3}$$

Where:

V_H = Head space volume at heated temperature 135 °F;

V_A = Head space volume at ambient temperature 68 °F;

PP_{135} °F = Partial pressure of volatile component at 135 °F.

$Constant_3$ = (434 ft^3/mole)(7.45 gal/ft^3) × (760 mmHg)

(J) The following equations shall be used to calculate the VOC emissions per batch from the process sources listed in paragraph (x)(9)(i) (*39*) through (*47*) of this section:

$$ER_A(lb/yr) = \frac{V_R(gal) \times M_V(lb/mole) \times P(mmHg) \times org}{t(yr) \times constant_1\ ([gal]\ [mmHg]/mole)}$$

$$ER_B(lb/yr) = C_B \times V_T(gal) \times d_B(lb/gal) \times (charges/yr) \times org$$

$$ER_C(lb/yr) = C_C \times Evap(gal/min) \times d_C(lb/gal) \times (min/yr) \times org$$

Where:

V_R = Refill volume;

t = Time between refills;

org = Fraction of organic component in product;

C_B = Concentration of chemical B fed 3 times/week;

v_T = Tower volume;

d_B = Density of chemical B;

C_C = Concentration of chemical C fed continuously;

Evap = Evaporation rate; and

d_c = Density of chemical C.

(K) The number of batches for each process source shall be calculated as follows:

(*1*) Compute the monthly number of batches for each process source by the 15th day of the following month.

(*2*) By the 15th day of each month, add the monthly number of batches for each process source for the 12 previous months to obtain the total number of batches per year.

(ii) *Recordingkeeping.* (A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all process sources listed in paragraphs (x)(9)(i)(A) (*1*) through (*53*) of this section. These records shall be maintained for the units specified in paragraphs (x)(9)(i)(A) through (K) of this section, be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be made available to the Administrator upon request.

(B) [Reserved]

(*1*) Calculations of the pounds per batch or pounds per hour (as appropriate) for each batch for each process source. This includes the information necessary for each calculation.

(*2*) The monthly number of batches for each process source.

(*3*) The total number of batches per year for the 12 previous months for each process source.

(10) The control requirements in this paragraph apply to the storage tanks listed in paragraph (x)(10)(i)(A) of this section at the Nalco Chemical Company facility in Bedford Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.* (A) On and after October 1, 1992, the product of the molecular weight of vapor in each storage tank (M_v), the true vapor pressure at bulk liquid conditions for each tank (P), and the paint factor (F_p); the storage tank maximum yearly throughput for each tank; and the maximum monthly throughput for each tank shall not exceed the following limits:

Tank No.	$M_V \times P \times F_p$, (lb) (mmhg)/lb-mole	Yearly throughput, gal/yr	Monthly throughput, gal/month

[a] Tank not in use.

(B) The throughput shall be calculated as follows:

(*1*) Compute the monthly throughput for each tank by the 15th day of the following month.

(*2*) By the 15th day of each month, add the monthly throughputs for the 12 previous months to obtain the yearly throughput.

(ii) *Recordkeeping.* (A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all storage tanks. These records shall be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be

made available to the Administrator upon request.

(*1*) The molecular weight of vapor in each storage tank (M_v), the true vapor pressure at bulk liquid conditions for each tank (P), the paint factor (F_p), and their product. F_p shall be determined from Table 4.3–1 of ''Compilation of Air Pollutant Emission Factors, Volume I: Stationary Point and Area Sources,'' AP–42, September 1985.

(*2*) The monthly throughput.

(*3*) The total throughput per year for the 12 previous months.

(B) [Reserved]

(iii) *Test Methods.* (A) The true vapor pressure at bulk liquid temperature shall be determined by using the procedures specified in paragraph (a)(8) of this section.

(B) The molecular weight of vapor in the storage tank shall be determined by using Table 4.3–2 ''Compilation of Air Pollutant Emission Factors, Volume I: Stationary Point and Area Sources,'' AP–42, September 1985, or by analysis of vapor samples. Where mixtures of organic liquids are stored in a tank, M_v shall be estimated from the liquid composition using the following equation:

$$M_v = M_a \frac{P_a X_a}{P_t} + M_b \frac{P_b X_b}{P_t}$$

Where:

M_a = Molecular weight of pure component a;
P_a = Vapor pressure of pure component a;
X_a = Mole fraction of pure component a in the liquid;
M_b = Molecular weight of pure component b;
P_b = Vapor pressure of pure component b;
X_b = Mole fraction of pure component b in the liquid; and
$P_t = P_a X_{2=} P_b X_b$.

(11) The control requirements in this paragraph apply to the fugitive emission sources listed in paragraph (x)(11)(i)(A) of this section at the Nalco Chemical Company facility in Bedfore Park, Illinois, instead of the control requirements in paragraph (x)(3) of this section.

(i) *Production and Operation Restrictions.*

(A) On and after October 1, 1992, all components (e.g., pumps, valves, flanges, pressure relief valves (PRV's), and open end lines) at the specified locations (e.g., Building 32—Tube Reactor System, etc.), and in the specified type of service (e.g., heavy liquid stratified, light liquid stratified, etc.) shall be limited by the maximum monthly hours in the following table:

(ii) *Recordkeeping.*

(A) On and after October 1, 1992, the owner and operator of the Nalco Chemical Company facility in Bedford Park, Illinois, shall keep the following records for all fugitive emission sources. These records shall be compiled on a monthly basis, be retained at the facility for a period of 3 years, and be made available to the Administrator upon request.

(*1*) The total number of hours of organic service for each component at each location specified in paragraphs (x)(11)(i)(A) (*1*) through (*10*) of this section.

(*2*) The vapor pressure of each organic compound in each component at each location specified in paragraphs (x)(11)(i)(A) (*1*) through (*10*) of this section.

(B) [Reserved]

(12) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the gravure and screen press operations at the Meyercord Corporation (Meyercord) in Carol Stream, Illinois, instead of the requirements in paragraphs (x)(1) through (x)(5) of this section.

(i) After July 1, 1991, no materials which contain volatile organic material (VOM), including coatings, inks, and cleaning material, may be used at any gravure or screen press unless the total VOM emissions remain below 100 tons of VOM for every consecutive 365-day period, or fraction thereof, starting on July 1, 1991. A new 365-day period starts on each day. The VOM emissions, which are to be calculated on a daily basis, are to be added to the VOM emissions for the prior 364 days (but not including any day prior to July 1, 1991). VOM emissions are based upon the VOM content of the material and the volume of material used. The effect of add-on control equipment is not considered in calculating VOM emissions; that is, the VOM emissions are to be determined as if the press(es) do(es) not have add-on control equipment.

The applicable test methods and procedures specified in paragraph (a)(4) of this section are to be used in determining daily VOM emissions.

(ii) The VOM content of each coating, ink, and cleaning solution shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section to establish the records required under paragraph (x)(12)(ii) of this section. Beginning on July 1, 1991, the owner or operator of the subject presses shall collect and record all of the following information each day and maintain the information at the facility for 3 years:

(A) The name and identification number of each coating, ink, and cleaning solution as applied on any press.

(B) The pounds (lbs) of VOM per gallon of each coating, ink, and cleaning solution (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on any press.

(C) The total gallons of each coating, ink, and cleaning solution (minus water and any compounds which are specifically exempted from the definition of VOM) used per day.

(D) The total lbs of VOM contained in the volume of each coating, ink, and cleaning solution used per day on any press. The lbs of VOM per day is to be calculated by multiplying the lbs of VOM per gallon (minus water and any compounds which are specifically exempted from the definition of VOM) times the gallons (minus water and any compounds which are specifically exempted from the definition of VOM) used per day.

(E) The total lbs of VOM per day from all coatings, inks, and cleaning solutions used on all presses. The total lbs of VOM per day is to be obtained by adding the lbs of VOM per day contained in all coatings, inks, and cleaning solutions.

(F) Within 7 days after each 365-day period, the VOM emissions (as calculated in paragraph (x)(12)(ii)(E)) of this section before add-on control, from the 365-day period, are to be determined.

Starting on July 7, 1992, VOM emissions are to be determined for the 365 days ending 7 days earlier. Each day concludes a new 365-day period. However, no VOM emissions are to be included for any days prior to July 1, 1991. For example, on July 17, 1991, the emissions from July 1, through July 10, 1991, are to be included, whereas on January 7, 1994, the emissions from January 1, 1993, through December 31, 1993, are to be included.

(13) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the sheet fed cold set presses and web heatset presses at the Wallace Computer Services, Inc. (Wallace) printing and binding plant in Hillside, Illinois, instead of the requirements in 40 CFR 52.741(h) and 40 CFR 52.741(x)(1) through 40 CFR 52.741(x)(5).

(i) After July 1, 1991, no inks shall at any time be applied, at the presses indicated below, which exceed the pounds (lbs) volatile organic material (VOM) per gallon of ink (minus water and any compounds which are specifically exempted from the definition of VOM) limit established for each press. After July 1, 1991, the yearly volume of ink used at each press, in gallons of ink (minus water and any compounds which are specifically exempted from the definition of VOM) per year, shall not exceed the gallons per year limit established below for each press. The yearly volume of ink used per press is to be calculated according to the procedure in paragraph (x)(13)(iii) of this section.

Press	Lbs VOM/ gallon ink	Gallons/ year ink
14	1.68	276
16	1.68	1896
22	3.01	2712
23	3.01	13140
25	3.01	12720
26	3.01	4764

(ii) After July 1, 1991, no materials (other than those inks subject to the limits in paragraph (x)(13)(i)) of this section, shall at any time be applied or used, at the presses indicated below, which exceed the lbs VOM per gallon of material (minus water and any compounds which are specifically exempted from the definition of VOM) limit established for each press. After July 1, 1991, the yearly volume of material (excluding ink and water) used at each

press, in gallons of material (minus water and any compounds which are specifically exempted from the definition of VOM) per year, shall not exceed the gallons per year limit established for each press. The yearly volume of material (excluding ink and water) used per press is to be calculated according to the procedure in paragraph (x)(13)(iii) of this section.

Press	Lbs VOM/ gallon material	Gallons/ year material
14	6.9	612
16	6.9	8,340
22	7.1	360
23	7.1	480
25	7.1	516
26	7.1	1,848

(iii) The yearly volume of ink/material used is to be calculated as follows:

(A) Compute the volume of ink/material used each month per press by the 15th of the following month.

(B) By the 15th of each month, add the monthly ink/material usage per press for the 12 previous months (to obtain the yearly volume of ink used).

(iv) Beginning on July 1, 1991, the owner and operator of Wallace's plant in Hillside, Illinois, shall keep the following records for each press for each month. All records shall be retained by Wallace for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each ink, fountain solution, fountain solution additive, cleaning solvent, and other VOM containing material as applied or used.

(B) The weight of VOM per volume of each ink, fountain solution, fountain solution additive, cleaning solvent, and each other VOM containing material (minus water and any compounds which are specifically exempted from the definition of VOM) as applied or used each month.

(C) The volume of ink (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each month.

(D) The total volume of miscellaneous VOM containing materials (minus water and any compounds which are specifically exempted from the definition of VOM), other than inks, that are used each month.

(v) Any record showing a violation of paragraph (x)(13)(i) or (x)(13)(ii) of this section shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(vi) To determine compliance with paragraphs (x)(13)(i) and (x)(13)(ii) of this section and to establish the records required under paragraph (x)(13)(iv) of this section the VOM content of each ink and miscellaneous VOM containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section.

(14) The control and recordkeeping and reporting requirements, as well as the test methods in this paragraph, apply to the power-operated silk screen presses, the hand screen presses, the screen adhesive printing lines, the Andreotti rotogravure press, the Halley Rotogravure press, and the Viking press at the American Decal and Manufacturing Company's plant in Chicago, Illinois, instead of the requirements in paragraphs (h) and (x)(1) through (x)(5) of this section. The emissions from the sources listed above (in paragraph (x)(14) of this section) are to be included in the calculation of ''maximum theoretical emissions'' for determining applicability for any other sources (for which applicability is based on the quantity of maximum theoretical emissions) at American Decal and Manufacturing Company's Chicago plant not included in paragraph (x)(14) of this section.

(i) After July 24, 1992, no inks, coatings, thinner, clean-up material or other VOC-containing material shall at any time be applied, at the presses/printing lines listed above (in paragraph (x)(14) of this section), which exceed the VOC content (in percent by weight VOC) limit established below. After July 24, 1992, the yearly usage (in weight of material applied) of ink, coating, thinner, clean-up material, and other VOC-containing material, shall not exceed the applicable pounds per year limit established below. The yearly weight of ink, coating, thinner,

clean-up material, and other VOC-containing material is to be calculated according to the procedure in paragraph (x)(14)(ii) of this section.

Material	Usage (lbs/yr)	Weight Percent VOC
#6 ink	9,076	56.8
#7 ink	1,278	54.2
#2 ink	2,911	72.7
Blue N.C. lacq.	394	64.3
Black M lacq.	753	61.6
4B9L Clear	2,451	77.1
4B9L H Clear	3,360	75.0
Flow-Out Agent	1,795	97.1
D.S. Stamp lacq.	1,047	62.0
Dull write-on	86	71.6
AH–16	621	84.5
Thinner (#7,6)	2,350	100.0
Exon 470	1,668	65.4
9L Clear	2,451	77.1
White M lacq	3,467	47.0
Tedlar Gr. Vehicle	1,050	66.7
TH–98	22,047	73.2
TH–57	59	69.5
TH–14M	16,520	0.7
PS 160	10,644	3.0
#1 tint	4,872	69.3
#2 tint	4,256	83.7
Roto Color	13,884	62.0
1st SS White	25,740	51.5
2nd SS White	25,740	51.5
Clean Up	108,742	100.0
Other Materials	400	100.0

(ii) The yearly weight of material used is to be calculated as follows:

(A) Compute the weight of each ink, coating, thinner, clean-up material, and other VOC-containing material used each month by the 15th of the following month.

(B) By the 15th of each month, add the monthly usage (in pounds) for each ink, coating, thinner, clean-up material, and other VOC-containing material for the twelve previous months (to obtain the yearly weight of each ink, coating, thinner, clean-up material used). A comparison of these yearly usage levels (in pounds) with purchase records must be made to ensure the accuracy of the monthly usage levels (in pounds) obtained to satisfy paragraph (x)(14)(ii)(A) of this section.

(iii) Beginning on August 1, 1992, the owner and operator of the American Decal and Manufacturing Company plant in Chicago, Illinois, shall keep the following records for each ink, coating, thinner, clean-up material, and other VOC-containing material for each month. All records shall be kept by the American Decal and Manufacturing Company for 3 years and shall be made available to the Administrator on request:

(A) The name and identification number of each ink, coating, thinner, clean-up material, and other VOC-containing material as applied or used.

(B) The weight percent VOC of each ink, coating, thinner, clean-up material, and each other VOC-containing material as applied or used each month.

(C) The as applied weight of each ink, coating, thinner, clean-up material, and other VOC-containing material used each month.

(iv) Any record showing a violation of paragraph (x)(14)(i) of this section after October 20, 1995 shall be reported by sending a copy of such record to the Administrator within 30 days of the violation.

(v) To determine compliance with paragraph (x)(14)(i) of this section and to establish the records required under paragraph (x)(14)(iii) of this section, the weight percent VOC of each ink, coating, thinner, clean-up material, and other VOC-containing material shall be determined by the applicable test methods and procedures specified in paragraph (a)(4) of this section. Any material reported to be 100 percent VOC does not have to be tested for weight percent VOC.

(y) *Recordkeeping and reporting for non-CTG sources*—(1) *Exempt emission sources.* Upon request by the Administrator, the owner or operator of an emission source which is exempt from the requirements of paragraphs (u), (v), (w), (x), or (e)(3)(ii) of this section shall submit records to the Administrator within 30 calendar days from the date of the request that document that the emission source is exempt from those requirements.

(2) *Subject emission sources.* (i) Any owner or operator of a VOM emission source which is subject to the requirements of paragraph (u), (v), (w) or (x) of this section and complying by the use of emission capture and control equipment shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a new emission source, the owner or operator of the subject VOM emission source shall perform all tests and submit to the Administrator the results of all tests and calculations

necessary to demonstrate that the subject emission source will be in compliance on and after July 1, 1991, or on and after the initial start-up date.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a subject VOM emission source shall collect and record all of the following information each day and maintain the information at the facility for a period of three years:

(*1*) Control device monitoring data.

(*2*) A log of operating time for the capture system, control device, monitoring equipment and the associated emission source.

(*3*) A maintenance log for the capture system, control device and monitoring equipment detailing all routine and non-routine maintenance performed including dates and duration of any outages.

(C) On and after July 1, 1991, the owner or operator of a subject VOM emission source shall notify the Administrator in the following instances:

(*1*) Any record showing a violation of the requirements of paragraphs (u), (v), (w), or (x) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraphs (u) or (x) of this section from the use of capture systems and control devices to the use of complying coatings, the owner or operator shall comply with all requirements of paragraph (y)(2)(ii)(A) of this section. Upon changing the method of compliance with paragraphs (u) or (x) of this section from the use of capture systems and control devices to the use of complying coatings, the owner or operator shall comply with all requirements of paragraph (y)(2)(ii) of this section.

(ii) Any owner or operator of a coating line which is subject to the requirements of paragraphs (u) or (x) of this section and complying by means of the daily-weighted average VOM content limitation shall comply with the following:

(A) By July 1, 1991, or upon initial start-up of a coating line subject to paragraph (u) or (x) of this section; the owner or operator of the subject coating line shall certify to the Administrator that the coating line will be in compliance on and after July 1, 1991, or on and after the initial start-up date. Such certification shall include:

(*1*) The name and identification number of each coating line which will comply by means of the daily-weighted average VOM content limitation.

(*2*) The name and identification number of each coating as applied on each coating line.

(*3*) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*4*) The instrument or method by which the owner or operator will accurately measure or calculate the volume of each coating as applied each day on each coating line.

(*5*) The method by which the owner or operator will create and maintain records each day as required in paragraph (y)(2)(ii)(B) of this section.

(*6*) An example of the format in which the records required in paragraph (y)(2)(ii)(B) of this section will be kept.

(B) On and after July 1, 1991, or on and after the initial start-up date, the owner or operator of a subject coating line shall collect and record all of the following information each day for each coating line and maintain the information at the facility for a period of three years:

(*1*) The name and identification number of each coating as applied on each coating line.

(*2*) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

(*3*) The daily-weighted average VOM content of all coatings as applied on each coating line as defined in paragraph (a)(3) of this section.

(C) On and after July 1, 1991, the owner or operator of a subject coating line shall notify the Administrator in the following instances:

(*1*) Any record showing violation of the requirements of paragraph (u) or (x) of this section shall be reported by sending a copy of such record to the Administrator within 30 days following the occurrence of the violation.

(*2*) At least 30 calendar days before changing the method of compliance with paragraph (u) or (x) of this section from the use of complying coatings to the use capture systems and control devices, the owner or operator shall comply with all requirements of paragraph (y)(2)(i)(A) of this section. Upon changing the method of compliance with paragraphs (u) or (x) of this section from the use of complying coatings to the use capture systems and control devices, the owner or operator shall comply with all requirements of paragraph (y)(2)(i) of this section.

(iii) Any owner or operator of a VOM emission source which is subject to the requirements of paragraphs (u), (v), (w) or (x) of this section and complying by means of an alternative control plan which has been approved by the Administrator as a SIP or FIP revision shall comply with the recordkeeping and reporting requirements specified in the altenative control plan.

(z) *Rules stayed.* Not withstanding any other provision of this subpart, the effectiveness of the following rules is stayed as indicated below.

(1) [Reserved]

(2) Compliance with all of 40 CFR 52.741 is stayed for 60 days (July 1, 1991, until August 30, 1991) as it pertains to the following parties: The Illinois Environmental Regulatory Group including its approximately 40 member firms; Allsteel, Incorporated; Riverside Laboratories, Incorporated; the Printing Industry of Illinois/Indiana Association including its member firms, and R.R. Donnelley & Sons Company; the rules applicable to General Motors Corporation; Reynolds Metals Company; Stepan Company; and Duo-Fast Corporation. Final compliance for these parties is extended 60 days from July 1, 1991 until August 30, 1991.

(3) The following rules are stayed from July 23, 1991, until USEPA completes its reconsideration as indicated:

(i) 40 CFR 52.741(e) only as it applies to Duo-Fast Corporation's Franklin Park, Illinois ''power-driven metal fastener'' manufacturing facility, and

(ii) 40 CFR 52.741 (w) and (y) only as it applies to Stepan Company's miscellaneous organic chemical manufacturing processes at its manufacturing facility located near Millsdale, Illinois.

When USEPA concludes its reconsideration, it will publish its decision and any actions required to effectuate that decision in the FEDERAL REGISTER.

(4)–(5) [Reserved]

APPENDIX A TO § 52.741—LIST OF CHEMICALS DEFINING SYNTHETIC ORGANIC CHEMICAL AND POLYMER MANUFACTURING

OCPDB No.[1]	Chemical
20	Acetal.
30	Acetaldehyde.
40	Acetaldol.
50	Acetamide.
65	Acetanilide.
70	Acetic acid.
80	Acetic anhydride.
90	Acetone.
100	Acetone cyanohydrin.
110	Acetonitrile.
120	Acetophenone.
125	Acetyl chloride.
130	Acetylene.
140	Acrolein.
150	Acrylamide.
160	Acrylic acid & esters.
170	Acrylonitrile.
180	Adipic acid.
185	Adiponitrile.
190	Alkyl naphthalenes.
200	Allyl alcohol.
210	Allyl chloride.
220	Aminobenzoic acid.
230	Aminoethylethanolamine.
235	p-aminophenol.
240	Amyl acetates.
250	Amyl alcohols.
260	Amyl amine.
270	Amyl chloride.
280	Amyl mercaptans.
290	Amyl phenol.
300	Aniline.
310	Aniline hydrochloride.
320	Anisidine.
330	Anisole.
340	Anthranilic acid.
350	Anthraquinone.
360	Benzaldehyde.
370	Benzamide.
380	Benzene.
390	Benzenedisulfonic acid.
400	Benzene-sulfonic acid.
410	Benzil.
420	Benzilic acid.
430	Benzoic acid.
440	Benzoin.
450	Bennzonitrile.
460	Benzophenone.
480	Benzotrichloride.
490	Benzoyl chloride.
500	Benzyl chalcohol.
510	Benzyl amine.
520	Benzyl benzoate.

OCPDB No.[1]	Chemical
530	Benzyl chloride.
540	Benzyl dichloride.
550	Biphenyl.
560	Bisphenol A.
570	Bromobenzene.
580	Bromonaphthalene.
590	Butadiene.
592	1-butene.
600	n-butyl acetate.
630	n-butyl acrylate.
640	n-butyl alcohol.
650	s-butyl alcohol.
660	t-butyl alcohol.
670	n-butylamine.
680	s-butylamine.
690	t-butylamine.
700	p-pert-butyl benzoic acid.
750	n-butyraldehyde.
760	Butyric acid.
770	Butyric anhydride.
780	Butyronitrile.
785	Caprolactam.
790	Carbon disulfide.
800	Carbon tetrabromide.
810	Carbon tetrachloride.
820	Cellulose acetate.
840	Chloroacetic acid.
850	m-chloroaniline.
860	o-chloroaniline.
870	p-chloroaniline.
880	Chlorobenzaldehyde.
890	Chlorobenzene.
900	Chlorobenzoic acid.
905	Chlorobenzotrichloride.
910	Chlorobenzoyl chloride.
920	Chlorodifluoroethane.
921	Chlorodifluoromethane.
930	Chloroform
940	Chloronaphthalene.
950	o-chloronitrobenzene.
951	p-chloronitrobenzene.
960	Chlorophenols.
964	Chloroprene.
965	Chlorosulfonic acid.
970	m-chlorotoluene.
980	o-chlorotoluene.
990	p-chlorotoluene.
992	Chlorotrifluoromethane.
1000	m-cresol.
1010	o-cresol.
1020	p-cresol.
1021	Mixed cresols.
1030	Cresylic acid.
1040	Crontonaldehyde.
1050	Crontonic acid.
1060	Cumene.
1070	Cumene hydroperoxide.
1080	Cyanoacetic acid.
1090	Cyanogen chloride.
1100	Cyanuric acid.
1110	Cyanuric chloride.
1120	Cychohexane.
1130	Cyclohexanol.
1140	Cyclohexanone.
1150	Cyclohexene.
1160	Cyclohexylamine.
1170	Cyclooctadiene.
1180	Decanol.
1190	Diacetone alcohol.
1200	Diaminobenzoic acid.
1210	Dichloroaniline.
1215	m-dichlorobenzene.
1216	o-dichlorobenzene.
1220	p-dichlorobenzene.
1221	Dichlorodifluoromethane.
1240	Dichloroethyl ether 1,2-dichloroethane.
1250	Dichlorohydrin
1270	Dichloropropene.
1280	Dicyclohexylamine.
1290	Diethylamine.
1300	Diethylene glycol.
1304	Diethylene glycol diethyl ether.
1305	Diethylene glycol dimethyl ether.
1310	Diethylene glycolmonobutyl ether.
1320	Diethylene glycolmonobutyl ether acetate.
1330	Diethylene glycolmonoethyl ether.
1340	Diethylene glycolmonoethyl ether acetate.
1360	Diethylene glycolmonomethyl ether.
1420	Diethyl sulfate.
1430	Difluoroethane.
1440	Diisobutylene.
1442	Diisodecyl phthalate.
1444	Diisooctyl phthalate.
1450	Diketene.
1460	Dimethylamine.
1470	N,N-dimethylaniline.
1480	N,N-dimethylether.
1490	N,N-dimethylformamide.
1495	Dimethylhydrazine.
1500	Dimethyl sulfate.
1510	Dimethyl sulfide.
1520	Dimethylsulfoxide.
1530	Dimethylterephthalate.
1540	3,5-dinitrobenzoic acid.
1545	Dinitrophenol.
1560	Dioxane.
1570	Dioxolane.
1580	Diphenylamine.
1590	Diphenyl oxide.
1600	Diphenyl thiourea.
1610	Dipropylene glycol.
1620	Dodecene.
1630	Dodecylaniline.
1640	Dodecylphenol.
1650	Epichlorohydrin.
1660	Ethanol.
1661	Ethanolamines.
1670	Ethyl acetate.
1680	Ethyl acetoacetate.
1690	Ethyl acrylate.
1700	Ethylamine.

APPENDIX B TO § 52.741—VOM MEASUREMENT TECHNIQUES FOR CAPTURE EFFICIENCY

Procedure G.1—Captured VOC Emissions

1. Introduction

1.1 *Applicability*. This procedure is applicable for determining the volatile organic compounds (VOC) content of captured gas streams. It is intended to be used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations. The procedure may not be acceptable in certain site-specific situations, *e.g.*, when: (1) Direct fired heaters or other circumstances affect the quantity of VOC at the control device inlet; and (2) particulate organic aerosols are formed in the process and are present in the captured emissions.

1.2 *Principle*. The amount of VOC captured (G) is calculated as the sum of the products of the VOC content (C_{Gj}), the flow rate (Q_{Gj}), and the sample time (T_C) from each captured emissions point.

1.3 *Estimated measurement uncertainty*. The measurement uncertainties are estimated for each captured or fugitive emissions point as follows: Q_{Gj}=±5.5 percent and C_{Gj}=±5.0 percent. Based on these numbers, the probable uncertainty for G is estimated at about ±7.4 percent.

1.4 *Sampling requirements*. A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes*. Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration*. A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe*. Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly*. Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line*. Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump*. A lead-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control*. A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow rate control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold*. Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If captured or fugitive emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analyzer*. An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements.

The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ±3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ±3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ±5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ±1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ±2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2/60 percent He or 40 percent H_2/60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA Linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 *Captured emissions volumetric flow rate.*

2.2.1 *Method 2 or 2A apparatus.* For determining volumetric flow rate.

2.2.2 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.3 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

3. Determinations of Volumetric Flow Rate of Captured Emissions

3.1 Locate all points where emissions are captured from the affected facility. Using Method 1, determine the sampling points. Be sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. Determinations of VOC Content of Captured Emissions

4.1 *Analysis duration.* Measure the VOC responses at each captured emissions point during the entire test run or, if applicable, while the process is operating. If there are multiple captured emission locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA according to the procedure in section 5.1.

4.2.2 Conduct a system check according to the procedure in section 5.3.

4.2.3 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.4 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.5 Conduct a system check before and a system check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.6 Verify that the sample lines, filter, and pump temperatures are 120 ±5 °C.

4.2.7 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple captured emission locations are sampled using a single FIA, sample at each location for the same amount of time (*e.g.*, 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each

sample point during each hour of testing. Disregard the measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Background concentration.*

4.3.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3.

NOTE: This sample train shall be a separate sampling train from the one to measure the captured emissions.

4.3.3 Position the probe at the sampling location.

4.3.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.4 to 4.2.7.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct the system drift checks at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet to the sampling probe while the dilution air is turned off. Record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before and after each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

A_i = area of NDO i, ft^2.
A_N = total area of all NDO's in the enclosure, ft^2.
C_{Bi} = corrected average VOC concentration of background emissions at point i, ppm propane.
C_B = average background concentration, ppm propane.
C_{Gj} = corrected average VOC concentration of captured emissions at point j, ppm propane.
C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.
C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.
C_H = actual concentration of the drift check calibration gas, ppm propane.
C_i = uncorrected average background VOC concentration measured at point i, ppm propane.
C_j = uncorrected average VOC concentration measured at point j, ppm propane.
G = total VOC content of captured emissions, kg.
$K_1 = 1.830 \times 10^{-6}$ kg/ (m^3-ppm).
n = number of measurement points.
Q_{Gj} = average effluent volumetric flow rate corrected to standard conditions at captured emissions point j, m^3/min.
T_C = total duration of captured emissions sampling run, min.

7. CALCULATIONS

7.1 *Total VOC captured emissions.*

$$G = \sum_{j=1}^{n} \left(C_{Gj} - C_B\right) Q_{Gj} T_C K_1 \qquad \text{Eq. 1}$$

7.2 *VOC concentration of the captured emissions at point j.*

$$C_{Gj} = \left(C_j - C_{DO}\right)\frac{C_H}{C_{DH} - C_{DO}} \qquad \text{Eq. 2}$$

7.3. *Background VOC concentration at point i.*

$$C_{Bi} = \left(C_i - C_{DO}\right)\frac{C_H}{C_{DH} - C_{DO}} \qquad \text{Eq. 3}$$

7.4 *Average background concentration.*

$$C_B = \frac{\sum_{i=1}^{n} C_{Bi} A_i}{n A_N} \qquad \text{Eq. 4}$$

NOTE: If the concentration at each point is with in 20 percent of the average concentration of all points, the terms ''A_i'' and ''A_N'' may be deleted from Equation 4.

Procedure G.2—Captured VOC Emissions (Dilution Technique)

1. INTRODUCTION

1.1 *Applicability.* This procedure is applicable for determining the volatile organic compounds (VOC) content of captured gas streams. It is intended to be used as a segment in the development of a gas/gas protocol in which fugitive emissions are measured for determining VOC capture efficiency (CE) for surface coating and printing operations. A dilution system is used to reduce the VOC concentration of the captured emission to about the same concentration as the fugitive emission. The procedure may not be acceptable in certain site-specific situations, *e.g.*, when: (1) Direct fired heaters or other circumstances affect the quantity of VOC at the control device inlet; and (2) particulate organic aerosols are formed in the process and are present in the captured emissions.

1.2 *Principle.* The amount of VOC captured (G) is calculated as the sum of the products of the VOC content (C_{Gj}), the flow rate (Q_{Gj}), and the sampling time (T_C) from each captured emissions point.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each captured or fugitive emissions point as follows: O_{Gj}=±5.5 percent and C_{Gj}=±5 percent. Based on these numbers, the probable uncertainty for G is estimated at about ±7.4 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Dilution system.* A Kipp in-stack dilution probe and controller or similar device may be used. The dilution rate may be changed by substituting different critical orifices or adjustments of the aspirator supply pressure. The dilution system shall be heated to prevent VOC condensation.

NOTE: An out-of-stack dilution device may be used.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contract the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If captured or fugitive emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be

demonstrated that they would provide more accurate measurements.

The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ±3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ±3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ±5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.7.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ±1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ±2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution system, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2/60 percent He or 40 percent H_2/60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies signficantly from a mean value.

2.1.9.2. *Carrier gas and dilution air supply.* High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.9.4 *Dilution check gas.* Gas mixture standard containing propane in air, approximately half the span value after dilution.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 *Captured emissions volumetric flow rate.*

2.2.1 *Method 2 or 2A apparatus.* For determining volumetric flow rate.

2.2.2 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.3 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF CAPTURED EMISSIONS

3.1 Locate all points where emissions are captured from the affected facility. Using Method 1, determine the sampling points. Be sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. DETERMINATION OF VOC CONTENT OF CAPTURED EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each captured emissions point during the entire test run or, if applicable, while the process is operating. If there are multiple captured emissions locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA according to the procedure in section 5.1.

4.2.2 Set the dilution ratio and determine the dilution factor according to the procedure in section 5.3.

4.2.3 Conduct a system check according to the procedure in section 5.4.

4.2.4 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.5 Inject zero gas at the calibration valve assembly. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.6 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.4. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.7 Verify that the sample lines, filter, and pump temperatures are 120 ±5 °C.

4.2.8 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple captured

emission locations are sampled using a single FIA, sample at each location for the same amount of time (*e.g.*, 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Background concentration.*

4.3.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.4.

4.3.3 Position the probe at the sampling location.

4.3.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.4 to 4.2.8.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. Calibration and Quality Assurance

5.1 *FIA Calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system after the dilution system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the diluted captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct the system drift check at the end of each run.

5.3 *Determination of dilution factor.* Inject the dilution check gas into the measurement system before the dilution system and record the response. Calculate the dilution factor using Equation 3.

5.4 *System check.* Inject the high range calibration gas at the inlet to the sampling probe while the dilution air is turned off. Record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before and after each test run.

5.5 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. Nomenclature

A_i = area of NDO i, ft^2.
A_N = total area of all NDO's in the enclosure, ft^2.
C_A = actual concentration of the dilution check gas, ppm propane.
C_{Bi} = corrected average VOC concentration of background emissions at point i, ppm propane.
C_B = average background concentration, ppm propane.
C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.
C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.
C_H = actual concentration of the drift check calibration, gas, ppm propane.
C_i = uncorrected average background VOC concentration measured at point i, ppm propane.
C_j = uncorrected average VOC concentration measured at point j, ppm propane.
C_M = measured concentration of the dilution check gas, ppm propane.
D_F = dilution factor.
G = total VOC content of captured emissions, kg.
$K_1 = 1.830 \times 10^{-6}$ kg/(m^3-ppm).
n = number of measurement points.
Q_{Gj} = average effluent volumetric flow rate corrected to standard conditions at captured emissions point j, m^3/min.

T_C = total duration of capture efficiency sampling run, min.

7. CALCULATIONS

7.1 *Total VOC captured emissions.*

$$G = \sum_{j=1}^{n} C_{Gj} Q_{Gj} T_C K_1 \qquad \text{Eq. 1}$$

7.2 *VOC concentration of the captured emissions to point j.*

$$C_{Gj} = DF\left(C_j + -C_{DO}\right)\frac{C_H}{C_{DH} - C_{DO}} \qquad \text{Eq. 2}$$

7.3 *Dilution factor.*

$$DF = \frac{C_A}{C_M} \qquad \text{Eq. 3}$$

7.4 *Background VOC concentration at point i.*

$$C_{Bi} = \left(C_i - C_{DO}\right)\frac{C_H}{C_{DH} - C_{DO}} \qquad \text{Eq. 4}$$

7.5 *Average background concentration.*

$$C_B = \frac{\sum_{i=1}^{n} C_{Bi} A_i}{nA_N} \qquad \text{Eq. 5}$$

NOTE: If the concentration at each point is within 20 percent of the average concentration of all points, the terms ''A_i'' and ''A_N'' may be deleted from Equation 4.

Procedure F.2—Fugitive VOC Emissions from Building Enclosures

1. Introduction

1.1 *Applicability.* This procedure is applicable for determining the fugitive volatile organic compounds (VOC) emissions from a building enclosure (BE). It is intended to be used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The total amount of fugitive VOC emissions (F_B) from the BE is calculated as the sum of the products of the

VOC content (C_{Fj}) of each fugitive emissions point, its flow rate (Q_{Fj}), and time (T_F).

1.3 *Measurement uncertainty.* The measurement uncertainties are estimated for each fugitive emissions point as follows: Q_{Fj}=±5.0 percent and C_{Fj}=±5.0 percent. Based on these numbers, the probable uncertainty for F_B is estimated at about ±11.2 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe.* Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of staimust be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow rate control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold must be heated to prevent condensation.

2.1.7 *Organic Concentration Analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ±3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ±3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ±5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ±1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ±2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2/60 percent He or 40 percent H_2/60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be heated to prevent any condensation unless it

can be demonstrated that no condensation occurs.

2.2 *Fugitive emissions volumetric flow rate.*

2.2.1 *Flow direction indicators.* Any means of indicating inward or outward flow, such as light plastic film or paper streamers, smoke tubes, filaments, and sensory perception.

2.2.2 *Method 2 or 2A apparatus.* For determining volumetric flow rate. Anemometers or similar devices calibrated according to the manufacturer's instructions may be used when low velocities are present. Vane anemometers (Young-maximum response propeller), specialized pitots with electronic manometers (*e.g.,* Shortridge Instruments Inc., Airdata Multimeter 860) are commercially available with measurement thresholds of 15 and 8 mpm (50 and 25 fpm), respectively.

2.2.3 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.4 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF FUGITIVE EMISSIONS

3.1 *Preliminary determinations.* The purpose of this exercise is to determine which exhaust points should be measured for volumetric flow rates and VOC concentrations.

3.1.1 *Forced draft openings.* Identify all forced draft openings. Determine the volumetric flow rate according to Method 2.

3.1.2 *NDO's exhaust points.* The NDO's in the roof of a facility are considered to be exhaust points. Determine volumetric flow rate from these NDO's. Divide the cross-sectional area according to Method 1 using 12 equal areas. Use the appropriate velocity measurement devices, *e.g.,* propeller anemometers.

3.1.3 *Other NDO's.*

3.1.3.1 This step is optional. Determine the exhaust flow rate, including that of the control device, from the enclosure and the intake air flow rate. If the exhaust flow rate divided by the intake air flow rate is greater than 1.1, then all other NDO's are not considered to be significant exhaust points.

3.1.3.2 If the option above is not taken, identify all other NDO's and other potential points through which fugitive emissions may escape the enclosure. Then use the following criteria to determine whether flow rates and VOC concentrations need to be measured:

3.1.3.2.1 Using the appropriate flow direction indicator, determine the flow direction. An NDO with zero or inward flow is not an exhaust point.

3.1.3.2.2 Measure the outward volumetric flow rate from the remainder of the NDO's. If the collective flow rate is 2 percent, or less, of the flow rate from sections 3.1.1 and 3.1.2, then these NDO's, except those within two equivalent diameters (based on NDO opening) from VOC sources, may be considered to be non-exhaust points.

3.1.3.2.3 If the percentage calculated in section 3.1.3.2.2 is greater than 2 percent, those NDO's (except those within two equivalent diameters from VOC sources) whose volumetric flow rate totals 2 percent of the flow rate from sections 3.1.1 and 3.1.2 may be considered as non-exhaust points. All remaining NDO's shall be measured for volumetric flow rate and VOC concentrations during the CE test.

3.1.3.2.4 The tester may choose to measure VOC concentrations at the forced exhaust points and the NDO's. If the total VOC emissions from the NDO's are less than 2 percent of the emissions from the forced draft and roof NDO's, then these NDO's may be eliminated from further consideration.

3.2 *Determination of flow rates.*

3.2.1 Measure the volumetric flow rate at all locations identified as exhaust points in section 3.1. Divide each exhaust opening into 9 equal areas for rectangular openings and 8 for circular openings.

3.2.2 Measure the velocity at each site at least once every hour during each sampling run using Method 2 or 2A, if applicable, or using the low velocity instruments in section 2.2.2.

4. DETERMINATION OF VOC CONTENT OF FUGITIVE EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each fugitive emission point during the entire test run or, if applicable, while the process is operating. If there are multiple emissions locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 Gas VOC concentration.

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3, respectively.

4.2.2 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.3 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.4 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform drift checks during the run not to exceed one drift check per hour.

4.2.5 Verify that the sample lines, filter, and pump temperatures are 120 ±5 °C.

4.2.6 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple emission locations are sampled using a single FIA, sample at each location for the same amount of time (*e.g.*, 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the response measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. Calibration and Quality Assurance

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas that most closely approximates the concentration of the captured emissions for conducting the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct a system drift check at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet of the sampling probe and record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. Nomenclature

C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.

C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.

C_{Fj} = corrected average VOC concentration of fugitive emissions at point j, ppm propane.

C_H = actual concentration of the drift check calibration gas, ppm propane.

C_j = uncorrected average VOC concentration measured at point j, ppm propane.

F_B = total VOC content of fugitive emissions from the building, kg.

$K_1 = 1.830 \times 10^{-6}$ kg/(m^3-ppm).

n = number of measurement points.

Q_{Fj} = average effluent volumetric flow rate corrected to standard conditions at fugitive emissions point j, m^3/min.

T_F = total duration of capture efficiency sampling run, min.

7. Calculations

7.1 *Total VOC fugitive emissions from the building.*

$$F_B = \sum_{j=1}^{n} C_{Fj} Q_{Fj} T_F K_1 \qquad \text{Eq. 1}$$

7.2 *VOC concentration of the fugitive emissions at point j.*

$$C_{Fj} = \left(C_j - C_{DO}\right) \frac{C_H}{C_{DH} - C_{DO}} \qquad \text{Eq. 2}$$

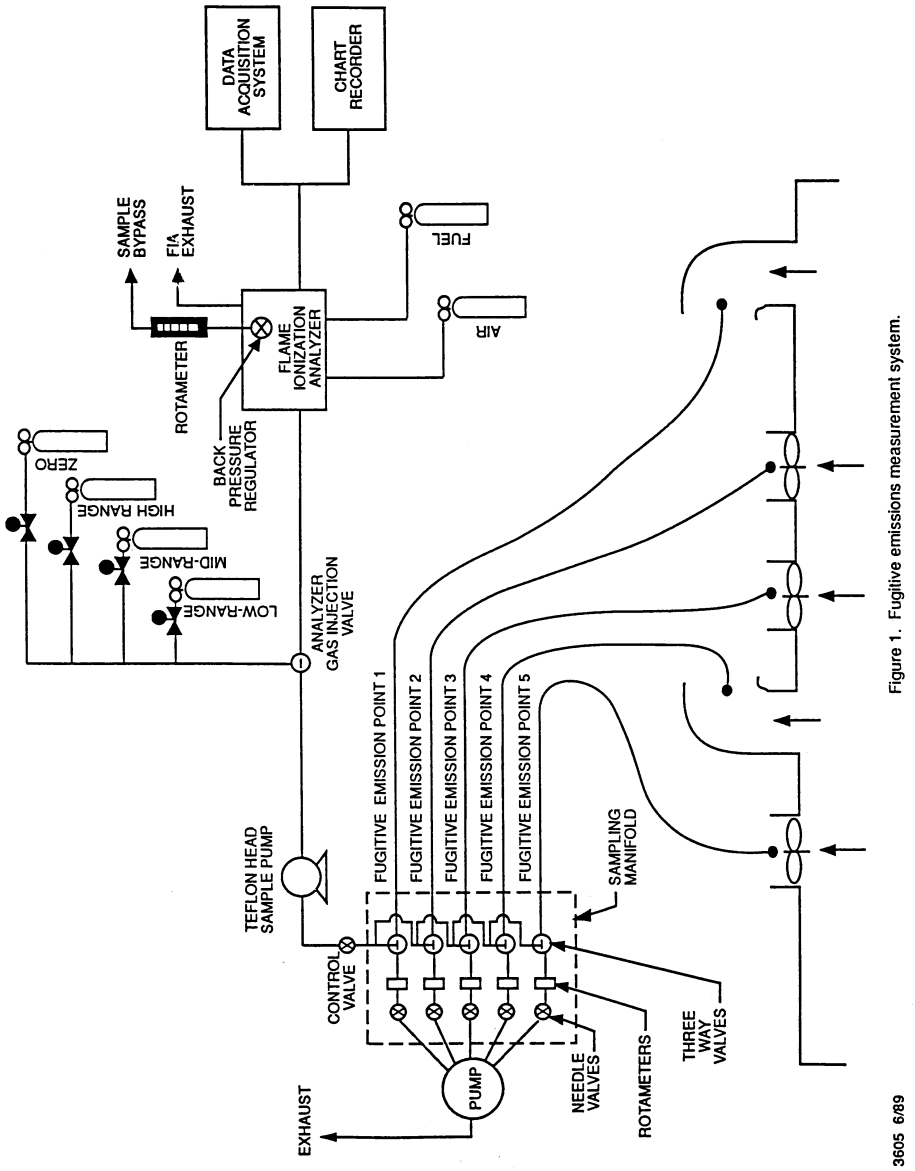

Figure 1. Fugitive emissions measurement system.

Procedure F.1—Fugitive VOC Emissions From Temporary Enclosures

1. Introduction

1.1 *Applicability.* This procedure is applicable for determining the fugitive volatile organic compounds (VOC) emissions from a temporary total enclosure (TTE). It is intended to be used as a segment in the development of liquid/gas or gas/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The amount of fugitive VOC emissions (F) from the TTE is calculated as the sum of the products of the VOC content

(C_{Fj}), the flow rate (Q_{Fj}), and the sampling time (T_F) from each fugitive emissions point.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each fugitive emission point as follows: Q=±5.5 percent and C_{Fj}=±5.0 percent. Based on these numbers, the probable uncertainty for F is estimated at about ±7.4 percent.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Gas VOC concentration.* A schematic of the measurement system is shown in Figure 1. The main components are described below:

2.1.1 *Sample probe.* Stainless steel, or equivalent. The probe shall be heated to prevent VOC condensation.

2.1.2 *Calibration valve assembly.* Three-way valve assembly at the outlet of sample probe to direct the zero and calibration gases to the analyzer. Other methods, such as quick-connect lines, to route calibration gases to the outlet of the sample probe are acceptable.

2.1.3 *Sample line.* Stainless steel or Teflon tubing to transport the sample gas to the analyzer. The sample line must be heated to prevent condensation.

2.1.4 *Sample pump.* A leak-free pump, to pull the sample gas through the system at a flow rate sufficient to minimize the response time of the measurement system. The components of the pump that contact the gas stream shall be constructed of stainless steel or Teflon. The sample pump must be heated to prevent condensation.

2.1.5 *Sample flow rate control.* A sample flow rate control valve and rotameter, or equivalent, to maintain a constant sampling rate within 10 percent. The flow control valve and rotameter must be heated to prevent condensation. A control valve may also be located on the sample pump bypass loop to assist in controlling the sample pressure and flow rate.

2.1.6 *Sample gas manifold.* Capable of diverting a portion of the sample gas stream to the flame ionization analyzer (FIA), and the remainder to the bypass discharge vent. The manifold components shall be constructed of stainless steel or Teflon. If emissions are to be measured at multiple locations, the measurement system shall be designed to use separate sampling probes, lines, and pumps for each measurement location and a common sample gas manifold and FIA. The sample gas manifold and connecting lines to the FIA must be heated to prevent condensation.

2.1.7 *Organic concentration analzyer.* An FIA with a span value of 1.5 times the expected concentration as propane; however, other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable of meeting or exceeding the following specifications:

2.1.7.1 *Zero drift.* Less than ±3.0 percent of the span value.

2.1.7.2 *Calibration drift.* Less than ±3.0 percent of the span value.

2.1.7.3 *Calibration error.* Less than ±5.0 percent of the calibration gas value.

2.1.7.4 *Response time.* Less than 30 seconds.

2.1.8 Integrator/data acquisition system. An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.1.9 *Calibration and other gases.* Gases used for calibration, fuel, and combustion air (if required) are contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ±1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ±2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.1.9.1 *Fuel.* A 40 percent H_2/60 percent He or 40 percent H_2/60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.1.9.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (as propane or carbon equivalent) or less than 0.1 percent of the span value, whichever is greater.

2.1.9.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.1.10 *Particulate filter.* An in-stack or an out-of-stack glass fiber filter is recommended if exhaust gas particulate loading is significant. An out-of-stack filter must be

heated to prevent any condensation unless it can be demonstrated that no condensation occurs.

2.2 *Fugitive emissions volumetric flow rate.*

2.2.1 *Method 2 or 2A apparatus.* For determining volumetric flow rate.

2.2.2 *Method 3 apparatus and reagents.* For determining molecular weight of the gas stream. An estimate of the molecular weight of the gas stream may be used if it can be justified.

2.2.3 *Method 4 apparatus and reagents.* For determining moisture content, if necessary.

2.3 *Temporary total enclosure.* The criteria for designing a TTE are discussed in Procedure T.

3. DETERMINATION OF VOLUMETRIC FLOW RATE OF FUGITIVE EMISSIONS

3.1 Locate all points where emissions are exhausted from the TTE. Using Method 1, determine the sampling points. Be sure to check each site for cyclonic or swirling flow.

3.2 Measure the velocity at each sampling site at least once every hour during each sampling run using Method 2 or 2A.

4. DETERMINATION OF VOC CONTENT OF FUGITIVE EMISSIONS

4.1 *Analysis duration.* Measure the VOC responses at each fugitive emission point during the entire test run or, if applicable, while the process is operating. If there are multiple emission locations, design a sampling system to allow a single FIA to be used to determine the VOC responses at all sampling locations.

4.2 *Gas VOC concentration.*

4.2.1 Assemble the sample train as shown in Figure 1. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3, respectively.

4.2.2 Install the sample probe so that the probe is centrally located in the stack, pipe, or duct, and is sealed tightly at the stack port connection.

4.2.3 Inject zero gas at the calibration valve assembly. Allow the measurement system response to reach zero. Measure the system response time as the time required for the system to reach the effluent concentration after the calibration valve has been returned to the effluent sampling position.

4.2.4 Conduct a system check before and a system drift check after each sampling run according to the procedures in sections 5.2 and 5.3. If the drift check following a run indicates unacceptable performance, the run is not valid. The tester may elect to perform system drift checks during the run not to exceed one drift check per hour.

4.2.5 Verify that the sample lines, filter, and pump temperatures are 120 ±5 °C.

4.2.6 Begin sampling at the start of the test period and continue to sample during the entire run. Record the starting and ending times and any required process information as appropriate. If multiple emission locations are sampled using a single FIA, sample at each location for the same amount of time (*e.g.*, 2 minutes) and continue to switch from one location to another for the entire test run. Be sure that total sampling time at each location is the same at the end of the test run. Collect at least 4 separate measurements from each sample point during each hour of testing. Disregard the response measurements at each sampling location until two times the response time of the measurement system has elapsed. Continue sampling for at least 1 minute and record the concentration measurements.

4.3 *Background concentration.*

4.3.1 *Determination of VOC background concentration.*

4.3.1.1 Locate all NDO's of the TTE. A sampling point shall be centrally located outside of the TTE at 4 equivalent diameters from each NDO, if possible. If there are more than 6 NDO's, choose 6 sampling points evenly spaced among the NDO's.

4.3.1.2 Assemble the sample train as shown in Figure 2. Calibrate the FIA and conduct a system check according to the procedures in sections 5.1 and 5.3.

4.3.1.3 Position the probe at the sampling location.

4.3.1.4 Determine the response time, conduct the system check and sample according to the procedures described in sections 4.2.3 to 4.2.6.

4.4 *Alternative procedure.* The direct interface sampling and analysis procedure described in section 7.2 of Method 18 may be used to determine the gas VOC concentration. The system must be designed to collect and analyze at least one sample every 10 minutes.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* Select the calibration gas concentration that most closely approximates that of the fugitive gas emissions to conduct the drift checks. Introduce the zero and calibration gas at the calibration valve assembly and verify that the appropriate gas flow rate and pressure are present at the FIA. Record the measurement system responses to the zero and calibration gases. The performance of the system is acceptable if the difference between the drift check measurement and the value obtained in section 5.1 is less than 3 percent of the span value. Conduct a system drift check at the end of each run.

5.3 *System check.* Inject the high range calibration gas at the inlet of the sampling probe and record the response. The performance of the system is acceptable if the measurement system response is within 5 percent of the value obtained in section 5.1 for the high range calibration gas. Conduct a system check before each test run.

5.4 *Analysis audit.* Immediately before each test analyze an audit cylinder as described in section 5.2. The analysis audit must agree with the audit cylinder concentration within 10 percent.

6. NOMENCLATURE

A_i = area of NDO i, ft^2.
A_N = total area of all NDO's in the enclosure, ft^2.
C_{Bi} = corrected average VOC concentration of background emissions at point i, ppm propane.
C_B = average background concentration, ppm propane.
C_{DH} = average measured concentration for the drift check calibration gas, ppm propane.
C_{DO} = average system drift check concentration for zero concentration gas, ppm propane.
C_{Fj} = corrected average VOC concentration of fugitive emissions at point j, ppm propane.
C_H = actual concentration of the drift check calibration gas, ppm propane.
C_i = uncorrected average background VOC concentration at point i, ppm propane.
C_j = uncorrected average VOC concentration measured at point j, ppm propane.
F = total VOC content of fugitive emissions, kg.
$K_1 = 1.830 \times 10^{-6}$ kg/(m^3 − ppm).
n = number of measurement points.
Q_{Fj} = average effluent volumetric flow rate corrected to standard conditions at fugitive emissions point j, m^3/min.
T_F = total duration of fugitive emissions sampling run, min.

7. CALCULATIONS

7.1 *Total VOC fugitive emissions.*

$$\sum_{j=1}^{F=n}\left(C_{Fj}-C_B\right)Q_{Fj}T_FK_1 \qquad \text{Eq. 1}$$

7.2 *VOC concentration of the fugitive emissions at point j.*

$$C_{Fj}=\left(C_j-C_{DO}\right)\frac{C_H}{C_{DH}-C_{DO}} \qquad \text{Eq. 2}$$

7.3 *Background VOC concentration at point i.*

$$C_{Bi}=\left(C_i-C_{DO}\right)\frac{C_H}{C_{DH}-C_{DO}} \qquad \text{Eq. 3}$$

7.4 *Average background concentration.*

$$C_B=\frac{\sum_{i=1}^{n}C_{Bi}A_i}{nA_N} \qquad \text{Eq. 4}$$

NOTE: If the concentration at each point is within 20 percent of the average concentration of all points, the terms ''A_i'' and ''A_N'' may be deleted from Equation 4.

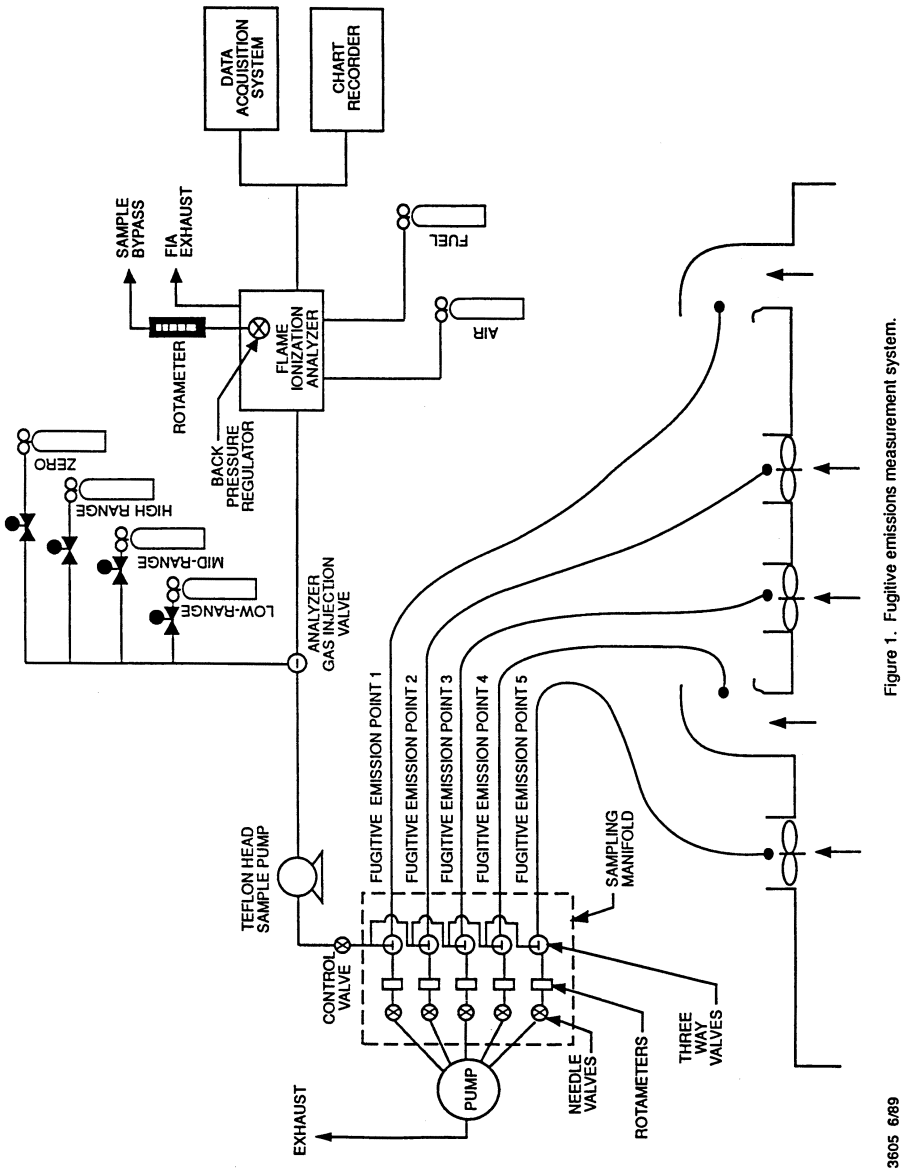

Figure 1. Fugitive emissions measurement system.

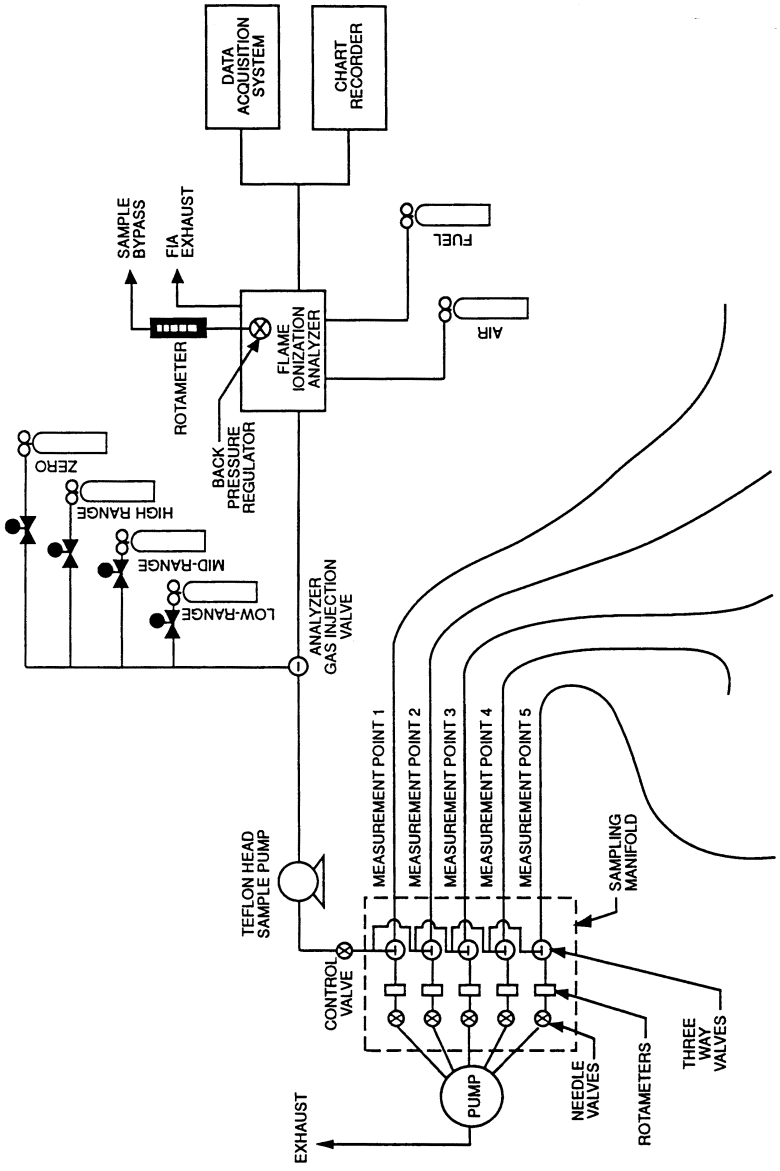

Figure 2. Background measurement system.

Procedure L—VOC Input

1. INTRODUCTION

1.1 *Applicability.* This procedure is applicable for determining the input of volatile organic compounds (VOC). It is intended to be used as a segment in the development of liquid/gas protocols for determining VOC capture efficiency (CE) for surface coating and printing operations.

1.2 *Principle.* The amount of VOC introduced to the process (L) is the sum of the products of the weight (W) of each VOC containing liquid (ink, paint, solvent, etc.) used and its VOC content (V). A sample of each

VOC containing liquid is analyzed with a flame ionization analyzer (FIA) to determine V.

1.3 *Estimated measurement uncertainty.* The measurement uncertainties are estimated for each VOC containing liquid as follows: W=±2.0 percent and V=±12.0 percent. Based on these numbers, the probable uncertainty for L is estimated at about ±12.2 percent for each VOC containing liquid.

1.4 *Sampling requirements.* A capture efficiency test shall consist of at least three sampling runs. The sampling time for each run should be at least 8 hours, unless otherwise approved.

1.5 *Notes.* Because this procedure is often applied in highly explosive areas, caution and care should be exercised in choosing appropriate equipment and installing and using the equipment. Mention of trade names or company products does not constitute endorsement. All gas concentrations (percent, ppm) are by volume, unless otherwise noted.

2. APPARATUS AND REAGENTS

2.1 *Liquid weight.*

2.1.1 *Balances/digital scales.* To weigh drums of VOC containing liquids to within 0.2 lb.

2.1.2 *Volume measurement apparatus (alternative).* Volume meters, flow meters, density measurement equipment, etc., as needed to achieve same accuracy as direct weight measurements.

2.2 *VOC content (flame ionization analyzer technique).* The liquid sample analysis system is shown in Figures 1 and 2. The following equipment is required:

2.2.1 *Sample collection can.* An appropriately sized metal can to be used to collect VOC containing materials. The can must be constructed in such a way that it can be grounded to the coating container.

2.2.2 *Needle valves.* To control gas flow.

2.2.3 *Regulators.* For carrier gas and calibration gas cylinders.

2.2.4 *Tubing.* Teflon or stainless steel tubing with diameters and lengths determined by connection requirements of equipment. The tubing between the sample oven outlet and the FIA shall be heated to maintain a temperature of 120 ±5 °C.

2.2.5 *Atmospheric vent.* A tee and 0- to 0.5-liter/min rotameter placed in the sampling line between the carrier gas cylinder and the VOC sample vessel to release the excess carrier gas. A toggle valve placed between the tee and the rotameter facilitates leak tests of the analysis system.

2.2.6 *Thermometer.* Capable of measuring the temperature of the hot water bath to within 1 °C.

2.2.7 *Sample oven.* Heated enclosure, containing calibration gas coil heaters, critical orifice, aspirator, and other liquid sample analysis components, capable of maintaining a temperature of 120 ±5 °C.

2.2.8 *Gas coil heaters.* Sufficient lengths of stainless steel or Teflon tubing to allow zero and calibration gases to be heated to the sample oven temperature before entering the critical orifice or aspirator.

2.2.9 *Water bath.* Capable of heating and maintaining a sample vessel temperature of 100 ±5 °C.

2.2.10 *Analytical balance.* To measure ±0.001 g.

2.2.11 *Disposable syringes.* 2-cc or 5-cc.

2.2.12 *Sample vessel.* Glass, 40-ml septum vial. A separate vessel is needed for each sample.

2.2.13 *Rubber stopper.* Two-hole stopper to accommodate 3.2-mm (⅛-in.) Teflon tubing, appropriately sized to fit the opening of the sample vessel. The rubber stopper should be wrapped in Teflon tape to provide a tighter seal and to prevent any reaction of the sample with the rubber stopper. Alternatively, any leak-free closure fabricated of non-reactive materials and accommodating the necessary tubing fittings may be used.

2.2.14 *Critical orifices.* Calibrated critical orifices capable of providing constant flow rates from 50 to 250 ml/min at known pressure drops. Sapphire orifice assemblies (available from O'Keefe Controls Company) and glass capillary tubing have been found to be adequate for this application.

2.2.15 *Vacuum gauge.* 0 -to 760-mm (0- to 30-in.) Hg U-Tube manometer or vacuum gauge.

2.2.16 *Pressure gauge.* Bourdon gauge capable of measuring the maximum air pressure at the aspirator inlet (e.g., 100 psig).

2.2.17 *Aspirator.* A device capable of generating sufficient vacuum at the sample vessel to create critical flow through the calibrated orifice when sufficient air pressure is present at the aspirator inlet. The aspirator must also provide sufficient sample pressure to operate the FIA. The sample is also mixed with the dilution gas within the aspirator.

2.2.18 *Soap bubble meter.* Of an appropriate size to calibrate the critical orifices in the system.

2.2.19 *Organic concentration analyzer.* An FIA with a span value of 1.5 times the expected concentration as propane; however other span values may be used if it can be demonstrated that they would provide more accurate measurements. The system shall be capable of meeting or exceeding the following specifications:

2.2.19.1 *Zero drift.* Less than ±3.0 percent of the span value.

2.2.19.2 *Calibration drift.* Less than ±3.0 percent of span value.

2.2.19.3 *Calibration error.* Less than ±5.0 percent of the calibration gas value.

2.2.20 *Integrator/data acquisition system.* An analog or digital device or computerized data acquisition system used to integrate the FIA response or compute the average response and record measurement data. The

minimum data sampling frequency for computing average or integrated values is one measurement value every 5 seconds. The device shall be capable of recording average values at least once per minute.

2.2.21 *Chart recorder (optional).* A chart recorder or similar device is recommended to provide a continuous analog display of the measurement results during the liquid sample analysis.

2.2.22 *Calibration and other gases.* For calibration, fuel, and combustion air (if required) contained in compressed gas cylinders. All calibration gases shall be traceable to NIST standards and shall be certified by the manufacturer to ±1 percent of the tag value. Additionally, the manufacturer of the cylinder should provide a recommended shelf life for each calibration gas cylinder over which the concentration does not change more than ±2 percent from the certified value. For calibration gas values not generally available, alternative methods for preparing calibration gas mixtures, such as dilution systems, may be used with prior approval.

2.2.22.1 *Fuel.* A 40 percent H_2/60 percent He or 40 percent H_2/60 percent N_2 gas mixture is recommended to avoid an oxygen synergism effect that reportedly occurs when oxygen concentration varies significantly from a mean value.

2.2.22.2 *Carrier gas.* High purity air with less than 1 ppm of organic material (as propane) or less than 0.1 percent of the span value, whichever is greater.

2.2.22.3 *FIA linearity calibration gases.* Low-, mid-, and high-range gas mixture standards with nominal propane concentrations of 20–30, 45–55, and 70–80 percent of the span value in air, respectively. Other calibration values and other span values may be used if it can be shown that more accurate measurements would be achieved.

2.2.22.4 *System calibration gas.* Gas mixture standard containing propane in air, approximately the undiluted VOC concentration expected for the liquid samples.

3. Determination of Liquid Input Weight

3.1 *Weight difference.* Determine the amount of material introduced to the process as the weight difference of the feed material before and after each sampling run. In determining the total VOC containing liquid usage, account for: (a) The initial (beginning) VOC containing liquid mixture; (b) any solvent added during the test run; (c) any coating added during the test run; and (d) any residual VOC containing liquid mixture remaining at the end of the sample run.

3.1.1 Identify all points where VOC containing liquids are introduced to the process. To obtain an accurate measurement of VOC containing liquids, start with an empty fountain (if applicable). After completing the run, drain the liquid in the fountain back into the liquid drum (if possible), and weigh the drum again. Weigh the VOC containing liquids to ±0.5 percent of the total weight (full) or ±0.1 percent of the total weight of VOC containing liquid used during the sample run, whichever is less. If the residual liquid cannot be returned to the drum, drain the fountain into a preweighted empty drum to determine the final weight of the liquid.

3.1.2 If it is not possible to measure a single representative mixture, than weigh the various components separately (*e.g.*, if solvent is added during the sampling run, weigh the solvent before it is added to the mixture). If a fress drum of VOC containing liquid is needed during the run, then weigh both the empty drum and fresh drum.

3.2 *Volume measurement (alternative).* If direct weight measurements are not feasible, the tester may use volume meters and flow rate meters (and density measurements) to determine the weight of liquids used if it can be demonstrated that the technique produces results equivalent to the direct weight measurements. If a single representative mixture cannot be measured, measure the components separately.

4. Determination of VOC Content in Input Liquids

4.1 *Collection of liquid samples.*

4.1.1 Collect a 100-ml or larger sample of the VOC containing liquid mixture at each application location at the beginning and end of each test run. A separate sample should be taken of each VOC containing liquid added to the application mixture during the test run. If a fresh drum is needed during the sampling run, then obtain a sample from the fresh drum.

4.1.2 When collecting the sample, ground the sample container to the coating drum. Fill the sample container as close to the rim as possible to minimize the amount of headspace.

4.1.3 After the sample is collected, seal the container so the sample cannot leak out or evaporate.

4.1.4 Label the container to identify clearly the contents.

4.2 *Liquid sample VOC content.*

4.2.1 Assemble the liquid VOC content analysis system as shown in Figure 1.

4.2.2 Permanently identify all of the critical orifices that may be used. Calibrate each critical orifice under the expected operating conditions (i.e., sample vacuum and temperature) against a volume meter as described in section 5.3.

4.2.3 Label and tare the sample vessels (including the stoppers and caps) and the syringes.

4.2.4 Install an empty sample vessel and perform a leak test of the system. Close the carrier gas valve and atmospheric vent and evacuate the sample vessel to 250 mm (10 in.) Hg absolute or less using the aspirator. Close

the toggle valve at the inlet to the aspirator and observe the vacuum for at least one minute. If there is any change in the sample pressure, release the vacuum, adjust or repair the apparatus as necessary and repeat the leak test.

4.2.5 Perform the analyzer calibration and linearity checks according to the procedure in section 5.1. Record the responses to each of the calibration gases and the back-pressure setting of the FIA.

4.2.6 Establish the appropriate dilution ratio by adjusting the aspirator air supply or substituting critical orifices. Operate the aspirator at a vacuum of at least 25 mm (1 in.) Hg greater than the vacuum necessary to achieve critical flow. Select the dilution ratio so that the maximum response of the FIA to the sample does not exceed the high-range calibration gas.

4.2.7 Perform system calibration checks at two levels by introducing compressed gases at the inlet to the sample vessel while the aspirator and dilution devices are operating. Perform these checks using the carrier gas (zero concentration) and the system calibration gas. If the response to the carrier gas exceeds ±0.5 percent of span, clean or repair the apparatus and repeat the check. Adjust the dilution ratio as necessary to achieve the correct response to the upscale check, but do not adjust the analyzer calibration. Record the identification of the orifice, aspirator air supply pressure, FIA back-pressure, and the responses of the FIA to the carrier and system calibration gases.

4.2.8 After completing the above checks, inject the system calibration gas for approximately 10 minutes. Time the exact duration of the gas injection using a stopwatch. Determine the area under the FIA response curve and calculate the system response factor based on the sample gas flow rate, gas concentration, and the duration of the injection as compared to the integrated response using Equations 2 and 3.

4.2.9 Verify that the sample oven and sample line temperatures are 120 ±5 °C and that the water bath temperature is 100 ±5 °C.

4.2.10 Fill a tared syringe with approximately 1 g of the VOC containing liquid and weigh it. Transfer the liquid to a tared sample vessel. Plug the sample vessel to minimize sample loss. Weigh the sample vessel containing the liquid to determine the amount of sample actually received. Also, as a quality control check, weigh the empty syringe to determine the amount of material delivered. The two coating sample weights should agree within ±0.02 g. If not, repeat the procedure until an acceptable sample is obtained.

4.2.11 Connect the vessel to the analysis system. Adjust the aspirator supply pressure to the correct value. Open the valve on the carrier gas supply to the sample vessel and adjust it to provide a slight excess flow to the atmospheric vent. As soon as the initial response of the FIA begins to decrease, immerse the sample vessel in the water bath. (Applying heat to the sample vessel too soon may cause the FID response to exceed the calibrated range of the instrument, and thus invalidate the analysis.)

4.2.12 Continuously measure and record the response of the FIA until all of the volatile material has been evaporated from the sample and the instrument response has returned to the baseline (i.e., response less than 0.5 percent of the span value). Observe the aspirator supply pressure, FIA back-pressure, atmospheric vent, and other system operating parameters during the run; repeat the analysis procedure if any of these parameters deviate from the values established during the system calibration checks in Section 4.2.7. After each sample perform the drift check described in Section 5.2. If the drift check results are acceptable, calculate the VOC content of the sample using the equations in Section 7. Integrate the area under the FIA response curve, or determine the average concentration response and the duration of sample analysis.

5. CALIBRATION AND QUALITY ASSURANCE

5.1 *FIA calibration and linearity check.* Make necessary adjustments to the air and fuel supplies for the FIA and ignite the burner. Allow the FIA to warm up for the period recommended by the manufacturer. Inject a calibration gas into the measurement system and adjust the back-pressure regulator to the value required to achieve the flow rates specified by the manufacturer. Inject the zero- and the high-range calibration gases and adjust the analyzer calibration to provide the proper responses. Inject the low- and mid-range gases and record the responses of the measurement system. The calibration and linearity of the system are acceptable if the responses for all four gases are within 5 percent of the respective gas values. If the performance of the system is not acceptable, repair or adjust the system and repeat the linearity check. Conduct a calibration and linearity check after assembling the analysis system and after a major change is made to the system.

5.2 *Systems drift checks.* After each sample, repeat the system calibration checks in Section 4.2.7 before any adjustments to the FIA or measurement system are made. If the zero or calibration drift exceeds ±3 percent of the span value, discard the result and repeat the analysis.

5.3 *Critical orifice calibration.*

5.3.1 Each critical orifice must be calibrated at the specific operating conditions that it will be used. Therefore, assemble all components of the liquid sample analysis system as shown in Figure 3. A stopwatch is also required.

5.3.2 Turn on the sample oven, sample line, and water bath heaters and allow the system to reach the proper operating temperature. Adjust the aspirator to a vacuum of 380 mm (15 in.) Hg vacuum. Measure the time required for one soap bubble to move a known distance and record barometric pressure.

5.3.3 Repeat the calibration procedure at a vacuum of 406 mm (16 in.) Hg and at 25-mm (1-in.) Hg intervals until three consecutive determinations provide the same flow rate. Calculate the critical flow rate for the orifice in ml/min at standard conditions. Record the vacuum necessary to achieve critical flow.

6. NOMENCLATURE

A_L = area under the response curve of the liquid sample, area count.
A_S = area under the response curve of the calibration gas, area count.
C_S = actual concentration of system calibration gas, ppm propane.
$K = 1.830 \times 10^{-9}$ g/(ml-ppm).
L = total VOC content of liquid input, kg.
M_L = mass of liquid sample delivered to the sample vessel, g.
q = flow rate through critical orifice, ml/min.
RF = liquid analysis system response factor, g/area count.
T_S = total gas injection time for system calibration gas during integrator calibration, min.
V_{Fj} = final VOC fraction of VOC containing liquid j.
V_{Ij} = initial VOC fraction of VOC containing liquid j.
V_{Aj} = VOC fraction of VOC containing liquid j added during the run.
V = VOC fraction of liquid sample.
W_{Fj} = weight of VOC containing liquid j remaining at end of the run, kg.
W_{Ij} = weight of VOC containing liquid j at beginning of the run, kg.
W_{Aj} = weight of VOC containing liquid j added during the run, kg.

7. CALCULATIONS

7.1 *Total VOC content of the input VOC containing liquid.*

$$L = \sum_{j=1}^{n} V_{Ij} W_{Ij} - \sum_{j=1}^{n} V_{Fj} W_{Fj} + \sum_{j=1}^{n} V_{Aj} W_{Aj} \qquad \text{Eq. 1}$$

7.2 *Liquid sample analysis system response factor for systems using intergrators, grams/area counts.*

$$RF = \frac{C_S q T_S K}{A_S} \qquad \text{Eq. 2}$$

7.3 VOC content of the liquid sample.

$$V = \frac{A_L RF}{M_L} \qquad \text{Eq. 3}$$

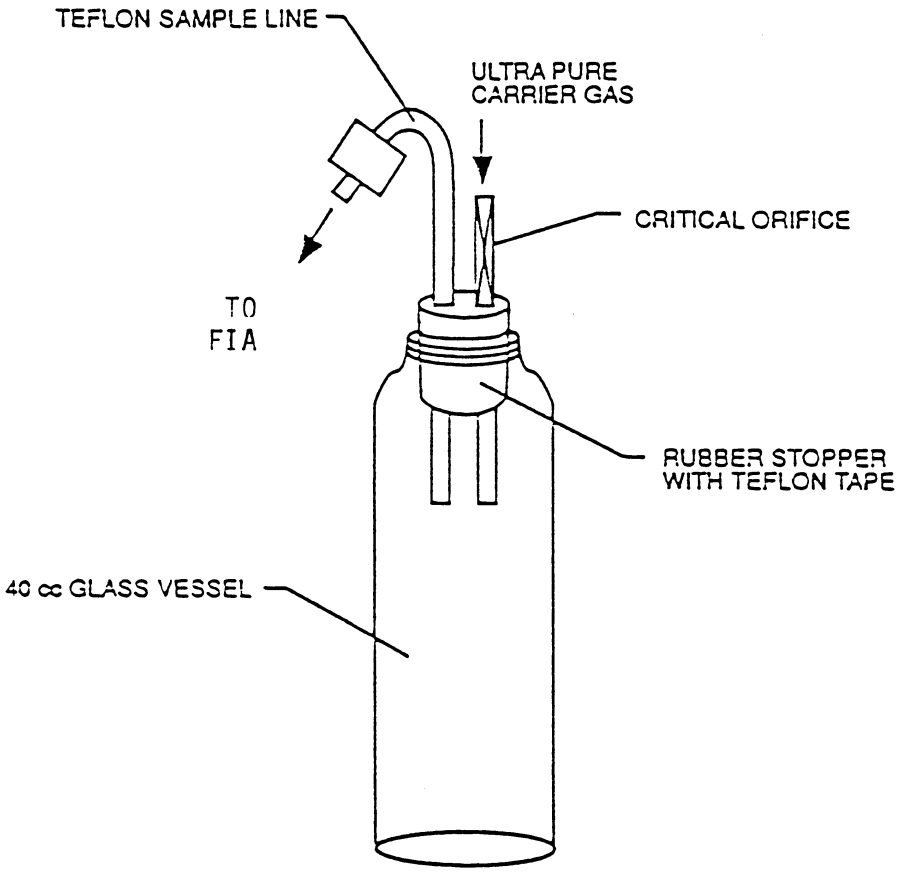

Figure 2. VOC sampling vessel.

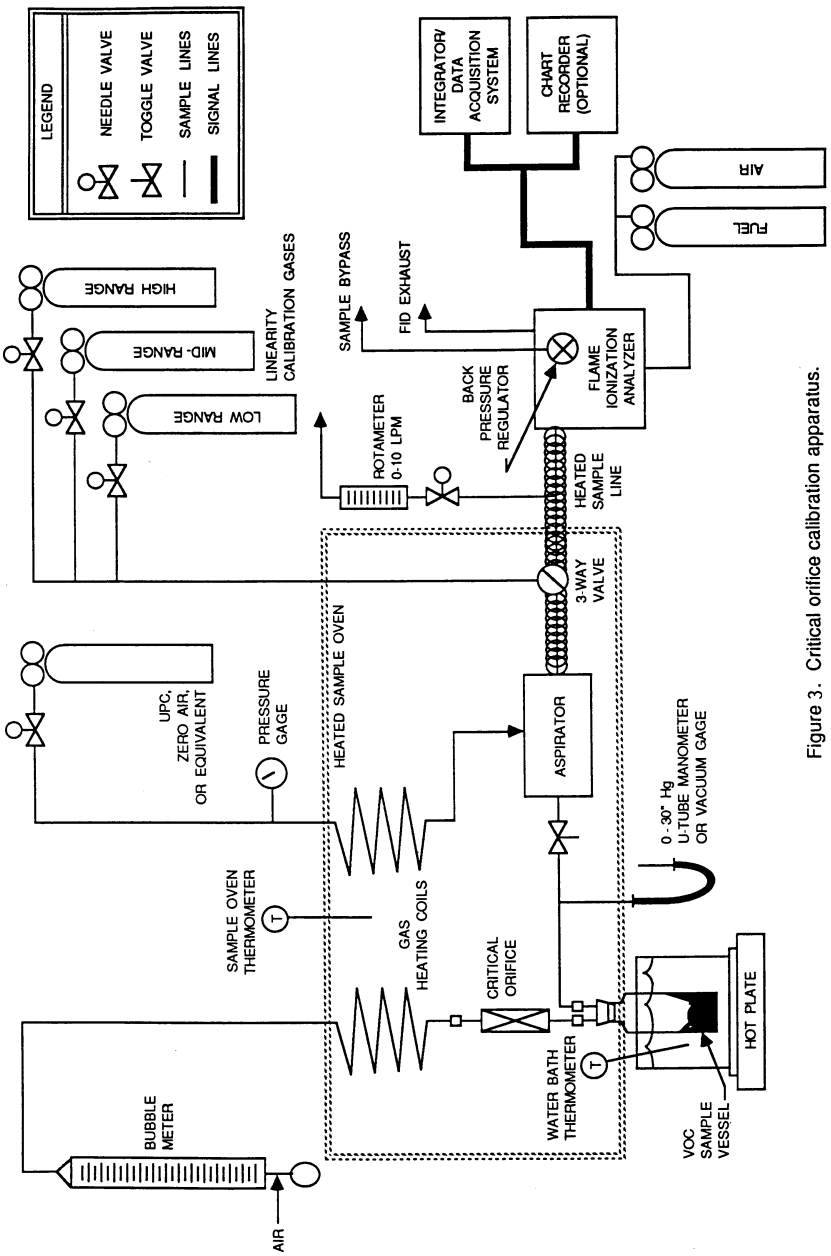

Figure 3. Critical orifice calibration apparatus.

Procedure T—Criteria for and Verification of a Permanent or Temporary Total Enclosure

1. Introduction

1.1 *Applicability*. This procedure is used to determine whether a permanent or temporary enclosure meets the criteria of a total enclosure.

1.2 *Principle*. An enclosure is evaluated against a set of criteria. If the criteria are met and if all the exhaust gases are ducted to a control device, then the volatile organic compounds (VOC) capture efficiency (CE) is assumed to be 100 percent and CE need not be measured. However, if part of the exhaust gas stream is not ducted to a control device, CE must be determined.

2. Definitions

2.1 *Natural Draft Opening (NDO)*—Any permanent opening in the enclosure that remains open during operation of the facility and is not connected to a duct in which a fan is installed.

2.2 *Permanent Total Enclosure (PTE)*—A permanently installed enclosure that completely surrounds a source of emissions such that all VOC emissions are captured and contained for discharge through a control device.

2.3 *Temporary Total Enclosure (TTE)*—A temporarily installed enclosure that completely surrounds a source of emissions such that all VOC emissions are captured and contained for discharge through ducts that allow for the accurate measurement of VOC rates.

3. Criteria of a Temporary Total Enclosure

3.1 Any NDO shall be at least 4 equivalent opening diameters from each VOC emitting point.

3.2 Any exhaust point from the enclosure shall be at least 4 equivalent duct or hood diameters from each NDO.

3.3 The total area of all NDO's shall not exceed 5 percent of the surface area of the enclosure's four walls, floor, and ceiling.

3.4 The average facial velocity (FV) of air through all NDO's shall be at least 3,600 m/hr (200 fpm). The direction of air through all NDO's shall be into the enclosure.

3.5 All access doors and windows whose areas are not included in section 3.3 and are not included in the calculation in section 3.4 shall be closed during routine operation of the process.

4. Criteria of a Permanent Total Enclosure

4.1 Same as sections 3.1 and 3.3–3.5.

4.2 All VOC emissions must be captured and contained for discharge through a control device.

5. Procedure

5.1 Determine the equivalent diameters of the NDO's and determine the distances from each VOC emitting point to all NDO's. Determine the equivalent diameter of each exhaust duct or hood and its distance to all NDO's. Calculate the distances in terms of equivalent diameters. The number of equivalent diameters shall be at least 4.

5.2 Measure the total area (A_t) of the enclosure and the total area (A_N) of all NDO's of the enclosure. Calculate the NDO to enclosure area ratio (NEAR) as follows:

$NEAR = A_N/A_t$

The NEAR must be ≤0.05.

5.3 Measure the volumetric flow rate, corrected to standard conditions, of each gas stream exiting the enclosure through an exhaust duct or hood using EPA Method 2. In some cases (*e.g.*, when the building is the enclosure), it may be necessary to measure the volumetric flow rate, corrected to standard conditions, of each gas stream entering the enclosure through a forced makeup air duct using Method 2. Calculate FV using the following equation:

$FV=[Q_O - Q_I]/A_N$

Where:

Q_O = the sum of the volumetric flow from all gas streams exiting the enclosure through an exhaust duct or hood.

Q_I = the sum of the volumetric flow from all gas streams into the enclosure through a forced makeup air duct; zero, if there is no forced makeup air into the enclosure.

A_N = total area of all NDO's in enclosure.

The FV shall be at least 3,600 m/hr (200 fpm).

5.4 Verify that the direction of air flow through all NDO's is inward. Use streamers, smoke tubes, tracer gases, etc. Strips of plastic wrapping film have been found to be effective. Monitor the direction of air flow at intervals of at least 10 minutes for at least 1 hour.

6. Quality Assurance

6.1 The success of this protocol lies in designing the TTE to simulate the conditions that exist without the TTE, i.e., the effect of the TTE on the normal flow patterns around the affected facility or the amount of fugitive VOC emissions should be minimal. The TTE must enclose the application stations, coating reservoirs, and all areas from the application station to the oven. The oven does not have to be enclosed if it is under negative pressure. The NDO's of the temporary enclosure and a fugitive exhaust fan must be properly sized and placed.

6.2 Estimate the ventilation rate of the TTE that best simulates the conditions that exist without the TTE, i.e., the effect of the TTE on the normal flow patterns around the affected facility or the amount of fugitive

VOC emissions should be minimal. Figure 1 may be used as an aid. Measure the concentration (C_G) and flow rate (Q_G) of the captured gas stream, specify a safe concentration (C_F) for the fugitive gas stream, estimate the CE, and then use the plot in Figure 1 to determine the volumetric flowrate of the fugitive gas stream (Q_F). A fugitive VOC emission exhaust fan that has a variable flow control is desirable.

6.2.1 Monitor the concentration of VOC into the capture device without the TTE. To minimize the effect of temporal variation on the captured emissions, the baseline measurement should be made over as long a time period as practical. However, the process conditions must be the same for the measurement in section 6.2.3 as they are for this baseline measurement. This may require short measuring times for this quality control check before and after the construction of the TTE.

6.2.2 After the TTE is constructed, monitor the VOC concentration inside the TTE. This concentration shall continue to increase and must not exceed the safe level according to OSHA requirements for permissible exposure limits. An increase in VOC concentration indicates poor TTE design or poor capture efficiency.

