(1) Chooses to claim a foreign tax credit as provided in section 901 for the taxable year for which he is required to include in gross income under section 951(a) or 951A(a) an amount attributable to the earnings and profits of a controlled foreign corporation; and

(2) Does not choose to claim a foreign tax credit as provided in section 901 for a taxable year in which he receives an amount which is excluded from gross income under section 959(a)(1) and which is attributable to such earnings and profits of such controlled foreign corporation,

No deduction shall be allowed under section 164 for the taxable year of such exclusion for any foreign income taxes paid or accrued on or with respect to such excluded amount.

(b) *Example.* The application of this section may be illustrated by the following example:

(1) *Facts.* USP, a domestic corporation, owns all the one class of stock of CFC, a controlled foreign corporation. Both corporations use the calendar year as the taxable year and the functional currency of CFC is the U.S. dollar. All of CFC's earnings and profits of \$80x for Year 1 (after payment of foreign income taxes of \$20x on its total income of \$100x for such year) are attributable to amounts required under section 951(a) to be included in USP's gross income for Year 1 because such income is general category foreign base company services income of CFC. For Year 1, USP chooses to claim a foreign tax credit for the \$20x of foreign income taxes which for such year are paid by CFC and deemed paid by USP under section 960(a) and § 1.960-2(b). In Year 2, CFC distributes the entire \$80x of Year 1 previously taxed earnings and profits, from which a foreign income tax of \$8x is withheld. Also in Year 2, CFC pays \$40x of interest to USP, from which a foreign income tax of \$4x is withheld. For Year 2, USP chooses to claim deductions for its creditable foreign income taxes under section 164 rather than a foreign tax credit under section 901.

(2) *Analysis.* Although USP does not choose to claim a foreign tax credit for Year 2, under section 960(c)(4) and paragraph (a) of this section it may not deduct the \$8x of foreign income taxes

under section 164. USP may, however, deduct under such section the foreign income tax of \$4x which is withheld from the interest paid by CFC in Year 2.

[T.D. 7120, 36 FR 10859, June 4, 1971, as amended by T.D. 7649, 44 FR 60089, Oct. 18, 1979; T.D. 9882, 84 FR 69119, Dec. 17, 2019]

§ 1.960-6 Overpayments resulting from increase in limitation for taxable year of exclusion.

(a) *Amount of overpayment.* If an increase in the limitation under section 960(c)(1) and § 1.960-4 for a taxable year of exclusion exceeds the tax (determined before allowance of any credits against tax) imposed by chapter 1 of the Code for such year, the amount of such excess shall be deemed an overpayment of tax for such year and shall be refunded or credited to the taxpayer in accordance with chapter 65 (section 6401 and following) of the Code.

(b) *Example.* The application of this section may be illustrated by the following example:

(1) *Facts.* USP, a domestic corporation, owns all of the one class of stock of CFC, a controlled foreign corporation. Both corporations use the calendar year as the taxable year, and the functional currency of CFC is the U.S. dollar. For Year 1, CFC has total income of \$100,000x on which it pays foreign income taxes of \$20,000x. All of CFC's earnings and profits for Year 1 of \$80,000x are attributable to an amount which is required under section 951(a) to be included in USP's gross income for Year 1 because such income is general category foreign base company services income of CFC. By reason of such income inclusion USP is deemed for Year 1 to have paid under section 960(a), and is required under section 78 to include in gross income for such year, the \$20,000x ($\$20,000x \times \$80,000x / \$80,000x$) of foreign income taxes paid by CFC for such year. USP also derives \$100,000x of taxable income from sources within the United States for Year 1. For Year 2, USP has \$4,000x of taxable income, all of which is derived from sources within the United States. No part of CFC's earnings and profits for Year 2 is attributable to an amount required under section 951(a) or section 951A(a) to be included in USP's gross

Internal Revenue Service, Treasury

§ 1.960-6

income. During Year 2, CFC makes one distribution consisting of its \$80,000x earnings and profits for Year 1, all of which is excluded under section 959(a)(1) from USP's gross income for Year 2, and from which distribution foreign income taxes of \$1,000x are withheld. For Year 1 and Year 2, USP

claims the foreign tax credit under section 901, subject to the limitation of section 904.

(2) *Analysis.* The U.S. tax liability of USP is determined as follows for such years, assuming a corporate tax rate of 21%:

TABLE 1 TO PARAGRAPH (b)(2)

Year 1		
Taxable income of USP:		
U.S. sources		\$100,000.00x
Sources without the U.S.:		
Amount required to be included in USP's gross income under section 951(a)	\$80,000.00x	
Foreign income taxes deemed paid by USP under section 960(a) and included in USP's gross income under section 78 (\$20,000x × \$80,000x/\$80,000x)	20,000.00x	100,000.00x
Total taxable income		200,000.00x
U.S. tax payable for Year 1:		
U.S. tax before credit ([\$200,000x × 21%])		42,000.00x
Credit: Foreign income taxes of \$20,000x, but not to exceed limitation of \$21,000x (\$42,000x × \$100,000x/\$200,000x)		20,000.00x
U.S. tax payable		22,000.00x

TABLE 2 TO PARAGRAPH (b)(2)

Year 2		
Taxable income of USP, consisting of income from U.S. sources		\$4,000x
U.S. tax before credit (\$4,000x × 21%)		840x
Section 904 limitation for Year 2:		
Limitation for Year 2 before increase under section 960(c)(1) (\$840x × \$0/\$4,000x)		0
Plus: Increase in section 904 limitation for Year 2 under section 960(c)(1):		
Amount by which Year 1 limitation was increased by reason of inclusion in USP's gross income under section 951(a) for Year 1 (\$21,000x-[\$21,000x × \$0/\$100,000x])	\$21,000x	
Less: Foreign income taxes allowed as a credit for Year 1 which were allowable solely by reason of such section 951(a) inclusion (\$20,000x-\$0)	20,000x	
Balance	1,000x	

TABLE 2 TO PARAGRAPH (b)(2)—Continued

But: Such balance not to exceed foreign income taxes paid by USP for Year 2 with respect to \$80,000x distribution excluded under section 959(a)(1) (\$1,000x tax withheld)	1,000x	1,000x
Limitation for Year 2		1,000x
U.S. tax payable for Year 2:		
U.S. tax before credit (\$4,000x × 21%)		840x
Credit: Foreign income taxes of \$1,000x, but not to exceed limitation of \$1,000x for Year 2		1,000x
U.S. tax payable		None
Overpayment of tax for Year 2:		
Increase in limitation under section 960(c)(1) for Year 2		1,000x
Less: Tax imposed for Year 2 under chapter 1 of the Code		840x
Excess treated as overpayment		160x

[T.D. 7120, 36 FR 10859, June 4, 1971, as amended by T.D. 7649, 44 FR 60089, Oct. 18, 1979; T.D. 9882, 84 FR 69119, Dec. 17, 2019]

§ 1.960-7 Applicability dates.

(a) Except as provided in paragraph (b) of this section, §§ 1.960-1 through 1.960-6 apply to each taxable year of a foreign corporation ending on or after December 4, 2018, and to each taxable year of a domestic corporation that is a United States shareholder of the foreign corporation in which or with which such taxable year of such foreign corporation ends.

(b) Section 1.960-1(c)(2) and (d)(3)(ii) apply to taxable years of a foreign corporation beginning after December 31, 2019, and to each taxable year of a domestic corporation that is a United States shareholder of the foreign corporation in which or with which such taxable year of such foreign corporation ends. For taxable years of a foreign corporation that end on or after December 4, 2018, and also begin before January 1, 2020, see § 1.960-1(c)(2) and (d)(3)(ii) as in effect on December 17, 2019. Paragraphs (b)(4), (5), and (6), (c)(1)(ii), (iii), and (iv), and (d)(3)(ii)(A) and (B) of § 1.960-1, and paragraphs (b)(2), (b)(3)(i), (b)(5)(i), (b)(5)(iv)(A), and (c)(4), (5), and (7) of § 1.960-2, apply to taxable years of foreign corporations beginning on or after December 28, 2021, and to each taxable year of a domestic corporation that is a United States shareholder of the foreign cor-

poration in which or with which such taxable year of such foreign corporation ends. For taxable years of foreign corporations beginning before December 28, 2021, with respect to the paragraphs described in the preceding sentence, see §§ 1.960-1 and 1.960-2 as in effect on November 12, 2020.

[T.D. 9922, 85 FR 72072, Nov. 12, 2020, as amended by T.D. 9959, 87 FR 375, Jan. 4, 2022]

§ 1.961-1 Increase in basis of stock in controlled foreign corporations and of other property.

(a) *Increase in basis*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, the basis of a United States shareholder's—

(i) Stock in a controlled foreign corporation; or

(ii) Property (as defined in paragraph (b)(1) of this section) by reason of the ownership of which he is considered under section 958(a)(2) as owning stock in a controlled foreign corporation shall be increased under section 961(a), as of the last day in the taxable year of such corporation on which it is a controlled foreign corporation, by the amount required to be included with respect to such stock or such property in such shareholder's gross income under section 951(a) for his taxable year in which or with which such taxable year of such corporation ends. The

increase in basis provided by the preceding sentence shall be made only to the extent to which such amount required to be included in gross income under section 951(a) was so included in gross income.

(2) *Limitation on amount of increase in case of election under section 962.* In the case of a United States shareholder who makes the election under section 962 for the taxable year, the amount of the increase in basis provided by subparagraph (1) of this paragraph shall not exceed the amount of United States tax paid in accordance with such election with respect to the amounts included in such shareholder's gross income under section 951(a) for such year (as determined under § 1.962-1).

(b) *Rules of application—(1) Property defined.* The property of a United States shareholder referred to in paragraph (a)(1)(ii) of this section shall consist of—

- (i) Stock in a foreign corporation;
- (ii) An interest in a foreign partnership; or
- (iii) A beneficial interest in a foreign estate or trust (as defined in section 7701(a)(31)).

(2) *Increase with respect to each share of stock.* Any increase under paragraph (a) of this section in the basis of a United States shareholder's stock in a foreign corporation shall be made in the amount included in gross income under section 951(a) or in the amount of United States tax paid in accordance with an election under section 962, as the case may be, with respect to each share of such stock.

(c) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. Domestic corporation M owns 800 of the 1,000 shares of the one class of stock in controlled foreign corporation R which owns all of the one class of stock in controlled foreign corporation S. Corporations M, R, and S use the calendar year as a taxable year. In 1964, S Corporation has \$100,000 of earnings and profits after the payment of \$11,250 of foreign income taxes, and \$100,000 of subpart F income. Corporation R has no earnings and profits. With respect to S Corporation, M Corporation is required to include in gross income \$80,000 ($800/1,000 \times \$100,000$) under section 951(a), and \$9,000 ($\$80,000/\$100,000 \times \$11,250$) under section 78. On

December 31, 1964, M Corporation must increase the basis of each share of its stock in R Corporation by \$100 ($\$80,000/800$).

Example 2. A, an individual United States shareholder, owns all of the 1,000 shares of the one class of stock in controlled foreign corporation T. Corporation T and A use the calendar year as a taxable year. In 1964, T Corporation has \$80,000 of earnings and profits after the payment of \$20,000 of foreign income taxes, and \$80,000 of subpart F income. A makes the election under section 962 for 1964 and in accordance with such election pays a United States tax of \$23,000 with respect to the \$80,000 included in his gross income under section 951(a). On December 31, 1964, A must increase the basis of each share of his stock in T Corporation by \$23 ($\$23,000/1,000$).

[T.D. 6850, 30 FR 11854, Sept. 16, 1965]

§ 1.961-2 Reduction in basis of stock in foreign corporations and of other property.

(a) *Reduction in basis—(1) In general.* Except as provided in subparagraph (2) of this paragraph, the adjusted basis of a United States person's—

- (i) Stock in a foreign corporation;
- (ii) Interest in a foreign partnership; or
- (iii) Beneficial interest in a foreign estate or trust (as defined in section 7701(a)(31)),

with respect to which such United States person receives an amount which is excluded from gross income under section 959(a), shall be reduced under section 961(b), as of the time such person receives such excluded amount, by the sum of the amount so excluded and any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(2) *Limitation on amount of reduction in case of election under section 962.* In the case of a distribution of earnings and profits attributable to amounts with respect to which an election under section 962 has been made, the amount of the reduction in basis provided by subparagraph (1) of this paragraph shall not exceed the sum of—

(i) The amount of such distribution which is excluded from gross income under section 959(a) after the application of section 962(d) and §1.962-3; and

(ii) Any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(b) *Reduction with respect to each share of stock.* Any reduction under paragraph (a) of this section in the adjusted basis of a United States person's stock in a foreign corporation shall be made with respect to each share of such stock in the sum of—

(1)(i) The amount excluded from gross income under section 959(a); or

(ii) The amount excluded from gross income under section 959(a) after the application of section 962(d) and §1.962-3; and

(2) The amount of any income, war profits, or excess profits taxes imposed by any foreign country or possession of the United States on or with respect to the earnings and profits attributable to such excluded amount when such earnings and profits were actually distributed directly or indirectly through a chain of ownership described in section 958(a)(2).

(c) *Amount in excess of basis.* To the extent that the amount of the reduction in the adjusted basis of property provided by paragraph (a) of this section exceeds such adjusted basis, the amount shall be treated as gain from the sale or exchange of property.

(d) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. (a) Domestic corporation M owns all of the 1,000 shares of the one class of stock in controlled foreign corporation R, which owns all of the 500 shares of the one class of stock in controlled foreign corporation S. Each share of M Corporation's stock in R Corporation has a basis of \$200. Corporations M, R, and S use the calendar year as a taxable year. In 1963, S Corporation has \$100,000 of earnings and profits after the payment of \$50,000 of foreign income taxes and \$100,000 of subpart F income. For 1963, M Corporation includes \$100,000 in gross income

under section 951(a) with respect to S Corporation. In accordance with the provisions of §1.961-1, M Corporation increases the basis of each of its 1,000 shares of stock in R Corporation to \$300 (\$200 + \$100,000/1,000) as of December 31, 1963.

(b) On July 31, 1964, M Corporation sells 250 of its shares of stock in R Corporation to domestic corporation N at a price of \$350 per share. Corporation N satisfies the requirements of paragraph (d) of §1.959-1 so as to qualify as M Corporation's successor in interest. On September 30, 1964, the earnings and profits attributable to the \$100,000 included in M Corporation's gross income under section 951(a) for 1963 are distributed to R Corporation which incurs a withholding tax of \$10,000 on such distribution (10 percent of \$100,000) and an additional foreign income tax of 33½ percent or \$30,000 by reason of the inclusion of the net distribution of \$90,000 (\$100,000 minus \$10,000) in its taxable income for 1964. On June 30, 1965, R Corporation distributes the remaining \$60,000 of such earnings and profits to corporations M and N: Corporation M receives \$45,000 (750/1,000 × \$60,000) and excludes such amount from gross income under section 959(a); Corporation N receives \$15,000 (250/1,000 × \$60,000) and, as M Corporation's successor in interest, excludes such amount from gross income under section 959(a). As of June 30, 1965, M Corporation must reduce the adjusted basis of each of its 750 shares of stock in R Corporation to \$200 (\$300 minus (\$45,000/750 + \$10,000/1,000 + \$30,000/1,000)); and N Corporation must reduce the basis of each of its 250 shares of stock in R Corporation to \$250 (\$350 minus (\$15,000/250 + \$10,000/1,000 + \$30,000/1,000)).

Example 2. The facts are the same as in paragraph (a) of example 1, except that in addition, on July 31, 1964, R Corporation sells its 500 shares of stock in S Corporation to domestic corporation P at a price of \$600 per share. Corporation P satisfies the requirements of paragraph (d) of §1.959-1 so as to qualify as M Corporation's successor in interest. On September 30, 1964, S Corporation distributes \$100,000 of earnings and profits to P Corporation, which earnings and profits are attributable to the \$100,000 included in M Corporation's gross income under section 951(a) for 1963. Corporation P incurs a withholding tax of \$10,000 on the distribution from S Corporation (10 percent of \$100,000). As M Corporation's successor in interest, P Corporation excludes the \$90,000 it receives from gross income under section 959(a). As of September 30, 1964, P Corporation must reduce the basis of each of its 500 shares of stock in S Corporation to \$400 (\$600 minus (\$90,000/500 + \$10,000/500)).

[T.D. 6850, 30 FR 11854, Sept. 16, 1965]

§ 1.962-1 Limitation of tax for individuals on amounts included in gross income under section 951(a).

(a) *In general.* An individual United States shareholder may, in accordance with § 1.962-2, elect to have the provisions of section 962 apply for his taxable year. In such case—

(1) The tax imposed under chapter 1 of the Internal Revenue Code on all amounts which are included in his gross income for such taxable year under section 951(a) shall (in lieu of the tax determined under section 1) be an amount equal to the tax which would be imposed under section 11 if such amounts were received by a domestic corporation (determined in accordance with paragraph (b)(1) of this section), and

(2) For purposes of applying sections 960(a) and 960(d) (relating to foreign tax credit) such amounts shall be treated as if received by a domestic corporation (as provided in paragraph (b)(2) of this section).

(3) Thus, an individual United States shareholder may elect to be subject to tax at corporate rates on amounts included in his gross income under section 951(a) and to have the benefit of a credit for certain foreign taxes paid with respect to the earnings and profits attributable to such amounts. Section 962 also provides rules for the treatment of an actual distribution of earnings and profits previously taxed in accordance with an election of the benefits of this section. See § 1.962-3.

(b) *Rules of application.* For purposes of this section—

(1) *Application of section 11.* For purposes of applying section 11 for a taxable year as provided in paragraph (a)(1) of this section in the case of an electing United States shareholder—

(i) *Determination of taxable income.* The term *taxable income* means the excess of—

(A) The sum of—

(1) All amounts required to be included in his gross income under section 951(a) for the taxable year with respect to a foreign corporation of which he is a United States shareholder, including—

(i) His section 965(a) inclusion amounts (as defined in § 1.965-1(f)(38)); and

(ii) His domestic pass-through owner shares (as defined in § 1.965-1(f)(21)) of section 965(a) inclusion amounts with respect to deferred foreign income corporations (as defined in § 1.965-1(f)(17)) of which he is a United States shareholder; plus

(2) His GILTI inclusion amount (as defined in § 1.951A-1(c)(1)) for the taxable year; plus

(3) All amounts which would be required to be included in his gross income under section 78 for the taxable year with respect to the amounts referred to in paragraph (b)(1)(i)(A)(1) and (2) of this section if the shareholder were a domestic corporation; over

(B) The sum of the following deductions, but no other deductions or amounts—

(1) His section 965(c) deduction amount (as defined in § 1.965-1(f)(42)) for the taxable year;

(2) His domestic pass-through owner shares of section 965(c) deduction amounts corresponding to the amounts referred to in paragraph (b)(1)(i)(A)(1)(ii) of this section; and

(3) The portion of the deduction under section 250 and § 1.250(a)-1 that would be allowed to a domestic corporation equal to the percentage applicable to global intangible low-taxed income for the taxable year under section 250(a)(1)(B) (including as modified by section 250(a)(3)(B)) multiplied by the sum of the amount described in paragraph (b)(1)(i)(A)(2) of this section and the amount described in paragraph (b)(1)(i)(A)(3) of this section that is attributable to the amount described in paragraph (b)(1)(i)(A)(2) of this section.

(ii) [Reserved]

(2) *Allowance of foreign tax credit—(i) In general.* Subject to the applicable limitation of section 904 and to the provisions of this paragraph (b)(2), there shall be allowed as a credit against the United States tax on the amounts described in paragraph (b)(1)(i) of this section the foreign income, war profits, and excess profits taxes deemed paid under section 960(a) or section 960(d) by the electing United States shareholder with respect to such amounts.

(ii) *Application of sections 960(a) and 960(d).* In applying sections 960(a) and 960(d) for purposes of this paragraph

(b)(2) in the case of an electing United States shareholder, the term “domestic corporation” as used in sections 960(a), 960(d), and 78, and the term “corporation” as used in sections 901 and 960(d)(2)(A) and (B), are treated as referring to such shareholder with respect to the amounts described in paragraph (b)(1)(i) of this section.

(iii) *Carryback and carryover of excess tax deemed paid.* For purposes of this paragraph (b)(2), other than with respect to section 951A category income (as defined in § 1.904-4(g)) (including section 951A category income that is reassigned to a separate category for income resourced under a treaty), any amount by which the foreign income, war profits, and excess profits taxes deemed paid by the electing United States shareholder for any taxable year under section 960 exceed the limitation determined under paragraph (b)(2)(iv)(A) of this section is treated as a carryback and carryover of excess tax paid under section 904(c), except that in no case will excess tax paid be deemed paid in another taxable year under section 904(c) if an election under section 962 by the shareholder does not apply for such taxable year. Such carrybacks and carryovers are applied only against the United States tax on amounts described in paragraph (b)(1)(i) of this section.

(iv) *Limitation on credit.* For purposes of determining the limitation under section 904 on the amount of the credit for foreign income, war profits, and excess profits taxes—

(A) Deemed paid with respect to amounts described in subparagraph (1)(i) of this paragraph, the electing United States shareholder’s taxable income shall be considered to consist only of the amounts described in such subparagraph (1)(i), and

(B) Paid with respect to amounts other than amounts described in subparagraph (1)(i) of this paragraph, the electing United States shareholder’s taxable income shall be considered to consist only of amounts other than the amounts described in such subparagraph (1)(i).

(v) *Effect of choosing benefits of sections 901 to 905.* The provisions of this subparagraph shall apply for a taxable year whether or not the electing

United States shareholder chooses the benefits of subpart A of part III of subchapter N of chapter 1 (sections 901 to 905) of the Internal Revenue Code for such year.

(c) *Example.* The application of this section may be illustrated by the following example.

(1) *Facts.* (i) Individual A is a U.S. resident who owns all of the shares of the one class of stock in CFC, a controlled foreign corporation. A and CFC each use the calendar year as their U.S. and foreign taxable years and the U.S. dollar as their functional currency. A owns no direct or indirect interest in any other controlled foreign corporation.

(ii) For the 2019 taxable year, CFC has \$6,000,000 of pre-foreign tax earnings with respect to which it accrues and pays \$1,000,000 of foreign income tax, leaving \$5,000,000 of after-tax net income. Of this amount, \$3,000,000 is general category tested income as defined in section 951A(c)(2), and \$2,000,000 is passive category subpart F income described in sections 952 and 904(d)(1)(C) that is all in a single subpart F income group under §§ 1.954-1(c)(1)(iii) and 1.960-1(d)(2)(ii)(B)(2)(i). Of the \$1,000,000 of foreign income taxes paid or accrued by CFC, \$600,000 is allocated and apportioned to its general category tested income group and \$400,000 is allocated and apportioned to its passive category subpart F income group under § 1.960-1(d)(3)(ii).

(iii) For the 2019 taxable year, A includes under section 951A(a) all \$3,000,000 of the tested income of CFC as A’s GILTI inclusion amount, as defined in § 1.951A-1(c)(1). In addition, A includes under section 951(a)(1) the \$2,000,000 of passive category subpart F income of CFC.

(iv) For the 2019 taxable year, A earns \$1,000,000 of foreign source passive category gross income and \$3,000,000 of U.S. source gross income. A pays \$100,000 of foreign withholding taxes with respect to the \$1,000,000 of foreign source passive category gross income. A incurs \$1,000,000 of deductible expenses for the 2019 taxable year that are definitely related to all of A’s gross income and are properly allocated and apportioned under §§ 1.861-

8(b)(5) and 1.861-8T(c)(1) among the section 904 statutory and residual groupings on the basis of the relative amounts of gross income in each grouping.

(v) A elects to apply section 962 and chooses to claim credits under section 901 for the 2019 taxable year.

(2) *Analysis with respect to section 962 taxable income.* (i) Section 962(a)(1) and § 1.962-1(a)(1) provide that when an individual United States shareholder elects to apply section 962 for a taxable year, the U.S. tax imposed with respect to amounts that the individual includes under section 951(a) (the “section 951(a) inclusions”) equals the tax that would be imposed under section 11 if the amounts were included by a domestic corporation under section 951(a). For purposes of section 962, an amount included under section 951A is treated as an inclusion under section 951(a). See section 951A(f)(1)(A). Therefore, A has total section 951(a) inclusions of \$5,000,000: a \$2,000,000 passive category subpart F inclusion and a \$3,000,000 GILTI inclusion amount. A is taxed at the corporate rates under section 11 with respect to these inclusions.

(ii) Section 962(a)(2), § 1.962-1(a)(2), and § 1.962-1(b)(2) provide that sections 960(a) and 960(d) apply to the section 951(a) inclusions of an electing individual United States shareholder as though the inclusions were received by a domestic corporation, and the electing individual United States shareholder is allowed a credit against the U.S. tax imposed with respect to the section 951(a) inclusions.

(iii) Section 960(a) deems a domestic corporation that is a United States shareholder of a controlled foreign corporation to pay the foreign income taxes paid or accrued by the foreign corporation that are properly attributable to the foreign corporation’s items of income included in the domestic corporation’s income under section 951(a). The foreign income taxes of a CFC that are properly attributable to such items are the domestic corporation’s proportionate share of the taxes that are allocated and apportioned to the relevant subpart F income group. See § 1.960-1(c) and § 1.960-2(b). A owns 100 percent of CFC, and includes all of its subpart F income, which is in a sin-

gle subpart F income group. Therefore, all of the \$400,000 of foreign income taxes that are allocable to CFC’s subpart F income are properly attributable to the section 951(a) inclusion of A, and A is deemed to pay these taxes.

(iv) Section 960(d) provides that a domestic corporation that has an inclusion in income under section 951A is deemed to pay an amount of foreign income taxes equal to 80 percent of the product of the domestic corporation’s inclusion percentage multiplied by the sum of all tested foreign income taxes. Tested foreign income taxes are the foreign income taxes of a controlled foreign corporation that are properly attributable to its tested income that the domestic corporation takes into account under section 951A. The foreign income taxes that are properly attributable to the tested income taken into account by a domestic corporation are the domestic corporation’s proportionate share of the controlled foreign corporation’s foreign income taxes that are allocated and apportioned to the relevant tested income. See § 1.960-1(c) and § 1.960-2(c). Because A owns 100% of CFC and takes all \$3,000,000 of CFC’s tested income into account in computing A’s GILTI inclusion amount, all \$600,000 of the foreign income taxes that are allocated and apportioned to the general category tested income group of CFC are tested foreign income taxes. A has an inclusion percentage of 100 percent because A’s GILTI inclusion amount equals all of A’s share of the tested income of CFC. A is therefore deemed to pay under section 960(d) 80 percent of the \$600,000 of tested foreign income taxes of CFC, or \$480,000 of the tested foreign income taxes.

(v) Section 1.962-1(b)(1)(i)(A) provides that, for purposes of computing taxable income under section 962, gross income includes amounts that would be included under section 78 if the shareholder with the section 951(a) inclusions were a domestic corporation. Section 78 requires a domestic corporation to include in its gross income the foreign income taxes that it is deemed to pay under section 960, computed without regard to the 80 percent limitation under section 960(d), and to which the benefits of section 901 apply. See section 78. A therefore includes in gross

§ 1.962-1

income the \$600,000 of foreign income taxes that A is deemed to pay under section 960(d), computed without regard to the 80 percent limitation, and the \$400,000 of taxes that A is deemed to pay under section 960(a).

(vi) Section 1.962-1(b)(1)(i)(B)(3) provides that, for purposes of computing taxable income under section 962, gross income is reduced only by specified deductions, which include the deduction allowed to a domestic corporation under section 250 and § 1.250(a)-1 equal to 50 percent of the sum of the GILTI inclusion amount and the inclusion under section 78 with respect to the GILTI inclusion amount. See section 250(a). A is therefore allowed a deduction under section 250 equal to 50 percent of \$3,600,000 (the \$3,000,000 GILTI inclusion amount plus the \$600,000 inclusion under section 78), or \$1,800,000.

(vii) A's taxable income and pre-credit U.S. tax liability with respect to the section 951(a) inclusions are computed as follows:

TABLE 1 TO PARAGRAPH (c)(2)(vii)

Section 951(a) inclusions with respect to CFC	\$5,000,000
Section 78 inclusions	1,000,000
Deduction under section 250	(1,800,000)
Section 962 taxable income under section 962	4,200,000
Pre-credit U.S. tax (0.21 × \$4,200,000)	882,000

(viii) Section 962 and § 1.962-1(b)(2) provide that, in computing the section 904 limitation on the credit for foreign income taxes that an electing individual United States shareholder is deemed to pay under sections 960(a) and (d), the individual's taxable income for a taxable year is considered to consist only of section 951(a) inclusions and the deductions allowed under section 962. Section 904 limits the credit that a taxpayer may claim for the taxes that it pays or accrues, or is deemed to pay, to the amount of its U.S. tax that is attributable to the taxpayer's foreign source income, and applies this limitation separately with respect to each separate category of income. The limitation amount is computed by multiplying the taxpayer's total pre-credit U.S. tax by the ratio of

the taxpayer's foreign source taxable income in a separate category for the taxable year to the taxpayer's total taxable income for the taxable year. See section 904(a) and § 1.904-1(a).

(ix) A must compute the limitation on the credit for the foreign income taxes deemed paid under section 960(d) separately with respect to A's taxable income in the separate category described in section 904(d)(1)(A) (the "GILTI category"), namely, taxable income attributable to the GILTI inclusion amount. The limitation is computed using only A's 2019 taxable income under section 962 and the pre-credit U.S. tax of \$882,000 on this income. A therefore computes the limitation by multiplying \$882,000 by the ratio of A's foreign source GILTI category taxable income under section 962 to A's total taxable income under section 962, as follows:

TABLE 2 TO PARAGRAPH (c)(2)(ix)

GILTI inclusion amount	\$3,000,000
Section 78 inclusion	\$600,000
Section 250 deduction	(\$1,800,000)
Total GILTI category taxable income under section 962	\$1,800,000
Ratio of GILTI category taxable income to total taxable income under section 962 (1,800,000/\$4,200,000)	42.86%
Limitation amount (pre-credit U.S. tax of \$882,000 × (\$1,800,000/\$4,200,000)) ..	\$378,000

(x) A also must compute the limitation on the credit for the foreign income taxes deemed paid under section 960(a) separately with respect to the foreign source passive category taxable income under section 962, namely, A's taxable income attributable to the subpart F inclusion. A computes the limitation by multiplying A's pre-credit U.S. tax of \$882,000 by the ratio of A's foreign source passive category taxable income under section 962 to A's total taxable income under section 962, as follows:

TABLE 3 TO PARAGRAPH (c)(2)(x)

Subpart F inclusion	\$2,000,000
Section 78 inclusion	\$400,000

Internal Revenue Service, Treasury

§ 1.962-1

TABLE 3 TO PARAGRAPH (c)(2)(x)—Continued

Total foreign source passive category taxable income ...	\$2,400,000
Ratio of foreign source passive category taxable income to total taxable income under section 962 (\$2,400,000/\$4,200,000) ...	57.14%
Limitation amount (pre-credit U.S. tax of \$882,000 × (\$2,400,000/\$4,200,000)) ..	\$504,000

(xi) A may claim a foreign tax credit for \$378,000 of the \$480,000 of foreign income taxes deemed paid under section 960(d), and a foreign tax credit for all \$400,000 of the foreign income taxes deemed paid under section 960(a), for a total foreign tax credit of \$778,000. The U.S. tax on A's 2019 taxable income with respect to CFC under section 962 is reduced from \$882,000 to \$104,000 (\$882,000 minus \$778,000).

(3) *Analysis with respect to other income.* (i) A's taxable income and pre-credit U.S. tax liability with respect to A's other income is computed as follows:

TABLE 4 TO PARAGRAPH (c)(3)(i)

Gross income	\$4,000,000
Deductions	1,000,000
Taxable Income	3,000,000
Pre-credit U.S. tax computed under section 1(j)	1,074,988

(ii) A must compute a separate limitation on the credit for the foreign withholding taxes paid with respect to A's other foreign source passive category taxable income. Under §1.962-1(b)(2)(iv)(B), A's section 904 limitation on this income is computed on the basis of A's taxable income other than the amounts taken into account under §1.962-1(b)(1)(i). Accordingly, \$250,000 of A's deductions (\$1,000,000 × \$1,000,000/\$4,000,000) are apportioned to A's \$1,000,000 of other foreign source passive category gross income, and \$750,000 of deductions (\$1,000,000 × \$3,000,000/\$4,000,000) are apportioned to A's \$3,000,000 of U.S. source gross income, resulting in \$750,000 of other foreign source passive category taxable income and \$2,250,000 of U.S. source taxable income A computes the limitation by

multiplying A's pre-credit U.S. tax on A's other income of \$1,074,988 by the ratio of A's other foreign source passive category taxable income to A's other total taxable income, as follows:

TABLE 5 TO PARAGRAPH (c)(3)(ii)

Total other foreign source passive category taxable income	\$750,000
Ratio of other foreign source passive category taxable income to total other taxable income (\$750,000/\$3,000,000)	25%
Limitation amount (pre-credit U.S. tax of \$1,074,988 × (\$750,000/\$3,000,000))	\$268,747

(iii) A may claim a foreign tax credit under section 901 for all \$100,000 of the foreign withholding taxes on the other passive income. The U.S. tax on A's \$3,000,000 of other taxable income is reduced from \$1,074,988 to \$974,988 (\$1,074,88 minus \$100,000).

(d) *Applicability dates.* Except as otherwise provided in this paragraph (d), paragraph (b)(1)(i) of this section applies beginning the last taxable year of a foreign corporation that begins before January 1, 2018, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends. Paragraphs (b)(1)(i)(A)(2) and (b)(1)(i)(B)(3) of this section apply to taxable years of a foreign corporation that end on or after March 4, 2019, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends. Paragraphs (a)(2), (b)(1)(ii), (b)(2)(i) through (iii), and (c) of this section apply to taxable years of a foreign corporation that end on or after July 15, 2020, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends. For taxable years that precede the applicability dates described in the preceding two sentences, taxpayers may choose to apply the provisions of paragraphs (a)(2), (b)(1)(i)(A)(2), (b)(1)(i)(B)(3), (b)(1)(ii), (b)(2)(i) through (iii), and (c) of this section for taxable

§ 1.962-2

26 CFR Ch. I (4-1-23 Edition)

years of a foreign corporation beginning on or after January 1, 2018, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends.

[T.D. 6858, 30 FR 13695, Oct. 28, 1965, as amended by T.D. 7413, 41 FR 12640, Mar. 26, 1976; T.D. 9846, 84 FR 1874, Feb. 5, 2019; T.D. 9849, 84 FR 9236, Mar. 14, 2019; T.D. 9901, 85 FR 43109, July 15, 2020]

§ 1.962-2 Election of limitation of tax for individuals.

(a) *Who may elect.* The election under section 962 may be made only by an individual (including a trust or estate) who is a United States shareholder (including an individual who is a United States shareholder because, by reason of section 958(b), he is considered to own stock of a foreign corporation owned (within the meaning of section 958(a)) by a domestic pass-through entity (as defined in § 1.965-1(f)(19))).

(b) *Time and manner of making election.* A United States shareholder shall make an election under this section by filing a statement to such effect with his return for the taxable year with respect to which the election is made. The statement shall include the following information:

(1) The name, address, and taxable year of each controlled foreign corporation with respect to which the electing shareholder is a United States shareholder and of all other corporations, partnerships, trusts, or estates in any applicable chain of ownership described in section 958(a);

(2) The amounts, on a corporation-by-corporation basis, which are included in such shareholder's gross income for his taxable year under section 951(a);

(3) Such shareholder's pro rata share of the earnings and profits (determined under § 1.964-1) of each such controlled foreign corporation with respect to which such shareholder includes any amount in gross income for his taxable year under section 951(a) and the foreign income, war profits, excess profits, and similar taxes paid on or with respect to such earnings and profits;

(4) The amount of distributions received by such shareholder during his taxable year from each controlled for-

foreign corporation referred to in subparagraph (1) of this paragraph from excludable section 962 earnings and profits (as defined in paragraph (b)(1)(i) of § 1.962-3), from taxable section 962 earnings and profits (as defined in paragraph (b)(1)(ii) of § 1.962-3), and from earnings and profits other than section 962 earnings and profits, showing the source of such amounts by taxable year; and

(5) Such further information as the Commissioner may prescribe by forms and accompanying instructions relating to such election.

(c) *Effect of election—(1) In general.* Except as provided in subparagraph (2) of this paragraph, an election under this section by a United States shareholder for a taxable year shall be applicable to all controlled foreign corporations with respect to which such shareholder includes any amount in gross income for his taxable year under section 951(a) and shall be binding for the taxable year for which such election is made.

(2) *Revocation.* Upon application by the United States shareholder, an election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless a material and substantial change in circumstances occurs which could not have been anticipated when the election was made. The application for consent to revocation shall be made by the United States shareholder's mailing a letter for such purpose to Commissioner of Internal Revenue, Attention: T:R, Washington, DC 20224, containing a statement of the facts upon which such shareholder relies in requesting such consent.

(d) *Applicability dates.* Paragraph (a) of this section applies beginning the last taxable year of a foreign corporation that begins before January 1, 2018, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends.

[T.D. 6858, 30 FR 13696, Oct. 28, 1965, as amended by T.D. 9846, 84 FR 1875, Feb. 5, 2019; T.D. 9849, 84 FR 9236, Mar. 14, 2019]

§ 1.962-3 Treatment of actual distributions.

(a) *In general.* Section 962(d) provides that the earnings and profits of a foreign corporation attributable to amounts which are, or have been, included in the gross income of an individual United States shareholder under section 951(a) by reason of such shareholder's ownership (within the meaning of section 958(a)) of stock in such corporation and with respect to which amounts an election under § 1.962-2 applies or applied shall, when such earnings and profits are distributed to such shareholder with respect to such stock, notwithstanding the provisions of section 959(a)(1), be included in his gross income to the extent that such earnings and profits exceed the amount of income tax paid by such shareholder under this chapter on the amounts to which such election applies or applied. Thus, when such shareholder receives an actual distribution of section 962 earnings and profits (as defined in paragraph (b)(1) of this section) from a foreign corporation, only the excludable section 962 earnings and profits (as defined in paragraph (b)(1)(i) of this section) may be excluded from his gross income.

(b) *Rules of application.* For purposes of this section—

(1) *Section 962 earnings and profits defined.* With respect to an individual United States shareholder, the term "section 962 earnings and profits" means the earnings and profits of a foreign corporation referred to in paragraph (a) of this section. Such earnings and profits include—

(i) *Excludable section 962 earnings and profits.* Excludable section 962 earnings and profits which are the amount of the section 962 earnings and profits equal to the amount of income tax paid under this chapter by such shareholder on the amounts included in his gross income under section 951(a); and

(ii) *Taxable section 962 earnings and profits.* Taxable section 962 earnings and profits which are the excess of section 962 earnings and profits over the amount described in subdivision (i) of this subparagraph.

(2) *Determinations made separately for each taxable year.* If section 962 earnings and profits attributable to more

than one taxable year are distributed by a foreign corporation the determinations under this section shall be made separately with respect to each such taxable year.

(3) *Source of distributions—(i) In general.* Except as otherwise provided in this subparagraph, the provisions of paragraphs (a) through (d) of § 1.959-3 shall apply in determining the source of distributions of earnings and profits by a foreign corporation.

(ii) *Treatment of section 962 earnings and profits under § 1.959-3.* For purposes of a section 959(c) amount and year classification under paragraph (b) of § 1.959-3, a distribution of earnings and profits by a foreign corporation shall be first allocated to earnings and profits other than section 962 earnings and profits (as defined in subparagraph (1) of this paragraph) and then to section 962 earnings and profits. Thus distributions shall be considered first attributable to amounts described in paragraph (b)(1) of § 1.959-3 which are not section 962 earnings and profits and then to amounts described in such paragraph (b)(1) which are section 962 earnings and profits (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year), secondly to amounts described in paragraph (b)(2) of § 1.959-3 which are not section 962 earnings and profits and then to amounts described in such paragraph (b)(2) which are section 962 earnings and profits (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year), and finally to the amounts described in paragraph (b)(3) of § 1.959-3 (first for the current taxable year and then for prior taxable years beginning with the most recent prior taxable year).

(iii) *Allocation to excludable section 962 earnings and profits.* A distribution of section 962 earnings and profits by a foreign corporation for any taxable year shall be considered first attributable to the excludable section 962 earnings and profits (as defined in subparagraph (1)(i) of this paragraph) and then to taxable section 962 earnings and profits.

(iv) *Allocation of deficits in earnings and profits.* A United States shareholder's pro rata share (determined in accordance with the principles of paragraph (e) of § 1.951-1) of a foreign corporation's deficit in earnings and profits (determined under § 1.964-1) for any taxable year shall be applied in accordance with the provisions of paragraph (c) of § 1.959-3 except that such deficit shall also be applied to taxable section 962 earnings and profits (as defined in subparagraph (1)(ii) of this paragraph).

(4) *Distribution in exchange for stock.* The provisions of this section shall not apply to a distribution of section 962 earnings and profits which is treated as in part or full payment in exchange for stock under subchapter C of chapter 1 of the Internal Revenue Code. The application of this subparagraph may be illustrated by the following example:

Example. Individual United States shareholder A owns 60 percent of the only class of stock in foreign corporation M, the basis of which is \$10,000. Both A and M Corporation use the calendar year as a taxable year. In each of the taxable years 1964, 1965, and 1966, M Corporation has \$1,000 of earnings and profits and \$1,000 of subpart F income. With respect to each such amount, A includes \$600 in gross income under section 951(a), makes the election under section 962, and pays a United States tax of \$132 (22 percent of \$600). Accordingly, A increases the basis of his stock in M corporation under section 961(a) by \$132 in each of the years 1964, 1965, and 1966, and thus on December 31, 1966, the adjusted basis for A's stock in M Corporation is \$10,396. In 1967, M Corporation is completely

liquidated (in a transaction described in section 331) and A receives \$13,800, consisting of \$1,800 of earnings and profits attributable to the amounts which A included in gross income under section 951(a) in 1964, 1965, and 1966, and \$12,000 attributable to the other assets of M Corporation. No amount of the \$3,404 gain realized by A on such distribution (\$13,800 minus \$10,396) may be excluded from gross income under section 959(a)(1). However, section 962(d) will not prevent any part of such \$3,404 from being treated as a capital gain under section 331.

(5) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) M, a controlled foreign corporation is organized on January 1, 1963; A and B, individual United States shareholders, own 50 percent and 25 percent, respectively, of the only class of stock in M Corporation. Corporation M, A, and B use the calendar year as a taxable year, and M Corporation is a controlled foreign corporation throughout the period here involved. For the taxable years 1963, 1964, 1965, and 1966, A and B must include amounts in gross income under section 951(a) with respect to M Corporation. For the years 1963, 1965, and 1966, A makes the election under section 962. On January 1, 1967, B sells his 25-percent interest in M Corporation to A; A satisfies the requirements of paragraph (d) of § 1.959-1 so as to qualify as B's successor in interest. As of December 31, 1967, M Corporation's accumulated earnings and profits of \$675 (before taking into account distributions made in 1967) applicable to A's interest (including his interest as B's successor in interest) in such corporation are classified under § 1.959-3 and this section for purposes of section 962(d) as follows:

CLASSIFICATION OF EARNINGS AND PROFITS FOR PURPOSES OF § 1.962-3

Year	Section 959(c)(1)			Section 959(c)(2)			Section 959 (c)(3)
	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962, earnings and profits	Non-section 962 earnings and profits	Excludable section 962 earnings and profits	Taxable section 962 earnings and profits	
1963	\$25	\$11	\$39				
1964	75			\$60			\$15
1965				75	\$33	\$117	
1966				50	22	78	
1967							75

Internal Revenue Service, Treasury

§ 1.963-0

(b) During 1967, M Corporation makes three separate distributions to A of \$200, \$208, and \$267. The source of such distributions under §1.959-3 and this section is as follows:

Distribution	Amount	Year	Classification of distributions under sections 959 and 962(d)
No. 1	\$75	1964	(c)(1) non-section 962.
	25	1963	Do.
	11	1963	(c)(1) excludable section 962.
	39	1963	
	50	1966	(c)(1) taxable section 962. (c)(2) non-section 962.
Total	200		
No. 2	22	1966	(c)(2) excludable section 962
	78	1966	
	75	1965	(c)(2) taxable section 962.
	33	1965	(c)(2) non-section 962. (c)(2) excludable section 962.
Total	208		
No. 3	117	1965	(c)(2) taxable section 962.
	60	1964	(c)(2) non-section 962.
	75	1967	(c)(3).
	15	1964	Do.
Total	267		

(c) A must include \$324 in his gross income for 1967. The source of these amounts is as follows:

Distribution	Amount	Year	Classification
No. 1	\$39	1963	(c)(1) taxable section 962.
No. 2	78	1966	(c)(2) taxable section 962.
No. 3	117	1965	Do.
	75	1967	(c)(3).
	15	1964	Do.
Total	324		

(c) *Treatment of shareholder's successor in interest*—(1) *In general.* If a United States person (as defined in §1.957-4) acquires from any person any portion of the interest in the foreign corporation of a United States shareholder referred to in this section, the rules of paragraphs (a) and (b) of this section shall apply to such acquiring person. However, no exclusion of section 962 earnings and profits under paragraph (a) of this section shall be allowed unless such acquiring person establishes to the satisfaction of the district director his right to such exclusion. The information to be furnished by the acquiring person to the district director with his return for the taxable year to support such exclusion shall include:

(i) The name, address, and taxable year of the foreign corporation from

which a distribution of section 962 earnings and profits is received and of all other corporations, partnerships, trusts, or estates in any applicable chain of ownership described in section 958(a);

(ii) The name and address of the person from whom the stock interest was acquired;

(iii) A description of the stock interest acquired and its relation, if any, to a chain of ownership described in section 958(a);

(iv) The amount for which an exclusion under paragraph (a) of this section is claimed; and

(v) Evidence showing that the section 962 earnings and profits for which an exclusion is claimed are attributable to amounts which were included in the gross income of a United States shareholder under section 951(a) subject to an election under §1.962-2, that such amounts were not previously excluded from the gross income of a United States person, and the identity of the United States shareholder including such amount.

The acquiring person shall also furnish to the district director such other information as may be required by the district director in support of the exclusion.

(2) *Taxes previously deemed paid by an individual United States shareholder.* If a corporate successor in interest of an individual United States shareholder receives a distribution of section 962 earnings and profits, the income, war profits, and excess profits taxes paid to any foreign country or to any possession of the United States in connection with such earnings and profits shall not be taken into account for purposes of section 902, to the extent such taxes were deemed paid by such individual United States shareholder under paragraph (b)(2) of §1.962-1 and section 960(a)(1) for any prior taxable year.

[T.D. 6858, 30 FR 13696, Oct. 28, 1965]

§ 1.963-0 Repeal of section 963; effective dates.

(a) *Repeal of section 963.* Except as provided in paragraphs (b) and (c) of this section, the provisions of section

963 and §§ 1.963-1 through 1.963-7 are repealed for taxable years of foreign corporations beginning after December 31, 1975, and for taxable years of United States shareholders (within the meaning of section 951(b), within which or with which such taxable years of such foreign corporations end.

(b) *Transitional rules for chain or group election*—(1) *In general.* If a United States shareholder (within the meaning of section 951(b) makes either a chain election pursuant to § 1.963-1(e) or a group election pursuant to § 1.963-1(f) for a taxable year of such shareholder beginning after December 31, 1975, then a foreign corporation shall be includible in such election only if—

(i) It has a taxable year beginning before January 1, 1976, which ends within such taxable year of the United States shareholder, and

(ii) It is either—

(A) A controlled foreign corporation or

(B) A foreign corporation by reason of ownership of stock in which such shareholder indirectly owns (within the meaning of section 958(a)(2)) stock in a controlled foreign corporation to which this subparagraph applies.

(2) *Series rule.* If any foreign corporation in a series of foreign corporations is excluded by subparagraph (i) of this paragraph from a chain or group election of a United States shareholder for its taxable year, then any foreign corporation in which the United States shareholder owns stock indirectly by reason of ownership of stock in such excluded corporation shall also be excluded from such election to the extent of such indirect ownership regardless of when its taxable year begins.

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) M is a domestic corporation, A, B, D, and E are controlled foreign corporations, and C is a foreign corporation other than a controlled foreign corporation. All five foreign corporations, each have only one class of stock outstanding. M owns directly all of the stock of A, which in turn owns directly all of the stock of B, which in turn owns directly 60 percent of the stock of D, which in turn owns directly all of the stock of E. M also owns directly 40 percent of the stock of C, which in turn owns directly the remaining 40 percent of the stock of D. M

is a United States shareholder with respect to no other foreign corporation. M and B each use the calendar year as the taxable year. A, C, D, and E each use a fiscal year ending on November 30 as the taxable year. For calendar year 1976, M may make either a first-tier election with respect to A, a chain election with respect to C and D (to the extent of M's indirect 16-percent stock interest in D by reason of its direct ownership of 40 percent of the stock of C) or a group election with respect to A, C, D (to the extent of such 16-percent stock interest) and E (to the extent of M's indirect 16-percent stock interest in E).

(b) M's indirect 100 percent stock interest in B will be excluded from any chain or group election made by M for calendar year 1976 since B is a controlled foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(c) M's indirect 60 percent stock interest through A and B in D and E will be excluded from any chain or group election made by M for calendar year 1976 since such 60 percent interests are indirectly owned by M by reason of its indirect ownership of stock in B, which is a foreign corporation which does not have a taxable year beginning before January 1, 1976, which ends within the taxable year of M beginning after December 31, 1975, for which M has made either a chain or group election.

(d) If C used the calendar year as its taxable year and was therefore excluded from a chain election made with respect to it and D, then D would also be excluded from such an election, since D would then be a foreign corporation in which M owns stock indirectly by reason of ownership of stock in C, which is excluded from such election.

(c) *Deficiency distributions.* The rules relating to deficiency distributions under section 963(e)(2) and § 1.963-6 shall continue to apply to a taxable year beginning after the effective date of the repeal of section 963 in which it is determined that a deficiency distribution must be made for an earlier taxable year for which a United States shareholder made an election to secure the exclusion under section 963 but failed to receive a minimum distribution.

(d) *Special adjustments pursuant to section 963 to be taken into account for taxable years subsequent to the repeal of section 963.* If a United States shareholder of a controlled foreign corporation elects to receive a minimum distribution under section 963 for a taxable

year, section 963 and the regulations thereunder may require certain elections and adjustments to be made in subsequent taxable years. These elections and adjustments shall be taken into account for subsequent taxable years as if section 963 were still in effect and no election to receive a minimum distribution were made after the effective date of the repeal of section 963. Examples of these elections and special adjustments include, but are not limited to, the election which may be made pursuant to §1.963-3(g)(2), relating to the special extended distribution period, and the special adjustments to be made pursuant to §1.963-4, relating to the minimum overall tax burden test.

[T.D. 7545, 43 FR 19652, May 8, 1978]

§ 1.963-1 [Reserved]

§ 1.963-2 Determination of the amount of the minimum distribution.

(a) *Application of statutory percentage to earnings and profits.* The amount of the minimum distribution required to be received by a United States shareholder with respect to stock to which the election under paragraph (c) of §1.963-1 applies for the taxable year in order to qualify for a section 963 exclusion for such year shall be the amount, if any, determined by the multiplication of the statutory percentage applicable for the taxable year by—

(1) In the case of a first-tier election, such shareholder's proportionate share (as determined under paragraph (d)(2) of this section) of the earnings and profits for the taxable year of the single first-tier corporation to which the election relates,

(2) In the case of a chain election, the consolidated earnings and profits (as determined under paragraph (d)(3) of this section) with respect to such shareholder for the taxable year of the chain to which the election relates, or

(3) In the case of a group election, the consolidated earnings and profits (as determined under paragraph (d)(3) of this section) with respect to such shareholder for the taxable year of the group to which the election relates.

For the requirement that the overall United States and foreign income tax incurred in respect of a minimum dis-

tribution from a chain or group must equal or exceed either 90 percent of the United States corporate tax rate applied against pretax and predistribution consolidated earnings and profits or, with the application of the special rules set forth therein, must equal or exceed the overall United States and foreign income tax which would have resulted from a pro rata minimum distribution, see paragraph (a)(1) of §1.963-4.

(b) *Statutory percentage.* The statutory percentage (referred to in paragraph (a) of this section) for the taxable year shall be determined by applying the effective foreign tax rate (as defined in paragraph (c) of this section) for such year with respect to the single first-tier corporation, chain, or group, as the case may be, against—

(1) The table set forth in section 963(b)(1) in the case of an election to secure an exclusion under section 963 for a taxable year of the United States shareholder beginning in 1963 and a taxable year entirely within the surcharge period ending before January 1, 1970.

(2) The table set forth in section 963(b)(2) in the case of an election to secure an exclusion under section 963 for a taxable year of the U.S. shareholder beginning in 1964 or for a taxable year of such shareholder beginning in 1969 and ending in 1970 to the extent subparagraph (B) of section 963(b)(3) applies,

(3) The table set forth in section 963(b)(3) in the case of an election to secure an exclusion under section 963 for a taxable year of the U.S. shareholder beginning after December 31, 1964 except a taxable year which includes any part of the surcharge period, or

(4) The table set forth in paragraph (b) of §1.963-8 in the case of an election to secure an exclusion under section 963 for the calendar year 1970.

Example. Domestic corporation M owns all the one class of stock in controlled foreign corporation A. Corporation M uses the calendar year as its taxable year, and A Corporation uses a fiscal year ending August 31. For 1964, M Corporation makes a first-tier election in order to exclude from gross income for such year the subpart F income of A Corporation for its taxable year ending on

August 31, 1964. Although, such election applies to the taxable year of A Corporation beginning on September 1, 1963, the applicable table, for purposes of determining the statutory percentages to be used under paragraph (a) of this section for the taxable year, is that set forth in section 963(b)(2), which relates to taxable years of United States shareholders beginning in 1964. Thus, if for the taxable year of A Corporation ending August 31, 1964, the effective foreign tax rate is 30 percent, A Corporation would have to distribute 72 percent of its earnings and profits for such year in order for M Corporation to be entitled to an exclusion under section 963 for 1964.

(c) *Effective foreign tax rate*—(1) *Single first-tier corporation*. For purposes of section 963 the term “effective foreign tax rate” for a taxable year means, with respect to a single first-tier corporation, the percentage which—

(i) The United States shareholder’s proportionate share (as determined under paragraph (e)(1) of this section) of the foreign income tax of such corporation for such taxable year is of—

(ii) The sum of—

(a) The United States shareholder’s proportionate share (as determined under paragraph (d)(2) of this section) of the earnings and profits of such corporation for such taxable year, and

(b) The amount referred to in subdivision (i) of this subparagraph.

(2) *Chain or group of corporations*. For purposes of section 963, the term “effective foreign tax rate” for a taxable year means, with respect to a chain or group, the percentage which—

(i) The consolidated foreign income taxes (as determined under paragraph (e)(2) of this section) of such chain or group with respect to the United States shareholder for such taxable year is of—

(ii) The sum of—

(a) The consolidated earnings and profits (as determined under paragraph (d)(3) of this section) of such chain or group with respect to such United States shareholder for such taxable year, and

(b) The amount referred to in subdivision (i) of this subparagraph.

(3) *Treatment of United States tax as foreign tax*. For the purpose solely of determining the effective foreign tax rate under this paragraph, if a foreign corporation has pretax earnings and profits attributable to income from

sources within the United States for the taxable year upon which it pays United States income tax and if distributions from the earnings and profits of such corporation for such year to the electing United States shareholder with respect to stock to which the election to secure an exclusion under section 963 relates do not entitle such shareholder to the dividends-received deduction under section 245, the amount of the United States income tax shall be taken into account as though such tax were foreign income tax. The amount so treated as foreign income tax shall not exceed 90 percent of an amount determined by multiplying such pretax earnings and profits attributable to income from sources within the United States by a percentage which is the sum of the normal tax rate and the surtax rate (determined without regard to the surtax exemption) prescribed by section 11 for the taxable year of the United States shareholder.

(d) *Determination of proportionate share of earnings and profits and consolidated earnings and profits*—(1) *Earnings and profits of foreign corporations*. For purposes of §§ 1.963-1 through 1.963-8, the earnings and profits, or deficit in earnings and profits, for the taxable year, of a single first-tier corporation or of a foreign corporation in a chain or group shall be the amount of its earnings and profits for such year, determined under section 964(a) and § 1.964-1 but without reduction for foreign income tax or for distributions made by such corporation, less—

(i) In the case of a foreign corporation included in a chain or group, the amount of any distributions received (computed without reduction for any income tax paid or accrued by such corporation with respect to such distributions) by such corporation during its taxable year from the earnings and profits (whether or not from earnings and profits of the taxable year to which the election under section 963 applies) of another foreign corporation in the chain or group.

(ii) In the case of every foreign corporation, the amount of foreign income tax paid or accrued by such corporation during its taxable year other than

foreign income tax referred to in subdivision (i) and (iii) of this subparagraph, and

(iii) In the case of a foreign corporation included in a chain or group, the foreign income tax paid or accrued by such corporation with respect to distributions from the earnings and profits of any other foreign corporation in the chain or group for the taxable year of such other corporation to which the election under section 963 applies, but only if the U.S. shareholder chooses under this subdivision to take such tax into account in determining the effective foreign tax rate rather than count it toward the amount of the minimum distribution as provided in paragraph (b)(2) of § 1.963-3.

In the event that the foreign income tax of a corporation included in a chain or group depends upon the extent to which distributions are made by such corporation, the amount of foreign income tax referred to in subdivision (ii) of this subparagraph shall, only for purposes of determining the effective foreign tax rate, be the amount which would have been paid or accrued if no distributions had been made. For the rules in other cases involving corporations whose foreign income tax varies with distributions, see § 1.963-5. For the manner of computing the earnings and profits of a foreign branch treated as a wholly owned foreign subsidiary corporation see paragraph (f)(4)(ii) of § 1.963-1.

(2) *Shareholder's proportionate share of earnings and profits*—(i) *Corporation with earnings and profits*—(a) *In general*. A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 relates, of the earnings and profits of a foreign corporation (not including a foreign branch described in (b) of this subdivision) for its taxable year shall be the share which such shareholder would receive if the total amount of such corporation's earnings and profits, as determined under subparagraph (1) of this paragraph, for such year were distributed on the last day of such corporation's taxable year on which such corporation is a controlled foreign corporation or is a foreign corporation by reason of the ownership of stock in

which the United States shareholder indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation.

(b) *Foreign branch treated as a foreign subsidiary corporation*. A United States shareholder's proportionate share of the earnings and profits, for the taxable year, of a branch treated as a wholly owned foreign subsidiary corporation and included in a group under paragraph (f)(4) of § 1.963-1 shall be the total earnings and profits of such branch for the taxable year, as determined under paragraph (f)(4)(ii) of such section.

(c) *Indirectly held foreign corporations*. If the proportionate share to be determined is of earnings and profits of a foreign corporation the stock of which is owned by the United States shareholder by reason of its ownership of stock (with respect to which the election relates) in another corporation, such shareholder's proportionate share of such earnings and profits for the taxable year shall be determined on the basis of the amount such shareholder would receive from such foreign corporation with respect to stock in such foreign corporation if there were distributed for the taxable year all such earnings and profits, as determined under subparagraph (1) of this paragraph, and of all the earnings and profits of all other corporations through which such earnings and profits must pass in order to be received by such shareholder with respect to the stock to which the election relates. For purposes of the preceding sentence, the amount received by the shareholder from the earnings and profits of a foreign corporation shall be determined without taking into account deductions (whether or not allowable under chapter 1 of the Code) of other foreign corporations through which such earnings and profits are distributed.

(d) *More than one class of stock*. If a foreign corporation for a taxable year has more than one class of stock outstanding, the earnings and profits of such corporation for such year which shall be taken into account with respect to any one class of such stock shall be the earnings and profits which would be distributed with respect to such class if all earnings and profits of

such corporation for such year were distributed on the last day of such corporation's taxable year, on which such corporation is a controlled foreign corporation or is a foreign corporation by reason of the ownership of stock in which the United States shareholder indirectly owns within the meaning of section 958(a)(2) stock in a controlled foreign corporation. If an arrearage in dividends for prior taxable years exists with respect to a class of preferred stock of such corporation, the earnings and profits for the taxable year shall be attributed to such arrearage only to the extent such arrearage exceeds the earnings and profits of such corporation remaining from prior taxable years beginning after December 31, 1962. For example, if a controlled foreign corporation, using the calendar year as its taxable year, has earnings and profits for 1963 of \$100 accumulated at December 31, 1963, and an arrearage of \$150 for such year in respect of preferred stock, the earnings and profits for 1964 attributable to such arrearage may not exceed \$50 (\$150 - \$100).

(e) *Discretionary power to allocate earnings to different classes of stock.* If the allocation of a foreign corporation's earnings and profits for the taxable year between two or more classes of stock depends upon the exercise of discretion by that body of persons which exercises with respect to such corporation the power ordinarily exercised by the board of directors of a domestic corporation, the allocation of such earnings and profits to such classes shall be made for purposes of this subdivision as if such classes constituted one class of stock in which each share has the same rights to dividends as any other share, unless a different method of allocation of such earnings and profits is made by such body not later than 90 days after the close of such taxable year.

(f) *Illustrations.* The application of this subdivision may be illustrated by the following examples:

Example 1. Domestic corporation M directly owns 80 percent of the one class of stock of controlled foreign corporation A, which directly owns 60 percent of the one class of stock of controlled foreign corporation B. Each such corporation has earnings and profits of \$70 for the taxable year, as determined under subparagraph (1) of this

paragraph. Corporation M's proportionate share of the earnings and profits is \$56 ($0.80 \times \70) as to A Corporation and \$33.60 ($0.80 \times 0.60 \times \70) as to B Corporation.

Example 2. Throughout 1964 controlled foreign corporation A, which uses the calendar year as the taxable year, has outstanding 40 shares of common stock and 60 shares of 6-percent, nonparticipating, noncumulative preferred stock with a par value of \$100 per share. Corporation A has earnings and profits of \$1,000, for 1964, as determined under subparagraph (1) of this paragraph. In such case, \$360 ($0.06 \times \100×60) of earnings and profits would be taken into account with respect to the preferred stock and \$640 ($\$1,000 - \360), with respect to the common stock. Thus, if a United States shareholder owns 10 shares of common stock and 30 shares of preferred stock for 1964, its proportionate share of the earnings and profits for such year is \$340 ($[(10/40) \times \$640] + [(30/60) \times \$360]$).

(ii) *Deficit in earnings and profits of a corporation in a chain or group.* A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 relates, of a deficit in earnings and profits of a foreign corporation in a chain or group for a taxable year shall be the portion of such deficit which, if such corporation had earnings and profits for such year as determined under subparagraph (1) of this paragraph and all of such earnings and profits were distributed on the date described in subdivision (i)(a) of this subparagraph, the share of such earnings and profits such shareholder would receive bears to the total of the earnings and profits which would be so distributed on such date. For the determination of the deficit of a foreign branch treated as a wholly owned foreign subsidiary corporation and included in a group, see paragraph (f)(4)(ii) of § 1.963-1. A United States shareholder's proportionate share of the deficit of such a branch shall be the total deficit of such branch for the taxable year.

(iii) *Controlled foreign corporation for part of year.* If—

(a) Stock in a foreign corporation is owned within the meaning of section 958(a) by a United States shareholder on the last day in the taxable year of such corporation for which such corporation is a controlled foreign corporation to which applies an election

by such shareholder to secure an exclusion under section 963 with respect to such stock, or

(b) Stock in a foreign corporation which is not a controlled foreign corporation is owned within the meaning of section 958(a) by a United States shareholder on the last day in the taxable year of such corporation on which another foreign corporation (which, by reason of the stock so owned, is owned by such shareholder within the meaning of section 958(a)) is a controlled foreign corporation to which applies an election by such shareholder to secure an exclusion under section 963 with respect to such stock,

the earnings and profits of such foreign corporation for the taxable year which are taken into account in determining such shareholder's proportionate share thereof shall be an amount of such earnings and profits, determined as provided in subparagraph (1) of this paragraph, which bears to the total of such earnings and profits the same ratio which the part (computed on a daily basis) of such year during which such corporation is a controlled foreign corporation (or, in case such corporation is not a controlled foreign corporation, during which such other corporation is a controlled foreign corporation) bears to the total taxable year. If the United States shareholder by sufficient records and accounts establishes to the satisfaction of the district director the gross income received or accrued, and the deductions paid or accrued, for the part of such year during which such corporation is a controlled foreign corporation (or, in case such corporation is not a controlled foreign corporation, during which such other corporation is a controlled foreign corporation), the amount of earnings and profits based on such records and accounts may be used in lieu of the amount determined under the preceding sentence. The application of this subdivision may be illustrated by the following examples:

Example 1. Domestic corporation M on June 30, 1963, purchases 60 percent of the one class of stock of A Corporation which on July 1 becomes a controlled foreign corporation and remains such throughout the remainder of 1963. Both corporations use the calendar year as the taxable year. Corpora-

tion M makes a first-tier election with respect to A Corporation. For 1963, A Corporation has \$100 of earnings and profits, as determined under subparagraph (1) of this paragraph. Corporation M's proportionate share of such earnings and profits for 1963 is \$30.25 ($0.60 \times [184/365 \times \$100]$).

Example 2. (a) Throughout 1963 domestic corporation M directly owns 20 percent of the one class of stock of foreign corporation A, not a controlled foreign corporation at any time, which directly owns 50 percent of the one class of stock of foreign corporation B, which becomes a controlled foreign corporation on July 1, 1963, and remains such throughout the remainder of 1963. All such corporations use the calendar year as the taxable year. Each of corporations A and B has earnings and profits for 1963 of \$100, as determined under subparagraph (1) of this paragraph. Corporation M makes a chain election for 1963 with respect to corporations A and B. Corporation M's proportionate share of the earnings and profits of A Corporation for 1963 is \$10.08 ($0.20 \times [184/365 \times \$100]$). Corporation M's proportionate share of the earnings and profits of B Corporation for 1963 is \$5.04 ($0.20 \times 0.50 \times [184/365 \times \$100]$).

(b) If B Corporation had been a controlled foreign corporation throughout 1963, M Corporation's proportionate share of the earnings and profits of corporations A and B for 1963 would have been \$20 ($0.20 \times \100) and \$10 ($0.20 \times 0.50 \times \100), respectively.

(c) If corporations A and B had each been a controlled foreign corporation only for the period of January 1, 1963, through June 30, 1963, M Corporation's proportionate share of the earnings and profits of such corporations would have been \$9.92 ($0.20 \times [181/365 \times \$100]$) and \$4.98 ($0.20 \times 0.50 \times [181/365 \times \$100]$), respectively.

(d) If A Corporation had been a controlled foreign corporation throughout 1963 or during the period of July 1, 1963, through December 31, 1963, but B Corporation had been a controlled foreign corporation only during the period of January 1, 1963, through June 30, 1963, M Corporation's proportionate share of the earnings and profits of such corporations would have been \$20 ($0.20 \times \100) and \$4.96 ($0.20 \times 0.50 \times [181/365 \times \$100]$), respectively.

(3) *Consolidated earnings and profits with respect to United States shareholder.* The consolidated earnings and profits of a chain or group with respect to any United States shareholder for the taxable year shall be the sum of such shareholder's proportionate shares of the earnings and profits, and of the deficit in earnings and profits, determined under subparagraph (2) of this paragraph, for such year of all foreign corporations, whether or not controlled

foreign corporations, in such chain or group.

(e) *Foreign income taxes used in determining effective foreign tax rate.* For purposes of determining the effective foreign tax rate under paragraph (c) of this section—

(1) *Shareholder's proportionate share of taxes of a foreign corporation.* The foreign income tax of a foreign corporation for a taxable year shall consist of the foreign income tax referred to in paragraph (d)(1)(ii) of this section with respect to such year and, if the United States shareholder chooses to take the foreign income tax described in paragraph (d)(1)(iii) of this section into account in determining the effective foreign tax rate of a chain or group which includes such foreign corporation, the foreign income tax referred to in such paragraph with respect to such year. A United States shareholder's proportionate share, with respect to stock to which the election to secure an exclusion under section 963 applies, of the foreign income tax of such foreign corporation for a taxable year shall be the same proportion of such foreign income tax that such shareholder's proportionate share (as determined under paragraph (d)(2)(i) of this section) of the earnings and profits of such corporation for such year bears to the total earnings and profits of such corporation for such year. A United States shareholder's proportionate share of the foreign income tax, for the taxable year, of a branch treated as a wholly owned foreign subsidiary corporation and included in a group under paragraph (f)(4) of § 1.963-1 shall be the total foreign income tax of such branch for the taxable year.

(2) *Consolidated foreign income taxes with respect to United States shareholder.* The consolidated foreign income taxes of a chain or group with respect to a United States shareholder for the taxable year of such chain or group shall be the sum of such shareholder's proportionate shares (as determined under subparagraph (1) of this paragraph) of the foreign income tax of all foreign corporations, whether or not controlled foreign corporations, in such chain or group.

(3) *Taxes paid by foreign corporation on distributions received during its distribu-*

tion period. If a distribution received by a foreign corporation in a chain or group from another foreign corporation in such chain or group after the close of the recipient's taxable year but during its distribution period for such year is allocated to the earnings and profits of such recipient corporation for such year under paragraph (c)(2) of § 1.963-3, then any foreign income tax paid or accrued by such recipient corporation on such distribution shall be treated as paid or accrued for such taxable year.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. For 1966, domestic corporation M makes a first-tier election with respect to controlled foreign corporation A, 80 percent of the one class of stock of which M Corporation owns directly. Both corporations use the calendar year as the taxable year. For 1966, A Corporation has earnings and profits (before reduction for foreign income tax) of \$100 with respect to which it pays foreign income tax of \$30. Its earnings and profits are \$70 ($\$100 - \30). Corporation M's proportionate share of such earnings and profits is \$56 ($0.80 \times \70), and its proportionate share of the foreign income tax is \$24 ($\$56/\$70 \times \30). The effective foreign tax rate is 30 percent ($\$24/[\$56 + \$24]$). Based on such effective foreign tax rate, the statutory percentage under section 963(b)(3) for 1966 is 69 percent. Thus, the amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is a dividend of \$38.64 ($0.69 \times \56).

Example 2. For 1966, domestic corporation M makes a first-tier election with respect to controlled foreign corporation A, all of whose one class of stock M Corporation owns directly. Both corporations use the calendar year as the taxable year. For 1966, A Corporation has earnings and profits (before reduction for income tax) of \$100, of which \$40 is attributable to income from sources within the United States on which \$12 United States income tax is paid. The foreign country in which A Corporation is incorporated imposes an income tax at 30 percent on the \$100 but allows a credit against its tax for the \$12 of United States income tax, so that it imposes a net foreign income tax of \$18 for 1966. In determining the effective foreign tax rate of A Corporation for 1966, such \$12 of United States income tax may be treated as foreign income tax to the extent it does not exceed \$17.28 ($\$40 \times 0.90 \times 0.48$). Corporation A has earnings and profits of \$70 for 1966. Although A Corporation's effective foreign tax rate for 1966 is 30 percent, determined by dividing \$30 by the sum of \$70 plus \$30, none of

the United States tax which is taken into account in determining such rate shall be treated as foreign income tax for purposes of determining the foreign tax credit of M Corporation under section 902. Based on such effective foreign tax rate, the statutory percentage under section 963(b)(3) for 1966 is 69 percent. Thus, the amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is a dividend of \$48.30 ($0.69 \times \70).

Example 3. Domestic corporation M directly owns throughout 1966, 60 percent of the one class of stock of controlled foreign corporation A, not a less developed country corporation under section 902(d), which has for 1966 earnings and profits of \$70 (all of which is attributable to subpart F income) after having paid foreign income tax of \$30. Both corporations use the calendar year as the taxable year. Corporation A is created under the laws of a foreign country which imposes a 6-percent dividend withholding tax. Corporation M would be required, but for section 963, to include \$42 ($0.60 \times \70) of A Corporation's subpart F income in gross income under section 951(a)(1)(A)(i). For 1966, however, M Corporation makes a first-tier election with respect to A Corporation. Since the tax withheld on distributions made by A Corporation is considered to have been paid by M Corporation, the effective foreign tax rate applicable to A Corporation for 1966 is only 30 percent, the percentage which such \$30 of foreign income tax is of \$100 (the sum of \$30 plus \$70). Thus, the statutory percentage under section 963(b) for 1966 is 69 percent. The amount of the minimum distribution which M Corporation must receive from A Corporation's 1966 earnings and profits is the distribution M Corporation will receive if A Corporation distributes 69 percent of its earnings and profits for 1966. Thus, if M Corporation receives a distribution of 69 percent of its proportionate share of such earnings and profits or \$28.98 ($0.69 \times 0.60 \times \70), it may exclude from gross income for 1966 \$42 otherwise required to be included in gross income under section 951(a)(1)(A)(i) and will determine its income tax, assuming no other income and no surtax exemption under section 11(c), as follows:

Dividend	\$28.98
Gross-up under section 78 ($\$28.98 / \$70 \times \$30$)	12.42
Taxable income	41.40
U.S. tax before foreign tax credit ($\$41.40 \times 0.48$)	19.87
Foreign tax credit ($\$12.42 + [0.06 \times \$28.98]$)	14.16
U.S. tax payable	5.71

Example 4. (a) For 1966 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all of whose one class of stock it directly owns, and controlled foreign corporation B, all of whose one class of stock is directly owned by A Corporation. Both foreign corporations are subject to a foreign income tax at a flat rate of 30 percent, and all corporations use the

calendar year as a taxable year. For 1966, B Corporation has pretax earnings and profits of \$100 and distributes \$51.50. For 1966, A Corporation has pretax earnings and profits of \$151.50, consisting of \$100 from selling activities and \$51.50 received as a distribution from B Corporation, upon which it pays a foreign income tax of \$45.45 (i.e., 30 percent of \$151.50).

(b) Corporation M chooses under paragraph (d)(1)(iii) of this section to take the foreign tax paid by A Corporation on the dividend received from B Corporation into account in determining the effective foreign tax rate of the chain rather than count it toward the amount of the minimum distribution. Thus, to determine consolidated earnings and profits of the chain for 1966, A Corporation's pretax earnings and profits of \$151.50 are first reduced by the intercorporate dividend of \$51.50 received from B Corporation so that A Corporation has pretax and predistribution earnings and profits of \$100 (\$151.50 less \$51.50). Corporation A's pretax and predistribution earnings and profits of \$100 are then reduced by the foreign income tax of \$30 (30 percent of \$100) paid on such earnings and profits, resulting in predistribution earnings and profits of \$70 (\$100 less \$30). Since M Corporation chooses to count toward the effective foreign tax rate, rather than toward the minimum distribution, A Corporation's foreign income tax of \$15.45 ($0.30 \times \51.50) imposed on the dividend received from B Corporation, such predistribution earnings and profits of \$70 of A Corporation are further reduced by such \$15.45 of tax to \$54.55 ($\$70 - \15.45). Corporation B, having received no dividends from any other corporation in the chain, has predistribution earnings and profits of \$70 (\$100 less foreign income tax of \$30).

(c) The consolidated earnings and profits of the chain for 1966 are \$124.55 ($\$54.55 + \70). The consolidated foreign income taxes for such year are \$75.45 ($\$30 + \$15.45 + \30). The effective foreign tax rate of the chain for 1966 is 37.73 percent ($\$75.45 / [\$124.55 + \$75.45]$). The statutory percentage for 1966 under section 963(b)(3) is 51 percent. Thus, the amount of the minimum distribution which M Corporation must receive from the 1966 consolidated earnings and profits of the chain is \$63.52 ($0.51 \times \124.55).

Example 5. The facts are the same as in example 4 except that M Corporation does not choose under paragraph (d)(1)(iii) of this section to take into account, in determining the effective foreign tax rate, the foreign income tax of \$15.45 paid by A Corporation on the distribution of \$51.50 received from B Corporation. In such case, the consolidated earnings and profits of the chain are \$140 ($\$70 + \70) and the consolidated foreign income taxes are \$60 ($\$30 + \30), the latter amount being determined without taking into account A Corporation's foreign income tax of

§ 1.963-2

26 CFR Ch. I (4-1-23 Edition)

\$15.45 on the distribution of \$51.50 received from B Corporation. The effective foreign tax rate for 1966 is 30 percent (\$60/[\$140 + \$60]), and the statutory percentage under section 963(b) is 69 percent. Thus, the amount of the minimum distribution which must be made from the 1966 consolidated earnings and profits of the chain is \$96.60 (0.69 × \$140). For the counting of such \$15.45 of A Corporation's tax toward the \$96.60 amount of the minimum distribution, see paragraph (b)(2) of § 1.963-3.

Example 6. For 1966 domestic corporation M directly owns the following percentages of the one class of stock of the following controlled foreign corporations in respect of which it makes a group election: 80 percent of A Corporation, 60 percent of B Corporation, and 70 percent of C Corporation. All corporations use the calendar year as the taxable year; none of the foreign corporations is a less developed country corporation under section 902(d). Each foreign corporation makes distributions during 1966. The consolidated earnings and profits, and the consolidated foreign income taxes, of the group for 1966 with respect to M Corporation, and the amount of the minimum distribution which M Corporation must receive, are determined as follows, based on the earnings and profits and foreign income tax shown in the following table:

	Controlled foreign corporations		
	A	B	C
Predistribution and pretax earnings and profits	\$100	\$100	\$100.00
Foreign income tax	15	25	35.00
Predistribution earnings and profits	85	75	65.00
M Corporation's proportionate share of earnings and profits:			
(0.80 × \$85)	68		
(0.60 × \$75)		45	
(0.70 × \$65)			45.50
Consolidated earnings and profits with respect to M Corporation (\$68 + \$45 + \$45.50)			158.50
M Corporation's proportionate share of foreign income tax:			
(\$15 × [\$68/\$85])	12		
(\$25 × [\$45/\$75])		15	
(\$35 × [\$45.50/\$65])			24.50

	Controlled foreign corporations		
	A	B	C
Consolidated foreign income taxes with respect to M Corporation (\$12 + \$15 + \$24.50)	51.50

The effective foreign tax rate for 1966 is 24.5 percent (\$51.50/[\$158.50 + \$51.50]) and the statutory percentage under section 963(b)(3) for such year is 76 percent. Thus, the amount of the minimum distribution which M Corporation must receive from the 1966 consolidated earnings and profits of the group is \$120.46 (0.76 × \$158.50).

Example 7. (a) For 1966 domestic corporation M makes a chain election with respect to the following controlled foreign corporations: A Corporation, 80 percent of whose one class of stock M Corporation owns directly; B Corporation, 60 percent of whose one class of stock is directly owned by A Corporation; and C Corporation, 70 percent of whose one class of stock is directly owned by B Corporation. All corporations use the calendar year as the taxable year; none of the foreign corporations is a less developed country corporation under section 902(d). The predistribution and pretax earnings and profits of each foreign corporation are \$100. Each foreign corporation pays a flat rate of foreign income tax on all income computed without reduction for dividends paid and determined by including dividends received. Such rate is 15 percent for A Corporation, 25 percent for B Corporation, and 35 percent for C Corporation. Corporation C distributes \$65, and B Corporation distributes \$100, for 1966. Corporation M chooses under paragraph (d)(1)(iii) of this section to count toward the effective foreign tax rate, rather than toward the amount of the minimum distribution, the foreign income tax paid by corporations A and B, respectively, on distributions received from corporations B and C, respectively.

(b) The consolidated earnings and profits, and the consolidated foreign income taxes, of the chain, and the amount of the minimum distribution for 1966, with respect to M Corporation are determined as follows:

	Controlled foreign corporations			
	A	B	C	Total
Pretax earnings and profits	\$160.00	\$145.50	\$100.00	
Reduction for intercorporate dividends:				
(0.60 × \$100)	60.00			
(0.70 × \$65)		45.50		
Pretax and predistribution earnings and profits	100.00	100.00	100.00	
Reduction for foreign income tax on such pretax and predistribution earnings and profits:				
(0.15 × \$100)	15.00			
(0.25 × \$100)		25.00		

	Controlled foreign corporations			
	A	B	C	Total
(0.35 × \$100)			35.00	
Predistribution earnings and profits	85.00	75.00	65.00	
Reduction for foreign income tax on intercorporate distributions of 1966 earnings and profits:				
(0.15 × \$60)	9.00			
(0.25 × \$45.50)		11.38		
	76.00	63.62	65.00	
Consolidated earnings and profits with respect to M Corporation:				
(0.80 × \$76)	60.80			
(0.80 × 0.60 × \$63.62)		30.54		
(0.80 × 0.60 × 0.70 × \$65)			21.84	\$113.18
Consolidated foreign income taxes with respect to M Corporation:				
(\$60.80/\$76 × [\$15 + \$9])	19.20			
(\$30.54/\$63.62 × [\$25 + \$11.38])		17.46		
(\$21.84/\$65 × \$35)			11.76	\$48.42
Effective foreign tax rate (\$48.42/[\$113.18 + \$48.42])				29.96%
Statutory percentage under section 963(b)				69%
Amount of minimum distribution which M Corporation must receive from 1966 consolidated earnings and profits (0.69 × \$113.18), no amount of the tax on intercorporate distributions being counted toward the minimum distribution				\$78.0

Example 8. The facts are the same as in example 7 except that M Corporation does not choose under paragraph (d)(1)(iii) of this section to take into account, in determining the effective foreign tax rate, the foreign income tax paid by the recipient corporations on the

intercorporate distributions. The consolidated earnings and profits, the consolidated foreign income taxes, of the chain, and the amount of the minimum distribution which M Corporation must receive, for 1966 are determined as follows:

	Controlled foreign corporations			
	A	B	C	Total
Pretax earnings and profits	\$160.00	\$145.50	\$100.00	
Reduction for intercorporate dividends:				
(0.60 × \$100)	60.00			
(0.70 × \$65)		45.50		
Pretax and predistribution earnings and profits	100.00	100.00	100.00	
Reduction for foreign income tax on such pretax and predistribution earnings and profits:				
(0.15 × \$100)	15.00			
(0.25 × \$100)		25.00		
(0.35 × \$100)			35.00	
Predistribution earnings and profits	85.00	75.00	65.00	
Consolidated earnings and profits with respect to M Corporation:				
(0.80 × \$85)	68.00			
(0.80 × 0.60 × \$75)		36.00		
(0.80 × 0.60 × 0.70 × \$65)			21.84	\$125.84
Consolidated foreign income taxes with respect to M Corporation:				
(\$68/\$85 × \$15)	12.00			
(\$36/\$75 × \$25)		12.00		
(\$21.84/\$65 × \$35)			11.76	\$35.76
Effective foreign tax rate (\$35.76/[\$125.84 + \$35.76])				22.13%
Statutory percentage under section 963(b)				76%
Amount of minimum distribution to be made from 1966 consolidated earnings and profits with respect to M Corporation: (0.76 × \$125.84)				\$95.64
Foreign income tax on intercorporate distributions of 1966 earnings and profits which is counted toward the minimum distribution (see § 1.963-3(b)(2)):				
(\$68/\$85 × [0.15 × \$60])	7.20			
(\$36/\$75 × [0.25 × \$45.50])		5.46		\$12.66
Amount of minimum distribution which M Corporation must actually receive from the chain (\$95.64 - \$12.66)				\$82.98

[T.D. 6759, 29 FR 13329, Sept. 25, 1964, as amended by T.D. 6767, 29 FR 14877, Nov. 3, 1964; T.D. 7100, 36 FR 5335, Mar. 20, 1971]

§ 1.963-3 Distributions counting toward a minimum distribution.

(a) *Conditions under which earnings and profits are counted toward a minimum distribution*—(1) *In general.* A distribution to the United States shareholder by a single first-tier corporation or by a foreign corporation included in a chain or group shall count toward a minimum distribution for the taxable year of such shareholder to which the election under section 963 relates only to the extent that—

(i) It is received by such shareholder during such year or within 180 days thereafter,

(ii) It is a distribution of the type described in paragraph (b) of this section,

(iii) Under paragraph (c) of this section, it is deemed to be distributed from the earnings and profits of the foreign corporations for the taxable year of such corporation to which the election relates, and

(iv) Such shareholder chooses to include it in gross income for the taxable year of such shareholder to which the election relates notwithstanding that such distribution, by reason of its receipt after the close of such year, would ordinarily be includible in the gross income of a subsequent year.

Amounts taken into account under this subparagraph as gross income of the United States shareholder for the taxable year to which the election relates shall not be considered to be includible in the gross income of such shareholder for a subsequent taxable year. For purposes of determining the foreign tax credit under sections 901 through 905, foreign income tax paid or accrued by such shareholder on or with respect to such amounts shall be treated as paid or accrued during the taxable year of such election.

(2) *Distributions made prior to acquisition of stock.* A United States shareholder which owns within the meaning of section 958(a) stock in a foreign corporation with respect to which such shareholder elects to secure an exclusion under section 963 for the taxable year may count toward the minimum distribution any distribution made with respect to such stock, and before its acquisition by the United States shareholder, to any other domestic cor-

poration not exempt from income tax under chapter 1 of the Code, to the extent that such distribution is made out of the United States shareholder's proportionate share, as determined under paragraph (d)(2) of § 1.963-2, of such corporation's earnings and profits for the taxable year and would have counted toward a minimum distribution if it had been distributed to such United States shareholder. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, which uses the calendar year as the taxable year, has for 1963 \$100 of earnings and profits and 100 shares of only one class of stock outstanding. Domestic corporation M, not exempt from income tax under chapter 1 of the Code, directly owns all of such shares during the period from January 1, 1963, through June 30, 1963. On June 30, 1963, M Corporation transfers all of such shares to domestic corporation N, which owns them throughout the remainder of 1963 and elects to secure an exclusion under section 963 for such year with respect to the subpart F income of A Corporation. During June 1963, M Corporation receives a dividend of \$75 from A Corporation, which would count toward a minimum distribution if it had been distributed to N Corporation for such year. Corporation N's proportionate share of the earnings and profits of A Corporation for 1963 is \$100; N Corporation may count toward a minimum distribution for 1963 the entire dividend of \$75 paid to M Corporation.

Example 2. The facts are the same as in example 1 except that M is a nonresident alien individual. Since A Corporation is not a controlled foreign corporation from January 1, 1963, through June 30, 1963, N Corporation's proportionate share of the earnings and profits of A Corporation for 1963 is \$50.41 ($\$100 \times 184/365$), as determined under paragraph (d)(2)(iii) of § 1.963-2. Although \$25.41 ($\$75 - \49.59) of the \$75 distribution to M is paid from N Corporation's proportionate share of A Corporation's 1963 earnings and profits, N Corporation may not count toward a minimum distribution any part of the \$75 dividend distributed to M, since M is not a domestic corporation.

(b) *Qualifying distributions*—(1) *Amounts not counted toward a minimum distribution.* No distribution received by a United States shareholder shall count toward a minimum distribution for the taxable year with respect to such shareholder to the extent the distribution is excludable from gross income to the extent gain on the distribution is not recognized, or to the

extent the distribution is treated as a distribution in part or full payment in exchange for stock. Undistributed amounts required to be included in gross income under section 551 as undistributed foreign personal holding company income or under section 951 as undistributed amounts of a controlled foreign corporation shall not count toward a minimum distribution under section 963. An amount received by a United States shareholder as a distribution which under section 302 or section 331 is treated as a distribution in part or full payment in exchange for stock shall not count toward a minimum distribution even though such amount is includible in gross income under section 1248 as a dividend. For purposes of this subparagraph, any portion of a distribution of earnings and profits which is attributable to an increase in current earnings, invested in United States property which, but for paragraph (e) of this section, would be included in the gross income of the United States shareholder under section 951(a)(1)(B) shall not be treated as an amount excludable from gross income.

(2) *Inclusion of tax on intercorporate distributions.* In the case of a chain or group election, the United States shareholder's proportionate share of the amount of the foreign income tax paid or accrued for the taxable year by a foreign corporation in the chain or group with respect to distributions received by such corporation from the earnings and profits, of another foreign corporation in such chain or group, for the taxable year of such other corporation to which the election relates shall count toward a minimum distribution from such chain or group for the taxable year, but only if the United States shareholder does not choose under paragraph (d)(1)(iii) of §1.963-2 to take such tax into account in determining the effective foreign tax rate of such chain or group for the taxable year. To the extent that foreign income tax counts toward a minimum distribution under this subparagraph, it shall be applied against and reduce the amount of the minimum distribution required to be received by the United States shareholder, determined without regard to this paragraph.

(c) *Rules for allocation of distributions to earnings and profits for a taxable year.* To determine whether a distribution to the United States shareholder by a single first-tier corporation or by a foreign corporation in a chain or group is made from the earnings and profits of such corporation for the taxable year to which the election under section 963 relates, the following subparagraphs shall apply:

(1) *Exception to section 316.* Section 316 shall apply except that a distribution of earnings and profits made by a foreign corporation either to another foreign corporation or to the United States shareholder shall be treated as having been paid from the earnings and profits of the distributing corporation for the taxable year of such corporation to which the election relates only if it is made during its distribution period (described in paragraph (g) of this section) for such year.

(2) *Distributions from other corporations.* The earnings and profits of a foreign corporation shall be determined in accordance with paragraph (d)(1) of §1.963-2 (applied as though the United States shareholder had chosen under subparagraph (1)(iii) of such paragraph to take the tax described therein into account in determining the effective foreign tax rate) except that, in the case of a chain or group election, a distribution received by a foreign corporation in the chain or group from another foreign corporation in such chain or group shall be taken into account as earnings and profits of the recipient corporation for the taxable year of such recipient corporation to which the election relates but only to the extent that—

(i) The distribution is received by the recipient corporation during the distribution period for the taxable year of such recipient corporation to which the election relates,

(ii) If the distribution had been received by the United States shareholder, it would have constituted a distribution of the type described in paragraph (b) of this section, and

(iii) The distribution is made from the earnings and profits of the distributing corporation for the taxable year of such distributing corporation to which the election relates.

(d) *Year of inclusion in income of foreign corporation and effect upon subpart F income.* To the extent that a distribution to the United States shareholder counting toward a minimum distribution from a chain or group consists of earnings and profits distributed to a foreign corporation in the chain or group after the close of the recipient corporation's taxable year but during its distribution period for such year by another foreign corporation in such chain or group, such amount shall be treated as received by the recipient corporation on the last day of such taxable year and shall not be regarded as foreign personal holding company income (within the meaning of section 553(a) or 954(c)) of such corporation for the taxable year in which such amount is actually received. The extent to which a distribution counting toward a minimum distribution consists of earnings and profits distributed to a foreign corporation in a chain or group shall be determined under the ordering rules of paragraph (b)(3) of § 1.963-4 (applied in each instance as though the United States shareholder had not chosen under paragraph (d)(1)(iii) of § 1.963-2 to take the tax described therein into account in determining the effective foreign tax rate). However, for such purpose, the amount of foreign income tax, if any, which counts toward the minimum distribution shall be determined without regard to paragraph (b)(2) of this section but in accordance with paragraph (b)(3)(iii) of § 1.963-4.

(e) *Distribution of current earnings invested in United States property.* A distribution made by a foreign corporation during its distribution period for a taxable year shall, notwithstanding section 959(c), first be attributed to earnings and profits for such year described in section 959(c)(3) and then to other earnings and profits. For such purposes, earnings and profits of such foreign corporation for such year attributable to amounts which would otherwise be included in gross income of the United States shareholder under section 951(a)(1)(B) for such year shall be treated as earnings and profits to which section 959(c)(3) applies, shall not be excluded from gross income under section 959 (a) or (b), and shall count toward a minimum distribution

for such year. See paragraph (c)(1)(v) of § 1.960-1 and paragraph (a) of § 1.960-2.

(f) *Cumulative dividends in arrears.* A distribution in satisfaction of arrearages shall be treated as being made out of earnings and profits of the foreign corporation for the taxable year to which the election under section 963 applies only to the extent the dividend is not attributed, under paragraph (d)(2)(i)(d) of § 1.963-2, to the earnings and profits of such corporation remaining from prior taxable years beginning after December 31, 1962. The application of this paragraph may be illustrated by the following example:

Example. For 1963, single first-tier corporation A, which uses the calendar year as the taxable year, has earnings and profits of \$50; for 1964, a deficit in earnings and profits of \$20; for 1965, earnings and profits of \$100; and for 1966, earnings and profits of \$240. For each of such years preferred dividends accumulate at the rate of \$60; but no dividend is paid until 1966 during which year the current dividend is paid and \$180 is distributed toward the arrearages. Of this \$180, only \$50 (\$180 - \$130) shall be treated as paid from 1966 earnings and profits.

(g) *Distribution period of a foreign corporation—(1) General distribution period.* Except as provided by subparagraph (2) of this paragraph, the distribution period with respect to a foreign corporation for its taxable year shall begin immediately after the close of the distribution period for the preceding taxable year and shall end with the close of the 60th day of the next succeeding taxable year. If no election to secure an exclusion under section 963 applied to the preceding taxable year, the distribution period for the taxable year shall begin with the 61st day of the taxable year.

(2) *Special extended distribution period.* If the United States shareholder of the foreign corporation so elects in statement filed with its return for the taxable year for which the election to secure the exclusion under section 963 is made, the distribution period with respect to such foreign corporation for its taxable year to which the election to secure the exclusion applies shall end with any day which occurs no earlier than the last day of such taxable year of such foreign corporation and no later than the 180th day after the close of such taxable year. The statement

shall designate the day so elected as the end of the distribution period.

(h) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. For 1963 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all of whose one class of stock M Corporation directly owns, and controlled foreign corporation B, all of whose one class of stock is directly owned by A Corporation. All such corporations use the calendar year as the taxable year, and the distribution periods of corporations A and B for 1963 coincide. Corporations A and B each have earnings and profits (before distributions) of \$100 for 1963. On June 1, 1963, B Corporation distributes earnings and profits of \$120, of which \$100 is from its earnings and profits for 1963 and \$20 is from prior earnings. For 1963, A Corporation pays no income tax and distributes earnings and profits of \$150 to M Corporation. Under paragraph (c) of this section, such \$150 is allocated to A Corporation's earnings and profits of \$200 for 1963, consisting of its total earnings and profits for that year of \$220 less the \$20 received as a distribution from B Corporation's prior earnings.

Example 2. Domestic corporation M directly owns all of the one class of stock of controlled foreign corporation A. Both corporations use the calendar year as the taxable year, and A Corporation's taxable year and its distribution period for 1963 coincide. For 1963, \$50 is included in the gross income of M Corporation under section 951(a)(1)(B) as A Corporation's increase in earnings invested for such year in United States property. For 1964, M Corporation makes a first-tier election with respect to A Corporation. For 1964, A Corporation has earnings and profits of \$100, including \$10 attributable to an increase in earnings invested for such year in United States property. During 1964, A Corporation distributes earnings and profits of \$80 to M Corporation. Without regard to paragraph (e) of this section, \$10 of this distribution is attributable under section 959(c)(1) to A Corporation's 1964 earnings and profits required to be included in M Corporation's gross income under section 951(a)(1)(D). Pursuant to paragraph (e) of this section, however, the entire distribution of \$80 counts toward a minimum distribution for 1964 and is considered to be from earnings and profits of A Corporation for 1964 described in section 959(c)(3). Thus the entire distribution of \$80 is included in M Corporation's gross income as a dividend and the foreign tax credit in respect of such amount is determined in accordance with section 902 as modified by the regulations under section 963. On the other hand, if A Corporation made no distributions for 1964, no part of the

\$10 of A Corporation's increase in earnings invested in United States property for such year would count toward a minimum distribution for any other year but would be included in the gross income for M Corporation for 1964 under section 951(a)(1)(B), and the foreign tax credit in respect of such amount would be determined in accordance with § 1.960-1.

Example 3. For 1964 domestic corporation M makes a chain election with respect to controlled foreign corporation A, all the one class of stock of which is owned directly by M Corporation, and controlled foreign corporation B, all the one class of stock of which is owned directly by A Corporation. Corporation M makes no election under section 963 for 1963 or 1965. Corporations M and B use the calendar year as the taxable year, and A Corporation uses for its taxable year a fiscal year ending on September 30. Corporation M elects to have the distribution period for each controlled foreign corporation end on March 29, 1965, such date being the 180th day after the close of A Corporation's taxable year ending on September 30, 1964. Corporation A's distribution period for its taxable year ending on September 30, 1964, begins on November 30, 1963, the 61st day of such taxable year. The distribution period of B Corporation for 1964 begins on March 1, 1964, the 61st day of such taxable year. A distribution counting toward a minimum distribution for 1964 may be made from the earnings and profits of B Corporation only if the amount thereof is distributed by B Corporation to A Corporation, and in turn by A Corporation to M Corporation, during the period of March 1, 1964, through March 29, 1965.

Example 4. The facts are the same as in example 3, except that for their taxable years ending in 1964, corporations A and B each have earnings and profits (before distributions) of \$100. On March 10, 1965, B Corporation distributes to A Corporation a dividend of \$80 upon which A Corporation incurs foreign income tax at the rate of 10 percent. On March 15, 1965, A Corporation distributes to M Corporation a dividend of \$50. Corporation M chooses to take into account as gross income for 1964 from such distribution only \$40. For purposes of applying this section, the distribution counting toward a minimum distribution is \$44.44, consisting of the \$40 of earnings and profits actually received by M Corporation plus the \$4.44 ($\$40/\$72 \times \8) of foreign income tax incurred by A Corporation attributable thereto; A Corporation is deemed to have received \$44.44 ($\$40 + 0.90$) of the distribution from B Corporation on September 30, 1964, the last day of the taxable year of A Corporation to which the election relates; and the foreign personal holding company income derived by A Corporation for its taxable year ending in 1965 from the distribution from B is only \$35.56 ($\$80 - \44.44). Assuming that no exceptions,

exclusions, or exemptions were applicable, subpart F income would be realized by A Corporation for its taxable year ending on September 30, 1965, upon the distribution by B Corporation to A Corporation, but only in the amount of \$32 (\$35.56 less a deduction under section 954(b)(5) for taxes of \$3.56).

[T.D. 7100, 36 FR 10860, June 4, 1971; 36 FR 11924, June 23, 1971, as amended by T.D. 7334, 39 FR 44214, Dec. 23, 1974]

§ 1.963-4—1.963-5 [Reserved]

§ 1.963-6 Deficiency distribution.

(a) *In general.* Section 963(e)(2) and this section provide a method under which, by virtue of a deficiency distribution, a United States shareholder may be relieved from the payment of a deficiency in tax for any taxable year arising by reason of failure to include subpart F income in gross income under section 951(a)(1)(A)(i), when it has been determined that such shareholder has failed to receive a minimum distribution for such year in respect of which it elected to secure the exclusion under section 963. In addition, this section provides rules with respect to a credit or refund of part or all of any such deficiency which has been paid. Under the method provided, the benefit of the exclusion of subpart F income from gross income of the United States shareholder is allowed retroactively for the taxable year in respect of which the election under section 963 applied, but only if the subsequent deficiency distribution meets the requirements of this section. The benefits of the retroactive exclusion will not, however, prevent the assessment of interest, additional amounts, and assessable penalties.

(b) *Requirements for deficiency distribution—(1) Distribution made on or after date of determination.* If—

(i) A United States shareholder, in making its return of the tax imposed by chapter 1 of the Code for any taxable year, elects to secure an exclusion under section 963 for such year,

(ii) It is subsequently determined (within the meaning of paragraph (c) of this section) that an exclusion under section 963 of subpart F income with respect to stock to which such election relates does not apply for such taxable year because of the failure of such shareholder to receive a minimum dis-

tribution for such year with respect to such stock, and

(iii) Such failure is due to reasonable cause, a deficiency distribution which is received by such shareholder with respect to such stock from a foreign corporation which was the single first-tier corporation, or a corporation in the chain or group, as the case may be, with respect to which the election was made, shall count toward a minimum distribution under section 963 for such year of election if such deficiency distribution is received (except as provided by subparagraph (2) of this paragraph) on, or within 90 days after, the date of such determination and prior to the filing of a claim under paragraph (d)(1) of this section. Such claim must be filed within 120 days after the date of such determination, and the deficiency distribution must be a dividend of such a nature (except as otherwise provided in this section) as would have permitted it to count toward a minimum distribution for the taxable year of the election if it had been received by the United States shareholder during such year. No distribution shall count as a deficiency distribution under this subparagraph unless a claim therefor is filed under paragraph (d)(1) of this section.

(2) *Distribution made before date of determination.* A deficiency distribution may also be received by a United States shareholder at any time prior to the date on which the determination required by subparagraph (1) of this paragraph is made. A distribution will count as a deficiency distribution under this subparagraph—

(i) To the extent that such distribution otherwise satisfies the requirements of this section;

(ii) If the United States shareholder files within 90 days after such distribution but before the determination date an advance claim described in paragraph (d)(2) of this section for treatment of such distribution as a deficiency distribution;

(iii) If such shareholder consents in such claim to include such deficiency distribution in gross income for the taxable year of the election to the extent necessary to complete a minimum distribution for such year and under section 6501 to extend the period for

the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts, and assessable penalties for such taxable year;

(iv) If, when requested by the district director, such shareholder consents under section 6501 in such claim to extend the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts and assessable penalties for the year of receipt of such distribution; and

(v) To the extent that such shareholder makes advance payment of tax which would result from the inclusion of such distribution in gross income as a minimum distribution for the year of such deficiency.

To the extent that such distribution is not necessary under the determination (when made under paragraph (c) of this section) for a deficiency distribution, it shall be included in the United States shareholder's gross income for the taxable year of receipt of such distribution and paragraph (g) of this section shall not apply.

(3) *Earnings and profits of year of election to be first distributed.* If—

(i) In the case of a first-tier election, the United States shareholder's proportionate share of the earnings and profits of the foreign corporation which was the single first-tier corporation, or

(ii) In the case of a chain or group election, any portion of the share of any corporation or corporations (which were in the chain or group) of the consolidated earnings and profits with respect to the United States shareholder,

for the taxable year of the election has not been distributed on the stock with respect to which the election was made, then a distribution, in order to be counted toward a deficiency distribution, must be made by such corporation or corporations and from such earnings and profits to the extent thereof. Once all such earnings and profits of such corporation or corporations have been completely distributed, a deficiency distribution may be made from other earnings and profits of such foreign corporation which was a single

first-tier corporation, or of such corporation or corporations which were in such chain or group, as the case may be.

(4) *Proof of reasonable cause.* Reasonable cause for failure to receive a minimum distribution shall be deemed to exist, in the absence of circumstances demonstrating bad faith, if the electing United States shareholder receives, within the period prescribed by paragraph (a)(1)(i) of § 1.963-3 with respect to the year of election, at least 80 percent of the amount of a minimum distribution (from the earnings and profits to which the election for such year relates) which if received during such period would have satisfied the conditions for the section 963 exclusion to apply to such year. If less than 80 percent of the amount of a minimum distribution is received during such period, the existence of a reasonable cause for failure to receive a minimum distribution must be established by clear and convincing evidence; however, the preceding sentence shall not be taken as a limitation on the establishment of reasonable cause by any other proof of reasonable cause. For example, reasonable cause will exist if a single first-tier corporation for its taxable year makes a distribution which would be a minimum distribution but for a refund of foreign income tax which it has paid in good faith under foreign law but which is found not to be due after the United States income tax return of the United States shareholder has been filed.

(c) *Nature and details of determination.* (1) A determination that the section 963 exclusion does not apply to a United States shareholder for a taxable year due to its failure to receive a minimum distribution for such year shall, for the purposes of this section, be established by—

(i) A decision by the Tax Court or a judgment, decree, or other order by any court of competent jurisdiction, which has become final;

(ii) A closing agreement made under section 7121; or,

(iii) An agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated, and by, or on behalf of, such shareholder and which

relates to the liability of such shareholder for the tax under chapter 1 of the Code for such year.

(2) The date of determination by a decision of the Tax Court shall be the date upon which such decision becomes final, as prescribed in section 7481.

(3) The date upon which a judgment of a court becomes final shall be determined upon the basis of the facts in the particular case. Ordinarily, a judgment of a United States district court shall become final upon the expiration of the time allowed for taking an appeal, if no such appeal is duly taken within such time; and a judgment of the United States Court of Claims shall become final upon the expiration of the time allowed for filing a petition for certiorari, if no such petition is duly filed within such time.

(4) The date of determination by a closing agreement made under section 7121 shall be the date such agreement is approved by the Commissioner.

(5) The date of a determination made by an agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated, shall be the date prescribed by this subparagraph. The agreement shall be sent to the United States shareholder at his last known address by either registered or certified mail. For further guidance regarding the definition of last known address, see §301.6212-2 of this chapter. If registered mail is used for such purpose, the date of registration shall be treated as the date of determination; if certified mail is used for such purpose, the date of the postmark on the sender's receipt for such mail shall be treated as the date of determination. However, if the deficiency distribution is received by such shareholder before such registration or postmark date but on or after the date the agreement is signed by the district director or such other official to whom authority to sign the agreement is delegated, the date of determination shall be the date on which the agreement is so signed.

(6) The determination under this paragraph shall find that, due to the United States shareholder's failure to receive a minimum distribution, the section 963 exclusion does not apply for the taxable year with respect to stock

to which the election under such section relates. A determination described in subdivision (ii) or (iii) of subparagraph (1) of this paragraph shall set forth the amount of the deficiency distribution and the amount of additional income tax for which the United States shareholder is liable under Chapter 1 of the Code by reason of not including in gross income for such year the amount of the deficiency distribution. If a determination described in subdivision (i) of subparagraph (1) of this paragraph does not establish the amount of the deficiency distribution and such amount of additional tax, such amounts may be established by an agreement which is signed by the district director, or such other official to whom authority to sign the agreement is delegated.

(d) *Claim for treatment of distribution as a deficiency distribution*—(1) *Claim filed after date of determination.* A claim (including any amendments thereof) for treatment of a deficiency distribution as counting toward a minimum distribution for the taxable year of election shall be filed in duplicate, within 120 days after the date of the determination described in paragraph (c) of this section, with the requisite declaration prescribed by the Commissioner on the appropriate claim form and shall be accompanied by—

(i) A copy of such determination and a description of how it became final;

(ii) If requested by the district director, or by such other official to whom authority to sign the agreement referred to in paragraph (c)(1) or (6) of this section is delegated, a consent by the United States shareholder under section 6501 to extend the period for the making of assessments, and the bringing of distraint or a proceeding in court for collection, in respect of a deficiency and all interest, additional amounts, and assessable penalties for the taxable year of election; and

(iii) Such other information as may be required by the claim form or the district director, or other official, in support of the claim.

(2) *Advance claim.* An advance claim for treatment of a deficiency distribution as counting toward a minimum distribution for the taxable year of election shall be filed in duplicate,

within 90 days after such distribution but before the date of determination described in paragraph (c) of this section, and shall satisfy all requirements of subparagraph (1) of this paragraph other than subdivision (i) of such subparagraph. However, within 120 days after the date of the determination described in paragraph (c) of this section, the advance claim shall be completed so that it satisfies all requirements of subparagraph (1) of this paragraph.

(e) *Computation of interest on deficiencies in tax.* If a United States shareholder, for the taxable year of the election under section 963, completes a minimum distribution for such year by receiving a deficiency distribution to which this section applies, the interest on the deficiency in tax due by reason of the failure to include the amount of such deficiency distribution in such shareholder's gross income for such year shall be computed for the period from the last date prescribed for payment of the tax for such year to the date such deficiency in tax is paid. No interest shall be due by reason of the failure to include Subpart F income in gross income for a taxable year in respect of which a minimum distribution under section 963 is completed by a deficiency distribution to which this section applies.

(f) *Claim for credit or refund.* If a deficiency in tax is asserted for any taxable year by reason of failure to include Subpart F income in gross income under section 951(a)(1)(A)(i) and the United States shareholder has paid any portion of such asserted deficiency, such shareholder is entitled to a credit or refund of such payment to the extent that such payment constitutes an overpayment of tax as the result of the receipt of a deficiency distribution to which this section applies. To secure credit or refund of such overpayment of tax, the United States shareholder must file a claim for refund in accordance with §301.6402-3, in addition to the claim form required under paragraph (d) of this section. No interest shall be allowed on such credit or refund. For other rules applicable to the filing of claims for credit or refund of an overpayment of tax, see section 6402 and the regulations thereunder. For the limitations applicable to the credit or

refund for an overpayment of tax, see section 6511 and the regulations thereunder.

(g) *Effect of deficiency distribution—(1) Allocation of distributions.* The deficiency distribution shall be allocated, by applying the rules of §1.963-3 (and paragraph (b) of §1.963-4, if applicable for the year of election), as a distribution first from the earnings and profits (to the extent thereof) of the foreign corporation which was the single first-tier corporation, or of the distributing corporation or corporations which were in the chain or group, as the case may be, for the taxable year in respect of which the election was made, and then from earnings and profits (to the extent thereof) described in section 959(c)(3) and determined as provided in section 959 for the most recent taxable year and the first, second, etc., taxable years preceding such recent taxable years, in that order, of the distributing corporation or corporations. In applying the preceding sentence to taxable years other than the taxable year in respect of which the election was made, the deficiency distribution shall first be allocated, in the order of allocation prescribed by such sentence, first to taxable years in respect of which no election under section 963 was made with respect to the stock on which such distribution is received and then to taxable years in respect of which an election under such section was made.

(2) *Year of receipt.* Any deficiency distribution made with respect to a taxable year of the United States shareholder shall be treated, except as provided in paragraph (b)(2) of this section, as having been received by the shareholder in that year for which such shareholder elected to secure an exclusion under section 963; and, for purposes of the foreign tax credit under section 901, the foreign income taxes paid or accrued, or deemed paid, by the United States shareholder by reason of a distribution of any amount treated as a deficiency distribution for such year shall be treated as paid or accrued, or deemed paid, for such year.

(3) *Year of payment.* A distribution counting toward a deficiency distribution for a taxable year of election shall, except as provided in paragraph

(b)(2) of this section, be treated for purposes of applying paragraph (a) of § 1.963-3, relating to conditions under which earnings and profits are counted toward a minimum distribution, and paragraph (b)(3) of § 1.963-4, relating to rules for distributing through a chain or group, as if it were distributed during the distribution period (as defined in paragraph (g) of § 1.963-3) with respect to the distributing corporation and each foreign corporation through which such distribution is made to the United States shareholder, for the taxable year to which the election under section 963 applies; and the foreign income taxes paid by any foreign corporation by reason of such distribution shall, in the application of section 902 and of the special rules of paragraph (c) of § 1.963-4, be treated as paid or accrued by such foreign corporation for its taxable year to which such election applies. The distribution shall not count toward a minimum distribution for any other taxable year.

(4) *Allocation of reduction in tax credit.* If any portion of a deficiency distribution from a corporation which was in a chain or group is paid from earnings and profits of a taxable year other than that in respect of which the election was made, then the minimum distribution toward which such deficiency distribution counts may not be treated as a pro rata minimum distribution for purposes of § 1.963-4. Moreover, the amount of the overall United States and foreign income tax with respect to such minimum distribution must satisfy the minimum tax requirements of paragraph (a)(1)(i), or paragraph (ii), of § 1.963-4, but, if the latter applies, without any reduction and deferral under paragraph (c)(3) of such section of the foreign tax credit allowable under section 901 with respect to the deficiency distribution.

[T.D. 6759, 29 FR 13346, Sept. 25, 1964, as amended by T.D. 6767, 29 FR 14879, Nov. 3, 1964; T.D. 7410, 41 FR 11020, Mar. 16, 1976; T.D. 8939, 66 FR 2819, Jan. 12, 2001]

§ 1.964-1 Determination of the earnings and profits of a foreign corporation.

(a)(1) *In general.* For rules for determining the earnings and profits (or deficit in earnings and profits) of a foreign

corporation for taxable years beginning before January 1, 1987, for purposes of sections 951 through 964, see 26 CFR 1.964-1(a) (revised as of April 1, 2006). For taxable years beginning after December 31, 1986, except as otherwise provided in the Code and regulations, the earnings and profits (or deficit in earnings and profits) of a foreign corporation for its taxable year shall be computed for all Federal income tax purposes substantially as if such corporation were a domestic corporation by—

(i) Preparing a profit and loss statement with respect to such year from the books of account regularly maintained by the corporation for the purpose of accounting to its shareholders.

(ii) Making the adjustments necessary to conform such statement to the accounting principles described in paragraph (b) of this section; and

(iii) Making the further adjustments necessary to conform such statement to the tax accounting standards described in paragraph (c) of this section.

(2) *Required adjustments.* The computation described in paragraph (a)(1) of this section shall be made in the foreign corporation's functional currency (determined under section 985 and the regulations under that section) and may be made by following the procedures described in paragraphs (a)(1)(i) through (a)(1)(iii) of this section in an order other than the one listed, as long as the result so obtained would be the same. In determining earnings and profits, or the deficit in earnings and profits, of a foreign corporation under section 964, the amount of an illegal bribe, kickback, or other payment (within the meaning of section 162(c), as amended by section 288 of the Tax Equity and Fiscal Responsibility Act of 1982 in the case of payments made after September 3, 1982, and the regulations issued pursuant to section 964) paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government shall not be taken into account to decrease such earnings and profits or to increase such deficit. No adjustment shall be required under paragraph (a)(1)(ii) or (iii) of this section unless it is material.

Whether an adjustment is material depends on the facts and circumstances of the particular case, including the amount of the adjustment, its size relative to the general level of the corporation's total assets and annual profit or loss, the consistency with which the practice has been applied, and whether the item to which the adjustment relates is of a recurring or merely a nonrecurring nature. For the treatment of earnings and profits whose distribution is prevented by restrictions and limitations imposed by a foreign government, see section 964(b) and the regulations issued pursuant to section 964.

(3) *Translation into dollars.* In the case of a foreign corporation with a functional currency other than the United States dollar (dollar), see sections 986(b) and 989(b) for rules regarding the time and manner of translating distributions or inclusions of the foreign corporation's earnings and profits into dollars.

(b) *Accounting adjustments—(1) In general.* The accounting principles to be applied in making the adjustments required by paragraph (a)(1)(ii) of this section shall be those accounting principles generally accepted in the United States for purposes of reflecting in the financial statements of a domestic corporation the operations of its foreign affiliates, including the following:

(i) *Clear reflection of income.* Any accounting practice designed for purposes other than the clear reflection on a current basis of income and expense for the taxable year shall not be given effect. For example, an adjustment will be required where an allocation is made to an arbitrary reserve out of current income.

(ii) *Physical assets, depreciation, etc.* All physical assets (as defined in paragraph (e)(5)(ii) of this section), including inventory when reflected at cost, shall be taken into account at historical cost computed either for individual assets or groups of similar assets. The historical cost of such an asset shall not reflect any appreciation or depreciation in its value or in the relative value of the currency in which its cost was incurred. Depreciation, depletion, and amortization allowances shall be based on the historical cost of

the underlying asset and no effect shall be given to any such allowance determined on the basis of a factor other than historical cost. For special rules for determining historical cost where assets are acquired during a taxable year beginning before January 1, 1950, or a majority interest in the foreign corporation is acquired after December 31, 1949, but before October 27, 1964, see subparagraph (2) of this paragraph.

(iii) *Valuation of assets and liabilities.* Any accounting practice which results in the systematic undervaluation of assets or overvaluation of liabilities shall not be given effect, even though expressly permitted or required under foreign law, except to the extent allowable under paragraph (c) of this section. For example, an adjustment will be required where inventory is written down below market value. For the definition of market value, see paragraph (a) of §1.471-4.

(iv) *Income equalization.* Income and expense shall be taken into account without regard to equalization over more than one accounting period; and any equalization reserve or similar provision affecting income or expense shall not be given effect, even though expressly permitted or required under foreign law, except to the extent allowable under paragraph (c) of this section.

