

§ 41.120

reports, local or state building department plan review documents, or other documents deemed appropriate by the DOT Operating Administration.

§ 41.120 Acceptable model codes.

(a) This section describes the standards that must be used to meet the seismic design and construction requirements of this part.

(b)(1) The following are model codes which have been found to provide a level of seismic safety substantially equivalent to that provided by use of the 1988 National Earthquake Hazards Reduction Program (NEHRP) Recommended Provisions (Copies are available from the Office of Earthquakes and Natural Hazards, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.):

(i) The 1991 International Conference of Building Officials (ICBO) Uniform Building Code, published by the International Conference of Building Officials, 5360 South Workman Mill Rd., Whittier, Cal. 90601;

(ii) The 1992 Supplement to the Building Officials and Code Administrators International (BOCA) National Building Code, published by the Building Officials and Code Administrators, 4051 West Flossmoor Rd., Country Club Hills, Ill. 60478-5795; and

(iii) The 1992 Amendments to the Southern Building Code Congress (SBCC) Standard Building Code, published by the Southern Building Code Congress International, 900 Montclair Rd., Birmingham, Ala. 35213-1206.

(2) Versions of the NEHRP seismic maps have been adopted along with the NEHRP Recommended Provisions into the BOCA National and SBCC Standard building codes. The seismic zone map in the ICBO Uniform Building Code is also based on one of the USGS maps of horizontal ground acceleration. However, the ICBO map should be used only with the ICBO code. Also, it is not appropriate to use the NEHRP maps with the ICBO Uniform Building Code, because the design requirements of building codes are keyed to the numerical values of the map they reference.

(c) Revisions to the model codes listed in paragraph (b) of this section that are substantially equivalent to or exceed the then current or immediately

49 CFR Subtitle A (10-1-20 Edition)

preceding edition of the NEHRP recommended provisions, as it is updated, may be approved by a DOT Operating Administration to meet the requirements in this part.

(d) State, county, local, or other jurisdictional building ordinances adopting and enforcing the model codes, listed in paragraph (b) of this section, in their entirety, without significant revisions or changes in the direction of less seismic safety, meet the requirements in this part. For ordinances that do not adopt the model codes listed in paragraph (b) of this section, substantial equivalency of the ordinances to the seismic safety level contained in the NEHRP recommended provisions must be determined by the DOT Operating Administration before the ordinances may be used to meet the requirements of this part.

(e) DOT Operating Administrations that, as of January 5, 1990, required seismic safety levels higher than those imposed by this part in new building construction programs will continue to maintain such levels in force.

(f) Emergencies. Nothing in this part applies to assistance provided for emergency work or for assistance essential to save lives and protect property and public health and safety performed pursuant to sections 402, 403, 502, and 503 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5170a, 5170b, 5192, and 5193, or for temporary housing assistance programs and individual and family grants performed pursuant to Sections 408 and 411 of the Stafford Act, 42 U.S.C. 5174 and 5178. However, this part applies to other provisions of the Stafford Act after a Presidentially declared major disaster or emergency when assistance actions involve new construction or total replacement of a building.

§ 41.125 Judicial review.

Nothing in this part is intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the DOT, its Operating Administrations, its officers, or any person.

PART 71—STANDARD TIME ZONE BOUNDARIES

Sec.

- 71.1 Limits defined; exceptions authorized for certain rail operating purposes only.
- 71.2 Annual advancement of standard time.
- 71.3 Atlantic zone.
- 71.4 Eastern zone.
- 71.5 Boundary line between eastern and central zones.
- 71.6 Central zone.
- 71.7 Boundary line between central and mountain zones.
- 71.8 Mountain zone.
- 71.9 Boundary line between mountain and Pacific zones.
- 71.10 Pacific zone.
- 71.11 Alaska zone.
- 71.12 Hawaii-Aleutian zone.
- 71.13 Samoa zone.
- 71.14 Chamorro Zone.

AUTHORITY: Secs. 1-4, 40 Stat. 450, as amended; sec. 1, 41 Stat. 1446, as amended; secs. 2-7, 80 Stat. 107, as amended; 100 Stat. 764; Act of Mar. 19, 1918, as amended by the Uniform Time Act of 1966 and Pub. L. 97-449, 15 U.S.C. 260-267; Pub. L. 99-359; Pub. L. 106-564, 15 U.S.C. 263, 114 Stat. 2811; 49 CFR 1.59(a), unless otherwise noted.

SOURCE: Amdt. 71-11, 35 FR 12318, Aug. 1, 1970, unless otherwise noted.

§ 71.1 Limits defined; exceptions authorized for certain rail operating purposes only.

(a) This part prescribes the geographic limits of each of the nine standard time zones established by section 1 of the Standard Time Act, as amended by section 4 of the Uniform Time Act of 1966 (15 U.S.C. 261). The Uniform Time Act also contains lists of operating exceptions granted for specified rail carriers, whose operations cross the time zone boundaries prescribed by this part. (15 U.S.C. 265).

(b) Any rail carrier whose operations cross a time zone boundary prescribed by this part may apply for an operating exception to the General Counsel, Department of Transportation, Washington, DC 20590. However, each rail carrier for which an operating exception is granted shall, in its advertisements, time cards, station bulletin boards, and other publications, show arrival and departure times in terms of the standard time for the place concerned.

(c) The time zones established by the Standard Time Zone Act, as amended by the Uniform Time Act of 1966, are Atlantic, eastern, central, mountain, Pacific, Alaska, Hawaii-Aleutian, Samoa, and Chamorro.

[Amdt. 71-11, 35 FR 12318, Aug. 1, 1970, as amended by Amdt. 71-21, 52 FR 41631, Nov. 18, 1986; 78 FR 15884, Mar. 13, 2013]

§ 71.2 Annual advancement of standard time.

(a) The Uniform Time Act of 1966 (15 U.S.C. 260a(a)), as amended, requires that the standard time of each State observing Daylight Saving Time shall be advanced 1 hour beginning at 2 a.m. on the second Sunday in March of each year and ending at 2 a.m. on the first Sunday in November. This advanced time shall be the standard time of each zone during such period. The Act authorizes any State to exempt itself from this requirement. States in two or more time zones may exempt either the entire State or may exempt the entire area of the State lying within either time zone.

(b) Section 3(b) of the Uniform Time Act of 1966 (15 U.S.C. 260a(b)) provides that "it is the express intent of Congress * * * to supersede any and all laws of the States or political subdivisions thereof insofar as they may now or hereafter provide for advances in time or changeover dates different from those specified in [section 3(a) of that Act]", which are those specified in paragraph (a) of this section.

[Amdt. 71-11, 35 FR 12318, Aug. 1, 1970, as amended by Amdt. 71-21, 52 FR 41631, Nov. 18, 1986; 78 FR 15885, Mar. 13, 2013]

§ 71.3 Atlantic zone.

The first zone, the Atlantic standard time zone, includes that part of the United States that is between 52°30' W. longitude and 67°30' W. longitude and that part of the Commonwealth of Puerto Rico that is west of 67°30' W. longitude, but does not include any part of the State of Maine.

§ 71.4 Eastern zone.

The second zone, the eastern standard time zone, includes that part of the United States that is west of 67°30' W. longitude and east of the boundary line described in § 71.5, and includes all of