6.2.3 Monitor the concentration of VOC into the capture device with the TTE. To limit the effect of the TTE on the process, the VOC concentration with and without the TTE must be within ±10 percent. If the measurements do not agree, adjust the ventilation rate from the TTE until they agree within 10 percent.

(8) ASTM E180–85, Standard Practice for Determining the Precision of ASTM Methods for Analysis and Testing of Industrial Chemicals, for § 52.741(a)(4)(i)(B)(*3*)(*viii*).

(9) ASTM D2372–85, Standard Method of Separation of Vehicle from Solvent-Reducible Paints, for § 52.741(a)(4)(i)(B)(*3*)(*ix*).

(10) ASTM D2879–86, Standard Test Method for Vapor Pressure-Temperature Relationship and Initial Decomposition Temperature of Liquids by Isoteniscope, for § 52.741(a)(3), (a)(8)(ii), (a)(9)(iii), and (a)(10)(iii).

(11) ASTM D323–82, Standard Test Method for Vapor Pressure of Petroleum Products (Reid Method), for § 52.741(a)(3).

(12) ASTM D86–82, Standard Method for Distillation of Petroleum Products, for § 52.741(a)(3).

(13) ASTM D3925–81(Reapproved 1985), Standard Practice for Sampling Liquid Paints and Related Pigment Coatings, for § 52.741(a)(4)(i)(A)(*1*).

(14) ASTM E300–86, Standard Practice for Sampling Industrial Chemicals, for § 52.741(a)(4)(i)(A)(*2*).

(b) The Evaporation Loss From External Floating-Roof Tanks, Publication 2517, second edition, February 1980, for § 52.741(a)(3) is available for purchase from the American Petroleum Institute, 2101 L Street, NW., Washington, DC 20037.

(c) The Standard Industrial Classification Manual, 1987, for § 52.741(a)(3) is available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(d) 35 Illinois Administrative Code 215, June 1989, subparts (B), (E) (sections 215.182, 215.183, and 215.184), (K) (sections 215.301 and 215.302), (Q) (excluding sections 215.432 and 215.436), (R) (excluding sections 215.447, 215.450, and 215.452), (S), (V), (X), (Y) (sections 215.582, 215.583, and 215.584), and (Z) of 35 Ill. Adm. Code 215 for § 52.741 (d)(l)–(d)(3); (e)(3), (e)(4); (h)(2); (i)(1), (i)(2); (j)(1)–(j)(3); (q)(1); (s)(1); (u)(1), (3); (v)(1); (w)(1); and (x)(1), (x)(3) is available from the United States Environmental Protection Agency, Air and Radiation Division, Region V, 230 S. Dearborn, Chicago, IL, 60604.

[55 FR 26909, June 29, 1990]

§ 52.743 Continuous monitoring.

(a) Alternative monitoring requirements established under Section 201.402 of Title 35, IAC must be either: Incorporated into a federally enforceable operating permit or construction permit or submitted to USEPA for approval as

a revision to the Illinois State Implementation Plan (SIP). Illinois shall set forth alternative emissions monitoring and reporting requirements to satisfy the intent of 40 CFR part 51, appendix P whenever Illinois exempts any source subject to Section 201.401 from installing continuous emission monitoring systems. Illinois may exempt a source if the source cannot install a continuous emission monitoring system because of physical plant limitations or extreme economic reasons, according to the criteria of Section 201.402.

(b) As codified at 40 CFR 52.737 (USEPA's approval of the Illinois operating permit program for the purpose of issuing federally enforceable construction and operating permits), USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures including operating permit requirements promulgated at 54 FR 27274 (June 28, 1989) and will be based upon either; the permit, permit approval procedures or state or local permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations. Among other things, underlying requirements include 40 CFR 51.214 and part 51, appendix P and Illinois' approved SIP, 40 CFR part 52. Should USEPA deem an operating or construction permit containing alternative monitoring requirements not federally enforceable, the underlying continuous monitoring requirements at Section 201.401 of the State rule would be the Federal requirements contained in the SIP to which the source would be subject. This interpretation of the impact of an operating permit deemed not federally enforceable by USEPA on a source to which it was issued was acknowledged by the State in a March 3, 1993, letter from Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency, to Stephen Rothblatt, Chief, Regulation Development Branch, Region 5, USEPA.

[58 FR 17783, Apr. 6, 1993]

§ 52.744 Small business stationary source technical and environmental compliance assistance program.

The Illinois program submitted on November 12, 1992, as a requested revision to the Illinois State Implementation Plan satisfies the requirements of section 507 of the Clean Air Act Amendments of 1990.

[58 FR 45451, Aug. 30, 1993]

§§ 52.745–52.746 [Reserved]

§ 52.750 Original identification of plan section.

(a) This section identified the original ''Air Quality Implementation Plan for the State of Illinois'' and all revisions submitted by Illinois that were Federally-approved prior to June 1, 2017.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revision listed below were submitted on the dates specified.

(1) The role of the City of Chicago as a local agent was defined in a letter from the State Environmental Protection Agency on March 13, 1972.

(2) Copies of the Illinois Pollution Control Board Regulations, Chapter 2, Parts I, II and III were submitted May 4, 1972, by the Governor.

(3) A document describing the role of the Chicago Department of Environmental Control was submitted July 28, 1972, by the State Environmental Protection Agency.

(4) Copies of the revisions to the State air episode regulations were submitted on August 29, 1972, by the Governor.

(5) Compliance schedules submitted on March 13, 1973, by the Pollution Control Board.

(6) Compliance schedules submitted on April 3, 1973, by the Pollution Control Board.

(7) Transportation control plan submitted on April 17, 1973, by the Pollution Control Board.

(8) Compliance schedules submitted on May 3, 1973, by the Pollution Control Board.

(9) Compliance schedules submitted on June 15, 1973, by the Pollution Control Board.

(10) Compliance schedules submitted on August 7, 1973, by the Pollution Control Board.

(11) Information concerning the coal ban in the Chicago area was submitted on October 22, 1973, by Governor Walker.

(12) On July 22, 1976, the Director of the Illinois Environmental Protection Agency submitted revised emergency episode regulations.

(13) On November 29, 1977, the Director of the Illinois Environmental Protection Agency submitted grain handling and drying emission limitations as revisions to Rule 203.

(14) Revision consisting of an Illinois Pollution Control Board Order issued on July 20, 1978 to Commonwealth Edison Company, Christian County, Illinois and submitted on August 14, 1978 by the Illinois Environmental Protection Agency.

(15) Revision consisting of an Illinois Pollution Control Board Order issued to Shell Oil Company's Wood River refinery on December 14, 1978 by the Illinois Environmental Protection Agency.

(16) On April 4, 1979, the State submitted its draft nonattainment area plan for all areas designated nonattainment as of March 3, 1978 and as revised on October 5, 1978. This submittal contained a request for extensions of the statutory attainment deadline for CO and 03. The submittal also included a vehicle emission inspection and maintenance program and a new source review plan. Although the State submittal also included the following provisions, U.S. EPA is taking no action to include them in the federally approved SIP at this time: the portions of Rules 101, 103 and 105 relating to the provisions addressing malfunctions, general requirements of the Clean Air Act which are not Part D requirements, and the provisions covering open burning, mobile source emission standards, diesel locomotive emission standards, sulfur dioxide emissions for certain fuel combustion sources located outside major metropolitan areas, compliance dates for organic emission limitations, particulate emissions from low carbon waste incinerators, and adoption of Federal New Source Performance Standards. In addition, U.S. EPA is not rulemaking at this time on those portions of the following rules which contain specified changes made between the publication of the notice of proposed rulemaking and the final rulemaking action:

(i)–(iii) [Reserved]

(iv) The new materials in Section 4.11 of the Rules for Issuance of Permits to New or Modified Air Pollution Sources;

(v) The addition of a definition of ''reconstruction'' in Section 4.7 of the Rules for Issuance of Permits;

(vi) The procedure allowing external offsets contained in Section 10 of the Rules for Issuance of Permits.

(17) On August 29, 1979, the State submitted additional information and clarification for the nonattainment area plan in response to USEPA's July 2, 1979 notice of proposed rulemaking.

(18) On September 20, 1979, the State submitted a summary of public hearing comments on the plan.

(19) On October 30, 1979, the State submitted copies of Illinois Pollution Control Board final orders for control of VOC emissions from stationary sources (Rule 205), sources of fugitive particulate (Rule 203(f)), and particulate emissions from iron and steel sources (Rule 203(d)).

(20) On December 20, 1979, the State submitted a letter containing the dates that most of the regulatory and nonregulatory portions of the nonattainment area plans were finally adopted by the Illinois Pollution Control Board. Rule 205 containing RACT controls for stationary sources of VOC was effective in the State on July 18, 1979. Rule 203(f) governing fugitive dust emissions was effective in the State on September 18, 1979.

(21) On January 25, 1980, the State submitted a copy of finally enacted ''Rules for the Issuance of Permits to New or Modified Air Pollution Sources Affecting Nonattainment Areas.'' Sections 5.1(a)(2)(ii) and 5.1(a)(2)(iii) of these rules were reserved by the State. The effective date of these Rules was January 16, 1980.

(22) On March 21, 1979, the State of Illinois submitted to the USEPA revised regulations for control of sulfur dioxide emissions. On September 19, 1979, the

State submitted additional information on these revised regulations to the USEPA.

(23) On January 17, 1980 and on February 7, 1980 the State submitted further information and clarifications to Rule 204.

(24) On September 19, 1979, the State of Illinois submitted a revision to Rule 204(e)(1) for the Commonwealth Edison Company. The revision approves an emission limitation of 105,162 lbs SO_2/hour for the Kincaid Generating Station in Christian County, Illinois.

(25) On April 30, 1980, the State submitted revisions to the transportation control plan for northeast Illinois (Chicago).

(26) On December 20, 1979, the State of Illinois submitted a revision to provide for modification of the existing air quality surveillance network.

(27) On January 8, 1980, the State submitted an Opinion and Final Order of the Pollution Control Board (dated November 19, 1979) which deletes Rule 206(d) of Chapter 2 from the Illinois Air Pollution Control Regulations.

(28) On September 18, 1979, the State submitted a Final Order of the Pollution Control Board (dated April 12, 1979) which amended Rule 205(g)(1) of Chapter 2 of the Illinois Air Pollution Control Regulations.

(29) On July 21, 1981, the State submitted Volume 9 Lead, of the Illinois State Implementation Plan for Air Pollution Control for incorporation in the Illinois State Implementation Plan. This plan covers all areas in Illinois except for Granite City in the St. Louis Interstate AQCR.

(30) On July 29, 1980, the State submitted a May 29, 1980, Opinion and Order of the Illinois Pollution Control Board granting a variance from the requirements Rule 203(d)(8)(B) of Chapter 2 of the Air Pollution Control Regulations to Continental Grain Company's grain elevator located in Crossville, White County, Illinois. This variance expired July 1, 1980.

(31) On April 4, 1980, the State submitted a November 29, 1979, Opinion and Order of the Illinois Pollution Control Board (IPCB) and Supplementary IPCB Orders dated January 24, 1980, and February 7, 1980. These Orders grant 13 Caterpillar Tractor Company boilers a variance from the requirements of IPCB (A), Rule 203(g)(1)(C)(i) and/or Rule 203(g)(1)(D) which regulate particulate emissions from new and existing sources. No action is taken at this time on variance provisions for Mapleton facility boilers #2, 3, 4, and 5. This variance expired on October 8, 1981.

(32) On August 31, 1981, the State of Illinois submitted a revision to the Illinois State Implementation Plan in the form of a July 9, 1981, Order of the Illinois Pollution Control Board (R–77–15). This Order creates Rule 204(c)(1)(E) which establishes sulfur dioxide (SO_2) emission limitations of 5.5 lbs/SO/MMBTU for solid fuel combustion sources having actual heat input not greater than 250 million BTU's per hour owned or operated by Bemis Company, Inc., Celotex Corporation or Sherex Corporation. On November 17, 1981, the State submitted additional information in support of this revision.

(33) On August 20, 1980, and March 20, 1981, the State submitted additional information on the transportation control plans for the Northeast Illinois (Chicago) Area.

(34) On October 15, 1980, the State submitted additional information on the transportation control plans for the Peoria Metropolitan Area.

(35) On April 1, 1981, the State submitted additional information on the transportation control plans for the St. Louis Metropolitan (Illinois) Area.

(36) On December 10, 1980, the State submitted a July 24, 1980, Opinion and Order of the Illinois Pollution Control Board and a September 18, 1980, Order of the Board granting Bunge Corporation's Cairo, Illinois soybean processing plant and grain elevator variance from Illinois Pollution Control Board's particulate emission standards under Rules 203(g)(1)(D) and 103(b)(1) of Chapter 2 of the Air Pollution Control Regulations through October 15, 1981.

(37) On July 17, 1980, the State submitted an April 3, 1980, Opinion and Order of the Illinois Pollution Control Board adopting a December 13, 1979, Proposed Opinion and Order of the Board which exempted certain small explosive waste incinerators from the requirements of Rule 203(e) Particulate Emission Standards and Limitations

for incinerators and Rule 206(b) Carbon Monoxide Emissions Standards and Limitations for incinerators.

(38) On May 10, 1982, the State submitted a February 4, 1982, Illinois Pollution Control Board Opinion and Order (PCB 81–184) granting a variance from the requirements of Rules 205(m)(1)(B) and 204(n)(1)(G) of Chapter 2 of the Air Pollution Control Regulations to the Lyon Metal Products, Incorporated, Montgomery, Illinois facility. This variance expires on May 31, 1985.

(39) On October 1, 1981, the State submitted a report in satisfaction of the Total Suspended Particulate Control Strategy approval condition in which the State agreed to conduct an analysis of the potential air quality impact from storage piles with uncontrolled emissions of less than 50 tons per year, to submit the results of any analysis to EPA, to submit any necessary regulations to the Illinois Pollution Control Board, and promulgate and submit any necessary regulations to EPA. This report concluded that no further regulations were needed.

(40) EPA Study Volatile Organic Compound Emissions from Solvent Cleaning Operations in the State of Illinois (EPA 905/4–80–008) was prepared to satisfy the Ozone Control Strategy approval condition in which the State agreed to conduct a study to demonstrate that the three pound per hour, 15 pound per day exemption for solvent metal cleaners contained in Rule 205(k) represents RACT, to submit the results of the study to EPA, to submit the necessary regulations to the Illinois Pollution Control Board and promulgate and submit any necessary regulations to EPA. The State reviewed this report and in a February 11, 1981, letter to EPA noted their agreement with the findings of the report and indicated that because there was no need for further regulations, this condition is satisfied.

(41) On December 7, 1981, the State submitted a October 8, 1981, Illinois Pollution Control Board Final Order (R79–11). This Final Order amends Rule 203(g)(1) by adding subsection (E).

(42) On January 4, 1983, the State submitted a revision to the Illinois State Implementation Plan in the form of an October 27, 1982, Illinois Pollution Control Board (IPCB) Opinion and Order (PCB 82–88). This Opinion and Order grants a variance from the requirements of Rule 203(a) of Chapter 2 of the Air Pollution Control Regulations to a proposed fluidized bed combustion boiler at B.F. Goodrich's Henry County, Illinois facility. This variance continues until October 1, 1987, or until the facility is no longer subject to Rule 206(a), whichever comes first.

(43) On July 29, 1982, the State submitted a revision to the Illinois State Implementation Plan in the form of a May 28, 1981, Illinois Pollution Control Board (IPCB) Final Opinion of the Board (R78–17). This Final Opinion deletes Rule 204(c)(1)(D) and the reference to it in Rule 204(h) from the IPCB Air Pollution Control Regulations.

(44) On March 17, 1983, the Illinois Environmental Protection Agency (IEPA) submitted a revision to its ozone SIP for Chrysler's Belvidere facility. The revision request contains an alternative compliance time schedule with interim emission limitations which is in the form of a variance for prime coating and prime surface coating operations. Final compliance is changed from December 31, 1982 to December 31, 1987.

(45) On August 19, 1983, the State of Illinois submitted a revision to the Illinois State Implementation Plan in the form of a July 26, 1983, Order of the Illinois Pollution Control Board (R82–12). This Order creates Rule 313 which establishes 1.5 micrograms per cubic meter, maximum arithmetic mean, averaged over a calendar quarter as the State's ambient air quality standard for lead. The Board also adopted, as part of Rule 313, a measurement method for determining compliance with the standard.

(46) On August 15, 1983, the Illinois Environmental Protection Agency submitted a May 19, 1983, Opinion and Order (PCB–82–147) of the Illinois Pollution Control Board (IPCB) granting Del Monte Corporation's Can Manufacturing Plant No. 115 located in Rochelle, Ogle County, Illinois, a variance from the IPCB volatile organic compound emission standards under Rule 205(n)(1)(B)(i) and Rule 205(n)(1)(B)(vi)

of Chapter 2: Air Pollution Regulations. The variance expires on December 31, 1984.

(47) On March 24, 1983, and May 3, 1983, the State submitted information that indicated that a February 21, 1980 (45 FR 11472), conditional approval of the incorporation of a revised Part D sulfur dioxide control strategy into the Illinois State Implementation Plan has been satisfied for Cincinnati, Pekin and Elm Grove Townships in Tazewell County and for Logan and Limestone Townships in Peoria County. This approval condition required that the SIP include a reanalysis of the Pekin, Illinois area; a submittal of the analysis results to USEPA; the proposal of any necessary regulations to the Illinois Pollution Control Board necessary to insure attainment and maintenance of the sulfur dioxide standard; and the promulgation of any necessary regulations. Any promulgated regulations must be submitted to USEPA.

(48)–(49) [Reserved]

(50) On May 3, 1983, the State requested that USEPA incorporate IPCB Rule 204 (f)(2) into the Illinois SIP. Rule 204(f)(2) was adopted by Illinois as part of a February 24, 1983, Order of the Board (R80–22). USEPA approves the incorporation of Rule 204(f)(2) as it pertains to Pekin Energy, a source in the Peoria major metropolitan area.

(51) On January 30, 1984, the State submitted Rule 204(f) as contained in a February 24, 1983, Order of the IPCB (R80–22) as it applies to sources in the Peoria Major Metropolitan area for incorporation in the SIP. USEPA approves the incorporation of Rule 204(f) into the SIP as it applies to all sources in Peoria and Tazewell Counties except Caterpillar Tractor Mapleton and East Peoria Plants. No action is taken on Rule 204(f) as it applies to the Chicago or St. Louis (Illinois—portion) Major Metropolitan Areas or on Rule 204(f) (1) and (2).

(52) [Reserved]

(53) On September 30, 1983, the State submitted a revision to the Illinois State Implementation Plan in the form of a lead plan to assure attainment and maintenance of the NAAQS in the Granite City area. The Illinois plan includes a discussion of air quality data measured since 1978, an emission inventory of three source categories capable of emitting lead, atmospheric modeling analyses and proposed necessary control strategies. On March 19, 1984, the State submitted five consent decrees entered by the State of Illinois with the Circuit Court for the Third Judicial Circuit of Madison County and filed March 16, 1984, for incorporation in the lead plan. These include *People of the State of Illinois* vs. *Taracorp, Inc.; People of the State of Illinois* vs. *St. Louis Lead Recyclers; People of the State of Illinois* vs. *First Granite City National Bank; People of the State of Illinois,* vs. *Stackorp Inc.;* and *People of the State of Illinois* vs. *B.V. and G.V. Transport Company*.

(54) [Reserved]

(55) On November 14, 1985, the State of Illinois submitted a negative declaration for natural gas/gasoline processing plants.

(i) *Incorporation by reference.* (A) Letter dated November 14, 1985, from Michael J. Hayes, Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency.

(56) On June 19, 1984, the State submitted Illinois Environmental Protection Agency Rule 252 entitled, ''Rules for Governing Public Participation in the Air Pollution Permit Program for Major Source in Nonattainment Areas.''

(i) *Incorporation by reference.* (A) Illinois Environmental Protection Agency Rule 252 entitled, ''Rule for Governing Public Participation in the Air Pollution Permit Program for Major Sources in Nonattainment Areas,'' published on June 8, 1984.

(57)–(60) [Reserved]

(61) On March 15, 1984 and June 14, 1984 the Illinois Environmental Protection Agency submitted commitments for satisfying several outstanding conditions to the sulfur dioxide [52.724(a)(1)] State Implementation Plan.

(62) On January 16, 1985, the Illinois Environmental Protection Agency submitted a variance from Illinois Rule 206(a).

(i) *Incorporation by reference.* (A) June 14, 1984, Opinion and Order of the Illinois Pollution Control Board (IPCB), PCB 84–19. This is a variance from Illinois Rule 206(a) until June 14, 1987, for

CO emissions from a fluidized bed combustion boiler at Midwest Solvents Company's facility in Tazewell County, Illinois.

(63) On February 6, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a site-specific revision to its total suspended particulates State Implementation Plan for Villa Grove's ''Dump and Boot Pit'' emissions in Champaign County, Illinois.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board, Opinion and Order of the Board, PCB 84–53, Villa Grove's ''Dump and Boot Pit'' site-specific TSP revision. This revision extends the compliance date for control requirements on these emissions until September 1, 1987, and was adopted on July 14, 1984.

(64) On May 13, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a variance from Illinois Rule 202(b) for a Brule pathological waste incinerator (BPWI) at NPWC's facility located at the Great Lakes Naval Base, Great Lakes, Shields Township, Illinois, as a revision to its TSP SIP. Shields Township is an attainment area for both the primary and secondary national ambient air quality standards (NAAQS) for TSP.

(i) *Incorporation by reference.* (A) Opinion and Order of the Illinois Pollution Control Board 84–156 adopted on March 22, 1985.

(65) Submitted from the Illinois Environmental Protection Agency (IEPA) dated July 22, 1985, requesting an extended compliance schedule for Precision Coatings Incorporated (PCI) coating Machine Number 2.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Opinion and Order of the Board, PCB 84–117, which was adopted on February 20, 1985, and a modification to PCB 84–117 which was adopted on April 14, 1985.

(66) On March 27, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a site-specific revision to its Carbon Monoxide State Implementation Plan for Anderson Clayton Foods, Inc. (ACF), a variance from 35 Illinois Administrative Code (IAC) 216.121 which governs Carbon Monoxide emissions from the Fluidized Bed Combuster retrofitted boiler at ACF's Jacksonville, Illinois facility. IAC 216.121 was incorporated in the Illinois SIP on May 31, 1972 (37 FR 10862), as Illinois Pollution Control Board Rule 206(a).

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Opinion and Order of the Board, PCB 84–147, which was adopted on January 24, 1985.

(67) On April 18, 1983, the State of Illinois submitted a 0.60 lb TSP/MMBTU emission limit for the City of Rochelle Municipal Steam Power Plant. On May 24, 1985, it submitted a revised modeling analysis.

(i) *Incorporation by reference.* Illinois Pollution Control Board Order (R78–15), Rule 203(g)(1)(C)(iii) which is dated February 24, 1983.

(68) On May 8, 1985, the Illinois Environmental Protection Agency submitted a variance until December 31, 1987, from Illinois Rule 205(n)(1)(b)(v) and Rule 205(n)(1)(b)(vi), for American Can Corporation's Hoopeston, Illinois facility in the form of a January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (PCB 84–106).

(i) *Incorporation by reference.* (A) A January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (ICPB), PCB 84–106. This is a variance until December 31, 1987, for the coating reformulation programs at American Can Corporation's Hoopeston facility located in Hoopeston, Illinois.

(69) On January 28, 1983, the Illinois Environmental Protection Agency submitted a December 30, 1982, Illinois Pollution Control Board Order (R80–5). Illinois Pollution Control Board Rules 205(l) (4) through (10), 205(t) and 205(u) are approved.

(i) *Incorporation by reference.* (A) Ilinois Pollution Control Board Rules 205(l)(4) through (10), 205(t) and 205(u) as contained in December 30, 1982, Illinois Pollution Control Board Order R80–5.

(ii) *Additional material.* None.

(70) On February 13, 1986, the Illinois Environmental Protection Agency (IEPA) submitted a revision to its ozone SIP for the Fedders-USA's facility located in Effingham, Effingham County, Illinois. It grants Fedders-USA a compliance date extension for control requirements from October 1, 1982, to April 1, 1986, and provides for a legally enforceable compliance program.

(i) *Incorporation by reference.* (A) A January 9, 1986, Opinion and Order of the Illinois Pollution Control Board (IPCB), PCB 83–47.

(71) On October 20, 1983, the Illinois Environmental Protection Agency submitted a site-specific revision to Illinois' sulfur dioxide plan for Illinois Power Company's Baldwin Power Station. The revised SO_2 emission limitations are 101,966 lbs/hour, in the aggregate, and 6 lbs/MMBTU.

(i) *Incorporation by reference.* (A) Emission limits within Paragraph 1 of Illinois Pollution Control Board Final Order PCB 79–7, which was adopted September 8, 1983.

(72) [Reserved]

(73) On May 6, 1985, the Illinois Environmental Protection Agency, requested an extended compliance schedule for National Can Corporation's Rockford facility.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board, April 1, 1982, Opinion and Order of the Board, PCB 81–189 and a January 24, 1985, Opinion and Order PCB 84–108. These orders grant National Can Corporation (Rockford Plant) a variance from the existing VOC SIP requirements from December 31, 1982, until December 31, 1983, and from December 31, 1983, until December 31, 1985, respectively.

(74) On October 30, 1986, the Illinois Environmental Protection Agency submitted a September 25, 1986, Final Order of the Illinois Pollution Control Board R85–33 revises the State's coke oven pushing and charging rules and recodifies some related rules.

(i) *Incorporation by reference.* (A) Order of the Illinois Pollution Control Board R85–33, which was adopted September 25, 1986.

(75)–(77) [Reserved]

(78) On January 28, 1983, June 25, 1987, August 21, 1987, September 28, 1987, October 2, 1987, December 22, 1987, January 8, 1988, March 29, 1988, and May 2, 1988 the State submitted stationary source control measures for incorporation in the ozone plan.

(i) *Incorporation by reference.* (A) The following sections of title 35, Environmental Protection; subtitle B: Air Pollution; Chapter 1: Pollution Control Board of the Illinois Administrative Code, (June 1989): section 211.122 (definitions of bead-dipping; component; dry cleaning facility; external floating roof; gas service; green tire spraying; green tires; heavy liquid; liquid mounted seal; liquid service; pneumatic rubber tire manufacture; refinery unit, process unit, or unit; tread end cementing; undertread cementing; valves not externally regulated; vapor collection system; vapor mounted primary seal; volatile organic liquid; and volatile organic material) of subpart B (part 211); section 215.104 (definitions of continuous process; in vacuum service; material recovery section; open-ended valve; polystyrene plant; polystyrene resin; repaired; styrene devolatilizer unit; and styrene recovery unit) of subpart A (part 215); sections 215.124, 215.125, and 215.126 of subpart B (part 215); section 215.205 of subpart F (part 215); sections 215.240, 215.241, and 215.249 of subpart H (part 215); section 215.408 of subpart P (part 215); sections 215.420 through 215.431, 215.433, 215.434, 215.435, 215.437, and 215.438, all of subpart Q (part 215); section 215.453 of subpart R (part 215); sections 215.465 and 215.466 of subpart S (part 215); sections 215.520, 215.521, 215.525, 215.526, and 215.527 all of subpart V (part 215); sections 215.582, 215,583, and 215.584 of subpart Y (part 215); sections 215.607 through 215.613 of subpart Z (part 215); and sections 215.875, 215.877, 215.879, 215.881, 215.883, and 215.886 all of subpart BB (part 215) are approved.

(ii) *Additional material.* (79) On March 20, 1986, November 17, 1986, and July 1, 1987, Illinois submitted its vehicle inspection and maintenance plan for the Chicago and East St. Louis areas.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 276, Procedures To Be Followed in the Performance of Annual Inspections of Motor Vehicle Exhaust Emissions, Adopted at 10 Illinois Register 13954, effective August 13, 1986.

(ii) *Additional material.* (A) ''Technical Procedures Memorandum—Enforcement'' between the Illinois Secretary of State and the Illinois Environmental Protection Agency, as submitted by Michael J. Hayes, Manager, Division of Air Pollution Control on July 1, 1987.

(80) [Reserved]

(81) On April 6, 1990, and May 4, 1990, Illinois submitted a regulation which reduced the maximum allowable volatility for gasoline sold in Illinois during July and August 1990 to 9.5 pounds per square inch.

(i) *Incorporation by reference.* (A) Title 35: Environmental protection, Subtitle B: Air pollution, Chapter I: Pollution control board, Part 215, Organic material emission standards and limitations, §215.585, Gasoline volatility standards, Adopted at 14 Illinois register *6434*, effective April 11, 1990.

(82)–(83) [Reserved]

(84) On September 18, 1991, and November 18, 1991, the State submitted documents intended to satisfy federal requirements for an operating permit program which can issue federally enforceable operating permits.

(i) *Incorporation in reference.* (A) Public Act 87–555, an Act to amend the Environmental Protection Act by changing section 9.1, effective September 17, 1991. (Ch. 111 1/2, par. 1009.1) par. 1009.1(a), (b), (c), (d) and (f).

(85) On March 24, 1988, the State submitted rules for issuance of construction permits to new and modified air pollution sources located in or affecting nonattainment areas (New Source Review rules).

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35 Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 203: Major Stationary Sources.

(86) On February 8, 1991, the State submitted revisions to its sulfur dioxide measurement methodology.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.101 Measurement Methods. Adopted December 20, 1990, effective January 15, 1991.

(87) On March 13, 1985, the State submitted revisions to its sulfur dioxide limitations.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 214 Sulfur Limitations, Subpart C: Existing Solid Fuel Combustion Emission Sources, Section 214.141 Sources Located in Metropolitan Areas, through paragraph (a) only, effective March 28, 1983; Subpart F: Alternative Standards for Sources Inside Metropolitan Areas, Section 214.201 Alternative Standards for Sources in Metropolitan Areas and Section 214.202 Dispersion Enhancement Techniques, effective March 28, 1983.

(88) On June 9, 1986, the State submitted revisions to its sulfur dioxide limitations in the form of a April 24, 1986, opinion and order of the Illinois Pollution Board in proceeding R84–28.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution Chapter 1: Pollution Control Board Part 214 Sulfur Limitations, Subpart C: Existing Solid Fuel Combustion Emission Sources, §214.141 Sources Located in Metropolitan Areas, paragraphs b), c) and d), and Subpart X: Utilities, §214.560 Scope and §214.561 E.D. Edwards Electric Generating Station effective May 20, 1986.

(89) On March 17, 1989, and August 28, 1990, the State of Illinois submitted a revision to the Illinois State Implementation Plan. The revision is contained in subpart J, §201.281 and subpart L, §§201.401-.408 of part 210 of title 35 of the Illinois Administrative Code. This revision provides a legally enforceable procedure for continuously monitoring and recording emissions to determine the status of compliance of certain stationary source categories and complies with 40 CFR 51.214 and part 51, appendix P. The rules were adopted by the Illinois Pollution Control Board on December 15, 1988, published (13 Ill. Reg. 2066) and became effective February 3, 1989. The rules were corrected for an omission, published on November 15, 1989, (13 Ill Reg. 19444), and became effective December 5, 1989. In a November 18, 1991, letter from Bharat Mathur, then Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency (IEPA) to Stephen Rothblatt, Chief, Regulation Development Branch, Region 5, USEPA, Illinois committed to notify USEPA of any pending construction or operating permit application during the 30 day public comment period which is part of Illinois' permit issuance process (Section 203.150). This

commitment is part of the administrative record of USEPA's approval of the Illinois' operating permit program for the purpose of issuing federally enforceable operating permits at 40 CFR 52.720 (c) (84) and 52.737 on December 17, 1992 (57 FR 59928). USEPA may deem a permit not federally enforceable if monitoring provisions do not comply with the requirements of 40 CFR 51.214, part 51, appendix P or § 51.165.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter a: Permits and General Provisions; Part 201: Permits and General Provisions, Subpart J: Monitoring and Testing, Section 201.281; and Subpart L: Continuous Monitoring, Sections 201.401 through 201.408, adopted at Ill. Reg. 2066, effective February 3, 1989.

(90) On June 11, 1991, Illinois submitted regulations concerning the emission of volatile organic compounds from pharmaceutical manufacturing.

(i) *Incorporation by reference.* (A) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter C: Emissions Standards and Limitations for Stationary Sources, Part 215: Organic Material Emission Standards and Limitations, Subpart T: Pharmaceutical Manufacturing, Subpart A: General Provisions: Amendments to sections 215.102 and 215.105 and Creation of section 215.108. Adopted at 15 ILLINOIS REGISTER 80 18, effective May 14, 1991.

(B) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter C: Emissions Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions. Adopted at 15 ILLINOIS REGISTER 79 01, effective May 14, 1991.

(91) [Reserved]

(92) On June 4, 1992, the State submitted particulate matter regulations adopted as part of Pollution Control Board Proceeding R91–35. These regulations concern particulate matter ambient limits and episode regulations.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board

(A) Part 212 Visible and Particulate Matter Emissions: Section 212.113 Incorporations by Reference; section 212.424 Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations located in LaSalle County, South of the Illinois River; section 212.443 Coke Plants; section 212.445 Blast Furnace Cast Houses; adopted at 16 Illinois Register 8204, effective May 15, 1992.

(B) Part 243 Air Quality Standards: Section 243.108 Incorporations by Reference; section 243.120 PM_{-10}; section 243.121 Repealed; adopted at 16 Illinois Register 8185, effective May 15, 1992.

(C) Part 244 Episodes: Section 244.101 Definitions; section 244.106 Monitoring; section 244.107 Determination of Areas Affected; section 244.121 Local Agency Responsibilities; section 244.161 Advisory Alert and Emergency Levels; section 244.162 Criteria for Declaring and Advisory; section 244.163 Criteria for Declaring a Yellow Alert; section 244.166 Criteria for Terminating Advisory, Alert and Emergency; section 244.167 Episode Stage Notification; section 244.168 Contents of Episode Stage Notification; section 244.169 Actions During Episode Stages Adopted; section 244 appendix D; adopted at 16 Illinois Register 8191, effective May 15, 1992.

(93) On September 30, 1992, the State submitted rules regulating volatile organic compound emissions from gasoline dispensing facilities' motor vehicle fuel operations.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, title 35 Environmental Protection, subtitle B: Air Pollution, chapter I: Pollution Control Board part 218: Organic Material Emission Standards and Limitations for the Chicago Area; subpart Y: Gasoline Distribution; § 218.583 Gasoline Dispensing Facilities—Storage Tank Filling Operations, amended at 16 Illinois Register 13864 effective August 24, 1992, and; § 218.586 Gasoline Dispensing Facilities—Motor Vehicle Fueling Operations, added at 16 Illinois Register 13864, effective August 24, 1992.

(B) [Reserved]

(ii) *Additional materials.* (A) Stage II Vapor Recovery SIP Program Description dated September 29, 1992.

(94) On July 30, 1986, the State submitted particulate boiler rules intended to replace rule 203(g)(1) which was vacated by the Courts. No action is taken on §212.209 because the variance which it authorized has expired. On July 22, 1988, the State submitted opacity rules intended to replace rule 202(b) which had been vacated by the Courts. Also on July 22, 1988, the State submitted Illinois Pollution Control Board procedural rules for considering Air Adjusted Standard Procedures.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Illinois Administrative Code, Subtitle B: Air Pollution; Chapter 1: Pollution Control Board; part 212 Visible and Particulate Matter Emissions; subpart E: Particulate Matter Emission from Fuel Combustion Emission Sources; §§212.201, 212.202, 212.203 and 212.204. Amended or added at 10 Ill Reg. 12637, effective July 9, 1986.

(B) Title 35: Environmental Protection, Illinois Administrative Code, Subtitle B: Air Pollution; Chapter 1: Pollution Control Board; part 212 Visible and Particulate Matter Emissions; subpart B: Visible Emissions. Amended or added at 12 Ill. Reg 12492, effective July 13, 1988.

(C) Title 35: Environmental Protection, Illinois Administrative Code; Subtitle A: General Provisions; Chapter 1: Pollution Control Board; part 106: Hearings Pursuant to Specific Rules; subpart E: Air Adjusted Standards Procedures. Added at 12 Ill. Reg 12484, effective July 13, 1988.

(95) On October 16, 1991, and November 13, 1991, the State submitted particulate matter regulations adopted as part of Pollution Control Board Proceeding R91–6. These regulations concern particulate matter controls for LaSalle County, Illinois.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board.

(A) The addition of definitions for ''Condensible PM–10'', ''PM–10'', ''Portland Cement Manufacturing Process Emission Source'', and the modification of the definition of ''Portland Cement Process'' to Part 211 Definitions and General Provisions: Section 211.122 Definitions; adopted at 15 Illinois Register 15673, effective October 14, 1991.

(B) Part 212 Visible and Particulate Matter Emissions: Section 212.110 Measurement Methods; the addition of an abbreviation for pounds per hour to Section 212.111 Abbreviations and Units; additions and deletions to Section 212.113 Incorporations by Reference including the addition and/or renumbering of paragraphs (a), (b), (c), (d), (e), and (h) and the deletion of paragraphs earlier numbered as (a) and (f); Section 212.423 Emission Limits for Portland Cement the Manufacturing Plant Located in LaSalle County, South of the Illinois River; adopted at 15 Illinois Register 15708, effective October 4, 1991.

(96) On November 12, 1992, the State of Illinois submitted a Small Business Stationary Source Technical and Environmental Assistance Program for incorporation in the Illinois State Implementation Plan as required by section 507 of the Clean Air Act Amendments of 1990. Included in the State's submittal were a program description, newly adopted enabling legislation including new subsection 20 of section 39.5 of the Environmental Protection Act, Public Act 87–1213, and new subsection 46.13(a) of the Civil Administrative Code, Public Act 87–1177, and a May 4, 1992, State of Illinois, Illinois Department of Commerce and Community Affairs (DCCA), Illinois Environmental Protection Agency (IEPA) Interagency Agreement defining the responsibilities of DCCA and IEPA in developing and implementing the Small Business Stationary Source Technical and Environmental Compliance Assistance Program (Program).

(i) *Incorporation by reference.* (A) Subsection 20 of section 39.5 of the Environmental Protection Act adopted as Public Act 87–1213 signed into law on September 26, 1992, and effective upon signature.

(B) Subsection 46.13(a) of the Civil Administrative Code adopted as Public Act 87–1177 signed into law on September 21, 1992, and effective upon signature.

(ii) *Other material.* (A) Program description.

(B) May 4, 1992, Interagency Agreement between DCCA and IEPA defining the responsibilities of each agency in developing and implementing the program.

(97) On October 12, 1992, and June 2, 1993, the State of Illinois submitted a requested revision to the Illinois State Implementation Plan (SIP) intended to satisfy the requirements of section 182(a)(3)(B) of the Clean Air Act as amended in 1990. Included were State rules establishing procedures for the annual reporting of emissions of volatile organic material (VOM) and oxides of nitrogen (NO_X) as well as other regulated air pollutants by stationary sources in ozone nonattainment areas. Also included was a June 2, 1993, commitment letter from the Illinois Environmental Protection Agency (IEPA) to fulfill the reporting requirements of the United States Environmental Protection Agency by performing the following tasks:

(i) Update the AIRS Facility Subsystem using the annual emissions report data. The 1992 data will be updated by December 31, 1993, and subsequent updates will be made by July 1st of each year.

(ii) Retain annual emissions reports for at least three (3) years.

(iii) Develop and submit Emissions Statement Status Reports (ESSR) on a quarterly basis each year until all applicable sources have submitted the required annual emissions reports. The report will show the total number of facilities from which emission statement data was requested, the number of facilities that met the provisions, and the number of facilities that failed to meet the provisions. Sources that are delinquent in submitting their emissions statements will be individually listed if they emit 500 tons per year or more of VOM or 2500 tons per year or more of NO_X. The report will also contain the emission data requested in Appendix F of the July 6, 1992, Draft Guidance on the Implementation of an Emission Statement Program.

(iv) All sources subject to the emission statement requirements must report, at a minimum, the information specified under subpart C of part 254 of chapter II of subtitle B of title 35 of the Illinois Administrative Code.

(A) Incorporation by reference. Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 254: Annual Emissions Report, adopted at 17 Illinois Register 7782, effective May 14, 1993.

(B) *Other material.* June 2, 1993, commitment letter.

(98) On July 21, 1986, the State a submitted revision to its particulate matter regulations to incorporate an emission limit for continuous automatic stoking animal pathological waste incinerators.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Part 212 Visible and Particulate Matter Emissions, subpart D: Particulate Matter Emissions from Incinerators, section 212.185 Continuous Automatic Stoking Animal Pathological Waste Incinerators. Adopted December 18, 1986, added at 11 Ill. Reg. 1410, effective December 30, 1986.

(99) On January 4, 1989, the State submitted revisions to its sulfur dioxide rules.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.102 Abbreviations and Units. Amended at 12 Ill. Reg. 20778, effective December 5, 1988.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart A: General Provisions, section 214.104 Incorporations by Reference. Amended at 15 Ill. Reg. 1017, effective January 15, 1991.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 214 Sulfur Limitations, Subpart O: Petroleum Refining, Petrochemical and Chemical

Manufacturing, section 214.382 Petroleum and Petrochemical Processes. Amended at 12 Ill. Reg. 20778, effective December 5, 1988.

(100) On October 21, 1993, the State submitted definitions codified as part of the Illinois Administrative Code for incorporation in the Illinois State Implementation Plan.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211 Definitions and General Provisions, Subpart A: General Provisions: Sections 211.101 and 211.102, Subpart B: Definitions, Sections 211.121, 211.130, 211.150, 211.170, 211.210, 211.230, 211.250, 211.290, 211.310, 211.330, 211.350, 211.370, 211.390, 211.410, 211.430, 211.450, 211.470, 211.490, 211.510, 211.530, 211.550, 211.570, 211.590, 211.610, 211.630, 211.650, 211.670, 211.690, 211.710, 211.730, 211.750, 211.770, 211.790, 211.810, 211.830, 211.850, 211.870, 211.890, 211.910, 211.930, 211.950, 211.970, 211.990, 211.1010, 211.1050, 211.1090, 211.1110, 211.1130, 211.1150, 211.1170, 211.1190, 211.1210, 211.1230, 211.1250, 211.1270, 211.1290, 211.1310, 211.1330, 211.1350, 211.1370, 211.1390, 211.1410, 211.1430, 211.1470, 211.1490, 211.1510, 211.1530, 211.1550, 211.1570, 211.1590, 211.1610, 211.1630, 211.1650, 211.1670, 211.1690, 211.1710, 211.1730, 211.1750, 211.1770, 211.1790, 211.1810, 211.1830, 211.1850, 211.1870, 211.1890, 211.1910, 211.1930, 211.1950, 211.1970, 211.1990, 211.2010, 211.2050, 211.2070, 211.2090, 211.2110, 211.2130, 211.2150, 211.2170, 211.2190, 211.2210, 211.2230, 211.2250, 211.2270, 211.2310, 211.2330, 211.2350, 211.2370, 211.2390, 211.2410, 211.2430, 211.2450, 211.2470, 211.2490, 211.2510, 211.2530, 211.2550, 211.2570, 211.2590, 211.2650, 211.2670, 211.2690, 211.2710, 211.2730, 211.2750, 211.2770, 211.2790, 211.2810, 211.2830, 211.2850, 211.2870, 211.2890, 211.2910, 211.2930, 211.2950, 211.2970, 211.2990, 211.3010, 211.3030, 211.3050, 211.3070, 211.3090, 211.3110, 211.3130, 211.3150, 211.3170, 211.3190, 211.3210, 211.3230, 211.3250, 211.3270, 211.3290, 211.3310, 211.3330, 211.3350, 211.3370, 211.3390, 211.3410, 211.3430, 211.3450, 211.3470, 211.3490, 211.3510, 211.3530, 211.3550, 211.3570, 211.3590, 211.3610, 211.3630, 211.3650, 211.3670, 211.3690, 211.3710, 211.3730, 211.3750, 211.3770, 211.3790, 211.3810, 211.3830, 211.3850, 211.3870, 211.3890, 211.3910, 211.3930, 211.3970, 211.3990, 211.4010, 211.4030, 211.4050, 211.4070, 211.4090, 211.4110, 211.4130, 211.4150, 211.4170, 211.4190, 211.4210, 211.4230, 211.4250, 211.4270, 211.4290, 211.4310, 211.4330, 211.4350, 211.4370, 211.4390, 211.4410, 211.4430, 211.4450, 211.4470, 211.4490, 211.4510, 211.4530, 211.4550, 211.4590, 211.4610, 211.4630, 211.4650, 211.4670, 211.4690, 211.4710, 211.4730, 211.4750, 211.4770, 211.4790, 211.4810, 211.4870, 211.4890, 211.4910, 211.4930, 211.4950, 211.4990, 211.5030, 211.5050, 211.5070, 211.5090, 211.5110, 211.5130, 211.5150, 211.5170, 211.5185, 211.5190, 211.5210, 211.5230, 211.5250, 211.5270, 211.5310, 211.5330, 211.5350, 211.5370, 211.5410, 211.5430, 211.5450, 211.5470, 211.5490, 211.5510, 211.5550, 211.5570, 211.5590, 211.5610, 211.5630, 211.5650, 211.5670, 211.5690, 211.5710, 211.5730, 211.5750, 211.5770, 211.5790, 211.5810, 211.5830, 211.5850, 211.5870, 211.5890, 211.5910, 211.5930, 211.5950, 211.5970, 211.5990, 211.6010, 211.6030, 211.6050, 211.6070, 211.6090, 211.6130, 211.6150, 211.6190, 211.6210, 211.6230, 211.6270, 211.6290, 211.6310, 211.6330, 211.6350, 211.6370, 211.6390, 211.6410, 211.6430, 211.6450, 211.6470, 211.6490, 211.6510, 211.6530, 211.6550, 211.6570, 211.6590, 211.6610, 211.6670, 211.6690, 211.6730, 211.6750, 211.6770, 211.6790, 211.6810, 211.6850, 211.6870, 211.6890, 211.6910, 211.6930, 211.6950, 211.6970, 211.6990, 211.7010, 211.7030, 211.7070, 211.7090, 211.7110, 211.7130, 211.7150, 211.7170, 211.7190, 211.7210, 211.7230, 211.7250, 211.7270, 211.7290, 211.7310, 211.7330, 211.7350.

These section were added at 17 Ill. Reg. 16504, effective September 27, 1993.

(101) On October 21, 1993, the state submitted volatile organic compound (VOC) control regulations for incorporation in the Illinois State Implementation for ozone.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area Subparts

A, B, C, E, F, G, H, Q, R, S, T, V, W, X, Y, Z, AA, BB, and Section 218.

Appendix A, B, C, and D. These regulations were adopted at R91–7 at 15 Ill. Reg. 12231, effective August 16, 1991; amended in R91–23 at Ill. Reg. 13564, effective August 24, 1992; amended in R91–28 and R91–30 at 16 Ill. Reg. 13864, effective August 24, 1992; amended in R93–9 at 17 Ill. Reg. 16636, effective September 27, 1993. The specific adoption and effective dates of the rules incorporated by reference follow.

(*1*) Adopted at R91–7 at 15 Ill. Reg. 12231, effective August 16, 1991. Subpart A 218.108; Subpart C: 218.142; Subpart R: 218.442, 218.444, 218.448, 218.451; Subpart T: 218.484, 218.488; Subpart V: 218.526; Subpart X: 218.561, 218.563; Subpart Z: 218.607; Subpart AA: 218.625, 218.626 and 218.630.

(*2*) Amended in R93–9 at 17 Ill. Reg. 16636, effective September 27, 1993. Subpart A: 218.100, 218.101, 218.102, 218.103, 218.104, 218.105, 218.106, 218.107, 218.109, 218.110, 218.111, 218.112; Subpart B: 218.121, 218.122, 218.123, 218.124; Subpart C: 218.141, 218.143, 218.144; Subpart E: 218.181, 218.182, 218.183, 218.184, 218.186; Subpart F: 218.204, 218.205, 218.206, 218.207, 218.208, 218.209, 218.210, 218.211; Subpart G: 218.301, 218.302, 218.303, 218.304; Subpart H: 218.401, 218.402, 218.403, 218.404, 218.405; Subpart Q: 218.421, 218.422, 218.423, 218.424, 218.425, 218.426, 218.427, 218.428, 218.429; Subpart R: 218.441, 218.443, 218.445, 218.446, 218.447, 218.449, 218.450, 218.452; Subpart S: 218.461, 218.462, 218.463, 218.464; Subpart T: 218.480, 218.481, 218.482, 218.483, 218.485, 218.486, 218.487, 218.489; Subpart V: 218.525; Subpart W: 218.541; Subpart X: 218.562; Subpart Y: 218.581, 218.582, 218.583, 218.584, 218.585, 218.586; Subpart Z: 218.601, 218.602, 218.603, 218.608, 218.609, 218.610, 218.611; Subpart AA: 218.620, 218.621, 218.623, 218.624, 218.628, 218.636, 218.637; Subpart BB: 218.640, 218.642, 218.644, Section 218: Appendix A, Appendix B, Appendix C, Appendix D.

(*3*) Section 218.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for Metro East Area Subparts A, B, C, E, F, G, H, Q, R, S, T, V, W, X, Y, Z, AA, BB and Section 219 Appendix A, B, C, and D. These regulations were adopted at R91–8 at Ill. Reg. 12491, effective August 16, 1991; amended in R91–24 at 16 Ill. Reg. 13597, effective August 24, 1992; amended in R91–30 at 16 Ill. Reg. 13833, effective August 24, 1992, emergency amendment in R93–12 at Ill. Reg. 8295, effective May 24, 1993, for a maximum of 150 days, amended in R93–9 at 17 Ill. Reg. 16918, effective September 27, 1993 and October 21, 1993. The specific adoption and effective dates of the rules incorporated by reference follow.

(*1*) Adopted at R91–8 at 15 Ill. Reg. 12491, effective August 16, 1991: Subpart A: 219.103, 219.108; Subpart C: 219.142; Subpart R: 219.442, 219.444, 219.448, 219.451; Subpart T: 219.484, 219.488; Subpart V: 219.526; Subpart X: 219.561, 219.563; Subpart Z: 219.607; Subpart AA: 219.625, 219.626, 219.630.

(*2*) Amended in R93–9 at 17 Ill. Reg. 16918, effective September 27, 1993:

Subpart A: 219.100, 219.101, 219.102, 219.104, 219.105, 219.106, 219.107, 219.109, 219.110, 219.111, 219.112;
Subpart B: 219.121, 219.122, 219.123, 219.124;
Subpart C: 219.141, 219.143, 219.144;
Subpart E: 219.181, 219.182, 219.183, 219.184, 219.186;
Subpart F: 219.204, 219.205, 219.206, 219.207, 219.208, 219.209, 219.210, 219.211;
Subpart G: 219.301, 219.302, 219.303, 219.304;
Subpart H: 219.401, 219.402, 219.403, 219.404, 219.405;
Subpart Q: 219.421, 219.422, 219.423, 219.424, 219.425, 219.426, 219.427, 219.428, 219.429;
Subpart R: 219.441, 219.443, 219.445, 219.446, 219.447, 219.449, 219.450, 219.452;
Subpart S: 219.461, 219.462, 219.463, 219.464;
Subpart T: 219.480, 219.481, 219.482, 219.483, 219.485, 219.486, 219.487, 219.489;
Subpart V: 219.525;
Subpart W: 219.541;
Subpart X: 219.562;
Subpart Y: 219.581, 219.582, 219.583, 219.584, 219.585, 219.586;
Subpart Z: 219.601, 219.602, 219.603, 219.608, 219.609, 219.610, 219.611;
Subpart AA: 219.620, 219.621, 219.623, 219.624, 219.628, 219.636, 219.637;
Subpart BB: 219.640, 219.642, 219.644;
Section 219: Appendix A, Appendix B, Appendix C, Appendix D.

(*3*) Section 219.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(102) On October 21, 1993 and March 4, 1994, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.270, 211.1070, 211.2030, 211.2610, 211.3950, 211.4050, 211.4830, 211.4850, 211.4970, 211.5390, 211.5530, 211.6110, 211.6170, 211.6250, 211.6630, 211.6650, 211.6710, 211.6830, 211.7050. These sections were adopted on January 6, 1994, Amended at 18 Ill. Reg. 1253, and effective January 18, 1994.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emissions Standards and Limitations for the Chicago Area, Subpart PP: 218.927, 218.928; Subpart QQ: 218.947, 218.948; Subpart RR: 218.967, 218.968; Subpart TT: 218.987, 218.988; Subpart UU: 218.990. These sections were adopted on September 9, 1993, Amended at 17 Ill. Reg. 16636, effective September 27, 1993.

(C) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218: Organic Material Emissions Standards and Limitations for the Chicago Area, Subpart A: 218.106, 218.108, 218.112, 218.114; Subpart H: 218.402; Subpart Z: 218.602, 218.611; Subpart AA: 218.620, 218.623 (repealed); Subpart CC; Subpart DD; Subpart PP: 218.920, 218.926; Subpart QQ: 218.940, 218.946; Subpart RR: 218.960, 218.966; Subpart TT: 218.980, 218.986; Subpart UU: 218.991. These sections were adopted on January 6, 1994, Amended at 18 Ill. Reg. 1945, effective January 24, 1994.

(103) On February 11, 1993, Illinois submitted a site specific revision to its carbon monoxide State Implementation Plan for a General Motors Corporation iron foundry located adjacent to Interstate 74 at G Street in Vermilion County, Illinois.

(i) *Incorporation by reference.* (A) Illinois Administrative Code; Title 35 Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; P 216: Carbon Monoxide Emissions; Subpart O: Primary and Fabricated Metal Products; Section 216.382 Exception, General Motors Ferris Foundry in Vermilion County. Added at 16 Illinois Register 18075, effective November 13, 1992.

(104) [Reserved]

(105) On February 7, 1994, the State submitted revisions intended to create a permit program for small sources. The purpose of these revisions is to lessen the permitting burden on small sources and the permitting authority by reducing the frequency and/or the requirement of operating permit renewal for sources emitting a total of less than 25 tons per year of regulated air pollutants. A permit obtained through these procedures is intended to continue as a legally binding State document until the source modifies its operations, withdraws its permit or becomes subject to a new applicable requirement. At that time, the State will determine whether the small source procedures continue to be appropriate and issue a revised small source permit or direct the source in following the correct permit procedures. Since small source permits are not subject to a public comment period or review by USEPA, they are not federally enforceable and cannot be used to limit sources' potential to emit and thereby exempt them from the requirements of the title v operating permit program.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board.

(A) Subchapter a: Permits and General Provisions, Part 201: Permits and General Provisions.

(*1*) Subpart D: Permit Applications and Review Process, Section 201.162 Duration and Section 201.163 Joint Construction and Operating Permits. Amended at 17 Ill. Reg., effective December 7, 1993.

(*2*) Subpart E: Special Provisions for Operating Permits for Certain Smaller Sources, Section 201.180 Applicability, Section 201.181 Expiration and Renewal and Section 201.187 Requirement for a Revised Permit Added at 17 Ill. Reg., effective December 7, 1993.

(B) Subchapter C: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.5500 Regulated Air Pollutant. Adopted at 17 Ill. Reg., effective December 7, 1993.

(106) On November 23, 1994, the State submitted amended marine vessel loading rules which consisted of revised definitions, and revisions to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.3480 Loading Event and 211.3660 Marine Vessel added at 18 Ill. Reg. 166769, effective October 25, 1994; Sections 211.3650 Marine Terminal, and 211.6970 Vapor Collection System, and Section 211.6990 Vapor Control System amended at 18 Ill. Reg. 16769, effective October 25, 1994.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A; General Provisions, Sections 218.101 Savings Clause and 218.106 Compliance Dates amended at 18 Ill. Reg. 16392, effective October 25, 1994; Subpart GG: Marine Terminals, Sections 218.760 Applicability, 218.762 Control Requirements, 218.764 Compliance Certification, 218.766 Leaks, 218.768 Testing and Monitoring, and 218.770 Recordkeeping and Reporting added at 18 Ill. Reg. 16392, effective October 25, 1994; Appendix E: List of Affected Marine Terminals amended at 18 Ill. Reg. 16392, effective October 25, 1994.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart A; General Provisions, Sections 219.101 Savings Clause and 219.106 Compliance Dates amended at 18 Ill. Reg. 16415, effective October 25, 1994; Subpart GG: Marine Terminals, Sections 219.760 Applicability, 219.762 Control Requirements, 219.764 Compliance Certification, 219.766 Leaks, 219.768 Testing and Monitoring, and 219.770 Recordkeeping and Reporting added at 18 Ill. Reg. 16415, effective October 25, 1994.

(D) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Appendix E: List of affected Marine Terminals amended at 20 Ill. Reg. 3848. Effective February 15, 1996.

(107) On October 25, 1994, Illinois submitted a regulation which requires gasoline dispensing operations in the Chicago and Metro-East St. Louis ozone nonattainment areas that have storage tanks of at least 575 gallons to install pressure/vacuum relief valves on storage tank vent pipes. Tanks installed before January 1, 1979, are exempt from the rule if they have a capacity of less than 2000 gallons, as are tanks that are equipped with floating roofs or equivalent control devices that have been approved by the State and USEPA.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 201 Permits and General Provisions, Section 201.302 Reports. Amended at 18 Ill. Reg. 15002. Effective September 21, 1994.

(B) Part 211 Definitions and General Provisions, Section 211.5060 Pressure/Vacuum Relief Valve. Added at 18 Ill. Reg. 14962. Effective September 21, 1994.

(C) Part 218 Organic Material Emission Standards and Limitations for Chicago Area, Section 218.583 Gasoline Dispensing Operations-Storage Tank Filling Operations. Amended at 18 Ill. Reg. 14973. Effective September 21, 1994.

(D) Part 219 Organic Material Emission Standards and Limitations for

Metro East Area, Section 219.583 Gasoline Dispensing Operations-Storage Tank Filling Operations. Amended at 18 Ill. Reg. 14987. Effective September 21, 1994.

(108) On January 25, 1994, the State submitted a revision to its ozone State Implementation Plan (SIP) for Quantum Chemical Corporation's facility located in Morris, Aux Sable Township, Grundy County, Illinois. It grants an adjusted standard from Parts 35 Illinois Administration Code (IAC) 218.966 and 218.986 as they apply to specific units or plants within this facility.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, AS 92–14, adopted on October 7, 1993, and effective on October 7, 1993.

(109) On October 25, 1994, Illinois submitted a regulation that reduces the maximum allowable volatility for gasoline sold in the Metro-East St. Louis ozone nonattainment area, which includes Madison, Monroe, and St. Clair Counties, to 7.2 pounds per square inch Reid Vapor Pressure (RVP) during the summer control period. On May 14, 1996, Illinois submitted an amendment to its RVP rule which changes the summer regulatory control period of the program. The summer control period for the Illinois RVP program is June 1 to September 15.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219 Organic Material Emission Standards and Limitations for Metro East Area.

(A) Section 219.112 Incorporation by Reference. Amended at 18 Ill. Reg. 14987. Effective September 21, 1994.

(B) [Reserved]

(C) Section 219.585 Gasoline Volatility Standards. Amended at 20 Ill. Reg. 3848: Effective February 15, 1996.

(D) Section 219.585 was repealed in 2013 and is removed without replacement; see paragraph (c)(201) of this section.

(110) On September 26, 1994, the State of Illinois submitted a revision to its ozone State Implementation Plan for the J. M. Sweeney Company located in Cicero, Cook County, Illinois. It grants a compliance date extension from Stage II vapor control requirements (35 Ill. Adm. Code 218.586) from November 1, 1993, to March 31, 1995.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 93–257, adopted on September 1, 1994, and effective on September 1, 1994. Certification dated 9/23/94 of Acceptance by J. M. Sweeney.

(111) On July 29, 1994, Illinois submitted regulations which require adoption and implementation of particulate matter contingency measures for Illinois' four moderate particulate matter nonattainment areas. Sources in the nonattainment areas which emit at least 15 tons of particulate matter must submit two levels of contingency measures, which will then become Federally enforceable. Sources will be required to implement the contingency measures if an exceedance of the National Ambient Air Quality Standard for Particulate Matter is measured, or if the United States Environmental Protection Agency finds that an area has failed to attain the National Ambient Air Quality Standards.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board;

(A) Part 106 Hearings Pursuant to Specific Rules, Section 106.930—Applicability, Section 106.931—Petition for Review, Section 106.932—Response and Reply, Section 106.933—Notice and Hearing, Section 106.934—Opinion and Order. Amended at 18 Ill. Reg. 11579–11586. Effective July 11, 1994.

(B) Part 212 Visible and Particulate Matter Emissions, Section 212.700—Applicability, Section 212.701—Contingency Measure Plans, Submittal and Compliance Date, Section 212.702—Determination of Contributing Sources, Section 212.703—Contingency Measure Plan Elements, Section 212.704—Implementation, Section 212.705—Alternative Implementation. Added at 18 Ill. Reg. 11587–11606. Effective July 11, 1994.

(112) On March 28, 1995, the State of Illinois submitted a revision to its ozone State Implementation Plan for P & S, Incorporated's facility located in Wood Dale, Du Page County, Illinois. It

grants a compliance date extension from Stage II vapor control requirements (35 Ill. Adm. Code 218.586) from November 1, 1994 until April 1, 1996, or 60 days after notification to P & S, Incorporated that the roadway construction complicating the installation of Stage II equipment will be abandoned for any reason, whichever is sooner.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 94–299, adopted on February 16, 1995, and effective on February 16, 1995. Certification dated March 1, 1995 of Acceptance by P & S, Incorporated.

(113) On April 27, 1995, the Illinois Environmental Protection Agency requested a revision to the Illinois State Implementation Plan in the form of revisions to the State's New Source Review rules for sources in the Chicago and metropolitan East St. Louis ozone nonattainment areas and are intended to satisfy Federal requirements of the Clean Air Act as amended in 1990. The State's New Source Review provisions are codified at Title 35: Environmental Protection Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions. Part 203 Major Stationary Sources Construction and Modification is amended as follows:

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subpart A: General Provisions, Section 203.101 Definitions, Section 203.107 Allowable Emissions, Section 203.110 Available Growth Margin, Section 203.112 Building, Structure and Facility, Section 203.121 Emission Offset, Section 203.122 Emissions Unit, Section 203.123 federally Enforceable, Section 203.126 Lowest Achievable Emission Rate, Section 203.128 Potential to Emit, Section 203.145 Volatile Organic Material, Section 203.150 Public Participation. Effective April 30, 1993.

(B) Title 35: Environmental Protection, Subpart B: Major Stationary Sources in Nonattainment Areas, Section 203.201 Prohibition, Section 203.203 Construction Permit Requirement and Application, Section 203.206 Major Stationary Source, Section 203.207 Major Modification of a Source, Section 203.208 Net Emission Determination, Section 203.209 Significant Emissions Determination. Effective April 30, 1993.

(C) Title 35: Environmental Protection, Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas, Section 203.301 Lowest Achievable Emission Rate, Section 203.302 Maintenance of Reasonable Further Progress and Emission Offsets, Section 203.303 Baseline and Emission Offsets Determination, Section 203.306 Analysis of Alternatives. Effective April 30, 1993.

(D) Title 35: Environmental Protection, Subpart H: Offsets for Emission Increases From Rocket Engines and Motor Firing, Section 203.801 Offsetting by Alternative or Innovative Means. Effective April 30, 1993. Published in the Illinois Register, Volume 17, Issue 20, May 14, 1993.

(114) On November 30, 1994, the State submitted an amended Synthetic Organic Chemical Manufacturing Industry Air Oxidation Process rule which consisted of extended applicability and tightened control measures to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart V; Air Oxidation Processes, Sections 218.520 Emission Limitations for Air Oxidation Processes, 218.522 Savings Clause, 218.523 Compliance, 218.524 Determination of Applicability, and 218.525 Emission Limitations for Air Oxidation Processes (Renumbered) at 18 Ill. Reg. 16972, effective November 15, 1994.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart V; Air Oxidation Processes, Sections 219.520 Emission Limitations for Air Oxidation Processes, 219.522 Savings Clause, 219.523 Compliance, 219.524 Determination of Applicability, and 219.525 Emission Limitations for Air Oxidation Processes (Renumbered) at 18 Ill. Reg. 17001, effective November 15, 1994.

(115) On May 5, 1995, and May 26, 1995, the State submitted an amended coating rule which consisted of a tightened applicability cut-off level for wood furniture coating operations to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.208 Exemptions from Emission Limitations, Subsection (b), amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Section 219.208 Exemptions from Emission Limitations, Subsection (b), amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(116) On May 5, 1995, and May 26, 1995, the State submitted a rule for automotive/transportation and business machine plastic parts coating operations, which consisted of new volatile organic compound emission limitations to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions, Sections 211.660 Automotive/Transportation Plastic Parts, 211.670 Baked Coatings, 211.820 Business Machine Plastic Parts, 211.1880 Electromagnetic Interference/Radio Frequency Interference Shielding Coatings, 211.1900 Electrostatic Prep Coat, 211.2360 Flexible Coatings, 211.2630 Gloss Reducers, 211.4055 Non-Flexible Coating, 211.4740 Plastic Part, 211.5480 Reflective Argent Coating, 211.5600 Resist Coat, 211.6060 Soft Coat, 211.6140 Specialty Coatings, 211.6400 Stencil Coat, 211.6580 Texture Coat, and 211.6880 Vacuum Metallizing, amended at 19 Ill. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.204 Emission Limitations, Subsection (n) Plastic Parts Coating: Automotive/Transportation and (o) Plastic Parts Coating: Business Machine, 218.205 Daily-Weighted Average Limitations, Subsection (g), and 218.207 Alternative Emission Limitations, Subsection (i), amended at 19 Ill. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Section 219.204 Emission Limitations, Subsection (m) Plastic Parts Coating: Automotive/Transportation and (n) Plastic Parts Coating: Business Machine, 219.205 Daily-Weighted Average Limitations, Subsection (f), and 219.207 Alternative Emission Limitations, Subsection (h), amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(117) On May 31, 1995, the State submitted amended lithographic printing rules which consisted of revised definitions, and revisions to the Ozone Control Plan for the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.474 Alcohol, 211.560 As-Applied Fountain Solution, 211.2850 Heatset Web Offset Lithographic Printing Line, 211.4065 Non-Heatset, 211.5980 Sheet-Fed added at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart H; Printing and Publishing, Sections 218.405 Lithographic Printing: Applicability, 218.406 Provisions Applying to Heatset Web Offset Lithographic Printing Prior to March 15, 1996, 218.407 Emissions Limitations and Control Requirements for Lithographic Printing Lines On and

After March 15, 1996, 218.408 Compliance Schedule for Lithographic Printing on and After March 15, 1996, 218.409 Testing for Lithographic Printing On and After March 15, 1996, 218.410 Monitoring Requirements for Lithographic Printing, 218.411 Recordkeeping and Reporting for Lithographic Printing added at 19 Ill. Reg. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart H; Printing and Publishing, Sections 219.405 Lithographic Printing: Applicability, 219.406 Provisions Applying to Heatset Web Offset Lithographic Printing Prior to March 15, 1996, 219.407 Emissions Limitations and Control Requirements for Lithographic Printing Lines On and After March 15, 1996, 219.408 Compliance Schedule for Lithographic Printing on and After March 15, 1996, 219.409 Testing for Lithographic Printing On and After March 15, 1996, 219.410 Monitoring Requirements for Lithographic Printing, 219.411 Recordkeeping and Reporting for Lithographic Printing added at 19 Ill. Reg. 6848, effective May 9, 1995.

(118) On October 24, 1994, the State submitted a site-specific revision to the State Implementation Plan establishing lubricant selection and temperature control requirements for Alumax Incorporated, Morris, Illinois facility's hot and cold aluminum rolling mills, as part of the Ozone Control Plan for the Chicago area.

(i) *Incorporation by reference.* September 1, 1994, Opinion and Order of the Illinois Pollution Control Board AS 92–13, effective September 1, 1994.

(119) On May 5, 1995, and May 26, 1995, the State submitted a revised rule tightening volatile organic compound emission limitations for certain surface coating operations in the Chicago and Metro-East St. Louis areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F; Coating Operations, Sections 218.204 Emission Limitations, 218.205 Daily-Weighted Average Limitations, 218.207 Alternative Emission Limitations, 218.208 Exemptions From Emission Limitations, 218.210 Compliance Schedule, 218.212 Cross-line Averaging to Establish Compliance for Coating Lines, 218.213 Recordkeeping and Reporting for Cross-line Averaging Participating Coating Lines, 218.214 Changing Compliance Methods, 218 Appendix H Baseline VOM Content Limitations for Subpart F, Section 218.212 Cross-Line Averaging, amended at 19 Ill. 6848, effective May 9, 1995.

(B) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart F; Coating Operations, Sections 219.204 Emission Limitations, 219.205 Daily-Weighted Average Limitations, 219.207 Alternative Emission Limitations, 219.208 Exemptions From Emission Limitations, 219.210 Compliance Schedule, 219.212 Cross-line Averaging to Establish Compliance for Coating Lines, 219.213 Recordkeeping and Reporting for Cross-line Averaging Participating Coating Lines, 219.214 Changing Compliance Methods, 219 Appendix H Baseline VOM Content Limitations for Subpart F, Section 219.212 Cross-line Averaging, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(120) On May 5, 1995, and May 31, 1995, the State of Illinois submitted a rule for motor vehicle refinishing operations, which consisted of new volatile organic material (VOM) emission limitations to the Ozone Control Plan for the Chicago and Metro East St. Louis areas. This State Implementation Plan revision contains rules which establish VOM content limits for certain coatings and surface preparation products used in automobile and mobile equipment refinishing operations in the Chicago and Metro-East area, as well as requires these operations to meet certain equipment and work practice standards to further reduce VOM.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions,

Sections 211.240 Adhesion Promoter, 211.495 Anti-Glare/Safety Coating, 211.685 Basecoat/Clearcoat System, 211.1875 Elastomeric Materials, 211.3915 Mobile Equipment, 211.3960 Motor Vehicles, 211.3965 Motor Vehicle Refinishing, 211.5010 Precoat, 211.5061 Pretreatment Wash Primer, 211.5080 Primer Sealer, 211.5090 Primer Surfacer Coat, 211.6145 Specialty Coatings for Motor Vehicles, 211.6540 Surface Preparation Materials, 211.6620 Three or Four Stage Coating System, 211.6695 Topcoat System, 211.6720 Touch-Up Coating, 211.6860 Uniform Finish Blender, amended at 19 Ill. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart HH; Motor Vehicle Refinishing, Sections 218.780 Emission Limitations, 218.782 Alternative Control Requirements, 218.784 Equipment Specifications, 218.786 Surface Preparation Materials, 218.787 Work Practices, 218.788 Testing, 218.789 Monitoring and Record keeping for Control Devices, 218.790 General Record keeping and Reporting, 218.791 Compliance Date, 218.792 Registration, amended at 19 Ill. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart HH; Motor Vehicle Refinishing, Sections 219.780 Emission Limitations, 219.782 Alternative Control Requirements, 219.784 Equipment Specifications, 219.786 Surface Preparation Materials, 219.787 Work Practices, 219.788 Testing, 219.789 Monitoring and Record keeping for Control Devices, 219.790 General Record keeping and Reporting, 219.791 Compliance Date 219.792 Registration, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(D) Sections 218.792 and 219.792 were repealed in 2013 and are removed without replacement; see paragraph (c)(201) of this section.

(121) On May 23, 1995, and June 7, 1995, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.695, 211.696, 211.5245, 211.6025. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7344, and effective May 22, 1995.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart V: 218.500, 218.501, 218.502, 218.503, 218.504, 218.505, 218.506. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7359, and effective May 22, 1995.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart V: 219.500, 219.501, 219.502, 219.503, 219.504, 219.505, 219.506. These sections were adopted on May 4, 1995, Amended at 19 Ill. Reg. 7385, and effective May 22, 1995.

(122) On June 26, 1995, the Illinois Environmental Protection Agency (IEPA) submitted a State Implementation Plan (SIP) revision containing the 1992 enhancements to the Illinois vehicle inspection and maintenance (I/M) program. Such enhancements were originally developed to meet the I/M performance standard as called for in the United States Environmental Protection Agency's (USEPA's) proposed 'post-1987' I/M SIP policy and specified in the settlement agreement entered into by the parties in *Wisconsin* v. *Reilly*, Case No. 87–C–0395, E.D. Wis. The submittal includes authorizing legislation P.A. 86–1433, signed into law on September 12, 1990 and procedural rules published in the Illinois Register on June 26, 1992 at Volume 16, Issue #16.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 276; Sections 276.101, 276.102, 276.204, 276.206, 276.301, 276.303, 276.304, 276.307, 276.308, 276.309, 276.310, 276.311, 276.401, 276.402, 276.701, 276.702, and 276.703 amended or added at 16 Ill. Reg. 10230, effective June 15, 1992.

(ii) *Other material.* (A) Public Act 86–1433 adopted by the Illinois General Assembly on June 29, 1990, signed into law by Governor Edgar on September 12, 1990 effective September 12, 1990 (Sections 2,3, and 4) and January 1, 1991 (Section 1). (B) June 26, 1995 letter and attachments from the IEPA's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director submitting Illinois' revision to the ozone SIP.

(123) On May 5, 1995, May 26, 1995, and May 31, 1995, the State of Illinois submitted miscellaneous revisions to its Volatile Organic Material (VOM) Reasonably Available Control Technology (RACT) rules contained in 35 Illinois Administrative Code Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, and Part 219: Organic Material Emission Standards and Limitations for the Metro East Area. These amendments clarify certain applicability provisions, control requirements, and compliance dates contained within these regulations. Also included in these amendments is an exemption for certain polyethylene foam packaging operations from VOM RACT requirements.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.106; Subpart T: Pharmaceutical Manufacturing, Section 218.480; Subpart DD: Aerosol Can Filling, Section 218.686; Subpart RR: Miscellaneous Organic Chemical Process, Section 218.966; Subpart TT: Other Emission Units, Section 218.980. Amended at 19 Ill. Reg. 6848; effective May 9, 1995.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart T: Pharmaceutical Manufacturing, Section 219.480; Subpart TT: Other Emission Units, Section 219.980. Amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(124) The State of Illinois requested a revision to the Illinois State Implementation Plan (SIP). This revision is for the purpose of establishing and implementing a Clean-Fuel Fleet Program in the Chicago ozone nonattainment area, which includes Cook, DuPage, Grundy (Aux Sable and Goose Lake townships only), Kane, Kendall (Oswego township only), Lake, McHenry, and Will counties, to satisfy the federal requirements for a Clean Fuel Fleet Program to be part of the SIP for Illinois.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 241; Sections 241.101, 241.102, 241.103, 241.104, 241.110, 241.111, 241.112, 241.113, 241.114, 241.115, 241.130, 241.131, 241.140, 241.141, 241.142, 241. Appendix A, 241. Appendix B adopted in R95–12 at 19 Ill. Reg. 13265, effective September 11, 1995.

(ii) *Other material.* (A) September 29, 1995 letter and attachments from the Illinois Environmental Protection Agency's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director submitting Illinois' revision to the ozone SIP.

(125) On November 14, 1995 the State submitted requested revisions to the Illinois State Implementation Plan in the form of revisions to the definitions of Organic Material and Organic Materials, Organic Solvent, Petroleum Liquid and Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) intended to exempt acetone from regulation as a VOC.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.4250 Organic Material and Organic Materials, Section 211.4260 Organic Solvent, Section 211.4610 Petroleum Liquid, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC). Amended at 19 Ill. Reg. 15176, effective October 19, 1995.

(126) On November 15, 1995 the State submitted a requested revision to the Illinois State Implementation Plan in the form of a revision to the definition Volatile Organic Material (VOM) or

Volatile Organic Compound (VOC) intended to exempt parachlorobenzotrifluoride and cyclic, branched or linear completely methylated siloxanes from the definition of VOM or VOC and thereby, from regulation as a VOC.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC). Amended at 19 Ill. Reg. 11066, effective July 12, 1995.

(127) On October 21, 1993, and May 26, 1995, Illinois submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219: Organic Material Emissions Standards and Limitations for Metro East Area, Subpart PP: 219.920, 219.923, 219.927, 219.928; Subpart QQ: 219.940, 219.943, 219.947, 219.948; Subpart RR: 219.960, 219.963, 219.967, 219.968; Subpart TT: 219.980, 219.983, 219.987, 219.988; and Subpart UU. These Subparts were adopted on September 9, 1993, Amended at 17 Ill. Reg. 16918, effective September 27, 1993.

(B) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 219: Organic Material Emissions Standards and Limitations for Metro East Area, Subpart PP: 219.926; Subpart QQ: 219.946; Subpart RR: 219.966; and Subpart TT: 219.986. These Subparts were adopted on April 20, 1995, Amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(128) On November 30, 1994, the State submitted volatile organic compound control regulations for incorporation in the Illinois State Implementation Plan for ozone.

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections 211.2300, 211.3695. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16929, and effective November 15, 1994.

(B) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart B: 218.119, 218.120, 218.125, 218.127, 218.128, 218.129. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16950, and effective November 15, 1994.

(C) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart B: 219.119, 219.120, 219.125, 219.127, 219.128, 219.129. These sections were adopted on October 20, 1994, Amended at 18 Ill. Reg. 16980, and effective November 15, 1994.

(129) [Reserved]

(130) On June 29, 1995, the State of Illinois submitted a revision to the State Implementation Plan (SIP) for the implementation of an enhanced motor vehicle inspection and maintenance (I/M) program in the Chicago and East St. Louis ozone nonattainment areas. This revision included the Vehicle Emissions Inspection Law of 1995 (625 ILCS 5/13B), P.A. 88–533, effective January 18, 1995; I/M regulations (R94–19 and R94–20) adopted on December 1, 1994, by the Illinois Pollution Control Board; February 29, 1996, Request-For-Proposals; April 22, 1996, letter of commitment; plus additional support documentation including modeling demonstration.

(i) *Incorporation by reference.* (A) Vehicle Emissions Inspection Law of 1995 (625 ILCS 5/13B), Public Act 88–533, signed into law by Governor Edgar on January 18, 1995 effective January 18, 1995.

(B) 35 Illinois Administrative Code 240; Sections 240.101, 240.102, 240.104, 240.105, 240.106, 240.107, 240.124, 240.125, 240.151, 240.152, 240.153, 240.161, 240.162, 240.163, 240.164, 240.171, 240.Table A, 240.Table B amended or added in R94–19 at 18 Ill. Reg. 18228, effective December 14, 1994.

(C) 35 Illinois Administrative Code 240; Sections 240.172, 240.173 amended in R94–20 at 18 Ill. Reg. 18013, effective December 12, 1994.

(ii) *Additional materials.* (A) February 29, 1996, Request-For-Proposals submitted on April 22, 1996.

(B) April 22, 1996, letter of commitment and attachments from IEPA's Bureau of Air Chief to the USEPA's Regional Air and Radiation Division Director.

(131) On January 10, 1996, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision request for ozone, which extends the required deadline for the Rexam Medical Packaging Inc. facility in Mundelein, Lake County, Illinois (Rexam), to comply with 35 Illinois Administrative Code, part 218, subpart H, as it applies to its Inline Press Number No.105, Inline Press No. 111, Offline 32-inch Press, Offline 36-inch Press, and Offline 42-inch press. The compliance date is extended from March 15, 1995, until June 15, 1996, or upon submittal of the ''certificate of compliance'' required under section 218.404 of subpart H, whichever occurs first. The variance includes a compliance plan requiring the installation and use of a catalytic oxidizer to control emissions from Inline Press No. 105, Inline Press No. 111, Offline 32-inch Press, and Offline 42-inch Press. The Offline 36-inch Press is required to convert to water-based ink, or be controlled by the oxidizer if the press is not converted by March 1, 1996. The variance is contingent upon certain compliance milestone conditions.

(i) *Incorporation by reference.* (A) Illinois Pollution Control Board Final Opinion and Order, PCB 95–99, adopted on October 19, 1995, and effective March 15, 1995. Certification of Acceptance dated November 29, 1996, by Rexam.

(132) On January 8, 1996, Illinois submitted a site-specific revision to the State Implementation Plan establishing lubricant selection and temperature control requirements for the hot and cold aluminum operations at Reynolds Metals Company's McCook Sheet and Plate Plant in McCook, Illinois (in Cook County), as part of the Ozone Control Plan for the Chicago area.

(i) *Incorporation by reference.* September 21, 1995, Opinion and Order of the Illinois Pollution Control Board AS 91–8, effective September 21, 1995.

(133) On July 23, 1996, the Illinois Environmental Protection Agency submitted a site-specific State Implementation Plan revision request for the Chase Products Company's Broadview (Cook County), Illinois facility located at 19th Street and Gardner Road, as part of the Ozone Control Plan for the Chicago area. The resulting revision revises the control requirements codified at 35 Illinois Administrative Code Part 218 Subpart DD Section 218.686 as they apply to the Chase Products Company's Broadview facility.

(i) *Incorporation by reference.* May 16, 1996, Opinion and Order of the Illinois Pollution Control Board AS 94–4, effective May 16, 1996.

(134) On May 5, 1995, and May 26, 1995, the State of Illinois submitted a State Implementation Plan revision request to the United States Environmental Protection Agency for reactor processes and distillation operation processes in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material (VOM) emissions for the Chicago and Metro-East (East St. Louis) areas. VOM, as defined by the State of Illinois, is identical to ''volatile organic compounds'' (VOC), as defined by EPA. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents. The EPA approves the State Implementation Plan revision request as it applies to Stepan Company's Millsdale Facility.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control

Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 218.431 Applicability, 218.432 Control Requirements, 218.433 Performance and Testing Requirements, 218.434 Monitoring Requirements, 218.435 Recordkeeping and Reporting Requirements, 218.436 Compliance Date, 218 Appendix G, TRE Index Measurement for SOCMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(135) On January 23, 1996, Illinois submitted a site-specific revision to the State Implementation Plan which relaxes the volatile organic material (VOM) content limit for fabricated product adhesive operations at Solar Corporation's Libertyville, Illinois facility from 3.5 pounds VOM per gallon to 5.75 pounds VOM per gallon.

(i) *Incorporation by reference.* July 20, 1995, Opinion and Order of the Illinois Pollution Control Board, AS 94–2, effective July 20, 1995.

(136) On January 9, 1997, Illinois submitted a site-specific revision to the State Implementation Plan which grants a temporary variance from certain automotive plastic parts coating volatile organic material requirements at Solar Corporation's Libertyville, Illinois facility.

(i) *Incorporation by reference.* September 5, 1996, Opinion and Order of the Illinois Pollution Control Board, PCB 96–239, effective September 13, 1996. Certificate of Acceptance signed September 13, 1996.

(137) Approval—On April 25, 1997, the Illinois Environmental Protection Agency submitted a revision to the State Implementation Plan for general conformity rules. The general conformity rules enable the State of Illinois to implement the general conformity requirements in the nonattainment or maintenance areas at the State or local level in accordance with 40 CFR part 93, subpart B—Determining Conformity of General Federal Actions to State or Federal Implementation Plans.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 2: Environmental Protection Agency, Part 255 General Conformity: Criteria and Procedures. Adopted at 21 Ill. Reg. effective March 6, 1997.

(138) On May 5, 1995, and May 26, 1995, the State of Illinois submitted State Implementation Plan (SIP) revision requests for reactor processes and distillation operation processes in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material emissions for the Metro-East (East St. Louis) area. This State Implementation Plan revision request is approved as it applies to Monsanto Chemical Group's Sauget Facility.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product, amended at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 219.431 Applicability, 219.432 Control Requirements, 219.433 Performance and Testing Requirements, 219.434 Monitoring Requirements, 219.435 Recordkeeping and Reporting Requirements, 219.436 Compliance Date, 219.Appendix G, TRE Index Measurement for SOCMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(139) On September 8, 1997, the State of Illinois submitted tightened volatile

organic material rules for cold cleaning degreasing operations in the Chicago and the Metro-East ozone nonattainment areas.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.1885, amended at 21 Ill. 7695, effective June 9, 1997.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart E: Solvent Cleaning, Section 218.182, amended at 21 Ill. 7708, effective June 9, 1997.

(C) Part 219: Organic Material Emissions Standards and Limitations for the Metro-East Area, Subpart E: Solvent Cleaning, Section 219.182, amended at 21 Ill. 7721, effective June 9, 1997.

(140) On March 5, 1998, the State of Illinois submitted amended rules for the control of volatile organic material emissions from wood furniture coating operations in the Chicago and Metro-East (East St. Louis) ozone nonattainment areas, as a requested revision to the ozone State Implementation Plan. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions, 211.1467 Continuous Coater, 211.1520 Conventional Air Spray, 211.6420 Strippable Spray Booth Coating, 211.7200 Washoff Operations, amended at 22 Ill. Reg. 3497, effective February 2, 1998.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations 218.204 Emission Limitations, 218.205 Daily-weighted Average Limitations, 218.210 Compliance Schedule, 218.211 Recordkeeping and Reporting, 218.215 Wood Furniture Coating Averaging Approach, 218.216 Wood Furniture Coating Add-On Control Use, 218.217 Wood Furniture Coating Work Practice Standards, amended at 22 Ill. Reg. 3556, effective February 2, 1998.

(C) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations 219.204 Emission Limitations, 219.205 Daily-weighted Average Limitations, 219.210 Compliance Schedule, 219.211 Recordkeeping and Reporting, 219.215 Wood Furniture Coating Averaging Approach, 219.216 Wood Furniture Coating Add-On Control Use, 219.217 Wood Furniture Coating Work Practice Standards, amended at 22 Ill. Reg. 3517, effective February 2, 1998.

(141) On November 14, 1995, May 9, 1996, June 14, 1996, and February 3, 1997, October 16, 1997, and October 21, 1997, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (SE Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the portion of the SIP revision request that applies to the Granite City area. The SIP revision request corrects, for the Granite City PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 212: Visible and Particulate Matter Emissions, Subpart A: General, Sections 212.107, 212.108, 212.109, 212.110; Subpart L: Particulate Matter from Process Emission Sources, Section 212.324; Subpart N: Food Manufacturing, Section 212.362; Subpart Q: Stone, Clay, Glass and Concrete Manufacturing, Section 212.425; Subpart R: Primary and Fabricated Metal Products and Machinery Manufacture, Sections 212.446, 212.458; Subpart S: Agriculture, Section 212.464. Adopted at 20 *Illinois Register* 7605, effective May 22, 1996.

(B) Joint Construction and Operating Permit: Application Number 95010005, Issued on October 21, 1997, to Granite City Division of National Steel Corporation.

(142) On May 5, 1995, and May 26, 1995, the State of Illinois submitted State Implementation Plan revision requests for reactor processes and distillation operations in the Synthetic Organic Chemical Manufacturing Industry as part of the State's control measures for Volatile Organic Material emissions for the Chicago and Metro-East (East St. Louis) areas. This plan was submitted to meet the Clean Air Act requirement for States to adopt Reasonably Available Control Technology rules for sources that are covered by Control Techniques Guideline documents.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 211: Definitions and General Provisions, Subpart B; Definitions, 211.980 Chemical Manufacturing Process Unit, 211.1780 Distillation Unit, 211.2365 Flexible Operation Unit, 211.5065 Primary Product, amended at 19 Ill. Reg. 6823, effective May 9, 1995.

(B) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 218.431 Applicability, 218.432 Control Requirements, 218.433 Performance and Testing Requirements, 218.434 Monitoring Requirements, 218.435 Recordkeeping and Reporting Requirements, 218.436 Compliance Date, 218.Appendix G, TRE Index Measurement for SOCMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6848, effective May 9, 1995.

(C) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart Q: Synthetic Organic Chemical and Polymer Manufacturing Plant, Sections 219.431 Applicability, 219.432 Control Requirements, 219.433 Performance and Testing Requirements, 219.434 Monitoring Requirements, 219.435 Recordkeeping and Reporting Requirements, 219.436 Compliance Date, 219.Appendix G, TRE Index Measurement for SOCMI Reactors and Distillation Units, amended at 19 Ill. Reg. 6958, effective May 9, 1995.