(v) *Foreign currency.* If transactions effected in a foreign currency other than that in which the books of the corporation are kept are translated into the foreign currency reflected in the books, such translation shall be made in a manner substantially similar to that as prescribed in section 988 and the regulations under that section for the translation of foreign currency amounts into United States dollars.

(2) *Historical cost.* For purposes of this section, the historical cost of an asset acquired by the foreign corporation during a taxable year beginning before January 1, 1963, shall be determined, if it is so elected by or on behalf of such corporation—

(i) In the event that the foreign corporation became a majority owned subsidiary of a United States person (within the meaning of section 7701(a)(30)) after December 31, 1949, but before October 27, 1964, and the asset was held by

such foreign corporation at that time, as though the asset was purchased on the date during such period the foreign corporation first became a majority owned subsidiary at a price equal to its then fair market value, or

(ii) In the event that subdivision (i) of this subparagraph is inapplicable but the asset was acquired by the foreign corporation during a taxable year beginning before January 1, 1950, as though the asset were purchased on the first day of the first taxable year of the foreign corporation beginning after December 31, 1949, at a price equal to the undepreciated cost (cost or other basis minus book depreciation) of that asset as of that date as shown on the books of account of such corporation regularly maintained for the purpose of accounting to its shareholders.

For purposes of this subparagraph, a foreign corporation shall be considered a majority owned subsidiary of a United States person if, taking into account only stock acquired by purchase (as defined in section 334(b)(3)), the United States person owns (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. The election under this subparagraph shall be made for the first taxable year beginning after December 31, 1962, in which the foreign corporation is a controlled foreign corporation (within the meaning of section 957), or for which it is included in a chain or group under section 963(c)(2)(B) or (3)(B) (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975), or has a deficit in earnings and profits sought to be taken into account under section 952(d) or pays a dividend that is included in the foreign base company shipping income of a controlled foreign corporation under § 1.954-6(f). Once made, such an election shall be irrevocable. For the time and manner in which an election may be made on behalf of a foreign corporation, see paragraph (c)(3) of this section.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Corporation M is a controlled foreign corporation which regularly maintains books of account for the purpose of ac-

counting to its shareholders in accordance with the accounting practices prevalent in country X, the country in which it operates. As a consequence of those practices, the profit and loss statement prepared from these books of account reflects an allocation to an arbitrary reserve out of current income and depreciation allowances based on replacement values which are greater than historical cost. Adjustments are necessary to conform such statement to accounting principles generally accepted in the United States. Assuming these adjustments to be material, the unacceptable practices, will have to be eliminated from the statement, an increase in the amount of profit (or a decrease in the amount of loss) thereby resulting.

Example 2. In 1973, Corporation N is a foreign corporation which is not a controlled foreign corporation but which is included in a chain, for minimum distribution purposes, under section 963(c)(2)(B). Corporation N regularly maintains books of account for the purpose of accounting to its shareholders in accordance with the accounting practices of country Y, the country in which it operates. As a consequence of those practices, the profit and loss statement prepared from these books of account reflects the inclusion in income of stock dividends and of corporate distributions representing a return of capital. Adjustments are necessary to conform such statement to accounting principles generally accepted in the United States. Assuming these adjustments to be material, the unacceptable practices will have to be eliminated from the statement, a decrease in the amount of profit (or increase in the amount of loss) thereby resulting.

(c) *Tax adjustments—(1) In general.* The tax accounting standards to be applied in making the adjustments required by paragraph (a)(1)(iii) of this section shall be the following:

(i) *Accounting methods.* The method of accounting shall reflect the provisions of section 446 and the regulations thereunder.

(ii) *Inventories.* Inventories shall be taken into account in accordance with the provisions of sections 471 and 472 and the regulations thereunder.

(iii) *Depreciation.* Depreciation shall be computed as follows:

(a) For any taxable year beginning before July 1, 1972; depreciation shall be computed in accordance with section 167 and the regulations thereunder.

(b) If, for any taxable year beginning after June 30, 1972, 20 percent or more of the gross income from all sources of

the corporation is derived from sources within the United States, then depreciation shall be computed in accordance with the provisions of §1.312-15.

(c) If, for any taxable year beginning after June 30, 1972, less than 20 percent of the gross income from all sources of the corporation is derived from sources within the United States, then depreciation shall be computed in accordance with section 167 and the regulations thereunder.

(iv) *Elections.* Effect shall be given to any election made in accordance with an applicable provision of the Code and the regulations thereunder and these regulations.

(v) *Taxable years.* The period for computation of taxable income and earnings and profits known as the taxable year shall reflect the provisions of section 441 and the regulations under that section.

(vi) *Applicable requirements.* Except as provided in paragraphs (c)(2) and (c) (3) of this section, any requirements imposed by the Code or applicable regulations with respect to making an election or adopting or changing a method of accounting or taxable year must be satisfied by or on behalf of the foreign corporation just as though it were a domestic corporation if such election or such adoption or change of method or taxable year is to be taken into account in the computation of its earnings and profits.

(2) *Adoption or change of method or taxable year.* For the first taxable year of a foreign corporation beginning after April 25, 2006, in which such foreign corporation first qualifies as a controlled foreign corporation (as defined in section 957 or 953) or a noncontrolled section 902 corporation (as defined in section 904(d)(2)(E)), any method of accounting or taxable year allowable under this section may be adopted, and any election allowable under this section may be made, by such foreign corporation or on its behalf notwithstanding that, in previous years, its books or financial statements were prepared on a different basis, and notwithstanding that such election is required by the Code or regulations to be made in a prior taxable year. Any allowable methods adopted or elections made shall be reflected in the computation of

the foreign corporation's earnings and profits for such taxable year, prior taxable years, and (unless the Commissioner consents to a change) subsequent taxable years. However, see section 898 for the rules regarding the taxable year of a specified foreign corporation as defined in section 898(b). Any allowable method of accounting or election that relates to events that first arise in a subsequent taxable year may be adopted or made by or on behalf of the foreign corporation for such year. Adjustments to the appropriate separate category (as defined in §1.904-5(a)(1)) of earnings and profits and income of the foreign corporation shall be required under section 481 to prevent any duplication or omission of amounts attributable to previous years that would otherwise result from any change in a method of accounting. See paragraph (c)(3) of this section for the manner in which a method of accounting or a taxable year may be adopted or changed on behalf of the foreign corporation. See paragraph (c)(4) of this section for applicable rules if the amount of the foreign corporation's earnings and profits became significant for United States tax purposes before a method of accounting or taxable year was adopted by the foreign corporation or on its behalf in accordance with the rules of paragraph (c)(3) of this section. See paragraph (c)(6) of this section for special rules postponing the time for taking action by or on behalf of a foreign corporation until the amount of its earnings and profits becomes significant for U.S. tax purposes. See also §§1.985-5, 1.985-6, and 1.985-7 relating to adjustments to earnings and profits of a QBU required when the QBU changes its functional currency or begins to use the dollar approximate separate transactions method of accounting.

(3) *Action on behalf of corporation—(i) In general.* An election shall be deemed made, or an adoption or change in method of accounting or taxable year deemed effectuated, on behalf of the foreign corporation only if its controlling domestic shareholders (as defined in paragraph (c)(5) of this section)—

(A) Satisfy for such corporation any requirements imposed by the Internal Revenue Code or applicable regulations with respect to such election or such

adoption or change in method or taxable year (including the provisions of sections 442 and 446 and the regulations under those sections, as well as any operative provisions), such as the filing of forms, the execution of consents, securing the permission of the Commissioner, or maintaining books and records in a particular manner. For purposes of this paragraph (c)(3)(i)(A), the books of the foreign corporation shall be considered to be maintained in a particular manner if the controlling domestic shareholders or the foreign corporation regularly keep the records and accounts required by section 964(c) and the regulations under that section in that manner;

(B) File the statement described in paragraph (c)(3)(ii) of this section, at the time and in the manner prescribed therein; and

(C) Provide the written notice required by paragraph (c)(3)(iii) of this section at the time and in the manner prescribed therein.

(ii) *Statement required to be filed with a tax return.* The statement required by this paragraph (c)(3)(ii) shall set forth the name, country of organization, and U.S. employer identification number (if applicable) of the foreign corporation, the name, address, stock interests, and U.S. employer identification number of each controlling domestic shareholder (or, if applicable, the shareholder's common parent) approving the action, and the names, addresses, U.S. employer identification numbers, and stock interests of all other domestic shareholders notified of the action taken. Such statement shall describe the nature of the action taken on behalf of the foreign corporation and the taxable year for which made, and identify a designated shareholder who retains a jointly executed consent confirming that such action has been approved by all of the controlling domestic shareholders and containing the signature of a principal officer of each such shareholder (or its common parent). Each controlling domestic shareholder (or its common parent) shall file the statement with, and on or before the due date (including extensions) of, its own tax return (or information return, if applicable) for its taxable year with or within which ends the taxable

year of the foreign corporation for which the election is made or for which the method of accounting or taxable year is adopted or changed. In the case of a controlling domestic shareholder that is the sole shareholder of a controlled foreign corporation, no separate statement need be filed if the information described in this paragraph (c)(3)(ii) is included on Form 5471 and Form 3115 or 1128, as applicable, filed with respect to the controlled foreign corporation with the shareholder's return for such taxable year.

(iii) *Notice.* On or before the filing date described in paragraph (c)(3)(ii) of this section, the controlling domestic shareholders shall provide written notice of the election made or the adoption or change of method or taxable year effected to all other persons known by them to be domestic shareholders who own (within the meaning of section 958(a)) stock of the foreign corporation. Such notice shall set forth the name, country of organization and U.S. employer identification number (if applicable) of the foreign corporation, and the names, addresses, and stock interests of the controlling domestic shareholders. Such notice shall describe the nature of the action taken on behalf of the foreign corporation and the taxable year for which made, and identify a designated shareholder who retains a jointly executed consent confirming that such action has been approved by all of the controlling domestic shareholders and containing the signature of a principal officer of each such shareholder (or its common parent). However, the failure of the controlling domestic shareholders to provide such notice to a person required to be notified shall not invalidate the election made or the adoption or change of method or taxable year effected.

(4) *Effect of action or inaction by controlling domestic shareholders—(i) In general.* Any election, or adoption or change of method of accounting or taxable year made by the controlling domestic shareholders on behalf of the foreign corporation pursuant to paragraph (c)(3) of this section or any other

provision of the regulations (for example, § 1.985-2(c)(2) or (3)) shall be reflected in the computation of the earnings and profits of such corporation under this section to the extent that it bears upon the federal income tax liability of the domestic shareholders of the foreign corporation. Any such action shall bind both the foreign corporation and its domestic shareholders as to the computation of the foreign corporation's earnings and profits for the taxable year of the foreign corporation for which the election is made or for which the method of accounting or taxable year is adopted or changed and in subsequent taxable years unless the Commissioner consents to a change. The preceding sentence shall apply regardless of—

(A) When the action was taken;

(B) Whether the foreign corporation was a controlled foreign corporation or a noncontrolled section 902 corporation at the time the action was taken;

(C) When ownership was acquired; or

(D) Whether the domestic shareholder received the written notice required by paragraph (c)(3)(iii) of this section.

(ii) *Inaction or untimely action.* In the event that action by or on behalf of the foreign corporation is not undertaken by the time specified in paragraph (c)(6) of this section and such failure is shown to the satisfaction of the Commissioner to be due to reasonable cause, such action may be undertaken during any period of at least 30 days occurring after such showing is made which the Commissioner may specify as appropriate for this purpose. In the event that action by or on behalf of the foreign corporation is not undertaken by the time specified in paragraph (c)(6) of this section and such failure is not shown to the satisfaction of the Commissioner to be due to reasonable cause, earnings and profits shall be computed as if no elections had been made and any permissible accounting methods not requiring an election and reflected in the books of account regularly maintained by the foreign corporation for the purpose of accounting to its shareholders had been adopted. Accordingly, if the earnings and profits of a noncontrolled section 902 corporation became significant for United

States income tax purposes in a taxable year beginning on or before April 25, 2006, the corporation's earnings and profits shall be computed as if no elections had been made and any permissible accounting methods not requiring an election and reflected in the books of account regularly maintained by the foreign corporation for purposes of accounting to its shareholders had been adopted. Thereafter, any change in a particular accounting method or methods or taxable year may be made by, or on behalf of, the foreign corporation only with the Commissioner's consent.

(iii) *Computation of earnings and profits by a minority shareholder prior to majority election or significant event.* A shareholder of a foreign corporation may be required to compute the foreign corporation's earnings and profits before the foreign corporation or its controlling domestic shareholders make, or are required under this section to make, an election or adopt a method of accounting for federal income tax purposes. In such a case, the shareholder must compute earnings and profits in accordance with this section. Such computation shall be made as if no elections had been made and any permissible accounting methods not requiring an election and reflected in the books of account regularly maintained by the foreign corporation for the purpose of accounting to its shareholders had been adopted. However, a later, properly filed, and timely election or adoption of method by, or on behalf of, the foreign corporation shall not be treated as a change in accounting method.

(5) *Controlling domestic shareholders—*

(i) *Controlled foreign corporations.* For purposes of this paragraph (c), the controlling domestic shareholders of a controlled foreign corporation shall be its controlling United States shareholders. The controlling United States shareholders of a controlled foreign corporation shall be those United States shareholders (as defined in section 951(b) or 953(c)) who, in the aggregate, own (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of the stock of such foreign corporation entitled to vote and who undertake to act on its behalf. In the

event that the United States shareholders of the controlled foreign corporation do not, in the aggregate, own (within the meaning of section 958(a)) more than 50 percent of the total combined voting power of all classes of the stock of such foreign corporation entitled to vote, the controlling United States shareholders of the controlled foreign corporation shall be all those United States shareholders who own (within the meaning of section 958(a)) stock of such corporation.

(ii) *Noncontrolled section 902 corporations.* For purposes of this paragraph (c), the controlling domestic shareholders of a noncontrolled section 902 corporation that is not a controlled foreign corporation shall be its majority domestic corporate shareholders. The majority domestic corporate shareholders of a noncontrolled section 902 corporation shall be those domestic corporations that meet the ownership requirements of section 902(a) with respect to the noncontrolled section 902 corporation (or to a first-tier foreign corporation that is a member of the same qualified group (as defined in section 902(b)(2)) as the noncontrolled section 902 corporation) that, in the aggregate, own directly or indirectly more than 50 percent of the combined voting power of all of the voting stock of the noncontrolled section 902 corporation that is owned directly or indirectly by all domestic corporations that meet the ownership requirements of section 902(a) with respect to the noncontrolled section 902 corporation (or a relevant first-tier foreign corporation).

(6) *Action not required until significant.* Notwithstanding any other provision of this paragraph, action by or on behalf of a foreign corporation (other than a foreign corporation subject to tax under section 882) to make an election or to adopt a taxable year or method of accounting shall not be required until the due date (including extensions) of the return for a controlling domestic shareholder's first taxable year with or within which ends the foreign corporation's first taxable year in which the computation of its earnings and profits is significant for United States tax purposes with respect to its controlling domestic shareholders (as defined in § 1.964-1(c)(5)). The filing of the infor-

mation return required by section 6038 shall not itself constitute a significant event. For taxable years beginning after April 25, 2006, events that cause a foreign corporation's earnings and profits to have United States tax significance include, without limitation:

(A) A distribution from the foreign corporation to its shareholders with respect to their stock.

(B) An amount is includible in gross income with respect to such corporation under section 951(a).

(C) An amount is excluded from subpart F income of the foreign corporation or another foreign corporation by reason of section 952(c).

(D) Any event making the foreign corporation subject to tax under section 882.

(E) The use by the foreign corporation's controlling domestic shareholders of the tax book value (or alternative tax book value) method of allocating interest expense under section 864(e)(4).

(F) A sale or exchange of the foreign corporation's stock of the controlling domestic shareholders that results in the recharacterization of gain under section 1248.

(7) *Revocation of election.* Notwithstanding any other provision of this section, any election made by or on behalf of a foreign corporation (other than a foreign corporation subject to tax under section 882) may be modified or revoked by or on behalf of such corporation for the taxable year for which made whenever the consent of the Commissioner is secured for such modification or revocation, even though such election would be irrevocable but for this subparagraph.

(8) [Reserved]

(d) *Effective/applicability dates.* Paragraphs (c)(1)(v) through (c)(6) of this section apply to taxable years ending on or after April 20, 2009. See 26 CFR §§ 1.964-1T(c)(1)(v) through (c)(6) (revised as of April 1, 2009) for rules applicable to taxable years beginning after April 25, 2006, and ending before April 20, 2009. However, taxpayers may choose to apply paragraphs (c)(1)(v) through (c)(6) of this section in their entirety in lieu of 26 CFR §§ 1.964-1T(c)(1)(v) through (c)(6) for periods covered by the temporary regulations,

provided that appropriate adjustments are made to eliminate duplicate benefits arising from the application of paragraphs (c)(1)(v) through (c)(6) of this section to taxable years that are not open for assessment.

[T.D. 6764, 29 FR 14628, Oct. 27, 1964]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.964-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

§ 1.964-2 Treatment of blocked earnings and profits.

(a) *General rule.* If, in accordance with paragraph (d) of this section, it is established to the satisfaction of the district director that any amount of the earnings and profits of a controlled foreign corporation for the taxable year (determined under § 1.964-1) was subject to a currency or other restriction or limitation imposed under the laws of any foreign country (within the meaning of paragraph (b) of this section) on its distribution to United States shareholders who own (within the meaning of section 958(a)) stock of such corporation, such amount shall not be included in earnings and profits for purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956 for such taxable year. For rules governing the treatment of amounts with respect to which such restriction or limitation is removed, see paragraph (c) of this section.

(b) *Rules of application.* For purposes of paragraph (a) of this section—

(1) *Period of restriction or limitation.* An amount of earnings and profits of a controlled foreign corporation for any taxable year shall not be included in earnings and profits for purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956 only if such amount of earnings and profits is subject to a currency or other restriction or limitation (within the meaning of subparagraph (2) of this paragraph) throughout the 150-day period beginning 90 days before the close of the taxable year and ending 60 days after the close of such taxable year.

(2) *Restriction or limitation defined.* Whether earnings and profits of a controlled foreign corporation are subject to a currency or other restriction or limitation imposed under the laws of a foreign country must be determined on the basis of all the facts and circumstances in each case. Generally, such a restriction or limitation must prevent—

(i) The ready conversion (directly or indirectly) of such currency into United States dollars, or into property of a type normally owned by such corporation in the operation of its business or other money which is readily convertible into United States dollars; or

(ii) The distribution of dividends by such corporation to its United States shareholders.

For purposes of this subparagraph, if a United States shareholder owns (within the meaning of section 958(a)), or is considered as owning by applying the rules of ownership of section 958(b), 80 percent or more of the total combined voting power of all classes of stock of a foreign corporation in a chain of ownership described in section 958(a), the distribution of dividends by such corporation to such shareholder will not be considered prevented solely by reason of the existence of a currency or other restriction or limitation at an intermediate tier in such chain if dividends may be distributed directly to such shareholders.

(3) *Foreign laws.* A currency or other restriction or limitation on the distribution of earnings and profits may be imposed in a foreign country by express statutory provisions, executive orders or decrees, rules or regulations of a governmental agency, court decisions, the actions of appropriate officials who are acting within the scope of their authority, or by any similar official action. A currency restriction will not be considered to exist unless export restrictions are also imposed which prevent the exportation of property of a type normally owned by the controlled foreign corporation in the operation of its business which could be readily converted into United States dollars.

(4) *Voluntary restriction or limitation.* A currency or other restriction or limitation arising from the voluntary act of the controlled foreign corporation or its United States shareholders during a taxable year beginning after December 31, 1962, will not be taken into account. For example, if a controlled foreign corporation—

(i) Issues a stock dividend which has the effect of capitalizing earnings and profits;

(ii) Elects to restrict its earnings and profits or to make certain investments as a means of avoiding current tax or securing a reduced rate of tax; or

(iii) Allocates earnings and profits to an optional or arbitrary reserve; such restriction is voluntary and will not be taken into account.

(5) *Treatment of earnings and profits in cases of certain mandatory reserves—(i) In general.* If a controlled foreign corporation is required under the laws of a foreign country to establish a reserve out of earnings and profits for the taxable year, such earnings and profits shall be considered subject to a restriction or limitation by reason of such requirement only to the extent that the amount required to be included in such reserve at the close of the taxable year exceeds the accumulated earnings and profits (determined in accordance with subdivision (ii) of this subparagraph) of such corporation at the close of the preceding taxable year.

(ii) *Determination of earnings and profits.* For purposes of determining the accumulated earnings and profits of a controlled foreign corporation under subdivision (i) of this subparagraph, such earnings and profits shall not include any amounts which are attributable to—

(a) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder under section 951(a) and have not been distributed;

(b) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such foreign corporation under section 551(b) and have not been distributed; or

(c) Amounts which become subject to a voluntary restriction or limitation (within the meaning of subparagraph

(4) of this paragraph) during a taxable year beginning before January 1, 1963.

The rules of this subdivision apply only in determining the accumulated earnings and profits of a controlled foreign corporation for purposes of this subparagraph. See section 959 and the regulations thereunder for limitations on the exclusion from gross income of previously taxed earnings and profits.

(6) *Exhaustion of procedures for distributing earnings and profits.* Earnings and profits of a controlled foreign corporation for a taxable year will not be considered subject to a currency or other restriction or limitation on their distribution unless the United States shareholders of such corporation demonstrate either that the available procedures for distributing such earnings and profits have been exhausted or that the use of such procedures will be futile. As a general rule, such procedures will be considered to have been exhausted if the foreign corporation applies for dollars (or foreign currency readily convertible into dollars) at the appropriate rate of exchange and complies with the applicable laws and regulations governing the acquisition and transfer of such currency including submission of the necessary documentation to the exchange authority. The fact that available procedures for distributing earnings and profits were exhausted without success with respect to a prior year is not, of itself, sufficient evidence that such procedures would not be successful with respect to the current taxable year.

(c) *Removal of restriction or limitation—*

(1) *In general.* If, during any taxable year, a currency or other restriction or limitation (within the meaning of paragraph (b) of this section) imposed under the laws of a foreign country on the distribution of earnings and profits of a controlled foreign corporation to its United States shareholders is removed—

(i) *Treatment of deferred income.* Each United States shareholder of such corporation on the last day in such year that such corporation is a controlled foreign corporation shall include in his gross income for such taxable year the amounts attributable to such earnings

and profits which would have been includible in his gross income under section 951(a) for prior taxable years but for the existence of the currency or other restriction or limitation except that the amounts included under this subdivision (i) shall not exceed his pro rata share of—

(a) The earnings and profits upon which the restriction was removed determined on the basis of his stock ownership on the last day of the immediately preceding taxable year, and

(b) The applicable limitations under paragraph (c) of § 1.952-1, paragraph (b)(2) of § 1.955-1, paragraph (b)(2) of § 1.955A-1, or paragraph (b) of § 1.956-1, determined as of the last day of the immediately preceding taxable year, taking into account the provisions of subdivision (ii) of this subparagraph.

(ii) *Treatment of earnings and profits.* For purposes of sections 952, 955 (as in effect both before and after the enactment of the Tax Reduction Act of 1975), and 956, the earnings and profits which are no longer subject to a currency or other restriction or limitation shall be treated as included in the corporation's earnings and profits for the year in which such earnings and profits were derived.

Amounts with respect to which a currency or other restriction or limitation is removed shall be translated into United States dollars at the appropriate exchange rate for the translation period during which such currency or other restriction or limitation is removed. See paragraph (d) of § 1.964-1. Amounts with respect to which a currency or other restriction or limitation is removed shall not be taken into account in determining whether a deficiency distribution (within the meaning of § 1.963-6 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975)) is required to be made for the year in which such earnings and profits were derived.

(2) *Removal of restriction or limitation defined.* An amount of earnings and profits shall be considered no longer subject to a limitation or restriction if and to the extent that—

(i) Money or property in such foreign country is readily convertible into United States dollars, or into other money or property of a type normally

owned by such corporation in the operation of its business which is readily convertible into United States dollars;

(ii) Notwithstanding the existence of any laws or regulations forbidding the exchange of money or property into United States dollars, conversion is actually made into United States dollars, or other money or property of a type normally owned by such corporation in the operation of its business which is readily convertible into United States dollars; or

(iii) A mandatory reserve requirement (described in paragraph (b)(5) of this section) is removed either by a change in law of the foreign country imposing such requirement or by an accumulation of earnings and profits not subject to such requirement.

(3) *Distribution in foreign country.* If, during any taxable year, earnings and profits previously subject to a currency or other restriction or limitation are distributed in a foreign country to one or more United States shareholders of a controlled foreign corporation directly, or indirectly through a chain of ownership described in section 958(a), such earnings and profits shall be considered no longer subject to a restriction or limitation. However, distributed amounts may be excluded from such shareholder's gross income for the taxable year of receipt if such shareholder elects a method of accounting under which the reporting of blocked foreign income is deferred until the income ceases to be blocked.

(4) *Source of distribution.* If, during any taxable year, earnings and profits previously subject to a currency or other restriction or limitation is distributed to one or more United States shareholders of a controlled foreign corporation directly, or indirectly through a chain of ownership described in section 958(a), the source of such distribution shall be determined in accordance with the rules of § 1.959-3.

(5) *Illustration.* The provisions of this paragraph may be illustrated by the following example:

Example. (a) M, a United States person, owns all of the only class of stock of A Corporation, a foreign corporation incorporated under the laws of foreign country X on January 1, 1963. Both M and A Corporations use the calendar year as a taxable year and A

Corporation is a controlled foreign corporation throughout the period here involved.

(b) During 1963, A Corporation derives income of \$100,000 all of which is subpart F income and has earnings and profits of \$100,000. Under the laws of X Country, currency cannot be exported without a license. During the last 90 days of 1963 and the first 60 days of 1964, A Corporation can obtain a license to distribute only an amount equivalent to \$10,000. M must include \$10,000 in his gross income for 1963 under section 951(a)(1)(A)(i) and \$90,000 of A Corporation's earnings and profits for 1963 are not taken into account for purposes of sections 952, 955, and 956.

(c) During 1964, A Corporation has no income and no earnings and profits. On June 1, 1964, A Corporation converts an amount equivalent to \$20,000 into property of a type normally owned by such corporation in the operation of its business which is readily convertible into United States dollars but does not distribute such amount. Corporation A must include \$20,000 in its earnings and profits for 1963 for purposes of sections 952, 955, and 956. M must include \$20,000 in his gross income for 1964.

(d) During 1965, A Corporation has no income and no earnings and profits. On December 15, 1965, A Corporation distributes an amount equivalent to \$15,000 to M in X Country. Neither M nor A Corporation can obtain a license to export currency from X Country. In his return for the taxable year 1965, M elects a method of accounting under which the reporting of blocked foreign income is deferred until the income ceases to be blocked. Accordingly, M does not include the \$15,000 in his gross income for 1965.

(e) During 1966, A Corporation has no income and no earnings and profits. On February 1, 1966, notwithstanding the laws and regulations of X Country which forbid the exchange of X Country's currency into United States dollars, M converts an amount equivalent to \$15,000 into a currency which is readily convertible into United States dollars. Since the income has ceased to be blocked, M must include \$15,000 in his gross income for 1966.

(d) *Manner of claiming existence of restriction or limitation on distribution of earnings and profits.* A United States shareholder claiming that an amount of the earnings and profits of a controlled foreign corporation for the taxable year was subject to a currency or other restriction or limitation imposed under the laws of a foreign country on its distribution shall file a statement with his return for the taxable year with or within which the taxable year of the foreign corporation ends which shall include—

(1) The name and address of the foreign corporation,

(2) A description of the classes of stock of the foreign corporation and a statement of the number of shares of each class owned (within the meaning of section 958(a)) or considered as owned (by applying the rules of ownership of section 958(b)) by the United States shareholder,

(3) A description of the currency or other restriction or limitation on the distribution of earnings and profits,

(4) The total earnings and profits of the foreign corporation for the taxable year (before any amount is excluded from earnings and profits under this section) and the United States shareholder's pro rata share of such total earnings and profits,

(5) The United States shareholder's pro rata share of the amount of earnings and profits subject to a restriction or limitation on distribution,

(6) The amounts which would be includible in the United States shareholder's gross income under section 951(a) but for the existence of the currency or other restriction or limitation,

(7) A description of the available procedures for distributing earnings and profits and a statement setting forth the steps taken to exhaust such procedures or a statement setting forth the reasons that the use of such procedures would be futile, and

(8) The amount of distributions made in a foreign country and a statement as to whether a method of accounting has been elected under which the reporting of blocked income is deferred until such income ceases to be blocked, including an identification of the taxable year and place of filing of such election.

In addition, such United States shareholder shall furnish to the district director such other information as he may require to verify the status of a currency or other restriction or limitation.

[T.D. 6892, 31 FR 11142, Aug. 23, 1966, as amended by T.D. 7545, 43 FR 19652, May 8, 1978; T.D. 7893, 48 FR 22510, May 19, 1983]

§ 1.964-3 Records to be provided by United States shareholders.

(a) *Shareholder's responsibility for providing records.* For purposes of verifying his income tax liability in respect of amounts includible in income under section 951 for the taxable year of a controlled foreign corporation each United States shareholder (as defined in section 951(b)) who owns (within the meaning of section 958(a)) stock of such corporation shall, within a reasonable time after demand by the district director, provide the district director—

(1) Such permanent books of account or records as are sufficient to satisfy the requirements of section 6001 and section 964(c), or true copies thereof, as are reasonably demanded, and

(2) If such books or records are not maintained in the English language, either (i) an accurate English translation of such books or records or (ii) the services of a qualified interpreter satisfactory to the district director.

If such books or records are being used by another district director, the United States shareholder upon whom the district director has made a demand to provide such books or records shall file a statement of such fact with his district director, indicating the location of such books or records. For the length of time the United States shareholder of a controlled foreign corporation must cause such books or records as are under his control to be retained, see paragraph (e) of § 1.6001-1.

(b) *Records to be provided.* Except as otherwise provided in paragraph (c) of this section, the requirements of section 6001 and section 964(c) for record keeping shall be considered satisfied if the books or records produced are sufficient to verify for the taxable year—

(1) The subpart F income of the controlled foreign corporation and, if any part of such income is excluded from the income of the United States shareholder under section 963 or section 970(a), the application of such exclusion,

(2) The previously excluded subpart F income of such corporation withdrawn from investment in less developed countries,

(3) The previously excluded subpart F income of such corporation withdrawn

from investment in foreign base company shipping operations,

(4) The previously excluded export trade income of such corporation withdrawn from investment, and

(5) The increase in earnings invested by such corporation in United States property.

(c) *Special rules.* Verification of the subpart F income of the controlled foreign corporation for the taxable year shall not be required if—

(1) It can be demonstrated to the satisfaction of the district director that—

(i) The locus and nature of such corporation's activities were such as to make it unlikely that the foreign base company income of such corporation (determined in accordance with paragraph (c)(3) of § 1.952-3) exceeded 5 percent of its gross income (determined in accordance with paragraph (b)(1) of § 1.952-3) for the taxable year. (For taxable years to which § 1.952-3 does not apply, such amounts shall be determined under 26 CFR § 1.954-1(d)(3)(i) and (ii) (Revised as of April 1, 1975))), and

(ii) If such corporation reinsures or issues insurance or annuity contracts in connection with United States risks, the 5-percent minimum premium requirement prescribed in paragraph (b) of § 1.953-1 has not been exceeded for the taxable year, or

(2) The United States shareholder's pro rata share of such subpart F income is excluded in full from his income under section 963 and the books or records verify the application of such exclusion.

[T.D. 6824, 30 FR 6480, May 11, 1965, as amended by T.D. 7893, 48 FR 22510, May 19, 1983]

§ 1.964-4 Verification of certain classes of income.

(a) *In general.* The provisions of this section shall apply for purposes of determining when books or records are sufficient for purposes of § 1.964-3 to verify the classes of income described in such section.

(b) *Subpart F income.* Books or records sufficient to verify the subpart F income of a controlled foreign corporation must establish for the taxable year—

(1) Its gross income and deductions,

(2) The income derived from the insurance of United States risks (as provided in paragraph (c) of this section),

(3) The foreign base company income (as provided in paragraph (d) of this section), and

(4) In the case of a United States shareholder claiming the benefit of the exclusion provided in section 952(b) or the limitation provided in section 952(c)—

(i) The items of income excluded from subpart F income by paragraph (b) of § 1.952-1 as income derived from sources within the United States, the United States income tax incurred with respect thereto, and the deductions properly allocable thereto and connected therewith, and

(ii) The earnings and profits, or deficit in earnings and profits, of any foreign corporation necessary for the determinations provided in paragraphs (c) and (d) of § 1.952-1.

(c) *Income from insurance of United States risks.* Books or records sufficient to verify the income of a controlled foreign corporation from the insurance of United States risks must establish for the taxable year—

(1) That the 5-percent minimum premium requirement prescribed in paragraph (b) of § 1.953-1 has not been exceeded, or

(2) The taxable income, as determined under § 1.953-4 or § 1.953-5, which is attributable to the reinsuring or the issuing of any insurance or annuity contracts in connection with United States risks, as defined in § 1.953-2 or § 1.953-3.

(d) *Foreign base company income and exclusions therefrom.* Books or records sufficient to verify the income of a controlled foreign corporation which is foreign base company income must establish for the taxable year the following items:

(1) *Foreign personal holding company income.* The foreign personal holding company income to which section 954(c) and § 1.954-2 apply, for which purpose there must be established the gross income from—

(i) All rents and royalties,

(ii) Rents and royalties received in the active conduct of a trade or business from an unrelated person, as de-

termined under section 954(c)(3)(A) and paragraph (d)(1) of § 1.954-2,

(iii) Rents and royalties received from a related person for the use of property in the country of incorporation of the controlled foreign corporation, as determined under section 954(c)(4)(C) and paragraph (e)(3) of § 1.954-2,

(iv) All dividends, interest, and except where the controlled foreign corporation is a regular dealer in stock or securities, all gains and losses from the sale or exchange of stock or securities,

(v) Dividends, interest, and gains from the sale or exchange of stock or securities, received in the conduct of a banking, financing, or insurance business from an unrelated person, as determined under section 954(c)(3)(B) and paragraph (d)(2) and (3) of § 1.954-2,

(vi) Dividends and interest received from a related corporation organized in the country of incorporation of the controlled foreign corporation, as determined under section 954(c)(4)(A) and paragraph (e)(1) of § 1.954-2,

(vii) Interest received in the conduct of a banking or other financing business from a related person, as determined under section 954(c)(4)(B) and paragraph (e)(2) of § 1.954-2,

(viii) All annuities,

(ix) All gains from commodities transactions described in section 553(a)(3),

(x) All income from estates and trusts described in section 553(a)(4),

(xi) All income from personal service contracts described in section 553(a)(5), and

(xii) All compensation for the use of corporate property by shareholders described in section 553(a)(6).

(2) *Foreign base company sales income.* The foreign base company sales income to which section 954(d) and § 1.954-3 apply, for which purpose there must be established the gross income from—

(i) All sales by the controlled foreign corporation of its personal property and all purchases or sales of personal property by such corporation on behalf of another person,

(ii) Purchases and/or sales of personal property in connection with transactions not involving related persons (as defined in paragraph (e)(2) of § 1.954-1),

(iii) Purchases and/or sales of personal property manufactured, produced, etc., in the country of incorporation of the controlled foreign corporation, as determined under paragraph (a)(2) of § 1.954-3,

(iv) Purchases and/or sales of personal property for use, etc., in the country of incorporation of the controlled foreign corporation, as determined under paragraph (a)(3) of § 1.954-3, and

(v) Sales of personal property manufactured or produced by the controlled foreign corporation, as determined under paragraph (a)(4) of § 1.954-3.

Where an item of income falls within more than one of subdivisions (ii) through (v) of this subparagraph, it shall be sufficient to establish that it falls within any one of them. If a branch or similar establishment is treated as a wholly owned subsidiary corporation through the application of section 954(d)(2) and paragraph (b) of § 1.954-3, the requirements of this subparagraph shall be satisfied separately for each branch or similar establishment so treated and for the remainder of the controlled foreign corporation.

(3) *Foreign base company services income.* The foreign base company services income to which section 954(e) and § 1.954-4 apply, for which purpose there must be established the gross income from—

(i) All services performed by the controlled foreign corporation,

(ii) Services other than those (as determined under paragraph (b) of § 1.954-4) performed for, or on behalf of, a related person,

(iii) Services performed in the country of incorporation of the controlled foreign corporation, as determined under paragraph (c) of § 1.954-4, and

(iv) Services performed in connection with the sale or exchange of, or with an offer or effort to sell or exchange, personal property manufactured, produced, etc., by the controlled foreign corporation, as determined under paragraph (d) of § 1.954-4.

Where an item of income falls within more than one of subdivisions (ii) through (iv) of this subparagraph, it shall be sufficient to establish that it falls within any one of them.

(4) *Foreign base company oil related income.* (i) The foreign base company oil related income described in section 954(g) and § 1.954-8, for which purpose there must be established, with respect to each foreign country, the gross income derived from—

(A) The processing of minerals extracted (by the taxpayer or by any other person) from oil or gas wells into their primary products, as determined under section 907(c)(2)(A),

(B) The transportation of such minerals or primary products, as determined under section 907(c)(2)(B),

(C) The distribution or sale of such minerals or primary products, as determined under section 907(c)(2)(C),

(D) The disposition of assets used by the taxpayer in a trade or business described in subdivision (A), (B) or (C), as determined under section 907(c)(2)(D),

(E) Dividends, interests, partnership distributions, and other amounts, as determined under section 907(c)(3).

Where an item of income falls within more than one of the listings in paragraphs (d)(4)(i)(A) through (E) of this section, it shall be sufficient to establish that it falls within any one of them.

(ii) If any of the items of income listed in paragraph (d)(4)(i) of this section arising from sources within a foreign country relates to oil, gas, or a primary product thereof and is described in section 954(g)(1)(A) or (B) and § 1.954-8(a)(1)(i) or (ii) (and, hence, is not foreign base company oil related income), then there must be established facts sufficient to verify the amount of such item of income which is not foreign base company oil related income. In this regard, the total quantities of oil, gas and primary products thereof which gave rise to such item of income and the portions of such quantities which were extracted or sold within the foreign country must be established.

(5) *Qualified investments in less developed countries.* For rules in effect for taxable years of foreign corporations beginning before January 1, 1976, see 26 CFR 1.964-4(d)(4) (Revised as of April 1, 1975).

(6) *Income derived from aircraft or ships.* For rules in effect for taxable years of foreign corporations beginning

§ 1.964-4

26 CFR Ch. I (4-1-23 Edition)

before January 1, 1976, see CFR § 1.964-4(d)(5) (Revised as of April 1, 1975).

(7) *Foreign base company shipping income.* The foreign base company shipping income to which section 954(f) and § 1.954-6 apply, for which purpose there must be established—

(i) Gross income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce, as determined under § 1.954-6(c),

(ii) Gross income derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce, as determined under § 1.954-6(d),

(iii) Gross income incidental to income described in subdivisions (i) and (ii) of this subparagraph, as determined under § 1.954-6(e),

(iv) Gross income derived from the sale, exchange, or other disposition of any aircraft or vessel used (by the seller or by a person related to the seller) in foreign commerce,

(v) Dividends, interest, and gains described in §§ 1.954-6(f) and 1.954(b)(1)(viii),

(vi) Income described in § 1.954-6(g) (relating to partnerships, trusts, etc.), and

(vii) Exchange gain, to the extent allocable to foreign base company shipping income, as determined under § 1.952-2(c)(2)(v)(b).

If the controlled foreign corporation has income derived from or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce, or derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce, it shall be necessary to establish, from the books and records of the controlled foreign corporation, that such aircraft or vessel was used in foreign commerce within the meaning of subparagraphs (3) and (4) of § 1.954-6(b).

(8) *Income on which taxes are not substantially reduced.* The gross income excluded from foreign base company income under section 954(b)(4) and paragraph (b)(3) or (4) of § 1.954-1 in the case of a controlled foreign corporation not availed of to substantially reduce income taxes, the income or similar taxes incurred with respect thereto,

and all other factors necessary to verify the application of such exclusion.

(9) *Qualified investments in foreign base company shipping operations.* The foreign base company shipping income that is excluded from foreign base company income under section 954(b)(2) and § 1.954-1(b)(1).

(10) *Special rule for shipping income.* The distributions received through a chain of ownership described in section 958(a) which are excluded from foreign base company income under section 954(b)(6)(B) and § 1.954-1(b)(2).

(11) *Deductions.* The deductions allocable, under paragraph (c) of § 1.954-1, to each of the classes and subclasses of gross income described in subparagraphs (1) through (9) of this paragraph.

(e) [Reserved]

(f) *Exclusion under section 970(a).* Books or records sufficient to verify the application for the taxable year of the exclusion provided by section 970(a) in respect of export trade income which is foreign base company income must establish for such year—

(1) That the controlled foreign corporation is an export trade corporation, as defined in section 971(a) and paragraph (a) of § 1.971-1,

(2) The export trade income, as determined under section 971(b) and paragraph (b) of § 1.971-1, which constitutes foreign base company income,

(3) The export promotion expenses, as determined under section 971(d) and paragraph (d) of § 1.971-1, which are allocable to the excludable export trade income,

(4) The gross receipts, and the gross amount on which is computed compensation included in gross receipts, from property in respect of which the excludable export trade income is derived, as described in section 970(a)(1)(B) and paragraph (b)(2)(ii) of § 1.970-1, and

(5) The increase in investments in export trade assets, as determined under section 970(c)(2) and paragraph (d)(2) of § 1.970-1.

(g-1) *Withdrawal of previously excluded subpart F income from qualified investment in less developed countries.* Books or records sufficient to verify the previously excluded subpart F income of

the controlled foreign corporation withdrawn from investment in less developed countries for the taxable year must establish—

(1) The sum of the amounts of income excluded from foreign base company income under section 954(b)(1) and paragraph (b)(1) of §1.954-1 (as in effect for taxable years beginning before January 1, 1976; see 26 CFR 1.954-1(b)(1) (Revised as of April 1, 1975)) for all prior taxable years,

(2) The sum of the amounts of previously excluded subpart F income withdrawn from investment in less developed countries for all prior taxable years, as determined under section 955(a) (as in effect before the enactment of the Tax Reduction Act of 1975) and paragraph (b) of §1.955-1, and

(3) The amount withdrawn from investment in less developed countries for the taxable year as determined under section 955(a) (as in effect before the enactment of the Tax Reduction Act of 1975) and paragraph (b) of §1.955-1.

(g-2) *Withdrawal of previously excluded subpart F income from investment in foreign base company shipping operations.* Books or records sufficient to verify the previously excluded subpart F income of the controlled foreign corporation withdrawn from investment in foreign base company shipping operations for the taxable year must establish—

(1) The sum of the amounts of income excluded from foreign base company income under section 954(b)(2) and paragraph (b)(1) of §1.954-1 for all prior taxable years,

(2) The sum of the amounts of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years, as determined under section 955(a) and paragraph (b) of §1.955A-1,

(3) The amount withdrawn from investment in foreign base company shipping operations for the taxable year as determined under section 955(a) and paragraph (b) of §1.955A-1, and

(4) If the carryover (as described in §1.955A-1(b)(3)) of amounts relating to investments in less developed country shipping companies (as described in §1.995-5(b)) is applicable, (i) the amount of the corporation's qualified

investments (determined under §1.955-2 other than paragraph (b)(5) thereof) in less developed country shipping companies at the close of the last taxable year of the corporation beginning before January 1, 1976, and (ii) the amount of the limitation with respect to previously excluded subpart F income (determined under §1.955-1(b)(1)(i)(b)) for the first taxable year of the corporation beginning after December 31, 1975.

(h) *Withdrawal of previously excluded export trade income from investment.* Books or records sufficient to verify the previously excluded export trade income of the controlled foreign corporation withdrawn from investment for the taxable year must establish the United States shareholder's proportionate share of—

(1) The sum of the amounts by which the subpart F income of such corporation was reduced for all prior taxable years under section 970(a) and paragraph (b) of §1.970-1,

(2) The sum of the amounts described in section 970(b)(1)(B),

(3) The sum of the amounts of previously excluded export trade income of such corporation withdrawn from investment under section 970(b) and paragraph (c) of §1.970-1 for all prior taxable years, and

(4) The amount withdrawn from investment under section 970(b) and paragraph (c) of §1.970-1 for the taxable year.

(i) *Increase in earnings invested in United States property.* Books or records sufficient to verify the increase for the taxable year in earnings invested by the controlled foreign corporations in United States property must establish—

(1) The amount of such corporation's earnings invested in United States property (as defined in section 956(b)(1) and paragraph (a) of §1.956-2) at the close of the current and preceding taxable years, as determined under paragraph (b) of §1.956-1,

(2) The amount of excluded property described in section 956(b)(2) and paragraph (b) of §1.956-2 held by such corporation at the close of such years,

(3) The earnings and profits, to which section 959(c)(1) and paragraph (b)(1) of

§ 1.964-5

26 CFR Ch. I (4-1-23 Edition)

§ 1.959-3 apply, distributed by such corporation during the preceding taxable year, and

(4) The amount of increase in earnings invested by such corporation in United States property which is excluded from the United States shareholder's gross income for the taxable year under section 959(a)(2) and paragraph (c) of § 1.959-1.

[T.D. 6824, 30 FR 6481, May 11, 1965, as amended by T.D. 7211, 37 FR 21436, Oct. 11, 1972; T.D. 7893, 48 FR 22511, May 19, 1983; T.D. 8331, 56 FR 2849, Jan. 25, 1991; T.D. 9849, 84 FR 9237, Mar. 14, 2019]

§ 1.964-5 Effective date of subpart F.

Sections 951 through 964 and §§ 1.951 through 1.964-4 shall apply with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders within which or with which such taxable years of such corporations end.

[T.D. 7120, 36 FR 10862, June 4, 1971]

§ 1.965-0 Outline of section 965 regulations.

This section lists the headings for §§ 1.965-1 through 1.965-9.

§ 1.965-1 Overview, general rules, and definitions.

- (a) Overview.
 - (1) In general.
 - (2) Scope.
- (b) Section 965(a) inclusion amounts.
 - (1) Inclusion of the pro rata share of the section 965(a) earnings amount.
 - (2) Reduction by the allocable share of the aggregate foreign E&P deficit.
- (c) Section 965(c) deduction amounts.
 - (d) Treatment of specified foreign corporation as a controlled foreign corporation.
- (e) Special rule for certain controlled domestic partnerships.
 - (1) In general.
 - (2) Definition of a controlled domestic partnership.
- (f) Definitions.
 - (1) 8 percent rate amount.
 - (2) 8 percent rate equivalent percentage.
 - (3) 15.5 percent rate amount.
 - (4) 15.5 percent rate equivalent percentage.
 - (5) Accounts payable.
 - (6) Accounts receivable.
 - (7) Accumulated post-1986 deferred foreign income.
 - (8) Aggregate foreign cash position.
 - (9) Aggregate foreign E&P deficit.

- (10) Aggregate section 965(a) inclusion amount.
- (11) Allocable share.
- (12) Bona fide hedging transaction.
- (13) Cash-equivalent asset.
 - (i) In general.
 - (ii) Specified commodity.
- (14) Cash-equivalent asset hedging transaction.
 - (i) In general.
 - (ii) Aggregate hedging transactions.
- (15) Cash measurement dates.
- (16) Cash position.
 - (i) General rule.
 - (ii) Fair market value of cash-equivalent assets.
 - (iii) Measurement of derivative financial instruments.
 - (iv) Translation of cash position amounts.
- (17) Deferred foreign income corporation.
 - (i) In general.
 - (ii) Priority rule.
- (18) Derivative financial instrument.
- (19) Domestic pass-through entity.
- (20) Domestic pass-through owner.
- (21) Domestic pass-through owner share.
- (22) E&P deficit foreign corporation.
 - (i) In general.
 - (ii) Determination of deficit in post-1986 earnings and profits.
- (23) E&P measurement dates.
- (24) Final cash measurement date.
- (25) First cash measurement date.
- (26) Inclusion year.
- (27) Net accounts receivable.
- (28) Pass-through entity.
- (29) Post-1986 earnings and profits.
 - (i) General rule.
 - (ii) Foreign income taxes.
 - (iii) Deficits in earnings and profits.
- (30) Pro rata share.
- (31) Second cash measurement date.
- (32) Section 958(a) stock.
- (33) Section 958(a) U.S. shareholder.
- (34) Section 958(a) U.S. shareholder inclusion year.
- (35) Section 965 regulations.
- (36) Section 965(a) earnings amount.
- (37) Section 965(a) inclusion.
- (38) Section 965(a) inclusion amount.
- (39) Section 965(a) previously taxed earnings and profits.
- (40) Section 965(b) previously taxed earnings and profits.
 - (41) Section 965(c) deduction.
 - (42) Section 965(c) deduction amount.
 - (43) Short-term obligation.
 - (44) Specified E&P deficit.
 - (45) Specified foreign corporation.
 - (i) General rule.
 - (ii) Special attribution rule.
 - (A) In general.
 - (B) Attribution for purposes of the ten percent standard.
 - (iii) Passive foreign investment companies.
 - (46) Spot rate.
 - (47) United States shareholder.

- § 1.965-2 *Adjustments to earnings and profits and basis.*
- (a) Scope.
 - (b) Determination of and adjustments to earnings and profits of a specified foreign corporation for purposes of applying sections 902, 959, 960, and 965.
 - (c) Adjustments to earnings and profits by reason of section 965(a).
 - (d) Adjustments to earnings and profits by reason of section 965(b).
 - (1) Adjustments to earnings and profits described in section 959(c)(2) and (c)(3) of deferred foreign income corporations.
 - (2) Adjustments to earnings and profits described in section 959(c)(3) of E&P deficit foreign corporations.
 - (i) Increase in earnings and profits by an amount equal to the portion of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit.
 - (A) In general.
 - (B) Reduction of a qualified deficit.
 - (ii) Determination of portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit taken into account.
 - (A) In general.
 - (B) Designation of portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit taken into account.
 - (e) Adjustments to basis by reason of section 965(a).
 - (1) General rule.
 - (2) Section 962 election.
 - (f) Adjustments to basis by reason of section 965(b).
 - (1) In general.
 - (2) Election to make adjustments to basis to account for the application of section 965(b).
 - (i) In general.
 - (ii) Basis adjustments.
 - (A) Increase in basis with respect to a deferred foreign income corporation.
 - (1) In general.
 - (2) Limited basis adjustment.
 - (B) Reduction in basis with respect to an E&P deficit foreign corporation.
 - (1) In general.
 - (2) Limited basis adjustment.
 - (C) Section 962 election.
 - (iii) Rules regarding the election.
 - (A) Consistency requirement.
 - (B) Manner of making election.
 - (1) Timing.
 - (i) In general.
 - (ii) Transition rule.
 - (2) Election statement.
 - (g) Gain reduction rule.
 - (1) Reduction in gain recognized under section 961(b)(2) by reason of distributions attributable to section 965 previously taxed earnings and profits in the inclusion year.
 - (i) In general.
 - (ii) Definition of section 965 previously taxed earnings and profits.
 - (2) Reduction in basis by an amount equal to the gain reduction amount.
 - (h) Rules of application for specified basis adjustments.
 - (1) Timing of basis adjustments.
 - (2) Netting of basis adjustments.
 - (3) Gain recognition for reduction in excess of basis.
 - (4) Adjustments with respect to each share.
 - (i) Section 958(a) stock.
 - (ii) Applicable property.
 - (5) Stock or property for which adjustments are made.
 - (i) In general.
 - (ii) Special rule for an interest in a foreign pass-through entity.
 - (1) Definitions.
 - (1) Applicable property.
 - (2) Foreign pass-through entity.
 - (3) Property.
 - (j) Examples.
 - (1) Example 1.
 - (i) Facts.
 - (ii) Analysis.
 - (A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.
 - (B) Distributions between specified foreign corporations before January 1, 2018.
 - (C) Section 965(a) inclusion amount.
 - (1) CFC1 section 965(a) earnings amount.
 - (2) CFC2 section 965(a) earnings amount.
 - (3) Effect on earnings and profits described in section 959(c)(2) and (3).
 - (D) Distribution to United States shareholder.

§ 1.965-0

26 CFR Ch. I (4-1-23 Edition)

(E) Section 902 and section 960 consequences.

(1) Distribution by and inclusions with respect to CFC2.

(2) Inclusions with respect to CFC1.

(2) Example 2.

(i) Facts.

(ii) Analysis.

(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.

(B) Distributions between specified foreign corporations before January 1, 2018.

(C) Section 965(a) inclusion amount.

(1) CFC1 section 965(a) earnings amount.

(2) CFC2 section 965(a) earnings amount.

(3) Effect on earnings and profits described in section 959(c)(2) and (3).

(D) Distribution to United States shareholder.

(3) Example 3.

(i) Facts.

(ii) Analysis.

(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.

(B) Distributions between specified foreign corporations before January 1, 2018.

(C) Section 965(a) inclusion amount.

(1) CFC1 section 965(a) earnings amount.

(2) CFC2 section 965(a) earnings amount.

(3) Effect on earnings and profits described in section 959(c)(2) and (3).

(D) Distribution to United States shareholder.

(4) Example 4.

(i) Facts.

(ii) Analysis.

(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.

(B) Distributions between specified foreign corporations before January 1, 2018.

(C) Section 965(a) inclusion amount.

(1) CFC1 section 965(a) earnings amount.

(2) CFC2 section 965(a) earnings amount.

(3) Effect on earnings and profits described in section 959(c)(2) and (3).

(D) Distribution to United States shareholder.

(1) Distribution that is a specified payment.

(2) Distribution to United States shareholder.

(E) Section 902 and section 960 consequences.

(5) Example 5.

(i) Facts.

(ii) Analysis.

(A) Section 965(a) inclusion amount.

(1) CFC section 965(a) earnings amount.

(2) Effect on earnings and profits described in section 959(c)(2) and (3).

(6) Example 6.

(i) Facts.

(ii) Analysis.

(A) Adjustments to section 959(c) classification of earnings and profits for section 1248 inclusion.

(B) Section 965(a) inclusion amount.

(C) Distributions to United States shareholders.

§ 1.965-1 Overview, general rules, and definitions.

(a) *Overview*—(1) *In general.* This section provides general rules and definitions under section 965. Section 1.965-2 provides rules relating to adjustments to earnings and profits and basis to determine and account for the application of section 965 and a rule that limits the amount of gain recognized under section 961(b)(2) by reason of distributions attributable to section 965 previously taxed earnings and profits (as defined in § 1.965-2(g)(1)(ii)) in the inclusion year. Section 1.965-3 provides rules regarding the determination of section 965(c) deductions. Section 1.965-4 sets forth rules that disregard certain transactions for purposes of section 965. Sections 1.965-5 and 1.965-6 provide rules with respect to foreign tax credits. Section 1.965-7 provides rules regarding elections and payments. Section 1.965-8 provides rules regarding affiliated groups, including consolidated groups. Section 1.965-9 provides dates of applicability. *See also* §§ 1.962-1 and 1.962-2 (providing rules regarding the application of section 962) and 1.986(c)-1 (providing rules regarding the application of section 986(c)).

(2) *Scope.* Paragraph (b) of this section provides the general rules concerning section 965(a) inclusion amounts. Paragraph (c) of this section provides the general rule concerning section 965(c) deduction amounts. Paragraph (d) of this section provides a rule for specified foreign corporations that are not controlled foreign corporations. Paragraph (e) of this section treats certain controlled domestic partnerships as foreign partnerships for purposes of section 965. Paragraph (f) of this section provides definitions applicable for the section 965 regulations and §§ 1.962-1, 1.962-2, and 1.986(c)-1. Paragraph (g) of this section contains examples illustrating the general rules and definitions set forth in this section.

(b) *Section 965(a) inclusion amounts*—(1) *Inclusion of the pro rata share of the section 965(a) earnings amount.* For an inclusion year of a deferred foreign in-

come corporation, the subpart F income of the deferred foreign income corporation (as otherwise determined for the inclusion year under section 952 and § 1.952-1) is increased by the section 965(a) earnings amount of the deferred foreign income corporation. *See* section 965(a). Accordingly, a section 958(a) U.S. shareholder with respect to a deferred foreign income corporation generally includes in gross income under section 951(a)(1) for the section 958(a) U.S. shareholder inclusion year its pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017, and subject to reduction under section 965(b), paragraph (b)(2) of this section, and § 1.965-8(b). The amount of the section 958(a) U.S. shareholder's inclusion with respect to a deferred foreign income corporation as a result of section 965(a) and this paragraph (b)(1), as reduced under section 965(b), paragraph (b)(2) of this section, and § 1.965-8(b), as applicable, is referred to as the *section 965(a) inclusion amount*. Neither the section 965(a) earnings amount nor the section 965(a) inclusion amount is subject to the rules or limitations in section 952 or limited by the accumulated earnings and profits of the deferred foreign income corporation on the date of the inclusion.

(2) *Reduction by the allocable share of the aggregate foreign E&P deficit.* For purposes of determining a section 958(a) U.S. shareholder's section 965(a) inclusion amount with respect to a deferred foreign income corporation, the U.S. dollar amount of the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017, is reduced by the deferred foreign income corporation's allocable share of the section 958(a) U.S. shareholder's aggregate foreign E&P deficit. *See* section 965(b). If the section 958(a) U.S. shareholder is a member of a consolidated group, under § 1.965-8(e), all section 958(a) U.S. shareholders that are members of the consolidated group are treated as a single section 958(a)

U.S. shareholder for purposes of this paragraph (b)(2).

(c) *Section 965(c) deduction amounts.* For a section 958(a) U.S. shareholder inclusion year, a section 958(a) U.S. shareholder is generally allowed a deduction in an amount equal to the section 965(c) deduction amount.

(d) *Treatment of specified foreign corporation as a controlled foreign corporation.* A specified foreign corporation described in section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section that is not otherwise a controlled foreign corporation is treated as a controlled foreign corporation solely for purposes of paragraph (b) of this section and sections 951, 961, and §1.1411-10. See 965(e)(2).

(e) *Special rule for certain controlled domestic partnerships—(1) In general.* For purposes of the section 965 regulations, a controlled domestic partnership is treated as a foreign partnership for purposes of determining the section 958(a) U.S. shareholder of a specified foreign corporation and the section 958(a) stock of the specified foreign corporation owned by the section 958(a) U.S. shareholder if the following conditions are satisfied—

(i) Without regard to this paragraph (e), the controlled domestic partnership is a section 958(a) U.S. shareholder of the specified foreign corporation and thus owns section 958(a) stock of the specified foreign corporation (*tested section 958(a) stock*);

(ii) If the controlled domestic partnership (and all other controlled domestic partnerships in the chain of ownership of the specified foreign corporation) were treated as foreign—

(A) The specified foreign corporation would continue to be a specified foreign corporation; and

(B) At least one United States shareholder of the specified foreign corporation—

(1) Would be treated as a section 958(a) U.S. shareholder of the specified foreign corporation; and

(2) Would be treated as owning (within the meaning of section 958(a)) tested section 958(a) stock of the specified foreign corporation through another foreign corporation that is a direct or indirect partner in the controlled domestic partnership.

(2) *Definition of a controlled domestic partnership.* For purposes of paragraph (e)(1) of this section, the term *controlled domestic partnership* means a domestic partnership that is controlled by a United States shareholder described in paragraph (e)(1)(ii)(B) of this section and persons related to the United States shareholder. For purposes of this paragraph (e)(2), control is determined based on all the facts and circumstances, except that a partnership will be deemed to be controlled by a United States shareholder and related persons if those persons, in the aggregate, own (directly or indirectly through one or more partnerships) more than 50 percent of the interests in the partnership capital or profits. For purposes of this paragraph (e)(2), a related person is, with respect to a United States shareholder, a person that is related (within the meaning of section 267(b) or 707(b)(1)) to the United States shareholder.

(f) *Definitions.* This paragraph (f) provides definitions that apply for purposes of the section 965 regulations and §§1.962-1, 1.962-2, and 1.986(c)-1. Unless otherwise indicated, all amounts are expressed as positive numbers.

(1) *8 percent rate amount.* The term *8 percent rate amount* means, with respect to a section 958(a) U.S. shareholder and a section 958(a) U.S. shareholder inclusion year, the excess, if any, of the section 958(a) U.S. shareholder's aggregate section 965(a) inclusion amount for the section 958(a) U.S. shareholder inclusion year over the amount of the section 958(a) U.S. shareholder's aggregate foreign cash position for the section 958(a) U.S. shareholder inclusion year as determined under §1.965-3(c).

(2) *8 percent rate equivalent percentage.* The term *8 percent rate equivalent percentage* means, with respect to a section 958(a) U.S. shareholder and a section 958(a) U.S. shareholder inclusion year, the percentage that would result in the 8 percent rate amount being subject to an 8 percent rate of tax determined by only taking into account a deduction equal to such percentage of such amount and the highest rate of tax specified in section 11 for the section 958(a) U.S. shareholder inclusion year. In the case of a section 958(a) U.S. shareholder inclusion year of a section

958(a) U.S. shareholder to which section 15 applies, the highest rate of tax under section 11 before the effective date of the change in rates and the highest rate of tax under section 11 after the effective date of such change will each be taken into account under the preceding sentence in the same proportions as the portion of the section 958(a) U.S. shareholder inclusion year that is before and after such effective date, respectively.

(3) *15.5 percent rate amount.* The term *15.5 percent rate amount* means, with respect to a section 958(a) U.S. shareholder and a section 958(a) U.S. shareholder inclusion year, the amount of the section 958(a) U.S. shareholder's aggregate foreign cash position for the section 958(a) U.S. shareholder inclusion year as determined under § 1.965-3(c) to the extent it does not exceed the section 958(a) U.S. shareholder's aggregate section 965(a) inclusion amount for the section 958(a) U.S. shareholder inclusion year.

(4) *15.5 percent rate equivalent percentage.* The term *15.5 percent rate equivalent percentage*, with respect to a section 958(a) U.S. shareholder and a section 958(a) U.S. shareholder inclusion year, has the meaning provided for the term "8 percent rate equivalent percentage" applied by substituting "15.5 percent rate amount" for "8 percent rate amount" and "15.5 percent rate of tax" for "8 percent rate of tax."

(5) *Accounts payable.* The term *accounts payable* means payables arising from the purchase of property described in section 1221(a)(1) or section 1221(a)(8) or the receipt of services from vendors or suppliers, provided the payables have a term upon issuance of less than one year.

(6) *Accounts receivable.* The term *accounts receivable* means receivables described in section 1221(a)(4) that have a term upon issuance of less than one year.

(7) *Accumulated post-1986 deferred foreign income—(i) In general.* The term *accumulated post-1986 deferred foreign income* means, with respect to a specified foreign corporation, the post-1986 earnings and profits of the specified foreign corporation except to the extent such earnings and profits—

(A) Are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1;

(B) If distributed, would, in the case of a controlled foreign corporation, be excluded from the gross income of a United States shareholder under section 959; or

(C) If distributed, would, in the case of a controlled foreign corporation that has shareholders that are not United States shareholders on an E&P measurement date, be excluded from the gross income of such shareholders under section 959 if such shareholders were United States shareholders, determined by applying the principles of Revenue Ruling 82-16, 1982-1 C.B. 106.

(ii) *Earnings and profits attributable to subpart F income in the same taxable year as an E&P measurement date.* For purposes of determining the accumulated post-1986 deferred foreign income of a specified foreign corporation as of an E&P measurement date, earnings and profits of the specified foreign corporation that are or would be, applying the principles of Revenue Ruling 82-16, 1982-1 C.B. 106, described in section 959(c)(2) by reason of subpart F income (as defined in section 952 without regard to section 965(a)) are described in section 965(d)(2)(B) and paragraph (f)(7)(i)(B) or (f)(7)(i)(C) of this section only to the extent that such income has been accrued by the specified foreign corporation as of the E&P measurement date. For rules regarding the interaction of sections 951, 956, 959, and 965 generally, see § 1.965-2(b).

(8) *Aggregate foreign cash position—(i) In general.* The term *aggregate foreign cash position* means, with respect to a section 958(a) U.S. shareholder that is not a member of a consolidated group, the greater of—

(A) The aggregate of the section 958(a) U.S. shareholder's pro rata share of the cash position of each specified foreign corporation determined as of the final cash measurement date of the specified foreign corporation; or

(B) One half of the sum of—

(1) The aggregate described in paragraph (f)(8)(i)(A) of this section determined as of the second cash measurement date of each specified foreign corporation, plus

(2) The aggregate described in paragraph (f)(8)(i)(A) of this section determined as of the first cash measurement date of each specified foreign corporation.

(ii) *Other rules.* For rules for determining the aggregate foreign cash position for a section 958(a) U.S. shareholder inclusion year of the section 958(a) U.S. shareholder, see § 1.965-3(c). For the rule for determining the aggregate foreign cash position of a section 958(a) U.S. shareholder that is a member of a consolidated group, see § 1.965-8(e)(3). For rules disregarding certain assets for purposes of determining the aggregate foreign cash position of a section 958(a) U.S. shareholder, see § 1.965-3(b).

(9) *Aggregate foreign E&P deficit.* The term *aggregate foreign E&P deficit* means, with respect to a section 958(a) U.S. shareholder, the lesser of—

(i) The aggregate of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit of each E&P deficit foreign corporation, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017, or

(ii) The aggregate of the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of each deferred foreign income corporation, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017.

(10) *Aggregate section 965(a) inclusion amount.* The term *aggregate section 965(a) inclusion amount* means, with respect to a section 958(a) U.S. shareholder, the sum of all of the section 958(a) U.S. shareholder's section 965(a) inclusion amounts.

(11) *Allocable share.* The term *allocable share* means, with respect to a deferred foreign income corporation and an aggregate foreign E&P deficit of a section 958(a) U.S. shareholder, the product of the aggregate foreign E&P deficit and the ratio determined by dividing—

(i) The section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation, translated

(if necessary) into U.S. dollars using the spot rate on December 31, 2017, by

(ii) The amount described in paragraph (f)(9)(ii) of this section with respect to the section 958(a) U.S. shareholder.

(12) *Bona fide hedging transaction.* The term *bona fide hedging transaction* means a hedging transaction that meets (or that would meet if the specified foreign corporation were a controlled foreign corporation) the requirements of a bona fide hedging transaction described in § 1.954-2(a)(4)(ii), except that in the case of a specified foreign corporation that is not a controlled foreign corporation, the identification requirements of § 1.954-2(a)(4)(ii)(B) do not apply.

(13) *Cash-equivalent asset—(i) In general.* The term *cash-equivalent asset* means any of the following assets—

(A) Personal property which is of a type that is actively traded and for which there is an established financial market, other than a specified commodity;

(B) Commercial paper, certificates of deposit, the securities of the Federal government and of any State or foreign government;

(C) Any foreign currency;

(D) A short-term obligation; or

(E) Derivative financial instruments, other than bona fide hedging transactions.

(ii) *Specified commodity.* The term *specified commodity* means a commodity held, or, for purposes of paragraph (f)(18) of this section, to be held, by a specified foreign corporation that, in the hands of the specified foreign corporation, is property described in section 1221(a)(1) or 1221(a)(8). This paragraph (f)(13)(ii) does not apply with respect to commodities held by a specified foreign corporation in its capacity as a dealer or trader in commodities.

(14) *Cash-equivalent asset hedging transaction—(i) In general.* The term *cash-equivalent asset hedging transaction* means a bona fide hedging transaction identified on a specified foreign corporation's books and records as hedging a cash-equivalent asset.

(ii) *Aggregate hedging transactions.* For purposes of paragraph (f)(14)(i) of this section, the amount of a bona fide hedging transaction described in

§ 1.1221-2(c)(3) (an *aggregate hedging transaction*) that is treated as a cash-equivalent asset hedging transaction is the amount that bears the same proportion to the fair market value of the aggregate hedging transaction as the value of the cash-equivalent assets being hedged by the aggregate hedging transaction bears to the value of all assets being hedged by the aggregate hedging transaction.

(15) *Cash measurement dates*. The term *cash measurement dates* means, with respect to a specified foreign corporation, the first cash measurement date, the second cash measurement date, and the final cash measurement date, collectively, and each a *cash measurement date*.

(16) *Cash position*—(i) *General rule*. The term *cash position* means, with respect to a specified foreign corporation, the sum of—

- (A) Cash held by the corporation;
- (B) The net accounts receivable of the corporation; and
- (C) The fair market value of the cash-equivalent assets held by the corporation.

(ii) *Fair market value of cash-equivalent assets*. For purposes of determining the fair market value of a cash-equivalent asset of a specified foreign corporation, the value of the cash-equivalent asset must be adjusted by the fair market value of any cash-equivalent asset hedging transaction with respect to the cash-equivalent asset, but only to the extent that the cash-equivalent asset hedging transaction does not reduce the fair market value of the cash-equivalent asset below zero.

(iii) *Measurement of derivative financial instruments*. The amount of derivative financial instruments taken into account in determining the cash position of a specified foreign corporation is the aggregate fair market value of its derivative financial instruments that constitute cash-equivalent assets, provided such amount is not less than zero.

(iv) *Translation of cash position amounts*. The cash position of a specified foreign corporation with respect to a cash measurement date must be expressed in U.S. dollars. For this purpose, the amounts described in paragraph (f)(16)(i) of this section must be

translated (if necessary) into U.S. dollars using the spot rate on the relevant cash measurement date.

(17) *Deferred foreign income corporation*—(i) *In general*. The term *deferred foreign income corporation* means a specified foreign corporation that has accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date.

(ii) *Priority rule*. If a specified foreign corporation satisfies the definition of a deferred foreign income corporation under section 965(d)(1) and paragraph (f)(17)(i) of this section, it is classified solely as a deferred foreign income corporation and not also as an E&P deficit foreign corporation even if it otherwise satisfies the requirements of section 965(b)(3)(B) and paragraph (f)(22) of this section.

(18) *Derivative financial instrument*. The term *derivative financial instrument* includes a financial instrument that is one of the following—

- (i) A notional principal contract,
- (ii) An option contract,
- (iii) A forward contract, other than a forward contract with respect to a specified commodity (as defined in paragraph (f)(13)(ii) of this section), but solely to the extent that the specified foreign corporation identified, or could have identified, the forward contract as a hedging transaction (within the meaning of § 1.1221-2(b)) with respect to one or more specified commodities held by the specified foreign corporation,
- (iv) A futures contract,
- (v) A short position in securities or commodities, other than a forward contract with respect to a specified commodity, but solely to the extent that the specified foreign corporation identified, or could have identified, the forward contract as a hedging transaction (within the meaning of § 1.1221-2(b)) with respect to one or more specified commodities held by the specified foreign corporation, or
- (vi) Any financial instrument similar to one described in paragraphs (f)(18)(i) through (v) of this section.

(19) *Domestic pass-through entity*. The term *domestic pass-through entity* means a pass-through entity that is a United States person (as defined in section 7701(a)(30)).

(20) *Domestic pass-through owner*. The term *domestic pass-through owner* means, with respect to a domestic pass-through entity, a United States person (as defined in section 7701(a)(30)) that is a partner, shareholder, beneficiary, grantor, or owner, as the case may be, in the domestic pass-through entity. Notwithstanding the preceding sentence, the term does not include a partner, shareholder, beneficiary, grantor, or owner of the domestic pass-through entity that is itself a domestic pass-through entity but does include any other United States person that is an indirect partner, shareholder, beneficiary, grantor, or owner of the domestic pass-through entity through one or more other pass-through entities.

(21) *Domestic pass-through owner share*. The term *domestic pass-through owner share* means, with respect to a domestic pass-through owner and a domestic pass-through entity, the domestic pass-through owner's share of the aggregate section 965(a) inclusion amount and the section 965(c) deduction amount, as applicable, of the domestic pass-through entity, including the domestic pass-through owner's share of the aggregate section 965(a) inclusion amount and section 965(c) deduction amount, as applicable, of a domestic pass-through entity owned indirectly by the domestic pass-through owner through one or more other pass-through entities.

(22) *E&P deficit foreign corporation*—(i) *In general*. The term *E&P deficit foreign corporation* means, with respect to a section 958(a) U.S. shareholder, a specified foreign corporation, other than a deferred foreign income corporation, if, as of November 2, 2017—

(A) The specified foreign corporation had a deficit in post-1986 earnings and profits,

(B) The corporation was a specified foreign corporation, and

(C) The shareholder was a United States shareholder of the corporation.

(ii) *Determination of deficit in post-1986 earnings and profits*. In the case of a specified foreign corporation that has post-1986 earnings and profits that include earnings and profits described in section 959(c)(1) or 959(c)(2) (or both) and a deficit in earnings and profits (including hovering deficits, as defined

in § 1.367(b)-7(d)(2)(i)), the specified foreign corporation has a deficit in post-1986 earnings and profits described in paragraph (f)(22)(i)(A) of this section only to the extent the deficit in post-1986 earnings and profits exceeds the aggregate of its post-1986 earnings and profits described in section 959(c)(1) and 959(c)(2).

(23) *E&P measurement dates*. The term *E&P measurement dates* means November 2, 2017, and December 31, 2017, collectively, and each an *E&P measurement date*.

(24) *Final cash measurement date*. The term *final cash measurement date* means, with respect to a specified foreign corporation, the close of the last taxable year of the specified foreign corporation that begins before January 1, 2018, and ends on or after November 2, 2017, if any.

(25) *First cash measurement date*. The term *first cash measurement date* means, with respect to a specified foreign corporation, the close of the last taxable year of the specified foreign corporation that ends after November 1, 2015, and before November 2, 2016, if any.

(26) *Inclusion year*. The term *inclusion year* means, with respect to a deferred foreign income corporation, the last taxable year of the deferred foreign income corporation that begins before January 1, 2018.

(27) *Net accounts receivable*. The term *net accounts receivable* means, with respect to a specified foreign corporation, the excess (if any) of—

(i) The corporation's accounts receivable, over

(ii) The corporation's accounts payable (determined consistent with the rules of section 461).

(28) *Pass-through entity*. The term *pass-through entity* means a partnership, S corporation, or any other person (whether domestic or foreign) other than a corporation to the extent that the income or deductions of the person are included in the income of one or more direct or indirect owners or beneficiaries of the person. For example, if a domestic trust is subject to federal income tax on a portion of its section 965(a) inclusion amount and its domestic pass-through owners are subject to tax on the remaining portion, the domestic trust is treated as a domestic

pass-through entity with respect to such remaining portion.

(29) *Post-1986 earnings and profits*—(i) *General rule.* The term *post-1986 earnings and profits* means, with respect to a specified foreign corporation and an E&P measurement date, the earnings and profits (including earnings and profits described in section 959(c)(1) and 959(c)(2)) of the specified foreign corporation (computed in accordance with sections 964(a) and 986, subject to § 1.965-4(f), and by taking into account only periods when the foreign corporation was a specified foreign corporation) accumulated in taxable years beginning after December 31, 1986, and determined—

(A) As of the E&P measurement date, except as provided in paragraph (f)(29)(ii) of this section, and

(B) Without diminution by reason of dividends distributed during the last taxable year of the foreign corporation that begins before January 1, 2018, other than dividends distributed to another specified foreign corporation to the extent the dividends increase the post-1986 earnings and profits of the distributee specified foreign corporation.

(ii) *Foreign income taxes.* For purposes of determining a specified foreign corporation's post-1986 earnings and profits as of the E&P measurement date on November 2, 2017, in the case in which foreign income taxes (as defined in section 901(m)(5)) of the specified foreign corporation accrue after November 2, 2017, but on or before December 31, 2017, and during the specified foreign corporation's U.S. taxable year that includes November 2, 2017, the specified foreign corporation's post-1986 earnings and profits as of November 2, 2017, are reduced by the applicable portion of such foreign income taxes. For purposes of the preceding sentence, the applicable portion of the foreign income taxes is the amount of the taxes that are attributable to the portion of the taxable income (as determined under foreign law) that accrues on or before November 2, 2017.

(iii) *Deficits in earnings and profits.* Any deficit related to post-1986 earnings and profits, including a hovering deficit (as defined in § 1.367(b)-7(d)(2)(i)), of a specified foreign cor-

poration is taken into account for purposes of determining the post-1986 earnings and profits (including a deficit) of the specified foreign corporation.

(30) *Pro rata share.* The term *pro rata share* means, with respect to a section 958(a) U.S. shareholder of a specified foreign corporation, a deferred foreign income corporation, or an E&P deficit foreign corporation, as applicable—

(i) With respect to the section 965(a) earnings amount of a deferred foreign income corporation, the portion of the section 965(a) earnings amount that would be treated as distributed to the section 958(a) U.S. shareholder under § 1.951-1(e), determined as of the last day of the inclusion year of the deferred foreign income corporation on which it is a specified foreign corporation;

(ii) With respect to the specified E&P deficit of an E&P deficit foreign corporation, the portion of the specified E&P deficit allocated to the section 958(a) U.S. shareholder, determined by allocating the specified E&P deficit among the shareholders of the corporation's common stock in proportion to the liquidation value of the common stock held by the shareholders, determined as of the last day of the last taxable year of the E&P deficit foreign corporation that begins before January 1, 2018, provided that—

(A) If the corporation's common stock has a liquidation value of zero and there is at least one other class of equity with a liquidation preference relative to the common stock, then the specified E&P deficit is allocated as if it were distributed in a hypothetical distribution described in § 1.951-1(e)(1)(i) with respect to the most junior class of equity with a positive liquidation value to the extent of such liquidation value, and then to the next most junior class of equity to the extent of its liquidation value, and so on, applying § 1.951-1(e) by substituting "specified E&P deficit" for "subpart F income" each place it appears and treating the amount of current earnings and profits of the corporation for the year as being equal to the specified E&P deficit of the corporation for the year; and

(B) If the corporation's common stock has a liquidation value of zero and there is no other class of equity with a liquidation preference relative to the common stock, the specified E&P deficit is allocated among the common stock using any reasonable method consistently applied; and

(iii) With respect to the cash position of a specified foreign corporation on a cash measurement date, the portion of the cash position that would be treated as distributed to the section 958(a) U.S. shareholder under §1.951-1(e) if the cash position were subpart F income, determined as of the close of the cash measurement date and without regard to whether the section 958(a) U.S. shareholder is a section 958(a) U.S. shareholder of the specified foreign corporation as of any other cash measurement date of the specified foreign corporation, including the final cash measurement date of the specified foreign corporation.

(31) *Second cash measurement date.* The term *second cash measurement date* means, with respect to a specified foreign corporation, the close of the last taxable year of the specified foreign corporation that ends after November 1, 2016, and before November 2, 2017, if any.

(32) *Section 958(a) stock.* The term *section 958(a) stock* means, with respect to a specified foreign corporation, a deferred foreign income corporation, or an E&P deficit foreign corporation, as applicable, stock of the corporation owned (directly or indirectly) by a United States shareholder within the meaning of section 958(a).

(33) *Section 958(a) U.S. shareholder.* The term *section 958(a) U.S. shareholder* means, with respect to a specified foreign corporation, a deferred foreign income corporation, or an E&P deficit foreign corporation, as applicable, a United States shareholder of such corporation that owns section 958(a) stock of the corporation.

(34) *Section 958(a) U.S. shareholder inclusion year.* The term *section 958(a) U.S. shareholder inclusion year* means the taxable year of a section 958(a) U.S. shareholder in which or with which the last day of the inclusion year of a deferred foreign income corporation on

which it is a specified foreign corporation occurs.

(35) *Section 965 regulations.* The term *section 965 regulations* means the regulations under §§1.965-1 through 1.965-9, collectively.

(36) *Section 965(a) earnings amount.* The term *section 965(a) earnings amount* means, with respect to a deferred foreign income corporation, the greater of the accumulated post-1986 deferred foreign income of the deferred foreign income corporation as of the E&P measurement date on November 2, 2017, or the accumulated post-1986 deferred foreign income of the deferred foreign income corporation as of the E&P measurement date on December 31, 2017, determined in each case in the functional currency of the specified foreign corporation. If the functional currency of a specified foreign corporation changes between the two E&P measurement dates, the comparison must be made in the functional currency of the specified foreign corporation as of December 31, 2017, by translating the specified foreign corporation's accumulated post-1986 deferred foreign income as of November 2, 2017, into the new functional currency using the spot rate on November 2, 2017.

(37) *Section 965(a) inclusion.* The term *section 965(a) inclusion* means, with respect to a person and a deferred foreign income corporation, an amount included in income by the person by reason of section 965 with respect to the deferred foreign income corporation, whether because the person is a section 958(a) U.S. shareholder of the deferred foreign income corporation with a section 965(a) inclusion amount with respect to the deferred foreign income corporation or because the person is a domestic pass-through owner with respect to a domestic pass-through entity that is a section 958(a) U.S. shareholder of the deferred foreign income corporation and the person includes in income its domestic pass-through owner share of the section 965(a) inclusion amount of the domestic pass-through entity with respect to the deferred foreign income corporation.

(38) *Section 965(a) inclusion amount.* The term *section 965(a) inclusion amount* has the meaning provided in paragraph (b)(1) of this section.

(39) *Section 965(a) previously taxed earnings and profits.* The term *section 965(a) previously taxed earnings and profits* has the meaning provided in § 1.965-2(c).

(40) *Section 965(b) previously taxed earnings and profits.* The term *section 965(b) previously taxed earnings and profits* has the meaning provided in § 1.965-2(d).

(41) *Section 965(c) deduction.* The term *section 965(c) deduction* means, with respect to a person, an amount allowed as a deduction to the person by reason of section 965(c), whether because the person is a section 958(a) U.S. shareholder with a section 965(c) deduction amount or because the person is a domestic pass-through owner with respect to a domestic pass-through entity that is a section 958(a) U.S. shareholder and the person takes into account its domestic pass-through owner share of the section 965(c) deduction amount of the domestic pass-through entity.

(42) *Section 965(c) deduction amount.* The term *section 965(c) deduction amount* means an amount equal to the sum of—

(i) A section 958(a) U.S. shareholder's 8 percent rate equivalent percentage of the section 958(a) U.S. shareholder's 8 percent rate amount for the section 958(a) U.S. shareholder inclusion year, plus

(ii) The section 958(a) U.S. shareholder's 15.5 percent rate equivalent percentage of the section 958(a) U.S. shareholder's 15.5 percent rate amount for the section 958(a) U.S. shareholder inclusion year.

(43) *Short-term obligation.* The term *short-term obligation* means any obligation with a term upon issuance that is less than one year and any loan that must be repaid at the demand of the lender (or that must be repaid within one year of such demand), but does not include any accounts receivable.

(44) *Specified E&P deficit.* The term *specified E&P deficit* means, with respect to an E&P deficit foreign corporation, the amount of the deficit described in paragraph (f)(22)(i)(A) of this section.

(45) *Specified foreign corporation—(i) General rule.* Except as provided in paragraph (f)(45)(iii) of this section, the

term *specified foreign corporation* means—

(A) A controlled foreign corporation, or

(B) A foreign corporation of which one or more domestic corporations is a United States shareholder.

(ii) *Special attribution rule—(A) In general.* Solely for purposes of determining whether a foreign corporation is a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section, stock owned, directly or indirectly, by or for—

(1) A partner (*tested partner*) will not be considered as being owned by a partnership under sections 958(b) and 318(a)(3)(A) and § 1.958-2(d)(1)(i) if the tested partner owns less than ten percent of the interests in the partnership's capital and profits; and

(2) A beneficiary (*tested beneficiary*) will not be considered as being owned by a trust under sections 958(b) and 318(a)(3)(B) and § 1.958-2(d)(1)(ii) if the value of the interest of the tested beneficiary, computed actuarially, whether vested or contingent, current or remainder, is less than ten percent of the value of the trust property, assuming the maximum exercise of discretion in favor of the beneficiary.

(B) *Attribution for purposes of the ten percent standard.* For purposes of paragraph (f)(45)(ii)(A) of this section, an interest in a partnership or trust owned by a partner or beneficiary other than the tested partner or tested beneficiary will be considered as being owned by the tested partner or tested beneficiary under the principles of sections 958(b) and 318, as modified by this paragraph (f)(45)(ii), as if interests in a partnership or trust were stock.

(iii) *Passive foreign investment companies.* A foreign corporation that is a passive foreign investment company (as defined in section 1297) with respect to a United States shareholder and that is not a controlled foreign corporation is not a specified foreign corporation of the United States shareholder.

(46) *Spot rate.* The term *spot rate* has the meaning provided in § 1.988-1(d).

(47) *United States shareholder.* The term *United States shareholder* has the meaning provided in section 951(b).

(g) *Examples.* The following examples illustrate the definitions and general rules set forth in this section.

(1) *Example 1. Definition of specified foreign corporation—(i) Facts.* A, an individual, owns 1% of the interests in a partnership, PS, and 10% by vote and value of the stock of a foreign corporation, FC. PS owns 100% of the stock of a domestic corporation, DC. A United States citizen, USI, owns an additional 10% by vote and value of the stock of FC. The remaining 80% by vote and value of the stock of FC is owned by non-United States persons that are unrelated to A, USI, DC, and PS.

(ii) *Analysis.* (A) Absent the application of sections 958(b), 318(a)(3)(A), and 318(a)(3)(C), and § 1.958-2(d)(1)(i) and (iii), FC would not be a specified foreign corporation because FC is not a controlled foreign corporation and there would be no domestic corporation that is a United States shareholder of FC. However, under sections 958(b) and 318(a)(3)(A) and § 1.958-2(d)(1)(i), absent the special attribution rule in paragraph (f)(45)(ii) of this section, PS would be treated as owning 10% of the stock of FC. As a result, under sections 958(b), 318(a)(5)(A), and 318(a)(3)(C), and § 1.958-2(f)(1)(i) and (d)(1)(iii), DC would be treated as owning the stock of FC treated as owned by PS, and thus DC would be a United States shareholder with respect to FC, causing FC to be a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section. The results would be the same whether A or PS or both are domestic or foreign persons.

(B) Under the special attribution rule in paragraph (f)(45)(ii) of this section, solely for purposes of determining whether a foreign corporation is a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section, the stock of FC owned by A is not considered as being owned by PS under sections 958(b) and 318(a)(3)(A) and § 1.958-2(d)(1)(i) because A owns less than 10% of the interests in PS's capital and profits. Accordingly, FC is not a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section.

(2) *Example 2. Definition of specified foreign corporation—(i) Facts.* The facts are the same as in paragraph (g)(1)(i) of this section (the facts in *Example 1*), except that A is a foreign corporation wholly owned by B, a foreign corporation, and B directly owns 9% of the interests in PS.

(ii) *Analysis.* Applying the principles of sections 958(b) and 318, as modified by paragraph (f)(45)(ii) of this section, as if the interest in PS were stock, A is treated as owning the interests in PS owned by B (in addition to the 1% interest in PS that A owns directly), and thus A is not treated as owning less than 10% of the interests in PS's capital and profits. Accordingly, the special attribution rule in paragraph (f)(45)(ii) of this section does not apply, and PS is treated as owning A's stock of FC for purposes of determining whether FC is a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section. Accordingly, under the analysis described in paragraph (ii)(A) of *Example 1* of paragraph (g)(1) of this section, FC is a specified foreign corporation within the meaning of section 965(e)(1)(B) and paragraph (f)(45)(i)(B) of this section.

(3) *Example 3. Determination of accumulated post-1986 deferred foreign income—(i) Facts.* USP, a domestic corporation, and FP, a foreign corporation unrelated to USP, have owned 70% and 30% respectively, by vote and value, of the only class of stock of FS, a foreign corporation, from January 1, 2016, until December 31, 2017. USP and FS both have a calendar year taxable year. FS had no income until its taxable year ending December 31, 2016, in which it had 100u of income, all of which constituted subpart F income, and USP included 70u in income with respect to FS under section 951(a)(1) for such year. FS earned no income in 2017. Therefore, FS's post-1986 earnings and profits are 100u as of both E&P measurement dates.

(ii) *Analysis.* Because USP included 70u in income with respect to FS under section 951(a)(1), 70u of such post-1986 earnings and profits would, if distributed, be excluded from the gross income of USP under section 959. Thus, FS's accumulated post-1986 deferred

foreign income would be reduced by 70u pursuant to section 965(d)(2)(B) and paragraph (f)(7)(i)(B) of this section. Furthermore, under paragraph (f)(7)(i)(C) of this section, the accumulated post-1986 deferred foreign income of FS is reduced by amounts that would be excluded from the gross income of FP if FP were a United States shareholder, consistent with the principles of Revenue Ruling 82-16. Accordingly, FS's accumulated post-1986 deferred foreign income is reduced by the remaining 30u of the 100u of post-1986 earnings and profits to which USP's 70u of section 951(a)(1) income inclusions were attributable. As a result, FS's accumulated post-1986 deferred foreign income is 0u (100u minus 70u minus 30u).

(4) *Example 4. Determination of status as a deferred foreign income corporation or an E&P deficit foreign corporation; specified foreign corporation is solely a deferred foreign income corporation—(i) Facts.* USP, a domestic corporation, owns all of the stock of FS, a foreign corporation. As of November 2, 2017, FS has a deficit in post-1986 earnings and profits of 150u. As of December 31, 2017, FS has 200u of post-1986 earnings and profits. FS does not have earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder.

(ii) *Analysis.* FS's accumulated post-1986 deferred foreign income is equal to its post-1986 earnings and profits because no adjustment to post-1986 earnings and profits is made under section 965(d)(2) or § 1.965-1(f)(7). Under paragraph (f)(17)(i) of this section, FS is a deferred foreign income corporation because FS has accumulated post-1986 deferred foreign income greater than zero as of the E&P measurement date on December 31, 2017. In addition, under paragraph (f)(17)(ii) of this section, because FS is a deferred foreign income corporation, FS is not also an E&P def-

icit foreign corporation, notwithstanding that FS has a deficit in post-1986 earnings and profits as of the E&P measurement date on November 2, 2017.

(5) *Example 5. Determination of status as a deferred foreign income corporation or an E&P deficit foreign corporation; specified foreign corporation is neither a deferred foreign income corporation nor an E&P deficit foreign corporation—(i) Facts.* USP, a domestic corporation, owns all of the stock of FS, a foreign corporation. As of both November 2, 2017, and December 31, 2017, FS has 100u of earnings and profits described in section 959(c)(2) and a deficit of 90u in earnings and profits described in section 959(c)(3), all of which were accumulated in taxable years beginning after December 31, 1986, while FS was a specified foreign corporation. Accordingly, as of both November 2, 2017, and December 31, 2017, FS has 10u of post-1986 earnings and profits.

(ii) *Analysis—(A) Determination of status as a deferred foreign income corporation.* Under paragraph (f)(17) of this section, for purposes of determining whether FS is a deferred foreign income corporation, a determination must be made whether FS has accumulated post-1986 deferred foreign income greater than zero as of either the E&P measurement date on November 2, 2017, or the E&P measurement date on December 31, 2017. Under section 965(d)(2) and paragraph (f)(7) of this section, FS's accumulated post-1986 deferred foreign income is its post-1986 earnings and profits, except to the extent such earnings and profits are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder. Disregarding FS's 100u of post-1986 earnings and profits described in paragraph (f)(7)(i)(B) of this section, FS has a 90u deficit in accumulated post-1986 deferred foreign income as of both E&P measurement dates. Accordingly, FS does not have accumulated post-1986 deferred foreign income

greater than zero as of either E&P measurement date, and, therefore, FS is not a deferred foreign income corporation.

(B) *Determination of status as an E&P deficit foreign corporation.* Under paragraph (f)(22)(i) of this section, for purposes of determining whether FS is an E&P deficit foreign corporation, a determination must be made whether FS has a deficit in post-1986 earnings and profits as of the E&P measurement date on November 2, 2017. Under paragraph (f)(22)(ii) of this section, because the deficit in the earnings and profits of FS described in section 959(c)(3) of 90u does not exceed the earnings and profits of FS described in section 959(c)(2) of 100u, FS does not have a deficit in post-1986 earnings and profits as of the E&P measurement date on November 2, 2017, and, therefore, FS is not an E&P deficit foreign corporation. Accordingly, FS is neither a deferred foreign income corporation nor an E&P deficit foreign corporation.

(6) *Example 6. Application of currency translation rules—(i) Facts.* As of November 2, 2017, and December 31, 2017, USP, a domestic corporation, owns all of the stock of CFC1, an E&P deficit foreign corporation with the “u” as its functional currency; CFC2, an E&P deficit foreign corporation with the “v” as its functional currency; CFC3, a deferred foreign income corporation with the “y” as its functional currency; and CFC4, a deferred foreign income corporation with the “z” as its functional currency. USP, CFC1, CFC2, CFC3, and CFC4 each have a calendar year taxable year. As of December 31, 2017, 1u=\$1, .75v=\$1, .50y=\$1, and .25z=\$1. CFC1 has a specified E&P deficit of 100u, CFC2 has a specified E&P deficit of 120v, CFC3 has a section 965(a) earnings amount of 50y, and CFC4 has a section 965(a) earnings amount of 75z.

(ii) *Analysis.* (A) Under paragraph (f)(38) of this section, for purposes of determining USP’s section 965(a) inclusion amounts with respect to CFC3 and CFC4, the section 965(a) earnings amount of each of CFC3 and CFC4 is translated into U.S. dollars at the spot rate on December 31, 2017, which equals \$100 (50y at .50y=\$1) and \$300 (75z at .25z=\$1), respectively. Furthermore, USP’s pro rata share of the section

965(a) earnings amounts, as translated, is \$100 and \$300, respectively, or 100% of each section 965(a) earnings amount.

(B) Under paragraph (f)(9) of this section, for purposes of determining USP’s aggregate foreign E&P deficit, the specified E&P deficit of each of CFC1 and CFC2 is translated into U.S. dollars at the spot rate on December 31, 2017, which equals \$100 (100u at 1u=\$1) and \$160 (120v at .75v=\$1), respectively. Furthermore USP’s pro rata share of each specified E&P deficit, as translated, is \$100 and \$160, respectively, or 100% of each specified E&P deficit. Therefore, USP’s aggregate foreign E&P deficit is \$260.

(C) Under section 965(b)(1) and paragraph (b)(2) of this section, for purposes of determining USP’s section 965(a) inclusion amount with respect to each of CFC3 and CFC4, the U.S. dollar amount of USP’s pro rata share of the section 965(a) earnings amount of each of CFC3 and CFC4 is reduced by each of CFC3 and CFC4’s allocable share of USP’s aggregate foreign E&P deficit. Under section 965(b)(2) and paragraph (f)(11) of this section, CFC3’s allocable share of USP’s aggregate foreign E&P deficit of \$260 is \$65 ($\$260 \times (\$100/\$400)$) and CFC4’s allocable share of USP’s aggregate foreign E&P deficit is \$195 ($\$260 \times (\$300/400)$). After reduction under section 965(b)(1) and paragraph (b)(2) of this section, the section 965(a) inclusion amount of USP with respect to CFC3 is \$35 ($\$100 - \65) and the section 965(a) inclusion amount of USP with respect to CFC4 is \$105 ($\$300 - \195). Under § 1.965-2(c), the section 965(a) previously taxed earnings and profits of each of CFC3 and CFC4, translated into the respective functional currencies of CFC3 and CFC4 at the spot rate on December 31, 2017, are 17.5y ($\$35$ at .50y=\$1) and 26.25z ($\105 at .25z=\$1), respectively. Under § 1.965-6(b)(1), for purposes of applying section 960(a)(1), the amounts treated as a dividend paid by each of CFC3 and CFC4, translated into the respective functional currencies of CFC3 and CFC4 at the spot rate on December 31, 2017, are 17.5y ($\$35$ at .50y=\$1) and 26.25z ($\105 at .25z=\$1).

(D) For purposes of determining the section 965(b) previously taxed earnings and profits of each of CFC3 and CFC4 under section 965(b)(4)(A) and § 1.965-

2(d)(1) as a result of the reduction to USP’s section 965(a) inclusion amounts with respect to CFC3 and CFC4, the amount of the aggregate foreign E&P deficit of USP allocated to each of CFC3 and CFC4 under section 965(b)(2) and paragraph (f)(11) of this section, translated into the respective functional currencies of CFC3 and CFC4 at the spot rate on December 31, 2017, is 32.5y (\$65 at .50y=\$1) and 48.75z (\$195 at .25z=\$1), respectively.

(7) *Example 7. Determination of cash measurement dates and pro rata shares of cash positions—(i) Facts.* Except as otherwise provided, for all relevant periods, USP, a domestic corporation, has owned directly at least 10% of the stock of CFC1, CFC2, CFC3, and CFC4, each a foreign corporation. CFC1 and CFC2 have calendar year taxable years. CFC3 and CFC4 have taxable years that end on November 30. No entity has a short taxable year, except as a result of the transactions described below.

(A) USP transferred all of its stock of CFC2 to an unrelated person on June

30, 2016, at which point USP ceased to be a United States shareholder with respect to CFC2.

(B) CFC4 dissolved on December 30, 2010, and, as a result, its final taxable year ended on December 30, 2010.

(ii) *Analysis.* Each of CFC1, CFC2, CFC3, and CFC4 is a specified foreign corporation of USP, subject to the sale of CFC2 on June 30, 2016, and the dissolution of CFC4 on December 30, 2010. Under the definition of aggregate foreign cash position in paragraph (f)(8)(i) of this section, the definition of pro rata share of a cash position in paragraph (f)(30)(iii) of this section, and the definitions of the final cash measurement date, second cash measurement date, and first cash measurement date in paragraphs (f)(24), (25), and (31) of this section, the cash measurement dates of the specified foreign corporations to be taken into account by USP in determining its aggregate foreign cash position are summarized in the following table:

CASH MEASUREMENT DATES

| | Final | Second | First |
|------------|-------------------------|-------------------------|--------------------|
| CFC1 | December 31, 2017 | December 31, 2016 | December 31, 2015. |
| CFC2 | N/A | N/A | December 31, 2015. |
| CFC3 | November 30, 2018 | November 30, 2016 | November 30, 2015. |
| CFC4 | N/A | N/A | N/A. |

(8) *Example 8. Determination of section 958(a) U.S. shareholder in case of a controlled domestic partnership—(i) Facts.* USP, a domestic corporation, owns all of the stock of CFC1 and CFC2. CFC1 and CFC2 own 60% and 40%, respectively, of the interests in the capital and profits of DPS, a domestic partnership. DPS owns all of the stock of CFC3 and CFC4. This ownership structure has existed since the date of formation of CFC1, CFC2, CFC3, and CFC4. CFC1, CFC2, CFC3, and CFC4 are each a foreign corporation. USP, DPS, CFC1, CFC2, CFC3, and CFC4 have calendar year taxable years. On both E&P measurement dates, CFC3 has 50u of accumulated post-1986 deferred foreign income. On both E&P measurement dates, CFC4 has a deficit in post-1986 earnings and profits of 30u. On all cash measurement dates, CFC1, CFC2, and

CFC3 each have a cash position of 0u, and CFC4 has a cash position of 200u.

(ii) *Analysis.* DPS is a controlled domestic partnership with respect to USP within the meaning of paragraph (e)(2) of this section because more than 50% of the interests in its capital and profits are owned by persons related to USP within the meaning of section 267(b), CFC1 and CFC2, and thus DPS is controlled by USP and related persons. Without regard to paragraph (e) of this section, DPS is a section 958(a) U.S. shareholder of CFC3 and CFC4, each of which is a controlled foreign corporation. If DPS were treated as foreign, CFC3 and CFC4 would each continue to be a controlled foreign corporation, and USP would be treated as a section 958(a) U.S. shareholder of each of CFC3 and CFC4, and would be treated as owning (within the meaning of section 958(a)) tested section 958(a) stock of

each of CFC3 and CFC4 through CFC1 and CFC2, which are both partners in DPS. Thus, under paragraph (e)(1) of this section, DPS is treated as a foreign partnership for purposes of determining the section 958(a) U.S. shareholder of both CFC3 and CFC4 and the section 958(a) stock of both CFC3 and CFC4 owned by the section 958(a) U.S. shareholder. Thus, USP's pro rata share of CFC3's section 965(a) earnings amount is 50u, and its pro rata share of CFC4's specified E&P deficit is 30u. USP's aggregate foreign cash position is 200u. DPS is not a section 958(a) U.S. shareholder with respect to either CFC3 or CFC4.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9846, 84 FR 14260, Apr. 10, 2019]

§ 1.965-2 Adjustments to earnings and profits and basis.

(a) *Scope.* This section provides rules relating to adjustments to earnings and profits and basis to determine and account for the application of section 965(a) and (b) and § 1.965-1(b) and a rule that limits the amount of gain recognized under section 961(b)(2) by reason of distributions attributable to section 965 previously taxed earnings and profits (as defined in paragraph (g)(1)(ii) of this section) in the inclusion year. Paragraph (b) of this section provides rules relating to adjustments to earnings and profits of a specified foreign corporation for purposes of applying sections 902, 959, 960, and 965. Paragraph (c) of this section provides rules regarding adjustments to earnings and profits by reason of section 965(a). Paragraph (d) of this section provides rules regarding adjustments to earnings and profits by reason of section 965(b). Paragraph (e) provides rules regarding adjustments to basis by reason of section 965(a). Paragraph (f) of this section provides an election to make certain adjustments to basis corresponding to adjustments to earnings and profits by reason of section 965(b). Paragraph (g) of this section provides rules that limit the amount of gain recognized in connection with the application of section 961(b)(2) and that require related reductions in basis. Paragraph (h) of this section provides rules regarding basis adjustments. Paragraph (i) of this section provides

definitions that apply for purposes of this section. Paragraph (j) of this section provides examples illustrating the application of this section.

(b) *Determination of and adjustments to earnings and profits of a specified foreign corporation for purposes of applying sections 902, 959, 960, and 965.* For the taxable year of a specified foreign corporation in which an E&P measurement date occurs, and the last taxable year of a specified foreign corporation that begins before January 1, 2018, and the taxable year of a section 958(a) U.S. shareholder in which or with which any such year ends, the adjustments to earnings and profits described in paragraphs (b)(1) through (b)(5) of this section apply in sequence. For purposes of determining the consequences under sections 902 and 960 of a distribution or an inclusion under section 951(a)(1), after the application of those paragraphs, the ordering rule in § 1.960-1(i)(2) applies except that section 902 is applied with respect to any distributions from the specified foreign corporation described in paragraph (b)(2) of this section that are not disregarded under § 1.965-4 before section 960 is applied with respect to an inclusion or distribution described in paragraph (b)(3), (b)(4), or (b)(5) of this section.

(1) Each of the subpart F income of the specified foreign corporation and the amount required to be included in income under section 1248, if any, are determined without regard to section 965(a), but taking into account any relevant distributions, and earnings and profits of the specified foreign corporation that are described in section 959(c)(2) with respect to the section 958(a) U.S. shareholder are increased to the extent of the section 958(a) U.S. shareholder's inclusion under section 951(a)(1)(A) without regard to section 965(a) (including to the extent provided in section 959(e)).

(2) The treatment of a distribution by the specified foreign corporation to another specified foreign corporation that is made before January 1, 2018, and, in the case of a taxable year of a specified foreign corporation before its last taxable year that begins before January 1, 2018, any other distribution from the

specified foreign corporation made before the relevant E&P measurement date, is determined under section 959.

(3) Each of the post-1986 earnings and profits (including a deficit) of the specified foreign corporation, the accumulated post-1986 deferred foreign income of the specified foreign corporation, the section 965(a) earnings amount of the specified foreign corporation, and the section 965(a) inclusion amount with respect to the specified foreign corporation, if any, is determined, taking into account the rules of § 1.965-4, and the earnings and profits (including a deficit) of the specified foreign corporation are adjusted as provided in paragraphs (c) and (d) of this section. For a rule disregarding subpart F income earned after an E&P measurement date for purposes of calculating accumulated post-1986 deferred foreign income as of the E&P measurement date, see § 1.965-1(f)(7)(ii).

(4) The treatment of distributions described in paragraph (b)(2) of this section that are disregarded under § 1.965-4 is redetermined (if necessary) and the treatment of all distributions from the specified foreign corporation other than those described in paragraph (b)(2) of this section is determined under section 959.

(5) An amount is determined under section 956 with respect to the specified foreign corporation and the section 958(a) U.S. shareholder; earnings and profits of the specified foreign corporation described in section 959(c)(2) with respect to the section 958(a) U.S. shareholder are reclassified as earnings and profits described in section 959(c)(1) with respect to the section 958(a) U.S. shareholder to the extent the amount determined under section 956 would, but for section 959(a)(2), be included by the section 958(a) U.S. shareholder under section 951(a)(1)(B); and earnings and profits described in section 959(c)(1) with respect to the section 958(a) U.S. shareholder are further increased to the extent of the section 958(a) U.S. shareholder's inclusion under section 951(a)(1)(B).

(c) *Adjustments to earnings and profits by reason of section 965(a).* The earnings and profits of a deferred foreign income corporation described in section 959(c)(2) with respect to a section 958(a)

U.S. shareholder are increased by an amount equal to the section 965(a) inclusion amount of the section 958(a) U.S. shareholder with respect to the deferred foreign income corporation, if any, translated (if necessary) into the functional currency of the deferred foreign income corporation using the spot rate on December 31, 2017, provided the section 965(a) inclusion amount is included in income by the section 958(a) U.S. shareholder. For purposes of the section 965 regulations, the earnings and profits described in section 959(c)(2) by reason of this paragraph (c) and the earnings and profits initially described in section 959(c)(2) by reason of this paragraph (c) but subsequently reclassified as earnings and profits described in section 959(c)(1), if any, are referred to as *section 965(a) previously taxed earnings and profits*. Furthermore, the earnings and profits (including a deficit) of the deferred foreign income corporation that are described in section 959(c)(3) (or that would be described in section 959(c)(3) but for the application of section 965(a) and the section 965 regulations) are reduced (or, in the case of a deficit, increased) by an amount equal to the section 965(a) previously taxed earnings and profits.

(d) *Adjustments to earnings and profits by reason of section 965(b)*—(1) *Adjustments to earnings and profits described in section 959(c)(2) and (c)(3) of deferred foreign income corporations.* The earnings and profits of a deferred foreign income corporation described in section 959(c)(2) with respect to a section 958(a) U.S. shareholder are increased by an amount equal to the reduction to the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation under section 965(b), § 1.965-1(b)(2), and § 1.965-8(b), as applicable, translated (if necessary) into the functional currency of the deferred foreign income corporation using the spot rate on December 31, 2017, provided the section 958(a) U.S. shareholder includes the section 965(a) inclusion amount (if any) with respect to the deferred foreign income corporation in income. For purposes of the section 965 regulations, the earnings and profits described in section 959(c)(2) by reason of this paragraph (d) and the earnings and

profits initially described in section 959(c)(2) by reason of this paragraph (d) but subsequently reclassified as earnings and profits described in section 959(c)(1) are referred to as *section 965(b) previously taxed earnings and profits*, and are treated as having been previously included in the gross income of the section 958(a) U.S. shareholder under section 951 for purposes of section 1248(d)(1). Furthermore, the earnings and profits (including a deficit) described in section 959(c)(3) of the deferred foreign income corporation (or that would be described in section 959(c)(3) but for the application of section 965(b) and the section 965 regulations) are reduced (or, in the case of a deficit, increased) by an amount equal to the section 965(b) previously taxed earnings and profits.

(2) *Adjustments to earnings and profits described in section 959(c)(3) of E&P deficit foreign corporations*—(i) *Increase in earnings and profits by an amount equal to the portion of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit taken into account*—(A) *In general.* For an E&P deficit foreign corporation's last taxable year that begins before January 1, 2018, the earnings and profits of the E&P deficit foreign corporation described in section 959(c)(3) are increased by an amount equal to the portion of a section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation taken into account under section 965(b), §1.965-1(b)(2), and §1.965-8(b), as determined under paragraph (d)(2)(ii) of this section, translated (if necessary) into the functional currency of the E&P deficit foreign corporation using the spot rate on December 31, 2017. For purposes of section 316, the earnings and profits of the E&P deficit foreign corporation attributable to the increase described in the preceding sentence are not treated as earnings and profits of the taxable year described in section 316(a)(2). See also §1.965-6(b)(3) for the timing of this adjustment for purposes of determining foreign taxes deemed paid under sections 902 and 960.

(B) *Reduction of a qualified deficit.* For purposes of section 952, a section 958(a) U.S. shareholder's pro rata share of the earnings and profits of an E&P deficit

foreign corporation is increased by an amount equal to the portion of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation taken into account under section 965(b), §1.965-1(b)(2), or §1.965-8(b), as applicable, as determined under paragraph (d)(2)(ii) of this section, translated (if necessary) into the functional currency of the E&P deficit foreign corporation using the spot rate on December 31, 2017, and such increase is attributable to the same activity to which the deficit so taken into account was attributable.

(ii) *Determination of portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit taken into account*—(A) *In general.* The portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit of an E&P deficit foreign corporation taken into account under section 965(b), §1.965-1(b)(2), or §1.965-8(b), as applicable, is 100 percent of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit if either of the following conditions is satisfied:

(1) The section 958(a) U.S. shareholder (including a consolidated group of which the section 958(a) U.S. shareholder is a member) does not have an excess aggregate foreign E&P deficit (as defined in §1.965-8(f)(7)(i)), or

(2) If the section 958(a) U.S. shareholder is a member of an affiliated group in which not all members are members of the same consolidated group, the amount described in §1.965-8(f)(1)(i)(B) with respect to the affiliated group is equal to or greater than the amount described in §1.965-8(f)(1)(i)(A).

(B) *Designation of portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit taken into account.* If neither the condition in paragraph (d)(2)(ii)(A)(1) nor the condition in paragraph (d)(2)(ii)(A)(2) is satisfied with respect to a section 958(a) U.S. shareholder, then the section 958(a) U.S. shareholder must designate the portion taken into account by reporting to each E&P deficit foreign corporation of the section 958(a) U.S. shareholder, and maintaining, in its books and records, a statement setting forth the following information—

(1) The portion of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation taken into account under section 965(b), § 1.965-1(b)(2), or § 1.965-8(b), as designated under § 1.965-8(c), as applicable, and

(2) In the case of an E&P deficit foreign corporation that has a qualified deficit (as determined under section 952 and § 1.952-1), the portion (if any) of the section 958(a) shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation taken into account under paragraph (d)(2)(ii)(B)(1) of this section that is attributable to a qualified deficit, including the qualified activities to which such portion is attributable.

(e) *Adjustments to basis by reason of section 965(a)*—(1) *General rule.* Except as provided in paragraph (e)(2) of this section, a section 958(a) U.S. shareholder's basis in section 958(a) stock of a deferred foreign income corporation, or a section 958(a) U.S. shareholder's basis in applicable property with respect to a deferred foreign income corporation, is increased by the section 958(a) U.S. shareholder's section 965(a) inclusion amount with respect to the deferred foreign income corporation included in income by the section 958(a) U.S. shareholder. *See* section 961(a).

(2) *Section 962 election.* In the case of a section 958(a) U.S. shareholder who has made an election under section 962 for a section 958(a) U.S. shareholder's inclusion year, the increase in basis in the section 958(a) U.S. shareholder's section 958(a) stock of, or applicable property with respect to, a deferred foreign income corporation cannot exceed an amount equal to the amount of tax paid under chapter 1 of the Code with respect to the section 958(a) U.S. shareholder's section 965(a) inclusion amount with respect to the deferred foreign income corporation, taking into account any section 965(h) election made by the section 958(a) U.S. shareholder.

(f) *Adjustments to basis by reason of section 965(b)*—(1) *In general.* Except as provided in paragraph (f)(2) of this section, no adjustments to basis of stock or property are made under section 961 (or any other provision of the Code) to take into account the reduction to a

section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of a deferred foreign income corporation under section 965(b), § 1.965-1(b)(2), or § 1.965-8(b), as applicable.

(2) *Election to make adjustments to basis to account for the application of section 965(b)*—(i) *In general.* If a section 958(a) U.S. shareholder makes the election as provided in this paragraph (f)(2), the adjustments to basis described in paragraph (f)(2)(ii) of this section are made with respect to each deferred foreign income corporation and each E&P deficit foreign corporation in which the section 958(a) U.S. shareholder owns section 958(a) stock.

(ii) *Basis adjustments*—(A) *Increase in basis with respect to a deferred foreign income corporation*—(1) *In general.* Except as provided in paragraphs (f)(2)(ii)(A)(2) and (C) of this section, a section 958(a) U.S. shareholder's basis in section 958(a) stock of a deferred foreign income corporation, or a section 958(a) U.S. shareholder's basis in applicable property with respect to a deferred foreign income corporation, is increased by an amount equal to the section 965(b) previously taxed earnings and profits of the deferred foreign income corporation with respect to the section 958(a) U.S. shareholder, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017.

(2) *Limited basis adjustment.* A section 958(a) U.S. shareholder may, in lieu of applying paragraph (f)(2)(ii)(A)(1) of this section, designate the amount by which it increases its basis in section 958(a) stock of, or applicable property with respect to, a deferred foreign income corporation, provided that—

(i) The increase does not exceed the section 965(b) previously taxed earnings and profits of the deferred foreign income corporation with respect to the section 958(a) U.S. shareholder, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017; and

(ii) The aggregate amount of a section 958(a) U.S. shareholder's increases in basis with respect to stock or applicable property pursuant to paragraph (f)(2)(ii)(A)(2) of this section does not exceed the aggregate amount of the

section 958(a) U.S. shareholder's reductions in basis pursuant to paragraph (f)(2)(ii)(B) of this section subject to the limitation under paragraph (f)(2)(ii)(B)(2) of this section.

(B) *Reduction in basis with respect to an E&P deficit foreign corporation*—(1) *In general.* Except as provided in paragraphs (f)(2)(ii)(B)(2) and (f)(2)(ii)(C) of this section, a section 958(a) U.S. shareholder's basis in section 958(a) stock of an E&P deficit foreign corporation, or a section 958(a) U.S. shareholder's basis in applicable property with respect to an E&P deficit foreign corporation, is reduced by an amount equal to the portion of the section 958(a) U.S. shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation taken into account under section 965(b), § 1.965-1(b)(2), and § 1.965-8(b), as applicable, as determined under paragraph (d)(2)(ii) of this section, translated (if necessary) into U.S. dollars using the spot rate on December 31, 2017. For rules requiring gain recognition, see paragraph (h)(3) of this section.

(2) *Limited basis adjustment.* If a section 958(a) U.S. shareholder adjusts its basis in section 958(a) stock of, or applicable property with respect to, one or more deferred foreign income corporations under paragraph (f)(2)(ii)(A)(2) of this section, the section 958(a) U.S. shareholder's aggregate reductions in basis in section 958(a) stock of, or applicable property with respect to, an E&P deficit foreign corporation pursuant to paragraph (f)(2)(ii)(B)(1) of this section on a day may not exceed the amount of the section 958(a) U.S. shareholder's basis in the section 958(a) stock of, or applicable property with respect to, such E&P deficit foreign corporation, determined without taking into account specified basis adjustments to the section 958(a) stock of, or applicable property with respect to, such E&P deficit foreign corporation.

(C) *Section 962 election.* In the case of a section 958(a) U.S. shareholder who has made an election under section 962 for a section 958(a) U.S. shareholder's inclusion year, the adjustments provided in paragraphs (f)(2)(ii)(A) and (B) of this section do not apply.

(iii) *Rules regarding the election*—(A) *Consistency requirement.* In order for the election described in this paragraph (f)(2) to be effective, a section 958(a) U.S. shareholder and each section 958(a) U.S. shareholder of an E&P deficit foreign corporation or of a deferred foreign income corporation with respect to which the second section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount is reduced under section 965(b), § 1.965-1(b)(2), or § 1.965-8(b) that is related to the first section 958(a) U.S. shareholder must make the election described in this paragraph (f)(2). For purposes of this paragraph (f)(2)(iii)(A), a person is treated as related to a section 958(a) U.S. shareholder if the person bears a relationship to the section 958(a) U.S. shareholder described in section 267(b) or 707(b).