(143) [Reserved]

(144) On September 3, 1997, the Illinois Environmental Protection Agency submitted a temporary, site specific State Implementation Plan revision request for the D.B. Hess Company, Incorporated's (DB Hess) lithographic printing operations located in Woodstock (McHenry County), Illinois. This variance took the form of a March 20, 1997, Opinion and Order of the Illinois Pollution Control Board issued in PCB 96–194 (Variance—Air). The variance which will expire on March 30, 1999, grants DB Hess a variance from 35 Illinois Administrative Code Sections 218.407(a)(1)(C),(D),(E) and 218.411(b)(1), (2)and (3) for heatset web offset presses 3, 4, and 5 which are located at the Woodstock (McHenry County), Illinois facility.

(i) *Incorporation by reference.* (A) March 20, 1997, Opinion and Order of the Illinois Pollution Control Board in PCB 96–194 (Variance—Air) which was effective on March 20, 1997 and expires on March 30, 1999.

(ii) The variance is subject to the following conditions (the dates specified indicate the latest start dates of compliance periods terminating on March 30, 1999, when presses 3, 4, and 5 must be replaced by complying presses or must be brought into compliance with the rules from which DB Hess seeks the variance):

(A) On or before March 20, 1997, the combined actual volatile organic material (VOM) emissions from all of the presses in the Woodstock plant shall not exceed 18 tons per year or 1.5 tons per month.

(B) On or before March 20, 1997, DB Hess shall use only cleaning solutions with VOM concentrations less than or equal to 30 percent by weight.

(C) On or before March 20, 1997, DB Hess shall use cleaning solutions on presses 3, 4, and 5 that have a VOM composite partial vapor pressure of less than 10 millimeters (mm) of Mercury (Hg) at 20 degrees Celsius. These cleaning solutions must comply with the requirements of 35 IAC 218.407(a)(4).

(D) On or before March 20, 1997, DB Hess shall store and dispose of all cleaning towels in closed containers.

(E) On or before May 5, 1997, DB Hess shall monitor presses 3, 4, and 5 pursuant to 35 IAC 218.410 (b), (c), and (e).

(F) On or before May 5, 1997, DB Hess shall use fountain solutions on presses 3, 4, and 5 that are less than 5 percent VOM by volume, as applied, and which contain no alcohol.

(G) On or before May 5, 1997, DB Hess shall prepare and maintain records pursuant to 35 IAC 218.411 (b), (c), and (d) for presses 3, 4, and 5 and must show compliance with the requirements of 35 IAC 218.407(a)(1) (C), (D), and (E) and with the requirements of 35 IAC 218.411(b) (1), (2), and (3) for these presses.

(H) On or before May 5, 1997, DB Hess shall submit quarterly reports to the Illinois Environmental Protection Agency's (IEPA's) Compliance and Systems Management Section demonstrating compliance with the terms of the Illinois Pollution Control Board Order.

(I) On or before March 30, 1998, DB Hess shall cease operation of press 3.

(J) On or before March 30, 1999, DB Hess shall either:

(*1*) Cease operation of presses 4 and 5, and notify the IEPA of such cessation; or

(*2*) Retrofit presses 4 and 5 or replace presses 4 and 5 in compliance with 35 IAC 218.407 (a)(1) (C), (D), and (E) and with 35 IAC 218.411(b) (1), (2), and(3). In this case:

(*i*) DB Hess must apply for and obtain necessary construction permits by March 30, 1998, or six months before retrofitting or replacing presses 4 and 5, whichever is earlier.

(*ii*) DB Hess must send monthly status reports, due the 15th day of each month, to the IEPA, covering the progress of the installation of the presses and control equipment and testing of the control equipment.

(K) On or before March 30, 1999, DB Hess shall cease operations at presses 3, 4, and 5 except for those presses for which it has obtained permits and installed controls, which have been tested and demonstrated to be in compliance with applicable rules.

(145) On September 16, 1998, the State of Illinois submitted amendments to Volatile Organic Material (VOM) rules affecting Illinois' ozone attainment area (the area of the State not including the Chicago and Metro-East ozone nonattainment areas). The amendments contain various deletions of obsolete provisions, changes of some word usage to comport Part 215 with other Illinois VOM regulations, and the addition of certain exemptions from VOM coating requirements.

(i) *Incorporation by reference*. Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources.

(A) Part 215: Organic Material Emission Standards and Limitations; Subpart A: General Provisions, 215.104 Definitions, 215.109 Monitoring for Negligibly-Reactive Compounds; Subpart F: Coating Operations, 215.204 Emission Limitations for Manufacturing Plants, 215.205 Alternative Emission Limitations, 215.206 Exemptions from Emission Limitations, 215.207 Compliance by Aggregation of Emissions Units, 215.211 Compliance Dates and Geographical Areas, 215.212 Compliance Plan, and 215.214 Roadmaster Emissions Limitations (Repealed); Subpart Z: Dry Cleaners, 215.601 Perchloroethylene Dry Cleaners (Repealed), 215.602 Exemptions (Repealed), 215.603 Leaks (Repealed), 215.604 Compliance Dates and Geographical areas (Repealed), 215.605 Compliance Plan (Repealed), and 215.606 Exception to Compliance Plan (Repealed), amended at 22 Ill. Reg. 11427, effective June 19, 1998.

(146) On February 13, 1998, the Illinois Environmental Protection Agency (IEPA) submitted a revision to the Illinois State Implementation Plan (SIP). This revision amends certain sections of the Clean-Fuel Fleet Program (CFFP) in the Chicago ozone nonattainment area to reflect that fleet owners and operators will have an additional year to meet the purchase requirements of the CFFP. The amendment changes the first date by which owners or operators of fleets must submit annual reports to IEPA from November 1, 1998 to November 1, 1999. In

addition, this revision corrects two credit values in the CFFP credit program.

(i) *Incorporation by reference.* (A) 35 Illinois Administrative Code 241; Sections 241.113, 241.130, 241.140, 241.Appendix B.Table A, 241.Appendix B.Table D adopted in R95–12 at 19 Ill. Reg. 13265, effective September 11, 1995; amended in R98–8, at 21 Ill. Reg. 15767, effective November 25, 1997.

(ii) *Other material.* (A) February 13, 1998, letter and attachments from the Illinois Environmental Protection Agency's Bureau of Air Chief to the United States Environmental Protection Agency's Regional Air and Radiation Division Director submitting Illinois' amendments to the Clean Fuel Fleet regulations as a revision to the ozone State Implementation Plan.

(147) On June 21, 1997, and December 9, 1998, the State of Illinois submitted regulations adopted by the Illinois Pollution Control Board and the Illinois Environmental Protection Agency and legislation adopted by the General Assembly and signed by the Governor related to Illinois' vehicle inspection and maintenance (I/M) program. The purpose of these submittals was to change the existing program from a basic I/M program to a fully enhanced I/M program. These changes modify the program in both the Chicago and Saint Louis (Illinois Portion) Ozone nonattainment areas.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile sources, Part 240 Mobile Sources, Except for Section 240. Table C. Adopted at 22 *Ill. Reg.* 13723, effective July 13, 1998.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile sources, Part 240 Mobile Sources, Section 240. Table C. Corrected at 22 *Ill. Reg.* 21120, effective July 13, 1998.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 276 Procedures to be Followed in the Performance of Inspections of Motor Vehicle Emissions. Amended at 22 *Ill. Reg.* 18867, effective September 28, 1998.

(ii) *Other materials.* (A) Transmittal letters dated June 21, 1997, and December 9, 1998.

(B) Public Act 90–475, effective August 17, 1997. This Act amends the Illinois Environmental Protection Act by changing Sections 3.32, 3.78, 21, and 22.15 and adding Sections 3.78a and 22.38.

(148) On October 13, 1998, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision affecting Volatile Organic Material controls at Central Can Company (CCC), located in Chicago, Illinois. The SIP revision allows CCC to apply can coating control rules to pail coating operations limited to certain conditions.

(i) *Incorporation by reference.* August 6, 1998, Opinion and Order of the Illinois Pollution Control Board, AS 94–18, effective July 1, 1991.

(149) On September 17, 1998, the Illinois Environmental Protection Agency submitted a site specific State Implementation Plan revision request for W.R. Grace and Company's facility, which manufactures container sealants, lubricant fluids, and concrete additives, and is located at 6050 West 51st Street in Chicago, Illinois (Cook County). This rule revision is contained in R98–16, the July 8, 1998, Opinion and Order of the Illinois Pollution Control Board, and consists of new Section 218.940(h), which exempts W.R. Grace's facility from the control requirements in 35 Illinois Administrative Code Part 218 Subpart QQ.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218 Organic Material Emission Standards and Limitations for the Chicago Area, Subpart QQ: Miscellaneous Formulation Manufacturing Processes, Section 218.940 Applicability, paragraph (h) which was amended in R98–16 at 22 Ill. Reg. 14282, effective July 16, 1998.

(150) On November 14, 1995, May 9, 1996, June 14, 1996, February 1, 1999, and May 19, 1999, the State of Illinois submitted State Implementation Plan (SIP) revision requests to meet commitments related to the conditional approval of Illinois' May 15, 1992, SIP submittal for the Lake Calumet (Southeast Chicago), McCook, and Granite City, Illinois, Particulate Matter (PM) nonattainment areas. The EPA is approving the SIP revision request as it applies to the Lake Calumet area. The SIP revision request corrects, for the Lake Calumet PM nonattainment area, all of the deficiencies of the May 15, 1992, submittal.

(*i*) *Incorporation by reference.*

(A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 212: Visible and Particulate Matter Emissions, Subpart A: General, Section 212.113; Subpart E: Particulate Matter from Fuel Combustion Sources, Section 212.210; Subpart K: Fugitive Particulate Matter, Sections 212.302, 212.309, and 212.316. Adopted at 20 Illinois Register 7605, effective May 22, 1996.

(B) Federally Enforceable State Operating Permit—Special: Application Number 98120091, Issued on May 14, 1999, to LTV Steel Company, Inc.

(151) On July 23, 1998, the State of Illinois submitted a State Implementation Plan (SIP) revision that included certain ''clean-up'' amendments to the State's permitting rules.

(*i*) *Incorporation by reference.*

Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board.

(A) Subchapter A: Permits and General Provisions, Part 201: Permits and General Provisions.

(1) Subpart D: Permit Applications and Review Process, Section 201.152 Contents of Application for Construction Permit, 201.153 Incomplete Applications (Repealed), Section 201.154 Signatures (Repealed), Section 201.155 Standards for Issuance (Repealed), Section 201.157 Contents of Application for Operating Permit, Section 201.158 Incomplete Applications, Section 201.159 Signatures, 201.160 Standards for Issuance, Section 201.162 Duration, Section 201.163 Joint Construction and Operating Permits, and Section 201.164 Design Criteria. Amended at 22 Ill. Reg. 11451, effective June 23, 1998.

(2) Subpart E: Special Provisions for Operating Permits for Certain Smaller Sources, Section 201.180 Applicability (Repealed), Section 201.181 Expiration and Renewal (Repealed), Section 201.187 Requirement for a Revised Permit (Repealed), Repealed at 22 Ill. Reg. 11451, effective June 23, 1998.

(3) Subpart F: CAAPP Permits, Section 201.207 Applicability, Amended at 22 Ill. Reg. 11451, effective June 23, 1998.

(152) On February 5, 1998, the Illinois Environmental Protection Agency submitted a requested revision to the Illinois State Implementation Plan. This revision provided additional exemptions from State of Illinois permit requirements codified by the State at Part 201 of Title 35 of the Illinois Administrative Code (35 IAC Part 201). The revision also added a definition of ''Feed Mill'' to Part 211 of 35 IAC (35 IAC Part 211).

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter C: Emission Standards and Limitations for Stationary Sources.

(A) Part 211 Definitions and General Provisions, Subpart B: Definitions, Section 211.2285 Feed Mill. Added at 21 Ill. Reg. 7856, effective June 17, 1997.

(B) Part 201 Permits and General Conditions, Subpart C: Prohibitions, Section 201.146 Exemptions from State Permit Requirements. Amended at 21 Ill. Reg. 7878, effective June 17, 1997.

(153) On July 9, 1999, the State of Illinois submitted a site-specific State Implementation Plan (SIP) revision affecting Volatile Organic Material control requirements at Sun Chemical Corporation (Sun) in Northlake, Illinois. The SIP revision changes requirements for 17 resin storage tanks operated by Sun. Specifically, the SIP revision exempts the 17 tanks from the bottom or submerged fill pipe requirements, provided that no odor nuisance exists at the Sun Northlake facility,

and that the vapor pressures of materials stored in the tanks remain less the 0.5 pounds per square inch absolute at 70 degrees Fahrenheit.

(*i*) *Incorporation by reference.*

May 20, 1999, Opinion and Order of the Illinois Pollution Control Board, AS 99–4, effective May 20, 1999.

(155) On May 21, 1999, the Illinois Environmental Protection Agency submitted a temporary, site-specific revision to the State Implementation Plan (SIP) for sulfur dioxide (SO_2) for the Central Illinois Light Company's E.D. Edwards Generating Station in Peoria County, Illinois (CILCO Edwards). The SIP revision took the form of an April 15, 1999, Opinion and Order of the Illinois Pollution Control Board (PCB 99–80, Variance-Air). In this Opinion and Order, the IPCB granted CILCO Edwards a variance from 35 Illinois Administrative Code 214.141, and provided for a relaxation in the fuel quality limit for one of the facility's three boilers, but added an overall fuel quality limit and retained an overall SO_2 emissions cap for the three CILCO Edwards boilers. The variance will expire on February 28, 2002, unless CILCO applies to Illinois for a permanent SIP revision.

(i) *Incorporation by reference.* An April 15, 1999, Opinion and Order of the Illinois Pollution Control Board in PCB 99–80 (Variance-Air), granting a variance from 35 IAC 214.141 for Boiler No. 2 at the Central Illinois Light Company's E.D. Edwards Generating Station near Peoria, Illinois. The variance expires on February 28, 2002, unless CILCO applies to Illinois for a permanent SIP revision. If CILCO applies for a permanent SIP revision, and the IPCB allows CILCO Edwards' variance to continue unamended through July 31, 2003, as stated in the Opinion and Order, then federal approval of the variance will continue until EPA approves alternate SO_2 limits for CILCO Edwards, or until July 31, 2003, whichever is earlier.

(156) On May 8, 2001, the State submitted rules to control Oxides of Nitrogen emissions from electric generating units.

(*i*) *Incorporation by reference.* Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; Part 217 Nitrogen Oxides Emissions; Subpart V: Electric Power Generation. Adopted at 25 *Ill. Reg.* 5914, effective April 17, 2001.

(157) On May 8, 2001, the Illinois Environmental Protection Agency submitted revisions to 35 Ill. Adm. Code 217, Subpart W: NO[x] Trading Program for Electrical Generating Units with a request that these rules be incorporated into the Illinois State Implementation Plan. On June 11, 2001, the Illinois EPA submitted Section 9.9(f) of the Illinois Environmental Protection Act as revised by Public Act 92–012 (formerly House Bill 1599) which was approved by both Houses of the Illinois General Assembly on June 7, 2001, approved by the Governor on June 22, 2001, and became effective on July 1, 2001. Section 9.9(f) requires a May 31, 2004 final compliance date for 35 Ill. Adm. Code 215, Subparts T, U and W. This compliance date replaces the compliance date contained in Section 217.756(d)(3).

(i) *Incorporation by reference.* (A) Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217 Nitrogen Oxides Emissions, Subpart W: NO[x] Trading Program for Electrical Generating Units except for 217.756(d)(3) which has been superseded by Section 9.9(f) of the Illinois Environmental Protection Act. Added at 25 Ill. Reg. 128, January 25, 2001, effective December 26, 2000.

(B) Section 9.9(f) of the Illinois Environmental Protection Act. Adopted by both Houses of the Illinois General Assembly as part of Public Act 92–0012 (previously House Bill 1599) on May 31, 2001, approved by the Governor of Illinois on June 22, 2001, effective July 1, 2001.

(158) On December 16, 1997, Bharat Mathur, Chief, Bureau of Air, Illinois Environmental Protection Agency, submitted rules for a cap and trade program regulating volatile organic compound emissions in the Chicago area. By letter dated August 23, 2001, the state requested that USEPA defer rulemaking on section 205.150(e), which

exempts new and modified sources obtaining offsets under the trading program from the requirements for traditional, full year offsets.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter b, Part 205, entitled Emissions Reduction Market System, adopted November 20, 1997, effective November 25, 1997, except section 205.150(e).

(159) On April 9, 2001, David Kolaz, Chief, Bureau of Air, Illinois Environmental Protection Agency, submitted rules regulating NO_X emissions from cement kilns. On May 1, 2001, Mr. Kolaz submitted rules regulating NO_X emissions from industrial boilers and turbines and requesting two minor revisions to the Illinois NO_X emissions budget. On June 18, 2001, Mr. Kolaz submitted a demonstration that Illinois' regulations were sufficient to assure that NO_X emissions in Illinois would be reduced to the level budgeted for the state by USEPA. On September 20, 2001, Mr. Kolaz sent a letter clarifying that Illinois' rules for industrial boilers and turbines require compliance on a unit-by-unit basis.

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 211, Definitions, sections 211.955, 211.960, 211.1120, 211.3483, 211.3485, 211.3487, 211.3780, 211.5015, and 211.5020, published at 25 Ill. Reg. 4582, effective March 15, 2001.

(B) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart A, Section 217.104, Incorporations by Reference, published at 25 Ill. Reg. 4597, effective March 15, 2001.

(C) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart T, Cement Kilns, sections 217.400, 217.400, 217.402, 217.404, 217.406, 217.408, and 217.410, published at 25 Ill. Reg. 4597, effective March 15, 2001.

(D) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 211, Sections 211.4067 and 211.6130, published at 25 Ill. Reg. 5900, effective April 17, 2001.

(E) Illinois Administrative Code, Title 35, Subtitle B, Chapter I, subchapter c, Part 217, Subpart U, NO_X Control and Trading Program for Specified NO_X Generating Units, sections 217.450, 217.452, 217.454, 217.456, 217.458, 217.460, 217.462, 217.464, 217.466, 217.468, 217.470, 217.472, 217.474, 217.476, 217.478, 217.480 and 217.482, published at 25 Ill. Reg. 5914, effective April 17, 2001.

(ii) *Additional material.* (A) Letter dated June 18, 2001, from David Kolaz, Illinois Environmental Protection Agency, to Cheryl Newton, United States Environmental Protection Agency.

(B) Letter dated September 20, 2001, from David Kolaz, Illinois Environmental Protection Agency, to Bharat Mathur, United States Environmental Protection Agency.

(160) On March 21, 2001, Illinois submitted revisions to volatile organic compound rules for Formel Industries, Incorporated in Cook County, Illinois. The revisions consist of a January 18, 2001 Opinion and Order of the Illinois Pollution Control Board in the Matter of: Petition of Formel Industries, Inc. for an Adjusted Standard from 35 ILL. ADM. CODE 218.401(a),(b) and (c): AS 00–13 (Adjusted Standard Air). This Opinion and Order grants Formel Industries, Incorporated an adjusted standard to the Flexographic Printing Rule. The adjusted standard requirements include participation in a market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* Volatile organic compound emissions limits contained in a January 18, 2001 Opinion and Order of the Illinois Pollution Control Board in the Matter of: Petition of Formel Industries, Inc. for an Adjusted Standard from 35 ILL. ADM. CODE 218.401(a), (b) and (c): AS 00–13 (Adjusted Standard-Air). This Opinion and Order was adopted by the Illinois Pollution Control Board on January 18, 2001. It became effective under State law on January 18, 2001.

(161) On March 28, 2001, Illinois submitted revisions to volatile organic compound rules for Bema Film Systems, Incorporated in DuPage County, Illinois. The revisions consist of AS 00–11, an adjusted standard to the Flexographic Printing Rule, 35 IAC 218.401 (a), (b), and (c). The adjusted standard

requirements include reducing the allotment baseline for the Illinois market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* AS 00–11, an adjusted standard from the Volatile Organic Compound emission limits for Bema Film Systems, Inc. contained in Illinois Administrative Code Title 35: Environmental Regulations for the State of Illinois, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218.401 (a), (b), and (c). Effective on January 18, 2001.

(ii) *Other material.* (A) November 14, 2001, letter from Dennis A. Lawler, Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency to Jay Bortzer, Chief, Regulation Development Section, Air and Radiation Division, USEPA, Region 5, indicating that the effective date of the adjusted standard for Bema Film Systems, Inc. AS 00–11, is January 18, 2001, the date that AS 00–11 was adopted by the Illinois Pollution Control Board.

(162) On March 28, 2001, Illinois submitted revisions to volatile organic compound rules for Vonco Products, Incorporated in Lake County, Illinois. The revisions consist of AS 00–12, an adjusted standard to the Flexographic Printing Rule, 35 IAC 218.401 (a), (b), and (c). The adjusted standard requirements include reducing the allotment baseline for the Illinois market-based emissions trading system, maintaining daily records, conducting trials of compliant inks, and reviewing alternate control technologies.

(i) *Incorporation by reference.* AS 00–12, an adjusted standard from the Volatile Organic Compound emission limits applicable to Vonco Products, Inc. contained in Illinois Administrative Code Title 35: Environmental Regulations for the State of Illinois, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218.401 (a), (b), and (c). Effective on January 18, 2001.

(ii) *Other material.* (A) November 14, 2001, letter from Dennis A. Lawler, Manager, Division of Air Pollution Control, Illinois Environmental Protection Agency to Jay Bortzer, Chief, Regulation Development Section, Air and Radiation Division, USEPA, Region 5, indicating that the effective date of the adjusted standard for Vonco Products, Inc. AS 00–12, is January 18, 2001, the date that AS 00–12 was adopted by the Illinois Pollution Control Board.

(163) [Reserved]

(164) On October 9, 2001, the State of Illinois submitted new rules regarding emission tests.

(i) *Incorporation by reference.* (A) New rules of 35 Ill. Admin. Code Part 283, including sections 283.110, 283.120, 283.130, 283.210, 283.220, 283.230, 283.240, and 283.250, effective September 11, 2000, published in the Illinois Register at 24 Ill. Reg. 14428.

(B) Revised section 283.120 of 35 Ill. Admin. Code, correcting two typographical errors, effective September 11, 2000, published in the Illinois Register at 25 Ill. Reg. 9657.

(165) On April 8, 1999, the Illinois Environmental Protection Agency submitted revisions to particulate matter control requirements for rural grain elevators in Illinois. The revised requirements exempt rural grain elevators from certain particulate matter control requirements.

(i) *Incorporation by reference.* Revised grain elevator provisions in Section 9(f) of the Illinois Environmental Protection Act. Adopted by both Houses of the Illinois General Assembly as Public Act 89–491 (previously Senate Bill 1633) on April 25, 1996, approved by the Governor of Illinois on May 23, 1996, effective June 21, 1996.

(166) On November 6, 2001, the State of Illinois submitted revisions to its emission reporting rules, restructuring these rules and adding hazardous air pollutant emission reporting for sources in Illinois' Emission Reduction Market System.

(i) *Incorporation by reference.* (A) Revised rules of 35 Ill. Admin. Code Part 254, including new or amended sections 254.101, 254.102, 254.103, 254.120, 254.132, 254.134, 254.135, 254.136, 254.137, 254.138, 254.203, 254.204, 254.303, 254.306, and 254.501, effective July 17, 2001, retention of section 254.133, and the repeal of

other previously approved sections of 35 Ill. Admin. Code 254. Amended or adopted at 25 Ill. Reg. 9856. Effective July 17, 2001.

(167) On August 31, 1998, Illinois submitted revisions to its major stationary sources construction and modification rules (NSR Rules) as a State Implementation Plan revision request. These revisions apply only in areas in Illinois that have been designated as being in serious or severe nonattainment with the national ambient air quality standards for ozone.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter A: Permits and General Provisions, Part 203 Major Stationary Sources Construction and Modification, Subpart B: Major Stationary Sources in Nonattainment Areas, Section 203.206 Major Stationary Source and Section 203.207 Major Modification of a Source; and, Subpart C: Requirements for Major Stationary Sources in Nonattainment Areas, Section 203.301 Lowest Achievable Emissions Rate. Amended in R98–10 at 22 Ill. Reg. 5674, effective March 10, 1998.

(168) On October 31, 2003, the Illinois Environmental Protection Agency submitted revisions to the Illinois State Implementation Plan for ozone. The submittal revises the definition for volatile organic material (VOM) or volatile organic compound (VOC) contained in 35 Ill. Adm. Code 211.7150 to incorporate an exemption for perchloroethylene (tetrachloroethylene); 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC–225ca); 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC–225cb); decafluoropentane (HFC 43–10mee); difluoromethane (HFC–32); ethylfluoride (HFC–161); 1,1,1,3,3,3-hexafluoropropane (HFC–236fa); 1,1,2,2,3-pentafluoropropane (HFC–245ca); 1,1,2,3,3-pentafluoropropane (HFC–245ea); 1,1,1,2,3-pentafluoropropane (HFC–245eb); 1,1,1,3,3-pentafluoropropane (HFC–245fa); 1,1,1,2,3,3-hexafluoropropane (HFC–236ea); 1,1,1,3,3-pentafluorobutane (HFC–365mfc); chlorofluoromethane (HCFC–31); 1,2-dichloro-1,1,2-trifluoroethane (HCFC–123a); 1-chloro-1-fluoroethane (HCFC–151a); 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxybutane ($C_4F_9OCH_3$); 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ($(CF_3)_2CFCF_2OCH_3$); 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane ($C_4F_9OC_2H_5$); 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ($(CF_3)_2CFCF_2OC_2H_5$); and methyl acetate from the definition of VOM or VOC and thereby, from regulation as ozone precursors.

(i) *Incorporation by reference.* (A) Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compound (VOC), amended at 22 Illinois Register 11405, effective June 22, 1998.

(169) On June 20, 2003, Illinois submitted an Adjusted Standard for Ford Motor Company's Chicago Assembly Plant. This Adjusted Standard from 35 Ill.Adm. Code 218.986 replaces those requirements with the control requirements in the Illinois Pollution Control Board's November 21, 2002, Order.

(i) *Incorporation by reference.* (A) The Illinois Pollution Control Board's November 21, 2002, Opinion and Order which granted the Ford Motor Company's Chicago Assembly Plant an adjusted standard (AS 02–3) from 35 Ill. ADM. Code 218.986. The requirements in 35 Ill. ADM. Code 218.986 have been replaced by the requirements in the Illinois Pollution Control Board's November 21, 2002, Order.

(170) On May 28, 2003, Illinois submitted an amendment to its leather coating rules for the Horween Leather Company's Chicago leather manufacturing facility. This adds a test method in Section 218.112(a)(26) and a new Section 35 Ill. Adm. Code 218.929. These amendments were incorporated in the Illinois Pollution Control Board's February 20, 2003, Final Order R02–20.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control

Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 218 Organic Material Emission Standards and Limitations for the Chicago Area.

(A) Subpart A: General Provisions, Section 218.112 Incorporations by Reference, (a) American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428–9555, 26) ASTM D2099–00. Amended at 27 Ill. Reg. 7283, effective April 8, 2003.

(B) Subpart PP: Miscellaneous Fabricated Product Manufacturing Processes, Section 218.929 Cementable and Dress or Performance Shoe Leather. Added at 27 Ill. Reg. 7283, effective April 8, 2003.

(171) On July 29, 2003, the Illinois Environmental Protection Agency submitted a site-specific revision to the State Implementation Plan (SIP) for sulfur dioxide (SO_2) for the Central Illinois Light Company's E.D. Edwards Generating Station, now known as AmerenEnergy Resources Generating Company, Edwards Power Plant, in Bartonville, Peoria County, Illinois.

(i) Incorporation by reference.

Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Stationary Sources, Part 214: Sulfur Limitations, Subpart X: Utilities Section 214.561 E.D. Edwards Electric Generating Station which was amended at 27 *Illinois Register* 12101, effective July 11, 2003.

(172) On September 19, 2003, Illinois submitted a site-specific revision to the State Implementation Plan which relaxes the volatile organic material (VOM) content limit for the coating operations at Louis Berkman Company, d/b/a/ the Swenson Spreader Company's Lindenwood, Ogle County, Illinois facility from 3.5 pounds VOM per gallon to a monthly average of 4.75 pounds VOM per gallon until May 7, 2008.

(i) *Incorporation by reference.* Order contained in a May 7, 1998, Opinion and Order of the Illinois Pollution Control Board, AS 97–5, effective May 7, 1998.

(173) On March 11, 2004, Illinois submitted an Adjusted Standard for Argonne National Laboratory's degreasing operations. Pursuant to this Adjusted Standard from 35 Ill. Adm. Code 218.182, the applicable vapor pressure and other associated requirements of 35 Ill. Code 218.182 do not apply to cold cleaning involving the preparation of sample materials and associated apparatus used for research and development testing and analysis at Argonne. These revised requirements were adopted in the Illinois Pollution Control Board's December 18, 2003, Adjusted Standard AS 03–4.

(i) *Incorporation by reference.* (A) The Illinois Pollution Control Board's December 18, 2003, Opinion and Order which granted the Argonne National Laboratory's degreasing operations an Adjusted Standard (AS 03–4) from 35 Ill. Code 218.182 for its cold cleaning involving the preparation of sample materials and associated apparatus used for research and development testing and analysis at Argonne.

(174) [Reserved]

(175) On January 4, 2006, Illinois submitted a site-specific State Implementation Plan revision for the Ford Motor Company (Ford) Chicago Assembly Plant. The revision allows Ford to discontinue use of its Stage II vapor recovery system and requires instead that Ford comply with federal onboard refueling vapor recovery regulations and other conditions.

(i) Incorporation by reference.

(A) September 1, 2005, Opinion and Order of the Illinois Pollution Control Board, AS 05–5, effective September 1, 2005.

(176) On June 14, 2004, Illinois submitted revisions to volatile organic compound rules for Formel Industries, Incorporated in Cook County, Illinois. The revisions consist of withdrawing an adjusted standard to the Flexographic Printing Rule. Formel Industries has installed a control device and is complying with the Flexographic Printing Rule.

(i) *Incorporation by reference.* An April 15, 2004, Supplemental Opinion and Order of the Illinois Pollution Control Board AS 00–13, terminating Formel's previously issued (January 18, 2001) adjusted standard from the Flexographic Printing Rule, effective April 15, 2004.

(177) On May 31, 2006, the Illinois Environmental Protection Agency submitted a requested revision to the Illinois State Implementation Plan. This revision provides additional exemptions from State of Illinois permit requirements codified by the State at Part 201 of Title 35 of the Illinois Administrative Code (35 IAC Part 201).

(i) Incorporation by reference.

Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions, Part 201 Permits and General Provisions, Subpart C: Prohibitions, Section 201.146 Exemptions from State Permit Requirements paragraphs (hhh), (iii), (jjj), (kkk), and (lll). Amended at 30 Ill. Reg. 4901, effective March 3, 2006.

(178) On September 14, 2007, the Illinois Environmental Protection Agency submitted rules and related material to address requirements under the Clean Air Interstate Rule. These rules mandate participation of electric generating units in EPA-run trading programs for annual emissions of sulfur dioxide, annual emissions of nitrogen oxides, and ozone season emissions of nitrogen oxides. These rules provide a methodology for allocating allowances to subject sources and require these sources to hold sufficient allowances to accommodate their emissions and to meet various monitoring, recordkeeping, and reporting requirements. EPA is approving the submitted provisions of Subparts A, C, D, and E of Part 225 of Title 35 of Illinois Administrative Code; EPA is deferring action on Subpart F.

(i) Incorporation by reference.

(A) Title 35 of the Illinois Administrative Code: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Part 225: Control of Emissions from Large Combustion Sources, effective August 31, 2007, including Subpart A: General Provisions, Subpart C: Clean Air Act Interstate Rule (CAIR) SO_2 Trading Program, Subpart D: CAIR NO_X Annual Trading Program, and Subpart E: CAIR NO_X Ozone Season Trading Program.

(179) On October 31, 2003, the Illinois Environmental Protection Agency submitted rules and related materials to address site-specific requirements for Cromwell-Phoenix, Incorporated, located in Alsip, Illinois. These rules establish an adjusted standard for the corrosion inhibiting packaging production facility of Cromwell-Phoenix, Incorporated located at this source site. These rules provide a site-specific adjusted standard for this source facility for volume 35 of the Illinois Administrative Code subpart F section 218.204(c). The adjusted standard gives the corrosion inhibiting paper coating lines at the Alsip facility an adjusted volatile organic material (volatile organic compounds) content limit for paper coatings, and places an annual limit on the volatile organic material emissions from the Alsip facility as a whole. The adjusted standard also establishes source administration and reporting requirements for Cromwell-Phoenix, Incorporated Alsip facility. EPA is approving this site-specific adjusted standard as a revision of the Illinois state implementation plan.

(i) Incorporation by reference.

(A) September 18, 2003, Opinion and Order of the Illinois Pollution Control Board, AS 03–5, effective September 18, 2003.

(180) On January 10, 2007, Illinois submitted revisions to its rules for the Emission Reduction Market System. These revisions assure that sources in the Chicago area with potential emissions of VOC between 25 and 100 tons per year will remain subject to the program, irrespective of changes in the area's ozone nonattainment classification or designation and any associated changes in whether such sources are defined to be major sources. EPA is again deferring action on section 205.150(e).

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter b: Alternative Reduction Program, Part 205 Emissions Reduction Market System, Sections:

205.120 Abbreviations and Acronyms
205.130 Definitions
205.150 Emissions Management Periods (except for 205.150(e))
205.200 Participating Source
205.205 Exempt Source
205.210 New Participating Source

205.220 Insignificant Emission Units
205.300 Seasonal Emissions Component of the Annual Emissions Report
205.310 ERMS Applications
205.315 CAAPP Permits for ERMS Sources
205.316 Federally Enforceable State Operating Permits for ERMS Sources
205.318 Certification for Exempt CAAPP Sources
205.320 Baseline Emissions
205.330 Emissions Determination Methods
205.335 Sampling, Testing, Monitoring and Recordkeeping Practices
205.337 Changes in Emissions Determination Methods and Sampling, Testing, Monitoring and Recordkeeping Practices
205.400 Seasonal Emissions Allotment
205.405 Exclusions From Further Reductions
205.410 Participating Source Shutdowns
205.500 Emissions Reduction Generator
205.510 Inter-Sector Transaction
205.610 Application for Transaction Account
205.700 Compliance Accounting
205.730 Excursion Reporting
205.750 Emergency Conditions
205.760 Market System Review Procedures

(181) On August 17, 2005 and January 29, 2008, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as amended by 69 FR 69298. The compounds 1,1,1,2,2,3,3-heptafluoro-3-methoxypropane (n-$C_3F_7OCH_3$), 3-ethoxy 1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane (HFE-7500), 1,1,1,2,3,3,3-heptafluoropropane (HFC-227ea), and methyl formate were added to the list of negligibly reactive compounds excluded from the definition of VOM in 35 IAC 211.7150(a). Tertiary-butyl acetate is also listed in 35 IAC 211.7150(a) with a notation that it must also meet the requirements of 35 IAC 211.7150(e), which state that tertiary-butyl acetate is considered a VOC for recordkeeping, emissions reporting, modeling, and inventory requirements, but is not considered a VOC for emission limits or content requirements.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsections 211.7150(a) and 211.7150(e). Effective January 16, 2008.

(182) On January 29, 2008, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as amended by 72 FR 2193. The compound 1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethyl-pentane (HFE–7300) was added to the list of negligibly reactive compounds excluded from the definition of VOM in 35 IAC 211.7150(a).

(i) Incorporation by reference.

(A) Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). Effective January 16, 2008.

(183) On January 24, 2008, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan for the packaging production facility of CP–D Acquisition Company, LLC. The revision changes the source name from Cromwell-Phoenix, Incorporated, to CP–D Acquisition Company, LLC.

(i) Incorporation by reference.

(A) November 20, 2003, Supplemental Opinion and Order of the Illinois Pollution Control Board, AS 03–05, effective November 20, 2003.

(184) On October 23, 2007, the Illinois Environmental Protection Agency submitted revisions to its State implementation plan for the Oxides of Nitrogen (NO_X) SIP Call Phase II. The State has submitted revisions to 35 Illinois Administrative Code (Ill. Adm. Code) Parts 211 and 217. The rules pertain to definitions and general provisions, and control of Nitrogen Oxides (NO_X), respectively. The rules satisfy the requirements of EPA's NO_X SIP Call Phase II Rule (the Phase II Rule).

(i) *Incorporation by reference.* (A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Sections: 211.740 Brakehorsepower; 211.1740 Diesel Engine; 211.1920 Emergency or Standby Unit; 211.3300 Lean-burn Engine; and 211.5640 Rich-burn Engine; effective September 25, 2007. (B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board,

Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217: Nitrogen Dioxide Emissions, Subpart A: General Provisions, Sections: 217.101 Measurement Methods; 217.102 Abbreviation and Units; Subpart Q: Stationary Reciprocating Internal Combustion Engines and Turbines, Sections 217.386 Applicability; 217.388 Control and Maintenance Requirements; 217.390 Emissions Averaging Plan; 217.392 Compliance; 217.394 Testing and Monitoring; 217.396 Recordkeeping and Reporting; and 217 Appendix G: Existing Reciprocating Internal Combustion Engines Affected by the NO_X SIP Call; *effective September 25, 2007.*

(ii) *Additional material.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 217: Nitrogen Dioxide Emissions, Subpart A: General Provisions, Section 217.104 Incorporation by Reference; effective September 25, 2007.

(185) On December 7, 2009, Illinois submitted a rule for the sunset of the provisions of 35 IAC 217 Subpart W, regulating electric generating unit participation in the NO_X Budget Trading Program, since these provisions have been superseded by provisions established pursuant to the Clean Air Interstate Rule.

(i) *Incorporation by reference.* The Illinois rule at 35 IAC 217.751, entitled ''Sunset Provisions,'' submitted on December 7, 2009, effective on November 2, 2009, is incorporated by reference.

(186) On July 17, 2009, Illinois submitted amendments to its pharmaceutical manufacturing rules for approval into its state implementation plan. These amendments consist of a site-specific rulemaking for certain of Abbott Laboratories' (Abbott) tunnel dryers and fluid bed dryers.

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart T: Pharmaceutical Manufacturing, Section: 218.480 Applicability, effective August 26, 2008.

(ii) Additional material.

(A) Letter from Laurel L. Kroack, Illinois Environmental Protection Agency, to Cheryl Newton, EPA, dated May 12, 2010, with attachments, that establishes how compliance with Abbott's 20.6 tons VOC per year limit is determined as well as Abbott's recordkeeping requirements.

(187) On October 25, 2010, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1), as amended by 74 FR 3437. The compounds propylene carbonate and dimethyl were added to the list of negligibly reactive compounds excluded from the definition of VOC in 35 IAC 211.7150(a).

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection, Part 211: Definitions and General Provisions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). Effective January 11, 2010.

(188) On November 8, 2010, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP allows an adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter, for Royal Fiberglass Pools, Inc. manufacturing facility located in Dix, Illinois. The adjusted standard is that 35 Ill. Adm. Code 217.301 does not apply to VOM emissions from Royal's Dix, Illinois facility. The facility is subject to emission limit requirements set forth in the MACT under 40 CFR 63 subpart WWWW finalized in 68 FR 19402, April 21, 2003.

(i) *Incorporation by reference.* (A) February 18, 2010, Opinion and Order of the Illinois Pollution Control Board, AS–09–04, effective February 18, 2010.

(189) On July 29, 2010, September 16, 2011 and September 29, 2011 Illinois submitted VOM RACT rules for the Chicago and Metro-East St. Louis 8-hour ozone nonattainment areas. These rules are consistent with the Control Technique Guideline documents issued by EPA in 2006, 2007 and 2008 and satisfy the RACT requirements of the Act.

On February 28, 2011, Illinois EPA submitted a confirmation that the sewage treatment plant exemption in Subpart TT of Parts 218 and 219 does not apply to industrial wastewater. This clarification clearly establishes that VOM emissions from major non-CTG industrial wastewater operations are regulated by Subpart TT.

(i) *Incorporation by reference.* The following sections of Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, are incorporated by reference:

(A) Part 211: Definitions and General Provisions, Sections 211.1000, 211.1745, 211.1878, 211.1885, 211.2359, 211.2368, 211.2615, 211.2830, 211.2840, 211.2965, 211.3215, 211.3305, 211.3555, 211.3705, 211.3707, 211.4065, 211.5335, 211.5535, 211.5585, 211.5860, 211.5875, 211.5885, 211.6405, 211.6425, 211.6535, 211.7290; effective June 25, 2010.

(B) Part 211: Definitions and General Provisions, Sections 211.101, 211.102, 211.200, 211.233, 211.235, 211.260, 211.481, 211.492, 211.540, 211.715, 211.735, 211.820, 211.825, 211.880, 211.954, 211.965, 211.1128, 211.1455, 211.1560, 211.1565, 211.1655, 211.1700, 211.1872, 211.1876, 211.1877, 211.1880, 211.1882, 211.1883, 211.2040, 211.2055, 211.2210, 211.2310, 211.2320, 211.2360, 211.2369, 211.2415, 211.2525, 211.2622, 211.2825, 211.2955, 211.2956, 211.2958, 211.2960, 211.2980, 211.3095, 211.3120, 211.3240, 211.3505, 211.3665, 211.3760, 211.3775, 211.3785, 211.3820, 211.3925, 211.3961, 211.3966, 211.3967, 211.3968, 211.3969, 211.3975, 211.4052, 211.4080, 211.4220, 211.4285, 211.4455, 211.4540, 211.4735, 211.4760, 211.4765, 211.4768, 211.4769, 211.4895, 211.4900, 211.5012, 211.5061, 211.5062, 211.5075, 211.5090, 211.5400, 211.5520, 211.5550, 211.5800, 211.5890, 211.5985, 211.5987, 211.6012, 211.6015, 211.6017, 211.6020, 211.6063, 211.6065, 211.6400, 211.6427, 211.6460, 211.6585, 211.6640, 211.6670, 211.6690, 211.6720, 211.6740, 211.6780, 211.6825, 211.6885, 211.7220, 211.7240; effective September 14, 2010.

(C) Part 211: Definitions and General Provisions, Sections 211.493, 211.2200, 211.2358, 211.2800, 211.3985, 211.4460, 211.5140, 211.6587, 211.6635; effective July 27, 2011.

(D) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations, Section 218.218; effective March 23, 2010.

(E) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart E: Solvent Cleaning, Section 218.181, Subpart H: Printing and Publishing, Sections 218.403, 218.405, 218.406, 218.407, 218.408, 218.410, 218.412, 218.413, 218.416; effective June 25, 2010.

(F) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Sections 218.106, 218.112, Subpart F: Coating Operations, Sections 218.205, 218.208, 218.210, 218.212, 218.219, Subpart II: Fiberglass Boat Manufacturing Materials, Section 218.890, Subpart JJ: Miscellaneous Industrial Adhesives, Section 218.900; effective September 14, 2010.

(G) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.105, Subpart E: Solvent Cleaning, Section 218.187, Subpart F: Coating Operations, Sections 218.204, 218.207, 218.211, 218.217, Subpart H: Printing and Publishing, Sections 218.401, 218.402, 218.404, 218.409, 218.411, 218.415, 218.417, Subpart II: Fiberglass Boat Manufacturing Materials, Sections 218.891, 218.892, 218.894, Subpart JJ: Miscellaneous Industrial Adhesives, Sections 218.901, 218.902, 218.903, 218.904; effective July 27, 2011.

(H) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations, Section 219.218; effective March 23, 2010.

(I) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart E: Solvent Cleaning, Section 219.181, Subpart H: Printing and Publishing, Sections 219.402, 219.403, 219.405, 219.406, 219.407, 219.408, 219.410, 219.412, 219.413, 219.416; effective June 25, 2010.

(J) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Sections 219.106, 219.112, Subpart F: Coating Operations, Sections 219.205, 219.208, 219.210, 219.212, 219.219, Subpart II: Fiberglass Boat

Manufacturing Materials, Section 219.890, Subpart JJ: Miscellaneous Industrial Adhesives, Section 219.900; effective September 14, 2010.

(K) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Section 219.105, Subpart E: Solvent Cleaning, Section 219.187, Subpart F: Coating Operations, Sections 219.204, 219.207, 219.211, 219.217, Subpart H: Printing and Publishing, Sections 219.401, 219.404, 219.409, 219.411, 219.415, 219.417, Subpart II: Fiberglass Boat Manufacturing Materials, Sections 219.891, 219.892, 219.894, Subpart JJ: Miscellaneous Industrial Adhesives, Sections 219.901, 219.902, 219.903, 219.904; effective July 27, 2011.

(ii) *Additional material.* On February 28, 2011, Illinois EPA submitted an email confirmation that the sewage treatment plant exemption in Subpart TT of Parts 218 and 219 does not apply to industrial wastewater.

(190) On June 10, 2011, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP allows an adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter, for Leisure Properties LLC/D/B/A Crownline Boats manufacturing facility located in West Frankfort, Illinois. The adjusted standard is that the facility takes an alternative standard of the emission limit requirements set forth in the MACT under 40 CFR part 63 subpart VVVV as published in 40 CFR Part 63 (§ 63.1200 to end) revised as of July 1, 2002.

(i) Incorporation by reference.

(A) July 22, 2004, Opinion and Order of the Illinois Pollution Control Board, AS–04–01, (identified in error as July 22, 2002 in the document heading), effective July 22, 2004.

(ii) Additional material.

(A) Letter from Laurel L. Kroack, Illinois Environmental Protection Agency, to Cheryl Newton, EPA, dated September 2, 2011, identifying that due to an ownership change to Crownline Boats, the Board transferred the adjusted standard to Leisure Properties LLC D/B/A Crownline Boats, which is the successor to Crownline Boats, by Board order AS04–1, effective October 7, 2010.

(191) On September 14, 2012, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code Part 223, which adds new consumer product categories and VOC limits for these products in Subpart B, and amends Subpart C to clarify applicability. 35 IAC Part 223 limits the amount of volatile organic compounds from consumer products and architectural and industrial maintenance coatings.

(i) Incorporation by reference.

(A) Illinois Administrative Code; Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter c: Emission Standards and Limitation for Stationary Sources; Part 223: Standards and Limitations for Organic material Emissions for Area Sources, effective May 4, 2012.

(B) Reserved.

(192) On June 24, 2011, Laurel Kroack, Illinois Environmental Protection Agency, submitted Illinois' regional haze plan to Cheryl Newton, Region 5, EPA. This plan includes a long-term strategy with emission limits for mandating emission reductions equivalent to the reductions from implementing best available retrofit technology and with emission reductions to provide Illinois' contribution toward achievement of reasonable progress goals at Class I areas affected by Illinois. The plan specifically includes regulations establishing Multi-Pollutant Standards and Combined Pollutant Standards, along with letters from the affected electric utilities establishing the applicability and enforceability of the option that includes sulfur dioxide and nitrogen oxide emission limits. The plan also includes permits establishing sulfur dioxide and nitrogen oxide emission limits for three additional electric generating plants and two consent decrees establishing sulfur dioxide and nitrogen oxide emission limits for two refineries.

(i) Incorporation by reference.

(A) The following sections of Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control

Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 225, Control of Emissions from Large Combustion Sources, published at 33 IL Reg 10427, effective June 26, 2009, are incorporated by reference:

(*1*) Subpart B: Control Of Mercury Emissions From Coal-Fired Electric Generating Units, Section 225.233 Multi-Pollutant Standards (MPS), only subsections (a), (b), (e), and (g), Section 225.291 Combined Pollutant Standard: Purpose, Section 225.292 Applicability of the Combined Pollutant Standard, Section 225.293 Combined Pollutant Standard: Notice of Intent, Section 225.295 Combined Pollutant Standard: Emissions standards for NO_X and SO_2, and Section 225.296 Combined Pollutant Standard: Control Technology Requirements for NO_X, SO_2, and PM Emissions, except for 225.296(d).

(*2*) Section 225.Appendix A Specified EGUs for Purposes of the CPS (Midwest Generation's Coal-Fired Boilers as of July 1, 2006).

(B) Joint Construction and Operating Permit: Application Number 09090046, Issued on June 23, 2011, to City Water, Light & Power, City of Springfield.

(C) Joint Construction and Operating Permit: Application Number 09050022, Issued on June 24, 2011, to Kincaid Generation, LLC.

(ii) Additional material.

(A) Letter from Guy Gorney, Midwest Generation to Dave Bloomberg, Illinois EPA, dated December 27, 2007, choosing to be subject to provisions of the Multi-Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(B) Letter from R. Alan Kelley, Ameren, to Jim Ross, Illinois EPA, dated December 27, 2007, choosing to be subject to provisions of the Combined Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(C) Letter from Keith A. McFarland, Dynegy, to Raymond Pilapil, Illinois EPA, dated November 26, 2007, choosing to be subject to provisions of the Combined Pollutant Standards that include emission limits for sulfur dioxide and nitrogen oxides.

(193) On June 20, 2012, Illinois submitted an Adjusted Standard for the Greif Packaging, LLC facility located at 5 S 220 Frontenac Road in Naperville, DuPage County. This adjustment to the Standard at 35 Ill. Adm. Code 218.986(a) for Greif's fiber drum manufacturing facility replaces the VOM capture and control requirements in 35 Ill. Adm. Code 218.986(a) with the control requirements in the Illinois Pollution Control Board's April 5, 2012 Order.

(i) Incorporation by reference.

(A) April 5, 2012 Opinion and Order of the Illinois Pollution Control Board (AS 2011–01), effective April 5, 2012.

(194) On November 14, 2011, the Illinois Environmental Protection Agency (Illinois EPA) submitted amendments to 35 Illinois Administrative Code 218.208 and 219.208. These sections add a ''small container exemption'' for pleasure craft surface coating operations in the Chicago and Metro-East St. Louis 8-hour ozone nonattainment areas. These exemptions are consistent with EPA volatile organic compound (VOC) reasonably available control technology (RACT) policy.

(i) Incorporation by reference. The following sections of Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter 1: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, are incorporated by reference.

(A) Part 218: Organic Material Emission Standards and Limitations for the Chicago Area, Subpart F: Coating Operations, Section 218.208 Exemptions From Emission Limitations; effective October 25, 2011.

(B) Part 219: Organic Material Emission Standards and Limitations for the Metro East Area, Subpart F: Coating Operations, Section 219.208 Exemptions From Emission Limitations; effective October 25, 2011.

(195) On June 20, 2012, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates National Ambient Air Quality Standards for ozone, lead, and particulate matter while correcting various errors in the plan.

(i) *Incorporation by reference.* Illinois Administrative Code; Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control

Board; Subchapter l: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.101 Definitions, 243.104 Nondegradation, 243.107 Reference Conditions, 243.108 Incorporations by Reference, 243.120 PM_{10} and $PM_{2.5}$, 243.122 Sulfur Oxides (Sulfur Dioxide), 243.125 8-Hour Ozone, and 243.126 Lead; effective October 25, 2011.

(196) On April 11, 2013, Illinois submitted a revision to 35 IAC Part 254, Annual Emissions Report. The revision amends the applicability provisions as they relate to greenhouse gases.

(i) Incorporation by reference.

Illinois Administrative Code Title 35: Environmental Protection, Subtitle B: Air Pollution; Chapter II: Environmental Protection Agency; Part 254: Annual Emission Report, Section 254.102: Applicability, effective April 20, 2012.

(197) On July 3, 2013, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1). The compound trans-1,3,3,3-tetraflouropropene (HFO–1234ze) was added to the list of negligibly reactive compounds excluded from the definition of ''Volatile Organic Material (VOM)'' or ''Volatile Organic Compound (VOC)'' at 35 IAC 211.7150(a).

(i) Incorporation by reference. Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; ChapterI: Pollution Control Board; Subchapter C: Emission Standards and Limitations for Stationary Sources; Part 211: Definitions and General Provisions, Section 211.7150: Volatile Organic Matter (VOM) or Volatile Organic Compound (VOC), Subsection 211.7150(a). Effective February 4, 2013.

(198) On January 9, 2014, Illinois submitted modifications to its Federally Enforceable State Operating Permits rules as a revision to the state implementation plan. The revision extends the maximum permit term of Federally Enforceable State Operating Permits from five years to ten years.

(i) Incorporation by reference. Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter a: Permits and General Provisions; Part 201: Permits and General Provisions; Subpart D: Permit Applications and Review Process; Section 201.162: Duration; Subsection 201.162(a). Effective December 1, 2010.

(199) On January 8, 2014, the Illinois Environmental Protection Agency submitted a revision to its state implementation plan. The revision to the SIP substitutes Latham Pool Products, d/b/a Viking Pools, for Royal Fiberglass Pools, Inc. as the holder of the adjusted standard to the general rule, Use of Organic Material Rule, known as the eight pound per hour (8 lb/hr) rule, for volatile organic matter that was granted to Royal Fiberglass Pools, Inc. manufacturing facility located in Dix, Illinois on February 18, 2010 by the Illinois Pollution Control Board. The adjusted standard affected by the name change provides that 35 Ill. Adm. Code 215.301 does not apply to VOM emissions from Viking Pools fiberglass pool manufacturing facility in Dix, Illinois. The facility is subject to emission limit requirements set forth in the National Emissions Standards for Hazardous Air Pollutants for Reinforced Plastic Composites Production at 40 CFR 63, subpart WWWW, April 21, 2003.

(i) Incorporation by reference.

(A) Supplemental Opinion and Order of the Illinois Pollution Control Board, AS 09–4, effective September 5, 2013.

(200) On November 29, 2012, the Illinois Environmental Protection Agency submitted a request to revise Illinois' vehicle inspection and maintenance (I/M) program to reflect changes that have been made to the program since EPA fully approved the I/M program on February 22, 1999.

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter k: Emission Standards and Limitations for Mobile Sources, Part 240 Mobile Sources. Effective February 1, 2012.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter II: Environmental Protection Agency, Part 276 Procedures to be Followed in the Performance of Inspections of Motor Vehicle Emissions. Effective January 30, 2012.

(ii) Other materials.

(A) Transmittal letter dated November 29, 2012.

(B) Vehicle Emissions Inspection Law of 2005, as amended, 625 ILCS 5/13C (Public Act 94–526 enacted on August 10, 2005; Public Act 94–848 enacted on June 9, 2006; Public Act 97–106, enacted on July 14, 2011).

(C) Listing of Chicago and Metro-East St. Louis NAA Facility Closures (July 2012).

(201) On March 19, 2013, the Illinois Environmental Protection Agency submitted a request to repeal the gasoline volatility standards at 35 Ill. Adm. Code 215.585, 218.585, and 219.585, including other related revisions to 35 Ill. Adm. Code Parts 211, 215, 218, and 219, to revise the motor vehicle refinishing equipment specifications at 35 Ill. Adm. Code 218.784 and 219.784, and to repeal the motor vehicle refinishing registration requirements at 35 Ill. Adm. Code 218.792 and 219.792.

(i) Incorporation by reference.

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211, Definitions and General Provisions, Sections 211.101 Incorporations by Reference, 211.2870 Heavy Liquid, and 211.5510 Reid Vapor Pressure. Effective January 28, 2013.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 215, Organic Material Emission Standards and Limitations, Sections 215.104 Definitions, and 215.105 Incorporation by Reference. Effective January 28, 2013.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218, Organic Material Emission Standards and Limitations for the Chicago Area, Sections 218.112 Incorporations by Reference, 218.128 Monitoring VOL Operations, and 218.784 Equipment Specifications. Effective January 28, 2013.

(D) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219, Organic Material Emission Standards and Limitations for the Metro East Area, Sections 219.112 Incorporations by Reference, 219.128 Monitoring VOL Operations, and 219.784 Equipment Specifications. Effective January 28, 2013.

(202) On June 10, 2014, Illinois submitted revised regulations that are consistent with 40 CFR 51.100(s)(1). The compounds (difluoromethoxy) (difluoro)methane (CHF_2OCHF_2 or HFE–134), bis(difluoromethoxy) (difluoro)methane ($CHF_2OCF_2OCHF_2$ or HFE–236cal2), 1-(difluoromethoxy)-2-[(difluoromethoxy) ((difluoro)methoxy]-1,1,2,2-tetrafluoroethane ($CHF_2OCF_2OCF_2CF_2OCHF_2$ or HFE–43–10pccc), 1,2-bis(difluoromethoxy)-1,1,2,2-tetrafluoroethane ($CHF_2OCF_2CF_2OCHF_2$ or HFE–338pcc13), and *trans* 1-chloro-3,3,3-trifluoroprop-1-ene ($CF_3CHCHCl$) were added to the list of negligibly reactive compounds excluded from the definition of ''Volatile Organic Material (VOM)'' or ''Volatile Organic Compound (VOC)'' at 35 IAC 211.7150(a).

(i) *Incorporation by reference.*

Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter c: Emission Standards and Limitations for Stationary Sources; Part 211: Definitions and General Provisions; Subpart B: Definitions; Section 211.7150: Volatile Organic Material (VOM) or Volatile Organic Compound (VOC), effective November 27, 2013.

(203) On January 17, 2013, the Illinois Environmental Protection Agency submitted a request to phase out Stage II vapor recovery standards at 35 Ill. Adm. Code 218.586 and to make other related revisions to 35 Ill. Adm. Code Parts 201, 218, and 219.

(i) *Incorporation by reference.*

(A) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter a: Permits and General Provisions, Part

201, Permits and General Provisions, Subpart C: Prohibitions, Section 201.146, Exemptions from State Permit Requirements, and Subpart K: Records and Reports, Section 201.302, Reports, effective December 23, 2013.

(B) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 218, Organic Material Emission Standards and Limitations for the Chicago Area, Subpart A: General Provisions, Section 218.112, Incorporations by Reference, Subpart Y: Gasoline Distribution, Section 218.583, Gasoline Dispensing Operations—Storage Tank Filling Operations and Section 218.586, Gasoline Dispensing Operations—Motor Vehicle Fueling Operations, effective December 23, 2013.

(C) Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 219, Organic Material Emission Standards and Limitations for the Metro East Area, Subpart A: General Provisions, Section 219.105, Test Methods and Procedures, and Section 219.112, Incorporations by Reference, Subpart Y: Gasoline Distribution, Section 219.583, Gasoline Dispensing Operations—Storage Tank Filling Operations, effective December 23, 2013.

(204) On December 2, 2013, Illinois submitted an amendment to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates Illinois air quality standards to reflect National Ambient Air Quality Standards for sulfur dioxide, ozone, nitrogen dioxide, lead, fine particulate matter, particulate matter, and carbon monoxide and incorporates Federal test procedures for these pollutants.

(i) *Incorporation by reference.* Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter l: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.101 Definitions, 243.102 Scope, 243.103 Applicability, 243.105 Air Quality Monitoring Data Influenced by Exceptional Events, 243.107 Reference Conditions, 243.108 Incorporations by Reference, 243.120 PM_{10} and $PM_{2.5}$, 243.122 Sulfur Oxides (Sulfur Dioxide), 243.123 Carbon Monoxide, 243.124 Nitrogen Oxides (Nitrogen Dioxide as Indicator), 243.125 Ozone, 243.126 Lead, and 243.TABLE A Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS, effective July 29, 2013.

(205) On May 16, 2013, and August 18, 2014, Illinois submitted variances to its regional haze state implementation plan affecting the following Midwest Generation, LLC facilities: Crawford Generating Station (Cook County), Joliet Generating Station (Will County), Powerton Generating Station (Tazewell County), Waukegan Generating Station (Lake County), and Will County Generating Station (Will County).

(i) Incorporation by Reference. (A) Illinois Pollution Control Board Order PCB 12–121, adopted on August 23, 2012; Certificate of Acceptance, dated August 24, 2012, filed with the Illinois Pollution Control Board Clerk's Office August 27, 2012.

(B) Illinois Pollution Control Board Order PCB 13–24, adopted on April 4, 2013; Certificate of Acceptance, dated May 16, 2013, filed with the Illinois Pollution Control Board Clerk's Office May 17, 2013.

(206) On December 18, 2014, the state submitted a proposed revision to the Illinois SIP updating the definition of Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) to exclude the chemical compound 2,3,3,3-tetrafluoropropene (HFO–1234yf), along with minor administrative revisions.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emission Standards and Limitations for Stationary Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC), effective June 9, 2014.

(207) On September 3, 2014, Illinois submitted a variance to its regional haze state implementation plan affecting the electrical generating units

(EGUs) included in the Ameren Multi-Pollutant Standard Group (Ameren MPS Group). The Ameren MPS Group consists of five facilities owned by Illinois Power Holdings, LLC (IPH) and two facilities owned by AmerenEnergy Medina Valley Cogen, LLC (Medina Valley). The IPH facilities included in the Ameren MPS Group and subject to the variance include: Coffeen Energy Center (Montgomery County), Duck Creek Energy Center (Fulton County), E.D. Edwards Energy Center (Peoria County), Joppa Energy Center (Massac County), and Newton Energy Center (Jasper County). The Medina Valley facilities included in the Ameren MPS Group and subject to the variance are the Meredosia Energy Center (Morgan County) and the Hutsonville Energy Center (Crawford County).

(i) *Incorporation by reference.*

(A) Illinois Pollution Control Board Order PCB 14–10, adopted on November 21, 2013; Certificate of Acceptance, filed with the Illinois Pollution Control Board Clerk's Office December 20, 2013.

(208) On December 18, 2014, and April 23, 2015, Illinois submitted amendments to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates Illinois air quality standards to reflect National Ambient Air Quality Standards promulgated by EPA through December 17, 2013, and incorporates Federal test procedures for these pollutants.

(i) *Incorporation by Reference.* (A) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.107 Reference Conditions, 243.120 $p.m._{10}$ and $PM_{2.5}$, 243.122 Sulfur Oxides (Sulfur Dioxide), and 243.Table A Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS, effective November 27, 2013.

(B) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Section 243.108 Incorporation by Reference, effective June 9, 2014.

(209) On August 9, 2016, the state submitted a proposed revision to the Illinois SIP updating the definition of Volatile Organic Material (VOM) or Volatile Organic Compound (VOC) to exclude the chemical compound 2-amino-2-methyl-1-propanol (AMP), along with minor administrative revisions.

(i) *Incorporation by reference.* Illinois Administrative Code, Title 35: Environmental Protection, Subtitle B: Air Pollution, Chapter I: Pollution Control Board, Subchapter c: Emissions Standards and Limitations for Station Sources, Part 211: Definitions and General Provisions, Subpart B: Definitions, Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compounds (VOC), effective March 24, 2015.

[37 FR 10862, May 31, 1972. Redesignated and amended at 82 FR 30638, June 30, 2017]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.750, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

Subpart P—Indiana

§ 52.769 Identification of plan—conditional approval.

The plan revision commitment listed in paragraphs (a) and (b) of this section were submitted on the dates specified.

(a)–(b) [Reserved]

[60 FR 22241, 22242, May 4, 1995, as amended at 62 FR 19056, Apr. 18, 1997; 63 FR 35144, June 29, 1998]

§ 52.770 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan (SIP) for Indiana under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR Part 51 to meet National Ambient Air Quality Standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c), (d), and (e) of this section with an EPA approval date prior to December 31, 2009, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Material is incorporated as it exists on the date of the approval, and notice of any change

in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c), (d), and (e) of this section with an EPA approval date after December 31, 2009, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 5 certifies that the rules/regulations provided by the EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the SIP as of December 31, 2009.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 5, Air Programs Branch, 77 West Jackson Boulevard, Chicago, IL 60604; the EPA, Air and Radiation Docket and Information Center, EPA Headquarters Library, Infoterra Room (Room Number 3334), EPA West Building, 1301 Constitution Ave., NW., Washington, DC 20460, and the National Archives and Records Administration. If you wish to obtain materials from a docket in the EPA Headquarters Library, please call the Office of Air and Radiation (OAR) Docket/Telephone number: (202) 566–1742. For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal__register/code__of__federal__regulations/ibr__locations.html.*

(c) *EPA approved regulations.*

Rule 2. Prevention of Significant Deterioration (PSD) Requirements				
2–2–1	Definitions	3/16/2011	9/28/2011, 76 FR 59899	(a) through (e), (f)(2) through (f)(3), (g) through (cc), (dd)(2) through (dd)(3), (ee)(1) through (ee)(2), (ff)(1) through (ff)(6), (gg)(1)(A) through (gg)(1)(B), (gg)(2) through (gg)(3), (hh) through (rr), (ss)(2) through (ss)(6), (tt) through (vv), (ww)(1)(A) through (ww)(1)(E), (ww)(1)(G) through (ww)(1)(W), (ww)(2), (xx) through (aaa).
2–2–1	Definitions	7/11/2012	10/29/2012, 77 FR 65478	(dd)(1), (ff)(7), (ss)(1), (ww)(1)(F) and (ww)(1)(G) only.
2–2–1	Definitions	7/11/2012	7/2/2014, 79 FR 37646	(f)(1), (ee)(3), and (gg)(1)(C) only.
2–2–2	Applicability	10/31/2010	7/8/2011, 76 FR 40242.	
2–2–3	Control technology review; requirements.	9/10/2004	6/18/2007, 72 FR 33395.	
2–2–4	Air quality analysis; requirements	3/16/2011	9/28/2011, 76 FR 59899	(a), (b)(1), (b)(2)(A)(i) through (b)(2)(A)(iv), (b)(2)(A)(vi) through (b)(2)(A)(xiii), (b)(2)(B), (b)(3), (c)(1) through (c)(3), (c)(5) through (c)(7).
2–2–4	Air quality analysis; requirements	7/11/2012	10/29/2012, 77 FR 65478	(b)(2)(A)(vi) only.
2–2–4	Air quality analysis; requirements	7/11/2012	7/2/2014, 79 FR 37646	(c)(4) only.
2–2–5	Air quality impact; requirements	10/31/2010	7/8/2011, 76 FR 40242.	
2–2–6	Increment consumption; requirements.	7/11/2012	8/11/2014, 79 FR 46710	(b) only
2–2–8	Source obligation	10/31/2010	7/8/2011, 76 FR 40242.	
2–2–10	Source information	10/31/2010	7/8/2011, 76 FR 40242.	
2–2–11	Stack height provisions	4/22/2001	6/27/2003, 68 FR 38197.	
2–2–12	Permit rescission	4/8/2004	5/20/2004, 69 FR 29071.	
2–2–13	Area designation and redesignation	4/22/2001	6/27/2003, 68 FR 38197.	
2–2–14	Sources impacting federal Class I areas: additional requirements.	7/11/2012	7/2/2014, 79 FR 37646.	
2–2–15	Public participation	4/22/2001	6/27/2003, 68 FR 38197.	
2–2–16	Ambient air ceilings	4/22/2001	6/27/2003, 68 FR 38197.	
Rule 3. Emission Offset				
2–3–1	Definitions	10/31/2010	7/8/2011, 76 FR 40242.	
2–3–2	Applicability	10/31/2010	7/8/2011, 76 FR 40242.	
2–3–3	Applicable requirements	10/31/2010	7/8/2011, 76 FR 40242.	
2–3–4	Banking of emission offsets	12/13/1993	10/7/1994, 59 FR 51108.	
2–3–5	Location of offsetting emissions	12/13/1993	10/7/1994, 59 FR 51108.	
Rule 3.4. Actuals Plantwide Applicability Limitations in Nonattainment Areas				
2–3.4–1	Applicability	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–2	Definitions	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–3	Permit application requirements	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–4	Establishing PALs; general requirements.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–5	Public participation requirements for PALs.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–6	Establishing a 10 year actuals PAL level.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–7	Contents of the PAL permit	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–8	PAL effective period and reopening of the PAL permit.	9/10/2004	6/18/2007, 72 FR 33395.	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
2–3.4–9	Expiration of a PAL	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–10	Renewal of a PAL	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–11	Increasing a PAL during the PAL effective period.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–12	Monitoring requirements for PALs	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–13	Record keeping requirements	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–14	Reporting and notification requirements.	9/10/2004	6/18/2007, 72 FR 33395.	
2–3.4–15	Termination and revocation of a PAL	9/10/2004	6/18/2007, 72 FR 33395.	
Rule 5.1. Construction of New Sources				
2–5.1–4	Transition procedures	9/10/2004	6/18/2007, 72 FR 33395.	
Rule 6. Emission Reporting				
2–6–1	Applicability	11/20/2016	4/7/2017, 82 FR 16926.	
2–6–2	Definitions	3/27/2004	10/29/2004, 69 FR 63069.	
2–6–3	Compliance schedule	8/13/2006	3/29/2007, 72 FR 14678.	
2–6–4	Requirements	8/13/2006	3/29/2007, 72 FR 14678.	
2–6–5	Additional information requests	3/27/2004	10/29/2004, 69 FR 63069.	
Rule 7. Part 70 Permit Program				
2–7–10.5	Part 70 permits; source modifications	10/26/2013	3/16/2015, 80 FR 13494	Indiana made typographical corrections to (f)(2)(C) on 1/11/2014.
Rule 8. Federally Enforceable State Operating Permit Program				
2–8–1	Definitions	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–2	Applicability	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–3	Permit application	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–4	Permit content	12/16/2007	10/6/2009, 74 FR 51240.	
2–8–5	Compliance requirements for FESOPs.	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–6	Federally enforceable requirements	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–7	Permit issuance, renewal, and revisions.	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–8	Permit reopening	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–9	Permit expiration	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–10	Administrative permit amendments	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–11	Permit modification (Repealed)	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–11.1	Permit revisions	10/26/2013	3/16/2015, 80 FR 13494	Indiana made typographical corrections to (d)(4) on 1/11/2014.
2–8–12	Emergency provision	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–13	Public notice	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–14	Review by U.S. EPA	6/24/1994	8/18/1995, 60 FR 43008.

2–8–16	Fees	6/24/1994	8/18/1995, 60 FR 43008.	
2–8–17	Local agencies	6/24/1994	8/18/1995, 60 FR 43008.	
Rule 9. Source Specific Operating Agreement Program				
2–9–1	General provisions	6/24/1994	4/2/1996, 61 FR 14487.	
2–9–2	Source specific restrictions and conditions (Repealed).	6/24/1994	4/2/1996, 61 FR 14487	Sec. 2(a), 2(b), and 2(e)
Article 3. Monitoring Requirements				
Rule 1. Continuous Monitoring of Emissions				
3–1–1	Applicability		9/4/1981, 46 FR 44448.	
Rule 2.1. Source Sampling Procedures				
3–2.1–5	Specific Testing Procedures	7/15/1995	4/9/1996, 61 FR 15704.	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
Rule 4. General Provisions				
3–4–1	Definitions	9/10/2011	10/23/2013, 78 FR 63093.	
3–4–2	Certification	9/10/2011	10/23/2013, 78 FR 63093.	
3–4–3	Conversion factors	9/10/2011		
Rule 5. Continuous Monitoring of Emissions				
3–5–1	Applicability; continuous monitoring requirements for applicable pollutants.	1/15/2014	4/17/2015, 80 FR 21174.	
3–5–2	Minimum performance and operating specifications.	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–3	Monitor system certification	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–4	Standard operating procedures	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–5	Quality assurance requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–6	Recordkeeping requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–7	Reporting requirements	9/10/2011	10/23/2013, 78 FR 63093.	
3–5–8	Operation and maintenance of continuous emission monitoring and continuous opacity monitoring systems.	9/10/2011	10/23/2013, 78 FR 63093.	
Rule 6. Source Sampling Procedures				
3–6–1	Applicability; test procedures	9/10/2011	10/23/2013, 78 FR 63093.	
3–6–2	Source sampling protocols	9/10/2011	10/23/2013, 78 FR 63093.	
3–6–3	Emission testing	9/10/2011	10/23/2013, 78 FR 63093.	
3–6–4	Reporting	9/10/2011	10/23/2013, 78 FR 63093.	
3–6–5	Specific testing procedures; particulate matter; PM_{10}; $PM_{2.5}$; sulfur dioxide; nitrogen oxides; volatile organic compounds.	9/10/2011	10/23/2013, 78 FR 63093.	
Rule 7. Fuel Sampling and Analysis Procedures				
3–7–1	Applicability	9/10/2011	10/23/2013, 78 FR 63093.	
3–7–2	Coal sampling and analysis methods	9/10/2011	10/23/2013, 78 FR 63093.	
3–7–3	Alternate coal sampling and analysis methods.	9/10/2011	10/23/2013, 78 FR 63093.	
3–7–4	Fuel oil sampling; analysis methods	9/10/2011	10/23/2013, 78 FR 63093.	
3–7–5	Recordkeeping requirements; standard operating procedures.	9/10/2011	10/23/2013, 78 FR 63093.	
Article 4. Burning Regulations				
Rule 1. Open Burning [1]				
4–1–0.5	Definitions	2/10/2001	12/9/2014, 79 FR 72979.	
4–1–1	Scope	2/10/2001	12/9/2014, 79 FR 72979.	
4–1–2	Prohibition against open burning	2/10/2001	12/9/2014, 79 FR 72979.	
4–1–3	Exemptions	10/28/2011	12/9/2014, 79 FR 72979.	
4–1–4	Emergency burning	10/28/2011	12/9/2014, 79 FR 72979.	
4–1–4.1	Open burning approval; criteria and conditions.	12/15/2002	12/9/2014, 79 FR 72979.	
4–1–4.2	Open burning; approval revocation	2/10/2001	12/9/2014, 79 FR 72979.	
4–1–4.3	Open burning approval; delegation of authority.	2/10/2001	12/9/2014, 79 FR 72979.	
Rule 2. Incinerators				
4–2–1	Applicability	12/15/2002	11/30/2004, 69 FR 69531.	
4–2–2	Incinerators	12/15/2002	11/30/2004, 69 FR 69531.	
4–2–3	Portable incinerators (Repealed)	12/15/2002	11/30/2004, 69 FR 69531.	
Article 5. Opacity Regulations				
Rule 1. Opacity Limitations				
5–1–1	Applicability	11/8/1998	7/16/2002, 67 FR 46589.	
5–1–2	Opacity limitations	11/8/1998	7/16/2002, 67 FR 46589.	

EPA-APPROVED INDIANA REGULATIONS—Continued

Indiana citation	Subject	Indiana effective date	EPA approval date	Notes
5–1–3	Temporary alternative opacity limitations.	11/8/1998	7/16/2002, 67 FR 46589.	
5–1–4	Compliance determination	6/11/1993	6/15/1995, 60 FR 31412 ...	Sec. 4(a).
		11/8/1998	7/16/2002, 67 FR 46589 ...	Sec. 4(b).
5–1–5	Violations	6/11/1993	6/15/1995, 60 FR 31412 ...	(a) and (c).
5–1–5	Violations	11/8/1998	7/16/2002, 67 FR 46589 ...	(b)(1)(A) through (b)(1)(D), (b)(1)(F) through (b)(1)(I), (b)(2) through (b)(11).
5–1–5	Violations	7/11/2012	7/2/2014, 79 FR 37646	(b)(1)(E) only.
5–1–7	State implementation plan revisions	6/11/1993	6/15/1995, 60 FR 31412.	
5–1–8	Site-specific temporary alternate opacity limitations.	12/6/2014	9/30/2016, 81 FR 67186.	
Article 6. Particulate Rules				
Rule 2. Particulate Emission Limitations for Sources of Indirect Heating				
6–2–1	Applicability	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–2	Emission limitations for facilities specified in 326 IAC 6–2–1(b).	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–3	Emission limitations for facilities specified in 326 IAC 6–2–1(c).	10/21/1983	5/17/1985, 50 FR 20569.	
6–2–4	Emission limitations for facilities specified in 326 IAC 6–2–1(d).	10/21/1983	5/17/1985, 50 FR 20569.	
Rule 3. Particulate Emission Limitations for Manufacturing Processes				
6–3–1	Applicability	6/12/2002	7/25/2005, 70 FR 42495 ...	Sec. 1.(a) and (b).
		4/20/2012	6/17/2014, 79 FR 34435 ...	only Sec. 1. (c).
6–3–1.5	Definitions	6/12/2002	7/25/2005, 70 FR 42495.	
6–3–2	Particulate emission limitations, work practices, and control technologies.	6/12/2002	7/25/2005, 70 FR 42495.	
Rule 4. Fugitive Dust Emissions				
6–4–1	Applicability of rule	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 1. Definitions.
6–4–2	Emission limitations	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 2. Allowable Emissions.
6–4–3	Multiple sources of fugitive dust	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 3. Applicability.
6–4–4	Motor vehicle fugitive dust sources	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 4. Mobile Fugitive Dust Sources.
6–4–5	Measurement processes	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 5. Methods of Measurement.
6–4–6	Exceptions	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 6.
6–4–7	Compliance date	11/16/1973	10/28/1975, 40 FR 50032	Approved as APC–20 Sec. 3(e).
Rule 7. Particulate Matter Emission Limitations for Southern Indiana Gas and Electric Company				
6–7–1	Southern Indiana Gas and Electric Company (SIGECO).	8/30/2008	11/10/2009, 74 FR 57904.	
Article 6.5. Particulate Matter Limitations Except Lake County				
Rule 1. General Provisions				
6.5–1–1	Applicability	4/20/2012	6/17/2014, 79 FR 34435.	
6.5–1–1.5	Definitions	9/9/2005	3/22/2006, 71 FR 14383.	
6.5–1–2	Particulate emission limitations; modification by commissioner.	4/20/2012	6/17/2014, 79 FR 34435.	
6.5–1–3	Nonattainment area particulate limitations; compliance determination.	9/9/2005	3/22/2006, 71 FR 14383.	
6.5–1–4	Compliance schedules	9/9/2005	3/22/2006, 71 FR 14383.

8–2–4	Coil coating operations		10/27/1982, 47 FR 20586.	
8–2–5	Paper coating operations	12/3/2009	2/24/2010, 75 FR 8246.	
8–2–6	Metal furniture coating operations	12/3/2009	2/24/2010, 75 FR 8246.	
8–2–7	Large appliance coating operations	12/3/2009	2/24/2010, 75 FR 8246.	
8–2–8	Magnet wire coating operations		10/27/1982, 47 FR 20586.	
8–2–9	Miscellaneous metal and plastic parts coating operations.	11/19/2010	10/13/11, 76 FR 63549.	
8–2–10	Flat wood panels; manufacturing operations.	12/3/2009	2/24/2010, 75 FR 8246.	
8–2–11	Fabric and vinyl coating	10/23/1988	3/6/1992, 57 FR 8082.	
8–2–12	Wood furniture and cabinet coating	4/10/1988	11/24/1990, 55 FR 39141.	
Rule 3. Organic Solvent Degreasing Operations				
8–3–1	Applicability and Exemptions	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–2	Cold cleaner degreaser control equipment and operating requirements.	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–3	Open top vapor degreaser operation	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–4	Conveyorized degreaser control equipment and operating requirements.	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–5	Cold cleaner degreaser operation and control (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–6	Open top vapor degreaser operation and control requirements (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–7	Conveyorized degreaser operation and control (Repealed).	3/1/2013	7/25/2014, 79 FR 43260.	
8–3–8	Material requirements for cold cleaner degreasers.	3/1/2013	7/25/2014, 79 FR 43260.	
Rule 4. Petroleum Sources:				
8–4–1	Applicability	3/5/2015	6/9/2016, 81 FR 37160.	
8–4–2	Petroleum refineries		1/18/1983, 48 FR 2127.	
8–4–3	Petroleum liquid storage facilities		2/10/1986, 51 FR 4912.	
8–4–4	Bulk gasoline terminals		1/18/1983, 48 FR 2127.	
8–4–5	Bulk gasoline plants		1/18/1983, 48 FR 2127.	
8–4–6	Gasoline dispensing facilities	3/5/2015	6/9/2016, 81 FR 37160.	
8–4–7	Gasoline transports	11/5/1999	5/31/2002, 67 FR 38006.	
8–4–8	Leaks from petroleum refineries; monitoring; reports.	6/5/1991	3/6/1992, 57 FR 8082.	
8–4–9	Leaks from transports and vapor collection systems; records.	11/5/1999	5/31/2002, 67 FR 38006.	
Rule 5. Miscellaneous Operations:				
8–5–1	Applicability of rule	3/22/2007	2/20/2008, 73 FR 9201.	
8–5–2	Asphalt paving rules		2/10/1986, 51 FR 4912.	
8–5–3	Synthesized pharmaceutical manufacturing operations.	5/18/1990	3/6/1992, 57 FR 8082.	
8–5–4	Pneumatic rubber tire manufacturing		1/18/1983, 48 FR 2124.	
8–5–5	Graphic arts operations	5/22/1997	6/29/1998, 63 FR 35141.	
8–5–6	Fuel grade ethanol production at dry mills.	3/22/2007	2/20/2008, 73 FR 9201.	
Rule 6. Organic Solvent Emission Limitations:				
8–6–1	Applicability of rule		1/18/1983, 48 FR 2124.	
8–6–2	Emission limits; exemptions		1/18/1983, 48 FR 2124.	
Rule 7. Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties:				
8–7–1	Definitions	1/21/1995	7/5/1995, 60 FR 34856.	
8–7–2	Applicability	1/21/1995	7/5/1995, 60 FR 34856.	
8–7–3	Emission limits	1/21/1995	7/5/1995, 60 FR 34856.	
8–7–4	Compliance methods	1/21/1995	7/5/1995, 60 FR 34856.

8–8–4	Compliance deadlines	1/18/1996	1/17/1997, 62 FR 2591.	
8–8–8.1	Municipal Solid Waste Landfills Not Located in Clark, Floyd, Lake, and Porter Counties.	1/18/1996	1/17/1997, 62 FR 2591.	
8–8.1–1	Applicability	1/18/1996	1/17/1997, 62 FR 2591.	
8–8.1–2	Definitions	1/18/1996	1/17/1997, 62 FR 2591.	
8–8.1–3	Requirements; incorporation by reference of federal standards.	1/18/1996	1/17/1997, 62 FR 2591.	
8–8.1–4	Compliance deadlines	1/18/1996	1/17/1997, 62 FR 2591.	
8–8.1–5	Alternative requirements	1/18/1996	1/17/1997, 62 FR 2591.	
Rule 9. Volatile Organic Liquid Storage Vessels:				
8–9–1	Applicability	7/16/2018	5/23/2019, 84 FR 23723.	
8–9–2	Exemptions	7/16/2018	5/23/2019, 84 FR 23723.	
8–9–3	Definitions	7/16/2018	5/23/2019, 84 FR 23723.	
8–9–4	Standards	7/16/2018	5/23/2019, 84 FR 23723.	
8–9–5	Testing and procedures	7/16/2018	5/23/2019, 84 FR 23723.	
8–9–6	Record keeping and reporting requirements.	7/16/2018	5/23/2019, 84 FR 23723 ...	Includes supplemental information provided on 9/28/2018.
Rule 10. Automobile Refinishing:				
8–10–1	Applicability	8/13/1998	12/20/1999, 64 FR 71031.	
8–10–2	Definitions	11/2/1995	6/13/1996, 61 FR 29965.	
8–10–3	Requirements	5/23/1999	12/20/1999, 64 FR 71031.	
8–10–4	Means to limit volatile organic compound emissions.	11/2/1995	6/13/1996, 61 FR 29965.	
8–10–5	Work practice standards	8/13/1998	12/20/1999, 64 FR 71031.	
8–10–6	Compliance procedures	8/13/1998	12/20/1999, 64 FR 71031.	
8–10–7	Test procedures	11/2/1995	6/13/1996, 61 FR 29965.	
8–10–8	Control system operation, maintenance, and monitoring (Repealed).	11/2/1995	6/13/1996, 61 FR 29965.	
8–10–9	Recordkeeping and reporting	8/13/1998	12/20/1999, 64 FR 71031.	
Rule 11. Wood Furniture Coating:				
8–11–1	Applicability	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–2	Definitions	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–3	Emission limits	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–4	Work practice standards	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–5	Continuous compliance plan	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–6	Compliance procedures and monitoring requirements.	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–7	Test procedures	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–8	Recordkeeping requirements	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–9	Reporting requirements	1/4/1996	10/30/1996, 61 FR 55889.	
8–11–10	Provisions for sources electing to use emissions averaging.	1/4/1996	10/30/1996, 61 FR 55889.	
Rule 12. Shipbuilding or Ship Repair Operations in Clark, Floyd, Lake, and Porter Counties:				
8–12–1	Applicability	5/1/1996	1/22/1997, 62 FR 3216.	
8–12–2	Exemptions	7/15/2001	4/1/2003, 68 FR 15664.

Article 26. Regional Haze				
Rule 2. Best Available Retrofit Technology Emission Limitations				
26–2–1	Applicability	3/9/2011	6/11/2012, 77 FR 34218.	
26–2–2	Alcoa emission limitations and compliance methods.	6/29/2014	8/20/2015, 80 FR 50581.	
State Statutes				
IC 13–13–8	Environmental Rules Board	1/1/2013	12/24/2013, 78 FR 77599	1, 2(a), 2(b), 3, 4, and 11 only.

[1] EPA is approving this rule for the counties of Adams, Allen, Bartholomew, Benton, Blackford, Boone, Brown, Carroll, Cass, Clay, Clinton, Crawford, Daviess, Dearborn, Decatur, De Kalb, Delaware, Dubois, Elkhart, Fayette, Fountain, Franklin, Fulton, Gibson, Grant, Greene, Hamilton, Hancock, Harrison, Hendricks, Henry, Howard, Huntington, Jackson, Jasper, Jay, Jefferson, Jennings, Johnson, Knox, Kosciusko, La Porte, Lagrange, Lawrence, Madison, Marion, Marshall, Martin, Miami, Monroe, Montgomery, Morgan, Newton, Noble, Ohio, Orange, Owen, Parke, Perry, Pike, Posey, Pulaski, Putnam, Randolph, Ripley, Rush, St. Joseph, Scott, Shelby, Spencer, Starke, Steuben, Sullivan, Switzerland, Tippecanoe, Tipton, Union, Vanderburgh, Vermillion, Vigo, Wabash, Warren, Warrick, Washington, Wayne, Wells, White, and Whitley.

(d) *EPA approved State source-specific requirements.*

EPA-APPROVED INDIANA SOURCE-SPECIFIC PROVISIONS

CO date	Title	SIP rule	EPA approval	Explanation
1/11/2016	A.B. Brown Generating Station.	N.A.	5/6/2016, 81 FR 27330	Limitation intended to support attainment designation.
10/1/1999	ALCOA-Warrick	5–1–2	7/5/2000, 65 FR 41352 (*also see* 64 FR 40287).	Alt. opacity limits (permit).
12/15/1999	ALCOA-Warrick	5–1–2	7/5/2000, 65 FR 41352 (*also see* 64 FR 40287).	Alt. opacity limits (permit).
2/1/2016	Clifty Creek Generating Station.	N.A.	5/6/2016, 81 FR 27330	Limitation intended to support attainment designation.
10/12/1999	Crane Naval	8–2–9	12/31/2002, 67 FR 79859	Exemption.
2/11/2004	Eli Lilly	8–5–3	11/8/2004, 69 FR 64661	Exemption.
12/22/2004	Transwheel	8–3–5(a)(5)(C)	4/12/2005, 70 FR 19000	Equivalent control.
9/8/2015	Abengoa Bioenergy of Indiana.	N.A.	8/12/2016, 81 FR 53297	Alternative control technology requirements.
10/20/2016	SABIC Innovative Plastics	N.A	5/10/2017, 82 FR 21703	Limitation intended to support attainment designation.
11/16/2016	Carmeuse Lime Inc	N.A	5/10/2017, 82 FR 21708	Limitation intended to support attainment designation.

(e) *EPA approved nonregulatory and quasi-regulatory provisions.*

EPA-APPROVED INDIANA NONREGULATORY AND QUASI-REGULATORY PROVISIONS

Title	Indiana date	EPA approval	Explanation
Allen County 1997 8-hour ozone maintenance plan		2/25/2014, 79 FR 10385	Revision to motor vehicle emission budgets.
Carbon Monoxide Control Strategy—Lake and Porter Co		1/19/2000, 65 FR 2883	Paragraph (b).
Carbon Monoxide Control Strategy—Lake and Marion Cos.	[1] 1/12/2009	10/15/2009, 74 FR 52891	Paragraph (c).
Chicago Hydrocarbon Control Strategy		8/26/2004, 69 FR 52427	Paragraph (aa).
Chicago-Gary Hydrocarbon Control Strategy		12/30/2008, 73 FR 79652	Paragraph (kk).
Ozone (8-Hour, 1997): Cincinnati-Hamilton, OH-KY-IN (Dearborn County (part)).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Control Strategy: Particulate Matter		11/27/2009, 74 FR 62243	Paragraph (s).
Ozone (8-Hour, 1997): Evansville, IN (Vanderburgh and Warrick Counties).	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Evansville/Southwest Indiana Area 1997 annual fine particulate matter maintenance plan.		3/19/2014, 79 FR 15224	Revision to motor vehicle emission budgets.
Fluoride Emission Limitations for Existing Primary Aluminum Plants.		3/11/2003, 68 FR 11472	Removed from SIP, replaced by NESHAP.

EPA-APPROVED INDIANA NONREGULATORY AND QUASI-REGULATORY PROVISIONS—Continued

Title	Indiana date	EPA approval	Explanation
Ozone (8-Hour, 1997): Fort Wayne, IN (Allen County) ...	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Ozone (8-Hour, 1997): Jackson Co., IN (Jackson County).	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Ozone (8-Hour, 1997): Greene Co., IN (Greene County)	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Ozone (8-Hour, 1997): Indianapolis, IN (Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Indianapolis 2010 Sulfur Dioxide (SO_2) Attainment Plan	10/2/2015	3/22/2019, 84 FR 10692.	
Indianapolis 2010 Sulfur Dioxide (SO_2) maintenance plan.	7/10/2017	5/21/2020, 85 FR 30844.	
Lake County sulfur dioxide maintenance plan	3/28/2013	9/3/2013, 78 FR 54173.	
Ozone (8-Hour, 1997): Chicago-Gary-Lake County, IL-IN (Lake and Porter Counties).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Lake and Porter Counties 1997 annual $PM_{2.5}$ maintenance plan.	2/1/2013	5/15/2013, 78 FR 28503 ..	Revision to motor vehicle emission budgets.
Lake and Porter Counties 2008 8-hour Ozone Moderate Planning Elements.	2/28/2017, 1/9/2018, and 10/25/2018	12/13/2019, 84 FR 68050	2011 base year emissions inventory, Reasonable Further Progress (RFP) plan, RFP contingency measure plan, 2017 VOC and NO_X motor vehicle emissions budgets, nonattainment new source review certification, VOC RACT Certification, and enhanced motor vehicle inspection and maintenance program certification.
Lake and Porter Counties 2008 8-hour Ozone Negative Declarations.	10/25/2018	12/13/2019, 84 FR 68050	Includes: Fiberglass Boat Manufacturing Materials CTG and Oil and Gas Industry CTG.
Ozone (8-Hour, 1997): LaPorte CO., IN (LaPorte County).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Lead Control Strategy—Marion County	.....	5/10/2000, 65 FR 29959 ..	Paragraph (d).
Lead Control Strategy—Marion County	[1] 4/1/2009	9/24/2009, 74 FR 48659 ..	Paragraph (e).
Louisville 1997 Annual $PM_{2.5}$ Maintenance Plan	6/16/2011	9/9/2016, 81 FR 62390.	
Ozone (8-Hour, 1997): Louisville, KY-IN (Clark and Floyd Counties).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Morgan County 2010 Sulfur Dioxide (SO_2) Attainment Plan.	10/2/2015	9/23/2019, 84 FR 49659.	
Ozone (8-Hour, 1997): Muncie, IN (Delaware County) ...	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Muncie 2008 lead emissions inventory	4/14/2016	5/15/2020, 85 FR 29331.	
Muncie 2008 lead maintenance plan	4/14/2016	5/15/2020, 85 FR 29331.	
Ozone Monitoring Season	2/19/1991	12/10/1991, 56 FR 64482.	
PM_{10} Maintenance Plan for Lake County	9/25/2002	1/10/2003, 68 FR 1370	Paragraph (r), also redesignation.
Particulate Control Strategy—Vermillion County	.....	8/26/1997, 62 FR 45168 ..	Paragraph (q).
Regional Haze Five-Year Progress Report	3/30/2016	2/2/2018, 83 FR 4847.	
Regional Haze Plan	11/27/2017	9/6/2019, 84 FR 46889	Full Approval.
Section 110(a)(2) infrastructure requirements for the 1997 8-Hour Ozone NAAQS.	12/7/2007, 9/19/2008, 3/23/2011, 4/7/2011, and 11/24/2017	12/17/2018, 83 FR 64472	All CAA infrastructure elements have been approved except the visibility portion of 110(a)(2)(D)(i)(II).
Section 110(a)(2) infrastructure requirements for the 1997 $PM_{2.5}$ NAAQS.	12/7/2007, 9/19/2008, 3/23/2011, 4/7/2011, and 11/24/2017	12/17/2018, 83 FR 64472	All CAA infrastructure elements have been approved except the visibility portion of 110(a)(2)(D)(i)(II).
Section 110(a)(2) Infrastructure Requirements for the 2006 24-Hour $PM_{2.5}$ NAAQS.	10/20/2009, 6/25/2012, 7/12/2012, 5/22/2013, and 11/27/2017	9/6/2019, 84 FR 46889	Full Approval.

EPA-APPROVED INDIANA NONREGULATORY AND QUASI-REGULATORY PROVISIONS—Continued

Title	Indiana date	EPA approval	Explanation
Section 110(a)(2) Infrastructure Requirements for the 2008 Lead NAAQS.	12/12/2011	10/16/2014, 79 FR 62035	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(I), (D)(i)(II), (D)(ii), (E), (F), (G), (H), (J), (K), (L), and (M).
Section 110(a)(2) Infrastructure Requirements for the 2008 8-Hour Ozone NAAQS.	12/12/2011 and 11/27/2017	9/6/2019, 84 FR 46889	Full Approval.
Section 110(a)(2) Infrastructure Requirements for the 2010 NO_2 NAAQS.	1/15/2013 and 11/27/2017	9/6/2019, 84 FR 46889	Full Approval.
Section 110(a)(2) Infrastructure Requirements for the 2010 SO_2 NAAQS.	5/22/2013 and 11/27/2017	9/6/2019, 84 FR 46889	All elements have been addressed except: 110(a)(2)(D)(i)(I).
Section 110(a)(2) infrastructure requirements for the 2012 $PM_{2.5}$ NAAQS.	6/10/2016 and 12/28/2016	10/8/2019, 84 FR 53601 ..	Fully approved for all CAA elements except the visibility protection requirements of (D)(i)(II).
Small Business Compliance Assistance Program	.....	9/2/1993, 58 FR 46541.	
Ozone (8-Hour, 1997): South Bend-Elkhart, IN (Elkhart and St. Joseph Counties).	6/20/2019	12/13/2019, 84 FR 68049	2nd maintenance plan.
Sulfur Dioxide Control Strategy—LaPorte, Marion, Vigo, and Wayne Counties.	.....	11/15/1996, 61 FR 58482	Paragraph (f) and (g).
Ozone (8-Hour, 1997): Terre Haute, IN (Vigo County) ...	6/20/2019	12/27/2019, 84 FR 71306	2nd limited maintenance plan.
Terre Haute 2010 Sulfur Dioxide (SO_2) Attainment Plan	10/2/2015	3/22/2019, 84 FR 10692.	
Terre Haute 2010 Sulfur Dioxide (SO_2) maintenance plan.	.....	7/8/2019, 84 FR 32317.	
Vanderburgh and Warrick Counties 1997 8-hour ozone maintenance plan.	.....	2/25/2014, 79 FR 10385 ..	Revision to motor vehicle emission budgets.
Vigo County 1997 8-hour ozone maintenance plan	.....	2/25/2014, 79 FR 10385 ..	Revision to motor vehicle emission budgets.

[75 FR 58307, Sept. 24, 2010]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.770, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.771 Classification of regions.

(a) The Indiana plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
East Central Indiana Intrastate	II	II	III	III	III
Evansville (Indiana)-Owensboro-Henderson (Kentucky) Interstate	I	II	III	III	III
Louisville Interstate	I	I	III	III	I
Metropolitan Chicago Interstate (Indiana-Illinois)	I	I	I	I	I
Metropolitan Cincinnati Interstate	I	II	III	III	I
Metropolitan Indianapolis Intrastate	I	I	I	I	I
Northeast Indiana Intrastate	II	III	III	III	III
South Bend-Elkhart (Indiana)-Benton Harbor (Michigan) Interstate	I	IA	III	III	III
Southern Indiana Intrastate	IA	IA	III	III	III
Wabash Valley Intrastate	I	I	III	III	III

(b) The requirements of § 51.150 of this chapter are not met by the classification of counties in APC–22 for the purposes of attainment and maintenance of the total suspended particulate ambient air quality standards.

(c) The requirements of § 51.150 of this chapter are not met by the classification of counties in APC–22 for the purposes of attainment and maintenance of the photochemical oxidant (hydrocarbon) ambient air quality standards.

(d) The requirements of § 51.150 of this chapter are not met by the classification of Jefferson, LaPorte, Porter, Vigo and Warrick Counties in Indiana in Regulation APC–22 for the purposes of attainment and maintenance of the sulfur dioxide ambient air quality standards.

[37 FR 10863, May 31, 1972, as amended at 39 FR 16346, May 8, 1974; 40 FR 50033, Oct. 28, 1975; 41 FR 35677, Aug. 24, 1976; 42 FR 34519, July 6, 1977; 51 FR 40675, Nov. 7, 1986]

§ 52.772 [Reserved]

§ 52.773 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Indiana's plan for attainment and maintenance of the National Ambient Air Quality Standards under section 110 of the Clean Air Act.

(b) [Reserved]

(c) The Administrator finds that Indiana's new source review strategy satisfies all requirements of Part D, Title 1 of the Clean Air Act as amended in 1977.

(d)–(e) [Reserved]

(f) The Administrator finds ozone strategies for Clark, Elkhart, Floyd, Lake, Marion, Porter, and St. Joseph Counties satisfy all requirements of Part D, Title I of the Clean Air Act that are required to be submitted by January 1, 1981, except as noted below.

(g) The administrator finds that the total suspended particulate strategies for Clark, Dearborn, Dubois, St. Joseph, Vanderburgh, and Vigo Counties satisfy all the requirements of Part D, Title I of the Clean Air Act except as noted below.

(h) The Administrator finds that the SO_2 strategies for Lake, LaPorte, Marion, Vigo, and Wayne Counties satisfy all requirements of Part D, Title 1 of the Clean Air Act, as amended in 1977. See § 52.770 (c)(67) and (c)(72).

(i) The Administrator finds that Indiana's ozone plan for Lake and Porter Counties, which was required to be submitted by July 1, 1992, does not satisfy all the requirements of part D, title 1 of the Clean Air Act and, thus, is disapproved. See §§ 52.770(c)(69)and 52.770(d). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana's ozone plan and they remain approved.

(j) The Administrator finds that the following portions of Indiana's ozone and CO plans satisfy the related requirements of part D, title 1 of the Clean Air Act, as amended in 1977:

(1) The transportation control plans for Lake, Porter, Clark and Floyd Counties, submitted on May 14, 1986, June 10, 1986, and April 6, 1987.

(2) The vehicle inspection and maintenance plan for Clark, Floyd, Lake, and Porter Counties, submitted October 27, 1989, and January 19, 1990.

(3) The demonstration of attainment, submitted December 2, 1983, and the carbon monoxide plan as a whole for the designated nonattainment area in Lake County.

[37 FR 10864, May 31, 1972, as amended at 46 FR 38, Jan. 2, 1981; 47 FR 6275, Feb. 11, 1982; 47 FR 6623, Feb. 16, 1982; 47 FR 10825, Mar. 12, 1982; 47 FR 20586, May 13, 1982; 47 FR 30980, July 16, 1982; 51 FR 4915, Feb. 10, 1986; 53 FR 33811, Sept. 1, 1988; 53 FR 46613, Nov. 18, 1988; 54 FR 2118, Jan. 19, 1989; 55 FR 31052, July 31, 1990; 59 FR 51114, Oct. 7, 1994; 75 FR 82554, Dec. 30, 2010; 76 FR 59901, Sept. 28, 2011]

§ 52.774 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Louisville, Kentucky-Indiana $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Louisville $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of

April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

[76 FR 55545, Sept. 7, 2011, as amended at 76 FR 60375, Sept. 29, 2011]

§ 52.775 Legal authority.

(a) The requirements of § 51.232(b) of this chapter are not met since the following deficiencies exist in the local agency legal authority:

(1) East Chicago: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(2) Evansville: (i) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(ii) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(iii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(3) Gary: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(4) Hammond: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(5) Indianapolis: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(6) Michigan City: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(7) Wayne County: (i) Authority to require recordkeeping and to make inspections and conduct tests of air pollution sources is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(iii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(8) Lake County: (i) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(ii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(9) St. Joseph County: (i) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(ii) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(iii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(10) Vigo County: (i) Authority to require recordkeeping is inadequate (§ 51.230(e) of this chapter).

(ii) Authority to require installation of monitoring devices is inadequate (§ 51.230(f) of this chapter).

(iii) Authority to prevent construction, modification, or operation of any stationary source at any location where emissions from such source will prevent the attainment or maintenance of a national standard is inadequate (§ 51.230(d) of this chapter).

(11) Anderson County: (i) Authority to require installation of monitoring

devices is inadequate (§ 51.230(f) of this chapter).

[37 FR 10863, May 31, 1972, as amended at 40 FR 55329, Nov. 28, 1975; 51 FR 40676, Nov. 7, 1986; 52 FR 24367, June 30, 1987]

§ 52.776 Control strategy: Particulate matter.

(a) The requirements of subpart G of this chapter are not met since the plan does not provide for attainment and maintenance of the secondary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region.

(b) APC 4–R of Indiana's ''Air Pollution Control Regulations'' (emission limitation for particulate matter from fuel combustion sources), which is part of the control strategy for the secondary standards for particulate matter, is disapproved for the Metropolitan Indianapolis Intrastate Region since it does not provide the degree of control needed to attain and maintain the secondary standards for particulate matter. APC 4–R is approved for attainment and maintenance of the primary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region.

(c) APC–3 of Indiana's Air Pollution Control Regulations (visible emission limitation) is disapproved insofar as the phrase ''for more than a cumulative total of 15 minutes in a 24-hour period'' will interfere with attainment and maintenance of particulate standards.

(d) [Reserved]

(e) Part D—Conditional Approval—The complete Indiana plan for Clark, Dearborn, Dubois, Marion (except for coke batteries), St. Joseph, Vanderburgh, and Vigo Counties is approved provided that the following condition is satisfied:

(1) The Part D Plan must contain Industrial Fugitive Dust Regulations. The State must submit these by July 31, 1982.

(f) 325 IAC 11–3–2(f), (as amended on August 27, 1981) is not approved as it applies to Lake and Marion Counties, insofar as it does not meet the requirements of section 172(b)(3) of the Clean Air Act.

(g) 325 IAC 11–3–2(g) and 11–3–2(h) (as amended on August 27, 1981) are disapproved insofar as they do not meet the requirements of section 110(a)(2)(D) of the Clean Air Act.

(h) Equivalent Visible Emission Limits (EVEL). (1) A 20% 2-hour opacity limit for the underfire stack at Bethlehem Steel Corporation's Coke Battery No. 2 in Porter County is approved as an EVEL to determine compliance with the 325 IAC 6–2 SIP limit of 0.33 lbs/MMBTU. This EVEL is approved for as long as the SIP mass emission limit for this source remains the same as determined by 325 IAC 6–2 (October 6, 1980, submittal). See § 52.770(c)(6), (35), and (42).

(2) Revised opacity limits for the boilers at Olin Corporation in Warren County are approved at § 52.770(c)(51) as an EVEL to determine compliance with the 325 IAC 6–2 SIP limit of 0.80 lbs/MMBTU. This EVEL is approved for as long as the SIP mass emission limit for this source remains the same as determined by 325 IAC 6–2 (October 6, 1980 submittal). See § 52.770(c)(6) and (35).

(i) 325 IAC 6–2.1 is approved with the State's March 27, 1985, commitment that any ''bubble'' approved by the State under 325 IAC 6–2.1–2(b) and 3(b) will also be subject to the State's general ''bubble'' regulation, 325 IAC 2–4. The State additionally committed that until such time as 325 IAC 2–4 is approved as a part of the SIP, all such limits approved under the bubbling provisions of 325 IAC 6–2.1–2(b) and 3(b) will be submitted as site specific revisions to the SIP. Unless and until these emission point specific limits are approved as a portion of the SIP, the SIP limit for each individual emission point will remain the general limit calculated by means of the formulae in 325 IAC 6–2.1–2(a) and 3(a), even though a revised emission point specific limit has been adopted by Indiana under 325 IAC 6–2.1–2(b) and 3(b). See 52.770(c)(50).

(j) [Reserved]

(k) On January 18, 1984, Indiana submitted a visible emission limit on coke oven battery doors and a limit on total dissolved solids content of coke quench makeup water for Battery Number One at Citizens Gas and Coke Utility in Marion County. These limits are disapproved because they are impermissible relaxations of requirements for each new major stationary sources, as

provided at § 52.21(j)(2) and section 173 of the Clean Air Act. See § 52.770(c)(60).

(l) The revised Porter County TSP plan, as submitted by Indiana on October 15, 1984, is disapproved, because the State did not demonstrate that it assures the attainment and maintenance of the primary TSP NAAQS in Porter County, Indiana. See § 52.770(c)(61).

(m) The Indiana Part D TSP plan is disapproved insofar as it does not contain RACT level opacity limits for certain process fugitive sources in TSP nonattainment areas and, therefore, does not meet the requirements of section 172 of the Clean Air Act.

(n) Approval—On June 23, 1988, and July 17, 1989, the State of Indiana submitted committal SIPs for particulate matter with an aerodynamic diameter equal to or less than 10 micrometers (PM_{10}) for the Group II areas within Marion and Vigo Counties and all of Porter County, respectively. The committal SIPs meet all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM_{10} at 52 FR 24681.

(o) Approval—On November 16, 1988 and September 10, 1992, Indiana submitted the following list of control measures for particulate matter (PM) already in its State Implementation Plan as a Group III Plan: 326 IAC 1–3–2, its air monitoring network, its list of possible additional sites for PM, its Prevention of Significant Deterioration rules and the following control measures which are part of 325 IAC: 2, Permit Review Rules; 5–1, Opacity Limitations; 6–1–1 to 6–1–6, Nonattainment Area Limitations; 6–1–8, Dearborn County; 6–1–9, Dubois County; 6–1–12, Marion County; 6–1–13, Vigo County; 6–1–14, Wayne County; 6–1–15, Howard County; 6–1–16, Vandenburgh County; 6–1–17, Clark County; 6–1–18, St. Joseph County; 6–2, Particulate Emissions Limitations for Sources of Indirect Heating; 6–3, Process Operations; 6–4, Fugitive Dust Emissions; 11–1, Existing Foundries; 11–4, Fiberglass Insulation Manufacturing; 11–5, Fluoride Emission Limitations for Existing Primary Aluminum Plants.

(p) Approval—On January 13, 1993, the State of Indiana submitted a particulate matter State Implementation Plan revision for the Vermillion County nonattainment area. Additional information was submitted on February 22, 1993, and April 8, 1993. These materials demonstrate that the plan will provide for attainment of the National ambient air quality standards for particulate matter by December 31, 1994, in accordance with section 189(a)(1)(B) of the Clean Air Act.

(q) Approval—On April 8, 1993, and supplemented on June 17, 1997, the State of Indiana submitted a maintenance plan and a request that sections 15, 16, 21, 22, 27, 28, 33 and 34 of Clinton Township in Vermillion County be redesignated to attainment of the National Ambient Air Quality Standard for particulate matter. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(r) Approval—EPA is approving the PM_{10} maintenance plan for Lake County that Indiana submitted on September 25, 2002.

(s) *Determination of Attainment.* EPA has determined, as of *November 27, 2009*, that the Chicago-Gary-Lake County, IL-IN $PM_{2.5}$ nonattainment area, which includes Lake and Porter counties in IN, and the Evansville nonattainment area have attained the 1997 $PM_{2.5}$ NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for these areas to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standard for as long as the area(s) continue to meet the 1997 $PM_{2.5}$ NAAQS.

(t) *Determination of Attainment.* EPA has determined, as of March 9, 2011, that the Louisville, IN-KY $PM_{2.5}$ nonattainment area has attained the 1997 $PM_{2.5}$ NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 $PM_{2.5}$ NAAQS.

(u) *Disapproval.* EPA is disapproving the portions of Indiana's Infrastructure SIP for the 2006 24-hour $PM_{2.5}$ NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(v) Approval—The 1997 annual $PM_{2.5}$ maintenance plans for the following areas have been approved:

(1) The Evansville area (Dubois, Vanderburgh, and Warrick Counties, and portions of Gibson, Pike, and Spencer Counties), as submitted on April 8, 2011. The maintenance plan establishes 2015 motor vehicle emission budgets for the Evansville area of 2628.35 tons per year for NO_X and 57.05 tons per year for $PM_{2.5}$, and 2022 motor vehicle emission budgets of 1869.84 tons per year for NO_X and 53.83 tons per year for $PM_{2.5}$.

(2) The Indianapolis area (Hamilton, Hendricks, Johnson, Marion and Morgan Counties), as submitted on October 20, 2009, and supplemented on May 31, 2011, January 17, 2013, and March 18, 2013. The maintenance plan establishes 2015 motor vehicle emissions budgets for the Indianapolis area of 853.76 tpy for primary $PM_{2.5}$ and 25,314.49 tpy for NO_X and 2025 motor vehicle emissions budgets of 460.18 tpy for primary $PM_{2.5}$ and 13,368.60 tpy for NO_X.

(3) The Indiana portion of the Cincinnati-Hamilton nonattainment area (Lawrenceburg Township in Dearborn County), as submitted on December 9, 2010. The maintenance plan establishes 2015 motor vehicle emissions budgets for the Ohio and Indiana portions of the Cincinnati-Hamilton area of 1,678.60 tpy for primary $PM_{2.5}$ and 35,723.83 tpy for NO_X and 2021 motor vehicle emissions budgets of 1,241.19 tpy for primary $PM_{2.5}$ and 21,747.71 tpy for NO_X.

(4) Approval—On February 1, 2013, Indiana submitted a request to revise the motor vehicle emission budgets (budgets) in the 1997 annual $PM_{2.5}$ maintenance plan for the Lake and Porter County, Indiana maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets for Lake and Porter County, Indiana are 347.30 tpy $PM_{2.5}$ and 10,486.08 tpy NO_X. The 2025 motor vehicle emissions budgets for the Lake and Porter County area are 188.73 tpy $PM_{2.5}$ and 5,472.34 tpy for NO_X.

(5) Approval—On July 2, 2013 Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 annual fine particulate matter maintenance plan for the Evansville maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets are 199.93 tpy $PM_{2.5}$ and 5,642.95 tpy NO_X. The 2022 motor vehicle emissions budgets are 100.45 tpy $PM_{2.5}$ and 3,173 tpy NO_X.

(6) Approval—The 1997 annual $PM_{2.5}$ maintenance plan for the Indiana portion of the Louisville (KY-IN) (Madison Township, Jefferson County and Clark and Floyd Counties), has been approved as submitted on June 16, 2011. The maintenance plan establishes 2025 motor vehicle emissions budgets for the Louisville area to be 324.04 tpy for primary $PM_{2.5}$ and 9,311.76 tpy for NO_X.

(w) Approval—The 1997 annual $PM_{2.5}$ comprehensive emissions inventories for the following areas have been approved:

(1) Indiana's 2005 NO_X, directly emitted $PM_{2.5}$, and SO_2 emissions inventory satisfies the emission inventory requirements of section 172(c)(3) for the Evansville area.

(2) Indiana's 2006 NO_X, primary $PM_{2.5}$, and SO_2 emissions inventories and 2007/2008 VOC and ammonia emission inventories, as submitted on October 20, 2009 and supplemented on May 31, 2011 and March 18, 2013, satisfy the emission inventory requirements of section 172(c)(3) of the Clean Air Act for the Indianapolis area.

(3) Indiana's 2005 NO_X, directly emitted $PM_{2.5}$, and SO_2 emissions inventory; and 2007 VOCs and ammonia emissions inventory, satisfy the emissions inventory requirements of section 172(c)(3) for the Cincinnati-Hamilton area.

(4) Indiana's 2005 NO_X, primary $PM_{2.5}$, and SO_2 emissions inventory satisfies the emission inventory requirements of section 172(c)(3) of the Clean Air Act for Lake and Porter Counties.

(5) Indiana's 2008 NO_X, directly emitted $PM_{2.5}$, SO_2, VOC, and ammonia emissions inventory satisfies the emission inventory requirements of section 172(c)(3) for the Louisville area.

(x) *Determination of Attainment.* EPA has determined, as of September 29, 2011, that based upon 2007–2009 air quality data, the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana, nonattainment Area has attained the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(y) Approval-By submittal dated July 3, 2008, Indiana demonstrated satisfaction of the requirements for reasonably available control measures for its portion of the Cincinnati-Hamilton OH-KY-IN area.

[37 FR 15084, July 27, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.776, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.777 Control strategy: photochemical oxidants (hydrocarbons).

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for photochemical oxidants (hydrocarbons) in the Metropolitan Indianapolis Intrastate Region by May 31, 1975.

(b) The requirements of subpart G are not met by Revised APC–15 (November 8, 1974 submission) because it does not provide for attainment and maintenance of the photochemical oxidant (hydrocarbon) standards throughout Indiana.

(c) Part D—Conditional approval—The 1979 Indiana plan for Clark, Floyd, Elkhart, Lake, Marion, Porter, and St. Joseph Counties is approved provided the following conditions are satisfied:

(1) The plan for stationary source volatile organic compound control must contain the following:

(i)–(iv) [Reserved]

(v) For regulation 325 IAC 8–5, Section 6, Perchloroethylene Dry Cleaning, the State must conduct a study to demonstrate that the 1,500 gallons exemption meets RACT requirements and submit the results to EPA within 6 months of the effective date of final rulemaking on 325 IAC 8 for VOC from Group II CTG source categories. If the demonstrated emissions resulting from the State's exemption are not essentially equivalent to those resulting from the RACT requirements, then the State must submit to EPA by July 1, 1983, a rule which requires control of emissions from dry cleaning sources using less than 1,500 gallons of perchloroethylene per year.

(2) The stationary source volatile organic control measures submitted by the State on October 23, 1990, and August 19, 1991, are approved as described in 40 CFR 52.770(c)(87) with the exception of 326 IAC 8–5–4 Pneumatic Rubber Tire Manufacturing, on which USEPA has taken no action. It should be noted that although the State's control measures provide that equivalent test methods, alternative emission controls, and revisions in rule applicability must be submitted to the USEPA as proposed revisions to the State Implementation Plan (SIP), such proposed SIP revisions are not part of the SIP unless and until they are approved as such by the USEPA.

(d) Part D—Disapproval. The 1982 Indiana plan for Lake and Porter County is disapproved because it does not assure the attainment and maintenance of the NAAQS there. See §§ 52.770(c)(69) and 52.773(i). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana's ozone plan and they remain approved.

(e) Approval—The Administrator approves the incorporation of the photochemical assessment ambient monitoring system submitted by Indiana on November 15, 1993, into the Indiana State Implementation Plan. This submittal satisfies 40 CFR 58.20(f), which requires the State to provide for the establishment and maintenance of photochemical assessment monitoring stations (PAMS) by November 12, 1993.

(f) *Approval.* The Indiana Department of Environmental Management submitted two ozone redesignation requests and maintenance plans requesting the ozone nonattainment areas to

be redesignated to attainment for ozone: South Bend/Elkhart (St. Joseph and Elkhart Counties), submitted on September 22, 1993; Indianapolis (Marion County), submitted on November 12, 1993. The redesignation requests and maintenance plans meet the redesignation requirements in section 107(d)(3)(d) of the Act as amended in 1990. The redesignations meet the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Indiana Ozone State Implementation Plan for the above mentioned counties.

(g) The base year ozone precursor emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for the following areas: Vanderburgh County in the Evansville Metropolitan Area; Marion County in the Indianapolis Metropolitan Area; and St. Joseph and Elkhart Counties in the South Bend Metropolitan Area.

(h) On November 17, 1993, Indiana submitted two of three elements required by section 182(d)(1)(A) of the Clean Air Amendments of 1990 to be incorporated as part of the vehicle miles traveled (VMT) State Implementation Plan intended to offset any growth in emissions from a growth in vehicle miles traveled. These elements are the offsetting of growth in emissions attributable to growth in VMT which was due November 15, 1992, and, any transportation control measures (TCMs) required as part of Indiana's 15 percent reasonable further progress (RFP) plan which was due November 15, 1993. Indiana satisfied the first requirement by projecting emissions from mobile sources and demonstrating that no increase in emissions would take place. Indiana satisfied the second requirement by determining that no TCMs were required as part of Indiana's 15 percent RFP plan.

(i) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_X) reasonably available control technology (RACT), new source review (NSR), vehicle inspection/maintenance (I/M), and general conformity exemptions for the Indiana portion of the Chicago-Gary-Lake County severe ozone nonattainment area as requested by the States of Illinois, Indiana, Michigan, and Wisconsin in a July 13, 1994 submittal. This approval does not cover the exemption of NO_X transportation conformity requirements of section 176(c) for this area. Approval of these exemptions is contingent on the results of the final ozone attainment demonstration expected to be submitted in mid-1997. The approval will be modified if the final attainment demonstration demonstrates that NO_X emission controls are needed in the nonattainment area to attain the ozone standard in the Lake Michigan Ozone Study modeling domain.

(j) The base year ozone precursor emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for Lake and Porter Counties, Indiana.

(k) On June 26, 1995, and June 13, 1997, Indiana submitted a 15 percent rate-of-progress plan for the Lake and Porter Counties portion of the Chicago-Gary-Lake County ozone nonattainment area. This plan satisfies the counties' requirements under section 182(b)(1) of the Clean Air Act, as amended in 1990.

(l) [Reserved]

(m) On July 12, 1995, Indiana submitted a 15 percent rate-of-progress plan for the Clark and Floyd Counties portion of the Louisville ozone nonattainment area. This plan satisfies Clark and Floyd Counties' requirements under section 182(b) of the Clean Air Act, as amended in 1990.

(n) On July 12, 1995, Indiana submitted corrections to the 1990 base year emissions inventory for Clark and Floyd Counties. The July 12, 1995, corrections are recognized revisions to Indiana's emissions inventory.

(o) On July 12, 1995, Indiana submitted as a revision to the Indiana State Implementation Plan a ridesharing transportation control measure which affects commuters in Clark and Floyd Counties.

(p) On August 26, 1996, Indiana submitted a rule for the purpose of meeting oxides of nitrogen (NO_X) reasonably available control technology (RACT) requirements under section 182(f) of the Clean Air Act (Act) for the Clark and Floyd Counties moderate ozone nonattainment area. The rule's NO_X control requirements meets RACT for major sources of portland cement

kilns, electric utility boilers, and industrial, commercial, or institutional boilers. In addition, on April 30, 1997, Indiana certified to the satisfaction of the United States Environmental Protection Agency that, to the best of the State's knowledge, there are no remaining major sources of NO_X in Clark and Floyd Counties which need RACT rules. Indiana, therefore, has satisfied the NO_X RACT requirements under section 182(f) of the Act for the Clark and Floyd Counties ozone nonattainment area.

(q) Approval—On February 5, 1997, Indiana submitted a transportation control measure under section 108(f)(1)(A) of the Clean Air Amendments of 1990 for Vanderburgh County, Indiana to aid in reducing emissions of precursors of ozone. The transportation control measure being approved as a revision to the ozone state implementation plan is the conversion of at least 40 vehicles from gasoline as a fuel to compressed natural gas.

(r) Indiana's November 15, 1996, request for a 1-year attainment date extension for the Indiana portion of the Louisville moderate ozone nonattainment area which consists of Clark and Floyd Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1997.

(s) Approval—On November 4, 1993, the State of Indiana submitted a maintenance plan and a request that Vanderburgh County be redesignated to attainment of the 1-hour National Ambient Air Quality Standard for ozone. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Clean Air Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Indiana ozone State Implementation Plan.

(t) Approval—On May 24, 1996, the Indiana Department of Environmental Management submitted a revision to the ozone State Implementation Plan for Lake and Porter Counties. The submittal pertained to a plan for the implementation of the Federal transportation conformity requirements in accordance with 40 CFR part 51 subpart T—Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Act.

(u) On December 17, 1997, and January 22, 1998, Indiana submitted the Post-1996 rate-of-progress plan for the Lake and Porter Counties portion of the Chicago-Gary-Lake County ozone nonattainment area. This plan satisfies the counties' requirements under section 182(c)(2)(B) of the Clean Air Act, as amended in 1990. The plan contains a 1999 mobile source vehicle emission budget for volatile organic compounds of 40,897 pounds per average summer day.

(v) Negative declarations—Aerospace coating operations, industrial clean up solvents, industrial wastewater processes, offset lithography operations, business plastics, automotive plastics, and synthetic organic chemical manufacturing industries (SOCMI) batch processes, reactors and distillation units categories. On November 8, 1999, the State of Indiana certified to the satisfaction of the Environmental Protection Agency that no major sources categorized as part of the nine categories listed above and have a potential to emit 100 tons or more of volatile organic compounds annually are located in Clark or Floyd Counties in southeast Indiana, adjacent to Louisville, Kentucky.

(w) Negative declarations—Aerospace coating operations, industrial clean up solvents, industrial wastewater processes, offset lithography operations, business plastics, automotive plastics, and synthetic organic chemical manufacturing industries (SOCMI) batch processes, reactors and distillation units categories. On November 8, 1999, and January 10, 2000, the State of Indiana certified to the satisfaction of the Environmental Protection Agency that no major sources categorized as part of the nine categories listed above and have a potential to emit 25 tons or more of volatile organic compounds annually are located in Lake or Porter Counties in northwest Indiana.

(x) The request submitted by Indiana on April 11, 2001 and supplemented on August 24, 2001, to redesignate the Indiana portion of the Louisville moderate interstate ozone nonattainment area

from nonattainment to attainment was approved on October 23, 2001. The motor vehicle emissions budgets for VOC and NO_X in the Indiana portion of the Louisville moderate interstate maintenance plan are adequate for conformity purposes and approvable as part of the maintenance plan. The 1-hour ozone standard maintenance plan motor vehicle emission budgets for the entire interstate Louisville area for the purposes of transportation conformity are now 48.17 tons per summer day of VOC and 92.93 tons per summer day of NO_X for the year 2012.

(y) Lake and Porter Counties Attainment Demonstration Approval—On December 21, 2000, Indiana submitted a 1-hour ozone attainment demonstration plan as a requested revision to the Indiana State Implementation Plan. This approval includes: A modeled demonstration of attainment, a plan to reduce ozone precursor emissions by 3 percent per year from 2000 to 2007, and associated conformity budgets for 2002 and 2005, a revision to the NO_X waiver, a contingency measures plan for both the ozone attainment demonstration and the post-1999 ROP plan, the conformity budgets for the 2007 attainment year, until such time that revised budgets are submitted and found adequate for conformity purposes as called for by the state in its commitment to recalculate and apply a revised budget for conformity within two years of the formal release of MOBILE6, the RACM analysis, the commitment to conduct a mid-course review of the attainment status of the Lake Michigan area, and an agreed order between U.S. Steel (currently USX Corporation) and the IDEM signed by IDEM on March 22, 1996, which requires U.S. Steel to establish a coke plant process water treatment plant at its Gary Works. Today's action finalizes approval of Indiana's 1-hour ozone attainment demonstration SIP revision.

(z) EPA is approving a revision to the Indiana SIP submitted by Indiana on June 26, 2003. The revision is for transportation conformity budgets for the Clark and Floyd portion of the Louisville area. The revised 2012 motor vehicle emission budgets (MVEBs) for the total Louisville area are 47.28 tons per day (tpd) for volatile organic compounds (VOC) and 111.13 tpd for oxides of nitrogen.

(aa) Approval—On August 6, 2004, Indiana submitted a revision to the 1-hour ozone attainment plan for Lake and Porter Counties. The revision consists of new motor vehicle emission estimates and new MOBILE6 based motor vehicle emissions budgets. The motor vehicle emissions budget for volatile organic compounds (VOCs) for Lake and Porter Counties, Indiana for the 2005 interim Rate of Progress year is now 15.18 tons per summer day (tpd). The 2007 motor vehicle emissions budgets for the Lake and Porter Counties, Indiana are now 12.37 tpd VOC and 63.33 tpd oxides of nitrogen.

(bb)(1) Approval—On July 15, 2005, Indiana submitted requests to redesignate Greene and Jackson Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. These requests were supplemented with submittals dated September 6, 2005, September 7, 2005, October 6, 2005, and October 20, 2005. As part of the redesignation requests, the State submitted maintenance plans as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Greene and Jackson Counties. The 2015 motor vehicle emission budgets for Greene County are 1.46 tpd for VOC and 1.54 tpd for NO_X. The 2015 motor vehicle emission budgets for Jackson County are 1.65 tpd for VOC and 3.18 tpd for NO_X.

(2) Approval—On July 8, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Greene County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Greene County, Indiana are 0.90 tons per day VOC and 2.31 tons per day NO_X.

(cc)(1) Approval—On August 25, 2005, Indiana submitted a request to redesignate Delaware County to attainment of the 8-hour ozone National Ambient Air

Quality Standard. This request was supplemented with a submittal dated October 20, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Delaware County. The 2015 motor vehicle emission budgets for Delaware County are 3.50 tons per day for VOC and 4.82 tons per day for NO_X.

(2) Approval—On August 17, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Delaware County (Muncie), Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Delaware County, Indiana are 2.53 tons per day volatile organic compounds (VOCs) and 7.02 tons per day nitrogen oxides (NO_X).

(dd)(1) Approval—On July 5, 2005, Indiana submitted a request to redesignate Vigo County to attainment of the 8-hour ozone National Ambient Air Quality Standard. This request was supplemented with submittals dated October 20, 2005 and November 4, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Vigo County. The 2015 motor vehicle emission budgets are 2.84 tons per day for VOC and 3.67 tons per day for NO_X.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Vigo County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Vigo County, Indiana are 2.17 tons per day VOC and 5.07 tons per day NO_X.

(ee)(1) Approval—On June 2, 2005, Indiana submitted a request to redesignate Vanderburgh and Warrick Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. This request was supplemented with a submittal dated October 20, 2005. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. Also included were motor vehicle emission budgets for use to determine transportation conformity in Vanderburgh and Warrick Counties. The 2015 motor vehicle emission budgets are 4.20 tons per day for VOC and 5.40 tons per day for NO_X for both counties combined.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Vanderburgh and Warrick Counties, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 budgets for Vanderburgh and Warrick Counties, Indiana are 5.02 tons per day VOC and 12.61 tons per day NO_X.

(ff)(1) Approval—On May 30, 2006, Indiana submitted a request to redesignate Allen County to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were motor vehicle emission budgets to determine transportation conformity in Allen County. The 2020 motor vehicle emission budgets are 6.5 tons per day for VOC and 7.0 tons per day for NO_X.

(2) Approval—On July 2, 2013, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Allen County, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2020 budgets for Allen County, Indiana are 4.52 tons per day VOC and 9.72 tons per day NO_X.

(gg) Approval—On May 30, 2006, Indiana submitted a request to redesignate LaPorte County to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. The maintenance plan establishes 2020 motor vehicle emission budgets for LaPorte County of 3.40 tons per day for volatile organic compounds (VOC) and 6.50 tons per day for oxides of nitrogen (NO_X).

(hh)(1) Approval—On May 30, 2006, Indiana submitted a request to redesignate St. Joseph and Elkhart Counties to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were motor vehicle emission budgets to determine transportation conformity in St. Joseph and Elkhart Counties. The 2020 motor vehicle emission budgets are 6.64 tons per day for volatile organic compounds and 7.73 tons per day for oxides of nitrogen.

(2) Approval—On August 17, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the South Bend/Elkhart, Indiana area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2020 budgets for South Bend/Elkhart, Indiana are 6.73 tons per day volatile organic compounds (VOCs) and 13.95 tons per day nitrogen oxides (NO_X).

(ii) Approval—On November 15, 2006, Indiana submitted a request to redesignate the Indiana portion of the Louisville 8-hour ozone nonattainment area (Clark and Floyd Counties) to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in eight years as required by the Clean Air Act. Also included were motor vehicle emission budgets to determine transportation conformity for the entire Louisville area. The 2003 and 2020 motor vehicle emission budgets are 40.97 tons per day for VOC and 95.51 tons per day for NO_X, and 22.92 tons per day for VOC and 29.46 tons per day for NO_X, respectively.

(jj)(1) Approval—On March 26, 2007, Indiana submitted a request to redesignate Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties (the Central Indiana Area) (Indianapolis ozone nonattainment area) to attainment of the 8-hour ozone National Ambient Air Quality Standard. As part of the redesignation request, the State submitted an ozone maintenance plan as required by section 175A of the Clean Air Act. Part of the section 175A maintenance plan includes a contingency plan. The ozone maintenance plan establishes 2006 motor vehicle emission budgets for the Central Indiana Area of 54.32 tons per day for volatile organic compounds (VOC) and 106.19 tons per day for nitrogen oxides (NO_X) and 2020 motor vehicle emission budgets for the Central Indiana Area of 29.52 tons per day for VOC and 35.69 tons per day for NO_X.

(2) Approval—On April 16, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Central Indiana area. The budgets are being revised with budgets developed

with the MOVES2010a model. The 2006 budgets for Central Indiana are 64.32 tons per day volatile organic compounds (VOCs) and 210.93 tons per day nitrogen oxides (NO_X) and 2020 budgets are 25.47 tons per day VOCs and 69.00 tons per day of NO_X.

(kk) Approval—On October 25, 2007, the Indiana Department of Environmental Management (IDEM) requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, IL-IN nonattainment area, has attained the revoked 1-hour ozone NAAQS. After review of this submission, EPA approves this finding.

(ll) Lake/Porter Co 8-hr Ozone NO_X Waiver—On June 5, 2009, the Indiana Department of Environmental Management (IDEM) requested that EPA grant a waiver from the Clean Air Act requirement for Nitrogen Oxides (NO_X) Reasonably Available Control Technology (RACT) in Lake and Porter Counties. After review of this submission, EPA approves and grants this NO_X RACT waiver to Lake and Porter Counties.

(mm) Lake/Porter Co 8-hr Ozone Finding of Attainment—On June 5, 2009, the Indiana Department of Environmental Management (IDEM) requested that EPA find that the Indiana portion of the Chicago-Gary-Lake County, Illinois-Indiana (IL-IN) ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). After review of this submission and 2006–2008 ozone air quality data for this ozone nonattainment area, EPA finds that Lake and Porter Counties and the entire Chicago-Gary-Lake County, IL-IN area have attained the 1997 8-hour ozone NAAQS.

(nn) Approval—Indiana's 2002 inventory satisfies the base year emissions inventory requirements of section 172(c)(3) of the Clean Air Act for the Indiana portion of the Cincinnati-Hamilton, OH–KY–IN area under the 1997 8-hour ozone standard.

(oo)(1) Approval—On January 21, 2010, the Indiana Department of Environmental Management submitted a request to redesignate the Indiana portion of the Cincinnati-Hamilton, OH–KY–IN area to attainment of the 8-hour ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. The 2015 motor vehicle emissions budgets for the Ohio and Indiana portions of the Cincinnati-Hamilton, OH–KY–IN area are 31.73 tpd for VOC and 49.00 tpd for NO_X. The 2020 motor vehicle emissions budgets for the Ohio and Indiana portions of the area are 28.82 tpd for VOC and 34.39 tpd for NO_X.

(2) Approval—On December 11, 2012, Indiana submitted a request to revise the approved MOBILE6.2 motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Indiana portion of the Cincinnati-Hamilton, OH–KY–IN maintenance area. The budgets are being revised with budgets developed with the MOVES2010a model. The 2015 motor vehicle emissions budgets for the Ohio and Indiana portions are 56.06 tpd VOC and 94.25 tpd NO_X. The 2020 motor vehicle emissions budgets for the Ohio and Indiana portions of the area are 42.81 tpd VOC and 73.13 tpd for NO_X.

(pp)(1) Approval—On June 5, 2009, the Indiana Department of Environmental Management submitted a request to redesignate Lake and Porter Counties to attainment of the 1997 8-hour ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175A maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years, as required by the Clean Air Act. The 2010 motor vehicle emissions budgets for Lake and Porter Counties are 10.5 tpd for VOC and 40.6 tpd for NO_X. The 2020 motor vehicle emissions budgets for Lake and Porter Counties are 6.0 tpd for VOC and 12.6 tpd for NO_X.

(2) Approval—On February 1, 2013, Indiana submitted a request to revise the motor vehicle emission budgets (budgets) in the 1997 8-hour ozone maintenance plan for the Lake and Porter County, Indiana maintenance area. The budgets are being revised with budgets

developed with the MOVES2010a model. The 2010 motor vehicle emissions budgets for Lake and Porter County, Indiana are 13.99 tpd VOC and 47.26 tpd NO_X. The 2020 motor vehicle emissions budgets for the Lake and Porter County area are 5.99 tpd VOC and 16.69 tpd for NO_X.

(qq) Approval—Indiana's 2002 VOC and NO_X emissions inventories satisfy the emission inventory requirements of section 182(a)(1) of the Clean Air Act for Lake and Porter Counties under the 1997 8-hour ozone NAAQS.

(rr) Approval—EPA is approving a request submitted by the State of Indiana on October 10, 2006, and supplemented on November 15, 2006, November 29, 2007, November 25, 2008, April 23, 2010 and November 19, 2010, to discontinue the vehicle inspection and maintenance (I/M) program in Clark and Floyd Counties. The submittal also includes Indiana's demonstration that eliminating the I/M programs in Clark and Floyd Counties will not interfere with the attainment and maintenance of the ozone NAAQS and the fine particulate NAAQS and with the attainment and maintenance of other air quality standards and requirements of the CAA. We are further approving Indiana's request to modify the SIP such that I/M is no longer an active program in these areas and is instead a contingency measure in this area's maintenance plan.

(ss) *Disapproval.* EPA is disapproving Indiana's December 5, 2012, ozone redesignation request for Lake and Porter Counties for the 2008 ozone standard. EPA is also disapproving Indiana's motor vehicle emission budgets and ozone maintenance plan submitted with the redesignation request.

(tt) *Determination of attainment.* As required by section 181(b)(2)(A) of the Clean Air Act, the EPA has determined that the Cincinnati, OH-KY-IN Marginal 2008 ozone nonattainment area has attained the 2008 ozone NAAQS by the applicable attainment date of July 20, 2015.

(uu) Approval—On February 23, 2016, the Indiana Department of Environmental Management submitted a request to redesignate the Indiana portion of the Cincinnati, OH–KY–IN area to attainment of the 2008 ozone NAAQS. As part of the redesignation request, the State submitted a maintenance plan as required by section 175A of the Clean Air Act. Elements of the section 175 maintenance plan include a contingency plan and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. The 2020 motor vehicle emissions budgets for the Indiana and Ohio portions of the Cincinnati, OH–KY–IN area are 30.02 tons per summer day (TPSD) for VOC and 30.79 TPSD for NO_X. The 2030 motor vehicle emissions budgets for the Indiana and Ohio portions of the area are 18.22 TPSD for VOC and 16.22 TPSD for NO_X.

(vv) On June 15, 2016, Indiana submitted 2011 volatile organic compounds and oxides of nitrogen emissions inventories for the Indiana portion of the Chicago-Naperville, Illinois-Indiana-Wisconsin nonattainment area for the 2008 ozone national ambient air quality standard as a revision of the Indiana state implementation plan. The documented emissions inventories are approved as a revision of the state's implementation plan.

(ww) On June 15, 2016, Indiana submitted a certification that sources of volatile organic compounds or oxides of nitrogen located in Lake and Porter Counties are required to annually submit statements documenting these emissions to the state. This certification is approved as a revision to the state's implementation plan.

[38 FR 16565, June 22, 1973]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.777, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.778 Compliance schedules.

(a) The requirements of § 51.262(a) of this chapter are not met since the compliance schedules for sources of nitrogen oxides extend over a period of more than 18 months and periodic increments of progress are not included.

(b)–(c) [Reserved]

(d) The compliance schedule for the source identified below is disapproved as not meeting the requirements of subpart N of this chapter. All regulations cited are air pollution control

regulations of the State, unless otherwise noted.

Source	Location	Regulation involved	Date schedule adopted
LAKE COUNTY			
Commonwealth Edison Co. of Indiana, Inc. (State Line Station).	Hammond	APC 13	Jan. 18, 1973.

[38 FR 12698 May 14, 1973, as amended at 39 FR 28158, Aug. 5, 1974; 51 FR 40675, 40676, 40677, Nov. 7, 1986; 54 FR 25258, June 14, 1989]

§ 52.779 [Reserved]

§ 52.780 Review of new sources and modifications.

(a) The requirements of § 51.160(a) of this chapter are not met in that the plan does not contain procedures to enable the State to determine whether construction or modification of coal burning equipment having a heat input of between 350,000 Btu per hour and 1,500,000 Btu per hour will result in violations of applicable portions of the control strategy and section 4(a)(2)(iii) of APC–19 is disapproved to the extent that it exempts coal burning equipment having a heat input of between 350,000 Btu per hour and 1,500,000 Btu per hour from pre-construction/modification review.

(b)–(c) [Reserved]

(d) Limited regulation for the review of new sources and modifications. (1) This requirement is applicable to any coal burning equipment other than smokehouse generators, having a heat input of between 350,000 Btu per hour (88.2 Mg-cal/h) and 1,500,000 Btu per hour (378.0 MG cal/h), the construction of which was commenced after May 14, 1973.

(2) No owner or operator shall commence construction or modification of any coal burning equipment subject to this regulation without first obtaining approval from the Administrator of the location and design of such source.

(i) Application for approval to construct or modify shall be made on forms furnished by the Administrator,

(ii) A separate application is required for each source.

(iii) Each application shall be signed by the applicant.

(iv) Each application shall be accompanied by site information, plans, descriptions, specifications, and drawings showing the design of the source, the nature and amount of emissions, and the manner in which it will be operated and controlled.

(v) Any additional information, plans, specifications, evidence, or documentation that the Administrator may require shall be furnished upon request.

(3) No approval to construct or modify will be granted unless the applicant shows to the satisfaction of the Administrator that:

(i) The source will operate without causing a violation of any local, State, or Federal regulation which is part of the applicable plan; and

(ii) The source will not prevent or interfere with attainment or maintenance of any national standard.

(4) (i) Within twenty (20) days after receipt of an application to construct, or any addition to such application, the Administrator shall advise the owner or operator of any deficiency in the information submitted in support of the application. In the event of such a deficiency, the date of receipt of the application for the purpose of paragraph (d)(4)(ii) of this section, shall be the date on which all required information is received by the Administrator.

(ii) Within thirty (30) days after receipt of a complete application, the Administrator shall:

(*a*) Make a preliminary determination whether the source should be approved, approved with conditions, or disapproved.

(*b*) Make available in at least one location in each region in which the proposed source would be constructed, a copy of all materials submitted by the owner or operator, a copy of the Administrator's preliminary determination and a copy or summary of other

materials, if any, considered by the Administrator in making his preliminary determination; and

(*c*) Notify the public, by prominent advertisement in a newspaper of general circulation in each region in which the proposed source would be constructed, of the opportunity for written public comment on the information submitted by the owner or operator and the Administrator's preliminary determination on the approvability of the source.

(iii) A copy of the notice required pursuant to this paragraph shall be sent to the applicant and to state and local air pollution control agencies, having cognizance over the location where the source will be situated.

(iv) Public comments submitted in writing within thirty (30) days after the date such information is made available shall be considered by the Administrator in making his final decision on the application. No later than ten (10) days after the close of the public comment period, the applicant may submit a written response to any comment submitted by the public. The Administrator shall consider the applicant's response in making his final decision. All comments shall be made available for public inspection in at least one location in the region in which the source would be located.

(v) The Administrator shall take final action on an application within thirty (30) days after the close of the public comment period. The Administrator shall notify the applicant in writing of his approval, conditional approval, or denial of the application, and shall set forth his reasons for conditional approval or denial. Such notification shall be made available for public inspection in at least one location in the region in which the source would be located.

(vi) The Administrator may extend each of the time periods specified in paragraph (d)(4) (ii), (iv) or (v) of this section by no more than 30 days, or such other period as agreed to by the applicant and the Administrator.

(5) The Administrator may impose any reasonable conditions upon an approval, including conditions requiring the source to be provided with:

(i) Sampling ports of a size, number, and location as the Administrator may require,

(ii) Safe access to each port,

(iii) Instrumentation to monitor and record emission data, and

(iv) Any other sampling and testing facilities.

(6) The Administrator may cancel an approval if the construction is not begun within 2 years from the date of issuance, or if during the construction, work is suspended for 1 year.

(7) Any owner or operator subject to the provisions of this regulation shall furnish the Administrator written notification as follows:

(i) A notification of the anticipated date of initial startup of a source not more than 60 days or less than 30 days prior to such date.

(ii) A notification of the actual date of initial startup of a source within 15 days after such date.

(8) Within 60 days after achieving the maximum production rate at which the source will be operated but not later than 180 days after initial startup of such source, the owner or operator of such source shall conduct a performance test(s) in accordance with methods and under operating conditions approved by the Administrator and furnish the Administrator a written report of the results of such performance test.

(i) Such test shall be at the expense of the owner or operator.

(ii) The Administrator may monitor such test and may also conduct performance tests.

(iii) The owner or operator of a source shall provide the Administrator 15 days prior notice of the performance test to afford the Administrator the opportunity to have an observer present.

(iv) The Administrator may waive the requirement of performance tests if the owner or operator of a source has demonstrated by other means to the Administrator's satisfaction that the source is being operated in compliance with all local, State, and Federal regulations which are part of the applicable plan.

(9) [Reserved]

(10) Approval to construct or modify shall not relieve any owner or operator

of the responsibility to comply with all local, State, and Federal regulations which are part of the applicable plan.

(11) Any owner or operator who constructs, modifies, or operates a stationary source not in accordance with the application, as approved and conditioned by the Administrator, or any owner or operator of a stationary source subject to this paragraph who commences construction or modification without applying for and receiving approval hereunder, shall be subject to enforcement action under section 113 of the Act.

(e) The requirements of subpart I of this chapter are not met because the State failed to submit a plan for review of new or modified indirect sources.

(f) Regulation for review of new or modified indirect sources. The provisions of §52.22(b) are hereby incorporated by reference and made a part of the applicable implementation of the plan for the State of Indiana.

(g) Delegation of authority. (1) The Administrator shall have the authority to delegate responsibility for implementing the procedures for conducting source review pursuant to this section in accordance with paragraphs (f) (2), (3), and (4) of this section.

(2) Where the Administrator delegates the responsibility for implementing the procedures for conducting source review pursuant to this section to any Agency, other than a Regional Office of the Environmental Protection Agency, a copy of the notice pursuant to paragraph (d)(4)(iii) of this section shall be sent to the Administrator through the appropriate Regional Office.

(3) In accordance with Executive Order 11752, the Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be delegated, other than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are owned or operated by the Federal Government or for new or modified sources located on Federal lands; except that, with respect to the latter category, where new or modified sources are constructed or operated on Federal lands pursuant to leasing or other Federal agreements, the Federal Land Manager may at his discretion, to the extent permissible under applicable statutes and regulations, require the lessee or permittee to be subject to new source review requirements which have been delegated to a State or local agency pursuant to this paragraph.

(4) The Administrator's authority for implementing the procedures for conducting source review pursuant to this section shall not be redelegated, other than to a Regional Office of the Environmental Protection Agency, for new or modified sources which are located in Indian reservations except where the State has assumed jurisdiction over such land under other laws, in which case the Administrator may delegate his authority to the States in accordance with paragraphs (g) (2), (3), and (4) of this section.

(h) On March 7, 1994, Indiana requested a revision to the State Implementation Plan (SIP) for New Source Review (NSR) to satisfy the requirements of the Clean Air Act Amendments of 1990. The Indiana 326 IAC regulations do not include a definition of ''federally enforceable''. On July 13, 1994, Pamela Carter, Attorney General of the State of Indiana, sent a letter to USEPA clarifying Indiana's interpretation of the definition of federally enforceable. The letter states that federally enforceable, e.g. as used in 326 IAC 2–3–1, should be interpreted in accordance with the federal definition at 40 CFR 51.165(a)(1)(xiv). The USEPA took the opportunity of rulemaking on the State's submittal to recodify the permitting SIP to conform to Title 326 the Indiana Administrative Code.

[37 FR 10863, May 31, 1972, as amended at 38 FR 12698, May 14, 1973; 39 FR 4663, Feb. 6, 1974; 39 FR 7281, Feb. 25, 1974; 40 FR 50270, Oct. 29, 1975; 51 FR 40677, Nov. 7, 1986; 59 FR 51114, Oct. 7, 1994]

§52.781 Rules and regulations.

(a) [Reserved]

(b) A part of the second sentence in section 3, APC–17, which states ''Where there is a violation or potential violation of ambient air quality standards, existing emission sources or any existing air pollution control equipment shall comply with th

(c)–(d) [Reserved]

(e) Section 2(d) of APC–20, Fugitive Dust Emissions, is disapproved because it is unenforceable within the terms of the regulation.

(f) Subsections 3(b)(3) and 3(b)(5) of APC–2 (May 18, 1977) are disapproved because they are unenforceable within the terms of the regulation.

(g) *Disapproval.* EPA is disapproving 326 IAC 25–2–1, 326 IAC 25–2–3 and 326 IAC 25–2–4 as revisions to the Indiana SIP.

(h) *Disapproval.* EPA is disapproving the December 10, 2009 submittal of 326 IAC 7–4–14 as a revision to the Indiana SIP.

[37 FR 10863, May 31, 1972, as amended at 37 FR 15084, July 27, 1972; 38 FR 12698, May 14, 1973; 40 FR 50033, Oct. 28, 1975; 43 FR 26722, June 22, 1978; 75 FR 72965, Nov. 29, 2010; 78 FR 78725, Dec. 27, 2013]

§ 52.782 Request for 18-month extension.

(a) The requirements of § 51.341 of this chapter are not met since the request for an 18-month extension for submitting that portion of the plan that implements the secondary standards for particulate matter in the Metropolitan Indianapolis Intrastate Region does not show that attainment of the secondary standards will require emission reductions exceeding those which can be achieved through the application of reasonably available control technology.

[37 FR 10863, May 31, 1972, as amended at 51 FR 40677, Nov. 7, 1986]

§ 52.783 [Reserved]

§ 52.784 Transportation and land use controls.

(a) To complete the requirements of subpart L and subpart G of this chapter, the Governor of Indiana must submit to the Administrator:

(1) No later than April 15, 1973, transportation and/or land use control strategies and a demonstration that said strategies, along with Indiana's presently adopted stationary source emission limitations for carbon monoxide and hydrocarbons and the Federal Motor Vehicle Control Program, will attain and maintain the national standards for carbon monoxide and photochemical oxidants (hydrocarbons) in the Metropolitan Indianapolis Intrastate Region by May 31, 1975. By such date (April 15, 1973), the State also must submit a detailed timetable for implementing the legislative authority, regulations, and administrative policies required for carrying out the transportation and/or land use control strategies by May 31, 1975.

(2) No later than July 30, 1973, the legislative authority that is needed for carrying out such strategies.

(3) No later than December 30, 1973, the necessary adopted regulations and administrative policies needed to implement such strategies.

[38 FR 7326, Mar. 20, 1973, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.785 Control strategy: Carbon monoxide.

(a) The requirements of subpart G of this chapter are not met because the plan does not provide for attainment and maintenance of the national standards for carbon monoxide in the Metropolitan Indianapolis Intrastate Region by May 31, 1975.

(b) On December 21, 1999, the Indiana Department of Environmental Management submitted carbon monoxide maintenance plans for those portions of Lake and Marion Counties which they requested the Environmental Protection Agency redesignate to attainment of the carbon monoxide national ambient air quality standard.

(c) Approval—The Indiana Department of Environmental Management (IDEM) submitted Carbon Monoxide (CO) Limited Maintenance Plan Updates for Lake and Marion Counties on January 12, 2009. The updated Limited Maintenance Plans demonstrate attainment of the CO National Ambient Air Quality Standard (NAAQS) for Lake and Marion Counties for an additional ten years.

[38 FR 16565, June 22, 1973, as amended at 51 FR 40676, Nov. 7, 1986; 65 FR 2888, Jan. 19, 2000; 74 FR 52893, Oct. 15, 2009]

§ 52.786 Inspection and maintenance program.

(a) Definitions:

(1) *Inspection and maintenance program* means a program to reduce emissions from in-use vehicles through identifying vehicles that need emission

control related maintenance and requiring that such maintenance be performed.

(2) *Light-duty vehicle* means a motor vehicle rated at 6,000 lb. GVW (gross vehicle weight) or less.

(3) All other terms used in this section that are defined in part 51, subpart G of this chapter, are used herein with the meanings so defined.

(b) This regulation is applicable in the County of Marion, Indiana (including all cities, towns and municipal corporations therein).

(c) The State of Indiana shall establish and cause the implementation of an inspection and maintenance program applicable to all gasoline-powered light duty vehicles which are registered in Marion County. Such program shall conform with this § 52.786. The Consolidated City of Indianapolis, the County of Marion, and other municipalities within the County of Marion, shall take all legislative, executive, or other action necessary to establish and implement the program required by this regulation.

(d) Not later than April 1, 1975, the State of Indiana, the County of Marion and the Consolidated City of Indianapolis shall jointly submit to the Administrator, for his approval, legally adopted legislation and/or regulations establishing the regulatory scheme for the inspection/maintenance program required by paragraph (c) of this section. The legislation and/or regulations shall include:

(1) Provisions requiring inspection of all light-duty motor vehicles subject to the inspection program required by paragraph (c) of this section at periodic intervals no more than 1 year apart by means of an idle test. Any class or category of vehicles that are found to be rarely used on public streets and highways (such as classic or antique vehicles) may be exempted.

(2) Provisions for regulatory criteria that are consistent with achieving an 11 percent reduction of hydrocarbon emissions from light-duty vehicles.

(3) Provisions ensuring that failed vehicles receive, within 30 days, the maintenance necessary to achieve compliance with the inspection standards. These provisions shall impose sanctions against owners of non-complying vehicles, require retest of failed vehicles following maintenance, require a suitable distinctive tag or sticker for display on complying vehicles, and include such other measures as are necessary or appropriate.

(4) Provisions establishing a certification program to ensure that testing stations performing the required tests have the necessary equipment and knowledgeable operators to perform the tests satisfactorily, imposing sanctions against non-complying testing stations, and containing such other measures as necessary or appropriate to a testing program.

(5) Provisions prohibiting vehicles from being intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them no longer to comply with the inspection standards. These may include authorization of spot checks of idle adjustments or of a suitable type of physical seal or tag on vehicles. These provisions shall include appropriate penalties for violation by any person.

(6) Designation of agency or agencies responsible for conducting, overseeing, and enforcing the inspection/maintenance program. Private parties may be designated to conduct parts of the program to certify compliance.

(e) After July 1, 1976, the State of Indiana, County of Marion, the Consolidated City of Indianapolis, and other municipalities in Marion County shall not allow the operation on streets, roads, or highways under their ownership or control of any light duty motor vehicle subject to the inspection program established pursuant to paragraph (c) of this section that does not comply with the applicable standards and procedures adopted in accordance with paragraph (d) of this section.

(f) After July 1, 1976, no person shall operate or allow the operation of any motor vehicle subject to the inspection program established pursuant to paragraph (c) of this section that does not comply with the applicable standards and procedures adopted in accordance with paragraph (d) of this section.

(g) No later than October 1, 1974, the State of Indiana, County of Marion,

and the Consolidated City of Indianapolis shall jointly submit to the Administrator, for his approval, a detailed compliance schedule showing the steps they will take to establish, operate and enforce the inspection program required by paragraph (c) of this section including:

(1) A detailed description of the inspection program required by paragraph (c) of this section (including a description of the way in which the program will be established, operated, and enforced and the respective responsibilities of the State, county, and municipalities for such tasks).

(2) A description of the legal authority for establishing and enforcing the inspection/maintenance program, including the text of proposed or adopted legislation and regulations.

(3) Specific dates (day, month, and year) by which various steps to implement the inspection/maintenance system will be completed, such steps to include, at a minimum, the following: submitting final plans and specifications for the system to the Administrator for this approval (this date to be no later than February 1, 1975), ordering necessary equipment (this date to be no later than April 15, 1975), commencement of onsite construction and/or installation, and system operational (this date to be no later than April 15, 1975, commencement of onsite construction and/ior installation, and system operational (this date to be no later than July 1, 1975).

(4) An identification of the sources and amounts of funds necessary to implement the system together with written assurances from the chief executive officers of the State, city, and county that they will seek such necessary funding from the appropriate legislative bodies.

(5) Other provisions necessary or appropriate to carry out the program.

(h) The State's December 2, 1992, commitment to timely adopt and implement enhanced inspection and maintenance (I/M) rules for Lake and Porter Counties is disapproved based on the failure of the State of Indiana to meet important milestones pertaining to the development and adoption of necessary authority for the I/M program. This disapproval initiates the sanction process of section 179(a) of the Act.

[39 FR 12348, Apr. 5, 1974, as amended at 46 FR 38, Jan. 2, 1981; 51 FR 40677, Nov. 7, 1986; 55 FR 31052, July 31, 1990; 58 FR 62535, Nov. 29, 1993]

§ 52.787 Gasoline transfer vapor control.

(a) *Gasoline* means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the County of Marion, Indiana (including all cities, towns and municipal corporations therein).

(c) No person shall transfer or permit the transfer of gasoline from any delivery vessel into any stationary source container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a control system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary storage container location. The control system shall include one or more of the following:

(1) A vapor-tight return line from the storage container to the delivery vessel and a system that will ensure that the vapor return line is connected before gasoline can be transferred into the container. If a ''vapor-balance return'' system is used to meet the requirements of this section, the system shall be so constructed as to be readily adapted to retrofit with an adsorption system, refrigeration-condensation system or equivalent system connected to the stationary storage container.

(2) Refrigeration-condensation system or adsorption system connected to the stationary storage container.

(3) An equivalent system, approved by the Administrator or his designee, designed to recover or eliminate no less than 90 percent by weight of the organic compounds in the displaced vapor.

(d) No person shall own or operate a delivery vessel containing gasoline unless the delivery vessel is so designed and maintained as to be vapor-tight at all times. This paragraph (d) shall not apply to delivery vessels in transit

through Marion County which neither are filled nor deliver gasoline therein, nor shall this paragraph (d) be construed to prohibit safety-valves on other devices required by governmental safety regulations. Delivery vessels which are filled in Marion County but do not deliver in Marion County may be controlled only for filling.

(e) No person shall own or operate a facility for the filling of delivery vessels with gasoline unless the facility is equipped with a control system, which can recover or eliminate at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling. Facilities which have a daily throughput of 20,000 gallons or less are required to have a vapor recovery system in operation no later than May 31, 1977. Delivery vessels and storage containers served exclusively by facilities required to have a vapor recovery system in operation no later than May 31, 1977, also will be required to meet the provisions of this section no later than May 31, 1977.

(f) After March 1, 1976, no person shall intentionally release gasoline vapors from a delivery vessel, except to a control system that can recover or eliminate at least 90 percent by weight of organic compounds in the vapors released.

(g) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of farming equipment.

(2) Any stationary container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(4) Gasoline storage compartments of 1,000 gallons or less in gasoline delivery vessels in use on the promulgated date of this regulation will not be required to be retrofitted with a vapor return system until January 1, 1977.

(h) The operation of a source, otherwise, subject to paragraph (c), (d), or (e) of this section, shall not be a violation of paragraph (c), (d), or (e), respectively, if the following acts shall be completed with respect to such source before the following dates:

(1) October 1, 1974. The owner of the source or his designee shall submit to the Administrator, a final control plan, which describes at a minimum the steps that will be taken by the source to achieve compliance with the applicable provisions of paragraphs (c), (d), and (e) of this section.

(2) March 1, 1975. Negotiate and sign all necessary contracts for control systems, or issue orders for the purchase of component parts to accomplish emission control.

(3) May 1, 1975. Initiate on-site construction or installation of control system equipment.

(4) February 1, 1976. Complete on-site construction or installation of control system equipment.

(5) March 1, 1976. Achieve final compliance with the applicable provisions of paragraphs (c), (d), and (e) of this section.

(6) Any owner of a source subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) As an alternative to compliance with the schedule under paragraph (h) of this section:

(1) The owner of a source which is in compliance with the provisions of paragraph (c), (d), or (e) of this section, shall certify such compliance to the Administrator by October 1, 1974. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) A source for which a compliance schedule is adopted by the State and approved by the Administrator may operate in conformity with such compliance schedule.

(3) The owner of a source may submit to the Administrator, by October 1, 1974, a proposed alternative compliance schedule. No such schedule may provide for compliance after March 1, 1976. Until promulgated by the Administrator, such source shall conform with applicable portions of paragraph (c),

(d), (e), or (h) of this section. Upon promulgation of the compliance schedule by the Administrator, no person shall own or operate the source except in conformity with the promulgated schedule.

(j) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (h) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

(k) Any new container, facility, or vessel subject to this regulation that is placed in operation after October 1, 1974, shall within 30 days of commencing operation submit a compliance schedule in conformity with paragraph (i) of this section and shall otherwise comply with this section. Any facility subject to this regulation that is placed in operation after March 1, 1976, shall comply with the applicable requirements of this section immediately upon commencing operation.

[39 FR 12349, Apr. 5, 1974, as amended at 39 FR 41253, Nov. 26, 1974; 41 FR 56643, Dec. 29, 1976; 42 FR 29004, June 7, 1977]

§ 52.788 Operating permits.

Emission limitations and other provisions contained in operating permits issued by the State in accordance with the provisions of the federally approved permit program shall be the applicable requirements of the federally approved State Implementation Plan (SIP) for Indiana for the purpose of sections 112(b) and 113 of the Clean Air Act and shall be enforceable by the United States Environmental Protection Agency (USEPA) and any person in the same manner as other requirements of the SIP. USEPA reserves the right to deem an operating permit not federally enforceable. Such a determination will be made according to appropriate procedures, and be based upon the permit, permit approval procedures or permit requirements which do not conform with the operating permit program requirements or the requirements of USEPA's underlying regulations.

[60 FR 43012, Aug. 18, 1995]

§ 52.789 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Indiana's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with

such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

(3) Notwithstanding the provisions of paragraph (b)(2) of this section, if, at the time of the approval of Indiana's SIP revision described in paragraph (b)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011, as amended at 81 FR 74586 and 74594, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.790 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Indiana and for which requirements are set forth under the CSAPR SO_2 Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Indiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.39 except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Indiana's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

§ 52.791 Visibility protection.

(a) *Regional Haze.* The requirements of section 169A of the Clean Air Act are not met because the regional haze plan submitted by Indiana on January 14, 2011, and supplemented on March 10, 2011, does not include fully approvable measures for meeting the requirements of 40 CFR 51.308(d)(3) and 51.308(e) with respect to emissions of NO_X and SO_2 from electric generating units. EPA has given limited approval and limited disapproval to the plan provisions addressing these requirements.

(b) *Measures Addressing Limited Disapproval Associated with NO_X.* The deficiencies associated with NO_X identified in EPA's limited disapproval of the regional haze plan submitted by Indiana on January 14, 2011, and supplemented on March 10, 2011, are satisfied by § 52.789.

(c) *Measures Addressing Limited Disapproval Associated with SO_2.* The deficiencies associated with SO_2 dentified in EPA's limited disapproval of the regional haze plan submitted by Indiana on January 14, 2011 and supplemented on March 10, 2011 are satisfied by § 52.790.

[77 FR 33657, June 7, 2012]

§ 52.792 [Reserved]

§ 52.793 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are not met, since the plan does not include approvable procedures for preventing the significant deterioration of air quality.

(b) *Regulations for preventing significant deterioration of air quality.* The provisions of § 52.21(a)(2) and (b) through (bb) are hereby incorporated and made a part of the applicable state plan for the State of Indiana.

(c) All applications and other information required pursuant to § 52.21 of this part from sources located in the State of Indiana shall be submitted to the state agency, Indiana Department of Environmental Management, Office of Air Quality, 100 North Senate Avenue, Indianapolis, Indiana 46204, rather than to EPA's Region 5 office.

[45 FR 52741, Aug. 7, 1980, as amended at 53 FR 18985, May 26, 1988; 68 FR 11323, Mar. 10, 2003; 75 FR 55275, Sept. 10, 2010]

§ 52.794 Source surveillance.

(a) The requirements of 51.212 of this chapter are not met by the phrase ''for more than a cumulative total of 15 minutes in a 24-hour period'' contained in section 1 of APC–3 of the Indiana Air Pollution Control Regulations.

(b) [Reserved]

(c) 325 IAC 5–1 (October 6, 1980, submittal—§ 52.770(c)(53)) is disapproved for the Lake County sources specifically listed in Table 2 of 325 IAC 6–1–10.2 (§ 52.770(c)(57)); for pushing and quenching sources throughout the State (August 27, 1981, 325 IAC 11–3–2 (g) and (h)—§ 52.770(c)(42)); and for coke oven doors in Lake and Marion Counties (325 IAC 11–3–2(f)—§ 52.770(c)(42)). Applicability of this regulation to these sources is being disapproved because 325 IAC 5–1 does not meet the enforceability requirements of § 51.22 as it applies to these sources. Opacity limits in 325 IAC 6–1–10.2 and certain opacity limits in 325 IAC 11–3 supersede those in 325 IAC 5–1, and USEPA has previously disapproved these superseding regulations (§ 52.776 (j), (g), and (f), respectively).

[40 FR 50033, Oct. 28, 1975; 41 FR 3475, Jan. 23, 1976, as amended at 48 FR 55860, Dec. 16, 1983; 51 FR 40676, 40677, Nov. 7, 1986; 52 FR 3644, Feb. 5, 1987; 52 FR 23038, June 17, 1987]

§ 52.795 Control strategy: Sulfur dioxide.

(a) Revised APC–13 (December 5, 1974 submission) of Indiana's Air Pollution Control regulations (sulfur dioxide emission limitation) is disapproved insofar as the provisions identified below will interfere with the attainment and maintenance of the suffix dioxide ambient air quality standards:

(1) The phrase ''equivalent full load'' in section 1(b)(2).

(2) The formula ''$E_p = 17.0\ Q_m^{0.67}$ where $E_p = E_m \times Q_m$'' in section 2(a).

(3) The phrase ''Direct fired process operations'' in sections 2(a), 3(c), 4(b), and 4(c).

(4) The modification of Q_m for non-Indiana coal as expressed in Section 2(a).

(b) The requirements of § 51.281 are not met by Warrick and Culley electrical generating stations enforcement orders which would revise the sulfur dioxide emission limitations for these two stations.

(c) The requirements of § 51.110(e) are not met by Wayne, Dearborn, Jefferson, Porter, and Warrick Counties.

(d)–(e) [Reserved]

(f) Approval—On March 14, 1996, the State of Indiana submitted a maintenance plan for Lawrence, Washington, and Warren Townships in Marion County and the remainder of the county, and requested that it be redesignated to attainment of the National Ambient Air Quality Standard for sulfur dioxide. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(g) Approval—On June 17, 1996, the State of Indiana submitted a maintenance plan for LaPorte, Vigo, and Wayne Counties and requested redesignation to attainment for the National Ambient Air Quality Standard for sulphur dioxide for each county in its entirety. The redesignation requests and maintenance plans satisfy all applicable requirements of the Clean Air Act.

(h) Approval—On June 21, 2005, and as supplemented on August 11, 2005, the State of Indiana submitted a request to redesignate the Lake County sulfur dioxide (SO_2) nonattainment area to attainment of the NAAQS. In its submittal, the State also requested that EPA approve the maintenance plan for the area into the Indiana SO_2 SIP. The redesignation request and maintenance plan satisfy all applicable requirements of the Clean Air Act.

(i) Approval—On March 28, 2013 the State of Indiana submitted a maintenance plan update for the Lake County, Indiana SO_2 maintenance area. This plan update demonstrates that Lake County will maintain attainment of the 1971 SO_2 NAAQS through 2025. This maintenance plan update satisfies section 175A of the Act.

[41 FR 35677, Aug. 24, 1976, as amended at 42 FR 34519, July 6, 1977; 47 FR 10825, Mar. 12, 1982; 47 FR 39168, Sept. 7, 1982; 49 FR 585, Jan. 5, 1984; 51 FR 40676, 40677, Nov. 7, 1986; 53 FR 1358, Jan. 19, 1988; 54 FR 2118, Jan. 19, 1989; 61 FR 58486, Nov. 15, 1996; 70 FR 56131, Sept. 26, 2005; 78 FR 54176, Sept. 3, 2013]

§ 52.796 Industrial continuous emission monitoring.

(a) APC–8, Appendix I 1.2.3, 3.3, and 6.0 are disapproved because they do not meet the requirements of 40 CFR 51.214.

(b)(1) The requirements of 40 CFR 51, Appendix P 3.3 are hereby incorporated and made a part of the applicable implementation plan for the State of Indiana.

(2) APC–8 does not apply to any source scheduled for retirement by October 6, 1980, or within five years after the promulgation of continuous emission monitoring requirements for that source category in 40 CFR part 51, Appendix P 1.1, provided that adequate evidence and guarantees are provided that clearly show that the source will cease operations on or before such date.

[43 FR 26722, June 22, 1978, as amended at 51 FR 40677, Nov. 7, 1986]

§ 52.797 Control strategy: Lead.

(a)–(b) [Reserved]

(c) On January 12, 1988, Indiana'a Office of Air Management (OAM), Indiana Department of Environmental Management, agreed to review all relevant hood designs and performance guidance to determine which criteria to use in determining ongoing compliance with the capture efficiency provisions in 326 IAC 15–1 for Quemetco, Inc., and Refined Metals. Because these efficiencies are closely related to equipment design, OAM believes that a review of the process and control equipment designs and operating paramenters should provide the necessary determination of compliance. OAM will work with the Indianapolis local agency, the Indianapolis Air Pollution Control Division, on viable alternatives and will keep USEPA up to date on its progress. OAM anticipates that specific criteria for determining compliance will be incorporated into the sources' operation permits (and forwarded to USEPA for informational purposes), and, should the opportunity arise, 326 IAC 15–1 will be revised to similarly incorporate capture efficiency criteria.

(d) On March 2, 2000, Indiana submitted a maintenance plan for Marion County as part of its request to redesignate the County to attainment of the lead standard.

(e) On April 1, 2009, Indiana submitted an updated maintenance plan under section 175A of the CAA for Marion County for the continued attainment of the 1.5 $\mu g/m^3$ lead standard.

(f) Approval—Indiana's 2008 lead emissions inventory for the Muncie area, as submitted on April 14, 2016, satisfying the emission inventory requirements of section 172(c)(3) of the Clean Air Act for the Muncie area.

(g) Approval — The 2008 lead maintenance plan for the Muncie, Indiana nonattainment area has been approved as submitted on April 14, 2016.

[53 FR 12905, Apr. 19, 1988, as amended at 53 FR 38722, Oct. 3, 1988; 54 FR 33896, Aug. 17, 1989; 65 FR 29963, May 10, 2000; 74 FR 48662, Sept. 24, 2009; 85 FR 29337, May 15, 2020]

§ 52.798 Small business stationary source technical and environmental compliance assistance program.

The Indiana program submitted on January 14, 1993, as a requested revision to the Indiana State Implementation Plan satisfies the requirements of section 507 of the Clean Air Act Amendments of 1990.

[58 FR 46544, Sept. 2, 1993]

§ 52.799 Transportation conformity.

On June 4, 2010, Indiana submitted the Transportation Conformity Consultation SIP consisting of Metropolitan Planning Organization resolutions and Memorandums of Understanding to address interagency consultation and enforceability of certain transportation related control measures and mitigation measures. EPA is approving

the Transportation Conformity SIP from Indiana.

[75 FR 50710, Aug. 17, 2010]

§ 52.800 Original identification of plan section.

(a) This section identifies the original ''Air Implementation Plan for the State of Indiana'' and all revisions submitted by Indiana that were Federally approved prior to December 31, 2009.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) The State Air Pollution Control Board submitted a SO_2 control strategy for the City of Indianapolis on March 16, 1972.

(2) The Governor submitted Pub. L. 100, Regulation APC 12–R and 13 through 17 on April 11, 1972.

(3) On May 1, 1972, the Governor's office submitted an errata sheet and revised pages for the State plan.

(4) A request for a nine month extension to achieve secondary SO_2 standards in the Indianapolis Region was made by the Governor on May 16, 1972.

(5) The State Air Pollution Control Board submitted additional information on surveillance methodology (nonregulatory) on May 17, 1972.

(6) Regulation APC 4–R was transmitted by the Governor on June 30, 1972.

(7) Assurance that emission data for sources was available for public inspection was given on July 24, 1972, by the Technical Secretary to the Indiana Board.

(8) Clarification of a policy on availability of emission data to the public sent August 17, 1972, by the Technical Secretary to the Indiana Board.

(9) On September 15, 1972, amendments to State control regulations 13, 15 and 16 were submitted to the Governor.

(10) On May 8, 1973, the Governor submitted a new regulation (APC–19) which replaced APC–1.

(11) The Governor submitted a transportation control plan for Marion County on October 19, 1973.

(12) On March 7, 1974, the Technical Secretary of the Air Pollution Control Board, acting for the Governor of Indiana, submitted new regulation APC–20.

(13) On October 3, 1974, the Technical Secretary submitted revised regulations APC–16 covering CO, APC–17 covering NO_2 and a new regulation APC–22 covering classification of counties for SO_2, oxidants, particulates, NO_2 and CO.

(14) On November 8, 1974, the Technical Secretary submitted revised regulation APC–3 covering visible emissions and revised regulation APC–15 covering hydrocarbons.

(15) On December 5, 1974, the Technical Secretary submitted revised regulation APC–13 covering SO_2. On July 18, 1975, an updated Technical Support Document on APC–13 was submitted by the Technical Secretary.

(16) On June 14, 1976, the Technical Secretary submitted enforcement orders varying the final sulfur dioxide emission limitations for the Warrick and Culley electrical generating stations in Warrick County.

(17) On March 16, 1977, the Technical Secretary submitted new regulation APC–8, Continuous Emission Monitoring; and revised regulations APC–7, Incinerators; and APC–14, Indiana Ambient Air Quality Standards.

(18) On May 18, 1977, the Technical Secretary submitted revised regulation APC–2, Open Burning.

(19) On June 26, 1979, the Governor submitted a revised sulfur dioxide strategy, including regulation APC 13 with appendix, which was promulgated by the State on June 19, 1979 for all areas of the State. This included the Part D sulfur dioxide regulations for Lake, LaPorte, and Marion Counties. On August 27, 1980 and July 16, 1981 the State committed itself to correct conditionally approved items within their strategy. On October 6, 1980, the State submitted a recodified version of APC 13 which was promulgated by the State on August 27, 1980. This included 325 IAC 7, 325 IAC 1.1–6, 325 IAC 1.1–7–2 and 4, 325 IAC 12–5–1 and 2(a), 325 IAC 12–9–1 and 4, and 325 IAC 12–18–1 and 2. EPA is not taking action on: (i) 325 IAC 7 as it applies to Floyd and Vigo Counties, (ii) the 30-day averaging compliance method contained in 325 IAC 7–1–3, and (iii) the stack height provision for NIPSCO's Mitchell Station in the Lake County SO_2 strategy and (4) the stack height provisions for IPALCO's Stout

Generating Chemicals Company, and Detroit Diesel Allison's Plant #8 in the Marion County SO_2 strategy.

(20) On June 26, 1979, the State of Indiana submitted to EPA revisions to the ozone and carbon monoxide portions (section 3.3.24) of its Marion County State Implementation Plan. On March 11, 1980, the state submitted revisions to the Marion County technical appendix to section 3.3.24. On May 19, 1980, the state submitted ozone and carbon monoxide attainment demonstrations for Marion County (section 1.5). On September 8, 1980 the state submitted its memoranda of understanding. On October 9 and October 15, 1980, the state submitted documentation concerning interagency coordination and the analysis of transportation control measures. On January 7, 1981, the state submitted corrections and clarifications in response to EPA's notice of proposed rulemaking (45 FR 81070).

(21) On June 26, 1979 Indiana submitted a motor vehicle inspection and maintenance program for Clark, Floyd, Lake, and Porter Counties. Additional commitments were submitted on April 7, 1980; June 12, 1980; August 27, 1980; November 13, 1980 and November 24, 1980.

(22) On June 26, 1979, Indiana made submittals pertaining to section 121 Consultation, section 110(a)(2)(K)—Permit Fees, section 126—Interstate Pollution, section 127—Public Notification, section 128—State Boards and section 110(a)(2)(F) (ii) and (iii)—Continuous Emission Monitoring Additional commitments were secured on April 17, 1980, June 25, 1980, August 1, 1980, November 10, 1980, December 9, 1980, and December 31, 1980. A revised version of Indiana's continuous emission monitoring regulation (325 IAC 3) was submitted on October 6, 1980.

(23) On June 26, 1979, the State of Indiana submitted a revision to provide for modification of the existing air quality surveillance network.

(24) On June 26, 1979, the Governor submitted a revised new source review regulation, APC–19. Additional information and commitments were submitted on June 25, 1980 and May 19, 1981. EPA is not taking action on section 7 of APC–19, Prevention of Significant deterioration.

(25) On June 26, 1979 the Governor submitted revised emission limits for Knauf Fiberglass, Shelby County. Additional information was submitted by November 21, 1979. The emission limitations were recodified as 325 IAC 11–4 and 11–4 Appendix A and were resubmitted on October 6, 1980.

(26) On June 26, 1979 the Governor submitted Indiana's definition regulation, APC–1. The definitions were recodified as 325 IAC 1.1–1 and resubmitted on October 6, 1980. On January 21, 1981 Indiana submitted a revised definition for ''positive net air quality benefit.'' EPA is taking no action on 325 IAC 1.1–1–82, definition of ''State Implementation Plan (SIP).''

(27) On October 6, 1980, Indiana submitted Regulation 325 IAC 1.1–2 (formerly APC 14) which includes the primary and secondary ambient air quality standards for ozone and lead.

(28) On February 26, 1981, Indiana submitted a revision to its plan waiving the State's sulfur dioxide air monitoring requirement of section 4(a) of Regulation 325 IAC 7–1 for the area around Public Service of Indiana's Noblesville Generating Station.

(29) On June 26, 1979, May 19, 1980, September 24, 1980, October 9, 1980 and October 15, 1980, Indiana submitted transportation control plans and ozone demonstrations of attainment for Lake, Porter, Clark, Floyd, St. Joseph, Elkhart and Allen Counties. It also submitted a carbon monoxide demonstration of attainment for Lake County. EPA is taking no action on the ozone demonstration of attainment for St. Joseph, Elkhart and Allen Counties.

(30) On April 10, 1981, Indiana submitted revised emission limits for Indiana Farm Bureau Cooperative Association's Beech Grove plant.