(B) *Manner of making election*—(1) *Timing*—(i) *In general.* Except as provided in paragraph (f)(2)(iii)(B)(1)(ii) of this section, the election provided in this paragraph (f)(2) must be made no later than the due date (taking into account extensions, if any) for the section 958(a) U.S. shareholder's return for the first taxable year that includes the last day of the last taxable year of a deferred foreign income corporation or E&P deficit foreign corporation of the shareholder that begins before January 1, 2018. Relief is not available under § 301.9100-2 or 301.9100-3 to file a late election. Except as provided in paragraph (f)(2)(iii)(B)(1)(ii) of this section, the election provided in this paragraph (f)(2) is irrevocable.

(ii) *Transition rule.* If the due date referred to in paragraph (f)(2)(iii)(B)(1)(i) of this section occurs before May 6, 2019, the election must be made by May 6, 2019. In the case of an election made before February 5, 2019, the election may be revoked by attaching a statement, signed under penalties of perjury, to an amended return filed by May 6, 2019. The statement must contain the section 958(a) U.S. shareholder's name and taxpayer identification number and a statement that the section 958(a) U.S. shareholder and all related persons, as defined in paragraph (f)(2)(iii)(A) of this section, that are section 958(a) U.S. shareholders of E&P deficit foreign corporations or of

deferred foreign income corporations with respect to which the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount is reduced under section 965(b), § 1.965-1(b)(2), or § 1.965-8(b) revoke the election provided in this paragraph (f)(2).

(2) *Election statement.* Except as otherwise provided in publications, forms, instructions, or other guidance, to make the election provided in this paragraph (f)(2), a section 958(a) U.S. shareholder must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the section 958(a) U.S. shareholders return, to its return for the first taxable year that includes the last day of the last taxable year of a deferred foreign income corporation or E&P deficit foreign corporation of the shareholder that begins before January 1, 2018. The statement must include the section 958(a) U.S. shareholder's name, taxpayer identification number, and a statement that the section 958(a) U.S. shareholder and all related persons, as defined in paragraph (f)(2)(iii)(A) of this section, that are section 958(a) U.S. shareholders of E&P deficit foreign corporations or of deferred foreign income corporations with respect to which the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount is reduced under section 965(b), § 1.965-1(b)(2), or § 1.965-8(b) make the election provided in this paragraph (f)(2). If the section 958(a) U.S. shareholder increases its basis in stock or applicable property under paragraph (f)(2)(ii)(A)(2) of this section and decreases its basis in stock or applicable property pursuant to paragraph (f)(2)(ii)(B) of this section subject to the limitation under paragraph (f)(2)(ii)(B)(2) of this section, the election statement must so indicate. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (f)(2)(iii)(B)(2) if the section 958(a) U.S. shareholder retains the original signed election statement in the manner specified by § 1.6001-1(e).

(g) *Gain reduction rule—(1) Reduction in gain recognized under section 961(b)(2) by reason of distributions attributable to*

section 965 previously taxed earnings and profits in the inclusion year—(i) In general. If a section 958(a) U.S. shareholder receives a distribution from a deferred foreign income corporation (including through a chain of ownership described under section 958(a)) during the inclusion year of the deferred foreign income corporation that is attributable to section 965 previously taxed earnings and profits of the deferred foreign income corporation, then the amount of gain that otherwise would be recognized under section 961(b)(2) by the section 958(a) U.S. shareholder with respect to the section 958(a) U.S. shareholder's section 958(a) stock of the deferred foreign income corporation or interest in applicable property with respect to the deferred foreign income corporation is reduced (but not below zero) by an amount equal to the section 965 previously taxed earnings and profits of the deferred foreign income corporation with respect to the section 958(a) U.S. shareholder, translated (if necessary) into U.S. dollars at the spot rate on December 31, 2017.

(ii) *Definition of section 965 previously taxed earnings and profits.* For purposes of paragraph (g)(1)(i) of this section, the term *section 965 previously taxed earnings and profits* means, with respect to a deferred foreign income corporation and a section 958(a) U.S. shareholder, the sum of the section 965(a) previously taxed earnings and profits of the deferred foreign income corporation with respect to the section 958(a) U.S. shareholder, and, if the section 958(a) U.S. shareholder has made the election described in paragraph (f)(2) of this section, the section 965(b) previously taxed earnings and profits of the deferred foreign income corporation with respect to the section 958(a) U.S. shareholder.

(2) *Reduction in basis by an amount equal to the gain reduction amount.* If a section 958(a) U.S. shareholder does not recognize gain under section 961(b)(2) by reason of paragraph (g)(1) of this section with respect to a distribution from a deferred foreign income corporation (including through a chain of ownership described under section 958(a)), the section 958(a) U.S. shareholder's basis in the section 958(a) stock of the deferred foreign income

corporation, or the section 958(a) U.S. shareholder's basis in the applicable property with respect to the deferred foreign income corporation, is reduced by the amount of gain that would otherwise be recognized by the section 958(a) U.S. shareholder without regard to paragraph (g)(1) of this section.

(h) *Rules of application for specified basis adjustments.* This paragraph (h) applies for purposes of making any adjustment to the basis of section 958(a) stock or applicable property with respect to a specified foreign corporation described in paragraph (e), (f)(2), or (g)(2) of this section (collectively, *specified basis adjustments*), and each a *specified basis adjustment*).

(1) *Timing of basis adjustments.* Except as provided in paragraph (e)(2) of this section, a specified basis adjustment to section 958(a) stock or applicable property with respect to a specified foreign corporation is made as of the last day of the last taxable year of the specified foreign corporation that begins before January 1, 2018, on which it is a specified foreign corporation.

(2) *Netting of basis adjustments.* If one or more specified basis adjustments occur on the same day with respect to the same section 958(a) stock or applicable property, a single basis adjustment is made as of the close of such day with respect to such stock or applicable property in an amount equal to the net amount, if any, of the increase or reduction, as applicable.

(3) *Gain recognition for reduction in excess of basis.* The excess (if any) of a net reduction in basis with respect to section 958(a) stock or applicable property of a section 958(a) U.S. shareholder by reason of one or more specified basis adjustments over the section 958(a) U.S. shareholder's basis in such stock or applicable property without regard to the specified basis adjustments is treated as gain from the sale or exchange of property.

(4) *Adjustments with respect to each share—(i) Section 958(a) stock.* If a specified basis adjustment is made with respect to section 958(a) stock, the specified basis adjustment is made with respect to each share of the section 958(a) stock in a manner consistent with the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earn-

ings amount or specified E&P deficit, as applicable, by reason of such share.

(ii) *Applicable property.* If a specified basis adjustment is made with respect to applicable property, the adjustment is made with respect to the applicable property in a manner consistent with the application of paragraph (h)(4)(i) of this section.

(5) *Stock or property for which adjustments are made—(i) In general.* Except as provided in paragraph (h)(5)(ii) of this section, a specified basis adjustment is made solely with respect to section 958(a) stock owned by the section 958(a) U.S. shareholder within the meaning of section 958(a)(1)(A) or applicable property owned directly by the section 958(a) U.S. shareholder.

(ii) *Special rule for an interest in a foreign pass-through entity.* If the applicable property of the section 958(a) U.S. shareholder described in paragraph (h)(5)(i) of this section is an interest in a foreign pass-through entity, then, for purposes of determining the foreign pass-through entity's basis in section 958(a) stock or applicable property, as applicable, with respect to the section 958(a) U.S. shareholder, a specified basis adjustment is made with respect to section 958(a) stock or applicable property of the section 958(a) U.S. shareholder owned through the foreign pass-through entity in the same manner as if the section 958(a) stock or applicable property were owned directly by the section 958(a) U.S. shareholder. In the case of tiered foreign pass-through entities, this paragraph (h)(5)(ii) applies with respect to each foreign pass-through entity.

(i) *Definitions.* This paragraph (i) provides definitions that apply for purposes of this section.

(1) *Applicable property.* The term *applicable property* means, with respect to a section 958(a) U.S. shareholder and a specified foreign corporation, property owned by the section 958(a) U.S. shareholder (including through one or more foreign pass-through entities) by reason of which the section 958(a) U.S. shareholder is considered under section 958(a)(2) as owning section 958(a) stock of the specified foreign corporation.

(2) *Foreign pass-through entity.* The term *foreign pass-through entity* means

a foreign partnership or a foreign estate or trust (as defined in section 7701(a)(31)) (including a controlled domestic partnership treated as a foreign partnership pursuant to § 1.965-1(e)).

(3) *Property*. The term *property* has the meaning provided in § 1.961-1(b)(1).

(j) *Examples*. The following examples illustrate the application of this section.

(1) *Example 1. Determination of accumulated post-1986 deferred foreign income with subpart F income earned before E&P measurement date on November 2, 2017—*

(i) *Facts*. USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation, which owns all of the stock of CFC2, also a foreign corporation. USP, CFC1, and CFC2 all have taxable years ending December 31, 2017. As of January 1, 2017, CFC1 has no earnings and profits, and CFC2 has 100u of earnings and profits described in section 959(c)(3) that were accumulated in taxable years beginning after December 31, 1986, while CFC2 was a specified foreign corporation, and \$21x of post-1986 foreign income taxes. None of CFC2's earnings and profits are attributable to income treated as effectively connected with the conduct of a trade or business within the United States. On March 1, 2017, CFC1 earns 30u of subpart F income (as defined in section 952), and CFC2 earns 20u of subpart F income. No foreign income tax is imposed on CFC1's or CFC2's subpart F income. For purposes of section 904, the post-1986 undistributed earnings, subpart F income, and post-1986 foreign income taxes are in the general category. On July 1, 2017, CFC2 distributes 40u to CFC1. On November 1, 2017, CFC1 distributes 60u to USP. USP does not have an aggregate foreign E&P deficit. USP includes in gross income all amounts that it is required to include under section 951. No foreign income tax is imposed or withheld on the distribution by CFC2 to CFC1 or the distribution by CFC1 to USP.

(ii) *Analysis—(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965*. The distribution from CFC2 to CFC1 does not give rise to subpart F income to CFC1 due to the application of section 954(c)(6). Accordingly, USP's inclu-

sion under section 951(a)(1)(A) without regard to section 965(a) is 30u with respect to CFC1 and 20u with respect to CFC2 for their taxable years ending December 31, 2017. As a result of the inclusions under section 951(a)(1)(A), CFC1 and CFC2 increase their earnings and profits described in section 959(c)(2) by 30u and 20u, respectively.

(B) *Distributions between specified foreign corporations before January 1, 2018*. The distribution of 40u from CFC2 to CFC1 is treated as a distribution of 20u out of earnings and profits described in section 959(c)(2) (attributable to inclusions under section 951(a)(1)(A) without regard to section 965(a)) and 20u out of earnings and profits described in section 959(c)(3).

(C) *Section 965(a) inclusion amount*. USP determines whether CFC1 and CFC2 are deferred foreign income corporations and, if so, determines its section 965(a) inclusion amounts with respect to CFC1 and CFC2. CFC1 and CFC2 are specified foreign corporations, and CFC1 and CFC2 each have accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date. Accordingly, CFC1 and CFC2 are deferred foreign income corporations. USP's section 965(a) inclusion amount with respect to each of CFC1 and CFC2, respectively, equals the section 965(a) earnings amount of CFC1 and CFC2, respectively.

(1) *CFC1 section 965(a) earnings amount*. The section 965(a) earnings amount with respect to CFC1 is 20u, the amount of its accumulated post-1986 deferred foreign income as of both November 2, 2017, and December 31, 2017, which is equal to 70u of post-1986 earnings and profits (30u earned and 40u attributable to the CFC2 distribution) reduced by 50u of such post-1986 earnings and profits described in section 959(c)(2) (30u earned and 20u attributable to the CFC2 distribution) under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B). Under section 965(d)(3)(B) and § 1.965-1(f)(29)(i)(B), the post-1986 earnings and profits of CFC1 are not reduced by the 60u distribution to USP.

(2) *CFC2 section 965(a) earnings amount*. The section 965(a) earnings amount with respect to CFC2 is 80u, the amount of its accumulated post-1986 deferred foreign income as of both

November 2, 2017, and December 31, 2017, which is equal to the amount of CFC2's post-1986 earnings and profits of 80u. CFC2's accumulated post-1986 deferred foreign income is equal to its post-1986 earnings and profits because CFC2 does not have earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder, and, therefore, no adjustment is made under section 965(d)(2) or § 1.965-1(f)(7). CFC2's 80u of post-1986 earnings and profits consists of 120u of earnings and profits that it earned, reduced by the 40u distribution to CFC1 under section 965(d)(3)(B) and § 1.965-1(f)(29)(i)(B). The amount of the reduction to the post-1986 earnings and profits of CFC2 for the 40u distribution is not limited by § 1.965-1(f)(29)(i)(B) because CFC1's post-1986 earnings and profits are increased by 40u as a result of the distribution. Furthermore, because the 40u distribution was made on July 1, 2017, which is before the E&P measurement date on November 2, 2017, § 1.965-4(f) is not relevant.

(3) *Effect on earnings and profits described in section 959(c)(2) and (3).* CFC1 and CFC2 increase their earnings and profits described in section 959(c)(2) by USP's section 965(a) inclusion amounts with respect to CFC1 and CFC2, 20u and 80u, respectively, and reduce their earnings and profits described in section 959(c)(3) by an equivalent amount.

(D) *Distribution to United States shareholder.* The distribution from CFC1 to USP is treated as a distribution of 60u out of the earnings and profits of CFC1 described in section 959(c)(2), which include earnings and profits attributable to the section 965(a) inclusion amount taken into account by USP.

(E) *Section 902 and section 960 consequences—(1) Distribution by and inclusions with respect to CFC2.* Under section 960, USP is deemed to pay $\$3.50x$ ($\$21x \times (20u/120u)$) of CFC2's post-1986 foreign income taxes as a result of its

inclusion under section 951(a)(1)(A) without regard to section 965(a) with respect to CFC2. As a result of the distribution from CFC2 to CFC1, CFC2's post-1986 foreign income taxes are reduced, and CFC1's post-1986 foreign income taxes are increased, by the foreign income taxes deemed paid by CFC1 under section 902 of $\$3.50x$ ($(\$21x - \$3.50x) \times (20u/120u - 20u)$). Under section 960, USP is deemed to pay $\$14x$ ($(\$21x - \$3.50x - \$3.50x) \times 80u/(120u - 40u)$) of CFC2's post-1986 foreign income taxes as a result of its section 965(a) inclusion with respect to CFC2. The taxes deemed paid by USP as a result of its section 965(a) inclusion with respect to CFC2 are subject to the applicable percentage disallowance under section 965(g).

(2) *Inclusions with respect to CFC1.* As determined in paragraph (j)(1)(ii)(E)(I) of this section (paragraph (E)(1) in the analysis in this Example 1), as a result of the distribution from CFC2 to CFC1, CFC1 is deemed under section 902 to pay $\$3.50x$ of CFC2's post-1986 foreign income taxes. Under section 960, USP is deemed to pay $\$2.10x$ ($\$3.50x \times (30u/(30u + 20u))$) of CFC1's post-1986 foreign income taxes as a result of its inclusion under section 951(a)(1)(A) without regard to section 965(a) with respect to CFC1. Under section 960, USP is deemed to pay $\$1.40x$ ($(\$3.50x - \$2.10x) \times 20u/(30u + 20u - 30u)$) of CFC1's post-1986 foreign income taxes as a result of its section 965(a) inclusion with respect to CFC1. The taxes deemed paid by USP as a result of its section 965(a) inclusion with respect to CFC1 are subject to the applicable percentage disallowance under section 965(g).

(2) *Example 2. Determination of accumulated post-1986 deferred foreign income with subpart F income earned after E&P measurement date on November 2, 2017—*

(i) *Facts.* The facts are the same as in paragraph (j)(1)(i) of this section (the facts in Example 1), except that on December 1, 2017, CFC1 earns an additional 50u of subpart F income (as defined in section 952), and neither CFC1 nor CFC2 has any post-1986 foreign income taxes.

(ii) *Analysis—(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.*

USP determines its inclusion under section 951(a)(1)(A) without regard to section 965(a), which is 80u with respect to CFC1 and 20u with respect to CFC2 for their taxable years ending December 31, 2017. As a result of the inclusions under section 951(a)(1)(A), CFC1 and CFC2 increase their earnings and profits described in section 959(c)(2) by 80u and 20u, respectively.

(B) *Distributions between specified foreign corporations before January 1, 2018.* The analysis is the same as in paragraph (j)(1)(ii)(B) of this section (paragraph (B) in the analysis in *Example 1*).

(C) *Section 965(a) inclusion amount.* USP determines whether CFC1 and CFC2 are deferred foreign income corporations and, if so, determines its section 965(a) inclusion amounts with respect to CFC1 and CFC2. CFC1 and CFC2 are specified foreign corporations, and CFC1 and CFC2 each have accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date. Accordingly, CFC1 and CFC2 are deferred foreign income corporations. USP's section 965(a) inclusion amount with respect to each of CFC1 and CFC2, respectively, equals the section 965(a) earnings amount of CFC1 and CFC2, respectively.

(1) *CFC1 section 965(a) earnings amount.* The section 965(a) earnings amount with respect to CFC1 is 20u, the greater of—

(i) The amount of its accumulated post-1986 deferred foreign income as of November 2, 2017, 20u, which is equal to 70u of post-1986 earnings and profits (30u earned and 40u attributable to the CFC2 distribution) reduced by 50u of such post-1986 earnings and profits described in section 959(c)(2) without regard to the subpart F income earned after November 2, 2017 (30u earned and 20u attributable to the CFC2 distribution) under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B) and (ii), and

(ii) The amount of its accumulated post-1986 deferred foreign income as of December 31, 2017, 20u, which is equal to 120u of post-1986 earnings and profits (80u earned and 40u attributable to the CFC2 distribution) reduced by 100u of such post-1986 earnings and profits described in section 959(c)(2) with regard to the subpart F income earned on or before December 31, 2017 (80u earned

and 20u attributable to the CFC2 distribution) under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B) and (ii).

(2) *CFC2 section 965(a) earnings amount.* The analysis is the same as in paragraph (j)(1)(ii)(C)(2) of this section (paragraph (C)(2) in the analysis in *Example 1*).

(3) *Effect on earnings and profits described in section 959(c)(2) and (3).* The analysis is the same as in paragraph (j)(1)(ii)(C)(3) of this section (paragraph (C)(3) in the analysis in *Example 1*).

(D) *Distribution to United States shareholder.* The analysis is the same as in paragraph (j)(1)(ii)(D) of this section (paragraph (D) in the analysis in *Example 1*).

(3) *Example 3. Determination of accumulated post-1986 deferred foreign income with subpart F income earned after E&P measurement date on November 2, 2017, but previously taxed earnings and profits attributable to the subpart F income distributed before E&P measurement date on November 2, 2017—(i) Facts.* The facts are the same as in paragraph (j)(1)(i) of this section (the facts in *Example 1*), except that on December 1, 2017, CFC2 earns an additional 50u of subpart F income (as defined in section 952), and neither CFC1 nor CFC2 has any post-1986 foreign income taxes.

(ii) *Analysis—(A) Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965.* USP determines its inclusion under section 951(a)(1)(A) without regard to section 965(a), which is 30u with respect to CFC1 and 70u with respect to CFC2 for their taxable years ending December 31, 2017. As a result of the inclusions under section 951(a)(1)(A), CFC1 and CFC2 increase their earnings and profits described in section 959(c)(2) by 30u and 70u, respectively.

(B) *Distributions between specified foreign corporations before January 1, 2018.* The distribution of 40u from CFC2 to CFC1 is treated as a distribution of 40u out of earnings and profits described in section 959(c)(2) (attributable to inclusions under section 951(a)(1)(A) without regard to section 965(a)).

(C) *Section 965(a) inclusion amount.* USP determines whether CFC1 and CFC2 are deferred foreign income corporations, and, if so, determines its

section 965(a) inclusion amounts with respect to CFC1 and CFC2. Because USP wholly owns CFC1 and CFC2 under section 958(a) and USP does not have an aggregate foreign E&P deficit, USP's section 965(a) inclusion amount with respect to each of CFC1 and CFC2, respectively, equals the section 965(a) earnings amount, if any, of CFC1 and CFC2, respectively.

(1) *CFC1 section 965(a) earnings amount.* CFC1 is not a deferred foreign income corporation and does not have a section 965(a) earnings amount because the amount of its accumulated post-1986 deferred foreign income as of both November 2, 2017, and December 31, 2017, is 0u, which is equal to 70u of post-1986 earnings and profits (30u earned and 40u attributable to the CFC2 distribution) reduced by 70u of such post-1986 earnings and profits described in section 959(c)(2) (30u earned and 40u attributable to the CFC2 distribution) under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B).

(2) *CFC2 section 965(a) earnings amount.* The section 965(a) earnings amount with respect to CFC2 is 100u, the greater of the amounts in paragraph (j)(3)(ii)(C)(2)(i) and (ii) of this section (paragraph (C)(2)(i) and (ii) in the analysis in this *Example 3*)—

(i) The amount of its accumulated post-1986 deferred foreign income as of November 2, 2017, 80u. CFC2's 80u of accumulated post-1986 deferred foreign income as of November 2, 2017, is equal to its 80u of post-1986 earnings and profits because no adjustment is made under section 965(d)(2) or § 1.965-1(f)(7), as CFC2 does not have earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder, without regard to the subpart F income earned after November 2, 2017. CFC2's 80u of post-1986 earnings and profits consists of 120u of earnings and profits that it earned, reduced by the 40u distribution to CFC1 under sec-

tion 965(d)(3)(B) and § 1.965-1(f)(29)(i)(B). The amount of the reduction to the post-1986 earnings and profits of CFC2 for the 40u distribution is not limited by § 1.965-1(f)(29)(i)(B) because CFC1's post-1986 earnings and profits are increased by 40u as a result of the distribution. Furthermore, because the 40u distribution was made on July 1, 2017, which is before any E&P measurement date, § 1.965-4(f) is not relevant.

(ii) The amount of its accumulated post-1986 deferred foreign income as of December 31, 2017, 100u, which is equal to 130u of post-1986 earnings and profits reduced by 30u of such post-1986 earnings and profits described in section 959(c)(2) with regard to the subpart F income earned before December 31, 2017, under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B) and (ii). CFC2's 130u of post-1986 earnings and profits consists of 170u of earnings and profits that it earned, reduced by the 40u distribution to CFC1 under section 965(d)(3)(B) and § 1.965-1(f)(29)(i)(B).

(3) *Effect on earnings and profits described in section 959(c)(2) and (3).* CFC2 increases its earnings and profits described in section 959(c)(2) by USP's section 965(a) inclusion amount with respect to CFC2, 100u, and reduces its earnings and profits described in section 959(c)(3) by an equivalent amount.

(D) *Distribution to United States shareholder.* The analysis is the same as in paragraph (j)(1)(ii)(D) of this section (paragraph (D) in the analysis in *Example 1*).

(4) *Example 4. Determination of accumulated post-1986 deferred foreign income with distribution made after E&P measurement date on November 2, 2017—(i) Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation, which owns all of the stock of CFC2, also a foreign corporation. USP, CFC1, and CFC2 all have taxable years ending December 31, 2017. As of January 1, 2017, CFC1 has 10u of earnings and profits described in section 959(c)(3) that were accumulated in taxable years beginning after December 31, 1986, while CFC1 was a specified foreign corporation, and \$2x of post-1986 foreign income taxes; and CFC2 has 100u of earnings and profits described in section 959(c)(3) that were

accumulated in taxable years beginning after December 31, 1986, while CFC2 was a specified foreign corporation and \$10x of post-1986 foreign income taxes. For purposes of section 904, the post-1986 undistributed earnings and post-1986 foreign income taxes are in the general category. None of CFC1's or CFC2's earnings and profits are attributable to income treated as effectively connected with the conduct of a trade or business within the United States. On December 1, 2017, CFC2 distributes 100u to CFC1, and CFC1 distributes 10u to USP. USP does not have an aggregate foreign E&P deficit. USP includes in gross income all amounts that it is required to include under section 951. No foreign income tax is imposed or withheld on the distribution by CFC2 to CFC1 or the distribution by CFC1 to USP. USP does not apply § 1.965-4(f)(3) to determine the post-1986 earnings and profits of CFC1 and CFC2.

(ii) *Analysis*—(A) *Adjustments to section 959(c) classification of earnings and profits for inclusion under section 951(a)(1)(A) without regard to section 965*. The distribution from CFC2 to CFC1 does not give rise to subpart F income to CFC1 due to the application of section 954(c)(6). Accordingly, USP does not have an inclusion under section 951(a)(1)(A) without regard to section 965(a) with respect to CFC1 or CFC2 for their taxable years ending December 31, 2017. As a result, neither CFC1 nor CFC2 has earnings and profits described in section 959(c)(2).

(B) *Distributions between specified foreign corporations before January 1, 2018*. The distribution of 100u from CFC2 to CFC1 is initially treated as a distribution out of earnings and profits described in section 959(c)(3).

(C) *Section 965(a) inclusion amount*. USP determines whether CFC1 and CFC2 are deferred foreign income corporations, and, if so, determines its section 965(a) inclusion amounts with respect to CFC1 and CFC2. CFC1 and CFC2 are specified foreign corporations, and CFC1 and CFC2 each have accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date. Accordingly, CFC1 and CFC2 are deferred foreign income corporations. USP's section 965(a) inclusion amount with respect to each of

CFC1 and CFC2, respectively, equals the section 965(a) earnings amount of CFC1 and CFC2, respectively.

(1) *CFC1 section 965(a) earnings amount*. The section 965(a) earnings amount with respect to CFC1 is 10u, the amount of its accumulated post-1986 deferred foreign income as of both November 2, 2017, and December 31, 2017, which is equal to the amount of CFC1's post-1986 earnings and profits of 10u. CFC1's accumulated post-1986 deferred foreign income is equal to its post-1986 earnings and profits because CFC1 does not have earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder, and therefore no adjustment is made under section 965(d)(2) or § 1.965-1(f)(7). But for § 1.965-4(f), CFC1's post-1986 earnings and profits as of December 31, 2017, would be 110u, but because the distribution from CFC2 is a specified payment, it is disregarded in determining CFC1's post-1986 earnings and profits as of December 31, 2017, under § 1.965-4(f). Under section 965(d)(3)(B) and § 1.965-1(f)(29)(i)(B), the post-1986 earnings and profits of CFC1 are not reduced by the 10u distribution to USP.

(2) *CFC2 section 965(a) earnings amount*. The section 965(a) earnings amount with respect to CFC2 is 100u, the amount of its accumulated post-1986 deferred foreign income as of both November 2, 2017, and December 31, 2017, which is equal to the amount of CFC2's post-1986 earnings and profits of 100u. CFC2's accumulated post-1986 deferred foreign income is equal to its post-1986 earnings and profits because CFC2 does not have earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1, or that, if distributed, would be excluded from the gross income of a

United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder, and therefore no adjustment is made under section 965(d)(2) or § 1.965-1(f)(7). But for § 1.965-4(f), CFC2's post-1986 earnings and profits as of December 31, 2017, would be 0u, but because the distribution to CFC1 is a specified payment, it is disregarded in determining CFC2's post-1986 earnings and profits as of December 31, 2017, under § 1.965-4(f).

(3) *Effect on earnings and profits described in section 959(c)(2) and (3).* CFC1 and CFC2 increase their earnings and profits described in section 959(c)(2) by USP's section 965(a) inclusion amounts with respect to CFC1 and CFC2, 10u and 100u, respectively, and reduce their earnings and profits described in section 959(c)(3) by an equivalent amount.

(D) *Distributions—(1) Distribution that is a specified payment.* The distribution from CFC2 to CFC1 is recharacterized as a distribution of 100u out of the earnings and profits of CFC2 described in section 959(c)(2), which include earnings and profits attributable to the section 965(a) inclusion amount taken into account by USP.

(2) *Distribution to United States shareholder.* The distribution from CFC1 to USP is treated as a distribution of 10u out of the earnings and profits of CFC1 described in section 959(c)(2), which include earnings and profits attributable to the section 965(a) inclusion amount taken into account by USP.

(E) *Section 902 and section 960 consequences.* Under section 960, USP is deemed to pay \$10x ($\$10x \times (100u/100u)$) of CFC2's post-1986 foreign income taxes as a result of its section 965(a) inclusion with respect to CFC2 and \$2x ($\$2x \times (10u/10u)$) of CFC1's post-1986 foreign income taxes as a result of its section 965(a) inclusion with respect to CFC1. Such taxes are subject to the applicable percentage disallowance under section 965(g).

(5) *Example 5. Determination of accumulated post-1986 deferred foreign income with section 951(a)(1)(B) inclusion after E&P measurement date on November 2, 2017—(i) Facts.* USP, a domestic corporation, owns all of the stock of CFC, a foreign corporation. USP has a taxable year ending December 31, 2017, and

CFC has a taxable year ending November 30, 2017. As of December 1, 2016, CFC has 110u of earnings and profits described in section 959(c)(3) that were accumulated in taxable years beginning after December 31, 1986, while CFC was a specified foreign corporation. CFC holds 150u of United States property throughout its taxable year ending November 30, 2017, but disposes of it on December 1, 2017, recognizing no gain or loss on the property. Between December 1, 2017, and December 31, 2017, CFC earns an additional 10u of income that does not constitute subpart F income or income treated as effectively connected with the conduct of a trade or business within the United States that gives rise to 10u of earnings and profits. USP includes in income all amounts that it is required to include under section 951.

(ii) *Analysis—(A) Section 965(a) inclusion amount.* USP determines whether CFC is a deferred foreign income corporation, and, if so, determines its section 965(a) inclusion amount with respect to CFC. CFC is a specified foreign corporation, and CFC has accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date. Accordingly, CFC is a deferred foreign income corporation. USP's section 965(a) inclusion amount with respect to CFC equals the section 965(a) earnings amount of CFC.

(1) *CFC section 965(a) earnings amount.* The section 965(a) earnings amount with respect to CFC is 110u, the greater of the amount of its accumulated post-1986 deferred foreign income as of November 2, 2017, which is 110u, and the amount of its accumulated post-1986 deferred foreign income as of December 31, 2017, which is 10u. CFC's accumulated post-1986 deferred foreign income as of November 2, 2017, is equal to its 110u of post-1986 earnings and profits, which are not reduced by the 110u of earnings and profits described in section 959(c)(1) as a result of USP's section 951(a)(1)(B) inclusion with respect to CFC as of December 31, 2017, because such amounts would not be excluded from the gross income of a United States shareholder under section 959 under section 965(d)(2) or § 1.965-1(f)(7) if distributed on November 2, 2017. CFC's accumulated post-1986 deferred foreign

income as of December 31, 2017, is equal to its 120u of post-1986 earnings and profits reduced by the 110u of earnings and profits described in section 959(c)(1) as a result of USP's section 951(a)(1)(B) inclusion with respect to CFC as of December 31, 2017, which would be excluded from the gross income of a United States shareholder under section 959 under section 965(d)(2) or § 1.965-1(f)(7) if distributed on December 31, 2017.

(2) *Effect on earnings and profits described in section 959(c)(2) and (3).* In USP's taxable year ending December 31, 2018, CFC increases its earnings and profits described in section 959(c)(2) by USP's section 965(a) inclusion amount with respect to CFC, 110u, and reduces its earnings and profits described in section 959(c)(3) by an equivalent amount.

(B) *Section 956 inclusion.* In USP's taxable year ending December 31, 2017, USP increases its earnings and profits described in section 959(c)(1) by USP's amount included under sections 951(a)(1)(B) and 956 with respect to CFC, 110u, and reduces its earnings and profits described in section 959(c)(3) by an equivalent amount.

(6) *Example 6. Section 1248 inclusion—*
 (i) *Facts.* USP1, a domestic corporation, owns all of the stock of CFC, a foreign corporation, until it sells all of such stock to USP2, a domestic corporation, on December 1, 2017, in a sale on which USP1 recognizes \$100x of gain. Throughout 2017, 1u=\$1x. USP1, USP2, and CFC all have taxable years ending December 31, 2017. As of January 1, 2017, CFC has 100u of earnings and profits described in section 959(c)(3) that were accumulated in taxable years beginning after December 31, 1986, while CFC was wholly owned by USP1. On March 1, 2017, CFC distributes 20u to USP1. None of CFC's earnings and profits are attributable to income treated as effectively connected with the conduct of a trade or business within the United States. USP2 does not have an aggregate foreign E&P deficit. USP1 and USP2 include in income all amounts that they are required to include under sections 951 and 1248.

(ii) *Analysis—*(A) *Adjustments to section 959(c) classification of earnings and profits for section 1248 inclusion.* USP1's

inclusion under section 1248 with respect to CFC is \$80x (\$100x-\$20x). As a result of the inclusion under section 1248, under section 959(e), CFC increases its earnings and profits described in section 959(c)(2) by 80u.

(B) *Section 965(a) inclusion amount.* USP2 determines whether CFC is a deferred foreign income corporation and, if so, determines its section 965(a) inclusion amount with respect to CFC. CFC is a specified foreign corporation, and CFC has accumulated post-1986 deferred foreign income greater than zero as of an E&P measurement date. Accordingly, CFC is a deferred foreign income corporation. USP2's section 965(a) inclusion amount with respect to CFC equals the section 965(a) earnings amount of CFC. The section 965(a) earnings amount with respect to CFC is 20u, the amount of its accumulated post-1986 deferred foreign income as of both November 2, 2017, and December 31, 2017, which is equal to 100u of post-1986 earnings and profits reduced by 80u of such post-1986 earnings and profits described in section 959(c)(2) under section 965(d)(2)(B) and § 1.965-1(f)(7)(i)(B). CFC increases its earnings and profits described in section 959(c)(2) by USP2's section 965(a) inclusion amount with respect to CFC, 20u, and reduces its earnings and profits that would be described in section 959(c)(3) but for the application of section 965(a) by an equivalent amount.

(C) *Distributions to United States shareholders.* The distributions from CFC to USP1 (including the deemed dividend under section 1248) are treated as distributions out of the earnings and profits of CFC described in section 959(c)(3).

(7) *Example 7. Distribution attributable to section 965(a) previously taxed earnings and profits—*(i) *Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a specified foreign corporation that has no post-1986 earnings and profits (or deficit in post-1986 earnings and profits), and CFC1 owns all the stock of CFC2, a deferred foreign income corporation. USP is a calendar year taxpayer. CFC1's last taxable year beginning before January 1, 2018, ends on November 30, 2018; CFC2 has an inclusion year that ends on November 30, 2018. The functional currency of CFC1 and CFC2 is the U.S. dollar. USP's adjusted

basis in the stock of CFC1 is zero. On January 1, 2018, CFC2 distributes \$100x to CFC1, and CFC1 distributes \$100x to USP. USP has a section 965(a) inclusion amount of \$100x with respect to CFC2 that is taken into account for USP's taxable year ending December 31, 2018. CFC2 has no earnings and profits described in section 959(c)(1) or (2) other than section 965(a) previously taxed earnings and profits.

(ii) *Analysis.* Under paragraph (c) of this section, CFC2 has \$100x of section 965(a) previously taxed earnings and profits with respect to USP. USP receives a distribution from CFC2 through a chain of ownership described in section 958(a) during the inclusion year of CFC2 that is attributable to the \$100x of section 965(a) previously taxed earnings and profits of CFC2. Under paragraph (g)(1) of this section, the amount of gain that USP otherwise would recognize with respect to the stock of CFC1 under section 961(b)(2) is reduced (but not below zero) by \$100x, the amount of CFC2's section 965(a) previously taxed earnings and profits with respect to USP. As of the close of November 30, 2018, USP's basis in CFC1 is increased under paragraph (e) of this section by USP's section 965(a) inclusion amount with respect to CFC2 (\$100x), and is reduced under paragraph (g)(2) of this section by the amount of gain that would have been recognized by USP under section 961(b)(2) but for the application of paragraph (g)(1) of this section (\$100x).

(8) *Example 8. Distribution attributable to section 965(b) previously taxed earnings and profits; parent-subsidiary—(i) Facts.* The facts are the same as in paragraph (j)(7)(i) of this section (the facts in *Example 7*), except that CFC1 has a specified E&P deficit of \$100x. Because of the specified E&P deficit of CFC1, USP's section 965(a) inclusion amount with respect to CFC2 is reduced to zero pursuant to section 965(b)(1) and § 1.965-1(b)(2). USP makes the election described in paragraph (f)(2) of this section.

(ii) *Analysis—(A) Application of the gain reduction rule.* Under paragraph (d)(1) of this section, CFC2 has \$100x of section 965(b) previously taxed earnings and profits with respect to USP, and, under paragraph (d)(2) of this section,

CFC1's earnings and profits described in section 959(c)(3) are increased by \$100x to \$0. USP receives a distribution from CFC2 through a chain of ownership described in section 958(a) during the inclusion year of CFC2 that is attributable to the \$100x of section 965(b) previously taxed earnings and profits of CFC2. Under paragraph (g)(1) of this section, the amount of gain that USP otherwise would recognize with respect to the stock of CFC1 under section 961(b)(2) is reduced (but not below zero) by \$100x, the amount of CFC2's section 965(b) previously taxed earnings and profits with respect to USP under paragraph (d)(1) of this section.

(B) *Adjustments to the basis of CFC1.* Because USP makes the election described in paragraph (f)(2) of this section, as of the close of November 30, 2018, USP's basis in CFC1 is increased under paragraph (f)(2)(ii)(A) of this section by an amount equal to CFC2's section 965(b) previously taxed earnings and profits with respect to USP under paragraph (d)(1) of this section (\$100x), reduced under paragraph (f)(2)(ii)(B) of this section by an amount equal to the portion of the specified E&P deficit of CFC1 taken into account in determining USP's section 965(a) inclusion amount with respect to CFC2 (\$100x), and reduced under paragraph (g)(2) of this section by the amount of gain that would have been recognized by USP with respect to the stock of CFC1 under section 961(b)(2) but for the application of paragraph (g)(1) of this section (\$100x). Under paragraph (h)(2) and (3) of this section, the excess of the net reduction from the adjustments under paragraphs (f) and (g) of this section over USP's basis in the stock of CFC1 (in this case, \$100x) is treated as gain recognized by USP from the sale or exchange of property.

(9) *Example 9. Distribution attributable to section 965(b) previously taxed earnings and profits; brother-sister—(i) Facts.* The facts are the same as in paragraph (j)(8)(i) of this section (the facts in *Example 8*), except that USP owns all the stock of CFC2, USP's adjusted basis in the stock of CFC2 is zero, CFC1 made no distributions, and on January 1, 2018, CFC2 distributes \$100x to USP.

(ii) *Analysis—(A) Application of the gain reduction rule.* Under paragraph

(d)(1) of this section, CFC2 has \$100x of section 965(b) previously taxed earnings and profits with respect to USP, and, under paragraph (d)(2) of this section, CFC1's earnings and profits described in section 959(c)(3) (deficit of \$100x) are increased by \$100x to \$0. USP receives a distribution from CFC2 during the inclusion year of CFC2 that is attributable to the \$100x of section 965(b) previously taxed earnings and profits of CFC2. Under paragraph (g)(1) of this section, the amount of gain that USP otherwise would recognize with respect to the stock of CFC2 under section 961(b)(2) is reduced (but not below zero) by \$100x, the amount of CFC2's section 965(b) previously taxed earnings and profits with respect to USP under paragraph (d)(1) of this section.

(B) *Adjustments to the basis of CFC1 and CFC2.* Because USP makes the election described in paragraph (f)(2) of this section, as of the close of November 30, 2018, USP's basis in the stock of CFC2 is increased under paragraph (f)(2)(ii)(A) of this section by the amount of CFC2's section 965(b) previously taxed earnings and profits with respect to USP under paragraph (d)(1) of this section (\$100x) and reduced under paragraph (g)(2) of this section by the amount of gain that would have been recognized by USP with respect to the stock of CFC2 under section 961(b)(2) but for the application of paragraph (g)(1) of this section (\$100x). As of the close of November 30, 2018, USP's basis in CFC1 is reduced under paragraph (f)(2)(ii)(B) of this section by an amount equal to the portion of USP's pro rata share of the specified E&P deficit of CFC1 taken into account in determining USP's section 965(a) inclusion amount with respect to CFC2 (\$100x). Under paragraph (h)(3) of this section, the excess of the reduction under paragraph (f) of this section over USP's basis in the stock of CFC1 (in this case, \$100x) is treated as gain recognized by USP from the sale or exchange of property.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9846, 84 FR 14260, Apr. 10, 2019]

§ 1.965-3 Section 965(c) deductions.

(a) *Scope.* This section provides rules regarding section 965(c) deductions and section 965(c) deduction amounts. Para-

graph (b) of this section provides rules for disregarding certain assets for purposes of determining the aggregate foreign cash position of a section 958(a) U.S. shareholder. Paragraph (c) of this section provides rules for determining the aggregate foreign cash position for a section 958(a) U.S. shareholder inclusion year. Paragraph (d) of this section provides a rule regarding certain expatriated entities. Paragraph (e) of this section provides a rule for the treatment of section 965(c) deductions in connection with an election under section 962. Paragraph (f) of this section provides rules regarding the treatment of a section 965(c) deduction under certain provisions of the Internal Revenue Code. Paragraph (g) of this section provides a rule for domestic pass-through entities.

(b) *Rules for disregarding certain assets for determining aggregate foreign cash position—(1) Disregard of certain obligations between related specified foreign corporations.* In determining the aggregate foreign cash position of a section 958(a) U.S. shareholder, any account receivable, account payable, short-term obligation, or derivative financial instrument between a specified foreign corporation with respect to which the section 958(a) U.S. shareholder owns section 958(a) stock and a related specified foreign corporation on corresponding cash measurement dates is disregarded to the extent of the smallest of the product of the amount of the item on such corresponding cash measurement dates of each specified foreign corporation and the section 958(a) U.S. shareholder's ownership percentage of section 958(a) stock of the specified foreign corporation owned by the section 958(a) U.S. shareholder on such dates. For purposes of this paragraph (b)(1)(i), a specified foreign corporation is treated as a related specified foreign corporation with respect to another specified foreign corporation if, as of the cash measurement date referred to in the preceding sentence of each specified foreign corporation, the specified foreign corporations are related persons within the meaning of section 954(d)(3), substituting the term "specified foreign corporation" for "controlled foreign corporation" in each place that it appears.

(2) *Disregard of other assets upon demonstration of double-counting.* For purposes of determining the aggregate foreign cash position of a section 958(a) U.S. shareholder, the section 958(a) U.S. shareholder's pro rata share of the cash position of a specified foreign corporation on a cash measurement date is reduced by amounts of net accounts receivable, actively traded property, and short-term obligations to the extent such amounts are attributable to amounts taken into account in determining the section 958(a) U.S. shareholder's pro rata share of the cash position of another specified foreign corporation on the corresponding cash measurement date of such other specified corporation and to the extent not disregarded pursuant to paragraph (b)(1) of this section. However, the preceding sentence applies only if the section 958(a) U.S. shareholder attaches a statement containing the information outlined in paragraphs (b)(2)(i) through (v) of this section to its timely filed return (taking into account extensions, if any) for the section 958(a) U.S. shareholder inclusion year, or, if the section 958(a) U.S. shareholder has multiple section 958(a) U.S. shareholder inclusion years, the later of such years. Relief is not available under § 301.9100-2 or 301.9100-3 to allow late filing of the statement. The statement must contain the following information with respect to each specified foreign corporation for which the cash position is reduced under this paragraph (b)(2)—

(i) A description of the asset that would be taken into account with respect to both specified foreign corporations,

(ii) A statement of the amount by which its pro rata share of the cash position of one specified foreign corporation is reduced,

(iii) A detailed explanation of why there would otherwise be double-counting, including the computation of the amount taken into account with respect to the other specified foreign corporation, and

(iv) An explanation of why paragraph (b)(1) of this section does not apply to disregard such amount.

(3) *Disregard of portion of cash position of noncorporate entities treated as specified foreign corporations.* If an entity is

treated as a specified foreign corporation of a section 958(a) U.S. shareholder pursuant to section 965(c)(3)(E), for purposes of determining the aggregate foreign cash position of the section 958(a) U.S. shareholder, the section 958(a) U.S. shareholder's pro rata share of the cash position of the entity (determined taking into account paragraphs (b)(1) and (b)(2) of this section) is reduced by the amount of the pro rata share attributable to deemed stock of the entity not owned (within the meaning of section 958(a), applied by treating domestic pass-through entities as foreign) by a specified foreign corporation of the section 958(a) U.S. shareholder (determined without taking into account section 965(c)(3)(E)).

(4) *Examples.* The following examples illustrate the application of this paragraph (b).

(i) *Example 1—(A) Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation. CFC1 owns 95% of the only class of stock of CFC2, also a foreign corporation, and 40% of the only class of stock of CFC3, also a foreign corporation. The remaining 5% of the only class of stock of CFC2 is owned by a person unrelated to USP, CFC1, and CFC2; and the remaining 60% of the only class of stock of CFC3 is owned by a person unrelated to USP and CFC1. USP, CFC1, and CFC3 have calendar year taxable years. CFC2 has a taxable year ending on November 30. On November 15, 2015, CFC1 makes a loan of \$100x to CFC2, which is required to be and is, in fact, repaid on January 1, 2016. On November 15, 2016, CFC2 sells inventory to CFC1 in exchange for an account receivable of \$200x, which is required to be and is, in fact, repaid on December 15, 2016. On August 1, 2017, CFC1 makes a loan of \$300x to CFC3, which is required to be and is, in fact, repaid on January 31, 2018.

(B) *Analysis—(1) Loan from CFC1 to CFC2.* For purposes of determining the aggregate foreign cash position of USP, a section 958(a) U.S. shareholder of CFC1, under paragraph (b)(1) of this section, because CFC1 and CFC2 are related within the meaning of paragraph

(b)(1) of this section, the short-term obligation of CFC2 held by CFC1 outstanding on the first cash measurement date of each specified foreign corporation, November 30, 2015, and December 31, 2015, respectively, is disregarded to the extent of 95%, the smallest ownership percentage of section 958(a) stock of CFC1 and CFC2 owned by USP on such first cash measurement dates. Accordingly, USP only takes into account \$5 (\$100-95% of \$100) of the short-term obligation in determining CFC1's cash position for purposes of determining its aggregate foreign cash position.

(2) *Account receivable of CFC1 held by CFC2.* Because the account receivable of CFC1 held by CFC2 on its second cash measurement date, November 30, 2016, is not outstanding on CFC1's second cash measurement date, December 31, 2016, paragraph (b)(1) of this section does not apply to disregard any portion of such account receivable.

(3) *Loan from CFC1 to CFC3.* Because CFC3 is not related to CFC1 within the meaning of paragraph (b)(1) of this section, paragraph (b)(1) of this section does not apply to disregard any portion of such short-term obligation.

(ii) *Example 2—(A) Facts.* The facts are the same as in paragraph (b)(4)(i)(A) of this section (the facts in *Example 1*), except that on December 1, 2015, CFC1 sells 5% of the stock of CFC2 to an unrelated person.

(B) *Analysis.* The analysis is the same as in paragraph (b)(4)(i)(B) of this section (the analysis in *Example 1*), except that the short-term obligation of CFC2 held by CFC1 outstanding on both of their first cash measurement dates, November 30, 2015, and December 31, 2015, respectively, is disregarded under paragraph (b)(1) of this section to the extent of 90%, the smallest ownership percentage of section 958(a) stock of CFC1 and CFC2 by USP on such first cash measurement dates. Accordingly, USP takes into account \$10 (\$100-90% of \$100) of the short-term obligation in determining CFC1's cash position for purposes of determining its aggregate foreign cash position.

(iii) *Example 3—(A) Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation, which owns 45% of the only class of

stock of CFC2, also a foreign corporation. The remainder of the CFC2 stock is actively traded on an established financial market but is not owned by any person related to USP or CFC1. USP, CFC1, and CFC2 have calendar year taxable years. The value of the CFC2 stock owned by CFC1 is \$500x on each of the cash measurement dates. Also on each of the cash measurement dates, CFC2 has \$300x of assets described in section 965(c)(3)(B) and § 1.965-1(f)(16) that are taken into account in determining its cash position.

(B) *Analysis.* For purposes of determining USP's aggregate foreign cash position, USP's pro rata share of the cash position of CFC1 on each cash measurement date may be reduced by the amount of the stock of CFC2 to the extent attributable to amounts taken into account in determining USP's pro rata share of the cash position of CFC2 on such cash measurement date (that is, to the extent of the \$135x taken into account with respect to CFC2), provided USP attaches a statement to its timely filed return (taking into account extensions, if any) containing the following: A description of the CFC2 stock and the assets of CFC2 taken into account in determining its cash position; a statement that USP's pro rata share of the cash position of CFC1 is being reduced by \$135x; the computation of the \$135x taken into account with respect to CFC2; and an explanation of why paragraph (b)(1) of this section does not apply to disregard such amount.

(iv) *Example 4—(A) Facts.* USP, a domestic corporation, owns all of the stock of CFC1 and CFC2, each a foreign corporation. USP, CFC1, and CFC2 have calendar year taxable years. CFC1 buys goods on credit from a third party for \$100x and thus has an account payable of \$100x. CFC1 modifies the goods and sells to CFC2 for \$105x in exchange for an account receivable of \$105x. CFC2 modifies the goods and sells to another third party for \$110x in exchange for an account receivable of \$110x. All of the accounts payable and accounts receivable are outstanding on the final cash measurement date.

(B) *Analysis.* For purposes of determining USP's aggregate foreign cash

position, on the final cash measurement date, CFC1 has net accounts receivable of \$0 because, pursuant to paragraph (b)(1) of this section, CFC1's account receivable from CFC2 is disregarded, and CFC2 has net accounts receivable of \$110x because, pursuant to paragraph (b)(1) of this section, CFC2's account payable to CFC1 is disregarded. USP cannot rely on the rule in paragraph (b)(2) of this section because no amounts attributable to CFC2's net accounts receivable are taken into account with respect to another specified foreign corporation.

(v) *Example 5—(A) Facts.* USP, a domestic corporation, owns all of the stock of CFC1 and CFC2, each a foreign corporation. USP and CFC1 own 60% and 40%, respectively, of the interests in the capital and profits of PS1, a partnership. PS1 and CFC2 own 70% and 30%, respectively, of the interests in the capital and profits of PS2, a partnership. On each cash measurement date, PS1's cash position of \$100x consists entirely of cash, and PS2's cash position of \$200x includes a \$50x short-term obligation of CFC2.

(B) *Analysis—(1) Treatment of PS1.* Because an interest in PS1 is held by CFC1, a specified foreign corporation of USP, and PS1 would be a specified foreign corporation of USP if it were a foreign corporation, PS1 is treated as a specified foreign corporation of USP for purposes of determining USP's aggregate foreign cash position. Without regard to paragraph (b)(3) of this section, USP must take into account \$100x, its pro rata share of PS1's cash position, for purposes of determining its aggregate foreign cash position. However, 60% of that amount is attributable to deemed stock of PS1 that is not owned (within the meaning of section 958(a)) by a specified foreign corporation of USP. Accordingly, pursuant to paragraph (b)(3) of this section, the amount of PS1's cash position that USP must take into account for purposes of determining its aggregate foreign cash position is reduced by \$60x (60% of \$100x) to \$40x (\$100x - \$60x).

(2) *Treatment of PS2.* Because an interest in PS2 is held by CFC2, a specified foreign corporation of USP, and PS2 would be a specified foreign corporation of USP if it were a foreign

corporation, PS2 is treated as a specified foreign corporation of USP for purposes of determining USP's aggregate foreign cash position. USP, CFC1, CFC2, PS1, and PS2 all have calendar year taxable years. For purposes of determining the aggregate foreign cash position of USP, a section 958(a) U.S. shareholder of PS2, under paragraph (b)(1) of this section, the short-term obligation of CFC2 held by PS2 outstanding on each cash measurement date of each specified foreign corporation is disregarded on such cash measurement dates. Accordingly, without regard to paragraph (b)(3) of this section, USP must take into account \$150x (\$200x - \$50x) of PS2's cash position for purposes of determining its aggregate foreign cash position. However, 42% (60% × 70%) of that amount is attributable to deemed stock of PS2 that is not owned (within the meaning of section 958(a), applied by treating PS1 as foreign if it is a domestic pass-through entity) by a specified foreign corporation of USP (determined without taking into account section 965(c)(3)(E)). Accordingly, pursuant to paragraph (b)(3) of this section, the amount of PS2's cash position that USP must take into account for purposes of determining its aggregate foreign cash position is reduced by \$63x (42% of \$150x) to \$87x (\$150x - \$63x).

(c) *Determination of aggregate foreign cash position for a section 958(a) U.S. shareholder inclusion year—(1) Single section 958(a) U.S. shareholder inclusion year.* If a section 958(a) U.S. shareholder has a single section 958(a) U.S. shareholder inclusion year, then the section 958(a) U.S. shareholder's aggregate foreign cash position for the section 958(a) U.S. shareholder inclusion year is equal to the aggregate foreign cash position of the section 958(a) U.S. shareholder.

(2) *Multiple section 958(a) U.S. shareholder inclusion years.* If a section 958(a) U.S. shareholder has multiple section 958(a) U.S. shareholder inclusion years, then the section 958(a) U.S. shareholder's aggregate foreign cash position for each section 958(a) U.S. shareholder inclusion year is determined by allocating the aggregate foreign cash

position to a section 958(a) U.S. shareholder inclusion year under paragraphs (c)(2)(i) and (c)(2)(ii) of this section.

(i) *Allocation to first section 958(a) U.S. shareholder inclusion year.* A portion of the aggregate foreign cash position of the section 958(a) U.S. shareholder is allocated to the first section 958(a) U.S. shareholder inclusion year in an amount equal to the lesser of the section 958(a) U.S. shareholder's aggregate foreign cash position or the section 958(a) U.S. shareholder's aggregate section 965(a) inclusion amount for the section 958(a) U.S. shareholder inclusion year.

(ii) *Allocation to succeeding section 958(a) U.S. shareholder inclusion years.* The amount of the section 958(a) U.S. shareholder's aggregate foreign cash position allocated to any succeeding section 958(a) U.S. shareholder inclusion year equals the lesser of the excess, if any, of the section 958(a) U.S. shareholder's aggregate foreign cash position over the aggregate amount of its aggregate foreign cash position allocated to preceding section 958(a) U.S. shareholder inclusion years under paragraph (c)(2)(i) of this section and this paragraph (c)(2)(ii) or the section 958(a) U.S. shareholder's aggregate section 965(a) inclusion amount for such succeeding section 958(a) U.S. shareholder inclusion year.

(3) *Estimation of aggregate foreign cash position.* For purposes of determining the aggregate foreign cash position of a section 958(a) U.S. shareholder, the section 958(a) U.S. shareholder may assume that its pro rata share of the cash position of any specified foreign corporation whose last taxable year beginning before January 1, 2018, ends after the date the return for such section 958(a) U.S. shareholder inclusion year (the *estimated section 958(a) U.S. shareholder inclusion year*) is timely filed (taking into account extensions, if any) is zero as of the cash measurement date with which the taxable year of such specified foreign corporation ends. If a section 958(a) U.S. shareholder's pro rata share of the cash position of a specified foreign corporation is treated as zero pursuant to the preceding sentence, the amount described in § 1.965-1(f)(8)(i)(A) with respect to such section 958(a) U.S. shareholder in fact exceeds

the amount described in § 1.965-1(f)(8)(i)(B) with respect to such section 958(a) U.S. shareholder, and the aggregate section 965(a) inclusion amount for the estimated section 958(a) U.S. shareholder inclusion year exceeds the amount described in § 1.965-1(f)(8)(i)(B) with respect to such section 958(a) U.S. shareholder, interest and penalties will not be imposed if such section 958(a) U.S. shareholder amends the return for the estimated section 958(a) U.S. shareholder inclusion year to account for the correct aggregate foreign cash position for the year. The amended return must be filed by the due date (taking into account extensions, if any) for the return for the year after the estimated section 958(a) U.S. shareholder inclusion year.

(4) *Examples.* The following examples illustrate the application of this paragraph (c).

(i) *Example 1. Estimation of aggregate foreign cash position for a section 958(a) U.S. shareholder inclusion year—(A) Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation, which owns all of the stock of CFC2, also a foreign corporation. USP is a calendar year taxpayer. CFC1 has a taxable year ending on December 31, and CFC2 has a taxable year ending on November 30. The cash position of CFC1 on each of December 31, 2015, December 31, 2016, and December 31, 2017, is \$100x. The cash position of CFC2 on each of November 30, 2015, and November 30, 2016, is \$200x. USP has a section 965(a) inclusion amount of \$300x with respect to CFC1.

(B) *Analysis.* In determining its aggregate foreign cash position for its 2017 taxable year, USP may assume that its pro rata share of the cash position of CFC2 will be zero as of November 30, 2018, for purposes of filing its return due on April 18, 2018 (or due on October 15, 2018, with extension). Therefore, USP's aggregate foreign cash position is treated as \$300x, which is the greater of (a) \$300x, 50% of the sum of USP's pro rata shares of the cash position of CFC1 as of December 31, 2015, and December 31, 2016, and of the cash position of CFC2 as of November 30, 2015, and November 30, 2016, and (b) \$100x, USP's pro rata share of the cash position of CFC1 as of December 31,

2017. If USP's pro rata share of the cash position of CFC2 as of November 30, 2018, in fact exceeds \$200x, USP must amend its return for its 2017 taxable year to reflect the correct aggregate foreign cash position by the due date for its return for its 2018 taxable year, April 15, 2019 (or October 15, 2019, with extension).

(ii) *Example 2. Allocation of aggregate foreign cash position among section 958(a) U.S. shareholder inclusion years—(A) Facts.* The facts are the same as in paragraph (c)(4)(i)(A) of this section (the facts in *Example 1*), except that the cash position of each of CFC1 and CFC2 on all relevant cash measurement dates is \$200x, with the result that USP has an aggregate foreign cash position determined under § 1.965-1(f)(8)(i) of \$400x. For its 2017 taxable year, USP has a section 965(a) inclusion amount with respect to CFC1 of \$300x, and for its 2018 taxable year, USP has a section 965(a) inclusion amount with respect to CFC2 of \$300x.

(B) *Analysis.* Under paragraph (c)(2)(i) of this section, USP's aggregate foreign cash position for 2017 is \$300x, which is the lesser of USP's aggregate foreign cash position determined under § 1.965-1(f)(8)(i) (\$400x) or the section 965(a) inclusion amount (\$300x) that USP takes into account in 2017. Under paragraph (c)(2)(ii) of this section, the amount of USP's aggregate foreign cash position for 2018 is \$100x, USP's aggregate foreign cash position determined under § 1.965-1(f)(8)(i) (\$400x) reduced by the amount of its aggregate foreign cash position for 2017 (\$300x) under paragraph (c)(2)(i) of this section.

(d) *Increase of income by section 965(c) deduction of an expatriated entity—(1) In general.* If a person is allowed a section 965(c) deduction and the person (or a successor) first becomes an expatriated entity, with respect to a surrogate foreign corporation, at any time during the 10-year period beginning on December 22, 2017, then the tax imposed by chapter 1 of the Internal Revenue Code is increased for the first taxable year in which such person becomes an expatriated entity by an amount equal to 35 percent of the person's section 965(c) deductions, and no credits are allowed against such increase in tax. The preceding sentence applies only if the sur-

rogate foreign corporation first becomes a surrogate foreign corporation on or after December 22, 2017.

(2) *Definition of expatriated entity.* For purposes of paragraph (d)(1) of this section, the term *expatriated entity* has the same meaning given such term under section 7874(a)(2), except that such term does not include an expatriated entity if the surrogate foreign corporation with respect to the expatriated entity is treated as a domestic corporation under section 7874(b).

(3) *Definition of surrogate foreign corporation.* For purposes of paragraph (d)(1) of this section, the term *surrogate foreign corporation* has the meaning given such term in section 7874(a)(2)(B).

(e) *Section 962 election—(1) In general.* In the case of an individual (including a trust or estate) that makes an election under section 962, any section 965(c) deduction taken into account under § 1.962-1(b)(1)(i)(B) in determining taxable income as used in section 11 is not taken into account for purposes of determining the individual's taxable income under section 1.

(2) *Example.* The following example illustrates the application of the rule in this paragraph (e).

(i) *Facts.* USI, a United States citizen, owns 10% of the capital and profits of USPRS, a domestic partnership that has a calendar year taxable year, the remainder of which is owned by foreign persons unrelated to USI or USPRS. USPRS owns all of the stock of FS, a foreign corporation that is a controlled foreign corporation with a calendar year taxable year. USPRS has a section 965(a) inclusion amount with respect to FS of \$1,000x and has a section 965(c) deduction amount of \$700x. FS has no post-1986 foreign income taxes. USI makes a valid election under section 962 for 2017.

(ii) *Analysis.* USI's "taxable income" described in § 1.962-1(b)(1)(i) equals \$100x (USI's domestic pass-through owner share of USPRS's section 965(a) inclusion amount) minus \$70x (USI's domestic pass-through owner share of USPRS's section 965(c) deduction amount), or \$30x. No other deductions are allowed in determining this amount. USI's tax on the \$30x section 965(a) inclusion will be equal to the tax that would be imposed on such amount

under section 11 if USI were a domestic corporation. Under paragraph (e)(1) of this section, USI cannot deduct \$70x for purposes of determining USI's taxable income that is subject to tax under section 1.

(f) *Treatment of section 965(c) deduction under certain provisions of the Internal Revenue Code—(1) Sections 62(a) and 63(d).* A section 965(c) deduction is treated as a deduction described in section 62(a) and is not treated as an itemized deduction for any purpose of the Internal Revenue Code.

(2) *Sections 705, 1367, and 1368—(i) Adjustments to basis.* In the case of a domestic partnership or S corporation—

(A) The aggregate amount of its section 965(a) inclusions net of the aggregate amount of its section 965(c) deductions is treated as a separately stated item of net income solely for purposes of calculating basis under section 705(a) and § 1.705-1(a) and section 1367(a)(1) and § 1.1367-1(f), and

(B) The aggregate amount of its section 965(a) inclusions equal to the aggregate amount of its section 965(c) deductions is treated as income exempt from tax solely for purposes of calculating basis under sections 705(a)(1)(B), 1367(a)(1)(A), and § 1.1367-1(f).

(ii) *S corporation accumulated adjustments account.* In the case of an S corporation, the aggregate amount of its section 965(a) inclusions equal to the aggregate amount of its section 965(c) deductions is treated as income not exempt from tax solely for purposes of determining whether an adjustment is made to an accumulated adjustments account under section 1368(e)(1)(A) and § 1.1368-2(a)(2).

(iii) *Example.* The following example illustrates the application of this paragraph (f)(2).

(A) *Facts.* USI, a United States citizen, owns all of the stock of S Corp, an S corporation, which owns all of the stock of FS, a foreign corporation. S Corp has a section 965(a) inclusion of \$1,000x with respect to FS and has a \$700x section 965(c) deduction.

(B) *Analysis.* As a result of the application of paragraph (f)(2)(i)(A) of this section, solely for purposes of calculating basis under section 1367(a)(1) and § 1.1367-1(f), USI treats as a separately stated item of net income \$300x (its pro

rata share of the net of S Corp's \$1,000x aggregate section 965(a) inclusion and S Corp's \$700x aggregate section 965(c) deduction). Accordingly, USI's basis in S Corp is increased under section 1367(a)(1) by \$300x. As a result of the application of paragraph (f)(2)(i)(B) of this section, an amount of S Corp's aggregate section 965(a) inclusion equal to its aggregate section 965(c) deduction, \$700x, is treated as tax exempt income solely for purposes of calculating basis under section 1367(a)(1)(A) and § 1.1367-1(f), and accordingly, USI's basis in S Corp is further increased by its pro rata share of such amount, \$700x. S Corp's accumulated adjustments account ("AAA") is increased under section 1368(e)(1)(A) by the \$1,000x section 965(a) inclusion taken into account and reduced by the \$700x section 965(c) deduction taken into account. In addition, as a result of the application of paragraph (f)(2)(ii) of this section, S Corp's AAA is further increased by an amount of S Corp's aggregate section 965(a) inclusion equal to its aggregate section 965(c) deduction, \$700x, which is not treated as tax-exempt income for purposes of § 1.1368-2(a)(2).

(3) *Section 1411.* For purposes of section 1411 and § 1.1411-4(f)(6), a section 965(c) deduction is not treated as being properly allocable to any section 965(a) inclusion.

(4) *Section 4940.* For purposes of section 4940(c)(3)(A), a section 965(c) deduction is not treated as an ordinary and necessary expense paid or incurred for the production or collection of gross investment income.

(g) *Domestic pass-through entities.* For purposes of determining a domestic pass-through owner share, a section 965(c) deduction amount of a domestic pass-through entity must be allocated to a domestic pass-through owner in the same proportion as an aggregate section 965(a) inclusion amount of the domestic pass-through entity for a section 958(a) U.S. shareholder inclusion year is allocated to the domestic pass-through owner.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019]

§ 1.965-4 Disregard of certain transactions.

(a) *Scope.* This section provides rules that disregard certain transactions for purposes of applying section 965 to a United States shareholder. Paragraph (b) of this section provides rules that disregard transactions undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder. Paragraph (c) of this section provides rules that disregard certain changes in method of accounting and entity classification elections that would otherwise change the amount of a section 965 element. Paragraph (d) of this section defines the term section 965 element. Paragraph (e) of this section provides rules of application concerning paragraphs (b) and (c) of this section. Paragraph (f) of this section provides rules that disregard certain transactions occurring between E&P measurement dates. Paragraph (g) of this section provides examples illustrating the application of this section.

(b) *Transactions undertaken with a principal purpose of changing the amount of a section 965 element—(1) General rule.* Except as otherwise provided in paragraph (e)(3) of this section, a transaction is disregarded for purposes of determining the amounts of all section 965 elements of a United States shareholder if each of the following conditions is satisfied with respect to any section 965 element of the United States shareholder—

(i) The transaction occurs, in whole or in part, on or after November 2, 2017 (the *specified date*);

(ii) The transaction is undertaken with a principal purpose of changing the amount of a section 965 element of the United States shareholder; and

(iii) The transaction would, without regard to this paragraph (b)(1), change the amount of the section 965 element of the United States shareholder.

(2) *Presumptions and exceptions for the application of the general rule—(i) Overview.* Under paragraphs (b)(2)(iii) through (v) of this section, certain transactions are presumed to be undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder for purposes of paragraph (b)(1) of this

section. The presumptions described in paragraphs (b)(2)(iii) through (v) of this section may be rebutted only if facts and circumstances clearly establish that the transaction was not undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder. A taxpayer that takes the position that the presumption is rebutted must attach a statement to its return for its taxable year in which or with which the relevant taxable year of the relevant specified foreign corporation ends disclosing that it has rebutted the presumption. In the case of a transaction described in paragraph (b)(2)(iii) or (iv) of this section, if the presumption does not apply because the transaction occurs in the ordinary course of business, whether the transaction was undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder must be determined under all the facts and circumstances. Under paragraphs (b)(2)(iii) through (v) of this section, certain transactions are treated per se as being undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder, and, therefore, such transactions are disregarded under paragraph (b)(1) of this section if the conditions of paragraphs (b)(1)(i) and (iii) of this section are satisfied. Further, under paragraph (b)(2)(iii) of this section, certain distributions are treated per se as not being undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder and therefore are not disregarded under paragraph (b)(1) of this section.

(ii) *Definitions—(A) Relatedness.* For purposes of paragraphs (b)(2)(iii) through (v) of this section, a person is treated as related to a United States shareholder if, either immediately before or immediately after the transaction (or series of related transactions), the person bears a relationship to the United States shareholder described in section 267(b) or section 707(b).

(B) *Transfer—(1) In general.* For purposes of paragraphs (b)(2)(iii) and (v) of this section, the term *transfer* includes any disposition of stock or property,

including a sale or exchange, contribution, distribution, issuance, redemption, recapitalization, or loan of stock or property, and includes an indirect transfer of stock or property.

(2) *Indirect transfer.* For purposes of paragraph (b)(2)(ii)(B)(1) of this section, the term *indirect transfer* includes a transfer of property or stock owned by an entity through a transfer of an interest in such entity (or an interest in an entity that has a direct or indirect interest in such entity), and a transfer of property or stock to a person through a transfer of property or stock to a pass-through entity of which such person is a direct or indirect owner.

(iii) *Cash reduction transactions—(A) General rule.* For purposes of paragraph (b)(1) of this section, a cash reduction transaction is presumed to be undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder. For this purpose, the term *cash reduction transaction* means a transfer of cash, accounts receivable, or cash-equivalent assets by a specified foreign corporation to a United States shareholder of the specified foreign corporation or a person related to a United States shareholder of the specified foreign corporation, or an assumption by a specified foreign corporation of an account payable of a United States shareholder of the specified foreign corporation or a person related to a United States shareholder of the specified foreign corporation, if such transfer or assumption would, without regard to paragraph (b)(1) of this section, reduce the aggregate foreign cash position of the United States shareholder. The presumption described in this paragraph (b)(2)(iii) does not apply to a cash reduction transaction that occurs in the ordinary course of business.

(B) *Per se rules for certain distributions.* Notwithstanding the presumption described in paragraph (b)(2)(iii)(A) of this section, except in the case of a specified distribution, a cash reduction transaction that is a distribution by a specified foreign corporation to a United States shareholder of the specified foreign corporation is treated per se as not being undertaken with a principal purpose of changing the amount

of a section 965 element of the United States shareholder for purposes of paragraph (b)(1) of this section. A specified distribution is treated per se as being undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder for purposes of paragraph (b)(1) of this section. For purposes of this paragraph (b)(2)(iii)(B), the term *specified distribution* means a cash reduction transaction that is a distribution by a specified foreign corporation of a United States shareholder if and to the extent that, at the time of the distribution, there was a plan or intention for the distributee to transfer cash, accounts receivable, or cash-equivalent assets to any specified foreign corporation of the United States shareholder or a distribution that is a non pro rata distribution to a foreign person that is related to the United States shareholder. For purposes of the preceding sentence, there is no plan or intention for the distributee to transfer cash, accounts receivable, or cash-equivalent assets to any specified foreign corporation of the United States shareholder if the transfer is pursuant to a legal obligation entered into before November 2, 2017. A taxpayer that takes the position that a cash reduction transaction is not a specified distribution because a transfer of cash, accounts receivable, or cash-equivalent asset is pursuant to a legal obligation entered into before November 2, 2017, must attach a statement to its return for its taxable year in which or with which the relevant taxable year of the relevant specified foreign corporation ends disclosing the position.

(iv) *E&P reduction transactions—(A) General rule.* For purposes of paragraph (b)(1) of this section, an E&P reduction transaction is presumed to be undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder. For purposes of this paragraph (b)(2)(iv), the term *E&P reduction transaction* means a transaction between a specified foreign corporation and any of a United States shareholder of the specified foreign corporation, another specified foreign corporation of a United States shareholder of the specified foreign corporation, or any person

related to a United States shareholder of the specified foreign corporation, if the transaction would, without regard to paragraph (b)(1) of this section, reduce either the accumulated post-1986 deferred foreign income or the post-1986 undistributed earnings (as defined in section 902(c)(1)) of the specified foreign corporation or another specified foreign corporation of any United States shareholder of such specified foreign corporation. The presumption described in this paragraph (b)(2)(iv)(A) does not apply to an E&P reduction transaction that occurs in the ordinary course of business.

(B) *Per se rule for specified transactions.* A specified transaction is treated per se as being undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder for purposes of paragraph (b)(1) of this section. For purposes of the preceding sentence, the term *specified transaction* means an E&P reduction transaction that involves one or more of the following: A complete liquidation of a specified foreign corporation to which section 331 applies; a sale or other disposition of stock by a specified foreign corporation; or a distribution by a specified foreign corporation that reduces the earnings and profits of the specified foreign corporation pursuant to section 312(a)(3).

(v) *Pro rata share transactions—(A) General rule.* For purposes of paragraph (b)(1) of this section, a pro rata share transaction is presumed to be undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder. For this purpose, the term *pro rata share transaction* means either a pro rata share reduction transaction or an E&P deficit transaction.

(1) *Definition of pro rata share reduction transaction.* For purposes of this paragraph (b)(2)(v)(A), the term *pro rata share reduction transaction* means a transfer of the stock of a specified foreign corporation by either a United States shareholder of the specified foreign corporation or a person related to a United States shareholder of the specified foreign corporation (including by the specified foreign corporation itself) to a person related to the United

States shareholder if the transfer would, without regard to paragraph (b)(1) of this section, reduce the United States shareholder's pro rata share of the section 965(a) earnings amount of the specified foreign corporation, reduce the United States shareholder's pro rata share of the cash position of the specified foreign corporation, or both.

(2) *Definition of E&P deficit transaction.* For purposes of this paragraph (b)(2)(v)(A), the term *E&P deficit transaction* means a transfer to either a United States shareholder or a person related to the United States shareholder of the stock of an E&P deficit foreign corporation by a person related to the United States shareholder (including by the E&P deficit foreign corporation itself) if the transfer would, without regard to paragraph (b)(1) of this section, increase the United States shareholder's pro rata share of the specified E&P deficit of the E&P deficit foreign corporation.

(B) *Per se rule for internal group transactions.* An internal group transaction is treated per se as being undertaken with a principal purpose of changing the amount of a section 965 element of a United States shareholder for purposes of paragraph (b)(1) of this section. For purposes of the preceding sentence, the term *internal group transaction* means a pro rata share transaction if, immediately before or after the transfer, the transferor of the stock of the specified foreign corporation and the transferee of such stock are members of an affiliated group in which the United States shareholder is a member. For this purpose, the term *affiliated group* has the meaning set forth in section 1504(a), determined without regard to paragraphs (1) through (8) of section 1504(b), and the term *members of an affiliated group* means entities included in the same affiliated group. For purposes of identifying an affiliated group and the members of such group, each partner in a partnership, as determined without regard to this sentence, is treated as holding its proportionate share of the stock held by the partnership, as determined under the rules and principles of sections 701 through 777, and if one or more members of an affiliated group

own, in the aggregate, at least 80 percent of the interests in a partnership's capital or profits, the partnership will be treated as a corporation that is a member of the affiliated group.

(C) *Example.* The following example illustrates the application of the rules in this paragraph (b)(2)(v).

(1) *Facts.* FP, a foreign corporation, owns all of the stock of USP, a domestic corporation. USP owns all of the stock of FS, a foreign corporation. USP has a calendar year taxable year; FS's taxable year ends November 30. On January 2, 2018, USP transfers all of the stock of FS to FP in exchange for cash. On January 3, 2018, FS makes a distribution with respect to the stock transferred to FP. USP treats the transaction as a taxable sale of the FS stock and claims a dividends received deduction under section 245A with respect to its deemed dividend under section 1248(j) as a result of the sale. FS has post-1986 earnings and profits as of December 31, 2017, and no post-1986 earnings and profits that are attributable to income effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1 or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959.

(2) *Analysis.* The transfer of the stock of FS is a pro rata share reduction transaction and thus a pro rata share transaction because such transfer is by USP, a United States shareholder, to FP, a person related to USP, and the transfer would, without regard to the rule in paragraph (b)(1) of this section, reduce USP's pro rata share of the section 965(a) earnings amount of FS. Because USP and FP are also members of an affiliated group within the meaning of paragraph (b)(2)(v)(B) of this section, the transfer of the stock of FS is also an internal group transaction and is treated per se as being undertaken with a principal purpose of changing the amount of a section 965 element of USP. Accordingly, because the transfer occurs after the specified date and reduces USP's section 965(a) inclusion amount with respect to FS, the transfer is disregarded for purposes of determining any section 965 element of USP with the result that, among other

things, USP's pro rata share of FS's section 965(a) earnings amount is determined as if USP owned (within the meaning of section 958(a)) 100% of the stock of FS on the last day of FS's inclusion year and no other person received a distribution with respect to such stock during such year. See section 951(a)(2)(A) and (B).

(c) *Disregard of certain changes in method of accounting and entity classification elections—(1) Changes in method of accounting.* Any change in method of accounting made for a taxable year of a specified foreign corporation that ends in 2017 or 2018 is disregarded for purposes of determining the amounts of all section 965 elements with respect to a United States shareholder if the change in method of accounting would, without regard to this paragraph (c)(1), change the amount of any section 965 element described in paragraph (d)(1) or (2) of this section with respect to the United States shareholder, or change the amount of the section 965 element described in paragraph (d)(3) of this section other than by reason of an increase in a section 965(a) inclusion amount with respect to the specified foreign corporation, regardless of whether the change in method of accounting is made with a principal purpose of changing the amount of a section 965 element with respect to the United States shareholder. The rule described in the preceding sentence applies regardless of whether the change in method of accounting was made in accordance with the procedures described in Rev. Proc. 2015-13, 2015-5 I.R.B. 419 (or successor), and regardless of whether the change in method of accounting was properly made, but it does not apply to a change in method of accounting for which the original and/or duplicate copy of any Form 3115, "Application for Change in Accounting Method," requesting the change was filed before the specified date (as defined in paragraph (b)(1) of this section).

(2) *Entity classification elections.* Except as otherwise provided in paragraph (e)(3) of this section, an election under §301.7701-3 to change the classification of an entity that is filed on or after the specified date (as defined in

paragraph (b)(1) of this section) is disregarded for purposes of determining the amounts of all section 965 elements of a United States shareholder if the election would, without regard to this paragraph (c)(2), change the amount of any section 965 element of the United States shareholder, regardless of whether the election is made with a principal purpose of changing the amount of a section 965 element of the United States shareholder. An election filed on or after the specified date is subject to the preceding sentence even if the election was filed with an effective date that is before the specified date.

(d) *Definition of a section 965 element.* For purposes of paragraphs (b) and (c) of this section, the term *section 965 element* means, with respect to a United States shareholder, any of the following amounts (collectively, *section 965 elements*)—

(1) The United States shareholder's section 965(a) inclusion amount with respect to a specified foreign corporation;

(2) The aggregate foreign cash position of the United States shareholder; or

(3) The amount of foreign income taxes of a specified foreign corporation deemed paid by the United States shareholder under section 960 as a result of a section 965(a) inclusion.

(e) *Rules for applying paragraphs (b) and (c) of this section—(1) Determination of whether there is a change in the amount of a section 965 element.* For purposes of paragraphs (b) and (c) of this section, there is a change in the amount of a section 965 element of a United States shareholder as a result of a transaction, change in accounting method, or election to change an entity's classification, if, without regard to paragraph (b)(1), (c)(1), or (c)(2) of this section, the transaction, change in accounting method, or change in entity classification would—

(i) Reduce the amount described in paragraph (d)(1) of this section,

(ii) Reduce the amount described in paragraph (d)(2) of this section, but only if such amount is less than the United States shareholder's aggregate section 965(a) inclusion amount, or

(iii) Increase the amount described in paragraph (d)(3) of this section.

(2) *Treatment of domestic pass-through owners as United States shareholders.* For purposes of paragraphs (b) and (c) of this section, if a domestic pass-through entity is a United States shareholder, then a domestic pass-through owner with respect to the domestic pass-through entity that is not otherwise a United States shareholder is treated as a United States shareholder.

(3) *Exception for certain incorporation transactions—(i) In general.* Paragraphs (b) and (c)(2) of this section do not apply to disregard a transfer of stock of a specified foreign corporation by a United States shareholder to a domestic corporation (for this purpose, including an S corporation), provided that—

(A) The transferee's section 965(a) inclusion amount with respect to the transferred stock of the specified foreign corporation is no lower than the transferor's section 965(a) inclusion amount with respect to the transferred stock of the specified foreign corporation, determined without regard to the transfer; and

(B) The transferee and the transferor determine their aggregate foreign cash position under paragraph (e)(3)(ii) of this section.

(ii) *Aggregate foreign cash position.* In the case of a transfer described in paragraph (e)(3)(i) of this section, in order to rely on the exception in paragraph (e)(3)(i) of this section—

(A) The transferee must treat its pro rata share of the cash position of a specified foreign corporation as of a cash measurement date as of which it did not own the transferred stock of the specified foreign corporation as including the transferor's pro rata share of the cash position of the specified foreign corporation with respect to the transferred stock of the specified foreign corporation as of such cash measurement date for purposes of determining its aggregate foreign cash position; and

(B) The transferor must treat its pro rata share of the cash position of a specified foreign corporation as of a cash measurement date as of which it did not own the transferred stock of

the specified foreign corporation as including the transferee's pro rata share of the cash position of the specified foreign corporation with respect to the transferred stock of the specified foreign corporation as of such cash measurement date for purposes of determining its aggregate foreign cash position.

(4) *Consequences of liquidation*—(i) *In general.* In the case of a liquidation of a specified foreign corporation that is disregarded for purposes of determining the section 965 elements of a United States shareholder pursuant to paragraph (b) or (c)(2) of this section, for purposes of determining the amounts of the section 965 elements of the United States shareholder, the date that is treated as the last day of the taxable year of the specified foreign corporation is the later of—

(A) The date of the liquidation; and

(B) The specified liquidation date, if any.

(ii) *Specified liquidation date.* The term *specified liquidation date* means, in the case of a liquidation of a specified foreign corporation pursuant to an entity classification election that is disregarded for purposes of determining the section 965 elements of a United States shareholder—

(A) November 30, 2017, with respect to a United States shareholder that must include in income under § 1.367(b)-3 as a deemed dividend the all earnings and profits amount with respect to the United States shareholder's stock of the liquidating specified foreign corporation; or

(B) The date of filing of the entity classification election, with respect to all other United States shareholders.

(f) *Disregard of certain transactions occurring between E&P measurement dates*—(1) *Disregard of specified payments.* Except as provided in paragraph (f)(3) of this section, a specified payment made by a specified foreign corporation (*payor specified foreign corporation*) to another specified foreign corporation (*payee specified foreign corporation*) is disregarded for purposes of determining the post-1986 earnings and profits of each of the payor specified foreign corporation and the payee specified foreign corporation as of the E&P

measurement date on December 31, 2017.

(2) *Definition of specified payment.* For purposes of paragraph (f)(1) of this section, the term *specified payment* means any amount paid or accrued by the payor specified foreign corporation, including a distribution by the payor specified foreign corporation with respect to its stock, if each of the following conditions are satisfied:

(i) Immediately before or immediately after the payment or accrual of the amount, the payor specified foreign corporation and the payee specified foreign corporation are related within the meaning of section 954(d)(3), substituting the term “specified foreign corporation” for “controlled foreign corporation” in each place that it appears;

(ii) The payment or accrual of the amount occurs after November 2, 2017, and on or before December 31, 2017; and

(iii) The payment or accrual of the amount would, without regard to the application of paragraph (f)(1) of this section, reduce the post-1986 earnings and profits of the payor specified foreign corporation as of the E&P measurement date on December 31, 2017.

(3) *Non-application of disregard rule.* A section 958(a) U.S. shareholder may determine the post-1986 earnings and profits of a specified foreign corporation without regard to paragraph (f)(1) of this section, provided that it and every section 958(a) U.S. shareholder related to the first section 958(a) U.S. shareholder determines the post-1986 earnings and profits of each of its specified foreign corporations without regard to paragraph (f)(1) of this section. For purposes of this paragraph (f)(3), a person is treated as related to a section 958(a) U.S. shareholder if the person bears a relationship to the section 958(a) U.S. shareholder described in section 267(b) or 707(b).

(4) *Examples.* The following examples illustrate the application of the rules in this paragraph (f).

(i) *Example 1. Deductible payment between wholly owned specified foreign corporations is a specified payment*—(A) *Facts.* USP, a domestic corporation, owns all of the stock of CFC1, a foreign corporation, which owns all of the

stock of CFC2, also a foreign corporation. USP, CFC1, and CFC2 have calendar year taxable years. On November 2, 2017, each of CFC1 and CFC2 has post-1986 earnings and profits of 100u. Neither CFC1 nor CFC2 has post-1986 earnings and profits that are attributable to income of the specified foreign corporation that is effectively connected with the conduct of a trade or business within the United States and subject to tax under chapter 1 or that, if distributed, would be excluded from the gross income of a United States shareholder under section 959 or from the gross income of another shareholder if such shareholder were a United States shareholder; therefore, no adjustment is made under section 965(d)(2) or § 1.965-1(f)(7), and each of CFC1's and CFC2's accumulated post-1986 deferred foreign income is equal to such corporation's post-1986 earnings and profits. On November 3, 2017, CFC2 makes a deductible payment of 10u to CFC1. The payment does not constitute subpart F income. CFC1 and CFC2 have no other items of income or deduction.

(B) *Analysis.* The payment from CFC2 to CFC1 is a specified payment because (1) CFC1 and CFC2 are related specified foreign corporations; (2) the payment occurs after November 2, 2017, and on or before December 31, 2017; and (3) the payment would, without regard to the application of the rule in paragraph (f)(1) of this section, reduce the post-1986 earnings and profits of CFC2 as of the E&P measurement date on December 31, 2017. Under paragraph (f)(1) of this section, the payment is disregarded, and CFC1 and CFC2 each have post-1986 earnings and profits of 100u as of December 31, 2017. Accordingly, the section 965(a) earnings amount of each of CFC1 and CFC2 is 100u.

(ii) *Example 2. Distribution is a specified payment—(A) Facts.* The facts are the same as in paragraph (f)(4)(i)(A) of this section (the facts in *Example 1*), except instead of a deductible payment to CFC1, CFC2 makes a 10u distribution on November 3, 2017, that, without regard to paragraph (f)(1) of this section would reduce the post-1986 earnings and profits of CFC2 as of the E&P measurement date on December 31, 2017, and increase the post-1986 earn-

ings and profits of CFC1 as of the E&P measurement date on December 31, 2017, by 10u.

(B) *Analysis.* The distribution is a specified payment because (1) CFC1 and CFC2 are related specified foreign corporations; (2) the distribution occurs after November 2, 2017, and on or before December 31, 2017; and (3) the distribution would, without regard to the application of the rule in paragraph (f)(1) of this section, reduce the post-1986 earnings and profits of CFC2 as of the E&P measurement date on December 31, 2017. Under paragraph (f)(1) of this section, the distribution is disregarded with the result that CFC1 and CFC2 each have post-1986 earnings and profits of 100u as of the E&P measurement date on December 31, 2017, and a section 965(a) earnings amount of 100u.

(iii) *Example 3. Deductible payment between related (but not wholly owned) specified foreign corporations is a specified payment—(A) Facts.* The facts are the same as in paragraph (f)(4)(i)(A) of this section (the facts in *Example 1*), except that CFC1 owns only 51% of the only class of stock of CFC2, the remainder of which is owned by USI, a United States citizen unrelated to USP, CFC1, and CFC2.

(B) *Analysis.* The analysis is the same as in paragraph (f)(4)(i)(B) of this section (the analysis in *Example 1*); thus, the payment is disregarded with the result that CFC1 and CFC2 each have post-1986 earnings and profits of 100u as of the E&P measurement date on December 31, 2017, and a section 965(a) earnings amount of 100u.

(iv) *Example 4. Deductible payment between unrelated specified foreign corporations is not a specified payment—(A) Facts.* The facts are the same as in paragraph (f)(4)(i)(A) of this section (the facts in *Example 1*), except that CFC1 owns only 50% of the only class of stock of CFC2, the remainder of which is owned by USI, a United States citizen unrelated to USP, CFC1, and CFC2.

(B) *Analysis.* Paragraph (f)(1) of this section does not apply because CFC1 and CFC2 are not related. Thus, the payment is taken into account with the result that CFC1 has post-1986 earnings and profits of 110u as of the E&P measurement date on December 31,

2017, and a section 965(a) earnings amount of 110u.

(v) *Example 5. Deductible payment and income accrued from unrelated persons are not specified payments—(A) Facts.* The facts are the same as in paragraph (f)(4)(i)(A) of this section (the facts in *Example 1*), except that CFC2 does not make a deductible payment to CFC1, and, between E&P measurement dates, CFC2 accrues gross income of 20u from a person that is not related to CFC2, and CFC1 incurs a deductible expense of 20u to a person that is not related to CFC1.

(B) *Analysis.* Paragraph (f)(1) of this section does not apply because neither the deductible expense of CFC1 nor the income accrual by CFC2 are attributable to a specified payment.

(vi) *Example 6. Deductible payment and income accrued with respect to unrelated persons are not specified payments; deductible payment between wholly specified foreign corporations is a specified payment—(A) Facts.* The facts are the same as in paragraph (f)(4)(v)(A) of this section (the facts in *Example 5*), except that CFC2 also makes a deductible payment of 10u to CFC1 on November 3, 2017.

(B) *Analysis.* The deductible payment is a specified payment because (1) CFC1 and CFC2 are related specified foreign corporations; (2) the payment occurs after November 2, 2017, and on or before December 31, 2017; and (3) the deductible payment would, without regard to the application of the rule in paragraph (f)(1) of this section, reduce the post-1986 earnings and profits of CFC2 as of the E&P measurement date on December 31, 2017. Accordingly, under paragraph (f)(1) of this section, the deductible payment is disregarded with the result that CFC1 and CFC2 have 80u and 120u of post-1986 earnings and profits as of the E&P measurement date on December 31, 2017, respectively. Accordingly, CFC1 and CFC2 have section 965(a) earnings amounts of 100u and 120u, respectively.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019]

§ 1.965-5 Allowance of credit or deduction for foreign income taxes.

(a) *Scope.* This section provides rules for the allowance of a credit or deduction for foreign income taxes in con-

nection with the application of section 965. Paragraph (b) of this section provides rules under section 965(g) for the allowance of a credit or deduction for foreign income taxes paid or accrued. Paragraph (c) of this section provides rules for the allowance of a credit or deduction for foreign income taxes treated as paid or accrued in connection with the application of section 965. Paragraph (d) of this section defines the term applicable percentage.

(b) *Rules for foreign income taxes paid or accrued—(1) In general.* Neither a deduction (including under section 164) nor a credit under section 901 is allowed for the applicable percentage of any foreign income taxes paid or accrued with respect to any amount for which a section 965(c) deduction is allowed for a section 958(a) U.S. shareholder inclusion year. Neither a deduction (including under section 164) nor a credit under section 901 is allowed for the applicable percentage of any foreign income taxes attributable to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits. Accordingly, for example, no deduction or credit is allowed for the applicable percentage of any withholding taxes imposed on a United States shareholder by the jurisdiction of residence of the distributing foreign corporation with respect to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits. Similarly, for example, no deduction or credit is allowed for the applicable percentage of foreign income taxes imposed on a United States citizen by the citizen's jurisdiction of residence upon receipt of a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits.

(2) *Attributing taxes to section 959(a) distributions of section 965 previously taxed earnings and profits.* For purposes of paragraph (b)(1) of this section, foreign income taxes are attributable to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits if such taxes would be allocated and apportioned to a distribution of such previously taxed earnings and

profits under the principles of §1.904-6(a)(1)(iv), regardless of whether an actual distribution is made or recognized for Federal income tax purposes. Therefore, for example, a credit or deduction for the applicable percentage of foreign income taxes imposed on a United States shareholder that pays foreign tax on a distribution that is not recognized for Federal income tax purposes (for example, in the case of a consent dividend or stock dividend upon which a withholding tax is imposed) is not allowed under paragraph (b)(1) of this section to the extent it is attributable to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits under the principles of §1.904-6(a)(1)(iv). For taxable years of foreign corporations beginning after December 31, 2019, in lieu of applying the principles of §1.904-6 under this paragraph (b)(2), the rules in §1.861-20 apply by treating the portion of a distribution attributable to section 965(a) previously taxed earnings and profits and the portion of a distribution attributable to section 965(b) previously taxed earnings and profits each as a statutory grouping, and the portion of the distribution that is attributable to other earnings and profits as the residual grouping. See §1.861-20(g)(7) (*Example 6*).

(c) *Rules for foreign income taxes treated as paid or accrued*—(1) *Disallowed credit*—(i) *In general*. A credit under section 901 is not allowed for the applicable percentage of any foreign income taxes treated as paid or accrued with respect to any amount for which a section 965(c) deduction is allowed for a section 958(a) U.S. shareholder inclusion year. For purposes of the preceding sentence, taxes treated as paid or accrued include foreign income taxes deemed paid under section 960(a)(1) with respect to a section 965(a) inclusion, foreign income taxes deemed paid under section 960(a)(3) (as in effect on December 21, 2017) or section 960(b) (as applicable to taxable years of controlled foreign corporations beginning after December 31, 2017) with respect to distributions of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits, foreign income taxes allo-

cated to an entity under §1.901-2(f)(4), and a distributive share of foreign income taxes paid or accrued by a partnership.

(ii) *Foreign income taxes deemed paid under section 960(a)(3) (as in effect on December 21, 2017)*. Foreign income taxes deemed paid by a domestic corporation under section 960(a)(3) with respect to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits include only the foreign income taxes paid or accrued by an upper-tier foreign corporation with respect to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits from a lower-tier foreign corporation. No credit is allowed under section 960(a)(3) or any other section for foreign income taxes that would have been deemed paid under section 960(a)(1) with respect to the portion of a section 965(a) earnings amount that is reduced under §1.965-1(b)(2) or §1.965-8(b).

(iii) *Foreign income taxes deemed paid under section 960(b) (as applicable to taxable years of controlled foreign corporations beginning after December 31, 2017, and to taxable years of United States persons in which or with which such taxable years of foreign corporations end)*. Paragraph (c)(1)(i) of this section applies to foreign income taxes deemed paid under section 960(b) (as in effect for a taxable year of a controlled foreign corporation beginning after December 31, 2017, and a taxable year of a United States person in which or with which such controlled foreign corporation's taxable year ends) only if such taxes are deemed paid under §1.960-3(b)(1) with respect to distributions to a domestic corporation of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits. See also §1.960-3(c)(2)(i), (ii), (vi), or (vii). Foreign income taxes that would have been deemed paid under section 960(a)(1) (as in effect on December 21, 2017) with respect to the portion of a section 965(a) earnings amount that was reduced under §1.965-1(b)(2) or §1.965-8(b) are not eligible to be deemed paid under section 960(b) and §1.960-3(b) or any other section of the Code.

(2) *Disallowed deduction.* No deduction (including under section 164) is allowed for the applicable percentage of any foreign income taxes treated as paid or accrued with respect to any amount for which a section 965(c) deduction is allowed. Such taxes include foreign income taxes allocated to an entity under § 1.901-2(f)(4) and a distributive share of foreign income taxes paid or accrued by a partnership.

(3) *Coordination with section 78—(i) In general.* With respect to foreign income taxes deemed paid by a domestic corporation with respect to its section 965(a) inclusion amount for a section 958(a) U.S. shareholder inclusion year, section 78 applies only to so much of such taxes as bears the same proportion to the amount of such taxes as—

(A) The excess of—

(1) The section 965(a) inclusion amount for a section 958(a) U.S. shareholder inclusion year, over

(2) The section 965(c) deduction amount allowable with respect to such section 965(a) inclusion amount, bears to

(B) Such section 965(a) inclusion amount.

(ii) *Domestic corporation that is a domestic pass-through owner.* With respect to foreign income taxes deemed paid by a domestic corporation attributable to such corporation's domestic pass-through owner share of a section 965(a) inclusion amount of a domestic pass-through entity, section 78 applies only to so much of such taxes as bears the same proportion to the amount of such taxes as the proportion determined under paragraph (c)(3)(i) of this section as applied to the domestic pass-through entity's section 965(a) inclusion amount for a section 958(a) U.S. shareholder inclusion year.

(d) *Applicable percentage—(1) In general.* For purposes of this section, except as provided in paragraphs (d)(2) and (d)(3) of this section, the term *applicable percentage* means, with respect to a section 958(a) U.S. shareholder and a section 958(a) U.S. shareholder inclusion year, the amount (expressed as a percentage) equal to the sum of—

(i) 0.771 multiplied by the ratio of—

(A) The section 958(a) U.S. shareholder's 8 percent rate amount for the

section 958(a) U.S. shareholder inclusion year, divided by

(B) The sum of the section 958(a) U.S. shareholder's 8 percent rate amount for the section 958(a) U.S. shareholder inclusion year plus the section 958(a) U.S. shareholder's 15.5 percent rate amount for the section 958(a) U.S. shareholder inclusion year; plus

(ii) 0.557 multiplied by the ratio of—

(A) The section 958(a) U.S. shareholder's 15.5 percent rate amount for the section 958(a) U.S. shareholder inclusion year, divided by

(B) The amount described in paragraph (d)(1)(i)(B) of this section.

(2) *No section 965(a) inclusion amount.* If a section 958(a) U.S. shareholder does not have an aggregate section 965(a) inclusion amount, the section 958(a) U.S. shareholder's applicable percentage is 55.7 percent.

(3) *Applicable percentage for domestic pass-through owners.* In the case of a domestic pass-through owner with respect to a domestic pass-through entity, the domestic pass-through owner's applicable percentage that is applied to foreign income taxes attributable to the domestic pass-through owner share of the section 965(a) inclusion amount or of distributions of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits is equal to the applicable percentage determined under paragraph (d)(1) or (2) of this section, as applicable, with respect to the domestic pass-through entity.

(4) *Applicable percentage with respect to certain distributions of previously taxed earnings and profits.* In the case of a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits (other than with respect to a section 958(a) U.S. shareholder described in paragraph (d)(2) of this section), the applicable percentage that is applied to foreign income taxes attributable to the distribution is the applicable percentage that applied with respect to the section 958(a) U.S. shareholder and the section 958(a) U.S. inclusion year in which, or with which, the inclusion year of the relevant deferred foreign income corporation ends. For this purpose, the relevant deferred foreign income corporation is the deferred

foreign income corporation with respect to which the section 958(a) U.S. shareholder had the section 965(a) inclusion as a result of which the section 965(a) previously taxed earnings and profits first arose (as described in § 1.965-2(c)) or the section 965(b) previously taxed earnings and profits first arose (as described in § 1.965-2(d)).

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9882, 84 FR 69120, Dec. 17, 2019; T.D. 9922, 85 FR 72072, Nov. 12, 2020]

§ 1.965-6 Computation of foreign income taxes deemed paid and allocation and apportionment of deductions.

(a) *Scope.* This section provides rules for the computation of foreign income taxes deemed paid and the allocation and apportionment of deductions. Paragraph (b) of this section provides the general rules for the computation of foreign income taxes deemed paid under sections 902 and 960. Paragraph (c) of this section provides rules for allocation and apportionment of expenses. Paragraph (d) of this section provides rules for foreign income taxes associated with hovering deficits.

(b) *Computation of foreign incomes taxes deemed paid*—(1) *In general.* For purposes of determining foreign income taxes deemed paid under section 960(a)(1) with respect to a section 965(a) inclusion attributable to a deferred foreign income corporation that is a member of a qualified group (as defined in section 902(b)(2)), section 902 applies as if the section 965(a) inclusion, translated (if necessary) into the functional currency of the deferred foreign income corporation using the spot rate on December 31, 2017, were a dividend paid by the deferred foreign income corporation. For purposes of computing the amount of foreign income taxes deemed paid under section 960(a)(1), §§ 1.965-2(b), 1.965-5, sections 902 and 960, the regulations under those sections, and this section apply.

(2) *Dividend or inclusion in excess of post-1986 undistributed earnings.* When the denominator of the section 902 fraction is positive but less than the numerator of such fraction, the section 902 fraction is one. When the denominator of the section 902 fraction is zero or less than zero, the section 902 frac-

tion is zero, and no foreign taxes are deemed paid.

(3) *Treatment of adjustment under section 965(b)(4)(B).* For purposes of section 902(c)(1), the post-1986 undistributed earnings of an E&P deficit foreign corporation are increased under section 965(b)(4)(B) and § 1.965-2(d)(2)(i)(A) as of the first day of the foreign corporation's first taxable year following the E&P deficit foreign corporation's last taxable year that begins before January 1, 2018.

(4) *Section 902 fraction.* The term *section 902 fraction* means, with respect to either a deferred foreign income corporation or an E&P deficit foreign corporation, the fraction that is—

(i) The dividends paid by, or the inclusion under section 951(a)(1) (including a section 965(a) inclusion) with respect to, the foreign corporation, as applicable (the *numerator*), divided by

(ii) The foreign corporation's post-1986 undistributed earnings or pre-1987 accumulated profits, as applicable (the *denominator*).

(c) *Allocation and apportionment of deductions.* For purposes of allocating and apportioning expenses, a section 965(c) deduction does not result in any gross income, including a section 965(a) inclusion, being treated as exempt, excluded, or eliminated income within the meaning of section 864(e)(3) or § 1.861-8T(d). Similarly, a section 965(c) deduction does not result in the treatment of stock as an exempt asset within the meaning of section 864(e)(3) or § 1.861-8T(d). In addition, consistent with the general inapplicability of § 1.861-8T(d)(2) to earnings and profits described in section 959(c)(1) or 959(c)(2), neither section 965(a) previously taxed earnings and profits nor section 965(b) previously taxed earnings and profits are treated as giving rise to gross income that is exempt, excluded, or eliminated income. Similarly, the asset that gives rise to a section 965(a) inclusion, section 965(a) previously taxed earnings and profits, or section 965(b) previously taxed earnings and profits is not treated as a tax-exempt asset.

(d) *Hovering deficits.* In the last taxable year that begins before January 1,

2018, of a deferred foreign income corporation that is also a foreign surviving corporation, as defined in § 1.367(b)-7(a), solely for purposes of determining the amount of related taxes that are included in post-1986 foreign income taxes under § 1.367(b)-7(d)(2)(iii)—

(1) The post-transaction earnings described in § 1.367(b)-7(d)(2)(ii) that can be offset by a hovering deficit include any post-transaction earnings earned in that year that were not considered accumulated because they were included in income under section 965 and § 1.965-1(b)(1) by a section 958(a) U.S. shareholder; and

(2) Any offset for purposes of § 1.367(b)-7(d)(2)(ii) is treated as occurring on the last day of the foreign surviving corporation's inclusion year.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019]

§ 1.965-7 Elections, payment, and other special rules.

(a) *Scope.* This section provides rules regarding certain elections and payments. Paragraph (b) of this section provides rules regarding the section 965(h) election. Paragraph (c) of this section provides rules regarding the section 965(i) election. Paragraph (d) of this section provides rules regarding the section 965(m) election and a special rule for real estate investment trusts. Paragraph (e) of this section provides rules regarding the section 965(n) election. Paragraph (f) of this section provides rules regarding the election to use the alternative method for calculating post-1986 earnings and profits. Paragraph (g) of this section provides definitions that apply for purposes of this section.

(b) *Section 965(h) election*—(1) *In general.* Any person with a section 965(h) net tax liability (that is, a section 958(a) U.S. shareholder or a domestic pass-through owner with respect to a domestic pass-through entity that is a section 958(a) U.S. shareholder, but not a domestic pass-through entity itself) may elect under section 965(h) and this paragraph (b) to pay its section 965(h) net tax liability in eight installments. This election may be revoked only by paying the full amount of the remaining unpaid section 965(h) net tax liability.

(i) *Amount of installments.* Except as provided in paragraph (b)(3) of this section, if a person makes a section 965(h) election, the amounts of the installments are—

(A) Eight percent of the section 965(h) net tax liability in the case of each of the first five installments;

(B) Fifteen percent of the section 965(h) net tax liability in the case of the sixth installment;

(C) Twenty percent of the section 965(h) net tax liability in the case of the seventh installment; and

(D) Twenty-five percent of the section 965(h) net tax liability in the case of the eighth installment.

(ii) *Increased installments due to a deficiency or a timely filed or amended return*—(A) *In general.* If a person makes a section 965(h) election, except as provided in paragraph (b)(1)(ii)(C) of this section, any deficiency or additional liability will be prorated to the installments described under paragraph (b)(1)(i) of this section if any of the following occur:

(1) A deficiency is assessed with respect to the person's section 965(h) net tax liability;

(2) The person files a return by the due date of the return (taking into account extensions, if any) increasing the amount of its section 965(h) net tax liability beyond that taken into account in paying the first installment described under paragraph (b)(1)(i) of this section; or

(3) The person files an amended return that reflects an increase in the amount of its section 965(h) net tax liability.

(B) *Timing.* If the due date for the payment of an installment to which the deficiency is prorated has passed, the amount prorated to such installment must be paid on notice and demand by the Secretary, or, in the case of an additional liability reported on a return increasing the amount of the section 965(h) net tax liability after payment of the first installment or on an amended return, with the filing of the return. If the due date for the payment of an installment to which the deficiency or additional liability is prorated has not passed, then such amount will be due at the same time as, and as part of, the relevant installment.

(C) *Exception for negligence, intentional disregard, or fraud.* If a deficiency or additional liability is due to negligence, intentional disregard of rules and regulations, or fraud with intent to evade tax, the proration rule of this paragraph (b)(1)(ii) will not apply, and the deficiency or additional liability (as well as any applicable interest and penalties) must be paid on notice and demand by the Secretary or, in the case of an additional liability reported on a return increasing the amount of the section 965(h) net tax liability after payment of the first installment or on an amended return, with the filing of the return.

(iii) *Due date of installments—(A) In general.* If a person makes a section 965(h) election, the first installment payment is due on the due date (without regard to extensions) for the return for the relevant taxable year. For purposes of this paragraph (b), the term *relevant taxable year* means, in the case in which the person is a section 958(a) U.S. shareholder, the section 958(a) U.S. shareholder inclusion year, or, in the case in which the person is a domestic pass-through owner, the taxable year in which the person has the section 965(a) inclusion to which the section 965(h) net tax liability is attributable. Each succeeding installment payment is due on the due date (without regard to extensions) for the return for the taxable year following the taxable year with respect to which the previous installment payment was made.

(B) *Extension for specified individuals.* If a person is a specified individual with respect to a taxable year within which an installment payment is due pursuant to paragraph (b)(1)(iii)(A) of this section, then, for purposes of determining the due date of an installment payment under paragraph (b)(1)(iii)(A) of this section, the due date of the return (without regard to extensions) due within the taxable year will be treated as the fifteenth day of the sixth month following the close of the prior taxable year. This paragraph (b)(1)(iii)(B) is applicable regardless of whether the person is a specified individual with respect to the relevant taxable year.

(2) *Manner of making election—(i) Eligibility.* Any person with a section 965(h) net tax liability may make the section 965(h) election, provided that, with respect to the person, none of the acceleration events described in paragraph (b)(3)(ii) of this section has occurred before the election is made. Notwithstanding the preceding sentence, a person that would be eligible to make the section 965(h) election but for the occurrence of an event described in paragraph (b)(3)(ii) of this section may make the section 965(h) election if the exception described in paragraph (b)(3)(iii)(A) of this section applies.

(ii) *Timing.* A section 965(h) election must be made no later than the due date (taking into account extensions, if any, or any additional time that would have been granted if the person had made an extension request) for the return for the relevant taxable year. Relief is not available under § 301.9100-2 or § 301.9100-3 to file a late election.

(iii) *Election statement.* Except as otherwise provided in publications, forms, instructions, or other guidance, to make a section 965(h) election, a person must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the person's return, to its return for the relevant taxable year. The statement must include the person's name, taxpayer identification number, total net tax liability under section 965, section 965(h) net tax liability, section 965(i) net tax liability with respect to which a section 965(i) election is effective (if applicable), and the anticipated amounts of each installment described under paragraph (b)(1)(i) of this section. The statement must be filed in the manner prescribed in publications, forms, instructions, or other guidance. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (b)(2)(iii) if the person making the election retains the original signed election statement in the manner specified by § 1.6001-1(e).

(3) *Acceleration of payment—(i) Acceleration.* Notwithstanding paragraph (b)(1)(i) of this section, if a person makes a section 965(h) election and an

acceleration event described in paragraph (b)(3)(ii) of this section subsequently occurs, then, except as provided in paragraph (b)(3)(iii) of this section, the unpaid portion of the remaining installments will be due on the date of the acceleration event (or in the case of a title 11 or similar case, the day before the petition is filed).

(ii) *Acceleration events.* The following events are acceleration events for purposes of paragraph (b)(3)(i) of this section with respect to a person that has made a section 965(h) election—

(A) An addition to tax is assessed for the failure to timely pay an installment described in paragraph (b)(1)(i) of this section;

(B) A liquidation, sale, exchange, or other disposition of substantially all of the assets of the person (including in a title 11 or similar case, or, in the case of an individual, by reason of death);

(C) In the case of a person that is not an individual, a cessation of business by the person;

(D) Any event that results in the person no longer being a United States person, including a resident alien (as defined in section 7701(b)(1)(A)) becoming a nonresident alien (as defined in section 7701(b)(1)(B));

(E) In the case of a person that was not a member of any consolidated group, the person becoming a member of a consolidated group;

(F) In the case of a consolidated group, the group ceasing to exist (including by reason of the acquisition of a consolidated group within the meaning of § 1.1502-13(j)(5)) or the group otherwise discontinuing in the filing of a consolidated return; or

(G) A determination by the Commissioner described in the second sentence of paragraph (b)(3)(iii)(C)(2) of this section.

(iii) *Eligible section 965(h) transferee exception—*(A) *In general.* Paragraph (b)(3)(i) of this section does not apply (such that the unpaid portion of all remaining installments will not be due as of the date of the acceleration event) to a person with respect to which an acceleration event occurs if the requirements described in paragraphs (b)(3)(iii)(A)(1) and (2) of this section are satisfied. A person with respect to which an acceleration event described

in this paragraph (b)(3)(iii)(A) occurs is referred to as an *eligible section 965(h) transferor*.

(1) *Requirement to have a covered acceleration event.* The acceleration event satisfies the requirements of this paragraph (b)(3)(iii)(A)(1) if it is described in—

(i) Paragraph (b)(3)(ii)(B) of this section, and the acceleration event is a qualifying consolidated group member transaction within the meaning of paragraph (b)(3)(iii)(E) of this section;

(ii) Paragraph (b)(3)(ii)(B) of this section (other than, in the case of an individual, an acceleration event caused by reason of death) in a transaction that is not a qualifying consolidated group member transaction;

(iii) Paragraph (b)(3)(ii)(E) of this section;

(iv) Paragraph (b)(3)(ii)(F) of this section, and the acceleration event results from the acquisition of a consolidated group within the meaning of § 1.1502-13(j)(5), and the acquired consolidated group members join a different consolidated group as of the day following the acquisition;

(v) Paragraph (b)(3)(ii)(F) of this section, and the group ceases to exist as a result of the transfer of all of the assets of one or more members of the consolidated group to other members with only one entity remaining (the *successor entity*); or

(vi) Paragraph (b)(3)(ii)(F) of this section, and the group ceases to exist as a result of the termination of the subchapter S election pursuant to section 1362(d) of a shareholder of the common parent of the consolidated group and, for the shareholder's taxable year immediately following the termination, the shareholder joins in the filing of a consolidated return as a consolidated group that includes all of the former members of the former consolidated group.

(2) *Requirement to enter into a transfer agreement.* An eligible section 965(h) transferor and an eligible section 965(h) transferee (as defined in paragraph (b)(3)(iii)(B)(1) of this section) must enter into an agreement with the Commissioner that satisfies the requirements of paragraph (b)(3)(iii)(B) of this section.

(B) *Transfer agreement—(1) Eligibility.* A transfer agreement that satisfies the requirements of this paragraph (b)(3)(iii)(B) must be entered into by an eligible section 965(h) transferor and an eligible section 965(h) transferee. For this purpose, the term *eligible section 965(h) transferee* refers to a single United States person that is not a domestic pass-through entity and that—

(i) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(i) of this section, is a departing member (as defined in paragraph (b)(3)(iii)(E)(I)(i) of this section) or its qualified successor (as defined in paragraph (b)(3)(iii)(E)(2) of this section);

(ii) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(ii) of this section, acquires substantially all of the assets of an eligible section 965(h) transferor;

(iii) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(iii) of this section, is the agent (within the meaning of § 1.1502-77) of the consolidated group that the eligible section 965(h) transferor joins;

(iv) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(iv) of this section, is the agent (within the meaning of § 1.1502-77) of the surviving consolidated group;

(v) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(v) of this section, is the successor entity (within the meaning of paragraph (b)(3)(iii)(A)(I)(v) of this section); or

(vi) With respect to an acceleration event described in paragraph (b)(3)(iii)(A)(I)(vi) of this section, is the agent (within the meaning of § 1.1502-77) of the consolidated group that includes the shareholder whose subchapter S election was terminated and all of the former members of the former consolidated group.

(2) *Filing requirements—(i) In general.* A transfer agreement must be timely filed. Except as provided in paragraph (b)(3)(iii)(B)(2)(ii) of this section, a transfer agreement is considered timely filed only if the transfer agreement is filed within 30 days of the date that the acceleration event occurs. The transfer agreement must be filed in accordance with the rules provided in

publications forms, instructions, or other guidance. In addition, a duplicate copy of the transfer agreement must be attached to the returns of both the eligible section 965(h) transferee and the eligible section 965(h) transferor for the taxable year during which the acceleration event occurs filed by the due date for such returns (taking into account extensions, if any). Relief is not available under § 301.9100-2 or 301.9100-3 to file a transfer agreement late.

(ii) *Transition rule.* If an acceleration event occurs on or before February 5, 2019, the transfer agreement must be filed by March 7, 2019, to be considered timely filed.

(3) *Signature requirement.* The transfer agreement that is filed within 30 days of the acceleration event or by the due date specified in paragraph (b)(3)(iii)(B)(2)(ii) of this section must be signed under penalties of perjury by a person who is authorized to sign a return on behalf of the eligible section 965(h) transferor and a person who is authorized to sign a return on behalf of the eligible section 965(h) transferee.

(4) *Terms of agreement.* A transfer agreement under this paragraph (b)(3)(iii)(B) must be entitled “Transfer Agreement Under Section 965(h)(3)” and must contain the following information and representations—

(i) A statement that the document constitutes an agreement by the eligible section 965(h) transferee to assume the liability of the eligible section 965(h) transferor for any unpaid installment payments of the eligible section 965(h) transferor under section 965(h);

(ii) A statement that the eligible section 965(h) transferee (and, if the eligible section 965(h) transferor continues in existence immediately after the acceleration event, the eligible section 965(h) transferor) agrees to comply with all of the conditions and requirements of section 965(h) and paragraph (b) of this section, as well as any other applicable requirements in the section 965 regulations;

(iii) The name, address, and taxpayer identification number of the eligible section 965(h) transferor and the eligible section 965(h) transferee;

(iv) The amount of the eligible section 965(h) transferor’s section 965(h) net tax liability remaining unpaid, as

determined by the eligible section 965(h) transferor, which amount is subject to adjustment by the Commissioner;

(v) A copy of the eligible section 965(h) transferor's most recent Form 965-A or Form 965-B, as applicable, if the eligible section 965(h) transferor has been required to file a Form 965-A or Form 965-B;

(vi) A detailed description of the acceleration event that led to the transfer agreement;

(vii) A representation that the eligible section 965(h) transferee is able to make the remaining payments required under section 965(h) and paragraph (b) of this section with respect to the section 965(h) net tax liability being assumed;

(viii) If the eligible section 965(h) transferor continues to exist immediately after the acceleration event, an acknowledgement that the eligible section 965(h) transferor and any successor to the eligible section 965(h) transferor will remain jointly and severally liable for any unpaid installment payments of the eligible section 965(h) transferor under section 965(h), including, if applicable, under § 1.1502-6;

(ix) A statement as to whether the leverage ratio of the eligible section 965(h) transferee and all subsidiary members of its affiliated group immediately after the acceleration event exceeds three to one, which ratio may be modified as provided in publications, forms, instructions, or other guidance;

(x) A certification by the eligible section 965(h) transferee stating that the eligible section 965(h) transferee waives the right to a notice of liability and consents to the immediate assessment of the portion of the section 965(h) net tax liability remaining unpaid; and

(xi) Any additional information, representation, or certification required by the Commissioner in publications, forms, instructions, or other guidance.