(31) On February 11, 1980, Indiana submitted a revised sulfur dioxide strategy for Vigo County. Technical information was submitted on December 10, 1979 and on May 30, 1980. On October 6, 1980, the State submitted a recodified version of the Vigo County Regulations, 325 IAC Article 7, which was promulgated by the State on August 27, 1980. EPA is not taking action on the

30-day averaging compliance method contained in 325 IAC 7–1–3 as it applies to Vigo County.

(32) On November 24, 1981, Indiana submitted site specific emission limitations for Tecumseh Pipe Line Company, Schererville; and Wayne Transportation Division, Richmond.

(33) On February 11, 1980, Indiana submitted APC 15. EPA is taking no action the ''bubble'' provisions contained in Section 8(a)(2) of revised APC 15.

(34) On June 26, 1979, the Governor of Indiana submitted general TSP RACT emisson limits for nonattainment areas. These regulations were amended and recodified as 325 IAC 6–1 and resubmitted on October 6, 1980. On October 6, 1980, the State submitted a revised TSP regulation for process sources, 325 IAC 6–3; a source specific Dearborn County strategy (amendments were submitted on August 10, 1981), 325 IAC 6–1–8; a source specific Dubois County strategy, 325 IAC 6–1–9; and a source specific Wayne County strategy (amendments were submitted on January 29, 1981), 325 IAC 6–1–14. On February 11, 1980, Indiana submitted a source specific Marion County strategy (amendments were submitted on October 28, 1981), 325 IAC 6–1–12. EPA is deferring rulemaking at this time on the coke battery emission limitations in the Marion County strategy. On January 29, 1981, the State submitted a source specific Vigo County strategy (amendments were submitted on October 28, 1981 and May 7, 1982), 325 IAC 6–1–13; a source specific Howard County strategy, 325 IAC 6–1–15; and a source specific Vanderburgh County strategy (amendments were submitted on October 28, 1981), 325 IAC 6–1–16. EPA is deferring rulemaking at this time on the coke battery emission limitations in the Vigo County strategy and on whether the Howard County strategy currently contains all the elements required by the Clean Air Act. On July 8, 1981, the State submitted a source specific Clark County strategy, 325 IAC 6–1–17, and a source specific St. Joseph County strategy, 325 IAC 6–1–18. On January 29, 1981 and May 7, 1982, the State submitted additional information and commitments.

(35) On October 6, 1980, Indiana submitted its regulations as recodified. Amendments were submitted on January 29, 1981 and March 18, 1981. EPA's approval is directed specifically to the codification numbering system change, not to the substance within each of the codified rules.

(36) [Reserved]

(37) On May 10, 1982, Indiana submitted source specific emission limits contained in operating permits for the Bunge Corporation, Globe Industries, Skyline Corporation, and Dubois County Farm Bureau Co-op Assn., Inc. as revisions to the Indiana SIP.

(38) On April 27, 1982, Indiana submitted source specific TSP emission limits for Huntingburg Wood Products, Jasper Desk Company, Jasper Office Furniture Company, Arist-O-Kraft Company, Mohr Construction Company, Dana Corporation, and Allis Chalmers Corporation. On April 29, 1982, Indiana submitted source specific VOC emission limits for McGee Refining Corporation, Hesco Industries, and Clark Oil and Refining Corporation.

(39) On November 25, 1980, Indiana submitted 325 IAC Article 8, Volatile Organic Compound Regulations. This regulation adds Group II CTG requirements to Indiana's VOC plan and was State promulgated on October 15, 1980. EPA is not taking action on 325 IAC 8–1.1 Section 2(b), Bubble Approach.

(40) On November 24, 1981, Indiana submitted site specific emission limitations for Jeffboat, Inc., Jeffersonville.

(41) On November 23, 1982, Indiana submitted source-specific emission limits for Paul H. Rohe Company, Inc.

(42) On June 26, 1979, Indiana submitted its coke oven battery regulation, APC 9. On October 6, 1980 Indiana resubmitted this regulation recodified as 325 IAC 11–3. On August 27, 1981, Indiana submitted amendments to 325 IAC 11–3. EPA is taking no action on 325 IAC 11–3–2(a), Pre-Carbonization Emissions. It is taking no action on 325 IAC 11–3–2(i), Underfire Particulate and Sulfur Dioxide Emissions, as it applies to Lake County.

(43) On February 26, 1981 and June 22, 1982, Indiana submitted a 9.57 lbs/MMBTU sulfur dioxide emission limit for IMEC's Breed Generating Station in Sullivan County. This limit supersedes that approved at paragraph (c)(19).

(44) On June 28, 1982, Indiana submitted new open burning regulations

for Marion County. An amendment was submitted on August 25, 1982.

(45) On March 15, 1983, Indiana submitted a revision to the TSP and SO_2 portions of its SIP in the form of operating permits for the Sisters of Providence Convent in St. Mary-of-the-Woods, Indiana.

(46) On November 29, 1982, and December 9, 1982, Indiana submitted amendments to 325 IAC 11–4, Fiber Glass Insulation Manufacturing (Superfine Process) Limitations.

(47) On August 17, 1983, Indiana submitted emission limits of 1.8 lbs/hr and 2.4 tons/yr for the boilers at Jasper Cabinet Co., Dubois County. The 1.8 lbs/hr limit replaces the 7.6 lbs/hr limit approved for this source in subparagraph 34.

(48) [Reserved]

(49) On March 28, 1983, Indiana submitted a 20% 2-hour opacity limit as an ''equivalent visible emission limit'' (EVEL) for the underfire stack at Bethlehem Steel Corporation's Coke Battery No. 2 in Porter County. This EVEL is approved for as long as the SIP mass emission limit determined from 325 IAC 6–2 (October 6, 1980, submittal) for this source remains in the SIP See (c)(6), (35), and (42).

(50) On December 21, 1983, the Indiana Air Pollution Control Board submitted Indiana Rule 325 IAC 6–2.1, Particulate Emission Limitations for Sources of Indirect Heating. This rule repeals and replaces Indiana Rule 325 IAC 6–2. See §§ 52.770(c)(4) and (c)(35) and § 52.776(i).

(i) *Incorporation by reference.* (A) 325 IAC 6–2.1, revised regulation establishing Particulate Emission Limitations for Sources of Indirect Heating.

(ii) *Additional material.* (A) December 21, 1983, submittal of Finding of Facts and Recommendations of Hearing Officer R. W. James on 325 IAC 6–2.1.

(B) March 27, 1985, commitment letter from the State concerning the procedures the State will use in processing ''bubbles'' under 325 IAC 6–2.1–2(B) and 3(b). See § 52.776(i).

(51) On February 7, 1983, Indiana submitted revised opacity limits for existing boilers at Olin Corporation, located in Covington, Indiana. These ''equivalent visible emission limits'' (EVEL) are approved for as long as the SIP mass emission limit determined from 325 IAC 6–2 (October 6, 1980 submittal) for this source remains in the SIP. See § 52.770(c) (6) and (35) and § 52.776(h)(2).

(i) *Incorporation by reference.* (A) EVELs for Olin Corporation contained in Operating Permits issued by IAPCB, dated October 6, 1981.

(ii) *Additional material.* (A) September 1, 1983, transmittal by IAPCD's A. Sunderland of Olin's Mass Emission Tests, dated August 26, 1983.

(B) April 5, 1984, letter from IAPCD's E. Stresino transmitting original petition, including Method 9 opacity data.

(52) On February 23, 1984, the Indiana Air Pollution Control Board submitted a revision to Indiana's SO_2 SIP waiving the self-monitoring requirement for Public Service Indiana's Edwardsport Generating Station, as set forth in section 4(a) of Rule 325 IAC 7–1. See (c)(19). This revision becomes effective once the Edwardsport Station achieves an annual operating capacity of no greater than 10%.

(53) On October 6, 1980, Indiana submitted revised opacity regulation 325 IAC 5–1. It replaces 1972 APC 3 for process sources, approved at paragraph (b), and SIP 1974 APC 3 for combustion sources, approved in part at subparagraph (c)(14). Indiana does not intend 325 IAC 5–1 to regulate the emission points in Lake County listed in Table 2 of 325 IAC 6–1–110.2 (subparagraph (c)(57)). USEPA is disapproving 325 IAC 5–1 for these sources. Indiana does not intend 325 IAC 5–1 to regulate certain coke battery emission sources listed in 325 IAC 11–3 (subparagraph (c)(42)). USEPA is disapproving 325 IAC 5–1 as it applies to the provisions of 325 IAC 11–3 which USEPA disapproved at (c)(42), i.e., pushing and quenching sources throughout the State and coke oven doors in Lake and Marion Counties. Additionally, Indiana has modified 325 IAC 5–1 as it applies to the stack emission points in Porter County listed at 325 IAC 6–6–4. USEPA disapproved 325 IAC 5–1 as it applies to these Porter County sources on February 5, 1987 (52 FR 3640). For those source categories where USEPA is disapproving 325 IAC 5–1, they remain regulated by the previously approved opacity SIP which consists of SIP 1974 APC 3 for combustion sources and 1972 APC 3 for process sources. Additionally, as long as the

Bethlehem Steel Corporation No. 2 Coke Oven Battery Underfire Stack EVEL (subparagraph (c)(49)) remains approved, it replaces 325 IAC 5–1.

(i) *Incorporation by reference.* (A) A letter dated October 6, 1980 from the State of Indiana Air Pollution Control Board and 325 IAC 5–1, Visible Emission Limitations, State promulgated on August 26, 1980.

(ii) *Additional material.* (A) February 12, 1985, letter from the Technical Secretary of the Air Pollution Control Board committing the State to make certain technical changes to 325 IAC 5–1.

(54) On March 28, 1984, Indiana submitted a revised TSP emission limitation for Richmond State Hospital, Wayne County, Indiana. This limitation replaces the one in 325 IAC 6–1–14 which was previously approved at (c)(34).

(i) *Incorporation by reference.* (A) On January 13, 1984, Indiana issued to Richmond State Hospital an amendment to operating permit, 89–04–85–0153, which revised its TSP emission limitations for the four boilers to 0.60 lbs/MMBTU with an annual total limit of 452 tons/yr.

(55) On January 30, 1985, Indiana submitted revised VOC regulations 325 IAC 8–1.1, 8–2, 8–3, 8–4 and 8–5 to satisfy certain conditions of USEPA's approval. Those regulations amended those approved at (c)(33) and (c)(34). In addition, the applicability of the regulations was extended to cover St. Joseph and Elkhart Counties. USEPA is taking no action on changes to 325 IAC 8–1.1–2(f), Methods of Compliance, and the repeal of 325 IAC 8–5–6, Perchloroethylene Dry Cleaning, because these exempt the compound perchloroethylene from control without the State justifying that such exemption is consistent with the Part D reasonably available control technology (RACT) requirements.

NOTE: If Indiana allows use of a non-USEPA test method in the future, its use must be submitted to USEPA as a SIP revision.

(i) *Incorporation by reference.* (A) Indiana's Volatile Organic Compounds (VOC) RACT I and II regulations, Title 325 Air Pollution Control Board:

(*1*) 325 IAC 8–1.1, Establishes Volatile Organic Compound Emission Limitations. State promulgated on June 21, 1984, and amended November 7, 1984.

NOTE: 325 IAC 8–1.1–4 Test methods andprocedures. If Indiana allows use of a non-USEPA test method in the future, its use must be submitted to USEPA as a SIP revision.

(*2*) 325 IAC 8–2 Surface Coating Emission Limitations. State promulgated on June 21, 1984, and amended November 7, 1984.

(*3*) 325 IAC 8–3 Solvent Metal Cleaning Operating Requirements. State promulgated on October 15, 1984, and amended November 7, 1984.

(*4*) 325 IAC 8–4 Petroleum Sources. State promulgated on June 21, 1984, and amended November 7, 1984.

(*5*) 325 IAC 8–5 Miscellaneous Operations. State promulgated on June 21, 1984, and amended November 7, 1984.

(56) On September 2, 1983, the Indiana Air Pollution Control Board (Board) submitted revised emission limitations for Occidental Chemical Corporation (OCC), located in Clark County, Indiana. Amendments to these operating permits were submitted by the State on December 21, 1983. These emission limits replace those approved for OCC (under its former name, Hooker Chemical) at (c)(34).

(i) *Incorporation by reference.* (A) Indiana Air Pollution Control Board Operation Permits:

(*1*) Control Number 16113, date issued December 27, 1982.

(*2*) Control Number 16114, date issued December 27, 1982.

(*3*) Control Number 16115, date issued December 27, 1982.

(ii) *Additional material.* (A) OCC corrected emissions dated September 13, 1984.

(B) OCC's new modeled data, dated November 6, 1984.

(C) State's modeling for OCC and surrounding area, dated July 2, 1984 and August 7, 1984.

(57) On October 11, 1983, October 24, 1983, and April 16, 1984, Indiana submitted a revised Lake County Total Suspended Particulates (TSP) Plan, including regulations 325 IAC 6–1–10.2 and 6–1–11.1. This plan is disapproved. See § 52.776(j).

(58) On November 13, 1984, Indiana submitted 325 IAC 13–2, Motor Vehicle Tampering and Fuel Switching.

(i) *Incorporation by reference.* (A) Indiana Rule 325 IAC 13–2, promulgated by the State on September 24, 1984.

(59) On March 24, 1986, the State of Indiana submitted a negative declaration for synthetic organic chemical manufacturing industry (SOCMI) source leaks and oxidation, and for natural gas/gasoline processing plants. On April 14, 1986, the State of Indiana submitted a negative declaration for manufacturers of high-density polyethylene, polypropylene, and polystyrene resins, and for large petroleum dry cleaners.

(i) *Incorporation by reference.* (A) Letter dated March 24, 1986, from Harry D. Williams, Director, Air Pollution Control Division, Indiana State Board of Health. Letter dated April 14, 1986, from Walter J. Kulakowski, Assistant Commissioner for Air Management, Department of Environmental Management.

(60) On January 18, 1984, Indiana submitted as a revision to the TSP SIP certain operating conditions and limits for three coke oven batteries at Citizens Gas and Coke Utility in Marion County. The operating permits included conditions and limits for Batteries E, H and Number One with respect to visible emissions from coke oven doors and pushing operations and allowable content of total dissolved solids in quench makeup water. EPA disapproves the limit on coke oven door visible emissions and total dissolved solids content for quench makeup water on Battery Number One, because the limits are inconsistent with that battery's Part C Prevention of Significant Deterioration requirements and Part D Lowest Achievable Emission Rate requirements. See subparagraphs (c)(34) and (c)(42) for further background on actions concerning coke oven batteries.

(i) *Incorporation by reference.* (A) Certificates of Operation Numbers 06895, 06896, and 06897 for Citizens Gas and Coke Utility issued by the City of Indianapolis, dated June 30, 1980, with addition of operating conditions and emission limits, dated September 12, 1983, as adopted by the State on January 4, 1984, and transmitted on January 18, 1984.

(ii) *Additional information.* (A) September 7, 1983, letter from the City of Indianapolis to the State concerning quarterly analysis of coke quenching makeup water.

(61) On October 15, 1984, Indiana submitted a revision to the Porter County total suspended particulate (TSP) plan, including regulation 325 IAC 6–6, which was promulgated by Indiana on November 7, 1984. This plan is disapproved. See § 52.776(l).

(62) On March 4, 1985, Indiana submitted a revision to the Marion County carbon monoxide (CO) plan. USEPA approved this plan based on monitoring and modeling data and a commitment to implement a one-way street pair in the Indianapolis central business district. These elements demonstrate attainment of the CO National Ambient Air Quality Standards by December 31, 1987.

(i) *Incorporation by reference.* (A) Marion County CO plan for attainment and maintenance of the CO NAAQS from Indianapolis Air Pollution Control Division, Sections 1.0, 3.4, 4.1, 4.2, 4.3.1, 4.3.2, 4.4, 5.1, 5.5.4, 6.1, 6.2.1, 6.2.2, 6.3, and 6.4, dated November 12, 1984.

(B) Letter from Indiana forwarding Marion County CO plan to USEPA, dated March 4, 1985.

(ii) *Additional material.* (A) Portion of additional technical information from Indianapolis Air Pollution Control Division, including Section 1.0, dated August 28, 1985.

(B) Letter from Indiana forwarding additional technical information, dated October 7, 1985.

(63) On January 23, 1986, the State submitted revisions to its Stage I Gasoline Dispensing regulations, which replace those conditionally approved at (c)(33), (c)(35)—Codification only, and (c)(55).

(i) *Incorporation by reference.* (A) Letter of January 23, 1986 to EPA from the State of Indiana, and Title 325 Air Pollution Control Board Rule 325 IAC 8–4–6, Gasoline Dispensing Facilities, which was promulgated on January 14, 1986.

(B) Title 325 Air Pollution Control Board Rule 8–1.1–3, Compliance Schedules, subsections (f), (g), and (h), which was promulgated on January 14, 1986.

(64) On January 23, 1986, the State of Indiana submitted to USEPA a revision to the Indiana Lead State Implementation Plan in order to satisfy the requirements of 40 CFR 51.160 through 51.163 and 51.165(b) (formerly 40 CFR 51.18 (a) through (i) and 51.18(k)) for a new source review program, USEPA approved this revision for lead new source review only.

(i) *Incorporation by reference.* (A) Construction and Operating Permit Requirements, 325 IAC 2–1.1 promulgated on January 8, 1986.

(B) Letter of November 17, 1987, to EPA from the Indiana Department of Environmental Management.

(65) On November 30, 1981, Indiana established its air quality surveillance network for lead. On November 21, 1983, Indiana notified USEPA that Corning Glass was shut down. On February 18, 1987, Indiana submitted its regulation to control lead emissions, 325 IAC 15–1.

(i) *Incorporation by reference.* (A) 325 IAC 15–1, Lead Emission Limitations, effective February 27, 1987.

(B) Letter of February 18, from the State of Indiana to EPA.

(ii) *Additional material.* (A) A November 30, 1981, letter from Harry Williams, Technical Secretary, Indiana Air Pollution Control Board establishing Indiana's air quality surveillance network for lead.

(B) A November 21, 1983, letter from Harry Williams, Technical Secretary, confirming that the Corning Glass facility in Wells County was permanently shut down and had been taken out of the State's emission inventory.

(C) A June 9, 1987, letter from Timothy Method, Acting Assistant Commissioner, submitting a general strategy and additional increments of progress required of Hammond Lead.

(66) On October 21, 1987, the State of Indiana submitted 325 IAC 7–1–3.1, Reporting Requirements and Methods to Determine Compliance, as a revision to its SO_2 plan. At paragraph (c)(19) of this section, USEPA approved/conditionally approved Indiana's SO_2 plan, 325 IAC 7-1, for most areas of the State. However, the emission limits in this plan were set aside by the Court of Appeals for the Seventh Circuit because USEPA took no action on the State's 30-day averaging compliance method in 325 IAC 7-1-3. New compliance method 325 IAC 7-1-3.1 replaces former 325 IAC 7-1-3. Therefore, with EPA's approval of 325 IAC 7-1-3.1, USEPA is reinstating its March 12, 1982, approval of Indiana's October 6, 1980, SO_2 rule, 325 IAC 7-1-1,7-1-2 (except for any emission limits in the below named counties), 7-1-4, 7-1-5, 7-1-6, and 7-1-7. Other than these general provisions and 325 IAC 7-1-3.1, USEPA is not acting on or approving today Indiana's SO_2 plan for Dearborn, Floyd, Gibson, Jefferson, Lake, LaPorte, Marion, Morgan, Porter, Sullivan, Vermillion, Vigo, Warrick, and Wayne Counties. Indiana recodified 325 IAC 7-1-1 through 7-1-7 to 326 IAC 7-1-1 through 7-1-7 and submitted the recodified rules on November 16, 1988.

(i) *Incorporation by reference.* (A) 326 IAC 7-1-1 through 326 7-1-7, Sulfur Dioxide Emission Limitations, as published in the April 1, 1988, *Indiana Register* (IR) at 11 IR 2511.

(67) On February 3, 1988, Indiana submitted its SO_2 plan for Jefferson, LaPorte, Marion, Sullivan, and Wayne Counties; on March 23, 1988, it submitted its SO_2 plan for Vermillion County; and on August 1, 1988, it submitted its SO submitted the same rules in its plans for Jefferson, LaPorte, Marion, Sullivan, and Wayne Counties, as recodified into Title 326 of the Indiana Administrative Code. These plans consist of the provisions and requirements in 326nIAC 7-1 approved or reinstated for these counties at paragraph (c)(66), any SO_2 emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at (c)(66)(i)(C)), and the site-specific SO_2 emission limits and other requirements in 326 IAC 7-1-13 (Jefferson County), 326 IAC 7-1-12 (LaPorte County), 326 IAC 7-1-9 (Marion County), 326 IAC 7-1-14 (Sullivan County), 326 IAC 7-1-15 (Vermillion County), 326 IAC 7-1-10.1 (Vigo County), and 326 IAC 7-1-11 (Wayne County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-13, Jefferson County Sulfur Dioxide Emission Limitations, as published in the April 1, 1988, *Indiana Register* (IR) at 11 IR 2526.

(B) 326 IAC 7-1-12, LaPorte County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2526.

(C) 326 IAC 7-1-9, Marion County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2518.

(D) 326 IAC 7-1-14, Sullivan County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2526.

(E) 326 IAC 7-1-15, Vermillion County Sulfur Dioxide Emission Limitations, as published on March 1, 1988, at 11 IR 1735.

(F) 326 IAC 7-1-10.1, Vigo County Sulfur Dioxide Emission Limitations, as published on August 1, 1988, at 11 IR 3785.

(G) 325 IAC 7-1-11, Wayne County Sulfur Dioxide Emission Limitations, as published on April 1, 1988, at 11 IR 2525.

(68) On December 2, 1983, Indiana submitted its transportation control plans as an element in its ozone strategy for Lake and Porter Counties. Further information was submitted on June 10, 1986.

(i) *Incorporation by reference.* (A) Chapter 7, Mobile Source Strategies and Reductions, Sections A.1.a, 2, and 3 and Exhibits 7-1 and 7-3 of Indiana's 1982 ozone and carbon monoxide plan, as adopted by the Indiana Air Pollution Control Board at its November 2, 1983, metting.

(B) [Reserved]

(ii) *Additional material.* (A) On June 10, 1986, Indiana submitted a May 23, 1986, letter from the Northwestern Indiana Regional Planning Commission discussing the Lake and Porter Counties' transportation control plans and their implementation.

(B) [Reserved]

(69) On December 2, 1983, Indiana submitted its ozone plan for Lake and Porter Counties, as adopted by the Indiana Air Pollution Control Board on November 2, 1983. On March 2, 1984, Indiana submitted as its attainment demonstration for Lake and Porter Counties, Illinois' attainment demonstration for the greater Chicago area. The greater Chicago attainment demonstration, as submitted by Indiana, and Indiana's overall ozone plan for Lake and Porter Counties is disapproved. See §§ 52.773(i) and 52.777(d). The disapproval does not affect USEPA's approval (or conditional approval) of individual parts of Indiana'a ozone plan, and they remain approved. See § 52.770(c) (20), (21), (29), (33), (38), (39), (55), (58), and (59).

(70) On February 3, 1988, and August 23, 1988, Indiana submitted its lead plans for Quemetco, Inc., in Indianapolis; Exide Corporation in Logansport; C and D Power System in Attica; and General Battery Corporation in Frankfort. This included a recodification of its former lead rule, 325 IAC 15-1 (40 CFR 52.770(c)(65)), to 326 IAC 15-1 and revisions to this rule.

(i) *Incorporation by reference.* (A) Title 326—Air Pollution Control Board—Indiana Administrative Code (326 IAC) 15-1, Lead Emission Limitations, as published in the *Indiana Register* (IR) on April 1, 1988, at 11 IR 2564.

(B) Corrections of typographical, clerical, or spelling errors to the document printed at 11 IR 2368 (Indiana's recodified air rules, including 326 IAC 15-1), as published on August 1, 1988, at 11 IR 3921.

(71) On March 23, 1988, Indiana submitted its SO_2 plan for Morgan County; on July 12, 1988, it submitted its SO_2 plan for Floyd County, and on November 16, 1988, it submitted its SO_2 plan for Warrick County. On December 6, 1988, it submitted its Warrick County rule as published in the *Indiana Register*. These plans consist of the provisions and requirements in 326 IAC 7-1 approved or reinstated for these counties at paragraph (c)(66), and SO_2 emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at paragraph (c)(66)(i)(C) of this section), and the site-specific SO_2 emission limits and other requirements in 326 IAC 7-1-16 (Floyd County), 326 IAC 7-1-18 (Morgan County), and 326 IAC 7-1-17 (Warrick County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-16, Floyd County Sulfur Dioxide Emission Limitations, as published in the March 1, 1988, *Indiana Register* (IR) at 11 IR 1737.

(B) 326 IAC 7-1-18, Morgan County Sulfur Dioxide Emission Limitations, as published on June 1, 1988, at 11 IR 3018.

(C) 326 IAC 7-1-17, Warrick County Sulfur Dioxide Emission Limitations,

as published on December 1, 1988, at 12 IR 553.

(72) On November 16, 1988, Indiana submitted its SO_2 plan for Dearborn County; on July 12, 1988, it submitted its SO_2 plan for Gibson County; on November 16, 1988, and December 6, 1988, it submitted its SO_2 plan for Lake County, and on November 16, 1988, and December 6, 1988, it submitted its SO_2 plan for Porter County. These plans consist of the provisions and requirements in 326 IAC 7-1 approved or reinstated for these counties at paragraph (c)(66), any SO_2 emission limits in 326 IAC 7-1-2 applicable in these counties (as incorporated by reference at paragraph (c)(66)(i)(C) of this section, and the site-specific SO_2 emission limits and other requirements in 326 IAC 7-1-20 (Dearborn County), 326 IAC 7-1-8.1 (Lake County), 326 IAC 7-1-19 (Gibson County), and 326 IAC 7-1-21 (Porter County).

(i) *Incorporation by reference.* (A) 326 IAC 7-1-20, Dearborn County Sulfur Dioxide Emission Limitations, as published in the August 1, 1988, *Indiana Register* (IR) at 11 IR 3784.

(B) 326 IAC 7-1-19, Gibson County Sulfur Dioxide Emission Limitations, as published on June 1, 1988, at 11 IR 3019.

(C) 326 IAC 7-1-8.1, Lake County Sulfur Dioxide Emission Limitations, as published on November 1, 1988, at 12 IR 262, and corrected on December 1, 1988, at 12 IR 597.

(D) 326 IAC 7-1-21, Porter County Sulfur Dioxide Emission Limitations, as published on November 1, 1988, at 12 IR 259, and corrected on December 1, 1988, at 12 IR 597.

(E) 326 IAC 7-1-1, Applicability, as published on December 1, 1988, at 12 IR 552.

(73) [Reserved]

(74) On July 23, 1987, the Indiana Department of Environmental Management submitted to USEPA a request for a site-specific revision to Indiana's ozone SIP. This revision consists of compliance date extensions until November 7, 1987, for Uniroyal's two fabric coaters and four vinyl printers at its Mishawaka plant, located in St. Joseph County, Indiana.

(i) *Incorporation by reference.* (A) Air pollution Operation Permits Numbers: U 2 33–15A, U 2 34–23, U 2 33–14C, U 2 34–3C, U 2 33–16, U 2 33–18, Date issued December 1, 1988, and Date Expires December 1, 1990.

(75) [Reserved]

(76) On October 21, 1987, the State submitted 325 IAC 8–1.1–5, Petition for alternative controls, which gives the provisions and requirements for petitioning for reasonably available control technology volatile organic compound plans. On November 16, 1988, the State submitted this rule recodified as 326 IAC 8–1–5, Petition for site-specific reasonably available control technology (RACT) plan.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administration Code (IAC) 8–1–5, Petition for site-specific reasonably available control technology (RACT) plan, as published in the April 1, 1988, *Indiana Register,* at Volume 11 IR 2530. Filed with the Secretary of State on March 10, 1988.

(77) [Reserved]

(78) On January 18, 1989, and June 23, 1989, Indiana submitted its revised lead plan for the HLP-Lead Plant of Hammond Lead Products, Inc. in Hammond Indiana. Additionally, minor changes were made to Indiana's overall lead rule, 326 IAC 15–1, Lead Emission Limitations.

(i) *Incorporation by reference.* (A) Title 326—Air Pollution Control Board—Indiana Administrative Code (326 IAC) 15–1, as published in the Indiana Register (IR) on July 1, 1989, at 1850. This rule was effective for State purposes on July 14, 1989.

(79) [Reserved]

(80) On October 15, 1987, the State submitted 325 IAC 8–2–13, Wood Furniture and Cabinet Coating, as a portion of its 1982 ozone plan, which gives provisions and requirements for controlling volatile organic compound (VOC) emissions from sources located in Clark, Floyd, Lake and Porter Counties. On November 16, 1988, the State submitted this rule recodified as 326 IAC 8–2–12, Wood Furniture and Cabinet Coating.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administrative Code (IAC) 8–2–1, Applicability of rule; and 326 IAC 8–2–12, Wood furniture and cabinet coating,

as published in the April 1, 1988, ''Indiana Register'' (IR), at 11 IR 2536 and corrected on March 1, 1989, at 12 IR 1394. Filed with the Secretary of State on March 10, 1988.

(81) On April 11, 1988, the State submitted, as a portion of its 1982 ozone plan, rules to control volatile organic compound (VOC) emissions in Lake and Porter Counties. These rules consist of the provisions and requirements in 326 IAC 14–1, General Provisions; 326 IAC 14–8, Emission Standards for Equipment Leaks; and 326 IAC 14–9, Emission Limitations for Benzene from Furnace Coke Oven By-product Recovery Plants.

(i) *Incorporation by reference.* (A) Amendments to title 326, Air Pollution Control Board, Indiana Administrative Code (IAC) 14–1 General Provisions; 326 IAC 14–8 Emission Standards for Equipment Leaks; (Fugitive Emission Sources); and 326 IAC 14–9 Emission Limitations for Benzene from Furnace Coke Oven By-Product Recovery Plants, as published in the June 1, 1988, Indiana Register (IR) at 11 IR 3011. Filed with the Secretary of State on April 13, 1988.

(82) [Reserved]

(83) On January 21, 1981, the State submitted its revised Malfunctions Rule 325 IAC 1.1–5. On November 16, 1988, Indiana submitted its recodified regulations. This rule was renumbered 326 IAC 1–6, Malfunctions.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code (IAC), Rule 326 IAC 1–6: Malfunctions as published in the April 1, 1988, Indiana Register (IR) at 11 IR 2380. Filed with the Secretary of State on March 10, 1988.

(ii) *Additional materials.* (A) On July 2, 1982, the State submitted clarifications of its intent for 325 IAC 1.1–5.

(84) On October 27, 1989, and January 19, 1990, Indiana submitted its vehicle inspection and maintenance plan for Clark, Floyd, Lake, and Porter Counties.

(i) *Incorporation by reference.* (A) Title 326, Air Pollution Control Board, of the Indiana Administrative Code (IAC), Rule 13–1, Motor Vehicle Inspection and Maintenance Requirements, Adopted at 13 Indiana Register 500, effective January l, 1990.

(85) On December 2, 1983, Indiana submitted its transportation control plan for Clark and Floyd Counties as one element in its ozone plan for the area. Additional material was submitted on May 14, 1986.

(i) *Incorporation by reference.* (A) Chapter 7, Mobile Source Strategies and Reductions, sections A.1.b and exhibits 7–2 and 7–4, as adopted by the Indiana Air Pollution Control Board at its November 2, 1983, meeting.

(ii) *Additional material.* (A) On May 14, 1986, Indiana submitted an April 23, 1986, Letter from Jim Thorne, Transportation Director, Kentuckiana Regional Planning and Development Agency, discussing the Clark and Floyd Counties portion of the Louisville, Kentucky transportation control plan.

(86) On February 15, 1990, Indiana submitted an amended rule which updates the applicable edition of the Code of Federal Regulations from the 1987 edition to the 1988 edition.

(i) *Incorporation by reference.* (A) Title 326, Air Pollution Control Board, Indiana Administrative Code (IAC) 1–1–3, References to the Code of Federal Regulations, as published in the February 1, 1990, Indiana Register (IR), Volume 13 at IR 867. Filed with the Secretary of State on December 14, 1989.

(87) On October 23, 1990, and August 19, 1991, the Indiana Department of Environmental Management submitted regulations adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code and intended incorporation to the Indiana ozone plan as part of the stationary source control strategy.

(i) *Incorporation by reference.* (A) The following volatile organic compound rules adopted by the Indiana Air Pollution Control Board as part of title 326 of the Indiana Administrative Code (326 IAC) and intended to partially satisfy the requirements of the Clean Air Act.

(*1*) Effective October 23, 1988: 326 IAC 8–1–.05 Coating Definition, 326 IAC 8–2–11 Fabric and Vinyl Coating.

(*2*) Effective February 15, 1990: 326 IAC 1–2–48 Non-Photochemically Reactive Hydrocarbon Defined; 326 IAC 8–2–5 Paper Coating Operations.

(*3*) Effective May 18, 1990: 326 IAC 1–2–18.5 Cold Cleaner Degreaser Defined; 326 IAC 1–2–21.5 Conveyorized Degreaser

Defined; 326 IAC 1–2–29.5 Freeboard Height Defined; 326 IAC 1–2–29.6 Freeboard Ratio Defined; 326 IAC 1–2–49.5 Open Top Vapor Degreaser Defined; 326 IAC 8–2–9 Miscellaneous Metal Coating Operations; 326 IAC 8–3–1 Organic Solvent Degreasing Operations; 326 IAC 8–5–3 Synthesized Pharmaceutical Manufacturing Operations; 326 IAC 8–5–5 Graphic Arts Operations.

(*4*) Effective June 8, 1990: 326 IAC 8–1–2 Compliance Methods; 326 IAC 1–2–90 Volatile Organic Compound (VOC) Definition; 326 IAC 8–1–4 Testing Procedures.

(*5*) Effective June 5, 1991: 326 IAC 1–2–14 Coating Line Definition; 326 IAC 8–1–1 Applicability of Rule; 326 IAC 8–1–2 Compliance Methods; 326 IAC 8–1–4 Testing Procedures; 326 IAC 8–2–1 Applicability; 326 IAC 8–3–5 Cold Cleaner Degreaser Operation and Control; 326 IAC 8–3–6 Open Top Vapor Degreaser Operation and Control Requirements; 326 IAC 8–3–7 Conveyorized Degreaser Operation and Control; 326 IAC 8–4–8 Leaks from Petroleum Refineries, Monitoring, Reports; 326 IAC 8–5–5 Graphic Arts Operations.

(88) On February 15, 1990, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding a site specific particulate matter revision for Navistar International Transportation Corporation (Navistar) gray iron foundry and engine plant in Indianapolis, Indiana.

(i) *Incorporation by reference.* (A) Title 326 Air Pollution Control Board, Indiana Administrative Code (IAC) 6–1–12 as amended, effective January 13, 1990.

(89) On July 22, 1991, as supplemented on April 18, 1994, the State submitted regulations adopted by the Indiana Air Pollution Control Board as part of Title 326 of the Indiana Administrative Code for incorporation into the Indiana sulfur dioxide State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 7–4–12.1: Gibson County sulfur dioxide emission limitations; effective December 5, 1990. Published in the *Indiana Register*, Volume 14, Number 3, December 1, 1990.

(90) On March 3, 1989, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan (SIP) by adding an emission trade or bubble for Joseph E. Seagram and Sons which is located in Lawrenceburg, Indiana. This requested SIP revision repeals rule 326 Indiana Administrative Code (IAC) 6–1–8, adds a new Section, 326 IAC 6–1–8.1, and amends 326 IAC 6–1–7 to include a reference for the new Section and a recodification of the applicable rule.

(i) *Incorporation by reference.* (A) Title 326 IAC 6–1–7 as published in the Indiana Register Volume 12, Number 6, March 1, 1989, effective April 9, 1989.

(B) Title 326, IAC 6–1–8.1, repeal of 326 IAC 6–1–8 as published in the Indiana Register, Volume 12, Number 6, March 1, 1989, effective March 1, 1989.

(91) [Reserved]

(92) On February 25, 1994, Indiana submitted an employee commute option rule intended to satisfy the requirements of section 182(d)(1)(B) of the Clean Air Act Amendments of 1990.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code, Article 19 MOBILE SOURCE RULES, Rule 1, Employee Commute Options. Filed with the Secretary of State, October 28, 1993, effective November 29, 1993. Published at Indiana Register, Volume 17, Number 3, December 1, 1993.

(93) On February 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of Stage II Vapor Recovery Rules as amendments to Title 326 of the Indiana Administrative Code (326 IAC) 8–1–0.5 and 8–4–6.

(i) *Incorporation by reference.* (A) 326 IAC 8–1–0.5 Definitions and 8–4–6 Gasoline dispensing facilities. Filed with the Secretary of State October 28, 1993, effective November 29, 1993. Published at Indiana Register, Volume 17, Number 3, December 1, 1993.

(94) On February 25, 1994, Indiana requested a revision to the State Implementation Plan (SIP) in the form of amendments to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2–1–1 and 2–1–3 which were intended to satisfy the additional new source review requirements of the Clean Air Act Amendments of 1990. The USEPA, at this

time, is also approving the incorporation of permitting rules Recodified as Article 2. Permit Review Rules of 326 IAC into the SIP to replace APC 19 which was incorporated into the Indiana SIP at 40 CFR 52.770 (c)(24).

(i) *Incorporation by reference.* (A) Amendments to Title 326 IAC 2–1–1, 2–1–2, 2–1–3, 2–3–1, 2–3–2, 2–3–3, and 2–3–5. Filed with the Secretary of State November 12, 1993, effective December 13, 1993.

(B) Amendments to Title 326 IAC 2–1–4, 2–1–5, 2–1–6, 2–1–7, 2–1–9, 2–1–10, 2–1–11, 2–1–12, 2–1–13, 2–3–4. Filed with the Secretary of State March 10, 1988, effective April 9, 1988.

(95) On May 22, 1994, the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding a lead plan for Marion County which consists of a source specific revision to Title 326 of the Indiana Administrative Code (326 IAC) for Refined Metals.

(i) *Incorporation by reference.* (A) Amendments to 326 IAC 15–1–2 Source-specific provisions. Filed with the Secretary of State March 25, 1994. Effective April 24, 1994. Published at Indiana Register, Volume 17, Number 8, May 1, 1994.

(96) On August 3, 1994 and February 6, 1995, the Indiana Department of Environmental Management submitted a requested SIP revision to the ozone plan for ozone nonattainment areas.

(i) *Incorporation by reference.* (A) Indiana Administrative Code, Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 22.5 ''Department'' definition, Section 28.5 ''Federally enforceable'' definition, and Section 64.1 ''Reasonably available control technology'' or ''RACT'' definition. Added at 18 *Indiana Register* 1223–4, effective January 21, 1995.

(B) Indiana Administrative Code, Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 7: Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties. Added at 18 *Indiana Register* 1224–9, effective January 21, 1995.

(97) On October 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to State Operating Permit Rules intended to satisfy Federal requirements for issuing federally enforceable State operating permits (FESOP) and thereby exempt certain small emission sources from review under the State's title V operating permit program. This FESOP rule is also approved for the purpose of providing federally enforceable emissions limits on hazardous air pollutants listed under section 112(b) of the Clean Air Act. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2–8 Federally Enforceable State Operating Permit Program.

(i) *Incorporation by reference.* 326 IAC 2–8 Federally Enforceable State Operating Permit Program. Sections 1 through 17. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(98) On October 25, 1994, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to State Operating Permit Rules intended to allow State permitting authorities the option of integrating requirements determined during preconstruction permit review with those required under title V. The State's Enhanced New Source Review provisions are codified at Title 326: Air Pollution Control Board (326 IAC) 2–1–3.2 Enhanced New Source Review.

(i) *Incorporation by reference.* 326 IAC 2–1–3.2 Enhanced new source review. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(99) On June 16, 1993, December 9, 1993, September 8, 1994, and November 17, 1994, Indiana submitted a part D particulate matter (PM) nonattainment area plan for the Lake County moderate nonattainment area.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions,

Section 32.1: ''Gooseneck cap'' definition, Section 34.1: ''Jumper pipe'' definition, Section 62.1: ''Quench car'' definition, Section 63.1: ''Quench reservoir'' definition, and Section 63.2: ''Quench tower'' definition. Added at 16 *Indiana Register* 2363, effective June 11, 1993.

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 5: Opacity Regulations, Rule 1: Opacity Limitations, Section 1: Applicability of rule, Section 2: Visible emissions limitations, Section 3: Temporary exemptions, Section 4: Compliance determination, Section 5: Violations, and Section 7: State implementation plan revisions. Amended at 16 *Indiana Register* 2363, effective June 11, 1993.

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Opacity Limitations, Section 10.1: Lake County PM10 emissions requirements (subsections a through k), Section 10.2: Lake County PM10 coke battery emissions requirements, and Section 11.1: Lake County fugitive particulate matter control requirements. Added at 16 *Indiana Register* 2363, effective June 11, 1993.

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 11: Emissions Limitations for Specific Types of Operations, Rule 3: Coke Oven Batteries, Section 2: Emissions limitations (subsections a through f, and i), and Section 4: Compliance determination. Amended at 16 *Indiana Register* 2363, effective June 11, 1993.

(100) On August 25, 1995, Indiana submitted a regulation which bans residential open burning in Clark, Floyd, Lake, and Porter Counties in Indiana. The regulation allows residential open burning, with certain restrictions, in other parts of the State, and describes other types of open burning which are allowed in Indiana.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 4: Burning Regulations, Rule 1: Open Burning, Section 3: Exemptions. Added at 18 In. Reg. 2408 Effective June 23, 1995.

(101) On August 25, 1995, Indiana submitted a regulation which reduced the maximum allowable volatility for gasoline sold in Clark and Floyd Counties to 7.8 psi during the summer control period. The summer control period is June 1, to September 15, for retail outlets and wholesale customers, and May 1, to September 15, for all others.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 13–3 Control of Gasoline Reid Vapor Pressure. Sections 1 through 7. Finally adopted by the Indiana Air Pollution Control Board January 11, 1995. Signed by the Secretary of State July 6, 1995. Effective August 5, 1995. Published at Indiana Register, Volume 18, Number 11, August 1, 1995.

(102) On June 6, 1995, and on September 28, 1995 the Indiana Department of Environmental Management submitted State Implementation Plan (SIP) revisions establishing an enhanced inspection and maintenance (I/M) program in accordance with the requirements of the Clean Air Act as amended in 1990. The new enhanced I/M program replaces the basic I/M programs in operation in Lake, Porter, Clark, and Floyd Counties. The Air Pollution Control Board adopted new rule 326 IAC 13–1.1 and repealed existing 326 IAC 13–1, thereby putting in place a revised I/M program.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 13–1.1 adopted April 5, 1995, effective October 1, 1995.

(ii) *Other material.* (A) June 6, 1995 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (USEPA) submitting Indiana's revision to the ozone State Implementation Plan (SIP).

(B) September 28, 1995 letter and enclosures from the IDEM Assistant Commissioner to the Regional Administrator of USEPA submitting supplemental vehicle inspection and maintenance SIP revision information and documentation.

(103) On August 25, 1995, the State submitted regulations adopted by the Indiana Air Pollution Control Board as

part of title 326 of the Indiana Administrative Code for incorporation into the Indiana sulfur dioxide State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 7–4–13(3); Dearborn County sulfur dioxide emission limitations; effective May 18, 1995. Published in the *Indiana Register,* Volume 18, Number 9, June 1, 1995.

(104) On December 20, 1995, and February 14, 1996, Indiana submitted a Clean-Fuel Fleet Program for Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 19–3 Clean Fuel Fleet Vehicles, Sections 1 through 7. Adopted by the Indiana Air Pollution Control Board October 4, 1995. Signed by the Secretary of State December 19, 1995. Effective January 18, 1996. Published at Indiana Register, Volume 19, Number 5, February 1, 1996.

(105) On October 25, 1994, the Indiana Department of Environmental Management submitted a requested revision to the Indiana State Implementation Plan in the form of Source Specific Operating Agreement (SSOA) regulations. The SSOA regulations are intended to limit the potential to emit for a source to below the threshold level of Title V of the Clean Air Act. This revision took the form of an amendment to title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2–9–1, 2–9–2(a), 2–9–2(b), and 2–9–2(e) Source Specific Operating Agreement Program.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 2–9. Sections 1, 2(a), 2(b), and 2(e). Adopted by the Indiana Air Pollution Control Board March 10, 1994. Signed by the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(106) On September 19, 1995, and November 8, 1995, Indiana submitted automobile and mobile equipment refinishing rules for Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan. This rule requires suppliers and refinishers to meet volatile organic compound content limits or equivalent control measures for coatings used in automobile and mobile equipment refinishing operations in the four counties, as well as establishing certain coating applicator and equipment cleaning requirements.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–10: Automobile refinishing, Section 1: Applicability, Section 2: Definitions, Section 3: Requirements, Section 4: Means to limit volatile organic compound emissions, Section 5: Work practice standards, Section 6: Compliance procedures, Section 7: Test procedures, Section 8: Control system operation, maintenance, and monitoring, and Section 9: Record keeping and reporting. Adopted by the Indiana Air Pollution Control Board June 7, 1995. Filed with the Secretary of State October 3, 1995. Published at Indiana Register, Volume 19, Number 2, November 1, 1995. Effective November 2, 1995.

(107) On August 8, 1995, Indiana submitted a site specific SIP revision request for Richmond Power and Light in Wayne County Indiana. The submitted revisions provide for revised particulate matter and opacity limitations on the number 1 and number 2 coal fired boilers at Richmond Power and Light's Whitewater Generating Station. The revisions also allow for time weighted averaging of stack test results at Richmond Power and Light to account for soot blowing. Indiana is making revisions to 326 IAC 3–2–1, which currently allows Indiana to authorize alternative emission test methods for Richmond Power and Light. Until the rule is revised to remove this authority, and approved by the United States Environmental Protection Agency, no alternate emission test method, changes in test procedures or alternate operating load levels during testing is to be granted to Richmond Power and Light.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 3: Monitoring Requirements, Rule 2.1: Source Sampling Procedures, Section 5: Specific Testing Procedures; Particulate Matter; Sulfur Dioxide; Nitrogen Oxides; Volatile Organic Compounds; Article 5: Opacity Regulations, Rule 1: Opacity Limitations, Section 2: Visible Emission Limitations; and Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 14:

Wayne County. Added at 18 In. Reg. 2725. Effective July 15, 1995.

(ii) *Additional information.* (A) August 8, 1995 letter from the Indiana Department of Environmental Management to USEPA Region 5 regarding submittal of a state implementation plan revision for Richmond Power and Light.

(108) On August 29, 1995, Indiana submitted a site specific SIP revision request for Allison Engine Company in Marion County, Indiana. The revision provides limits of 0 tons per year for boilers 2 and 11, which have shut down. The hourly mass limits remain unchanged at 0.337 pounds per million British Thermal Units (lbs/MMBTU) for boilers 1–4 of plant 5, 0.15 lbs/MMBTU for boilers 3–6 of plant 8, and 0.15 lbs/MMBTU for boilers 7–10 of plant 8. The rule provides for a combined limit of 130.0 tons per year for the boilers mentioned above, as well as new limits on the types and amounts of fuel which may be burned at the boilers, and a recordkeeping requirement to document compliance.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Added at 19 In. Reg. 186. Effective November 3, 1995.

(109) On October 25, 1994, and April 29, 1997, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to the General Provisions and Permit Review Rules intended to update and add regulations which have been effected by recent SIP revisions, and to change regulations for streamlining purposes. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 1–1 Provisions Applicable Throughout Title 326, 1–2 Definitions, 1–6 Malfunctions, 2–1 Construction and Operating Permit Requirements.

(i) *Incorporation by reference.* 326 IAC 1–1–2 and 1–1–3. 326 IAC 1–2–2, 1–2–4, 1–2–12, 1–2–33.1, and 1–2–33.2. 326 IAC 1–6–1. 326 IAC 2–1–1, 2–1–3, and 2–1–10. Adopted by the Indiana Air Pollution Control Board March 10, 1994. Filed with the Secretary of State May 25, 1994. Effective June 24, 1994. Published at Indiana Register, Volume 17, Number 10, July 1, 1994.

(110) On November 21, 1995, and February 14, 1996, Indiana submitted Municipal Solid Waste (MSW) Landfill rules for Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan. This rule requires MSW landfills that emit greater than fifty-five tons per day of nonmethane organic compound, or that have a minimum design capacity of one hundred eleven thousand tons (one hundred thousand megagrams) of solid waste, to install a landfill gas collection and control system that either incinerates the gas or recovers the gas for energy use.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–8 Municipal Solid Waste Landfills, Section 1 Applicability, Section 2 Definitions, Section 3 Requirements; incorporation by reference of federal standards, Section 4 Compliance deadlines. Adopted by the Indiana Air Pollution Control Board July 12, 1995. Filed with the Secretary of State December 19, 1995. Published at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 18, 1996.

(111) On November 21, 1995, and February 14, 1996, Indiana submitted a rule for the control of volatile organic compound emissions from volatile organic liquid storage operations in Clark, Floyd, Lake, and Porter Counties.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–9: Volatile Organic Liquid Storage Vessels, Section 1: Applicability, Section 2: Exemptions, Section 3: Definitions, Section 4: Standards, Section 5: Testing and procedures, Section 6: Record keeping and reporting requirements. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State December 19, 1995. Published at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 18, 1996.

(112) [Reserved]

(113) On February 13, 1996, and June 27, 1996, Indiana submitted rules for the control of volatile organic compound emissions from shipbuilding and ship repair operations in Clark, Floyd,

Lake, and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–12: Shipbuilding or Ship Repair operations in Clark, Floyd, Lake, and Porter Counties, Section 1: Applicability, Section 2: Exemptions, Section 3: Definitions, Section 4: Volatile organic compound emissions limiting requirements, Section 5: Compliance requirements, Section 6: Test methods and procedures, and Section 7: Record keeping, notification, and reporting requirements. Adopted by the Indiana Air Pollution Control Board September 6, 1995. Filed with the Secretary of State April 1, 1996. Published at Indiana Register, Volume 19, Number 8, May 1, 1996. Effective May 1, 1996.

(114) On November 21, 1995, and February 14, 1996, Indiana submitted regulations for wood furniture coating operations in Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan for ozone.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–11 Wood Furniture Coatings, Section 1 Applicability, Section 2 Definitions, Section 3 Emission limits, Section 4 Work practice standards, Section 5 Continuous compliance plan, Section 6 Compliance procedures and monitoring requirements, Section 7 Test procedures, Section 8 Recordkeeping requirements, Section 9 Reporting requirements, Section 10 Provisions for sources electing to use emission averaging. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State December 5, 1996. Published at Indiana Register, Volume 19, Number 5, February 1, 1996. Effective January 4, 1996.

(115) [Reserved]

(116) On September 20, 1996 the Indiana Department of Environmental Management submitted a request to revise the Indiana State Implementation Plan by adding parachlorobenzotrifluoride (PCBTF), cyclic, branched or linear completely methylated siloxanes and acetone to the definition of ''nonphotochemically reactive hydrocarbon,'' and by deleting ''vegetable oil'' from a list of compounds not considered to be volatile organic compounds (VOC) from the definition of VOC (thus including ''vegetable oil'' as a ''VOC'').

(i) *Incorporation by reference.* (A) 326 IAC 1–2–48 ''nonphotochemically reactive hydrocarbon''. Sections 48(a)(22) ''parachlorobenzotrifluoride'' and (23) ''cyclic, branched, or linear completely methylated siloxanes.'' 326 IAC 1–2–90 ''volatile organic compound (VOC)'' definition. Section 90. Published in Indiana Register, Volume 19, Number 1, October 1, 1995, page 29. Filed with the Secretary of State September 5, 1995, effective October 5, 1995.

(B) 326 IAC 1–2–48 ''nonphotochemically reactive hydrocarbon.'' Section 48(a)(24) ''acetone'' (CAS Number 67–64–1). Published in Indiana Register, Volume 19, Number 10, July 1, 1996, page 2856. Filed with the Secretary of State, May 13, 1996, effective June 12, 1996.

(117) [Reserved]

(118) On July 12, 1995, Indiana submitted as a revision to the State Implementation Plan construction permits CP 019–2110, CP 019–2696, and CP 019–4362, issued under Indiana rule 326 IAC 2–1. The permits establish volatile organic compound control requirements for Rhodes Incorporated's heatset web offset printing presses.

(i) *Incorporation by reference.* Construction Permit CP 019–2110, issued and effective October 15, 1991; Construction Permit CP 019–2696, issued and effective December 18, 1992; Construction permit CP 019–4362, issued and effective April 21, 1995.

(119) Approval—On October 2, 1996, the State of Indiana submitted a State Implementation Plan revision request to eliminate references to total suspended particulates (TSP) while maintaining the existing opacity requirements. The SIP revision became effective July 19, 1996. The SIP revision request satisfies all applicable requirements of the Clean Air Act.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 5–1: Opacity Limitations, Section 1: Applicability of Rule, Section 2: Visible emission limitations. Adopted by the Indiana Air Pollution Control Board April 3, 1996. Filed with the Secretary of State June 19, 1996. Published at the Indiana Register, Volume 19, Number 11, August 1, 1996 (19 IR 3049). Effective July 19, 1996.

(120) On August 26, 1996, Indiana submitted a rule requiring an oxides of nitrogen (NO_X) reasonably available control technology (RACT) rule for the Clark and Floyd Counties moderate ozone nonattainment area as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 10: Nitrogen Oxides Rules. Rule 1: Nitrogen Oxides Control in Clark and Floyd Counties. Section 1: Applicability, Section 2: Definitions, Section 3: Requirements, Section 4: Emission limits, Section 5: Compliance procedures, Section 6: Emissions monitoring, and Section 7: Certification, record keeping, and reports. Adopted by the Indiana Air Pollution Control Board February 7, 1996. Filed with the Secretary of State May 13, 1996. Published at Indiana Register, Volume 19, Number 10, July 1, 1996. Effective June 12, 1996.

(121) On January 23, 1997, the Indiana Department of Environmental Management submitted a revision to the State Implementation Plan (SIP) for the general conformity rules. The general conformity SIP revision enables the State of Indiana to implement and enforce the Federal general conformity requirements in the nonattainment and maintenance areas at the State and local level in accordance with 40 CFR part 51, subpart W—Determining Conformity of General Federal Actions to State or Federal Implementation Plans.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 16–3: General Conformity, Section 1: Applicability; incorporation by reference of Federal standards. Adopted by the Indiana Air Pollution Control Board April 3, 1996. Filed with the Secretary of State June 6, 1996. Published at the Indiana Register, Volume 19, Number 11, August 1, 1996 (19 IR 3050). Effective July 6, 1996.

(122) On July 24, 1997, Indiana submitted rules requiring record keeping and reporting requirements for graphic arts sources of volatile organic compounds and amended source applicability requirements for graphic arts sources located in Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* (A) 326 IAC 8–1–9 General record keeping and reporting requirements. 326 IAC 8–1–10 Compliance certification, record keeping, and reporting requirements for certain coating facilities using compliant coatings. 326 IAC 8–1–11 Compliance certification, record keeping, and reporting requirements for certain coating facilities using daily weighted averaging. 326 IAC 8–1–12 Compliance certification, record keeping, and reporting requirements for certain coating facilities using control devices. Adopted by the Indiana Air Pollution Control Board November 6, 1996. Filed with the Secretary of State April 22, 1997. Published at Indiana Register, Volume 20, Number 9, June 1, 1997. Effective May 22, 1997.

(B) 326 IAC 8–5–5 Graphic arts operations. Adopted by the Indiana Air Pollution Control Board November 6, 1996. Filed with the Secretary of State April 22, 1997. Published at Indiana Register, Volume 20, Number 9, June 1, 1997. Effective May 22, 1997.

(123) On July 9, 1997, Indiana submitted a site specific SIP revision request for the University of Notre Dame in Saint Joseph County, Indiana. The submitted revision amends 326 IAC 6–1–18, and provides for revised particulate matter and heat input limitations on the five boilers at Notre Dame's power plant.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 18: St. Joseph County. Added at 20 In. Reg. 2299. Effective May 22, 1997.

(124) On February 3, 1999, and May 17, 2000, Indiana submitted revised particulate matter emissions regulations for Allison Transmission in Marion County, Indiana. The submittal amends 326 IAC 6–1–12, and includes the combination of annual emissions limits for 5 boilers into one overall limit as well as new recordkeeping requirements.

(i) *Incorporation by reference.* Emissions limits and recordkeeping requirements for Allison Transmission in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area

Limitations, Section 12: Marion County. Added at 22 In. Reg. 416. Effective October 16, 1998.

(125) On April 6, 1999, Indiana submitted amended rules for the control of volatile organic compound emissions from vehicle refueling in Clark, Floyd, Lake, and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–1: General Provisions, Section 0.5: Definitions and 326 Indiana Administrative Code 8–4: Petroleum Sources, Section 6: Gasoline Dispensing Facilities. Adopted by the Indiana Air Pollution Control Board May 3, 1995. Filed with the Secretary of State September 18, 1995. Published at Indiana Register, Volume 19, Number 2, November 1, 1995. Effective October 18, 1995.

(126) On August 18, 1999, Indiana submitted amendments to the State's automobile refinishing rule for Lake, Porter, Clark, and Floyd Counties.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–10: Automobile Refinishing, Section 1: Applicability, Section 5: Work practice standards, Section 6: Compliance procedures, Section 9: Recordkeeping and reporting. Adopted by the Indiana Air Pollution Control Board February 4, 1998. Filed with the Secretary of State July 14, 1998. Published at Indiana Register, Volume 21, Number 12, page 4518, September 1, 1998. Effective August 13, 1998.

(127) On August 18, 1999, Indiana submitted rules for controlling Volatile Organic Compound (VOC) emissions in Vanderburgh County. The rules contain control requirements for Stage I gasoline vapor recovery equipment, and a requirement for automobile refinishers to use special coating application equipment (automobile refinishing spray guns) to reduce VOC.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8–4: Petroleum Sources, Section 1: Applicability, Subsection (c). Adopted by the Indiana Air Pollution Control Board November 4, 1998. Filed with the Secretary of State April 23, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999. Effective May 23, 1999.

(B) 326 Indiana Administrative Code 8–10: Automobile Refinishing, Section 1: Applicability, Section 3: Requirements. Adopted by the Indiana Air Pollution Control Board November 4, 1998. Filed with the Secretary of State April 23, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999. Effective May 23, 1999.

(128) [Reserved]

(129) On May 18, 1999, the Indiana Department of Environmental Management submitted revised site-specific lead emission limits for Hammond Group—Halstab Division located in Hammond (Lake County), Indiana. The revised emission limits are expressed as pounds-per-hour limits ranging from 0.04 to 0.07 applicable to sixteen separate emissions points. The revised emission limits will result in the reduction of total allowable lead emissions from 31,546 pounds per year as provided for in the current federally-approved State Implementation Plan to 6,832.8 pounds per year.

(i) *Incorporation by reference.* (A) Indiana Administrative Code 326: Air Pollution Control Board, Article 15 Lead, Rule 1 Lead Emissions Limitations, Section 2—Source Specific Provisions, subsection (a), subdivision 7, clauses (A) through (G). Amended at 22 Indiana Register 1427, effective February 5, 1999.

(130) On February 3, 1999, Indiana submitted a site specific SIP revision request for the Central Soya Company, Incorporated, Marion County, Indiana. The submitted revision amends 326 IAC 6–1–12(a), and provides for revised particulate matter emission totals for a number of source operations at the plant. The revision reflects the closure of nine operations and the addition of five new ones, resulting in a net reduction in particulate matter emissions.

(i) *Incorporation by reference.* The entry for Central Soya Company, Incorporated contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Subsection (a) amended at 22, Indiana Register 416, effective October 16, 1998.

(131) On April 6, 1999, Indiana submitted rules for the control of volatile

organic compound emissions from steel mill sinter plant operations in Lake and Porter Counties as a revision to the State Implementation Plan.

(i) *Incorporation by reference.*

326 Indiana Administrative Code 8–13: Sinter Plants. Adopted by the Indiana Air Pollution Control Board March 4, 1998. Filed with the Secretary of State June 24, 1998. Published at Indiana Register, Volume 21, Number 11, August 1, 1998. Effective July 24, 1998.

(132) On February 3, 1999, Indiana submitted revised particulate matter emissions regulations for Dubois County, Indiana. The submitted revision amends 326 IAC 6–1–9, and includes relaxation of some PM limits, the elimination of limits for boilers which are no longer operating, updated facility names, and changes to boiler fuel types.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 9: Dubois County. Added at 22 In. Reg. 423. Effective October 18, 1998.

(133) On November 22, 1999, Indiana submitted revised particulate matter emissions regulations for Indianapolis Power and Light Company in Marion County, Indiana. The submittal amends 326 IAC 6–1–12, and includes relaxation of some PM limits, tightening of other limits, and the elimination of limits for several boilers which are no longer operating. The revisions also include the combination of annual emissions limits for several boilers, and correction of a typographical error in one limit.

(i) *Incorporation by reference.* Emissions limits for Indianapolis Power and Light in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County, subsection (a). Added at 22 In. Reg. 2857. Effective May 27, 1999.

(134) On February 3, 1999, the State of Indiana submitted a revision to particulate matter limitations for the Lever Brothers facility in Lake County. On December 28, 1999, Indiana submitted revisions to particulate matter and sulfur dioxide limitations for NIPSCo's Dean Mitchell Station.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code (326 IAC) 6–1–10.1 (d)(28) and (d)(33), filed with the Secretary of State on May 13, 1999, effective June 12, 1999. Published at Indiana Register Volume 22, Number 10, July 1, 1999 (22 IR 3047).

(B) Title 326 of the Indiana Administrative Code (326 IAC) 7–4–1.1 (c)(17), filed with the Secretary of State on May 13, 1999, effective June 12, 1999. Published at Indiana Register Volume 22, Number 10, July 1, 1999 (22 IR 3070).

(135) On January 1, 2000, Indiana submitted revised opacity limits for three processes at ALCOA Warrick Operations. The revised limits allow higher opacity emissions during fluxing operations at three casting complexes. This action does not change mass emissions limits for these sources.

(i) *Incorporation by reference.* (A) Modifications to Operating Permits OP 87–07–91–0112 thru 0116: Permit I.D. 173–10913, Issued on October 1, 1999, to ALCOA, Inc.—Warrick Operations. Effective October 1, 1999.

(B) Modifications to Operating Permit OP 87–07–91–0113: Permit I.D. 173–11414, Issued on December 15, 1999, to ALCOA, Inc.—Warrick Operations. Effective December 15, 1999.

(136) On August 30, 1999, and May 17, 2000, Indiana submitted revised particulate matter and sulfur dioxide emissions regulations for National Starch in Marion County, Indiana. The submittal amends 326 IAC 6–1–12, and includes elimination of shut down sources from the rules, increases in some limits, and a decrease in one limit.

(i) *Incorporation by reference.*

(a) Emissions limits for National Starch in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 12: Marion County. Added at 22 In. Reg. 1953. Effective March 11, 1999.

(b) Emissions limits for National Starch in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by

County, Section 2: Marion County Sulfur Dioxide Emission Limitations. Added at 22 In. Reg. 1953. Effective March 11, 1999.

(138) On August 2, 2000, Indiana submitted revised total suspended particulate emissions regulations for Illinois Cereal Mills, Incorporated in Marion County, Indiana. The submittal amends 326 IAC 6–1–12(a). It includes an increase in the annual particulate matter limit from 0.7 tons per year (TPY) to 1.0 TPY for a boiler and a decrease in the annual limit from 6.3 TPY to 6.0 TPY for a grain elevator.

(i) *Incorporation by reference.*

Emissions limits for Illinois Cereal Mills, Incorporated in Marion County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 12: Marion County, subsection (a). Filed with the Secretary of State on May 26, 2000 and effective on June 25, 2000. Published in 23 *Indiana Register* 2414 on July 1, 2000.

(139) On December 30, 1999, Indiana submitted revised total suspended particulate emissions regulations for Johns Manville Corporation in Wayne County. The submittal appends 326 IAC 6–1–14. It includes raising seven long-term emissions limits, lowering one short-term limit, removing one emissions source, and a name change for the company. The long-term limits are being raised to allow to facility to operate 8760 hours annually. Switching fuel for a boiler allows its short-term limit to be decreased. One emissions source was removed from this facility. The Johns Manville, Wayne County, facility was formerly known as Schuller International, Incorporated.

(i) *Incorporation by reference.*

Emissions limits for Johns Manville Corporation in Wayne County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 14: Wayne County. Filed with the Secretary of State on September 24, 1999, and effective on October 24, 1999. Published in 23 *Indiana Register* 301 on November 1, 1999.

(140) On August 31, 2000, Indiana submitted revised particulate matter emissions regulations for Rolls-Royce Allison in Marion County, Indiana. The submittal amends 326 IAC 6–1–12(a). It includes a name change for the company from the Allison Engine Company to Rolls-Royce Allison and the addition of an alternate fuel, landfill gas. Landfill gas can be used in boilers 1 through 4 of plant 5 and boilers 3, 4, and 7 through 10 of plant 8. These state implementation plan revisions do not change the particulate matter emissions limits.

(i) *Incorporated by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 12: Marion County, subsection (a). Filed with the Secretary of State on May 26, 2000 and effective on June 25, 2000. Published in 23 *Indiana Register* 2419 on July 1, 2000.

(141) On February 16, 2001 Indiana submitted revised particulate matter emissions regulations for Cerestar USA, Inc. The submittal amends 326 IAC 6–1–10.1, and includes the elimination of 18 emission points, the addition of 39 new emission points, and a change in the way the short-term emission limits are expressed (from pounds of particulate matter per ton of product to grains per dry standard cubic feet). The revision also changes the name of the facility listed in the rules from American Maize Products (Amaizo) to Cerestar USA, Inc.

(i) *Incorporation by reference.* Emissions limits for Cerestar USA, Inc. in Lake County contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, Section 10.1: Lake County PM_{10} emission requirements. Added at 24 In. Reg. 1308. Effective January 13, 2001.

(142) On June 8, 2000 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of the Indiana vehicle inspection and maintenance (I/M) program in operation in Lake, Porter, Clark, and Floyd Counties. Among the most significant changes being made to the program include: the exemption of

the current calendar year model vehicle plus the (3) previous model years vehicles from emission testing; the inclusion of language that allows the use of the IM93 alternative vehicle emission test currently being used in the program; language that updates the requirement to test vehicles equipped with second generation on-board diagnostics systems (OBDII); and the elimination of the off-cycle test, which is the emission test currently required when there is a change in possession of motor vehicle titles. The Air Pollution Control Board amended 326 IAC 13–1.1 and repealed 326 IAC 13–1.1–17, thereby putting in place the revisions to the I/M program.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 13–1.1 adopted December 2, 1998, effective January 22, 1999.

(ii) *Other material.* (A) June 8, 2000 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (USEPA) submitting Indiana's revision to the ozone State Implementation Plan (SIP).

(143) On November 15, 2000, the State submitted rules to reduce volatile organic compound emissions from cold cleaning degreasing.

(i) *Incorporation by reference.* 326 Indiana Administrative Code 8–3: Organic Solvent Degreasing Operations, Section 1, Applicability, and Section 8, Material Requirements for Cold Cleaning Degreasers. Final adoption by the Indiana Air Pollution Control Board on November 4, 1998. Filed with the Secretary of State on April 27, 1999. Effective May 27, 1999. Published at Indiana Register, Volume 22, Number 9, June 1, 1999.

(144) On August 20, 2001 and September 19, 2001, Indiana submitted a plan in response to Phase I of the NO_X SIP Call. The plan includes Indiana's Phase I NO_X Budget Demonstration and supporting documentation including initial unit allocations and two new rules: 326 IAC 10–3 and 326 IAC 10–4.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 10; Ozone rules, Rule 3: Nitrogen Oxide Reduction Program for Specific Source Categories (326 IAC 10–3). Adopted June 6, 2001. Submitted August 20, 2001 and September 19, 2001. State effective September 16, 2001.

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 10; Ozone rules, Rule 4: Nitrogen Oxides Budget Trading Program (326 IAC 10–4). Adopted June 6, 2001. Submitted August 20, 2001 and September 19, 2001. State effective September 16, 2001.

(145) Indiana submitted on December 17, 1997, as part of the 9% Rate of Progress Plan, an agreed order between U.S. Steel and the Indiana Department of Environmental Management. Section 3 of Exhibit E requires U.S. Steel to establish a coke plant process water treatment plant at its Gary Works.

(i) *Incorporation by reference.* (A) Section 3 of Exhibit E of the March 22, 1996, Agreed Order between U.S. Steel (currently USX Corporation) and the Indiana Department of Environmental Management.

(146) On October 21, 1999, Indiana submitted revised state opacity regulations. The submittal amends 326 IAC 5–1–1, 5–1–2, 5–1–3, 5–1–4(b), and 5–1–5(b). The revisions address provisions concerning the startup and shutdown of operations, averaging period terminology, temporary exemptions, alternative opacity limits, and conflicts between continuous opacity monitor and visual readings.

(i) *Incorporation by reference.* Opacity limits for Indiana contained in Indiana Administrative Code Title 326: Air Pollution Control Board, Article 5: Opacity Regulations. Filed with the Secretary of State on October 9, 1998 and effective on November 8, 1998. Published in 22 *Indiana Register* 426 on November 1, 1998.

(ii) *Additional material.* Letter of October 10, 2001, from Janet McCabe, Indiana Department of Environmental Management, Assistant Commissioner of the Office of Air Quality, to Stephen Rothblatt, US EPA Region 5, Chief of Air Programs Branch. The letter adds the technical justification and air quality analysis required for alternate opacity limits.

(147) On February 1, 2002, Indiana submitted its Prevention of Significant Deterioration rules as a revision to the State implementation plan.

(i) *Incorporation by reference.* (A) Title 326 of the Indiana Administrative Code, Rules 2–2–1, 2–2–2, 2–2–3, 2–2–4, 2–2–5, 2–2–6, 2–2–7, 2–2–9, 2–2–12, and 2–2–14. Filed with the Secretary of State on December 20, 2001, effective January 19, 2002.

(B) Title 326 of the Indiana Administrative Code, Rules 2–2–8, 2–2–10, 2–2–11, 2–2–13, 2–2–15 and 2–2–16. Filed with the Secretary of State on March 23, 2001, effective April 22, 2001.

(C) Title 326 of the Indiana Administrative Code, Rules 2–1.1–6 and 2–1.1–8. Filed with the Secretary of State on November 25, 1998, effective December 25, 1998. Errata filed with the Secretary of State on May 12, 1999, effective June 26, 1999.

(148) On August 8, 2001, the State submitted rules to incorporate by reference Federal capture efficiency test methods. The submittal amends 326 IAC 8–1–4.

(i) *Incorporation by reference.*

Title 326: Air Pollution Control Board; Article 8: Volatile Organic Compound Rules; Rule 1: General Provisions; Section 4: Testing procedures. Filed with the Secretary of State on June 15, 2001 and effective on July 15, 2001. Published in 24 *Indiana Register* 3619 on August 1, 2001.

(149) [Reserved]

(150) On July 18, 2000 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of Indiana's gasoline transport testing requirements with additional material submitted on January 11, 2002 and March 13, 2002. The Air Pollution Control Board amended 326 IAC 8–4–7 and 326 IAC 8–4–9 and added 326 IAC 20–10.

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8–4–7; 8–4–9; and 20–10–01 adopted May 5, 1999, effective November 5, 1999.

(ii) *Additional materials.* (A) July 18, 2000 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (EPA) submitting Indiana's revision to the ozone SIP.

(B) January 11, 2002 letter and enclosures from IDEM to EPA submitted as an addendum to the July 18, 2000 revision to the ozone SIP.

(C) March 13, 2002 letter and enclosures from IDEM to EPA submitted as an addendum to the July 18, 2000 revision to the ozone SIP.

(151) On March 5, 2002, the Indiana Department of Environmental Management requested a revision to the Indiana State Implementation Plan in the form of revisions to the Permit Review Rules intended to add regulations to assure that construction permit conditions exist independently of title V permits. This revision took the form of an amendment to Title 326: Air Pollution Control Board of the Indiana Administrative Code (326 IAC) 2–1.1–9.5 General Provisions; Term of Permit.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Rules 326 IAC 2–1.1–9.5. Adopted by the Indiana Air Pollution Control Board October 3, 2001. Filed with the Secretary of State December 20, 2001. Effective January 19, 2002. Published at Indiana Register, Volume 25, Number 5, February 1, 2002.

(152) On December 19, 2001, Indiana submitted revised Particulate Matter (PM) control requirements. A March 17, 2003 letter from Indiana clarified what portions of the original submission the State was seeking revisions for. EPA is approving revisions for certain natural gas combustion sources in Indiana and various cleanup revisions to Indiana's PM rules. One revision eliminates PM emissions limits on specified natural gas combustion sources and replaces the limits with a requirement that such sources may only burn natural gas. The submission also contains many cleanup provisions such as eliminating limits for sources which have shut down and updating names of sources.

(i) *Incorporation by reference.* (A) Indiana Administrative Code (IAC) Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Nonattainment Area Limitations, IAC 6–1–1.5: Definitions; IAC 6–1–2: Particulate emission limitations; fuel combustion steam generators, asphalt concrete

plant, grain elevators, foundries, mineral aggregate operations; modification by commissioner; IAC 6–1–3: Non-attainment area particulate limitations; compliance determination; IAC 6–1–4: Compliance schedules; IAC 6–1–5: Control strategies; IAC 6–1–6: State Implementation Plan revisions; IAC 6–1–8.1: Dearborn County particulate matter emissions limitations; IAC 6–1–9: Dubois County; IAC 6–1–10.1: Lake County PM_{10} emission requirements, Subsections (a) through (k); IAC 6–1–11.1: Lake County fugitive particulate matter control requirements; IAC 6–1–12: Marion County; IAC 6–1–13: Vigo County; IAC 6–1–14: Wayne County; IAC 6–1–15: Howard County; IAC 6–1–16: Vanderburgh County; IAC 6–1–17: Clark County; and, IAC 6–1–18: St. Joseph County. Adopted by the Indiana Air Pollution Control Board August 1, 2001. Filed with the Secretary of State November 8, 2001. Published in the *Indiana Register*, Volume 25, Number 3, December 1, 2001 at 709. State effective December 8, 2001.

(B) Indiana Administrative Code (IAC) Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, 6–1–1: Applicability. Adopted by the Indiana Air Pollution Control Board August 1, 2001. Filed with the Secretary of State November 8, 2001. Published in the *Indiana Register*, Volume 25, Number 3, December 1, 2001 at 709. State effective, December 8, 2001. Amended by Errata filed with the Secretary of State January 10, 2002. Published in the *Indiana Register*, Volume 25, Number 5, February 1, 2002 at 1644. State effective, February 24, 2002. And amended by Errata filed with the Secretary of State October 2, 2002. Published in the *Indiana Register*, Volume 26, Number 2, November 1, 2002 at 383. State effective, November 16, 2002.

(153) On April 30, 2002 and September 6, 2002, Indiana submitted revised particulate matter regulations for Union Tank Car's railcar manufacturing facility in Lake County, Indiana. The submittal amends 326 IAC 6–1–10.1. The revisions consist of relaxing the limits for the grit blaster. The new limits are 0.01 grains per dry standard cubic foot and 9.9 pounds per hour.

(i) *Incorporation by reference.*

Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.1: Lake County PM_{10} emission requirements. Filed with the Secretary of State on July 26, 2002 and effective on August 25, 2002. Published in 25 *Indiana Register* 4076 on September 1, 2002.

(154) On August 08, 2001, Indiana submitted revised volatile organic Compound control requirements for certain facilities in the Indiana shipbuilding and ship repair industry. This submittal changes the individual and plantwide coating exemption levels and makes revisions to the compliance requirements, test methods and recordkeeping requirements. On October 1, 2002, Indiana submitted a letter providing its interpretation of certain of the above requirements.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compounds, Rule 12: Shipbuilding or Ship Repair Operations in Clark, Floyd, Lake, and Porter Counties, Section 2: Exemptions, Section 4: Volatile organic compound emissions limiting requirements, Section 5: Compliance requirements, Section 6: Test methods and procedures, Section 7: Recordkeeping, notification, and reporting requirements. Adopted by the Indiana Air Pollution Control Board on February 7, 2001. Filed with the Secretary of State June 15, 2001, effective July 15, 2001.

(B) An October 1, 2002, letter from the Indiana Department of Environmental Management which provides background information on its shipbuilding and ship repair rule revisions and its interpretation of certain of these requirements.

(155) On October 17, 2002, the State submitted revised particulate matter emission limits for the Knauf Fiber Glass in Shelby County for incorporation into the Indiana SIP.

(i) Incoropration by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 11 Emission Limitations for Specific Types of Operations, Rule 4 Fiberglass Insulation Manufacturing, Paragraph 5 Shelby County (326 IAC 11–

4–5). Adopted by the Indiana Air Pollution Control Board on May 1, 2002. Filed with the Secretary of State on August 28, 2002. Published in the *Indiana Register*, Volume 26, Number 1, October 1, 2002, effective September 27, 2002.

(156) On April 3, 2000 the State submitted a revision to Indiana's State Implementation Plan to allow the Department of the Navy use of military specification coatings containing volatile organic compound (VOC) control requirements with content up to 5.45 pounds of VOC per gallon of coating less water for the projectile renovations operations in Building 2728 at the Naval Surface Warfare Center, Crane Division.

(i) *Incorporation by reference.* (A) Part 70 Significant Source Modification No.: 101–11153–00005 as issued by the Indiana Air Pollution Control Board on October 12, 1999.

(157) On December 19, 2001, and February 11, 2004, Indiana submitted revised volatile organic compound (VOC) emissions regulations for Eli Lilly and Company in Marion County. The submission provides alternate VOC control requirements for reactors, vacuum dryers, centrifuges, and filters in the pilot plant. The alternate control requirements are being approved under site-specific Reasonably Available Control Technology standards.

(i) *Incorporation by reference.* (A) Commissioner's Order #2003–02 as issued by the Indiana Department of Environmental Management on February 11, 2004.

(158) On October 21, 2002 and January 10, 2003, Indiana submitted revised volatile organic compound regulations for dip and flow coating operations. The revisions include replacing daily compliance with a rolling thirty day average and adding new equivalent emission limits.

(i) *Incorporation by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General Provisions, Section 2: Compliance Methods. Filed with the Secretary of State on November 15, 2002, and effective on December 15, 2002. Published in 26 *Indiana Register* 1073 on January 1, 2003.

(159) On January 31, 2003, Indiana submitted revised particulate matter regulations for Richmond Power and Light Company's coal burning power plant in Wayne County, Indiana. The submission amends 326 IAC 6–1–14. The revisions make the long-term emission limits consistent with the short-term limits approved by EPA on April 9, 1996. The new limits are 320 tons per years for boiler number 1 and 700 tons per years for boiler number 2.

(i) *Incorporation by reference.* Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 14: Wayne County PM emission requirements. Filed with the Secretary of State on March 10, 2003 and effective on April 9, 2003. Published in 26 *Indiana Register* 2318–19 on April 1, 2003.

(160) On July 9, 2002, Indiana submitted revised process weight rate rules as a requested revision to the Indiana State Implementation Plan. The changes clarify rule applicability, correct errors in the process weight rate table, allow sources to substitute work standard practices instead of the process weight rate table. They clarify the definitions of particulate and particulate matter. They also reduce duplicative recordkeeping.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules Rule 3: Particulate Emission Limitations for Manufacturing Process. 6–3–1 Applicability, 6–3–1.5 Definitions and 6–3–2 Particulate emission limitations, work practices, and control technologies. Adopted by the Indiana Air Pollution Control Board on February 6, 2002. Filed with the Secretary of State May 13, 2002, effective June 12, 2002.

(161) On October 30, 2002 and January 10, 2003, the Indiana Department of Environmental Management submitted revisions to Chapter 326 IAC 4–2 and 9–1 of the Indiana Administrative Code (IAC), an incineration plan for selected sources in Indiana, with a request that the Indiana State Implementation Plan be revised to include these amended carbon monoxide and particulate matter rules.

(i) *Incorporation by reference.* (A) *Indiana rule:* 326 IAC 4–2–1 and 326 IAC 4–2–2 (particulate matter), published at *Indiana Register*, January 1, 2003, 26 IR 1070, with an effective date of December 15, 2002.

(B) *Indiana rule:* 326 IAC 9–1–1 and 326 IAC 9–1–2 (carbon monoxide), published at *Indiana Register*, January 1, 2003, 26 IR 1072, with an effective date of December 15, 2002.

(162) On January 7, 2003 the Indiana Department of Environmental Management submitted a State Implementation Plan (SIP) revision amending certain provisions of Indiana's 326 IAC 8–2–9 (Miscellaneous metal coating operations) and 326 IAC 13–3–1 (Applicability, Control of gasoline Reid vapor pressure).

(i) *Incorporation by reference.* (A) 326 Indiana Administrative Code 8–2–9; and 13–3–1 adopted August 7, 2002, effective December 15, 2002.

(ii) *Additional materials.* (A) January 7, 2003 letter and enclosures from the Indiana Department of Environmental Management (IDEM) Commissioner to the Regional Administrator of the United States Environmental Protection Agency (EPA) submitting Indiana's revisions to the ozone SIP.

(163) On June 26, 2003, the Indiana Department of Environmental Management (IDEM) submitted revisions to 326 IAC 10–3 (NO_X Reduction Program for Specific Source Categories) and 326 IAC 10–4 (NO_X Budget Trading Program) of the Indiana Administrative Code (IAC). Also, on August 4, 2003, IDEM submitted a letter containing the Legislative Service Agency Document #00–54(F) as published in the Indiana Register on August 1, 2003, 26 IR 3550, containing the legal and approving signatures. The revised rules change the Indiana Phase I NO_X budget to 233,548 tons per ozone season for 2007.

(i) *Incorporation by reference.* (A) Indiana Pollution Control Board rules: 326 IAC 10–3–1 and 326 IAC 10–4–1, 10–4–2, 10–4–9, 10–4–10, 10–4–13, 10–4–14 and 10–4–15. Adopted by the Indiana Pollution Control Board on May 7, 2003. Filed with the Secretary on July 7, 2003. Published at Indiana Register Volume 26, Number 11, August 1, 2003 (26 IR 3550). Effective August 6, 2003.

(164) On June 13, 2003, and as supplemented on October 3, 2003, Indiana submitted a State Implementation Plan (SIP) revision for the control of emissions of particulate matter (PM_{10}) in the state of Indiana. Revisions to 326 IAC 6–1–10.1 and 326 IAC 6–1–10.2 amend the PM_{10} emission limits at U.S. Steel-Gary Works and U.S. Steel-Gary Coke Operations, located in Lake County, Indiana, and should result in decreased PM_{10} emissions of approximately 350 tons per year.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.1: Lake County PM_{10} emission requirements. Filed with the Secretary of State on August 6, 2003 and effective on September 5, 2003. Published at Indiana Register, Volume 27, Number 1, October 1, 2003 (27 IR 61).

(B) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: Non-attainment Area Limitations, Section 10.2: Lake County PM_{10} coke battery emission requirements. Filed with the Secretary of State on August 6, 2003 and effective on September 5, 2003. Published at Indiana Register, Volume 27, Number 1, October 1, 2003 (27 IR 85).

(165) On January 16, 2004 Indiana submitted revised Prevention of Significant Deterioration rules as a revision to the Indiana State Implementation Plan.

(i) *Incorporation by reference.* (A) Amendments to the Indiana Administrative Code, Title 326: Air Pollution Control Board; Article 2: Permit Review Rules; Rule 2: Prevention of Significant Deterioration (PSD) Requirements; Section 2–2–1 Definitions; Section 2–2–6 Increment consumption; requirements; and Section 2–2–12 Permit rescission. Filed with the Secretary of State on March 9, 2004, effective April 8, 2004. Published at 27 Indiana Register 2216; April 1, 2004.

(166)–(167) [Reserved]

(168) On October 7, 2004, Indiana submitted a request revision to particulate matter and sulfur dioxide emission limits as an amendment to its State Implementation Plan. The particulate matter and sulfur dioxide emission limits were deleted for the five boilers removed from the Pfizer, Incorporated facility in Vigo County, Indiana. These limits were listed in 326 Indiana Administrative Code (IAC) 6–1–13 and 326 IAC 7–4–3.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 1: County Specific Particulate Limitations, Section 13: Vigo County and Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 3: Vigo County Sulfur Dioxide Emission Limitations. Filed with the Secretary of State on August 31, 2004 and effective September 30, 2004. Published in 28 *Indiana Register* 115–18 on October 1, 2004.

(169) On December 22, 2004, Indiana submitted a request to revise the volatile organic compound requirements for Transwheel Corporation of Huntington County, Indiana. EPA is approving the oil cover as an equivalent control device under 326 Indiana Administrative Code 8–3–5 (a)(5)(C).

(i) *Incorporation by reference.* (A) Commissioner's Order #2004–04 as issued by the Indiana Department of Environmental Management on December 22, 2004.

(170) The Indiana Department of Environmental Management submitted revisions to Indiana's State Implementation plan on February 18, 2005, February 21, 2005, and April 8, 2005. Revisions to 326 IAC 1–2–52, 326 IAC 1–2–82.5, and 326 IAC 1–3–4 amend the definition of ''particulate matter'' to include the definition of $PM_{2.5}$ and amends the section that specifies the national ambient air quality standards. Revisions to 326 IAC 1–1–3 and 326 IAC 1–1–6 update the references to the Code of Federal Regulations (CFR) from the 2000 edition to the 2002 edition and add ''credible evidence provisions'' into state rules consistent with federal requirements, respectively.

(i) Incorporation by reference. The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 52: '' 'Particulate matter' '' defined,'' Section 52.2: '' '$PM_{2.5}$' defined,'' Section 52.4:'' 'PM_{10}' defined,'' Section 82.5: '' 'Total suspended particulate' or 'TSP' defined.'' Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 3: Ambient Air Quality Standards, Section 4: ''Ambient air quality standards.'' Filed with the Secretary of State on December 20, 2004 and effective on January 19, 2005. Published at Indiana Register, Volume 28, Number 5, February 1, 2005 (28 IR 1471–1473).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout Title 326, Section 3: ''References to the Code of Federal Regulations.'' Filed with the Secretary of State on August 26, 2004 and effective on September 25, 2004. Published at Indiana Register, Volume 28, Number 1, October 1, 2004 (28 IR 17).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout Title 326, Section 6: ''Credible evidence.'' Filed with the Secretary of State on February 14, 2005 and effective on March 16, 2005. Published at Indiana Register, Volume 28, Number 7, April 1, 2005 (28 IR 2045).

(171) On April 8, 2005, Indiana submitted final adopted revisions for the Dearborn County sulfur dioxide emission limitations in 326 IAC 7–4–13 as a requested revision to the Indiana state implementation plan. EPA is approving these revisions, which remove obsolete rule language for Indiana Michigan Tanners Creek Station and update information for other companies listed in the rule.

(i) Incorporation by reference. (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by

County, Section 13: Dearborn County Sulfur Dioxide Emission Limitations. Filed with the Secretary of State on February 14, 2005, and effective March 16, 2005. Published in the Indiana Register on April 1, 2005 (28 IR 2021).

(172) On April 8, 2005, and as supplemented on July 6, 2005, Indiana submitted a State Implementation Plan (SIP) revision for the control of sulfur dioxide (SO_2) emissions in Lake County, Indiana. The SIP revision submitted by the Indiana Department of Environmental Management (IDEM) amends 326 Indiana Administrative Code (IAC) Article 7. Indiana's revised SO_2 rule consists of changes to 326 IAC 7–4 which sets forth facility-specific SO_2 emission limitations and record-keeping requirements for Lake County. The rule revision also reflects updates to company names, updates to emission limits currently in permits, deletion of facilities that are already covered by natural gas limits, and other corrections and updates. Due to changes in section numbers, references to citations in other parts of the rule have also been updated.