(5) *Consolidated groups.* For purposes of this paragraph (b)(3)(iii)(B), in the case of a consolidated group, the terms "eligible section 965(h) transferor" and "eligible section 965(h) transferee" each refer to a consolidated group that is a party to a covered acceleration event described in paragraph (b)(3)(iii)(A)(1) of this section. In such a

case, any transfer agreement under this paragraph (b)(3)(iii)(B) must be entered into by the agent (as defined in § 1.1502-77) of the relevant consolidated group.

(6) *Leverage ratio.* For purposes of paragraph (b)(3)(iii)(B)(4)(ix) of this section, and except as otherwise provided in publications, forms, instructions, or other guidance, the term *leverage ratio* means the ratio that the total indebtedness of the eligible section 965(h) transferee bears to the sum of its money and all other assets reduced (but not below zero) by such total indebtedness. For this purpose, the amount taken into account with respect to any asset is the adjusted basis thereof for purposes of determining gain, and the amount taken into account with respect to any indebtedness with original issue discount is its issue price plus the portion of the original issue discount previously accrued as determined under the rules of section 1272 (determined without regard to subsection (a)(7) or (b)(4) thereof).

(C) *Consent of Commissioner—(1) In general.* Except as otherwise provided in publications, forms, instructions, or other guidance, if an eligible section 965(h) transferor and an eligible section 965(h) transferee file a transfer agreement in accordance with the provisions of paragraph (b)(3)(iii)(B) of this section, the eligible section 965(h) transferor and the eligible section 965(h) transferee will be considered to have entered into an agreement described in paragraph (b)(3)(iii)(A)(2) of this section with the Commissioner for purposes of section 965(h)(3) and paragraph (b)(3)(iii) of this section. If the Commissioner determines that additional information is necessary (for example, additional information regarding the ability of the eligible section 965(h) transferee to fully pay the remaining section 965(h) net tax liability), the eligible section 965(h) transferee must provide such information upon request.

(2) *Material misrepresentations and omissions.* If the Commissioner determines that an agreement filed by an eligible section 965(h) transferor and an eligible section 965(h) transferee contains a material misrepresentation or material omission, or if the eligible

section 965(h) transferee does not provide the additional information requested under paragraph (b)(3)(iii)(C)(I) of this section within a reasonable timeframe communicated by the Commissioner to the eligible section 965(h) transferee, then the Commissioner may reject the transfer agreement (effective as of the date of the related acceleration event). In the alternative, on the date that the Commissioner determines that the transfer agreement includes a material misrepresentation or material omission, the Commissioner may determine that an acceleration event has occurred with respect to the eligible section 965(h) transferee as of the date of the determination, such that any unpaid installment payments of the eligible section 965(h) transferor that were assumed by the eligible section 965(h) transferee become due on the date of the determination.

(D) *Effect of assumption*—(1) *In general.* If the exception in this paragraph (b)(3)(iii) applies with respect to an eligible section 965(h) transferor and an eligible section 965(h) transferee, the eligible section 965(h) transferee assumes all of the outstanding obligations and responsibilities of the eligible section 965(h) transferor with respect to the section 965(h) net tax liability as though the eligible section 965(h) transferee had included the section 965(a) inclusion in income. Accordingly, the eligible section 965(h) transferee is responsible for making payments and reporting with respect to any unpaid installment payments. In addition, for example, if an acceleration event described in paragraph (b)(3)(ii) of this section occurs with respect to an eligible section 965(h) transferee, any unpaid installment payments of the eligible section 965(h) transferor that were assumed by the eligible section 965(h) transferee will become due on the date of such event, subject to any applicable exception in paragraph (b)(3)(iii) of this section.

(2) *Eligible section 965(h) transferor liability.* An eligible section 965(h) transferor (or a successor) remains jointly and severally liable for any unpaid installment payments of the eligible section 965(h) transferor that were assumed by the eligible section 965(h) transferee, as well as any penalties, ad-

ditions to tax, or other additional amounts attributable to such net tax liability.

(E) *Qualifying consolidated group member transaction*—(1) *Definition of qualifying consolidated group member transaction.* For purposes of this paragraph (b)(3), the term *qualifying consolidated group member transaction* means a transaction in which—

(i) A member of a consolidated group (the *departing member*) ceases to be a member of the consolidated group (including by reason of the distribution, sale, or exchange of the departing member's stock);

(ii) The transaction results in the consolidated group (which is treated as a single person for this purpose under § 1.965-8(e)(1)) being treated as transferring substantially all of its assets for purposes of paragraph (b)(3)(ii)(B) of this section; and

(iii) The departing member either continues to exist immediately after the transaction or has a qualified successor.

(2) *Definition of qualified successor.* For purposes of this paragraph (b)(3), the term *qualified successor* means, with respect to a departing member described in this paragraph (b)(3)(iii)(E), another domestic corporation (or consolidated group) that acquires substantially all of the assets of the departing member (including in a transaction described in section 381(a)(2)).

(3) *Departure of multiple members of a consolidated group.* Multiple members that deconsolidate from the same consolidated group as a result of a single transaction are treated as a single departing member to the extent that, immediately after the transaction, they become members of the same (second) consolidated group, which would be treated as a single person under § 1.965-8(e)(1).

(c) *Section 965(i) election*—(1) *In general.* Each shareholder of an S corporation (including a person listed in § 1.1362-6(b)(2) with respect to a trust or estate, but not a domestic pass-through entity itself) that is a United States shareholder of a deferred foreign income corporation may elect under section 965(i) and this paragraph (c) to defer the payment of the shareholder's

section 965(i) net tax liability with respect to the S corporation until the shareholder's taxable year that includes a triggering event described in paragraph (c)(3) of this section. This election may be revoked only by paying the full amount of the unpaid section 965(i) net tax liability.

(2) *Manner of making election*—(i) *Eligibility*. Each shareholder with a section 965(i) net tax liability with respect to an S corporation may make the section 965(i) election with respect to such S corporation, provided that, with respect to the shareholder, none of the triggering events described in paragraph (c)(3)(ii) of this section have occurred before the election is made. Notwithstanding the preceding sentence, a shareholder that would be eligible to make the section 965(i) election but for the occurrence of an event described in paragraph (c)(3)(ii) of this section may make the section 965(i) election if an exception described in paragraph (c)(3)(iv) of this section applies.

(ii) *Timing*. A section 965(i) election must be made no later than the due date (taking into account extensions, if any) for the shareholder's return for each taxable year that includes the last day of the taxable year of the S corporation in which the S corporation has a section 965(a) inclusion to which the shareholder's section 965(i) net tax liability is attributable. Relief is not available under § 301.9100-2 or 301.9100-3 to make a late election.

(iii) *Election statement*. Except as otherwise provided in publications, forms, instructions, or other guidance, to make a section 965(i) election, a shareholder must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the person's return, to its return for the taxable year that includes the last day of a taxable year of the S corporation in which the S corporation has a section 965(a) inclusion to which the shareholder's section 965(i) net tax liability is attributable. The statement must include the shareholder's name, taxpayer identification number, the name and taxpayer identification number of the S corporation with respect to which the election is made, the amount described in paragraph (g)(10)(i)(A) of

this section as modified by paragraph (g)(6) of this section for purposes of determining the section 965(i) net tax liability with respect to the S corporation, the amount described in paragraph (g)(10)(i)(B) of this section, and the section 965(i) net tax liability with respect to the S corporation. The statement must be filed in the manner prescribed in publications, forms, instructions, or other guidance. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (c)(2)(iii) if the shareholder retains the original signed election statement in the manner specified by § 1.6001-1(e).

(3) *Triggering events*—(i) *In general*. If a shareholder makes a section 965(i) election with respect to an S corporation, the shareholder defers payment of its section 965(i) net tax liability with respect to the S corporation until the shareholder's taxable year that includes the occurrence of a triggering event described in paragraph (c)(3)(ii) of this section with respect to the section 965(i) net tax liability with respect to the S corporation. If a triggering event described in paragraph (c)(3)(ii) of this section with respect to an S corporation occurs, except as provided in paragraph (c)(3)(iv) of this section, the shareholder's section 965(i) net tax liability with respect to the S corporation will be assessed as an addition to tax for the shareholder's taxable year that includes the triggering event.

(ii) *Triggering events*. The following events are considered triggering events for purposes of paragraph (c)(3)(i) of this section with respect to a shareholder's section 965(i) net tax liability with respect to an S corporation—

(A) The corporation ceases to be an S corporation (determined as of the first day of the first taxable year that the corporation is not an S corporation);

(B) A liquidation, sale, exchange, or other disposition of substantially all of the assets of the S corporation (including in a title 11 or similar case), a cessation of business by the S corporation, or the S corporation ceasing to exist;

(C) The transfer of any share of stock of the S corporation by the shareholder

(including by reason of death or otherwise) that results in a change of ownership for federal income tax purposes; or

(D) A determination by the Commissioner described in the second sentence of paragraph (c)(3)(iv)(C)(2) of this section.

(iii) *Partial transfers.* If an S corporation shareholder transfers less than all of its shares of stock of the S corporation, the transfer will be a triggering event only with respect to the portion of a shareholder's section 965(i) net tax liability that is properly allocable to the transferred shares.

(iv) *Eligible section 965(i) transferee exception—(A) In general.* Paragraph (c)(3)(i) of this section will not apply (such that a shareholder's section 965(i) net tax liability with respect to an S corporation will not be assessed as an addition to tax for the shareholder's taxable year that includes the triggering event) if the requirements described in paragraphs (c)(3)(iv)(A)(1) and (2) of this section are satisfied. A shareholder with respect to which a triggering event described in this paragraph (c)(3)(iv)(A) occurs is referred to as an *eligible section 965(i) transferor*.

(1) *Requirement to have a covered triggering event.* The triggering event satisfies the requirements of this paragraph (c)(3)(iv)(A)(1) if it is described in paragraph (c)(3)(ii)(C) of this section.

(2) *Requirement to enter into a transfer agreement.* The shareholder with respect to which a triggering event occurs and an eligible section 965(i) transferee (as defined in paragraph (c)(3)(iv)(B)(1) of this section) must enter into an agreement with the Commissioner that satisfies the requirements of paragraph (c)(3)(iv)(B) of this section.

(B) *Transfer agreement—(1) Eligibility.* A transfer agreement that satisfies the requirements of this paragraph (c)(3)(iv)(B) may be entered into by an eligible section 965(i) transferor and an eligible section 965(i) transferee. For this purpose, the term *eligible section 965(i) transferee* refers to a single United States person that becomes a shareholder of the S corporation (including a person listed in §1.1362-6(b)(2) with respect to a trust or estate, but not a domestic pass-through entity itself). In the case of a transfer that consists of

multiple partial transfers (as described in paragraph (c)(3)(iii) of this section), a transfer agreement that satisfies the requirements of this paragraph (c)(3)(iv)(B) may be entered into by an eligible section 965(i) transferor and an eligible section 965(i) transferee for each partial transfer.

(2) *Filing requirements—(i) In general.* A transfer agreement must be timely filed. Except as provided in paragraphs (c)(3)(iv)(B)(2)(ii) and (iii) of this section, a transfer agreement is considered timely filed only if the transfer agreement is filed within 30 days of the date that the triggering event occurs. The transfer agreement must be filed in accordance with the rules provided in publications, forms, instructions, or other guidance. In addition, a duplicate copy of the transfer agreement must be attached to the returns of both the eligible section 965(i) transferee and the eligible section 965(i) transferor for the taxable year during which the triggering event occurs filed by the due date (taking into account extensions, if any) for such returns. Relief is not available under §301.9100-2 or 301.9100-3 to file a transfer agreement late.

(ii) *Transition rule.* If a triggering event occurs on or before February 5, 2019, the transfer agreement must be filed by March 7, 2019, to be considered timely filed.

(iii) *Death of eligible section 965(i) transferor.* If the triggering event is the death of the eligible section 965(i) transferor, the transfer agreement must be filed by the later of the unextended due date for the eligible section 965(i) transferor's final income tax return or March 7, 2019.

(3) *Signature requirement.* The transfer agreement that is filed within 30 days of the triggering event or by the due date specified in paragraph (c)(3)(iv)(B)(2)(ii) or (iii) of this section must be signed under penalties of perjury by a person who is authorized to sign a return on behalf of the eligible section 965(i) transferor and a person who is authorized to sign a return on behalf of the eligible section 965(i) transferee.

(4) *Terms of agreement.* A transfer agreement under this paragraph (c)(3)(iv)(B) must be entitled "Transfer Agreement Under Section 965(i)(2)" and

must contain the following information and representations:

(i) A statement that the document constitutes an agreement by the eligible section 965(i) transferee to assume the liability of the eligible section 965(i) transferor for the unpaid portion of the section 965(i) net tax liability, or, in the case of a partial transfer, for the unpaid portion of the section 965(i) net tax liability attributable to the transferred stock;

(ii) A statement that the eligible section 965(i) transferee agrees to comply with all of the conditions and requirements of section 965(i) and paragraph (c) of this section, including the annual reporting requirement, as well as any other applicable requirements in the section 965 regulations;

(iii) The name, address, and taxpayer identification number of the eligible section 965(i) transferor and the eligible section 965(i) transferee;

(iv) The amount of the eligible section 965(i) transferor's unpaid section 965(i) net tax liability or, in the case of a partial transfer, the unpaid portion of the section 965(i) net tax liability attributable to the transferred stock, each as determined by the eligible section 965(i) transferor, which amount is subject to adjustment by the Commissioner;

(v) A copy of the eligible section 965(i) transferor's most recent Form 965-A, if the eligible section 965(i) transferor has been required to file a Form 965-A;

(vi) A detailed description of the triggering event that led to the transfer agreement, including the name and taxpayer identification number of the S corporation with respect to which the section 965(i) election was effective;

(vii) A representation that the eligible section 965(i) transferee is able to pay the section 965(i) net tax liability being assumed;

(viii) An acknowledgement that the eligible section 965(i) transferor and any successor to the eligible section 965(i) transferor will remain jointly and severally liable for the section 965(i) net tax liability being assumed by the eligible section 965(i) transferee;

(ix) A statement as to whether the leverage ratio of the eligible section 965(i) transferee immediately after the

triggering event exceeds three to one, which ratio may be modified as provided in publications, forms, instructions, or other guidance;

(x) Any additional information, representation, or certification required by the Commissioner in publications, forms, instructions, or other guidance.

(5) *Special rule in the case of death of eligible section 965(i) transferor.* Except in the case of transfers to trusts, if the triggering event is the death of the eligible section 965(i) transferor, and the identity of the beneficiary or beneficiaries (in the case of multiple partial transfers) is determined as of the due date for the transfer agreement described in paragraph (c)(3)(iv)(B)(2)(iii) of this section, then the transfer may be treated as a transfer directly between the eligible 965(i) transferor and the beneficiary or beneficiaries. If, however, the identity of the beneficiary or beneficiaries is not determined as of the due date for the transfer agreement described in paragraph (c)(3)(iv)(B)(2)(iii) of this section, then the transfer must be treated first as a transfer between the eligible section 965(i) transferor and his or her estate at the time of death and second as a transfer between the estate and the beneficiary or beneficiaries when the shares are actually transferred to the beneficiary or beneficiaries. Separate transfer agreements must be filed for each transfer. The transfer from the eligible section 965(i) transferor to his or her estate is a transfer resulting from a triggering event that is the death of the eligible section 965(i) transferor, and the transfer agreement is subject to the timing rules in paragraph (c)(3)(iv)(B)(2)(iii) of this section. The transfer from the estate to the beneficiary or beneficiaries is not a transfer resulting from a triggering event that is the death of the eligible section 965(i) transferor, and the transfer agreement is subject to the timing rules in paragraph (c)(3)(iv)(B)(2)(i) and (ii) of this section.

(6) *Leverage ratio.* For purposes of paragraph (c)(3)(iv)(B)(4)(ix) of this section, and except as otherwise provided in publications, forms, instructions, or other guidance, the term *leverage ratio* means the ratio that the total indebtedness of the eligible section 965(i)

transferee bears to the sum of its money and all other assets reduced (but not below zero) by such total indebtedness. For this purpose, the amount taken into account with respect to any asset is the adjusted basis thereof for purposes of determining gain, and the amount taken into account with respect to any indebtedness with original issue discount is its issue price plus the portion of the original issue discount previously accrued as determined under the rules of section 1272 (determined without regard to subsection (a)(7) or (b)(4) thereof).

(C) *Consent of Commissioner—(1) In general.* Except as otherwise provided in publications, forms, instructions, or other guidance, if an eligible section 965(i) transferor and an eligible section 965(i) transferee file a transfer agreement in accordance with the provisions of paragraph (c)(3)(iv)(B) of this section, the eligible section 965(i) transferor and the eligible section 965(i) transferee will be considered to have entered into an agreement with the Commissioner for purposes of section 965(i)(2) and paragraph (c)(3)(iv) of this section. If the Commissioner determines that additional information is necessary (for example, additional information regarding the ability of the eligible section 965(i) transferee to pay the eligible section 965(i) transferor's unpaid section 965(i) net tax liability), the eligible section 965(i) transferee must provide such information upon request.

(2) *Material misrepresentations and omissions.* If the Commissioner determines that an agreement filed by an eligible section 965(i) transferor and an eligible section 965(i) transferee contains a material misrepresentation or material omission, or if the eligible section 965(i) transferee does not provide the additional information requested under paragraph (c)(3)(iv)(C)(1) of this section within a reasonable timeframe communicated by the Commissioner to the eligible section 965(i) transferee, then the Commissioner may reject the transfer agreement (effective as of the date of the related triggering event). In the alternative, on the date that the Commissioner determines that the transfer agreement includes a material misrepresentation or material

omission, the Commissioner may determine that a triggering event has occurred with respect to the eligible section 965(i) transferee as of the date of the determination, such that the unpaid section 965(i) net tax liability of the eligible section 965(i) transferor that was assumed by the eligible section 965(i) transferee becomes due on the date of the determination.

(D) *Effect of assumption—(1) In general.* When the exception in this paragraph (c)(3)(iv) applies with respect to an eligible section 965(i) transferor and an eligible section 965(i) transferee, the eligible section 965(i) transferee assumes all of the outstanding obligations and responsibilities of the eligible section 965(i) transferor with respect to the section 965(i) net tax liability with respect to the S corporation as though the eligible section 965(i) transferee had included the section 965(a) inclusion in income. Accordingly, the eligible section 965(i) transferee is responsible for making payments and reporting with respect to any unpaid section 965(i) net tax liability with respect to the S corporation. In addition, for example, if a triggering event described in paragraph (c)(3)(ii) of this section occurs with respect to an eligible section 965(i) transferee, any unpaid portion of the section 965(i) net tax liability of the eligible section 965(i) transferor that was assumed by the eligible section 965(i) transferee becomes due on the date of such event, subject to any applicable exception in paragraph (c)(3)(iv) or (v) of this section.

(2) *Eligible section 965(i) transferor liability.* An eligible section 965(i) transferor remains jointly and severally liable for any unpaid installment payments of the eligible section 965(i) transferor that were assumed by the eligible section 965(i) transferee, as well as any penalties, additions to tax, or other additional amounts attributable to such net tax liability.

(v) *Coordination with section 965(h) election—(A) In general.* Subject to the limitation described in paragraph (c)(3)(v)(D) of this section, a shareholder that has made a section 965(i) election with respect to an S corporation, upon the occurrence of a triggering event with respect to such S

corporation, may make a section 965(h) election with respect to the portion of the shareholder's section 965(i) net tax liability with respect to such S corporation that is assessed as an addition to tax for the shareholder's taxable year that includes the triggering event pursuant to paragraph (c)(3)(i) of this section as if such portion were a section 965(h) net tax liability.

(B) *Timing for election.* A section 965(h) election made pursuant to section 965(i)(4) and paragraph (c)(3)(v)(A) of this section must be made no later than the due date (taking into account extensions, if any) for the shareholder's return for the taxable year in which the triggering event with respect to the S corporation occurs. Relief is not available under § 301.9100-2 or § 301.9100-3 to make a late election.

(C) *Due date for installment.* If a shareholder makes a section 965(h) election pursuant to section 965(i)(4) and paragraph (c)(3)(v)(A) of this section, the payment of the first installment (as described in paragraph (b)(1)(i) of this section) must be made no later than the due date (without regard to extensions) for the shareholder's return of tax for the taxable year in which the triggering event with respect to the S corporation occurs.

(D) *Limitation—(1) In general.* Notwithstanding paragraph (c)(3)(v)(A) of this section, if the triggering event with respect to an S corporation is a triggering event described in paragraph (c)(3)(ii)(B) of this section, then the section 965(h) election may only be made with the consent of the Commissioner.

(2) *Manner of obtaining consent—(i) In general.* In order to obtain the consent of the Commissioner as required by paragraph (c)(3)(v)(D)(1) of this section, the shareholder intending to make the section 965(h) election must file the agreement described in paragraph (c)(3)(v)(D)(4) of this section within 30 days of the occurrence of the triggering event, except as described in paragraph (c)(3)(v)(D)(2)(ii) of this section. The agreement must be filed in accordance with the rules provided in publications, forms, instructions, or other guidance. In addition, a duplicate copy of the agreement must be filed, with the shareholder's timely-filed return for

the taxable year during which the triggering event occurs (taking into account extensions, if any), along with the election statement described in paragraph (b)(2)(iii) of this section. Relief is not available under § 301.9100-2 or § 301.9100-3 to file an agreement late.

(ii) *Transition rule.* If a triggering event occurs on or before February 5, 2019, the agreement must be filed by March 7, 2019, in order to be considered timely filed.

(3) *Signature requirement.* The agreement that is filed within 30 days of the triggering event or by the due date specified in paragraph (c)(3)(v)(D)(2)(ii) of this section must be signed under penalties of perjury by the shareholder.

(4) *Terms of agreement.* The agreement under this paragraph (c)(3)(v)(D) must be entitled "Consent Agreement Under Section 965(i)(4)(D)" and must contain the following information and representations—

(i) A statement that the shareholder agrees to comply with all of the conditions and requirements of section 965(h) and paragraph (b) of this section, as well as any other applicable requirements in the section 965 regulations;

(ii) The name, address, and taxpayer identification number of the shareholder;

(iii) The amount of the section 965(i) net tax liability under section 965 remaining unpaid with respect to which the section 965(h) election is made pursuant to section 965(i)(4)(D) and paragraph (c)(3)(v)(A) of this section, as determined by the shareholder, which amount is subject to adjustment by the Commissioner; and

(iv) A representation that the shareholder is able to make the payments required under section 965(h) and paragraph (b) of this section with respect to the portion of the total net tax liability under section 965 remaining unpaid described in paragraph (c)(3)(v)(D)(4)(iii) of this section.

(v) A statement as to whether the leverage ratio of the shareholder and all subsidiary members of its affiliated group immediately following the triggering event exceeds three to one; and

(vi) Any additional information, representation, or certification required by the Commissioner in publications, forms, instructions, or other guidance.

(5) *Consent of Commissioner*—(i) *In general.* If a shareholder files an agreement in accordance with the provisions of paragraph (c)(3)(v)(D) of this section, the shareholder will be considered to have obtained the consent of the Commissioner for purposes of section 965(i)(4)(D) and paragraph (c)(3)(v)(D)(I) of this section. However, if the Commissioner reviews the agreement and determines that additional information is necessary, the shareholder must provide such information upon request.

(ii) *Material misrepresentations and omissions.* If the Commissioner determines that an agreement filed by a shareholder in accordance with the provisions of this paragraph (c)(3)(v)(D) contains a material misrepresentation or material omission, or if the shareholder does not provide the additional information requested under paragraph (c)(3)(v)(D)(5)(i) of this section within a reasonable timeframe communicated by the Commissioner to the shareholder, then the Commissioner may reject the agreement (effective as of the date of the related triggering event).

(6) *Leverage ratio.* For purposes of paragraph (c)(3)(v)(D)(4)(v) of this section, and except as otherwise provided in publications, forms, instructions, or other guidance, the term *leverage ratio* means the ratio that the total indebtedness of the shareholder bears to the sum of its money and all other assets reduced (but not below zero) by such total indebtedness. For this purpose, the amount taken into account with respect to any asset is the adjusted basis thereof for purposes of determining gain, and the amount taken into account with respect to any indebtedness with original issue discount is its issue price plus the portion of the original issue discount previously accrued as determined under the rules of section 1272 (determined without regard to subsection (a)(7) or (b)(4) thereof).

(4) *Joint and several liability.* If any shareholder of an S corporation makes a section 965(i) election, the S corporation is jointly and severally liable for the payment of the shareholder's section 965(i) net tax liability with respect to the S corporation, as well as any penalties, additions to tax, or other ad-

ditional amounts attributable to such net tax liability.

(5) *Extension of limitation on collection.* If an S corporation shareholder makes a section 965(i) election with respect to its section 965(i) net tax liability with respect to an S corporation, any limitation on the time period for the collection of the net tax liability shall not begin before the date of the triggering event with respect to the section 965(i) net tax liability.

(6) *Annual reporting requirement*—(i) *In general.* A shareholder that makes a section 965(i) election with respect to its section 965(i) net tax liability with respect to an S corporation is required to report the amount of its deferred net tax liability on its return of tax for the taxable year in which the election is made and on the return of tax for each subsequent taxable year until such net tax liability has been fully assessed.

(ii) *Failure to report.* If a shareholder fails to report the amount of its deferred net tax liability as required with respect to any taxable year by the due date (taking into account extensions, if any) for the return of tax for that taxable year, five percent of such deferred net tax liability will be assessed as an addition to tax for such taxable year.

(d) *Section 965(m) election and special rule for real estate investment trusts*—(1) *In general.* A real estate investment trust may elect under section 965(m) and this paragraph (d) to defer the inclusion in gross income (for purposes of the computation of real estate investment trust taxable income under section 857(b)) of its REIT section 965 amounts and include them in income according to the schedule described in paragraph (d)(2) of this section. This election is revocable only by including in gross income (for purposes of the computation of real estate investment trust taxable income under section 857(b)) the full amount of the REIT section 965 amounts.

(2) *Inclusion schedule for section 965(m) election.* If a real estate investment trust makes the section 965(m) election, the REIT section 965 amounts will be included in the real estate investment trust's gross income as follows—

(i) Eight percent of the REIT section 965 amounts in each taxable year in the five-taxable year period beginning with

the taxable year the amount would otherwise be included;

(ii) Fifteen percent of the REIT section 965 amounts in the first year following the five year period described in paragraph (d)(2)(i) of this section;

(iii) Twenty percent of the REIT section 965 amounts in the second year following the five year period described in paragraph (d)(2)(i) of this section; and

(iv) Twenty-five percent of the REIT section 965 amounts in the third year following the five year period described in paragraph (d)(2)(i) of this section.

(3) *Manner of making election*—(i) *Eligibility*. A real estate investment trust with section 965(a) inclusions may make the section 965(m) election.

(ii) *Timing*. A section 965(m) election must be made no later than the due date (taking into account extensions, if any) for the return for the first year of the five year period described in paragraph (d)(2)(i) of this section. Relief is not available under § 301.9100-2 or § 301.9100-3 to make a late election.

(iii) *Election statement*. Except as otherwise provided in publications, forms, instructions, or other guidance, to make a section 965(m) election, a real estate investment trust must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the person's return, to its return for the taxable year in which it would otherwise be required to include the REIT section 965 amounts in gross income. The statement must include the real estate investment trust's name, taxpayer identification number, REIT section 965 amounts, and the anticipated amounts of each portion of the REIT section 965 amounts described under paragraph (d)(2) of this section, and the statement must be filed in the manner prescribed in publications, forms, instructions, or other guidance. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (d)(3)(iii) if the real estate investment trust retains the original signed election statement in the manner specified by § 1.6001-1(e).

(4) *Coordination with section 965(h)*. A real estate investment trust that

makes the section 965(m) election may not also make a section 965(h) election for any year with respect to which a section 965(m) election is in effect.

(5) *Acceleration of inclusion*. If a real estate investment trust makes a section 965(m) election and subsequently there is a liquidation, sale, exchange, or other disposition of substantially all of the assets of the real estate investment trust (including in a title 11 or similar case), or a cessation of business by the real estate investment trust, any amount not yet included in gross income (for purposes of the computation of real estate investment trust taxable income under section 857(b)) as a result of the section 965(m) election will be so included as of the day before the date of the event. The unpaid portion of any tax liability with respect to such inclusion will be due on the date of the event (or in the case of a title 11 or similar case, the day before the petition is filed).

(6) *Treatment of section 965(a) inclusions of a real estate investment trust*. Regardless of whether a real estate investment trust has made a section 965(m) election, and regardless of whether it is a United States shareholder of a deferred foreign income corporation, any section 965(a) inclusions of the real estate investment trust are not taken into account as gross income of the real estate investment trust for purposes of applying paragraphs (2) and (3) of section 856(c) for any taxable year for which the real estate investment trust takes into account a section 965(a) inclusion, including pursuant to paragraph (d)(2) of this section.

(e) *Section 965(n) election*—(1) *In general*—(i) *General rule*. A person may elect to not take into account the amount described in paragraph (e)(1)(ii) of this section in determining its net operating loss under section 172 for the taxable year or in determining the amount of taxable income for such taxable year (computed without regard to the deduction allowable under section 172) that may be reduced by net operating loss carryovers or carrybacks to such taxable year under section 172. Except as provided in paragraph (e)(2)(ii)(B) of this section, the election for each taxable year is irrevocable. If the section 965(n) election creates or

increases a net operating loss under section 172 for the taxable year, then the taxable income of the person for the taxable year cannot be less than the amount described in paragraph (e)(1)(ii) of this section. The amount of deductions equal to the amount by which a net operating loss is created or increased for the taxable year by reason of the section 965(n) election (the *deferred amount*) is not taken into account in computing taxable income or the separate foreign tax credit limitations under section 904 for that year. The source and separate category (as defined in §1.904-5(a)(4)(v)) components of the deferred amount are determined in accordance with paragraph (e)(1)(iv) of this section.

(ii) *Applicable amount for section 965(n) election.* If a person makes a section 965(n) election, the amount referred to in paragraph (e)(1)(i) of this section is the sum of—

(A) The person's section 965(a) inclusions for the taxable year reduced by the person's section 965(c) deductions for the taxable year, and

(B) In the case of a domestic corporation, the taxes deemed paid under section 960(a)(1) for the taxable year with respect to the person's section 965(a) inclusions that are treated as dividends under section 78.

(iii) *Scope of section 965(n) election.* If a person makes a section 965(n) election, the election applies to both net operating losses for the taxable year for which the election is made and the net operating loss carryovers or carrybacks to such taxable year, each in their entirety. Any section 965(n) election made by the agent (within the meaning of §1.1502-77) of a consolidated group applies to all net operating losses available to the consolidated group, including all components of the consolidated net operating loss deduction (as defined in §1.1502-21(a)).

(iv) *Effect of section 965(n) election—*
(A) *In general.* The section 965(n) election for a taxable year applies solely for purposes of determining the amount of net operating loss under section 172 for the taxable year and determining the amount of taxable income for the taxable year (computed without regard to the deduction allowable under section 172) that may be reduced

by net operating loss carryovers or carrybacks to such taxable year under section 172. Paragraph (e)(1)(iv)(B) of this section provides a rule for coordinating the section 965(n) election's effect on section 172 with the computation of the separate foreign tax credit limitations under section 904.

(B) *Ordering rule for allocation and apportionment of deductions for purposes of the section 904 limitation.* The effect of a section 965(n) election with respect to a taxable year on the computation of the separate foreign tax credit limitations under section 904 is computed as follows and in the following order.

(1) Deductions, including those that create or increase a net operating loss for the taxable year by reason of the section 965(n) election, are allocated and apportioned under §§1.861-8 through 1.861-17 to the relevant statutory and residual groupings, taking into account the amount described in paragraph (e)(1)(ii) of this section. The source and separate category of the net operating loss carryover or carryback to the taxable year, if any, is determined under the rules of §1.904(g)-3(b), taking into account the amount described in paragraph (e)(1)(ii) of this section. Therefore, if the amount of the net operating loss carryover or carryback to the taxable year (as reduced by reason of the section 965(n) election) exceeds the U.S. source loss component of the net operating loss that is carried over under §1.904(g)-3(b)(3)(i), but such excess is less than the potential carryovers (or carrybacks) of the separate limitation losses that are part of the net operating loss, the potential carryovers (or carrybacks) are proportionately reduced as provided in §1.904(g)-3(b)(3)(ii) or (iii), as applicable.

(2) If a net operating loss is created or increased for the taxable year by reason of the section 965(n) election, the deferred amount (as defined in paragraph (e)(1)(i) of this section) is not allowed as a deduction for the taxable year. See paragraph (e)(1)(i) of this section. The deferred amount (which is the corresponding addition to the net operating loss for the taxable year) comprises a ratable portion of the deductions (including the deduction allowed under section 965(c)) allocated

and apportioned to each statutory and residual grouping under paragraph (e)(1)(iv)(B)(I) of this section. Such ratable portion equals the deferred amount multiplied by a fraction, the numerator of which is the deductions allocated and apportioned to the statutory or residual grouping under paragraph (e)(1)(iv)(B)(I) of this section and the denominator of which is the total deductions described in paragraph (e)(1)(iv)(B)(I) of this section. Accordingly, the fraction described in the previous sentence takes into account the deferred amount.

(3) Taxable income and the separate foreign tax credit limitations under section 904 for the taxable year are computed without taking into account any deferred amount. Deductions allocated and apportioned to the statutory and residual groupings under paragraph (e)(1)(iv)(B)(I) of this section, to the extent deducted in the taxable year rather than deferred to create or increase a net operating loss, are combined with income in the statutory and residual groupings to which those deductions are assigned in order to compute the amount of separate limitation income or loss in each separate category and U.S. source income or loss for the taxable year. Section 904(b), (f), and (g) are then applied to determine the applicable foreign tax credit limitations for the taxable year.

(2) *Manner of making election*—(i) *Eligibility*. A person with a section 965(a) inclusion may make the section 965(n) election.

(ii) *Timing*—(A) *In general*. A section 965(n) election must be made no later than the due date (taking into account extensions, if any) for the person's return for the taxable year to which the election applies. Relief is not available under § 301.9100-2 or § 301.9100-3 of this chapter to make a late election.

(B) *Transition rule*. In the case of a section 965(n) election made before June 21, 2019, the election may be revoked by attaching a statement, signed under penalties of perjury, to an amended return for the taxable year to which the election applies (the *election year*). The statement must include the person's name, taxpayer identification number, and a statement that the person revokes the section 965(n) election.

The amended return to which the statement is attached must be filed by—

(1) In the case of a revocation with respect to an election due before February 5, 2019, the due date (taking into account extensions, if any, or any additional time that would have been granted if the person had made an extension request) for the return for the taxable year following the election year; or

(2) In the case of a revocation with respect to an election due on or after February 5, 2019, the due date (taking into account extensions, if any, or any additional time that would have been granted if the person had made an extension request) for the return for the election year.

(iii) *Election statement*. Except as otherwise provided in publications, forms, instructions, or other guidance, to make a section 965(n) election, a person must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the person's return, to its return for the taxable year to which the election applies. The statement must include the person's name, taxpayer identification number, the amounts described in section 965(n)(2)(A) and paragraph (e)(1)(ii)(A) of this section and section 965(n)(2)(B) and paragraph (e)(1)(ii)(B) of this section, and the sum thereof, and the statement must be filed in the manner prescribed in publications, forms, instructions, or other guidance. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (e)(2)(iii) if the person making the election retains the original signed election statement in the manner specified by § 1.6001-1(e).

(3) *Examples*. The following examples illustrate the application of paragraph (e)(1)(iv) of this section.

(i) *Example 1: Net operating loss in inclusion year*—(A) *Facts*. USP, a domestic corporation, has a section 965(a) inclusion of \$100x and has a section 965(c) deduction of \$70x for its taxable year ending December 31, 2017. USP also includes in gross income the amount treated as dividends under section 78 of \$50x (the foreign taxes deemed paid

under section 960(a) for the taxable year with respect to USP's section 965(a) inclusion). The section 965(a) inclusion and the section 78 dividends are foreign source general category income. During the 2017 taxable year, USP also has U.S. source gross income of \$150x and other deductions of \$210x, comprising \$60x of interest expense and \$150x of other deductible expenses that are not definitely related to any gross income. USP's total tax book value of its assets, as determined under §§ 1.861-9(g)(2) and 1.861-9T(g)(3), is divided equally between assets that generate foreign source general category income and assets that generate U.S. source income. USP elects under paragraph (e)(1)(i) of this section to not take into account the amount described in paragraph (e)(1)(ii) of this section in determining its net operating loss under section 172 for the taxable year. Before taking into account the section 965(n) election, USP's total deductions are \$280x (\$210x + \$70x) and USP's taxable income is \$20x (\$100x + \$50x + \$150x - \$70x - \$210x).

(B) *Analysis.* (1) The amount described in paragraph (e)(1)(ii) of this section is \$80x (\$100x section 965(a) inclusion - \$70x section 965(c) deduction + \$50x section 78 dividends). Not taking into account the \$80x creates a net operating loss under section 172 of \$60x (\$20x taxable income without regard to the section 965(n) election - \$80x for the taxable year (the "deferred amount"). Under paragraph (e)(1)(i) of this section, the deferred amount of \$60x constitutes a net operating loss and is not allowed as a deduction for the taxable year. USP's taxable income for the year is \$80x (\$100x + \$50x + \$150x - (\$280x - \$60x)).

(2) Under paragraph (e)(1)(iv)(B)(1) of this section, deductions are allocated and apportioned under §§ 1.861-8 through 1.861-17 to the relevant statutory and residual groupings, taking into account the amount described in paragraph (e)(1)(ii) of this section. Under § 1.861-8(b), USP's section 965(c) deduction is definitely related to the section 965(a) inclusion, and, therefore, is allocated solely to foreign source general category income. Under § 1.861-9T, based on USP's asset values, the interest expense of \$60x is ratably apportioned

\$30x to foreign source general category income and \$30x to U.S. source income. Under § 1.861-8(c)(3), based on \$150x of gross U.S. source income and \$150x of gross foreign source general category income, the other expenses of \$150x are ratably apportioned \$75x to foreign source general category income and \$75x to U.S. source income. Therefore, USP's deductions allocated and apportioned to foreign source general category income are \$175x (\$70x + \$30x + \$75x) and its deductions allocated and apportioned to U.S. source income are \$105x (\$30x + \$75x).

(3) Under paragraph (e)(1)(iv)(B)(2) of this section, the deferred amount of \$60x comprises a ratable portion of the allocated and apportioned deductions. Therefore, \$37.5x ($\$60x \times \$175x / \$280x$) of the deferred amount comprises deductions allocated and apportioned to foreign source general category income, and \$22.5x ($\$60x \times \$105x / \$280x$) comprises deductions allocated and apportioned to U.S. source income.

(4) Under paragraph (e)(1)(iv)(B)(3) of this section, for purposes of the separate foreign tax credit limitation under section 904, foreign source general category income for the taxable year is computed without taking into account the \$37.5x of the deferred amount that is attributable to the deductions allocated and apportioned to the foreign source general category. Therefore, for the 2017 taxable year, foreign source general category income is \$12.5x (\$100x section 965(a) inclusion + \$50x section 78 dividends - (\$175x deductions - \$37.5x deferred amount)). The remaining taxable income of \$67.5x is U.S. source income.

(ii) *Example 2: Net operating loss carry-over to the inclusion year—(A) Facts.* USP, a domestic corporation, has a section 965(a) inclusion of \$100x and has a section 965(c) deduction of \$60x for its taxable year ending December 31, 2017. USP also includes in gross income the amount treated as dividends under section 78 of \$40x (the foreign taxes deemed paid under section 960(a) for the taxable year with respect to USP's section 965(a) inclusion). The section 965(a) inclusion and the section 78 dividends are foreign source general category income. USP also has U.S. source gross income of \$200x, foreign source

passive category gross income of \$100x, and other deductions of \$140x. Under § 1.861-8(b), USP's \$60x section 965(c) deduction is definitely related to the section 965(a) inclusion, and, therefore, is allocated solely to foreign source general category income. Under §§ 1.861-8 through 1.861-17, USP allocates and apportions the other \$140x of deductions as follows: \$40x to foreign source general category income, \$40x to foreign source passive category income, and \$60x to U.S. source income. USP has a net operating loss of \$260x for the 2016 taxable year consisting of a \$120x U.S.

source loss, a \$75x general category separate limitation loss, and a \$65x passive category separate limitation loss. Under paragraph (e)(1)(i) of this section, USP elects to not take into account the amount described in paragraph (e)(1)(ii) of this section in determining the amount of taxable income that may be reduced by net operating loss carryovers and carrybacks to the taxable year under section 172. USP's taxable income before taking into account the section 965(n) election and any net operating loss carryover deduction is \$240x:

TABLE 1 TO PARAGRAPH (e)(3)(ii)(A)

| | General | Passive | U.S. | Total |
|--------------------------------|---------|---------|-------|--------|
| Section 965(a) inclusion | \$100x | | | \$100x |
| Section 78 dividend | 40x | | | 40x |
| Other gross income | | 100x | 200x | 300x |
| Section 965(c) deduction | (60x) | | | (60x) |
| Other deductions | (40x) | (40x) | (60x) | (140x) |
| Net Income | 40x | 60x | 140x | 240x |

(B) *Analysis—(1)* The amount described in paragraph (e)(1)(ii) of this section is \$80x (\$100x section 965(a) inclusion – \$60x section 965(c) deduction + \$40x section 78 dividends). As a result of the section 965(n) election, the net operating loss deduction allowed in the 2017 taxable year is reduced from \$240x to \$160x (the amount of USP's taxable income reduced by the amount described in paragraph (e)(1)(ii) of this section).

(2) Under paragraph (e)(1)(iv)(B)(1) of this section, the source and separate category of the net operating loss deduction allowed in the 2017 taxable year is determined under the rules of § 1.904(g)-3(b), taking into account the amount described in paragraph (e)(1)(ii) of this section. Under § 1.904(g)-3(b)(3)(i), first the \$120x U.S. source component of the net operating loss is allocated to U.S. source income for the

2017 taxable year. Because the total tentative carryover under § 1.904(g)-3(b)(3)(ii) of \$100x (\$40x in the general category and \$60x in the passive category) exceeds the remaining net operating loss deduction of \$40x (\$160x – \$120x), the tentative carryover amount from each separate category is reduced proportionately, to \$16x (\$40x × \$40x/\$100x) for the general category and \$24x (\$40x × \$60x/\$100x) for the passive category. Accordingly, \$16x of the general category component of the net operating loss is carried forward, and \$24x of the passive category component of the net operating loss is carried forward and combined with income in the same respective categories for the 2017 taxable year. After allocation of the net operating loss carryover from 2016, USP's taxable income for the 2017 taxable year is as follows:

TABLE 1 TO PARAGRAPH (e)(3)(ii)(B)(2)

| | General | Passive | U.S. | Total |
|---------------------------------------|---------|---------|--------|--------|
| Net income before NOL deduction | \$40x | \$60x | \$140x | \$240x |
| NOL deduction | (16x) | (24x) | (120x) | (160x) |
| Net income after NOL deduction | 24x | 36x | 20x | 80x |

(f) *Election to use alternative method for calculating post-1986 earnings and profits*—(1) *Effect of election for specified foreign corporations that do not have a 52-53-week taxable year.* If an election is made under this paragraph (f) with respect to a specified foreign corporation that does not have a 52-53-week taxable year, the amount of the post-1986 earnings and profits (including a deficit) as of the E&P measurement date on November 2, 2017, is determined under paragraph (f)(3) of this section. The election described in this paragraph (f) is irrevocable. A specified foreign corporation that does not have a 52-53-week taxable year may not use the alternative method of determination in paragraph (f)(3) of this section for purposes of determining its post-1986 earnings and profits on the E&P measurement date on December 31, 2017.

(2) *Effect of election for specified foreign corporations that have a 52-53-week taxable year.* If an election is made under this paragraph (f) with respect to a specified foreign corporation that has a 52-53-week taxable year, the amount of the post-1986 earnings and profits (including a deficit) as of both E&P measurement dates is determined under paragraph (f)(3) of this section. The election described in this paragraph (f) is irrevocable.

(3) *Computation of post-1986 earnings and profits using alternative method.* With respect to an E&P measurement date, the post-1986 earnings and profits of a specified foreign corporation for which an election is properly made equals the sum of—

(i) The specified foreign corporation's post-1986 earnings and profits (including a deficit) determined as of the notional measurement date, as if it were an E&P measurement date, plus

(ii) The specified foreign corporation's annualized earnings and profits amount with respect to the notional measurement date.

(4) *Definitions*—(i) *52-53-week taxable year.* The term *52-53-week taxable year* means a taxable year described in §1.441-2(a)(1).

(ii) *Annualized earnings and profits amount.* The term *annualized earnings and profits amount* means, with respect to a specified foreign corporation, an E&P measurement date, and a notional

measurement date, the amount equal to the product of the number of days between the notional measurement date and the E&P measurement date (not including the former, but including the latter) multiplied by the daily earnings amount of the specified foreign corporation. The annualized earnings and profits amount is expressed as a negative number if the E&P measurement date precedes the notional measurement date.

(iii) *Daily earnings amount.* The term *daily earnings amount* means, with respect to a specified foreign corporation and a notional measurement date, the post-1986 earnings and profits (including a deficit) of the specified foreign corporation determined as of the close of the notional measurement date that were earned (or incurred) during the specified foreign corporation's taxable year that includes the notional measurement date, divided by the number of days that have elapsed in such taxable year as of the close of the notional measurement date.

(iv) *Notional measurement date.* The term *notional measurement date* means—

(A) With respect to an E&P measurement date of a specified foreign corporation with a 52-53-week taxable year, the closest end of a fiscal month to such E&P measurement date, and

(B) With respect to the E&P measurement date on November 2, 2017, of all specified foreign corporations not described in paragraph (f)(4)(iv)(A) of this section, October 31, 2017.

(5) *Manner of making election*—(i) *Eligibility.* An election with respect to a specified foreign corporation to use the alternative method of calculating post-1986 earnings and profits as of an E&P measurement date pursuant to this paragraph (f) must be made on behalf of the specified foreign corporation by a controlling domestic shareholder (as defined in §1.964-1(c)(5)) pursuant to the rules of §1.964-1(c)(3), except that the controlling domestic shareholder is not required to file the statement described in §1.964-1(c)(3)(ii).

(ii) *Timing.* An election under this paragraph (f) must be made no later than the due date (taking into account extensions, if any) for the person's return for the first taxable year in which

the person has a section 965(a) inclusion amount with respect to the specified foreign corporation or in which the person takes into account a specified E&P deficit with respect to the specified corporation for purposes of computing a section 965(a) inclusion amount with respect to another specified foreign corporation. Relief is not available under § 301.9100-2 or § 301.9100-3 to make a late election.

(iii) *Election statement.* Except as otherwise provided in publications, forms, instructions, or other guidance, to make an election under this paragraph (f), a person must attach a statement, signed under penalties of perjury consistent with the rules for signatures applicable to the person's return, to the person's return for the taxable year described in paragraph (f)(5)(ii) of this section. The statement must include the person's name, taxpayer identification number, and the name and taxpayer identification number, if any, of each of the specified foreign corporations with respect to which the election is made, and the statement must be filed in the manner prescribed in instructions or other guidance. The attachment of an unsigned copy of the election statement to the timely-filed return for the relevant taxable year satisfies the signature requirement of this paragraph (f)(5)(iii) if the person making the election retains the original signed election statement in the manner specified by § 1.6001-1(e).

(6) *Examples.* The following examples illustrate the application of this paragraph (f).

Example 1. (i)(A) *Facts.* FS, a foreign corporation, has a calendar year taxable year, and as of October 31, 2017, FS has post-1986 earnings and profits of 10,000u, 3,040u of which were earned during the taxable year that includes October 31, 2017. An election is properly made under paragraph (f)(5) of this section with respect to FS, allowing FS to determine its post-1986 earnings and profits under the alternative method with respect to its E&P measurement date on November 2, 2017.

(B) *Analysis.* As of the close of October 31, 2017, the notional measurement date with respect to the E&P measurement date on November 2, 2017, 304 days have elapsed in the taxable year of FS that includes October 31, 2017. Therefore, FS's daily earnings amount is 10u (3,040u divided by 304), and FS's annualized earnings and profits amount is

20u (10u multiplied by 2 (the number of days between the notional measurement date on October 31, 2017, and the E&P measurement date on November 2, 2017)). Accordingly, FS's post-1986 earnings and profits as of November 2, 2017, are 10,020u (its post-1986 earnings and profits as of October 31, 2017 (10,000u), plus its annualized earnings and profits amount (20u)).

Example 2. (ii)(A) *Facts.* The facts are the same as in paragraph (f)(6)(i)(A) of this section (the facts in *Example 1*), except that a deficit of 3,040u was incurred during the taxable year that includes October 31, 2017.

(B) *Analysis.* The analysis is the same as in paragraph (f)(6)(i)(B) of this section (the analysis in *Example 1*), except that FS's daily earnings amount is (10u) ((3,040u) divided by 304), and FS's annualized earnings and profits amount is (20u) ((10u) multiplied by 2 (the number of days between the notional measurement date on October 31, 2017, and the E&P measurement date on November 2, 2017)). Accordingly, FS's post-1986 earnings and profits as of November 2, 2017, are 9,980u (its post-1986 earnings and profits as of October 31, 2017 (10,000u), plus its annualized earnings and profits amount ((20u))).

(g) *Definitions.* This paragraph (g) provides definitions that apply for purposes of this section.

(1) *Deferred net tax liability.* The term *deferred net tax liability* means, with respect to any taxable year of a person, the amount of the section 965(i) net tax liability the payment of which has been deferred under section 965(i) and paragraph (c) of this section.

(2) *REIT section 965 amounts.* The term *REIT section 965 amounts* means, with respect to a real estate investment trust and a taxable year of the real estate investment trust, the aggregate amount of section 965(a) inclusions and section 965(c) deductions that would (but for section 965(m)(1)(B) and paragraph (d) of this section) be taken into account in determining the real estate investment trust's income for the taxable year.

(3) *Section 965(h) election.* The term *section 965(h) election* means the election described in section 965(h)(1) and paragraph (b)(1) of this section.

(4) *Section 965(h) net tax liability.* The term *section 965(h) net tax liability* means, with respect to a person that has made a section 965(h) election, the total net tax liability under section 965 reduced by the aggregate amount of

the person's section 965(i) net tax liabilities, if any, with respect to which section 965(i) elections are effective.

(5) *Section 965(i) election.* The term *section 965(i) election* means the election described in section 965(i)(1) and paragraph (c)(1) of this section.

(6) *Section 965(i) net tax liability.* The term *section 965(i) net tax liability* means, with respect to an S corporation and a shareholder of the S corporation, in the case in which a section 965(i) election is made, the amount determined pursuant to paragraph (g)(10)(i) of this section by adding before the word "over" in (g)(10)(i)(A) of this section "determined as if the only section 965(a) inclusions included in income by the person are domestic pass-through entity shares of section 965(a) inclusions by the S corporation with respect to deferred foreign income corporations of which the S corporation is a United States shareholder."

(7) *Section 965(m) election.* The term *section 965(m) election* means the election described in section 965(m)(1)(B) and paragraph (d)(1) of this section.

(8) *Section 965(n) election.* The term *section 965(n) election* means the election described in section 965(n)(1) and paragraph (e)(1)(i) of this section.

(9) *Specified individual.* The term *specified individual* means, with respect to a taxable year, a person described in §1.6081-5(a)(5) or (6) who receives an extension of time to file and pay under §1.6081-5(a) for the taxable year.

(10) *Total net tax liability under section 965—(i) General rule.* The term *total net tax liability under section 965* means, with respect to a person, the excess (if any) of—

(A) The person's net income tax for the taxable year in which the person includes a section 965(a) inclusion in income, over—

(B) The person's net income tax for the taxable year determined—

(1) Without regard to section 965, and

(2) Without regard to any income, deduction, or credit properly attributable to a dividend received (directly or through a chain of ownership described in section 958(a)) by the person (or, in the case of a domestic pass-through owner, by the person's domestic pass-through entity) from, or an inclusion under sections 951(a)(1)(B) and 956 with

respect to, a deferred foreign income corporation and paid during, or included with respect to, the deferred foreign income corporation's inclusion year.

(ii) *Net income tax.* For purposes of this paragraph (g)(10), the term *net income tax* means the regular tax liability (as defined in section 26(b)) reduced by the credits allowed under subparts A, B, and D of part IV of subchapter A of chapter 1 of subtitle A of the Internal Revenue Code.

(iii) *Foreign tax credits.* The foreign tax credit disregarded in determining net income tax determined under paragraph (g)(10)(i)(B) of this section includes the credit for foreign income taxes deemed paid with respect to section 965(a) inclusions or foreign income taxes deemed paid with respect to a dividend, including a distribution that would have been treated as a dividend in the absence of section 965. The foreign tax credit disregarded under paragraph (g)(10)(i)(B) of this section also includes the credit for foreign income taxes imposed on distributions of section 965(a) previously taxed earnings and profits or 965(b) previously taxed earnings and profits made in the taxable year in which the person includes a section 965(a) inclusion in income.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9846, 84 FR 14261, Apr. 10, 2019; T.D. 9866, 84 FR 29365, June 21, 2019; T.D. 9882, 84 FR 69120, Dec. 17, 2019]

§ 1.965-8 Affiliated groups (including consolidated groups).

(a) *Scope.* This section provides rules for applying section 965 and the section 965 regulations to members of an affiliated group (as defined in section 1504(a)), including members of a consolidated group (as defined in §1.1502-1(h)). Paragraph (b) of this section provides guidance regarding the application of section 965(b)(5) to determine the section 965(a) inclusion amounts of a member of an affiliated group. Paragraph (c) of this section provides guidance for designating the source of aggregate unused E&P deficits. Paragraph (d) provides rules regarding earning and profits and stock basis adjustments. Paragraph (e) of this section provides rules that treat members of a consolidated group as a single person

for certain purposes. Paragraph (f) of this section provides definitions that apply for purposes of this section. Paragraph (g) of this section provides examples illustrating the application of this section.

(b) *Reduction of E&P net surplus shareholder's pro rata share of the section 965(a) earnings amount of a deferred foreign income corporation by the allocable share of the applicable share of the aggregate unused E&P deficit*—(1) *In general.* This paragraph (b) applies after the application of § 1.965-1(b)(2) for purposes of determining the section 965(a) inclusion amount with respect to a deferred foreign income corporation of a section 958(a) U.S. shareholder that is both an E&P net surplus shareholder and a member of an affiliated group in which not all members are members of the same consolidated group. If this paragraph (b) applies, the U.S. dollar amount of the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation is further reduced (but not below zero) by the deferred foreign income corporation's allocable share of the section 958(a) U.S. shareholder's applicable share of the affiliated group's aggregate unused E&P deficit.

(2) *Consolidated group as part of an affiliated group.* If some, but not all, members of an affiliated group are members of a consolidated group, then the consolidated group is treated as a single member of the affiliated group for purposes of § 1.965-1(b)(2) and paragraph (b)(1) of this section.

(c) *Designation of portion of excess aggregate foreign E&P deficit taken into account*—(1) *In general.* This paragraph (c) provides rules for designating the source of an aggregate unused E&P deficit of an affiliated group that is not also a consolidated group taken into account under section 965(b)(5) and paragraph (b) of this section if the amount described in paragraph (f)(1)(i)(A) of this section with respect to the affiliated group exceeds the amount described in paragraph (f)(1)(i)(B) of this section with respect to the affiliated group. If this paragraph (c)(1) applies, each member of the affiliated group that is an E&P net deficit shareholder must designate by

maintaining in its books and records a statement (identical to the statement maintained by all other such members) setting forth the portion of the excess aggregate foreign E&P deficit of the E&P net deficit shareholder taken into account under section 965(b)(5) and paragraph (b) of this section. See § 1.965-2(d)(2)(ii)(B) for a rule for designating the portion of a section 958(a) U.S. shareholder's pro rata share of a specified E&P deficit of an E&P deficit foreign corporation taken into account under section 965(b), § 1.965-1(b)(2), and paragraph (b) of this section, as applicable.

(2) *Consolidated group as part of an affiliated group.* If some, but not all, members of an affiliated group are properly treated as members of a consolidated group, then the consolidated group is treated as a single member of the affiliated group for purposes of applying paragraph (c)(1) of this section.

(d) *Adjustments to earning and profits and stock basis.*

(1) [Reserved]

(2) *Consolidated groups.* See § 1.1502-33(d)(1) for adjustments to members' earnings and profits and § 1.1502-32(b)(3) for adjustments to members' basis.

(e) *Treatment of a consolidated group or other affiliated group as a single section 958(a) U.S. shareholder or a single person*—(1) *In general.* All members of a consolidated group that are section 958(a) U.S. shareholders of a specified foreign corporation are treated as a single section 958(a) U.S. shareholder for purposes of section 965(b), § 1.965-1(b)(2), and § 1.965-3. Furthermore, all members of a consolidated group are treated as a single person for purposes of paragraphs (h), (k), and (n) of section 965 and § 1.965-7. In addition, all members of an affiliated group that are section 958(a) U.S. shareholders of a specified foreign corporation are treated as a single section 958(a) U.S. shareholder for purposes of § 1.965-2(f). Thus, for example, any election governed by section 965(h) and § 1.965-7(b) must be made by the agent (within the meaning of § 1.1502-77) of the group as a single election on behalf of all members of the consolidated group. Similarly, the determination of whether the transfer of assets by one member to a non-member of the consolidated group would

constitute an acceleration event under § 1.965-7(b)(3)(ii)(B) takes into account all of the assets of the consolidated group, which for purposes of this determination, includes all of the assets of each consolidated group member. In analyzing issues relating to the transfer of assets of a consolidated group, appropriate adjustments are made to prevent the duplication of assets or asset value.

(2) *Limitation.* Paragraph (e)(1) of this section does not apply to treat all members of a consolidated group as a single section 958(a) U.S. shareholder or a single person, as applicable, for purposes of determining the amount of any member's inclusion under section 951 (including a section 965(a) inclusion), the foreign income taxes deemed paid with respect to a section 965(a) inclusion (see sections 960 and 902), or any purpose other than those specifically listed in paragraph (e)(1) of this section or another provision of the section 965 regulations.

(3) *Determination of section 965(c) deduction amount.* For purposes of determining the section 965(c) deduction amount of any section 958(a) U.S. shareholder that is a member of a consolidated group, the aggregate foreign cash position of the section 958(a) U.S. shareholder is equal to the aggregate section 965(a) inclusion amount of the section 958(a) U.S. shareholder multiplied by the group cash ratio of the consolidated group.

(f) *Definitions.* This paragraph (f) provides definitions that apply for purposes of applying the section 965 regulations to members of an affiliated group, including members of a consolidated group.

(1) *Aggregate unused E&P deficit*—(i) *General rule.* The term *aggregate unused E&P deficit* means, with respect to an affiliated group, the lesser of—

(A) The sum of the excess aggregate foreign E&P deficit with respect to each E&P net deficit shareholder that is a member of the affiliated group, or

(B) The amount determined under paragraph (f)(3)(ii) of this section.

(ii) *Reduction with respect to E&P net deficit shareholders that are not wholly owned by the affiliated group.* If the group ownership percentage of an E&P net deficit shareholder is less than 100

percent, the amount of the excess aggregate foreign E&P deficit with respect to the E&P net deficit shareholder that is taken into account under paragraph (f)(1)(i) of this section is the product of the group ownership percentage multiplied by the excess aggregate foreign E&P deficit.

(2) *Allocable share.* The term *allocable share* means, with respect to a deferred foreign income corporation and an E&P net surplus shareholder's applicable share of an aggregate unused E&P deficit of an affiliated group, the product of the E&P net surplus shareholder's applicable share of the affiliated group's aggregate unused E&P deficit and the ratio described in § 1.965-1(f)(11) with respect to the deferred foreign income corporation.

(3) *Applicable share.* The term *applicable share* means, with respect to an E&P net surplus shareholder and an aggregate unused E&P deficit of an affiliated group, the amount that bears the same proportion to the affiliated group's aggregate unused E&P deficit as—

(i) The product of—

(A) The E&P net surplus shareholder's group ownership percentage, multiplied by

(B) The amount that would (but for section 965(b)(5) and paragraph (b) of this section) constitute the E&P net surplus shareholder's aggregate section 965(a) inclusion amount, bears to

(ii) The aggregate amount determined under paragraph (f)(3)(i) of this section with respect to all E&P net surplus shareholders that are members of the group.

(4) *Consolidated group aggregate foreign cash position.* The term *consolidated group aggregate foreign cash position* means, with respect to a consolidated group, the aggregate foreign cash position (as defined in § 1.965-1(f)(8)(i)) determined by treating each member of the consolidated group that is a section 958(a) U.S. shareholder as a single section 958(a) U.S. shareholder pursuant to paragraph (e)(1) of this section.

(5) *E&P net deficit shareholder.* The term *E&P net deficit shareholder* means a section 958(a) U.S. shareholder that has an excess aggregate foreign E&P deficit.

(6) *E&P net surplus shareholder.* The term *E&P net surplus shareholder* means a section 958(a) U.S. shareholder that would (but for section 965(b)(5) and paragraph (b) of this section) have an aggregate section 965(a) inclusion amount greater than zero.

(7) *Excess aggregate foreign E&P deficit.* The term *excess aggregate foreign E&P deficit* means, with respect to a section 958(a) U.S. shareholder, the amount, if any, by which the amount described in § 1.965-1(f)(9)(i) with respect to the section 958(a) U.S. shareholder exceeds the amount described in § 1.965-1(f)(9)(ii) with respect to the section 958(a) U.S. shareholder.

(8) *Group cash ratio.* The term *group cash ratio* means, with respect to a consolidated group, the ratio of—

(i) The consolidated group aggregate foreign cash position, to

(ii) The sum of the aggregate section 965(a) inclusion amounts of all members of the consolidated group.

(9) *Group ownership percentage.* The term *group ownership percentage* means, with respect to a section 958(a) U.S. shareholder that is a member of an affiliated group, the percentage of the value of the stock of the United States shareholder which is held by other includible corporations in the affiliated group. Notwithstanding the preceding sentence, the group ownership percentage of the common parent of the affiliated group is 100 percent. Any term used in this paragraph (f)(9) that is also used in section 1504 has the same meaning as when used in such section. Additionally, if the term is used in the context of a rule for which all members of a consolidated group are treated as a single section 958(a) U.S. shareholder under paragraph (e)(1) of this section, then the group ownership percentage is determined solely with respect to the value of the stock of the common parent of the consolidated group held by other includible corporations that are not members of the consolidated group.

(g) *Examples.* The following examples illustrate the application of this section.

Example 1. (1) *Application of affiliated group rule—(i) Facts—(A) In general.* USP owns all of the stock of USS1, USS2, and USS3. Each of USP, USS1, USS2, and USS3 is a domestic corporation and is a member of an affiliated

group of which USP is the common parent (the “USP Group”). The USP Group has not elected to file a consolidated federal income tax return. USS1 owns all of the stock of CFC1 and CFC2, USS2 owns all of the stock of CFC3, and USS3 owns all of the stock of CFC4. Each of CFC1, CFC2, CFC3, and CFC4 is a controlled foreign corporation within the meaning of section 957(a), and, therefore, each is a specified foreign corporation under section 965(e) and § 1.965-1(f)(45). Each of USP, USS1, USS2, USS3, CFC1, CFC2, CFC3, and CFC4 has the calendar year as its taxable year.

(B) *Facts relating to section 965.* CFC1 and CFC3 are deferred foreign income corporations with section 965(a) earnings amounts of \$600x and \$300x, respectively. CFC1 and CFC3 have cash positions of \$0x and \$50x, respectively, on each of their cash measurement dates. CFC2 and CFC4 are E&P deficit foreign corporations with specified E&P deficits of \$400x and \$100x, respectively. CFC2 and CFC4 have cash positions of \$100x and \$50x, respectively, on each of their cash measurement dates. The cash positions all consist solely of cash. CFC1, CFC2, CFC3, and CFC4 all use the U.S. dollar as their functional currency.

(ii) *Analysis—(A) Section 965(a) inclusion amounts before application of section 965(b)(5).* USS1 is a section 958(a) U.S. shareholder with respect to CFC1 and CFC2; USS2 is a section 958(a) U.S. shareholder with respect to CFC3; and USS3 is a section 958(a) U.S. shareholder with respect to CFC4. USS1’s pro rata share of CFC1’s section 965(a) earnings amount is \$600x. Under section 965(b)(3)(A) and § 1.965-1(f)(9), USS1’s aggregate foreign E&P deficit is \$400x, the lesser of the aggregate of USS1’s pro rata share of the specified E&P deficit of each E&P deficit foreign corporation (\$400x) and the amount described in § 1.965-1(f)(9)(ii) with respect to USS1 (\$600x). Under section 965(b) and § 1.965-1(b)(2), in determining its section 965(a) inclusion amount with respect to CFC1, USS1 reduces its pro rata share of the U.S. dollar amount of section 965(a) earnings amount of CFC1 by CFC1’s allocable share of USS1’s aggregate foreign E&P deficit. CFC1’s allocable share of USS1’s aggregate foreign E&P deficit is \$400x, which is the product of USS1’s aggregate foreign E&P deficit (\$400x) and 1, which is the ratio determined by dividing USS1’s pro rata share of the section 965(a) earnings amount of CFC1 (\$600x), by the amount described in § 1.965-1(f)(9)(ii) with respect to USS1 (\$600x). Accordingly, under section 965(b) and § 1.965-1(b)(2) (before applying section 965(b)(5) and paragraph (b) of this section), USS1’s section 965(a) inclusion amount with respect to CFC1 would be \$200x (USS1’s pro rata share of the section 965(a) earnings amount of CFC1 of \$600x reduced by CFC1’s allocable share of USS1’s aggregate foreign E&P deficit of \$400x). Under section 965(b)

and §1.965-1(b)(2) (before applying section 965(b)(5) and paragraph (b) of this section), USS2's section 965(a) inclusion amount with respect to CFC3 would be \$300x (USS2's pro rata share of the section 965(a) earnings amount of CFC3).

(B) *Application of section 965(b)(5)*—(1) *Determination of E&P net surplus shareholders and E&P net deficit shareholders.* USS1 is an E&P net surplus shareholder because it would have an aggregate section 965(a) inclusion amount of \$200x but for the application of section 965(b)(5) and paragraph (b) of this section. USS2 is also an E&P net surplus shareholder because it would have an aggregate section 965(a) inclusion amount of \$300x but for the application of section 965(b)(5) and paragraph (b) of this section. USS3 is an E&P net deficit shareholder because it has an excess aggregate foreign E&P deficit of \$100x.

(2) *Determining section 965(a) inclusion amounts under section 965(b)(5).* Under section 965(b) and paragraph (b) of this section, for purposes of determining the section 965(a) inclusion amount of a section 958(a) U.S. shareholder with respect to a deferred foreign income corporation, if, after applying §1.965-1(b)(2), the section 958(a) U.S. shareholder is an E&P net surplus shareholder, then the U.S. dollar amount of the section 958(a) U.S. shareholder's pro rata share of the section 965(a) earnings amount of the deferred foreign income corporation is further reduced (but not below zero) by the deferred foreign income corporation's allocable share of the section 958(a) U.S. shareholder's applicable share of the affiliated group's aggregate unused E&P deficit. USS3 is the only E&P net deficit shareholder in the USP Group, and, therefore, the aggregate unused E&P deficit of the USP Group is equal to USS3's excess aggregate foreign E&P deficit (\$100x). The applicable share of the USP Group's aggregate unused E&P deficit of each of USS1 and USS2, respectively, is an amount that bears the same proportion to the USP Group's aggregate unused E&P deficit as the product of the group ownership percentage of USS1 and USS2, respectively, multiplied by the amount that would (but for section 965(b)(5) and paragraph (b) of this section) constitute the aggregate section 965(a) inclusion amount of USS1 and USS2, respectively, bears to the aggregate of such amounts with respect to both USS1 and USS2. Therefore, USS1's applicable share of the USP Group's aggregate unused E&P deficit is \$40 ($\$100x \times (\$200x/(\$200x + \$300x))$) and USS2's applicable share of the USP Group's aggregate unused E&P deficit is \$60x ($\$100x \times (\$300x/(\$200x + \$300x))$). Because USS1 is a section 958(a) U.S. shareholder with respect to only one deferred foreign income corporation, the entire \$40x of USS1's applicable share of the USP Group's aggregate unused E&P deficit is treated as CFC1's allocable share of USS1's

applicable share of the USP Group's aggregate unused E&P deficit, and thus USS1's section 965(a) inclusion amount with respect to CFC1 is reduced to \$160x ($\$200x - \$40x$). Because USS2 is a section 958(a) U.S. shareholder with respect to only one deferred foreign income corporation, the entire \$60x of USS2's applicable share of the USP Group's aggregate unused E&P deficit is treated as CFC3's allocable share of USS2's applicable share of the USP Group's aggregate unused E&P deficit, and thus USS2's section 965(a) inclusion amount with respect to CFC3 is reduced to \$240x ($\$300x - \$60x$).

(C) *Aggregate foreign cash position.* Under section 965(c) and §1.965-1(c), a section 958(a) U.S. shareholder that includes a section 965(a) inclusion amount in income is allowed a deduction equal to the section 965(c) deduction amount. The section 965(c) deduction amount is computed by taking into account the aggregate foreign cash position of the section 958(a) U.S. shareholder. Under §1.965-1(f)(8)(i), the aggregate foreign cash position of USS1 is \$100x, and the aggregate foreign cash position of USS2 is \$50x.

(D) *Section 965(c) deduction amount.* The section 965(c) deduction amount of USS1 is \$102x, which is equal to (i) USS1's 8 percent rate equivalent percentage (77.142857%) of its 8 percent rate amount for USS1's 2017 year (\$60x ($\$160x - \$100x$)), plus USS1's 15.5 percent rate equivalent percentage (55.7142857%) of its 15.5 percent rate amount for USS1's 2017 year (\$100x). The section 965(c) deduction amount of USS2 is \$174.43x, which is equal to (i) USS2's 8 percent rate equivalent percentage (77.142857%) of its 8 percent rate amount for USS2's 2017 year (\$190x ($\$240x - \$50x$)), plus USS2's 15.5 percent rate equivalent percentage (55.7142857%) of its 15.5 percent rate amount for USS2's 2017 year (\$50x). Because USS3 has no section 965(a) inclusion amount, it has no section 965(c) deduction amount and therefore is not allowed a section 965(c) deduction.

Example 2—(2) *Application to members of a consolidated group*—(i) *Facts.* The facts are the same as in paragraph (g)(1)(i) of this section (the facts in *Example 1*), except that the USP Group has elected to file a consolidated return.

(ii) *Analysis*—(A) *Section 965(a) inclusion amount*—(1) *Single section 958(a) U.S. shareholder treatment.* Because each of USS1, USS2, and USS3 is a section 958(a) U.S. shareholder of a specified foreign corporation and is a member of a consolidated group, paragraph (e)(1) of this section applies to treat USS1, USS2, and USS3 as a single section 958(a) U.S. shareholder for purposes of section 965(b) and §1.965-1(b)(2).

(2) *Determination of inclusion amount.* The single section 958(a) U.S. shareholder composed of USS1, USS2, and USS3 is a section 958(a) U.S. shareholder with respect to CFC1, CFC2, CFC3, and CFC4. Under §1.965-1(b)(2),

in determining USS1's section 965(a) inclusion amount, the single section 958(a) U.S. shareholder decreases its pro rata share of the U.S. dollar amount of the section 965(a) earnings amount of CFC1 by CFC1's allocable share of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder. CFC1's allocable share of the aggregate foreign E&P deficit is \$333.33x, which is the product of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder (\$500x (\$400x + \$100x)) and .67, which is the ratio determined by dividing its pro rata share of the section 965(a) earnings amount of CFC1 (\$600x) by the amount described in § 1.965-1(f)(9)(ii) with respect to the single section 958(a) U.S. shareholder (\$900x (\$600x + \$300x)). Therefore, USS1's section 965(a) inclusion amount with respect to CFC1 is \$266.67 (its pro rata share of the section 965(a) earnings amount of CFC1 (\$600) less CFC1's allocable share of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder (\$333.33x)). Similarly, under § 1.965-1(b)(2), in determining the section 965(a) inclusion amount of USS2, the single section 958(a) U.S. shareholder decreases its pro rata share of the U.S. dollar amount of the section 965(a) earnings amount of CFC3 by CFC3's allocable share of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder. CFC3's allocable share of the aggregate foreign E&P deficit is \$166.67x, which is the product of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder (\$500x) and .33, which is the ratio determined by dividing its pro rata share of the section 965(a) earnings amount of CFC3 (\$300x) by the amount described in § 1.965-1(f)(9)(ii) with respect to the single section 958(a) U.S. shareholder (\$900x (\$600x + \$300x)). Therefore, USS2's section 965(a) inclusion amount with respect to CFC3 is \$133.33x (its pro rata share of the section 965(a) earnings amount of CFC3 (\$300x) less CFC3's allocable share of the aggregate foreign E&P deficit of the single section 958(a) U.S. shareholder (\$166.67x)).

(B) *Consolidated group aggregate foreign cash position.* Because USS1 and USS2 are members of a consolidated group, the aggregate foreign cash position of each of USS1 and USS2 is determined under paragraph (e)(3) of this section. Under paragraph (e)(3) of this section, the aggregate foreign cash position of each of USS1 and USS2 is equal to the aggregate section 965(a) inclusion amount of USS1 and USS2, respectively, multiplied by the group cash ratio of the USP Group, as determined pursuant to paragraph (f)(8) of this section. The group cash ratio of the USP Group is .50, which is the ratio of the USP Group's consolidated group aggregate foreign cash position (\$200x (\$50x + \$100x + \$50x)) and the sum of the aggregate section 965(a) inclusion amounts of all members of the USP Group (\$400x (\$266.67x + \$133.33x)). Therefore,

under paragraph (e)(3) of this section, the aggregate foreign cash positions of USS1 and USS2 are, respectively, \$133.34x ($\$266.67x \times (\$200x/\$400x)$) and \$66.67 ($\$133.33x \times (\$200x/400x)$).

(C) *Section 965(c) deduction amount.* The section 965(c) deduction amount of USS1 is \$177.14x, which is equal to (i) USS1's 8 percent rate equivalent percentage (77.1428571%) of its 8 percent rate amount for USS1's 2017 year (\$133.33x (\$266.67x - \$133.34x)), plus USS1's 15.5 percent rate equivalent percentage (55.7142857%) of its 15.5 percent rate amount for USS1's 2017 year (\$133.34x). The section 965(c) deduction amount of USS2 is \$88.56x, which is equal to (i) USS2's 8 percent rate equivalent percentage (77.1428571%) of its 8 percent rate amount for USS2's 2017 year (\$66.66x (\$133.33x - \$66.67x)), plus USS2's 15.5 percent rate equivalent percentage (55.7142857%) of its 15.5 percent rate amount for USS2's 2017 year (\$66.67x). Because USS3 has no section 965(a) inclusion amount, it has no section 965(c) deduction amount and therefore is not allowed a section 965(c) deduction.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9846, 84 FR 14261, Apr. 10, 2019]

§ 1.965-9 Applicability dates.

(a) *In general.* Except as otherwise provided in this section, §§ 1.965-1 through 1.965-8 apply beginning the last taxable year of a foreign corporation that begins before January 1, 2018, and with respect to a United States person, beginning the taxable year in which or with which such taxable year of the foreign corporation ends.

(b) *Applicability dates for rules disregarding certain transactions.* Section 1.965-4 applies regardless of whether, with respect to a foreign corporation, the transaction, effective date of a change in method of accounting, effective date of an entity classification election, or specified payment described in § 1.965-4 occurred before the first day of the foreign corporation's last taxable year that begins before January 1, 2018, or, with respect to a United States person, the transaction, effective date of a change in method of accounting, effective date of an entity classification election, or specified payment described in § 1.965-4 occurred before the first day of the taxable year of the United States person in which or with which the taxable year of the foreign corporation ends.

(c) *Applicability date for certain portions of § 1.965-5.* Paragraph (c)(1)(iii) of

§1.965-5 applies to taxable years of foreign corporations that both begin after December 31, 2017, and end on or after December 4, 2018, and with respect to a United States person, to the taxable years in which or with which such taxable years of the foreign corporations end. Section 1.965-5(b)(2) applies to taxable years of foreign corporations that end on or after December 16, 2019, and with respect to a United States person, to the taxable years in which or with which such taxable years of the foreign corporations end.

[T.D. 9846, 84 FR 1875, Feb. 5, 2019, as amended by T.D. 9882, 84 FR 69120, Dec. 17, 2019; T.D. 9922, 85 FR 72072, Nov. 12, 2020]

EXPORT TRADE CORPORATIONS

§ 1.970-1 Export trade corporations.

(a) *In general.* Sections 970 through 972 provide in general that if a controlled foreign corporation is an export trade corporation for any taxable year, the subpart F income of such corporation shall, subject to limitations provided by section 970(a) and paragraph (b) of this section, be reduced by so much of such corporation's export trade income as constitutes foreign base company income. To the extent subpart F income of an export trade corporation is reduced under section 970 and this section, an amount is required by section 970(b) and paragraph (c) of this section to be included in gross income of United States shareholders of the corporation if there is a subsequent decrease in such corporation's investments in export trade assets. See section 971(a) and paragraph (a) of §1.971-1 for definition of the term "export trade corporation", section 971(b) and paragraph (b) of §1.971-1 for definition of the term "export trade income", and section 971(c) and paragraph (c) of §1.971-1 for definition of the term "export trade assets".

(b) *Amount by which export trade income shall reduce subpart F income—(1) Deductible amount.* The subpart F income, determined as provided in section 952 and the regulations thereunder but without regard to section 970 and this paragraph, of a controlled foreign corporation which is an export trade corporation for its taxable year shall be reduced by an amount equal to so

much of its export trade income as constitutes foreign base company income for such taxable year, but only to the extent that such amount of export trade income does not exceed the limitation determined under subparagraph (2) of this paragraph for such taxable year. See section 972 and §1.972-1 for rules relating to the consolidation of export trade corporations for purposes of determining the limitations described in subparagraph (2) of this paragraph.

(2) *Limitation on the amount of export trade income deductible from subpart F income.* The amount by which subpart F income of an export trade corporation may be reduced for any taxable year under subparagraph (1) of this paragraph may not exceed whichever of the following limitations is the smallest:

(i) The amount which is equal to 150 percent of the export promotion expenses, as defined in section 971(d) and paragraph (d) of §1.971-1, of the export trade corporation paid or incurred during the taxable year which are properly allocable to the receipt or the production of so much of its export trade income as constitutes foreign base company income for such taxable year;

(ii) The amount which is equal to 10 percent of the gross receipts (other than from commissions, fees, or other compensation for services), plus 10 percent of the gross amount upon the basis of which are computed commissions, fees, or other compensation for services included in gross receipts, of the export trade corporation received or accrued during the taxable year from, or in connection with, the sale, installation, operation, maintenance, or use of property in respect of which such corporation derives export trade income which constitutes foreign base company income for such taxable year; or

(iii) The amount which bears the same ratio to the increase in investments in export trade assets, as defined in section 970(c)(2) and paragraph (d)(2) of this section, of the export trade corporation for its taxable year as the export trade income which constitutes foreign base company income of such corporation for such taxable year bears to the entire export trade income of the corporation for such year.

Under subdivision (ii) of this subparagraph, in the case of minimum or maximum fee arrangements, the determination shall be made on the basis of the actual gross amounts with respect to which such fees are paid, rather than on the basis of the amounts upon which such minimum or maximum fees are computed. All determinations of limitations under this subparagraph shall be made on an aggregate basis and not with respect to separate items or categories of income described in paragraph (b)(1) of § 1.971-1.

(3) *Determination of export promotion expense limitation.* For purposes of determining the limitation contained in subparagraph (2)(i) of this paragraph for any taxable year of the export trade corporation, there shall be taken into account with respect to those items or categories of export trade income which constitute foreign base company income the entire amount of those export promotion expenses which are directly related to such items or categories of income and a ratable part of any other export promotion expenses which are indirectly related to such items or categories of income, except that no export promotion expense shall be allocated to an item or category of income to which it clearly does not apply and no deduction allowable to such corporation under section 882(c) and the regulations thereunder shall be taken into account.

(4) *Application of section 482.* The limitations provided in section 970(a) and subparagraph (2) of this paragraph shall not affect the authority of the district director to apply the provisions of section 482 and the regulations thereunder, relating to allocation of income and deductions among taxpayers.

(5) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as the taxable year. For 1963, A Corporation's subpart F income determined under section 952 and the regulations thereunder is \$35, the total of its gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph is \$310, its export promotion expenses properly allocable to its export trade income which constitutes foreign base company income are \$18, its increase in invest-

ments in export trade assets is \$32, and its export trade income is \$40, of which \$30 constitutes foreign base company income and \$10 does not constitute foreign base company income. The subpart F income of A Corporation for 1963 as reduced under section 970(a) is \$11, determined as follows:

| | | | |
|--|------|------|----|
| (i) Subpart F income | | \$35 | |
| (ii) Less: \$30 export trade income which constitutes foreign base company income, but deduction not to exceed the smallest of the following limitations (smallest of (a), (b), or (c)): | | | |
| (a) 150 percent of allocable export promotion expenses referred to in subparagraph (2)(i) of this paragraph (150% of \$18) | \$27 | | |
| (b) 10 percent of gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph (10% of \$310) | \$31 | | |
| (c) Amount which bears to the increase in investments in export trade assets (\$32) the same ratio as the export trade income which constitutes foreign base company income (\$30) bears to total export trade income (\$40) (75% [\$30/\$40] of \$32) | \$24 | \$24 | |
| (iii) Subpart F income as reduced under section 970(a) | | | 11 |

Example 2. The facts are the same as in example 1, except that A Corporation's export promotion expenses properly allocable to export trade income which constitutes foreign base company income are \$14 instead of \$18. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is \$21 (150% of \$14) instead of \$24. The subpart F income as reduced under section 970(a) is \$14 (\$35 less \$21).

Example 3. The facts are the same as in example 1, except that the total amount of A Corporation's gross receipts and gross amounts referred to in subparagraph (2)(ii) of this paragraph is \$200 instead of \$310. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is \$20 (10 percent of \$200) instead of \$24. The subpart F income as reduced under section 970(a) is \$15 (\$35 less \$20).

Example 4. The facts are the same as in example 1, except that A Corporation derives its export trade income which constitutes foreign base company income of \$30 in a service arrangement with M Corporation under which it receives as a fee 5 percent of the gross receipts from M Corporation's sales or a minimum fee of \$30. Such gross receipts are \$220. The gross amounts taken into account in determining the limitation under subparagraph (2)(ii) of this paragraph are \$220. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is \$22 (10 percent of \$220) instead of \$24. The subpart F income as reduced under section 970(a) is \$13 (\$35 minus \$22).

Example 5. The facts are the same as in example 1, except that A Corporation derives its export trade income which constitutes foreign base company income of \$30 in a service arrangement with M Corporation under which it receives as a fee 9 percent of the gross receipts from M Corporation's sales or a maximum fee of \$30. Such gross receipts are \$400. In such instance, the limitation under (ii)(b) of example 1 is \$40 (10 percent of \$400) instead of \$31. The applicable limitation on the amount deductible from A Corporation's subpart F income for 1963 is \$24, the smallest of the three limitations. The subpart F income as reduced under section 970(a) is \$11 (\$35 less \$24).

(c) *Withdrawal of previously excluded export trade income*—(1) *Inclusion of withdrawal in income of United States shareholders.* If—

(i) A controlled foreign corporation was an export trade corporation for any taxable year,

(ii) Such corporation in any such taxable year derived subpart F income which, under the provisions of section 970(a) and paragraph (b) of this section, was reduced, and

(iii) Such corporation has in a subsequent taxable year a decrease in investments in export trade assets,

every person who is a United States shareholder, as defined in section 951(b), of such corporation on the last day of such subsequent taxable year on which such corporation is a controlled foreign corporation shall include in his gross income, under section 951(a)(1)(A)(ii) and the regulations thereunder as an amount to which section 955 (as in effect before the enactment of the Tax Reduction Act of 1975) applies, his pro rata share of the amount of such decrease in investments but only to the extent that such pro rata share does not exceed the limitations determined under subparagraph (2) of this paragraph. A United States shareholder's pro rata share of a controlled foreign corporation's decrease for any taxable year in investments in export trade assets shall be his pro rata share of such corporation's decrease for such year determined under section 970(c)(3) and paragraph (d)(3) of this section.

(2) *Limitations applicable in determining amount includible in income*—(i) *General.* A United States shareholder's pro rata share of a controlled foreign

corporation's decrease in investments in export trade assets for any taxable year of such corporation shall, for purposes of determining an amount to be included in the gross income for any taxable year of such shareholder, not exceed the lesser of the limitations determined under (a) and (b) of this subdivision:

(a) Such shareholder's pro rata share of the sum of the controlled foreign corporation's earnings and profits (or deficit in earnings and profits) for the taxable year, computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year, plus his pro rata share of the sum of its earnings and profits (or deficits in earnings and profits) accumulated for prior taxable years beginning after December 31, 1962, or

(b)(1) Such shareholder's pro rata share of the sum of the amounts by which the subpart F income of such controlled foreign corporation for prior taxable years was reduced under section 970(a) and paragraph (b) of this section, plus

(2) Such shareholder's pro rata share of the sum of the amounts which were not included in the subpart F income of such controlled foreign corporation for such prior taxable years by reason of the application of section 972 and § 1.972-1, minus

(3) Such shareholder's pro rata share of the sum of the amounts which were previously included in his gross income for prior taxable years under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) and this paragraph with respect to such controlled foreign corporation.

The net amount determined under (b) of this subdivision with respect to any stock owned by the United States shareholder shall be determined without taking into account any amount attributable to a period prior to the date on which such shareholder acquired such stock. See section 1248 and the regulations thereunder for rules governing the treatment of gain from sales or exchanges of stock in certain foreign corporations.

(ii) *Treatment of earnings and profits.* For purposes of determining earnings

§ 1.970-1

and profits of a controlled foreign corporation under subdivision (i) (a) of this subparagraph, such earnings and profits shall be considered not to include any amounts which are attributable to—

(a) Amounts which are, or have been, included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) (other than an amount included in the gross income of a United States shareholder under section 951(a)(1)(A)(ii) or section 951(a)(1)(B) for the taxable year) and have not been distributed, or

(b)(I) Amounts which for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(2) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subdivision apply only in determining the limitation on a United States shareholder's pro rata share of a controlled foreign corporation's decrease in investments in export trade assets. See section 959 and the regulations thereunder for limitations on the exclusion of previously taxed earnings and profits.

(iii) *Rules of application.* The determinations made under subdivision (i) of this subparagraph for purposes of determining the United States shareholder's pro rata share of a controlled foreign corporation's decrease in investments in export trade assets for any taxable year shall be made on the basis of the stock such shareholder owns, within the meaning of section 958(a) and the regulations thereunder, in the controlled foreign corporation on the last day in the taxable year on which such corporation is a controlled foreign corporation even though such shareholder owned more or less stock in such corporation prior to that date. See section 972 and paragraph (b)(3) of § 1.972-1 for rules relating to the alloca-

tion of a decrease in investments in export trade assets of export trade corporations in a consolidated chain of such corporations. See section 951(a)(3) and the regulations thereunder for an additional limitation upon the amount of a United States shareholder's pro rata share determined under this paragraph.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation A, which has one class of stock outstanding, is a wholly owned subsidiary of domestic corporation M throughout 1963 and 1964. Both corporations use the calendar year as the taxable year. For 1963, A Corporation qualifies as an export trade corporation and its subpart F income, determined in accordance with the provisions of section 952 and the regulations thereunder, is reduced by \$20 under the provisions of section 970(a) and paragraph (b) of this section. Section 972 is assumed not to apply to A Corporation. For 1964, A Corporation has a decrease of \$8 in investments in export trade assets. For 1963 and 1964, A Corporation has earnings and profits of \$30 (determined under the provisions of subparagraph (2) of this paragraph). Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1964 which is includible in M Corporation's gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) is \$8, determined as follows:

| | |
|---|------|
| (i) Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1964 (100% of \$8) | \$8 |
| (ii) Limitation on amount includible in gross income of M Corporation for 1964 (smaller of (a) or (b)): | |
| (a) Corporation M's pro rata share of A Corporation's earnings and profits for 1963 and 1964 determined under subparagraph (2) of this paragraph (100% of \$30) | \$30 |
| (b) Corporation M's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (100% of \$20) | \$20 |
| Plus: Corporation M's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 by reason of the application of section 972 | 0 |
| Total | 20 |

| | | |
|--|---|----|
| Less: Corporation M's pro rata share of the sum of amounts which were previously included in gross income of M Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation | 0 | 20 |
| (iii) Corporation M's pro rata share includible in gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii)) | 8 | |

Example 2. Assume the same facts as in example 1, except that on February 14, 1965, M Corporation sells 25 percent of its stock in A Corporation to N Corporation. Corporation N is a domestic corporation which also uses the calendar year as a taxable year. For 1965, A Corporation has a decrease of \$16 in investments in export trade assets. Corporation A's earnings and profits for 1963 and 1964 (determined under the provisions of subparagraph (2) of this paragraph) are \$22 (\$30 minus \$8). Corporation A's earnings and profits for 1965 are \$6 (determined under the provisions of subparagraph (2) of this paragraph). For 1965, M Corporation's pro rata share of A Corporation's decrease in investments in export trade assets which is includible in M Corporation's gross income under section 951(a)(1)(A)(ii) is \$9, and N Corporation's pro rata share includible in gross income under such section is \$0, determined as follows:

| | | |
|--|------|--|
| M CORPORATION | | |
| (i) Corporation M's pro rata share of A Corporation's decrease in investments in export trade assets for 1965 (75% of \$16) | \$12 | |
| (ii) Limitation on amount includible in gross income of M Corporation for 1965 (smaller of (a) or (b)): | | |
| (a) Corporation M's pro rata share of A Corporation's earnings and profits for 1963, 1964, and 1965 determined under subparagraph (2) of this paragraph (75% of \$28) | \$21 | |
| (b) Corporation M's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (75% of \$20) | \$15 | |
| Plus: Corporation M's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 and 1964 by reason of the application of section 972 | 0 | |
| Total | \$15 | |

| | | |
|---|---|---|
| M CORPORATION—Continued | | |
| Less: Corporation M's pro rata share of the sum of amounts which were previously included in gross income of M Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation (75% of \$8) | 6 | 9 |
| (iii) Corporation M's pro rata share includible in gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii)) | 9 | |

| | | |
|--|----|--|
| N CORPORATION | | |
| (i) Corporation N's pro rata share of A Corporation's decrease in investments in export trade assets for 1965 (25% of \$16) | 0 | |
| (ii) Limitation on amount includible in gross income of N Corporation for 1965 (smaller of (a) or (b)): | | |
| (a) Corporation N's pro rata share of A Corporation's earnings and profits for 1963, 1964, and 1965 determined under subparagraph (2) of this paragraph (25% of \$28) | 07 | |
| (b) Corporation N's pro rata share of amounts by which the subpart F income of A Corporation for 1963 was reduced under section 970(a) (amounts prior to 2/14/65 not being taken into account) | 0 | |
| Plus: Corporation N's pro rata share of amounts which were not included in subpart F income of A Corporation for 1963 and 1964 by reason of the application of section 972 (amounts prior to 2/14/65 not being taken into account) | 0 | |
| Total | 0 | |

| | | |
|--|---|---|
| Less: Corporation N's pro rata share of the sum of amounts which were previously included in gross income of N Corporation under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) with respect to A Corporation (amounts prior to 2/14/65 not being taken into account) | 0 | 0 |
| (iii) Corporation N's pro rata share includible in gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) (smaller of (i) or (ii)) | 0 | |

(d) *Investments in export trade assets—*
 (1) *Amount of investments.* For purposes of sections 970 through 972 and §§1.970-1 to 1.972-1, inclusive, export trade assets shall be taken into account on the following bases:

(i) *Working capital.* Working capital to which section 971(c)(1) applies shall be taken into account at the adjusted basis of current assets, determined as of the applicable determination date,

less any current liabilities (except as provided in subdivision (iii) of this subparagraph).

(ii) *Other export trade assets.* Inventory to which section 971(c)(2) applies, facilities to which section 971(c)(3) applies, and evidences of indebtedness to which section 971(c)(4) applies, shall be taken into account at their adjusted bases as of the applicable determination date, reduced by any liabilities (except as provided in subdivision (iii) of this subparagraph) to which such property is subject on such date. To be taken into account under this subparagraph, a liability must constitute a specific charge against the property involved. Thus, a liability evidenced by an open account or a liability secured only by the general credit of the controlled foreign corporation will not be taken into account. On the other hand, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the liability shall be apportioned against each of such items of property in that ratio which the adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items on such date. A liability in excess of the adjusted basis of the property which is subject to such liability will not be taken into account for the purpose of reducing the adjusted basis of other property which is not subject to such liability. See paragraph (c)(6) of § 1.971-1 for treatment of export trade assets which constitute working capital to which section 971(c)(1) applies and which also constitute inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies.

(iii) *Treatment of certain liabilities.* For purposes of subdivisions (i) and (ii) of this subparagraph, a current liability, or a specific charge created with respect to any item of property, principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's investments in export trade assets shall be taken into account in such a manner as to properly reflect the controlled foreign corporation's investments in export trade assets; whether a specific charge or current liability is

created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan is from a related person, as defined in section 954(d)(3) and paragraph (e) of § 1.954-1.

(iv) *Statement required.* If for purposes of this section a United States shareholder of a controlled foreign corporation reduces the adjusted basis of property which constitutes an export trade asset on the ground that such property is subject to a liability, he shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(2) *Increase in investments in export trade assets.* For purposes of section 970(a) and paragraph (b) of this section, the amount of increase in investments in export trade assets of a controlled foreign corporation for a taxable year shall be, except as provided in § 1.970-2, the amount by which—

(i) The amount of its investments in export trade assets at the close of such taxable year, exceeds

(ii) The amount of its investments in export trade assets at the close of the preceding taxable year.

(3) *Decrease in investments in export trade assets.* For purposes of section 970(b) and paragraph (c) of this section, the amount of the decrease in investments in export trade assets of a controlled foreign corporation for a taxable year shall be, except as provided in § 1.970-2, the amount by which—

(i) The amount of its investments in export trade assets at the close of the preceding taxable year, minus

(ii) An amount equal to the excess of recognized losses over recognized gains on sales, exchanges, involuntary conversions, assets or other dispositions, of export trade during the taxable year, exceeds

(iii) The amount of its investments in export trade assets at the close of the taxable year.

For purposes of subdivision (ii) of this subparagraph, recognized losses include a write-down of inventory to lower of cost or market in accordance with a method of inventory valuation established or adopted by or on behalf of

such foreign corporation under paragraph (c) of § 1.964-1.

[T.D. 6755, 29 FR 12704, Sept. 9, 1964, as amended by T.D. 6795, 30 FR 947, Jan. 29, 1965; T.D. 6892, 31 FR 11144, Aug. 23, 1966; T.D. 7293, 38 FR 32802, Nov. 28, 1973; T.D. 7893, 48 FR 22511, May 19, 1983]

§ 1.970-2 Elections as to date of determining investments in export trade assets.

(a) *Nature of elections*—(1) *In general.* In lieu of determining the increase under the provisions of paragraph (d)(2) of § 1.970-1, or the decrease under the provisions of paragraph (d)(3) of § 1.970-1, in a controlled foreign corporation's investments in export trade assets for a taxable year in the manner provided in such provisions, a United States shareholder of such corporation may elect, under the provisions of section 970(c)(4) and this section, to determine such increase or decrease in accordance with the provisions of subparagraph (2) of this paragraph or, in the case of export trade assets which are facilities described in section 971(c)(3), in accordance with the provisions of subparagraph (3) of this paragraph. Separate elections may be made under subparagraph (2) and/or (3) of this paragraph with respect to each controlled foreign corporation with respect to which a person is a United States shareholder, within the meaning of section 951(b).

(2) *Election of 75-day rule.* A United States shareholder of a controlled foreign corporation may elect with respect to a taxable year of such corporation to make the determinations under subparagraphs (2)(i) and (3)(iii) of paragraph (d) of § 1.970-1 of the amount of such corporation's investments in export trade assets as of the 75th day after the close of the taxable year referred to in such subparagraphs of paragraph (d) of § 1.970-1. The election provided by this subparagraph may be made with respect to export trade assets other than facilities described in section 971(c)(3) or with respect to export trade assets which are facilities or with respect to both types of export trade assets (but the election under this paragraph with respect to export trade assets which are facilities or with respect to both types of export trade assets may be made only if the election

provided by subparagraph (3) of this paragraph is not made). If the election provided by this subparagraph is made, the amount of export trade assets with respect to which such election is made at the close of the preceding taxable year which is described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970-1 shall be the amount of export trade assets which was considered by application of the 75-day rule to be the amount of export trade assets at the close of such preceding taxable year; except that for the first taxable year of the controlled foreign corporation for which the 75-day rule is elected the amount of investments in export trade assets with respect to which such election is made at the close of such preceding year described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970-1 shall be the amount of investments in export trade assets at the actual close of such preceding year. In the case of a taxable year of such corporation beginning after December 31, 1962, and before December 31, 1963, the amount of investments in export trade assets with respect to which such election is made alternatively may be determined by the United States shareholder as of the 75th day after the close of the preceding taxable year referred to in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970-1 rather than as of the close of such preceding taxable year.

(3) *Election for export trade assets which are facilities.* A United States shareholder of a controlled foreign corporation may elect with respect to a taxable year of such corporation to make the determinations under subparagraphs (2)(i) and (3)(iii) of paragraph (d) of § 1.970-1 of the amount of such corporation's investments in export trade assets which are facilities described in section 971(c)(3) as of the close of such corporation's taxable year following the taxable year referred to in such subparagraphs of paragraph (d) of § 1.970-1. The election provided by this subparagraph may be made only if the United States shareholder does not elect the 75-day rule of subparagraph (2) of this paragraph with respect to export trade assets which are facilities. If

the election provided by this subparagraph is made, the amount of investments in export trade assets which are facilities at the close of the preceding taxable year which is described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970-1 shall be the amount of export trade assets which are facilities which was considered, by reason of the application of the following-year rule provided in this subparagraph with respect to such preceding taxable year, to be the amount of export trade assets which are facilities at the close of such preceding taxable year; except that for the first taxable year of the controlled foreign corporation for which such following-year rule is elected the amount of investments in export trade assets which are facilities at the close of the preceding taxable year described in subparagraphs (2)(ii) and (3)(i) of paragraph (d) of § 1.970-1 shall be the amount of investments in export trade assets which are facilities at the actual close of such preceding taxable year.

(b) *Time and manner of making elections*—(1) *Without consent.* A United States shareholder may, with respect to any controlled foreign corporation, make one or both of the elections described in paragraph (a)(2) or (3) of this section without the consent of the Commissioner by filing a statement to such effect with his return for his taxable year in which or with which ends the first taxable year of such corporation in which—

(i) Such shareholder owns, within the meaning of section 958(a), or is considered as owning, by applying the rules of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such corporation, and

(ii) Such corporation realizes subpart F income which is reduced under section 970(a) and paragraph (b) of § 1.970-1.

The statement shall contain the name and address of the controlled foreign corporation, identification of such first taxable year of such corporation, and an indication as to which election or elections described in paragraph (a) of this section the United States shareholder is making. If such return has been filed on or before the 90th day

after the date these regulations are published in the FEDERAL REGISTER, such United States shareholder shall file such statement with the district director with which the return was filed on or before such 90th day.

(2) *With consent.* A United States shareholder may make one or both of the elections described in paragraph (a)(2) or (3) of this section with respect to any controlled foreign corporation at any time with the consent of the Commissioner. Consent will not be granted unless the shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the election will be effected. The application for consent to elect shall be made by the shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to determine an exclusion under section 970(a) in accordance with one or both of the elections provided in paragraph (a) of this section. The application shall include the following information:

(i) The name, address, and taxable year of the United States shareholder;

(ii) The name, address, and taxable year of the controlled foreign corporation;

(iii) A statement indicating which of the elections the shareholder desires to make;

(iv) The amount of the foreign corporation's investments in export trade assets (by a category which includes export trade assets other than facilities and a category which includes only export trade assets which are facilities) at the close of its preceding taxable year;

(v) The shareholder's pro rata share of the sum of the amounts by which the subpart F income of the foreign corporation, for all prior taxable years during which such shareholder was a United States shareholder of such corporation, was reduced under section 970(a) and paragraph (b) of § 1.970-1;

(vi) The shareholder's pro rata share of the sum of the amounts which were not included in the subpart F income of the foreign corporation, for all prior

taxable years during which such shareholder was a United States shareholder of such corporation, by reason of the application of section 972 and §1.972-1; and

(vii) The shareholder's pro rata share of the sum of the amounts which were previously included in his gross income, for all prior taxable years during which such shareholder was a United States shareholder of such corporation, under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) and paragraph (b) of §1.970-1 to the foreign corporation.

(c) *Effect of elections*—(1) *In general.* Except as provided in subparagraphs (3) and (4) of this paragraph, an election made under paragraph (a) of this section with respect to a controlled foreign corporation shall be binding on the United States shareholder and—

(i) In the case of the election described in paragraph (a)(2) of this section, shall apply to all investments in export trade assets with respect to which such election is made acquired, or disposed of, by such corporation during the 75-day period following its taxable year for which subpart F income is first computed under the election and during all succeeding corresponding 75-day periods of such corporation, or

(ii) In the case of the election described in paragraph (a)(3) of this section, shall apply to all investments in export trade assets which are facilities acquired, or disposed of, by such corporation during the taxable year following its taxable year for which subpart F income is first computed under the election and during all succeeding corresponding taxable years of such corporation.

(2) *Returns.* Any return of a United States shareholder required to be filed before the completion of a period with respect to which determinations are to be made as to a controlled foreign corporation's investments in export trade assets for purposes of computing such shareholder's taxable income shall be filed on the basis of an estimate of the amount of such corporation's investments in export trade assets at the close of the period. If the actual amount of such investments is not the same as the amount of the estimate, the shareholder shall immediately no-

tify the Commissioner. The Commissioner will thereupon redetermine the amount of such shareholder's tax for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(3) *Revocation*—(i) *In general*—(a) *Consent required.* Upon application by the United States shareholder, an election made under paragraph (a) of this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless the shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the revocation will be effected.

(b) *Revocation of 75-day rule.* In the case of the revocation of an election described in paragraph (a)(2) of this section, the change in the controlled foreign corporation's investments in export trade assets with respect to which such election was made for its first taxable year for which subpart F income or a decrease in investments in export trade assets is computed without regard to the election previously made shall, unless the agreement with the Commissioner provides otherwise, be considered to be the amount by which—

(1) Such corporation's investments in export trade assets with respect to which such election was made at the close of such taxable year exceeds or, if applicable, is exceeded by

(2) Such corporation's investments in export trade assets with respect to which such election was made at the close of the 75th day after the close of the preceding taxable year of such corporation.

(c) *Revocation of following-year rule.* In the case of the revocation of an election described in paragraph (a)(3) of this section, the change in the controlled foreign corporation's investments in export trade assets which are facilities for its first taxable year for

which subpart F income or a decrease in investments in export trade assets is computed without regard to the election previously made shall, unless the agreement with the Commissioner provides otherwise, be considered to be zero.

(ii) *Time and manner of applying for consent to revocation—(a) Application to Commissioner.* The application for consent to revocation of an election shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC, 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to determine an exclusion under section 970(a) or an inclusion under section 970(b) without regard to such election.

(b) *Information required.* The application shall include the following information:

(1) The name, address, and taxable year of the United States shareholder;

(2) The name, address, and taxable year of the controlled foreign corporation;

(3) A statement indicating the election the shareholder desires to revoke under this subparagraph;

(4) The information required under subdivisions (iv) through (vii) of paragraph (b)(2) of this section;

(5) In the case of an application for consent to revocation of an election made under paragraph (a)(2) of this section, the amount of the foreign corporation's investments in export trade assets with respect to which such election was made at the close of the 75th day after the close of such corporation's taxable year immediately preceding the taxable year of such corporation; and

(6) The reasons for the request for consent to revocation.

(4) *Transfer of stock—(i) Election of 75-day rule in force.* (a) If during any taxable year of a controlled foreign corporation—

(1) A United States shareholder who has made the election described in paragraph (a)(2) of this section with respect to such corporation sells, exchanges, or otherwise disposes of all or

part of his stock in such corporation, and

(2) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange, or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the successor in interest shall consider the controlled foreign corporation's change during the first 75 days of such taxable year in investments in export trade assets with respect to which such election is made to be zero.

(b) If the United States shareholder's successor in interest makes an election under paragraph (a)(2) of this section in order to determine an exclusion under section 970(a) for the taxable year of such corporation in which the acquires such stock, the amount of the controlled foreign corporation's investments in export trade assets with respect to which such election is made at the close of its preceding taxable year shall be considered, with respect to the stock so acquired, to be the amount of such corporation's investments in export trade assets with respect to which such election is made at the close of the 75th day after the close of such preceding taxable year.

(c) If the United States shareholder's successor in interest makes an election under paragraph (a)(2) of this section in order to determine an exclusion under section 970(a) for a taxable year of such corporation subsequent to the taxable year in which he acquired the stock, the amount of the controlled foreign corporation's investments in export trade assets with respect to which such election is made at the close of its taxable year immediately preceding such subsequent taxable year shall, with respect to the stock so acquired, be the amount of such corporation's investments in such assets at the actual close of such preceding taxable year.

(ii) *Election in force with respect to export trade assets which are facilities—(a) If during any taxable year of a controlled foreign corporation—*

(1) A United States shareholder who has made the election described in paragraph (a)(3) of this section with respect to such corporation sells, exchanges, or otherwise disposes of all or

part of his stock in such corporation, and

(2) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the successor in interest shall consider the controlled foreign corporation's change for such taxable year in investments in export trade assets which are facilities to be zero.

(b) If the United States shareholder's successor in interest makes an election under paragraph (a)(3) of this section in order to determine an exclusion under section 970(a) for the taxable year of such corporation in which he acquires such stock, the amount of the controlled foreign corporation's investments in export trade assets which are facilities at the close of its preceding taxable year shall be considered, with respect to the stock so acquired, to be the amount of such corporation's investments in export trade assets which are facilities at the close of the taxable year in which such stock is acquired.

(c) If the United States shareholder's successor in interest makes an election under paragraph (a)(3) of this section in order to determine an exclusion under section 970(a) for a taxable year of such corporation subsequent to the taxable year in which he acquired the stock, the amount of the controlled foreign corporation's investments in export trade assets which are facilities at the close of its taxable year immediately preceding such subsequent taxable year shall, with respect to the stock so acquired, be the amount of such corporation's investments in such assets at the actual close of such preceding taxable year.

(d) *Illustrations.* The principles contained in this section are illustrated by the examples set forth in paragraph (d) of § 1.955.3.

[T.D. 6755, 29 FR 12707, Sept. 9, 1964]

§ 1.970-3 Effective date of subpart G.

Sections 970 through 972 and §§ 1.970-1 through 1.972-1 shall apply with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United

States shareholders within which or with which such taxable years of such corporations end.

[T.D. 6755, 29 FR 12709, Sept. 9, 1964]

§ 1.971-1 Definitions with respect to export trade corporations.

(a) *Export trade corporations*—(1) *In general.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term “export trade corporation” means a controlled foreign corporation which for the period specified in subparagraph (2) of this paragraph satisfies the conditions specified in subparagraph (3) of this paragraph. However, no controlled foreign corporation may qualify as an export trade corporation for any taxable year beginning after October 31, 1971, unless it qualified as an export trade corporation for any taxable year beginning before such date. In addition, if a corporation fails to qualify as an export trade corporation for a period of any 3 consecutive taxable years beginning after October 31, 1971, then for any taxable year beginning after such 3-year period, such corporation shall not be included within the term “export trade corporation”.

(2) *Three-year period.* The period referred to in subparagraph (1) of this paragraph is the 3-year period ending with the close of the controlled foreign corporation's current taxable year, or such part of such 3-year period as occurs on and after the beginning of the corporation's first taxable year beginning after December 31, 1962, whichever period is shorter.

(3) *Gross income requirements.* The conditions referred to in subparagraph (1) of this paragraph are that the controlled foreign corporation derives—

(i) 90 percent or more of its gross income from sources without the United States, and

(ii)(a) 75 percent or more of its gross income from transactions, activities, or interest described in section 971(b) and paragraph (b) of this section, or

(b) 50 percent or more of its gross income from transactions, activities, or interest described in section 971(b) and paragraph (b) of this section in respect of agricultural products grown in the United States.

(4) *Determination of sources of gross income.* The sources of gross income of a controlled foreign corporation shall be determined for purposes of subparagraph (3)(i) of this paragraph in accordance with the rules for determining sources of gross income set forth in sections 861 through 864 and the regulations thereunder.

(b) *Export trade income*—(1) *General rule.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term “export trade income” means the gross export trade income of a controlled foreign corporation derived from transactions, activities, or interest described in subdivisions (i) through (vii) of this subparagraph, less deductions allowed under subdivision (viii) of this subparagraph.

(i) *Sale of export property.* Gross export trade income of a controlled foreign corporation includes gross income it derives from the sale of export property (as defined in paragraph (e) of this section) which it purchases, if the sale is made to an unrelated person for use, consumption, or disposition outside the United States. See section 971(b)(1). As a general rule, property will be presumed to have been sold for use, consumption, or disposition in the country of destination of the sale. However, if at the time of the sale the controlled foreign corporation knows, or should have known from the facts and circumstances surrounding the sales transaction, that the property will probably be used, consumed, or disposed of in the United States, such property will be presumed to have been sold for use, consumption, or disposition in the United States unless the controlled foreign corporation establishes that such property was used, consumed, or disposed of outside the United States. For purposes of this subdivision, export property must be sold by a controlled foreign corporation in essentially the same form in which such property is purchased. Whether export property sold is in essentially the same form in which such property is purchased shall be determined on the basis of all the facts and circumstances in each case. Storage, handling, transportation, packaging, or servicing of property will be considered not to alter the form in which property

is purchased. However, manufacture or production, within the meaning of paragraph (a)(4) of § 1.954-3, will be considered to alter the form in which property is purchased and no part of the gross income from the sale of such property will be treated as export trade income. The application of this subdivision may be illustrated by the following example:

Example. Controlled foreign corporation A, incorporated under the laws of foreign country Y, purchases articles manufactured in the United States from domestic corporation M and sells them in the form in which purchased to foreign corporation B, unrelated to A Corporation, for use in foreign countries, X, Y, and Z. The gross income of A Corporation from the purchase and sale of the articles constitutes gross export trade income.

(ii) *Commissions and other income derived in connection with the sale of export property.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in respect of a sale by such corporation in a transaction described in subdivision (i) of this subparagraph or in respect of the sale by any other person of export property to a person unrelated to the controlled foreign corporation for use, consumption, or disposition outside the United States. Such gross export trade income includes payments received for surveys made prior to, and in connection with, the sale of such export property (whether or not such sales are ultimately consummated). See section 971(b)(1). The term “any person” or “any other person” as used in this subdivision includes a related person as defined in section 954(d)(3) and paragraph (e) of § 1.954-1. The application of this subdivision may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, receives from M Corporation a commission equal to 6 percent of the gross selling price of all personal property shipped by M Corporation as a result of services performed by A Corporation in soliciting orders in foreign countries X, Y, and Z. In fulfillment of such orders, M Corporation ships

products manufactured by it in the United States. Corporation A does not assume title to the property sold. Gross commissions received by A Corporation from M Corporation in connection with the sale of such property to persons unrelated to A Corporation for use, consumption, or disposition outside the United States constitute gross export trade income.

Example 2. Foreign corporation B, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation N. Corporation N, is engaged in the business of manufacturing heavy duty electrical equipment in the United States. By contract, N Corporation engages B Corporation for the purpose of conducting engineering, technical, and financial studies required by N Corporation in the preparation of bids to supply foreign country Y with electrical equipment for a construction project to be undertaken by such country. Corporation N pays B Corporation a fee for the services, all of which are performed in country Y, which is based upon the number of hours of work performed without regard to whether a sale is ultimately consummated. Corporation N does not receive a contract from country Y on its bid to supply equipment. Income derived by B Corporation from performance of the service contract constitutes gross export trade income.

(iii) *Commissions and other income derived in connection with the installation or maintenance of export property.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in respect of the installation or maintenance of export property which has been sold by such corporation in a transaction described in subdivision (i) of this subparagraph or by any other person to a person unrelated to the controlled foreign corporation for use, consumption, or disposition outside the United States. See section 971(b)(1). The term “any person” or “any other person” as used in this subdivision includes a related person as defined in section 954(d)(3) and paragraph (e) of § 1.954-1.

(iv) *Commissions and other income derived in connection with the use of patents, copyrights, and other like property.* Gross export trade income of a controlled foreign corporation includes

gross commissions, fees, compensation, or other income derived by such corporation from the performance for any person of commercial, industrial, financial, technical, scientific, managerial, engineering, architectural, skilled, or other services in connection with the use outside of the United States by an unrelated person of patents, copyrights, secret processes and formulas, goodwill, trademarks, trade brands, franchises, and other like property, including gross income derived from obtaining licensees for patents, but only if the patent, copyright, or other like property is acquired, or developed, and owned by the manufacturer, producer, grower, or extractor of any export property, in respect of which the controlled foreign corporation also derives gross export trade income within the meaning of subdivision (i), (ii), or (iii) of this subparagraph. See section 971(b)(2). The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation M, the owner of a patent registered in foreign country X, grants B Corporation, a corporation unrelated to A Corporation, the right to use such patent in foreign country Y in exchange for payment of a royalty. By a separate contract with B Corporation, A Corporation agrees for a gross fee of \$100,000 to furnish, by maintaining a staff of technical representatives at the offices of B Corporation, technical services to B Corporation in connection with B Corporation’s use of the patent. Corporation A also derives export trade income from the sale of export property which it purchases from M Corporation, the manufacturer of such property, and sells to C Corporation, an unrelated person, for use in country Y by C Corporation. The gross fee of \$100,000 received by A Corporation for the furnishing of technical services in connection with B Corporation’s use of M Corporation’s patent constitutes gross export trade income since the service for which the fee is paid is performed in connection with the use outside the United States by an unrelated person (B Corporation) of a patent owned by a manufacturer (M Corporation) of export property in respect of which the controlled foreign corporation (A Corporation) derives gross export trade income from the sale to an unrelated person (C Corporation) for use outside the United States of export property purchased by it from the manufacturer (M Corporation).

(v) *Income attributable to use of export property by an unrelated person.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, rents, compensation, or other income which is received by such corporation from an unrelated person and is attributable to the use of export property by such unrelated person. See section 971(b)(3). The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A acquires by purchase bottling machines manufactured in the United States and leases the machines to B Corporation, a corporation unrelated to A Corporation, for use by B Corporation in foreign country Y. Gross rental income of A Corporation from the lease of the machines to B Corporation constitutes gross export trade income.

(vi) *Income attributable to the use of export property in the rendition of technical, scientific, or engineering services—*
(a) *General.* Gross export trade income of a controlled foreign corporation includes gross commissions, fees, compensation, or other income which is received by such corporation from an unrelated person and is attributable to the use of export property in the performance of technical, scientific, or engineering services to such unrelated person. See section 971(b)(3).

(b) *Rule of apportionment.* If a commission, fee, or other income received by a controlled foreign corporation from an unrelated person under a contract or arrangement for the performance of technical, scientific, or engineering services is not solely attributable to the use of export property in the performance of such services and the amount of the gross income attributable to such use of export property cannot be established by reference to transactions between other unrelated persons, such gross income shall be an amount which bears the same ratio to total gross income from the contract or arrangement as the cost of the export property consumed in the performance of such services, including a reasonable allowance for depreciation with respect to the export property so used, bears to the total costs and expenses attributable to the production

of income under the contract or arrangement.

(c) *Illustration.* The application of this subdivision may be illustrated by the following example:

Example. Foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A is engaged in the seismograph service business in foreign country X. In an effort to establish the probable existence of oil in a concession area it owns in foreign country Y, B Corporation which is unrelated to A Corporation enters into a contract with A Corporation whereby A Corporation is required to make seismographic tests of the area in country Y for a fixed fee of \$100,000. In performance of the contract, A Corporation hires a skilled crew to carry out the contract and utilizes equipment and supplies (for example, trucks, seismographic equipment, etc.) which constitute export property. Corporation A cannot establish by reference to transactions between other unrelated persons, the income attributable to the use of the export property in the performance of the contract. Corporation A's total costs and expenses (for example, salaries of the crew, administrative expenses, all supplies, total depreciation on property used in performance of the contract, etc.) incurred in performance of the contract are \$80,000. The cost of export property consumed in performance of the contract (for example, dynamite, motor oil, and other supplies which were produced in the United States, reasonable depreciation on trucks and seismographic equipment manufactured in the United States and used in performance of the contract, etc.) is \$30,000. Corporation A's gross export trade income from the contract is \$37,500, that is, the amount which bears the same ratio to total gross income from the contract (\$100,000) as the cost of the export property consumed in the rendition of the services (\$30,000) bears to total costs and expenses attributable to the contract (\$80,000).

(vii) *Interest from export trade assets.* Gross export trade income of a controlled foreign corporation includes interest derived by it from export trade assets described in section 971(c)(4) and paragraph (c)(5) of this section. See section 971(b)(4).

(viii) *Deductions to be taken into account.* Export trade income of a controlled foreign corporation for any taxable year shall be the amount determined by deducting from the items or categories of gross income described in subdivisions (i) through (vii) of this subparagraph the entire amount of

those expenses, taxes, and other deductions properly allocable to such items or categories of income. For purposes of this section, expenses, taxes, and other deductions shall first be allocated to items or categories of gross income to which they directly relate; then, expenses, taxes, and other deductions which cannot definitely be allocated to some item or category of gross income shall be ratably apportioned among all items or categories of gross income, except that no expense, tax, or other deduction shall be allocated to an item or category of income to which it clearly does not apply and no deduction allowable to such controlled foreign corporation under section 882(c) and the regulations thereunder shall be taken into account.

(2) *Cross reference.* For rules governing the determination of gross income and taxable income of a foreign corporation, see § 1.952-2.

(c) *Export trade assets*—(1) *In general.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term “export trade assets” means—

(i) Working capital reasonably necessary for the production of export trade income,

(ii) Inventory of export property held for use, consumption, or disposition outside the United States,

(iii) Facilities located outside the United States for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property, and

(iv) Evidences of indebtedness executed by unrelated persons in connection with payment for purchases of export property for use, consumption, or disposition outside the United States, or in connection with the payment for services described in section 971(b)(2) or (3) and paragraph (b)(1)(iv), (v), or (vi) of this section.

(2) *Working capital.* For purposes of subparagraph (1)(i) of this paragraph, working capital of a controlled foreign corporation is the excess of its current assets over its current liabilities. Liabilities maturing in one year or less shall be considered current liabilities. A determination of the amount of working capital of a controlled foreign corporation which is reasonably necessary for the production of export

trade income will depend upon the nature and volume of the activities of the controlled foreign corporation which produce export trade income as they exist on the applicable determination date. In determining working capital which is reasonably necessary for the production of export trade income, the anticipated future needs of the business will be taken into account to the extent that such needs relate to the year of the controlled foreign corporation following the applicable determination date; anticipated future needs relating to a later period will not be taken into account unless it is clearly established that such needs are reasonably related to the production of export trade income as of the applicable determination date.

(3) *Inventory of export property.* For purposes of subparagraph (1)(ii) of this paragraph, the inclusion of items in inventory shall be determined in accordance with rules applicable to domestic corporations. See §§ 1.471-1 through 1.471-9. Inventory of export property of a controlled foreign corporation includes export property held for use, consumption, or disposition outside the United States regardless of where it is located on the applicable determination date. Thus, such property may be physically located in the United States on such date. However, for property physically located in the United States to constitute export property, it must have been acquired by the controlled foreign corporation with a clear intent that it would dispose of the property for use, consumption, or disposition outside the United States. As a general rule, if during the year following the applicable determination date export property which was physically located in the United States on such date is actually exported for use, consumption, or disposition outside the United States, such property will be deemed held for such purpose on the applicable determination date. On the other hand, the indefinite warehousing of export property in the United States by the controlled foreign corporation, or the subsequent sale of export property by such corporation for use, consumption, or disposition in the United States, will evidence a lack of intent by such

corporation on the applicable determination date to hold such property for use, consumption, or disposition outside the United States.

(4) *Facilities located outside the United States*—(i) *In general.* For purposes of subparagraph (1)(iii) of this paragraph, a facility, as defined in subdivision (ii)(a) of this subparagraph, will be considered an export trade asset only—

(a) If such facility is located outside the United States, and

(b) To the extent that such facility is used, within the meaning of subdivision (ii)(c) of this subparagraph, by the controlled foreign corporation for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property in essentially the same form in which such property is acquired by such corporation.

Thus, a facility in which property is manufactured or produced, even though export property is used or consumed in the production or becomes a component part of the manufactured article, will not qualify as an export trade asset.

(ii) *Special rules*—(a) *Facility defined.* For purposes of subdivision (i) of this subparagraph, the term “facility” includes any asset or group of assets used for the storage, handling, transportation, packaging, servicing, sale, or distribution of export property. Thus, such term includes warehouse, storage, or sales facilities (for example, sales office equipment), transportation equipment (for example, motor trucks, vessels, etc.), and machinery and equipment (for example, packaging equipment, servicing equipment, cranes, forklift trucks used in warehouses, etc.).

(b) *Determination of location of transportation facilities.* A transportation facility shall be considered to be located outside the United States for purposes of subdivision (i)(a) of this subparagraph if such property is predominantly located outside the United States. As a general rule, on an applicable determination date a transportation facility will be considered to be predominantly located outside the United States if 70 percent or more of the miles traversed (during the 12-month period immediately preceding such determination date or for such

part of such period as such facility is owned by the controlled foreign corporation) in the use of such facility are traversed outside the United States or if such facility is located outside the United States at least 70 percent of the time during such period or such part thereof.

(c) *Determination of use.* For purposes of subdivision (i)(b) of this subparagraph, the extent to which a facility is used in carrying on the activities described in such subdivision depends on the use made of the facility for the 12-month period immediately preceding the applicable determination date or for such part of such period as such facility is owned by the controlled foreign corporation. The method of measuring such use will depend upon the facts and circumstances in each case. However, such determinations of use will generally be made for a facility as a whole and not on the basis of individual items used in the operation of a facility. Thus, a determination as to the use of a warehouse facility will generally be made with respect to the entire facility and not separately for the items used in such warehouse, such as forklift trucks, storage bins, etc.

(5) *Evidences of indebtedness.* For purposes of subparagraph (1)(iv) of this paragraph, the term “evidence of indebtedness” shall mean a note, installment sales contract, a time bill of exchange evidencing a sale on credit, or similar written instrument executed by an unrelated person which evidences the obligation of an unrelated person to pay for export property which an unrelated person purchases for use, consumption, or disposition outside the United States or to pay for services described in section 971(b)(2) or (3) and paragraph (b)(1)(iv), (v), or (vi) of this section which are performed for an unrelated person. Receivables which arise out of the delivery of export property, or the performance of services, which are evidenced by invoices, bills of lading, bills of exchange which do not evidence a sale on credit, sales slips, and similar documents created by the unilateral act of a creditor shall not be considered evidences of indebtedness for purposes of section 971(c)(4).

(6) *Duplication of treatment and priority of application.* No asset which constitutes an export trade asset shall be taken into account more than once in determining the investments in export trade assets of a controlled foreign corporation. Assets which constitute working capital and also constitute inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies shall be taken into account in determining whether the amount of working capital of the controlled foreign corporation is reasonably necessary for the production of export trade income. However, to the extent that the amount of inventory to which section 971(c)(2) applies or evidences of indebtedness to which section 971(c)(4) applies is not included in working capital to which section 971(c)(1) applies on the ground that such amount is not reasonably necessary for the production of export trade income, the amount shall be included under section 971(c)(2) or 971(c)(4), as the case may be, in a controlled foreign corporation's investments in export trade assets.

(d) *Export promotion expenses*—(1) *In general.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term "export promotion expenses" means, subject to the provisions of subparagraph (2) of this paragraph, all the ordinary and necessary expenses paid or incurred during the taxable year by the controlled foreign corporation which are reasonably allocable to the receipt or production of export trade income including—

(i) A reasonable allowance for salaries or other compensation for personal services actually rendered for such purpose,

(ii) Rentals or other payments for the use of property actually used for such purpose, and

(iii) A reasonable allowance for the exhaustion, wear and tear, or obsolescence of property actually used for such purpose.

In determining for purposes of this subparagraph whether expenses are reasonably allocable to the receipt or production of export trade income, consideration shall be given to the facts and circumstances of each case. As a general rule, if export trade income results

from the sale of export property, export promotion expenses allocable to such income shall include warehousing, advertising, selling, billing, collection, other administrative, and similar costs properly allocable to the marketing activity, but shall not include cost of goods sold, income or similar tax, any expense which does not advance the distribution or sale of export property for use, consumption, or disposition outside the United States, or any expense for which the controlled foreign corporation is reimbursed. If export trade income results from the rental of export property, export promotion expenses allocable to such income shall include a reasonable allowance for depreciation and servicing of such property, and the administrative and similar costs properly allocable to the rental activity. If export trade income results from the performance of services, export promotion expenses shall include a reasonable allowance for compensation of the persons performing services for the controlled foreign corporation in the execution of the service contract or arrangement and administrative expenses reasonably allocable to the service activity. In no case shall income taxes be included in export promotion expenses.

(2) *Expenses incurred within the United States.* No expense incurred within the United States shall be treated as an export promotion expense for purposes of section 971(d) and subparagraph (1) of this paragraph unless at least—

(i) 90 percent of all salaries and other personal service compensation incurred in the receipt or the production of export trade income,

(ii) 90 percent of rents and other payments for the use of property used in the receipt or the production of export trade income,

(iii) 90 percent of the allowances for the exhaustion, wear and tear, or obsolescence of property used in the receipt or the production of export trade income, and

(iv) 90 percent of all other ordinary and necessary expenses reasonably allocable to the receipt or the production of export trade income,

is incurred outside the United States. For this purpose, personal service compensation will be considered incurred

at the place where the service is performed (for example, salaries will be considered incurred at the place where the employee works; payments for art work will be considered incurred at the place where the art work is prepared, etc.); rent, depreciation, and other expenses related to real or personal property will be considered incurred at the place where the property is located; and expenses for media advertising will be considered incurred at the place where the advertising is consumed. For such purpose, newspaper or periodical advertising will be considered consumed where the newspaper or periodical is principally distributed, and television and radio advertising will be considered consumed at the place where the audience is primarily located. Technicalities of contract or payment, for example, the place where a contract is executed or the location of a bank account from which payment is made, shall not be determinative of the place where an expense is incurred.

(e) *Export property.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term “export property” means property, or any interest in property, which is manufactured, produced, grown, or extracted in the United States. Whether property will be considered manufactured or produced in the United States will depend on the facts and circumstances of each case. As a general rule, if—

(1) The property sold, serviced, used, or rented by the controlled foreign corporation is substantially transformed in the United States prior to its export from the United States, or

(2) The operations conducted in the United States with respect to the property sold, serviced, used, or rented by the controlled foreign corporation, whether performed in the United States by one person or a series of persons in a chain of distribution, are substantial in nature and are generally considered to constitute the manufacture or production of property,

then the property sold, serviced, used, or rented will be considered to have been manufactured or produced in the United States. The rules under paragraph (a)(4)(ii) of § 1.954-3, relating to the substantial transformation of property, and paragraph (a)(4)(iii) of such

section, dealing with a substantive test for determining whether property will be treated as having been manufactured or produced, shall apply for purposes of making determinations under this paragraph.

(f) *Unrelated person.* For purposes of sections 970 through 972 and §§ 1.970-1 to 1.972-1, inclusive, the term “unrelated person” means a person other than a related person as defined in section 954(d)(3) and paragraph (e) of § 1.954-1.

[T.D. 6755, 29 FR 12710, Sept. 9, 1964, as amended by T.D. 7293, 38 FR 32802, Nov. 28, 1973; T.D. 7533, 43 FR 6603, Feb. 15, 1978]

§ 1.972-1 Consolidation of group of export trade corporations.

(a) *Election to consolidate—(1) In general.* One or more United States shareholders (as defined in section 951(b)) owning (within the meaning of section 958(a)) or who are considered as owning by applying the rules of ownership of section 958(b) more than 50 percent of the total combined voting power of all classes of stock entitled to vote of an export trade corporation, which is the top-tier corporation in a chain (within the meaning of subparagraph (2) of this paragraph) of export trade corporations, may, subject to the provisions of this section, elect to consolidate such chain for purposes of determining—

(i) The limitations, described in section 970(a) and paragraph (b)(2) of § 1.970-1, on the amount by which subpart F income of an export trade corporation in such chain shall be reduced as provided in section 970(a) and paragraph (b)(1) of § 1.970-1, and

(ii) The amount includible in gross income of such shareholders under section 951(a)(1)(A)(ii) with respect to such a corporation’s decrease in investments in export trade assets to which section 970(b) applies as described in paragraph (c) of § 1.970-1.

(2) *“Chain” defined.* A chain of export trade corporations shall include—

(i) The top-tier export trade corporation referred to in subparagraph (1) of this paragraph which is the first export trade corporation in a chain of ownership described in section 958(a);

(ii) All export trade corporations 80 percent or more of the total combined

voting power of all classes of stock entitled to vote of which is owned directly by such top-tier export trade corporation on the last day of its taxable year; and

(iii) All export trade corporations 80 percent or more of the total combined voting power of all classes of stock entitled to vote of which is owned directly by the export trade corporations described in subdivision (ii) of this subparagraph on the last day of the taxable year of the export trade corporation described in subdivision (i) of this subparagraph.

For purposes of this section, a reference to a top-tier corporation shall mean an export trade corporation described in subdivision (i) of this subparagraph, a reference to a second-tier corporation shall mean an export trade corporation described in subdivision (ii) of this subparagraph, and a reference to a third-tier corporation shall mean an export trade corporation described in subdivision (iii) of this subparagraph.

(3) *Inclusion requirement.* If an election is made by a United States shareholder under this paragraph with respect to a chain of export trade corporations (as defined in subparagraph (2) of this paragraph), all export trade corporations which are included in the chain must be included in the consolidation. If such an election is made, the determinations under section 970 shall be made on a consolidated basis with respect to the entire interest which the electing United States shareholder owns in each of the export trade corporations in the chain, including any minority interests owned directly or indirectly by such shareholder in second-tier and third-tier corporations in the chain. A United States shareholder may elect to consolidate his interest in export trade corporations in one chain of such corporations without electing to consolidate his interest in export trade corporations in other chains.

(4) *Conditions for making initial election*—(i) *Without consent.* The initial election to consolidate a chain of export trade corporations may be made without the consent of the Commissioner only if, immediately before the election to consolidate, each of the export trade corporations to be included

in the consolidation is using the same taxable year and has the same elections under section 970(c)(4) and §1.970-2 in force, or not in force, as the case may be. The election shall be made by the electing shareholder or shareholders with respect to the taxable year in which or with which ends the first taxable year of the top-tier corporation to which the election to consolidate applies and at the time of filing such shareholders' returns for such taxable year or within 90 days after final regulations under this section are published in the FEDERAL REGISTER, whichever date occurs later. Each United States shareholder making such an election shall attach to his return a statement showing:

(a) The name, address, and taxable year of each export trade corporation in the chain of such corporations for which an election is made,

(b) The amount and percentage of each class of stock owned by such shareholder (within the meaning of section 958), corporation by corporation, in each of such export trade corporations, and

(c) A list of the names and addresses, and a description of the ownership interests, of all other United States shareholders, if any, who are making the same election to consolidate and a statement that such shareholders are also making the election.

(ii) *With consent.* If, immediately before the election to consolidate, each of the export trade corporations in a chain of such corporations does not use the same taxable year or does not have the same elections under section 970(c)(4) and §1.970-2 in force, or not in force, as the case may be, the initial election to consolidate such chain may be exercised by the electing shareholder or shareholders only with the consent of the Commissioner. Consent will not be granted unless each electing United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which such consolidation is to be effected and unless, subject to such terms, conditions, and adjustments as the Commissioner may prescribe, each of the export trade corporations in the chain adopts a common taxable year and has the same elections under section

970(c)(4) and § 1.970-2 in force, or not in force, as the case may be. The application for consent to consolidate shall be made by mailing a letter, signed by each of the electing United States shareholders, to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the top-tier corporation with respect to which the electing shareholder or shareholders desire to make a consolidation or before the close of the 90th day after final regulations under this section are published in the FEDERAL REGISTER, whichever date occurs later, and shall include the statement described in subdivision (i) of this subparagraph.

(5) *Effect of election.* If an election to consolidate a chain of export trade corporations is made for a taxable year of a United States shareholder, such election shall, except as provided in subparagraph (6) of this paragraph, be binding on such shareholder for such taxable year and for all succeeding taxable years. If, in a subsequent taxable year of the United States shareholder, an export trade corporation for the first time qualifies as a second-tier or third-tier corporation in such chain on the last day of the taxable year of the top-tier corporation which ends in or with the subsequent taxable year of such shareholder, the shareholder's interest in such export trade corporation shall be included in the consolidation to which the election applies, but only if such export trade corporation as of such last day uses the same taxable year and has the same elections under section 970(c)(4) and § 1.970-2 in force, or not in force, as the case may be, as such top-tier corporation. The United States shareholder shall, with respect to such additional export trade corporation, submit with his return for such subsequent taxable year the statement described in subparagraph (4)(i) of this paragraph.

(6) *Termination of election.* An election under this paragraph to consolidate a chain of export trade corporations shall terminate for the first taxable year of the foreign corporation which during the period of consolidation is a top-tier corporation—

(i) At the close of which any foreign corporation which was included in such consolidation for the preceding taxable year ceases to qualify as an export trade corporation or to be eligible under this paragraph for inclusion in such chain,

(ii) At the close of which an export trade corporation for the first time qualifies as a second-tier or third-tier corporation in such chain but does not as of such close of the year use the same taxable year or have the same elections under section 970(c)(4) and § 1.970-2 in force, or not in force, as the case may be, as such top-tier corporation, or

(iii)(a) In respect of which the Commissioner, upon application made by a United States shareholder who made the election to consolidate, or his successor in interest, consents to a termination of the election. Approval will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the termination will be effected.

(b) The application for consent to termination shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the taxable year of the foreign corporations with respect to which the shareholder desires to terminate the consolidation and shall include the following information:

(1) The name, address, and taxable year of each export trade corporation in the chain of such corporations for which the election was made,

(2) The amount and percentage of each class of stock owned by such shareholder (within the meaning of section 958), corporation by corporation, in each of such export trade corporations, and

(3) A list of the names and addresses, and a description of the ownership interests, of all other United States shareholders, if any, who participated in making the election with such United States shareholder, or their successors in interest, and a statement whether such other persons are or are not terminating the election.

(7) *Election subsequent to initial election.* If a United States shareholder elects under subparagraph (4) of this paragraph to consolidate his interest in a chain of export trade corporations and the election to consolidate such corporations terminates under the provisions of subparagraph (6) of this paragraph, such shareholder may not thereafter elect under this section to consolidate his interest in any corporation which was in that chain of export trade corporations unless he receives the consent of the Commissioner to do so. Application to obtain such consent of the Commissioner shall be made by a letter mailed to the Commissioner of Internal Revenue, Washington, DC, 20224, before the close of the first taxable year of the top-tier corporation of the chain of export trade corporations in which the election to include such interest is to apply. Such application for consent shall include a statement showing:

(i) With respect to such chain, the information required to be shown in the statement described in subparagraph (4)(i) of this paragraph, and

(ii) The United States shareholder's interest in such chain which was previously included in a consolidation, the taxable years of such previous consolidation, and the manner in which such previous consolidation was terminated.

(8) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. Domestic corporation M owns 60 percent of the only class of stock of foreign corporation A, and 100 percent of the only class of stock of foreign corporation F, respectively. Corporation A owns 80 percent of the only class of stock of foreign corporations B and C, respectively. Corporation M also owns 20 percent of the stock of B Corporation. Corporation B owns 80 percent of the only class of stock of foreign corporation D. Corporations B and C each own 50 percent of the only class of stock of foreign corporation E. Corporation F owns 100 percent of the only class of stock of foreign corporation G, which owns 100 percent of the only class of stock of foreign corporation H. Corporation F also owns 20 percent of the stock of C Corporation. Domestic corporations N and R own 30 percent and 10 percent, respectively, of the stock of A Corporation. All corporations use the calendar year as a taxable year, and all foreign corporations qualify as export trade corporations for 1963. Corporation M

may elect for 1963 to consolidate its interest in the chain (the "A" chain) of export trade corporations which includes corporations A, B, C, D, and E; and Corporation M need not, but may, elect to consolidate its interest in the chain (the "F" chain) of export trade corporations which includes corporations F, G, and H. Consolidation of M Corporation's interest in the "A" chain with its interest in the "F" chain is not permitted. If M Corporation elects to consolidate the "A" chain, M Corporation must include in the consolidation its 20 percent directly owned interest in B Corporation and its 20 percent indirectly owned (through F Corporation) interest in C Corporation. Either N Corporation or R Corporation, or both, may join M Corporation in electing to consolidate their interests in the "A" chain. However, neither N Corporation nor R Corporation may elect to consolidate the "A" chain unless M Corporation also agrees to so elect, because corporations N and R, neither jointly nor separately, own more than 50 percent of the total combined voting power of all classes of stock entitled to vote of A Corporation. If corporations M, N, and R elect to consolidate the "A" chain, the determinations specified in subparagraph (1) of this paragraph will be made on a consolidated basis with respect to such corporations' respective interest in the chain as shown in the following tabulation:

| | A % | B % | C % | D % | E % |
|--|------------|------------|------------|-----------|------------|
| M Corporation's interest: | | | | | |
| Direct interest | 60 | | | | |
| (60% × 80%) + 20% direct interest | | 68 | | | |
| (60% × 80%) + 20% indirect interest | | | 68 | | |
| (68% × 80%) | | | | 54.4 | |
| (68% × 50%) + (68% × 50%) | | | | | 68 |
| N Corporation's interest: | | | | | |
| Direct interest | 30 | | | | |
| (30% × 80%) | | 24 | | | |
| (30% × 80%) | | | 24 | | |
| (24% × 80%) | | | | 19.2 | |
| (24% × 50%) + (24% × 50%) | | | | | 24 |
| R Corporation's interest: | | | | | |
| Direct interest | 10 | | | | |
| (10% × 80%) | | 8 | | | |
| (10% × 80%) | | | 8 | | |
| (8% × 80%) | | | | 6.4 | |
| (8% × 50%) + (8% × 50%) | | | | | 8 |
| Total interests to which consolidation applies .. | 100 | 100 | 100 | 80 | 100 |

(b) *Effect of consolidation—(1) Determination of subpart F income, export trade income, etc.* An election under paragraph (a) of this section to consolidate export trade corporations in a chain of such corporations shall have no effect on the determination of the

character of income as subpart F income or on the determination of export trade income, export trade income which constitutes foreign base company income, or earnings and profits of the individual export trade corporations in the chain. Thus, the consolidation of export trade corporations under this section shall not have the effect of reducing earnings and profits of such corporations or of changing the characterization of income from that which is, for example, foreign base company income to that which is not. The application of this paragraph may be illustrated by the following example:

Example. Corporation A, incorporated under the laws of foreign country X, and corporation B, incorporated under the laws of foreign country Y, are both wholly owned subsidiaries of domestic corporation M. Corporations A and B both qualify under section 971(a) as export trade corporations. Corporation A purchases personal property produced in the United States from an unrelated person and sells the property to B Corporation for use outside of country X. Corporation B resells the property to an unrelated person for use in foreign country Z. Corporations A and B each derive foreign base company sales income described in § 1.954-3 from the purchase and sale transactions. Consolidation of Corporations A and B under this section does not result in the two transactions being treated as one transaction which is a purchase of property from an unrelated person and a sale of property to an unrelated person or the nonrecognition of gain on the sale of export property by A Corporation to B Corporation.

(2) *Determination of amount by which consolidated subpart F income is reduced*—(i) *In general.* In determining the amount by which the subpart F income of each export trade corporation includible in a consolidation of export trade corporations shall be reduced as provided in section 970(a) and paragraph (b)(1) of § 1.970-1 for any taxable year of consolidation, the limitations provided by section 970(a) and paragraph (b)(2) of § 1.970-1 on such amount for each such export trade corporation shall be determined on the basis of such corporation's separate share of—

(a) Amounts included in the total export promotion expense,

(b) The total gross receipts from the sale, installation, operation, maintenance, or use of property in respect of which each such corporation derives

such export trade income as is properly allocable to the export trade income which constitutes foreign base company income, and

(c) The total increase in investments in export trade assets,

of all export trade corporations to which the consolidation applies for the taxable year.

(ii) *Limitations not effective.* If for any taxable year each of the limitations under paragraph (b)(2) of § 1.970-1, determined on a consolidated basis, equals or exceeds the total export trade income which constitutes foreign base company income of all corporations includible in the consolidation of export trade corporations, the subpart F income of each includible corporation shall be reduced under section 970(a) for such year by its separate export trade income which constitutes foreign base company income.

(iii) *Limitation effective.* If for any taxable year one of the limitations under paragraph (b)(2) of § 1.970-1, determined on a consolidated basis, is less than the total export trade income which constitutes foreign base company income of all corporations includible in the consolidation of export trade corporations, the amount by which the subpart F income of each includible corporation shall be reduced under section 970(a) for such year shall be an amount which bears the same ratio to the amount by which the subpart F income may be reduced on a consolidated basis as the export trade income which constitutes foreign base company income of each includible corporation bears to the total export trade income which constitutes foreign base company income of all export trade corporations includible in the consolidation of export trade corporations.

(iv) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Domestic corporation M owns 100 percent of the only class of stock of controlled foreign corporation A, which, in turn, owns 100 percent of the only class of stock of controlled foreign corporation B. All corporations use the calendar year as the taxable year, and corporations A and B are export trade corporations throughout the period here involved. Corporation M elects

Internal Revenue Service, Treasury

§ 1.972-1

under this section to consolidate corporations A and B for the entire period here involved. Corporation M elects under paragraph (a)(2) of § 1.970-2 for 1963 to determine both A Corporation's and B Corporation's investments in export trade assets as of the close of the 75th day after the close of such corporations' taxable year.

(b) The following amounts are applicable to corporations A and B for 1964:

| | Corporation A | Corporation B |
|---|---------------|---------------|
| Subpart F income | \$100 | \$200 |
| Export trade income which constitutes foreign base company income | 25 | 75 |
| Other export trade income | 10 | 15 |
| Export promotion expenses allocable to export trade income which constitutes foreign base company income | 10 | 80 |
| Gross receipts from the sale of property in respect of which export trade income which constitutes foreign base company income is derived | 400 | 600 |
| Increase in investments in export trade assets for period beginning with March 16, 1964, and ending with March 16, 1965 | 35 | 120 |

(c) The amount by which subpart F income of corporations A and B is reduced for 1964 on a separate-company basis without regard to section 972 may be determined as set forth in items (i) through (vii) below, and the results of the consolidation of corporations A and B for 1964 are set forth in items (viii) through (x). Assuming an alternative case in which for 1964 the facts are the same as set forth in paragraphs (a) and (b) of this example except that B Corporation incurs export promotion expenses of \$50 (rather than \$80) which are allocable to the export trade income which constitutes foreign base company income, the results of the consolidation of corporations A and B for such year (a case where one of the limitations under paragraph (b)(2) of § 1.970-1 is effective) are set forth in items (xi) through (xiii):

| | A Corporation (1) | B Corporation (2) | Total (3) |
|--|-------------------|-------------------|-----------|
| (i) Subpart F income | \$100 | \$200 | \$300 |
| (ii) Export trade income which constitutes foreign base company income | 25 | 75 | 100 |
| (iii) Other export trade income .. | 10 | 15 | 25 |
| (iv) Total export trade income ... | 35 | 90 | 125 |
| (v) Limitations under § 1.970-1(b)(2): | | | |
| (a) Increase in export trade assets limitation: | | | |
| (\$35 × \$25/\$35) | 25 | | |
| (\$120 × \$75/\$90) | | 100 | |
| ((\$35 + \$120) × \$100/\$125) | | | 124 |

| | A Corporation (1) | B Corporation (2) | Total (3) |
|--|-------------------|-------------------|-----------|
| (b) Gross receipts limitation: | | | |
| (10% of \$400) | 40 | | |
| (10% of \$600) | | 60 | |
| (10% of \$1,000) | | | 100 |
| (c) Export promotion expenses limitation: | | | |
| (150% of \$10) | 15 | | |
| (150% of \$80) | | 120 | |
| (150% of \$90) | | | 135 |
| (d) Export promotion expenses limitation (alternative case): | | | |
| (150% of \$10) | 15 | | |
| (150% of \$50) | | 75 | |
| (150% of \$60) | | | 90 |
| (vi) Reduction in subpart F income on a separate company basis determined without regard to section 972 (item (ii), but not to exceed smallest of items (v) (a), (b), and (c), in columns (1) and (2)) | 15 | 60 | 75 |
| (vii) Subpart F income as reduced on a separate company basis (item (i) minus item (vi)) | 85 | 140 | 225 |
| (viii) Reduction in subpart F income on a consolidated basis determined under section 972 (item (ii), but not to exceed smallest of items (v) (a), (b), and (c), in column (3)) | | | 100 |
| (ix) Apportionment of reduction in subpart F income (item (ii)) | 25 | 75 | 100 |
| (x) Subpart F income as reduced on a consolidated basis (item (i) minus item (ix)) | 75 | 125 | 200 |

ALTERNATIVE CASE

| | | | |
|---|---------|---------|-----|
| (xi) Reduction in subpart F income on a consolidated basis determined under section 972 (item (ii) but not to exceed smallest of items (v) (a), (b), and (d), in column (3)) | | | 9 |
| (xii) Apportionment of reduction in subpart F income (item (xi) times [item (ii) of column (1) over item (ii) of column (3)] and item (xi) times [item (ii) of column (2) over item (ii) of column (3)]): (\$90 × \$25/\$100) | \$22.50 | | |
| (\$90 × \$75/\$100) | | \$67.50 | 90 |
| (xiii) Subpart F income as reduced on a consolidated basis (item (i) minus item (xii)) | 77.50 | 132.50 | 210 |

(3) Determination of pro rata share of consolidated withdrawal of previously excluded export trade income—(i) In general. If, for any taxable year, there is a

§ 1.972-1

26 CFR Ch. I (4-1-23 Edition)

decrease in investments in export trade assets under section 970(b) and paragraph (c)(1) of § 1.970-1, determined on a consolidated basis, of export trade corporations includible in a consolidated chain of such corporations, each United States shareholder who has elected under paragraph (a) of this section to consolidate his interest in such chain of corporations shall include in his gross income, under section 951(a)(1)(A)(ii) and the regulations thereunder as an amount to which section 955 (as in effect before the enactment of the Tax Reduction Act of 1975) applies, his pro rata share of the amount of such consolidated decrease in investments but only to the extent such pro rata share does not exceed the lesser of the limitations provided by section 970(b) and paragraph (c)(2) of § 1.970-1 with respect to such shareholder determined on a consolidated basis. The consolidated decrease in investments and the consolidated limitations shall be determined by aggregating the applicable amounts determined under paragraph (c) of § 1.970-1 with respect to such shareholder's interest in each corporation includible in the consolidation.

(ii) *Allocation of pro rata share of consolidated decrease in investments in export trade assets.* For purposes of determining the amount referred to in paragraph (c)(2)(i)(b)(3) of § 1.970-1 for a subsequent taxable year, a United States shareholder's pro rata share of a consolidated decrease in investments determined under subdivision (i) of this subparagraph for the current taxable year shall be allocated to such shareholder's interest in each of the export trade corporations includible in the consolidation in that ratio which—

(a) The net amount determined under paragraph (c)(2)(i)(b) of § 1.970-1 with respect to such shareholder's interest in such corporation for all prior taxable years (whether or not a taxable year occurring during the period of consolidation) bears to

(b) The total of the net amounts determined under paragraph (c)(2)(i) (b) of § 1.970-1 with respect to such shareholder's interests in all export trade corporations includible in such consolidation for all prior taxable years (whether or not a taxable year occur-

ring during the period of consolidation).

(iii) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Domestic corporation M owns 60 percent of the only class of stock of controlled foreign corporation A, which, in turn, owns 100 percent of the only class of stock of controlled foreign corporation B. All corporations use the calendar year as a taxable year, and corporations A and B are export trade corporations throughout the period here involved. Corporation M elects to consolidate corporations A and B for the entire period here involved.

(b) The following amounts are applicable to corporations A and B for 1964:

| | A (1) | B (2) | Consolidated (3) |
|--|-------|-------|------------------|
| (i) Consolidated decrease in investments in export trade assets (determined before application of § 1.970-1(c)(2)) | | | \$100 |
| (ii) M Corporation's pro rata share of consolidated decrease (60%) | | | 60 |
| (iii) M Corporation's pro rata share of earnings and profits for 1963 and 1964 (§ 1.970-1(c) (2)(i)(a)) | \$120 | \$90 | 210 |
| (iv) M Corporation's pro rata share of net amount determined under § 1.970-1(c)(2)(i)(b) for 1963 | 180 | 60 | 240 |
| (v) Amount includible in M Corporation's gross income for 1964 (smallest of items (ii), (iii), and (iv) in column (3)) | | | 60 |

Corporation M must include \$60 in its gross income for 1964 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)(b)(3) of § 1.970-1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1964 is allocated as follows: to M Corporation's interest in A Corporation, \$45 (\$60 times \$180/\$240); and to its interest in B Corporation, \$15 (\$60 times \$60/\$240).

(c) The following amounts are applicable to corporations A and B for 1965:

| | A(1) | B(2) | Consolidated (3) |
|--|------|------|------------------|
| (i) Consolidated decrease in investments in export trade assets (determined before application of § 1.970-1(c)(2)) | | | \$150 |

Internal Revenue Service, Treasury

§ 1.981-1

| | A(1) | B(2) | Consolidated (3) |
|---|-------|--------|------------------|
| (ii) M Corporation's pro rata share of consolidated decrease (60%) | | | 90 |
| (iii) M Corporation's pro rata share of earnings and profits (and deficits in earnings and profits) for 1963, 1964, and 1965 (\$ 1.970-1(c)(2)(i)(a)) | \$100 | (\$20) | 80 |
| (iv) M Corporation's pro rata share of the net amount determined under § 1.970-1(c)(2)(i)(b) for 1963 and 1964. | | | |
| (\$180 - \$45) | 135 | | |
| (\$60 - \$15) | | 45 | |
| Total | | | 180 |
| (v) Amount includible in M Corporation's gross income for 1965 (smallest of items (ii), (iii), and (iv) in column (3)). | | | 80 |

| | A(1) | B(2) | Consolidated (3) |
|--|------|------|------------------|
| (v) Amount includible in M Corporation's gross income for 1966 (smallest of items (ii), (iii), and (iv) in column (3)) | | | 100 |

Corporation M must include \$100 in its gross income for 1966 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)(b)(3) of § 1.970-1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1966 is allocated as follows: to M Corporation's interest in A Corporation, \$75 (\$100 times \$75/\$100); and to its interest in B Corporation, \$25 (\$100 times \$25/\$100).

[T.D. 6754, 29 FR 12714, Sept. 9, 1964, as amended by T.D. 7893, 48 FR 22512, May 19, 1983]

Corporation M must include \$80 in its gross income for 1965 under section 951(a)(1)(A)(ii) by reason of the application of section 970(b) as its pro rata share of the consolidated decrease in investments in export trade assets; and, for purposes of determining the amount under paragraph (c)(2)(i)(b)(3) of § 1.970-1 with respect to M Corporation's interest in each of corporations A and B for a subsequent taxable year, such consolidated decrease for 1965 is allocated as follows: to M Corporation's interest in A Corporation, \$60 (\$80 times \$135/\$180); and to its interest in B Corporation, \$20 (\$80 times \$45/\$180).

(d) The following amounts are applicable to corporations A and B for 1966:

| | A(1) | B(2) | Consolidated (3) |
|---|-------|------|------------------|
| (i) Consolidated decrease in investments in export trade assets (determined before application of § 1.970-1(c)(2)) | | | \$200 |
| (ii) M Corporation's pro rata share of consolidated decrease (60%) | | | 120 |
| (iii) M Corporation's pro rata share of earnings and profits (and deficits in earnings and profits) for 1963, 1964, 1965, and 1966 (\$ 1.970-1(c)(2)(i)(a)) | \$120 | \$50 | 170 |
| (iv) M Corporation's pro rata share of the net amount determined under § 1.970-1(c)(2)(i)(b) for 1963, 1964, and 1965. | | | |
| (\$180 minus [\$45 + \$60]) | 75 | | |
| (\$60 - [\$15 + \$20]) | | 25 | |
| Total | | | 100 |

§ 1.981-0 Repeal of section 981; effective dates.

The provisions of section 981 are not effective for taxable years beginning after December 31, 1976. For the treatment of the community income of aliens and their spouses for taxable years beginning after December 31, 1976, see section 879 and the regulations thereunder.

[T.D. 7670, 45 FR 6929, Jan. 31, 1980]

§ 1.981-1 Foreign law community income for taxable years beginning after December 31, 1966, and before January 1, 1977.

(a) *Election for special treatment*—(1) *In general*. An individual citizen of the United States who meets the requirements of section 981(a)(1) and subparagraph (2) of this paragraph for any open taxable year beginning after December 31, 1966, and before January 1, 1977, may make a binding election with his non-resident alien spouse to have section 981(b) and paragraph (b) of this section apply to their income for such year which is treated as community income under the applicable community property laws of a foreign country or countries. Generally, the community property laws of a foreign country operate upon land situated within its jurisdiction and upon personal property owned

by spouses domiciled therein. If the election is made for any taxable year, it shall also apply for all subsequent open taxable years of such citizen and his nonresident alien spouse for which all the requirements of section 981(a)(1) and subparagraph (2) of this paragraph are met, unless the Director of International Operations consents, in accordance with paragraph (c)(2) of this section, to a termination of the election. An election under section 981(a) and this section has no effect for any taxable year beginning before January 1, 1967, for which a separate election, if made, must be made under section 981(c)(1) and § 1.981-2. For the definition of “open taxable year” see section 981(e)(2) and paragraph (a) of § 1.981-3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of § 1.981-3. If one of the spouses is deceased, see paragraph (d) of § 1.981-3.

(2) *Requirements to be met.* In order for a U.S. citizen and his nonresident alien spouse to make an election under section 981(a) and this section for any taxable year and in order for the election to apply for any subsequent taxable year it is required under section 981(a)(1) that, for each such taxable year, such citizen be (i) a citizen of the United States, (ii) a bona fide resident of a foreign country or countries during the entire taxable year, and (iii) married at the close of the taxable year to an individual who is (a) a nonresident alien during the entire taxable year and (b), in the case of any such subsequent taxable year, the same nonresident alien individual to whom the citizen was married at the close of the earliest of such taxable years. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated, solely for purposes of making the determination under subdivision (iii) of this subparagraph, as ending on the date of such death. A citizen of the United States shall be considered as not married at the close of his taxable year if he is legally separated from his spouse under a decree of divorce or of separate maintenance. However, the mere fact that spouses have not lived together during the course of the taxable year shall not cause them to be considered as not

married at the close of the taxable year. A husband and wife who are separated under an interlocutory decree of divorce retain the relationship of husband and wife until the decree becomes final.

(3) *Determination of residence.* The principles of paragraphs (a)(2) and (b)(7) of § 1.911-1 (26 CFR 1.911-1 (1978)) shall apply in order to determine for purposes of this paragraph whether a U.S. citizen is a *bona fide* resident of a foreign country or countries during the entire taxable year. The principles of §§ 1.871.2 through 1.871-5 shall apply in order to determine whether the alien spouse of a U.S. citizen is a nonresident during the entire taxable year.

(4) *Manner of electing.* The election under section 981(a) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income—(1) In general.* Community income for any taxable year to which an election under section 981(a) and this section applies, and the deductions properly allocable to such income, shall be divided between the electing U.S. citizen and nonresident alien spouses in accordance with the rules set forth in section 981(b) and subparagraphs (2) through (6) of this paragraph. Community income for this purpose means all gross income, whether derived from sources within or without the United States, which is treated as community income of the spouses under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. A spouse has ownership of the income for this purpose if under the applicable foreign law he has a proprietary vested interest in the income.

(2) *Earned income.* Wages, salaries, or professional fees, and other amounts received as compensation for personal services actually performed, which are community income for the taxable year, shall be treated as the income of the spouse who actually performed the personal services. This subparagraph does not apply, however, to community income (i) derived from any trade or business carried on by the husband or the wife, (ii) attributable to a spouse's distributive share of the income of a

partnership to which subparagraph (4) of this paragraph applies, (iii) consisting of compensation for personal services rendered to a corporation which represents a distribution of the earnings and profits of the corporation rather than a reasonable allowance as compensation for the personal services actually performed, or (iv) derived from property which is acquired as consideration for personal services performed.

(3) *Trade or business income.* If any income derived from a trade or business carried on by the husband or wife is community income for the taxable year, all of the gross income, and the deductions attributable to such income, shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of the trade or business, in which case all of the gross income and deductions shall be treated as the gross income and deductions of the wife. This subparagraph does not apply to any income derived from a trade or business carried on by a partnership of which both or one of the spouses is a member. For purposes of this subparagraph, income derived from a trade or business includes any income derived from a trade or business in which both personal services and capital are material income producing factors. The term "management and control" means management and control in fact, not the management and control imputed to the husband under the community property laws of a foreign country. For example, a wife who operates a beauty parlor without any appreciable collaboration on the part of a husband is considered as having substantially all of the management and control of the business despite the provisions of any community property laws of a foreign country vesting in the husband the right of management and control of community property; and the income and deductions attributable to the operation of the beauty parlor are considered the income and deductions of the wife.

(4) *Partnership income.* If any portion of a spouse's distributive share of the income of a partnership of which such spouse is a member is community in-

come for the taxable year, all of that distributive share shall be treated as the income of that spouse and shall not be taken into account in determining the income of the other spouse. If both spouses are members of the same partnership, the distributive share of the income of each spouse which is community income shall be treated as the income of that spouse. A spouse's distributive share of such income of a partnership shall be determined as provided in section 704, and the regulations thereunder.

(5) *Income from separate property.* Any community income for the taxable year, other than income described in section 981(b)(1) or (2) and subparagraph (2), (3), or (4) of this paragraph, which is derived from the separate property of one of the spouses shall be treated as the income of that spouse. The determination of what property is separate property for this purpose shall be made in accordance with the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that the income from such property is community income.

(6) *Other community income.* Any community income for the taxable year, other than income described in section 981(b)(1), (2), or (3), and subparagraph (2), (3), (4), or (5) of this paragraph, shall be treated as the income of that spouse who has a proprietary vested interest in that income under the laws of the foreign country which, in accordance with subparagraph (1) of this paragraph, has jurisdiction to determine that such income is community income. Thus, for example, this subparagraph applies to community income not described in subparagraph (2), (3), (4), or (5) of this paragraph which consists of dividends, interest, rents, royalties, or gains, from community property or of the earnings of unemancipated minor children.

(7) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. H, a nonresident alien individual and W, a U.S. citizen, each of whose taxable years is the calendar year, were married throughout 1967. H and W were residents of, and domiciled in, foreign country Z during the entire taxable year. During 1967, H

earned \$10,000 from the performance of personal services as an employee. H also received \$500 in dividend income from stock which under the community property laws of country Z is considered to be the separate property of H. W had no separate income for 1967. Under the community property laws of country Z all income earned by either spouse is considered to be community income, and one-half of such income is considered to belong to the other spouse. In addition, such laws of country Z provide that all income derived from property held separately by either spouse is to be treated as community income and treated as belonging one-half to each spouse. Thus, under the community property laws of country Z, H and W are both considered to have realized income of \$5,250 during 1967, even though such laws recognize the stock as the separate property of H. If the election under this section is in effect for 1967, under the rules of subparagraphs (2) and (5) of this paragraph all of the income of \$10,500 derived during 1967 shall be treated, for U.S. income tax purposes, as the income of H.

Example 2. The facts are the same as in example 1 except that H is the sole proprietor of a retail merchandising company and such company has a \$10,000 profit during 1967. W exercises no management and control over the business. In addition, H is a partner in a wholesale distributing company, and his distributive share of the partnership profit is \$5,000. Both of these amounts of income are treated as community income under the community property laws of country Z, and under such laws both H and W are treated as realizing \$7,500 of such income. If the election under this section is in effect for 1967, under the rule of subparagraphs (3) and (4) of this paragraph all \$15,000 of such income shall be treated as the income of H for U.S. income tax purposes.

Example 3. The facts are the same as in example 1 except that H also received \$1,000 in dividends on stock held separately in his name. Under the community property laws of country Z the stock is considered to be community property; and the dividends, to be community income, one-half of such income being treated as the income of each spouse. If the election under this section is in effect for 1967, under the rule of subparagraph (6) of this paragraph, \$500 of the dividend income shall be treated, for U.S. income tax purposes, as the income of each spouse.

(c) *Time and manner of making or terminating an election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse shall, for the first taxable year beginning after December 31, 1966, for which an election under section 981(a) and this section is

to apply, make the election by filing a return, an amended return, or a claim for refund, whichever is proper, for such taxable year and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for such taxable year. The statement must show the name, address, and account number, if any, of each spouse, the name and address of the executor, administrator, or other person making the election for a deceased spouse, the taxable year to which the election applies, and the name of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(b) and paragraph (b) of this section. The statement must be signed by both persons making the election. An election under this section may be made only for a taxable year which, on the date of the election, as defined in paragraph (b) of § 1.981-3, is open within the meaning of section 981(e)(2) and paragraph (a) of § 1.981-3.

(2) *Termination only with consent of Director of International Operations*—(i) *In general.* An election under this section for any taxable year is binding and may not be revoked. The election shall also remain in effect for all subsequent taxable years of the spouses for which the requirements of paragraph (a)(2) of this section are met and which on the date of the election are open, within the meaning of paragraph (a) of § 1.981-3, unless the election is terminated for any such subsequent taxable year or years in accordance with subdivision (ii) of this subparagraph. Any return, amended return, or claim for refund in respect of any such subsequent taxable year for which the election is in effect shall have attached thereto a copy of the statement filed in accordance with subparagraph (1) of this paragraph and an additional signed statement that for such subsequent taxable year the requirements of paragraph (a)(2) of this section are met.

(ii) *Written request to terminate required.* A request to terminate an election under this section for a subsequent taxable year or years shall be made in writing by the persons who made the election and shall be addressed to the Director of International

Operations, Internal Revenue Service, Washington, DC 20225. The request must include the name, address, and account number, if any, of each spouse and must be signed by the persons making the request. It must specify the taxable year or years for which the termination is to be effective and the grounds which justify the termination. The request shall be filed not later than 90 days before the close of the period for assessing a deficiency against the U.S. citizen for the earliest taxable year of such citizen for which the termination is to be effective. The Director of International Operations may require such other information as may be necessary in order to determine whether the termination will be permitted. A copy of the consent by the Director of International Operations to terminate must be attached to an amended income tax return for each taxable year for which the termination is effective and for which a return has previously been filed.

(Secs. 913(m) (92 Stat. 3106; 26 U.S.C. 913(m)), and 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 7330, 39 FR 38372, Oct. 31, 1974, as amended by T.D. 7670, 45 FR 6929, Jan. 31, 1980; T.D. 7736, 45 FR 76143, Nov. 18, 1980]

§ 1.981-2 Foreign law community income for taxable years beginning before January 1, 1967.

(a) *Election for special treatment*—(1) *In general.* For all open taxable years beginning before January 1, 1967, for which an individual citizen of the United States meets the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph, such citizen and his nonresident alien spouse may make a joint election to have section 981(c)(2) and paragraph (b) of this section apply to their income which is treated as community income under the applicable community property laws of a foreign country or countries. However, if the conditions prescribed by section 981(d)(3) and subparagraph (3) of this paragraph are met, the nonresident alien spouse is not required to join in the election and such citizen may make a separate election to have section 981(c)(2) and paragraph (b) of this section apply to such income for such

taxable years. An election under section 981(c)(1) and this section shall apply to every open taxable year of such citizen and his nonresident alien spouse beginning before January 1, 1967, for which all the requirements of subparagraphs (A) and (C) of section 981(a)(1) and subparagraph (2) of this paragraph are met. It is immaterial whether such open taxable year is a taxable year subject to the provisions of the 1954 Code, the 1939 Code, or any other internal revenue law in effect before the 1939 Code. An election under section 981(c)(1) and this section has no effect for any taxable year beginning after December 31, 1966. For the definition of “open taxable year” see section 981(e)(2) and paragraph (a) of § 1.981-3. If the citizen and his nonresident alien spouse have different taxable years, see paragraph (c) of § 1.981-3. If one of the spouses is deceased, see paragraph (d) of § 1.981-3. An election under section 981(c)(1) and this section is binding and may not be revoked.

(2) *Requirements to be met.* In order for the citizen of the United States to make an election under this section, whether required to be made jointly with his nonresident alien spouse or permitted to be made separately, it is required under section 981(c)(1) that, for each taxable year to which the election applies, the citizen making the election be (i) a citizen of the United States and (ii) married at the close of the taxable year to an individual who is (a) a nonresident alien during the entire taxable year and (b), in the case of any such taxable years subsequent to the first, the same nonresident alien individual to whom the citizen was married at the close of such first taxable year. The provisions of paragraph (a)(2) of § 1.981-1 apply to determine whether a U.S. citizen making an election under section 981(c)(1) and this section is married at the close of a taxable year to an individual who is a nonresident alien during the entire taxable year.

(3) *Cases where joint election is not required.* A nonresident alien spouse is not required to join in an election under section 981(c)(1) and this section if the Director of International Operations determines in accordance with paragraph (c)(4) of this section—

(i) That an election under section 981(c)(1) and this section would not affect the liability for Federal income tax of the nonresident alien spouse for any taxable year, whether beginning on, before, or after January 1, 1967, or

(ii) That the effect of the election on the liability of the nonresident alien spouse for Federal income tax for any such taxable year cannot be ascertained and that to deny the election to the U.S. citizen spouse would be inequitable and cause undue hardship to the U.S. citizen.

If in accordance with this subparagraph the nonresident alien spouse is not required to join in the election by the U.S. citizen, the provisions of section 981(d)(2) and paragraph (e) of § 1.981-3 shall not apply so as to extend the period for assessing deficiencies or filing a claim for credit or refund for any taxable year of the nonresident alien spouse.

(4) *Manner of electing.* The election under section 981(c)(1) and this section shall be made in accordance with the applicable rules set forth in paragraph (c) of this section.

(b) *Treatment of community income*—(1) *In general.* Community income, as defined in paragraph (b)(1) of § 1.981-1, for any taxable year beginning before January 1, 1967, to which an election under section 981(c)(1) and this section applies, and the deductions properly allocable to such income, shall be divided between the U.S. citizen and his nonresident alien spouse in accordance with the rules set forth in section 981(c)(2) and subparagraphs (2) and (3) of this paragraph. The income shall be divided in such manner even though the nonresident alien spouse is not required, in accordance with paragraph (a)(3) of this section, to join in the election by the U.S. citizen.

(2) *Earned income, business income, partnership income, and income from separate property.* All community income for any taxable year to which this paragraph applies which is treated as the income of one of the spouses in accordance with section 981(b)(1), (2), or (3) and paragraph (b)(2), (3), (4), or (5) of § 1.981-1 shall be treated as the income of that spouse for purposes of this paragraph.

(3) *Other community income.* All community income for any taxable year to which this paragraph applies, other than income described in subparagraph (2) of this paragraph, shall be treated as the income of the spouse who, for such taxable year, has a greater amount of gross income than the other spouse, determined by adding to the amount of gross income which is treated as the gross income of that spouse in accordance with subparagraph (2) of this paragraph the amount of the gross income for the taxable year which is treated as the separate income of that spouse under the community property laws of the foreign country having jurisdiction to determine the legal ownership of the income. If either spouse dies during a taxable year, the taxable year of the surviving spouse shall be treated as ending on the date of such death for the purpose of determining which spouse has the greater amount of gross income for such taxable year. Moreover, if the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the periods for which the amounts of gross income are to be compared under this subparagraph are (i) the taxable year of the citizen and (ii) that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen. See paragraph (c) of § 1.981-3.

(c) *Time and manner of making election*—(1) *In general.* A citizen of the United States and his nonresident alien spouse or, if subparagraph (4) of this paragraph applies, such citizen alone may make an election under section 981(c)(1) and this section at any time on or after November 13, 1966, for each and every taxable year beginning before January 1, 1967, which on the date of the election, as defined in paragraph (b) of § 1.981-3, is open within the meaning of section 981(e)(2) and paragraph (a) of § 1.981-3. The election shall be made by filing a return, an amended return, or a claim for refund, whichever is proper, for each taxable year to

which the election applies and attaching thereto a statement that the election is being made and that the requirements of paragraph (a)(2) of this section are met for each such taxable year. The statement must also show the information required by subparagraph (2) of this paragraph and must, where applicable, be signed by both persons making the election.

(2) *Information required.* The statement described in subparagraph (1) of this paragraph must show—

(i) The name, address, and account number, if any, of each spouse,

(ii) The name and address of the executor, administrator, or other person making the election for a deceased spouse,

(iii) The taxable years to which the election applies,

(iv) The office of the district director, or the service center, where the return or returns, if any, for such taxable year or years were filed,

(v) The dates on which such return or returns, if any, were filed and on which the tax for such taxable year or years was paid, if the tax has been paid, and

(vi) The name of the foreign country or countries having jurisdiction to determine the ownership of any income being treated in accordance with section 981(c)(2) and paragraph (b) of this section.

(3) *Place for filing.* Any return, amended return, or claim for refund filed under subparagraph (1) of this paragraph in respect of any taxable year shall be filed with the Director of International Operations, Internal Revenue Service, Washington, DC 20225. (See § 1.6091-3.)

(4) *Determination that joint election is not required.* A U.S. citizen spouse entitled to make an election under section 981(c)(1) and this section for open taxable years beginning before January 1, 1967, may apply to the Director of International Operations for a determination under section 981(d)(3) that the nonresident alien spouse is not required to join in the election by such citizen. This application shall be made by filing with the Director of International Operations, Internal Revenue Service, Washington, DC 20225, a statement setting forth the same information required by subparagraph (2) of

this paragraph and such other information as is required by the Director of International Operations to justify a claim that the requirements of section 981(d)(3) and paragraph (a)(3) of this section are met. The Director of International Operations shall notify the U.S. citizen by letter of his determination with respect to the application. If the determination is that the nonresident alien spouse is not required to join in the election, a copy of the letter of determination shall be attached to each return, amended return, or claim for refund, to be filed pursuant to subparagraph (1) of this paragraph.

[T.D. 7330, 39 FR 38373, Oct. 31, 1974]

§ 1.981-3 Definitions and other special rules.

(a) *Open taxable years.* (1) For purposes of paragraph (a) of § 1.981-1, and paragraph (a) of § 1.981-2, a taxable year of the U.S. citizen, and the taxable year or years of his nonresident alien spouse ending or beginning within such taxable year of such citizen, shall be treated as open if the period prescribed by section 6501(a) (or section 6501(c)(4) if the period is extended by agreement) for assessing a deficiency against the citizen for his taxable year has not expired before the date of the election, determined under paragraph (b) of this section. Thus, for example, a taxable year of a U.S. citizen beginning before January 1, 1967, is open for purposes of this subparagraph if, before the election under section 981(c)(1) and § 1.981-2, such citizen has never filed a return for such year and a return was required under section 6012 without reference to section 981. For example, if a U.S. citizen spouse on a calendar year basis who has never filed a return for 1960 decides in 1975 that he wishes to make the election under section 981(c)(1) and § 1.981-2 in order to avoid being subject to tax for 1960 on his share of the community income for that year, he may in 1975 elect the benefits of section 981(c)(2) by filing an election in accordance with paragraph (c) of § 1.981-2. In such case, a taxable year or years of the nonresident alien spouse of such citizen ending or beginning within 1960 shall be treated in 1975 as an open taxable year.

(2) Subparagraph (1) of this paragraph shall apply even though the period prescribed by section 6501 for assessing a deficiency against the nonresident alien spouse for his taxable year or years ending or beginning within the taxable year of the U.S. citizen has expired before the election is made.

(3) If either spouse dies during a taxable year to which an election under § 1.981-1 or § 1.981-2 applies, the taxable year of the decedent and the surviving spouse shall be determined under this paragraph without regard to section 981(e)(4), relating to death of spouse during the taxable year. See paragraph (a)(2) of § 1.443-1.

(4) For definition of the term “taxable year”, see section 441(b) and the regulations thereunder.

(b) *Date of election.* (1) For purposes of § 1.981-1 and this section the date of an election made under section 981(a) and § 1.981-1 is the date on which the return, amended return, or claim for refund required by paragraph (c)(1) of § 1.981-1 is filed.

(2) For purposes of § 1.981-2 and this section the date of an election made under section 981(c)(1) and § 1.981-2 is the date on which the returns, amended returns, or claims for refund, required by paragraph (c)(1) of § 1.981-2 are filed.

(3) For provisions treating timely mailing as timely filing, see section 7502 and the regulations thereunder.

(c) *Spouses with different taxable years.* If the U.S. citizen and his nonresident alien spouse do not have the same taxable year, as defined in section 441(b) and the regulations thereunder, the election under § 1.981-1 or § 1.981-2 shall apply to each taxable year of such citizen in respect of which the election is made and to that period falling within the consecutive taxable years of the nonresident alien spouse which coincides with the period covered by such taxable year of the citizen.

(d) *Election on behalf of deceased spouse.* Any election, statement, or request, required to be made under paragraph (c) of § 1.981-1, or paragraph (c) of § 1.981-2, by one of the spouses may, if such spouse is deceased, be made by the executor, administrator, or other person charged with the property of such deceased spouse.

(e) *Extension of period of limitations on assessment or refund—*(1) *Assessment of deficiency.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and § 1.981-1, or under section 981(c)(1) and § 1.981-2, is properly made, the period within which a deficiency may be assessed for any taxable year to which the election applies shall, to the extent the deficiency is attributable to the application of such election, not expire before one year after the date of the election, determined under paragraph (b) of this section.

(2) *Refund of tax.* Except as provided in subparagraph (3) of this paragraph, if an election under section 981(a) and § 1.981-1, or under section 981(c)(1) and § 1.981-2, is properly made, the period within which a claim for credit or refund of an overpayment for any taxable year to which the election applies may be filed shall, to the extent the overpayment is attributable to the application of the election, not expire before one year after the date of the election, determined under paragraph (b) of this section.

(3) *Exception in case of nonelecting alien.* Subparagraphs (1) and (2) of this paragraph shall not apply to any taxable year of a nonresident alien spouse who, in accordance with paragraph (a)(3) of § 1.981-2, is not required to join in the election by the U.S. citizen spouse under section 981(c)(1) and § 1.981-2.

(f) *Payment of interest for extension period.* To the extent that an overpayment or deficiency for any taxable year is attributable to an election made under § 1.981-1 or § 1.981-2, no interest shall be allowed or paid for any period ending with the day before the date which is one year after the date of the election, determined under paragraph (b) of this section.

[T.D. 7330, 39 FR 38374, Oct. 31, 1974]

§ 1.985-0 Outline of regulation.

This section lists the paragraphs contained in §§ 1.985-1 through 1.985-6.

§ 1.985-1 Functional currency.

- (a) Applicability and effective date.
- (b) Dollar functional currency.
- (c) Functional currency of a QBU that is not required to use the dollar.

Internal Revenue Service, Treasury

§ 1.985-1

- (d) Single functional currency for a foreign corporation.
- (e) Translation of nonfunctional currency transactions.
- (f) Examples.

§ 1.985-2 Election to use the United States dollar as the functional currency of a QBU.

- (a) Background and scope.
- (b) Eligible QBU.
- (c) Time and manner for dollar election.
- (d) Effect of dollar election.

§ 1.985-3 United States dollar approximate separate transactions method.

- (a) Scope and effective date.
- (b) Statement of method.
- (c) Translation into United States dollars.
- (d) Computation of DASTM gain or loss.
- (e) Effect of DASTM gain or loss on gross income, taxable income, or earnings and profits.

§ 1.985-4 Method of accounting.

- (a) Adoption or election.
- (b) Condition for changing functional currencies.
- (c) Relationship to certain other sections of the Code.

§ 1.985-5 Adjustments required upon change in functional currency.

- (a) In general.
- (b) Step 1—Taking into account exchange gain or loss on certain section 988 transactions.
- (c) Step 2—Determining the new functional currency basis of property and the new functional currency amount of liabilities and any other relevant items.
- (d) Step 3A—Additional adjustments that are necessary when a branch changes functional currency.
- (e) Step 3B—Additional adjustments that are necessary when a taxpayer changes functional currency.
- (f) Examples.

Section 1.985-6 Transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning in 1987.

- (a) In general.
- (b) Certain controlled foreign corporations.
- (c) All other foreign corporations.
- (d) Pre-1987 section 902 amounts.
- (e) Net worth branch.
- (f) Profit and loss branch.

[T.D. 8263, 54 FR 38653, Sept. 20, 1989, as amended by T.D. 8464, 58 FR 232, Jan. 5, 1993; T.D. 8556, 59 FR 37672, July 25, 1994]

§ 1.985-1 Functional currency.

- (a) *Applicability and effective date*—(1) *Purpose and scope.* These regulations

provide guidance with respect to defining the functional currency of a taxpayer and each qualified business unit (QBU), as defined in section 989(a). Generally, a taxpayer and each QBU must make all determinations under subtitle A of the Code (relating to income taxes) in its respective functional currency. This section sets forth rules for determining when the functional currency is the United States dollar (dollar) or a currency other than the dollar. Section 1.985-2 provides an election to use the dollar as the functional currency for certain QBUs that absent the election would have a functional currency that is a hyperinflationary currency, and explains the effect of making the election. Section 1.985-3 sets forth the dollar approximate separate transactions method that certain QBUs must use to compute their income or loss or earnings and profits. Section 1.985-4 provides that the adoption of a functional currency is a method of accounting and sets forth conditions for a change in functional currency. Section 1.985-5 provides adjustments that are required to be made upon a change in functional currency. Finally, § 1.985-6 provides transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning after December 31, 1986.

(2) *Effective date.* These regulations apply to taxable years beginning after December 31, 1986. However, any taxpayer desiring to apply temporary Income Tax Regulations § 1.985-0T through § 1.985-4T in lieu of these regulations to all taxable years beginning after December 31, 1986, and on or before October 20, 1989 may (on a consistent basis) so choose. For the text of the temporary regulations, see 53 FR 20308 (1988).

(b) *Dollar functional currency*—(1) *In general.* The dollar shall be the functional currency of a taxpayer or QBU described in paragraph (b)(1)(i) through (v) of this section regardless of the currency used in keeping its books and records (as defined in § 1.989(a)-1(d)). The dollar shall be the functional currency of—

- (i) A taxpayer that is not a QBU (e.g., an individual);

(ii) A QBU that conducts its activities primarily in dollars. A QBU conducts its activities primarily in dollars if the currency of the economic environment in which the QBU conducts its activities is primarily the dollar. The facts and circumstances test set forth in paragraph (c)(2) of this section shall apply in making this determination;

(iii) Except as otherwise provided by ruling or administrative pronouncement, a QBU that has the United States, or any possession or territory of the United States where the dollar is the standard currency, as its residence (as defined in section 988(a)(3)(B));

(iv) A QBU that does not keep books and records in the currency of any economic environment in which a significant part of its activities is conducted. Whether a QBU keeps such books and records is determined in accordance with paragraph (c)(3) of this section; or

(v) A QBU that produces income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States.

(2) *QBUs operating in a hyperinflationary environment*—(i) *Taxable years beginning on or before August 24, 1994.* For taxable years beginning on or before August 24, 1994, see § 1.985-2 with respect to a QBU that elects to use, or is otherwise required to use, the dollar as its functional currency.

(ii) *Taxable years beginning after August 24, 1994*—(A) *In general.* For taxable years beginning after August 24, 1994, except as otherwise provided in paragraph (b)(2)(ii)(B) of this section, any QBU that otherwise would be required to use a hyperinflationary currency as its functional currency must use the dollar as its functional currency and compute income or loss or earnings and profits under the rules of § 1.985-3.

(B) *Exceptions*—(1) *Certain QBU branches.* The functional currency of a QBU that otherwise would be required to use a hyperinflationary currency as its functional currency and that is a branch of a foreign corporation having a non-dollar functional currency that is not hyperinflationary shall be the functional currency of the foreign corporation. Such QBU's income or loss or earnings and profits shall be determined under § 1.985-3 by substituting

the functional currency of the foreign corporation for the dollar.

(2) *Corporation that is not a controlled foreign corporation.* A foreign corporation (or its QBU branch) operating in a hyperinflationary environment is not required to use the dollar as its functional currency pursuant to paragraph (b)(2)(ii)(A) of this section if that foreign corporation is not a controlled foreign corporation as defined in section 957 or 953(c)(1)(B). However, a non-controlled section 902 corporation, as defined in section 904(d)(2)(E), may elect to use the dollar (or, if appropriate, the currency specified in paragraph (b)(2)(ii)(B)(I) of this section) as its (or its QBU branch's) functional currency under the procedures set forth in § 1.985-2(c)(3).

(C) *Change in functional currency*—(1) *In general.* If a QBU is required to change its functional currency to the dollar under paragraph (b)(2)(ii)(A) of this section, or chooses or is required to change its functional currency to the dollar for any open taxable year (and all subsequent taxable years) under § 1.985-3(a)(2)(ii), the change is considered to be made with the consent of the Commissioner for purposes of § 1.985-4. A QBU changing functional currency must make adjustments described in § 1.985-7 if the year of change (as defined in § 1.481-1(a)(1)) begins after 1987, or the adjustments described in § 1.985-6 if the year of change begins in 1987. No adjustments under section 481 are required solely because of a change in functional currency described in this paragraph (b)(2)(ii)(C).

(2) *Effective date.* This paragraph (b)(2)(ii)(C) applies to taxable years beginning after April 6, 1998. However, a taxpayer may choose to apply this paragraph (b)(2)(ii)(C) to all open years after December 31, 1986, provided each person, and each QBU branch of a person, that is related (within the meaning of § 1.985-2(d)(3)) also applies to this paragraph (b)(2)(ii)(C).

(D) *Hyperinflationary currency.* For purposes of sections 985 through 989, the term hyperinflationary currency means the currency of a country in which there is cumulative inflation during the base period of at least 100 percent as determined by reference to

the consumer price index of the country listed in the monthly issues of the "International Financial Statistics" or a successor publication of the International Monetary Fund. If a country's currency is not listed in the monthly issues of "International Financial Statistics," a QBU may use any other reasonable method consistently applied for determining the country's consumer price index. Base period means, with respect to any taxable year, the thirty-six calendar months immediately preceding the first day of the current calendar year. For this purpose, the cumulative inflation rate for the base period is based on compounded inflation rates. Thus, if for 1991, 1992, and 1993, a country's annual inflation rates are 29 percent, 25 percent, and 30 percent, respectively, the cumulative inflation rate for the three-year base period is 110 percent $[(1.29 \times 1.25 \times 1.3) - 1.0 \times 1.10] \times 100 = 110\%$ and the currency of the country for the QBU's 1994 year is considered hyperinflationary. In making the determination whether a currency is hyperinflationary, the determination for purposes of United States generally accepted accounting principles may be used for income tax purposes provided the determination is based on criteria that is substantially similar to the rules previously set forth in this paragraph (b)(2)(ii)(D), the method of determination is applied consistently from year to year, and the same method is applied to all related persons as defined in § 1.985-3(e)(2)(vi).

(E) *Change in functional currency when currency ceases to be hyperinflationary*—(1) *In general.* A QBU that has been required to use the dollar as its functional currency under paragraph (b)(2) of this section, or has elected to use the dollar as its functional currency under paragraph (b)(2)(ii)(B)(2) of this section or § 1.985-2, must change its functional currency as of the first day of the first taxable year that follows three consecutive taxable years in which the currency of its economic environment, determined under paragraph (c)(2) of this section, is not a hyperinflationary currency. The functional currency of the QBU for such year shall be determined in accordance with paragraph (c) of this sec-

tion. For purposes of § 1.985-4, the change is considered to be made with the consent of the Commissioner. See § 1.985-5 for adjustments that are required upon a change in functional currency.

(2) *Effective Date.* This paragraph (b)(2)(ii)(E) of this section applies to taxable years beginning after April 6, 1998.

(c) *Functional currency of a QBU that is not required to use the dollar*—(1) *General rule.* The functional currency of a QBU that is not required to use the dollar under paragraph (b) of this section shall be the currency of the economic environment in which a significant part of the QBU's activities is conducted, if the QBU keeps, or is presumed under paragraph (c)(3) of this section to keep, its books and records in such currency.

(2) *Economic environment.* For purposes of section 985 and the regulations thereunder, the economic environment in which a significant part of a QBU's activities is conducted shall be determined by taking into account all the facts and circumstances.

(i) *Facts and circumstances.* The facts and circumstances that are considered in determining the economic environment in which a significant part of a QBU's activities is conducted include, but are not limited to, the following:

(A) The currency of the country in which the QBU is a resident as determined under section 988(a)(3)(B);

(B) The currencies of the QBU's cash flows;

(C) The currencies in which the QBU generates revenues and incurs expenses;

(D) The currencies in which the QBU borrows and lends;

(E) The currencies of the QBU's sales markets;

(F) The currencies in which pricing and other financial decisions are made;

(G) The duration of the QBU's business operations; and

(H) The significance and/or volume of the QBU's independent activities.

(ii) *Rate of inflation.* The rate of inflation (regardless of how it is determined) shall not be a factor used to determine a QBU's economic environment.

(iii) *Consistency.* A taxpayer must consistently apply the facts and circumstances test set forth in this paragraph (c)(2) in evaluating the economic environment of its QBUs, *e.g.*, its branches, that engage in the same or similar trades or businesses.

(3) *Books and records presumption.* A QBU shall be presumed to keep books and records in the currency of the economic environment in which a significant part of its activities are conducted. The presumption may be overcome only if the QBU can demonstrate to the satisfaction of the district director that a substantial nontax purpose exists for not keeping any books and records in such currency. A taxpayer may not use this presumption affirmatively in determining a QBU's functional currency.

(4) *Multiple currencies.* If a QBU has more than one currency that satisfies the requirements of paragraph (c)(1) of this section, the QBU may choose any such currency as its functional currency.

(5) *Relationship of United States accounting principles.* In making the functional currency determination under this paragraph (c), the currency of the QBU for purposes of United States generally accepted accounting principles (GAAP) will ordinarily be accepted as the functional currency of the QBU for income tax purposes, provided that the GAAP determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section.

(6) *Effect of changed circumstances.* Regardless of any change in circumstances, a QBU may change its functional currency determined under this paragraph (c) only if the QBU complies with § 1.985-4 or the Commissioner's consent is considered to have been granted under § 1.985-2(d)(4) or § 1.985-3(a)(2)(ii). For special rules relating to the conversion to the euro, see § 1.985-8.

(d) *Single functional currency for a foreign corporation—(1) General rule.* This paragraph (d) applies to a foreign corporation that has two or more QBUs that do not have the same functional currency. The foreign corporation shall be treated as having a single functional currency for the corporation as a whole

that is different from the functional currency of one or more of its QBUs. The determination of a foreign corporation's functional currency shall be made by first applying paragraph (d)(1)(i) and then paragraph (d)(1)(ii) of this section.

(i) *Step 1.* Each QBU of the foreign corporation determines its functional currency in accordance with the rules set forth in paragraphs (b) and (c) of this section and § 1.985-2.

(ii) *Step 2.* The foreign corporation determines its functional currency applying the principles of paragraphs (b) and (c) of this section to the corporation's activities as a whole. Thus, if a foreign corporation has two branches, the corporation shall determine its functional currency by applying the principles of paragraphs (b) and (c) of this section to the combined activities of the corporation and the branches. For purposes of this paragraph (d)(1), if a QBU of a foreign corporation has the dollar as its functional currency under paragraph (b)(2) of this section, the QBU's activities shall be considered dollar activities of the corporation.

(2) *Translation of income or loss of QBUs having different functional currencies than the foreign corporation as a whole.* Where the functional currency of a foreign corporation as a whole differs from the functional currency of one or more of its QBUs, each such QBU shall determine the amount of its income or loss or earnings and profits (or deficit in earnings and profits) in its functional currency under the principles of section 987 (relating to branch transactions). The amount of income or loss or earnings and profits (or deficit in earnings and profits) of each QBU in its functional currency shall then be translated into the foreign corporation's functional currency using the appropriate exchange rate as defined in section 989(b)(4) for purposes of determining the corporation's income or loss or earnings and profits (or deficit in earnings and profits).

(e) *Translation of nonfunctional currency transactions.* Except for a QBU using the dollar approximate separate transactions method described in § 1.985-3, see section 988 and the regulations thereunder for the treatment of nonfunctional currency transactions.

(f) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. P, a domestic corporation, operates exclusively through foreign branch X in Country A. X is a QBU within the meaning of section 989(a) and its residence is Country A as determined under section 988 (a)(3)(B). The currency of Country A is the LC. All of X's purchases, sales, and expenses are in the LC. The laws of A require X to keep books and records in the LC. It is determined that the LC is the currency of X under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, while the functional currency of P is the dollar since its residence is the United States, the functional currency of X is the LC.

Example 2. P, a publicly-held domestic regulated investment company (as defined under section 851), operates exclusively through foreign branch B in Country R. B is a QBU within the meaning of section 989(a) and its residence is Country R as determined under section 988(a)(3)(B). The currency of Country R is the LC. B's principal activities consist of purchasing and selling stock and securities of Country R companies and securities issued by Country R. It is determined that the dollar is the currency of B under United States generally accepted accounting principles. This determination is not based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, while the functional currency of P is the dollar since its residence is the United States, B may choose the LC as its functional currency because it has significant activities in the LC provided it keeps books and records in the LC. The fact that the dollar is the currency of B under generally accepted accounting principles is irrelevant for purposes of determining B's functional currency because the GAAP determination was not based on factors similar to those set forth in paragraph (c)(2) of this section.

Example 3. P, a domestic bank, operates through foreign branch X in Country R. X is a QBU within the meaning of section 989(a) and its residence is Country R as determined under section 988(a)(3)(B). The currency of Country R is the LC. The laws of R require X to keep books and records in the LC. The branch customarily loans dollars and LCs. In the case of its LC loans, X ordinarily fixes the terms of the loans by reference to a contemporary London Inter-Bank Offered Rate (LIBOR) on dollar deposits. For instance, the interest on the amount of the outstanding LC loan principal might equal LIBOR plus 2 percent and the amount of the outstanding LC loan principal would be adjusted to re-

flect changes in the dollar value of the LC. X is primarily funded with dollar-denominated funds borrowed from related and unrelated parties. X's only LC activities are paying local taxes, employee wages, and local expenses such as rent and electricity. Under these facts, X's activities are primarily conducted in dollars. Thus, although X keeps its books and records in LCs, X's functional currency is the dollar.

Example 4. S, a foreign corporation organized in Country U, is wholly-owned by P, a domestic corporation. The currency of Country U is the LC. S's sole function is acting as a financing vehicle for P and domestic corporations that are affiliated with P. All borrowing and lending transactions between S and P and its domestic affiliates are in dollars. Furthermore, primarily all of S's other borrowings are dollar-denominated or based on a dollar index. S's only LC activities are paying local taxes, employee wages, and local expenses such as rent and electricity. S keeps its books and records in the LC. Under these facts, S's activities are primarily conducted in dollars. Thus, although S keeps its books and records in LCs, S's functional currency is the dollar.

Example 5. D is a domestic corporation whose primary activity is the extraction of natural gas and oil through foreign branch X in Country Y. X is a QBU within the meaning of section 989(a) and its residence is Country Y as determined under section 988(a)(3)(B). The currency of Country Y is the LC. X bills a significant amount of its natural gas and oil sales in dollars and a significant amount in LCs. X also incurs significant LC and dollar expenses and liabilities. The laws of Country Y require X to keep its books and records in the LC. It is determined that the LC is the currency of X under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Absent other factors indicating that X primarily conducts its activities in the dollar, D could choose either the dollar or the LC as X's functional currency because X has significant activities in both the dollar and the LC, provided the books and records requirement is satisfied. If, instead, X's activities were determined to be primarily in the dollar, then X would have to use the dollar as its functional currency.

Example 6. S, a foreign corporation organized in Country U, is wholly-owned by P, a domestic corporation. The currency of U is the LC. S purchases the products it sells from related and unrelated parties, including P. These purchases are made in the LC. In addition, most of S's gross receipts are generated by transactions denominated in the LC. S attempts to determine its LC price for goods sold in such a manner as to obtain an LC equivalent of a certain dollar amount

after reduction for all LC costs. However, local market conditions sometimes result in pricing adjustments. Thus, changes in the LC-dollar exchange rate from period to period generally result in corresponding changes in the LC price of S's products. S pays local taxes, employee wages, and other local expenses in the LC. It is determined that the dollar is the currency of S under United States generally accepted accounting principles. This determination is not based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, S could choose either the dollar or the LC as its functional currency because S has significant activities in both the dollar and the LC, provided that the books and records requirement is satisfied.

Example 7. S, a foreign corporation organized in Country X, is wholly-owned by P, a domestic corporation. S conducts all of its operations through two branches. Branch A is located in Country F and branch B is located in Country G. S, A, and B are QBUs within the meaning of section 989(a). Branch A's and branch B's residences are Country F and Country G respectively as determined under section 988(a)(3)(B). The currency of Country F is the FC and the currency of Country G is the LC. The functional currencies of S, A, and B are determined in a two step procedure.

Step 1: The functional currency of branches A and B. Branch A and branch B both conduct all activities in their respective local currencies. The FC is the currency of branch A and the LC is the currency of branch B under United States generally accepted accounting principles. This determination is based on facts and circumstances substantially similar to those set forth in paragraph (c)(2) of this section. Under these facts, the functional currency of branch A is the FC and the functional currency of branch B is the LC.

Step 2: The functional currency of S. S's functional currency is determined by disregarding the fact that A and B are branches. When A's activities and B's activities are viewed as a whole, S determines that it only conducts significant activities in the LC. Therefore, S's functional currency is the LC. See Examples 9, 10, and 11 for how the earnings and profits of a foreign corporation, which has branches with different functional currencies, are determined.

Example 8. Assume the same facts as in Example 7, except that S does not exist and P conducts all of its operations through branch A and branch B. In this instance P's functional currency in Step 2 is the dollar, regardless of the fact that its branches' activities viewed as a whole are in the LC, because P is a taxpayer whose residence is the United States under section 988(a)(3)(B)(i). Therefore, while the functional currency of branch

A is the FC and the functional currency of branch B is the LC, the functional currency of P is the dollar because its residence is the United States.

Example 9. The facts are the same as in Example 7. In addition, assume that in 1987 branch A has earnings of 100 FC and branch B has earnings of 100 LC as determined under section 987. The weighted average exchange rate for the year is 1 FC/2 LC. Branch A's earnings are translated into 200 LC for purposes of computing S's earnings and profits in 1987. Thus, the total earnings and profits of S from branch A and branch B for 1987 is 300 LC.

Example 10. (i) X, a foreign corporation organized in Country W, is wholly-owned by P, a domestic corporation. Both X and P are calendar year taxpayers that began business during 1987. X operates exclusively through two branches, A and B both of which are located outside of Country W. The functional currency of X and A is the LC, while the functional currency of B is the DC as determined under section 985 and § 1.985-1. The earnings of B must be computed under section 987, relating to branch transactions. In 1987, A earns 900 LCs of nonsubpart F income and B earns 200 DCs of nonsubpart F income. Under section 904(d)(2), A's income is financial service income and B's income is general limitation income. In order to determine X's earnings and profits, B's income must be translated into LCs (the functional currency of X). The weighted average exchange rate for 1987 is 1 LC/2 DC. Thus, in 1987 X's current earnings and profits (and its post-1986 undistributed earnings) are 1000 LCs consisting of 900 LCs of financial services income earned by A and 100 LCs (200 DC/2) of general limitation income earned by B. Neither A nor B makes any remittances during 1987.

(ii) In 1988, neither A nor B earns any income or generates any loss. On December 31, 1988, A remits 50 LCs directly to P. The remittance to P is considered to be remitted by A to X and then immediately distributed by X as a dividend. The 50 LC remittance does not result in an exchange gain or loss under section 987 to X because the functional currency of X and A is the LC. See section 987(3). Under section 904(d)(3)(D), the 50 LC dividend is treated as income in a separate category to the extent of the dividend's pro rata share of X's earnings and profits in each separate limitation category. Thus, 90 percent, or 45 LCs, is treated as financial services income, and 10 percent, or 5 LCs, is treated as general limitation income. After the dividend distribution, X has 950 LCs of accumulated earnings and profits (and post-1986 undistributed earnings) consisting of 855 LCs of financial service limitation income and 95 LCs of general limitation income.

Example 11. The facts are the same as in Example 10, except that A makes no remittance during 1988 but B remits 120 DCs to X on December 31, 1988, which X immediately converts into LCs, and X makes no dividend distribution during 1988. Assume that the appropriate exchange rate for the remittance is 1 LC/3 DCs. B's remittance triggers exchange loss to X. See section 987(3). Under section 987, the exchange loss on the remittance is 20 LCs calculated as follows: 40 LCs, which is the LC value of the 120 DC remittance (120 DCs/3), less 60 LCs, their LC basis (120 DCs/2). This loss is sourced and characterized under section 987 and regulations thereunder.

Example 12. F, a foreign corporation, has gain from the disposition of a United States real property interest (as defined in section 897(c)). The gain is taken into account as if F were engaged in a trade or business within the United States during the taxable year and as if such gain were effectively connected with such trade or business. F's disposition activity shall be treated as a separate QBU with a dollar functional currency because such activity produced income that is treated as effectively connected with a trade or business within the United States. Therefore, F must compute its gain from the disposition by giving the United States real property interest an historic dollar basis.

[T.D. 8263, 54 FR 38653, Sept. 20, 1989, as amended by T.D. 8556, 59 FR 37672, July 25, 1994; T.D. 8765, 63 FR 10774, Mar. 5, 1998; 63 FR 15760, Apr. 1, 1998; T.D. 8776, 63 FR 40368, July 29, 1998; T.D. 8927, 66 FR 2216, Jan. 11, 2001]

§ 1.985-2 Election to use the United States dollar as the functional currency of a QBU.

(a) *Background and scope*—(1) *In general.* This section permits an eligible QBU to elect to use the dollar as its functional currency for taxable years beginning on or before August 24, 1994. An election to use a dollar functional currency is not permitted for a QBU other than an eligible QBU. Paragraph (b) of this section defines an eligible QBU. Paragraph (c) of this section describes the time and manner for making the dollar election and paragraph (d) of this section describes the effect of making the election. For the definition of a QBU, see section 989(a). See § 1.985-1(b)(2)(ii) for rules requiring a QBU to use the dollar as its functional currency in taxable years beginning after August 24, 1994.

(2) *Exception.* Pursuant to § 1.985-1(b)(2)(ii)(B)(2), the rules of paragraph (c)(3) of this section shall apply with respect to the procedure required to be

followed by a noncontrolled section 902 corporation as defined in section 904(d)(2)(E) to elect the dollar as its (or its QBU branch's) functional currency and the application of § 1.985-3.

(b) *Eligible QBU*—(1) *In general.* The term "eligible QBU" means a QBU that could have used a hyperinflationary currency as its functional currency absent the dollar election. See § 1.985-1 for how a QBU determines its functional currency absent the dollar election.

(2) *Hyperinflationary currency.* See § 1.985-1(b)(2)(ii)(D) for the definition of hyperinflationary currency.

(c) *Time and manner for dollar election*—(1) *QBUs that are branches of United States persons*—(i) *Rule.* If an eligible QBU is a branch of a United States person, the dollar election shall be made by attaching a completed Form 8819 to the United States person's timely filed (taking extensions into account) tax return for the first taxable year for which the election is to be effective.

(ii) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, the election shall be made in accordance with § 1.985-2T(c)(1). Failure to file an amended return within the time period prescribed in § 1.985-2T(c)(1) shall not invalidate the dollar election if it is established to the satisfaction of the district director that reasonable cause existed for such failure. A subsequent election for 1988 will not prejudice the taxpayer with respect to such reasonable cause determination. Nevertheless, each United States person making an election under the § 1.985-2T(c)(1) must file a Form 8819 in the time and manner provided in the Form's instructions.

(2) *Eligible QBUs that are controlled foreign corporations or branches of controlled foreign corporations*—(i) *Rule.* If an eligible QBU is a controlled foreign corporation (as described in section 957), or a branch of a controlled foreign corporation, the election may be made either by the foreign corporation or by the controlling United States shareholders on behalf of the foreign corporation by—

(A) Filing a completed Form 8819 in the time and manner provided in the Form's instructions, and

(B) Providing the written notice required by paragraph (c)(2)(ii) of this section at the time and in the manner prescribed therein.

The term *controlling United States shareholders* means those United States shareholders (as defined in section 951(b)) who, in the aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote. If the foreign corporation is a controlled foreign corporation (as described in section 957) but the United States shareholders do not, in the aggregate, own the requisite voting power, the term “controlling United States shareholders” means all the United States shareholders (as defined in section 951(b)) who own (within the meaning of section 958(a)) stock of the controlled foreign corporation.

(ii) *Notice.* Prior to filing Form 8819, the controlling United States shareholders (or the foreign corporation, if the dollar election is made by the corporation) shall provide written notice that the dollar election will be made to all United States persons known to be shareholders who own (within the meaning of section 958(a)) stock of the foreign corporation. Such notice shall also include all information required in Form 8819.

(iii) *Reasonable cause exception.* Failure of the controlling United States shareholders (or the foreign corporation, if the dollar election is made by the corporation) to timely file Form 8819 or provide written notice to a United States person required to be notified by paragraph (c)(2)(ii) of this section shall not invalidate the dollar election, if it is established to the satisfaction of the district director that reasonable cause existed for such failure.

(iv) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, an eligible QBU described in paragraph (c)(2)(i) of this section shall make the dollar election in accordance with § 1.985-2T(c)(2). Nevertheless, the person or persons that made such election must file a Form 8819 in the time and manner provided in the Form’s instructions.

(3) *Eligible QBUs that are noncontrolled foreign corporations or branches of noncontrolled foreign corporations—(i) Rule.* If an eligible QBU is a noncontrolled foreign corporation (a foreign corporation not described in section 957), or a branch of a noncontrolled foreign corporation, the dollar election must be made by the corporation or the majority domestic corporate shareholders on behalf of the corporation by applying the rules provided in paragraph (c)(2)(i)(A) and (B), (ii), (iii), and (iv) of this section substituting “majority domestic corporate shareholders” for “controlling United States shareholders” wherever it appears therein. The term “majority domestic corporate shareholders” means those domestic corporate shareholders (as described in section 902(a)) who, in the aggregate, own (within the meaning of section 958(a)) greater than 50 percent of the total combined voting stock of all classes of stock of the noncontrolled foreign corporation entitled to vote that is owned (within the meaning of section 958(a)) by all the domestic corporate shareholders.

(ii) *Procedure prior to the issuance of Form 8819.* In the absence of Form 8819, an eligible QBU described in paragraph (c)(3)(i) of this section shall make the dollar election in accordance with § 1.985-2T(c)(3). Nevertheless, the person or persons that made such election must file a Form 8819 in the time and manner provided in the Form’s instructions.

(4) *Others.* Any other person making a dollar election under this section shall elect by filing Form 8819 and fulfilling any other notice requirements that may be required by the Commissioner.

(d) *Effect of dollar election—(1) General rule.* If a dollar election is made (or considered made under paragraph (d)(3) of this section) by or on behalf of an eligible QBU, the QBU shall be deemed to have the dollar as its functional currency. Each United States person that owns (within the meaning of section 958(a)) stock of a foreign corporation which has the dollar as its functional currency under § 1.985-2 must make all of its federal income tax calculations with respect to the foreign corporation using the dollar as the corporation’s

functional currency (regardless of when ownership was acquired or whether the United States person received the written notice required by paragraph (c)(2)(i)(B) of this section).

(2) *Computation*—(i) *In general*. Except as provided in paragraph (d)(2)(ii) of this section, any eligible QBU that pursuant to this § 1.985-2 has a dollar functional currency must compute income or loss or earnings and profits (or deficit in earnings and profits) in dollars using the dollar approximate separate transactions method described in § 1.985-3.

(ii) *Alternative method*. An eligible QBU that has a dollar functional currency pursuant to this § 1.985-2 may use a method other than the dollar approximate separate transactions method described in § 1.985-3 only if the QBU demonstrates to the satisfaction of the Commissioner that it can properly employ such method. Generally, the QBU must show that it could compute foreign currency gain or loss under the principles of section 988 with respect to each of its section 988 transactions. If subsequently the QBU can no longer demonstrate to the satisfaction of the district director that it can properly employ such an alternative method, then the QBU will be deemed to have changed its method of accounting to the dollar approximate separate transactions method described in § 1.985-3. This change in accounting will be treated as having been made with the consent of the Commissioner. No adjustments under either § 1.985-5T (or any succeeding final regulation) or section 481(a) shall be required solely because of the change. Rather the QBU shall begin accounting for its operations under § 1.985-3 based on its dollar books and records as of the time of the change.

(3) *Conformity*—(i) *General rule*. If a dollar election is made under this § 1.985-2 for an eligible QBU (“electing QBU”), then the dollar shall be the functional currency of any related person (regardless of when such person became related to the electing QBU) that is an eligible QBU, or any branch of any such related person that is an eligible QBU. For purposes of the preceding sentence, the term “related person” means any person with a relation-

ship defined in section 267 (b) to the electing QBU (or to the United States or foreign person of which the electing QBU is a part). In determining whether two or more corporations are members of the same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned with the application of section 267(c).

(ii) *Branches of United States and foreign persons*. If a dollar election is made for a QBU branch of any person, each eligible QBU branch of such person shall have the dollar as its functional currency.

(4) *Required adjustments*. If an eligible QBU’s functional currency changes due to a dollar election, or due to the conformity requirements of paragraph (d)(3) of this section, such change shall be deemed for purposes of § 1.9B5-4 to be consented to by the Commissioner. No adjustments under section 481(a) shall be required solely because of the change. However, the QBU must make those adjustments required by § 1.985-5T (or any succeeding final regulation).

(5) *Taxable year conformity required*. Generally, the adjustments required by paragraph (d)(4) of this section shall be made for a related person’s taxable year—

(i) That includes the date in which the electing QBU made the dollar election if the person was related to such electing QBU at any time during the QBU’s taxable year that includes such date, or

(ii) During which the person first becomes related to any electing QBU, in all other cases.

For purposes of this paragraph (d)(5), the date in which the electing QBU makes the dollar election shall be the last day of the electing QBU’s taxable year. The district director may permit the related party to make such adjustments beginning one taxable year later if, in the district director’s sole judgment, reasonable cause exists for the related party not being able to make the required adjustments for the earlier year.

(6) *Availability of election*. A dollar election may be made by or on behalf of a QBU, or considered made under the conformity rule of paragraph (d)(3), in

any year in which the QBU is an eligible QBU. If a dollar election is not made by or on behalf of a QBU for its first taxable year beginning after December 31, 1986 in which it is an eligible QBU, then any dollar election made by or on behalf of the QBU, or considered made under the conformity rules of paragraph (d)(3) of this section, that results in a change in the QBU's functional currency shall be treated as having been made with the consent of the Commissioner. In such a case, however, the taxpayer must make those adjustments required by § 1.985-5T (or any succeeding final regulation).

(7) *Effect of changed circumstances.* Regardless of any change in circumstances (e.g., a currency ceases to qualify as hyperinflationary), a QBU whose functional currency is the dollar under this section may change its functional currency only if the QBU complies with § 1.985-4.

(8) *Examples.* The provisions of this section are illustrated by the following examples.

Example 1. X is a calendar year domestic corporation that in 1987 establishes a branch, A, in Country Z. A's functional currency under sections 985(b)(1) and (2) and § 1.985-1 is the "h", the currency of Country Z. The cumulative inflation in Country Z exceeds 100 percent for the thirty-six months prior to January 1987, as measured by the consumer price index of Country Z listed in the monthly issues of the "International Financial Statistics". Accordingly, A is an eligible QBU in 1987 because the h is a hyperinflationary currency. Thus, X may elect the dollar as the functional currency of A for 1987.

Example 2. The facts are the same as in Example (1). X does not elect the dollar as the functional currency of A for 1987. Rather, X elects the dollar as the functional currency of A for 1991, a year A is an eligible QBU. The election constitutes a change in A's functional currency that is made with the consent of the Commissioner. However, A must make the adjustments required under § 1.985-5T (or any succeeding final regulation).

Example 3. X is a domestic corporation that establishes A, an eligible QBU branch. X is wholly owned by domestic corporation Y. Y has an eligible QBU branch, B. Both X and Y are calendar year taxpayers. X makes a dollar election for A in 1987. Thus, A is an electing QBU. X and Y are related persons as defined in section 267(b) (i.e., Y has a relationship under section 267(b)(3) to X, the corporation of which A is a part). Therefore, the dollar election by X for A in 1987 results in B,

the eligible QBU branch of Y, also having the dollar as its functional currency for 1987.

Example 4. The facts are the same as in Example 3, except that Y does not have an eligible QBU branch but owns all the stock of C, a calendar year controlled foreign corporation, which is not itself an eligible QBU but which has an eligible QBU branch, D. X and C are related persons as defined in section 267(b) (i.e., C has a relationship under section 267(b)(3) to X, the corporation of which A is a part). Therefore, the dollar election by X for A in 1987 results in D, the eligible QBU branch of C, also having the dollar as its functional currency for 1987.

Example 5. X, whose taxable year ends September 30, is an eligible QBU that does not use the dollar as its functional currency. X is wholly-owned by domestic corporation W. On January 1, 1989, X acquires all the stock of Y, an unrelated eligible QBU that made the dollar election under § 1.985-2. Y is a calendar year taxpayer. After the stock purchase, X and Y are related persons as defined in section 267(b). Under §§ 1.985-2(d)(3) and (5), the dollar shall be the functional currency of X, any person related to X, and any branch of such related person that is an eligible QBU beginning with the taxable year that includes December 31, 1989. Thus, X must change to the dollar for its taxable year beginning October 1, 1988. However, the district director may allow X to change to the dollar for its taxable year beginning October 1, 1989, provided reasonable cause exists. Those QBUs changing to the dollar as their functional currency as the result of the conformity requirements must make the adjustments required under § 1.985-5T (or any succeeding final regulation).

Example 6. The facts are the same as in Example 5, except that before X purchased the Y stock, X made the dollar election under § 1.985-2 but Y did not use the dollar as its functional currency. Under §§ 1.985-2(d)(3) and (5) the dollar shall be the functional currency of Y, any person related to Y, and any branch of such related person that is an eligible QBU beginning with the taxable year that includes September 30, 1989. Thus, Y must change to the dollar for its taxable year beginning January 1, 1989. However the district director may allow Y to change to the dollar for its taxable year beginning January 1, 1990, provided reasonable cause exists. Those QBUs changing to the dollar as their functional currency as the result of the conformity requirements must make the adjustments required under § 1.985-5T (or any succeeding final regulation).

[T.D. 8263, 54 FR 38656, Sept. 20, 1989, as amended by T.D. 8556, 59 FR 37673, July 25, 1994]

§ 1.985-3 United States dollar approximate separate transactions method.

(a) *Scope and effective date*—(1) *Scope*. This section describes the United States dollar (dollar) approximate separate transactions method of accounting (DASTM). For all purposes of subtitle A, this method of accounting must be used to compute the gross income, taxable income or loss, or earnings and profits (or deficit in earnings and profits) of a QBU (as defined in section 989(a)) that has the dollar as its functional currency pursuant to § 1.985-1(b)(2).

(2) *Effective date*—(i) *In general*. This section is effective for taxable years beginning after August 24, 1994.

(ii) *DASTM prior-year election*. A taxpayer may elect to apply this section to any open taxable year beginning after December 31, 1986 (whether or not DASTM has been previously elected for some or all of those years). In order to make this election, the taxpayer must apply § 1.985-3 to that year and all subsequent years. In addition, each person that is related (within the meaning of § 1.985-3(e)(2)(vi)) to the taxpayer on the last day of any taxable year for which the election is effective and that would have been eligible to elect DASTM must also apply these rules to that year and all subsequent years. A taxpayer that has not previously elected to apply DASTM to its prior taxable years may make the DASTM election for the pertinent years by filing amended returns and complying with the applicable election procedures of § 1.985-2. Form 8819 shall be attached to the return for the first year for which the election is to be effective. A taxpayer that has elected DASTM for prior taxable years and applied the rules under § 1.985-3 (as contained in the April 1, 1994 edition of 26 CFR part 1 (1.908 to 1.1000)) may amend its returns to apply the rules of this § 1.985-3. In either case, the DASTM election for prior taxable years shall be deemed to be made with the consent of the Commissioner.

(b) *Statement of method*. Under DASTM, income or loss or earnings and profits (or a deficit in earnings and profits) of a QBU for its taxable year shall be determined in dollars by—

(1) Preparing an income or loss statement from the QBU's books and records (within the meaning of § 1.989(a)-1(d)) as recorded in the QBU's hyperinflationary currency (as defined in § 1.985-1(b)(2)(ii)(D));

(2) Making the adjustments necessary to conform such statement to United States generally accepted accounting principles and tax accounting principles (including reversing monetary correction adjustments required by local accounting principles);

(3) Translating the amounts of hyperinflationary currency as shown on such adjusted statement into dollars in accordance with paragraph (c) of this section; and

(4) Adjusting the resulting dollar income or loss or earnings and profits (or deficit in earnings and profits) and, where necessary, particular items of gross income, deductible expense or other amounts, in accordance with paragraph (e) of this section to reflect the amount of DASTM gain or loss as determined under paragraph (d) of this section.

(c) *Translation into United States dollars*—(1) *In general*. Except as otherwise provided in this paragraph (c), the amounts shown on the income or loss statement, as adjusted under paragraph (b)(2) of this section, shall be translated into dollars at the exchange rate (as defined in paragraph (c)(6) of this section) for the translation period (as defined in paragraph (c)(7) of this section) to which they relate. However, if the QBU previously changed its functional currency to the dollar, and the rules of § 1.985-5 (or, if applicable, § 1.985-5T, as contained in the April 1, 1993 edition of 26 CFR part 1 (1.908 to 1.1000)) applied in translating its balance sheet amounts into dollars, then the spot exchange rate applied under those rules shall be used to translate any amount that would otherwise be translated at a rate determined by reference to a translation period prior to the change in functional currency. For example, depreciation with respect to an asset acquired while the QBU had a nondollar functional currency shall be translated into dollars at the spot rate on the last day of the taxable year before the year of change to a dollar functional currency, rather than at the

rate for the period in which the asset was acquired.

(2) *Cost of goods sold.* The dollar value of cost of goods sold shall equal the sum of the dollar values of beginning inventory and purchases less the dollar value of closing inventory as these amounts are determined under paragraph (c)(3) of this section.

(3) *Beginning inventory, purchases, and closing inventory*—(i) *Beginning inventory.* Amounts representing beginning inventory shall be translated so as to obtain the same amount of dollars which represented such items in the closing inventory balance for the preceding taxable year.

(ii) *Purchases.* Amounts representing items purchased or otherwise first included in inventory during the taxable year shall be translated at the exchange rate for the translation period in which the cost of such items was incurred.

(iii) *Closing inventory*—(A) *In general.* Amounts representing items included in the closing inventory balance shall be translated at the exchange rate for the translation period in which the cost of such items was incurred. However, if amounts representing items included in the closing inventory balance are either valued at market or written down to market value, they shall be translated at the exchange rate existing on the last day of the taxable year. For purposes of determining lower of cost or market, items of inventory included in the closing inventory balance shall be translated into dollars at the exchange rate for the translation period in which the cost of such items was incurred and compared with market as determined in the QBU's hyperinflationary currency translated into dollars at the exchange rate existing on the last day of the taxable year.

(B) *Determination of translation period.* The method used to determine the translation period of amounts representing items of closing inventory for purposes of paragraph (c)(3)(iii)(A) of this section may be based upon reasonable approximations and averages, including rates of turnover, provided that the method is used consistently from year to year.

(4) *Depreciation, depletion, and amortization.* Amounts representing allow-

ances for depreciation, depletion, or amortization shall be translated at the exchange rate for the translation period in which the cost of the underlying asset was incurred, except as provided in paragraph (c)(1) of this section.

(5) *Prepaid expenses or income.* Amounts representing expense or income paid or received in a prior taxable year shall be translated at the exchange rate for the translation period during which they were paid or received.

(6) *Exchange rate.* The exchange rate for a translation period may be determined under any reasonable method, provided that the method is consistently applied to all translation periods and conforms to the taxpayer's method of financial accounting. Reasonable methods include the average of beginning and ending exchange rates for the translation period and the spot rate on the last day of the translation period. Once chosen, a method for determining an exchange rate can be changed only with the consent of the district director.

(7) *Translation period*—(i) *In general.* Except as provided in paragraphs (c)(3)(iii)(B) and (c)(7)(ii) of this section, a translation period shall be each month within a QBU's taxable year.

(ii) *Exception.* A taxpayer may divide its taxable year into translation periods of equal length (with not more than one short period annually) that are less than one month. Once such a translation period is established, it may not be changed without the consent of the district director.

(8) *Dollar transactions*—(i) *In general.* Except as provided in paragraph (c)(8)(ii) of this section, no DASTM gain or loss is realized with respect to dollar transactions since the dollar is the functional currency of the QBU. Thus, the amount of any payment or receipt of dollars shall be reflected in the income or loss statement by the amount of such dollars. Also, the income or loss attributable to any transaction in which the amount that a QBU is entitled to receive (or is required to pay) by reason of such transaction is denominated in terms of the dollar, or is determined by reference to the value

of the dollar, must be computed transaction by transaction. For example, if a foreign corporation lends 20 LC when 20 LC = \$20 and is entitled to receive the LC equivalent of \$20 at maturity plus a market rate of interest in dollars (or its LC equivalent), the loan is a dollar transaction. Similarly, this paragraph applies to any transaction that is determined to be a dollar transaction under section 988.

(ii) *Non-dollar functional currency.* If pursuant to § 1.985-1(b)(2)(ii)(B)(I), a QBU is required to use a functional currency other than the dollar, then that currency shall be substituted for the dollar in applying paragraph (c)(8)(i) of this section.

(9) *Third currency transactions.* A taxpayer may use any reasonable method of accounting for transactions described in sections 988(c)(1)(B) and (C) that are denominated in, or determined by reference to, a currency other than the QBU's hyperinflationary currency or the dollar (third currency transactions) so long as such method is consistent with its method of financial accounting.

(10) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

Example 1. S is an accrual basis QBU that is required to use the dollar as its functional currency for its first taxable year beginning in 1994. S's hyperinflationary currency is the "h." During 1994, S accrues 100 dollars attributable to dollar-denominated sales. Because this is a dollar transaction under paragraph (c)(8) of this section, S's income or loss for 1994 shall reflect the 100 dollars (not the hyperinflationary value of such dollars when accrued).

Example 2. (i) S is an accrual basis QBU that is required to use the dollar as its functional currency for its first taxable year beginning in 1994. S's hyperinflationary currency is the "h." During 1994, S's sales amounted to 240,000,000h, its currently deductible expenses were 26,000,000h, and its total inventory purchases amounted to 100,000,000h. During January and February of 1994, S purchased depreciable assets for 80,000,000h and was allowed depreciation of 4,000,000h. At the end of 1994, S's closing inventory was 23,000,000h. No election to use a translation period other than the month is made, S had no transactions described in paragraph (c)(8) or (c)(9) of this section, and S's closing inventory was computed on the first-in, first-out inventory method. S's adjusted income or loss statement for 1994 is translated into dollars as follows:

| | Hyperinflationary
currency | Exchange
rate | United States
dollars |
|------------------------------|-------------------------------|-------------------|--------------------------|
| Sales | | | |
| (Jan.-Feb.) | 10,000,000h | ¹ 20:1 | \$500,000 |
| (Mar.-Apr.) | 20,000,000 | 21:1 | 952,381 |
| (May.-June.) | 50,000,000 | 22:1 | 2,272,727 |
| (July) | 50,000,000 | 23:1 | 2,173,913 |

¹ Where multiple months are indicated, the exchange rate applies for all months.

² See paragraph (ii) of this *Example*.

§ 1.985-3

26 CFR Ch. I (4-1-23 Edition)

(ii) Since S uses the first-in, first-out inventory method, the closing inventory is assumed to consist of purchases made during

the most recent translation period as follows:

| | Hyperinflationary currency | Exchange rate | United States dollars |
|--|----------------------------|---------------|-----------------------|
| December | 2,500,000h | 31:1 | \$80,645 |
| November | 2,500,000 | 30:1 | 83,333 |
| October | 5,000,000 | 29:1 | 172,414 |
| September | 5,000,000 | 28:1 | 178,571 |
| August | 8,000,000 | 26:1 | 307,692 |
| Total | 23,000,000h | | 822,655 |
| Non-Capitalized Expenses | | | |
| (Jan.-Feb.) | 4,000,000h | 20:1 | 200,000 |
| (Mar.-Apr.) | 2,500,000 | 21:1 | 119,048 |
| (May-June) | 2,500,000 | 22:1 | 113,636 |
| (July) | 2,000,000 | 23:1 | 86,957 |
| (August) | 3,000,000 | 26:1 | 115,385 |
| (Sept.) | 3,000,000 | 28:1 | 107,143 |
| (Oct.) | 2,000,000 | 29:1 | 68,966 |
| (Nov.) | 3,000,000 | 30:1 | 100,000 |
| (Dec.) | 4,000,000 | 31:1 | 129,032 |
| Total | 26,000,000h | | 1,040,167 |
| Depreciation | 4,000,000h | 20:1 | 200,000 |
| Total Cost & Expenses | 107,000,000h | | 4,776,481 |
| Operating Profit | 133,000,000h | | 4,930,121 |

(d) *Computation of DASTM gain or loss—(1) Rule.* DASTM gain or loss of a QBU equals—

(i) The net worth of the QBU (as determined under paragraph (d)(2) of this section) at the end of the taxable year minus the net worth of the QBU at the end of the preceding taxable year; plus

(ii) The dollar amount of the items described in paragraph (d)(3) of this section and minus the dollar amount of the items described in paragraph (d)(4) of this section; minus

(iii) The amount of dollar income or earnings and profits (or plus the amount of any dollar loss or deficit in earnings and profits) as determined for the taxable year pursuant to paragraphs (b)(1) through (b)(3) of this section.

(2) *Net worth.* Net worth of a QBU at the end of any taxable year equals the aggregate dollar amount representing assets on the QBU's balance sheet at the end of the taxable year less the aggregate dollar amount representing liabilities on the balance sheet. Notwithstanding any other provision in this paragraph (d)(2), the district director may adjust the amount of any asset or liability if a purpose for acquiring (or

disposing of) the asset or incurring (or discharging) the liability is to manipulate the composition of the balance sheet for any period during the taxable year in order to avoid tax. The taxpayer shall determine net worth by—

(i) Preparing a balance sheet as of the end of the taxable year from the QBU's books and records (within the meaning of §1.989(a)-1(d)) as recorded in the QBU's hyperinflationary currency;

(ii) Making adjustments necessary to conform such balance sheet to United States generally accepted accounting principles and tax accounting principles (including reversing monetary correction adjustments required by local accounting principles); and

(iii) Translating the asset and liability amounts shown on the balance sheet into United States dollars in accordance with paragraph (d)(5) of this section.

(3) *Positive adjustments—(i) In general.* The items described in this paragraph (d)(3) are dividend distributions for the taxable year and any items that decrease net worth for the taxable year but that generally do not affect income

or loss or earnings and profits (or a deficit in earnings and profits). Such items include a transfer to the home office of a QBU branch and a return of capital.

(ii) *Translation.* Except as provided by ruling or administrative pronouncement, items described in paragraph (d)(3)(i) of this section shall be translated into dollars as follows:

(A) If the item giving rise to the adjustment would be translated under paragraph (d)(5) of this section at the exchange rate for the last translation period of the taxable year if it were shown on the QBU's year-end balance sheet, such item shall be translated at the exchange rate on the date the item is transferred.

(B) If the item giving rise to the adjustment would be translated under paragraph (d)(5) of this section at the exchange rate for the translation period in which the cost of the item was incurred if it were shown on the QBU's year-end balance sheet, such item shall be translated at the same historical rate.

(iii) *Effective date.* Paragraph (d)(3)(ii) of this section is applicable for any transfer, dividend, or distribution that is a return of capital that is made after March 8, 2005, and that gives rise to an adjustment under this paragraph (d)(3).

(4) *Negative adjustments.* The items described in this paragraph (d)(4) are items that increase net worth for the taxable year but that generally do not affect income or loss or earnings and profits (or a deficit in earnings and profits). Such items include a capital contribution or a transfer from a home office to a QBU branch. Except as otherwise provided by ruling or administrative pronouncement, if the contribution or transfer is not in dollars, the amount of a capital contribution or transfer shall be translated into dollars at the exchange rate on the date made.

(5) *Translation of balance sheet.* Asset and liability amounts shown on the balance sheet in hyperinflationary currency (adjusted pursuant to paragraph (d)(2)(ii) of this section) shall be translated into dollars as provided in this paragraph (d)(5). However, if the QBU previously changed its functional currency to the dollar and the rules of § 1.985-5 (or, if applicable, § 1.985-5T, as

contained in the April 1, 1993 edition of 26 CFR part 1 (1.908 to 1.1000)) applied in translating its balance sheet amounts into dollars, then the spot exchange rate applied under those rules shall be used to translate any amount that would otherwise be translated at a rate determined by reference to a translation period prior to the change in functional currency. For example, the basis of real property acquired while the QBU had a nondollar functional currency shall be translated into dollars at the spot rate on the last day of the taxable year before the year of change to a dollar functional currency, rather than at the rate for the period in which the cost was incurred.

(i) *Closing inventory.* Amounts representing items of inventory included in the closing inventory balance shall be translated in accordance with paragraph (c)(3)(iii) of this section.

(ii) *Bad debt reserves.* Amounts representing bad debt reserves shall be translated at the exchange rate for the last translation period for the taxable year.

(iii) *Prepaid income or expense.* Amounts representing expenses or income paid or received in a prior taxable year shall be translated in accordance with paragraph (c)(5) of this section.

(iv) *Hyperinflationary currency.* Amounts of the hyperinflationary currency and hyperinflationary demand deposit balances shall be translated at the exchange rate for the last translation period of the taxable year.

(v) *Certain assets—(A) In general.* Amounts representing plant, real property, equipment, goodwill, and patents and other intangibles shall be translated at the exchange rate for the translation period in which the cost of the asset was incurred.

(B) *Adjustment to certain assets.* Amounts representing depreciation, depletion, and amortization reserves shall be translated in accordance with paragraph (c)(4) of this section.

(vi) *Hyperinflationary debt obligations.* Except as provided in paragraph (d)(5)(vii) of this section, amounts representing a hyperinflationary debt obligation (including accounts receivable and payable) shall be translated at the

exchange rate for the last translation period for the taxable year.

(vii) *Accrued foreign income taxes.* Amounts representing an accrued but unpaid foreign income tax shall be translated at the exchange rate on the last day of the last translation period of the taxable year of accrual.

(viii) *Certain hyperinflationary financial instruments.* Amounts representing any item described in section 988(c)(1)(B)(iii) (relating to forward contracts, futures contracts, options, or similar financial instruments) denominated in or determined by reference to the hyperinflationary currency shall be translated at the exchange rate for the last translation period for the taxable year.

(ix) *Other assets and liabilities.* Amounts representing assets and liabilities, other than those described in paragraphs (d)(5)(i) through (viii) of this section, shall be translated at the exchange rate for the translation period in which the cost of the asset or the amount of the liability was incurred.

(6) *Dollar transactions.* Notwithstanding any other provisions of this paragraph (d), where the amount representing an item shown on the balance sheet reflects a dollar transaction (described in paragraph (c)(8) of this section), the transaction shall be taken into account in accordance with that paragraph.

(7) *Third currency transactions.* A taxpayer may use any reasonable method

of accounting for transactions described in section 988(c)(1)(B) and (C) that are denominated in, or determined by reference to, a currency other than the QBU's hyperinflationary currency or the dollar (third currency transactions), so long as such method is consistent with its method of financial accounting.

(8) *Character.* The amount of DASTM gain or loss determined under paragraph (d)(1) of this section shall be ordinary income or loss.

(9) *Example.* The provisions of this paragraph (d) are illustrated by the following example:

Example. (i) S, an accrual method calendar year foreign corporation, uses DASTM. S's hyperinflationary currency is the "h." S's net worth at December 31, 1993 was \$3,246,495. For 1994, S's operating profit is 81,340,000h, or \$2,038,200. S made a 5,000,000h distribution in April and again in December of 1994. S's translation period is the month. None of S's assets or liabilities reflect a dollar or third currency transaction described in paragraph (c)(8) or (c)(9) of this section, respectively. The exchange rate for each month in 1994 is as follows:

| | |
|-----------------|---------|
| January | 32h:\$1 |
| Feb.-Mar. | 33:1 |
| April-May | 34:1 |
| June | 35:1 |
| July | 36:1 |
| Aug.-Sept. | 37:1 |
| Oct. | 38:1 |
| Nov. | 39:1 |
| Dec. | 40:1 |

(ii) At the end of 1994, S's assets and liabilities, as adjusted and translated pursuant to paragraphs (d)(2) and (d)(5) of this section, are as follows:

| | Hyperinflationary | Exchange rate | U.S. dollar |
|--|-------------------|---------------|-------------|
| Hyperinflationary cash on hand | 40,000h | 40:1 | \$1,000 |
| Checking account | 400,000 | 40:1 | 10,000 |
| Accounts Receivable- 30 Day Accounts | 20,000,000 | 1 40:1 | 500,000 |
| 60 Day Accounts | 25,000,000 | 40:1 | 625,000 |
| Inventory | 65,000,000 | (2) | 2,500,000 |
| Fixed assets—Property | 90,000,000 | 27:1 | 3,333,333 |
| Plant | 190,000,000 | (3) | 6,785,714 |
| Accumulated Depreciation | (600,000) | (3) | (21,428) |
| Equipment | 10,000,000 | (4) | 340,000 |
| Accumulated Depreciation | (400,000) | (4) | (13,333) |
| Common Stock—Stock A | 500,000 | 34:1 | 14,706 |
| Stock B | 400,000 | 26:1 | 15,385 |
| Preferred Stock | 1,000,000 | 32:1 | 31,250 |
| C.D.s | 5,000,000 | 40:1 | 125,000 |
| Total Assets | 406,340,000 | | 14,246,627 |
| Accounts Payable Long-term liabilities: | | | |
| Liability A | 35,000,000 | 40:1 | 875,000 |
| Liability B | 150,000,000 | 40:1 | 3,750,000 |
| Liability C | 80,000,000 | 40:1 | 2,000,000 |
| Liability D | 30,000,000 | 40:1 | 750,000 |

| | Hyperinflationary | Exchange rate | U.S. dollar |
|-------------------------|-------------------|---------------|-------------|
| Total Liabilities | 295,000,000h | | \$7,375,000 |

¹ S ages its accounts receivable and groups them into two categories—those outstanding for 30 days and those outstanding for 60 days.