(i) *Incorporation by reference.* (A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 7 SULFUR DIOXIDE RULES, Rule 1.1 Sulfur Dioxide Emission Limitations, sections 326 IAC 7–1.1–1, ''Applicability'', 326 IAC 7–1.1–2 ''Sulfur Dioxide Emission Limitations'', and 326 IAC 7–2–1 ''Reporting Requirements: Methods to Determine Compliance''; newly created 326 IAC 7–4.1, ''Lake County Sulfur Dioxide Emission Limitations'', adopted by the Indiana Air Pollution Control Board on March 2, 2005. Filed with the Secretary of State May 25, 2005, effective June 24, 2005.

(173) The Indiana Department of Environmental Management submitted amendments to Indiana's State Implementation Plan on September 1, 2005. The amendments include the repeal of 326 IAC 6–1, which is replaced with new articles 326 IAC 6.5, ''Particulate Matter Limitations for all Counties Except Lake County'' and 326 IAC 6.8, ''Particulate Matter Limitations for Lake County.''

(i) Incorporation by reference. The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Amendments to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5 Particulate Matter Limitations Except Lake County, and Article 6.8 Particulate Matter Limitations For Lake County. Adopted by the Indiana Air Pollution Control Board on May 4, 2005. Filed with the Secretary of State on August 10, 2005 and effective on September 9, 2005. Published at Indiana Register, Volume 28, Number 12, September 1, 2005 (3454).

(174) [Reserved]

(175) On December 15, 2005, Indiana submitted revised particulate matter (PM_{10}) regulations for ASF Keystone, Inc. in Lake County. The emission limit for the small coil manufacturing unit is increased while the limits for the medium and large coil manufacturing units are decreased. The result of these revisions is a net decrease in PM_{10} emission limits. The emission limits for miscellaneous coil manufacturing are removed because the unit no longer operates. EPA also removed the process weight rate emission limits for the four units.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 2: Lake County: PM_{10} Emission Requirements, Section 4: ASF Keystone, Inc.-Hammond. Filed with the Secretary of State on October 20, 2005 and effective November 19, 2005. Published in 29 *Indiana Register* 794 on December 1, 2005.

(176) On December 21, 2005, Indiana submitted revised regulations to the EPA. As a result, the compounds, 1,1,1,2,2,3,3-heptafluoro-3-methoxy-propane, 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane, 1,1,1,2,3,3,3-heptafluoropropane, and methyl formate, are added to the list of ''nonphotochemically reactive hydrocarbons'' or ''negligibly photochemically reactive compounds'' in 326 IAC 1–2–48 and these compounds are deleted from the list of VOCs in 326 IAC 1–2–90. Companies producing or using the four compounds will no longer need to follow the VOC rules for these compounds. The requirements in

326 IAC 1–2–48 and 1–2–90 were also modified for the compound t-butyl acetate. It is not considered a VOC for emission limits and content requirements. T-butyl acetate will still be considered a VOC for the record-keeping, emissions reporting, and inventory requirements.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 2: Definitions, Section 48: '''Nonphotochemically reactive hydrocarbon' or 'negligibly photochemically reactive compounds' defined'', and Section 90: ''' Volatile organic compound' or 'VOC' defined''. Filed with the Secretary of State on October 20, 2005 and effective November 19, 2005. Published in 29 *Indiana Register* 795–797 on December 1, 2005.(177) The Indiana Department of Environmental Management submitted revisions to Indiana's State Implementation plan on December 21, 2005, and June 27, 2006. Revisions to 326 IAC 1–3–4 provide consistency between State (326 IAC 1–3–4) and Federal (40 CFR 50.3) reference conditions for measurements of particulate matter air quality; and amendments to 326 IAC 1–1–3 update the references to the Code of Federal Regulations (CFR) from the 2002 edition to the 2004 edition.

(i) Incorporation by reference. The following sections of the Indiana Administrative Code are incorporated by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 1: Provisions Applicable Throughout Title 326, Section 3: References to the Code of Federal Regulations. Filed with the Secretary of State on October 14, 2005 and effective on November 13, 2005. Published at Indiana Register, Volume 29, Number 3, December 1, 2005 (29 IR 795).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 1: General Provisions, Rule 3: Ambient Air Quality Standards, Section 4: Ambient Air Quality Standards. Filed with the Secretary of State on March 6, 2006 and effective on April 5, 2006. Published at Indiana Register, Volume 29, Number 7, April 1, 2006 (29 IR 2179).

(178) On August 25, 2006, Indiana submitted final adopted revisions to its emission reporting requirement rules as a revision to the Indiana State Implementation Plan.

(i) *Incorporation by reference.* Indiana Administrative Code Title 326: Air Pollution Control Board, Article 2: Permit Review Rules, Rule 6 Emission Reporting, Section 1: Applicability, Section 3: Compliance schedule, and Section 4: Requirements. Approved by the Attorney General June 29, 2006. Approved by the Governor July 13, 2006. Filed with the Publisher July 14, 2006. Published on the Indiana Register Web site August 9, 2006, Document Identification Number (DIN):20060809–IR–326050078FRA. Effective August 13, 2006.

(179) On July 17, 2006, Indiana submitted final adopted revisions, which add 326 IAC 8–1–6 (3)(B) and (C), to its VOC rules for new facilities in 326 IAC 8–1–6 as a requested revision to the Indiana state implementation plan. EPA is approving these revisions, which exempt boat manufacturers subject to NESHAPS for boat manufacturing, or reinforced plastics composites manufacturers subject to NESHAPS for reinforced composites production facilities, from the requirement to do a best available control technology analysis provided they comply with the applicable NESHAPS.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General Provisions, Section 6: New facilities; general reduction requirements. Final adopted by the Air Pollution Control Board on March 1, 2006. Filed with the Secretary of State on May 25, 2006, and became effective June 23, 2006. Published in the Indiana Register on July 1, 2006 (29 IR 3350).

(180) On November 1, 2005, and supplemented on March 20, 2007, the State of Indiana submitted a source specific revision to its state implementation plan for control of particulate matter in Title 326 of the Indiana Administrative Code (IAC), Rule 6.5–7, Section 13, which contains particulate matter emission limits for Holy Cross Services Corporation, to reflect current operating conditions of the boilers at St. Mary's College, located in Notre Dame,

Indiana. The revision in 326 IAC 6.5–7–13 also changes the source name from St. Mary's to Holy Cross Services Corporation (Saint Mary's Campus).

(i) Incorporation by reference. Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: PM Limitations Except Lake County, Rule 7: St. Joseph County, Section 13: Holy Cross Services Corporation (Saint Mary's Campus). Approved by the Attorney General January 18, 2007. Approved by the Governor January 23, 2007. Filed with the Publisher January 26, 2007. Published on the Indiana Register Web site February 14, 2007, Document Identification Number (DIN):20070214–IR–326060121FRA. Effective February 25, 2007.

(181) On September 2, 2004, Indiana submitted modifications to its Prevention of Significant Deterioration and nonattainment New Source Review rules as a revision to the state implementation plan. On October 25, 2005, and January 17, 2007, Indiana submitted revisions to the September 2, 2004 submittal.

(i) Incorporation by reference.

(A) Title 326 of the Indiana Administrative Code, Rules 2–1.1–7, 2–2–1(a) through (l), 2–2–1(n) through (kk), 2–2–1(mm) through (tt), 2–2–1(uu)(1) through (4), 2–2–1(vv) through (aaa), 2–2–2(a) through (d)(4), 2–2–2(d)(6) through (e), 2–2–2(g) through (i), 2–2–3, 2–2–4, 2–2–5(a), 2–2–5(c) through (e), 2–2–6, 2–2–8, 2–2.4, 2–3–1(a) through (i), 2–3–1(k) through (ff), 2–3–1(hh) through (uu), 2–3–2(a) through (c)(4), 2–3–2(c)(6) through (k), 2–3–2(m), 2–3–3(a) through (b)(11), 2–3–3(b)(14), 2–3.4, 2–5.1–4. Filed with the Secretary of State on August 10, 2004, effective September 10, 2004. Published in the Indiana Register on September 1, 2004 (27 IR 3887).

(182) On March 30, 2007, Indiana submitted final adopted revisions, which amend 326 IAC 8–5–1, concerning rule applicability, and add 326 IAC 8–5–6, fuel grade ethanol production at dry mills, to its VOC rules as a requested revision to the Indiana state implementation plan. By letter of December 19, 2007, Indiana stated that it would be acceptable to measure the concentration limits in 326 IAC 8–5–6 using EPA Method 25(a) expressed as equivalent ethanol with the calibration gas being a mixture of ethanol in air. EPA is approving these revisions, authorizing Indiana to establish an industry-specific State BACT standard for fuel grade ethanol production at dry mill facilities that emit 25 tons or more of VOC per year.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference. 326 IAC 8–5–1, ''Applicability of Rule'', and 326 IAC 8–5–6 ''Fuel Grade Ethanol Production at Dry Mills''. Approved by the Attorney General February 16, 2007. Approved by the Governor February 16, 2007. Filed with the Publisher February 20, 2007. Published on the Indiana Register Web site March 21, 2007, Document Identification Number (DIN):20070321-IR–326050197FRA. Effective March 22, 2007.

(ii) *Additional materials.* A December 19, 2007, letter from Daniel Murray, Assistant Commissioner of the Indiana Department of Environmental management, Office of Air Quality, which states that it would be acceptable to measure the concentration limits in 326 IAC 8–5–6 using EPA Method 25(a) expressed as equivalent ethanol with the calibration gas being a mixture of ethanol in air.

(183) On February 7, 2002, Indiana submitted revisions to its State Implementation Plan (SIP) for lead (Pb) as part of the State's incorporation of a Federal standard for secondary lead smelters. On October 3, 2006, and November 27, 2007, Indiana supplemented its request as it pertained to Quemetco, Incorporated, in Marion County. This revision removes from the Indiana SIP the source-specific provisions for Quemetco found in article 326 IAC 15, previously approved in paragraph (c)(95) of this section, and replaces them with the corresponding provisions of article 326 IAC 20–13.

(i) *Incorporation by reference.* The following sections of Title 326 of the Indiana Administrative Code (IAC) are incorporated by reference:

(A) 326 IAC 15–1–2(c) ''Source-specific provisions'' and 326 IAC 15–1–3 ''Control of fugitive lead dust''. Filed with the Secretary of State on December 1, 2000, effective December 30, 2000. Published in the Indiana Register on January 1, 2001 (24 IR 954).

(B) 326 IAC 20–13–1(c) ''Applicability; incorporation by reference of federal standards'', 326 IAC 20–13–2(a) ''Emission limitations lead standards for Quemetco, Incorporated'', and 326 IAC 20–13–6 ''Compliance testing''. Filed with the Secretary of State on December 1, 2000, effective December 30, 2000. Published in the Indiana Register on January 1, 2001 (24 IR 958).

(184) Indiana Department of Environmental Management submitted amendments to the State Implementation Plan to control nitrogen oxide emissions from internal combustion engines in 326 Indiana Administrative Code (IAC) 10–5 and corrections to 326 IAC 10–3–3 and 326 IAC 10–4 on March 8, 2006.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference.

(A) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 3: Nitrogen Oxide Reduction Program for Specific Source Categories, Section 3: Emissions limits. Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1876).

(B) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 4: Nitrogen Oxides Budget Trading Program, Section 1: Applicability, Section 2: Definitions, Section 3: Retired unit exemption, Section 9: NO_X allowance allocations, Section 13: Individual opt-ins, Section 14: NO_X allowance banking, and Section 15: Compliance supplement pool. Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1877).

(C) Title 326: Air Pollution Control Board, Article 10: Nitrogen Oxides Rules, Rule 5: Nitrogen Oxide Reduction Program for Internal Combustion Engines (ICE). Filed with the Secretary of State on January 27, 2006, effective February 26, 2006. Published in the Indiana Register on March 1, 2006 (29 IR 1899).

(185) The Indiana Department of Environmental Management submitted amendments on September 20, 2007 to the State Implementation Plan to Control Emissions from electric generating units (EGU) and non-EGUs. Rules affecting these units include: 326 Indiana Administrative Code (IAC) 24–1–2, 326 IAC 24–1–8, 326 IAC 24–1–12, 326 IAC 24–2–11, 326 IAC 24–3–1, 326 IAC 24–3–2, 326 IAC 24–3–8 and 326 IAC 24–3–12 respectively.

(i) Incorporation by reference. The following sections of the Indiana Administrative Code (IAC) are incorporated by reference: 326 IAC 24–1–2(36) ''Control period''; 326 IAC 24–1–2(38) ''Energy efficiency or renewable energy projects''; 326 IAC 24–1–2(60) ''Rated energy efficiency''; 326 IAC 24–1–8 ''CAIR NO_X allowance allocations''; 326 IAC 24–1–12 ''CAIR NO_X opt-in units''; 326 IAC 24–2–11 ''CAIR SO_2 opt-in units''; 326 IAC 24–3–1 ''Applicability''; 326 IAC 24–3–2(38) ''Energy efficiency or renewable energy projects''; 326 IAC 24–3–2(49) ''Large affected unit''; 326 IAC 24–3–2(61) ''Rated energy efficiency''; 326 IAC 24–3–8 ''CAIR NO_X ozone season allowance''; and 326 IAC 24–3–12 ''CAIR NO_X ozone season opt-in units''. Approved by the Attorney General January 12, 2007. Approved by the Governor January 23, 2007. Filed with the Publisher January 26, 2007. Published on the Indiana Register Web site February 28, 2007, Document Identification Number (DIN): 20070221–IR–326050117FRA. Effective February 25, 2007.

(186) The Indiana Department of Environmental Management submitted revisions to Indiana's State Implementation plan on July 20, 2007, as revised on December 19, 2007, to amend 326 IAC 1–1–3, ''References to the Code of Federal Regulations''; 326 IAC 1–2–48, ''nonphotochemically reactive hydrocarbons'' or ''negligibly photochemically reactive compounds'' defined; and 326 IAC 1–2–90, ''volatile organic compound'' or ''VOC'' defined. The revision to 326 IAC 1–1–3 updates the references to CFR from the 2005 edition to the 2006 edition. In 326 IAC 1–2–48, and 326 IAC 1–2–90, the SIP revision deletes references to outdated FEDERAL REGISTER citations.

(i) *Incorporation by reference.* The following sections of the Indiana Administrative Code (IAC) are incorporated by reference.

(A) 326 IAC 1–1–3, ''References to the Code of Federal Regulations''. Filed with the Secretary of State on April 26,

2007, and effective on May 26, 2007. Published in the Indiana Register, on May 23, 2007 (DIN: 20070523–IR–326060412FRA).

(B) 326 IAC 1–2–48, ''nonphotochemically reactive hydrocarbons'' or ''negligibly photochemically reactive compounds'' defined; and 326 IAC 1–2–90, ''volatile organic compound'' or ''VOC'' defined. Filed with the Secretary of State on April 26, 2007, and effective on May 26, 2007. Published in the Indiana Register, on May 23, 2007 (DIN: 20070523–IR–326060412FRA).

(ii) *Additional Materials.* A December 19, 2007, letter from Daniel Murray, Assistant Commissioner of the Indiana Department of Environmental Management, Office of Air Quality, which limits the July 20, 2007, SIP revision request to the following definitions: 326 IAC 1–1–3, ''References to the CFR''; 326 IAC 1–2–48, ''nonphotochemically reactive hydrocarbons'' or ''negligibly photochemically reactive compounds'' defined; and 326 IAC 1–2–90, ''volatile organic compound'' or ''VOC'' defined.

(187) On February 21, 2008, Indiana submitted revisions to its particulate matter SIP. On March 27, 2008, Indiana submitted a corrected copy of its rules. The submittal revises 326 IAC 6.5: Particulate Matter Limitations Except Lake County and 326 IAC 6.8: Particulate Matter Limitations for Lake County. This SIP revision updates facility names, revises formatting, removes sources no longer in operation, and revises some emission limits.

(i) *Incorporation by reference.* The following sections of Title 326 of the Indiana Administrative Code (IAC) are incorporated by reference:

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 1, General Provisions, sections 326 IAC 6.5–1–1 through 326 IAC 6.5–1–7, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 2, Clark County, sections 326 IAC 6.5–2–1 through 326 IAC 6.5–2–12, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.5–2–8 Kimball Office-Borden, filed January 23, 2008, effective on February 22, 2008, errata filed on February 29, 2008).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 3, Dearborn County, sections 326 IAC 6.5–3–1 through 326 IAC 6.5–3–9, filed January 23, 2008, effective on February 22, 2008.

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 4, Dubois County, sections 326 IAC 6.5–4–1 through 326 IAC 6.5–4–24, filed January 23, 2008, effective on February 22, 2008.

(E) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 5, Howard County, sections 326 IAC 6.5–5–1 through 326 IAC 6.5–5–16, filed January 23, 2008, effective on February 22, 2008.

(F) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 6, Marion County, sections 326 IAC 6.5–6–1 through 326 IAC 6.5–6–36, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.5–6–18, Cargill, Inc., filed January 23, 2008, effective on February 22, 2008, errata filed on January 31, 2008).

(G) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 7, St. Joseph County, sections 326 IAC 6.5–7–1 through 326 IAC 6.5–7–20, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.5–7–14 Accucast Technology, LLC, filed January 23, 2008, effective on February 22, 2008, errata filed on February 5, 2008).

(H) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 8, Vanderburgh County, sections 326 IAC 6.5–8–1 through 326 IAC 6.5–8–15, filed January 23, 2008, effective on February 22, 2008.

(I) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 9, Vigo County, sections 326 IAC 6.5–9–1 through 326 IAC 6.5–9–20, filed January 23, 2008, effective on February 22, 2008.

(J) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.5: Particulate Matter Limitations Except Lake County, Rule 10, Wayne County, sections 326 IAC 6.5–10–1 through 326 IAC 6.5–10–19, filed January 23, 2008, effective on February 22, 2008.

(K) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations For Lake County, Rule 1, General Provisions, sections 326 IAC 6.8–1–1, Applicability, 6.8–1–5, Control strategies, and 6.8–1–7, Scope, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations For Lake County, Rule 1, General Provisions, sections 326 IAC 6.8–1–1.5, Definitions, 6.8–1–2, Particulate emission limitations; fuel combustion steam generators, asphalt concrete plant, grain elevators, foundries, mineral aggregate operations; modification by commission, 6.8–1–3, Compliance Determination, 6.8–1–4, Compliance schedules, and 6.8–6–6, State implementation plan revisions, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(L) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 2, Lake County: PM10 Emission Requirements, sections 326 IAC 6.8–2–1 through 326 IAC 6.8–2–38, filed January 23, 2008, effective on February 22, 2008 (326 IAC 6.8–2–6 BP Products North America, Inc.-Whiting Refinery, filed January 23, 2008, effective on February 22, 2008, errata filed on February 29, 2008).

(M) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 3, Lake County: Opacity Limits; Exceptions to 326 IAC 5–1–2, sections 326 IAC 6.8–3–1 through 326 IAC 6.8–3–4, filed January 23, 2008, effective on February 22, 2008.

(N) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 4, Lake County: Opacity Limits; Test Methods, filed January 23, 2008, effective on February 22, 2008.

(O) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 5, Lake County: Opacity Continuous Emissions Monitors, Installation and operation of continuous emissions monitors (Repealed), filed January 23, 2008, effective on February 22, 2008.

(P) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 6, Lake County: Combustion Sources; Natural Gas, sections 326 IAC 6.8–6–1 through 326 IAC 6.8–6–20), filed January 23, 2008, effective on February 22, 2008.

(Q) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 7, Lake County: Site-Specific Control Requirements, sections 326 IAC 6.8–7–1 through 326 IAC 6.8–7–8, filed January 23, 2008, effective on February 22, 2008.

(R) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 8, Lake County: Continuous Compliance Plan, section 326 IAC 6.8–8–1 Applicability, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 8, Lake County: Continuous Compliance Plan, sections 326 IAC 6.8–8–2 Documentation; operation and maintenance procedures, 326 IAC 6.8–8–3 Plan requirements, 326 IAC 6.8–8–4 Plan; schedule for complying with 326 IAC 6.8–7, 326 IAC 6.8–8–5 Plan; source categories, 326 IAC 6.8–8–6 Plan; particulate matter control equipment; operation and maintenance, 326 IAC 6.8–8–7 Plan; particulate matter control equipment; recording; operation; inspection, 326 IAC 6.8–8–8 Plan; department review, filed August 10, 2005, effective on

September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(S) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 9, Lake County: PM10 Coke Battery Emission Requirements, section 326 IAC 6.8–9–3 Emission limitations, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 9, Lake County: PM10 Coke Battery Emission Requirements, sections 326 IAC 6.8–9–1 Applicability, and 326 IAC 6.8–9–2 Definitions, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(T) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 10, Lake County: Fugitive Particulate Matter, section 326 IAC 6.8–10–1 Applicability, filed January 23, 2008, effective on February 22, 2008; and Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 10, Lake County: Fugitive Particulate Matter, sections 326 IAC 6.8–10–2 Definitions, 326 IAC 6.8–10–3 Particulate matter emission limitations, and 326 IAC 6.8–10–4 Compliance requirements; control plans, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(U) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6.8: Particulate Matter Limitations for Lake County, Rule 11, Lake County: Particulate Matter Contingency Measures, sections 326 IAC 6.8–11–1 through 326 IAC 6.8–11–6, filed August 10, 2005, effective on September 9, 2005 and previously incorporated by reference (see paragraph (c)(173)(i)(A) of this section).

(ii) *Additional material.*

(A) Certificate of Authenticity, Indiana Administrative Code, (As Updated Through March 26, 2008), signed by John M. Ross, Executive Director, Legislative Services Agency.

(188) The Indiana Department of Environmental Management submitted a revision to Indiana's State Implementation plan on May 22, 2008, to amend 326 IAC 1–1–3, ''References to the Code of Federal Regulations''. The revision to 326 IAC 1–1–3 updates the references to CFR from the 2006 edition to the 2007 edition.

(i) *Incorporation by reference.* Title 326 of the Indiana Administrative Code (IAC), section 1–1–3, ''References to the Code of Federal Regulations'' is incorporated by reference. The rule was filed with the Publisher of the Indiana Register on April 1, 2008, and became effective on May 1, 2008. Published in the Indiana Register, on April 30, 2008 (DIN: 20080430–IR–32607037FRA).

(189) On December 19, 2007, Indiana submitted modifications to its Federally Enforceable State Operating Permits rules as a revision to the state implementation plan. The revision extends the maximum permit term for renewals of Federally Enforceable State Operating Permits from five years to ten years. EPA has determined that this revision is approvable under the Clean Air Act.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326, Article 2: Permit Review Rules, sections 2–1.1–9.5, ''General provisions; term of permit'', and 2–8–4, ''Permit content'', are incorporated by reference. Filed with the Publisher of the Indiana Register on November 16, 2007, and became effective on December 16, 2007. Published in the Indiana Register on December 13, 2007 (20071212–IR–326060487FRA).

(190) On September 11, 2008, Indiana submitted a revision to its SIP. The revisions add particulate matter, sulfur dioxide, and nitrogen oxides control and emission limitations on the Southern Indiana Gas and Electric Company's F.B. Culley Generating Station, a power plant located in Warrick County, Indiana.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 6: Particulate Rules, Rule 7: Particulate Matter Emission Limitations for Southern Indiana Gas and

Electric Company, Section 1: ''Southern Indiana Gas and Electric Company (SIGECO)''; Article 7: Sulfur Dioxide Rules, Rule 4: Emission Limitations and Requirements by County, Section 10: ''Warrick County sulfur dioxide emission limitations''; and Article 10: Nitrogen Oxides Rules, Rule 6: Nitrogen Oxides Emission Limitations for Southern Indiana Gas and Electric Company, Section 1: ''Southern Indiana Gas and Electric Company (SIGECO)''.

Filed with the Secretary of State on July 31, 2008 and effective on August 30, 2008. Published in Indiana Register 326070309 on August 28, 2008, LSA Document #07–309(F).

(191) The Indiana Department of Environmental Management submitted a revision to Indiana's State Implementation plan on September 25, 2009, to amend 326 IAC 1–1–3, ''References to the Code of Federal Regulations''. The revision to 326 IAC 1–1–3 updates the references to CFR from the 2007 edition to the 2008 edition.

(i) *Incorporation by reference.* Title 326 of the Indiana Administrative Code (IAC), section 1–1–3, ''References to the Code of Federal Regulations'' is incorporated by reference. The rule was filed with the Publisher of the Indiana Register on July 1, 2009, and became effective on July 31, 2009. Published in the Indiana Register, on July 29, 2009 (DIN: 20090729–IR–326080901FRA).

(192) On April 25, 2008, Indiana submitted regulations that incorporate its continuous emission monitoring requirements into its SIP. Indiana also submitted Commissioner's Orders that provide an alternative monitoring plan for a Warrick County source. The alternative monitoring requirements allow the use of a particulate matter continuous emissions monitoring system in place of a continuous opacity monitor.

(i) *Incorporation by reference.* (A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 3: Monitoring Requirements, Rule 5: Continuous Monitoring of Emissions, Section 1: Applicability; monitoring requirements for applicable pollutants. Filed with the Secretary of State on January 30, 1998, and effective on March 1, 1998. Published in 21 *Indiana Register* 2062–2079 on March 1, 1998. (B) Commissioner's Order #2008–01 as issued by the Indiana Department of Environmental Management on February 11, 2008.

(193) On December 10, 2009, the Indiana Department of Environmental Management submitted several volatile organic compound rules for approval into the Indiana State Implementation Plan for the Lake and Porter County portion of the Chicago-Gary-Lake County, IL–IN, 8-hour ozone nonattainment area. This includes both revisions to existing rules and also new rules. Also submitted were subsequent technical corrections to typographical, clerical, or spelling errors for some of these rules.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General provisions, Section 0.5: Definitions, Section 2: Compliance Methods, and Section 4: Testing procedures, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090220FRA).

(B) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 2: Surface Coating Emission Limitations, Section 1: Applicability, Section 2: Automobile and light duty truck coating regulations, Section 5: Paper coating operations, Section 6: Metal furniture coating operations, Section 7: Large appliance coating operations, Section 9: Miscellaneous metal and plastic parts coating operations, and Section 10: Flat wood panels; manufacturing operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090220FRA).

(C) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 5: Miscellaneous Operations, Section 5: Graphic arts operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3,

2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090220FRA).

(D) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 16: Offset Lithographic Printing and Letterpress Printing, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090221FRA).

(E) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 17: Industrial Solvent Cleaning Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090221FRA).

(F) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 18: Synthetic Organic Chemical Manufacturing Industry Air Oxidation, Distillation, and Reactor Processes, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090222FRA).

(G) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 19: Control of Volatile Organic Compound Emissions from Process Vents in Batch Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090222FRA).

(H) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 20: Industrial Wastewater, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090222FRA).

(I) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 21: Aerospace Manufacturing and Rework Operations, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090222FRA).

(J) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 22: Miscellaneous Industrial Adhesives, filed with the Publisher of the Indiana Register on November 3, 2009, and became effective on December 3, 2009. Published in the Indiana Register on December 2, 2009 (DIN: 20091202–IR–326090221FRA).

(K) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 1: General provisions, Section 2: Compliance Methods and Section 4: Testing procedures, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090220ACA).

(L) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 2: Surface Coating Emission Limitations, Section 2: Automobile and light duty truck coating operations, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090220ACA).

(M) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 16: Offset Lithographic Printing and Letterpress Printing, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090221ACA).

(N) Corrections to Indiana Administrative Code Title 326: Air Pollution

Control Board, Article 8: Volatile Organic Compound Rules, Rule 17: Industrial Solvent Cleaning Operations, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090221ACA).

(O) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 18: Synthetic Organic Chemical Manufacturing Industry Air Oxidation, Distillation, and Reactor Processes, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090222ACA).

(P) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 19: Control of Volatile Organic Compound Emissions from Process Vents in Batch Operations, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090222ACA).

(Q) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 20: Industrial Wastewater, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090222ACA).

(R) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 21: Aerospace Manufacturing and Rework Operations, filed with the Publisher of the Indiana Register on November 19, 2009, and became effective on January 3, 2009. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090222ACA).

(S) Corrections to Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 22: Miscellaneous Industrial Adhesives, filed with the Publisher of the Indiana Register on November 18, 2009, and became effective on January 2, 2010. Published in the Indiana Register on December 16, 2009 (DIN: 20091216–IR–326090221ACA).

(194) On December 31, 2008, Indiana submitted a Commissioner's Order that provided an alternative monitoring plan for Indianapolis Power and Light—Harding Street Generating Station in Marion County that is being incorporated into its SIP. The alternative monitoring requirements allow the use of a particulate matter continuous emissions monitoring system in place of a continuous opacity monitor.

(i) *Incorporation by reference.* Commissioner's Order #2008–02 for Indianapolis Power and Light as issued by the Indiana Department of Environmental Management on October 31, 2008.

(195) On June 5, 2009, the Indiana Department of Environmental Management submitted amendments to Indiana's automobile refinishing rule for approval into its state implementation plan (SIP). These rule revisions extend the applicability of Indiana's approved volatile organic compound (VOC) automobile refinishing rules to all persons in Indiana who sell or manufacture automobile refinishing coatings or who refinish motor vehicles.

(i) Incorporation by reference.

(A) Indiana Administrative Code Title 326: Air Pollution Control Board, Article 8: Volatile Organic Compound Rules, Rule 10: Automobile Refinishing, filed with the Publisher of the Indiana Register on March 27, 2009, and became effective on April 26, 2009. Published in the Indiana Register on April 22, 2009 (DIN: 20090422–IR–326060603FRA).

[37 FR 10863, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.800, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

Subpart Q—Iowa

§ 52.820 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable SIP for Iowa under section 110 of the CAA, 42 U.S.C.

7401, and 40 CFR part 51 to meet NAAQS.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2014, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after December 31, 2014, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 7 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the SIP as of December 31, 2014.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 7, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; and the National Archives and Records Administration (NARA). If you wish to obtain material from the EPA Regional Office, please call (913) 551–7089. For information on the availability of this material at NARA, call (202) 741–6030, or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html*.

(c) *EPA-approved regulations.*

EPA-APPROVED IOWA REGULATIONS

Iowa citation	Title	State effective date	EPA approval date	Explanation
Iowa Department of Natural Resources Environmental Protection Commission [567]				
Chapter 20—Scope of Title—Definitions				
567–20.1 ...	Scope of Title-Definitions	3/22/17	6/8/2018, 83 FR 26599	This rule is a non-substantive description of the Chapters contained in the Iowa rules. EPA has not approved all the Chapters to which this rule refers.
567–20.2 ...	Definitions	4/17/2019	6/1/2020, 85 FR 33023	The definitions for ''anaerobic lagoon,'' ''odor,'' ''odorous substance,'' ''odorous substance source'' are not SIP approved.
567–20.3 ...	Air Quality Forms Generally	4/22/2015	8/10/2015, 80 FR 33192.	
Chapter 21—Compliance				
567–21.1 ...	Compliance Schedule	3/22/17	6/8/2018, 83 FR 26599.	
567–21.2 ...	Variances	4/4/2007	10/16/2007, 72 FR 58535.	
567–21.3 ...	Emission Reduction Program	3/14/1990	6/29/1990, 55 FR 26690.	
567–21.4 ...	Circumvention of Rules	3/14/1990	6/29/1990, 55 FR 26690.	
567–21.5 ...	Evidence Used in Establishing That a Violation Has or Is Occurring.	11/16/1994	10/30/1995, 60 FR 55198.	
567–21.6 ...	Temporary Electricity Generation for Disaster Situations.	10/15/2008	12/29/2009, 74 FR 68692.	

EPA-APPROVED IOWA REGULATIONS—Continued

Iowa citation	Title	State effective date	EPA approval date	Explanation
	Chapter 22—Controlling Pollution			
567–22.1 ...	Permits Required for New or Stationary Sources.	4/17/2019	6/1/2020, 85 FR 33023	In 22.1(3) the following sentence regarding electronic submission is not SIP approved. The sentence is: ''Alternatively, the owner or operator may apply for a construction permit for a new or modified stationary source through the electronic submittal format specified by the department.''
567–22.2 ...	Processing Permit Applications	4/22/2015	8/10/2015, 80 FR 33192.	
567–22.3 ...	Issuing Permits	4/22/2015	6/11/2015; 80 FR 33192	Subrule 22.3(6) has not been approved as part of the SIP. Subrule 22.3(6), Limits on Hazardous Air Pollutants, has been approved under Title V and section 112(l). The remainder of the rule has not been approved pursuant to Title V and section 112(l).
567–22.4 ...	Special Requirements for Major Stationary Sources Located in Areas Designated Attainment or Unclassified (PSD).	12/16/2015	9/9/2016, 81 FR 62387	None.
567–22.5 ...	Special Requirements for Nonattainment Areas.	12/16/2015	9/9/2016, 81 FR 62387	None.
567–22.8 ...	Permit by Rule	4/18/2018	2/5/2019, 84 FR 1615.	
567–22.9 ...	Special Requirements for Visibility Protection.	4/17/2019	6/1/2020, 85 FR 33023.	
567–22.10	Permitting Requirements for Country Grain Elevators, Country Grain Terminal Elevators, Grain Terminal Elevators and Feed Mill Equipment.	12/16/2015	9/9/2016, 81 FR 62387	None.
567–22.105	Title V Permit Applications	11/11/2009	10/25/2013, 78 FR 63887	Only subparagraph (2)i(5) is approved as part of the SIP. In 22.105(1) *Duty to apply* the last sentence ''Alternatively, an owner or operator may submit a complete and timely application through the electronic submittal format specified by the department.'' is not approved. In 22.105(1) ''a'' new subparagraph (9) is not approved.
567–22.200	Definitions for Voluntary Operating Permits.	10/18/1995	4/30/1996, 61 FR 18958.	
567–22.201	Eligibility for Voluntary Operating Permits.	4/4/2007	10/16/2007, 72 FR 58535.	
567–22.202	Requirement to Have a Title V Permit.	4/9/1997	6/25/1998, 63 FR 34600.	

EPA-APPROVED IOWA REGULATIONS—Continued

Iowa citation	Title	State effective date	EPA approval date	Explanation
567–22.203	Voluntary Operating Permit Applications.	11/11/2009	10/25/2013, 78 FR 63887.	
567–22.204	Voluntary Operating Permit Fees	12/14/1994	4/30/1996, 61 FR 18958.	
567–22.205	Voluntary Operating Permit Processing Procedures.	12/14/1994	4/30/1996, 61 FR 18958.	
567–22.206	Permit Content	10/18/1995	4/30/1996, 61 FR 18958.	
567–22.207	Relation to Construction Permits	10/15/2008	12/29/2009, 74 FR 68692.	
567–22.208	Suspension, Termination, and Revocation of Voluntary Operating Permits.	12/14/1994	4/30/1996, 61 FR 18958.	
567–22.209	Change of Ownership for Facilities with Voluntary Operating Permits.	11/11/2009	10/25/2013, 78 FR 63887.	
567–22.300	Operating Permit by Rule for Small Sources.	4/17/2019	6/1/2020, 85 FR 33023.	
	Chapter 23—Emission Standards for Contaminants			
567–23.1	Emission Standards	11/24/2010	10/25/2013, 78 FR 63887	Sections 23.1(2)–(5) are not approved in the SIP. Section 23.1 (5) is approved as part of the 111(d) plan.
567–23.2	Open Burning	1/14/2004	11/3/2004, 69 FR 63945	Subrule 23.2(3)g(2) was not submitted for approval. Variances from open burning rule 23.2(2) are subject to EPA approval.
567–23.3	Specific Contaminants	3/22/17	6/8/2018, 83 FR 26599	567 IAC 23.3(3) ''(d)'' is not SIP approved.
567–23.4	Specific Processes	6/11/2008	12/29/2009, 74 FR 68692	Subrule 23.4(10) is not SIP approved.
	Chapter 24—Excess Emissions			
567–24.1	Excess Emission Reporting	11/24/2010	10/25/2013, 78 FR 63887.	
567–24.2	Maintenance and Repair Requirements.	3/14/1990	6/29/1990, 55 FR 26690.	
	Chapter 25—Measurement of Emissions			
567–25.1	Testing and Sampling of New and Existing Equipment.	4/17/2019	6/1/2020, 85 FR 33023.	
	Chapter 26—Prevention of Air Pollution Emergency Episodes			
567–26.1	General	3/14/1990	6/29/1990, 55 FR 26690.	
567–26.2	Episode Criteria	3/22/17	6/8/2018, 83 FR 26599.	
567–26.3	Preplanned Abatement Strategies	3/14/1990	6/29/1990, 55 FR 26690.	
567–26.4	Actions During Episodes	3/14/1990	6/29/1990, 55 FR 26690.	
	Chapter 27—Certificate of Acceptance			
567–27.1	General	3/22/17	6/8/2018, 83 FR 26599.	
567–27.2	Certificate of Acceptance	3/14/1990	6/29/1990, 55 FR 26690.	
567–27.3	Ordinance or Regulations	3/22/17	6/8/2018, 83 FR 26599.	
567–27.4	Administrative Organization	3/14/1990	6/29/1990, 55 FR 26690.	
567–27.5	Program Activities	3/14/1990	6/29/1990, 55 FR 26690.	
	Chapter 28—Ambient Air Quality Standards			
567–28.1	Statewide standards	3/22/17	6/8/2018, 83 FR 26599.	
	Chapter 29—Qualification in Visual Determination of the Opacity of Emissions			
567–29.1	Methodology and Qualified Observer	5/13/1998	5/22/2000, 65 FR 32030.	

EPA-APPROVED IOWA REGULATIONS—Continued

Iowa citation	Title	State effective date	EPA approval date	Explanation
Chapter 31—Nonattainment Areas				
567–31.1 ...	Permit Requirements Relating to Nonattainment Areas.	12/16/2015	9/9/2016, 81 FR 62387	None.
567–31.2 ...	Rescinded	3/22/17	6/8/2018, 83 FR 26599	Rescinded and reserved
567–31.3 ...	Nonattainment new source review requirements for areas designated nonattainment on or after May 18, 1998.	1/15/2014	5/15/2014, 79 FR 27763.	
567–31.4 ...	Preconstruction review permit program.	1/15/2014	5/15/2014, 79 FR 27763.	
567–31.9 ...	Actual PALs	1/15/2014	5/15/2014, 79 FR 27763.	
567–31.10	Validity of Rules	1/15/2014	5/15/2014, 79 FR 27763.	
567–31.20	Special requirements for nonattainment areas designated before May 18, 1998 (originally adopted in 567–22.5(455B)).	4/22/2015	8/10/2015, 80 FR 33192.	
Chapter 33—Special Regulations and Construction Permit Requirements for Major Stationary Sources—Prevention of Significant Deterioration (PSD) of Air Quality				
567–33.1 ...	Purpose	4/18/2018	2/5/2019, 84 FR 1615.	
567–33.3 ...	Special Construction Permit Requirements for Major Stationary Sources in Areas Designated Attainment or Unclassified (PSD).	4/18/2018	4/17/2020, 85 FR 21329	Provisions of the 2010 $PM_{2.5}$ PSD—Increments, SILs and SMCs rule, published in the **Federal Register** on October 20, 2010, relating to SILs and SMCs that were affected by the January 22, 2013, U.S. Court of Appeals decision are not, at the state's request, included in Iowa's SIP provisions (see **Federal Register,** March 14, 2014) (Vol. 79, No. 50).
567–33.9 ...	Plantwide Applicability Limitations	7/17/2013	6/17/2016, 81 FR 39585	
567–33.10	Exceptions to adoption by reference	11/1/2006	5/14/2007, 72 FR 27056.	

EPA-APPROVED IOWA REGULATIONS—Continued

Iowa citation	Title	State effective date	EPA approval date	Explanation
	Linn County			
Chapter 10	Linn County Air Quality Ordinance, Chapter 10.	6/5/2018	2/24/2020, 85 FR 10292	The following definitions are not SIP-approved in Chapter 10–55; Anaerobic lagoon, Biomass, Chemical processing plants (ethanol production facilities that produce ethanol by natural fermentation included in NAICS code 325193 or 312140 are not included in this definition); Federally Enforceable; Greenhouse gases; The following sections are not SIP approved: 10–57(a), Title V Permits; 10–59(c), Fees Associated with PSD Applications; 10–61, Emissions From Fuel-Burning Equipment, (c) Exemptions for Residential Heaters Burning Solid Fuels; 10–61, Emissions from Fuel-Burning Equipment, (d) Nuisance Conditions for Fuel Burning Equipment; 10–62, Emission Standards, (b) NSPS; 10–62(c), Emission Standards for HAPs; 10–62(d), Emission Standards for HAPs for Source Categories; 10–64, Emission of Objectionable Odors; 10–70, Testing and Sampling of New and Existing Equipment, (k) Continuous Emissions Monitoring from Acid Rain Program; and 10–77, Penalty.

EPA-APPROVED IOWA NONREGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA Approval date	Explanation
(1) Air Pollution Control Implementation Plan.	Statewide	1/27/1972	5/31/1972, 37 FR 10842.	
(2) Request for a Two Year Extension to Meet the NAAQS.	Council Bluffs	1/27/1972	5/31/1972, 37 FR 10842	Correction notice published 3/2/1976.
(3) Revisions to Appendices D and G.	Statewide	2/2/1972	5/31/1972, 37 FR 10842	Correction notice published 3/2/1976.
(4) Source Surveillance and Record Maintenance Statements.	Statewide	4/14/1972	3/2/1976, 41 FR 8956	[FRL 484–4].
(5) Statement Regarding Public Availability of Emissions Data.	Statewide	5/2/1972	3/2/1976, 41 FR 8956	[FRL 484–4].
(7) Letter Describing the Certificates of Acceptance for Local Air Pollution Control Programs.	Linn County, Polk County.	12/14/1972	10/1/1976, 41 FR 43406	[FRL 616–1].
(8) High Air Pollution Episode Contingency Plan.	Statewide	6/20/1973	10/1/1976, 41 FR 43406	[FRL 616–1].
(9) Summary of Public Hearing on Revised Rules Which Were Submitted on July 17, 1975.	Statewide	9/3/1975	10/1/1976, 41 FR 43406	[FRL 616–1].
(10) Air Quality Modeling to Support Sulfur Dioxide Emission Standards.	Statewide	3/4/1977	6/1/1977, 42 FR 27892 ...	[FRL 739–1].
(11) Nonattainment Plans	Mason City, Davenport, Cedar Rapids, Des Moines.	6/22/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(12) Information on VOC Sources to Support the Nonattainment Plan.	Linn County	10/8/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(13) Information and Commitments Pertaining to Legally Enforceable RACT Rules to Support the Nonattainment Plan.	Linn County	11/16/1979	3/6/1980, 45 FR 14561 ...	[FRL 1427–5].
(14) Lead Plan	Statewide	8/19/1980	3/20/1981, 46 FR 17778	[A–7–FRL–1776–5].
(15) Letter to Support the Lead Plan.	Statewide	1/19/1981	3/20/1981, 46 FR 17778	[A–7–FRL–1776–5].
(16) Nonattainment Plans to Attain Secondary Standards.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	4/18/1980	4/17/1981, 46 FR 22368	[A–7–FRL 1792–2].
(17) Information to Support the Particulate Matter Nonattainment Plan.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	9/16/1980	4/17/1981, 46 FR 22368	[A–7–FRL 1792–2].

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA Approval date	Explanation
(18) Information to Support the Particulate Matter Nonattainment Plan.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	11/17/1980	4/17/1981, 46 FR 22368	[A–7–FRL 1792–2].
(19) Schedule for Studying Nontraditional Sources of Particulate Matter and for Implementing the Results.	Mason City, Cedar Rapids, Des Moines, Davenport, Keokuk, Council Bluffs, Fort Dodge, Sioux City, Clinton, Marshalltown, Muscatine, Waterloo.	6/26/1981	3/5/1982, 47 FR 9462	[A–7–FRL–2057–7].
(20) Air Monitoring Strategy	Statewide	7/15/1981	4/12/1982, 47 FR 15583	[A–5–FRL–2076–5].
(21) Letter of Commitment to Revise Unapprovable Portions of Chapter 22.	Statewide	5/14/1985	9/12/1985, 50 FR 37176	[EPA Action IA 1582; A–7–FRL–2895–9].
(22) Letter of Commitment to Submit Stack Height Regulations and to Implement the EPA's Regulations until the State's Rules Are Approved.	Statewide	4/22/1986	7/11/1986, 51 FR 25199	[EPA Action IA 2060; A–7–FRL–3046–8].
(23) Letter of Commitment to Implement the Stack Height Regulations in a Manner Consistent with the EPA's Stack Height Regulations with Respect to NSR/PSD Regulations.	Statewide	4/22/1987	6/26/1987, 52 FR 23981	[A–7–FRL–3216–5].
(24) PM_{10} SIP	Statewide	10/28/1988	8/15/1989, 54 FR 33536	[FRL–3627–7].
(25) Letter Pertaining to NO_X Rules and Analysis Which Certifies the Material Was Adopted by the State on October 17, 1990.	Statewide	11/8/1990	2/13/1991, 56 FR 5757 ...	[FRL–3903–5].
(26) SO_2 Plan	Clinton	3/13/1991	11/1/1991, 56 FR 56158	[IA–21–5182; FRL–4014–4].
(27) Letter Withdrawing Variance Provisions.	Polk County	10/23/1991	11/29/1991, 56 FR 60924	[FRL–IA–4–1–5308; FRL–4034–5] Correction notice published 1/26/1993.
(28) Letter Concerning Open Burning Exemptions.	Statewide	10/3/1991	1/22/1992, 57 FR 2472 ...	[IA5–1–5380; FRL–4039–5].
(29) Compliance Sampling Manual.	Statewide	1/5/1993	5/12/1993, 58 FR 27939	[IA–8–1–5750; FRL–4618–6].
(30) Small Business Assistance Plan.	Statewide	12/22/1992	9/27/1993, 58 FR 50266	[IA–9–1–5859; FRL–4734–5].
(31) Voluntary Operating Permit Program.	Statewide	12/8/1994, 2/16/1996, 2/27/1996	4/30/1996, 61 FR 18958	[IA 003–1003, FRL–5455–4].
(32) SO_2 Plan	Muscatine	6/19/1996 5/21/1997	12/1/1997, 62 FR 63454	[IA 036–1036, FRL–5929–3].
(33) SO_2 Maintenance Plan	Muscatine	4/25/1997	3/19/1998, 63 FR 13343	[IA 040–1040(a), FRL–5980–2].
(34) SO_2 Control Plan	Cedar Rapids	9/11/1998	3/11/1999, 64 FR 12087	[IA 058–1058a; FRL–6308–5].
(35) PM_{10} Control Plan	Buffalo, Iowa	10/1/1998	3/18/1999, 64 FR 13346	[IA 059–1059a; FRL–6310–7].
(36) CAA 110(a)(2)(D)(i) SIP—Interstate Transport.	Statewide	11/22/2006	3/8/2007, 72 FR 10380 ...	[EPA–R07–OAR–2006–1015; FRL–8285–1].

EPA-APPROVED IOWA NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA Approval date	Explanation
(37) SO_2 Maintenance Plan for the Second 10-year Period.	Muscatine	4/5/2007	8/1/2007; 72 FR 41900	[EPA–R07–OAR–2007–0477, FRL–8448–5].
(38) CAA 110(a)(1) and (2)-Ozone Infrastructure SIP.	Statewide	6/15/2007	3/4/2008; 73 FR 11554	[EPA–R07–OAR–2007–1180, FRL–8535–9].
(39) Regional Haze plan for the first implementation period.	Statewide	3/25/2008	6/26/2012, 77 FR 38007	[EPA–R07–OAR–2012–0153, FRL–9688–1] § 52.842(a); Limited Approval.
(40) Sections 110(a)(1) and (2) Infrastructure Requirements 2008 Lead NAAQS.	Statewide	11/4/2011	11/2/2015; Correction 3/25/2016, 81 FR 16094	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(I) is not applicable.
(41) Section 128 Declaration: Conflicts of Interest Provisions;				
Constitution of the State of Iowa, Article 1, Section 2.				This action addresses the following sections of the Constitution of the State of Iowa, Article 1, section 2;
Iowa Code: 4.4.(5), 7E.4, Chapter 68B				Iowa Code : 4.4 (5), 7e.4, Chapter 68B;
Iowa Administrative Code: 351 IAC 6.11, 351 IAC 6.14(2), 351 IAC 6.19, 351 IAC 7.1-7.2, 567 IAC 1.11 (1–9).	Statewide	5/11/2015	11/2/2015; Correction 3/25/2016, 81 FR 16094	Iowa Administrative Code: 351 IAC 6.11, 351 IAC 6.14(2), 351 IAC 6.19, 351 IAC 7.1–7.2, 567 IAC 1.11(1–9).
(42) Lead attainment SIP	Portions of Pottawattamie County.	1/30/2015	2/26/2016, 81 FR 9770	[EPA–R07–OAR–2015–0582; FRL–9942–79–Region 7].
(43) Sections 110(a)(1) and (2) Infrastructure Requirements 2008 Ozone NAAQS.	Statewide	1/17/2013	9/20/2016, 81 FR 64347	This action approves the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II)—prong 3 only, (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(D)(i)(II)—prong 4 is disapproved. 110(a)(2)(I) is not applicable. [EPA–R07–OAR–2016–0407; FRL–9952–55–Region 7].
(44) State Implementation Plan (SIP) Revision for the Attainment and Maintenance of National Ambient Air Quality Standards for Regional Haze (2013 Five-Year Progress Report).	Statewide	7/19/2013	8/15/2016, 81 FR 53924	[EPA–R07–OAR–2014–0365; FRL–9949–82–Region 7.
(45) Sections 110(a)(1) and (2) Infrastructure Requirements 1997 $PM_{2.5}$ NAAQS.	Statewide	3/21/2008	8/16/2016, 81 FR 54502	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), prong 3, (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(I) is not applicable.
(46) Sections 110(a)(1) and (2) Infrastructure Requirements 2006 $PM_{2.5}$ NAAQS.	Statewide	7/23/2013	8/16/2016, 81 FR 54502	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II), prong 3, (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(I) is not applicable.

EPA-APPROVED IOWA NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA Approval date	Explanation
(47) Sections 110(a)(1) and (2) Infrastructure Requirements 2010 Sulfur Dioxide NAAQS.	Statewide	7/23/2013	3/22/2018, 83 FR 12486	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), D(i)(II) prong 3 only, D(ii), (E), (F), (G), (H), (J), (K), (L), and (M). [EPA–R07–OAR–2017–0267; FRL–*9975–78*–Region 7].
(48) Sections 110(a)(1) and (2) Infrastructure Requirements 2010 Nitrogen Dioxide NAAQS.	Statewide	7/23/2013, 3/1/2017	3/22/2018, 83 FR 12491	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(I) prongs 1 and 2, D(i)(II) prong 3 only, D(ii), (E), (F), (G), (H), (J), (K), (L), and (M). [EPA–R07–OAR–2017–0208; FRL–*9975–69*—Region 7].
(49) Sections 110(a)(1) and (2) Infrastructure Requirements 2012 annual fine Particulate Matter NAAQS.	Statewide	12/15/2015	3/22/2018, 83 FR 12488	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), D(i)(II) prong 3 only, D(ii), (E), (F), (G), (H), (J), (K), (L), and (M). [EPA–R07–OAR–2017–0517; FRL–*9975–68*–Region 7].
(50) Lead Redesignation SIP and Maintenance Plan.	Portions of Pottawattamie County.	9/18/2017	10/4/2018, 83 FR 50024	[EPA–R07–OAR–2018–0532; FRL–9984–64–Region 7].
(51) Section 110(a)(2) (D)(i)(I)—significant contribution to nonattainment (prong 1), and interfering with maintenance of the NAAQs (prong 2) (Interstate Transport) Infrastructure Requirements for the 2012 Annual Fine Particulate Matter ($PM_{2.5}$) NAAQS.	Statewide	12/15/2015	9/6/2019, 84 FR 46887 ...	This action approves the following CAA elements: 110(a)(1) and 110(a)(2 (D)(i)(I)—prongs 1 and 2 [EPA–R07–OAR–2019–0332; FRL–9998–89–Region 7].
(52) Sections 110 (a)(2) Infrastructure Prong 4 Requirements for the 2006 Fine Particulate Matter, 2012 Fine Particulate Matter, 2010 Nitrogen Dioxide, 2010 Sulfur Dioxide, 2008 Ozone, and 2015 Ozone NAAQS.	Statewide	1/17/2013; 7/28/2013; 7/29/2013; 7/29/2013; 12/22/2015; 11/30/2018; 5/14/2019	12/3/2019, 84 FR 66075	This action approves the following CAA elements: 110(a)(2)(D)(i)(II)—prong 4. [EPA–R07–OAR–2019–0468; FRL–10001–89–Region 7.].

EDITORIAL NOTES: For FEDERAL REGISTER citations affecting § 52.820, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.821 Classification of regions.

The Iowa plan was evaluated on the basis of the following classification:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Omaha-Council Bluffs Interstate	I	II	III	III	III
Metropolitan Sioux Falls Interstate	II	III	III	III	III

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Sioux City Interstate	III	III	III	III	III
Metropolitan Dubuque Interstate	I	III	III	III	III
Metropolitan Quad Cities Interstate	I	III	III	III	III
Burlington-Keokuk Interstate	I	I	III	III	III
Northwest Iowa Intrastate	III	III	III	III	III
North Central Iowa Intrastate	IA	III	III	III	III
Northeast Iowa Intrastate	I	III	III	III	III
Southwest Iowa Intrastate	III	III	III	III	III
South Central Iowa Intrastate	I	III	III	III	I
Southeast Iowa Intrastate	III	III	III	III	III

[37 FR 10865, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.822 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Iowa's plan for the attainment and maintenance of the national standards. Further, the Administrator finds the plan satisfies all requirements of Part D, Title I, of the Clean Air Act as amended in 1977, except as noted below.

(b) [Reserved]

[45 FR 14567, Mar. 6, 1980, as amended at 46 FR 47546, Sept. 29, 1981; 75 FR 82555, Dec. 30, 2010; 76 FR 67070, Oct. 31, 2011]

§ 52.823 PM_{10} State Implementation Plan Development in Group II Areas.

The Iowa Department of Natural Resources committed to comply with the PM_{10} regulations as set forth in 40 CFR part 51. In a letter to Morris Kay, EPA, dated October 28, 1988, Mr. Larry J. Wilson, Director, Iowa Department of Natural Resources, stated:

Three groups within the State of Iowa have been classified as Group II areas for fine particulate (PM–10) State Implementation Plan (SIP) development purposes. This includes portions of the cities of Des Moines, Mason City, and Cedar Rapids. The specific boundaries of these areas were identified in a letter of October 13, 1987, from Peter R. Hamlin to Carl Walter. The remainder of the State was classified as Group III.

In accordance with the SIP development procedures identified in the preamble of the PM–10 regulations for Implementing Revised Particulate Matter Standards, promulgated July 1, 1987, the State of Iowa commits to perform the following activities in these three Group II areas of the state:

(a) Gather ambient PM–10 data, to an extent consistent with minimum EPA requirements (note the network description contained in a letter of January 26, 1988, from Peter R. Hamlin to John Helvig).

(b) Analyze and verify the ambient PM–10 data and report exceedances of the 24-hour PM–10 National Ambient Air Quality Standards (NAAQS) to the Regional Office within 60 days of each exceedance.

(c) Immediately notify the Regional Office:

(1) Upon the availability of an appropriate number of verifiable 24-hour NAAQS exceedances to indicate a violation (see Section 2.0 of the PM–10 SIP development guideline) or

(2) when an annual arithmetic mean (AAM) above the annual PM–10 NAAQS becomes available.

(d) Within thirty (30) days of any notification of the Regional Office pursuant to (c) above (or upon collection of thirty-six (36) months of PM–10 ambient air quality data acceptable to EPA, whichever comes first) determine whether the measures in the existing SIP will assure timely attainment and maintenance of the primary PM–10 NAAQS and immediately notify the Regional Office of the results of this determination.

(e) Within six (6) months of any notification pursuant to (d) above, adopt and submit to EPA a PM–10 control strategy that assures attainment as expeditiously as practicable but not later than three (3) years from approval of the Committal SIP.

Because of the uncertainty about when the determination can be made pursuant to (d) above, it is difficult to determine if that control strategy could provide for the attainment of the PM–10 NAAQS within three years from the date EPA approves this Committal SIP. Therefore, I reserve the right to request a two-year extension of the attainment date as provided in Section 110(e) of the Clean Air Act, if and when the State of Iowa

submits a SIP revision for any of these areas of the state.

The State of Iowa also commits to develop a PM–10 emission inventory for the areas submitted as part of any PM–10 SIP pursuant to items (c), (d), and (e) above. If the PM–10 NAAQS are not violated, the State of Iowa will proceed with this inventory for the three Group II areas in accordance with the following schedule:

October 1, 1988—Request special assistance funds from EPA to perform the inventory.
October 1, 1989—Initiate inventory.
August 1, 1990—Complete inventory.
October 31, 1990*—Submit inventory as part of a determination of adequacy that the current SIP will attain and maintain the PM–10 NAAQS.

[54 FR 33539, Aug. 15, 1989]

§ 52.824 Original identification of plan section.

(a) This section identifies the original ''Air Implementation Plan for the State of Iowa'' and all revisions submitted by Iowa that were Federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 27, 1972.

(c) The plan revisions listed below were submitted on the dates specified:

(1) Request for a two-year extension to meet the National Primary and Secondary Ambient Air Quality Standards for nitrogen dioxide in the Metropolitan Omaha-Council Bluffs Interstate Air Quality Control Region was submitted by the Governor on January 27, 1972. (Non-regulatory)

(2) Revisions of Appendices D and G of the plan were submitted on February 2, 1972, by the State Department of Health. (Non-regulatory)

(3) Source surveillance and record maintenance statements were submitted on April 14, 1972, by the State Department of Health. (Non-regulatory)

(4) Revised statement regarding public availability of emission data was submitted on May 2, 1972, by the State Department of Health. (Non-regulatory)

(5) State submitted Senate File 85 which created the Department of Environmental Quality and replaced the Iowa air pollution control statute which appeared as Chapter 136B of the Code of Iowa, on May 4, 1972. (Regulatory)

(6) A letter describing the issuance of a Certificate of Acceptance for the local air pollution control programs conducted by the Linn County Board of Health for the jurisdictions of the City of Cedar Rapids and Linn County, and the Des Moines-Polk County Health Department for the jurisdictions of the City of Des Moines and Polk County was submitted by the State Department of Health on December 14, 1972. (Non-regulatory)

(7) Compliance schedules were submitted by the State in February 1973. (Regulatory)

(8) Compliance schedules were submitted by the State in May 1973. (Regulatory)

(9) The State of Iowa High Air Pollution Episode Contingency Plan was submitted on June 20, 1973, by the Governor.

(10) The letter which requested the inclusion of the Linn County Health Department Rules and Regulations, the City of Cedar Rapids Air Pollution Control Ordinance, the Polk County Rules and Regulations—Air Pollution Control, and the City of Des Moines Air Pollution Control Regulations in the State of Iowa implementation plan was submitted by the State Department of Environmental Quality on June 25, 1974. (No approval action was taken on the request because it did not meet the procedural requirements specified in 40 CFR part 51.)

(11) Revisions of Rules 2.1, 3.1, 3.4, 4.1, 4.3(3) and 4.3(4) of the Iowa Rules and Regulations Relating to Air Pollution Control were submitted on April 24, 1974 (by the Governor's office). (No approval or disapproval action was taken on amended Subrule 4.3(3)a., which restricts emissions of sulfur oxides from fuel-burning sources.) (Regulatory)

(12) Compliance schedules were submitted by the State in May 1974.

(13) Compliance schedules were submitted by the State in May 1974.

(14) Compliance schedules were submitted by the State in July 1974.

(15) Compliance schedules were submitted by the State in August 1974.

(16) A letter from the Director of the Department of Environmental Quality,

*Presuming that sufficient ambient data acceptable to EPA are collected by July 31, 1990, and available by September 30, 1990.

dated August 29, 1974, which requested that no further action be taken on Subrule 4.3(3) a. as submitted on April 24, 1974. (Regulatory)

(17) Compliance schedules were submitted by the State in September 1974.

(18) Compliance schedules were submitted by the State in November 1974.

(19) Compliance schedules were submitted by the State in February 1975.

(20) Compliance schedules were submitted by the State in April 1975.

(21) Compliance schedules were submitted by the State in June 1975.

(22) Revisions of Rules 1.2, 2.1, 3.1, 3.4, 4.1, 4.2, 4.3, 5.1, 7.1, 8.3 and 8.4 of the Iowa Rules and Regulations Relating to Air Pollution Control were submitted on July 17, 1975, by the Governor's office. (Regulatory) (No approval or disapproval action was taken on Subrules 4.3(2)c. or 4.3(3)b.)

(23) Summary of the public hearing which was held on the revised rules which were submitted on July 17, 1975, by the Governor's office was submitted by the Iowa Department of Environmental Quality on September 3, 1975. (non-regulatory)

(24) Letter which withdrew amended Subrule 4.3(2)c. from the proposed Iowa plan revision submitted on July 17, 1975, was submitted by the Governor's office on January 20, 1976.

(25) Revisions to Rules 1.2, 2.1, 3.1, 3.2, 4.1, 4.3, 4.4, and new Chapters 14 and 52 of the Iowa Administrative Code Relating to Air Pollution Control were submitted June 9, 1976, by the Department of Environmental Quality (Subrules 4.3(3)a(1) and 4. 3(3)a(5) were disapproved).

(26) Additional air quality modeling to support the sulfur dioxide emission standards of Subrules 4.3(3)a(1) and 4.3(3)a(2) was submitted March 4, 1977, by the Department of Environmental Quality (Non-regulatory).

(26a) Revisions of Rules 1.2, 4.3(2)b, 4.4(6), 4.4(12) and of Chapter 7 of the Iowa Administrative Code relating to Air Pollution Control were submitted June 20, 1977, by the Department of Environmental Quality.

(27) Nonattainment plan provisions as required by the Clean Air Act Amendments of 1977 were submitted on June 22, 1979, by the Department of Environmental Quality. The submission included amended rule 4.3(2) relating to fugitive dust and new rule 4.5 relating to offsets for particulate matter. The revisions included attainment plans for particulate in Mason City and Davenport, particulate and ozone in Cedar Rapids and particulate and carbon monoxide in Des Moines. The submission was disapproved in part for failure to meet the requirements of Section 173 and was conditionally approved with respect to several requirements.

(28) On October 8, 1979, the Iowa Department of Environmental Quality submitted additional information to support the June 22, 1979, submission.

(29) On November 16, 1979, the Iowa Air Quality Commission submitted additional information and commitments to allow approval or conditional approval of portions of the June 22, 1979, submission.

(30) Nonattainment plan provisions as required by the Clean Air Act Amendments of 1977 were submitted on April 18, 1980, by the Department of Environmental Quality. The submission included amended rule 4.3(2) relating to fugitive dust and amended rule 3.5 relating to particulate matter offsets. The revisions included plans to attain the secondary particulate standards for all areas designated nonattainment as of March 6, 1980. The submission was conditionally approved with respect to several requirements.

(31) The State of Iowa Lead State Implementation Plan was submitted on August 19, 1980 by the Director of the Department of Environmental Quality.

(32) Additional information to support the April 18, 1980 submission was submitted on September 16, 1980, by the Department of Environmental Quality.

(33) Additional information to support the April 18, 1980 submission was submitted on November 17, 1980, by the Department of Environmental Quality.

(34) A revised Chapter 5, dealing with excess emissions and malfunctions was submitted on December 23, 1980, by the Department of Environmental Quality.

(35) [Reserved]

(36) A letter was submitted dated January 19, 1981 by the Director of the Department of Environmental Quality which provided additional information concerning the Iowa Lead State Implementation Plan.

(37) A variance from 400—4.2(1) of the Iowa Administrative Code for the Iowa Army Ammunition Plant at Middletown, Iowa, was submitted on October 19, 1979 by the Executive Director.

(38) Revisions to Subrule 400—4.3(2)''c'' relating to fugitive emissions control and a document describing how this subrule is to be enforced were submitted on June 1, 1981, by the Department of Environmental Quality.

(39) A schedule for studying nontraditional sources of particulate matter and for implementing the results of the studies in the form of control strategies was submitted on June 26, 1981 by the Department of Environmental Quality. (Non-Regulatory).

(40) Revisions to Subrule 400—4.3(2)''b'' relating to particulate emissions from fuel burning sources were submitted on July 31, 1981, by the Department of Environmental Quality.

(41) The Iowa Ambient Air Monitoring Strategy was submitted July 15, 1981, by the Department of Environmental Quality (non-regulatory).

(42) A conditional permit containing an alternative emission reduction program for the Progressive Foundry, Inc., of Perry, Iowa, under 400–3.7 and 400–4.6 of the Iowa Administrative Code; and an administrative order setting forth a compliance schedule, were submitted on December 18, 1981, by the Executive Director. The conditional permit specifies particulate emissions not to exceed 16.3 pounds per hour from the gray iron cupola with a process weight rate not to exceed 8534 pounds per hour and specifies the casting shakeout exhaust system shall not exceed 0.05 grains per standard cubic foot nor 12.8 pounds per hour of particulate matter. The compliance schedule specifies a final compliance date of September 1, 1983.

(43) On July 1, 1983, the State's air pollution control regulations were recodified at Department 900, Title II, Chapters 20 through 29.

(44) Revised Chapter 22 regulations, dealing with new source review in nonattainment areas, were submitted on July 18, 1984, by the Iowa Department of Water, Air and Waste Management. Subrules 22.5(4) g, i, and j remain unapproved. EPA will temporarily defer action on these subrules pending a May 14, 1985, commitment from the State to submit appropriate revisions.

(i) *Incorporation by reference.* Revised Chapter 22 regulations, dealing with new source review in nonattainment areas, adopted by the State on July 17, 1984.

(ii) *Additional material.*May 14, 1985, letter of commitment from the State to revise unapprovable portions of their Chapter 22 air pollution regulations.

(45) Revised Chapter 22 subrules 22.5(2) a and b; and revised subrules 22.5(4) g, i, and j, all relating to new source review in nonattainment areas, were submitted on December 31, 1985, by the Iowa Department of Water, Air and Waste Management.

(a) *Incorporation by reference.*

(i) Revised Chapter 22 subrules 22.5(2) a and b; and subrules 22.5(4) g, i, and j, adopted by the State on December 17, 1985.

(ii) April 22, 1986, letter of commitment from the Iowa Department of Water, Air and Waste Management to submit stack height regulations by May 30, 1986, and to implement EPA's stack height requirements until such time that the regulations are fully approved.

(46) Revised Chapter 22 regulations pertaining to new source review in attainment and unclassified areas of the state (PSD) were submitted on March 9, 1987, by the Iowa Department of Natural Resources.

(i) *Incorporation by reference.* (A) Iowa Administrative Bulletin (ARC 7446), amendments to Chapter 22, ''Controlling Pollution,'' adopted by the Iowa Environmental Protection Commission on February 17, 1987.

(B) Letter from Iowa dated April 22, 1987, committing to implementation of its stack height regulations in a manner consistent with EPA's stack height regulations with respect to new source review/PSD regulations.

(47) Revised Chapters 22 and 23 regulations pertaining to stack height credits for modeling purposes were submitted on May 20, 1986, by the Iowa Department of Natural Resources. Revised definition of ''emission limitation'' and ''emission standard'' at Iowa regulation 567.20.2(455B), Definitions.

(i) *Incorporation by reference.* (A) Iowa Administrative Bulletin (ARC 6566), amendments to Chapter 22, ''Controlling Pollution'' and Chapter 23, ''Emission Standards for Contaminants'' adopted by the Iowa Environmental Protection Commission on April 22, 1986, effective June 25, 1986.

(B) Iowa Administrative Bulletin (ARC 8023) amendment to 567–20.2(455B). Effective September 22, 1987.

(48) Revised Chapter 22, subrule 22.1(2)''d'' exemptions from permit requirements were submitted on September 13, 1988, by the Iowa Department of Natural Resources. The revision clarifies permit exemptions for certain grain roasting equipment.

(i) *Incorporation by reference.* (A) Amendment to Chapter 22, ''Controlling Pollution,'' Iowa Administrative Code, subrule 22.1(2)''d'', effective September 14, 1988.

(49) Revised Polk County, Iowa, Board of Health Rules and Regulations, Chapter V, Air Pollution, submitted by the Iowa Department of Natural Resources on February 3, 1988. EPA approves these regulations with the provision that any operating permit which changes any requirement of the Iowa SIP, including requirements in any construction permit, must be submitted to EPA, and approved, as a SIP revision. In the absence of such approval, the enforceable requirements shall be those in the Iowa SIP.

(i) *Incorporation by reference.* (A) Ordinance No. 28, Amendment to Polk County Board of Health Rules and Regulations chapter V, Air Pollution, Article I, 5–1 and 5–2 (except for variance); Article II, 5–3; and Article X, 5–28 through 5.50–1 (except for 5–49 and 5–50), effective October 8, 1987.

(ii) *Additional material.* (A) None.

(50) Revised Linn County, Iowa, Chapter 10 Ordinance ''Air Pollution Control'' submitted as a SIP revision by the Iowa Department of Natural Resources on February 3, 1988. EPA approves these regulations with the provision that any operating permit which changes any requirement of the Iowa SIP, including requirements in any construction permit, must be submitted to EPA, and approved, as a SIP revision. In the absence of such approval, the enforceable requirements shall be those in the Iowa SIP.

(i) *Incorporation by reference.* (A) Linn County Chapter 10 Ordinance ''Air Pollution Control'' sections 10.1 (except for 10.1(50)), 10.2, 10.3, and 10.4, adopted by the Linn County Board of Supervisors on September 2, 1987.

(ii) *Additional material.* (A) None.

(51) Revised Iowa regulations pertaining to PM_{10} were submitted by the state on October 28, 1988. These rules became effective on December 21, 1988.

(i) *Incorporation by reference.* (A) Amended Iowa Administrative Code pertaining to the prevention, abatement, and control of air pollution: Chapter 20, ''Scope of Title—Definitions—Forms—Rules of Practice;'' Chapter 22, ''Controlling Pollution;'' Chapter 26, ''Prevention of Air Pollution Emergency Episodes;'' and Chapter 28, ''Ambient Air Quality Standards,'' effective December 21, 1988.

(ii) *Additional information.* (A) None.

(52) Revised chapter 22, subrule 22.4(1), submitted on May 7, 1990, incorporates by reference revised EPA Modeling Guideline Supplement A, July 1987, and recodified air quality rules chapter 20–29.

(i) *Incorporation by reference.* (A) Amendment to chapter 22, ''Controlling Pollution,'' Iowa Administrative Code, subrule 22.4(1). Effective March 14, 1990.

(B) Recodification of Iowa Administrative Code, title II—Air Quality, chapters 20–29, effective December 3, 1986.

(53) Revised chapter 22, rule 22.4(455B), submitted on November 8, 1990, incorporates by reference revised EPA PSD rules pertaining to NO_X increments.

(i) *Incorporation by reference.* (A) Amendment to chapter 22, ''Controlling Pollution,'' Iowa Administrative Code, subrule 22.4, adopted by the Environmental Protection Commission on October 17, 1990, effective November 21, 1990.

(ii) *Additional material.* (A) Letter from the state dated November 8, 1990, pertaining to NO_X rules and analysis which certifies the material was adopted by the state on October 17, 1990.

(54) On March 13, 1991, the Iowa Department of Natural Resources (IDNR) submitted a plan revision pertaining to

major SO_2 sources in Clinton County, Iowa.

(i) *Incorporation by reference.* (A) Administrative Consent Order #90–AQ–10, signed by Larry Wilson, Director, IDNR, dated July 5, 1990, and revision dated March 25, 1991. Also, three letters to Archer-Daniels-Midland (ADM) Company dated June 20, 1990, signed by Michael Hayward, IDNR, which contain or reference new or revised permit conditions for ADM sources, and a letter to ADM from IDNR dated February 26, 1991, correcting certain permit provisions.

(B) Administrative Consent Order #89–AQ–04, signed by Larry Wilson, Director, IDNR, dated February 21, 1990. Also, two letters to Interstate Power Company dated January 25 and 29, 1990, and signed by Michael Hayward, IDNR, which contain supplemental permit condition for permits 74-A-117-S and 78–A–157–S.

(ii) *Additional material.* (A) Letter and supplemental material from Larry J. Wilson to Morris Kay dated March 13, 1991.

(55) Revised Polk County, Iowa Board of Health Rules and Regulations, chapter V, Air Pollution, submitted by the Iowa Department of Natural Resources on May 23, 1991.

(i) *Incorporation by reference.* (A) Polk County Board of Health Rules and Regulations, chapter V, Air Pollution, Ordinances 28, 72 and 85, effective May 1, 1991, except for the following: Article I, definition of variance; Article VI, Section 5–16 (n), (o), and (p); Article VI, Section 5–17(d), variance provision; Article VIII; Article IX, Sections 5–27(3) and 5–27(4); and Article X, Division 5—Variance.

(ii) *Additional material.* (A) Letter from Allan Stokes to William A. Spratlin dated October 23, 1991.

(56) Revised Chapter 23, rule 23.2, submitted on October 3, 1991, incorporates changes to the open burning rule.

(i) *Incorporation by reference.* (A) Amendment to Chapter 23, ''Emission Standards for Contaminants, ''Iowa Administrative Code, subrule 23.2, adopted by the Environmental Protection Commission, effective September 12, 1990.

(ii) *Additional information.* (A) Letter from Allan Stokes, IDNR, to William Spratlin, dated October 3, 1991.

(57) On January 5, 1993, the Iowa Department of Natural Resources (IDNR) submitted air quality rule revisions to Iowa Administrative Code, Chapters 20, 22, 23, 24, 25, 29, and revisions to the Compliance Sampling Manual.

(i) *Incorporation by reference.* (A) Revisions to Chapter 20 (20.2), Scope of Title-Definitions-Forms-Rules of Practice; Chapter 22 (22.3(1), 22.4, 22.5(2)), Controlling Pollution; Chapter 23 (23.2(3), 23.3(2), 23.3(3), 23.4(12)), Emission Standards for Contaminants; Chapter 24 (24.1(1), 24.1(5)), Excess Emission; Chapter 25, (25.1(7), 25.1(9)), Measurement of Emissions and rescind 25.1(10)d; and Chapter 29 (29.1), Qualification in Visual Determination of the Opacity of Emissions. These revisions were adopted by the Iowa Environmental Protection Commission on December 21, 1992, and became effective on February 24, 1993.

(ii) *Additional material.* (A) Letter from Larry Wilson, IDNR, to Morris Kay, EPA, dated January 5, 1993, and the Compliance Sampling Manual, revised December 1992.

(58) A plan for implementation of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program was submitted by the Iowa Department of Natural Resources as a revision to the Iowa SIP on December 22, 1992.

(i) *Incorporation by reference.* (A) Revisions to the Iowa State Implementation Plan for the Small Business Stationary Source Technical and Environmental Compliance Assistance Program dated December 1992.

(59) On May 5, 1994, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to update the state's incorporation by reference and conformity to various federally approved regulations.

(i) *Incorporation by reference.* (A) Revised rules, ''Iowa Administrative Code,'' effective January 12, 1994. This revision approves an amendment to paragraph 23.2(3)g pertaining to open fires burned for the purpose of training fire-fighting personnel.

(B) Revised rules, ''Iowa Administrative Code,'' effective April 20, 1994. This revision approves amendments to rules 22.4; 23.3(2)d (3) and (4); 23.4(6); and 25.1(9). These rules concern the update of the state's incorporation of prevention of significant deterioration and test method requirements.

(ii) *Additional material.*None.

(60) On May 5, 1994, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to update the state's incorporation by reference and conformity to various Federally approved regulations.

(i) *Incorporation by reference.* (A) Revised rules, ''Polk County Ordinance No. 132—Polk County Board of Health Rules and Regulations,'' effective December 2, 1993. This revision approves all articles in Chapter V, except for Article VI, Section 5–16(n) and (p), Article VIII, and Article XIII.

(ii) *Additional material.* (A) None.

(61) On October 18, 1994, and January 26, 1995, the Director of the Iowa Department of Natural Resources submitted revisions to the state implementation plan (SIP) to include special requirements for nonattainment areas, provisions for use of compliance, and enforcement information and adoption of EPA definitions. These revisions fulfill Federal regulations which strengthen maintenance of established air quality standards.

(i) *Incorporation by reference.* (A) Revised rules ''Iowa Administrative Code,'' effective November 16, 1994. This revision approves revised rules 567–20.2, 567–22.5(1)a, 567–22.5(1)f(2), 567–22.5(1)m, 567–22.5(2), 567–22.5(3), 567–22.5(4)b, 567–22.5(6), 567–22.5(7), 567–22.105(2), and new rule 567–21.5. These rules provide for special requirements for nonattainment areas, provisions for use of compliance and enforcement information and adopts EPA's definition of volatile organic compound.

(B) Revised rules, ''Iowa Administrative Code,'' effective February 22, 1995. This revision approves new definitions to rule 567–20.2. This revision adopts EPA's definitions of ''EPA conditional method'' and ''EPA reference method.''

(ii) *Additional material.* None.

(62) [Reserved]

(63) On December 8, 1994; February 16, 1996; and February 27, 1996, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) to create a voluntary operating permit program as an alternative to Title V. These revisions strengthen maintenance of established air quality standards.

(i) *Incorporation by reference.* (A) ''Iowa Administrative Code,'' sections 567–22.200–22.208, effective December 14, 1994. These rules create the voluntary operating permit program.

(B) ''Iowa Administrative Code,'' sections 567–22.201(1)''a'' and 22.206(1)''h'', effective January 11, 1995.

(C) ''Iowa Administrative Code,'' section 567–22.203(1)''a''(1), effective February 24, 1995.

(D) ''Iowa Administrative Code,'' sections 567–20.2; 22.200; 22.201(1)''a'' and ''b''; 22.201(2)''a''; and 22.206(2)''c'', effective October 18, 1995.

(ii) *Additional material.* (A) Letter from Allan E. Stokes, Iowa Department of Natural Resources, to William A. Spratlin, U.S. EPA, dated February 16, 1995. This letter outlines various commitments by the state to meet requirements outlined by the EPA.

(64) In correspondence dated February 16, 1996, February 19, 1996, and February 27, 1996, the Director of the Iowa Department of Natural Resources (IDNR) submitted revisions to the State Implementation Plan concerning open burning, new source review (NSR) requirements for nonattainment areas, test method and definition updates.

(i) *Incorporation by reference.* (A) ''Iowa Administrative Code,'' section 567–22.8(1), effective July 12, 1995, containing a permit by rule for spray booths.

(B) ''Iowa Administrative Code,'' sections 567–23.2(3); 23.2(4), effective April 19, 1995, addressing open burning.

(C) ''Iowa Administrative Code,'' sections 567–22.5 (2)–(6), (8)–(10), effective March 20, 1996. These rules address NSR requirements in nonattainment areas.

(D) ''Iowa Administrative Code,'' sections 567–20.2; 22.4(1); and 25.1(9), effective July 12, 1995. These rules address test method and definition updates.

(E) ''Iowa Administrative Code,'' section 567–31.1, effective February 22,

1995. This rule addresses permit requirements relating to nonattainment areas.

(ii) *Additional material.* (A) Letter dated July 11, 1997, from Pete Hamlin, IDNR, to Wayne Leidwanger, EPA, requesting approval under 112(l).

(65) On June 13, 1996, and April 25, 1997, the Director of the Iowa Department of Natural Resources (IDNR) submitted a revision to the State Implementation Plan (SIP) which included permits containing source specific emission limits and conditions for three sources in Muscatine, Iowa.

(i) *Incorporation by reference.* (A) Grain Processing Corporation permits #95–A–374, #74–A–015–S, #79–A–194–S, #79–A–195–S, signed September 18, 1995.

(B) Muscatine Power and Water permits #74–A–175–S, #95–A–373 signed September 14, 1995.

(C) Monsanto Corporation permits #76–A–265S3, #76–A–161S3, signed July 18, 1996.

(ii) *Additional material.* (A) Letters from Allan E. Stokes, IDNR, to Dennis Grams, Environmental Protection Agency, dated June 13, 1996, and April 21, 1997, containing supporting SIP information.

(66) On April 2, 1997, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan (SIP) for the State's two local agencies: the Polk County Public Works Department and Linn County Health Department.

(i) *Incorporation by reference.* (A) Revised rules, ''Polk County Board of Health Rules and Regulations: Chapter V, Air Pollution,'' effective December 18, 1996. This revision approves all articles insofar as they pertain to the SIP. Article XIII is specifically excluded from this approval. No action is taken on Sections 5–16(n), 5–16(p), 5–20, and 5–27(3) and (4).

(B) Revised rules, ''Linn County Air Pollution Control Code of Ordinances,'' effective March 7, 1997. This revision approves all sections insofar as they pertain to the SIP. Sections 10.4(1.), 10.11, and 10.15 are specifically excluded from this approval. No action is taken on Sections 10.9(2.), 10.9(3.), 10.9(4.), and the definition of ''federally enforceable'' in Section 10.2.

(ii) *Additional material.* (A) Letter from Allan E. Stokes, Iowa Department of Natural Resources, to William A. Spratlin, Environmental Protection Agency, dated May 15, 1997. This letter provides additional information regarding various administrative requirements outlined in 40 CFR part 51.

(67) In correspondence dated October 21, 1997, and January 21, 1998, the Director of the Iowa Department of Natural Resources submitted revisions to the State Implementation Plan.

(i) *Incorporation by reference.* (A) ''Iowa Administrative Code'' sections567–22.8(1) ''b,'' ''c,'' and ''e,''567–22.203(1) ''a,'' 567–22.300, 567–22.300(1) through 567–22.300(11), 567–23.3(2) ''d,'' and 567–29.1, effective June 12, 1996.

(B) ''Iowa Administrative Code''section 567–20.2, effective October 16, 1996.

(C) ''Iowa Administrative Code'' sectuibs 567–22.300(40 ''b''(1), 567–22.300(8) ''a''(1), and 567–22.300(8)''b''(2), effective December 25, 1996. (D) ''Iowa Administrative Code'' sections 567–20.2, 567–22.2(1), 567–22.201(1) ''a,'' 567–22.201(2) ''b,'' 567–22.202, 567–22.203(1), 567–22.300(3) ''b'' and ''c,'' 567–22.300(8) ''a,'' effective May 14, 1997.

(ii) *Additional material.* (A) ''Iowa Administrative Code'' section 567–23.1(5), Calculation of emission limitations based upon stack height, was renumbered to section 567–23.1(6), effective August 20, 1997.

[37 FR 10865, May 31, 1972. Redesignated at 64 FR 7094, Feb. 12, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.824, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.825 Compliance schedules.

(a) [Reserved]

(b) *Regulation for increments of progress.* (1) Except as provided in paragraph (b)(2) of this section, the owner or operator of any stationary source subject to regulation 4.3.(3)(b), ''Rules and Regulations Relating to Air Pollution Control of the Iowa Air Pollution Control Commission'' shall, no later than December 31, 1972, submit to the Administrator for approval, a proposed compliance schedule that demonstrates

compliance with the applicable regulation as expeditiously as practicable but no later than January 1, 1975. The compliance schedule shall provide for periodic increments of progress towards compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Letting of necessary contract for construction or process changes, if applicable; initiation of construction; completion and start-up of control system; performance tests; and submittal of performance test analysis and results.

(2) Where any such owner or operator demonstrates to the satisfaction of the Administrator that compliance with the applicable regulations will be achieved on or before December 31, 1973, no compliance schedule shall be required.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(4) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(c) The compliance schedules for the sources identified below are approved as revisions to the plan pursuant to §51.104 and subpart N of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

IOWA

Source	Location	Regulation involved	Date adopted	Variance expiration date	Final compliance date
Iowa Army Ammunition Plant (explosive contaminated waste burning).	Middletown, Iowa.	400—4.2(1)	June 14, 1979	Feb. 28, 1982 ..	Feb. 1982.
Progressive Foundry, Inc., cupola and casting shakeout area.	Perry	400–4.6	Nov. 6, 1981 ...	.....	Sept. 1, 1983.

NOTE 1: Linn County Health Department does not issue variances if source(s) is on an approvable compliance schedule.
NOTE 2: Polk County Department of Health does not issue variances if source(s) is on an accepted and approved compliance schedule.
NOTE 3: City of Des Moines, Department of Public Health does not issue variances if source(s) is on an accepted and approved compliance schedule.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §52.825, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§§ 52.826–52.827 [Reserved]

§ 52.828 Enforcement.

(a) Sections 23(1)(b) and 13(7) of Senate File 85, Division II for Iowa are disapproved insofar as they permit the Air Quality Commission of the Iowa Department of Environmental Quality to issue abatement orders (1) that defer compliance with plan requirements beyond the dates required for attainment of the national standards, (2) without the approval of the Administrator, and (3) for reasons not permitted by the Clean Air Act.

(b) Regulation limiting administrative abatement orders:

(1) No order deferring compliance with a requirement of the Iowa Implementation Plan shall be issued by the Air Quality Commission of the Iowa Department of Environmental Quality which does not meet the following requirements:

(i) An order must require compliance with the plan requirement within the times and under the conditions specified in §51.261 (a) and (b) of this chapter.

(ii) An order may not defer compliance beyond the last date permitted by section 110 of the Act for attainment of the national standard which the plan implements unless the procedures and conditions set forth in section 110(f) of the Act are met.

(iii) An order shall not be effective until it has been submitted to and approved by the Administrator in accordance with §§ 51.104, 51.105, 51.261 and 51.262(a).

(2) Notwithstanding the limitations of paragraph (b)(1)(ii) of this section, an order may be granted which provides for compliance beyond the statutory attainment date for a national standard where compliance is not possible because of breakdowns or malfunctions of equipment, acts of God, or other unavoidable occurrences. However, such order may not defer compliance for more than three (3) months unless the procedures and conditions set forth in section 110(f) of the Act are met.

[38 FR 30877, Nov. 8, 1973, as amended at 51 FR 40675, 40676, 40677, Nov. 7, 1986; 52 FR 24367, June 30, 1987]

§§ 52.829–52.832 [Reserved]

§ 52.833 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Air Act are met, except for sources seeking permits to locate on Indian lands in the state of Iowa; and certain sources affected by the stack height rules described in a letter from Iowa dated April 22, 1987.

(b) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable State plan for the State of Iowa for sources wishing to locate on Indian lands; and certain sources as identified in Iowa's April 22, 1987, letter.

[71 FR 16053, Mar. 30, 2006]

§ 52.834 Control strategy: Sulfur dioxide.

Approval—On April 21, 1997, the Iowa Department of Natural Resources (IDNR) submitted a maintenance plan and redesignation request for the Muscatine County nonattainment area. The maintenance plan and redesignation request satisfy all applicable requirements of the Clean Air Act.

[63 FR 13345, Mar. 19, 1998]

§ 52.840 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under §52.38(b) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(3) Notwithstanding the provisions of paragraph (b)(2) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (b)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48364, Aug. 8, 2011, as amended at 76 FR 80774, Dec. 27, 2011; 81 FR 74586 and 74595, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.841 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Iowa and Indian country within the borders of the State and for which requirements are set forth under the CSAPR SO_2 Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under §52.39 for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Iowa's SIP.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Iowa's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74595, Oct. 26, 2016]

§ 52.842 Visibility protection.

The requirements of section 169A of the Clean Air Act are met because the Regional Haze plan submitted by Iowa on March 25, 2008 and supplemented on May 14, 2019, includes fully approvable measures for meeting the requirements of the Regional Haze Rule including 40 CFR 51.308(d)(3) and 51.308(e) with respect to emissions of NO_X and SO_2 from electric generating units.