² Translated the same as closing inventory under paragraph (c)(3)(iii).

³ The cost of S's plant was incurred in several translation periods. Therefore, the dollar cost and dollar depreciation reflect several translation rates.

⁴ S has a variety of equipment. Therefore, S's dollar basis represents the sum of the hyperinflationary cost of each, translated according to the exchange rate for the translation period incurred.

(iii) The DASTM gain of S for 1994 is computed as follows:

| | | |
|---------------------------|-----------|-------------|
| Net worth—1994 | | \$6,871,627 |
| Less—Net worth—1993 | | \$3,246,495 |
| Plus—1994 Dividends: | | |
| April | \$149,254 | |
| December | 126,582 | 275,836 |
| Less Operating Profit— | | |
| 1994 | | 2,038,200 |
| DASTM Gain | | \$1,862,768 |

¹ The exchange rates on the date of the April and December dividends were 33.5h:\$1 and 39.5h:\$1, respectively.

(iv) Thus, total profit = \$2,038,200 + \$1,862,768 = \$3,900,968

(e) *Effect of DASTM gain or loss on gross income, taxable income, or earnings and profits*—(1) *In general.* For all purposes of subtitle A, the amount of DASTM gain or loss of a QBU determined under paragraph (d) of this section is taken into account by the QBU for purposes of determining the amount of its gross income, taxable income or loss, earnings and profits (or deficit in earnings and profits), and, where necessary, particular items of income, expense or other amounts. DASTM gain or loss is allocated under one of two methods. Certain small QBUs may elect the small QBU DASTM allocation described in paragraph (e)(2) of this section. All other QBUs must use the 9-step procedure described in paragraph (e)(3) of this section.

(2) *Small QBU DASTM allocation*—(i) *Election threshold.* A taxpayer may elect to use the small QBU DASTM allocation described in paragraph (e)(2)(iv) of this section with respect to a QBU that has an adjusted basis in assets (translated as provided in paragraph (d)(5) of this section) of \$10 million or less at the end of any taxable year. In calculating the \$10 million threshold, a QBU shall be treated as owning all of the assets of each related QBU (as defined in paragraph (e)(2)(vi) of this section) having its residence (as defined in section 988(a)(3)(B)) in the QBU's country of residence (related

same-country QBU). For this purpose, appropriate adjustment shall be made to eliminate the double counting of assets created in transactions between related QBUs resident in the same country. For example, assume QBU-1, resident in country X, sells inventory to related QBU-2, also resident in country X, in exchange for an account receivable. For purposes of determining the assets of QBU-1 under this paragraph (e)(2)(i), the taxpayer shall take into account either the inventory shown on the books of QBU-2 or QBU-1's receivable from QBU-2 (but not both).

(ii) *Consent to election.* The election of the small QBU DASTM allocation or subsequent application of the rules of paragraph (e)(3) of this section due to an increase in the adjusted basis of the QBU's assets shall be deemed to have been made with the consent of the Commissioner. Once the election under paragraph (e)(2)(iii) of this section is made, it shall apply for all years in which the adjusted basis of the assets of the QBU (and any related same-country QBU) is \$10 million or less, unless revoked with the Commissioner's consent. If the adjusted basis of the assets of the QBU (and any related same-country QBU) exceeds \$10 million at the end of any taxable year, the rules of paragraph (e)(3) of this section shall apply to that QBU (and any related same-country QBU) for such year and each subsequent year unless such QBU again qualifies, and applies for and obtains the Commissioner's consent, to use the small QBU DASTM allocation. However, if a QBU acquires assets with a principal purpose of avoiding the application of paragraph (e)(2)(iv) of this section, the Commissioner may disregard the acquisition of such assets.

(iii) *Manner of making election*—(A) *QBUs that are branches of United States persons.* For the first year in which this

election is effective, in the case of a QBU branch of a United States person, a statement shall be attached to the United States person's timely filed Federal income tax return (taking extensions into account). The statement shall identify the QBU (or QBUs) for which the election is being made by describing its business and its country of residence, state the adjusted basis of the assets of the QBU (and any related same-country QBUs) to which the election applies, and include a statement that the election is being made pursuant to § 1.985-3(e)(2).

(B) *Other QBUs.* In the case of a QBU other than one described in paragraph (e)(2)(iii)(A) of this section, an election must be made in the manner prescribed in § 1.964-1. The statement filed with the Internal Revenue Service as required under § 1.964-1 must include the information required under paragraph (e)(2)(iii)(A) of this section.

(iv) *Effect of election.* If a taxpayer elects under this paragraph (e)(2) to use the small QBU DASTM allocation, DASTM gain or loss, as determined under paragraph (d) of this section, of a small QBU shall be allocated ratably to all items of the QBU's gross income (determined prior to adjustment for DASTM gain or loss). Therefore, for purposes of the foreign tax credit, DASTM gain or loss shall be allocated on the basis of the relative amounts of gross income in each separate category as defined in § 1.904-5(a)(4)(v). In the case of a controlled foreign corporation (within the meaning of section 957 or 953(c)(1)(B)), for purposes of section 952, DASTM gain or loss shall be allocated to subpart F income in a separate category in the same ratio that the gross subpart F income in that category for the taxable year bears to its total gross income in that category for the taxable year.

(v) *Conformity.* If a person (or a QBU of such person) makes an election under this paragraph (e)(2) to use the small QBU DASTM allocation, then each QBU of any related person (as defined in paragraph (e)(2)(vi) of this section) that satisfies the threshold requirement of paragraph (e)(2)(i) of this section (after application of the aggregation rule of paragraph (e)(2)(i) of this

section) shall be deemed to have made the election.

(vi) *Related person.* The term related person means any person with a relationship to the QBU (or to the United States or foreign person of which the electing QBU is a part) that is defined in section 267(b) or section 707(b).

(3) *DASTM 9-step procedure*—(i) *Step 1—prepare balance sheets.* The taxpayer shall prepare an opening and a closing balance sheet for the QBU for each balance sheet period during the taxable year. The balance sheet period is the most frequent period for which balance sheet data are reasonably available (but in no event less frequently than quarterly). The balance sheet period may not be changed without the consent of the district director. The balance sheets must be prepared under the principles of paragraph (d)(2) of this section.

(ii) *Step 2—identify certain assets and liabilities.* The taxpayer shall identify each item on the balance sheet that is described in section 988(c)(1)(B) or (C) and that would have been translated under paragraph (d)(5) of this section into dollars at the exchange rate for the last translation period for the taxable year (or the exchange rate on the last day of the last translation period of the taxable year in the case of an accrued foreign income tax liability).

(iii) *Step 3—characterize the assets.* The taxpayer shall characterize and group the assets identified in paragraph (e)(3)(ii) of this section (Step 2) according to the source and the type of income that they generate, have generated, or may reasonably be expected to generate by applying the principles of § 1.861-9T(g)(3) or its successor regulation (relating to characterization of assets for purposes of interest expense allocation). If a purpose for a taxpayer's business practices is to manipulate asset characterization or groupings, the district director may allocate or apportion DASTM gain or loss attributable to the assets. Thus, if a taxpayer that previously did not separately state interest on accounts receivable begins to impose an interest charge and a purpose for the change was to manipulate tax characterizations or groupings, then the district director may require that none of the

Internal Revenue Service, Treasury

§ 1.985-3

DASTM gain or loss attributable to those receivables be allocated or apportioned to interest income.

(iv) *Step 4—determine DASTM gain or loss attributable to certain assets—(A) General rule.* The taxpayer shall determine the dollar amount of DASTM gain or loss attributable to assets in each group identified in paragraph (e)(3)(iii) of this section (Step 3) as follows:

$$\frac{[(bb+eb) \div 2] \times [er-br]}{}$$

where

- bb = the hyperinflationary currency adjusted basis of the assets in the group at the beginning of the balance sheet period.
- eb = the hyperinflationary currency adjusted basis of the assets in the group at the end of the balance sheet period.
- er = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the end of the balance sheet period.
- br = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the beginning of the balance sheet period.

(B) *Weighting to prevent distortion.* If averaging the adjusted basis of assets in a group at the beginning and end of a balance sheet period results in an allocation of DASTM gain or loss that does not clearly reflect income, as might be the case in the event of a purchase or disposition of an asset that is not in the normal course of business, the taxpayer must use a weighting method that reflects the time the assets are held by the QBU during the translation period.

(C) *Example.* The provisions of this paragraph (e)(3)(iv) are illustrated by the following example:

Example. S is a foreign corporation that operates in the hyperinflationary currency “h” and computes its income or loss or earnings and profits under DASTM. S’s adjusted basis in a group of assets described in section 988(c)(1)(B) or (C) that generate general limitation foreign source income (as characterized under paragraph (e)(3)(iii) of this section) at the beginning of the balance sheet period is 750,000h. S’s basis in such assets at the end of the balance sheet period is 1,250,000h. The exchange rate at the beginning of the balance sheet period is \$1 = 200h. The exchange rate at the end of the balance sheet period is \$1 = 500h. The DASTM loss attributable to the assets described above is \$3,000, determined as follows:

$$[(750,000h + 1,250,000h) \div 2] \times [(\$1 + 500h) - (\$1 + 200h)] = (\$3000)$$

(v) *Step 5—adjust dollar gross income by DASTM gain or loss from assets.* The taxpayer shall adjust the dollar amount of the QBU’s gross income (computed under paragraphs (b)(1) through (b)(3) of this section) generated by each group of assets characterized in paragraph (e)(3)(iii) of this section (Step 3) by the amount of DASTM gain or loss attributable to those assets computed under paragraph (e)(3)(iv) of this section (Step 4). Thus, if a group of assets, such as accounts receivable, generates both a category of income described in section 904(d)(1)(I) (relating to general limitation income) that is not foreign base company income as defined in section 954 and a DASTM loss under paragraph (e)(3)(iv) of this section (Step 4), the amount of the DASTM loss would reduce the amount of the QBU’s gross income in that category. Similarly, if a group of assets, such as short-term bank deposits, generates both foreign personal holding company income that is passive income (described in sections 954(c)(1)(A) and 904(d)(1)(A)) and a DASTM loss under paragraph (e)(3)(iv) of this section (Step 4), the amount of the DASTM loss would reduce the amount of the QBU’s foreign personal holding company income and passive income. See section 904(f) and the regulations thereunder in the case where that section would apply and DASTM loss attributable to a group of assets exceeds the income generated by such assets.

(vi) *Step 6—determine DASTM gain or loss attributable to liabilities—(A) General rule.* The taxpayer shall determine the dollar amount of DASTM gain or loss attributable to liabilities identified in paragraph (e)(3)(ii) of this section (Step 2), and described in paragraph (e)(3)(vi)(B) of this section as follows:

$$\frac{[(bl+el) \div 2] \times [br-er]}{}$$

where

- bl = the hyperinflationary currency amount of liabilities at the beginning of the balance sheet period.
- el = the hyperinflationary currency amount of liabilities at the end of the balance sheet translation period.

br = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the beginning of the balance sheet period.

er = one dollar divided by the number of hyperinflationary currency units that equal one dollar at the end of the balance sheet period.

(B) *Separate calculation.* The calculation shall be made separately for interest-bearing liabilities described in paragraph (e)(3)(vii) of this section (Step 7) and for each of the classes of non-interest-bearing liabilities described in paragraph (e)(3)(viii) of this section (Step 8).

(C) *Weighting to prevent distortion.* Where a distortion would result from averaging the amount of liabilities at the beginning and end of a balance sheet period, as might be the case where a taxpayer incurs or retires a substantial liability, the taxpayer must use a different method that more clearly reflects the average amount of liabilities weighted to reflect the time the liability was outstanding during the balance sheet period.

(vii) *Step 7—adjust dollar income and expense by DASTM gain or loss from interest-bearing liabilities—(A) In general.* The taxpayer shall apply the amount of DASTM gain on interest-bearing liabilities computed under paragraph (e)(3)(vi) of this section (Step 6) to reduce interest expense generated by such liabilities (e.g., prior to the application of § 1.861-9T or its successor regulation). To the extent DASTM gain on such liabilities exceeds interest expense, it shall be sourced or otherwise classified in the same manner that interest expense is allocated and apportioned under § 1.861-9T or its successor regulation. The amount of DASTM loss on interest-bearing liabilities computed under paragraph (e)(3)(vi) of this section (Step 6) shall be allocated and apportioned in the same manner that interest expense is allocated and apportioned under § 1.861-9T or its successor regulation (without regard to the exceptions to fungibility in § 1.861-10T or its successor regulation). For purposes of this section, an interest-bearing liability is a liability that requires payment of periodic interest (whether fixed or variable), has original issue discount, or would have interest imputed under subtitle A.

(B) *Allocation of DASTM gain or loss from interest-bearing liabilities that generate related person interest expense.* DASTM gain or loss from interest-bearing liabilities that generate related person interest expense (as provided in section 954(b)(5)) shall be allocated for purposes of subtitle A (including sections 904 and 952) in the same manner that the related person interest expense of that debt is required to be allocated under the rules of section 954(b)(5) and § 1.904-5(c)(2).

(C) *Modified gross income method.* In applying the modified gross income method described in § 1.861-9T(j) or its successor regulation, gross income shall be adjusted for any DASTM gain or loss from assets as provided in paragraph (e)(3)(v) of this section (Step 5) and any DASTM gain or loss with respect to short-term, non-interest-bearing trade payables as provided in paragraph (e)(3)(viii)(A) of this section.

(viii) *Step 8—adjust dollar income and expense by DASTM gain or loss from non-interest bearing liabilities—(A) Short-term, non-interest-bearing trade payables.* The taxpayer shall allocate DASTM gain or loss on short-term non-interest-bearing trade payables for purposes of subtitle A (including sections 904 and 952) to the same category or type of gross income as the cost or expense to which the trade payable relates. For this purpose, a short-term, non-interest-bearing trade payable is a non-interest-bearing liability with a term of 183 days or less that is incurred to purchase property or services to be used by the obligor in an active trade or business.

(B) *Excise tax payables.* The taxpayer shall allocate DASTM gain or loss on excise tax payables for purposes of subtitle A (including sections 904 and 952) to the same category or type of gross income as would be derived from the activity to which the excise tax relates.

(C) *Other non-interest-bearing liabilities—(1) In general.* Except as provided in paragraphs (e)(3)(viii)(A), (e)(3)(viii)(B), and (e)(3)(viii)(C)(2) of this section, DASTM gain or loss on non-interest-bearing liabilities shall be allocated under paragraph (e)(3)(ix) of this section (Step 9).

(2) *Tracing if substantial distortion of income.* DASTM gains and losses on liabilities described in paragraph (e)(3)(viii)(C)(I) of this section may be attributed to the same section 904(d) separate category or subpart F category as the transaction to which the liability relates if the taxpayer demonstrates to the satisfaction of the district director, or it is determined by the district director, that application of paragraph (e)(3)(viii)(C)(I) of this section results in a substantial distortion of income.

(ix) *Step 9—allocate residual DASTM gain or loss.* If there is a difference between the net DASTM gain or loss determined under paragraphs (e)(3)(i) through (viii) of this section (Steps 1 through 8) and the DASTM gain or loss determined under paragraph (d) of this section, the amount of the difference must be allocated for purposes of subtitle A (including sections 904 and 952) to the QBU's gross income (computed under paragraphs (b)(1) through (3) of this section, as adjusted under paragraphs (e)(3)(i) through (viii) of this section (Steps 1 through 8)) on the basis of the relative amounts of each category or type of gross income.

[T.D. 8556, 59 FR 37673, July 25, 1994, as amended by T.D. 9320, 72 FR 15044, Mar. 30, 2007; T.D. 9882, 84 FR 69120, Dec. 17, 2019]

§ 1.985-4 Method of accounting.

(a) *Adoption of election.* The adoption of, or the election to use, a functional currency shall be treated as a method of accounting. The functional currency shall be used for the year of adoption (or election) and for all subsequent taxable years unless permission to change is granted, or considered to be granted under § 1.985-2 or § 1.985-8, by the Commissioner.

(b) *Condition for changing functional currencies.* Generally, permission to change functional currencies shall not be granted unless significant changes in the facts and circumstances of the QBU's economic environment occur. If the determination of the functional currency of the QBU for purposes of United States generally accepted accounting principles (GAAP) is based on facts and circumstances substantially similar to those set forth in § 1.985-1(c)(2), then ordinarily the Commis-

sioner will grant a taxpayer's request to change its functional currency (or the functional currency of its branch that is a QBU) to a new functional currency only if the taxpayer (or its QBU) also changes to the new functional currency for purposes of GAAP. However, permission to change will not necessarily be granted merely because the new functional currency will conform to the taxpayer's GAAP functional currency.

(c) *Relationship to certain other sections of the Code.* Nothing in this section shall be construed to override the provisions of any other sections of the Code of regulations that require the use of consistent accounting methods. Such provisions must be independently satisfied separate and apart from the identification of a functional currency. For instance, while separate geographical divisions of a taxpayer's trade or business may have different functional currencies, such geographical divisions may nevertheless be required to consistently use other methods of accounting.

[T.D. 8263, 54 FR 38661, Sept. 20, 1989, as amended by T.D. 8776, 63 FR 40368, July 29, 1998; T.D. 8927, Jan. 11, 2001]

§ 1.985-5 Adjustments required upon change in functional currency.

(a) *In general.* This section applies in the case of a taxpayer or qualified business unit (QBU) (including a section 987 QBU (as defined in § 1.987-1(b)(2)) changing from one functional currency (old functional currency) to another functional currency (new functional currency). A taxpayer or QBU subject to the rules of this section shall make the adjustments set forth in the 3-step procedure described in paragraphs (b) through (e) of this section. Except as otherwise provided in this section, the adjustments shall be made on the last day of the last taxable year ending before the year of change (as defined in § 1.481-1(a)(1)). Gain or loss required to be recognized under paragraphs (b), (d)(2), (e)(2), and (e)(4)(iii) of this section is not subject to section 481 and, therefore, the full amount of the gain or loss must be included in income on the last day of the last taxable year ending before the year of change.

(b) *Step 1—Taking into account exchange gain or loss on certain section 988 transactions.* The taxpayer or QBU shall recognize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a section 988 transaction (as defined in section 988(c)(1)(A) through (C)) that, after applying section 988(d), is denominated in terms of or determined by reference to the new functional currency. The amount of such gain or loss shall be determined without regard to the limitations of section 988(b) (that is, whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988.

(c) *Step 2—Determining the new functional currency basis of property and the new functional currency amount of liabilities and any other relevant items.* Except as otherwise provided in this section, the new functional currency adjusted basis of property and the new functional currency amount of liabilities and any other relevant items (for example, items described in section 988(c)(1)(B)(iii)) shall equal the product of the old functional currency adjusted basis or liability and the new functional currency/old functional currency spot rate on the last day of the last taxable year ending before the year of change.

(d) *Step 3A—Additional adjustments that are necessary when a QBU changes functional currency—(1) QBU changing to a functional currency other than the owner's functional currency—(i) Rule.* If a QBU changes its functional currency, and after the change the QBU is a section 987 QBU that is subject to §§ 1.987-1 through 1.987-11 pursuant to § 1.987-1(b)(1), then the adjustments described in either paragraph (d)(1)(ii) or (d)(1)(iii) of this section shall be taken into account for purposes of section 987.

(ii) *QBU and the owner had different functional currencies prior to the change.* If the QBU and the owner of the QBU had different functional currencies prior to the change and as a result the QBU was a section 987 QBU prior to the change, then the adjustments described in paragraphs (d)(1)(ii)(A) and

(d)(1)(ii)(B) of this section shall be taken into account.

(A) *Determining new historic rates.* The historic rate (as defined in § 1.987-1(c)(3)) for the year of change and subsequent taxable years with respect to a historic item (as defined in § 1.987-1(e)) reflected on the balance sheet of the section 987 QBU immediately prior to the year of change shall be equal to the historic rate prior to the year of change (that is, a rate that translates the section 987 QBU's old functional currency into the owner's functional currency) divided by the spot rate (as defined in § 1.987-1(c)(1)) for translating an amount denominated in the section 987 QBU's old functional currency into the section 987 QBU's new functional currency on the last day of the last taxable year ending before the year of change. For example, if a taxpayer with a U.S. dollar (USD) functional currency owns a section 987 QBU that changes from a British pound (GBP) functional currency to a euro (EUR) functional currency, the historic rate for translating a specific historic item of this section 987 QBU from GBP to USD is 1.50, and the spot rate for translating GBP to EUR on the last day of the last taxable year before the change is 1.30, then the new historic rate for translating this historic item from EUR to USD is 1.15 (1.50/1.30).

(B) *Determining the owner functional currency net value of the QBU on the last day of the last taxable year ending before the year of change under § 1.987-4(d)(1)(i)(B).* For purposes of determining the owner functional currency net value of the section 987 QBU on the last day of the last taxable year ending before the year of change under § 1.987-4(d)(1)(i)(B) and § 1.987-4(e), the section 987 QBU's marked items (as defined in § 1.987-1(d)) shall be translated from the section 987 QBU's old functional currency into the owner's functional currency using the spot rate on the last day of the last taxable year ending before the year of change.

(iii) *QBU and the taxpayer had the same functional currency prior to the change.* If a QBU that has the same functional currency as a taxpayer changes its functional currency to a new functional currency that is different than the functional currency of

the taxpayer, and as a result the taxpayer becomes an owner of a section 987 QBU (see §1.987-1), the taxpayer and section 987 QBU will become subject to section 987 for the year of change and subsequent years.

(2) *QBU changing to the owner's functional currency.* If a section 987 QBU changes its functional currency to the functional currency of its owner, the section 987 QBU shall be treated as if it terminated on the last day of the last taxable year ending before the year of change. See §§1.987-5 and 1.987-8 for the effect of a termination of a section 987 QBU that is subject to §§1.987-1 through 1.987-11.

(e) *Step 3B—Additional adjustments that are necessary when a taxpayer/owner changes functional currency—(1) Corporations.* The amount of a corporation's new functional currency earnings and profits and the amount of its new functional currency paid-in capital shall equal the old functional currency amounts of such items multiplied by the spot rate for translating an amount denominated in the corporation's old functional currency into the corporation's new functional currency on the last day of the last taxable year ending before the year of change. The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also shall be translated into the new functional currency at the spot rate.

(2) *Collateral consequences to a United States shareholder of a corporation changing to the United States dollar as its functional currency.* A United States shareholder (within the meaning of section 951(b) or section 953(c)(1)(A)) of a controlled foreign corporation (within the meaning of section 957 or section 953(c)(1)(B)) changing its functional currency to the dollar shall recognize foreign currency gain or loss computed under section 986(c) as if all previously taxed earnings and profits, if any, (including amounts attributable to pre-1987 taxable years that were translated from dollars into functional currency in the foreign corporation's first post-

1986 taxable year) were distributed immediately prior to the change.

(3) *Taxpayers that are not corporations.* [Reserved]

(4) *Adjustments to a section 987 QBU's balance sheet and net accumulated unrecognized section 987 gain or loss when an owner changes functional currency—(i) Owner changing to a functional currency other than the section 987 QBU's functional currency.* If an owner of a section 987 QBU, subject to §§1.987-1 through 1.987-11 pursuant to §1.987-1(b)(1), changes to a functional currency other than the functional currency of the section 987 QBU, the adjustments described in paragraphs (e)(4)(i)(A) through (C) of this section shall be taken into account for purposes of section 987.

(A) *Determining new historic rates.* The historic rate (as defined in §1.987-1(c)(3)) for the year of change and subsequent taxable years with respect to a historic item (as defined in §1.987-1(e)) reflected on the balance sheet of the section 987 QBU immediately prior to the year of change shall be equal to the historic rate prior to the year of change (that is, a rate that translates the section 987 QBU's functional currency into the owner's old functional currency) divided by the spot rate for translating an amount denominated in the owner's new functional currency into the owner's old functional currency on the last day of the last taxable year ending before the year of change. For example, if a taxpayer that owns a section 987 QBU with a British pound functional currency changes from a U.S. dollar functional currency to a euro functional currency, and the historic rate for translating a specific item of the section 987 QBU from GBP to USD is 1.50 and the spot rate for translating EUR to USD on the last day of the last taxable year before the change is 1.10, then the new historic rate for translating this historic item from GBP to EUR is 1.36 (1.50/1.10).

(B) *Determining the owner functional currency net value of the section 987 QBU on the last day of the last taxable year ending before the year of change under §1.987-4(d)(1)(i)(B).* For purposes of determining the change in the owner functional currency net value of the section 987 QBU on the last day of the

§ 1.985-5

26 CFR Ch. I (4-1-23 Edition)

last taxable year preceding the year of change under §§1.987-4(d)(1)(i)(B) and 1.987-4(e), the section 987 QBU's marked items shall be translated into the owner's new functional currency at the spot rate on the last day of the last taxable year ending before the year of change.

(C) *Translation of net accumulated unrecognized section 987 gain or loss.* Any net accumulated unrecognized section 987 gain or loss determined under §1.987-4 shall be translated from the owner's old functional currency into the owner's new functional currency using the spot rate for translating an amount denominated in the owner's old functional currency into the owner's new functional currency on the last day of the last taxable year ending before the year of change.

(ii) *Taxpayer with the same functional currency as its QBU changing to a different functional currency.* If a taxpayer with the same functional currency as its QBU changes to a new functional currency and as a result the taxpayer becomes an owner of a section 987 QBU (see §1.987-1), the taxpayer and the sec-

tion 987 QBU shall become subject to section 987 for the year of change and subsequent years.

(iii) *Owner changing to the same functional currency as the section 987 QBU.* If an owner changes its functional currency to the functional currency of its section 987 QBU, the section 987 QBU shall be treated as if it terminated on the last day of the last taxable year ending before the year of change. See §§1.987-5 and 1.987-8 for the consequences of a termination of a section 987 QBU that is subject to §§1.987-1 through 1.987-11.

(f) *Example.* The provisions of this section are illustrated by the following example:

Example. (i) *Facts.* FC, a foreign corporation, owns all of the stock of DC, a domestic corporation. The Commissioner granted permission to change FC's functional currency from the British pound to the euro beginning January 1, 2020. The EUR/GBP exchange rate on December 31, 2019, is €1:£0.50.

(ii) *Determining new functional currency basis of property and liabilities.* The following table shows how FC must convert the items on its balance sheet from the British pound to the euro on December 31, 2019.

| | GBP | EUR |
|--|------------------|------------------|
| Assets: | | |
| Cash on hand | £40,000 | €80,000 |
| Accounts Receivable | 10,000 | 20,000 |
| Inventory | 100,000 | 200,000 |
| €100,000 Euro Bond (£100,000 historical basis) | 50,000 | 100,000 |
| Fixed assets: | | |
| Property | 200,000 | 400,000 |
| Plant | 500,000 | 1,000,000 |
| Accumulated Depreciation | (200,000) | (400,000) |
| Equipment | 1,000,000 | 2,000,000 |
| Accumulated Depreciation | (400,000) | (800,000) |
| Total Assets | 1,300,000 | 2,600,000 |
| Liabilities: | | |
| Accounts Payable | 50,000 | 100,000 |
| Long-term Liabilities | 400,000 | 800,000 |
| Paid-in-Capital | 800,000 | 1,600,000 |
| Retained Earnings | 50,000 | 100,000 |
| Total Liabilities and Equity | 1,300,000 | 2,600,000 |

(iii) *Exchange gain or loss on section 988 transactions.* Under paragraph (b) of this section, FC will recognize a £50,000 loss (£50,000 current value minus £100,000 historical basis) on the Euro Bond resulting from the change in functional currency because, after the change, the Euro Bond will no longer be an asset denominated in a non-functional currency. The amount of FC's retained earnings

on its December 31, 2019, balance sheet reflects the £50,000 loss on the Euro Bond.

(g) *Effective/applicability date.* Generally, this regulation shall apply to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. If

pursuant to §1.987-11(b) a taxpayer applies §§1.987-1 through 1.987-11 beginning in a taxable year prior to the earliest taxable year described in §1.987-11(a), then this section shall apply to taxable years of the taxpayer beginning on or after the first day of such prior taxable year.

[T.D. 9794, 81 FR 88819, Dec. 8, 2016]

§ 1.985-6 Transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning in 1987.

(a) *In general.* This section sets forth transition rules for a QBU that used the dollar approximate separate transactions method of accounting set forth in §1.985-3 or §1.985-3T (as contained in the April 1, 1989 edition of 26 CFR part 1 (1.908 to 1.1000)) for its first taxable year beginning in 1987 (DASTM QBU). A DASTM QBU must determine the dollar and hyperinflationary currency basis of its assets and the dollar and hyperinflationary currency amount of its liabilities that were acquired or incurred in taxable years beginning before January 1, 1987. In addition, a DASTM QBU must determine its net worth, including its retained earnings, at the end of the QBU's last taxable year beginning before January 1, 1987. This section provides rules for controlled foreign corporations (as defined in section 957 or section 953(c)(1)(B)), other foreign corporations, and branches of United States persons that must make these determinations.

(b) *Certain controlled foreign corporations.* If a DASTM QBU was a controlled foreign corporation for its last taxable year beginning before January 1, 1987, and it had a significant event as described in §1.964-1(c)(6) in a taxable year beginning before January 1, 1987, then the rules of this paragraph (b) shall apply.

(1) *Basis in assets and amount of liabilities.* The hyperinflationary currency adjusted basis of the QBU's assets and the hyperinflationary currency amount of the QBU's liabilities acquired or incurred by the QBU in a taxable year beginning before January 1, 1987, shall be the basis or the amount as determined under §1.964-1(e) prior to translation under §1.964-1(e)(4). The dollar adjusted

basis of such assets and the dollar amount of such liabilities shall be the adjusted basis or the amount as determined under the rules of §1.964-1(e) after translation under §1.964-1(e)(4).

(2) *Retained earnings.* The dollar amount of the QBU's retained earnings at the end of its last taxable year beginning before January 1, 1987, shall be the dollar amount determined under §1.964-1(e)(3).

(c) *All other foreign corporations.* If a foreign corporation is a DASTM QBU that is not described in paragraph (b) of this section, then the hyperinflationary currency and dollar adjusted basis in the QBU's assets acquired in taxable years beginning before January 1, 1987, the hyperinflationary currency and dollar amount of the QBU's liabilities acquired or incurred in taxable years beginning before January 1, 1987, and the dollar amount of the QBU's net worth, including its retained earnings, at the end of its last taxable year beginning before January 1, 1987, shall be determined by applying the principles of §1.985-3T or §1.985-3. Thus, for example, the dollar basis of plant and equipment shall be determined using the appropriate historical exchange rate.

(d) *Pre-1987 section 902 amounts—(1) Translation of pre-1987 section 902 accumulated profits and taxes into United States dollars.* The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, shall be translated into dollars at the spot exchange rate on the first day of its first taxable year beginning after December 31, 1986. Once translated into dollars, these accumulated profits and taxes shall (absent a change in functional currency) remain in dollars for all federal income tax purposes.

(2) *Carryforward of accumulated deficits in accumulated profits from pre-1987 taxable years to post-1986 taxable years.* For purposes of sections 902 and 960, the post-1986 undistributed earnings of a foreign corporation that is subject to

the rules of this section shall be reduced by the dollar amount of the corporation's deficit in accumulated profits, if any, determined under section 902 and the regulations thereunder, that was accumulated at the end of the corporation's last taxable year beginning before January 1, 1987. The dollar amount of the accumulated deficit shall be determined by multiplying the foreign currency amount of such deficit by the spot exchange rate on the last day of the corporation's last taxable year beginning before January 1, 1987, and shall be taken into account on the first day of the corporation's first taxable year beginning after December 31, 1986. Post-1986 undistributed earnings may not be reduced by the dollar amount of a pre-1987 deficit in retained earnings determined under § 1.964-1(e).

(e) *Net worth branch.* If a DASTM QBU is a branch of a United States person and the QBU used a net worth method of accounting for its last taxable year beginning before January 1, 1987, then the rules of this paragraph (e) shall apply. A net worth method of accounting is any method of accounting under which the taxpayer calculates the taxable income of a QBU based on the net change in the dollar value of the QBU's equity (assets minus liabilities) during the course of a taxable year, taking into account any contributions or remittances made during the year. See, e.g., Rev. Rul. 75-106, 1975-1 C.B. 31. (See § 601.601(d)(2)(ii)(b) of this chapter).

(1) *Basis in assets and amount of liabilities—(i) Hyperinflationary amounts.* For the first taxable year beginning in 1987, the hyperinflationary currency adjusted basis of a QBU's assets or the hyperinflationary currency amounts of its liabilities acquired or incurred in a taxable year beginning before January 1, 1987 is the hyperinflationary currency basis or amount at the date when acquired or incurred, as adjusted according to United States generally accepted accounting and tax accounting principles. If a hyperinflationary currency basis or amount was not determined at such date, the dollar basis or amount, as adjusted according to United States generally accepted accounting and tax accounting principles, shall be translated into

hyperinflationary currency at the spot exchange rate on the date when the asset or liability was acquired or incurred.

(ii) *Dollar amounts.* For the first taxable year beginning in 1987, the dollar adjusted basis of the QBU's assets and the amounts of its liabilities shall be those amounts reflected on the QBU's dollar books and records at the end of the taxpayer's last taxable year beginning before January 1, 1987, after adjusting the books and records according to United States generally accepted accounting and tax accounting principles.

(2) *Ending net worth.* The dollar amount of the QBU's net worth at the end of its last taxable year beginning before January 1, 1987 shall equal the QBU's net worth at that date as determined under paragraph (e)(1)(ii) of this section.

(f) *Profit and loss branch.* If a DASTM QBU is a branch of a United States person and the QBU used a profit and loss method of accounting for its last taxable year beginning before January 1, 1987, then the United States person shall first apply the transition rules of § 1.987-5 in order to determine the beginning amount and dollar basis of the branch's EQ pool, the hyperinflationary currency basis of the branch's assets, and the hyperinflationary currency amounts of its liabilities. A profit and loss method of accounting is any method of accounting under which the taxpayer calculates the profits of a QBU by computing the QBU's profits in its functional currency and translating the net result into dollars. See e.g., Rev. Rul. 75-107, 1975-1 C.B. 32. (See § 601.601(d)(2)(ii)(b) of this chapter). The QBU and the taxpayer must then make the adjustments required by § 1.985-5, e.g., the QBU must take into account unrealized exchange gain or loss on dollar-denominated section 988 transactions, the taxpayer must account for the deemed termination of the branch, and the taxpayer must translate the QBU's balance sheet items from hyperinflationary currency into dollars at the spot rate.

[T.D. 8464, 58 FR 234, Jan. 5, 1993]

§ 1.985-7 Adjustments required in connection with a change to DASTM.

(a) *In general.* If a QBU begins to use the dollar approximate separate transactions method of accounting set forth in § 1.985-3 (DASTM) in a taxable year beginning after April 6, 1998, adjustments shall be made as provided by this section. For the rules with respect to foreign corporations, see paragraph (b) of this section. For the rules with respect to adjustments to the income of United States shareholders of controlled foreign corporations, see paragraph (c) of this section. For the rules with respect to adjustments relating to QBU branches, see paragraph (d) of this section. For the effective date of this section, see paragraph (e). For purposes of applying this section, the look-back period shall be the period beginning with the first taxable year after the transition date and ending on the last day prior to the taxable year of change. The term transition date means the later of the last day of the last taxable year ending before the base period as defined in § 1.985-1(b)(2)(ii)(D) or the last day of the taxable year in which the QBU last applied DASTM. The taxable year of change shall mean the taxable year of change as defined in § 1.481-1(a)(1). The application of this paragraph may be illustrated by the following examples:

Example 1. A calendar year QBU that has not previously used DASTM operates in a country in which the functional currency of the country is hyperinflationary as defined under § 1.985-1(b)(2)(ii)(D) for the QBU's 1999 tax year. The look-back period is the period from January 1, 1996 through December 31, 1998, the transition date is December 31, 1995, and the taxable year of change is the taxable year beginning January 1, 1999.

Example 2. A QBU that has not previously used DASTM with a taxable year ending June 30, operates in a country in which the functional currency of the country is hyperinflationary for the QBU's tax year beginning July 1, 1999 as defined under § 1.985-1(b)(2)(ii)(D) (where the base period is the thirty-six calendar months immediately preceding the first day of the current calendar year 1999). The look-back period is the period from July 1, 1995 through June 30, 1999, the transition date is June 30, 1995, and the taxable year of change is the taxable year beginning July 1, 1999.

(b) *Adjustments to foreign corporations—(1) In general.* In the case of a

foreign corporation, the corporation shall make the adjustments set forth in paragraphs (b)(2) through (4) of this section. The adjustments shall be made on the first day of the taxable year of change.

(2) *Treatment of certain section 988 transactions—(i) Exchange gain or loss from section 988 transactions unrealized as of the transition date.* A foreign corporation shall adjust earnings and profits by the amount of any unrealized exchange gain or loss that was attributable to a section 988 transaction (as defined in sections 988(c)(1)(A), (B), and (C)) that was denominated in terms of (or determined by reference to) the dollar and was held by the corporation on the transition date. Such gain or loss shall be computed as if recognized on the transition date and shall be reduced by any gain and increased by any loss recognized by the corporation with respect to such transaction during the look-back period. The amount of such gain or loss shall be determined without regard to the limitations of section 988(b) (i.e., whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988. Proper adjustments shall be made to account for gain or loss taken into account by reason of this paragraph (b)(2). See § 1.985-5(f) *Example 1, footnote 1.*

(ii) *Treatment of a section 988 transaction entered into and terminated during the look-back period.* A foreign corporation shall reduce earnings and profits by the amount of any gain, and increase earnings and profits by the amount of any loss, that was recognized with respect to any dollar denominated section 988 transactions entered into and terminated during the look-back period.

(3) *Opening balance sheet.* The opening balance sheet of a foreign corporation for the taxable year of change shall be determined as if the corporation had changed its functional currency to the dollar by applying § 1.985-5(c) on the transition date and had translated its assets and liabilities acquired and incurred during the look-back period under § 1.985-3.

(4) *Earnings and profits adjustments—*

(i) *Pre-1987 accumulated profits.* The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that are attributable to taxable years beginning before January 1, 1987, as stated on the transition date, and that were maintained for purposes of section 902 in the old functional currency, shall be translated into dollars at the spot rate in effect on the transition date. The applicable accumulated profits shall be reduced on a last-in, first-out basis by the aggregate dollar amount (translated from functional currency in accordance with the rules of section 989(b)) attributable to earnings and profits that were distributed (or treated as distributed) during the look-back period to the extent such amounts distributed exceed the earnings and profits calculated under (b)(4)(ii) or (b)(4)(iii), as applicable. See § 1.902-1(b)(2)(ii). Once translated into dollars, these pre-1987 taxes and accumulated profits or deficits in accumulated profits shall (absent a change in functional currency) remain in dollars for all federal income tax purposes.

(ii) *Post-1986 undistributed earnings of a CFC.* In the case of a controlled foreign corporation (within the meaning of section 957 or section 953(c)(1)(B))(CFC) or a foreign corporation subject to the rules of § 1.904-6(a)(2), the corporation's post-1986 undistributed earnings in each separate category as defined in § 1.904-5(a)(1) as of the first day of the taxable year of change (and prior to adjustment under paragraph (c)(1) of this section) shall equal the sum of—

(A) The corporation's post-1986 undistributed earnings and profits (or deficit in earnings and profits) in each separate category as defined in § 1.904-5(a)(1) as stated on the transition date translated into dollars at the spot rate in effect on the transition date; and

(B) The sum of the earnings and profits (or deficit in earnings and profits) in each separate category determined under § 1.985-3 for each post-transition date taxable year prior to the taxable year of change.

Such amount shall be reduced by the aggregate dollar amount (translated from functional currency in accordance

with the rules of section 989(b)) attributable to earnings and profits that were distributed (or treated as distributed) during the look-back period out of post-1986 earnings and profits in such separate category. For purposes of applying this paragraph (b)(4)(ii)(B), the opening balance sheet for calculating earnings and profits under § 1.985-3 for the first post-transition year shall be translated into dollars pursuant to § 1.985-5(c).

(iii) *Post-1986 undistributed earnings of other foreign corporations.* In the case of a foreign corporation that is not a CFC or subject to the rules of § 1.904-6(a)(2), the corporation's post-1986 undistributed earnings shall equal the sum of—

(A) The corporation's post-1986 undistributed earnings (or deficit) on the transition date translated into dollars at the spot rate in effect on the transition date; and

(B) The sum of the earnings and profits (or deficit in earnings and profits) determined under § 1.985-3 for each post-transition date taxable year (or such later year determined under section 902(c)(3)(A)) prior to the taxable year of change.

Such amount shall be reduced by the aggregate dollar amount (translated from functional currency in accordance with the rules of section 989(b)) that was distributed (or treated as distributed) during the look-back period out of post-1986 earnings and profits. For purposes of applying this paragraph (b)(4)(iii)(B), the opening balance sheet for calculating earnings and profits under § 1.985-3 for the first post-transition year shall be translated into dollars pursuant to § 1.985-5(c).

(c) *United States shareholders of controlled foreign corporations—*(1) *In general.* A United States shareholder (within the meaning of section 951(b) or section 953(c)(1)(B)) of a CFC that changes to DASTM shall make the adjustments set forth in paragraphs (c) (2) through (5) of this section on the first day of the taxable year of change. Adjustments under this section shall be taken into account by the shareholder (or such shareholder's successor in interest) ratably over four taxable years beginning with the taxable year of change. Similar rules shall apply in determining adjustments to income of

United States persons who have made an election under section 1295 to treat a passive foreign investment company as a qualified electing fund.

(2) *Treatment under subpart F of income recognized on section 988 transactions.* The character of amounts taken into account under paragraph (b)(2) of this section for purposes of sections 951 through 964, shall be determined on the transition date and to the extent characterized as subpart F income shall be taken into account in accordance with the rules of paragraph (c)(1) of this section. Such amounts shall retain their character for all federal income tax purposes (including sections 902, 959, 960, 961, 1248, and 6038).

(3) *Recognition of foreign currency gain or loss on previously taxed earnings and profits on the transition date.* Gain or loss is recognized under section 986(c) as if all previously taxed earnings and profits as determined on the transition date, if any, were distributed on such date. Such gain or loss shall be reduced by any foreign currency gain and increased by any foreign currency loss that was recognized under section 986(c) with respect to distributions of previously taxed earnings and profits during the look-back period. Such amount shall be characterized in accordance with section 986(c) and taken into account in accordance with the rules of paragraph (c)(1) of this section.

(4) *Subpart F income adjustment.* Subpart F income in a separate category shall be determined under §1.985-3 for each look-back year. For this purpose, the opening DASTM balance sheet shall be determined under §1.985-5. The sum of the difference (positive or negative) between the amount computed pursuant to §1.985-3 and amount that was included in income for each year shall be taken into account in the taxable year of change pursuant to paragraph (c)(1) of this section. Such amounts shall retain their character for all federal income tax purposes (including sections 902, 959, 960, 961, 1248, and 6038). For rules applicable if an adjustment under this section results in a loss for the taxable year in a separate category, see section 904(f) and the regulations thereunder. The amount of previously taxed earnings and profits as determined under section 959(c)(2)

shall be adjusted (positively or negatively) by the amount taken into account under this paragraph (c)(4) as of the first day of the taxable year of change.

(5) *Foreign tax credit.* A United States shareholder of a CFC shall compute an amount of foreign taxes deemed paid under section 960 with respect to any positive adjustments determined under paragraph (c) of this section. The amount of foreign tax deemed paid shall be computed with reference to the full amount of the adjustment and to the post-1986 undistributed earnings determined under paragraph (b)(4) (i) and (ii) of this section and the post-1986 foreign income taxes of the CFC on the first day of the taxable year of change (i.e., without taking into account earnings and taxes for the taxable year of change). For purposes of section 960, the associated taxes in each separate category shall be allocated pro rata among, and deemed paid in, the shareholder's taxable years in which the income is taken into account. (No adjustment to foreign taxes deemed paid in prior years is required solely by reason of a negative adjustment to income under paragraph (c)(1) of this section).

(d) *QBU branches—(1) In general.* In the case of a QBU branch, the taxpayer shall make the adjustments set forth in paragraphs (d)(2) through (d)(4) of this section. Adjustments under this section shall be taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

(2) *Treatment of certain section 988 transactions—(i) Exchange gain or loss from section 988 transactions unrealized as of the transition date.* A QBU branch shall adjust income by the amount of any unrealized exchange gain or loss that was attributable to a section 988 transaction (as defined in sections 988(c)(1) (A), (B), and (C)) that was denominated in terms of (or determined by reference to) the dollar and was held by the QBU branch on the transition date. Such gain or loss shall be computed as if recognized on the transition date and shall be reduced by any gain and increased by any loss recognized by the QBU branch with respect to such transaction during the look-back period. The amount of such gain or loss

shall be determined without regard to the limitations of section 988(b) (i.e., whether any gain or loss would be realized on the transaction as a whole). The character and source of such gain or loss shall be determined under section 988. Proper adjustments shall be made to account for gain or loss taken into account by reason of this paragraph (d)(2). See § 1.985-5(f) *Example 1, footnote 1*.

(ii) *Treatment of a section 988 transaction entered into and terminated during the look-back period.* A QBU branch shall reduce income by the amount of any gain, and increase income by the amount of any loss, that was recognized with respect to any dollar denominated section 988 transactions entered into and terminated during the look-back period.

(3) *Deemed termination income adjustment.* The taxpayer shall realize gain or loss attributable to the QBU branch's equity pool (as stated on the transition date) under the principles of section 987, computed as if the branch terminated on the transition date. Such amount shall be reduced by section 987 gain and increased by section 987 loss that was recognized by such taxpayer with respect to remittances during the look-back period.

(4) *Branch income adjustment.* Branch income in a separate category shall be determined under § 1.985-3 for each look-back year. For this purpose, the opening DASTM balance sheet shall be determined under § 1.985-5. The sum of the difference (positive or negative) between the amount computed pursuant to § 1.985-3 and amount taken into account for each year shall be taken into account in the taxable year of change pursuant to paragraph (d)(1) of this section. Such amounts shall retain their character for all federal income tax purposes.

(5) *Opening balance sheet.* The opening balance sheet of a QBU branch for the taxable year of change shall be determined as if the branch had changed its functional currency to the dollar by applying § 1.985-5(c) on the transition date and had translated its assets and liabilities acquired and incurred during the look-back period under § 1.985-3.

(e) *Effective date.* This section is effective for taxable years beginning

after April 6, 1998. However, a taxpayer may choose to apply this section to all open taxable years beginning after December 31, 1986, provided each person, and each QBU branch of a person, that is related (within the meaning of § 1.985-2(d)(3)) to the taxpayer also applies this section.

[T.D. 8765, 63 FR 10774, Mar. 5, 1998]

§ 1.985-8 Special rules applicable to the European Monetary Union (conversion to euro).

(a) *Definitions*—(1) *Legacy currency.* A legacy currency is the former currency of a Member State of the European Community which is substituted for the euro in accordance with the Treaty establishing the European Community signed February 7, 1992. The term legacy currency shall also include the European Currency Unit.

(2) *Conversion rate.* The conversion rate is the rate at which the euro is substituted for a legacy currency.

(b) *Operative rules*—(1) *Initial adoption.* A QBU (as defined in § 1.989(a)-1(b)) whose first taxable year begins after the euro has been substituted for a legacy currency may not adopt a legacy currency as its functional currency.

(2) *QBU with a legacy currency as its functional currency*—(i) *Required change.* A QBU with a legacy currency as its functional currency is required to change its functional currency to the euro beginning the first day of the first taxable year—

(A) That begins on or after the day that the euro is substituted for that legacy currency (in accordance with the Treaty on European Union); and

(B) In which the QBU begins to maintain its books and records (as described in § 1.989(a)-1(d)) in the euro.

(ii) Notwithstanding paragraph (b)(2)(i) of this section, a QBU with a legacy currency as its functional currency is required to change its functional currency to the euro no later than the last taxable year beginning on or before the first day such legacy currency is no longer valid legal tender.

(3) *QBU with a non-legacy currency as its functional currency*—(i) *In general.* A QBU with a non-legacy currency as its functional currency may change its

functional currency to the euro pursuant to this § 1.985-8 if—

(A) Under the rules set forth in § 1.985-1(c), the euro is the currency of the economic environment in which a significant part of the QBU's activities are conducted;

(B) After conversion, the QBU maintains its books and records (as described in § 1.989(a)-1(d)) in the euro; and

(C) The QBU is not required to use the dollar as its functional currency under § 1.985-1(b).

(ii) *Time period for change.* A QBU with a non-legacy currency as its functional currency may change its functional currency to the euro under this section only if it does so within the period set forth in paragraph (b)(2) of this section as if the functional currency of the QBU was a legacy currency.

(4) *Consent of Commissioner.* A change made pursuant to paragraph (b) of this section shall be deemed to be made with the consent of the Commissioner for purposes of § 1.985-4. A QBU changing its functional currency to the euro pursuant to paragraph (b)(2) of this section must make adjustments as provided in paragraph (c) of this section. A QBU changing its functional currency to the euro pursuant to paragraph (b)(3) must make adjustments as provided in § 1.985-5.

(5) *Statement to file upon change.* With respect to a QBU that changes its functional currency to the euro under paragraph (b) of this section, an affected taxpayer shall attach to its return for the taxable year of change a statement that includes the following: "TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS CHANGED ITS FUNCTIONAL CURRENCY TO THE EURO PURSUANT TO TREAS. REG. § 1.985-8." For purposes of this paragraph (b)(5), an affected taxpayer shall be in the case where the QBU is: a QBU of an individual U.S. resident (as a result of the activities of such individual), the individual; a QBU branch of a U.S. corporation, the corporation; a controlled foreign corporation (as described in section 957)(or QBU branch thereof), each United States shareholder (as described in section 951(b)); a partnership, each partner separately; a noncontrolled section 902 corporation

(as described in section 904(d)(2)(E)) (or branch thereof), each domestic shareholder as described in § 1.902-1(a)(1); or a trust or estate, the fiduciary of such trust or estate.

(c) *Adjustments required when a QBU changes its functional currency from a legacy currency to the euro pursuant to paragraph (b)(2) of this section—(1) In general.* A QBU that changes its functional currency from a legacy currency to the euro pursuant to paragraph (b)(2) of this section must make the adjustments described in paragraphs (c)(2) through (5) of this section. Section 1.985-5 shall not apply.

(2) *Determining the euro basis of property and the euro amount of liabilities and other relevant items.* The euro basis in property and the euro amount of liabilities and other relevant items shall equal the product of the legacy functional currency adjusted basis or amount of liabilities multiplied by the applicable conversion rate.

(3) *Taking into account exchange gain or loss on legacy currency section 988 transactions—(i) In general.* Except as provided in paragraphs (c)(3)(iii) and (iv) of this section, a legacy currency denominated section 988 transaction (determined after applying section 988(d)) outstanding on the last day of the taxable year immediately prior to the year of change shall continue to be treated as a section 988 transaction after the change and the principles of section 988 shall apply.

(ii) *Examples.* The application of this paragraph (c)(3) may be illustrated by the following examples:

Example 1. X, a calendar year QBU on the cash method of accounting, uses the deutschmark as its functional currency. X is not described in section 1281(b). On July 1, 1998, X converts 10,000 deutschmarks (DM) into Dutch guilders (fl) at the spot rate of fl1 = DM1 and loans the 10,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on June 30, 1999. On January 1, 1999, X changes its functional currency to the euro pursuant to this section. Assume that the euro/deutschmark conversion rate is set by the European Council at €1 = DM2. Assume further that the euro/guilder conversion rate is set at €1 = fl2.25. Accordingly, under the terms of the note, on June 30, 1999, X will receive €444.44 (fl10,000/2.25) of principal and €444.44 (fl1,000/2.25) of interest. Pursuant to

this paragraph (c)(3), X will realize an exchange loss on the principal computed under the principles of § 1.988-2(b)(5). For this purpose, the exchange rate used under § 1.988-2(b)(5)(i) shall be the guilder/euro conversion rate. The amount under § 1.988-2(b)(5)(ii) is determined by translating the fl10,000 at the guilder/deutschmark spot rate on July 1, 1998, and translating that deutschmark amount into euros at the deutschmark/euro conversion rate. Thus, X will compute an exchange loss for 1999 of €555.56 determined as follows: $[\text{€}4444.44 (\text{fl}10,000/2.25) - 5000 ((\text{fl}10,000/1)/2)] = -\text{€}555.56$. Pursuant to this paragraph (c)(3), the character and source of the loss are determined pursuant to section 988 and regulations thereunder. Because X uses the cash method of accounting for the interest on this debt instrument, X does not realize exchange gain or loss on the receipt of that interest.

Example 2. (i) X, a calendar year QBU on the accrual method of accounting, uses the deutschmark as its functional currency. On February 1, 1998, X converts 12,000 deutschmarks into Dutch guilders at the spot rate of fl1 = DM1 and loans the 12,000 guilders to Y (an unrelated party) for one year at a rate of 10% with principal and interest to be paid on January 31, 1999. In addition, assume the average rate (deutschmark/guilder) for the period from February 1, 1998, through December 31, 1998 is fl1.07 = DM1. Pursuant to § 1.988-2(b)(2)(ii)(C), X will accrue eleven months of interest on the note and recognize interest income of DM1028.04 (fl1100/1.07) in the 1998 taxable year.

(ii) On January 1, 1999, the euro will replace the deutschmark as the national currency of Germany pursuant to the Treaty on European Union signed February 7, 1992. Assume that on January 1, 1999, X changes its functional currency to the euro pursuant to this section. Assume that the euro/deutschmark conversion rate is set by the European Council at €1 = DM2. Assume further that the euro/guilder conversion rate is set at €1 = fl2.25. In 1999, X will accrue one month of interest equal to €44.44 (fl100/2.25). On January 31, 1999, pursuant to the note, X will receive interest denominated in euros of €533.33 (fl1200/2.25). Pursuant to this paragraph (c)(3), X will realize an exchange loss in the 1999 taxable year with respect to accrued interest computed under the principles of § 1.988-2(b)(3). For this purpose, the exchange rate used under § 1.988-2(b)(3)(i) is the guilder/euro conversion rate and the exchange rate used under § 1.988-2(b)(3)(ii) is the deutschmark/euro conversion rate. Thus, with respect to the interest accrued in 1998, X will realize exchange loss of €25.13 under § 1.988-2(b)(3) as follows: $[\text{€}488.89 (\text{fl}1100/2.25) - \text{€}514.02 (\text{DM}1028.04/2)] = -\text{€}25.13$. With respect to the one month of interest accrued in 1999, X will realize no exchange gain or loss since the exchange rate when the interest ac-

crued and the spot rate on the payment date are the same.

(iii) X will realize exchange loss of €666.67 on repayment of the loan principal computed in the same manner as in Example 1 $[\text{€}5333.33 (\text{fl}12,000/2.25) - \text{€}6000 (\text{fl}12,000/1)/2]$. The losses with respect to accrued interest and principal are characterized and sourced under the rules of section 988.

(iii) *Special rule for legacy nonfunctional currency.* The QBU shall realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to nonfunctional currency (as described in section 988(c)(1)(C)(ii)) that is denominated in a legacy currency as if the currency were disposed of on the last day of the taxable year immediately prior to the year of change. The character and source of the gain or loss are determined under section 988.

(iv) *Legacy currency denominated accounts receivable and payable—(A) In general.* A QBU may elect to realize or otherwise take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange gain or loss attributable to a legacy currency denominated item described in section 988(c)(1)(B)(ii) as if the item were terminated on the last day of the taxable year ending prior to the year of change.

(B) *Time and manner of election.* With respect to a QBU that makes an election described in paragraph (c)(3)(iv)(A) of this section, an affected taxpayer (as described in paragraph (b)(5) of this section) shall attach a statement to its tax return for the taxable year ending immediately prior to the year of change which includes the following: “TAXPAYER CERTIFIES THAT A QBU OF THE TAXPAYER HAS ELECTED TO REALIZE CURRENCY GAIN OR LOSS ON LEGACY CURRENCY DENOMINATED ACCOUNTS RECEIVABLE AND PAYABLE UPON CHANGE OF FUNCTIONAL CURRENCY TO THE EURO.” A QBU making the election must do so for all legacy currency denominated items described in section 988(c)(1)(B)(ii).

(4) *Adjustments when a branch changes its functional currency to the euro—(i) Branch changing from a legacy currency to the euro in a taxable year during which taxpayer’s functional currency is*

other than the euro. If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is other than the euro, the branch's euro equity pool shall equal the product of the legacy currency amount of the equity pool multiplied by the applicable conversion rate. No adjustment to the basis pool is required.

(ii) *Branch changing from a legacy currency to the euro in a taxable year during which taxpayer's functional currency is the euro.* If a branch changes its functional currency from a legacy currency to the euro for a taxable year during which the taxpayer's functional currency is the euro, the taxpayer shall realize gain or loss attributable to the branch's equity pool under the principles of section 987, computed as if the branch terminated on the last day prior to the year of change. Adjustments under this paragraph (c)(4)(ii) shall be taken into account by the taxpayer ratably over four taxable years beginning with the taxable year of change.

(5) *Adjustments to a branch's accounts when a taxpayer changes to the euro—(i) Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is other than the euro.* If a taxpayer changes its functional currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is other than the euro, the basis pool shall equal the product of the legacy currency amount of the basis pool multiplied by the applicable conversion rate. No adjustment to the equity pool is required.

(ii) *Taxpayer changing from a legacy currency to the euro in a taxable year during which a branch's functional currency is the euro.* If a taxpayer changes its functional currency from a legacy currency to the euro for a taxable year during which the functional currency of a branch of the taxpayer is the euro, the taxpayer shall take into account gain or loss as determined under paragraph (c)(4)(ii) of this section.

(6) *Additional adjustments that are necessary when a corporation changes its functional currency to the euro.* The amount of a corporation's euro cur-

rency earnings and profits and the amount of its euro paid-in capital shall equal the product of the legacy currency amounts of these items multiplied by the applicable conversion rate. The foreign income taxes and accumulated profits or deficits in accumulated profits of a foreign corporation that were maintained in foreign currency for purposes of section 902 and that are attributable to taxable years of the foreign corporation beginning before January 1, 1987, also shall be translated into the euro at the conversion rate.

(d) *Treatment of legacy currency section 988 transactions with respect to a QBU that has the euro as its functional currency—(1) In general.* This § 1.985-8(d) applies to a QBU that has the euro as its functional currency and that holds a section 988 transaction denominated in, or determined by reference to, a currency that is substituted by the euro. For example, this paragraph (d) will apply to a German QBU with the euro as its functional currency if the QBU is holding Country X currency or other section 988 transactions denominated in such currency on the day in the year 2005 when the euro is substituted for the Country X currency.

(2) *Principles of paragraph (c)(3) of this section shall apply.* With respect to a QBU described in paragraph (d) of this section, the principles of paragraph (c)(3) of this section shall apply. For example, if a German QBU with the euro as its functional currency is holding a Country X currency denominated debt instrument on the day in the year 2005 when the euro is substituted for the Country X currency, the instrument shall continue to be treated as a section 988 transaction pursuant to the principles of paragraph (c)(3)(i) of this section. However, if such QBU holds Country X currency, the QBU shall take into account any unrealized exchange gain or loss pursuant to the principles of paragraph (c)(3)(iii) of this section as if the currency was disposed of on the day prior to the day the euro is substituted for the Country X currency. Similarly, if the QBU makes an election under the principles of paragraph (c)(3)(iv) of this section, the QBU shall take into account for all purposes of the Internal Revenue Code the amount of any unrealized exchange

§ 1.986(a)-1

26 CFR Ch. I (4-1-23 Edition)

gain or loss attributable to a legacy currency denominated item described in section 988(c)(1)(B)(ii) as if the item were terminated on the day prior to the day the euro is substituted for the Country X currency.

(e) *Effective date.* This section applies to tax years ending after July 29, 1998.

[T.D. 8927, 66 FR 2216, Jan. 11, 2001; T.D. 8927, 66 FR 21447, Apr. 30, 2001]

§ 1.986(a)-1 Translation of foreign income taxes for purposes of the foreign tax credit.

(a) *Translation of foreign income taxes taken into account when accrued*—(1) *In general.* For purposes of this section, the term *section 901 taxpayer* means the “taxpayer” described in § 1.901-2(f)(1) and so includes a partnership or a specified 10-percent owned foreign corporation (as defined in section 245A(b)) that has legal liability under foreign law for foreign income tax. Except as provided in paragraph (a)(2) of this section, in the case of a section 901 taxpayer that takes foreign income taxes (as defined in section 986(a)(4) (including taxes described in section 903)) into account when accrued, the amount of any foreign income taxes denominated in foreign currency that has been paid or accrued, including additional tax liability denominated in foreign currency, foreign income taxes withheld in foreign currency, or estimated foreign income taxes paid in foreign currency, are translated into dollars using the weighted average exchange rate (as defined in § 1.989(b)-1) (the “average exchange rate”) for the section 901 taxpayer’s U.S. taxable year (as defined in § 1.960-1(b)(37)) to which such foreign income taxes relate. See section 986(a)(1)(A). See section 988 and §§ 1.988-1(a)(2)(ii) and 1.988-2(c) for rules for determining whether and the extent to which there is a foreign currency gain or loss when an accrued functional currency amount of foreign income tax denominated in nonfunctional currency differs from the functional currency amount paid.

(2) *Exceptions*—(i) *Foreign income taxes not paid within 24 months.* Any foreign income taxes denominated in foreign currency that are paid more than 24 months after the close of the section 901 taxpayer’s U.S. taxable year to

which they relate are translated into dollars using the spot rate on the date of payment of the foreign income taxes. See section 986(a)(1)(B)(i) and (a)(2)(A). For purposes of this section and § 1.905-3, the term *spot rate* has the meaning provided in § 1.988-1(d). To the extent any accrued foreign income taxes denominated in foreign currency remain unpaid more than 24 months after the close of the taxable year to which they relate, see § 1.905-3 and paragraph (c) of this section for the required adjustments.

(ii) *Foreign income taxes paid before taxable year begins.* Any foreign income taxes denominated in foreign currency that are paid before the beginning of the section 901 taxpayer’s U.S. taxable year to which such taxes relate are translated into dollars using the spot rate on the date of payment of the foreign income taxes. See section 986(a)(1)(B)(ii) and (a)(2)(A).

(iii) *Inflationary currency.* Any foreign income taxes denominated in a foreign currency that is an inflationary currency in the section 901 taxpayer’s U.S. taxable year to which the foreign income taxes relate, or in any subsequent taxable year up to and including the taxable year in which the taxes are paid, are translated into dollars using the spot rate on the date of payment of such taxes. For purposes of section 986(a)(1)(C) and this paragraph (a)(2)(iii), the term *inflationary currency* means the currency of a country in which there is cumulative inflation during the base period of at least 30 percent, as determined under the principles of § 1.985-1(b)(2)(ii)(D), where the base period, with respect to any taxable year, is the 36 months ending on the last day of such taxable year (in lieu of the base period described in § 1.985-1(b)(2)(ii)(D), which ends on the last day of the preceding calendar year). Accrued but unpaid foreign income taxes denominated in a foreign currency that is an inflationary currency in the taxable year accrued are translated into dollars at the spot rate on the last day of the section 901 taxpayer’s U.S. taxable year to which such taxes relate (provisional year-end rate). However, a U.S. taxpayer that

claims a foreign tax credit under section 901 may choose to translate accrued but unpaid foreign income taxes (including foreign income taxes deemed paid under section 960) denominated in a foreign currency that is an inflationary currency into dollars at the spot rate on the date of payment, in lieu of the provisional year-end rate, if such taxes are paid prior to the due date (with extensions) of the original Federal income tax return for the taxable year for which the credit is claimed and such return is timely filed. In all other cases, see § 1.905-3 and paragraph (c) of this section for required adjustments upon payment of accrued foreign income taxes denominated in an inflationary currency.

(iv) *Election to translate foreign income taxes using the spot rate as of date of payment*—(A) *Eligibility to make election.* An individual or corporate taxpayer (including a specified 10-percent owned foreign corporation) that is otherwise required to translate foreign income taxes that are denominated in foreign currency using the average exchange rate may elect to translate foreign income taxes described in this paragraph (a)(2)(iv) into dollars using the spot rate on the date of payment of the foreign income taxes, provided that the liability for such taxes is denominated in nonfunctional currency. For purposes of section 986(a)(1)(D) and this paragraph (a)(2)(iv), whether the currency in which a tax liability attributable to a qualified business unit (within the meaning of section 989(a)) (QBU) is denominated is a nonfunctional currency is determined by reference to the functional currency of the individual or corporate taxpayer and not that of the QBU of the taxpayer. Accrued but unpaid foreign income taxes subject to the election under this paragraph (a)(2)(iv) are translated at the provisional year-end rate. However, a taxpayer that claims a foreign tax credit under section 901 may choose to translate accrued but unpaid foreign income taxes (including foreign taxes deemed paid under section 960 with respect to a specified 10-percent owned foreign corporation that has made an election under this paragraph (a)(2)(iv)) into dollars at the spot rate on the date of payment, in lieu of

the provisional year-end rate, if such taxes are paid prior to the due date (with extensions) of the original return for the taxable year for which the credit is claimed and such return is timely filed. In all other cases, see § 1.905-3 and paragraph (c) of this section for required adjustments upon payment of accrued foreign income taxes that are translated into dollars at the spot rate on the date of payment.

(B) *Scope of election.* In general, an individual taxpayer may make an election under this paragraph (a)(2)(iv) for all foreign income taxes denominated in nonfunctional currency, or only for those foreign income taxes that are denominated in nonfunctional currency and that are attributable to the individual's non-QBU activities and all QBUs with dollar functional currencies. A corporate taxpayer may make an election under this paragraph (a)(2)(iv) for all foreign income taxes that are denominated in nonfunctional currency, or only for those foreign income taxes that are denominated in nonfunctional currency and that are attributable to all QBUs (including the corporate taxpayer) with dollar functional currencies. Therefore, an election under this paragraph (a)(2)(iv) may not be made for foreign income taxes that are denominated in a nonfunctional currency of the taxpayer and attributable to QBUs with non-dollar functional currencies, except as part of an election to translate all taxes denominated in nonfunctional currency at the spot rate on the date of payment. For purposes of this paragraph (a)(2)(iv)(B), foreign income tax is attributable to a QBU if the tax is properly recorded on the books and records of the QBU in accordance with sections 985 through 989. An election under this paragraph (a)(2)(iv) by a domestic corporation (or an individual that has made an election under section 962) does not apply to any taxes paid or accrued by foreign corporations with respect to which the individual or corporation is a United States shareholder. However, an election may be made on behalf of a foreign corporation to translate either all of the foreign corporation's foreign income taxes denominated in nonfunctional currency,

or only the foreign income taxes denominated in nonfunctional currency that are attributable to the foreign corporation's QBUs with dollar functional currencies, using the spot rate on the date of payment. Such an election is made using the procedures under § 1.964-1(c)(3) that apply to permit controlling domestic shareholders to make or change a tax accounting election on behalf of a foreign corporation.

(C) *Time and manner of election.* The election under this paragraph (a)(2)(iv) must be made by attaching a statement to the taxpayer's timely filed Federal income tax or information return (including extensions) for the first taxable year to which the election applies. The statement must identify whether the election under this paragraph (a)(2)(iv) is made for all foreign income taxes denominated in nonfunctional currency or only for those foreign income taxes that are denominated in nonfunctional currency and that are either attributable to the taxpayer's QBUs with dollar functional currencies or, in the case of an individual, attributable to non-QBU activities. Once made, the election under this paragraph (a)(2)(iv) applies for the taxable year for which made and all subsequent taxable years unless revoked with the consent of the Commissioner.

(D) *Example—(1) Facts.* USP, a domestic corporation that uses the calendar year as its taxable year, owns a partnership interest in PS, a non-hybrid partnership organized in Country X. USP also owns an equity interest in HPS, a Country X corporation that has filed an entity classification election under § 301.7701-3 of this chapter to be treated as a partnership for Federal income tax purposes. USP also owns 100% of CFC, a Country Y controlled foreign corporation that uses the U.S. dollar as its functional currency. PS and HPS each use a fiscal year ending November 30 as its taxable year both for Federal income tax purposes and for Country X tax purposes, and their functional currency is the Euro. HPS is the section 901 taxpayer of foreign income taxes denominated in Euros that it pays to Country X and properly records on its books and records. USP takes its dis-

tributive share of the HPS taxes into account under sections 702(a)(6) and 901(b)(5) and §§ 1.702-1(a)(6) and 1.704-1(b)(4)(viii) in computing its foreign tax credit. USP is the section 901 taxpayer of Euro-denominated foreign income taxes it pays to Country X with respect to its distributive share of the income of PS, and also pays Country X taxes withheld in Euros from distributions from HPS to USP and properly records these taxes on its books and records. Pursuant to § 1.985-1(b)(1)(iii), USP's functional currency is the dollar. USP timely elects under § 1.986(a)-1(a)(2)(iv) to use the spot rate on the date of payment to translate into dollars its foreign income taxes denominated in nonfunctional currency that are attributable to all QBUs with dollar functional currencies.

(2) *Result.* The Euro taxes paid by USP with respect to its distributive share of income from PS and the Euro taxes withheld from distributions from HPS are nonfunctional currency taxes attributable to USP, a QBU with a dollar functional currency. Accordingly, these taxes are translated into dollars at the spot rate on the date the taxes are paid. USP's distributive share of the Euro taxes paid by HPS are attributable to HPS, a Euro functional currency QBU of USP. Because these taxes are not attributable to a dollar QBU of USP, they are not covered by USP's election and so are translated into dollars at the average exchange rate for HPS's U.S. taxable year ending on November 30. See § 1.986(a)-1(a)(1). Foreign income taxes paid by CFC are not covered by USP's election; however, if USP so chooses it may make a separate election on behalf of CFC to use the spot rate on the date of payment to translate either all of CFC's nonfunctional currency taxes, or only those taxes that are attributable to CFC's dollar QBUs (which includes CFC). If instead USP had elected to use the spot rate on the date of payment to translate all of its foreign income taxes denominated in nonfunctional currency, rather than only those taxes attributable to QBUs with dollar functional currencies, then the spot rate on the

date of payment would apply to translate all of the Euro taxes paid or accrued by USP, including its distributive share of taxes paid by HPS. However, this election would still not apply to taxes paid or accrued by CFC. See § 1.986(a)-1(a)(2)(iv)(B).

(v) *Regulated investment companies.* In the case of a regulated investment company (as defined in section 851) which takes into account income on an accrual basis, foreign income taxes paid or accrued with respect to such income are translated into dollars using the spot rate on the date the income accrues. See section 986(a)(1)(E).

(b) *Translation of foreign income taxes taken into account when paid.* In the case of a section 901 taxpayer that takes foreign income taxes into account when paid, the amount of any foreign income tax liability denominated in foreign currency, including additional income tax liability denominated in foreign currency or estimated foreign income taxes paid in foreign currency, are translated into dollars using the spot rate on the date of payment of such taxes. See section 986(a)(2)(A). Foreign income taxes withheld in foreign currency are translated into dollars using the spot rate on the date on which such taxes were withheld.

(c) *Refunds or other reductions of foreign income tax liability.* In the case of a section 901 taxpayer that takes foreign income taxes into account when accrued, a reduction in the amount of previously-accrued foreign income taxes that is attributable to a refund of foreign income taxes, a credit allowed in lieu of a refund, or a reduction in or other downward adjustment to an accrued amount, including an adjustment on account of accrued foreign income taxes that were not paid by the date 24 months after the close of the U.S. taxable year to which such taxes relate, is translated into dollars using the exchange rate that was used to translate such amount when claimed as a credit or added to PTEP group taxes (as defined in § 1.960-3(d)(1)). In the case of foreign income taxes taken into account when accrued but translated into dollars on the date of payment, see § 1.905-3(b) for required adjustments to reflect a foreign tax redetermination

(as defined in § 1.905-3(a)) attributable to a reduction in the amount of previously-accrued foreign income taxes that is attributable to a difference in exchange rates between the date or taxable year of accrual and the date of payment. In the case of a section 901 taxpayer that takes foreign income taxes into account when paid, a refund or other reduction in or downward adjustment to the amount of foreign income taxes is translated into dollars using the exchange rate that was used to translate such amount when claimed as a credit. If a refund or other reduction of foreign income taxes relates to foreign income taxes paid or accrued on more than one date, then the refund or other reduction is deemed to be derived from, and reduces, the payments of foreign income taxes in order, starting with the most recent payment of foreign income taxes first, to the extent thereof.

(d) *Allocation of refunds of foreign income taxes.* Refunds of foreign income taxes are allocated to the same separate category as the foreign income taxes to which the refunded taxes relate. Refunds are related to foreign income taxes in a separate category if the foreign income tax that was refunded was imposed with respect to that separate category. See § 1.904-6 concerning the allocation of foreign income taxes to separate categories of income.

(e) *Basis of foreign currency refunded—*
(1) *Nonfunctional currency tax liability and dollar functional currency.* If the functional currency of the QBU that paid the tax and received the refund is the dollar or the person receiving the refund is not a QBU, then the recipient's basis in the foreign currency refunded is the dollar value of the refund determined under paragraph (c) of this section by using the exchange rate that was used to translate such amount into dollars when claimed as a credit or added to PTEP group taxes.

(2) *Nonfunctional currency tax liability and non-dollar functional currency.* If the functional currency of the QBU receiving the refund is not the dollar and is different from the currency in which the foreign income taxes were paid, then the recipient's basis in the refunded foreign currency is equal to the

§ 1.986(c)-1

26 CFR Ch. I (4-1-23 Edition)

functional currency value of the non-functional currency refund, translated into functional currency at the appropriate exchange rate between the functional currency and the nonfunctional currency. Such exchange rate is determined under the principles of paragraph (c) of this section, substituting the words “functional currency” for the word “dollar” and using the exchange rate that was used to translate such amount into the QBU’s functional currency when claimed as a credit or added to PTEP group taxes (as defined in § 1.960-3(d)(1)). If a QBU receives a refund of nonfunctional currency tax that is denominated in a currency that was the functional currency of the QBU when the refunded tax was claimed as a credit or added to PTEP group taxes, the QBU’s basis in the nonfunctional currency received in the refund is determined by using the exchange rate used under § 1.985-5(c) when the QBU’s functional currency changed. See § 1.905-3(b)(1)(ii)(C) (*Example 3*).

(3) *Functional currency tax liabilities.* If the functional currency of the QBU receiving the refund is the currency in which the refund was made, then the recipient’s basis in the currency received is the amount of the functional currency received. If the QBU receives a refund of functional currency tax that was denominated in a nonfunctional currency of the QBU when the tax was claimed as a credit or added to PTEP group taxes, the QBU will recognize the section 988 gain or loss that would have been recognized under § 1.985-5(b) if the refund had been received immediately before the QBU’s functional currency changed.

(4) *Foreign currency gain or loss.* For rules for determining subsequent foreign currency gain or loss on the disposition of nonfunctional currency, the basis of which is determined under this paragraph (e), see section 988(c)(1)(C).

(f) *Applicability dates.* This section applies to taxable years ending on or after December 16, 2019, and to taxable years of foreign corporations which end with or within a taxable year of a United States shareholder ending on or after December 16, 2019.

[T.D. 9882, 84 FR 69120, Dec. 17, 2019]

§ 1.986(c)-1 Coordination with section 965.

(a) *Amount of foreign currency gain or loss.* Foreign currency gain or loss with respect to distributions of section 965(a) previously taxed earnings and profits (as defined in § 1.965-1(f)(39)) is determined based on movements in the exchange rate between December 31, 2017, and the time such distributions are made.

(b) *Section 965(a) previously taxed earnings and profits.* Any gain or loss recognized under section 986(c) with respect to distributions of section 965(a) previously taxed earnings and profits is reduced in the same proportion as the reduction by a section 965(c) deduction amount (as defined in § 1.965-1(f)(42)) of the section 965(a) inclusion amount (as defined in § 1.965-1(f)(38)) that gave rise to such section 965(a) previously taxed earnings and profits.

(c) *Section 965(b) previously taxed earnings and profits.* Section 986(c) does not apply with respect to distributions of section 965(b) previously taxed earnings and profits (as defined in § 1.965-1(f)(40)).

(d) *Applicability dates.* The section applies beginning the last taxable year of a foreign corporation that begins before January 1, 2018, and with respect to a United States person, for the taxable year in which or with which such taxable year of the foreign corporation ends.

[T.D. 9846, 84 FR 1915, Feb. 5, 2019]

§ 1.987-0 Section 987; table of contents.

This section lists captioned paragraphs contained in §§ 1.987-1 through 1.987-11.

§ 1.987-1 Scope, definitions and special rules.

- (a) In general.
- (b) Scope of section 987 and definitions.
 - (1) Taxpayers subject to section 987.
 - (2) Definition of section 987 QBU.
 - (3) Definition of an eligible QBU.
 - (4) Definition of owner.
 - (5) Section 987 aggregate partnership.
 - (6) [Reserved]
 - (7) Examples illustrating paragraph (b) of this section.
- (c) Exchange rates.
 - (1) Spot rate.
 - (2) Yearly average exchange rate.
 - (3) Historic rate.
 - (d) Marked item.

- (e) Historic item.
- (f) [Reserved]
- (g) Elections.
- (1) In general.
- (2) Exceptions to the general rules.
- (3) Manner of making elections.
- (4) No change in method of accounting.
- (5) Revocation of an election.

§ 1.987-2 Attribution of items to eligible QBUs; definition of a transfer and related rules.

- (a) Scope and general principles.
- (b) Attribution of items to an eligible QBU.
 - (1) General rules.
 - (2) Exceptions for non-portfolio stock, interests in partnerships, and certain acquisition indebtedness.
 - (3) Adjustments to items reflected on the books and records.
 - (4) Assets and liabilities of a section 987 aggregate partnership or DE that are not attributed to an eligible QBU.
 - (c) Transfers to and from section 987 QBUs.
 - (1) In general.
 - (2) Disregarded transactions.
 - (3) Transfers of assets to and from section 987 QBUs owned through section 987 aggregate partnerships.
 - (4) Transfers of liabilities to and from section 987 QBUs owned through section 987 aggregate partnerships.
 - (5) Acquisitions and dispositions of interests in DEs and section 987 aggregate partnerships.
 - (6) Changes in form of ownership.
 - (7) Application of general tax law principles.
 - (8) Interaction with § 1.988-1(a)(10).
 - (9) Certain disregarded transactions not treated as transfers.
 - (10) Examples.
 - (d) Translation of items transferred to a section 987 QBU.
 - (1) Marked items.
 - (2) Historic items.
 - (e) Effective/applicability date.
 - (1) In general.
 - (2) Certain disregarded transactions not treated as transfers.

§ 1.987-3 Determination of section 987 taxable income or loss of an owner of a section 987 QBU.

- (a) In general.
- (b) Determination of each item of income, gain, deduction, or loss in the section 987 QBU's functional currency.
 - (1) In general.
 - (2) Translation of items of income, gain, deduction, or loss that are denominated in a nonfunctional currency.
 - (3) Determination in the case of a section 987 QBU owned through a section 987 aggregate partnership.
 - (4) [Reserved]
 - (c) Translation of items of income, gain, deduction, or loss of a section 987 QBU into the owner's functional currency.

- (1) In general.
- (2) Exceptions.
- (3) Adjustments to COGS required under the simplified inventory method.
- (d) [Reserved]
- (e) Examples.

§ 1.987-4 Determination of net unrecognized section 987 gain or loss of a section 987 QBU.

- (a) In general.
- (b) Calculation of net unrecognized section 987 gain or loss.
 - (c) Net accumulated unrecognized section 987 gain or loss for all prior taxable years.
 - (1) In general.
 - (2) Coordination with § 1.987-12.
 - (d) Calculation of unrecognized section 987 gain or loss for a taxable year.
 - (1) Step 1: Determine the change in the owner functional currency net value of the section 987 QBU for the taxable year.
 - (2) Step 2: Increase the amount determined in step 1 by the amount of assets transferred from the section 987 QBU to the owner.
 - (3) Step 3: Decrease the amount determined in steps 1 and 2 by the amount of assets transferred from the owner to the section 987 QBU.
 - (4) Step 4: Decrease the amount determined in steps 1 through 3 by the amount of liabilities transferred from the section 987 QBU to the owner.
 - (5) Step 5: Increase the amount determined in steps 1 through 4 by the amount of liabilities transferred from the owner to the section 987 QBU.
 - (6) Step 6: Decrease or increase the amount determined in steps 1 through 5 by the section 987 taxable income or loss, respectively, of the section 987 QBU for the taxable year.
 - (7) Step 7: Increase the amount determined in steps 1 through 6 by any expenses that are not deductible in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year.
 - (8) Step 8: Decrease the amount determined in steps 1 through 7 by the amount of any tax-exempt income.
 - (e) Determination of the owner functional currency net value of a section 987 QBU.
 - (1) In general.
 - (2) Translation of balance sheet items into the owner's functional currency.
 - (f) Combinations and separations.
 - (1) Combinations.
 - (2) Separations.
 - (3) Examples.
 - (g) Examples.
 - (h) Effective/applicability date.
 - (1) In general.
 - (2) Combinations and separations.

§ 1.987-5 Recognition of section 987 gain or loss.

- (a) Recognition of section 987 gain or loss by the owner of a section 987 QBU.

§ 1.987-0

26 CFR Ch. I (4-1-23 Edition)

- (b) Remittance proportion.
- (c) Remittance.
- (1) Definition.
- (2) Day when a remittance is determined.
- (3) Termination.
- (d) Aggregate of all amounts transferred from the section 987 QBU to the owner for the taxable year.
- (e) Aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year.
- (f) Determination of owner's adjusted basis in transferred assets.
 - (1) In general.
 - (2) Marked asset.
 - (3) Historic asset.
 - (g) Example.

§ 1.987-6 Character and source of section 987 gain or loss.

- (a) Ordinary income or loss.
- (b) Character and source of section 987 gain or loss.
 - (1) In general.
 - (2) Method required to characterize and source section 987 gain or loss.
 - (3) Coordination with section 954.
 - (4) [Reserved]
 - (c) Examples.

§ 1.987-7 Section 987 aggregate partnerships.

- (a) In general.
- (b) [Reserved]
- (c) Coordination with subchapter K.

§ 1.987-8 Termination of a section 987 QBU.

- (a) Scope.
- (b) In general.
 - (1) Trade or business ceases.
 - (2) Substantially all assets transferred.
 - (3) Owner no longer a CFC.
 - (4) Owner ceases to exist.
- (c) Transactions described in section 381(a).
 - (1) Liquidations.
 - (2) Reorganizations.
 - (d) [Reserved]
 - (e) Effect of terminations.
 - (f) Examples.

§ 1.987-9 Recordkeeping requirements.

- (a) In general.
- (b) Supplemental information.
- (c) Retention of records.
- (d) Information on a dedicated section 987 form.

§ 1.987-10 Transition rules.

- (a) Scope.
 - (b) Fresh start transition method.
 - (1) In general.
 - (2) Application of § 1.987-4.
 - (3) Determination of historic rate.
 - (4) Example.
 - (c) Transition of section 987 QBUs that applied the method set forth in the 2006 proposed section 987 regulations.

- (1) In general.
- (2) Application of § 1.987-4.
- (3) Use of prior historic rate.
- (4) Example.
- (d) Adjustments to avoid double counting.
- (e) Reporting.
 - (1) In general.
 - (2) Attachments not required where information is reported on a form.

§ 1.987-11 Effective/applicability date.

- (a) In general.
- (b) Application of these regulations to taxable years beginning after December 7, 2016.
- (c) Transition date.

§ 1.987-12 Deferral of section 987 gain or loss.

- (a) In general.
 - (1) Overview.
 - (2) Scope.
 - (3) Exceptions.
 - (b) Gain and loss recognition in connection with a deferral event.
 - (1) In general.
 - (2) Deferral event.
 - (3) Gain or loss recognized under § 1.987-5 in the taxable year of a deferral event.
 - (4) Successor QBU.
 - (c) Recognition of deferred section 987 gain or loss in the taxable year of a deferral event and in subsequent taxable years.
 - (1) In general.
 - (2) Recognition upon a subsequent remittance.
 - (3) Recognition of deferred section 987 loss in certain outbound successor QBU terminations.
 - (4) Special rules regarding successor QBUs.
 - (d) Loss recognition upon an outbound loss event.
 - (1) In general.
 - (2) Outbound loss event.
 - (3) Loss recognized upon an outbound loss event.
 - (4) Adjustment of basis of stock received in certain nonrecognition transactions.
 - (5) Recognition of outbound section 987 loss that is not converted into stock basis.
 - (e) Source and character.
 - (1) Deferred section 987 gain or loss and certain outbound section 987 loss.
 - (2) Outbound section 987 loss reflected in stock basis.
 - (f) Definitions.
 - (1) Controlled group.
 - (2) Qualified successor.
 - (g) Anti-abuse.
 - (h) Examples.
 - (i) Coordination with fresh start transition method.
 - (1) In general.
 - (2) Adjustment to deferred section 987 gain or loss.
 - (3) Adjustments in the case of an outbound loss event.
 - (j) Applicability date.

- (1) In general.
- (2) Exceptions.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88867, Dec. 8, 2016; T.D. 9857, 84 FR 20794, May 13, 2019; 84 FR 31194, July 1, 2019]

§ 1.987-1 Scope, definitions, and special rules.

(a) *In general.* These regulations under section 987 (§§ 1.987-1 through 1.987-11) provide rules for determining the taxable income or loss of a taxpayer with respect to a section 987 QBU (as defined in paragraph (b)(2) of this section). Further, these regulations provide rules for determining the timing, amount, character, and source of section 987 gain or loss recognized with respect to a section 987 QBU. This section addresses the scope of these regulations and provides certain definitions, special rules, and the procedures for making the elections provided for in the regulations. Section 1.987-2 provides rules for attributing assets and liabilities and items of income, gain, deduction, and loss to an eligible QBU. It also provides rules regarding the translation of items transferred to a section 987 QBU. Section 1.987-3 provides rules for determining and translating the taxable income or loss of a taxpayer with respect to a section 987 QBU. Section 1.987-4 provides rules for determining net unrecognized section 987 gain or loss. Section 1.987-5 provides rules regarding the recognition of section 987 gain or loss. It also provides rules for determining an owner's basis in assets transferred from a section 987 QBU. Section 1.987-6 provides rules regarding the character and source of section 987 gain or loss. Section 1.987-7 provides rules with respect to section 987 aggregate partnerships. Section 1.987-8 provides rules regarding the termination of a section 987 QBU. Section 1.987-9 provides rules regarding the recordkeeping required under section 987. Section 1.987-10 provides transition rules. Section 1.987-11 provides the effective/applicability date of these regulations.

(b) *Scope of section 987 and definitions—(1) Taxpayers subject to section 987—(i) In general.* Except as provided in paragraphs (b)(1)(ii) and (b)(6) of this section, an individual or corporation is

subject to these regulations under section 987 if such person is an owner (as defined in paragraph (b)(4) of this section) of an eligible QBU (as defined in paragraph (b)(3) of this section) that is a section 987 QBU (as defined in paragraph (b)(2) of this section).

(ii) *Inapplicability to certain entities.* Except as otherwise provided in paragraph (b)(1)(iii) of this section, these regulations under section 987 do not apply to specified entities described in this paragraph (b)(1)(ii), other than specified entities that engage in transactions primarily with related persons within the meaning of section 267(b) or section 707(b) that are not themselves specified entities. For this purpose, specified entities means banks, insurance companies, leasing companies, finance coordination centers, regulated investment companies, or real estate investment trusts. Further, except as otherwise provided in paragraph (b)(1)(iii) of this section, these regulations do not apply to trusts, estates, S corporations, and partnerships other than section 987 aggregate partnerships (as defined in paragraph (b)(5) of this section).

(iii) [Reserved] For further guidance, see § 1.987-1T(b)(1)(iii).

(2) *Definition of a section 987 QBU—(i) In general.* A section 987 QBU is an eligible QBU (as defined in paragraph (b)(3) of this section) that has a functional currency different from its direct owner. A section 987 QBU also includes the assets and liabilities of an eligible QBU that are considered under paragraph (b)(5)(ii) of this section to be a section 987 QBU of a partner in a section 987 aggregate partnership (as defined in paragraph (b)(5) of this section). A section 987 QBU will continue to be treated as a section 987 QBU of the owner until a sale or other termination of the section 987 QBU as described in § 1.987-8(b). Except as provided in paragraph (b)(2)(ii) of this section, the functional currency of an eligible QBU shall be determined under § 1.985-1.

(ii) *Section 987 QBU grouping election—(A) In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, an owner may elect to treat, solely for purposes of section 987, all section 987

QBUs with the same functional currency that it directly owns as a single section 987 QBU.

(B) *Special grouping rules for section 987 QBUs owned indirectly through a section 987 aggregate partnership.* An owner may elect to treat all section 987 QBUs with the same functional currency owned indirectly through a single section 987 aggregate partnership (as defined in paragraph (b)(5) of this section) as a single section 987 QBU. An owner may not treat section 987 QBUs as a single section 987 QBU if such QBUs are owned indirectly through different section 987 aggregate partnerships. Additionally, an owner may not treat section 987 QBUs that are owned both directly and indirectly through a section 987 aggregate partnership as a single section 987 QBU.

(3) *Definition of an eligible QBU*—(i) *In general.* Eligible QBU means a qualified business unit, as defined in § 1.989(a)-1, that is not subject to the Dollar Approximate Separate Transactions Method rules of § 1.985-3.

(ii) *Exclusion of certain entities.* A corporation, partnership, trust, estate, or entity disregarded as an entity separate from its owner for Federal income tax purposes as described in § 301.7701-2(c)(2) (hereafter referred to as a “DE”) is not an eligible QBU (even though such an entity may have activities that qualify as an eligible QBU).

(4) *Definition of owner.* For purposes of these regulations under section 987, an owner is any person having direct or indirect ownership in an eligible QBU. Only an individual or corporation may be an owner of an eligible QBU. The term *owner* for section 987 purposes does not include an eligible QBU. For example, a section 987 QBU (QBU1) is not an owner of another section 987 QBU (QBU2) even if QBU1 owns the stock of QBU2.

(i) *Direct ownership.* An individual or a corporation is a direct owner of an eligible QBU if the individual or corporation is the owner for Federal income tax purposes of the assets and liabilities of the eligible QBU.

(ii) *Indirect ownership.* An individual or corporation that is a partner in a section 987 aggregate partnership (as defined in paragraph (b)(5) of this section) and is allocated, under § 1.987-7,

all or a portion of the assets and liabilities of an eligible QBU of such partnership is an indirect owner of the eligible QBU.

(5) *Section 987 aggregate partnership*—(i) *In general.* A partnership is a section 987 aggregate partnership if:

(A) All of the interests in partnership capital and profits are owned, directly or indirectly, by persons related to each other within the meaning of sections 267(b) or 707(b). For purposes of this paragraph (b)(5), ownership of an interest in partnership capital or profits is determined in accordance with the rules for constructive ownership provided in section 267(c), other than section 267(c)(3); and

(B) The partnership has one or more eligible QBUs, at least one of which would be a section 987 QBU with respect to a partner if the partner owned the eligible QBU directly.

(ii) *Section 987 QBU of a partner.* The assets and liabilities of an eligible QBU owned through a section 987 aggregate partnership and allocated to a partner under the principles of § 1.987-7(b) are considered to be a section 987 QBU of such partner if the partner has a functional currency different from that of the eligible QBU.

(iii) *Certain unrelated partners disregarded.* In determining whether a partnership is a section 987 aggregate partnership, the interest of an unrelated partner shall be disregarded if the acquisition of such interest has as a principal purpose the avoidance of this paragraph (b)(5).

(6) [Reserved] For further guidance, see § 1.987-1T(b)(6).

(7) *Examples illustrating paragraph (b) of this section.* The following examples illustrate the principles of paragraph (b) of this section. U.S. Corp is a domestic corporation, has the U.S. dollar as its functional currency, and uses the calendar year as its taxable year. Except as otherwise provided, (i) Business A and Business B are eligible QBUs and have the euro and the Japanese yen, respectively, as their functional currencies and (ii) DE1 and DE2 are DEs, have no assets or liabilities, and conduct no activities.

Example 1. (i) *Facts.* U.S. Corp owns Business A and all of the interests in DE1. DE1 maintains a separate set of books and

records that are kept in British pounds. DE1 owns pounds and all of the stock of a foreign corporation, FC. DE1 is liable to a lender on a pound-denominated obligation that was incurred to acquire the stock of FC. The FC stock, the pounds, and the liability incurred to acquire the FC stock are recorded on DE1's separate books and records. DE1 has no other assets or liabilities and conducts no activities (other than holding the FC stock and servicing its liability).

(i) *Analysis.* (A) Pursuant to paragraph (b)(4)(i) of this section, U.S. Corp is the direct owner of Business A because it is the owner of the assets and liabilities of Business A. Because Business A is an eligible QBU with a functional currency that is different from the functional currency of its owner, U.S. Corp, Business A is a section 987 QBU (as defined in paragraph (b)(2) of this section). As a result, U.S. Corp and its section 987 QBU, Business A, are subject to section 987.

(B) Holding the stock of FC and pounds and servicing a liability does not constitute a trade or business within the meaning of §1.989(a)-1(c). Because the activities of DE1 do not constitute a trade or business within the meaning of §1.989(a)-1(c), such activities are not an eligible QBU. In addition, pursuant to paragraph (b)(3)(ii) of this section, DE1 itself is not an eligible QBU. As a result, neither DE1 nor its activities qualify as a section 987 QBU of U.S. Corp. Therefore, neither the activities of DE1 nor DE1 itself is subject to section 987. For the foreign currency treatment of payments on DE1's pound-denominated liability, see §1.988-2(b).

Example 2. (i) *Facts.* U.S. Corp owns all of the interests in DE1. DE1 owns Business A and all of the interests in DE2. The only activities of DE1 are Business A activities and holding the interests in DE2. DE2 owns Business B and Business C. For purposes of this example, Business B does not maintain books and records that are separate from its owner, DE2. Instead, the activities of Business B are reflected on the books and records of DE2, which are maintained in Japanese yen. In addition, Business C has the U.S. dollar as its functional currency, maintains books and records that are separate from the books and records of DE2, and is an eligible QBU.

(ii) *Analysis.* (A) Pursuant to paragraph (b)(3)(ii) of this section, DE1 and DE2 are not eligible QBUs. Pursuant to paragraph (b)(3)(i) of this section, the Business B and Business C activities of DE2, and the Business A activities of DE1, are eligible QBUs. Moreover, pursuant to paragraph (b)(4) of this section, DE1 is not the owner of the Business A, Business B, or Business C eligible QBUs, and DE2 is not the owner of the Business B or Business C eligible QBUs. Instead, pursuant to paragraph (b)(4)(i) of this section, U.S. Corp is the direct owner of the

Business A, Business B, and Business C eligible QBUs.

(B) Because Business A and Business B are eligible QBUs with functional currencies that are different than the functional currency of U.S. Corp, Business A and Business B are section 987 QBUs (as defined in paragraph (b)(2) of this section).

(C) The Business C eligible QBU has the same functional currency as U.S. Corp. Therefore, the Business C eligible QBU is not a section 987 QBU.

Example 3. (i) *Facts.* U.S. Corp owns all of the interests in DE1. DE1 owns Business A and Business B. For purposes of this example, assume Business B has the euro as its functional currency.

(ii) *Analysis.* (A) Pursuant to paragraph (b)(3)(ii) of this section, DE1 is not an eligible QBU. Moreover, pursuant to paragraph (b)(4) of this section, DE1 is not the owner of the Business A or Business B eligible QBUs. Instead, pursuant to paragraph (b)(4)(i) of this section, U.S. Corp is the direct owner of the Business A and Business B eligible QBUs.

(B) Business A and Business B constitute two separate eligible QBUs, each with the euro as its functional currency. Accordingly, Business A and Business B are section 987 QBUs of U.S. Corp. U.S. Corp may elect to treat Business A and Business B as a single section 987 QBU pursuant to paragraph (b)(2)(ii)(A) of this section. If such election is made, pursuant to paragraph (b)(4)(i) of this section, U.S. Corp would be the direct owner of the Business AB section 987 QBU that would include the activities of both the Business A section 987 QBU and the Business B section 987 QBU. In addition, pursuant to paragraph (b)(4) of this section, DE1 would not be treated as the owner of the Business AB section 987 QBU.

Example 4. (i) *Facts.* U.S. Corp owns all the stock of Y, a U.S. corporation that is a member of U.S. Corp's consolidated group. U.S. Corp also owns all the stock of CFC, a controlled foreign corporation (as defined in section 957(a)) of U.S. Corp with the Japanese yen as its functional currency. Y and CFC are the only partners in P, a foreign partnership. P owns DE1 and Business A. DE1 owns Business B.

(ii) *Analysis.* (A) Under paragraph (b)(5)(i) of this section, P is a section 987 aggregate partnership because Y and CFC own all the interests in partnership capital and profits, Y and CFC are related within the meaning of section 267(b), and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Pursuant to paragraph (b)(3)(ii) of this section, P and DE1 are not eligible QBUs. Moreover, pursuant to paragraph (b)(4) of this section, for purposes of section 987, neither P nor DE1 is the owner of the Business B eligible QBU, and P is not the owner of the Business A eligible QBU. Instead, pursuant to paragraph (b)(4)(ii) of this section, Y and CFC are indirect owners of

the Business A eligible QBU and the Business B eligible QBU to the extent they are allocated the assets and liabilities of such businesses under § 1.987-7.

(B) Because Business A and Business B are eligible QBUs with different functional currencies than Y, the portions of Business A and Business B allocated to Y under § 1.987-7 are section 987 QBUs of Y.

(C) Because the Business A eligible QBU has a different functional currency than CFC, the portion of Business A that is allocated to CFC under § 1.987-7 is a section 987 QBU, and CFC and its section 987 QBU are subject to section 987. Because the Business B eligible QBU has the same functional currency as CFC, the portion of Business B that is allocated to CFC under § 1.987-7 is not a section 987 QBU of CFC.

Example 5. (i) *Facts.* U.S. Corp owns all of the interests in DE1. DE1 owns Business A and all of the interests in DE2. DE2 owns Business B and all of the interests in DE3, an entity disregarded as an entity separate from its owner. DE3 owns Business C, which is an eligible QBU with the Russian ruble as its functional currency.

(ii) *Analysis.* Pursuant to paragraph (b)(3)(ii) of this section, DE1, DE2, and DE3 are not eligible QBUs, and the Business A, Business B, and Business C activities are eligible QBUs. Pursuant to paragraph (b)(4) of this section, an eligible QBU is not an owner of another eligible QBU. Accordingly, the Business A eligible QBU is not the owner of the Business B eligible QBU, and the Business B eligible QBU is not the owner of the Business C eligible QBU. Instead, pursuant to paragraph (b)(4) of this section, U.S. Corp is the direct owner of the Business A, Business B, and Business C eligible QBUs. Because each of the Business A, Business B, and Business C eligible QBUs has a different functional currency than U.S. Corp, such eligible QBUs are section 987 QBUs of U.S. Corp.

(c) *Exchange rates.* Solely for purposes of section 987, the following definitions shall apply.

(1) *Spot rate*—(i) *In general.* Except as otherwise provided in this section, the spot rate means the rate determined under the principles of § 1.988-1(d)(1), (2), and (4) on the relevant date.

(ii) *Election to use a spot rate convention*—(A) *In general—spot rate convention.* An owner may elect to use a spot rate convention that reasonably approximates the spot rate determined in paragraph (c)(1)(i) of this section in lieu of such spot rate. A spot rate convention may be determined with respect to a spot rate at the beginning of a reasonable period, the end of a reasonable period, as an average of spot

rates for a reasonable period, or by reference to spot and forward rates for a reasonable period. For this purpose, a reasonable period shall not exceed three months. For example, in lieu of the spot rate determined in paragraph (c)(1)(i) of this section, the spot rate for all transactions during a monthly period can be determined pursuant to one of the following conventions: The spot rate at the beginning of the current month or at the end of the preceding month; the monthly average of daily spot rates for the current or preceding month; or an average of the beginning and ending spot rates for the current or preceding month. Similarly, in lieu of the spot rate determined in paragraph (c)(1)(i) of this section, the spot rate can be determined pursuant to an average of the spot rate and the 30-day forward rate on a day of the preceding month. Use of a spot rate convention that is consistent with the convention used for financial accounting purposes is presumed to reasonably approximate the rate in paragraph (c)(1)(i) of this section. The Commissioner can rebut this presumption if the Commissioner determines that the use of the convention would not clearly reflect income based on the facts and circumstances available at the time of the election.

(B) [Reserved] For further guidance, see § 1.987-1T(c)(1)(ii)(B).

(iii) *Election to use spot rates in lieu of yearly average exchange rates.* A taxpayer may elect under this paragraph (c)(1)(iii) to use spot rates in lieu of yearly average exchange rates (as defined in paragraph (c)(2) of this section) for certain purposes. In particular, a taxpayer that makes this election must use the spot rate for purposes of determining the historic rate, as provided in paragraph (c)(3)(ii) of this section, and for purposes of translating items of income, gain, deduction, or loss of a section 987 QBU into the owner's functional currency, as described in § 1.987-3(c)(1). Additionally, a taxpayer that makes this election will be deemed also to elect to use the historic inventory method described in § 1.987-3(c)(2)(iv)(B).

(2) *Yearly average exchange rate.* For purposes of section 987, the yearly average exchange rate is a rate that represents an average exchange rate for

the taxable year (or, if the relevant period is less than a full taxable year, such portion of the taxable year) computed under any reasonable method. For example, an owner may determine the yearly average exchange rate based on a daily, monthly or quarterly averaging convention, whether weighted or unweighted, and may take into account forward rates for a period not to exceed three months. Use of an averaging convention that is consistent with the convention used for financial accounting purposes is presumed to be a reasonable method. The Commissioner can rebut this presumption if the Commissioner determines that the use of the convention would not have been expected to clearly reflect income based on the facts and circumstances available at the time of the election.

(3) *Historic rate*—(i) *In general*. Except as otherwise provided in these regulations, the historic rate is determined as described in paragraphs (c)(3)(i)(A) through (E) of this section.

(A) *Assets generally*. In the case of an asset other than inventory that is acquired by a section 987 QBU (including through a transfer), the historic rate is the yearly average exchange rate applicable to the year of acquisition.

(B) *Inventory under the simplified inventory method*. In the case of inventory with respect to which a taxpayer uses the simplified inventory method described in §1.987-3(c)(2)(iv)(A), the historic rate for inventory accounted for under the last-in, first-out (LIFO) method of accounting is the yearly average exchange rate applicable to the year in which the inventory's LIFO layer arose. The historic rate for all other inventory of such a taxpayer is the yearly average exchange rate for the taxable year for which the determination of the historic rate for such inventory is relevant.

(C) *Inventory under the historic inventory method*. In the case of inventory with respect to which a taxpayer has elected under §1.987-3(c)(2)(iv)(B) to use the historic inventory method, each inventoriable cost with respect to such inventory may have a different historic rate. The historic rate for each inventoriable cost is the exchange rate at which such item would be translated

under §1.987-3 if it were not an inventoriable cost.

(D) *Liabilities generally*. In the case of a liability that is incurred or assumed by a section 987 QBU, the historic rate is the yearly average exchange rate applicable to the year the liability is incurred or assumed.

(E) [Reserved] For further guidance, see §1.987-1T(c)(3)(i)(E).

(ii) *Historic rate when an election to use spot rates in lieu of yearly average exchange rates is in effect*. A taxpayer that has elected under paragraph (c)(1)(iii) of this section to use spot rates in lieu of yearly average exchange rates must determine historic rates under paragraphs (c)(3)(i)(A) and (c)(3)(i)(D) of this section using the spot rate (as defined in paragraph (c)(1) of this section) for the date an asset is acquired by a section 987 QBU or a liability is assumed or incurred by a section 987 QBU in lieu of using the yearly average exchange rate.

(iii) *Date placed in service for depreciable or amortizable property*. In the case of depreciable or amortizable property, an owner may determine the historic rate (whether a yearly average exchange rate or a spot rate, as applicable) by reference to the date such property is placed in service by the section 987 QBU rather than the date the property was acquired, provided that this convention is consistently applied for all such property attributable to that section 987 QBU.

(iv) *Changed functional currency*. In the case of a section 987 QBU or an owner of a section 987 QBU that previously changed its functional currency, §1.985-5(d)(1)(ii)(A) and §1.985-5(e)(4)(i)(A), respectively, shall be taken into account in determining the historic rate for an item reflected on the balance sheet of the section 987 QBU immediately prior to the year of change.

(d) *Marked item*. A marked item is an asset (marked asset) or liability (marked liability) that is properly reflected on the books and records of a section 987 QBU under §1.987-2(b) and that—

(1) Is denominated in, or determined by reference to, the functional currency of the section 987 QBU, is not a section 988 transaction of the section

987 QBU, and would be a section 988 transaction if such item were held or entered into directly by the owner of the section 987 QBU;

(2) Is a prepaid expense or a liability for an advance payment of unearned income, in either case having an original term of one year or less on the date the prepaid expense or liability for an advance payment of unearned income arises; or

(3) [Reserved] For further guidance, see § 1.987-1T(d)(3).

(e) *Historic item.* A historic item is an asset (historic asset) or liability (historic liability) that is properly reflected on the books and records of a section 987 QBU under § 1.987-2(b) and that is not a marked item (as defined in paragraph (d) of this section).

(f) [Reserved] For further guidance, see § 1.987-1T(f).

(g) *Elections—(1) In general.* This paragraph (g) provides rules for making elections under section 987. Except as otherwise provided in paragraph (g)(2) of this section, such elections—

(i) May be made separately for each section 987 QBU;

(ii) Are made by the owner of the section 987 QBU (as defined in paragraph (b)(4) of this section); and

(iii) Must be made for the first taxable year in which the election is relevant in determining the section 987 taxable income or loss, or section 987 gain or loss, of the section 987 QBU and in which the regulations implementing the election are applicable with respect to the section 987 QBU.

(2) *Exceptions to the general rules—(i) Consistency and timeliness requirements for certain elections.* Notwithstanding paragraph (g)(1)(i) of this section, the following consistency and timeliness requirements apply:

(A) *Section 987 grouping election.* Elections made pursuant to paragraph (b)(2)(ii) of this section (regarding the grouping of section 987 QBUs) are binding on all section 987 QBUs that are eligible to be grouped under the particular election (for example, election to group all euro QBUs owned by the same aggregate partnership), regardless of whether the section 987 QBU is established or acquired after the election is made and regardless of whether the section 987 QBU is identified on the

election as required in paragraph (g)(3)(i)(A) of this section.

(B) through (C) [Reserved] For further guidance, see § 1.987-1T(g)(2)(i)(B) through (C).

(ii) *Persons making elections for QBUs owned by foreign corporations.* Notwithstanding paragraph (g)(1)(ii) of this section, if a section 987 QBU is owned by a foreign corporation, elections shall be made in accordance with § 1.964-1(c) by the foreign corporation's controlling domestic shareholders, as defined under § 1.964-1(c)(5)(i) (dealing with controlled foreign corporations) and § 1.964-1(c)(5)(ii) (dealing with noncontrolled section 902 corporations).

(3) *Manner of making elections—(i) Election made by attaching statement to a return.* Except as provided in paragraph (g)(3)(ii) of this section, elections shall be made under section 987 for each section 987 QBU by attaching a statement with the information required in this paragraph (g)(3)(i) to the timely filed tax return of the owner or, in the case of a foreign corporation, other applicable person for the first taxable year in which the election is required to be made under paragraph (g)(1)(iii) of this section.

(A) *Section 987 grouping election.* The election provided in paragraph (b)(2)(ii) of this section must be titled “Section 987 Grouping Election Under § 1.987-1(b)(2)(ii)” and provide the following information:

(1) The name, address, and functional currency of each section 987 QBU that the taxpayer is grouping together; and

(2) The owner's name and address.

(B) *Election to use a spot rate convention.* An election under paragraph (c)(1)(ii) of this section to use a spot rate convention must be titled “Section 987 Election to Use a Spot Rate Convention Under § 1.987-1(c)(1)(ii)” and provide the following information:

(1) A description of the convention; and

(2) The name and address of each section 987 QBU for which the election is being made.

(C) *Election to use spot rates in lieu of yearly average exchange rates.* An election under paragraph (c)(1)(iii) of this section to use spot rates in lieu of yearly average exchange rates must be titled “Section 987 Election to Use

Spot Rates in Lieu of Yearly Average Exchange Rates Under §1.987-1(c)(1)(iii)” and provide the following information:

(1) A description of the convention; and

(2) The name and address of each section 987 QBU for which the election is being made.

(D) *Election to use the historic inventory method.* An election under §1.987-3(c)(2)(iv)(B) to use the historic inventory method shall be titled “Section 987 Election to Use the Historic Inventory Method Under §1.987-3(c)(2)(iv)(B)” and must provide the name and address of each section 987 QBU for which the election is being made.

(E) through (H) [Reserved] For further guidance, see §1.987-1T(g)(3)(i)(E) through (H).

(ii) *Election made by filing a dedicated section 987 form.* If the Commissioner publishes a form that provides the manner in which elections are made under section 987, the form shall govern the manner in which elections are made under section 987.

(4) *No change in method of accounting.* An election under section 987 is not governed by the general rules concerning changes in methods of accounting. See also paragraph (g)(5) of this section.

(5) *Revocation of an election.* Elections under section 987 may not be revoked without the consent of the Commissioner or his delegate. The Commissioner or his delegate will consider allowing a revocation of an election if the taxpayer can demonstrate significantly changed circumstances or such other circumstances that clearly demonstrate a substantial non-tax business reason for revoking the election.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88867, Dec. 8, 2016]

§ 1.987-1T Scope, definitions, and special rules (temporary).

(a) through (b)(1)(ii) [Reserved] For further guidance, see §1.987-1(a) through (b)(1)(ii).

(iii) *Certain provisions applicable to all taxpayers.* Notwithstanding §1.987-1(b)(1)(ii), paragraphs (b)(6) and (g)(3)(i)(E) of this section and §1.987-6T(b)(4) apply to any taxpayer that is

an owner of a dollar QBU (as defined in paragraph (b)(6) of this section), and paragraphs (g)(2)(i)(B) and (g)(3)(i)(H) of this section and §§1.987-8T(d) and 1.987-12T apply to any taxpayer that is an owner of an eligible QBU (determined without regard to §1.987-1(b)(3)(ii)) that is subject to section 987.

(b)(2) through (b)(5) [Reserved] For further guidance, see §1.987-1(b)(2) through (b)(5).

(6) *Dollar QBUs—(i) In general.* Except as provided in paragraphs (b)(1)(iii) and (b)(6)(iii) of this section, section 987 and the regulations thereunder do not apply with respect to an eligible QBU (determined without regard to §1.987-1(b)(3)(ii)) that has the U.S. dollar as its functional currency and that would be subject to section 987 if it had a functional currency other than the dollar (dollar QBU). This paragraph (b)(6) applies to all taxpayers, including entities described in §1.987-1(b)(1)(ii).

(ii) *Application of section 988 to a dollar QBU—(A) In general.* Except as provided in paragraphs (b)(6)(ii)(B) and (b)(6)(iii) of this section, a controlled foreign corporation (as defined in section 957(a)) (CFC) that is the owner of a dollar QBU applies section 988 with respect to any item that is properly reflected on the books and records of the dollar QBU and that would give rise to a section 988 transaction if such item were acquired, accrued, or entered into directly by the owner of the dollar QBU. Except as provided in paragraph (b)(6)(ii)(B) of this section, for purposes of determining the amount of section 988 gain or loss of the CFC, any item that is properly reflected on the books and records of the dollar QBU and that would give rise to a section 988 transaction if such item were acquired, accrued, or entered into directly by the owner of the dollar QBU is treated as properly reflected on the books and records of the owner of the dollar QBU, such that the amount of section 988 gain or loss with respect to such item is determined by reference to the owner's functional currency.

(B) *Section 988 gain or loss characterized as effectively connected income.* Solely for the purpose of determining the amount of section 988 gain or loss of a CFC described in paragraph

(b)(6)(ii)(A) of this section that is effectively connected with the conduct of a trade or business within the United States (ECI), any section 988 gain or loss that would be determined under section 988 as a result of the acquisition or accrual of any item and treated as ECI under §1.988-4(c) if the item were treated as properly reflected on the books and records of the dollar QBU is determined by treating such item as properly reflected on the books and records of the dollar QBU. Consequently, solely for that purpose, such section 988 gain or loss is determined by reference to the U.S. dollar.

(iii) *Election for a CFC to apply section 987 to a dollar QBU—(A) In general.* A CFC that is the owner of a dollar QBU may elect to apply section 987 and the regulations thereunder with respect to the dollar QBU in lieu of applying section 988 pursuant to paragraph (b)(6)(ii) of this section. If the dollar QBU or CFC is described in §1.987-1(b)(1)(ii), however, the CFC must apply section 987 to the dollar QBU using the method it applied to the dollar QBU immediately prior to the effective date of this paragraph (b)(6) as provided in paragraph (h) of this section, provided such method was a reasonable interpretation of section 987, or, if no such method exists, a reasonable method.

(B) *Section 988 gain or loss characterized as effectively connected income.* Solely for the purpose of determining the amount of section 988 gain or loss of a dollar QBU that is the subject of an election described in paragraph (b)(6)(iii)(A) of this section that is ECI, §1.987-3T(b)(4)(i) and (ii) do not apply, and any section 988 gain or loss that would be determined under section 988 as a result of the acquisition or accrual of any item and treated as ECI under §1.988-4(c) if the item were treated as properly reflected on the books and records of the dollar QBU is determined by treating such item as properly reflected on the books and records of the dollar QBU. Consequently, solely for that purpose, such section 988 gain or loss is determined by reference to the U.S. dollar. See §1.987-6T(b)(4) for rules regarding the source of section 987 gain or loss with respect to a dollar QBU for which the CFC owner has made the election described in this paragraph.

(b)(7) through (c)(1)(ii)(A) [Reserved] For further guidance, see §1.987-1(b)(7) through (c)(1)(ii)(A).

(B) *Election inapplicable with respect to certain amounts.* Except as provided in this paragraph (c)(1)(ii)(B), the election provided in §1.987-1(c)(1)(ii)(A) does not apply for purposes of determining section 987 taxable income or loss (as defined in §1.987-3(a)) with respect to a historic item (as defined in §1.987-1(e)) if acquiring, accruing, or entering into such item gives rise to a section 988 transaction or specified owner functional currency transaction. However, the election provided in §1.987-1(c)(1)(ii)(A) does apply for purposes of determining section 987 taxable income or loss with respect to a payable or receivable described in §1.988-1(d)(3) under the circumstances described in §1.988-1(d)(3).

(c)(2) through (c)(3)(i)(D) [Reserved] For further guidance, see §1.987-1(c)(2) through (c)(3)(i)(D).

(E) *Section 988 transactions and specified owner functional currency transactions.* If acquiring, accruing, or entering into a historic item gives rise to a section 988 transaction of a section 987 QBU or a specified owner functional currency transaction described in §1.987-3T(b)(4)(ii), the historic rate is the spot rate (as defined in paragraph (c)(1) of this section) on the date such item is acquired, accrued, or entered into. For this purpose, use of a spot rate convention under §1.987-1(c)(1)(ii) is permitted only with respect to a payable or receivable described in §1.988-1(d)(3) and only to the extent provided therein.

(c)(3)(ii) through (d)(2) [Reserved] For further guidance, see §1.987-1(c)(3)(ii) through (d)(2).

(3) Gives rise to a qualified short-term section 988 transaction (as defined in §1.987-3T(b)(4)(iii)(B)) of the section 987 QBU, whether denominated in the functional currency of the owner or other nonfunctional currency with respect to the section 987 QBU, for which section 988 gain or loss is determined under §1.987-3T(b)(4)(iii)(A) in, and by reference to, the functional currency of the section 987 QBU.

(e) [Reserved] For further guidance, see §1.987-1(e).

(f) *Examples.* The following examples illustrate the application of § 1.987-1(d) and (e).

Example 1. U.S. Corp is a domestic corporation with the U.S. dollar as its functional currency and is the owner of Business A, a section 987 QBU that has the pound as its functional currency. Assume all transactions of Business A are entered into in the ordinary course of its business. U.S. Corp has not made an election under § 1.987-3T(b)(4)(iii)(C) to adopt a foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions. Items reflected on Business A's balance sheet include £10,000, \$1,000, a building with a basis of £100,000, a light general purpose truck with a basis of £30,000, a computer with a basis of £1,000, a 60-day receivable for ¥15,000, an account payable of £5,000, and a foreign currency contract within the meaning of section 1256(g)(2) that requires Business A to exchange £100 for \$125 in 90 days. Under paragraph (d) of this section, the £10,000, the £5,000 account payable and the £/\$ section 1256 foreign currency contract are marked items. The other items are historic items under this paragraph (e) of this section.

Example 2. The facts are the same as *Example 1* except that U.S. Corp has elected under § 1.987-3T(b)(4)(iii)(C) to adopt the foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions of Business A. Under paragraphs (d) and (e) of this section, the £10,000, the \$1,000, the ¥15,000 receivable, the £5,000 account payable, and the £/\$ section 1256 foreign currency contract are marked items.

(g)(1) through (g)(2)(i)(A) [Reserved] For further guidance, see § 1.987-1(g)(1) through (g)(2)(i)(A).

(B) *Annual deemed termination election—(1) In general.* Except as provided in paragraph (g)(2)(i)(B)(2) of this section, an election under § 1.987-8T(d) (annual deemed termination election) applies to all section 987 QBUs owned by the taxpayer, as well as to all section 987 QBUs owned by any person that has a relationship to the taxpayer described in section 267(b) or section 707(b) (substituting “and the profits interest” for “or the profits interest” in section 707(b)(1)(A) and substituting “and profits interests” for “or profits interests” in section 707(b)(1)(B)) on the last day of the first taxable year for which the election applies (a related person). If a taxpayer makes the election under § 1.987-8T(d), the first taxable year of a related person for which the election applies is the first

taxable year that ends with or within a taxable year of the taxpayer for which the taxpayer's election applies. An election under § 1.987-8T(d) may not be revoked.

(i) *Fresh start taxpayers.* A taxpayer to which § 1.987-10 applies that is required under § 1.987-10(a) to apply the fresh start transition method described in § 1.987-10(b) (fresh start taxpayer) may make the election under § 1.987-8T(d) only if the first taxable year for which the election would apply to the taxpayer is either the first taxable year beginning on or after the transition date (as defined in § 1.987-11(c)) in which the election is relevant or a subsequent taxable year in which the taxpayer's controlled group aggregate section 987 loss, if any, does not exceed \$5 million. For purposes of this paragraph (g)(2)(i)(B), a taxpayer's controlled group aggregate section 987 loss means the aggregate net amount of section 987 loss that would be recognized pursuant to the election by the taxpayer and all other persons to whom the taxpayer's election would apply in the first taxable year of each person for which the election would apply.

(ii) *Other taxpayers.* Other taxpayers, including taxpayers described in § 1.987-1(b)(1)(ii) and taxpayers described in § 1.987-10(c), must follow the election rules provided in paragraph (g)(2)(i)(B)(I)(i) of this section if any related party is a fresh start taxpayer. If no related party is a fresh start taxpayer, the election under § 1.987-8T(d) may be made only if the first taxable year for which the election would apply to the taxpayer is either the first taxable year beginning on or after December 7, 2016, in which the election is relevant or a subsequent taxable year in which the taxpayer's controlled group aggregate section 987 loss, if any, does not exceed \$5 million.

(2) *QBU-by-QBU elections in certain circumstances.* Notwithstanding paragraph (g)(2)(i)(B)(I) of this section, a taxpayer may make a separate election under § 1.987-8T(d) with respect to any section 987 QBU owned by the taxpayer if the first taxable year for which the election would apply to the taxpayer with respect to the section 987 QBU is a taxable year in which there is a section 987 gain recognized with respect to

the section 987 QBU pursuant to the election, or is a taxable year in which there is a section 987 loss of \$1 million or less that would be recognized with respect to the section 987 QBU pursuant to the election

(C) *Election to translate all items at the yearly average exchange rate.* An election under § 1.987-3T(d) (election to translate all items at the yearly average exchange rate) may be made with respect to a section 987 QBU only if the first taxable year for which the election would apply is the first taxable year for which an election under § 1.987-8T(d) (annual deemed termination election) applies with respect to the section 987 QBU.

(g)(2)(ii) through (g)(3)(i)(D) [Reserved] For further guidance, see § 1.987-1(g)(2)(ii) through (g)(3)(i)(D).

(E) *Election for a CFC to apply section 987 to a dollar QBU.* An election under § 1.987-1T(b)(6)(iii) for a CFC to apply section 987 to a dollar QBU must be titled “Section 987 Election for a CFC to Apply Section 987 to a Dollar QBU Under § 1.987-1T(b)(6)(iii)” and must provide the name and address of each QBU for which the election is being made.

(F) *Election to apply the foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions.* An election under § 1.987-3T(b)(4)(iii)(C) to apply the foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions must be titled “Section 987 Election to Use Foreign Currency Mark-to-Market Method of Accounting for Qualified Short-Term Section 988 Transactions Under § 1.987-3(b)T(4)(iii)(C)” and must provide the name and address of each section 987 QBU for which the election is being made.

(G) *Election to translate all items at the yearly average exchange rate.* An election under § 1.987-3T(d) to translate all items at the yearly average exchange rate must be titled “Section 987 Election to Translate All Items at the Yearly Average Exchange Rate Under § 1.987-3T(d)” and must provide the name and address of each section 987 QBU for which the election is being made.

(H) *Annual deemed termination election.* An election under § 1.987-8T(d) for an owner to deem all of its section 987 QBUs to terminate on the last day of each taxable year must be titled “Section 987 Annual Deemed Termination Election Under § 1.987-8T(d)” and must provide the name and address of each section 987 QBU to which the election applies, including a section 987 QBU owned by a related person (within the meaning of paragraph (g)(2)(i)(B)(I) of this section).

(g)(4) through (6) [Reserved] For further guidance, see § 1.987-1(g)(4) through (6).

(h) *Effective/applicability date.* Paragraphs (g)(2)(i)(B) and (g)(3)(i)(H) of this section apply to the first taxable year beginning on or after December 7, 2016. Paragraphs (b)(1)(iii), (b)(6), (c)(1)(ii)(B), (c)(3)(i)(E), (d)(3), (f), (g)(2)(i)(C), and (g)(3)(i)(E) through (G) of this section apply to taxable years beginning one year after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then paragraphs (b)(1)(iii), (b)(6), (c)(1)(ii)(B), (c)(3)(i)(E), (d)(3), (f), (g)(2)(i)(C), and (g)(3)(i)(E) through (G) of this section apply to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

(i) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88868, Dec. 8, 2016]

§ 1.987-2 Attribution of items to eligible QBUs; definition of a transfer and related rules.

(a) *Scope and general principles.* Paragraph (b) of this section provides rules for attributing assets and liabilities, and items of income, gain, deduction, and loss, to an eligible QBU. Assets and liabilities are attributed to a section 987 QBU for purposes of section 987. Items of income, gain, deduction, and loss are attributed to a section 987 QBU for purposes of computing the section 987 taxable income of the section 987 QBU and of its owner. Paragraph (c) of this section defines a transfer to or from a section 987 QBU. Paragraph (d) of this section provides translation rules for transfers to a section 987 QBU.

(b) *Attribution of items to an eligible QBU*—(1) *General rules.* Except as provided in paragraphs (b)(2) and (3) of this section, items are attributable to an eligible QBU to the extent they are reflected on the separate set of books and records, as defined in §1.989(a)-1(d), of the eligible QBU. In the case of a section 987 aggregate partnership, items reflected on the books and records of the partnership and deemed allocated to an eligible QBU of such partnership are considered to be reflected on the books and records of such eligible QBU. For purposes of this section, the term “item” refers to any asset or liability, and any item of income, gain, deduction, or loss. Items that are attributed to an eligible QBU pursuant to this section must be adjusted to conform to Federal income tax principles. Except as provided in §1.989(a)-1(d)(3), these attribution rules apply solely for purposes of section 987. For example, the allocation and apportionment of interest expense under section 864(e) is independent of the rules under section 987.

(2) *Exceptions for non-portfolio stock, interests in partnerships, and certain acquisition indebtedness.* The following items shall not be considered to be on the books and records of an eligible QBU:

(i) Stock of a corporation (whether domestic or foreign), other than stock of a corporation reflected on the books and records (within the meaning of paragraph (b)(1) of this section) of an eligible QBU if the owner of the eligible QBU owns less than 10 percent of the total value of all classes of stock of such corporation. For this purpose, section 318(a) applies in determining ownership, except that in applying section 318(a)(2)(C), the phrase “10 percent” is used instead of the phrase “50 percent.”

(ii) An interest in a partnership (whether domestic or foreign).

(iii) A liability that was incurred to acquire stock described in paragraph (b)(2)(i) of this section or that was incurred to acquire a partnership interest described in paragraph (b)(2)(ii) of this section.

(iv) Income, gain, deduction, or loss arising from the items described in paragraphs (b)(2)(i) through (iii) of this section. For example, a section 951 in-

clusion with respect to stock of a foreign corporation described in paragraph (b)(2)(i) of this section shall not be considered to be on the books and records of an eligible QBU.

(3) *Adjustments to items reflected on the books and records*—(i) *General rule.* If a principal purpose of recording (or failing to record) an item on the books and records of an eligible QBU is the avoidance of Federal income tax under, or through the use of, section 987, the item must be allocated between or among the eligible QBU, the owner of such eligible QBU, and any other persons, entities (including DEs), or other QBUs within the meaning of §1.989(a)-1(b) (including eligible QBUs) in a manner that reflects the substance of the transaction. For purposes of this paragraph (b)(3)(i), relevant factors for determining whether such Federal income tax avoidance is a principal purpose of recording (or failing to record) an item on the books and records of an eligible QBU shall include, but are not limited to, the factors set forth in paragraphs (b)(3)(ii) and (iii) of this section. The presence or absence of any factor or factors is not determinative. Moreover, the weight given to any factor (whether or not set forth in paragraphs (b)(3)(ii) and (iii) of this section) depends on the particular case.

(ii) *Factors indicating no tax avoidance.* For purposes of paragraph (b)(3)(i) of this section, factors that may indicate that recording (or failing to record) an item on the books and records of an eligible QBU did not have as a principal purpose the avoidance of Federal income tax under, or through the use of, section 987 include the recording (or not recording) of an item:

(A) For a significant and bona fide business purpose;

(B) In a manner that is consistent with the economics of the underlying transaction;

(C) In accordance with generally accepted accounting principles (or similar comprehensive accounting standard);

(D) In a manner that is consistent with the treatment of similar items from year to year;

(E) In accordance with accepted conditions or practices in the particular trade or business of the eligible QBU;

(F) In a manner that is consistent with an explanation of existing internal accounting policies that is evidenced by documentation contemporaneous with the timely filing of a Federal income tax return for the taxable year; and

(G) As a result of a transaction between legal entities (for example, the transfer of an asset or the assumption of a liability), even if such transaction is not regarded for Federal income tax purposes (for example, a transaction between a DE and its owner).

(iii) *Factors indicating tax avoidance.* For purposes of paragraph (b)(3)(i) of this section, factors that may indicate that a principal purpose of recording (or failing to record) an item on the books and records of an eligible QBU is the avoidance of Federal income tax under, or through the use of, section 987 include:

(A) The presence or absence of an item on the books and records that is the result of one or more transactions that are transitory, for example, due to a circular flow of cash or other property;

(B) The presence or absence of an item on the books and records that is the result of one or more transactions that do not have substance;

(C) The presence or absence of an item on the books and records that results in the taxpayer (or a person related to the taxpayer within the meaning of section 267(b) or section 707(b)) having offsetting positions with respect to the functional currency of a section 987 QBU; and

(D) The absence of any or all of the factors listed in paragraph (b)(3)(ii) of this section.

(4) *Assets and liabilities of a section 987 aggregate partnership or DE that are not attributed to an eligible QBU.* Neither a section 987 aggregate partnership nor a DE is an eligible QBU and, thus, neither entity can be a section 987 QBU. See § 1.987-1(b)(2) and (3). As a result, a section 987 aggregate partnership or DE may own assets and liabilities that are not attributed to an eligible QBU as provided under this paragraph (b) and, therefore, are not subject to section 987. For the foreign currency treatment of such assets or liabilities, see § 1.988-1(a)(4).

(c) *Transfers to and from section 987 QBUs*—(1) *In general.* The following rules apply for purposes of determining whether there is a transfer of an asset or a liability from an owner to a section 987 QBU, or from a section 987 QBU to an owner. These rules apply solely for purposes of section 987.

(2) *Disregarded transactions*—(i) *General rule.* An asset or liability shall be treated as transferred to a section 987 QBU from its owner (whether direct owner or indirect owner, as defined in § 1.987-1(b)(4)) if, as a result of a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section), such asset or liability is reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section. Similarly, an asset or liability shall be treated as transferred from a section 987 QBU to its owner if, as a result of a disregarded transaction, such asset or liability is no longer reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section.

(ii) *Definition of a disregarded transaction.* For purposes of this section, a disregarded transaction means a transaction that is not regarded for Federal income tax purposes (for example, any transaction between separate section 987 QBUs of the same owner). For purposes of this paragraph (c), a disregarded transaction shall be treated as including the recording of an asset or liability on the books and records of an eligible QBU (as defined in § 1.987-1(b)(3)) of an owner, if the recording is the result of such asset or liability being removed from the books and records of a separate eligible QBU of the same owner, whether such separate eligible QBU is owned directly or is owned indirectly through the same entity (including through a DE or a section 987 aggregate partnership). Additionally, if an asset or liability that is attributable to a section 987 QBU within the meaning of paragraph (b) of this section is sold or exchanged (including in a nonrecognition transaction, such as an exchange under section 351) for an asset or liability that is not attributable to the section 987 QBU immediately after the sale or exchange, the sold or exchanged asset or liability

that was attributable to the section 987 QBU immediately before the transaction shall be treated as transferred from the section 987 QBU to its direct or indirect owner in a disregarded transaction immediately before the sale or exchange for purposes of section 987 (including for purposes of recognizing section 987 gain or loss under § 1.987-5) and subsequently sold or exchanged by the owner. The preceding sentence shall not apply with respect to an acquisition or disposition of an interest in a section 987 aggregate partnership or in a DE, as described in paragraph (c)(5) of this section.

(iii) *Items derived from disregarded transactions ignored.* For purposes of section 987, disregarded transactions shall not give rise to items of income, gain, deduction, or loss that are taken into account in determining section 987 taxable income or loss under § 1.987-3.

(3) *Transfers of assets to and from section 987 QBUs owned through section 987 aggregate partnerships—(i) Contributions to section 987 aggregate partnerships.* Solely for purposes of section 987, an asset shall be treated as transferred by an indirect owner (as defined in § 1.987-1(b)(4)(ii)) to a section 987 QBU of a partner (as defined in § 1.987-1(b)(5)(ii)) to the extent the indirect owner contributes the asset to the section 987 aggregate partnership that carries on the activities of the section 987 QBU, provided that, immediately prior to the contribution, the asset is not reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section and the asset is reflected on the books and records of the section 987 QBU immediately following such contribution. For purposes of this paragraph (c)(3)(i), deemed contributions of money described under section 752 shall be disregarded. See paragraph (c)(4)(ii) of this section for rules governing the assumption by a partner of liabilities of a section 987 aggregate partnership.

(ii) *Distributions from section 987 aggregate partnerships.* Solely for purposes of section 987, an asset shall be treated as transferred from a section 987 QBU of a partner to its indirect owner to the extent the section 987 aggregate partnership that carries on the activities of the section 987 QBU distributes the

asset to the indirect owner, provided that, immediately prior to such distribution, the asset is reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section, and the asset is not reflected on the books and records of the section 987 QBU immediately after such distribution. For purposes of this paragraph (c)(3)(ii), deemed distributions of money described under section 752 shall be disregarded. See paragraph (c)(4)(i) of this section for rules governing the assumption by a section 987 aggregate partnership of liabilities of a partner.

(4) *Transfers of liabilities to and from section 987 QBUs owned through section 987 aggregate partnerships—(i) Assumptions of partner liabilities.* Solely for purposes of section 987, a liability of the owner of a section 987 aggregate partnership shall be treated as transferred to a section 987 QBU of a partner if, and to the extent, the section 987 aggregate partnership assumes such liability, provided that, immediately prior to the transfer, the liability is not reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section, and the liability is reflected on the books and records of the section 987 QBU immediately following the transfer.

(ii) *Assumptions of section 987 aggregate partnership liabilities.* Solely for purposes of section 987, a liability of a section 987 aggregate partnership shall be treated as transferred from a section 987 QBU of a partner to its indirect owner if, and to the extent, the indirect owner assumes such liability of the section 987 aggregate partnership, provided that, immediately prior to such assumption, the liability is reflected on the books and records of the section 987 QBU within the meaning of paragraph (b) of this section, and the liability is not reflected on the books and records of the section 987 QBU immediately following the transfer.

(5) *Acquisitions and dispositions of interests in DEs and section 987 aggregate partnerships.* Solely for purposes of section 987, an asset or liability shall be treated as transferred to a section 987 QBU from its owner if, as a result of an acquisition (including by contribution)

or disposition of an interest in a section 987 aggregate partnership or DE, such asset or liability is reflected on the books and records of the section 987 QBU. Similarly, an asset or liability shall be treated as transferred from a section 987 QBU to its owner if, as a result of an acquisition or disposition of an interest in a section 987 aggregate partnership or DE, the asset or liability is not reflected on the books and records of the section 987 QBU.

(6) *Changes in form of ownership.* For purposes of this paragraph (c), mere changes in the form of ownership of an eligible QBU shall not result in a transfer to or from a section 987 QBU. Instead, the determination of whether a transfer has occurred in such case shall be made under paragraph (c)(5) of this section. For example, a transaction that causes a direct owner of an eligible QBU to become an indirect owner of the eligible QBU shall not, except to the extent provided in paragraph (c)(5) of this section, result in a transfer to or from a section 987 QBU. See, for example, Rev. Rul. 99-5 (1999-1 CB 434), Rev. Rul. 99-6 (1999-1 CB 432), § 601.601(d)(2) of this chapter, and section 708 and the applicable regulations.

(7) *Application of general tax law principles.* General tax law principles, including the circular cash flow, step-transaction, economic substance, and substance-over-form doctrines, apply for purposes of determining whether there is a transfer of an asset or liability under this paragraph (c), including a transfer of an asset or liability pursuant to a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section).

(8) *Interaction with § 1.988-1(a)(10).* See § 1.988-1(a)(10) for rules regarding the treatment of an intra-taxpayer transfer of a section 988 transaction.

(9) *Certain disregarded transactions not treated as transfers—(i) Combinations of section 987 QBUs.* The combination of two or more separate section 987 QBUs (combining QBUs) that are directly owned by the same owner, or that are indirectly owned by the same partner through a single section 987 aggregate partnership, into one section 987 QBU (combined QBU) does not give rise to a transfer of any combining QBU's assets or liabilities to the owner under § 1.987-

2(c). In addition, transactions between the combining QBUs occurring in the taxable year of the combination do not result in a transfer of the combining QBUs' assets or liabilities to the owner under § 1.987-2(c). For this purpose, a combination occurs when the assets and liabilities that are properly reflected on the books and records of two or more combining QBUs begin to be properly reflected on the books and records of a combined QBU and the separate existence of the combining QBUs ceases. A combination may result from any transaction or series of transactions in which the combining QBUs become a combined QBU. For rules regarding the determination of net unrecognized section 987 gain or loss of a combined QBU, see § 1.987-4(f)(1).

(ii) *Change in functional currency from a combination.* If, following a combination of section 987 QBUs described in paragraph (c)(9)(i) of this section, the combined section 987 QBU has a different functional currency than one or more of the combining section 987 QBUs, any such combining section 987 QBU is treated as changing its functional currency and the owner of the combined section 987 QBU must comply with the regulations under section 985 regarding the change in functional currency. See §§ 1.985-1(c)(6) and 1.985-5.

(iii) *Separation of section 987 QBUs.* The separation of a section 987 QBU (separating QBU) into two or more section 987 QBUs (separated QBUs) that, after the separation, are directly owned by the same owner, or that are indirectly owned by the same partner through a single section 987 aggregate partnership, does not result in a transfer of the separating QBU's assets or liabilities to the owner under § 1.987-2(c). Additionally, transactions that occurred between the separating QBUs in the taxable year of the separation prior to the completion of the separation do not result in transfers for purposes of section 987. For this purpose, a separation occurs when the assets and liabilities that are properly reflected on the books and records of a separating QBU begin to be properly reflected on the books and records of two or more separated QBUs. A separation may result

from any transaction or series of transactions in which a separating QBU becomes two or more separated QBUs. A separation may also result when a section 987 QBU that is subject to a grouping election under §1.987-1(b)(2)(ii) changes its functional currency. For rules regarding the determination of net unrecognized section 987 gain or loss of a separated QBU, see §1.987-4(f)(2).

(10) *Examples.* The following examples illustrate the principles of this paragraph (c). For purposes of the examples, X and Y are domestic corporations, have the U.S. dollar as their functional currency, and use the calendar year as their taxable years. Furthermore, except as otherwise provided, Business A and Business B are eligible QBUs that have the euro and the Japanese yen, respectively, as their functional currencies, and DE1 and DE2 are DEs. For purposes of determining whether any of the transfers in these examples result in remittances, see §1.987-5.

Example 1. Transfer to a directly owned section 987 QBU. (i) *Facts.* X owns all of the interests in DE1. DE1 owns Business A, which is a section 987 QBU of X. X owns €100 that are not reflected on the books and records of Business A. Business A is in need of additional capital and, as a result, X lends the €100 to DE1 for use in Business A in exchange for a note.

(ii) *Analysis.* (A) The loan from X to DE1 is not regarded for Federal income tax purposes (because it is an interbranch transaction) and therefore is a disregarded transaction (as defined in paragraph (c)(2)(ii) of this section). As a result, the DE1 note held by X and the liability of DE1 under the note are not taken into account under this section.

(B) As a result of the disregarded transaction, the €100 is reflected on the books and records of Business A. Therefore, X is treated as transferring €100 to its Business A section 987 QBU for purposes of section 987. This transfer is taken into account in determining the amount of any remittance for the taxable year under §1.987-5(c). See §1.988-1(a)(10)(ii) for the application of section 988 to X as a result of the transfer of non-functional currency to its section 987 QBU.

Example 2. Transfer to a directly owned section 987 QBU. (i) *Facts.* X owns Business A and Business B, both of which are section 987 QBUs of X. X owns equipment that is used in Business A and is reflected on the books and records of Business A. Because Business A has excess manufacturing capacity and X intends to expand the manufacturing capacity

of Business B, the equipment formerly used in Business A is transferred to Business B for use by Business B. As a result of the transfer, the equipment is removed from the books and records of Business A and is recorded on the books and records of Business B.

(ii) *Analysis.* The transfer of the equipment from the books and records of Business A to the books and records of Business B is not regarded for Federal income tax purposes (because it is an interbranch transaction), and therefore it is a disregarded transaction for purposes of this paragraph (c). Therefore, for purposes of section 987, the Business A section 987 QBU is treated as transferring the equipment to X, and X is subsequently treated as transferring the equipment to the Business B section 987 QBU. These transfers are taken into account in determining the amount of any remittance for the taxable year under §1.987-5(c).

Example 3. Intracompany sale of property between two section 987 QBUs. (i) *Facts.* X owns all of the interests in DE1 and DE2. DE1 and DE2 own Business A and Business B, respectively, both of which are section 987 QBUs of X. DE1 owns equipment that is used in Business A and is reflected on the books and records of Business A. For business reasons, DE1 sells a portion of the equipment used in Business A to DE2 in exchange for a fair market value amount of Japanese yen. The yen used by DE2 to acquire the equipment was generated by Business B and was reflected on Business B's books and records. Following the sale, the yen and the equipment will be used in Business A and Business B, respectively. As a result of such sale, the equipment is removed from the books and records of Business A and is recorded on the books and records of Business B. Similarly, as a result of the sale, the yen is removed from the books and records of Business B and is recorded on the books and records of Business A.

(ii) *Analysis.* (A) The sale of equipment between DE1 and DE2 is a transaction that is not regarded for Federal income tax purposes (because it is an interbranch transaction). Therefore the transaction is a disregarded transaction for purposes of paragraph (c) of this section. As a result, the sale is not taken into account under this section and, pursuant to paragraph (c)(2)(iii) of this section, the sale does not give rise to an item of income, gain, deduction, or loss for purposes of determining section 987 taxable income or loss under §1.987-3. However, the yen and equipment exchanged by DE1 and DE2 in connection with the sale must be taken into account as a disregarded transaction under this paragraph (c).

(B) As a result of the disregarded transaction, the equipment ceases to be reflected on the books and records of Business A and becomes reflected on the books and records

of Business B. Therefore, the Business A section 987 QBU is treated as transferring the equipment to X, and X is subsequently treated as transferring such equipment to the Business B section 987 QBU.

(C) Additionally, as a result of the disregarded transaction, the yen currency ceases to be reflected on the books and records of Business B and becomes reflected on the books and records of Business A. Therefore, the Business B section 987 QBU is treated as transferring the yen to X, and X is subsequently treated as transferring such yen from X to the Business A section 987 QBU. The transfers among Business A, Business B and X are taken into account in determining the amount of any remittance for the taxable year under § 1.987-5(c).

Example 4. Sale of property by a section 987 QBU to a corporation that is a member of the consolidated group. (i) *Facts.* X owns all of the stock of Y and all of the interests in DE1. DE1 owns Business A. X and Y file a consolidated return. Business A sells property to Y for €100.

(ii) *Analysis.* The sale of property by Business A to Y is not considered a transfer of property to X (and a corresponding transfer from X to Y) under paragraph (c) of this section because the transaction is regarded for Federal income tax purposes. Rather, for purposes of section 987, the transaction is considered to occur between Business A and Y.

Example 5. Transactions of a section 987 QBU owned through an aggregate partnership. (i) *Facts.* (A) X owns all of the stock of Y and a 50 percent interest in the capital and profits of P, a partnership. Y owns the other 50 percent interest in P. P owns 100 percent of the interests in DE1 and DE2. DE1 owns Business A and DE2 owns Business B.

(B) In connection with Business A, DE1 licenses intangible property to both DE2 and X. X enters into the license agreement in a transaction other than in its capacity as a partner of P and, therefore, the license is considered as occurring between P and one who is not a partner within the meaning of section 707(a). X uses the intangible property in its own trade or business in the U.S. DE2 uses the intangible property in Business B. Pursuant to the license agreement, X and DE2 pay a €30 and a €50 royalty, respectively, to DE1.

(ii) *Analysis.* (A) Under § 1.987-1(b)(5)(i), P is a section 987 aggregate partnership because X and Y own all the interests in partnership capital and profits, X and Y are related within the meaning of section 267(b), and the requirements of § 1.987-1(b)(5)(i)(B) are satisfied. X and Y each have a 50 percent allocable share of the assets and liabilities of Business A and Business B, as determined under § 1.987-7. Under § 1.987-1(b)(5)(ii), the assets and liabilities of Business A allocated to X are a section 987 QBU of X, and the assets

and liabilities of Business A allocated to Y are a section 987 QBU of Y. Likewise, the assets and liabilities of Business B allocated to X are a section 987 QBU of X, and the assets and liabilities of Business B allocated to Y are a section 987 QBU of Y.

(B) The license from DE1 to DE2 is not regarded for Federal income tax purposes (because it is an interbranch agreement) and, as a result, royalty payments under the license are disregarded transactions. Thus, pursuant to paragraph (c)(2)(iii) of this section, DE1's receipt of the royalty pursuant to the license agreement does not give rise to an item of income, gain, deduction, or loss for purposes of determining section 987 taxable income or loss under § 1.987-3. However, the €50 that is paid from DE2 to DE1 pursuant to the license agreement must be taken into account under paragraph (c) of this section. Accordingly, €50 ceases to be reflected on the books and records of Business B and becomes reflected on the books and records of Business A. As a result, a 50 percent allocable share of the €50 royalty payment (€25) is treated as transferred from each of the Business B section 987 QBUs of X and Y, to X and Y, respectively. And subsequently, X and Y are treated as transferring their respective receipts of €25 to their respective Business A section 987 QBUs. These transfers are taken into account in determining the amount of any remittance to either of X or Y for the taxable year under § 1.987-5(c).

(C) The €30 royalty payment from X to DE1 is regarded for Federal income tax purposes (because it is a payment from a partnership to a separate entity). Accordingly, the royalty payment is not a disregarded transaction for purposes of this paragraph (c) and is therefore not treated as a transfer of an asset from an owner to a section 987 QBU. As a result, the payment is not taken into account in determining the amount of any remittance for the taxable year under § 1.987-5(c). Instead, the payment gives rise to an item of income and deduction that must be taken into account in computing section 987 taxable income or loss of Business A pursuant to § 1.987-3.

Example 6. Acquisition of an interest in a partnership. (i) *Facts.* (A) X owns all of the stock of Z, a domestic corporation with the dollar as its functional currency. X also owns all of the stock of Y and a 50 percent interest in the capital and profits of P, a partnership. Y owns the other 50 percent interest in P. P owns Business A, and P owns no other assets or liabilities other than those of Business A.

(B) Z contributes cash to P in exchange for a 20 percent interest in the capital and profits of P. The cash Z contributes to P is used in Business A and is reflected on Business A's books and records.

(ii) *Analysis.* (A) Under § 1.987-1(b)(5)(i), P is a section 987 aggregate partnership because

X and Y own all the interests in partnership capital and profits, X and Y are related within the meaning of section 267(b), and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Prior to the contribution to P by Z, X and Y each have a 50 percent allocable share of the assets and liabilities of Business A, as determined under §1.987-7. Under §1.987-1(b)(5)(ii), the assets and liabilities of Business A allocated to X are a section 987 QBU of X, and the assets and liabilities of Business A allocated to Y are a section 987 QBU of Y.

(B) Following Z's acquisition of a 20 percent interest in P, P remains a section 987 aggregate partnership because X, Y and Z own all the interests in partnership capital and profits; X, Y, and Z are related within the meaning of section 267(b); and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Z acquires a 20 percent allocable share of the assets and liabilities of Business A, as determined under §1.987-7. Under §1.987-1(b)(5)(ii), the assets and liabilities of Business A allocated to Z are a section 987 QBU of Z (because Z becomes an indirect owner of Business A and Z and Business A have different functional currencies).

(C) As a result of Z's contribution of cash to Business A, through its contribution to P, each of X, Y, and Z are allocated a share of that Business A asset. Accordingly, under §1.987-2(c)(5), Z is treated as contributing its allocable share of the cash to its Business A section 987 QBU. In addition, Z is treated as transferring X's and Y's respective allocable shares of the cash to X and Y, and X and Y are subsequently treated as transferring that cash to their respective Business A section 987 QBUs.

(D) In addition, as a result of Z's acquisition of its interest in P and Z's consequent acquisition of a Business A section 987 QBU, Z's allocable portion of the assets and liabilities of Business A (other than the cash) cease being reflected on the books and records of the respective Business A section 987 QBUs of each of X and Y. Those allocable portions of assets and liabilities from the Business A section 987 QBUs of X and Y are treated as if they are transferred from such section 987 QBUs to their respective owners, X and Y. These assets and liabilities are consequently recorded on the books and records of Z's Business A section 987 QBU. Accordingly, X and Y are treated as transferring those assets and liabilities to Z, and Z is treated as contributing those assets and liabilities to its new Business A section 987 QBU.

Example 7. Acquisition of an interest in a partnership. (i) *Facts.* The facts are the same as in *Example 6*, except that the cash that Z contributes to P in exchange for a 20 percent interest in P is not used in Business A and is not reflected on Business A's books and

records. Instead, the cash is reflected on P's books and records.

(ii) *Analysis.* (A) Following Z's acquisition of a 20 percent interest in P, P remains a section 987 aggregate partnership because X, Y and Z own all the interests in partnership capital and profits; X, Y, and Z are related within the meaning of section 267(b); and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Z acquires a 20 percent allocable share of the assets and liabilities of Business A, as determined under §1.987-7. Under §1.987-1(b)(5)(ii), the assets and liabilities of Business A allocated to Z are a section 987 QBU of Z (because Z becomes an indirect owner of Business A and Z and Business A have different functional currencies).

(B) As a result of Z's acquisition of its interest in P and Z's consequent acquisition of a Business A section 987 QBU, Z's allocable portion of the assets and liabilities of Business A cease being reflected on the books and records of the respective Business A section 987 QBUs of each of X and Y. Those allocable portions of assets and liabilities from the Business A section 987 QBUs of X and Y are treated as if they are transferred from such section 987 QBUs to their respective owners, X and Y. These assets and liabilities are consequently recorded on the books and records of Z's Business A section 987 QBU. Accordingly, X and Y are treated as transferring those assets and liabilities to Z, and Z is treated as contributing those assets and liabilities to its new Business A section 987 QBU.

Example 8. Conversion of a DE to a partnership through a sale of an interest. (i) *Facts.* X owns all of the stock of Y and all of the interests in DE1. DE1 owns Business A. Y acquires 50 percent of the DE1 interests from X for cash.

(ii) *Analysis.* (A) DE1 is converted to a partnership when Y purchases the 50 percent interest in DE1. For Federal income tax purposes, Y's purchase of 50 percent of X's interest in DE1 is treated as the direct purchase of 50 percent of the assets of Business A because DE1 is disregarded and Business A is treated as held directly by X. Immediately after the sale of 50 percent of Business A to Y, X and Y are treated as contributing their respective interests in the assets of Business A to a partnership. See Rev. Rul. 99-5 (1999-1 CB 434) (situation 1) and §601.601(d)(2) of this chapter.

(B) For purposes of this paragraph (c), these deemed transactions are disregarded transactions. Under §1.987-1(b)(5)(i), the newly formed partnership is a section 987 aggregate partnership because X and Y own all the interests in partnership capital and profits, X and Y are related within the meaning of section 267(b), and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Because Y is a partner in a section 987 aggregate partnership that owns Business A and because Y and

Business A have different functional currencies, Y's portion of the Business A assets and liabilities constitutes a section 987 QBU of Y.

(C) As a result of the conversion of DE1 to a partnership, Y acquires an allocable share of 50 percent of the assets and liabilities of Business A, as determined under § 1.987-7. Accordingly, 50 percent of the assets and liabilities of Business A cease being reflected on the books and records of X's section 987 QBU. Under § 1.987-2(b)(5), these amounts are treated as if they are transferred from X's section 987 QBU to X, and X is treated as transferring these assets and liabilities to Y. Accordingly, the assets and liabilities of Business A allocated to Y are treated as transferred by Y to Y's newly formed Business A section 987 QBU.

Example 9. Conversion of a DE to a partnership through a contribution. (i) *Facts.* X owns all of the stock of Y and all of the interests in DE1. DE1 owns Business A. Y contributes property (that is not then attributed to a section 987 QBU of Y) to DE1 in exchange for an interest in DE1. The property transferred by Y to DE1 is used in Business A and is reflected on the books and records of Business A.

(ii) *Analysis.* (A) DE1 is converted to a partnership when Y contributes property to DE1 in exchange for a 50 percent interest in DE1. For Federal income tax purposes, Y's contribution is treated as a contribution to a partnership in exchange for an ownership interest in the partnership. X is treated as contributing all of Business A to the partnership in exchange for a partnership interest. See Rev. Rul. 99-5 (situation 2), (1999-1 CB 434) and § 601.601(d)(2) of this chapter.

(B) For purposes of this paragraph (c), these deemed transactions are disregarded transactions. Under § 1.987-1(b)(5)(i), the newly formed partnership is a section 987 aggregate partnership because X and Y own all the interests in partnership capital and profits, X and Y are related within the meaning of section 267(b), and the requirements of § 1.987-1(b)(5)(i)(B) are satisfied. Because Y is a partner in a section 987 aggregate partnership that owns Business A and because Y and Business A have different functional currencies, Y's portion of the Business A assets and liabilities constitutes a section 987 QBU of Y.

(C) As a result of the conversion of DE1 to a partnership, Y acquires an allocable share of 50 percent of the assets and liabilities of Business A, as determined under § 1.987-7. Accordingly, under § 1.987-2(c)(5), Y is treated as contributing its allocable share of its contributed property to its Business A section 987 QBU. In addition, Y is treated as transferring X's allocable share of the contributed property to X, and X is subsequently treated as transferring that property to its Business A section 987 QBUs. In addition, Y's allocable

share of the original (pre-conversion) assets and liabilities of Business A cease being reflected on the books and records of X's section 987 QBU. Under § 1.987-2(b)(5), these amounts are treated as if they are transferred from X's section 987 QBU to X, and X is treated as transferring these assets and liabilities to Y. Y is subsequently treated as transferring these assets and liabilities to Y's Business A section 987 QBU.

Example 10. Contribution of assets to a corporation. (i) *Facts.* X owns Business A. X forms Z, a domestic corporation, contributing 50 percent of its Business A assets and liabilities to Z in exchange for all of the stock of Z. X and Z do not file a consolidated tax return.

(ii) *Analysis.* Pursuant to paragraph (b)(2) of this section, the Z stock received in exchange for 50 percent of Business A's assets and liabilities is not reflected on the books and records of, and therefore is not attributable to, Business A for purposes of section 987 immediately after the exchange. As a result, pursuant to paragraph (c)(2)(i) and (ii) of this section, 50 percent of the assets and liabilities of Business A are treated as transferred from Business A to X in a disregarded transaction immediately before the exchange. The result would be the same even if X and Z filed a consolidated return.

Example 11. Circular transfers. (i) *Facts.* X owns Business A. On December 30, 2021, Business A purports to transfer €100 to X. On January 2, 2022, X purports to transfer €50 to Business A. On January 4, 2022, X purports to transfer another €50 to Business A. As of the end of 2021, X has an unrecognized section 987 loss with respect to Business A, such that a remittance, if respected, would result in recognition of a foreign currency loss under section 987.

(ii) *Analysis.* Because the transfer by Business A to X is offset by the transfers from X to Business A that occurred in close temporal proximity, the Internal Revenue Service (IRS) may disregard the purported transfers to and from Business A for purposes of section 987 pursuant to general tax principles under paragraph (c)(7) of this section.

Example 12. Transfers without substance. (i) *Facts.* X owns Business A and Business B. On January 1, 2021, Business A purports to transfer €100 to X. On January 4, 2021, X purports to transfer €100 to Business B. The account in which Business B deposited the €100 is used to pay the operating expenses and other costs of Business A. As of the end of 2021, X has an unrecognized section 987 loss with respect to Business A, such that a remittance, if respected, would result in recognition of a foreign currency loss under section 987.

(ii) *Analysis.* Because Business A continues to have use of the transferred property, the

IRS may disregard the €100 purported transfer from Business A to X for purposes of section 987 pursuant to general tax principles under paragraph (c)(7) of this section.

Example 13. Offsetting positions in section 987 QBUs. (i) *Facts.* X owns Business A and Business B. Each of Business A and Business B has the euro as its functional currency. X has not made a grouping election under § 1.987-1(b)(2)(ii). On January 1, 2021, X borrows €1,000 from a third party lender, records the liability with respect to the borrowing on the books and records of Business A, and records the borrowed €1,000 on the books and records of Business B. On December 31, 2022, when Business A has \$100 of net unrecognized section 987 loss and Business B has \$100 of net unrecognized section 987 gain resulting from the change in exchange rates with respect to the liability and the €1,000, X terminates the Business A section 987 QBU.

(ii) *Analysis.* Because Business A and Business B have offsetting positions in the euro, the IRS will scrutinize the transaction under paragraph (b)(3) of this section to determine if a principal purpose of recording the euro-denominated liability on the books and records of Business A and the borrowed euros on the books and records of Business B was the avoidance of tax under section 987. If such a principal purpose is present, the IRS may reallocate the items (that is, the euros and the euro-denominated liability) between Business A, Business B, and X, under paragraph (c)(7) of this section to reflect the substance of the transaction.

Example 14. Offsetting positions with respect to a section 987 QBU and a section 988 transaction. (i) *Facts.* X owns all of the interests in DE1, and DE1 owns Business A. On January 1, 2021, X borrows €1,000 from a third party lender and records the liability with respect to the borrowing on its books and records. X contributes the €1,000 loan proceeds to DE1 and the €1,000 are reflected on the books and records of Business A. On December 31, 2022, when Business A has \$100 of net unrecognized section 987 loss resulting from the change in exchange rates with respect to the €1,000 received from the borrowing, and when the euro-denominated borrowing, if repaid, would result in \$100 of gain under section 988, X terminates the Business A section 987 QBU.

(ii) *Analysis.* Because X and Business A have offsetting positions in the euro, the IRS will scrutinize the transaction under paragraph (b)(3) of this section to determine whether a principal purpose of recording the borrowed euros on the books and records of Business A, or not recording the corresponding euro-denominated liability on the books and records of Business A, was the avoidance of tax under section 987. If such a principal purpose is present, the Commissioner may reallocate the items (that is, the euros and the euro-denominated liability)

between Business A and X under paragraph (c)(7) of this section to reflect the substance of the transaction.

Example 15. Offsetting positions with respect to a section 987 QBU and a section 988 transaction. (i) *Facts.* X owns all of the stock of Y and all of the interests in DE1. DE1 owns Business A. X and Y file a consolidated return. On January 1, 2021, DE1 lends €1,000 to Y. X records the receivable with respect to the loan on Business A's books and records. On December 31, 2022, when Business A has \$100 of net unrecognized section 987 gain resulting from the loan, Y repays the €1,000 liability. The repayment of the euro-denominated borrowing results in \$100 of loss to Y under section 988. X claims a \$100 loss on its consolidated return under section 988. Business A does not make any remittances to X in 2022, so the offsetting gain with respect to the loan receivable has not been recognized by X.

(ii) *Analysis.* Y, a related party to X, and Business A have offsetting positions in the euro. The IRS will scrutinize the transaction under paragraph (b)(3) of this section to determine whether a principal purpose of recording the euro-denominated receivable on the books and records of Business A, rather than on the books and records of X, was to avoid tax through the use of section 987. If such a principal purpose is present, the IRS may reallocate the euro-denominated receivable between Business A and X under paragraph (c)(7) of this section to reflect the substance of the transaction. Other provisions may also apply to defer or disallow the loss.

Example 16. Loan by section 987 QBU followed by immediate distribution to owner. (i) *Facts.* X owns all of the interests in DE1. DE1 owns Business A. On January 1, 2021, Business A borrows €1,000 from a bank. On January 2, 2021, Business A distributes the €1,000 it received from the bank to X. There are no other transfers between X and Business A during the year. At the end of the year, X has net unrecognized section 987 loss with respect to Business A such that a remittance would result in the recognition of foreign currency loss under section 987.

(ii) *Analysis.* Because the proceeds from the loan to Business A are immediately transferred to X and the distribution from Business A to X could result in the recognition of section 987 loss, the IRS may scrutinize the recording of the loan on the books of Business A and move the loan onto the books of X, resulting in the transfer not being taken into account for purposes of section 987 under paragraph (b)(3) of this section.

Example 17. Payment of interest by section 987 QBU on obligation of owner. (i) *Facts.* X owns all of the interests in DE1. DE1 owns Business A. On January 1, X borrows €1,000 from a bank. On July 1, Business A pays €20 in interest on X's €1,000 obligation to the bank.

(ii) *Analysis.* Under general tax law principles as provided in paragraph (c)(7) of this section, on July 1, 2021, Business A is treated for purposes of section 987 as making a transfer of €20 to X, and X is treated as making a €20 interest payment to the bank.

(d) *Translation of items transferred to a section 987 QBU—(1) Marked items.* The adjusted basis of a marked asset, or the amount of a marked liability, transferred to a section 987 QBU shall be translated into the section 987 QBU's functional currency at the spot rate (as defined in §1.987-1(c)(1)) applicable to the date of transfer. If the asset or liability transferred is denominated in (or determined by reference to) the functional currency of the section 987 QBU (for example, cash or a note denominated in the functional currency of the section 987 QBU), no translation is required. See §1.988-1(a)(10)(ii) for special rules regarding intra-taxpayer transfers.

(2) *Historic items.* The adjusted basis of a historic asset, or the amount of a historic liability, transferred to a section 987 QBU shall be translated into the section 987 QBU's functional currency at the rate provided in §1.987-1(c)(3).

(e) *Effective/applicability date—(1) In general.* Except as set forth in paragraph (e)(2) of this section, this section is applicable as specified in §1.987-11.

(2) *Certain disregarded transactions not treated as transfers.* Paragraph (c)(9) of this section applies to taxable years beginning on or after the day that is three years after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under §1.987-11(b), then paragraph (c)(9) of this section applies to taxable years to which §§1.987-1 through 1.987-10 apply as a result of such election.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88870, Dec. 8, 2016; T.D. 9857, 84 FR 20795, May 13, 2019; 84 FR 31194, July 1, 2019]

§ 1.987-3 Determination of section 987 taxable income or loss of an owner of a section 987 QBU.

(a) *In general.* This section provides rules for determining the taxable income or loss, or the earnings and profits, of an owner of a section 987 QBU

(hereafter, section 987 taxable income or loss). Paragraph (b) of this section provides rules for determining items of income, gain, deduction, and loss, which generally must be determined in the section 987 QBU's functional currency. Paragraph (c) of this section provides rules for translating each item determined under paragraph (b) of this section into the functional currency of the owner of the section 987 QBU, if necessary. Paragraph (e) of this section provides examples illustrating the application of the rules of this section.

(b) *Determination of each item of income, gain, deduction, or loss in the section 987 QBU's functional currency—(1) In general.* Except as otherwise provided in this section, a section 987 QBU shall determine each item of income, gain, deduction, or loss of such section 987 QBU in its functional currency under Federal income tax principles.

(2) *Translation of items of income, gain, deduction, or loss that are denominated in a nonfunctional currency—(i) In general.* Except as otherwise provided in paragraphs (b)(2)(ii) and (b)(4) of this section, an item of income, gain, deduction, or loss that is denominated in (or determined by reference to) a nonfunctional currency (including the functional currency of the owner) shall be translated into the section 987 QBU's functional currency at the spot rate (as defined in §1.987-1(c)(1)) on the date such item is properly taken into account, subject to the limitation under §1.987-1(c)(1)(ii)(B) regarding the use of a spot rate convention. Examples 1, 2 and 6 of paragraph (e) of this section illustrate the application of this paragraph (b)(2)(i).

(ii) [Reserved] For further guidance, see §1.987-3T(b)(2)(ii).

(3) *Determination in the case of a section 987 QBU owned through a section 987 aggregate partnership—(i) In general.* Except as otherwise provided in this paragraph (b)(3), the taxable income or loss of a section 987 aggregate partnership, and the distributive share of any owner that is a partner in such partnership, shall be determined in accordance with the provisions of subchapter K of the Internal Revenue Code.

(ii) *Determination of each item of income, gain, deduction, or loss in the eligible QBU's functional currency.* A section 987 aggregate partnership generally shall determine each item of income, gain, deduction, or loss reflected on the books and records of each of its eligible QBUs under §1.987-2(b) in the functional currency of each such QBU.

(iii) *Allocation of items of income, gain, deduction, or loss of an eligible QBU.* A section 987 aggregate partnership shall allocate the items of income, gain, deduction, or loss of each eligible QBU among its partners in accordance with each partner's distributive share of such income, gain, deduction, or loss as determined under subchapter K of the Internal Revenue Code.

(iv) *Translation of items into the owner's functional currency.* To the extent the items referred to in paragraph (b)(3)(iii) of this section are allocated to a partner, the partner shall adjust the items to conform to Federal income tax principles and translate the items into the partner's functional currency as provided in paragraph (c) of this section.

(4) [Reserved] For further guidance, see §1.987-3T(b)(4).

(c) *Translation of items of income, gain, deduction, or loss of a section 987 QBU into the owner's functional currency—(1) In general.* Except as otherwise provided in this section, the exchange rate to be used by an owner in translating an item of income, gain, deduction, or loss attributable to a section 987 QBU into the owner's functional currency, if necessary, shall be the yearly average exchange rate (as defined in §1.987-1(c)(2)) for the taxable year. However, an owner of a section 987 QBU that has elected under §1.987-1(c)(1)(iii) to use spot rates in lieu of yearly average exchange rates must use the spot rate (as defined in §1.987-1(c)(1)) for the date each item is properly taken into account.

(2) *Exceptions—(i) Recovery of basis with respect to historic assets.* Except as otherwise provided in this section, the exchange rate to be used by the owner in translating any recovery of basis (whether through a sale or exchange; deemed sale or exchange; cost recovery deduction such as depreciation, depletion or amortization; or otherwise)

with respect to a historic asset (as defined in §1.987-1(e)) shall be the historic rate as determined under §1.987-1(c)(3) for the property to which such recovery of basis is attributable.

(ii) [Reserved] For further guidance, see §1.987-3T(c)(2)(ii).

(iii) *Gain or loss on the sale, exchange or other disposition of an interest in a section 987 aggregate partnership.* [Reserved]

(iv) *Cost of goods sold computation—(A) General rule—simplified inventory method.* Cost of goods sold (COGS) for a taxable year shall be translated into the functional currency of the owner at the yearly average exchange rate (as defined in §1.987-1(c)(2)) for the taxable year and adjusted as provided in paragraph (c)(3) of this section.

(B) *Election to use the historic inventory method.* In lieu of using the simplified inventory method described in paragraph (c)(2)(iv)(A) of this section, the owner of a section 987 QBU may elect under this paragraph (c)(2)(iv)(B) to translate inventoriable costs (including current-year inventoriable costs and costs that were capitalized into inventory in prior years) that are included in COGS at the historic rate as determined under §1.987-1(c)(3) for each such cost. As described in §1.987-1(c)(1)(iii), a taxpayer that elects to use spot rates in lieu of yearly average exchange rates as provided in that section will be deemed to have made the election described in this paragraph (c)(2)(iv)(B).

(v) [Reserved] For further guidance, see §1.987-3T(c)(2)(v) through (d).

(3) *Adjustments to COGS required under the simplified inventory method—(i) In general.* An owner of a section 987 QBU that uses the simplified inventory method described in paragraph (c)(2)(iv)(A) of this section must make the adjustment described in paragraph (c)(3)(ii) of this section. In addition, the owner must make the adjustment described in paragraph (c)(3)(iii) of this section with respect to any inventory for which the section 987 QBU does not use the LIFO inventory method (as described in section 472) and must make the adjustment described in paragraph (c)(3)(iv) of this section with respect to any inventory for which the section 987 QBU uses the LIFO inventory method.

An owner of a section 987 QBU that uses the simplified inventory method must make all of the applicable adjustments described in paragraphs (c)(3)(ii) through (iv) with respect to the section 987 QBU even in taxable years in which the amount of COGS is zero.

(ii) *Adjustment for cost recovery deductions included in inventoriable costs.* The translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section must be increased or decreased (as appropriate) to reflect the difference between the historic rates appropriate for translating cost recovery deductions attributable to other historic assets and the exchange rate used to translate COGS under paragraph (c)(2)(iv)(A) of this section, to the extent any such cost recovery deductions are included in inventoriable costs for the taxable year. The adjustment shall be included as an adjustment to translated COGS computed under paragraph (c)(2)(iv)(A) of this section in full in the year to which the adjustment relates and shall not be allocated between COGS and ending inventory. The adjustment for each cost recovery deduction shall be computed as the product of:

(A) The cost recovery deduction, expressed in the functional currency of the section 987 QBU; and

(B) The exchange rate specified in paragraph (c)(2)(i) of this section for translating the cost recovery deduction (that is, the historic rate for the property to which such deduction is attributable) less the exchange rate used to translate COGS under the simplified inventory method described in paragraph (c)(2)(iv)(A) of this section (that is, the yearly average exchange rate for the taxable year).

(iii) *Adjustment to beginning inventory for non-LIFO inventory.* In the case of inventory with respect to which a section 987 QBU does not use the LIFO inventory method (non-LIFO inventory), the translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section must be increased or decreased (as appropriate) by the product of:

(A) The ending non-LIFO inventory included on the closing balance sheet for the preceding year, expressed in the functional currency of the section 987 QBU; and

(B) The exchange rate described in §§ 1.987-4(e)(2)(ii) and 1.987-1(c)(3)(i)(C) that is used for translating ending inventory on the closing balance sheet for the preceding year (that is, the yearly average exchange rate for the preceding year) less the exchange rate used to translate COGS under paragraph (c)(2)(iv)(A) of this section (that is, the yearly average exchange rate for the taxable year).

(iv) *Adjustment for year of LIFO liquidation.* In the case of inventory with respect to which a section 987 QBU uses the LIFO inventory method, for each LIFO layer liquidated in whole or in part during the taxable year, the translated COGS amount computed under paragraph (c)(2)(iv)(A) of this section must be increased or decreased (as appropriate) by the product of:

(A) The amount of the LIFO layer liquidated during the taxable year, expressed in the functional currency of the section 987 QBU; and

(B) The exchange rate described in §§ 1.987-4(e)(2)(ii) and 1.987-1(c)(3)(i)(C) that is used for translating such LIFO layer (that is, the yearly average exchange rate for the year such LIFO layer arose) less the exchange rate used to translate COGS under paragraph (c)(2)(iv)(A) of this section (that is, the yearly average exchange rate for the taxable year).

(d) [Reserved] For further guidance, see § 1.987-3T(c)(2)(v) through (d).

(e) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, U.S. Corp is a domestic corporation that uses the calendar year as its taxable year and has the U.S. dollar as its functional currency. Except as otherwise indicated, U.S. Corp is the owner of Business A, a section 987 QBU with the euro as its functional currency, and elects under paragraph (c)(2)(iv)(B) of this section to use the historic inventory method with respect to Business A but does not make any other elections under section 987. However, where it is specified that U.S. Corp elects to use spot rates in lieu of yearly average exchange rates under § 1.987-1(c)(1)(iii), U.S. Corp also elects under § 1.987-1(c)(1)(ii) to use a spot rate convention. Under this convention, sales booked

Internal Revenue Service, Treasury

§ 1.987-3

during a particular month are translated at the average of the spot rates on the first and last day of the preceding month (the “convention rate”). Exchange rates used in these examples are selected for the purpose of illustrating the principles of this section. No inference (for example, whether a currency is hyperinflationary or not) is intended by their use. See §1.987-4(g) for an illustration of the simplified inventory method described in paragraphs (c)(2)(iv)(A) and (c)(3) of this section.

Example 1. Business A properly accrues £100 of income from the provision of services. Under paragraph (b)(2)(i) of this section, the £100 is translated into €90 at the spot rate (as defined in §1.987-1(c)(1)) on the date of accrual, without the use of a spot rate convention. In determining U.S. Corp’s taxable income, the €90 of income is translated into dollars at the rate provided in paragraph (c)(1) of this section.

Example 2. Business A sells a historic asset consisting of non-inventory property for £100. Under paragraph (b)(2)(i) of this section, the £100 amount realized is translated into €85 at the spot rate (as defined in §1.987-1(c)(1)) on the sale date without the use of a spot rate convention. In determining U.S. Corp’s taxable income, the €85 is translated into dollars at the rate provided in paragraph (c)(1) of this section. The euro basis of the property is translated into dollars at the rate provided in paragraph (c)(2)(i) of this section (that is, the historic rate as determined under §1.987-1(c)(3)).

Example 3. (i) Business A uses a first-in, first-out (FIFO) method of accounting for inventory. Business A sells 1,200 units of inventory in 2021 for €3 per unit. Business A’s gross sales are translated under paragraph (c)(1) of this section at the yearly average exchange rate for the year of the sale. The yearly average exchange rate is €1 = \$1.02 for 2020 and €1 = \$1.05 for 2021. Thus, Business A’s dollar gross sales will be computed as follows:

GROSS SALES
[2021]

| Month | Number of units | Amount in € | €/ \$ yearly average rate | Amount in \$ |
|-------------|-----------------|-------------|---------------------------|--------------|
| Jan | 100 | 300 | €1 = \$1.05 | 315.00 |
| Feb | 200 | 600 | €1 = \$1.05 | 630.00 |
| March | 0 | 0 | €1 = \$1.05 | 0 |
| April | 200 | 600 | €1 = \$1.05 | 630.00 |
| May | 100 | 300 | €1 = \$1.05 | 315.00 |
| June | 0 | 0 | €1 = \$1.05 | 0 |
| July | 100 | 300 | €1 = \$1.05 | 315.00 |
| Aug | 100 | 300 | €1 = \$1.05 | 315.00 |
| Sept | 0 | 0 | €1 = \$1.05 | 0 |
| Oct | 0 | 0 | €1 = \$1.05 | 0 |
| Nov | 100 | 300 | €1 = \$1.05 | 315.00 |
| Dec | 300 | 900 | €1 = \$1.05 | 945.00 |
| | 1,200 | | | 3,780.00 |

(ii) The purchase price for each inventory unit was €1.50. Under §1.987-1(c)(3)(i) and paragraph (c)(2)(iv)(B) of this section, the

basis of each item of inventory is translated into dollars at the yearly average exchange rate for the year the inventory was acquired.

OPENING INVENTORY AND PURCHASES
[2021]

| Month | Number of units | Amount in € | €/ \$ yearly average rate | Amount in \$ |
|--|-----------------|-------------|---------------------------|--------------|
| Opening inventory (purchased in December 2020) | 100 | 150 | €1 = \$1.02 | 153.00 |
| Purchases in 2021: | | | | |
| Jan | 300 | 450 | €1 = \$1.05 | 472.50 |
| Feb | 0 | 0 | €1 = \$1.05 | 0 |
| March | 0 | 0 | €1 = \$1.05 | 0 |
| April | 300 | 450 | €1 = \$1.05 | 472.50 |
| May | 0 | 0 | €1 = \$1.05 | 0 |
| June | 0 | 0 | €1 = \$1.05 | 0 |
| July | 300 | 450 | €1 = \$1.05 | 472.50 |
| Aug | 0 | 0 | €1 = \$1.05 | 0 |
| Sept | 0 | 0 | €1 = \$1.05 | 0 |

OPENING INVENTORY AND PURCHASES—Continued
[2021]

| Month | Number of units | Amount in € | €/ \$ yearly average rate | Amount in \$ |
|-----------|-----------------|-------------|---------------------------|--------------|
| Oct | 0 | 0 | €1 = \$1.05 | 0 |
| Nov | 300 | 450 | €1 = \$1.05 | 472.50 |
| Dec | 0 | 0 | €1 = \$1.05 | 0 |
| | 1,200 | | | 1,890.00 |

(iii) Because Business A uses a FIFO method for inventory, Business A is considered to have sold in 2021 the 100 units of opening inventory purchased in 2020 (\$153.00), the 300 units purchased in January 2021 (\$472.50), the 300 units purchased in April 2021 (\$472.50), the 300 units purchased in July 2021 (\$472.50), and 200 of the 300 units purchased in November 2021 (\$315.00). Accordingly, Business A's translated dollar COGS for 2021 is \$1,885.50. Business A's opening inventory for 2022 is 100 units of inventory with a translated dollar basis of \$157.50.

(iv) Accordingly, for purposes of section 987 Business A has gross income in dollars of \$1,894.50 (\$3,780.00—\$1,885.50).

Example 4. (i) The facts are the same as in *Example 3* except that U.S. Corp properly elects under paragraph §1.987-1(c)(1)(iii) to use spot rates in lieu of yearly average exchange rates. As a result, under paragraph (c)(3) of this section, U.S. Corp uses the convention rate to translate items of income, gain, deduction, or loss where such rate is appropriate. Thus, Business A's dollar gross sales will be computed as follows:

GROSS SALES
[2021]

| Sales | Number of units | Amount in € | €/ \$ convention rate | Amount in \$ |
|-------------|-----------------|-------------|-----------------------|--------------|
| Jan | 100 | 300 | €1 = \$1.00 | 300 |
| Feb | 200 | 600 | €1 = \$1.05 | 630 |
| March | 0 | 0 | €1 = \$1.03 | 0 |
| April | 200 | 600 | €1 = \$1.02 | 612 |
| May | 100 | 300 | €1 = \$1.04 | 312 |
| June | 0 | 0 | €1 = \$1.05 | 0 |
| July | 100 | 300 | €1 = \$1.06 | 318 |
| Aug | 100 | 300 | €1 = \$1.05 | 315 |
| Sept | 0 | 0 | €1 = \$1.06 | 0 |
| Oct | 0 | 0 | €1 = \$1.07 | 0 |
| Nov | 100 | 300 | €1 = \$1.08 | 324 |
| Dec | 300 | 900 | €1 = \$1.08 | 972 |
| | 1,200 | | | 3,783 |

(ii) As in *Example 3*, the purchase price for each inventory unit was €1.50. Under §1.987-3(c)(2)(iv)(B), U.S. Corp uses the convention

rate as the historic rate in determining COGS.

OPENING INVENTORY AND PURCHASES
[2021]

| Month | Number of units | Amount in € | €/ \$ convention rate | Amount in \$ |
|--|-----------------|-------------|-----------------------|--------------|
| Opening inventory (purchased in December 2020) | 100 | 150 | €1 = \$1.02 | 153 |
| Purchases in 2021: | | | | |
| Jan | 300 | 450 | €1 = \$1.00 | 450 |
| Feb | 0 | 0 | €1 = \$1.05 | 0 |
| March | 0 | 0 | €1 = \$1.03 | 0 |
| April | 300 | 450 | €1 = \$1.02 | 459 |
| May | 0 | 0 | €1 = \$1.04 | 0 |
| June | 0 | 0 | €1 = \$1.05 | 0 |
| July | 300 | 450 | €1 = \$1.06 | 477 |
| Aug | 0 | 0 | €1 = \$1.05 | 0 |

OPENING INVENTORY AND PURCHASES—Continued
[2021]

| Month | Number of units | Amount in € | €/ \$ convention rate | Amount in \$ |
|------------|-----------------|-------------|-----------------------|--------------|
| Sept | 0 | 0 | €1 = \$1.06 | 0 |
| Oct | 0 | 0 | €1 = \$1.07 | 0 |
| Nov | 300 | 450 | €1 = \$1.08 | 486 |
| Dec | 0 | 0 | €1 = \$1.08 | 486 |
| | 1,200 | | | 1,872 |

(iii) As set forth in (i), Business A's gross sales are \$3,783.

(iv) Because Business A uses a FIFO method for inventory, Business A is considered to have sold in 2021 the 100 units of opening inventory purchased in December 2020 (\$150), the 300 units purchased in January 2021 (\$450), the 300 units purchased in April 2021 (\$459), the 300 units purchased in July 2021 (\$477), and 200 of the 300 units purchased in November 2021 (\$324). Thus, Business A's COGS is \$1,860.

(v) Accordingly, Business A has gross income in dollars of \$1,923 (\$3,783 - \$1,860).

Example 5. The facts are the same as in *Example 3* except that during 2021, Business A incurred €100 of depreciation expense with respect to a truck. No portion of the depreciation expense is an inventoriable cost. The truck was purchased on January 15, 2020. The yearly average exchange rate for 2020 was €1 = \$1.02. Under paragraph (c)(2)(i) of this section, the €100 of depreciation is translated into dollars at the historic rate. Under § 1.987-1(c)(3)(i), the historic rate is the yearly average rate for 2020. Accordingly, U.S. Corp takes into account depreciation of \$102 with respect to Business A in 2021.

Example 6. The facts are the same as in *Example 5* except that the €100 of depreciation expense incurred during 2021 with respect to the truck is an inventoriable cost. As a result, the depreciation expense is capitalized into the 1,200 units of inventory purchased by Business A in 2021. Of those 1,200 units, 1,100 units are sold during the year, and 100 units become ending inventory. The portion of depreciation expense capitalized into inventory that is sold during 2021 is reflected in Business A's euro COGS and is translated at the €1 = \$1.02 yearly average exchange rate for 2020, the year in which the truck was purchased. The portion of the depreciation expense capitalized into the 100 units of ending inventory is not taken into account in 2021 but, rather, will be taken into account in the year the ending inventory is sold, translated at the €1 = \$1.02 yearly average exchange rate for 2020.

Example 7. Business A purchased raw land on October 16, 2020, for €8,000 and sold the land on November 1, 2021, for €10,000. The

yearly average exchange rate was €1 = \$1.02 for 2020 and €1 = \$1.05 for 2021. Under paragraph (c)(1) of this section, the amount realized is translated into dollars at the yearly average exchange rate for 2021 (€10,000 × \$1.05 = \$10,500). Under paragraph (c)(2)(i) of this section, the basis is determined at the historic rate for 2020, which is the yearly average rate under section § 1.987-1(c)(3)(i) for such year (€8,000 × \$1.02 = \$8,160). Accordingly, the amount of gain reported by U.S. Corp on the sale of the land is \$2,340 (\$10,500 - \$8,160).

Example 8. The facts are the same as in *Example 7* except that Business A properly elects under paragraph § 1.987-1(c)(1)(iii) to use spot rates in lieu of yearly average rates. Accordingly, the amount realized will be translated at the convention rate for the date of sale, and the basis will be translated at the convention rate for the date of purchase. The convention rate is €1 = \$1.01 for October 2020 and is €1 = \$1.08 for November 2021. Under these facts, the amount realized, translated into dollars at the convention rate for November 2021, is \$10,800 (€10,000 × \$1.08), and the basis, translated at the convention rate for October 2020, is \$8,080 (€8,000 × \$1.01). The amount of gain reported by U.S. Corp on the sale of the land is \$2,720 (\$10,800 - \$8,080).

Example 9 through Example 14 [Reserved] For further guidance, see § 1.987-3T(e), *Example 9 through Example 14*.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88870, Dec. 8, 2016]

§ 1.987-3T Determination of section 987 taxable income or loss of an owner of a section 987 QBU (temporary).

(a) through (b)(2)(i) [Reserved] For further guidance, see § 1.987-3(a) through (b)(2)(i).

(ii) *No translation of basis or amount realized with respect to a specified owner functional currency transaction treated as a historic asset.* If the acquisition of a historic asset gives rise to a specified owner functional currency transaction

described in paragraph (b)(4)(ii) of this section, the basis of the historic asset, and any amount realized on a disposition of the historic asset, is not translated if the amount is denominated in the owner's functional currency.

(3) [Reserved] For further guidance, see § 1.987-3(b)(3).

(4) *Special rule for section 988 transactions*—(i) *In general.* Section 988 and the regulations thereunder apply to section 988 transactions of a section 987 QBU. For this purpose, whether a transaction is a section 988 transaction is determined by reference to the functional currency of the section 987 QBU. (But see paragraph (b)(4)(ii) of this section, providing that specified owner functional currency transactions are not treated as section 988 transactions.) However, except as provided in paragraph (b)(4)(iii)(A) of this section, section 988 gain or loss is determined in, and by reference to, the functional currency of the owner of the section 987 QBU rather than the functional currency of the section 987 QBU. Accordingly, in determining section 988 gain or loss of a section 987 QBU with respect to a section 988 transaction of the section 987 QBU, the amounts required under section 988 and the regulations thereunder to be translated on the applicable booking date or payment date with respect to the section 988 transaction are translated into the owner's functional currency at the rate required under section 988 and the regulations thereunder.

(ii) *Specified owner functional currency transactions not treated as section 988 transactions.* Transactions of a section 987 QBU described in sections 988(c)(1)(B)(i), 988(c)(1)(B)(ii), and 988(c)(1)(C) (including the acquisition of nonfunctional currency as described in § 1.988-1(a)(1)), other than transactions described in paragraph (b)(4)(iii)(A) of this section, that are denominated in (or determined by reference to) the owner's functional currency (specified owner functional currency transactions) are not treated as section 988 transactions. Thus, no currency gain or loss is recognized by a section 987 QBU under section 988 with respect to such transactions.

(iii) *Determination of section 988 gain or loss for qualified short-term section 988*

transactions—(A) *Determination by reference to the section 987 QBU's functional currency for certain transactions subject to a mark-to-market method of accounting.* Section 988 gain or loss with respect to section 988 transactions described in paragraph (b)(4)(iii)(B) of this section that are accounted for under a mark-to-market method of accounting for Federal income tax purposes or under the foreign currency mark-to-market method of accounting described in paragraph (b)(4)(iii)(C) of this section, and any hedges entered into to manage risk with respect to such transactions within the meaning of § 1.1221-2(c)(4) (related hedges), must be determined in, and by reference to, the functional currency of the section 987 QBU (rather than the functional currency of its owner).

(B) *Qualified short-term section 988 transaction.* A qualified short-term section 988 transaction is a section 988 transaction that occurs in the ordinary course of a section 987 QBU's business and has an original term of one year or less on the date the transaction is entered into by the section 987 QBU. The holding of currency that is nonfunctional currency (within the meaning of section 988(c)(1)(C)(ii)) to the section 987 QBU in the ordinary course of a section 987 QBU's trade or business also is treated as a qualified short-term section 988 transaction. Any transaction that is denominated in, or determined by reference to, a hyperinflationary currency, including the holding of hyperinflationary currency, is not considered a qualified short-term section 988 transaction. See §§ 1.988-2(b)(15), 1.988-2(d)(5), and 1.988-2(e)(7) for rules relating to transactions denominated in, or determined by reference to, a hyperinflationary currency.

(C) *Election to use a foreign currency mark-to-market method of accounting.* A taxpayer may elect under this paragraph (b)(4)(iii)(C) to apply the foreign currency mark-to-market method of accounting described in this paragraph for all qualified short-term section 988 transactions described in paragraph (b)(4)(iii)(B) of this section, and any related hedges, that are properly attributable to a section 987 QBU on or after the effective date of the election and that are not otherwise accounted for

under a mark-to-market method of accounting under section 475 or section 1256. Under the foreign currency mark-to-market method of accounting, the timing of section 988 gain or loss on section 988 transactions is determined under the principles of section 1256(a)(1). Thus, only section 988 gain or loss is taken into account under the foreign currency mark-to-market method of accounting. Appropriate adjustments must be made to prevent the section 988 gain or loss from being taken into account again under section 988 or another provision of the Code or regulations. A section 988 transaction subject to this election is not subject to the “netting rule” of section 988(b) and § 1.988-2(b)(8), under which exchange gain or loss is limited to overall gain or loss realized in a transaction, in taxable years prior to the taxable year in which section 988 gain or loss would be recognized with respect to such section 988 transaction but for this election.

(iv) *Examples.* Examples 10 through 13 of paragraph (e) of this section illustrate the application of this paragraph (b)(4).

(c)(1) through (c)(2)(i) [Reserved] For further guidance, see § 1.987-3(c)(1) through (c)(2)(i).

(ii) *Amount realized with respect to historic assets that are section 988 transactions.* If the acquisition of a historic asset gave rise to a section 988 transaction described in paragraph (b)(4)(i) of this section, then in computing the total gain or loss on a disposition of the historic asset (some or all of which total gain or loss may be section 988 gain or loss described in section 988(b) and paragraph (b)(4)(i) of this section), the amount realized (determined, if necessary, under § 1.987-3(b)(2)(i)) is translated into the owner’s functional currency using the spot rate on the date such item is properly taken into account, subject to the limitation under § 1.987-1T(c)(1)(ii)(B) regarding the use of a spot rate convention.

(iii) through (iv) [Reserved] For further guidance, see § 1.987-3(c)(2)(iii) through (iv).

(v) *Translation of income to account for certain foreign income tax claimed as a credit.* The owner of a section 987 QBU claiming a credit under section 901 for

foreign income taxes, other than foreign income taxes deemed paid under section 902 or section 960, that are properly reflected on the books and records of the section 987 QBU (the creditable tax amount) must determine section 987 taxable income or loss attributable to the section 987 QBU by reducing the amount of section 987 taxable income or loss that otherwise would be determined under this section by an amount equal to the creditable tax amount, translated into U.S. dollars using the yearly average exchange rate for the taxable year in which the creditable tax is accrued, and by increasing the resulting amount by an amount equal to the creditable tax amount, translated using the same exchange rate that is used to translate the creditable taxes into U.S. dollars under section 986(a). See *Example 14* of paragraph (e) of this section., for an illustration of this rule.

(d) *Election to translate all items at the yearly average exchange rate.* Notwithstanding § 1.987-3(c), a taxpayer that has made the annual deemed termination election described in § 1.987-8T(d) may elect under this paragraph (d) to translate all items of income, gain, deduction, and loss with respect to a section 987 QBU determined under § 1.987-3(b) in the functional currency of the section 987 QBU into the owner’s functional currency, if necessary, at the yearly average exchange rate for the taxable year. *Example 9* of paragraph (e) of this section illustrates the application of this election.

(e) *Example 1* through *Example 8* [Reserved] For further guidance, see § 1.987-3(e), *Example 1* through *Example 8*.

Example 9. The facts are the same as in *Example 7*, except that U.S. Corp properly elects under paragraph (d) of this section to translate all items of income, gain, deduction, and loss with respect to Business A at the yearly average exchange rate. Accordingly, Business A’s €2,000 gain on the sale of the land is translated at the yearly average exchange rate for 2021 of €1 = \$1.05, and the amount of gain reported by U.S. Corp on the sale of the land is \$2,100.

Example 10. Business A acquires £100 on August 27, 2021, for €120 and sells the pounds on November 17, 2021, for €125. The dollar-pound spot rate (without the use of a spot rate convention) is £1 = \$1 on August 27, 2021, and £1 = \$1.10 on November 17, 2021. The disposition

of the pounds is a section 988 transaction of Business A under paragraph (b)(4)(i) of this section, and the pounds are a historic asset under § 1.987-1(e). Section 988 gain or loss with respect to the disposition of the pounds is determined under paragraph (b)(4)(i) of this section and § 1.988-2(a)(2) by reference to the dollar functional currency of Business A's owner. The dollar amount realized for the pounds is determined under paragraph (c)(2)(ii) of this section by translating £100 into \$110 using the dollar-pound spot rate on November 17, 2021, without the use of a spot rate convention. The dollar basis in the pounds is determined under § 1.987-3(c)(2)(i) by translating £100 into \$100 using the historic rate described in § 1.987-1T(c)(3)(i)(E), which is the dollar-pound spot rate on August 27, 2021, without the use of a spot rate convention. Thus, U.S. Corp takes into account \$10 of section 988 gain with respect to Business A's disposition of £100.

Example 11. (i) Business A purchases a £100 2-year note for €75 on October 1, 2021, and receives a £100 repayment of principal with respect to the note on December 31, 2021. At the spot rates on October 1, 2021 (as defined in § 1.987-1(c)(1)), without the use of a spot rate convention, Business A's €75 purchase price translates into £80 and \$95. At the spot rates on December 31, 2021, without the use of a spot rate convention, the £100 principal amount on the note translates into €90 and \$130, and £80 translates into \$104.

(ii) The acquisition of the note is a section 988 transaction of Business A under paragraph (b)(4)(i) of this section, and the note is a historic asset under § 1.987-1(e). To determine its section 987 taxable income or loss with respect to Business A, U.S. Corp must determine Business A's total gain or loss on the disposition of the note in U.S. Corp's dollar functional currency. Consistent with § 1.988-2(b)(8), U.S. Corp also must determine whether some or all of that gain or loss constitutes section 987 gain or loss described in section 988(b).

(iii) To determine Business A's total gain or loss on the disposition of the note, Business A's basis and amount realized on the note must be determined in euros under § 1.987-3(b), if necessary, and translated into dollars under § 1.987-3(c). Business A has a €75 basis in the note that is translated into \$95 under § 1.987-3(c)(2)(i) at the historic rate described in § 1.987-1T(c)(3)(i)(E), which is the spot rate on the date the note was acquired without the use of a spot rate convention. Business A's £100 amount realized on the note is translated into €90 under § 1.987-3(b)(2)(i) using the spot rate on December 31, 2021, without the use of a spot rate convention. That €90 amount realized is then translated into \$130 under paragraph (c)(2)(ii) of this section using the spot rate on December 31, 2021, without the use of a spot rate convention. Accordingly, the total gain with re-

spect to the disposition of the note that is included in section 987 taxable income is \$35 (\$130 less \$95).

(iv) U.S. Corp must determine whether some or all of the \$35 total gain with respect to the note constitutes section 988 gain. The amount of section 988 gain realized with respect to the note is determined under § 1.988-2(b)(5), which requires a comparison of the functional currency value of the principal amount of the note on the booking date and payment date spot rates, respectively, and defines the principal amount of the note as Business A's purchase price in units of non-functional currency, which is £80. Under paragraph (b)(4)(i) of this section, section 988 gain or loss with respect to the note is determined by reference to U.S. Corp's dollar functional currency, such that the amounts required under section 988 to be translated on the booking date and payment date are translated into the dollars at the booking date and payment date spot rates. Accordingly, Business A's £80 principal amount with respect to the note is translated at the booking date and payment date spots rates into \$95 and \$104, respectively. Thus, \$9 (\$104 less \$95) of the \$35 total gain taken into account by U.S. Corp as section 987 taxable income with respect to the note is section 988 gain. The remaining \$26 of gain, which may be attributable to credit risk or another factor unrelated to currency fluctuations, is sourced and characterized without regard to section 988.

Example 12. The facts are the same as in *Example 11*, except that Business A is owned by a foreign corporation with a pound functional currency. Under paragraph (b)(4)(ii) of this section, the acquisition of the £100 2-year note is a specified owner functional currency transaction that is not treated as a section 988 transaction of Business A. Because the note is a historic asset under § 1.987-1(e), Business A's €75 basis in the note translates into £80 at the historic rate described in § 1.987-1T(c)(3)(i)(E), which provides that the historic rate is the spot rate for the date the note was acquired without the use of a spot rate convention. (If, instead, Business A had purchased the 5-year note for £80 rather than €75, then pursuant to paragraph (b)(2)(ii) of this section, Business A's basis in the note would have been determined without translating the £80 purchase price because it is denominated in the owner's functional currency.) Under paragraph (b)(2)(ii) of this section, the £100 amount realized with respect to the note is not translated because it is denominated in the owner's functional currency. Thus, the owner takes into account £20 (£100 less £80) of section 987 taxable income in 2021 with respect to the note.

Example 13. (i) Business A receives and accrues \$100 of income from the provision of

services on January 1, 2021. Business A continues to hold the \$100 as a U.S. dollar-denominated demand deposit at a bank on December 31, 2021. U.S. Corp has elected under paragraph (b)(4)(iii)(C) of this section to use the foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions entered into by Business A. The euro-dollar spot rate without the use of a spot rate convention is €1 = \$1 on January 1, 2021, and €1 = \$2 on December 31, 2021, and the yearly average exchange rate for 2021 is €1 = \$1.50.

(ii) Under § 1.987-3(b)(2)(i), the \$100 earned by Business A is translated into €100 at the spot rate on January 1, 2021, as defined in § 1.987-1(c)(1) without the use of a spot rate convention. In determining U.S. Corp's taxable income, the €100 of service income is translated into \$150 at the yearly average exchange rate for 2021, as provided in § 1.987-3(c)(1).

(iii) The \$100 demand deposit constitutes a qualified short-term section 988 transaction under paragraph (b)(4)(iii)(B) of this section because the demand deposit is treated as nonfunctional currency within the meaning of section 988(c)(1)(C)(ii). Because Business A uses the foreign currency mark-to-market method of accounting for qualified short-term section 988 transactions, under paragraph (b)(4)(iii)(A) of this section, section 988 gain or loss for such transactions is determined in, and by reference to, euros, the functional currency of Business A. Accordingly, section 988 gain or loss must be determined on Business A's holding of the \$100 demand deposit in, and by reference to, the euro. Under § 1.988-2(a)(2), Business A is treated as having an amount realized of €50 when the \$100 is marked to market at the end of 2021 under paragraph (b)(4)(iii)(C) of this section. Marking the dollars to market gives rise to a section 988 loss of €50 (€50

amount realized, less Business A's €100 basis in the \$100). In determining U.S. Corp's taxable income, that €50 loss is translated into a \$75 loss at the yearly average exchange rate for 2021, as provided in § 1.987-3(c)(1).

Example 14. (i) *Facts.* Business A earns €100 of revenue from the provision of services and incurs €30 of general expenses and €10 of depreciation expense during 2021. Except as otherwise provided, U.S. Corp uses the yearly average exchange rate described in § 1.987-1(c)(2) to translate items of income, gain, deduction, and loss of Business A. Business A is subject to income tax in Country X at a 25 percent rate. U.S. Corp claims a credit with respect to Business A's foreign income taxes and elects under section 986(a)(1)(D) to translate the foreign income taxes at the spot rate on the date the taxes were paid. The yearly average exchange rate for 2021 is €1 = \$1.50. The historic rate used to translate the depreciation expense is €1 = \$1.00. The spot rate on the date that Business A paid its foreign income taxes was €1 = \$1.60.

(ii) *Analysis.* Because U.S. Corp has elected to translate foreign income taxes at the spot rate on the date such taxes were paid rather than at the yearly average exchange rate, U.S. Corp must make the adjustments described in paragraph (c)(2)(v) of this section. Accordingly, U.S. Corp determines its section 987 taxable income by reducing the section 987 taxable income or loss that otherwise would be determined under this section by €15, translated into U.S. dollars at the yearly average exchange rate (€1 = \$1.50), and increasing the resulting amount by €15, translated using the same exchange rate that is used to translate the creditable taxes into U.S. dollars under section 986(a) (€1 = \$1.60). Following these adjustments, Business A's section 987 taxable income for 2021 is \$96.50, computed as follows:

| | Amount in € | Translation rate | Amount in \$ |
|--|-------------|------------------|--------------|
| Revenue | €100 | €1 = \$1.50 | \$150.00 |
| General Expenses | (30) | €1 = \$1.50 | (45.00) |
| Depreciation | (10) | €1 = \$1.00 | (10.00) |
| Tentative section 987 taxable income | €60 | | \$95.00 |
| Adjustments under paragraph (c)(2)(v) of this section: | | | |
| Decrease by €15 tax translated at yearly average exchange rate (€1 = \$1.50) | | | (\$22.50) |
| Increase by €15 tax translated at spot rate on payment date (€1 = \$1.60) | | | 24.00 |
| Section 987 taxable income | | | \$96.50 |

(f) *Effective/applicability date.* This section applies to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. Notwithstanding the

preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then this section applies to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

(g) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88870, Dec. 8, 2016]

§ 1.987-4 Determination of net unrecognized section 987 gain or loss of a section 987 QBU.

(a) *In general.* The net unrecognized section 987 gain or loss of a section 987 QBU shall be determined by the owner annually as provided in paragraph (b) of this section in the owner's functional currency. Only assets and liabilities reflected on the books and records of the section 987 QBU under § 1.987-2(b) shall be taken into account.

(b) *Calculation of net unrecognized section 987 gain or loss.* Net unrecognized section 987 gain or loss of a section 987 QBU for a taxable year shall equal the sum of:

(1) The section 987 QBU's net accumulated unrecognized section 987 gain or loss for all prior taxable years to which these regulations apply as determined in paragraph (c) of this section, and

(2) The section 987 QBU's unrecognized section 987 gain or loss for the current taxable year as determined in paragraph (d) of this section.

(c) *Net accumulated unrecognized section 987 gain or loss for all prior taxable years—(1) In general.* A section 987 QBU's net accumulated unrecognized section 987 gain or loss for all prior taxable years is the aggregate of the amounts determined under § 1.987-4(d) for all prior taxable years to which these regulations apply, reduced by the amounts taken into account under § 1.987-5 upon remittances for all such prior taxable years.

(2) *Coordination with § 1.987-12.* For purposes of paragraph (c)(1) of this section, amounts taken into account under § 1.987-5 are determined without regard to § 1.987-12.

(d) *Calculation of unrecognized section 987 gain or loss for a taxable year.* The unrecognized section 987 gain or loss of a section 987 QBU for a taxable year shall be determined under paragraphs (d)(1) through (8) of this section.

(1) *Step 1: Determine the change in the owner functional currency net value of the section 987 QBU for the taxable year—*
(i) *In general.* The change in the owner

functional currency net value of the section 987 QBU for the taxable year shall equal—

(A) The owner functional currency net value of the section 987 QBU, determined in the functional currency of the owner under paragraph (e) of this section, on the last day of the taxable year; less

(B) The owner functional currency net value of the section 987 QBU, determined in the functional currency of the owner under paragraph (e) of this section, on the last day of the preceding taxable year. This amount shall be zero in the case of the section 987 QBU's first taxable year.

(ii) *Year section 987 QBU is terminated.* If a section 987 QBU is terminated within the meaning of § 1.987-8 during an owner's taxable year, the owner functional currency net value of the section 987 QBU as provided in paragraph (d)(1)(i)(A) of this section shall be determined on the date the section 987 QBU is terminated.

(2) *Step 2: Increase the amount determined in step 1 by the amount of assets transferred from the section 987 QBU to the owner—*(i) *In general.* The amount determined in paragraph (d)(1) of this section shall be increased by the total amount of assets described in paragraph (d)(2)(ii) of this section transferred from the section 987 QBU to the owner during the taxable year translated into the owner's functional currency as provided in paragraph (d)(2)(ii) of this section.

(ii) *Assets transferred from the section 987 QBU to the owner during the taxable year.* The assets transferred from the section 987 QBU to the owner for the taxable year shall equal the sum of:

(A) The amount of the section 987 QBU's functional currency and the aggregate adjusted basis of all marked assets (as defined in § 1.987-1(d)), after taking into account § 1.988-1(a)(10), transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the owner's functional currency at the spot rate (as defined in § 1.987-1(c)(1)) applicable to the date of transfer; and

(B) The aggregate adjusted basis of all historic assets (as defined in § 1.987-1(e)), after taking into account § 1.988-

1(a)(10), transferred to the owner during the taxable year determined in the functional currency of the section 987 QBU and translated into the owner's functional currency at the historic rate for each such asset (as defined in § 1.987-1(c)(3)).

(3) *Step 3: Decrease the amount determined in steps 1 and 2 by the amount of assets transferred from the owner to the section 987 QBU—(i) In general.* The aggregate amount determined in paragraphs (d)(1) and (d)(2) of this section shall be decreased by the total amount of assets transferred from the owner to the section 987 QBU during the taxable year determined in the functional currency of the owner as provided in paragraph (d)(3)(ii) of this section.

(ii) *Total of all amounts transferred from the owner to the section 987 QBU during the taxable year.* The total amount of assets transferred from the owner to the section 987 QBU for the taxable year shall equal the aggregate of:

(A) The total amount of functional currency of the owner transferred to the section 987 QBU during the taxable year; and

(B) The adjusted basis, determined in the functional currency of the owner, of any asset transferred to the section 987 QBU during the taxable year (after taking into account § 1.988-1(a)(10)).

(4) *Step 4: Decrease the amount determined in steps 1 through 3 by the amount of liabilities transferred from the section 987 QBU to the owner.* The aggregate amount determined in paragraphs (d)(1) through (3) of this section shall be decreased by the aggregate amount of liabilities transferred from the section 987 QBU to the owner during the taxable year. The amount of such liabilities shall be translated into the functional currency of the owner at the spot rate (as defined in § 1.987-1(c)(1)) applicable on the date of transfer.

(5) *Step 5: Increase the amount determined in steps 1 through 4 by the amount of liabilities transferred from the owner to the section 987 QBU.* The aggregate amount determined in paragraphs (d)(1) through (4) of this section shall be increased by the aggregate amount of liabilities transferred by the owner to the section 987 QBU during the taxable year. The amount of such liabilities

shall be translated into the functional currency of the owner at the spot rate (as defined in § 1.987-1(c)(1)) applicable on the date of transfer.

(6) *Step 6: Decrease or increase the amount determined in steps 1 through 5 by the section 987 taxable income or loss, respectively, of the section 987 QBU for the taxable year.* The aggregate amount determined in paragraphs (d)(1) through (5) of this section shall be decreased or increased by the section 987 taxable income or loss, respectively, computed under § 1.987-3 for the taxable year.

(7) *Step 7: Increase the amount determined in steps 1 through 6 by any expenses that are not deductible in computing the section 987 taxable income or loss of the section 987 QBU for the taxable year.* The aggregate amount determined under paragraphs (d)(1) through (6) shall be increased by the amount of any expense or loss attributable to a section 987 QBU for the taxable year that is not deductible in computing the section 987 QBU's taxable income or loss for the year, including any foreign income taxes incurred by the section 987 QBU with respect to which the owner claims a credit (translated at the same rate at which such taxes were translated under section 986(a)).

(8) *Step 8: Decrease the amount determined in steps 1 through 7 by the amount of any tax-exempt income.* The aggregate amount determined under paragraphs (d)(1) through (7) shall be decreased by the amount of any income or gain attributable to a section 987 QBU for the taxable year that is not included in computing the section 987 QBU's taxable income or loss for the year.

(e) *Determination of the owner functional currency net value of a section 987 QBU—(1) In general.* The owner functional currency net value of a section 987 QBU on the last day of a taxable year shall equal the aggregate amount of functional currency and the adjusted basis of each asset on the section 987 QBU's balance sheet on that day, less the aggregate amount of each liability on the section 987 QBU's balance sheet on that day, in each case translated into the owner's functional currency as provided in paragraph (e)(2) of this section. Such amount shall be determined by:

(i) Preparing a balance sheet for the relevant date from the section 987 QBU's books and records (within the meaning of § 1.989(a)-1(d)), as recorded in the section 987 QBU's functional currency and showing all assets and liabilities reflected on such books and records as provided in § 1.987-2(b);

(ii) Making adjustments necessary to conform the items reflected on the balance sheet described in paragraph (e)(1)(i) of this section to United States tax accounting principles; and

(iii) Translating the asset and liability amounts on the adjusted balance sheet described in paragraph (e)(1)(ii) of this section into the functional currency of the owner in accordance with paragraph (e)(2) of this section.

(2) *Translation of balance sheet items into the owner's functional currency.* The amount of the section 987 QBU's functional currency, the basis of an asset, or the amount of a liability shall be translated as follows:

(i) *Marked item.* A marked item (as defined in § 1.987-1(d)) shall be translated into the owner's functional currency at the spot rate (as defined in § 1.987-1(c)(1)) applicable to the last day of the relevant taxable year.

(ii) *Historic item.* A historic item (as defined in § 1.987-1(e)) shall be translated into the owner's functional currency at the historic rate (as defined in § 1.987-1(c)(3)).

(f) *Combinations and separations—(1) Combinations.* The net unrecognized section 987 gain or loss of a combined QBU (as defined in § 1.987-2(c)(9)(i)) for a taxable year is determined under paragraph (b) of this section by taking into account the net accumulated unrecognized section 987 gain or loss of each combining QBU (as defined in § 1.987-2(c)(9)(i)) for all prior taxable years to which the regulations under section 987 apply, as determined under paragraph (c) of this section, and by treating the combining QBUs as having combined immediately prior to the beginning of the taxable year of combination. See paragraph (f)(3) of this section, *Example 1*, for an illustration of this rule.

(2) *Separations.* The net unrecognized section 987 gain or loss of a separated QBU (as defined in § 1.987-2(c)(9)(iii)) for a taxable year is determined under

paragraph (b) of this section by taking into account the separated QBU's share of the net accumulated unrecognized section 987 gain or loss of the separating QBU (as defined in § 1.987-2(c)(9)(iii)) for all prior taxable years to which the regulations under section 987 apply, as determined under paragraph (c) of this section, and by treating the separating QBU as having separated immediately prior to the beginning of the taxable year of separation. A separated QBU's share of the separating QBU's net accumulated unrecognized section 987 gain or loss for all such prior taxable years is determined by apportioning the separating QBU's net accumulated unrecognized section 987 gain or loss for all such prior taxable years to each separated QBU in proportion to the aggregate adjusted basis of the gross assets properly reflected on the books and records of each separated QBU immediately after the separation. For purposes of determining the owner functional currency net value of the separated QBUs on the last day of the taxable year preceding the taxable year of separation under paragraphs (d)(1)(B) and (e) of this section, the balance sheets of the separated QBUs on that day will be deemed to reflect the assets and liabilities reflected on the balance sheet of the separating QBU on that day, apportioned between the separated QBUs in a reasonable manner that takes into account the assets and liabilities reflected on the balance sheets of the separated QBUs immediately after the separation. See paragraph (f)(3) of this section, *Example 2*, for an illustration of this rule.

(3) *Examples.* The following examples illustrate the rules of paragraphs (f)(1) and (2) of this section.

(i) *Example 1. Combination of two section 987 QBUs that have the same owner—(A) Facts.* DC1, a domestic corporation, owns Entity A, a DE. Entity A conducts a business in France that constitutes a section 987 QBU (French QBU) that has the euro as its functional currency. French QBU has a net accumulated unrecognized section 987 loss from all prior taxable years to which the regulations under section 987 apply of \$100. DC1 also owns Entity B, a DE. Entity B conducts a business in Germany that constitutes a section 987

QBU (German QBU) that has the euro as its functional currency. German QBU has a net accumulated unrecognized section 987 gain from all prior taxable years to which the regulations under section 987 apply of \$110. During the taxable year, Entity A and Entity B merge under local law. As a result, the books and records of French QBU and German QBU are combined into a new single set of books and records. The combined entity has the euro as its functional currency.

(B) *Analysis.* Pursuant to § 1.987-2(c)(9)(i), French QBU and German QBU are combining QBUs, and their combination does not give rise to a transfer that is taken into account in determining the amount of a remittance (as defined in § 1.987-5(c)). For purposes of computing net unrecognized section 987 gain or loss under this section for the year of the combination, the combination is deemed to have occurred on the last day of the owner's prior taxable year, such that the owner functional currency net value of the combined section 987 QBU at the end of that taxable year described under paragraph (d)(1)(B) of this section takes into account items reflected on the balance sheets of both French QBU and German QBU at that time. Additionally, any transactions between French QBU and German QBU occurring during the year of the merger will not result in transfers to or from a section 987 QBU. Pursuant to paragraph (f)(1) of this section, the combined QBU will have a net accumulated unrecognized section 987 gain from all prior taxable years of \$10 (the \$100 loss from French QBU plus the \$110 gain from German QBU).

(ii) *Example 2. Separation of two section 987 QBUs that have the same owner—(A) Facts.* DC1, a domestic corporation, owns Entity A, a DE. Entity A conducts a business in the Netherlands that constitutes a section 987 QBU (Dutch QBU) that has the euro as its functional currency. The business of Dutch QBU consists of manufacturing and selling bicycles and scooters and is recorded on a single set of books and records. On the last day of Year 1, the adjusted basis of the gross assets of Dutch QBU is €1,000. In Year 2, the net accumulated unrecognized section 987 loss of Dutch QBU from all prior tax-

able years is \$200. During Year 2, Entity A separates the bicycle and scooter business such that each business begins to have its own books and records and to meet the definition of a section 987 QBU under § 1.987-1(b)(2) (hereafter, "bicycle QBU" and "scooter QBU"). There are no transfers between DC1 and Dutch QBU before the separation. After the separation, the aggregate adjusted basis of bicycle QBU's assets is €600 and the aggregate adjusted basis of scooter QBU's assets is €400. Each section 987 QBU continues to have the euro as its functional currency.

(B) *Analysis.* Pursuant to § 1.987-2(c)(9)(iii), bicycle QBU and scooter QBU are separated QBUs, and the separation of Dutch QBU, a separating QBU, does not give rise to a transfer taken into account in determining the amount of a remittance (as defined in § 1.987-5(c)). For purposes of computing net unrecognized section 987 gain or loss under this section for Year 2, the separation will be deemed to have occurred on the last day of the owner's prior taxable year, Year 1. Pursuant to paragraph (f)(2) of this section, bicycle QBU will have a net accumulated unrecognized section 987 loss of \$120 (€600/€1,000 × \$200), and scooter QBU will have a net accumulated unrecognized section 987 loss of \$80 (€400/€1,000 × \$200).

(g) *Examples.* The following examples illustrate the provisions of this section. For purposes of the examples, U.S. Corp is a domestic corporation that uses the calendar year as its taxable year and has the dollar as its functional currency. Except as otherwise indicated, U.S. Corp elects under § 1.987-3(c)(2)(iv)(B) to use the historic inventory method with respect to all of its section 987 QBUs but does not make other elections under section 987. Exchange rate and tax accounting (for example, depreciation rate) assumptions used in these examples are selected for the purpose of illustrating the principles of this section, and no inference is intended by their use. Additionally, the examples are not intended to demonstrate when activities constitute a trade or business within the meaning of § 1.989(a)-1(b)(2)(ii)(A) and § 1.989(a)-1(c) and therefore whether a section 987 QBU is considered to exist.

Example 1. (i) On July 1, 2021, U.S. Corp establishes Japan Branch, a section 987 QBU of U.S. Corp that has the yen as its functional currency, and transfers to Japan Branch \$1,000 and raw land with a basis of \$500. Japan Branch immediately exchanges the \$1,000 for ¥100,000. On the same day, Japan Branch borrows ¥10,000. For the taxable year 2021, Japan Branch earns ¥2,000 per month (total of ¥12,000 for the six-month period from July 1, 2021, through December 31, 2021) for providing services and incurs ¥333.33 per month (total of ¥2,000 when rounded for the six-month period from July 1, 2021, through December 31, 2021) of related expenses. Assume that the spot rate on July 1, 2021, is \$1 = ¥100; the spot rate on December 31, 2021, is \$1 = ¥120; and the average rate for the period of July 1, 2021, to December 31, 2021, is \$1 = ¥110. Thus, the ¥12,000 of services revenue when properly translated under § 1.987-3(c)(1) at the yearly average exchange rate equals \$109.09 (¥12,000 × (\$1/¥110)) = \$109.09). The ¥2,000 of expenses translated at the same yearly average exchange rate equals \$18.18 (¥2,000 × (\$1/¥110) = \$18.18). Thus, Japan Branch's net income translated into dollars equals \$90.91 (\$109.09 - \$18.18 = \$90.91).

(ii) Under paragraph (a) of this section, U.S. Corp must compute the net unrecognized section 987 gain or loss of Japan Branch for 2021. Because this is Japan Branch's first taxable year, the net unrecognized section 987 gain or loss (as defined under paragraph (b) of this section) is the branch's unrecognized section 987 gain or loss for 2021 as determined in paragraph (d) of this section. The calculation under paragraph (d) of this section is made as follows:

(iii) *Step 1.* Under paragraph (d)(1) of this section, U.S. Corp must determine the change in the owner functional currency net

value (OFCNV) of Japan Branch for 2021 in dollars. The change in the OFCNV of Japan Branch for 2021 is equal to the OFCNV of Japan Branch determined in dollars on the last day of 2021, less the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year.

(A) The OFCNV of Japan Branch determined in dollars on the last day of the current taxable year is determined under paragraph (e) of this section as the sum of the basis of each asset on Japan Branch's balance sheet on December 31, 2021, less the sum of each liability on Japan Branch's balance sheet on that date, translated into dollars as provided in paragraph (e)(2) of this section.

(B) For this purpose, Japan Branch will show the following assets and liabilities on its balance sheet for December 31, 2021:

- (1) ¥120,000;
- (2) Raw land with a basis of ¥55,000 (\$500 translated under § 1.987-2(d)(2) at the historic rate of \$1 = ¥110); and
- (3) Liabilities of ¥10,000.

(C) Under paragraph (e)(2) of this section, U.S. Corp will translate these items as follows. The ¥120,000 is a marked asset and the ¥10,000 liability is a marked liability (as each is defined in § 1.987-1(d)). These items are translated into dollars on December 31, 2021, using the spot rate on December 31, 2021, of \$1 = ¥120. The raw land is a historic asset (as defined in § 1.987-1(e)) and is translated into dollars under paragraph (e)(2)(ii) of this section at the historic rate, which under § 1.987-1(c)(3)(1)(A) is the yearly average exchange rate of \$1 = ¥110 applicable to the year the land was transferred to the QBU. Thus, the OFCNV of Japan Branch on December 31, 2021, in dollars is \$1,416.67 determined as follows:

| Assets | Amount in ¥ | Translation rate | Amount in \$ |
|--------------------------------|-------------|---|-----------------|
| Yen | 120,000 | \$1 = ¥120 (spot rate—12/31/21) | \$1,000.00 |
| Land | 55,000 | 1 = ¥110 (yearly average rate—2021) | 500.00 |
| Total assets | | | 1,500.00 |
| Liabilities: | | | |
| Bank Loan | 10,000 | 1 = ¥120 (spot rate—12/31/21) | 83.33 |
| Total liabilities | | | 83.33 |
| 2021 ending OFCNV | | | 1,416.67 |

(D) Under paragraph (d)(1) of this section, the change in OFCNV of Japan Branch for 2021 is equal to the OFCNV of the branch determined in dollars on December 31, 2021, (\$1,416.67) less the OFCNV of the branch determined in dollars on the last day of the preceding taxable year. Because this is the first taxable year of Japan Branch, the OFCNV of Japan Branch determined in dollars on the last day of the preceding taxable year is zero under paragraph (d)(1)(i)(B) of

this section. Accordingly, the change in OFCNV of Japan Branch for 2021 is \$1,416.67.

(iv) *Step 2.* Under paragraph (d)(2) of this section, the aggregate amount determined in paragraph (d)(1) of this section (step 1) is increased by the total amount of assets described in paragraph (d)(2)(ii) of this section transferred from the section 987 QBU to the owner during the taxable year translated into the owner's functional currency as provided in paragraph (d)(2)(ii) of this section. Because no such amounts were transferred,

Internal Revenue Service, Treasury

§ 1.987-4

there is no change in the \$1,416.67 determined in step 1.

(v) *Step 3.* Under paragraph (d)(3) of this section, the aggregate amount determined in paragraphs (d)(1) and (d)(2) of this section (steps 1 and 2) is decreased by the total amount of assets transferred from the owner to the section 987 QBU during the taxable year as determined in paragraph (d)(3)(ii) of this section in dollars. On July 1, 2021, U.S. Corp transferred to Japan Branch \$1,000.00 (which Japan Branch immediately converted into ¥100,000) and raw land with a basis of \$500.00 (equal to ¥55,000, translated under § 1.987-2(d)(2) at the historic rate of \$1 = ¥110). Thus, the \$1,416.67 determined under steps 1 and 2 is reduced by \$1,500.00, resulting in (\$83.33).

(vi) *Steps 4 and 5.* Because no liabilities were transferred by U.S. Corp to Japan Branch or by Japan Branch to U.S. Corp during the taxable year, the aggregate amount determined in paragraph (d)(3) of this section (Step 3) is not increased or decreased.

(vii) *Step 6.* Under paragraph (d)(6) of this section, the aggregate amount determined after applying paragraphs (d)(1) through (5) of this section (steps 1 through 5) is decreased by the section 987 taxable income of Japan Branch of \$90.91 from (\$83.33) to (\$174.24).

(viii) *Steps 7 and 8.* Paragraphs (d)(7) and (d)(8) do not apply because Japan Branch does not have any tax-exempt or nondeductible items. Accordingly, the unrecognized section 987 loss of Japan Branch for 2021 is (\$174.24), the amount determined after applying step 6.

Example 2. (i) U.S. Corp operates in the United Kingdom through U.K. Branch, a section 987 QBU of U.S. Corp that has the pound as its functional currency. U.S. Corp properly elects under § 1.987-1(c)(1)(ii) for U.K. Branch to use a spot rate convention (when permitted). Under the chosen convention, the spot rate (the “convention rate”) for any transaction occurring during a month is the average of the pound spot rate and the 30-day forward rate for pounds on the next-to-last Thursday of the preceding month. The yearly average exchange rate was £1 = \$0.90 for 2020, £1 = \$1.00 for 2021, and £1 = \$1.10 for 2022. The closing balance sheet of U.K. Branch in 2021 reflected the following assets:

- (A) £100;
- (B) A sales office purchased in 2020 with an adjusted basis of £1,000;
- (C) A delivery truck purchased in 2020 with an adjusted basis of £200;
- (D) Inventory of 100 units purchased in 2021 with a basis of £100; and
- (E) Stock in ABC Corporation purchased in 2021 with a basis of £150, representing less than 10 percent of the total voting power and value of all classes of stock of ABC Corporation.

The closing balance sheet of U.K. Branch for 2021 reflected one liability, £50 of long-term debt entered into in 2020 with F Bank, an unrelated bank.

The office, truck, stock, and inventory are historic assets (as defined in § 1.987-1(e)). The £100 and long-term debt are marked items (as defined in § 1.987-1(d)). Assume that U.S. Corp translated U.K. Branch’s 2021 closing balance sheet as follows:

| Assets | Amount in £ | Translation rate | Amount in \$ |
|--------------------------------|-------------|---|-----------------|
| Pounds | 100.00 | £1 = \$1.05 (convention rate—Dec. 2021) | 105.00 |
| Office | 1,000.00 | £1 = \$0.90 (historic rate—2020) | 900.00 |
| Truck | 200.00 | £1 = \$0.90 (historic rate—2020) | 180.00 |
| Stock | 50.00 | £1 = \$1.00 (historic rate—2021) | 150.00 |
| Inventory | 100.00 | £1 = \$1.00 (historic rate—2021) | 100.00 |
| Total assets | | | 1,435.00 |
| Liabilities: | | | |
| Bank Loan | 50.00 | £1 = \$1.05 (convention rate—Dec. 2021) | 52.50 |
| Total liabilities | | | 52.50 |
| 2021 ending OFCNV | | | 1,382.50 |

(ii) U.K. Branch uses the first-in, first-out (FIFO) method of accounting for inventory. In 2022, U.K. Branch sold 100 units of inventory for a total of £300 and purchased another 100 units of inventory for £100. There is depreciation of £33 with respect to the office and £40 with respect to the truck, and U.K. Branch incurred £30 of business expenses dur-

ing 2022. Neither the depreciation nor the business expenses are inventoriable costs. All items of income earned and expenses incurred during 2022 are received and paid, respectively, in pounds. Under § 1.987-3, U.K. Branch’s section 987 taxable income or loss is determined as follows:

| Item | Amount in £ | Translation rate | Amount in \$ |
|----------------------|-------------|--|--------------|
| Gross receipts | 300.00 | £1 = \$1.10 (yearly average rate—2022) | 330.00 |
| Less: | | | |

§ 1.987-4

26 CFR Ch. I (4-1-23 Edition)

| Item | Amount in £ | Translation rate | Amount in \$ |
|--------------------------------|-------------|--|--------------|
| COGS | (100.00) | £1 = \$1.00 (historic rate—2021) | (100.00) |
| Gross income | | | 230.00 |
| Dep: | | | |
| Office | (33.00) | £1 = \$0.90 (historic rate—2020) | (29.70) |
| Truck | (40.00) | £1 = \$0.90 (historic rate—2020) | (36.00) |
| Other expenses | (30.00) | £1 = \$1.10 (yearly average rate—2022) | (33.00) |
| Total expenses | | | (98.70) |
| Section 987 taxable income ... | | | 131.30 |

Accordingly, U.K. Branch has \$131.30 of section 987 taxable income in 2022.

(iii) In December 2022, U.K. Branch transferred £30 to U.S. Corp, and U.S. Corp transferred a computer with a basis of \$10 to U.K. Branch. U.S. Corp's net accumulated unrecognized section 987 gain or loss for all prior taxable years as determined in paragraph (c) of this section is \$30.

(iv) The unrecognized section 987 gain or loss of U.K. Branch for 2022 is determined as follows:

(A) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of U.K. Branch determined under paragraph (e) of this section on the last day of 2022, less the OFCNV of U.K. Branch determined on the last day of 2021. The OFCNV of U.K. Branch on December 31, 2022, and the change in OFCNV for 2022, are determined as follows:

| Assets | Amount in £ | Translation rate | Amount in \$ |
|-------------------------|-------------|---|--------------|
| Pounds | 240.00 | £1 = \$1.15 (convention rate—Dec. 2022) | 276.00 |
| Office | 967.00 | 1 = \$0.90 (historic rate—2020) | 870.30 |
| Truck | 160.00 | £1 = \$0.90 (historic rate—2020) | 144.00 |
| Inventory | 100.00 | £1 = \$1.10 (historic rate—2022) | 110.00 |
| Computer | 9.09 | £1 = \$1.10 (historic rate—2022) | 10.00 |
| Stock | 150.00 | £1 = \$1.00 (historic rate—2021) | 150.00 |
| Total assets | | | 1,560.30 |
| Liabilities: | | | |
| Bank Loan | 50.00 | £1 = \$1.15 (convention rate—Dec. 2022) | 57.50 |
| Total liabilities | | | 57.50 |
| 2022 ending OFCNV | | | 1,502.80 |
| Less: | | | |
| 2021 ending OFCNV | | | (1,382.50) |
| Change in OFCNV ... | | | 120.30 |

(B) *Step 2.* Under paragraph (d)(2) of this section, the aggregate amount determined in step 1 must be increased by the total amount of assets described in paragraph (d)(2)(ii) of this section transferred from U.K. Branch to U.S. Corp during the taxable year, translated

into U.S. Corp's functional currency as provided in paragraph (d)(2)(ii) of this section. The amount of assets transferred from U.K. Branch to U.S. Corp during 2022 is determined as follows:

| Asset | Amount in £ | Translation rate | Amount in \$ |
|-----------|-------------|---|--------------|
| £30 | 30.00 | £1 = \$1.15 (convention rate—Dec. 2022) | 34.50 |

(C) *Step 3: Decrease the aggregate amount described in steps 1 and 2 by the owner's transfers to the section 987 QBU.* Under paragraph (d)(3) of this section, the aggregate amount determined in steps 1 and 2 must be decreased by the total amount of all assets transferred from U.S. Corp to U.K. Branch during the taxable year as determined in paragraph

(d)(3)(ii) of this section. The amount of assets transferred from U.S. Corp to U.K. Branch during 2022 is determined as follows:

| Asset | Amount in \$ |
|----------------|--------------|
| Computer | 10.00 |

(D) *Step 4.* Under paragraph (d)(4) of this section, the aggregate amount determined in steps 1 through 3 must be decreased by the aggregate amount of liabilities transferred by U.K. Branch to U.S. Corp. Under these facts, such amount is \$0.

(E) *Step 5.* Under paragraph (d)(5) of this section, the aggregate amount determined in steps 1 through 4 must be increased by the aggregate amount of liabilities transferred by U.S. Corp to U.K. Branch. Under these facts, such amount is \$0.

(F) *Step 6.* Under paragraph (d)(6) of this section, the aggregate amount determined in steps 1 through 5 is decreased or increased, respectively, by any section 987 taxable income or loss of U.K. Branch computed under §1.987-3 for the taxable year. The amount of U.K. Branch's taxable income, as determined above, is \$131.30.

(G) [Reserved]

(H) *Steps 7 and 8:* Paragraphs (d)(7) and (d)(8) do not apply because U.K. Branch does not have any tax-exempt income or non-deductible expense.

(v) *Summary.* Taking steps 1 through 8 into account, the amount of U.S. Corp's unrecognized section 987 gain or loss with respect to U.K. Branch in 2022 is computed as follows:

| Step | Amount in \$ | Balance |
|---------|--------------|----------|
| 1 | + 120.30 | \$120.30 |
| 2 | + 34.50 | 154.80 |
| 3 | - 10.00 | 144.80 |
| 4 | - 0 | 144.80 |
| 5 | + 0 | 144.80 |
| 6 | - 131.30 | 13.50 |
| 7 | + 0 | 13.50 |
| 8 | - 0 | 13.50 |

Thus, U.S. Corp's unrecognized section 987 gain for 2022 with respect to U.K. Branch is \$13.50. As of the end of 2022, before taking into account the recognition of any section 987 gain or loss under §1.987-5, U.S. Corp's net unrecognized section 987 gain is \$43.50 (that is, \$30.00 accumulated from prior years, plus \$13.50 in 2022).

Example 3. (i) Background. U.S. Corp is the owner of Business A, a section 987 QBU that has the euro as its functional currency. Business A uses the FIFO method to account for

inventory and uses the simplified inventory method described in §1.987-3(c)(2)(iv)(A). On the last day of 2020, U.S. Corp begins Business A by contributing to Business A a building with a basis of \$780, a machine with a basis of \$300, and \$100. On January 1, 2021, Business A converts the \$100 into €100. The tax basis of the building and machine is translated into euros using the historic rate, which is the yearly average exchange rate for 2020, the year of the transfer. Accordingly, the building and the machine have a tax basis of €780 and €300, respectively, on December 31, 2020. The building and machine have annual depreciation of €20 and €30, respectively. Business A determines that 50 percent of the building depreciation should be allocated to the cost of goods manufactured (that is, treated as an inventoriable cost) and 50 percent should be allocated to selling, general and administrative (SG&A) expenses. The machine is used exclusively to manufacture inventory. Relevant exchange rates for purposes of this example are as follows:

| Year | Yearly average exchange rate | December 31 spot rate |
|------------|------------------------------|-----------------------|
| 2020 | €1 = \$1.00 | €1 = \$1.00 |
| 2021 | €1 = \$1.50 | €1 = \$2.00 |
| 2022 | €1 = \$2.50 | €1 = \$3.00 |

(ii) *Operations in 2021.* During 2021, Business A recognizes €140 of revenue from sales of finished goods. The related COGS is €70. Business A pays €10 in salaries allocable to SG&A. Inventoriable costs in 2021 include €10 of depreciation on the building and €30 of depreciation on the machine. Business A's balance sheet on December 31, 2021, shows no liabilities and the following assets: currency of €160, the building with an adjusted basis of €760, the machine with an adjusted basis of €270, and ending inventory with a FIFO cost basis of €40, comprising raw materials and finished goods.

(A) *Determination of income.* Under the simplified inventory method, Business A's income for 2021 is computed as follows:

| Item | Amount in € | Translation rate | Amount in \$ |
|--|-------------|---|--------------|
| Sales revenue | 140 | €1 = \$1.50 (yearly avg. rate—2021) | 210 |
| COGS before adjustments | 70 | €1 = \$1.50 (yearly avg. rate—2021) | 105 |
| Adjustment for cost recovery deductions (see calculation below). | | | (20) |
| Adjustment for beginning inventory (none). | | | 0 |
| Adjusted COGS | | | 85 |

§ 1.987-4

26 CFR Ch. I (4-1-23 Edition)

| Item | Amount in € | Translation rate | Amount in \$ |
|--|-------------|---|--------------|
| SG&A: | | | |
| Depreciation on building (50%) | 10 | €1 = \$1.00 (historic rate—2020) | 10 |
| Salaries | 10 | €1 = \$1.50 (yearly avg. rate—2021) | 15 |
| Total SG&A | | | 25 |
| Section 987 net income (revenue less COGS and SG&A). | | | 100 |

COGS Adjustments.