[84 FR 66078, Dec. 3, 2019]

Subpart R—Kansas

§ 52.869 [Reserved]

§ 52.870 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable SIP for Kansas under Section 110 of the CAA, 42 U.S.C. 7401 *et seq.* and 40 CFR Part 51 to meet NAAQS.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to December 31, 2014, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c) and (d) of this section with EPA approval dates after December 31, 2014, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 7 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the SIP as of December 31, 2014.

(3) Copies of the materials incorporated by reference may be inspected at the Environmental Protection Agency, Region 7, Air Planning and Development Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; at the EPA, Air and Radiation Docket and Information Center, and the National Archives and Records Administration (NARA). If you wish to obtain material from the EPA Regional Office, please call (913) 551–7089. For information on the availability of this material at NARA, call (202) 741–6030, or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

(c) *EPA-approved regulations.*

Name of source	Permit or case No.	State effective date	EPA approval date	Explanation
(1) Board of Public Utilities, Quindaro Power Station.	2090048	10/20/93	10/18/94, 59 FR 52425.	
(2) Board of Public Utilities, Kaw Power Station.	2090049	10/20/93	10/18/94, 59 FR 52425.	
(3) Kansas City Power and Light Company.	.....	12/5/07	12/27/11, 76 FR 80754 ...	Certain provisions withdrawn from plan as identified in letter dated 12/1/11 from Kansas.
(4) Westar Energy, Inc.	.....	2/29/08	12/27/11, 76 FR 80759 ...	Certain provisions withdrawn from plan as identified in letter dated 12/1/11 from Kansas.
(5) Exide Technologies	1690035	8/18/14	7/20/16, 81 FR 47034	

(e) *EPA-approved nonregulatory provisions and quasi-regulatory measures.*

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
(1) Implementation Plan for Attainment and Maintenance of the National Air Quality Standards.	Statewide	1/31/72	5/31/72, 37 FR 10867.	
(2) Comments on the Plan in Response to EPA Review.	Kansas City	3/24/72	6/22/73, 38 FR 16550	Correction notice published 3/2/76.
(3) Emergency Episode Operations/Communications Manual.	Kansas City	4/6/72	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(4) Emergency Episode Operations/Communications Manual.	Statewide except Kansas City.	2/15/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(5) Letter Concerning Attainment of CO Standards.	Kansas City	5/29/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(6) Amendment to State Air Quality Control Law Dealing with Public Access to Emissions Data.	Statewide	7/27/73	11/8/73, 38 FR 30876	Correction notice published 3/2/76.
(7) Analysis and Recommendations Concerning Designation of Air Quality Maintenance Areas.	Statewide	2/28/74	3/2/76, 41 FR 8956	[FRL 484–4].
(8) Ozone Nonattainment Plan	Kansas City	9/17/79	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(9) Ozone Nonattainment Plan	Douglas County	10/22/79	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(10) TSP Nonattainment Plan	Kansas City	3/10/80	4/3/81, 46 FR 20164	[A–7–FRL 1788–5].
(11) Lead Plan	Statewide	2/17/81	10/22/81, 46 FR 51742	[A–7–FRL–1938–8].
(12) CO Nonattainment Plan	Wichita	4/16/81	12/15/81, 46 FR 61117	[A–7–FRL–1990–3].
(13) Air Monitoring Plan	Statewide	10/16/81	1/22/82, 47 FR 3112	[A–7–FRL–2024–8].
(14) Letter and Supporting Documentation Relating to Reasonably Available Control Technology for Certain Particulate Matter Sources.	Kansas City	9/15/81	6/18/82, 47 FR 26387	[EPA Action KS 276; FRL 2137–6]. Correction notice published 1/12/84.
(15) Letter Agreeing to Follow EPA Interim Stack Height Policy for Each PSD Permit Issued Until EPA Revises the Stack Height Regulations.	Statewide	6/20/84	12/11/84, 49 FR 48185	[A–7–FRL–2734–4; EPA No 1163].
(16) Letters Pertaining to Permit Fees.	Statewide	3/27/86, 9/15/87	12/21/87, 52 FR 48265	[FRL 3299–4].
(17) Revisions to the Ozone Attainment Plan.	Kansas City	7/2/86, 4/16/87, 8/18/87, 8/19/87, 1/6/88	5/18/88, 53 FR 17700	[3375–5].
(18) Revised CO Plan	Wichita	3/1/85, 9/3/87	10/28/88, 53 FR 43691	[FRL–3449–1].
(19) Letter Pertaining to the Effective Date of Continuous Emission Monitoring Regulations.	Statewide	1/6/88	11/25/88, 53 FR 47690	[FRL–3473–9].
(20) Letters Pertaining to New Source Permit Regulations, Stack Height Regulations, and Stack Height Analysis and Negative Declarations.	Statewide	3/27/86, 12/7/87 1/6/88	4/20/89, 54 FR 15934	[FRL–3558–5].
(21) PM_{10} Plan	Statewide	10/5/89, 10/16/89	1/16/90, 55 FR 1420	[FRL–3704–3].
(22) Ozone Maintenance Plan	Kansas City	10/23/91	6/23/92, 57 FR 27936	[KS1–1–5439; FRL 4126–6].
(23) Letter Pertaining to PSD NO_x Requirements.	Statewide	9/15/92	1/12/93, 58 FR 3847	[KS–2–1–5640; FRL–4552–3].
(24) Small Business Assistance Plan.	Statewide	1/25/94	5/12/94, 59 FR 24644	[KS–3–1–8332; FRL–4882–4].
(25) Letter Regarding Compliance Verification Methods and Schedules Pertaining to the Board of Public Utilities Power Plants.	Kansas City	12/11/92	10/18/94, 59 FR 52425	[KS–4–1–6508a; FRL–5079–2].
(26) Emissions Inventory Update Including a Motor Vehicle Emissions Budget.	Kansas City	5/11/95	4/25/96, 61 FR 18251	[KS–6–1–6985, MO–31–1–7153; FRL 5448–9].
(27) Air monitoring plan	Statewide	1/6/02	8/30/02, 67 FR 55726	[KS 162–1162a; FRL–7270–4].
(28) Maintenance Plan for the 1-hour ozone standard in the Kansas portion of the Kansas City maintenance area for the second ten-year period.	Kansas City	1/9/03	1/13/04, 69 FR 1919	[KS 202–1202; FRL–7608–9].

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
(29) Revision to Maintenance Plan for the 1-hour ozone standard in the Kansas portion of the Kansas City maintenance area for the second ten-year period.	Kansas City	2/10/06	6/26/06, 71 FR 36213	[EPA–R07–OAR–2006–0365; FRL–8188–4].
(30) CAA 110(a)(2)(D)(i) SIP—Interstate Transport.	Statewide	1/7/07	3/9/07, 72 FR 10608	[EPA–R07–OAR–2007–0141; FRL–8286–3].
(31) Maintenance Plan for the 8-hour ozone standard in the Kansas portion of the Kansas City area.	Kansas City	5/23/07	8/9/07, 72 FR 44781	[EPA–R07–OAR–2007–0620; FRL–8450–5] This plan replaces numbers (28) and (29).
(32) Section 110(a)(2) Infrastructure Requirements for the 1997 8-Hour Ozone NAAQS.	Statewide	1/8/08 7/20/09	7/11/11, 76 FR 40624	[EPA–R07–OAR–2011–0304; FRL–9434–3]. This action addresses the following CAA elements as applicable: 111(a)(2)(A), (B), (C), (D)(ii), (E), (F), (G), (H), (J), (K), (L) and (M).
(33) Regional Haze Plan for the first implementation period.	Statewide	11/9/09	12/27/11, 76 FR 80754 ...	[EPA–R07–OAR–2011–0675; FRL–9611–3]. Certain provisions withdrawn from plan as identified in letter dated 12/1/11 from Kansas.
(34) Section 110(a)(2) Infrastructure Requirements for the 1997 $PM_{2.5}$ NAAQS.	Statewide	1/08/08	6/20/13, 78 FR 37126	[EPA–R07–OAR–2013–0233; FRL–9825–6]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), D(ii), (E), (F), (G), (H), (J), (K), (L), and (M), except as noted.
(35) Section 110(a)(2) Infrastructure Requirements for the 2006 $PM_{2.5}$ NAAQS.	Statewide	4/12/10	6/20/13, 78 FR 37126	[EPA–R07–OAR–2013–0233; FRL–9825–6]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), D(ii), (E), (F), (G), (H), (J), (K), (L) and (M), except as noted.
(36) Section 128 Declaration: Kansas Department of Health and Environment Representation and Conflicts of Interest Provisions, Kansas Revised Statutes (KSA). KSA 46–221, KSA 46–229, KSA 46–247(c).	Statewide	3/19/13	6/20/13, 78 FR 37126	[EPA–R07–OAR–2013–0233; FRL–9825–6].
(37) Section 110(a)(2) infrastructure Requirements for the 2008 Pb NAAQS.	Statewide	1/13/12	9/15/14, 79 FR 54908	[EPA–R07–OAR–2014–0271; FRL–9916–50–Region 7]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L) and (M).

EPA-APPROVED KANSAS NONREGULATORY PROVISIONS—Continued

Name of nonregulatory SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Explanation
(38) Section 110(a)(2) Infrastructure Requirements for the 2008 O_3 NAAQS.	Statewide	3/19/13	10/21/14, 79 FR 62861 ...	[EPA–R07–OAR–2014–0401; FRL–9918–19–Region 7]. This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D)(i)(II) (prongs 3 and 4), (D)(ii), (E), (F), (G), (H), (J), (K), (L) and (M) except as noted.
(39) Section 110(a)(2) Infrastructure Requirements for the 2010 NO_2 NAAQS.	Statewide	3/19/13	10/22/14, 79 FR 63044 ...	[EPA–R07–OAR–2014–0500; FRL–9918–11–Region 7]. This action addresses the following CAA elements: 110 (a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L) and (M).
(40) Cross State Air Pollution Rule—State-Determined Allowance Allocations for the 2016 control periods.	Statewide	3/30/15	8/21/2015, 80 FR 50789.	
(41) Section 110(a)(2) Infrastructure Requirements for the 2008 O_3 NAAQS.	Statewide	3/19/2013	8/27/2015, 80 FR 51955	This action addresses the visibility protection portion of section 110(a)(2)(J) of the CAA.
(42) State Implementation Plan (SIP) Revision for the Attainment and Maintenance of National Ambient Air Quality Standards for Regional Haze (2014 Five-Year Progress Report).	Statewide	3/10/15	9/14/15, 80 FR 55030.	
(43) Attainment plan for 2008 lead NAAQS.	Salina	2/3/15	7/20/16, 81 FR 47034	[EPA–R07–OAR–2015–0708; 9949–13–Region 7].
(44) Section 110(a)(2) Infrastructure Requirements for the 2012 $PM_{2.5}$ NAAQS.	Statewide	11/16/15	9/9/16, 81 FR 62373	This action addresses the following CAA elements: 110(a)(2)(A), (B), (C), (D), (E), (F), (G), (H), (J), (K), (L), and (M). 110(a)(2)(I) is not applicable. [EPA–R07–OAR–2016–0313; FRL–]

[64 FR 7098, Feb. 12, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.870, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.871 Classification of regions.

The Kansas plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Metropolitan Kansas City Interstate	I	III	III	I	I
South Central Kansas Intrastate	I	III	III	III	I
Northeast Kansas Intrastate	I	III	III	III	III

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Southeast Kansas Intrastate	III	III	III	III	III
North Central Kansas Intrastate	I	III	III	III	III
Northwest Kansas Intrastate	I	III	III	III	III
Southwest Kansas Intrastate	I	III	III	III	III

[37 FR 10867, May 31, 1972]

§ 52.872 Operating permits.

Emission limitations and related provisions which are established in Kansas operating permits as Federally enforceable conditions shall be enforceable by EPA. EPA reserves the right to deem permit conditions not Federally enforceable. Such a determination will be made according to appropriate procedures and be based upon the permit, permit approval procedures, or permit requirements which do not conform with the operating permit program requirements or the requirements of EPA underlying regulations.

[60 FR 36364, July 17, 1995]

§ 52.873 Approval status.

(a) The Kansas portion of the Kansas City metropolitan area was designated as nonattainment for ozone in 40 CFR part 81. Therefore, the Administrator approves continuation of the 7.8 RVP limit as federally enforceable in the Kansas City metropolitan area, even after the area is redesignated to attainment, because of its nonattainment designation effective January 6, 1992. Also, the requirement for 7.8 psi RVP volatility is deemed necessary to ensure attainment and maintenance of the ozone standard as demonstrated by the emissions inventory projections (based on use of 7.8 psi RVP) in Kansas' ozone maintenance plan for the Kansas City metropolitan area.

(b) [Reserved]

(c) The Administrator approves Rule K.A.R. 28–19–31 as identified at § 52.870(c)(29), with the understanding that any alternative compliance plans issued under this rule must be approved by EPA as individual SIP revisions.

[37 FR 10867, May 31, 1972, as amended at 46 FR 20170, Apr. 3, 1981; 46 FR 61118, Dec. 15, 1981; 57 FR 27939, June 23, 1992; 59 FR 52427, Oct. 18, 1994; 61 FR 16061, Apr. 11, 1996]

§ 52.874 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since authority to make emission data available to the public is inadequate. Kansas Statutes Annotated 65–3015 would require confidential treatment if the data related to processes or production unique to the owner or would tend to affect adversely the competitive position of the owner.

(b) The requirements of § 51.232(b) of this chapter are not met since the following deficiencies exist in the local agency legal authority:

(1) *Kansas City, Kans.-Wyandotte County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65–3016 provides a designated local air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(2) *Topeka-Shawnee County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65–3016 provides a designated air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(3) *Wichita-Sedgwick County Health Department.* (i) Authority to make emission data available to the public is inadequate because the Kansas Statutes Annotated 65–3016 provides a designated local air quality conservation authority with the same authority as the State (§ 51.230(f) of this chapter).

(c) The requirements of § 51.230(d) of this chapter are not met since statutory authority to prevent construction, modification, or operation of a facility, building, structure, or installation, or combination thereof, which indirectly results or may result in emissions of any air pollutant at any location which will prevent the maintenance of a national air quality standard is not adequate.

[37 FR 10867, May 31, 1972, as amended at 39 FR 7281, Feb. 25, 1974; 51 FR 40676, Nov. 7, 1986]

§ 52.875 Original identification of plan section.

(a) This section identifies the original ''Air Quality Implementation Plan for the State of Kansas'' and all revisions submitted by Kansas that were Federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 31, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Various comments on the plan in response to the Regions review were submitted on March 24, 1972, by the State Department of Health. (Non-regulatory)

(2) The Emergency Episode Operations/Communications Manual for the Kansas City Interstate AQCR was submitted on April 6, 1972, by the State Department of Health. (Non-regulatory)

(3) Emergency Episode Operations/Communications Manual for all Kansas Intrastate AQCR's was submitted on February 15, 1973, by the State Department of Health. (Non-regulatory)

(4) Revisions of sections 28–19–6 through 15, 20–24, 30–32, 40–47, 50–52 and 55–58 of the State air pollution control regulations were submitted by the State Department of Health on April 17, 1973.

(5) Letter from the Governor, dated May 29, 1973, concerning the attainment of CO emission standards. (Non-regulatory)

(6) An amendment to the State air quality control law, Senate Bill No. 30, dealing with public access to emission data was submitted on July 27, 1973, by the Governor.

(7) Revisions of sections 28–19–8, 9, 14, 22, 25 and 47 of the State air pollution control regulations were submitted on February 6, 1974, by the Governor.

(8) Copy of the State's analysis and recommendations concerning the designation of Air Quality Maintenance Areas was submitted by letter from the State Department of Health on February 28, 1974. (Non-regulatory)

(9) Kansas submitted State Implementation Plan (SIP) revisions to attain the National Ambient Air Quality Standards on September 17, 1979 for Wyandotte and Johnson Counties, on October 22, 1979 for Douglas County, and on March 10, 1980 for Kansas City of the state designated nonattainment areas under section 107 of the Clean Air Act as amended in 1977. On September 22 and 25, 1980, the state submitted revised regulations on the control of volatile organic compounds and a regulation on the new source permit review program. Included in the plan are the following approved state air pollution control regulations:

(i) The VOC regulations which EPA approved as RACT: 28–19–61 Definitions, 28–19–62 Testing Procedures, 28–19–63 Automobile and Light Duty Trunk Surface Coating, 28–19–65 Petroleum Liquid Storage Tanks, 28–19–66 Petroleum Liquid Storage in External Floating Roof Tanks, 28–19–67 Petroleum Refineries, 28–19–68 Leaks from Petroleum Refinery Equipment, 28–19–69 Cutback Asphalt.

(ii) The New Source Permit Review regulation 28–19–16 through 16m which EPA conditionally approved as meeting the requirements of sections 172(b)(6); 172(b)(11)(A), and 173.

(iii) The Kansas City-Wyandotte County air pollution control regulations which have been adopted by both the Kansas City, Kansas Board of City Commissioners and the Wyandotte County Board of County Commissioners:

2A–1 Jurisdiction, 2A–2 Purpose, 2A–3 Definitions, 2A–4 Powers of the Board, 2A–5 Facts and Circumstances Pertinent to Orders of Joint Board, 2A–6 Right of Entry for Inspection, 2A–7 Time for Compliance Schedule, 2A–8 Variance, 2A–9 Circumvention of Chapter or Regulations, 2A–10 Air Pollution Nuisances Prohibited; Additional Emission Restrictions; Interference with the Enjoyment of Life and Property, 2A–11 Reserved,

2A–12 Confidential Information, 2A–13 Registration and Permit System; Exemptions, 2A–14 Review of New or Altered Sources, 2A–15 Public Hearings, 2A–16 Installations in which Fuel is Burned, 2A–17 Restriction of Emission of Particulate Matter from Industrial Processes, 2A–18 Open Burning Prohibition, 2A–19 Opacity Requirements, 2A–20 Exceptions Due to Breakdowns or Scheduled Maintenance, 2A–21 Preventing Particulate Matter from Becoming Air-Borne, 2A–22 Measurement of Emissions, 2A–23 Restriction of Emission of Odors, 2A–24 Sulfur Compound Emissions, 2A–24.1 Hydrocarbon Emissions; Stationary Sources, 2A–25 Control of Carbon Monoxide Emissions, 2A–26 Control of Nitrogen Oxide Emissions, 2A–26.1 Incinerators, 2A–27 Air Pollution Emergencies—General Provisions, 2A–28 Air Pollution Emergencies—Episode Criteria, 2A–29 Emission Reduction Requirements, 2A–30 Emergency Episode Plans, 2A–31 Penalties for Violation of Chapter or Air Pollution Control Regulations, and 2A–32 Conflict of Ordinances, Effect Partial Invalidity.

(10) The Kansas State Implementation Plan for lead was submitted on February 17, 1981, by the Governor of Kansas, along with a submittal letter which provided additional information concerning the Kansas State Implementation Plan for lead.

(11) Kansas submitted SIP revisions to attain and maintain the National Ambient Air Quality Standards for carbon monoxide on April 16, 1981, for the South Central Kansas Interstate Air Quality Control Region, Wichita nonattainment area. The plan included commitments to complete transportation control measures for the reduction of carbon monoxide from transportation related sources for the attainment of the national standards by December 31, 1982.

(12) A plan revision which makes modifications to the existing Kansas air quality surveillance network was submitted by the Kansas Department of Health and Environment on October 16, 1981.

(13) Additional information to correct two plan deficiencies was submitted by the Kansas Department of Health and Environment on May 12, 1981.

(14) Letter and supporting documents submitted on September 15, 1981, from the Director of Air Quality and Occupational Health relating to reasonably available control technology for certain particulate matter sources in the Kansas City, Kansas area.

(15) New regulations 28–19–70 and 28–19–62 applicable to tank trucks operating at bulk gasoline terminals were submitted by the Kansas Department of Health and Environment on June 15, 1982. State regulation 28–19–51 is revoked. Revised regulations 28–19–16, 28–19–16a, 28–19–16b, 28–19–16c, 28–19–16f, 28–19–16g, 28–19–16h, and 28–19–16i, applicable to new sources in nonattainment areas were included with the June 15, 1982 submittal. Action is deferred on the following regulations: 28–19–16a(d), 28–19–16a(v), 28–19–16, 28–19–16b, 28–19–16c, 28–19–16f, 28–19–16h, 28–19–16i, and 28–19–16a(o). The remainder of the provisions are approved.

(16) New regulations K.A.R. 28–19–17 through K.A.R. 28–19–171 applicable to stationary sources subject to prevention of significant deterioration (PSD) permit requirements were submitted on May 5, 1983. Regulation K.A.R. 28–19–171 pertaining to the use of innovative control technology is not approved. By letter dated June 20, 1984, the State of Kansas agrees to follow the EPA interim stack height policy for each PSD permit issued until such time as EPA revises its general stack height regulations.

(17) Revised regulation K.A.R. 28–19–69, applicable to the use of cutback asphalt, was submitted by the Secretary of the Kansas Department of Health and Environment on February 21, 1986.

(i) *Incorporation by reference.* (A) Revised regulation K.A.R. 28–19–69 as approved by the Kansas Attorney General on December 5, 1985.

(18) Revised regulations K.A.R. 28–19–63 applicable to automobile and light-duty truck surface coating; K.A.R. 28–19–64 applicable to bulk gasoline terminals; K.A.R. 28–19–67 applicable to petroleum refineries; and K.A.R. 28–19–68 applicable to leaks at petroleum refineries, were submitted by the Secretary of the Kansas Department of Health and Environment on February 21, 1986.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28–19–63, K.A.R. 28–19–64, K.A.R. 28–19–67, and K.A.R. 28–19–68 as approved by the Kansas Attorney General on October 30, 1985.

(19) Revised Kansas regulations pertaining to fees for permits to construct and operate were submitted by the Kansas Department of Health and Environment on March 27, 1986.

(i) *Incorporation by reference.* (A) Kansas Administrative Regulations (KAR) 28–19–7, 28–19–8, 28–19–9, 28–19–14, 14(a) and 14(b), 28–19–31, 28–19–45, which became effective on May 1, 1986.

(B) Letter of March 27, 1986 to EPA from the State of Kansas Department of Health and Environment.

(C) Letter of September 15, 1987 to EPA from the State of Kansas Department of Health and Environment.

(20) Revisions to the ozone attainment plan for the Kansas City metropolitan area were submitted by the Governor on July 2, 1986. Pursuant to this plan, revised regulations for the control of volatile organic compound emissions were submitted by the Secretary of the Kansas Department of Health and Environment on January 6, 1988. In numerous instances, the revised Kansas regulations provide for departmental discretion to approve compliance plans and test methods which are alternatives to the EPA reference methods. EPA approves these regulations with the understanding that all such alternative compliance plans and test methods must be submitted to EPA, and approved, as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP shall be the emission limits or reduction requirements stated in the regulations. Also, the Kansas regulations contain provisions whereby testing is required when the facility intends to demonstrate compliance by improved operations or new emission controls, yet no test procedures are specified. Examples of such provisions are transfer efficiency (TE) and vapor processing systems. Test methods which are developed by the state must be approved by EPA before facilities may demonstrate compliance through alternative controls and/or TE.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28–19–8, Reporting required; K.A.R. 28–19–61, Definitions; K.A.R. 28–19–62, Testing procedures; K.A.R. 28–19–63, Automobile and light-duty truck surface coating; K.A.R. 28–19–64, Bulk gasoline terminals; K.A.R. 28–19–65, VOC liquid storage in permanent fixed roof type tanks; K.A.R. 28–19–66, VOC liquid storage in external floating roof tanks; K.A.R. 28–19–69, Cutback asphalt; K.A.R. 28–19–70, Leaks from gasoline delivery vessels and vapor collection systems; K.A.R. 28–19–71, Printing operations; K.A.R. 28–19–72, Gasoline dispensing facilities; K.A.R. 28–19–73, Surface coating of miscellaneous metal parts and products and metal furniture; K.A.R. 28–19–74, Wool fiberglass manufacturing; and K.A.R. 28–19–75, Solvent metal cleaning. Temporary versions of these regulations are effective December 16, 1987, through April 30, 1988. The permanent regulations are effective May 1, 1988.

(B) Letter of January 6, 1988, from the Secretary of the Kansas Department of Health and Environment. This letter establishes the effective dates for the revised regulations referenced in subparagraph (20)(i)(A) above.

(ii) *Additional material.* (A) State of Kansas Implementation Plan, Part A—Kansas City Metropolitan Area, Ozone, dated June 1986, submitted by the Governor on July 2, 1986. The plan contains an attainment demonstration, emissions inventories, and a control strategy.

(B) Supplemental information, pursuant to the above referenced plan, was submitted on August 19, 1987.

(C) Negative declarations for certain VOC source categories were submitted on April 16 and August 18, 1987.

(21) Revised Kansas regulations applicable to air quality models and definitions were submitted by the Kansas Department of Health and Environment on January 6, 1988.

(i) *Incorporation by reference.* (A) Kansas Administrative Regulations (K.A.R.) 28–19–17(f) and 28–19–7 (a) through (f) and (h) through (w) which became effective December 16, 1987. EPA is deferring action on 28–19–7(g), *Emission Limitation and Standard.*

(22) On March 1, 1985, the Governor of Kansas submitted a revised carbon monoxide state implementation plan for Wichita, Kansas. On September 3, 1987, the Kansas Department of Health and Environment submitted two new transportation control measures as part of the revised Wichita carbon monoxide control plan.

(i) *Incorporation by reference.* (A) Letter of September 3, 1987, from the Kansas Department of Health and Environment and attached transportation control measures adopted August 18, 1987.

(B) Revision of the Wichita-Sedgwick County Portion of the Kansas State Implementation Plan for Carbon Monoxide submitted by the Governor on March 1, 1985. The plan contains an attainment demonstration, emissions inventory, and a control strategy.

(23) Kansas Administrative Regulations (K.A.R.) 28–19–19(a) through 28–19–19(o) pertaining to continuous emission monitoring at certain stationary sources were submitted on January 6, 1988, by the Kansas Department of Health and Environment. K.A.R. 28–19–19(o) allows for departmental discretion on use of different but equivalent procedures than those specified in 28–19–19(a) through 28–19–19(n). EPA approves this rule with the understanding that all such equivalent procedures and requirements must be submitted to EPA as individual SIP revisions. In the absence of such approval, the enforceable provisions of K.A.R. 28–19–19(a) through 28–19–19(n) shall be applicable.

(i) *Incorporation by reference.* (A) K.A.R. 28–19–19(a) through 28–19–19(o), continuous emission monitoring, as submitted by the Secretary of the Kansas Department of Health and Environment. These regulations became effective on May 1, 1988.

(B) Letter of January 6, 1988, from the Secretary of the Kansas Department of Health and Environment. This letter establishes the effective date for the revised regulations referenced in paragraph (23)(i)(A) of this section.

(24) Revised regulations K.A.R. 28–19–7(g), K.A.R. 28–19–16, and K.A.R. 28–19–17 pertaining to new source permit requirements, were submitted by the Secretary of the Kansas Department of Health and Environment on March 27, 1986. Revised regulation K.A.R. 28–19–18 pertaining to stack heights was submitted by the Secretary of the Kansas Department of Health and Environment on January 6, 1988.

(i) *Incorporation by reference.* (A) Revised regulations, K.A.R. 28–19–16, 28–19–16b, 28–19–16d, 28–19–16g, 28–19–16i, 28–19–16l, 28–19–17, 28–19–17a, and 28–19–17b, which became effective on May 1, 1986.

(B) Revised regulations K.A.R. 28–19–7(g), and K.A.R. 28–19–18 through 28–19–18f. The temporary regulations became effective December 16, 1987, and became permanently effective on May 1, 1988.

(ii) *Additional material.* (A) KDHE letter of March 27, 1986, to EPA pertaining to new source permit regulations.

(B) KDHE letter of January 6, 1988, and June 9, 1988, to EPA pertaining to stack height regulations.

(C) KDHE letters of December 7, 1987, and December 23, 1987, pertaining to the state's stack heights analysis and negative declarations.

(25) Revised Kansas Administrative Regulations (K.A.R.) pertaining to PM_{10} regulations and the PM_{10} committal SIP were submitted by Kansas on October 5, 1989.

(i) *Incorporation by reference.* (A) Revised regulations Article 19—Ambient Air Quality Standards and Air Pollution Control, K.A.R. 28–19–7, 28–19–8, 28–19–14, 28–19–16a, 28–19–17a, 28–19–17b, 28–19–17c, 28–19–17g, 28–19–17i, 28–19–20, 28–19–21, and 28–19–56, published August 31, 1989, effective October 16, 1989.

(ii) *Additional material.* (A) Letter of October 5, 1989, from the Secretary of the Kansas Department of Health and Environment (KDHE).

(B) Memorandum of October 16, 1989, from the Secretary of State (Kansas) to Stanley Grant (KDHE).

(C) Revised Air Quality Surveillance Monitoring Plan—Section E.

(26) Revisions to the state implementation plan for the Kansas City metropolitan area were submitted by the Governor on October 23, 1991. Revisions include a maintenance plan which demonstrates continued attainment of the NAAQS for ozone through the year 2002. Rule revisions were also submitted on October 23, 1991.

(i) *Incorporation by reference.* (A) Article 19—Ambient Air Quality Standards and Air Pollution Control, revised Kansas Administrative Regulations (K.A.R.) 28–19–61, Definitions, and K.A.R. 28–19–62, Testing procedures; and new rules K.A.R. 28–19–76, Lithography printing facilities, and K.A.R. 28–19–77, Chemical processing facilities that operate alcohol plants or liquid detergent plants. These rules were published August 22, 1991, and became effective October 7, 1991.

(ii) *Additional material.* (A) State of Kansas Implementation Plan, Kansas City Metropolitan Area Maintenance Provisions, October 1991.

(27) On September 15, 1992, the Secretary of KDHE submitted rule revisions to K.A.R. 28–19–17, the PSD rule; to K.A.R. 28–19–19, the CEM rule; and to K.A.R. 28–19–73, a surface coating rule. These rule revisions were adopted by KDHE on April 3, 1992.

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28–19–17 through 28–19–171, K.A.R. 28–19–19 and K.A.R. 28–19–73, and new regulations K.A.R. 28–19–17m through 28–19–17q, effective June 8, 1992.

(ii) *Additional material.* (A) Letter and attachment from KDHE dated September 15, 1992 pertaining to PSD NO_X requirements.

(28) A plan for implementation of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program was submitted by the Kansas Department of Health and Environment as a revision to the Kansas State Implementation Plan (SIP) on January 25, 1994.

(i) *Incorporation by reference.* (A) Kansas SIP, Small Business Stationary Source Technical and Environmental Compliance Assistance Program, dated November 15, 1993.

(29) On May 16, 1994 the Secretary of KDHE submitted revisions to rules K.A.R. 28–19–31, 28–19–32, 28–19–63, and operating permits #20090048 (BPU Quindaro station) and #20090049 (BPU Kaw station).

(i) *Incorporation by reference.* (A) Revised regulations K.A.R. 28–19–31, K.A.R. 28–19–32, K.A.R. 28–19–63, effective November 8, 1993.

(B) Operating permits; Kansas City, Kansas, Board of Public Utilities Quindaro permit #20090048, and Kaw permit #20090049, effective October 20, 1993.

(ii) *Additional material.* (A) Letter from BPU to KDHE dated December 11, 1992, regarding compliance verification methods and schedules.

(30) On February 17, 1995, the Secretary of the Kansas Department of Health and Environment (KDHE) submitted for approval numerous rule revisions which add and revise definitions, revise the Kansas construction permit program, and create a class II operating permit program.

(i) *Incorporation by reference.* (A) Revised rules K.A.R. 28–19–7 effective November 22, 1993; K.A.R. 28–19–8 effective January 23, 1995; K.A.R. 28–19–14 effective January 24, 1994; and the revocation of K.A.R. 28–19–14a effective January 23, 1995; and the revocation of K.A.R. 28–19–14b effective January 24, 1994.

(B) New rules K.A.R. 28–19–204, 212, 300, 301, 302, 303, 304, 400, 401, 402, 403, 404, 500, 501, 502, 540, 541, 542, 543, 544, 545, 546, 561, 562, and 563 effective January 23, 1995.

(31) On May 11, 1995, the Kansas Department of Health and Environment submitted an emissions inventory update to the Kansas City maintenance plan approved by EPA on June 23, 1992. The submittal also establishes a motor vehicle emissions budget for the purpose of fulfilling the requirements of the Federal Transportation Conformity rule.

(i) *Incorporation by reference.* (A) Kansas City Ozone Maintenance State Implementation Plan Revision: Emissions Inventories and Motor Vehicle Emissions Budgets for the Kansas City Metropolitan Area, adopted on May 11, 1995.

(32) A Plan revision was submitted by the Kansas Department of Health and Environment (KDHE) on June 6, 1996, which incorporates by reference the EPA's regulations relating to determining conformity of general Federal actions to State or Federal Implementation Plans, and which revokes old and adopts new open burning regulations.

(i) *Incorporation by reference.* (A) Regulation K.A.R. 28–19–800, adopted by the Secretary of the KDHE on February 21, 1996, effective March 15, 1996.

(B) Regulations K.A.R. 28–19–645 to K.A.R. 28–19–648, adopted by the Secretary of KDHE on February 6, 1996, effective March 1, 1996.

(C) Regulations K.A.R. 28–19–45 to K.A.R. 28–19–47, revoked by the Secretary of KDHE on February 6, 1996, effective March 1, 1996.

(33) A revision to the Kansas SIP was submitted by the Kansas Department of Health and Environment on May 23, 1997, pertaining to fuel volatility.

(i) *Incorporation by reference.* (A) K.A.R. 28–19–79, Fuel Volatility, effective May 2, 1997.

(d) Plan revisions were submitted on April 17, 1974, and February 17, 1974.

[37 FR 10867, May 31, 1972]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.875, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov.*

§ 52.876 Compliance schedules.

(a) The requirements of § 51.260 and of § 51.15(a)(2) of this chapter as of September 19, 1976 (40 FR 43216), are not met since the plan does not contain legally enforceable compliance schedules setting forth the dates by which all stationary sources or categories of such sources must be in compliance with applicable portions of the control strategy. Paragraphs C and D of Kansas Regulation 28–19–9 specify that all sources not in compliance must submit an acceptable compliance schedule within 120 days after receiving notification from the State. There are no assurances that all sources will be notified by the State in a timely manner, therefore, paragraphs C and D of Regulation 28–19–9 are disapproved.

(b) *Federal compliance schedule.* (1) Except as provided in paragraph (2) of this paragraph (b), the owner or operator of any stationary source subject to any emission regulation which is part of the approved plan shall be in compliance on or before January 31, 1974.

(i) Any owner or operator in compliance with any such applicable regulation on the effective date of this paragraph shall certify such compliance to the Administrator no later than December 31, 1972.

(ii) Any owner or operator who achieves compliance with any such applicable regulation after the effective date of this paragraph shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(2) An owner or operator of a stationary source subject to any emission regulation approved by the Administrator may no later than December 31, 1972, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with such regulation as expeditiously as practicable, but no later than July 31, 1975. The compliance schedule shall provide for periodic increments of progress toward compliance. The dates for achievement of such increments shall be specified. Increments of progress shall include, but not be limited to: Letting of necessary contracts for construction or process changes, if applicable; initiation of construction; completion and startup of control systems; performance tests; and submittal of performance test analysis and results.

(3) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

(4) Any compliance schedule adopted by the State and approved by the Administrator shall satisfy the requirements of this paragraph for the affected source.

(c) *State compliance schedules.* (1) [Reserved]

(2) The compliance schedules identified below are disapproved as not meeting the requirements of § 51.102 or subpart N of this chapter. All regulations cited are air pollution control regulations of the state, unless otherwise noted.

§§ 52.877–52.880 [Reserved]

§ 52.881 PM_{10} State implementation plan development in group II areas.

The state has submitted a committal SIP for Kansas City, Kansas. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM_{10} at 52 FR 24681, except the state will report the PM_{10} data which exceed the standard within 60 days of the exceedance, rather than 45 days.

[55 FR 1423, Jan. 16, 1990]

§ 52.882 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Kansas and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under §52.38(a) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances

to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Kansas and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under §52.38(b) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(2) Notwithstanding the provisions of paragraph (b)(1) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (b)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 80 FR 50793, Aug. 21, 2015; 81 FR 74586 and 74595, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§52.883 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Kansas and Indian country within the borders of the State and for which requirements are set forth under the CSAPR SO_2 Group 2 Trading Program in subpart DDDDD of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated with regard to sources and units in the State by the promulgation of an approval by the Administrator of a revision to Kansas' State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under §52.39 for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Kansas' SIP.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Kansas' SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 2 allowances under subpart DDDDD of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart DDDDD of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74596, Oct. 26, 2016]

§52.884 Significant deterioration of air quality.

(a) The requirements of section 160 through 165 of the Clean Air Act, as amended are met; except that:

(1) EPA retains PSD permit authority for Indian lands in the State of Kansas.

[49 FR 48186, Dec. 11, 1984, as amended at 54 FR 15935, Apr. 20, 1989; 58 FR 3848, Jan. 12, 1993]

Subpart S—Kentucky

§ 52.919 [Reserved]

§ 52.920 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan for Kentucky under section 110 of the Clean Air Act, 42 U.S.C. 7401, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraph (c) of this section with an EPA approval date prior to October 1, 2003, for the Commonwealth of Kentucky (Table 1) and November 23, 2001, for Jefferson County, Kentucky (Table 2) was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraph (c), Table 1, and paragraph (d) of this section with EPA approval dates after October 1, 2003, will be incorporated by reference in the next update to the SIP compilation. Entries in paragraph (c), Table 2, with EPA approval dates after October 23, 2001, will be incorporated by reference in the next update to the Jefferson County portion of the Kentucky SIP compilation.

(2) EPA Region 4 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated state rules/regulations which have been approved as part of the State and Local Implementation Plans listed in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 4 EPA Office at 61 Forsyth Street, SW., Atlanta, GA 30303; at the EPA, Office of Air and Radiation Docket and Information Center, Room B–108, 1301 Constitution Avenue, (Mail Code 6102T) NW., Washington, DC 20460; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal__register/code__of__federal__regulations/ibr__locations.html.*

(c) *EPA approved regulations.*

Chapter 52 Permits, Registrations, and Prohibitory Rules				
401 KAR 52:001	Definitions for 401 KAR Chapter 52	11/18/06	9/13/07, 72 FR 52282	
401 KAR 52:020	Title V permits	1/15/01	1/28/16, 81 FR 4896	Only adding the first sentence of Section 22 entitled ''*Annual Emissions Certification*'', and introductory paragraph text and subsection (4) of Section 23 entitled ''*Certification by Responsible Official*''.
401 KAR 52:030	Federally enforceable permits for non-major sources.	01/15/01	09/06/06, 71 FR 52464	

TABLE 1—EPA-APPROVED KENTUCKY REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanation
** 401 KAR 52:040.	State-origin permits	1/15/01	1/28/16, 81 FR 4896	Only adding subsection (2) introductory text, subsection (2)(c), and subsection (3) of Section 3 entitled ''*General Provisions*''; subsection (1) of Section 20 entitled ''*Annual Emissions Certification for Specified Sources*''; and introductory text and subsection (4) of Section 21 entitled ''*Certification by Responsible Official*''.
401 KAR 52:070	Registration of designated sources	1/15/01	1/28/16, 81 FR 4896	Only adding subsection (2) introductory text, subsection (2)(a)(1), and first sentence of subsection (2)(a)(2) of Section 3 entitled ''*General Provisions*''.
401 KAR 52:090	Prohibitory rule for hot mix asphalt plants	01/15/01	09/06/06, 71 FR 52464	
401 KAR 52:100	Public, affected state, and U.S. EPA review	01/15/01	09/06/06, 71 FR 52464	
	Chapter 53 Ambient Air Quality			
401 KAR 53:005	General provisions	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 53:010	Ambient air quality standards	7/19/2016	9/12/2017, 82 FR 42748.	
	Chapter 55 Emergency Episodes			
401 KAR 55:005	Significant harm criteria	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 55:010	Episode criteria	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 55:015	Episode declaration	06/06/79	01/25/80, 45 FR 6092.	
401 KAR 55:020	Abatement strategies	06/06/79	01/25/80, 45 FR 6092.	
	Chapter 59 New Source Standards			
401 KAR 59:001	Definitions for abbreviations of terms used in the Title 401, Chapter 59.	11/18/06	9/13/07, 72 FR 52282	
401 KAR 59:005	General provisions	12/01/82	12/04/86, 51 FR 43742.	
401 KAR 59:010	New process operations	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 59:015	New indirect heat exchangers	01/07/81	03/22/83, 48 FR 11945.	
401 KAR 59:020	New incinerators	06/06/79	07/12/82, 47 FR 30059.	
401 KAR 59:046	Selected new petroleum refining processes and equipment.	06/29/79	08/07/81, 46 FR 40188.	
401 KAR 59:050	New storage vessels for petroleum liquids	02/04/81	03/30/83, 48 FR 13168.	
401 KAR 59:080	New kraft (sulfate) pulp mills	06/06/79	01/25/80, 45 FR 6092.	
401 KAR 59:085	New sulfite pulp mills	06/06/79	07/12/82, 47 FR 30059.	
401 KAR 59:090	New ethylene producing plants	06/06/79	07/12/82, 47 FR 30059.	
401 KAR 59:095	New oil-effluent water separators	06/29/79	08/07/81, 46 FR 40188.	
401 KAR 59:101	New bulk gasoline plants	09/28/94	06/28/96, 61 FR 33674.	
401 KAR 59:105	New process gas steams	04/07/82	03/22/83, 48 FR 11945.	
401 KAR 59:174	Stage II controls at gasoline dispensing facilities	5/3/2016	10/14/2016, 81 FR 70966	
401 KAR 59:175	New service stations	02/08/93	06/23/94, 59 FR 32343.	
401 KAR 59:185	New solvent metal cleaning equipment	01/04/05	10/04/05, 70 FR 57750.	

TABLE 1—EPA-APPROVED KENTUCKY REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanation
401 KAR 59:190	New insulation of magnet wire operations	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:210	New fabric, vinyl and paper surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:212	New graphic arts facilities using rotogravure and flexography.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:214	New factory surface coating operations of flat wood paneling.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:225	New miscellaneous metal parts and products surface coating operation.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:230	New synthesized pharmaceutical product manufacturing operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:235	New pneumatic rubber tire manufacturing plants	02/04/81	03/30/83, 48 FR 13168.	
401 KAR 59:240	New perchloroethylene dry cleaning systems	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:315	Specific new sources	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 59:760	Commercial Motor Vehicle and Mobile Equipment Refinishing Operations.	03/11/05	10/04/05, 70 FR 57750	
	Chapter 61 Existing Source Standards			
401 KAR 61:001	Definitions and abbreviations of terms used in the Title 401, Chapter 61.	11/18/06		
401 KAR 61:005	General provisions	12/01/82	05/04/89, 54 FR 19169.	
401 KAR 61:010	Existing incinerators	06/06/79	05/04/89, 54 FR 19169.	
401 KAR 61:015	Existing indirect heat exchangers	06/01/83	04/02/96, 61 FR 14489.	
401 KAR 61:020	Existing process operations	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 61:025	Existing kraft (sulfate) pulp mills	06/06/79	05/26/82, 47 FR 22955	
401 KAR 61:030	Existing sulfuric acid plants	06/06/79	03/22/83, 48 FR 11945.	
401 KAR 61:035	Existing process gas streams	04/07/82	03/22/83, 48 FR 11945.	
401 KAR 61:040	Existing ethylene producing plants	06/06/79	01/25/80, 45 FR 6092.	
401 KAR 61:045	Existing oil-effluent water separators	06/29/79	08/07/81, 46 FR 40188.	
401 KAR 61:050	Existing storage vessels for petroleum liquids	06/24/92	06/23/94, 59 FR 32345.	
401 KAR 61:055	Existing loading facilities at bulk gasoline terminals.	08/24/82	03/30/83, 48 FR 13168.	
401 KAR 61:056	Existing bulk gasoline plants	09/28/94	06/28/96, 61 FR 33674.	
401 KAR 61:060	Existing sources using organic solvents	06/29/79	01/25/80, 45 FR 6092.	
401 KAR 61:065	Existing nitric acid plants	06/06/79	07/12/82, 47 FR 30059.	
401 KAR 61:070	Existing ferroalloy production facilities	06/06/79	05/03/84, 49 FR 18833.	
401 KAR 61:075	Steel plants and foundries using existing electric arc furnaces.	12/01/82	05/04/89, 54 FR 19169.	
401 KAR 61:080	Steel plants using existing basic oxygen process furnaces.	04/01/84	05/04/89, 54 FR 19169.	
401 KAR 61:085	Existing service stations	02/08/93	06/23/94, 59 FR 32343.	
401 KAR 61:090	Existing automobile and light-duty truck surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:095	Existing solvent metal cleaning equipment	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:100	Existing insulation of magnet wire operations	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:105	Existing metal furniture surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:110	Existing large appliance surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:120	Existing fabric, vinyl and paper surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:122	Existing graphic arts facilities using rotogravure and flexography.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:124	Existing factory surface coating operations of flat wood paneling.	06/24/92	06/23/94 59 FR 32343.	
401 KAR 61:125	Existing can surface coating operations	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:130	Existing coil surface coating operations	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:132	Existing miscellaneous metal parts and products surface coating operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:135	Selected existing petroleum refining processes and equipment.	06/29/79	01/25/80, 45 FR 6092.	
401 KAR 61:137	Leaks from existing petroleum refinery equipment.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:140	Existing by-product coke manufacturing plants	09/04/86	05/04/89, 54 FR 19169.	
401 KAR 61:145	Existing petroleum refineries	01/07/81	03/22/83, 48 FR 11945.	
401 KAR 61:150	Existing synthesized pharmaceutical product manufacturing operations.	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:155	Existing pneumatic rubber tire manufacturing plants.	06/24/92	06/23/94, 59 FR 32343.	

TABLE 1—EPA-APPROVED KENTUCKY REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanation
401 KAR 61:160	Existing perchloroethylene dry cleaning systems	06/24/92	06/23/94, 59 FR 32343.	
401 KAR 61:165	Existing primary aluminum reduction plants	06/04/85	12/02/86, 51 FR 43395.	
401 KAR 61:170	Existing blast furnace casthouses	04/14/88	02/07/90, 55 FR 4169.	
401 KAR 61:175	Leaks from existing synthetic organic chemical and polymer manufacturing equipment.	06/24/92	06/23/94, 59 FR 32343.	
Chapter 63 General Standards of Performance				
401 KAR 63:001	Definitions and abbreviations of terms used in 401 KAR Chapter 63.	11/18/06	9/13/07, 72 FR 52282	
401 KAR 63:005	Open burning	07/13/05	10/17/07, 72 FR 58759.	
401 KAR 63:010	Fugitive emissions	06/06/79	07/12/82, 47 FR 30059.	
401 KAR 63:015	Flares	06/06/79	12/24/80, 45 FR 84999.

7.22	Standard of Performance for New Volatile Organic Materials Loading Facilities.	10/23/01	66 FR 53662	03/17/93	
7.25	Standard of Performance for New Sources Using Volatile Organic Compounds.	10/23/01	66 FR 53662	03/17/93	
7.34	Standard of Performance for New Sulfite Pulp Mills.	10/23/01	66 FR 53662	06/13/79	
7.35	Standard of Performance for New Ethylene Producing Plants.	10/23/01	66 FR 53662	06/13/79	
7.36	Standards of Performance for New Volatile Organic Compound Water Separators.	7/11/2019	84 FR 33004	1/17/18	

TABLE 2—EPA-APPROVED JEFFERSON COUNTY REGULATIONS FOR KENTUCKY—Continued

Reg	Title/subject	EPA approval date	Federal Register notice	District effective date	Explanation
7.51	Standard of Performance for New Liquid Waste Incinerators.	10/23/01	66 FR 53662	01/20/88	
7.52	Standard of Performance for New Fabric, Vinyl, and Paper Surface Coating Operations.	10/23/01	66 FR 53662	05/15/91	
7.55	Standard of Performance for New Insulation of Magnet Wire.	10/23/01	66 FR 53662	03/17/93	
7.56	Standard of Performance for Leaks from New Petroleum Refinery Equipment.	10/23/01	66 FR 53662	05/15/91	
7.58	Standard of Performance for New Factory Surface Coating Operations of Flat Wood Paneling.	10/23/01	66 FR 53662	05/15/91	
7.59	Standards of Performance for New Miscellaneous Metal Parts and Products Surface Coating Operations.	8/12/2019	84 FR 39756	1/17/2018	
7.60	Standard of Performance for New Synthesized Pharmaceutical Product Manufacturing Operations.	10/23/01	66 FR 53662	05/15/91	
7.77	Standards of Performance for New Blast Furnace Casthouses.	10/23/01	66 FR 53662	10/20/93	
7.79	Standards of Performance for New Commercial Motor Vehicles and Mobile Equipment Refinishing Operations.	10/23/01	66 FR 53690	02/02/94	
7.81	Standard of Performance for New or Modified Bakery Oven Operations.	10/23/01	66 FR 53662	05/17/00	
Reg 8—Mobile Source Emissions Control					

(d) *EPA-approved source specific requirements.*

EPA-APPROVED KENTUCKY SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit No.	State effective date	EPA approval date	Explanations
Bubble action at Kentucky Utilities Green River Plant.	N/A	12/01/80	06/15/81, 46 FR 31260.	
Bubble action at Corning Glassworks.	N/A	05/18/81	10/29/81, 46 FR 53408.	
Bubble action at National Distillers Company's, Old Crow Plant.	N/A	12/24/80	09/14/81, 46 FR 45610.	
Bubble action at Borden Chemical CO in Jefferson CO..	N/A	03/05/82	05/11/82, 47 FR 20125.	
Variance for seven perchloroethylene dry cleaners.	N/A	08/04/82	05/02/83, 48 FR 19176.	
Variance for two dry cleaners ...	N/A	01/27/83	05/05/83, 48 FR 20233.	

EPA-APPROVED KENTUCKY SOURCE-SPECIFIC REQUIREMENTS—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanations
Variance for Jiffy and Hiland Dry Cleaners.	N/A	04/25/84	04/18/85, 50 FR 15421.	
TVA Paradise Permit	KDEPDAQ Permit 0–87–012 ..	6/29/87	08/25/89, 54 FR 35326	WITHDRAWN
Opacity variance for boiler Units 1 and 2 of TVA's Paradise Steam Plant.	KDEPDAQ Permit 0–86–75	07/24/96	08/17/88, 53 FR 30998.	
Operating Permits for nine presses at the Alcan Foil Products facility—Louisville.	APCDJC Permits 103–74, 104–74, 105–74, 103–74, 110–74, 111–74.	02/28/90	05/16/90, 55 FR 20269.	
Operating Permit requiring VOC RACT for Calgon CO.	KDEPDAQ Permit 0–94–020 ..	11/17/94	05/24/95, 60 FR 27411.	
Reynolds Metals Company	APCDJC Permits 103–74, 104–74, 016–74, 110–74, 111–74.	04/16/97	01/13/98, 63 FR 1929.	
Alternative Averaging Period for American Greetings Corporation.	KDEPDAQ Permit V–98–049 ..	07/07/99	05/09/01, 66 FR 23617.	
Title V permit requiring VOC RACT for Publisher's Printing, Inc., Bullitt County.	KDEPDAQ Permit 21–029–00019.	07/20/01	10/23/01, 66 FR 53664.	
Board Order American Synthetic Rubber Company.	NO_X RACT Plan 12/20/00	01/01/01	10/23/01, 66 FR 53684.	
Board Order E.I. du Pont de Nemours & Company.	NO_X RACT Plan 02/21/01	03/01/01	10/23/01, 66 FR 53684.	
Board Order Ford Louisville Assembly Plant.	NO_X RACT Plan 11/08/99	01/01/00	10/23/01, 66 FR 53684.	
Board Order General Electric Company.	NO_X RACT Plan 01/17/01	03/01/01	10/23/01, 66 FR 53684.	
Board Order Kosmos Cement Company.	NO_X RACT Plan 05/03/04	05/03/04	05/18/05, 70 FR 28429.	
Board Order Louisville Gas and Electric Company, Cane Run Generating Station.	NO_X RACT Plan 10/18/00	01/01/01	10/23/01, 66 FR 53684.	
Board Order Louisville Gas and Electric Company, Mill Creek Generating Station.	NO_X RACT Plan 10/18/00	01/01/01	10/23/01, 66 FR 53684.	
Board Order Louisville Medical Center Steam Plant.	NO_X RACT Plan 1/18/2017	1/18/2017	10/12/2017, 82 FR 47376	
Board Order Oxy Vinyls, LP	NO_X RACT Plan 12/20/00	01/01/01	10/23/01, 66 FR 53685.	
Board Order Rohm and Haas Company.	NO_X RACT Plan 12/20/00	01/01/01	10/23/01, 66 FR 53685.	
Board Order Texas Gas Transmission.	NO_X RACT Plan 5/18/2016	5/18/2016	10/12/2017, 82 FR 47376	
Lawson Mardon Packaging, USA, Inc..	N/A	08/11/03	07/10/03, 68 FR 41084.	
Calgon Carbon Corporation	V–00–015	05/13/05	05/24/06, 71 FR 29786	The only parts of the permit being approved and incorporated are the SO_2 emission limits from the following emissions points: 12, 14, 21, 31, 34, 32, 40, 39, 42, and 64.
TVA Paradise Permit	KDEPDAQ Permit 0–87–012 ..	10/19/07	4/29/08, 73 FR 23105	Emission Rates Units 1 and 2 are 1.2 lb/MMBTU and Unit 3 is 1.2 lb/MMBTU or *3.1 lb/MMBTU.

EPA-APPROVED KENTUCKY SOURCE-SPECIFIC REQUIREMENTS—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanations
Source-Specific SIP Revision for Avis Budget Car Rental Group.	N/A	8/9/07	11/30/09, 74 FR 62499	Removal of stage II requirements
LG & E Cane Run Generating Station NO_X RACT Plan Amendment 2.	N/A	7/18/2012	8/30/2016, 81 FR 59488	
Louisville Gas and Electric Mill Creek Electric Generating Station.	145–97–TV(R3)	6/23/2017	6/28/2019, 84 FR 30920	Plant-wide Specific condition S1-Standards, S2-Monitoring and Record Keeping and S3-Reporting in title V permit 145–97–TV(R3) for EGU U1, U2, U3 and U4.

*Bypass of the scrubber shall be limited to 720 operating hours in any 12 consecutive months.

(e) *EPA-approved non-regulatory provisions.*

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
Air Quality surveillance plan	Commonwealth of Kentucky.	11/15/79	11/16/81, 46 FR 56198.	
Protection Visibility in Class I Areas.	Mammoth Cave National Park (Class I area).	08/31/97	07/12/88, 53 FR 26253.	
Small Business Assistance Program.	Commonwealth of Kentucky.	07/15/93	06/19/95, 60 FR 31915.	
Lexington Maintenance Plan	Fayette County, Scott County.	08/24/04	09/16/04, 69 FR 55751.	
Ashland-Huntington Maintenance Plan.	Boyd County, Greenup County.	05/24/95	06/29/95, 60 FR 33752.	
Maintenance Plan for Owensboro & Edmonson County Area.	Daviess County, Hancock County, Edmonson County.	04/14/98	09/03/98, 63 FR 46898.	
Northern Kentucky 15% Plan & I/M.	Boone, Campbell and Kenton Counties.	09/11/98	12/08/98, 63 FR 67591.	
Negative Declarations for the nonattainment portions of Bullitt and Oldham Counties in Louisville 1-hour moderate ozone nonattainment area for CTG rules for aerospace, SOCMI, shipbuilding, and wood furniture manufacturing.	Jefferson County, Bullitt County, Oldham County.	12/14/99	10/23/01, 66 FR 53665.	
Negative Declarations submitted by the Air Pollution Control District of Jefferson County for the Louisville 1-hour moderate ozone nonattainment area for CTG rules for aerospace, shipbuilding, and wood furniture manufacturing.	Jefferson County, Bullitt County, Oldham County.	02/26/01	10/23/01, 66 FR 53665.	
Louisville 1-Hour Ozone Maintenance Plan.	Jefferson County and portions of Bullitt and Oldham Counties.	11/1/03	05/18/05, 70 FR 28429.	
Maintenance Plan for Paducah Area.	Marshall County and a portion of Livingston County.	06/14/01	08/20/01, 66 FR 43488.	

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS—Continued

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
Northern Kentucky 1-Hour Ozone Maintenance Plan.	Boone, Campbell, and Kenton Counties.	02/09/05	10/04/05, 70 FR 57750	
8-Hour Ozone Maintenance Plan for the Christian County, Kentucky area.	Christian County	05/20/05	01/25/06, 71 FR 4047	
Kentucky portion of the Ashland-Huntington Sulfur Dioxide Maintenance Plan.	Boyd County	05/13/05	05/24/06, 71 FR 29786	
Louisville 8-hour Ozone Maintenance Plan.	Bullitt County, Jefferson County, Oldham County.	09/26/2006	07/05/07, 72 FR 36601	
Huntington-Ashland 8-hour Ozone Maintenance Plan.	Boyd County	09/29/06	08/03/07, 71 FR 43172	
Northern Kentucky 8-Hour Ozone Maintenance plan.	Boone, Campbell and Kenton Counties in Kentucky.	1/29/2010	8/5/2010, 75 FR 47218	For the 1997 8-hour ozone NAAQS.
Paducah 8-Hour Ozone Attainment/1-Hour Ozone Maintenance Plan Section 110(a)(1).	Marshall and Livingston Counties.	May 27, 2008	8/26/2010, 75 FR 52467	
Huntington—Ashland 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	A portion of Greenup County.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Lexington 8-Hour Ozone Section 110(a)(1) Maintenance Plan Section 110(a)(1).	Fayette and Scott Counties.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Edmonson County 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	Edmonson County	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
Owensboro 8-Hour Ozone Section 110(a)(1) Maintenance Plan.	Daviess County and a portion of Hancock County.	May 27, 2008	4/14/11, 76 FR 20853	For the 1997 8-hour ozone NAAQS.
110(a)(1) and (2) Infrastructure Requirements for the 1997 8-Hour Ozone National Ambient Air Quality Standards.	Commonwealth of Kentucky.	12/13/2007	7/13/2011, 76 FR 41088	For the 1997 8-hour ozone NAAQS.
1997 Annual $PM_{2.5}$ Maintenance Plan for the Northern Kentucky Area.	Boone, Campbell and Kenton Counties (Kentucky portion of the Cincinnati-Hamilton OH-KY-IN Area).	1/27/11	12/15/2011, 76 FR 77903	For the 1997 Annual $PM_{2.5}$ NAAQS.
Huntington-Ashland 1997 $PM_{2.5}$ Attainment Plan.	Boyd County; Portion of Lawrence County.	12/03/2008	4/11/2012, 77 FR 21663	For the 1997 $PM_{2.5}$ NAAQS.
Regional Haze Plan and Plan Amendment.	Statewide	06/25/08 and 05/28/10	03/30/12, 77 FR 19098	Source-specific BART requirements are summarized in Table 7.5.3–2 of the Commonwealth's May 28, 2010 submittal.
Louisville; 1997 Annual Fine Particulate Matter 2002 Base Year Emissions Inventory.	Bullitt and Jefferson Counties.	12/03/2008	8/2/12, 77 FR 45956.	
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	8/26/2008	10/3/2012, 77 FR 60307	With the exception of section 110(a)(2)(D)(i), With respect to sections 110(a)(2)(C) related to PSD requirements and 110(a)(2)(J) related to PSD requirements, EPA conditionally approved these requirements.

EPA—APPROVED KENTUCKY NON-REGULATORY PROVISIONS—Continued

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/ effective date	EPA approval date	Explanations
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	7/17/2012	10/3/2012, 77 FR 60307	With the exception of section 110(a)(2)(D)(i), With respect to sections 110(a)(2)(C) related to PSD requirements and 110(a)(2)(J) related to PSD requirements, EPA conditionally approved these requirements.
1997 Annual $PM_{2.5}$ Maintenance Plan for the Kentucky portion of the Huntington-Ashland Area.	Boyd County and Lawrence County (part) (Kentucky portion of the Huntington-Ashland WV–KY–OH Area).	2/9/12	12/26/12, 77 FR 75865	For the 1997 Annual $PM_{2.5}$ NAAQS.
110(a)(1) and (2) Infrastructure Requirements for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	Commonwealth of Kentucky.	7/17/2012	3/7/2013 78 FR 14681	With the exception of section 110(a)(2)(D)(i)(I) concerning interstate transport which is being disapproved and, the portions of sections 110(a)(2)(C), prong 3 of 110(a)(2)(D)(i), and 110(a)(2)(J) related to structural PSD requirements, which are being conditionally approved.
MVEB Update for the 1997 8-hour Ozone Maintenance Plan for Northern Kentucky.	Boone, Campbell, and Kenton Counties, KY.	8/9/12	6/5/13, 78 FR 33726	
110(a)(1) and (2) Infrastructure Requirements for 1997 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	8/26/2008	5/7/2014, 79 FR 26143	Addressing prong 4 of section 110(a)(2)(D)(i) only.
110(a)(1) and (2) Infrastructure Requirements for 2006 Fine Particulate Matter National Ambient Air Quality Standards.	Kentucky	7/17/2012	5/7/2014, 79 FR 26143	Addressing prong 4 of section 110(a)(2)(D)(i) only.
110(a)(1) and (2) Infrastructure Requirements for the 2008 Lead NAAQS.	Kentucky	7/17/2012	3/18/2015, 80 FR 14019	Addressing the PSD permitting requirements of sections 110(a)(2)(C), 110(a)(2)(D)(i)(II) (prong 3) and 110(a)(2)(J) only

[64 FR 28750, May 27, 1999]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.920, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov*.

§ 52.921 Classification of regions.

The Kentucky plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Photochemical oxidants (hydrocarbons)
Appalachian Intrastate	II	III	III	III	III
Bluegrass Intrastate	II	III	III	III	III
Evansville (Indiana)-Owensboro-Henderson (Kentucky) Interstate	I	II	III	III	III
Huntington (West Virginia)-Ashland (Kentucky)-Portsmouth-Ironton (Ohio) Interstate	I	III	III	III	III
Louisville Interstate	I	I	III	III	I
Metropolitan Cincinnati Interstate	I	II	III	III	I
North Central Kentucky Intrastate	II	III	III	III	III
Paducah (Kentucky)-Cairo (Illinois) Interstate	I	II	III	III	III
South Central Kentucky Intrastate	III	III	III	III	III

[37 FR 10868, May 31, 1972, as amended at 39 FR 16346, May 8, 1974]

§ 52.922 [Reserved]

§ 52.923 Approval status.

(a) With the exceptions set forth in this subpart, the Administrator approves Kentucky's plan for the attainment and maintenance of the national standards under section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of part D, title 1, of the Clean Air Act as amended in 1977.

(b) New Source review permits issued pursuant to Section 173 of the Clean Air Act will not be deemed valid by EPA unless the provisions of Section V of Appendix S of 40 CFR part 51 are met.

[45 FR 72157, Oct. 31, 1980, as amended at 79 FR 30050, May 27, 2014]

§ 52.924 Legal authority.

(a) The requirements of § 51.230(f) of this chapter are not met since K.R.S. 224.380 of the Air Pollution Control Law of the Commonwealth of Kentucky (June 18, 1970) does not provide for the release, under certain circumstances, of emission data to the public.

(b) Delegation of Authority: Pursuant to section 114 of the Act, Kentucky requested a delegation of authority to enable it to collect, correlate, and release emission data to the public. The Administrator has determined that Kentucky is qualified to receive a delegation of the authority it requested. Accordingly, the Administrator delegates to Kentucky his authority under section 114(a) (1) and (2) and section 114(c) of the Act, i.e., authority to collect, correlate, and release emission data to the public.

[37 FR 10868, May 31, 1972, as amended at 37 FR 15084, July 27, 1972; 51 FR 40676, Nov. 7, 1986]

§ 52.925 General requirements.

(a) The requirements of § 51.116(c) of this chapter are not met since the legal authority to provide for public availability of emission data is inadequate.

[39 FR 34536, Sept. 26, 1974, as amended at 51 FR 40676, Nov. 7, 1986]

§ 52.926 Attainment dates for national standards.

The following table presents the latest dates by which the national standards are to be attained. The dates reflect the information presented in Kentucky's plan, except where noted.

Air quality control region	Pollutant						
	Particulate matter		Sulfur oxides		Nitrogen dioxide	Carbon monoxide	Ozone
	Primary	Secondary	Primary	Secondary			
Appalachian Intrastate:							
a. Bell County	g	h	b	b	b	b	b

See § 81.318 of this chapter to identify the specific nonattainment area.

NOTE: Dates or footnotes in italics are prescribed by the Administrator because the plan did not provide a specific date or the dates provided were not acceptable. Sources subject to plan requirements and attainment dates established under section 110(a)(2)(A) prior to the 1977 Clean Air Act Amendments remain obligated to comply with those requirements by the earlier deadlines. The earlier attainment dates are set out at 40 CFR 52.926 (1979 edition).

a. Air quality levels presently below primary standards or area is unclassifiable.
b. Air quality levels presently below secondary standards or area is unclassifiable.
c. April 1975.
d. July 1975.
e. July 1977.
f. July 1978.
g. December 31, 1982.
h. December 31, 1987.
i. 18 month extension for plan submittal granted: attainment date not yet established.
j. January 1, 1985.

[45 FR 85002, Dec. 24, 1980]

§ 52.927 Compliance schedule.

(a) The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012.

(b) [Reserved]

[79 FR 30050, May 27, 2014]

§ 52.928 Control strategy: Sulfur oxides.

The revised SO_2 emission limit for large coal-fired boilers in Bell, Clark, and Woodford Counties, submitted on June 29, 1979, is disapproved since it does not provide for attainment and maintenance of all SO_2 NAAQS. The limit approved by EPA on May 10, 1976 (41 FR 19105), remains the limit applicable to these sources.

[49 FR 11091, Mar. 23, 1984]

§ 52.929 Determination of attainment.

(a) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Huntington-Ashland, West Virginia-Kentucky-Ohio $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Huntington-Ashland $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(b) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Louisville, Kentucky-Indiana $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Louisville $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

(c) Based upon EPA's review of the air quality data for the 3-year period 2007–2009, EPA determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana $PM_{2.5}$ nonattainment Area attained the 1997 annual $PM_{2.5}$ NAAQS by the applicable attainment date of April 5, 2010. Therefore, EPA has met the requirement pursuant to CAA section 179(c) to determine, based on the Area's air quality as of the attainment date, whether the Area attained the standard. EPA also determined that the Cincinnati-Hamilton, Ohio, Kentucky, and Indiana $PM_{2.5}$ nonattainment Area is not subject to the consequences of failing to attain pursuant to section 179(d).

[76 FR 55543, Sept. 7, 2011, as amended at 76 FR 55546, Sept. 7, 2011; 76 FR 60375, Sept. 29, 2011]

§ 52.930 Control strategy: Ozone.

(a) The VOC bubble for Alcan Foil Products in Louisville submitted as a SIP revision on March 3, 1986, is disapproved. The source must continue to meet all the requirements of Jefferson County Regulation 6.29.

(b) *Part D—disapproval*—(1) Campbell and Kenton Counties nonattainment area. The 1979 SIP revisions for these two counties are disapproved because the Commonwealth failed to submit evidence of legal authority to implement a vehicle inspection and maintenance program as required under section 172(b)(11)(B) of the Clean Air Act. No major new or modified sources of volatile organic compounds can be built in these two counties by virtue of the provisions of section 110(a)(2)(I) of the Clean Air Act.

(2) Northern Kentucky (Boone, Campbell and Kenton Counties) ozone nonattainment area. The demonstration of attainment of the ozone standards by the end of 1982, submitted as part of Kentucky's ozone SIP revision on June 23, 1982, (draft), September 27, 1982, and November 3, 1982, is disapproved. As a result, the extension of the attainment deadline until December 31, 1987, remains in effect, along with the related requirement to submit a SIP revision addressing all requirements of Part D extension areas.

(c) The redesignation request submitted by the Commonwealth of Kentucky, on November 11, 1994, for the Kentucky portion of the Cincinnati-Northern Kentucky moderate interstate ozone nonattainment area from nonattainment to attainment was disapproved on September 27, 1996.

(d) Kentucky's November 15, 1996, request for a 1-year attainment date extension for the Kentucky portion of the Cincinnati-Hamilton metropolitan moderate ozone nonattainment area which consists of Kenton, Boone, and Campbell Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1997.

(e) Kentucky's November 15, 1996, request for a 1-year attainment date extension for the Kentucky portion of the Louisville moderate ozone nonattainment area which consists of Jefferson County and parts of Bullitt and Oldham Counties is approved. The date

for attaining the ozone standard in these counties is November 15, 1997.

(f) Kentucky's January 7, 1998, request for a 1-year attainment date extension for the Kentucky portion of the Cincinnati-Hamilton metropolitan moderate ozone nonattainment area which consists of Kenton, Boone, and Campbell Counties is approved. The date for attaining the ozone standard in these counties is November 15, 1998.

(g) The redesignation request submitted by the Commonwealth of Kentucky, on October 29, 1999, for the Kentucky portion of the Cincinnati-Hamilton moderate interstate ozone nonattainment area from nonattainment to attainment was approved on July 5, 2000. The mobile source budgets for the Kentucky portion of the area for the purposes of transportation conformity are now 5.83 tons per summer day of volatile organic compounds and 15.13 tons per summer day of nitrogen oxides for the year 2010.

(h) Determination—EPA is determining that as of July 5, 2000, the Kentucky portion of the Cincinnati-Hamilton ozone nonattainment area (which includes the Counties of Boone, Kenton, and Campbell) has attained the 1-hour ozone standard and that the attainment demonstration requirements of section 182(b)(1), 182(j), and 172(c)(1), along with the section 172(c)(9) contingency measure requirements, do not apply to the area.

(i) Approval—EPA is approving an exemption from the requirements contained in section 182(f) of the Clean Air Act. This approval exempts Boone, Kenton, and Campbell counties in Kentucky from the NO_X related general conformity provisions; nonattainment NSR for new sources and modifications that are major for NO_X; NO_X RACT; and the requirement for a demonstration of compliance with the enhanced I/M performance standard for NO_X.

(j) [Reserved]

(k) The redesignation request submitted by the Commonwealth of Kentucky, on March 30, 2001, and supplemented on July 9, 2001, for the Kentucky portion of the Louisville moderate interstate ozone nonattainment area from nonattainment to attainment was approved on October 23, 2001. The motor vehicle emissions budgets for VOC and NO_X in the Kentucky portion of the Louisville moderate interstate maintenance plan are adequate for conformity purposes and approvable as part of the maintenance plan. The 1-hour ozone standard maintenance plan motor vehicle emission budgets for the entire interstate Louisville area for the purposes of transportation conformity are now 48.17 tons per summer day of VOC and 92.93 tons per summer day of NO_X for the year 2012.

(l) *Disapproval.* EPA is disapproving in part, the Commonwealth of Kentucky's Infrastructure SIP for the 2008 8-hour Ozone National Ambient Air Quality Standards addressing section 110(a)(2)(D)(i)(I) concerning interstate transport requirements, submitted July 17, 2012.

(m) *Determination of attainment.* The EPA has determined, as of June 3, 2016, that based on 2012 to 2014 ambient air quality data, the Cincinnati, OH-KY-IN 2008 ozone Marginal nonattainment area has attained the 2008 ozone NAAQS. Therefore, the EPA has met the requirement pursuant to CAA section 181(b)(2)(A) to determine, based on the area's air quality data as of the attainment date, whether the area attained the standard. The EPA also determined that the Cincinnati, OH-KY-IN nonattainment area will not be reclassified for failure to attain by its applicable attainment date under section 181(b)(2)(A).

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 52.930, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

§ 52.931 Significant deterioration of air quality.

(a) Regulations for preventing significant deterioration of air quality. The provisions of § 52.21 (b) through (w) are hereby incorporated and made a part of the applicable state plan for the State of Kentucky only as they apply to permits issued pursuant to § 52.21 prior to final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source

Review in Attainment Areas. The provisions of § 52.21 (b) through (w) are rescinded for permits issued after final approval of Kentucky's Regulation for Prevention of Significant Deterioration (PSD), Visibility Monitoring, and Visibility New Source Review in Attainment Areas.

(b) The Commonwealth of Kentucky has committed to revising the state's regulations accordingly when EPA amends the federal vessel emissions provisions contained in 40 CFR 51.166. In a letter dated October 17, 1986, Kentucky stated:

> As requested, the Division of Air Pollution Control hereby commits to changing the definition of ''building, structure, facility, or installation,'' and any other applicable definitions, when the issue of vessel emissions is resolved at the federal level, and after the federal regulation, 40 CFR 51.24, is amended.

(c) In a letter dated May 3, 1988, EPA informed Kentucky that the following caveat must be included in all potentially affected permits due to a decision of the U.S. Court of Appeals for the District of Columbia Circuit (*NRDC* v. *Thomas*, 838 F.2d 1224):

> In approving this permit, the Kentucky Division for Air Quality has determined that the application complies with the applicable provisions of the stack height regulations as revised by the EPA on July 8, 1985 (50 FR 27892). Portions of the regulations have been remanded by a panel of the U.S. Court of Appeals for the D.C. Circuit in NRDC v. *Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). Consequently, this permit may be subject to modification if and when the EPA revises the regulation in response to the court decision. This may result in revised emission limitations or may affect other actions taken by the source owners or operators.

Kentucky responded with a letter dated May 11, 1988, stating in part:

> This is in response to your letter dated May 3, 1988 * * *. As requested by your letter, the Kentucky Division for Air Quality agrees to include the condition set forth in your letter, in all potentially affected permits issued under regulation 401 KAR 51:017 or 401 KAR 51:052. Therefore, we request that you consider this letter as our commitment that the required caveat will be included in all potentially affected permits * * *.

(d) All applications and other information required pursuant to § 52.21 from sources located in the Commonwealth of Kentucky shall be submitted to the appropriate state or local agency for which the source is located, rather than to EPA's Region 4 office: Kentucky Department for Environmental Protection, Division for Air Quality, 300 Sower Boulevard, 2nd Floor, Frankfort, Kentucky 40601; or Louisville Metro Air Pollution Control District, 701 W. Ormsby Ave., Suite 303, Louisville, Kentucky 40203.

[54 FR 36311, Sept. 1, 1989, as amended at 74 FR 55143, Oct. 27, 2009; 79 FR 30050, May 27, 2014; 82 FR 32645, July 17, 2017]

§ 52.932 Rules and regulations.

(a) The last sentence of section 3(1) of Kentucky regulation 401 KAR 3:050, which specifies that a new fossil fuel fired steam electric generator's allowable SO_2 emissions may be calculated by averaging SO_2 emissions from existing units of this type and from new ones, is disapproved since it contravenes subpart D of 40 CFR part 60, New Source Performance Standards.

(b) Section 8(2)(a) of regulation 401 KAR 61:015 is disapproved in that it allows the Tennessee Valley Authority's Shawnee power plant until October 1, 1981, to achieve compliance with emissions limits which are not made more stringent by the 1979 Part D revisions, and which the source was previously required to meet by July 1, 1977.

(c) Section 8(2)(d) of regulation 401 KAR 61:015 is disapproved in that it allows sources until December 31, 1982, to achieve compliance with emission limits which are not made more stringent by the 1979 Part D revisions, and which the sources were previously required to meet prior to 1979.

[41 FR 19106, May 10, 1976, as amended at 46 FR 40188, Aug. 7, 1981]

§ 52.933 Control Strategy: Sulfur oxides and particulate matter.

(a) In a letter dated March 27, 1987, the Kentucky Department for Natural Resources and Environmental Protection certified that no emission limits in the State's plan are based on dispersion techniques not permitted by EPA's stack height rules. This certification does not apply to: Big Rivers-Green #1 & 2, Kentucky Utilities-Ghent #3 & 4, and Ashland Oil, Inc.-Catlettsburg.

(b) *Determination of Attainment.* EPA has determined, as of March 9, 2011, that the Louisville, IN-KY $PM_{2.5}$ nonattainment area has attained the 1997 $PM_{2.5}$ NAAQS. These determinations, in accordance with 40 CFR 51.1004(c), suspend the requirements for this area to submit an attainment demonstration, associated reasonably available control measures, reasonable further progress, contingency measures, and other plan elements related to attainment of the standards for as long as the area continues to meet the 1997 $PM_{2.5}$ NAAQS.

(c) *Disapproval.* EPA is disapproving portions of Kentucky's Infrastructure SIP for the 2006 24-hour $PM_{2.5}$ NAAQS addressing interstate transport, specifically with respect to section 110(a)(2)(D)(i)(I).

(d) *Determination of Attainment.* EPA has determined, as of September 7, 2011, that based upon 2007–2009 air quality data, the Huntington-Ashland, West Virginia-Kentucky-Ohio, nonattainment Area has attained the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

(e) *Determination of Attainment.* EPA has determined, as of September 29, 2011, that based upon 2007–2009 air quality data, the Cincinnati-Hamilton, Ohio-Kentucky-Indiana nonattainment Area has attained the 1997 annual $PM_{2.5}$ NAAQS. This determination, in accordance with 40 CFR 52.1004(c), suspends the requirements for this Area to submit an attainment demonstration, associated reasonably available control measures, a reasonable further progress plan, contingency measures, and other planning SIPs related to attainment of the standard for as long as this Area continues to meet the 1997 annual $PM_{2.5}$ NAAQS.

[54 FR 23478, June 1, 1989, as amended at 76 FR 12862, Mar. 9, 2011; 76 FR 43143, July 20, 2011; 76 FR 55543, Sept. 7, 2011; 76 FR 60376, Sept. 29, 2011]

§ 52.934 [Reserved]

§ 52.935 PM_{10} State implementation plan development in group II areas.

On July 7, 1988, the State submitted a committal SIP for the cities of Ashland and Catlettsburg in Boyd County. The committal SIP contains all the requirements identified in the July 1, 1987, promulgation of the SIP requirements for PM_{10} at 52 FR 24681. The SIP commits the State to submit an emissions inventory, continue to monitor for PM_{10}, report data and to submit a full SIP if a violation of the PM_{10} National Ambient Air Quality Standards is detected.

[55 FR 4172, Feb. 7, 1990]

§ 52.936 [Reserved]

§ 52.937 Review of new sources and modifications.

(a) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_X) reasonably available control technology (RACT) exemption request submitted by the Kentucky Department for Environmental Protection on August 16, 1994, for the Kentucky portion of the Huntington-Ashland ozone (O_3) moderate nonattainment area. This approval exempts this area from implementing NO_X RACT on major sources of NO_X. If a violation of the O_3 NAAQS occurs in the area, the exemption from the requirement of section 182(f) of the CAA in the applicable area shall not apply.

(b) Approval—EPA is approving the section 182(f) oxides of nitrogen (NO_X) reasonably available control technology (RACT) exemption for the Kentucky portion of the Cincinnati-Hamilton ozone (O_3) moderate nonattainment area. This approval exempts this area from implementing NO_X RACT on major sources of NO_X.

[60 FR 21717, May 3, 1995, as amended at 65 FR 37898, June 19, 2000]

§ 52.938 General conformity.

The General Conformity regulations were submitted on November 10, 1995, and adopted into the Kentucky State Implementation Plan (SIP). The Commonwealth of Kentucky incorporated by reference regulations 40 CFR part

51, subpart W—determining conformity of General Federal Actions to State or Federal Implementation Plans.

[63 FR 40046, July 27, 1998]

§ 52.939 Original identification of plan section.

(a) This section identified the original ''Air Implementation Plan for the State of Kentucky'' and all revisions submitted by Kentucky that were federally approved prior to March 1, 1999. The information in this section is available in the 40 CFR, part 52 edition revised as of July 1, 1999, the 40 CFR, part 52, Volume 1 of 2 (§§ 52.01 to 52.1018) editions revised as of July 1, 2000 through July 1, 2011, and the 40 CFR, part 52, Volume 1 of 3 (§§ 52.01 to 52.1018) editions revised as of July 1, 2012. The Jefferson County portion of the Commonwealth of Kentucky's SIP previously identified in section 52.934(a) and (b) is also available in the above editions.

[79 FR 30051, May 27, 2014]

§ 52.940 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_X Annual Trading Program in subpart AAAAA of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under § 52.38(a), except to the extent the Administrator's approval is partial or conditional.

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, if, at the time of the approval of Kentucky's SIP revision described in paragraph (a)(1) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Annual allowances under subpart AAAAA of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart AAAAA of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Annual allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

(b)(1) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

(3) Notwithstanding the provisions of paragraph (b)(2) of this section, if, at the time of the approval of Kentucky's SIP revision described in paragraph (b)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by

such approval of the State's SIP revision.

[76 FR 48365, Aug. 8, 2011, as amended at 81 FR 74586 and 74596, Oct. 26, 2016; 83 FR 33760, July 17, 2018]

§ 52.941 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of sulfur dioxide?

(a) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR SO_2 Group 1 Trading Program in subpart CCCCC of part 97 of this chapter must comply with such requirements. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan under §52.39, except to the extent the Administrator's approval is partial or conditional.

(b) Notwithstanding the provisions of paragraph (a) of this section, if, at the time of the approval of Kentucky's SIP revision described in paragraph (a) of this section, the Administrator has already started recording any allocations of CSAPR SO_2 Group 1 allowances under subpart CCCCC of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart CCCCC of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR SO_2 Group 1 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[76 FR 48366, Aug. 8, 2011, as amended at 81 FR 74586, Oct. 26, 2016]

(c) *EPA approved regulations.*

Subpart T—Louisiana

§ 52.970 Identification of plan.

(a) *Purpose and scope.* This section sets forth the applicable State Implementation Plan (SIP) for Louisiana under section 110 of the Clean Air Act, 42 U.S.C. 7410, and 40 CFR part 51 to meet national ambient air quality standards.

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c),(d) and (e) of this section with an EPA approval date prior to July 1, 1998, was approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval, and notice of any change in the material will be published in the FEDERAL REGISTER. Entries in paragraphs (c), (d) and (e) of this section with EPA approval dates after July 1, 1998, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 6 certifies that the rules/regulations provided by EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of July 1, 1998.

(3) Copies of the materials incorporated by reference may be inspected at *https://www.epa.gov/sips-la* or the Environmental Protection Agency, Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270–2102. If you wish to obtain material from the EPA Regional Office, please call (800) 887–6063 or (214) 665–2760.

EPA APPROVED LOUISIANA REGULATIONS IN THE LOUISIANA SIP—Continued

State citation	Title/subject	State approval date	EPA approval date	Comments
Subchapter C. Solvent Degreasers				
Section 2125	Solvent Degreasers	1/20/2008	8/29/2017, 82 FR 40949	
Subchapter D. Cutback Paving Asphalt				
Section 2127	Cutback Paving Asphalt	Apr. 1991, LR17:360	5/5/1994, 59 FR 23166	Ref 52.999(c)(60)
Subchapter F. Gasoline Handling				
Section 2131	Filling of Gasoline Storage Vessels.	7/20/2010	8/29/2017, 82 FR 40949	
Section 2132	Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities.	4/20/2011	8/29/2017, 82 FR 40949	This rule is approved for fueling/refueling of only 100% ORVR vehicles.
Subchapter G. Petroleum Refinery Operations				
Section 2139.C	Refinery Vacuum Producing Systems.	5/20/1998	7/5/2011, 76 FR 38977	
Section 2141	Refinery Process Unit Turnarounds.	Jul. 1991, LR17:654	5/5/1994, 59 FR 23166	Ref 52.999(c)(60)
Subchapter H. Graphic Arts				
Section 2143	Graphic Arts (Printing) by Rotogravure and Flexographic Processes. Control Requirements.	6/20/2009	12/2/2011, 76 FR 75467	Revisions to Section 2143 approved in the Louisiana Register June 20, 2009 (LR 35:1101).
Section 2143.A	Graphic Arts (Printing) by Rotogravure and Flexographic Processes. Control Requirements.	4/20/2004	7/5/2011, 76 FR 38977	
Section 2143.A.1	Graphic Arts (Printing) by Rotogravure and Flexographic Processes. Control Requirements.	10/20/1999	7/5/2011, 76 FR 38977	
Section 2143.B	Applicability Exemption ..	4/20/2004	7/5/2011, 76 FR 38977	
Section 2143.C.1.–3	Compliance	12/20/1996	7/5/2011, 76 FR 38977	
Section 2143.E	Timing	4/20/2004	7/5/2011, 76 FR 38977	
Subchapter I. Pharmaceutical Manufacturing Facilities				
Section 2145	Pharmaceutical Manufacturing Facilities.	1/20/2008	8/29/2017, 82 FR 40949	
Subchapter J. Limiting Volatile Organic Compound (VOC) Emissions From Reactor Processes and Distillation Operations in the Synthetic Organic Chemical Manufacturing Industry (SOCMI)				
Section 2147	Limiting VOC Emissions from SOCMI Reactor Processes and Distillation Operations.	1/20/2008	8/29/2017, 82 FR 40949	
Subchapter K. Limiting Volatile Organic Compound Emissions from Batch Processing				
Section 2149.A.1	Applicability	4/20/2004	7/5/2011, 76 FR 38977	
Section 2149.E.2.a.–c.i.	Performance Testing	12/20/1996	7/5/2011, 76 FR 38977	
Subchapter L. Limiting Volatile Organic Compound Emissions from Cleanup Solvent Processing				
Section 2151.A	Limiting Volatile Organic Compound Emissions from Cleanup Solvent Processing.	4/20/2004	7/5/2011, 76 FR 38977

EPA APPROVED LOUISIANA REGULATIONS IN THE LOUISIANA SIP—Continued

State citation	Title/subject	State approval date	EPA approval date	Comments
Section 2199	Appendix A	11/20/1997	7/5/2011, 76 FR 38977	
Chapter 22—Control of Emissions of Nitrogen Oxides (NO_X)				
Section 2201	Affected Facilities in the Baton Rouge Nonattainment Area and the Region of Influence.	1/20/2008	8/29/2017, 82 FR 40949	
Section 2202	Contingency Plan	1/20/2010	11/30/2011, 76 FR 74000	Section 2202 approved in the Louisiana Register January 20, 2010 (LR 36:63).
Chapter 23—Control of Emissions from Specific Industries				
Subchapter A. Chemical Woodpulping Industry				
Section 2301.D. and 2301.D.3.	Control of Emissions from the Chemical Woodpulping Industry. Emission Limitations.	12/20/1993	7/5/2011, 76 FR 38977	
Section 2301.D.4.a	Control of Emissions From Chemical Woodpulping Industry. Compliance.	10/20/2007	1/28/2016, 81 FR 4891	
Section 2301.E	Exemptions	10/20/2006	7/5/2011, 76 FR 38977	
Subchapter B. Aluminum Plants				
Section 2303.E	Standards for Horizontal Stud Soderberg Primary Aluminum Plants and Prebake Primary Aluminum Plants. Monitoring.	10/20/2007	1/28/2016, 81 FR 4891	
Section 2303.F.1.d.2.	Standards for Horizontal Study Doderberg Primary Aluminum Plants and Prebake Primary Aluminum Plants. Reporting.	10/20/2005	7/5/2011, 76 FR 38977	
Subchapter C. Phosphate Fertilizer Plants				
Section 2305	Fluoride Emissions Standards for Phosphate Fertilizer Plants.	Dec. 1987, LR13:741	3/8/1989, 54 FR 9795	Ref 52.999(c)(49)
Subchapter D. Emission Standards for the Nitric Acid Industry				
Section 2307.C.1.a	Start-Up Provisions	10/20/2007	1/28/2016, 81 FR 4891	Administrative change here; 2307(C)(1) is subject to SIP Call.
Section 2307.C.2.a	On-Line Operating Adjustments.	10/20/2007	1/28/2016, 81 FR 4891	Administrative change here; 2307(C)(2) is subject to SIP Call.
Chapter 25—Miscellaneous Incinerator Rules				
Section 2511	Standards of Performance for Biomedical Waste Incinerators.	1/20/2008	8/29/2017, 82 FR 40949	
Section 2521	Refuse Incinerators	1/20/2008	8/29/2017, 82 FR 40949	
Section 2531	Standards of Performance for Crematories.	1/20/2008	8/29/2017, 82 FR 40949	
Chapter 30. Standards of Performance from New Stationary Sources (NSPS)				
Chapter 30	Standards of Performance from New Stationary Sources (NSPS).	12/20/1996	7/5/2011, 76 FR 38977

EPA-APPROVED LOUISIANA SOURCE-SPECIFIC REQUIREMENTS

Name of source	Permit or order number	State approval/effective date	EPA approval date	Comments
Lead SIP for Ethyl Corp. in Baton Rouge.	Compliance order	1/27/1989	6/27/1989, 54 FR 27002	Amended Compliance order dated 01/31/86. Modeling 05/27/88. State letter 01/27/89. Ref 52.999(c)(51)
Vulcan Materials Company Facility in Geiser, Ascension Parish.	1829T(M–2)	7/28/1989	10/10/1989, 54 FR 41444	Revision of Bubble Permit. Issued 03/24/83, amended 07/28/89. Ref 52.999(c)(52)
American Cyanamid Company Fortier Plant in Westwego, Jefferson Parish.	1896(M–2)	7/20/1989	11/27/1989, 54 FR 48743	Revision of Bubble Permit. Issued 10/17/84, amended 07/20/89. Ref 52.999(c)(53)
Vista Chemical Company Facility in Westlake, Louisiana.	1828(M–2)	9/25/1986	2/2/1990, 55 FR 03598	Bubble Permit. Submitted by Governor on 11/22/83, amended 09/25/86. Ref 52.999(c)(54)
Dow Chemical Facility in Plaquemine, Iberville Parish.	1838T(M–2)	10/16/1991	10/4/1994, 59 FR 50500	Revision of Bubble Permit. Issued 7/28/83, amended 10/16/91. Ref 52.999(c)(62)
Exxon Compliance Date Extension, Baton Rouge Refinery.	N/A	9/12/1997	5/11/1998, 63 FR 25773	Extension of compliance date to LAC 33:III, 2103.D.4 Ref 52.999(c)(79).
Borden Chemicals and Plastics in Baton Rouge.	Reasonable Further Progress Agreed To Order.	10/24/1996	7/2/1999, 64 FR 35939	Submitted as part of the Baton Rouge, LA Post–1996 ROP Plan
Phillips 66 Alliance Refinery	Administrative Order on Consent No. AE–AOC–14–00211A.	4/29/2016	12/21/2017, 82 FR 60520	
EcoServices LLC.	EcoServices AOC No. AE–14–00957 and through the applicability of the New Source Performance Standards for Sulfuric Acid Plants (40 CFR part 60, subpart H).	8/8/2016	12/21/2017, 82 FR 60520	
Mosaic	Mosaic AOC No. AE–AOC–14–00274A.	6/6/2016	12/21/2017, 82 FR 60520	
NRG Big Cajun II	In the Matter of Louisiana Generating LLC, Point Coupee Parish, Big Cajun II Power Plant.	2/9/2017	12/21/2017, 82 FR 60520	Units 1 and 2.
Cleco Power, LLC Brame Energy Center.	In the Matter of Cleco Power, LLC, Rapides Parish, Brame Energy Center.	2/9/2017	12/21/2017, 82 FR 60520	Unit 1 (Nesbitt 1) and Unit 2 (Rodemacher 2).

EPA-APPROVED LOUISIANA SOURCE-SPECIFIC REQUIREMENTS—Continued

Name of source	Permit or order number	State approval/effective date	EPA approval date	Comments
Entergy Louisiana, LLC, Little Gypsy Generating Plant.	In the Matter of Entergy Louisiana, LLC, Little Gypsy Generating Plant, St. Charles Parish.	2/13/2017	12/21/2017, 82 FR 60520	Units 2, 3, and the Auxiliary Boiler.
Entergy Louisiana, LLC, Ninemile Point Electric Generating Plant.	In the Matter of Entergy Louisiana, LLC, Ninemile Point Electric Generating Plant, Jefferson Parish.	2/9/2017	12/21/2017, 82 FR 60520	Units 4 and 5.
Entergy Louisiana, LLC, Waterford.	In the Matter of Entergy Louisiana, LLC, Waterford 1 & 2 Electrical Generating Plant, St. Charles Parish.	2/9/2017	12/21/2017, 82 FR 60520	Units 1 and 2.
Entergy Louisiana, LLC, Willow Glen Generating Plant.	In the Matter of Entergy Louisiana, LLC, Willow Glen Generating Plant, Iberville Parish.	2/9/2017	12/21/2017, 82 FR 60520	Units 2, 3, 4, 5, and the Auxiliary Boiler.
Entergy Louisiana, LLC, R. S. Nelson Generating Plant.	In the Matter of Entergy Louisiana, LLC, R. S. Nelson Generating Plant, Calcasieu Parish.	10/26/2017	12/21/2017, 82 FR 60520	Units 4, 6, and the Unit 4 Auxiliary Boiler.
Rain CII Carbon in St. Bernard Parish.	In the Matter of Rain CII Carbon LLC, St. Bernard Parish.	8/2/2018	5/29/2019, 84 FR 24712	Amended Administrative order on Consent dated 8/2/2018. Pyroscrubber (EQT 004) and Waste Heat Boiler/ Baghouse (EQT 0003).

§ 52.971 Classification of regions.

The Louisiana plan was evaluated on the basis of the following classifications:

Air quality control region	Pollutant				
	Particulate matter	Sulfur oxides	Nitrogen dioxide	Carbon monoxide	Ozone
Southern Louisiana-Southeast Texas Interstate	II	I	III	III	I
Shreveport-Texarkana-Tyler Interstate	II	III	III	III	III
Monroe-El Dorado Interstate	II	III	III	III	III

[37 FR 10869, May 31, 1972, as amended at 45 FR 9909, Feb. 14, 1980]

§§ 52.972–52.974 [Reserved]

§ 52.975 Redesignations and maintenance plans; ozone.

(a) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted redesignation requests and maintenance plans for the areas of Beauregard, Lafourche, and St. Mary Parishes on June 14, 1993. Redesignation requests and maintenance plans were submitted for the areas of Grant and Lafayette on May 25, 1993. The EPA deemed these requests complete on September 10, 1993. Several approvability issues existed, however. The LDEQ addressed these approvability issues in supplemental ozone redesignation requests and revised maintenance plans. These supplemental submittals were received for the areas of Beauregard, Grant, Lafayette, Lafourche, and St. Mary Parishes on March 27, 1995, December 12, 1994, October 21, 1994, November 18, 1994, and November 23, 1994, respectively. The redesignation requests and maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignations meet the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for these areas. The EPA therefore approved the request for redesignation to attainment with respect to ozone for the areas of Beauregard, Grant, Lafayette, Lafourche, and St. Mary Parishes on October 17, 1995.

(b) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted a redesignation request and maintenance plan for St. James Parish on May 25, 1993. The EPA deemed this request complete on September 10, 1993. Several approvability issues existed, however. The LDEQ addressed these approvability issues in a supplemental ozone redesignation request and revised maintenance plan. This supplemental submittal was received for St. James Parish on December 15, 1994. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for this parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for St. James Parish on November 13, 1995.

(c) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted a redesignation request and maintenance plan for the New Orleans CMSA on April 23, 1993.

The EPA deemed this request complete on September 10, 1993. Several approvability issues existed, however. The LDEQ addressed these approvability issues in a supplemental ozone redesignation request and revised maintenance plan. This supplemental submittal was received on October 14, 1994. The redesignation request and maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Jefferson, Orleans, St. Bernard, and St. Charles Parishes. The EPA therefore approved the request for redesignation to attainment with respect to ozone for 7Jefferson, Orleans, St. Bernard, and St. Charles Parishes on December 1, 1995.

(d) *Approval*—The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Pointe Coupee Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Pointe Coupee Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Pointe Coupee Parish on December 20, 1996.

(e) *Approval*—The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Calcasieu Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Act as a revision to the Louisiana ozone State Implementation Plan for Calcasieu Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Calcasieu Parish on June 2, 1997.

(f) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted minimal maintenance plans for Lafourche Parish on November 18, 1994. The LDEQ submitted a redesignation request on August 9, 2000. The maintenance plans meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Lafourche Parish.

(g) *Approval*—The Louisiana Department of Environmental Quality (LDEQ) submitted to the EPA a request on December 4, 2000, to revise the Louisiana SIP for Beauregard, St. Mary, Lafayette, and Grant Parishes and the New Orleans Consolidated Metropolitan Statistical Area ozone maintenance area. The revision involves changes to the approved contingency plans. The contingency measures and the schedule for implementation satisfy the requirements of section 175A(d) of the Act. The EPA therefore approved this request on June 20, 2003.

(h) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted 8-hour ozone maintenance plans for the areas of Beauregard, Grant, and St. Mary Parishes on August 23, 2006, August 23, 2006, and October 10, 2006, respectively. The three areas are designated unclassifiable/attainment for the 8-hour ozone standard. EPA determined these requests for Beauregard, Grant, and St. Mary Parishes were complete on October 9, 2006, October 9, 2006, and November 30, 2006, respectively. The maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 8-hour ozone maintenance plans for the areas of Beauregard, Grant, and St. Mary parishes on November 6, 2007.

(i) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted 8-hour ozone maintenance plans for the Lafayette and Lafourche Parish areas on October 13, 2006 and December 19, 2006, respectively. The two areas are designated unclassifiable/attainment for the 8-

hour ozone standard. EPA determined these requests for Lafayette and Lafourche Parishes were complete on November 30, 2006 and May 2, 2007, respectively. These maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 8-hour ozone maintenance plans for the Lafayette and Lafourche Parish areas on *March 24, 2008*.

(j) Approval. The Louisiana Department of Environmental Quality (LDEQ) submitted 1997 8-hour ozone NAAQS maintenance plans for the areas of Calcasieu and St. James Parishes on July 20, 2007, and August 24, 2007, respectively. The two areas are designated unclassifiable/attainment for the 1997 8-hour ozone standard. EPA determined these requests for Calcasieu and St. James Parishes were complete on October 5, 2007, and October 16, 2007, respectively. The maintenance plans meet the requirements of section 110(a)(1) of the Clean Air Act, and are consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plans for the areas of Calcasieu and St. James Parishes on *October 9, 2008*.

(k) *Approval.* The LDEQ submitted a maintenance plan addressing the 1997 8-hour ozone standard for the New Orleans Ozone Maintenance Area on June 29, 2007. This area is designated unclassifiable/attainment for the 1997 ozone standard. EPA determined this request for the New Orleans Ozone Maintenance Area was complete on August 8, 2007. This maintenance plan meets the requirements of section 110(a)(1) of the CAA, and is consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plan for the New Orleans Ozone Maintenance Area including the parishes of Jefferson, Orleans, St. Bernard and St. Charles on September 16, 2008.

(l) *Approval.* The Louisiana Department of Environmental Quality (LDEQ) submitted a 1997 8-hour ozone NAAQS maintenance plan for the area of Pointe Coupee Parish on February 28, 2007. The area is designated unclassifiable/attainment for the 1997 8-hour ozone standard. EPA determined this request for Pointe Coupee Parish was complete on May 2, 2007. The maintenance plan meets the requirements of section 110(a)(1) of the Clean Air Act, and is consistent with EPA's maintenance plan guidance document dated May 20, 2005. The EPA therefore approved the 1997 8-hour ozone NAAQS maintenance plan for the area of Pointe Coupee Parish on May 9, 2013.

[60 FR 43025, Aug. 18, 1995, as amended at 60 FR 47285, Sept. 12, 1995; 60 FR 51360, Oct. 2, 1995; 62 FR 652, Jan. 6, 1997; 62 FR 24038, May 2, 1997; 62 FR 64286, Dec. 5, 1997; 66 FR 66321, Dec. 26, 2001; 68 FR 19375, Apr. 21, 2003; 72 FR 62584, Nov. 6, 2007; 73 FR 15416, Mar. 24, 2008; 73 FR 53378, Sept. 16, 2008; 73 FR 59523, Oct. 9, 2008; 78 FR 27062, May 9, 2013]

§ 52.976 Review of new sources and modification.

(a) Section 6.7 of Regulation 6.0 is disapproved since it could conflict with the preconstruction requirements for the prevention of significant deterioration (PSD) of air quality.

(b) Section 6.9 of Regulation 6.0 is disapproved since it could conflict with the preconstruction requirements for the prevention of significant deterioration (PSD) of air quality and the Administrator's Interpretative on Rule of December 21, 1976.

[44 FR 18491, Mar. 28, 1979, as amended at 47 FR 6017, Feb. 10, 1982]

§ 52.977 Control strategy and regulations: Ozone.

(a) *Determination of Attainment.* Effective March 12, 2010 EPA has determined the Baton Rouge 1-hour ozone nonattainment area has attained the 1-hour ozone National Ambient Air Quality Standard (NAAQS). Under the provisions of EPA's Clean Data Policy, this determination suspends the requirements for this area to submit a severe attainment demonstration, a severe reasonable further progress plan, applicable contingency measures plans, and other planning Louisiana State Implementation Plan (SIP) requirements related to attainment of the 1-hour ozone NAAQS for so long as the

area continues to attain the 1-hour ozone NAAQS.

(b) *Determination of Attainment.* Effective October 12, 2010 EPA has determined that the Baton Rouge 8-hour ozone nonattainment area has attained the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). Under the provisions of 40 CFR 51.918 this determination suspends the requirements for this area to submit an attainment demonstration, a reasonable further progress plan, applicable contingency measures, and other planning Louisiana State Implementation Plan (SIP) requirements related to attainment of the 1997 8-hour ozone NAAQS for so long as the area continues to attain the 1997 8-hour ozone NAAQS.

(c) Determination to Terminate the Clean Air Act Section 185 Penalty Fee Requirement. Effective September 6, 2011 EPA has determined that the State of Louisiana is no longer required to submit a section 185 fee program State Implementation Plan (SIP) revision for the Baton Rouge ozone nonattainment area to satisfy anti-backsliding requirements for the 1-hour ozone standard. This determination is based on EPA's determination that the area has attained the 1-hour ozone standard due to permanent and enforceable emissions reductions.

(d) Redesignation for the 1997 8-hour Ozone Standard. Effective December 30, 2011, EPA has redesignated the Baton Rouge area to attainment for the 1997 8-hour ozone standard. With this final redesignation to attainment for the 1997 8-hour ozone NAAQS and the final determination of attainment for the 1-hour ozone NAAQS in paragraph (a) of this section, the 1-hour anti-backsliding obligations to submit planning SIPs to meet the attainment demonstration and reasonably available control measures requirements, the rate of progress and contingency measures requirements, and any other outstanding 1-hour requirements, cease to apply.

(e) *Clean Data Determination.* Effective June 16, 2014 EPA has determined that the Baton Rouge, Louisiana, marginal 2008 8-hour ozone nonattainment area is currently attaining the 2008 8-hour NAAQS for ozone.

(f) The EPA has determined that the Baton Rouge Marginal 2008 ozone NAAQS nonattainment area attained the NAAQS by the applicable attainment date of July 20, 2015.

[75 FR 6575, Feb. 10, 2010, as amended at 75 FR 54779, Sept. 9, 2010; 76 FR 39777, July 7, 2011; 76 FR 74002, Nov. 30, 2011; 79 FR 21142, Apr. 15, 2014; 81 FR 26709, May 4, 2016]

§§ 52.978–52.983 [Reserved]

§ 52.984 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

(a)(1) The owner and operator of each source located within the State of Louisiana and for which requirements are set forth under the Federal CAIR NO_X Annual Trading Program in subparts AA through II of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be eliminated by the promulgation of an approval by the Administrator of a revision to the Louisiana State Implementation Plan (SIP) as meeting the requirements of CAIR for $PM_{2.5}$ relating to NO_X under §51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under §51.123(p) of this chapter.

(2) Notwithstanding any provisions of paragraph (a)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_X allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X allowances for those years.

(b)(1) The owner and operator of each NO_X source located within the State of Louisiana and for which requirements are set forth under the Federal CAIR NO_X Ozone Season Trading Program in subparts AAAA through IIII of part 97 of this chapter must comply with such applicable requirements. The obligation to comply with these requirements in part 97 of this chapter will be

eliminated by the promulgation of an approval by the Administrator of a revision to the Louisiana State Implementation Plan (SIP) as meeting the requirements of CAIR for ozone relating to NO_X under § 51.123 of this chapter, except to the extent the Administrator's approval is partial or conditional or unless such approval is under § 51.123(ee) of this chapter.

(2) Notwithstanding any provisions of paragraph (b)(1) of this section, if, at the time of such approval of the State's SIP, the Administrator has already allocated CAIR NO_X Ozone Season allowances to sources in the State for any years, the provisions of part 97 of this chapter authorizing the Administrator to complete the allocation of CAIR NO_X Ozone Season allowances for those years shall continue to apply, unless the Administrator approves a SIP provision that provides for the allocation of the remaining CAIR NO_X Ozone Season allowances for those years.

(c) Notwithstanding any provisions of paragraphs (a) and (b) of this section and subparts AA through II and AAAA through IIII of part 97 of this chapter to the contrary:

(1) With regard to any control period that begins after December 31, 2014,

(i) The provisions in paragraphs (a) and (b) of this section relating to NO_X annual or ozone season emissions shall not be applicable; and

(ii) The Administrator will not carry out any of the functions set forth for the Administrator in subparts AA through II and AAAA through IIII of part 97 of this chapter;

(2) The Administrator will not deduct for excess emissions any CAIR NO_X allowances or CAIR NO_X Ozone Season allowances allocated for 2015 or any year thereafter;

(3) By March 3, 2015, the Administrator will remove from the CAIR NO_X Allowance Tracking System accounts all CAIR NO_X allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X allowances will be required with regard to emissions or excess emissions for such control periods; and

(4) By March 3, 2015, the Administrator will remove from the CAIR NO_X Ozone Season Allowance Tracking System accounts all CAIR NO_X Ozone Season allowances allocated for a control period in 2015 and any subsequent year, and, thereafter, no holding or surrender of CAIR NO_X Ozone Season allowances will be required with regard to emissions or excess emissions for such control periods.

(d)(1) The owner and operator of each source and each unit located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 1 Trading Program in subpart BBBBB of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2015 and 2016.

(2) The owner and operator of each source and each unit located in the State of Louisiana and Indian country within the borders of the State and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements with regard to sources and units in the State will be eliminated by the promulgation of an approval by the Administrator of a revision to Louisiana's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b) for those sources and units, except to the extent the Administrator's approval is partial or conditional. The obligation to comply with such requirements with regard to sources and units located in Indian country within the borders of the State will not be eliminated by the promulgation of an approval by the Administrator of a revision to Louisiana's SIP.

(3) Notwithstanding the provisions of paragraph (d)(2) of this section, if, at the time of the approval of Louisiana's SIP revision described in paragraph (d)(2) of this section, the Administrator has already started recording any allocations of CSAPR NO_X Ozone Season Group 2 allowances under subpart EEEEE of part 97 of this chapter to units in the State for a control period in any year, the provisions of subpart

EEEEE of part 97 of this chapter authorizing the Administrator to complete the allocation and recordation of CSAPR NO_X Ozone Season Group 2 allowances to units in the State for each such control period shall continue to apply, unless provided otherwise by such approval of the State's SIP revision.

[72 FR 62348, Nov. 2, 2007, as amended at 76 FR 48366, Aug. 8, 2011; 79 FR 71671, Dec. 3, 2014; 81 FR 74596, Oct. 26, 2016; 83 FR 65924, Dec. 21, 2018]

§ 52.985 Visibility protection.

(a) *Measures addressing best available retrofit technology (BART) for electric generating unit (EGU) emissions of nitrogen oxides (NO_X).* The BART requirements for EGU NO_X emissions are satisfied by § 52.984.

(b) *Other measures addressing BART.* The BART requirements for emissions other than EGU NO_X emissions are satisfied by the Louisiana Regional Haze SIP approved December 21, 2017.

[82 FR 60543, Dec. 21, 2017]

§ 52.986 Significant deterioration of air quality.

(a) The plan submitted by the Governor of Louisiana on August 14, 1984 (as adopted by the Secretary of Louisiana Department of Environmental Quality (LDEQ) on May 23, 1985), July 26, 1988 (as revised and adopted by the LDEQ on May 5, 1988), and October 26, 1990 (as revised and adopted by the LDEQ on July 20, 1990), LAC:33:III: § 509 Prevention of Significant Deterioration (PSD) and its Supplement documents, is approved as meeting the requirements of Part C, Clean Air Act for preventing significant deterioration of air quality.

(b) The requirements of sections 160 through 165 of the Clean Air Act are not met for federally designated Indian lands since the plan (specifically LAC: 33:III:509.A.1) excludes all federally recognized Indian lands from the provisions of this regulation. Therefore, the provisions of § 52.21 except paragraph (a)(1) are hereby incorporated and made a part of the applicable implementation plan, and are applicable to sources located on land under the control of Indian governing bodies.

(c) The revisions to the Louisiana SIP adopted on April 20, 2011, and submitted on December 21, 2011, establishing PSD permitting requirements for sources that are classified as major and thus required to obtain a PSD permit based solely on their potential GHG emissions (''Step 2'' sources) at the definition of ''major stationary source'' paragraph (c) and the definition of ''significant'' at LAC 33:III.509(B), are disapproved as inconsistent with federal law for the regulation and permitting of GHGs.

[56 FR 20139, May 2, 1991, as amended at 68 FR 11323, Mar. 10, 2003; 68 FR 74489, Dec. 24, 2003; 75 FR 82555, Dec. 30, 2010; 81 FR 46608, July 18, 2016]

§ 52.987 Control of hydrocarbon emissions.

(a) Notwithstanding any provisions to the contrary in the Louisiana Implementation Plan, the control measures listed in paragraphs (b) through (n) of this section shall be implemented in accordance with the schedule set forth below.

(b) Removal from service of a 10,000 barrel capacity crude oil storage tank at the Belcher Station of the Exxon Pipeline Company, Belcher, Louisiana, with a final compliance date of January 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 208 tons per year.

(c) Removal from service of a 55,000 barrel capacity crude oil storage tank at the Weller Station of the Exxon Pipeline Company, near Minden, Louisiana, with a final compliance date of January 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 263 tons per year.

(d) Installation of emission control systems on three 3,000 barrel capacity distillate storage tanks, at the Jones O'Brien Inc., Keatchie, Louisiana, with a final compliance date of January 1, 1978. This shall result in an estimated hydrocarbon emission reduction of at least 23 tons per year.

(e) Installation of emission control systems on crude oil storage tanks TK–43, TK–44, T–45 and T–49, and distillate tanks T–46 and T–50 at the Atlas Processing Company, Shreveport, Louisiana

with a final compliance date of January 2, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 881 tons per year.

(f) Installation of emission control systems on crude oil storage tanks TK–19–74, TK–HC–74, TK–571–74 and TK–15–74 and agreement to store only nonvolatile organic solvent in tanks TK–F2–74, TK–41–74 and TK–40–74 at the Cotton Valley Solvents Company, Cotton Valley, Louisiana with a final compliance date of January 2, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 934 tons per year.

(g) Discontinue use of residue gas in pneumatic instrumentation and control systems at the Kerr-McGee Corporation, Devon Corporation, and Eason Oil Company, Calhoun Plant, Calhoun, Louisiana with a final compliance date of July 1, 1978. This shall result in an estimated hydrocarbon emission reduction of at least 21 tons per year.

(h) Discontinue use of residue gas in pneumatic instrumentation and control systems with a final compliance date of July 1, 1978, and install emission control systems on distillate storage tanks 2–7 and 2–13 with a final compliance date of January 2, 1980, at the Kerr-McGee Corp., Devon Corp., and Eason Oil Co., Dubach Plant, Dubach, Louisiana. This shall result in an estimated hydrocarbon reduction of at least 367 tons per year.

(i) Installation of emission control systems on a 37,500 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Oil City, Louisiana with a final compliance date of February 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 208 tons per year.

(j) Installation of emission control systems on a 25,000 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Haynesville, Louisiana with a final compliance date of February 1, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 28 tons per year.

(k) Installation of emission control systems on a 10,000 barrel capacity crude oil storage tank at Cities Service Pipeline Company, Summerfield, Louisiana with final compliance achieved in August 1977. This shall result in an estimated hydrocarbon emission reduction of at least 162 tons per year.

(l) Installation of emission control systems on a 30,000 barrel capacity crude oil storage tank at the Scurlock Oil Company, Lake End, Louisiana, with a final compliance date of January 15, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 90 tons per year.

(m) Installation of emission control systems on a 55,000 barrel capacity crude oil storage tank at the Scurlock Oil Company, Dutchtown Oil Field near Minden, Louisiana, with a final compliance date of January 15, 1980. This shall result in an estimated hydrocarbon emission reduction of at least 186 tons per year.

(n) Installation of emission control systems on distillate storage tank No. 414 with a final compliance date of September 1, 1979, and the removal from service of tank No. 450 with final compliance achieved on December 1, 1977, at the Texas Eastern Products Pipeline Company, Sarepta, Louisiana. This shall result in an estimated hydrocarbon emission reduction of at least 355 tons per year.

[44 FR 15705, Mar. 15, 1979]

§ 52.988 [Reserved]

§ 52.990 Stack height regulations.

The State of Louisiana has committed to submit to EPA a SIP revision whenever a new or revised emission limitation for a specific source exceeds the height allowed by Section 921(A) ''Good Engineering Practice (GEP) Stack Height 1 or 2'' of the State regulations. A letter from the Secretary of Louisiana Department of Environmental Quality, dated September 23, 1986, stated that:

In specific, the State regulation, Section 17.14.2 [now LAC 33: Part III, Section 921(B)], provides that the degree of emission limitation required of any source for control of any air pollutant must not be affected by so much of any source's stack height that exceeds good engineering practice or by any other dispersion technique. In reference to this requirement, the Louisiana Department of Environmental Quality or the Administrative Authority will submit to EPA a SIP revision whenever the Louisiana Department of Environmental Quality adopts a new or

revised emission limitation for a specific source that is based on a stack height that exceeds the height allowed by Section 17.14.1(e)(1) [now LAC 33: Part III, Section 921(A) ''Good Engineering Practice (GEP) Stack Height 1''] or Section 17.14.1(e)(2) [now LAC 33: Part III, Section 921(A) ''Good Engineering Practice (GEP) Stack Height 2''].

[53 FR 36010, Sept. 16, 1988]

§ 52.991 Small business assistance program.

The Governor of Louisiana submitted on October 22, 1992, a plan revision to develop and implement a Small Business Stationary Source Technical and Environmental Compliance Assistance Program to meet the requirements of section 507 of the Clean Air Act by November 15, 1994. The plan commits to provide technical and compliance assistance to small businesses, hire an Ombudsman to serve as an independent advocate for small businesses, and establish a Compliance Advisory Panel to advise the program and report to EPA on the program's effectiveness.

[59 FR 32360, June 23, 1994]

§ 52.992 Area-wide nitrogen oxides exemptions.

(a) The Louisiana Department of Environmental Quality submitted to the EPA on August 5, 1994, a petition requesting that the nonclassifiable ozone nonattainment areas in the State of Louisiana be exempted from the requirement to meet the NO_X provisions of the Federal transportation conformity rule. The exemption request was based on monitoring data which demonstrated that the National Ambient Air Quality Standard for ozone had been attained in this area for the 3 years prior to the petition. The parishes for which the NO_X exemption was requested include: Beauregard, Grant, Lafayette, Lafourche, Jefferson, Orleans, St. Bernard, St. Charles, St. James, and St. Mary. The EPA approved this exemption request on March 2, 1995.

(b) The LDEQ submitted to the EPA on November 17, 1994, a petition requesting that the Baton Rouge serious ozone nonattainment area be exempted from the NO_X control requirements of the CAA. In addition, supplemental information was submitted to the EPA by the LDEQ on January 26, 1995, June 6, 1995, and June 16, 1995. The Baton Rouge nonattainment area consists of East Baton Rouge, West Baton Rouge, Pointe Coupee, Livingston, Iberville, and Ascension Parishes. The exemption request was based on photochemical grid modeling which shows that reductions in NO_X would not contribute to attainment in the nonattainment area. On January 18, 1996, the EPA approved the State's request for an areawide exemption from the following requirements: NO_X new source review, NO_X reasonably available control technology, NO_X general conformity, and NO_X inspection and maintenance requirements.

(c) The LDEQ submitted to the EPA on July 25, 1995, a revision to the SIP, pursuant to section 182(b)(1), requesting that the Baton Rouge serious ozone nonattainment area be exempted from the transportation conformity NO_X requirements of the CAA. The Baton Rouge nonattainment area consists of East Baton Rouge, West Baton Rouge, Pointe Coupee, Livingston, Iberville, and Ascension Parishes. The exemption request was based on photochemical grid modeling which shows that additional reductions in NO_X would not contribute to attainment in the nonattainment area. On February 12, 1996, the EPA approved the State's request for an areawide exemption from the transportation conformity NO_X requirements.

(d) The LDEQ submitted to the EPA on October 28, 1994, a petition requesting that the Lake Charles marginal ozone nonattainment area be exempted from the NO_X control requirements of the Act. The Lake Charles nonattainment area consists of Calcasieu Parish. The exemption request was based on photochemical grid modeling which shows that reductions in NO_X would not contribute to attainment in the nonattainment area. On May 27, 1997, the EPA approved the State's request for an area-wide exemption from the following requirements: NO_X new source review, NO_X general conformity, and NO_X transportation conformity requirements. The waiver was granted on the basis of modeling, and ambient air quality data demonstrating the area has attained the ozone NAAQS.

(e) On September 24, 2001, and on December 31, 2001, the LDEQ requested that EPA rescind the Baton Rouge section 182(f) and 182(b)(1) NO_X exemptions that were approved by EPA, and published in the FEDERAL REGISTER on January 26, 1996 (61 FR 2438), and February 27, 1996 (61 FR 7218). The State based its request on photochemical grid modeling recently performed for the Baton Rouge State Implementation Plan (SIP) which indicates that controlling NO_X sources will assist in bringing the Baton Rouge area into attainment with the National Ambient Air Quality Standard (NAAQS) for ozone. On May 7, 2002, EPA proposed approval of the State's request to rescind both NO_X exemptions. Based on our review of the State's request and the supporting photochemical grid modeling the NO_X exemptions are rescinded on May 5, 2003.

[60 FR 5864, Jan. 31, 1995, as amended at 61 FR 2446, Jan. 26, 1996; 61 FR 7221, Feb. 27, 1996; 62 FR 29078, May 29, 1997; 68 FR 23604, May 5, 2003]

§ 52.993 Emissions inventories.

(a) The Governor of the State of Louisiana submitted the 1990 base year emission inventories for the Baton Rouge (BTR) and Calcasieu Parish (CAL) ozone nonattainment areas on November 16, 1992 as a revision to the State Implementation Plan (SIP). The 1990 base year emission inventory requirement of section 182(a)(1) of the Clean Air Act, as amended in 1990, has been satisfied for each of these areas.

(b) The inventories are for the ozone precursors which are volatile organic compounds, nitrogen oxides, and carbon monoxide. The inventories cover point, area, non-road mobile, on-road mobile, and biogenic sources.

(c) The BTR nonattainment area is classified as Serious and includes Ascension, East Baton Rouge, Iberville, Livingston, Point Coupee, and West Baton Rouge Parishes; the CAL nonattainment area is classified as Marginal and includes Calcasieu Parish.

(d) On December 15, 1995, the Governor of the State of Louisiana submitted a revision to the 1990 base year volatile organic compound (VOC) emissions inventory for the Baton Rouge, Louisiana ozone nonattainment area. The revised inventory was submitted as part of the revised Baton Rouge 15 Percent Rate-of-Progress Plan. This revision to the base year inventory modified the point source VOC emissions. The revisions satisfy the requirements of section 182(a)(1) of the Clean Air Act, as amended in 1990.

(e) On January 2, 1997, the Governor of the State of Louisiana submitted a revision to the 1990 base year volatile organic compound (VOC) emissions inventory for the Baton Rouge, Louisiana ozone nonattainment area. The revised inventory was submitted as part of the revised Baton Rouge Post–1996 Rate-of-Progress Plan. This revision to the base year inventory modified the point, area, non-road mobile, on-road mobile, and biogenic sources of VOC emissions. The revisions satisfy the requirements of section 182(a)(1) of the Clean Air Act, as amended in 1990.

[60 FR 13911, Mar. 15, 1995, as amended at 64 FR 35941, July 2, 1999]

§ 52.994 [Reserved]

§ 52.995 Enhanced ambient air quality monitoring.

(a) The Governor of the State of Louisiana submitted the photochemical assessment monitoring stations (PAMS) State Implementation Plan (SIP) revision for the Baton Rouge ozone nonattainment area on September 10, 1993. This SIP submittal satisfies 40 CFR 58.20(f), which requires the State to provide for the establishment and maintenance of PAMS.

(b) The Baton Rouge ozone nonattainment area is classified as Serious and includes Ascension, East Baton Rouge, Iberville, Livingston, Pointe Coupee, and West Baton Rouge Parishes.

[61 FR 31037, June 19, 1996]

§ 52.996 Disapprovals.

(a) The portion of the SIP submitted on June 4, 2013 addressing Clean Air Act section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS is disapproved.

(b) The portions of the SIP submitted on May 16, 2011, June 4, 2013, and December 17, 2015 addressing noninterference with measures required to protect visibility in any other state (Clean Air Act section 110(a)(2)(D)(i)(II)) are

disapproved for the following National Ambient Air Quality Standards: 2006 $PM_{2.5}$, 2008 Ozone, 2010 NO_2, 2010 SO_2 and 2012 $PM_{2.5}$.

[81 FR 53309, Aug. 12, 2016, as amended at 81 FR 68334, Oct. 4, 2016]

§ 52.999 Original identification of plan section.

(a) This section identifies the original ''The Louisiana Air Control Commission Implementation Plan'' and all revisions submitted by Louisiana that were federally approved prior to July 1, 1998.

(b) The plan was officially submitted on January 28, 1972.

(c) The plan revisions listed below were submitted on the dates specified.

(1) Certification that public hearings were held on the State's implementation plan was submitted on February 28, 1972. (Non-regulatory)

(2) Response to comments by Region VI on the plan was transmitted by the Louisiana Air Control Commission on May 8, 1972. (Non-regulatory)

(3) Revisions to Louisiana Air Control Regulations 6, 8, 18, 19, 22, A22, 27, 28, control strategy for photochemical oxidants-hydrocarbons, prevention of air pollution emergency episodes, source surveillance, and procedures for submission and approval and compliance schedules were submitted by the Governor on July 17, 1972.

(4) Revisions concerning the control strategy for photochemical oxidants and hydrocarbon for Region 106 was submitted by the Governor on March 30, 1973. (Regulatory)

(5) Revision of Section 6.1 of the State air control regulations was submitted by the Governor on April 25, 1973.

(6) A revision concerning the control strategy for particulate matter for the Southern Louisiana-Southeast Texas AQCR was submitted by the Governor on January 2, 1973.

(7) Variances to Emission Limiting Regulations adopted by the Louisiana Air Control Commission on October 29, 1975, December 12, 1975, and April 6, 1976, and submitted by the Governor on April 22, 1976.

(8) Commission Orders creditable as emission offsets for the GM Plant in Shreveport were submitted by the Governor on January 25, 1978 as amendments to the Louisiana State Implementation Plan.

(9) A proposed dedesignation of the Shreveport area as an AQMA for particulate matter was submitted by the Governor on December 9, 1977.

(10) An administrative revision of the Air Quality Surveillance Network was submitted by the Louisiana Air Control Commission on April 3, 1978. (Non regulatory)

(11) Revisions to Regulation 19.0, Emission Standards for Particulate Matter, as adopted on November 30, 1977, were submitted by the Governor on December 9, 1977.

(12) Minor changes and administrative revisions to regulations 2.0, 3.0, 4.0, 5.0, 6.0, 7.0, 8.0, 9.0, 10.0, 11.0, 12.0, 13.0, 14.0, 15.0, 16.0, and 17.0 of the Louisiana SIP were submitted by the Governor on December 9, 1977.

(13) A variance to Regulation 19.5 for Kaiser Aluminum & Chemical Corporation at Norco, Louisiana was submitted by the Governor on August 31, 1978.

(14) Revisions to the Air Control Regulations 18.1, 18.3, 18.5, 18.6–18.6.2, 18.7, 20.1–20.8, 21.1–21.6.4, 23.0–23.4.2, 24.1–24.5, 24.6.2, 24.7–24.7.3, 24.8, 25.0–25.6.2, 26.0–26.2, 26.4–26.8.2, 27.0–27.5.4, 28.0–28.6.2 and 30.0, as adopted by the Louisiana Air Control Commission on November 30, 1977, were submitted by the Governor on December 9, 1977.

(15) Revisions to the plan for attainment of standards for ozone (Part D requirements) were submitted by the Governor on April 30, 1979.

(16) Evidence of notice and public hearing for the April 30, 1979 plan was submitted by the Governor on June 20, 1979.

(17) Emission inventory information, emission reduction information, a certification of the lack of major degreasing sources, and a commitment to adopt future regulations were submitted by the Louisiana Air Control Commission on August 28, 1979 (non-regulatory).

(18) Schedule for the modification and submittal of regulations 22.6 and regulation 6.3.8 were submitted by the Louisiana Air Control Commission on October 11, 1979 (non-regulatory).

(19) Regulations 22.17 and 22.18, adopted by the Louisiana Air Control

Commission on September 25, 1979 were submitted by the Governor on October 18, 1979.

(20) On January 10, 1980, the Governor submitted final revisions to the ambient monitoring portion of the plan.

(21) Revised Regulation 22.8(c) was submitted by the Governor on June 20, 1979. This regulation was adopted by the Louisiana Air Control Commission on March 27, 1979.

(22) Revised Regulation 22.5 was submitted by the Governor on April 30, 1979. This regulation was adopted by the Louisiana Air Control Commission on March 27, 1979. A second revision to Regulation 22.5 was submitted by the Governor on July 7, 1979, as adopted by the Louisiana Air Control Commission on June 26, 1979.

(23) Revised Regulations 6.3.8, 22.3, 22.6.1, 22.6.2, 22.10, and 22.12.4 were submitted by the Governor on December 10, 1979. These regulations were adopted by the Louisiana Air Control Commission on November 27, 1979. A second revision to Regulation 6.3.8 was submitted by the Governor on October 23, 1980. The second revision was adopted by the Louisiana Air Control Commission on September 25, 1980.

(24) Revisions to the Air Control Regulations 24.6.1 and 24.7.4, as adopted by the Louisiana Environmental Control Commission on March 27, 1979, were submitted by the Governor on April 30, 1979.

(25) Revised Regulations 22.9.2, 22.9.3(b), 22.19, 22.20, 22.21, 22.22 and 22.23 and revised Regulation 4.0 (i.e. sections 4.99 through 4.116) were adopted by the State on November 27, 1979 and submitted by the Governor on December 10, 1979; and revised Regulations 22.3 and 22.20.2 were adopted by the State on July 22, 1980 and submitted by the Governor on September 12, 1980.

(26) Revised Regulations 22.9.3(b), 22.20.3, and 22.23.7 were adopted by the State on December 11, 1980 and submitted by the Governor on January 12, 1981; revised Regulation 22.21.2(E) was adopted by the State on April 23, 1981 and submitted by the Governor on June 3, 1981; and, revised Regulation 22.19.2(B) was adopted by the State on June 25, 1981 and submitted by the Governor on July 22, 1981.

(27) Revisions to the Air Control Regulations 6.1.1, 18.2, 18.4, 18.6.3, 19.5.1, 24.9.1, 24.9.2, 26.3.1, 26.3.2 and 51.11, as adopted by the Louisiana Environmental Control Commission on September 25, 1980, were submitted by the Governor on October 23, 1980.

(28) Revisions to the plan for permit fee systems, interstate pollution abatement, public availability of emission data, maintenance of pay, permit public comment, and public notification of exceedances of the primary national ambient air quality standards (NAAQS), were submitted by the Governor on April 30, 1979. In addition, revised submittals for permit fee schedules were submitted on July 7, 1979; September 12, 1980; October 23, 1980; and January 12, 1981. The September 12, 1980 letter also included a new § 51.285 (a), (b) and (c). Finally, the State sent a notification letter on August 7, 1979, which corrected a typographical error in the maintenance of pay revision.

(29) A revision to the Air Control Regulations 22.9.3(d) as adopted by the Louisiana Air Control Commission on December 11, 1980, was submitted by the Governor on January 12, 1981.

(30) Revisions to the Air Control Regulations 8.5.1, 22.3.1.1, 22.3.1.2, and 22.10, as adopted by the Louisiana Air Control Commission on April 23, 1981, were submitted by the Governor on June 3, 1981.

(31) A revision to the Air Control Regulation 22.9.3(a), as adopted by the Louisiana Air Control Commission on May 28, 1981, was submitted by the Governor on June 3, 1981.

(32) A revision to the Air Control Regulation 22.3.2, as adopted by the Louisiana Air Control Commission on July 23, 1981, was submitted by the Governor on August 17, 1981.

(33) The Louisiana State Implementation Plan for lead and Regulations for—the Control of Air Pollution from lead, 10.0–10.3 and 19A.0, were submitted to EPA on July 27, 1979, by the Governor of Louisiana as adopted by the Louisiana Air Control Commission on July 24, 1979. Letters of Clarification dated January 6, 1982, April 1, 1982 and May 4, 1982 also were submitted. No action is taken on the Baton Rouge area.

(34) Section 6.1 of Regulation 6.0 amended and adopted by the Louisiana Environmental Control Commission on October 22, 1981, was submitted by the Governor on November 30, 1981.

(35) Revisions to the Air Control Regulations 4.102, 4.110, 22.20.2 and 22.21.2(D), as adopted by the Louisiana Environmental Control Commission on December 11, 1980, were submitted by the Governor on January 12, 1981.

(36) [Reserved]

(37) Revisions to the Air Control Regulations 4.14, 4.36, 6.6, 22.3.1.1, and 22.3.1.2, as adopted by the Louisiana Environmental Control Commission on February 26, 1981, were submitted by the Governor on March 25, 1981.

(38) Revisions to the Air Control Regulations 17.13, 23.4.1.1 and 23.4.4, as adopted by the Louisiana Environmental Control Commission on January 28, 1982, were submitted by the Governor on February 15, 1982.

(39) A revision to section 2210 of the Louisiana Air Control Law was submitted to EPA on March 10, 1982. The Section was renamed Section 1077 of the Environmental Affairs Act, by the Louisiana Legislature, and was effective January 1, 1980.

(40) The Louisiana State Implementation Plan for lead for the Baton Rouge area was submitted on July 27, 1979, with letters of clarification and revisions dated January 4, 1983, September 15, 1983, September 30, 1983. The final lead control plan was submitted in a letter dated October 31, 1983, as adopted by the Louisiana Air Control Commission on October 20, 1983.

(41) Revisions to sections 2.3, 3.1, 3.4, and 4.1 of the Rules and Regulations for the Fee System of the Air Quality Control Program, as adopted by the Louisiana Environmental Control Commission on January 26, 1983, were submitted by the Louisiana Department of Natural Resources (now the Department of Environmental Quality), Air Quality Division, on November 17, 1983.

(42) Deletion of Air Control Regulation 14.0, and deletion of hydrocarbon guideline standard from Table 1, 1a, and 2, as adopted by the Louisiana Environmental Control Commission on July 28, 1983, was submitted by the Governor on October 19, 1983.

(43) Revisions to the Air Control Regulation 22.22 as adopted by the Louisiana Environmental Control Commission on September 23, 1982, and submitted by the Governor on July 14, 1983.

(i) *Incorporation by reference.* (A) Regulation 22.22.1(A) and 22.22.2(A) Letter dated July 14, 1983, from the State of Louisiana and which change the reference for the test methods from a CTG document to the Louisiana Air Quality Regulations Division's Source Test Manual. These regulations were adopted on September 23, 1982.

(44) On October 4, 1985, the Governor submitted a revision entitled, ''Protection of Visibility for Mandatory Class I Federal Areas,'' July 12, 1985. This submittal included new source review and visibility monitoring strategy as adopted by the Secretary of the Louisiana Department of Environmental Quality in October 1985.

(45) On August 14, 1985, the Governor of Louisiana submitted a Prevention of Significant Deterioration (PSD) Plan including Air Quality Regulations—Part V, (sections 90.1–90.19) as adopted by the Secretary of the Department of Environmental Quality on May 23, 1985. Air Quality Regulations—Part V provides authority for the State to implement the PSD program in certain areas of the State. Letters of commitment for air quality modeling (dated September 30, 1985) and Federal stack height and dispersion technique regulation (dated June 3, 1986) were submitted by the Secretary of Louisiana Department of Environmental Quality.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulations—Part V, Prevention of Significant Deterioration of Air Quality, except that no provision of this part applies to Indian Reservations meaning any Federally recognized reservation established by Treaty, Agreement,Executive Order, or Act of Congress, as adopted on May 23, 1985.

(B) A letter from the Secretary of Louisiana Department of Environmental Quality dated September 30, 1985, which commits the Department to use only the EPA approved air quality models in accordance with the provisions of 40 CFR 51.24(1) [now 40 CFR 51.166(1)] and to submit a stack height

and dispersion techniques SIP revision by April 8, 1986.

(C) A letter from the Secretary of Louisiana Department of Environmental Quality dated June 3, 1986, which certifies that the Department interprets the provisions of section 90.8 of Louisiana PSD regulations as having the same meaning as the Federal stack height and dispersion technique regulation, 40 CFR 51.1(hh)-(kk) [now 40 CFR 51.100(hh)-(kk)], promulgated by EPA in the FEDERAL REGISTER of July 8, 1985, and that the State will apply, implement, and enforce these requirements in the PSD permitting process.

(D) A narrative explanation and additional requirements entitled ''Prevention of Significant Deterioration Revisions to the Louisiana State Implementation Plan''.

(46) On January 6, 1988, the Governor of Louisiana submitted a revision to the State Implementation Plan (SIP) that contained Air Quality Regulations, LAC 33: Part III, Section 921, Stack Heights, as adopted by the Secretary of the Department of Environmental Quality on December 20, 1987. Section 921, Stack Heights, enables the State to ensure that the degree of emission limitation required for the control of any air pollutant under its SIP is not affected by that portion of any stack height which exceeds GEP or by any other dispersion technique.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulations—LAC 33: Part III, Section 921, Stack Heights, as adopted by the Secretary of the Department of Environmental Quality on December 20, 1987.

(ii) Other material—none.

(47) A revision exempting four rural carbon black plants—Ashland Chemical, Louisa, LA; Cabot Corporation, Centerville, LA; Cabot Corporation, Ville Platte, LA; and Columbian Chemicals, Franklin, LA—from further controls on acetylene emissions as required under Louisiana Air Quality Regulation 22.8 received from the Governor on January 12, 1987, and amended May 13, 1987.

(i) *Incorporation by reference.* (A) A letter dated May 29, 1987, from Martha Madden, Secretary, Louisiana Department of Environmental Quality, to the Governor of Louisiana approving the exemptions from further controls on acetylene emissions for the four rural carbon black plants and ordering each facility to maintain its emissions at or below the levels specified in the attached summary of emissions.

(ii) *Additional material.* (A) A summary of VOC emissions for each of the four rural carbon black plants exempted from further controls on acetylene emissions under Louisiana Air Quality Regulation 22.8.

(48) Part II of the Visibility Protection Plan was submitted by the Governor on October 26, 1987.

(i) *Incorporation by reference.* (A) Revision entitled, ''Louisiana State Implementation Plan Revision: Protection of Visibility: Proposed Part II Long-Term Strategy, October 26, 1987''. This submittal includes a visibility long-term strategy and general plan provisions as approved and adopted by the Secretary of the Louisiana Department of Environmental Quality on October 26, 1987.

(B) Letter dated October 26, 1987, from Secretary of Louisiana Department of Environmental Quality (LDEQ), to the Governor approving the SIP revision.

(ii) *Additional material.* (A) Letter dated June 16, 1988, from Administrator, Air Quality Division, LDEQ, to Chief, SIP/New Source Section (6T–AN), EPA Region 6, committing to make its three-year periodic review report available to the public as well as to EPA.

(49) The recodified and revised regulations of the Louisiana Administrative Code, Title 33, Part 3 (LAC:33:III) that were adopted by the State effective December 20, 1987, and submitted by the Governor by letters dated January 6, 1988, and October 4, 1988, for inclusion in the SIP. These regulations include LAC:33:III: Chapters 1, 5, 7, 9, 11, 13, 15, 17, 23, 56, 60, 63, and 65, except LAC:33:III:111 ''Particulate matter,'' and ''Suspended particulate matter,'' LAC:33:III:505.J, and LAC:33:III:505.L, which were previously disapproved, and LAC:33:III:6099, which was withdrawn by the Governor.

(i) *Incorporation by reference.* (A) Louisiana Administrative Code, Title 33, Part 3, Chapters 1, 5, 7, 9, 11, 13, 15, 17,

23, 56, 60, 63, and 65 as adopted by Louisiana Department of Environmental Quality on December 20, 1987, except LAC:33:III: section 111 ''Particulate matter,'' ''Suspended particulate matter,'' section 505.J, section 505.L, and section 6099.

(ii) *Additional material.* (A) A letter dated December 16, 1987, from Martha Madden, Secretary of the Louisiana Department of Environmental Quality, to the Governor of Louisiana, approving the codified air quality regulations effective December 20, 1987.

(50) The Louisiana State Implementation Plan for PM_{10} as submitted by the Governor in a letter dated July 26, 1988, and adopted by the State effective June 20, 1988.

(i) *Incorporation by reference.* (A) Revisions to the Louisiana Administrative Code, Title 33, Chapter III, Sections 111, 509.B, 509.I.8.a, 709, 1301.B, 1303.A, 1305.A., 1311.B, 1311.C, 1313.C, 1315, 1319.G, 5609.A.1, 5609.A.2, 5609.A.3, and Tables 1, 1a, and 2 of chapter 7 as adopted effective June 20, 1988.

(B) A letter dated May 22, 1989, from Mike D. McDaniel, Louisiana Department of Environmental Quality, to William B. Hathaway, U.S. Environmental Protection Agency.

(ii) *Additional material.* (A) A letter dated July 26, 1988, from Paul H. Templet, Secretary, Louisiana Department of Environmental Quality, to the Governor of Louisiana approving the adoption of amendments to the Louisiana Air Quality Regulations to implement the new PM_{10} standard effective June 20, 1988.

(B) A narrative supplement to the Louisiana PM_{10} submitted by the Governor in a letter dated July 26, 1988.

(51) Revision to the Louisiana Lead State Implementation Plan (SIP) submitted by the Governor in a letter dated July 18, 1986.

(i) *Incorporation by reference.* (A) An amended Compliance Order dated January 31, 1986, issued by the Secretary of the State of Louisiana Department of Environmental Quality in the matter of Ethyl Corporation, Baton Rouge, Louisiana.

(ii) *Additional material.* (A) Computer modeling submitted by letter dated May 27, 1988, from Doug Walters, Louisiana Department of Environmental Quality, to Joe Winkler, U.S. Environmental Protection Agency.

(B) Explanatory letter dated January 27, 1989, from Gustave Von Bodungen, Louisiana Department of Environmental Quality, to Gerald Fontenot, U.S. Environmental Protection Agency.

(52) On October 31, 1983, the Governor submitted a request to revise the Louisiana SIP to include an Alternative Emission Reduction Plan for the Vulcan Materials Company facility located at Geismar, Ascension Parish. A permit was issued by LDEQ on March 24, 1983 (#1829T), but after several revisions, the final permit for the trade is #1829T (M–2), issued July 28, 1989. This Bubble uses credits obtained from installation of a vapor recovery system on a tank farm of five VOC storage tanks in lieu of controls on one process vent and one VOC storage tank.

(i) *Incorporation by reference.* (A) LDEQ Permit number 1829T (M–2), Revision of Bubble Permit—Vulcan Chemicals Company, Geismar, Ascension Parish, Louisiana, issued July 28, 1989.

(ii) *Additional material.* (A) Letter dated June 28, 1989, from the Administrator of the Louisiana Office of Air Quality, giving assurances that the State has resources and plans necessary to strive toward attainment and maintenance of the NAAQS for ozone taking into account the influence of this Bubble on air quality.

(53) On May 5, 1986, the Governor submitted a request to revise the Louisiana SIP to include an alternate Emission Reduction Plan for the American Cyanamid Company Fortier Plant located at Westwego, Jefferson Parish. A permit was issued by LDEQ on October 17, 1984 (#1896), but after several revisions, the final permit for the trade is #1896 (M–2), issued July 20, 1989. This Bubble uses credits obtained from the change of service of three storage tanks from VOC to non-VOC usage to offset reductions required by controlling one methanol storage tank.

(i) *Incorporation by reference.* (A) LDEQ permit number 1896 (M–2) issued July 20, 1989, a Revision to Bubble Permit No. 1896 (M–1)—American Cyanamid Company, Westwego, Jefferson Parish, Louisiana.

(ii) *Additional material.* (A) Letter dated June 6, 1989, from the Administrator of the Louisiana Office of Air Quality, giving the State position that the Volatile Organic Compounds that have been shifted out of the emission reduction credit donating tanks have not been shifted elsewhere in the nonattainment area.

(B) Letter received by EPA on March 31, 1989, from Mr. Addison Tatum of the State of Louisiana, including calculations for the permit.

(54) A revision to allow an alternative emission reduction plan (''bubble'') for the Vista Chemical Company facility in Westlake, Louisiana, as submitted by the Governor on November 22, 1983, and amended by Louisiana Department of Environmental Quality Air Quality Division permit #1828 M–2 issued September 25, 1986.

(i) *Incorporation by reference.* (A) Louisiana Department of Environmental Quality Air Quality Division permit #1828 M–2 issued September 25, 1986.

(ii) *Additional material.*—None.

(55) A revision to allow an alternative emission reduction plan [''bubble''] for the Union Carbide facility in Hahnville, Louisiana, as submitted by the Governor on October 19, 1983, and amended by Louisiana Department of Environmental Quality Air Quality Division permit #1836T(M–1) issued April 23, 1987, and revised on May 5, 1990.

(i) *Incorporation by reference.* (A) Louisiana Department of Environmental Quality Air Quality Division permit #1836T(M–1) issued April 23, 1987, and revised on May 5, 1990.

(ii) *Additional material.*—None.

(56) Revisions to Louisiana's volatile organic compound regulations were submitted by the Governor on June 13, 1990.

(i) *Incorporation by reference.* (A) Revisions to Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Volatile Organic Compounds, Subchapter B. Organic Solvents, Section 2123. Organic Solvents, paragraphs C.6. and D.3., effective February 20, 1990.

(57) Revisions to the Louisiana State Implementation Plan for LAC:33:III: Section 509 Prevention of Significant Deterioration (PSD) sections (509)(B) (Baseline Area) (1), 509(B) (Baseline Area) (2), 509(B) (Baseline Concentration) (1), (509)(B) (Baseline Concentration) (1)(b), 509(B) (Baseline Concentration) (2)(a), 509(B) (Baseline Concentration) (2)(b), 509(B) (Baseline Date) (1)(a), 509(B) (Baseline Date) (1)(b), 509(B) (Baseline Date) (2), 509(B) (Baseline Date) (2)(a), 509(B) (Baseline Date) (2)(b), 509(B) (Net Emission Increases) (4), 509(D), and 509(P)(4), as adopted by the Secretary of Louisiana Department of Environmental Quality (LDEQ) on July 20, 1990, were submitted by the Governor on October 26, 1990.

(i) *Incorporation by reference.* (A) LAG:33:III: Section 509 Prevention of Significant Deterioration Sections (509)(B) (Baseline Area) (1), 509(B) (Baseline Area) (2), 509(B) (Baseline Concentration) (1)(a), (509)(B) (Baseline Concentration) (1)(b), 509(B) (Baseline Concentration) (2)(a), 509(B) (Baseline Concentration) (2)(b), 509(B) (Baseline Date (1)(a), 509(B) (Baseline Date) (1)(b), 509(B) (Baseline Date) (2), 509(B) (Baseline Date) (2)(a), 509(B) (Baseline Date) (2)(b), 509(B) (Net Emission Increase) (4), 509(D), and 509(P)(4) as amended on July 20, 1990.

(ii) *Additional material.*—None.

(58) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(i) *Incorporation by reference.* (A) Louisiana Air Quality Regulation section 6.6 as revised and adopted by the Louisiana Environmental Control Commission on February 26, 1981, submitted by the Governor on March 25, 1981, and approved by the Environmental Protection Agency on June 9, 1982.

(ii) *Additional material.* (A) Letter dated March 24, 1981, from the Secretary of the Louisiana Department of Natural Resources to the Governor of Louisiana acknowledging approval of Louisiana Air Quality Regulation section 6.6 by the Louisiana Environmental Control Commission effective on February 26, 1981.

(59) A revision to the Louisiana State Implementation Plan (SIP) to include revisions to LAC, Title 33, ''Environmental Quality,'' Part III. Air, Chapter

15. Emission Standards for Sulfur Dioxide, effective April 20, 1992, and submitted by the Governor by cover letter dated August 5, 1992.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, ''Environmental Quality,'' Part III. Air, Chapter 15. Emission Standards for Sulfur Dioxide, Section 1501, ''Degradation of Existing Emission Quality Restricted;'' Section 1503, ''Emission Limitations;'' Table 4, ''Emissions—Methods of Contaminant Measurement;'' Section 1505, ''Variances;'' Section 1507, ''Exceptions;'' Section 1509, ''Reduced Sulfur Compounds (New and Existing Sources);'' Section 1511, ''Continuous Emissions Monitoring;'' and Section 1513, ''Recordkeeping and Reporting,'' effective April 20, 1992.

(60) A revision to the Louisiana State Implementation plan (SIP) to include revisions to Louisiana Administrative Code (LAC), Title 33, Environmental Quality, Part III. Air, Chapter 1, Chapter 21, and Chapter 61 as submitted by the Governor on June 13, 1990, October 26, 1990, May 24, 1991, and March 24, 1992.

(i) *Incorporation by reference.* (A) LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21 (December 1987). Control of Emission of Organic Compounds, except section 2105. Storage of Volatile Organic Components (Small Tanks).

(B) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 1. General Provisions, section 111. Definitions—Administrator, Administrative Authority*, Attainment Areas, Nonattainment Areas, SIP, Volatile Organic Compound, and Chapter 21. Control of Emission of Organic Compounds, Subchapter A. General, section 2103. Storage of Volatile Organic Compounds paragraphs A., C., D.1., D.1.a. through D.1.d., D.2., D.2.a., D.2.b., D.3., E., F., H.1., H.2., I. effective January 20, 1990.

(C) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds Subchapter A. General, section 2107. Volatile Organic Compounds-Loading, section 2109. Oil/Water-Separation, paragraphs A.1. through A.4., B. through D., section 2113. Housekeeping, paragraphs A.1 through A.3., A.5., section 2117. Exemptions, section 2119. Variances B., and Subchapter D. Cutback Paving Asphalt section 2127. Cutback Paving Asphalt, paragraphs A., B., C.1., C.2., C.3., D., D.1., D.1.b., D.1.c., D.1.d., and D.2., effective February 20, 1990.

(D) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, Subchapter B. Organic Solvents, section 2123. Organic Solvents, paragraphs C., C.1. through C.5., C.7. through C.9., effective February 20, 1990.

(E) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, Subchapter F. Gasoline Handling, section 2131. Filling of Gasoline Storage Vessels, paragraphs A., B., B.1., B.3., D., D.1., D.4., D.5., E., F., and G., section 2133. Gasoline Bulk Plants paragraphs A., A.1., A.3. through A.6., B., B.3., B.4., C. and D., section 2135. Bulk Gasoline Terminals paragraphs A., B., B.1.a., B.1.a.i., B.1.a.iii., B.1.d., B.2. through B.5., and C. through E., E.1. through E.4., and section 2137. Gasoline Terminal Vapor-Tight Control Procedure. effective July 20, 1990.

(F) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds Subchapter A. General, section 2101. Compliance Schedules, section 2115. Waste Gas Disposal paragraphs A., B., C., D., F., G., H., I.1. through I.5., J. through K., section 2121. Fugitive Emission Control paragraphs B., B.1, B.2., C., C.1.b., C.1.b.i., C.1.b.ii., C.1.b.iii., C.1.c, C.2., C.2.b., C.2.b.i., C.4., C.4.c., C.4.d., C.5. and G., Subchapter C. Vapor Degreasers, section 2125. Vapor Degreasers paragraphs A., A.1., A.2., A.2.i. through A.2.m., A.3., A.3.a. through A.3.d., B., B.1., B.7., B.8., C., C.1., C.1.a. through C.1.c., C.1.i., C.1.j., and D. through G., Subchapter E. Perchloroethylene Dry Cleaning Systems, section 2129. Perchloroethylene Dry Cleaning Systems paragraphs A., A.1., A.2., A.2.a. through A.2.c., C., and D., Subchapter H. Graphic Arts, section 2143. Graphic Arts (Printing) by Rotogravure and Flexographic Processes paragraphs A.,

A.1., A.3., A.5., B., C. and D., Subchapter I. Pharmaceutical Manufacturing Facilities, section 2145. Pharmaceutical Manufacturing Facilities, paragraphs A., A.1., A.1.c., and E. through G. effective November 20, 1990.

(G) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emissions of Organic Compounds Subchapter A. General, section 2103. Storage of Volatile Organic Compounds paragraphs B.,D., D.2.c. through D.2.e., G., H.3., I.2.c., I.4. and I.5., section 2107. Volatile Organic Compounds-Loading paragraphs D.3. and D.4., section 2109. Oil/Water Separation paragraphs A., B.4., and B.5., section 2111. Pumps and Compressors, section 2113. Housekeeping paragraph A.4., section 2119. Variances paragraph A.; Subchapter D. Cutback Paving Asphalt, section 2127. Cutback Paving Asphalt paragraphs C. and D.1.a. effective April 20, 1991.

(H) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 21. Control of Emission of Organic Compounds, section 2115. Waste Gas Disposal paragraphs I., K., and K.4., section 2121. Fugitive Emission Control paragraphs A., C.1., C.1.b.iv. through C.1.b.vi., C.4.a., C.4.b., C.4.h., D., D.1., D.1.b. through D.1.f., and D.2., section 2123. Organic Solvents paragraphs A., A.1. through A.3., B., B.1., B.1.a. through B.1.c., C.11., D., D.1. through D.9., E., E.1. through E.7., F., and F.1. through F.4., Subchapter F. Gasoline Handling, section 2131. Filling of Gasoline Storage Vessels paragraphs D.2. and D.3., section 2135. Bulk Gasoline Terminals paragraph E.5., Subchapter G-Petroleum Refinery Operations, section 2139. Refinery Vacuum Producing Systems paragraphs A. and B. and section 2141. Refinery Process Unit Turnarounds effective July 20, 1991.

(I) Revisions to LAC, Title 33, Environmental Quality, Part III. Air, Chapter 61. Division's Sources Test Manual, Subchapter A. Method 43–Capture Efficiency Test Procedures section 6121 through section 6131 effective July 20, 1991.

(J) Revisions to LAC, Title 33, Environmental Quality, Part III. Air Chapter 1. General Provisions, section 111. Definitions-Coating, Department, Distance from Source to Property Line, Exceedance, Hydrocarbon, Leak, Miscellaneous Metal Parts and Products Coating, Nonattainment Area, Ozone Exceedance, SIP effective August 20, 1991.

(61) A revision to the Louisiana SIP to include revisions to LAC, Title 33, ''Environmental Quality,'' Part III. Air, Chapter 21, Control of Emission of Organic Compounds, Section 2132—Stage II Vapor Recovery Systems for Control of Vehicle Refuelling Emissions at Gasoline Dispensing Facilities effective November 20, 1992, and submitted by the Governor by cover letter dated November 10, 1992.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, ''Environmental Quality,'' Part III. Air, Chapter 21, Control of Emission of Organic Compounds, Section 2132—Stage II Vapor Recovery Systems for Control of Vehicle Refuelling Emissions at Gasoline Dispensing Facilities, effective November 20, 1992; and Chapter 65, Section 6523—Fee Schedule Listing, effective November 20, 1992.

(ii) *Additional materials.* (A) November 15, 1993, narrative plan addressing: Legal authority, control strategy, compliance schedules, air quality surveillance, public notice, determination of regulated universe, Louisiana Department of Environmental Quality recordkeeping, facility recordkeeping, annual in-use above ground inspections, program penalties, training, and benefits.

(62) Alternative emission reduction (bubble) plan for the Dow Chemical facility located in Plaquemine, Iberville Parish, as adopted by the Louisiana Environmental Control Commission on July 28, 1983, submitted by the Governor on October 19, 1983, and amended by the Louisiana Department of Environmental Quality with permit number 1838T(M–2) issued on October 16, 1991.

(ii) Incorporation by reference.

(A) Permit number 1838T(M–2) as issued by the Louisiana Department of Environmental Quality on October 16, 1991.

(ii) *Additional material.* (A) Letter dated September 17, 1991, from the Administrator of the Office of Air Quality at the Louisiana Department of Environmental Quality to the Chief of the Planning Section at the Air Programs

Branch of the U.S. Environmental Protection Agency—Region 6, furnishing State assurances.

(63) The State is required to implement a Small Business Stationary Source Technical and Environmental Compliance Assistance Program (PROGRAM) as specified in the plan revision submitted by the Governor on October 22, 1992. This plan submittal, as adopted by the Secretary of the Louisiana Department of Environmental Quality (LDEQ) on October 22, 1992, was developed in accordance with section 507 of the Clean Air Act (CAA).

(i) *Incorporation by reference.* (A) Enrolled House Bill No. 1319 (Act 1037, Regular Session, 1992), signed into law by the Governor on July 13, 1992, and effective upon signature, enacting Louisiana Revised Statutes (R.S.) 30:2061 and 2062 and R.S. 36:239(H). Included in Act 1037 are provisions establishing a small business stationary source compliance assistance program; creating the State Ombudsman Office for small business; creating a Compliance Advisory Panel (CAP); establishing membership of the CAP; and establishing CAP powers, duties, and functions.

(B) Louisiana R.S. 30:2060N.(6), ''Toxic air pollutant emission control program'', (the small business stationary source technical and environmental compliance assistance program subsection), as in effect on October 22, 1992.

(C) State of Louisiana Executive Order No. EWE 92–4 dated February 10, 1992, and effective upon signature, creating and establishing an Office of Permits within the Executive Department, Office of the Governor.

(D) Letter from Louisiana Governor Edwards to Mr. Kai Midboe, Secretary, LDEQ, dated February 20, 1992, designating the Governor's Office of Permits as the official State office to serve as Ombudsman for the PROGRAM per the mandate of section 507 of the Federal CAA. The Coordinator of the Office of Permits will be responsible for administering the Small Business Ombudsman portion of the PROGRAM.

(ii) *Additional material.* (A) Narrative SIP Revision entitled, ''Louisiana SIP, Concerning CAA Amendments of 1990, Section 507, Small Business Stationary Source Technical and Environmental Compliance Assistance (Program); November 15, 1992.''

(B) ''State of Louisiana Memorandum of Understanding Between the Governor's Office of Permits and the Louisiana Department of Environmental Quality'', signed (and effective) on April 7, 1992, by Mr. Kai David Midboe, Secretary, LDEQ, and Ms. Martha A. Madden, Coordinator, Governor's Office of Permits.

(C) Legal opinion letter dated October 22, 1992, from James B. Thompson, III, Assistant Secretary for Legal Affairs and Enforcement, LDEQ, to Mr. B. J. Wynne, Regional Administrator, EPA Region VI, regarding ''Appointment to Small Business Advisory Panel''.

(64) Revisions to the Louisiana SIP addressing VOC RACT catch-up requirements were submitted by the Governor of Louisiana by letters dated December 21, 1992, and April 14, 1993.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs G., I., I.4.; section 2109. Oil/Water Separation, paragraph B.4.; Subchapter B. Organic Solvents; section 2123. Organic Solvents, paragraph D.6.; Subchapter C. Vapor Degreasers; section 2125. Vapor Degreasers, paragraph D.; Subchapter F. Gasoline Handling; section 2131. Filling of Gasoline Storage Vessels, paragraphs D., D.1., D.3., G.; section 2135. Bulk Gasoline Terminals, paragraph A.; Subchapter H. Graphic Arts; section 2143. Graphic Arts (Printing) by Rotogravure and Flexographic Processes, paragraph B, as adopted by LDEQ on October 20, 1992.

(B) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2115. Waste Gas Disposal, introductory paragraph, paragraphs H., H.1., H.1.a through H.1.d, H.2, H.2.a, H.2.b, H.3, L., as adopted by LDEQ on March 20, 1993.

(ii) *Additional material.* (A) Letters dated November 10, 1992 and December 21, 1992, signed by Edwin Edwards, Governor of Louisiana.

(B) Letter dated April 14, 1993, signed by Edwin Edwards, Governor of Louisiana.

(C) Letter of negative declaration dated March 29, 1994, signed by Gustave Von Boduungen, P.E., Assistant Secretary, LDEQ.

(65) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 9, Section 919, (February 2, 1993), and a technical correction (October 20, 1994). These revisions are for the purpose of implementing an emission statement program for stationary sources within the ozone nonattainment areas.

(i) *Incorporation by reference.* (A) Revisions to LAC, title 33, Part III, Chapter 9, *General Regulations on Control of Emissions and Emissions Standards*, Section 919, *Emission Inventory*, adopted in the *Louisiana Register*, Vol. 19, No. 2, 184–186, February 20, 1993. All subsections except B.2.a. and B.2.d.

(B) Revisions to LAC, title 33, Part III, Chapter 9, *General Regulations on Control of Emissions and Emissions standards*, Section 919, *Emission Inventory*, adopted in the *Louisiana Register*, Vol 20, No. 10, 1102, October 20, 1994. Subsections B.2.a. and B.2.d.

(66) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 2, Section 223 and Chapter 19, Sections 1951–1973. These revisions are for the purpose of implementing a Clean Fuel Fleet Program to satisfy the Federal requirements for a Clean Fuel Fleet Program to be part of the SIP for Louisiana.

(i) *Incorporation by reference.* (A) Revision to LAC, Title 33, Part III, Chapter 2, Rules and Regulations for the Fee System of the Air Quality Control Programs, Section 223, Fee Schedule Listing, adopted in the *Louisiana Register*, Vol. 20, No. 11, 1263, November 20, 1994.

(B) Revision to LAC, Title 33, Part III, Chapter 19, Mobile Sources, Subchapter B, Clean Fuel Fleet Program, Sections 1951–1973, adopted in the *Louisiana Register*, Vol. 20, No. 11, 1263–1268, November 20, 1994.

(67) A revision to the Louisiana State Implementation Plan for General Conformity: LAC 33:III. CHAPTER 14. SUBCHAPTER A ''Determining Conformity of General Federal Actions to State or Federal Implementation Plan'' as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 20, No. 11, 1268, November 20, 1994, was submitted by the Governor on November 10, 1994.

(i) *Incorporation by reference.* (A) Louisiana General Conformity: LAC 33:III. CHAPTER 14. SUBCHAPTER A ''Determining Conformity of General Federal Actions to State or Federal Implementation Plan'' as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 20, No. 11, 1268, November 20, 1994.

(68) A revision to the Louisiana SIP addressing the nonattainment NSR program for Louisiana was submitted by the Governor of Louisiana on March 3, 1993, and November 15, 1993.

(i) *Incorporation by reference.* (A) Revision to LAC, Title 33, Part III. Air, Chapter 5. Permit Procedures, by the addition of Section 504. Nonattainment New Source Review Procedures, as promulgated in the Louisiana Register, Volume 19, Number 2, 176–183, February 20, 1993; effective February 20, 1993, and submitted by the Governor on March 3, 1993.

(B) Revisions to LAC, Title 33, Part III. Air, Chapter 5. Permit Procedures, Section 504. Nonattainment New Source Review Procedures, Subsections: A., Applicability, Paragraphs A(1), A(2), A(3), A(4); D., Nonattainment New Source Requirements, Paragraph D(4); Delete G., Permit Procedures, Public Participation and Notification; Reletter H., Definitions, to G., and revise definitions for Major Modification (paragraphs: a., c.iii, c.iv, c.v.(a)(b), c.vi, c.vii), Major Stationary Source (paragraphs: a., d.i); Delete Table 1; Renumber Table 2, Major Stationary Source/Major Modification Emission Thresholds, to Table 1, and revise Footnote 1., as promulgated in the Louisiana Register, Volume 19, Number 11, 1420–1421, November 20, 1993; effective November 20, 1993, and submitted by the Governor on November 4, 1993.

(ii) *Additional material.* (A) Letter dated January 7, 1994, signed by the Governor of Louisiana, which clarifies

that section 504 is to be reviewed under the SIP program.

(69) The Governor of Louisiana submitted revisions to Regulation Louisiana Administrative Code on March 22, 1995 to incorporate changes in the Federal PSD permitting regulations for PM–10 increments.

(i) *Incorporation by reference.* (A) Revisions to Regulation Louisiana Administrative Code 33:III.Chapter 5, Section 509, effective February 20, 1995: Section B. Definitions: Baseline Date; Section B. Definitions: Net Emissions Increase; Section D. Ambient Air Increments; Section I.8.a.; Section K.2.; and Section P.4.

(70) The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Pointe Coupee Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act as amended in 1990. The redesignation meets the Federal requirements of section 182(a)(1) of the Clean Air Act as a revision to the Louisiana ozone State Implementation Plan for Pointe Coupee Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Pointe Coupee Parish on December 20, 1996.

(i) *Incorporation by reference.* Letter dated August 31, 1995, from Mr. Gustave Von Bodungen, P.E., Assistant Secretary, Louisiana Department of Environmental Quality, transmitting a copy of the Pointe Coupee Parish maintenance plan for the EPA's approval.

(ii) *Additional material.* (A) Letter dated August 28, 1995, from Governor Edwin E. Edwards of Louisiana to Ms. Jane Saginaw, Regional Administrator, requesting the reclassification and redesignation of Pointe Coupee Parish to attainment for ozone.

(B) The ten year ozone maintenance plan, including emissions projections and contingency measures, submitted to EPA as part of the Pointe Coupee Parish redesignation request on December 20, 1995.

(71) A revision to the Louisiana SIP addressing the 15 percent rate-of-progress requirements was submitted by the Governor of Louisiana by cover letter dated December 15, 1995. This revision, submitted to satisfy the requirements of section 182(b) of the Clean Air Act (Act), will aid in ensuring that reasonable further progress is made towards attaining the national ambient air quality standard (NAAQS) for ozone.

(i) *Incorporation by reference.* (A) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2108. Marine Vapor Recovery, paragraphs B.1., B.2., B.3., B.3.a. through B.3.d., B.4.a., B.4.b., B.5., B.6., D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.2., D.3., D.4.a., D.4.b., D.4.c., D.4.c.i., D.4.c.ii., D.4.d., D.4.e., D.4.e.i., D.4.e.ii., D.4.f., D.4.g., E.2., E.2.a. through E.2.c., F.1., F.2., F.3., G.1., G.2., as adopted by LDEQ on October 20, 1988.

(B) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2108. Marine Vapor Recovery, paragraphs A., B. Definitions-Barge, Crude Oil, Gasoline, Ship, C., C.1., C.2., C.3., C.3.a. through C.3.d. (note: paragraphs B.1., B.2., B.3., and B.3.a. through B.3.d., as adopted on October 20, 1988, were moved to C.1., C.2., C.3., and C.3.a. through C.3.d. without repromulgating), C.4., C.4.a., C.4.b., C.5., C.6. (note: paragraphs B.4.a., B.4.b., B.5., and B.6., as adopted on October 20, 1988, were moved to C.4.a., C.4.b., C.5., and C.6. without repromulgating), D.1., D.1.a. through D.1.c., D.2., D.2.a. through D.2.c., D.3., E., E.1., E.1.a., E.1.a.i., E.1.a.ii., E.1.b., E.2., E.3. (note: D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.2., and D.3., as adopted October 20, 1988, were moved to E.1.a., E.1.a.i., E.1.a.ii., E.1.b., E.2., and E.3. without repromulgating), E.4., E.4.a., E.4.b., E.4.c., E.4.c.i., E.4.c.ii., E.4.d., E.4.e., E.4.e.i., E.4.e.ii., E.4.f., E.4.g. (note: D.4.a., D.4.b., D.4.c., D.4.c.i., D.4.c.ii., D.4.d., D.4.e., D.4.e.i., D.4.e.ii., D.4.f., and D.4.g, as adopted on October 20, 1988, were moved to E.4.a., E.4.b., E.4.c., E.4.c.i., E.4.c.ii., E.4.d., E.4.e., E.4.e.i., E.4.e.ii., E.4.f., and E.4.g. without repromulgating), E.5., F., F.1., F.2., F.2.a. through F.2.e. (note: E.2. and E.2.a. through E.2.c., as adopted on October 20, 1988, were moved to F.2. and F.2.a through F.2.c. without repromulgating), G., G.1., G.2., G.3. (note: F.1.,

F.2., and F.3., as adopted October 20, 1988, were moved to G.1., G.2., and G.3. without repromulgating), H., H.1., H.2. (note: G.1. and G.2., as adopted on October 20, 1988, were moved to H.1. and H.2. without repromulgating), as adopted by LDEQ on November 20, 1990.

(C) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2122. Fugitive Emission Control for Ozone Nonattainment Areas, paragraphs A., A.1. through A.5., A.6., A.6.a. through A.6.d., B. Definitions-Connector, Good Performance Level, Heavy Liquid Service, Inaccessible Valve/Connector, In Vacuum Service, Light Liquid, Light Liquid Service, Liquid Service, Process Unit, Process Unit Shutdown, Unrepairable Component, C., C.1., C.1.a. through C.1.c., C.2. through C.5., D., D.1., D.1.a., D.1.a.i., D.1.a.ii., D.1.b., D.1.b.i. through D.1.b.v., D.1.c. through D.1.e., D.2., D.2.a., D.2.b., D.2.b.i. through D.2.b.iii., D.3., D.3.a. through D.3.d., D.4., D.4.a. through D.4.k., D.5., E.1.a. through E.1.f., E.2., E.3., E.3.a., E.3.a.i. through E.3.a.v., E.3.b., E.3.b.i. through E.3.b.v., F., F.1., F.2., F.2.a. through F.2.j., F.3., G., G.1. through G.13., as adopted by LDEQ on October 20, 1994.

(D) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2122. Fugitive Emission Control for Ozone Nonattainment Areas, paragraphs E., E.1., E.1.g., as adopted by LDEQ on November 20, 1994.

(E) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs A., B., D.1., D.1.a. through D.1.d., D.2., D.2.a. through D.2.e., E., F., G., G.1. through G.4., H., H.1., H.2., H.2.a. through H.2.e., H.3., I., I.1., I.2., I.2.a. through I.2.c., I.3. through I.5., as adopted by LDEQ on December 20, 1994.

(F) Revisions to LAC, Title 33, Environmental Quality, Part III. Air;

Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraphs C., D., D.3., as adopted by LDEQ on November 20, 1995.

(G) Revisions to LAC, Title 33, Environmental Quality, Part III. Air; Chapter 21. Control of Emissions of Organic Compounds, Subchapter A. General; section 2103. Storage of Volatile Organic Compounds, paragraph D.4., as adopted by LDEQ on December 20, 1995.

(H) Reasonable Further Progress Agreed To Order, dated December 16, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of BASF Corporation, Geismar, Louisiana.

(I) Reasonable Further Progress Agreed To Order, dated August 22, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of CosMar Company, Inc., Carville, Louisiana.

(J) Reasonable Further Progress Agreed To Order, dated September 26, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of Shell Chemical Company, Geismar, Louisiana.

(K) Reasonable Further Progress Agreed To Order, dated September 8, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of Uniroyal Chemical Company, Inc., Geismar, Louisiana.

(L) Reasonable Further Progress Agreed To Order, dated September 8, 1994, issued by the Assistant Secretary of the State of Louisiana Department of Environmental Quality in the matter of Vulcan Chemicals, Geismar, Louisiana.

(M) SIP narrative plan entitled, ''Revision to the 15% Rate of Progress Plan and 1990 Emissions Inventory,'' dated December 28, 1995, page 11, Section 2.2, 1996 Target Level Emissions, first paragraph; page 23, Section 5, Table 2—Reductions in Plan; page 173, Appendix G, table—Reductions from Industrial Sources through 1996 Used for the 15% Requirement, which ends on page 174.

(ii) *Additional materials.* (A) SIP narrative plan entitled, ''Revision to 15% Rate of Progress Plan and 1990 Emissions Inventory,'' submitted by the Governor of Louisiana on December 15,

1995, except Section 6. Contingency Measures Documentation, Appendix M. Contingency Reductions Documentation, and Appendix N. Banking Regulations.

(B) Letter dated May 3, 1996, from Gustave Von Bodungen, Louisiana Department of Environmental Quality, to Thomas Diggs, U.S. Environmental Protection Agency, transmitting supplemental documentation for the 15 Percent Rate of Progress Plan.

(72) Revisions to the Louisiana SIP addressing VOC RACT Negative Declarations. The Governor of Louisiana submitted the negative declarations for reasonably available control technology (RACT) for the Baton Rouge ozone nonattainment area on December 15, 1996. Section 172(c)(1) of the Clean Air Act requires nonattainment areas to adopt, at a minimum, RACT to reduce emissions from existing sources. Pursuant to section 182(b)(2) of the Act, for moderate and above ozone nonattainment areas, the EPA has identified 13 categories for such sources and developed the Control Technique Guidelines (CTGs) or Alternate Control Techniques (ACTs) documents to implement RACT at those sources. When no major volatile organic compound (VOC) sources for a CTG/ACT category exist in a nonattainment area, a State may submit a negative declaration for that category. Louisiana's submittal included two negative declaration letters from Mr. Gustave Von Bodungen to Ms. Karen Alvarez dated April 6, 1994, and June 20, 1994, for the following source categories: offset lithography, plastic parts-business machines, plastic parts-others, wood furniture, aerospace coatings, autobody refinishing, and shipbuilding coatings/repair. This submittal satisfies section 182(b)(2) of the Clean Air Act Amendments of 1990 for these particular CTG/ACT source categories for the Baton Rouge ozone nonattainment area.

(i) *Incorporation by reference.* The letter dated December 15, 1995, from the Governor of Louisiana to the Regional Administrator, submitting a revision to the Louisiana SIP for VOC RACT rules, which included VOC RACT negative declarations.

(ii) *Additional material.* (A) The negative declaration letter dated April 16, 1994, from Mr. Gustave Von Bodungen to Ms. Karen Alvarez.

(B) The negative declaration letter dated June 20, 1994, from Mr. Gustave Von Bodungen to Ms. Karen Alvarez.

(73) The Louisiana Department of Environmental Quality submitted a redesignation request and maintenance plan for Calcasieu Parish on December 20, 1995. The redesignation request and maintenance plan meet the redesignation requirements in section 107(d)(3)(E) of the Act. The redesignation meets the Federal requirements of section 182(a)(1) of the Act as a revision to the Louisiana ozone State Implementation Plan for Calcasieu Parish. The EPA therefore approved the request for redesignation to attainment with respect to ozone for Calcasieu Parish on June 2, 1997.

(i) *Incorporation by reference.* Letter dated December 20, 1995, from Governor Edwin E. Edwards of Louisiana to Ms. Jane Saginaw, Regional Administrator, transmitting a copy of the Calcasieu Parish maintenance plan and requesting the redesignation of Calcasieu Parish to attainment for ozone.

(ii) *Additional material.*The ten year ozone maintenance plan, including emissions projections and contingency measures, submitted to EPA as part of the Calcasieu Parish redesignation request on December 20, 1995.

(74) Revisions to the Louisiana Department of Environmental Quality Regulation Title 33, Part III, Chapter 21, Control of Emission of Organic Compounds, submitted by the Governor on December 15, 1995.

(i) *Incorporation by reference.* (A) LAC, Title 33, Part III, Chapter 21, Section 2147, Limiting Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in the Synthetic Organic Chemical Manufacturing Industry, adopted in the Louisiana Register on April 20, 1995 (LR 21:380).

(B) LAC, Title 33, Part III, Chapter 21, Section 2149, Limiting Volatile Organic Compound Emissions from Batch Processing, adopted in the Louisiana Register on April 20, 1995 (LR 21:387).

(C) LAC, Title 33, Part III, Chapter 21, Section 2151, Limiting Volatile Organic Compound Emissions from Cleanup Solvent Processing, adopted in the

Louisiana Register on April 20, 1995 (LR 21:391).

(ii) *Additional material.* (A) Letter of negative declaration for wood furniture dated January 21, 1997, from the State of Louisiana Department of Environmental Quality.

(75) A revision to the Louisiana State Implementation Plan for General Conformity: LAC 33:III. Chapter 14. Subchapter A ''Determining Conformity of General Federal Actions to State or Federal Implementation Plan,'' Section 1405.B as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 23, No. 6, 720, June 20, 1997, was submitted by the Governor on September 8, 1997.

(i) *Incorporation by reference.* (A) Louisiana General Conformity: LAC 33:III. Chapter 14. Subchapter A ''Determining Conformity of General Federal Actions to State or Federal Implementation Plan'', Section 1405.B as adopted by the Louisiana Department of Environmental Quality Secretary and published in the Louisiana Register, Vol. 23, No. 6, 720, June 20, 1997.

(76) [Reserved]

(77) Revisions to the Louisiana Administrative Code, Title 33, Part III, Chapter 21, Section 2149 (LAC 33:III.2149), ''Limiting Volatile Organic Compound Emissions from Batch Processing,'' submitted by the Governor on March 23, 1998.

(i) *Incorporation by reference.* LAC 33:III Chapter 21, revised paragraph 2149.A.2.b; paragraphs 2149.C.2.a, b, and c become paragraphs 2149.C.2.d, e, and f respectively; and add new paragraphs 2149.C.2.a, b, and c, as adopted in the Louisiana Register on November 20, 1997 (LR 23:1507).

(ii) *Additional material.*None.

(78) [Reserved]

(79) Site-specific revision to the 15% Rate-of-Progress plan submitted by the Governor in a letter dated December 20, 1997. The revision provides for a schedule extension for installation of guide pole sliding cover gaskets on 33 external floating roof tanks located at the Baton Rouge refinery of Exxon Company U.S.A.

(i) *Incorporation by reference.* Letters dated July 17, 1997, and September 12, 1997, from the LDEQ to Exxon Company U.S.A. approving the compliance date extension; which are included in the State Implementation Plan submittal entitled, ''Summary of 15% Rate-of-Progress State Implementation Plan Revision,'' dated December 20, 1997.

(ii) *Additional material.* (A) Letter from the Governor of Louisiana dated December 20, 1997, transmitting a copy of the State Implementation Plan revision.

(B) Letters dated November 13, 1996; May 14, 1997; and July 3, 1997; from Exxon Company U.S.A. to the LDEQ requesting the compliance date extension and including a list of the subject tanks, the date of the next maintenance downtime, and emissions estimates for the tanks; which are included in the State Implementation Plan submittal entitled, ''Summary of 15% Rate-of-Progress State Implementation Plan Revision,'' dated December 20, 1997.

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations (CFR) that were made by documents published in the FEDERAL REGISTER since January 1, 2015 are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters, parts and subparts as well as sections for revisions.

For changes to this volume of the CFR prior to this listing, consult the annual edition of the monthly List of CFR Sections Affected (LSA). The LSA is available at *www.govinfo.gov*. For changes to this volume of the CFR prior to 2001, see the ''List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000'' published in 11 separate volumes. The ''List of CFR Sections Affected 1986–2000'' is available at *www.govinfo.gov*.