Adjustment for cost recovery deductions included in inventoriable costs.

| Depreciation amount | Historic rate | 2021 yearly avg. rate | Difference in translation rates | Adjustment (depreciation × change in rates) |
|---|---------------|-----------------------|---------------------------------|---|
| €10 (building) | 1.00 | 1.50 | (0.50) | (\$5) |
| €30 (machine) | 1.00 | 1.50 | (0.50) | (15) |
| Total adjustment for cost recovery deductions | | | | (20) |

(B) *Determination of OFCNV for 2020 and 2021.* determined under paragraph (e) of this section as follows:

Under the simplified inventory method, the OFCNV of Business A for 2020 and 2021 is

OFCNV—END OF 2021

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|--|--------------|
| Euros | 160 | €1 = \$2.00 (year-end spot rate—2021) | 320 |
| Building | 760 | €1 = \$1.00 (historic rate—2020) | 760 |
| Machine | 270 | €1 = \$1.00 (historic rate—2020) | 270 |
| Inventory | 40 | €1 = \$1.50 (yearly average rate—2021) | 60 |
| Total assets | | | 1,410 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2021 ending OFCNV | | | 1,410 |

OFCNV—END OF 2020

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|---|--------------|
| Euros | 100 | €1 = \$1.00 (year-end spot rate—2020) | 100 |
| Building | 780 | €1 = \$1.00 (historic rate—2020) | 780 |
| Machine | 300 | €1 = \$1.00 (historic rate—2020) | 300 |
| Total assets | | | 1,180 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2020 ending OFCNV | | | 1,180 |

(C) *Determination of net unrecognized section 987 gain or loss.* The net unrecognized section 987 gain or loss of Business A is determined under paragraph (d) of this section as follows (relevant steps only):

(1) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of Business A determined under paragraph (e) of this section on

the last day of 2021, less the OFCNV of Business A determined on the last day of 2020.

| | |
|-------------------------------|---------|
| 2021 ending OFCNV | \$1,410 |
| Less: 2020 ending OFCNV | (1,180) |
| Change in OFCNV | 230 |

(2) *Step 6.* Under paragraph (d)(6) of this section, the aggregate amount determined in steps 1 through 5 must be decreased by the

Internal Revenue Service, Treasury

§ 1.987-4

section 987 taxable income of Business A. The amount of Business A's taxable income for 2021, as determined above, is \$100.

| | |
|--|-------|
| Change in OFCNV | \$230 |
| Less: section 987 taxable income | (100) |
| Unrecognized section 987 gain | 130 |
| Plus: Net accumulated unrecognized section 987 gain or loss from prior years | 0 |
| Net unrecognized section 987 gain | 130 |

(iii) *Operations in 2022.* During 2022, Business A recognizes €180 of revenue from sales of finished goods. The related COGS is €96. Business A pays €10 in salaries allocable to SG&A. Inventoriable costs in 2022 include €30 of depreciation on the machine and €10 of depreciation on the building. Business A's balance sheet on December 31, 2022, shows no liabilities and the following assets: currency of €260, the building with an adjusted basis of €740, the machine with an adjusted basis of €240, and ending inventory with a FIFO cost basis of €54, comprising raw materials and finished goods.

(A) *Determination of income.* Under the simplified inventory method, Business A's income for 2022 is computed as follows:

| Item | Amount in € | Translation rate | Amount in \$ |
|---|-------------|---|--------------|
| Sales revenue | 180 | €1 = \$2.50 (yearly avg. rate—2022) | 450 |
| COGS before adjustments | 96 | €1 = \$2.50 (yearly avg. rate—2022) | 240 |
| Adjustment for cost recovery deductions (see calculation below) | | | (60) |
| Adjustment for beginning inventory (see calculation below) | | | (40) |
| Adjusted COGS | | | 140 |
| SG&A: | | | |
| Depreciation on building (50%) | 10 | €1 = \$1.00 (historic rate—2020) | 10 |
| Salaries | 10 | €1 = \$2.50 (yearly avg. rate—2022) | 25 |
| Total SG&A | | | 35 |
| Section 987 net income (revenue less COGS and SG&A) | | | 275 |

COGS Adjustments.

Adjustment for cost recovery deductions.

| Depreciation amount | Historic rate | 2022 yearly avg. rate | Difference in translation rates | Adjustment (depreciation × change in rates) |
|---|---------------|-----------------------|---------------------------------|---|
| €10 (building) | 1.00 | 2.50 | (1.50) | (\$15) |
| €30 (machine) | 1.00 | 2.50 | (1.50) | (45) |
| Total adjustment for cost recovery deductions | | | | (60) |

Adjustment for beginning inventory.

| Prior year ending inventory | 2021 yearly avg. rate | 2022 yearly avg. rate | Difference in translation rates | Adjustment (inventory × change in rates) |
|--|-----------------------|-----------------------|---------------------------------|--|
| €40 | 1.50 | 2.50 | (1.00) | (\$40) |
| Total adjustment for beginning inventory | | | | (40) |

(B) *Determination of OFCNV.* Under the simplified inventory method, the OFCNV of

Business A for 2022 is determined under paragraph (e) of this section as follows:

OFCNV—END OF 2022

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|--|--------------|
| Euros | 260 | €1 = \$3.00 (year-end spot rate—2022) | 780 |
| Building | 740 | €1 = \$1.00 (historic rate—2020) | 740 |
| Machine | 240 | €1 = \$1.00 (historic rate—2020) | 240 |
| Inventory | 54 | €1 = \$2.50 (yearly average rate—2022) | 135 |
| Total assets | | | 1,895 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2022 ending OFCNV | | | 1,895 |

(C) *Determination of net unrecognized section 987 gain or loss.* The net unrecognized section 987 gain of Business A is determined under paragraph (d) of this section as follows (relevant steps only):

(1) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of Business A determined under paragraph (e) of this section on the last day of 2022, less the OFCNV of Business A determined on the last day of 2021.

| | |
|-------------------------------|---------|
| 2022 ending OFCNV | \$1,895 |
| Less: 2021 ending OFCNV | (1,410) |
| Change in OFCNV | 485 |

(2) *Step 6.* Under paragraph (d)(6) of this section, the aggregate amount determined in steps 1 through 5 must be decreased by the section 987 taxable income of Business A. The amount of Business A's taxable income for 2022, as determined above, is \$275.

| | |
|-----------------------|-------|
| Change in OFCNV | \$485 |
|-----------------------|-------|

| | |
|---|-------|
| Less: Section 987 taxable income | (275) |
| Unrecognized section 987 gain 2022 | 210 |
| Plus: Net accumulated unrecognized section 987 gain from prior year | 130 |
| Net unrecognized section 987 gain | 340 |

Example 4. (i) Background. The background facts about Business A are the same as in *Example 3*, except that Business A uses the dollar-value LIFO method to account for inventory.

(ii) *Operations in 2021.* The facts about Business A's operations in 2021 are the same as in *Example 3*.

(A) *Determination of income.* Under the simplified inventory method, Business A's income for 2021 is computed as follows:

| Item | Amount in € | Translation rate | Amount in \$ |
|---|-------------|---|--------------|
| Sales revenue | 140 | €1 = \$1.50 (yearly avg. rate—2021) | 210 |
| COGS before adjustments | 70 | €1 = \$1.50 (yearly avg. rate—2021) | 105 |
| Adjustment for cost recovery deductions (same as <i>Example 1</i>) | | | (20) |
| Adjustment for LIFO liquidation (none) | | | 0 |
| Adjusted COGS | | | 85 |
| SG&A: | | | |
| Depreciation on building (50%) | 10 | €1 = \$1.00 (historic rate—2020) | 10 |
| Salaries | 10 | €1 = \$1.50 (yearly avg. rate—2021) | 15 |
| Total SG&A | | | 25 |
| Section 987 net income (revenue less COGS and SG&A) | | | 100 |

(B) *Determination of OFCNV for 2020 and 2021.* Under the simplified inventory method, the OFCNV of Business A for 2020 and 2021 is

determined under paragraph (e) of this section as follows:

OFCNV—END OF 2021

| Assets | Amount in € | Translation rate | Amount in \$ |
|----------------|-------------|---|--------------|
| Euros | 160 | €1 = \$2.00 (year-end spot rate—2021) | 320 |
| Building | 760 | €1 = \$1.00 (historic rate—2020) | 760 |

OFCNV—END OF 2021—Continued

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|--|--------------|
| Machine | 270 | €1 = \$1.00 (historic rate—2020) | 270 |
| Inventory | 40 | €1 = \$1.50 (historic rate—2021) | 60 |
| Total assets | | | 1,410 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2021 ending OFCNV | | | 1,410 |

OFCNV—END OF 2020

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|---|--------------|
| Euros | 100 | €1 = \$1.00 (year-end spot rate—2020) | 100 |
| Building | 780 | €1 = \$1.00 (historic rate—2020) | 780 |
| Machine | 300 | €1 = \$1.00 (historic rate—2020) | 300 |
| Total assets | | | 1,180 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2020 ending OFCNV | | | 1,180 |

(C) *Determination of net unrecognized section 987 gain or loss.* The net unrecognized section 987 gain or loss of Business A for 2021 is determined under paragraph (d) of this section as follows (relevant steps only):

(1) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of Business A determined under paragraph (e) of this section on the last day of 2021, less the OFCNV of Business A determined on the last day of 2020.

| | |
|-------------------------------|---------|
| 2021 ending OFCNV | \$1,410 |
| Less: 2020 ending OFCNV | (1,180) |

Change in OFCNV (230)

(2) *Step 6.* Under paragraph (d)(6) of this section, the aggregate amount determined in steps 1 through 5 must be decreased by the section 987 taxable income of Business A. The amount of Business A's taxable income for 2021, as determined above, is \$100.

| | |
|-----------------------|-------|
| Change in OFCNV | \$230 |
|-----------------------|-------|

| | |
|--|-------|
| Less: section 987 taxable income | (100) |
|--|-------|

| | |
|--|-----|
| Unrecognized section 987 gain | 130 |
| Plus: Net accumulated unrecognized section 987 gain or loss from prior years | 0 |

| | |
|---|-----|
| Net unrecognized section 987 gain | 130 |
|---|-----|

(iii) *Operations in 2022.* The facts about Business A's operations in 2022 are the same as in *Example 3*, except that due to Business A's dollar-value LIFO method of inventory accounting, Business A's balance sheet on December 31, 2022, reflects a 2021 layer of inventory with a LIFO cost basis of €40 and a 2022 layer of inventory with a LIFO cost basis of €10.80, and Business A's COGS is €99.20.

(A) *Determination of income.* Business A's income for 2022 is computed as follows:

| Item | Amount in € | Translation rate | Amount in \$ |
|---|-------------|---|--------------|
| Sales revenue | 180 | €1 = \$2.50 (yearly avg. rate—2022) | 450 |
| COGS before adjustments | 99.20 | €1 = \$2.50 (yearly avg. rate—2022) | 248 |
| Adjustment for cost recovery deductions (same as <i>Example 3</i>) | | | (60) |
| Adjustment for LIFO liquidation (none) | | | 0 |
| Adjusted COGS | | | 188 |
| SG&A: | | | |
| Depreciation on building (50%) | 10 | €1 = \$1.00 (historic rate—2020) | 10 |
| Salaries | 10 | €1 = \$2.50 (yearly avg. rate—2022) | 25 |
| Total SG&A | | | 35 |
| Section 987 net income (revenue less COGS and SG&A) | | | 227 |

OFCNV—END OF 2022

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|---|--------------|
| Euros | 260.00 | €1 = \$3.00 (year-end spot rate—2022) | 780 |
| Building | 740.00 | €1 = \$1.00 (historic rate—2020) | 740 |
| Machine | 240.00 | €1 = \$1.00 (historic rate—2020) | 240 |
| Inventory | 10.80 | €1 = \$2.50 (historic rate—2022) | 27 |
| | 40.00 | €1 = \$1.50 (historic rate—2021) | 60 |
| Total assets | | | 1,847 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2022 ending OFCNV | | | 1,847 |

(B) *Determination of net unrecognized section 987 gain or loss.* The net unrecognized section 987 gain of Business A for 2022 is determined under paragraph (d) of this section as follows (relevant steps only):

(1) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of Business A determined under paragraph (e) of this section on the last day of 2022, less the OFCNV of Business A determined on the last day of 2021.

| | |
|-------------------------------|---------|
| 2022 ending OFCNV | \$1,847 |
| Less: 2021 ending OFCNV | (1,410) |
| Change in OFCNV | 437 |

(2) *Step 6—Decrease the aggregate amount determined in steps 1 through 5 by the section 987 taxable income of the section 987 QBU for the taxable year.* Under paragraph (d)(6) of this section, the aggregate amount determined in steps 1 through 5 must be decreased by the section 987 taxable income of Business A. The amount of Business A's taxable income for 2022, as determined above, is \$227.

| | |
|--|-------|
| Change in OFCNV | \$437 |
| Less: section 987 taxable income | (227) |

| | |
|--|-----|
| Unrecognized section 987 gain 2022 | 210 |
| Plus: net accumulated unrecognized section 987 gain from prior years ... | 130 |
| Net unrecognized section 987 gain | 340 |

(iv) *Operations in 2023.* During 2023, Business A recognizes revenue of €252 from sales of finished goods. The related COGS is €140.80, reflecting a full liquidation of the 2022 inventory layer with a LIFO cost basis of \$10.80 and a partial liquidation of inventory from the 2021 layer with a LIFO cost basis of \$10.00. Business A pays €10 in salaries allocable to SG&A. Inventoriable costs in 2023 include €10 of depreciation on the building and €30 of depreciation on the machine. Business A's balance sheet on December 31, 2023, shows no liabilities and the following assets: currency of €422, the building with an adjusted basis of €720, the machine with an adjusted basis of €210, and a 2021 layer of ending inventory with a LIFO cost basis of €30, comprising raw materials and finished goods. The yearly average exchange rate for 2023 is €1 = \$3.50, and the spot rate on December 31, 2023 is €1 = \$4.00.

(A) *Determination of income.* Business A's income for 2023 is computed as follows:

| Item | Amount in € | Translation rate | Amount in \$ |
|--|-------------|---|--------------|
| Sales revenue | 252 | €1 = \$3.50 (yearly avg. rate—2023) | 882 |
| COGS before adjustments | 140.80 | €1 = \$3.50 (yearly avg. rate—2023) | 492.80 |
| Adjustment for cost recovery deductions (see calculation below). | | | (100.00) |
| Adjustment for LIFO liquidation (see calculation below). | | | (30.80) |
| Adjusted COGS | | | 362.00 |
| SG&A: | | | |
| Depreciation on building (50%) | 10 | €1 = \$1.00 (historic rate—2020) | 10 |
| Salaries | 10 | €1 = \$3.50 (yearly avg. rate—2023) | 35 |
| Total SG&A | | | 45 |
| Section 987 net income | | | 475 |

Internal Revenue Service, Treasury

§ 1.987-4

COGS Adjustments.
Adjustment for cost recovery deductions.

| Depreciation amount | Historic rate | 2023 yearly avg. rate | Difference in translation rates | Adjustment (depreciation × change in rates) |
|---|---------------|-----------------------|---------------------------------|---|
| €10 (building) | 1.00 | 3.50 | (2.50) | (\$25) |
| €30 (machine) | 1.00 | 3.50 | (2.50) | (75) |
| Total adjustment for cost recovery deductions | | | | (100) |

Adjustment for LIFO liquidation.

| LIFO liquidation layer | Historic rate | 2023 yearly avg. rate | Difference in translation rates | Adjustment (liquidated layer × change in rates) |
|---|---------------|-----------------------|---------------------------------|---|
| €10.80 (2022) | 2.50 | 3.50 | (1.00) | (\$10.80) |
| €10 (2021) | 1.50 | 3.50 | (2.00) | (20.00) |
| Total adjustment for liquidation of LIFO layers | | | | (30.80) |

(B) *Determination of OFCNV.* The OFCNV of Business A for 2023 is determined under paragraph (e) of this section as follows:

OFCNV—END OF 2023

| Assets | Amount in € | Translation rate | Amount in \$ |
|-------------------------|-------------|---|--------------|
| Euros | 422 | €1 = \$4.00 (year-end spot rate—2023) | 1,688 |
| Building | 720 | €1 = \$1.00 (historic rate—2020) | 720 |
| Machine | 210 | €1 = \$1.00 (historic rate—2020) | 210 |
| Inventory | 30 | €1 = \$1.50 (historic rate—2021) | 45 |
| Total assets | | | 2,663 |
| Liabilities: | | | |
| Total liabilities | | | 0 |
| 2023 ending OFCNV | | | 2,663 |

(C) *Determination of net unrecognized section 987 gain or loss.* The net unrecognized section 987 gain of Business A is determined under paragraph (d) of this section as follows (relevant steps only):

(1) *Step 1.* Under paragraph (d)(1) of this section, the change in OFCNV for the taxable year must be determined. This amount is equal to the OFCNV of Business A determined under paragraph (e) of this section on the last day of 2023, less the OFCNV of Business A determined on the last day of 2022.

| | |
|-------------------------------|---------|
| 2023 ending OFCNV | \$2,663 |
| Less: 2022 ending OFCNV | (1,847) |
| Change in OFCNV | 816 |

(2) *Step 6—Decrease the aggregate amount determined in steps 1 through 5 by the section 987 taxable income of the section 987 QBU for the taxable year.* Under paragraph (d)(6) of this section, the aggregate amount determined in

steps 1 through 5 must be decreased by the section 987 taxable income of Business A. The amount of Business A's taxable income for 2023, as determined above, is \$475.

| | |
|--|-------|
| Change in OFCNV | \$816 |
| Less: section 987 taxable income | (475) |
| Unrecognized section 987 gain 2023 | 341 |
| Plus: net accumulated unrecognized section 987 gain from prior years ... | 340 |
| Net unrecognized section 987 gain | 681 |

(h) *Effective/applicability date—(1) In general.* Except as set forth in paragraph (h)(2) of this section, this section is applicable as specified in § 1.987-11.

(2) *Combinations and separations.* Paragraphs (c)(2) and (f) of this section apply to taxable years beginning on or after the day that is three years after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then paragraphs (c)(2) and (f) of this section applies to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88873, Dec. 8, 2016; T.D. 9857, 84 FR 20795, May 13, 2019; 84 FR 31194, July 1, 2019]

§ 1.987-5 Recognition of section 987 gain or loss.

(a) *Recognition of section 987 gain or loss by the owner of a section 987 QBU.* The taxable income of an owner of a section 987 QBU shall include the owner's section 987 gain or loss recognized with respect to the section 987 QBU for the taxable year. Except as otherwise provided, for any taxable year the owner's section 987 gain or loss recognized with respect to a section 987 QBU shall equal:

(1) The owner's net unrecognized section 987 gain or loss with respect to the section 987 QBU determined under § 1.987-4 on the last day of such taxable year (or, if earlier, on the day the section 987 QBU is terminated under § 1.987-8); multiplied by

(2) The owner's remittance proportion for the taxable year, as determined under paragraph (b) of this section.

(b) *Remittance proportion.* The owner's remittance proportion with respect to a section 987 QBU for a taxable year shall equal:

(1) The remittance, as determined under paragraph (c) of this section, to the owner from the section 987 QBU for such taxable year; divided by

(2) The sum of

(A) The aggregate adjusted basis of the gross assets of the section 987 QBU as of the end of the taxable year that are reflected on its year-end balance sheet translated into the owner's functional currency as provided in § 1.987-4(e)(2) and

(B) The amount of the remittance as determined under paragraph (c) of this section.

(c) *Remittance—(1) Definition.* A remittance shall be determined in the owner's functional currency and shall equal the excess, if any, of:

(i) The aggregate of all amounts transferred from the section 987 QBU to the owner during the taxable year, as determined in paragraph (d) of this section; over

(ii) The aggregate of all amounts transferred from the owner to the section 987 QBU during the taxable year, as determined in paragraph (e) of this section.

(2) *Day when a remittance is determined.* An owner's remittance from a section 987 QBU shall be determined on the last day of the owner's taxable year (or, if earlier, on the day the section 987 QBU is terminated under § 1.987-8).

(3) *Termination.* A termination of a section 987 QBU as determined under § 1.987-8 is treated as a remittance of all the gross assets of the section 987 QBU to the owner on the date of such termination. See § 1.987-8(e). Accordingly, the remittance proportion in the case of a termination is 1.

(d) *Aggregate of all amounts transferred from the section 987 QBU to the owner for the taxable year.* For purposes of paragraph (c)(1)(i) of this section, the aggregate amount transferred from the section 987 QBU to the owner for the taxable year shall be the aggregate amount of functional currency and the aggregate adjusted basis of the assets transferred, as determined in the owner's functional currency under § 1.987-4(d)(2). Solely for this purpose, the amount of liabilities transferred from the owner to the section 987 QBU, as determined in the owner's functional currency under § 1.987-4(d)(5), shall be treated as a transfer of assets from the section 987 QBU to the owner in an amount equal to the amount of such liabilities.

(e) *Aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year.* For purposes of paragraph (c)(1)(ii) of this section, the aggregate of all amounts transferred from the owner to the section 987 QBU for the taxable year shall be the aggregate amount of functional currency

and the aggregate adjusted basis of the assets transferred, as determined in the owner's functional currency under §1.987-4(d)(3). Solely for this purpose, the amount of liabilities transferred from the section 987 QBU to the owner determined under §1.987-4(d)(4) shall be treated as a transfer of assets from the owner to the section 987 QBU in an amount equal to the amount of such liabilities.

(f) *Determination of owner's adjusted basis in transferred assets*—(1) *In general.* The owner's adjusted basis in an asset received in a transfer from a section 987 QBU (whether or not such transfer is made in connection with a remittance, as defined in paragraph (c) of this section) shall be determined in the owner's functional currency under the rules prescribed in paragraphs (f)(2) and (f)(3) of this section.

(2) *Marked asset.* The basis of a marked asset shall be the amount determined by translating the section 987 QBU's functional currency basis of the asset, after taking into account §1.988-1(a)(10), into the owner's functional currency at the spot rate (as defined in §1.987-1(c)(1)) applicable to the date of transfer.

(3) *Historic asset.* The basis of a historic asset shall be the amount determined by translating the section 987 QBU's functional currency basis of the asset, after taking into account §1.988-1(a)(10), into the owner's functional currency at the historic rate for the asset (as defined in §1.987-1(c)(3)).

(g) *Example.* The following example illustrates the calculation of section 987 gain or loss under this section:

Example. (i) U.S. Corp, a domestic corporation with the dollar as its functional currency, operates in the United Kingdom through Business A, a section 987 QBU with the pound as its functional currency. During 2021, the following transfers took place between U.S. Corp and Business A. On January 5, 2021, U.S. Corp transferred to Business A \$300, which Business A used during the year to purchase services. On March 5, 2021, Business A transferred a machine to U.S. Corp. The pound adjusted basis of the machine when properly translated into dollars as described under §1.987-4(d)(2)(ii)(B) and paragraph (d) of this section is \$500. On November 1, 2021, Business A transferred pounds to U.S. Corp. The dollar amount of the pounds when properly translated as described under §1.987-4(d)(2)(ii)(A) and paragraph (d) of this

section is \$2,300. On December 7, 2021, U.S. Corp transferred a truck to Business A with an adjusted basis of \$2,000.

(ii) At the end of 2021, Business A holds assets, properly translated into the owner's functional currency pursuant to §1.987-4(e)(2), consisting of a computer with a pound adjusted basis equivalent to \$500, a truck with a pound adjusted basis equivalent to \$2,000, and pounds equivalent to \$2,850. In addition, Business A has a pound liability entered into in 2020 with Bank A. All such assets and liabilities are reflected on the books and records of Business A. Assume that the net unrecognized section 987 gain for Business A as determined under §1.987-4 as of the last day of 2021 is \$80.

(iii) U.S. Corp's section 987 gain with respect to Business A is determined as follows:

(A) *Computation of amount of remittance.* Under paragraphs (c)(1) and (c)(2) of this section, U.S. Corp must determine the amount of the remittance for 2021 in the owner's functional currency (dollars) on the last day of 2021. The amount of the remittance for 2021 is \$500, determined as follows:

Transfers from Business A to U.S. Corp in dollars:

| | |
|---------------|-------|
| Machine | \$500 |
| Pounds | 2,300 |

| | |
|--|-------|
| Aggregate transfers from Business A to U.S. Corp | 2,800 |
|--|-------|

Transfers from U.S. Corp to Business A in dollars:

| | |
|--------------------|-------|
| U.S. dollars | \$300 |
| Truck | 2,000 |

| | |
|--|-------|
| Aggregate transfers from U.S. Corp to Business A | 2,300 |
|--|-------|

Computation of amount of remittance:

| | |
|--|---------|
| Aggregate transfers from Business A to U.S. Corp | \$2,800 |
| Less: aggregate transfers from U.S. Corp to Business A | (2,300) |

| | |
|------------------------|-----|
| Total remittance | 500 |
|------------------------|-----|

(B) *Computation of section 987 QBU gross assets plus remittance.* Under paragraph (b)(2) of this section, Business A must determine the aggregate basis of its gross assets that are reflected on its year-end balance sheet translated into the owner's functional currency and must increase this amount by the amount of the remittance.

| | |
|----------------|-------|
| Computer | \$500 |
| Pounds | 2,850 |

§ 1.987-6

| | |
|---|-------|
| Truck | 2,000 |
| Aggregate gross as-
sets | 5,350 |
| Remittance | 500 |
| Aggregate basis of
Business A's gross
assets at end of 2021,
increased by
amount of remit-
tance | 5,850 |

(C) *Computation of remittance proportion.* Under paragraph (b) of this section, Business A must compute the remittance proportion by dividing the \$500 remittance amount by the \$5,850 sum of the aggregate basis of Business A's gross assets and the amount of the remittance. The resulting remittance proportion is 0.085.

(D) *Computation of section 987 gain or loss.* The amount of U.S. Corp's section 987 gain or loss that must be recognized with respect to Business A is determined under paragraph (a) of this section by multiplying the 0.085 remittance proportion by the \$80 of net unrecognized section 987 gain. U.S. Corp's resulting recognized section 987 gain for 2021 is \$6.80.

[T.D. 9794, 81 FR 88821, Dec. 8, 2016]

§ 1.987-6 Character and source of section 987 gain or loss.

(a) *Ordinary income or loss.* Section 987 gain or loss is ordinary income or loss for Federal income tax purposes.

(b) *Character and source of section 987 gain or loss—(1) In general.* With respect to each section 987 QBU, the owner must determine the character and source of section 987 gain or loss in the year of a remittance under the rules of this paragraph (b) for all purposes of the Internal Revenue Code, including sections 904(d), 907, and 954.

(2) *Method required to characterize and source section 987 gain or loss.* The owner must use the asset method set forth in § 1.861-9T(g) to characterize and source section 987 gain or loss. In applying the asset method, the owner must take into account only the assets of the section 987 QBU and must consistently determine the value of the assets on the basis of either the tax book value or the fair market value of the assets. The modified gross income method described in § 1.861-9T(j) cannot be used.

(3) *Coordination with section 954.* Solely for purposes of determining the excess of foreign currency gains over for-

foreign currency losses characterized as foreign personal holding company income under section 954(c)(1)(D), section 987 gain or loss that is characterized pursuant to paragraph (b)(2) of this section by reference to assets that give rise to subpart F income shall be treated as foreign currency gain or foreign currency loss attributable to section 988 transactions not directly related to the business needs of the controlled foreign corporation.

(4) [Reserved] For further guidance, see § 1.987-6T(b)(4).

(c) *Examples.* The following examples illustrate the application of this section.

Example 1. CFC is a controlled foreign corporation as defined in section 957 with the Swiss franc (Sf) as its functional currency. CFC is the owner of Business A, a section 987 QBU that has the euro as its functional currency. For the year 2021, CFC recognizes section 987 gain of Sf10,000 under § 1.987-5. Applying the rules of this section, Business A has average total assets of Sf1,000,000, which generate income as follows: Sf750,000 of assets that generate foreign source general limitation income under section 904(d)(1)(A), none of which is subpart F income under section 952; and Sf250,000 of assets that generate foreign source passive income under section 904(d)(1)(B), all of which is subpart F income. Under paragraph (b) of this section, Sf7,500 (Sf750,000/Sf1,000,000 × Sf10,000) of the section 987 gain will be characterized as foreign source general limitation income that is not subpart F income under section 952, and Sf2,500 (Sf250,000/Sf1,000,000 × Sf10,000) will be characterized as foreign source passive income that is characterized as foreign personal holding company income under section 954(c)(1)(D). All of the section 987 gain is treated as ordinary income.

Example 2. The facts are the same as in *Example 1* except that: (a) CFC recognizes section 987 loss of Sf40,000, Sf10,000 of which is characterized under paragraph (b) of this section by reference to assets that give rise to subpart F income; and (b) CFC otherwise has Sf12,000 of net foreign currency gain determined under § 1.954-2(g) that is taken into account in determining the excess of foreign currency gain over foreign currency losses characterized as foreign personal holding company income under section 954(c)(1)(D). Under paragraph (b)(3) of this section, the Sf10,000 section 987 loss characterized by reference to assets that give rise to subpart F income is treated as foreign currency loss attributable to section 988 transactions not directly related to the business needs of the controlled foreign corporation for purposes of determining the excess of foreign currency

gains over foreign currency losses characterized as foreign personal holding company income under section 954(c)(1)(D). Accordingly, CFC will aggregate the \$10,000 section 987 loss with the \$12,000 net foreign currency gain and will have \$2,000 of net foreign currency gain characterized as foreign personal holding company income under section 954(c)(1)(D).

[T.D. 9794, 81 FR 88845, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88874, Dec. 8, 2016]

§ 1.987-6T Character and source of section 987 gain or loss (temporary).

(a) through (b)(3) [Reserved] For further guidance, see § 1.987-6(a) through (b)(3).

(4) *Source of section 987 gain or loss with respect to a dollar QBU.* The source of section 987 gain or loss with respect to a dollar QBU (as defined in § 1.987-1T(b)(6)(i)) for which the CFC owner has elected under § 1.987-1T(b)(6)(iii) to apply section 987 is determined by reference to the residence of the CFC owner. This paragraph (b)(4) applies to any CFC that has made the election under § 1.987-1T(b)(6)(iii), including a CFC described in § 1.987-1(b)(1)(ii).

(c) [Reserved] For further guidance, see § 1.987-6(c).

(d) *Effective/applicability date.* This section applies to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then this section applies to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

(e) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88874, Dec. 8, 2016]

§ 1.987-7 Section 987 aggregate partnerships.

(a) *In general.* This section provides rules for determining an owner's share of the assets and liabilities of an eligible QBU that is owned indirectly, as described in § 1.987-1(b)(4)(ii), through a section 987 aggregate partnership.

(b) [Reserved]

(c) *Coordination with subchapter K.* [Reserved]

[T.D. 9794, 81 FR 88845, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88874, Dec. 8, 2016; T.D. 9857, 84 FR 20796, May 13, 2019]

§ 1.987-8 Termination of a section 987 QBU.

(a) *Scope.* This section provides rules regarding the termination of a section 987 QBU. Paragraph (b) of this section provides general rules for determining when a termination occurs. Paragraph (c) of this section provides exceptions to the general termination rules for certain transactions described in section 381(a). Paragraph (e) of this section describes certain effects of terminations. Paragraph (f) of this section contains examples that illustrate the principles of this section.

(b) *In general.* Except as provided in paragraph (c) of this section, a section 987 QBU terminates if the conditions described in one of paragraphs (b)(1) through (4) is satisfied.

(1) *Trade or business ceases.* A section 987 QBU ceases its trade or business. When a section 987 QBU ceases its trade or business is determined based on all the facts and circumstances, provided that an owner may continue to treat a section 987 QBU as a section 987 QBU for a reasonable period during the winding up of such trade or business, which period may in no event exceed two years from the date on which such QBU ceases its activities carried on for profit.

(2) *Substantially all assets transferred.* The section 987 QBU transfers substantially all (within the meaning of section 368(a)(1)(C)) of its assets to its owner. For purposes of this paragraph (b)(2), the amount of assets transferred from the section 987 QBU to its owner as a result of a transaction shall be reduced by the amount of assets transferred from the owner to the section 987 QBU pursuant to the same transaction. See Examples 2, 5, and 6 in paragraph (f) of this section.

(3) *Owner no longer a CFC.* A foreign corporation that is a controlled foreign corporation (as defined in section 957) that is the owner of a section 987 QBU ceases to be a controlled foreign corporation as a result of a transaction or

series of transactions after which persons that were related to the corporation within the meaning of section 267(b) immediately before the transaction or series of transactions collectively own sufficient interests in the corporation such that the corporation would continue to be considered a controlled foreign corporation if such persons were United States shareholders within the meaning of section 951(b).

(4) *Owner ceases to exist.* The owner of the section 987 QBU ceases to exist (including in connection with a transaction described in section 381(a)).

(c) *Transactions described in section 381(a)—(1) Liquidations.* Notwithstanding paragraph (b) of this section, a termination does not occur when the owner of a section 987 QBU ceases to exist in a liquidation described in section 332, except in the following cases:

(i) The distributor is a domestic corporation and the distributee is a foreign corporation.

(ii) The distributor is a foreign corporation and the distributee is a domestic corporation.

(iii) The distributor and the distributee are both foreign corporations and the functional currency of the distributee is the same as the functional currency of the distributor's section 987 QBU.

(2) *Reorganizations.* Notwithstanding paragraph (b) of this section, a termination does not occur when the owner of the section 987 QBU ceases to exist in a reorganization described in section 381(a)(2), except in the following cases:

(i) The transferor is a domestic corporation and the acquiring corporation is a foreign corporation.

(ii) The transferor is a foreign corporation and the acquiring corporation is a domestic corporation.

(iii) The transferor is a controlled foreign corporation immediately before the transfer, the acquiring corporation is a foreign corporation that is not a controlled foreign corporation immediately after the transfer, and the acquiring corporation was related to the transferor within the meaning of section 267(b) immediately before the transfer.

(iv) The transferor and the acquiring corporation are foreign corporations and the functional currency of the ac-

quiring corporation is the same as the functional currency of the transferor's section 987 QBU.

(d) [Reserved] For further guidance, see § 1.987-8T(d).

(e) *Effect of terminations.* A termination of a section 987 QBU as determined in this section is treated as a remittance of all the gross assets of the section 987 QBU to its owner immediately before the section 987 QBU terminates. Thus, except as otherwise provided in these regulations under section 987, a termination results in the recognition of any net unrecognized section 987 gain or loss of the section 987 QBU. See § 1.987-5(c)(3).

(f) *Examples.* The following examples illustrate the principles of this section. Except as otherwise provided, U.S. Corp is a domestic corporation that has the U.S. dollar as its functional currency, and Business A is a section 987 QBU.

Example 1. Cessation of operations. (i) *Facts.* U.S. Corp is the owner of Business A, a sales office of U.S. Corp in Country X. Business A ceases sales activities on December 31, 2021. During 2022, Business A sells all of the assets used in its sales activities and winds up its business, settling outstanding accounts.

(ii) *Analysis.* Business A's trade or business ceases on December 31, 2021. The cessation of Business A's trade or business causes a termination of the Business A section 987 QBU under paragraph (b)(1) of this section on December 31, 2021, unless U.S. Corp chooses to continue to treat Business A as a section 987 QBU until completion of the wind-up activities in 2022. If U.S. Corp chooses to continue to treat Business A as a section 987 QBU during the wind-up of Business A, Business A section 987 QBU would terminate under paragraph (b)(1) of this section upon completion of the wind-up in 2022.

Example 2. Transfer of a section 987 QBU to a member of a consolidated group. (i) *Facts.* U.S. Corp, the owner of Business A, transfers all the assets and liabilities of Business A to DS, a domestic corporation all of the stock of which is owned by U.S. Corp, in a transaction qualifying under section 351. U.S. Corp and DS are members of the same consolidated group.

(ii) *Analysis.* Pursuant to § 1.987-2(c)(2)(i) and (ii), as a result of the deemed exchange of the assets and liabilities of Business A for DS stock in a section 351 transaction, Business A is treated as transferring its assets and liabilities to U.S. Corp immediately before the transfer by U.S. Corp of the assets and liabilities to DS. Because a section 351 transaction is not a transaction described in

section 381(a), the transfer of all of the assets of Business A to U.S. Corp causes a termination of the Business A section 987 QBU under paragraph (b)(2) of this section.

Example 3. Cessation of controlled foreign corporation status. (i) *Facts.* Foreign parent (FP) is a foreign corporation that owns all the stock of U.S. Corp, a domestic corporation. U.S. Corp owns all of the stock of FC, a controlled foreign corporation as defined in section 957. FC is the owner of Business A. FP contributes cash to FC in exchange for FC stock representing 60 percent of the voting power and value of all FC stock. FC no longer constitutes a controlled foreign corporation after the capital contribution.

(ii) *Analysis.* Because FC ceases to qualify as a controlled foreign corporation as a result of a transaction after which persons that were related to FC within the meaning of section 267(b) immediately before the transaction collectively own sufficient interests in FC such that the FC would continue to be considered a controlled foreign corporation if such persons were United States shareholders within the meaning of section 951(b), the Business A section 987 QBU terminates pursuant to paragraph (b)(3) of this section.

Example 4. Section 332 liquidation. (i) *Facts.* U.S. Corp owns all of the stock of FC, a foreign corporation. FC is the owner of Business A. Pursuant to a liquidation described in section 332, FC transfers all of its assets and liabilities to U.S. Corp.

(ii) *Analysis.* FC's liquidation causes a termination of the Business A section 987 QBU as provided in paragraph (b)(4) of this section because FC ceases to exist as a result of the liquidation. The exception for certain section 332 liquidations provided under paragraph (c)(1) of this section does not apply because U.S. Corp is a domestic corporation and FC is a foreign corporation. See paragraph (c)(1)(ii) of this section.

Example 5. Transfers to and from a section 987 QBU pursuant to the same transaction. (i) *Facts.* U.S. Corp owns 100 percent of DC1 and DC2, each a domestic corporation. DC1 owns Entity A, a DE that conducts a business (Business A) in Country X that constitutes a section 987 QBU of DC1. DC2 subsequently contributes property to Entity A in exchange for a 95 percent interest in Entity A. The property DC2 contributes to Entity A is used in the business conducted by Business A and is reflected on its books and records as provided under §1.987-2(b).

(ii) *Analysis.* (A) For general Federal income tax purposes, Entity A is converted to a partnership when DC2 contributes property to Entity A in exchange for a 95 percent interest in Entity A. DC2's contribution is treated as a contribution to a partnership in exchange for an ownership interest in the partnership. DC1 is treated as contributing all of Business A to the partnership in ex-

change for a partnership interest. See Rev. Rul. 99-5 (situation 2), (1999-1 CB 434) and §601.601(d)(2) of this chapter. For purposes of this section, these deemed transactions are not taken into account. See §1.987-2(c) and §1.987-2(c)(10), Example 9.

(B) Under §1.987-1(b)(5)(i), Entity A is converted to a section 987 aggregate partnership when DC2 contributes property to Entity A in exchange for a 95 percent interest in Entity A because DC1 and DC2 own all the interests in partnership capital and profits, DC1 and DC2 are related within the meaning of section 267(b), and the requirements of §1.987-1(b)(5)(i)(B) are satisfied. Because DC2 is a partner in a section 987 aggregate partnership that owns Business A and because DC2 and Business A have different functional currencies, DC2's portion of the Business A assets constitutes a section 987 QBU of DC2.

(C) As a result of the conversion of Entity A to a partnership, DC2 acquires an allocable share of 95 percent of the assets of Business A, as determined under §1.987-7. Accordingly, under §1.987-2(c)(5), DC2 is treated as contributing 95 percent of its contributed property to its Business A section 987 QBU. In addition, DC2 is treated as transferring 5 percent of the contributed property to DC1, and DC1 is subsequently treated as transferring that property to DC1's Business A section 987 QBU. In addition, 95 percent of the original (pre-conversion) assets of Business A cease being reflected on the books and records of DC1's section 987 QBU. Under §1.987-2(b)(5), these amounts are treated as if they are transferred from DC1's section 987 QBU to DC1, and DC1 is treated as transferring these assets to DC2. DC2 is subsequently treated as transferring these assets to DC2's Business A section 987 QBU. The other 5 percent of the original (pre-conversion) assets are treated as remaining on the books and records of DC1's section 987 QBU and are not deemed to be transferred.

(D) For purposes of determining whether substantially all the assets of Business A were transferred from DC1's section 987 QBU as provided under paragraph (b)(2) of this section, the amount of assets transferred from Business A to DC1 under §1.987-2(c) (95 percent of the assets held by Business A before the contribution by DC2) must be reduced by the 5 percent of the assets contributed by DC2, which were treated as transferred from DC2 to DC1 and subsequently transferred from DC1 to its Business A section 987 QBU, as a result of the formation of the section 987 aggregate partnership. Accordingly, the amount of assets transferred from DC1's section 987 QBU for purposes of paragraph (b)(2) of this section is equal to 95 percent of the original (pre-conversion) assets minus 5 percent of DC2's contributed assets.

Example 6. Deemed transfers to a CFC upon a check-the-box election. (i) *Facts.* In 2021, U.S.

Corp forms an entity in a foreign country, Entity A. Entity A owns Business A, which has the pound as its functional currency. Entity A forms Entity B in another foreign country. Entity B owns Business B, a section 987 QBU that has the euro as its functional currency. At the time of formation, Entity A and Entity B elect to be DEs. In 2026, Entity A files an election on Form 8832 to be classified as a corporation under §301.7701-3(g)(1)(iv) and becomes a CFC (FC) owned directly by U.S. Corp. FC has the pound as its functional currency.

(ii) *Analysis.* (A) Under §1.987-1(b)(4)(i), U.S. Corp is the owner of Business A and Business B. In 2026, when Entity A elects to be classified as a corporation, U.S. Corp is deemed to contribute the assets and liabilities of Business A and Business B to FC under section 351 in exchange for FC stock. Pursuant to §1.987-2(c)(2)(i) and (ii), as a result of the deemed exchange of the assets and liabilities of Business A and Business B for FC stock in a section 351 transaction, Business A and Business B are each treated as transferring their assets and liabilities to U.S. Corp immediately before U.S. Corp's transfer of such assets and liabilities to FC. The transfer of assets from Business A and Business B to U.S. Corp causes terminations of those section 987 QBUs under paragraph (b)(2) of this section. The assets and liabilities of Business A and Business B are now owned by FC, but because FC and Business A have the same functional currency, only Business B qualifies as a section 987 QBU to which section 987 applies.

(B) Terminations also would have occurred in 2026 if U.S. Corp had contributed Entity A and Entity B to an existing foreign corporation owned by U.S. Corp or to a newly created foreign corporation owned by U.S. Corp pursuant to a section 351 exchange because the transfer of all of the assets of Business A and Business B would cause terminations of those section 987 QBUs under paragraph (b)(2) of this section.

Example 7. Sale of a section 987 QBU to a member of a consolidated group. (i) *Facts.* U.S. Corp, the owner of Business A, sells all of the assets and liabilities of Business A to DS, a domestic corporation, in exchange for cash. U.S. Corp and DS are members of the same consolidated group. The cash received on the sale is recorded on the books of U.S. Corp.

(ii) *Analysis.* Pursuant to §1.987-2(c)(2)(i) and (ii), Business A is treated as transferring all of its assets and liabilities to U.S. Corp immediately before the sale by U.S. Corp to DS. As a result of this deemed transfer from Business A to U.S. Corp, the Business A section 987 QBU terminates under paragraph (b)(2) of this section.

[T.D. 9794, 81 FR 88845, Dec. 8, 2016, as amended by T.D. 9795, 81 FR 88875, Dec. 8, 2016]

§ 1.987-8T Termination of a section 987 QBU (temporary).

(a) through (c) [Reserved] For further guidance, see §1.987-8(a) through (c).

(d) *Annual deemed termination election.* A taxpayer, including a taxpayer described in §1.987-1(b)(1)(ii) to which §§1.987-1 through 1.987-11 generally do not apply, may elect under this paragraph (d) to deem all of the section 987 QBUs of which it is an owner to terminate on the last day of each taxable year for which the election is in effect. See §1.987-8(e) regarding the effect of such a deemed termination. The owner of a section 987 QBU that is deemed to terminate under this paragraph is treated as having transferred all of the assets and liabilities attributable to such section 987 QBU to a new section 987 QBU on the first day of the following taxable year.

(e) through (f) [Reserved] For further guidance, see §1.987-8(e) through (f).

(g) *Effective/applicability date.* This section applies to taxable years beginning on or after December 7, 2016.

(h) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88875, Dec. 8, 2016]

§ 1.987-9 Recordkeeping requirements.

(a) *In general.* A taxpayer that is an owner of a section 987 QBU shall keep a copy of each election made by the taxpayer in accordance with the rules of §1.987-1(g)(3) (if not required to be made on a form published by the Commissioner regarding section 987) and such reasonable records as are sufficient to establish the section 987 QBU's taxable income or loss and section 987 gain or loss.

(b) *Supplemental information.* An owner's obligation to maintain records under section 6001 and paragraph (a) of this section is not satisfied unless the following information is maintained in such records with respect to each section 987 QBU:

(1) The amount of the items of income, gain, deduction, or loss attributed to the section 987 QBU in the functional currency of the section 987 QBU.

(2) The amount of assets and liabilities attributed to the section 987 QBU

in the functional currency of the section 987 QBU.

(3) The exchange rates used to translate items of income, gain, deduction, or loss of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which such convention is determined.

(4) The exchange rates used to translate the assets and liabilities of the section 987 QBU into the owner's functional currency and, if a spot rate convention is used, the manner in which such convention is determined.

(5) The amount of the items of income, gain, deduction, or loss attributed to the section 987 QBU translated into the functional currency of the owner.

(6) The amount of assets and liabilities attributed to the section 987 QBU translated into the functional currency of the owner.

(7) The amount of assets and liabilities transferred by the owner to the section 987 QBU determined in the functional currency of the owner.

(8) The amount of assets and liabilities transferred by the section 987 QBU to the owner determined in the functional currency of the owner.

(9) The amount of the unrecognized section 987 gain or loss for the taxable year.

(10) The amount of the net accumulated unrecognized section 987 gain or loss at the close of the taxable year.

(11) If a remittance is made, the computations determined under §1.861-9T(g) for purposes of sourcing and characterizing the remittance under §1.987-5.

(12) The transition information required to be determined under §1.987-10(e).

(c) *Retention of records.* The records required by this section, or records that support the information required on a form published by the Commissioner regarding section 987, must be maintained and kept at all times available for inspection by the Internal Revenue Service for so long as the contents thereof may become relevant in the administration of the Internal Revenue Code.

(d) *Information on a dedicated section 987 form.* The requirements of para-

graph (b) of this section shall be satisfied if the taxpayer provides the specific information required on a form published by the Commissioner for this purpose.

[T.D. 9794, 81 FR 88845, Dec. 8, 2016]

§ 1.987-10 Transition rules.

(a) *Scope.* These transition rules shall apply to any taxpayer that is an owner of a section 987 QBU pursuant to §1.987-1(b)(4) on the transition date (as defined in §1.987-11(c)). Except as provided in paragraph (c) of this section, a taxpayer to which this section applies must transition from the method previously used to comply with section 987 (the "prior section 987 method") to the method prescribed by these regulations pursuant to the fresh start transition method set forth in paragraph (b) of this section.

(b) *Fresh start transition method—(1) In general.* Pursuant to the fresh start transition method, and solely for purposes of this section, all section 987 QBUs of a taxpayer, other than section 987 QBUs subject to paragraph (c) of this section, are deemed to terminate on the day before the transition date. No section 987 gain or loss is determined or recognized as a result of the deemed termination. The owner of a section 987 QBU that is deemed to terminate under this section is treated as having transferred all of the assets and liabilities attributable to such QBU to a new section 987 QBU on the transition date. This deemed transfer of assets and liabilities is taken into account only for purposes of transitioning to these regulations under section 987 and shall not be taken into account in determining the amounts transferred from the owner to the section 987 QBU during the taxable year for purposes of §1.987-5(c)(1)(ii).

(2) *Application of §1.987-4.* For purposes of applying §1.987-4 with respect to a section 987 QBU described in paragraph (b)(1) of this section for the taxable year beginning on the transition date, the amount of assets and liabilities deemed transferred from the owner to the section 987 QBU on the transition date pursuant to paragraph (b)(1) of this section shall be determined by translating such assets and liabilities (without regard to whether

§ 1.987-10

the asset or liability is a marked item or a historic item) at the historic rate as determined under paragraph (b)(3) of this section.

(3) *Determination of historic rate.* For purposes of applying these regulations with respect to a section 987 QBU described in paragraph (b)(1) of this section for taxable years beginning on or after the transition date, the historic rate (as defined in § 1.987-1(c)(3)) for an asset or liability deemed transferred under paragraph (b)(1) of this section from an owner to the section 987 QBU on the transition date shall be the historic rate under § 1.987-1(c)(3) determined by reference to the date the assets were acquired or liabilities entered into or assumed by the section 987 QBU deemed terminated (that is, without regard to the deemed termination or transfer described in paragraph (b)(1) of this section). However, if the owner is not able to determine reliably the historic rate for a particular asset or liability, then the historic rate must be determined based on reasonable assumptions (for example, assumptions about turnover and aging of accounts receivable), consistently applied.

(4) *Example.* The provisions of this paragraph (b) are illustrated by the following example. Exchange rate assumptions used in the example are selected for the purpose of illustrating the principles of this section, and no inference is intended by their use. Additionally, the effect of depreciation is not taken into account for purposes of this example.

Example. (i) U.S. Corp is a domestic corporation with the dollar as its functional currency. U.S. Corp owns Business A, a U.K. branch with the pound as its functional currency. Business A was formed on January 1,

year 1. U.S. Corp uses the method prescribed in the 1991 proposed section 987 regulations to determine the section 987 gain or loss of Business A. U.S. Corp contributed £6,000 to Business A on January 1, year 1. On the same day, Business A bought a truck for £4,000 and a computer for £1,000. Business A had profits determined under § 1.987-1(b)(1)(i) through (iii) of the 1991 proposed section 987 regulations of £250 in each of year 1, year 2, and year 3, and the yearly average exchange rate was used in each of those years to translate Business A's profits under the 1991 proposed section 987 regulations. The yearly average exchange rate was £1 = \$1.10 in year 1, £1 = \$1.20 in year 2, and £1 = \$1.30 in year 3. Business A incurred a £50 loss in each of year 4 and year 5. Business A made no remittances to U.S. Corp in any year.

(ii) On January 1, year 5, Business A transitions to the method provided in these regulations pursuant to the fresh start transition method described in paragraph (b) of this section. Pursuant to paragraph (b)(1) of this section, Business A is deemed to terminate on December 31, year 4. However, no section 987 gain or loss is determined or recognized as a result of the deemed termination. Pursuant to paragraph (b)(2) of this section, for purposes of applying § 1.987-4 with respect to Business A for year 5, the amount of assets and liabilities transferred from U.S. Corp to Business A on the transition date shall be determined by translating all of Business A's assets at the historic rates for those assets as determined under § 1.987-1(c)(3) and paragraph (b)(3) of this section. Because U.S. Corp is not able to determine reliably the historic rate for the pound currency it is deemed to transfer to Business A, U.S. Corp determines the historic rate for these pounds based on a last-in, first-out cash flow assumption. Thus, it is assumed that the £50 loss in each of year 4 and year 5 first reduces the £250 earned in year 3. Accordingly, for purposes of determining the amount of assets and liabilities deemed transferred from U.S. Corp to Business A on January 1, year 5, U.S. Corp translates Business A's assets and liabilities as follows:

| Assets | Amount in £ | Translation rate | Amount in \$ |
|-------------------------|-------------|--|--------------|
| Pounds | 1,000 | £1 = \$1.10 (yearly average rate—year 1) | 1,100 |
| Pounds | 250 | £1 = \$1.10 (yearly average rate—year 1) | 275 |
| Pounds | 250 | £1 = \$1.20 (yearly average rate—year 2) | 300 |
| Pounds | 150 | £1 = \$1.30 (yearly average rate—year 3) | 195 |
| Truck | 4,000 | £1 = \$1.10 (yearly average rate—year 1) | 4,400 |
| Computer | 1,000 | £1 = \$1.10 (yearly average rate—year 1) | 1,100 |
| Total assets | | | 7,370 |
| Liabilities: | | | |
| Total liabilities | | | 0 |

(c) *Transition of section 987 QBUs that applied the method set forth in the 2006 proposed section 987 regulations*—(1) *In general.* If, with respect to a particular section 987 QBU, a taxpayer's prior section 987 method was based on a reasonable application of the method described in the 2006 proposed section 987 regulations (REG-208270-86, 71 FR 52876), then the taxpayer shall apply these regulations under section 987 with respect to such section 987 QBU without regard to paragraph (b) of this section.

(2) *Application of § 1.987-4.* For purposes of applying § 1.987-4 with respect to a section 987 QBU described in paragraph (c)(1) for the taxable year beginning on the transition date, the owner functional currency net value of the section 987 QBU on the last day of the preceding taxable year under § 1.987-4(d)(1)(B) shall be the amount that was determined under § 1.987-4(d)(1)(A) of the 2006 proposed section 987 regulations for the preceding taxable year. Additionally, for purposes of applying § 1.987-4 with respect to a section 987 QBU described in paragraph (c)(1) for all taxable years that end after the transition date, the section 987 QBU's net unrecognized section 987 gain or loss for all prior taxable years under § 1.987-4(c) shall take into account the aggregate of the amounts determined under § 1.987-4(d) of the 2006 proposed section 987 regulations for taxable years for which the taxpayer applied the 2006 proposed section 987 regulations, reduced by the amounts taken into account under § 1.987-5 of the 2006 proposed section 987 regulations upon a remittance for all such prior taxable years.

(3) *Use of prior historic rate.* For purposes of applying these regulations under section 987 with respect to historic items (as defined in § 1.987-1(e)), other than inventory, that are reflected on the balance sheet of the section 987 QBU on the transition date, a taxpayer may use the same historic exchange rates as were used under the taxpayer's application of the 2006 proposed section 987 regulations in place of the historic rates that otherwise would be determined under § 1.987-1(c)(3), provided that, for all taxable years that end after the transition

date, the taxpayer does so with respect to all historic items (other than inventory) that are reflected on the balance sheet of the section 987 QBU on the transition date.

(4) *Example.* The provisions of this paragraph (c) are illustrated by the following example. Exchange rate assumptions used in the example are selected for the purpose of illustrating the principles of this section, and no inference is intended by their use. Additionally, the effect of depreciation is not taken into account for purposes of this example.

Example. (i) U.S. Corp is a domestic corporation with the dollar as its functional currency. U.S. Corp owns Business A, a U.K. branch with the pound as its functional currency. Business A was formed on January 1, year 1. U.S. Corp uses a reasonable application of the method described in the 2006 proposed section 987 regulations to determine the section 987 gain or loss of Business A. On January 1, year 5, Business A transitions to the method provided in these regulations pursuant to the method described in this paragraph (c). Business A's opening balance sheet on January 1, year 5, includes pounds, a truck acquired in year 2, inventory accounted for under the FIFO method, and no liabilities. These assets remain on the balance sheet on December 31, year 5.

(ii) Pursuant to paragraph (c)(3) of this section, U.S. Corp chooses to use the same historic exchange rates as were used under its application of the 2006 proposed regulations in place of the historic rates prescribed under § 1.987-1(c)(3) for purposes of applying these regulations with respect to historic items (other than inventory) held on the transition date.

(iii) The pounds are marked items under § 1.987-1(d). Because the pounds are marked items, for purposes of determining the owner functional currency net value of Business A on the last day of year 5 pursuant to § 1.987-4(e), the pounds are translated into dollars using the spot rate (as defined in § 1.987-1(c)(1)) applicable to the last day of year 5.

(iv) The truck held on Business A's balance sheet on January 1, year 5, is a historic item under § 1.987-1(e). For purposes of determining the owner functional currency net value of Business A on the last day of year 5 pursuant to § 1.987-4(e), the basis of the truck is translated into dollars using the spot rate on the day the truck was acquired in year 2, as determined under § 1.987-1(c)(3) of the 2006 proposed section 987 regulations. If U.S. Corp had not chosen pursuant to paragraph (c)(3) of this section to use the same historic exchange rates as were used under its application of the 2006 proposed regulations, the

basis of the truck would have been translated into dollars using the historic rate described in § 1.987-1(c)(3), which is the yearly average exchange rate for year 5.

(v) The inventory held on Business A's balance sheet on January 1, year 5, is a historic item under § 1.987-1(e). For purposes of determining the owner functional currency net value of Business A on the last day of year 5 pursuant to § 1.987-4(e), the FIFO cost basis of the inventory is translated into dollars using the historic rate, which pursuant to § 1.987-1(c)(3)(i)(B) is the yearly average exchange rate for year 5.

(vi) Pursuant to paragraph (c)(3) of this section, for purposes of applying § 1.987-4 with respect to Business A for year 5, the owner functional currency net value of Business A on the last day of year 4 under § 1.987-4(d)(1)(B) is the amount that was determined under § 1.987-4(d)(1)(A) of the 2006 proposed section 987 regulations for year 4. Additionally, Business A's net unrecognized section 987 gain or loss for all prior years under § 1.987-4(c) shall take into account the aggregate of the amounts determined under § 1.987-4(d) of the 2006 proposed section 987 regulations for year 1 through year 4, reduced by the amounts taken into account under § 1.987-5 of the 2006 proposed section 987 regulations upon a remittance for all such prior taxable years.

(d) *Adjustments to avoid double counting.* If a difference between the treatment of any item under these regulations and the treatment of the item under the taxpayer's prior section 987 method would result in income, gain, deduction or loss being taken into account more than once, then the net unrecognized section 987 gain or loss of the section 987 QBU, as determined under § 1.987-4(b) for the first taxable year for which these regulations apply, shall be adjusted to account for the difference.

(e) *Reporting*—(1) *In general.* Except as otherwise provided in this paragraph (e), the taxpayer must attach a statement titled "Section 987 Transition Information" to its timely filed return for the first taxable year to which these regulations under section 987 apply providing the following information:

(i) A description of each section 987 QBU to which these rules apply, the section 987 QBU's owner, the section 987 QBU's principal place of business, and a description of the prior section 987 method used by the taxpayer to de-

termine section 987 gain or loss with respect to the section 987 QBU.

(ii) Any assumptions used by the taxpayer for determining the exchange rates used to translate the amount of assets and liabilities transferred to the section 987 QBU on the transition date, as provided in paragraph (b)(3) of this section.

(iii) With respect to each section 987 QBU subject to paragraph (c) of this section, a statement regarding whether historic items (as defined in § 1.987-1(c)(3)) are translated pursuant to paragraph (c)(2) of this section at the same historic rates as were used under the taxpayer's application of the 2006 proposed regulations or at the historic rates determined under § 1.987-1(c)(3).

(iv) With respect to each section 987 QBU with respect to which an adjustment is made pursuant to paragraph (d) of this section, a description of the adjustment and the basis for the computation of such adjustments.

(2) *Attachments not required where information is reported on a form.* Paragraph (e) of this section shall not apply to the extent the information described in such paragraph is required to be reported on a form published by the Commissioner.

[T.D. 9794, 81 FR 88845, Dec. 8, 2016]

§ 1.987-11 Effective/applicability date.

(a) *In general.* Except as otherwise provided in this section, §§ 1.987-1 through 1.987-10 shall apply to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016.

(b) *Application of these regulations to taxable years beginning after December 7, 2016.* A taxpayer may apply these regulations under section 987 to taxable years beginning after December 7, 2016, provided the taxpayer consistently applies these regulations to such taxable years with respect to all section 987 QBUs directly or indirectly owned by the taxpayer on the transition date (as defined in paragraph (b)(2) of this section) as well as all section 987 QBUs directly or indirectly owned on the transition date by members that file a consolidated return with the taxpayer or by any controlled foreign corporation, as defined in section 957, in which a member owns more than 50

percent of the voting power or stock value, as determined under section 958(a).

(c) *Transition date.* The transition date is the first day of the first taxable year to which these regulations under section 987 are applicable with respect to a taxpayer under this section.

[T.D. 9794, 81 FR 88845, Dec. 8, 2016]

§ 1.987-12 Deferral of section 987 gain or loss.

(a) *In general*—(1) *Overview.* This section provides rules that defer the recognition of section 987 gain or loss that, but for this section, would be recognized in connection with certain QBU terminations and certain other transactions involving partnerships. This paragraph (a) provides an overview of this section and describes the section's scope of application, including with respect to QBUs subject to section 987 but to which §§ 1.987-1 through 1.987-11 generally do not apply. Paragraph (b) of this section describes the extent to which section 987 gain or loss is recognized under § 1.987-5 or similar principles in the taxable year of a deferral event (as defined in paragraph (b)(2) of this section) with respect to a QBU. Paragraph (c) of this section describes the extent to which section 987 gain or loss that, as a result of paragraph (b), is not recognized under § 1.987-5 or similar principles is recognized upon the occurrence of subsequent events. Paragraph (d) of this section describes the extent to which section 987 loss is recognized under § 1.987-5 or similar principles in the taxable year of an outbound loss event (as defined in paragraph (d)(2) of this section) with respect to a QBU. Paragraph (e) of this section provides rules for determining the source and character of gains and losses that, as a result of this section, are not recognized under § 1.987-5 or similar principles in the taxable year of a deferral event or outbound loss event. Paragraph (f) of this section defines controlled group and qualified successor for purposes of this section. Paragraph (g) of this section provides an anti-abuse rule. Paragraph (h) of this section provides examples illustrating the rules described in this section. Paragraph (i) of this section provides rules coordinating the appli-

cation of this section with the fresh start transition method. Paragraph (j) of this section provides dates of applicability.

(2) *Scope.* This section applies to any foreign currency gain or loss realized under section 987(3), including foreign currency gain or loss of an entity described in § 1.987-1(b)(1)(ii) (certain entities not otherwise subject to the regulations under section 987). References in this section to section 987 gain or loss refer to any foreign currency gain or loss realized under section 987(3), references to a section 987 QBU refer to any eligible QBU (as defined in § 1.987-1(b)(3)(i), but without regard to § 1.987-1(b)(3)(ii)) that is subject to section 987, and references to a section 987 aggregate partnership refer to any partnership for which the acquisition or disposition of a partnership interest could give rise to foreign currency gain or loss realized under section 987(3). Additionally, references to recognition of section 987 gain or loss under § 1.987-5 encompass any determination and recognition of gain or loss under section 987(3) that would occur but for this section. Accordingly, the principles of this section apply to a QBU subject to section 987 regardless of whether the QBU otherwise is subject to §§ 1.987-1 through 1.987-11. An owner of a QBU that is not subject to § 1.987-5 must adapt the rules set forth in this section as necessary to recognize section 987 gains or losses that are subject to this section consistent with the principles of this section.

(3) *Exceptions*—(i) *Annual deemed termination elections.* This section does not apply to section 987 gain or loss of a section 987 QBU with respect to which the annual deemed termination election described in § 1.987-8(d) is in effect.

(ii) *De minimis exception.* This section does not apply to a section 987 QBU for a taxable year if the net unrecognized section 987 gain or loss of the section 987 QBU that, as a result of this section, would not be recognized under § 1.987-5 in the taxable year does not exceed \$5 million.

(b) *Gain and loss recognition in connection with a deferral event*—(1) *In general.* Notwithstanding § 1.987-5, the owner of a section 987 QBU with respect to

which a deferral event occurs (a deferral QBU) includes in taxable income section 987 gain or loss in connection with the deferral event only to the extent provided in paragraphs (b)(3) and (c) of this section. However, if the deferral event also constitutes an unbound loss event described in paragraph (d) of this section, the amount of loss recognized by the owner may be further limited under that paragraph.

(2) *Deferral event*—(i) *In general*. A deferral event with respect to a section 987 QBU means any transaction or series of transactions that satisfy the conditions described in paragraphs (b)(2)(ii) and (iii) of this section.

(ii) *Transactions*. The transaction or series of transactions include either:

(A) A termination of the section 987 QBU other than any of the following terminations: A termination described in § 1.987-8(b)(3), a termination described in § 1.987-8(c), or a termination described solely in § 1.987-8(b)(1); or

(B) A disposition of part of an interest in a section 987 aggregate partnership or DE through which the section 987 QBU is owned, a disposition of part of a directly held section 987 QBU, or any contribution by another person to a section 987 aggregate partnership, DE, or section 987 QBU of assets that, immediately after the contribution, are not considered to be included on the books and records of an eligible QBU, provided that the contribution gives rise to a deemed transfer from the section 987 QBU to the owner. See paragraph (h) of this section, *Examples I, 2, and 4*, for illustrations of this rule.

(iii) *Assets on books of successor QBU*. Immediately after the transaction or series of transactions, assets of the section 987 QBU are reflected on the books and records of a successor QBU (as defined in paragraph (b)(4) of this section).

(3) *Gain or loss recognized under § 1.987-5 in the taxable year of a deferral event*. In the taxable year of a deferral event with respect to a deferral QBU, the owner of the deferral QBU recognizes section 987 gain or loss as determined under § 1.987-5, except that, solely for purposes of applying § 1.987-5, all assets and liabilities of the deferral QBU that, immediately after the deferral event, are reflected on the books

and records of a successor QBU are treated as not having been transferred and therefore as remaining on the books and records of the deferral QBU notwithstanding the deferral event.

(4) *Successor QBU*. For purposes of this section, a section 987 QBU (potential successor QBU) is a successor QBU with respect to a section 987 QBU referred to in paragraph (b)(2)(ii) of this section if, immediately after the transaction or series of transactions described in that paragraph, the potential successor QBU satisfies all of the conditions described in paragraphs (b)(4)(i) through (iii) of this section.

(i) The books and records of the potential successor QBU reflect assets that, immediately before the transaction or series of transactions described in paragraph (b)(2)(ii) of this section, were reflected on the books and records of the section 987 QBU referred to in that paragraph.

(ii) The owner of the potential successor QBU and the owner of the section 987 QBU referred to in paragraph (b)(2)(ii) of this section immediately before the transaction or series of transactions described in that paragraph are members of the same controlled group.

(iii) In the case of a section 987 QBU referred to in paragraph (b)(2)(ii)(A) of this section, if the owner of the section 987 QBU immediately before the transaction or series of transactions described in that paragraph was a U.S. person, the potential successor QBU is owned by a U.S. person.

(c) *Recognition of deferred section 987 gain or loss in the taxable year of a deferral event and in subsequent taxable years*—(1) *In general*—(i) *Deferred section 987 gain or loss*. A deferral QBU owner (as defined in paragraph (c)(1)(ii) of this section) recognizes section 987 gain or loss attributable to the deferral QBU that, as a result of paragraph (b) of this section, is not recognized in the taxable year of the deferral event under § 1.987-5 (deferred section 987 gain or loss) in the taxable year of the deferral event and in subsequent taxable years as provided in paragraphs (c)(2) through (4) of this section.

(ii) *Deferral QBU owner*. For purposes of this paragraph (c), a deferral QBU owner means, with respect to a deferral

QBU, the owner of the deferral QBU immediately before the deferral event, or the owner's qualified successor.

(2) *Recognition upon a subsequent remittance*—(i) *In general.* Except as provided in paragraph (c)(3) of this section, a deferral QBU owner recognizes deferred section 987 gain or loss in the taxable year of the deferral event and in subsequent taxable years upon a remittance from a successor QBU to the owner of the successor QBU (successor QBU owner) in the amount described in paragraph (c)(2)(ii) of this section.

(ii) *Amount.* The amount of deferred section 987 gain or loss that is recognized pursuant to this paragraph (c)(2) in a taxable year of the deferral QBU owner is the outstanding deferred section 987 gain or loss (that is, the amount of deferred section 987 gain or loss not previously recognized) multiplied by the remittance proportion of the successor QBU owner with respect to the successor QBU for the taxable year ending with or within the taxable year of the deferral QBU owner, as determined under § 1.987-5(b) (and, to the extent relevant, paragraphs (b) and (c)(2)(iii) of this section) without regard to any election under § 1.987-8(d). For purposes of computing this remittance proportion, multiple successor QBUs of the same deferral QBU are treated as a single successor QBU. See paragraph (h) of this section, *Example 5*, for an illustration of this rule.

(iii) *Deemed remittance when a successor QBU ceases to be owned by a member of the deferral QBU owner's controlled group.* For purposes of this paragraph (c)(2), in a taxable year of the deferral QBU owner in which a successor QBU ceases to be owned by a member of a controlled group that includes the deferral QBU owner, the successor QBU owner is treated as having a remittance proportion of 1. Accordingly, if there is only one successor QBU with respect to a deferral QBU and that successor QBU ceases to be owned by a member of the controlled group that includes the deferral QBU owner, all outstanding deferred section 987 gain or loss with respect to that deferral QBU will be recognized. This paragraph (c)(2)(iii) does not affect the application of §§ 1.987-1 through 1.987-11 to the

successor QBU owner with respect to its ownership of the successor QBU.

(3) *Recognition of deferred section 987 loss in certain outbound successor QBU terminations.* Notwithstanding paragraph (c)(2) of this section, if assets of the successor QBU (transferred assets) are transferred (or deemed transferred) in a transaction that would constitute an outbound loss event if the successor QBU had a net accumulated section 987 loss at the time of the exchange, then the deferral QBU owner recognizes outstanding deferred section 987 loss, if any, to the extent it would recognize loss under paragraph (d)(1) of this section if (i) the deferral QBU owner owned the successor QBU, (ii) the deferral QBU owner had net unrecognized section 987 loss with respect to the successor QBU equal to its outstanding deferred section 987 loss with respect to the deferral QBU, and (iii) the transferred assets were transferred (or deemed transferred) in an outbound loss event. Any outstanding deferred section 987 loss with respect to the deferral QBU that is not recognized as a result of the preceding sentence is recognized by the deferral QBU owner in the first taxable year in which the deferral QBU owner (including any qualified successor) ceases to be a member of a controlled group that includes the acquirer of the transferred assets or any qualified successor of such acquirer.

(4) *Special rules regarding successor QBUs*—(i) *Successor QBU with respect to a deferral QBU that is a successor QBU.* If a section 987 QBU is a successor QBU with respect to a deferral QBU that is a successor QBU with respect to another deferral QBU, the first-mentioned section 987 QBU is considered a successor QBU with respect to the second-mentioned deferral QBU. For example, if QBU A is a successor QBU with respect to QBU B, and QBU B is a successor QBU with respect to QBU C, then QBU A is a successor QBU with respect to QBU C.

(ii) *Separation of a successor QBU.* If a successor QBU with respect to a deferral QBU separates into two or more separated QBUs (as defined in § 1.987-2(c)(9)(iii)), each separated QBU is considered a successor QBU with respect to the deferral QBU.

(iii) *Combination of a successor QBU.* If a successor QBU with respect to a deferral QBU combines with another section 987 QBU of the same owner, resulting in a combined QBU (as defined in § 1.987-2(c)(9)(i)), the combined QBU is considered a successor QBU with respect to the deferral QBU.

(d) *Loss recognition upon an outbound loss event—(1) In general.* Notwithstanding § 1.987-5, the owner of a section 987 QBU with respect to which an outbound loss event occurs (an outbound loss QBU) includes in taxable income in the taxable year of an outbound loss event section 987 loss with respect to that section 987 QBU only to the extent provided in paragraph (d)(3) of this section.

(2) *Outbound loss event.* An outbound loss event means, with respect to a section 987 QBU:

(i) Any termination of the section 987 QBU in connection with a transfer by a U.S. person of assets of the section 987 QBU to a foreign person that is a member of the same controlled group as the U.S. transferor immediately before the transaction or, if the transferee did not exist immediately before the transaction, immediately after the transaction (related foreign person), provided that the termination would result in the recognition of section 987 loss with respect to the section 987 QBU under § 1.987-5 and paragraph (b) of this section but for this paragraph (d); or

(ii) Any transfer by a U.S. person of part of an interest in a section 987 aggregate partnership or DE through which the U.S. person owns the section 987 QBU to a related foreign person that has the same functional currency as the section 987 QBU, or any contribution by such a related foreign person to such a partnership or DE of assets that, immediately after the contribution, are not considered to be included on the books and records of an eligible QBU, provided that the transfer would result in the recognition of section 987 loss with respect to the section 987 QBU under § 1.987-5 and paragraph (b) of this section but for this paragraph (d). See paragraph (h) of this section, *Example 3*, for an illustration of this rule.

(3) *Loss recognized upon an outbound loss event.* In the taxable year of an outbound loss event with respect to an outbound loss QBU, the owner of the outbound loss QBU recognizes section 987 loss as determined under § 1.987-5 and paragraphs (b) and (c) of this section, except that, solely for purposes of applying § 1.987-5, the following assets and liabilities of the outbound loss QBU are treated as not having been transferred and therefore as remaining on the books and records of the outbound loss QBU notwithstanding the outbound loss event:

(i) In the case of an outbound loss event described in paragraph (d)(2)(i) of this section, assets and liabilities that, immediately after the outbound loss event, are reflected on the books and records of the related foreign person described in that paragraph or of an eligible QBU owned by such related foreign person; and

(ii) In the case of an outbound loss event described in paragraph (d)(2)(ii) of this section, assets and liabilities that, immediately after the outbound loss event, are reflected on the books and records of the eligible QBU from which the assets and liabilities of the outbound loss QBU are allocated and not on the books and records of a section 987 QBU.

(4) *Adjustment of basis of stock received in certain nonrecognition transactions.* If an outbound loss event results from the transfer of assets of the outbound loss QBU in a transaction described in section 351 or section 361, the basis of the stock that is received in the transaction is increased by an amount equal to the section 987 loss that, as a result of this paragraph (d), is not recognized with respect to the outbound loss QBU in the taxable year of the outbound loss event (outbound section 987 loss).

(5) *Recognition of outbound section 987 loss that is not converted into stock basis.* Outbound section 987 loss attributable to an outbound loss event that is not described in paragraph (d)(4) of this section is recognized by the owner of the outbound loss QBU in the first taxable year in which the owner or any qualified successor of the owner ceases to be a member of a controlled group that includes the related foreign person referred to in paragraph (d)(2)(i) or (ii)

of this section, or any qualified successor of such person.

(e) *Source and character*—(1) *Deferred section 987 gain or loss and certain outbound section 987 loss.* The source and character of deferred section 987 gain or loss recognized pursuant to paragraph (c) of this section, and of outbound section 987 loss recognized pursuant to paragraph (d)(5) of this section, is determined under §1.987-6 as if such deferred section 987 gain or loss were recognized pursuant to §1.987-5 without regard to this section on the date of the related deferral event or outbound loss event.

(2) *Outbound section 987 loss reflected in stock basis.* If loss is recognized on the sale or exchange of stock described in paragraph (d)(4) of this section within two years of the outbound loss event described in that paragraph, then, to the extent of the outbound section 987 loss, the source and character of the loss recognized on the sale or exchange is determined under §1.987-6 as if such loss were section 987 loss recognized pursuant to §1.987-5 without regard to this section on the date of the outbound loss event.

(f) *Definitions*—(1) *Controlled group.* For purposes of this section, a controlled group means all persons with the relationships to each other specified in sections 267(b) or 707(b).

(2) *Qualified successor.* For purposes of this section, a qualified successor with respect to a corporation (transferor corporation) means another corporation (acquiring corporation) that acquires the assets of the transferor corporation in a transaction described in section 381(a), but only if (A) the acquiring corporation is a domestic corporation and the transferor corporation was a domestic corporation, or (B) the acquiring corporation is a controlled foreign corporation (as defined in section 957(a)) (CFC) and the transferor corporation was a CFC. A qualified successor of a corporation includes the qualified successor of a qualified successor of the corporation.

(g) *Anti-abuse.* No section 987 loss is recognized under §1.987-5 or this section in connection with a transaction or series of transactions that are undertaken with a principal purpose of avoiding the purposes of this section.

(h) *Examples.* The following examples illustrate the application of this section. For purposes of the examples, DC1 is a domestic corporation that owns all of the stock of DC2, which is also a domestic corporation, and CFC1 and CFC2 are CFCs. In addition, DC1, DC2, CFC1, and CFC2 are members of a controlled group as defined in paragraph (f)(1) of this section, and the de minimis rule of paragraph (a)(3)(ii) of this section is not applicable. Finally, except as otherwise provided, Business A is a section 987 QBU with the euro as its functional currency, there are no transfers between Business A and its owner, and Business A's assets are not depreciable or amortizable.

(1) *Example 1. Contribution of a section 987 QBU to a member of the controlled group*—(i) *Facts.* DC1 owns all of the interests in Business A. The balance sheet of Business A reflects assets with an aggregate adjusted basis of €1,000x and no liabilities. DC1 contributes €900x of Business A's assets to DC2 in an exchange to which section 351 applies. Immediately after the contribution, the remaining €100x of Business A's assets are no longer reflected on the books and records of a section 987 QBU. DC2, which has the U.S. dollar as its functional currency, uses the former Business A assets in a business (Business B) that constitutes a section 987 QBU. At the time of the contribution, Business A has net accumulated unrecognized section 987 gain of \$100x.

(ii) *Analysis.* (A) Under §1.987-2(c)(2)(ii), DC1's contribution of €900x of Business A's assets to DC2 is treated as a transfer of all of the assets of Business A to DC1, immediately followed by DC1's contribution of €900x of Business A's assets to DC2. The contribution of Business A's assets is a deferral event within the meaning of paragraph (b)(2) of this section because:

(1) The transfer from Business A to DC1 is a transfer of substantially all of Business A's assets to DC1, resulting in a termination of Business A under §1.987-8(b)(2); and

(2) Immediately after the transaction, assets of Business A are reflected on the books and records of Business B, a section 987 QBU owned by a member of DC1's controlled group

and a successor QBU within the meaning of paragraph (b)(4) of this section. Accordingly, Business A is a deferral QBU within the meaning of paragraph (b)(1) of this section, and DC1 is a deferral QBU owner of Business A within the meaning of paragraph (c)(1)(ii) of this section.

(B) Under paragraph (b)(3) of this section, DC1's taxable income in the taxable year of the deferral event includes DC1's section 987 gain or loss determined with respect to Business A under § 1.987-5, except that, for purposes of applying § 1.987-5, all assets and liabilities of Business A that are reflected on the books and records of Business B immediately after Business A's termination are treated as not having been transferred and therefore as though they remained on Business A's books and records (notwithstanding the deemed transfer of those assets under § 1.987-8(e)). Accordingly, in the taxable year of the deferral event, DC1 is treated as making a remittance of €100x, corresponding to the assets of Business A that are no longer reflected on the books and records of a section 987 QBU, and is treated as having a remittance proportion with respect to Business A of 0.1, determined by dividing the €100x remittance by the sum of the remittance and the €900x aggregate adjusted basis of the gross assets deemed to remain on Business A's books at the end of the year. Thus, DC1 recognizes \$10x of section 987 gain in the taxable year of the deferral event. DC1's deferred section 987 gain equals \$90x, which is the amount of section 987 gain that, but for the application of paragraph (b) of this section, DC1 would have recognized under § 1.987-5 (\$100x), less the amount of section 987 gain recognized by DC1 under § 1.987-5 and this section (\$10x).

(2) *Example 2. Election to be classified as a corporation*—(i) *Facts*. DC1 owns all of the interests in Entity A, a DE. Entity A conducts Business A, which has net accumulated unrecognized section 987 gain of \$500x. Entity A elects to be classified as a corporation under § 301.7701-3(a). As a result of the election and pursuant to § 301.7701-3(g)(1)(iv), DC1 is treated as contributing all of the assets and liabilities of Business A to newly-formed CFC1,

which has the euro as its functional currency. Immediately after the contribution, the assets and liabilities of Business A are reflected on CFC1's balance sheet.

(ii) *Analysis*. Under § 1.987-2(c)(2)(ii), DC1's contribution of all of the assets and liabilities of Business A to CFC1 is treated as a transfer of all of the assets and liabilities of Business A to DC1, followed immediately by DC1's contribution of those assets and liabilities to CFC1. Because the deemed transfer from Business A to DC1 is a transfer of substantially all of Business A's assets to DC1, the Business A QBU terminates under § 1.987-8(b)(2). The contribution of Business A's assets is not a deferral event within the meaning of paragraph (b)(2) of this section because, immediately after the transaction, no assets of Business A are reflected on the books and records of a successor QBU within the meaning of paragraph (b)(4) of this section due to the fact that the assets of Business A are not reflected on the books and records of a section 987 QBU immediately after the termination as well as the fact that the requirement of paragraph (b)(4)(iii) of this section is not met. Accordingly, DC1 recognizes section 987 gain with respect to Business A under § 1.987-5 without regard to this section. Because the requirement of paragraph (b)(4)(iii) of this section is not met, the result would be the same even if the assets of Business A were transferred in a section 351 exchange to an existing foreign corporation that had a different functional currency than Business A.

(3) *Example 3. Outbound loss event*—(i) *Facts*. The facts are the same as in *Example 2 in paragraph (h)(2) of this section*, except that Business A has net accumulated unrecognized section 987 loss of \$500x rather than net accumulated unrecognized section 987 gain of \$500x.

(ii) *Analysis*. (A) The analysis of the transactions under §§ 1.987-2(c)(2)(ii), 1.987-8(b)(2), and paragraph (b) of this section is the same as in *Example 2 in paragraph (h)(2) of this section*. However, the termination of Business A as a result of the transfer of the assets of Business A by a U.S. person (DC1) to a foreign person (CFC1) that is a member

of DC1's controlled group is an outbound loss event described in paragraph (d)(2) of this section.

(B) Under paragraphs (d)(1) and (3) of this section, in the taxable year of the outbound loss event, DC1 includes in taxable income section 987 loss recognized with respect to Business A as determined under §1.987-5, except that, for purposes of applying §1.987-5, all assets and liabilities of Business A that are reflected on the books and records of CFC1, a related foreign person described in paragraph (d)(2) of this section, are treated as not having been transferred. Accordingly, DC1's remittance proportion with respect to Business A is 0, and DC1 recognizes no section 987 loss with respect to Business A. DC1's outbound section 987 loss is \$500x, which is the amount of section 987 loss that DC1 would have recognized under §1.987-5 (\$500x) without regard to paragraph (d) of this section, less the amount of section 987 loss recognized by DC1 under paragraph (d)(3) of this section (\$0). Under paragraph (d)(4) of this section, DC1 must increase its basis in its CFC1 shares by the amount of the outbound section 987 loss (\$500x).

(4) *Example 4. Conversion of a DE to a partnership*—(i) *Facts.* (A) DC1 owns all of the interests in Entity A, a DE that conducts Business A. On the last day of Year 1, DC1 sells 50 percent of its interest in Entity A to DC2 (the Entity A sale).

(B) For Federal income tax purposes, Entity A is converted to a partnership when DC2 purchases the 50 percent interest in Entity A. DC2's purchase is treated as the purchase of 50 percent of the assets of Entity A (that is, the assets of Business A), which, prior to the purchase, were treated as held directly by DC1 for Federal income tax purposes. Immediately after DC2's deemed purchase of 50 percent of Business A assets, DC1 and DC2 are treated as contributing their respective interests in Business A assets to a partnership. See Rev. Rul. 99-5, 1999-1 CB 434 (situation 1). In connection with the deemed contribution, DC1 and DC2 agree to share equally in all items of the partnership's profits and loss, and, for purposes of §1.987-7, to determine their share of assets and liabilities of the re-

sulting partnership in accordance with their respective shares of partnership profits.

(ii) *Analysis.* (A) The transactions deemed to occur under Rev. Rul. 99-5 are not taken into account for purposes of this section. The Entity A sale and resulting existence of a partnership, however, have consequences under section 987 and this section, as described in this Example 4 in paragraphs (h)(4)(ii)(B) through (D) of this section.

(B) Immediately after the Entity A sale, Entity A is a section 987 aggregate partnership within the meaning of §1.987-1(b)(5) because DC1 and DC2 own all the interests in partnership capital and profits, DC1 and DC2 are related within the meaning of section 267(b), and the partnership has an eligible QBU (Business A) that would be a section 987 QBU with respect to a partner if owned by the partner directly. As a result of the Entity A sale, 50 percent of the assets and liabilities of Business A ceased to be reflected on the books and records of DC1's Business A section 987 QBU. As a result, such assets and liabilities are treated as if they were transferred from DC1's Business A section 987 QBU to DC1. Additionally, following DC2's acquisition of 50 percent of the interest in Entity A, DC2 is allocated 50 percent of the assets and liabilities of Business A under §§1.987-2(b). Because DC2 and Business A have different functional currencies, DC2's portion of the Business A assets and liabilities constitutes a section 987 QBU. Accordingly, 50 percent of the assets and liabilities of Business A are treated as transferred by DC2 to DC2's Business A section 987 QBU.

(C) The Entity A sale is a deferral event described in paragraph (b)(2) of this section because:

(1) The sale constitutes the disposition of part of an interest in a DE; and

(2) Immediately after the transaction, assets of DC1's Business A section 987 QBU are reflected on the books and records of DC1's Business A section 987 QBU and DC2's Business A section 987 QBU, each of which is a successor QBU with respect to DC1's Business A section 987 QBU within the meaning of paragraph (b)(4) of this section. Accordingly, DC1's Business A section 987 QBU is a deferral QBU within the

meaning of paragraph (b)(1) of this section, and DC1 is a deferral QBU owner within the meaning of paragraph (c)(1)(ii) of this section. Under paragraph (b)(1) of this section, DC1 includes in taxable income section 987 gain or loss with respect to Business A in connection with the deferral event to the extent provided in paragraphs (b)(3) and (c) of this section.

(D) Under paragraph (b) of this section, in the taxable year of the Entity A sale, DC1 includes in taxable income section 987 gain or loss with respect to Business A as determined under § 1.987-5, except that, for purposes of applying § 1.987-5, all assets and liabilities of Business A that, immediately after the Entity A sale, are reflected on the books and records of successor QBUs are treated as though they were not transferred and therefore as remaining on the books and records of DC1's Business A section 987 QBU notwithstanding the Entity A sale. Accordingly, DC1's remittance amount under § 1.987-5 is \$0, and DC1 recognizes no section 987 gain or loss with respect to Business A.

(5) *Example 5. Partial recognition of deferred gain or loss—(i) Facts.* DC1 owns all of the interests in Entity A, a DE that conducts Business A in Country X. During Year 1, DC1 contributes all of its interests in Entity A to DC2 in an exchange to which section 351 applies. At the time of the contribution, Business A has net accumulated unrecognized section 987 gain of \$100x. After the contribution, Entity A continues to conduct business in Country X (Business B). In Year 3, as a result of a net transfer of property from Business B to DC2, DC2's remittance proportion with respect to Business B, as determined under § 1.987-5, is 0.25.

(ii) *Analysis.* (A) For the reasons described in *Example 1 in paragraph (h)(1) of this section*, the contribution of Entity A by DC1 to DC2 results in a termination of Business A and a deferral event with respect to Business A, a deferral QBU; DC1 is a deferral QBU owner within the meaning of paragraph (c)(1)(ii) of this section; Business B is a successor QBU with respect to Business A; DC2 is a successor QBU owner; and the \$100x of net accumulated unrecognized section 987 gain with respect to

Business A becomes deferred section 987 gain as a result of the deferral event.

(B) Under paragraph (c)(1) of this section, DC1 recognizes deferred section 987 gain with respect to Business A in accordance with paragraphs (c)(2) through (4) of this section. Under paragraph (c)(2)(i) of this section, DC1 recognizes deferred section 987 gain in Year 3 as a result of the remittance from Business B to DC2. Under paragraph (c)(2)(ii) of this section, the amount of deferred section 987 gain that DC1 recognizes is \$25x, which is DC1's outstanding deferred section 987 gain or loss (\$100x) with respect to Business A multiplied by the remittance proportion (0.25) of DC2 with respect to Business B for the taxable year as determined under § 1.987-5(b).

(i) *Coordination with fresh start transition method—(1) In general.* If a taxpayer is a deferral QBU owner, or is or was the owner of an outbound loss QBU, and the taxpayer is required under § 1.987-10(a) to apply the fresh start transition method described in § 1.987-10(b) to the deferral QBU or outbound loss QBU, or would have been so required if the taxpayer had owned the deferral QBU or outbound loss QBU on the transition date (as defined in § 1.987-11(c)), the adjustments described in paragraphs (i)(2) and (3) of this section, as applicable, must be made on the transition date.

(2) *Adjustment to deferred section 987 gain or loss.* The amount of any outstanding deferred section 987 gain or loss of a deferral QBU owner with respect to a deferral QBU described in paragraph (i)(1) of this section must be adjusted to equal the amount of outstanding deferred section 987 gain or loss that the deferral QBU owner would have had with respect to the deferral QBU on the transition date if, immediately before the deferral event, the deferral QBU had transitioned to the method prescribed by §§ 1.987-1 through 1.987-10 pursuant to the fresh start transition method.

(3) *Adjustments in the case of an outbound loss event.* The basis of any stock described in paragraph (d)(4) of this section that was received in connection with the transfer (or deemed transfer)

of assets of an outbound loss QBU described in paragraph (i)(1) of this section and that is held on the transition date must be adjusted to equal the basis that such stock would have had on the transition date if, immediately prior to the outbound loss event, the outbound loss QBU had transitioned to the method prescribed by §§1.987-1 through 1.987-10 pursuant to the fresh start transition method. If no such stock was received, the amount of any outbound section 987 loss with respect to the outbound loss QBU that may be recognized on or after the transition date pursuant to paragraph (d)(5) of this section must be adjusted to equal the amount of such loss that would be outstanding and that may be recognized pursuant to that paragraph if, immediately before the outbound loss event, the outbound loss QBU had transitioned to the method prescribed by §§1.987-1 through 1.987-10 pursuant to the fresh start transition method.

(j) *Applicability date*—(1) *In general.* Except as described in paragraph (j)(2) of this section, this section applies to any deferral event or outbound loss event that occurs on or after January 6, 2017. This section also applies to any deferral event or outbound loss event that occurs as a result of an entity classification election made under §301.7701-3 that is filed on or after January 6, 2017, and that is effective before January 6, 2017.

(2) *Exceptions*—(i) *Principal purpose.* This section applies to any deferral event or outbound loss event occurring on or after December 7, 2016, if such deferral event or outbound loss event was undertaken with a principal purpose of recognizing section 987 loss.

(ii) *Entity classification.* This section also applies to any deferral event or outbound loss event that occurs as a result of an entity classification election made under §301.7701-3 that was filed on or after December 22, 2016, that was effective before December 7, 2016, and that was undertaken with a principal purpose of recognizing section 987 loss.

[T.D. 9857, 84 FR 20796, May 13, 2019]

§ 1.988-0 Taxation of gain or loss from a section 988 transaction; Table of Contents.

This section lists captioned paragraphs contained in §§1.988-1 through 1.988-6.

§ 1.988-1 Certain definitions and special rules.

- (a) Section 988 transaction.
 - (1) In general.
 - (2) Description of transactions.
 - (3) [Reserved]
 - (4) Treatment of assets and liabilities of a section 987 aggregate partnership or DE that are not attributed to an eligible QBU.
 - (5) [Reserved]
 - (6) Examples.
 - (7) Special rules for regulated futures contracts and non-equity options.
 - (8) Special rules for qualified funds.
 - (9) Exception for certain transactions entered into by an individual.
 - (10) Intra-taxpayer transactions.
 - (11) Authority of Commissioner to include or exclude transactions from section 988.
- (b) Spot contract.
- (c) Nonfunctional currency.
- (d) Spot rate.
 - (1) In general.
 - (2) Consistency required in valuing transactions subject to section 988.
 - (3) Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.
 - (4) Currency where an official government established rate differs from a free market rate.
- (e) Exchange gain or loss.
- (f) Hyperinflationary currency.
- (g) Fair market value.
- (h) Interaction with sections 1092 and 1256 in examples.
- (i) Effective date.

§ 1.988-2 Recognition and computation of exchange gain or loss.

- (a) Disposition of nonfunctional currency.
 - (1) Recognition of exchange gain or loss.
 - (2) Computation of exchange gain or loss.
- (b) Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments.
 - (1) Translation of interest income received with respect to a nonfunctional currency demand account.
 - (2) Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in §1.988-1(a)(1)(ii) and (2)(i).
 - (3) Exchange gain or loss recognized by the holder with respect to accrued interest income.
 - (4) Exchange gain or loss recognized by the obligor with respect to accrued interest expense.

§ 1.988-0

26 CFR Ch. I (4-1-23 Edition)

(5) Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.

(6) Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.

(7) Payment ordering rules.

(8) Limitation of exchange gain or loss on payment or disposition of a debt instrument.

(9) Examples.

(10) Treatment of bond premium.

(11) Market discount.

(12) Tax exempt bonds.

(13) Nonfunctional currency debt exchanged for stock of obligor.

(14) [Reserved]

(15) Debt instruments and deposits denominated in hyperinflationary currencies.

(16) [Reserved]

(17) Coordination with installment method under section 453.

(18) Interaction of section 988 and § 1.1275-2(g).

(c) Item of expense or gross income or receipts which is to be paid or received after the date accrued.

(1) In general.

(2) Determination of exchange gain or loss with respect to an item of gross income or receipts.

(3) Determination of exchange gain or loss with respect to an item of expense.

(4) Examples.

(d) Exchange gain or loss with respect to forward contracts, futures contracts and option contracts.

(1) Scope.

(2) Realization of exchange gain or loss.

(3) Recognition of exchange gain or loss.

(4) Determination of exchange gain or loss.

(5) Hyperinflationary contracts.

(e) Currency swaps and notional principal contracts.

(1) Notional principal contract denominated in a single nonfunctional currency.

(2) Special rules for currency swaps.

(3) Amortization of swap premium or discount in the case of off market swaps.

(4) Treatment of taxpayer disposing of a currency swap.

(5) Examples.

(6) Special effective date for rules regarding currency swaps.

(7) Special rules for currency swap contracts in hyperinflationary currencies.

(f) Substance over form.

(1) In general.

(2) Example.

(g) Effective date.

(h) Timing of income and deductions from notional principal contracts.

§ 1.988-6 Nonfunctional Currency Contingent Payment Debt Instruments

(a) In general.

(1) Scope.

(2) Exception for hyperinflationary currencies.

(b) Instruments described in paragraph (a)(1)(i) of this section.

(1) In general.

(2) Application of noncontingent bond method.

(3) Treatment and translation of amounts determined under noncontingent bond method.

(4) Determination of gain or loss not attributable to foreign currency.

(5) Determination of foreign currency gain or loss.

(6) Source of gain or loss.

(7) Basis different from adjusted issue price.

(8) Fixed but deferred contingent payments.

(c) Examples.

(d) Multicurrency debt instruments.

(1) In general.

(2) Determination of denomination currency.

(3) Issuer/holder consistency.

(4) Treatment of payments in currencies other than the denomination currency.

(e) Instruments issued for nonpublicly traded property.

(1) Applicability.

(2) Separation into components.

(3) Treatment of components consisting of one or more noncontingent payments in the same currency.

(4) Treatment of components consisting of contingent payments.

(5) Basis different from adjusted issue price.

(6) Treatment of holder on sale, exchange, or retirement.

(f) Rules for nonfunctional currency tax exempt obligations described in § 1.1275-4(d).

(g) Effective date.

[T.D. 8400, 57 FR 9177, Mar. 17, 1992, as amended by T.D. 8860, 65 FR 2028, Jan. 13, 2000; T.D. 9157, 69 FR 52818, Aug. 30, 2004; T.D. 9794, 81 FR 88850, Dec. 8, 2016; T.D. 9795, 81 FR 88879, Dec. 8, 2016]

§ 1.988-1 Certain definitions and special rules.

(a) *Section 988 transaction*—(1) *In general*. The term “section 988 trans-

action” means any of the following transactions—

(i) A disposition of nonfunctional currency as defined in paragraph (c) of this section;

(ii) Any transaction described in paragraph (a)(2) of this section if any amount which the taxpayer is entitled to receive or is required to pay by reason of such transaction is denominated in terms of a nonfunctional currency or is determined by reference to the value of one or more nonfunctional currencies.

A transaction described in this paragraph (a) need not require or permit payment with a nonfunctional currency as long as any amount paid or received is determined by reference to the value of one or more nonfunctional currencies. The acquisition of nonfunctional currency is treated as a section 988 transaction for purposes of establishing the taxpayer’s basis in such currency and determining exchange gain or loss thereon.

(2) *Description of transactions*. The following transactions are described in this paragraph (a)(2).

(i) *Debt instruments*. Acquiring a debt instrument or becoming an obligor under a debt instrument. The term “debt instrument” means a bond, debenture, note, certificate or other evidence of indebtedness.

(ii) *Payables, receivables, etc.* Accruing, or otherwise taking into account, for purposes of subtitle A of the Internal Revenue Code, any item of expense or gross income or receipts which is to be paid or received after the date on which so accrued or taken into account. A payable relating to cost of goods sold, or a payable or receivable relating to a capital expenditure or receipt, is within the meaning of this paragraph (a)(2)(ii). Generally, a payable relating to foreign taxes (whether or not claimed as a credit under section 901) is within the meaning of this paragraph (a)(2)(ii). However, a payable of a domestic person relating to accrued foreign taxes of its qualified business unit (QBU branch) is not within the meaning of this paragraph (a)(2)(ii) if the QBU branch’s functional currency is the U.S. dollar and the foreign taxes are claimed as a credit under section 901.

(iii) *Forward contract, futures contract, option contract, or similar financial instrument.* Except as otherwise provided in this paragraph (a)(2)(iii) and paragraph (a)(4)(i) of this section, entering into or acquiring any forward contract, futures contract, option, warrant, or similar financial instrument.

(A) *Limitation for certain derivative instruments.* A forward contract, futures contract, option, warrant, or similar financial instrument is within this paragraph (a)(2)(iii) only if the underlying property to which the instrument ultimately relates is a nonfunctional currency or is otherwise described in paragraph (a)(1)(ii) of this section. Thus, if the underlying property of an instrument is another financial instrument (e.g., an option on a futures contract), then the underlying property to which such other instrument (e.g., the futures contract) ultimately relates must be a nonfunctional currency. For example, a forward contract to purchase wheat denominated in a nonfunctional currency, an option to enter into a forward contract to purchase wheat denominated in a nonfunctional currency, or a warrant to purchase stock denominated in a nonfunctional currency is not described in this paragraph (a)(2)(iii). On the other hand, a forward contract to purchase a nonfunctional currency, an option to enter into a forward contract to purchase a nonfunctional currency, an option to purchase a bond denominated in or the payments of which are determined by reference to the value of a nonfunctional currency, or a warrant to purchase nonfunctional currency is described in this paragraph (a)(2)(iii).

(B) *Nonfunctional currency notional principal contracts—(1) In general.* The term “similar financial instrument” includes a notional principal contract only if the payments required to be made or received under the contract are determined with reference to a nonfunctional currency.

(2) *Definition of notional principal contract.* The term “notional principal contract” means a contract (e.g., a swap, cap, floor or collar) that provides for the payment of amounts by one party to another at specified intervals calculated by reference to a specified index upon a notional principal amount

in exchange for specified consideration or a promise to pay similar amounts. For this purpose, a “notional principal contract” shall only include an instrument where the underlying property to which the instrument ultimately relates is money (e.g., functional currency), nonfunctional currency, or property the value of which is determined by reference to an interest rate. Thus, the term “notional principal contract” includes a currency swap as defined in § 1.988-2(e)(2)(ii), but does not include a swap referenced to a commodity or equity index.

(C) *Effective date with respect to certain contracts.* This paragraph (a)(2)(iii) does not apply to any forward contract, futures contract, option, warrant, or similar financial instrument entered into or acquired on or before October 21, 1988, if such instrument would have been marked to market under section 1256 if held on the last day of the taxable year.

(3) [Reserved] For further guidance, see § 1.988-1T(a)(3).

(4) *Treatment of assets and liabilities of a section 987 aggregate partnership or DE that are not attributed to an eligible QBU—(i) Scope.* This paragraph (a)(4) applies to assets and liabilities of a section 987 aggregate partnership as defined in § 1.987-1(b)(5), or of an entity disregarded as an entity separate from its owner for Federal income tax purposes (DE), that are not attributable to an eligible QBU as defined in § 1.987-1(b)(3).

(ii) *Section 987 Aggregate Partnerships.* For purposes of applying section 988 and the applicable regulations to transactions involving assets and liabilities described in paragraph (a)(4)(i) of this section that are held by a section 987 aggregate partnership, the owners of the section 987 aggregate partnership (within the meaning of § 1.987-1(b)(4)) shall be treated as owning their share of such assets and liabilities. Section 1.987-7(b) shall apply for purposes of determining an owner's share of such assets or liabilities.

(iii) *Disregarded entities.* For purposes of applying section 988 and the applicable regulations to transactions involving assets and liabilities described in paragraph (a)(4)(i) of this section that are held by a DE, the owner of the DE

(within the meaning of § 1.987-1(b)(4)) shall be treated as owning all such assets and liabilities.

(iv) *Example.* The following example illustrates the application of paragraph (a)(4) of this section:

Example. Liability held through a section 987 aggregate partnership. (i) *Facts.* P, a foreign partnership, has two equal partners, X and Y. X is a domestic corporation with the dollar as its functional currency. Y is a foreign corporation wholly owned by X that has the yen as its functional currency. P is a section 987 aggregate partnership. On January 1, 2021, P borrowed yen and issued a note to the lender that obligated P to pay interest and repay principal to the lender in yen. Also on January 1, 2021, P used the yen it borrowed from the lender to acquire all of the stock of F, a foreign corporation, from an unrelated person. P also holds an eligible QBU (within the meaning of § 1.987-1(b)(3)) that has the yen as its functional currency. P maintains one set of books and records. The assets and liabilities of the eligible QBU are reflected on the books and records of P as provided under § 1.987-2(b). The F stock held by P, and the yen liability incurred to acquire the F stock, are also recorded on the books and records of P but, pursuant to § 1.987-2(b)(2)(i), are not considered to be reflected on the books and records of the eligible QBU for purposes of section 987.

(ii) *Analysis.* X's portion of the assets and liabilities of the eligible QBU owned by P is a section 987 QBU. Y's portion of the assets and liabilities of the eligible QBU owned by P is not a section 987 QBU because Y and the eligible QBU have the same functional currency. Because the F stock and yen-denominated liability incurred to acquire such stock are not considered reflected on the books and records of the eligible QBU, they are not subject to section 987. In addition, because the F stock and the yen-denominated liability incurred to acquire such stock are held by P (but not attributable to P's eligible QBU), X and Y are treated as owning their respective shares of such stock and liability pursuant to § 1.988-1(a)(4)(ii) for purposes of applying section 988. As a result, P's becoming the obligor on the portion of the yen-denominated note that is treated as an obligation of X is a section 988 transaction pursuant to paragraphs (a)(1)(ii), (a)(2)(ii) and (a)(3) of this section. Similarly, the dispositions of yen to make payments of interest and principal on the liability, to the extent such yen are treated as owned by X under paragraph (a)(4)(ii) of this section, are section 988 transactions under paragraphs (a)(1)(i) and (a)(3) of this section. To the extent the yen are treated as owned by the eligible QBU, see § 1.987-2(c) for the treatment of the payment of yen as a transfer from the

eligible QBU to X. P's becoming the obligor on Y's portion of the yen-denominated note, and Y's portion of the yen disposed of in connection with payments on such note, are not section 988 transactions because Y has the yen as its functional currency.

(5) [Reserved]

(6) *Examples.* The following examples illustrate the application of paragraph (a) of this section. The examples assume that X is a U.S. corporation on an accrual method with the calendar year as its taxable year. Because X is a U.S. corporation the U.S. dollar is its functional currency under section 985. The examples also assume that section 988(d) does not apply.

Example 1. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X uses the 10,000 Canadian dollars to purchase inventory. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The disposition of the 10,000 Canadian dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 2. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X converts the 10,000 Canadian dollars to U.S. dollars. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The conversion of the 10,000 Canadian dollars to U.S. dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 3. On January 1, 1989, X borrows 100,000 British pounds (£) for a period of 10 years and issues a note to the lender with a face amount of £100,000. The note provides for payments of interest at an annual rate of 10% paid quarterly in pounds and has a stated redemption price at maturity of £100,000. X's becoming the obligor under the note is a section 988 transaction pursuant to paragraphs (a)(1)(ii) and (2)(i) of this section. Because X is an accrual basis taxpayer, the accrual of interest expense under X's note is a section 988 transaction pursuant to paragraphs (a)(1)(ii) and (2)(ii) of this section. In addition, the acquisition of the British pounds to make payments under the note is a section 988 transaction for purposes of establishing X's basis in such pounds, and the disposition of such pounds is a section 988 transaction under paragraph (a)(1)(i) of this section. See § 1.988-2(b) with respect to the translation of accrued interest expense and the determination of exchange gain or loss upon payment of accrued interest expense.

Example 4. On January 1, 1989, X purchases an original issue for 74,621.54 British pounds (£) a 3-year bond maturing on December 31,

1991, at a stated redemption price of £100,000. The bond provides for no stated interest. The bond has a yield to maturity of 10% compounded semiannually and has £25,378.46 of original issue discount. The acquisition of the bond is a section 988 transaction as provided in paragraphs (a)(1)(ii) and (2)(i) of this section. The accrual of original issue discount with respect to the bond is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section. See § 1.988-2(b) with respect to the translation of original issue discount and the determination of exchange gain or loss upon receipt of such amounts.

Example 5. On January 1, 1989, X sells and delivers inventory to Y for 10,000,000 Italian lira for payment on April 1, 1989. Under X's method of accounting, January 1, 1989 is the accrual date. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of gross receipts on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section.

Example 6. On January 1, 1989, X agrees to purchase a machine from Y for delivery on March 1, 1990 for 1,000,000 yen. The agreement calls for X to pay Y for the machine on June 1, 1990. Under X's method of accounting, the expenditure for the machine does not accrue until delivery on March 1, 1990. The agreement to purchase the machine is not a section 988 transaction. In particular, the agreement to purchase the machine is not described in paragraph (a)(2)(ii) of this section because the agreement is not an item of expense taken into account under subtitle A (but rather is an agreement to purchase a capital asset in the future). However, the payable that will arise on the delivery date is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section even though the payable relates to a capital expenditure. In addition, the disposition of yen to satisfy the payable on June 1, 1990, is a section 988 transaction under paragraph (a)(1)(i) of this section.

Example 7. On January 1, 1989, X purchases and takes delivery of inventory for 10,000 French francs with payment to be made on April 1, 1989. Under X's method of accounting, the expense accrues on January 1, 1989. On January 1, 1989, X also enters into a forward contract with a bank to purchase 10,000 French francs for \$2,000 on April 1, 1989. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of expense on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(ii) of this section. Entering into the forward contract to purchase the 10,000 French francs is a section 988 transaction under paragraphs (a)(1)(ii) and (2)(iii) of this section.

Example 8. On January 1, 1989, X acquires 100,000 Norwegian krone. On January 15, 1989, X purchases and takes delivery of 1,000 shares of common stock with the 100,000 krone acquired on January 1, 1989. On August 1, 1989, X sells the 1,000 shares of common stock and receives 120,000 krone in payment. On August 30, 1989, X converts the 120,000 krone to U.S. dollars. The acquisition of the 100,000 krone on January 1, 1989, and the acquisition of the 120,000 krone on August 1, 1989, are section 988 transactions for purposes of establishing the basis of such krone. The disposition of the 100,000 krone on January 15, 1989, and the 120,000 krone on August 30, 1989, are section 988 transactions as provided in paragraph (a)(1)(i) of this section. Neither the acquisition on January 15, 1989, nor the disposition on August 1, 1989, of the stock is a section 988 transaction.

Example 9. On May 11, 1989, X purchases a one year note at original issue for its issue price of \$1,000. The note pays interest in dollars at the rate of 4 percent compounded semiannually. The amount of principal received by X upon maturity is equal to \$1,000 plus the equivalent of the excess, if any, of (a) the Financial Times One Hundred Stock Index (an index of stocks traded on the London Stock Exchange hereafter referred to as the FT100) determined and translated into dollars on the last business day prior to the maturity date, over (b) £2,150, the "stated value" of the FT100, which is equal to 110% of the average value of the index for the six months prior to the issue date, translated at the exchange rate of £1 = \$1.50. The purchase by X of the instrument described above is not a section 988 transaction because the index used to compute the principal amount received upon maturity is determined with reference to the value of stock and not nonfunctional currency.

Example 10. On April 9, 1989, X enters into an interest rate swap that provides for the payment of amounts by X to its counterparty based on 4% of a 10,000 yen principal amount in exchange for amounts based on yen LIBOR rates. Pursuant to paragraphs (a)(1)(ii) and (2)(iii) of this section, this yen for yen interest rate swap is a section 988 transaction.

Example 11. On August 11, 1989, X enters into an option contract for sale of a group of stocks traded on the Japanese Nikkei exchange. The contract is not a section 988 transaction within the meaning of § 1.988-1(a)(2)(iii) because the underlying property to which the option relates is a group of stocks and not nonfunctional currency.

(7) *Special rules for regulated futures contracts and non-equity options—(i) In general.* Except as provided in paragraph (a)(7)(ii) of this section, paragraph (a)(2)(iii) of this section shall not

apply to any regulated futures contract or non-equity option which would be marked to market under section 1256 if held on the last day of the taxable year.

(ii) *Election to have paragraph (a)(2)(iii) of this section apply.* Notwithstanding paragraph (a)(7)(i) of this section, a taxpayer may elect to have paragraph (a)(2)(iii) of this section apply to regulated futures contracts and non-equity options as provided in paragraphs (a)(7)(iii) and (iv) of this section.

(iii) *Procedure for making the election.* A taxpayer shall make the election provided in paragraph (a)(7)(ii) of this section by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled "Election to Treat Regulated Futures Contracts and Non-Equity Options as Section 988 Transactions Under Section 988 (c)(1)(D)(ii)" that contains the following:

(A) The taxpayer's name, address, and taxpayer identification number;

(B) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(C) A statement that the taxpayer (including all members of such person's affiliated group as defined in section 1504 or in the case of an individual all persons filing a joint return with such individual) elects to have section 988(c)(1)(D)(i) and §1.988-1(a)(7)(i) not apply;

(D) The date of the beginning of the taxable year for which the election is being made;

(E) If the election is filed after the first day of the taxable year, a statement regarding whether the taxpayer has previously held a contract described in section 988(c)(1)(D)(i) or §1.988-1(a)(7)(i) during such taxable year, and if so, the first date during the taxable year on which such contract was held; and

(F) The signature of the person making the election (in the case of individuals filing a joint return, the signature of all persons filing such return).

The election shall be made by the following persons: in the case of an individual, by such individual; in the case of a partnership, by each partner sepa-

ately; effective for taxable years beginning after March 17, 1992, in the case of tiered partnerships, each ultimate partner; in the case of an S corporation, by each shareholder separately; in the case of a trust (other than a grantor trust) or estate, by the fiduciary of such trust or estate; in the case of any corporation other than an S corporation, by such corporation (in the case of a corporation that is a member of an affiliated group that files a consolidated return, such election shall be valid and binding only if made by the common parent, as that term is used in §1.1502-77(a)); in the case of a controlled foreign corporation, by its controlling United States shareholders under §1.964-1(c)(3). With respect to a corporation (other than an S corporation), the election, when made by the common parent, shall be binding on all members of such corporation's affiliated group as defined in section 1504 that file a consolidated return. The election shall be binding on any income or loss derived from the partner's share (determined under the principles of section 702(a)) of all contracts described in section 988(c)(1)(D)(i) or paragraph (a)(7)(i) of this section in which the taxpayer holds a direct interest or indirect interest through a partnership or S corporation; however, the election shall not apply to any income or loss of a partnership for any taxable year if such partnership made an election under section 988(c)(1)(E)(iii)(V) for such year or any preceding year. Generally, a copy of the election must be attached to the taxpayer's income tax return for the first year it is effective. It is not required to be attached to subsequent returns. However, in the case of a partner, a copy of the election must be attached to the taxpayer's income tax return for every year during which the taxpayer is a partner in a partnership that engages in a transaction that is subject to the election.

(iv) *Time for making the election—(A) In general.* Unless the requirements for making a late election described in paragraph (a)(7)(iv)(B) of this section are satisfied, an election under section 988 (c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section for any taxable year shall be made on or before the first day

of the taxable year or, if later, on or before the first day during such taxable year on which the taxpayer holds a contract described in section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section. The election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section shall apply to contracts entered into or acquired after October 21, 1988, and held on or after the effective date of the election. The election shall be effective as of the beginning of the taxable year and shall be binding with respect to all succeeding taxable years unless revoked with the prior consent of the Commissioner. In determining whether to grant revocation of the election, recapture of the tax benefit derived from the election in previous taxable years will be considered.

(B) *Late elections.* A taxpayer may make an election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section within 30 days after the time prescribed in the first sentence of paragraph (a)(7)(iv)(A) of this section. Such a late election shall be effective as of the beginning of the taxable year; however, any losses recognized during the taxable year with respect to contracts described in section 988(c)(1)(D)(ii) or paragraph (a)(7)(ii) of this section which were entered into or acquired after October 21, 1988, and held on or before the date on which the late election is mailed or otherwise delivered to the Internal Revenue Service Center shall not be treated as derived from a section 988 transaction. A late election must comply with the procedures set forth in paragraph (a)(7)(iii) of this section.

(v) *Transition rule.* An election made prior to September 21, 1989 which satisfied the requirements of Notice 88-124, 1988-51 I.R.B. 6, shall be deemed to satisfy the requirements of paragraphs (a)(7)(iii) and (iv) of this section.

(vi) *General effective date provision.* This paragraph (a)(7) shall apply with respect to futures contracts and options entered into or acquired after October 21, 1988.

(8) *Special rules for qualified funds—(i) Definition of qualified fund.* The term “qualified fund” means any partnership if—

(A) At all times during the taxable year (and during each preceding taxable year to which an election under section 988(c)(1)(E)(iii)(V) applied) such partnership has at least 20 partners and no single partner owns more than 20 percent of the interests in the capital or profits of the partnership;

(B) The principal activity of such partnership for such taxable year (and each such preceding taxable year) consists of buying and selling options, futures, or forwards with respect to commodities;

(C) At least 90 percent of the gross income of the partnership for the taxable year (and each such preceding year) consists of income or gains described in subparagraph (A), (B), or (G) of section 7704(d)(1) or gain from the sale or disposition of capital assets held for the production of interest or dividends;

(D) No more than a de minimis amount of the gross income of the partnership for the taxable year (and each such preceding taxable year) was derived from buying and selling commodities; and

(E) An election under section 988(c)(1)(E)(iii)(V) as provided in paragraph (a)(8)(iv) of this section applies to the taxable year.

(ii) *Special rules relating to paragraph (a)(8)(i)(A) of this section—(A) Certain general partners.* The interest of a general partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section for any taxable year of the partnership if, for the taxable year of the partner in which such partnership’s taxable year ends, such partner (and each corporation filing a consolidated return with such partner) had no ordinary income or loss from a section 988 transaction (other than income from the partnership) which is exchange gain or loss (as the case may be).

(B) *Treatment of incentive compensation.* For purposes of paragraph (a)(8)(i)(A) of this section, any income allocable to a general partner as incentive compensation based on profits rather than capital shall not be taken into account in determining such partner’s interest in the profits of the partnership.

(C) *Treatment of tax exempt partners.* The interest of a partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirements of paragraph (a)(5)(8)(A) of this section if none of the income of such partner from such partnership is subject to tax under chapter 1 of subtitle A of the Internal Revenue Code (whether directly or through one or more pass-through entities).

(D) *Look-through rule.* In determining whether the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section is met with respect to any partnership, any interest in such partnership held by another partnership shall be treated as held proportionately by the partners in such other partnership.

(iii) *Other special rules—(A) Related persons.* Interests in the partnership held by persons related to each other (within the meaning of section 267(b) or 707(b)) shall be treated as held by one person.

(B) *Predecessors.* Reference to any partnership shall include a reference to any predecessor thereof.

(C) *Treatment of certain debt instruments.* Solely for purposes of paragraph (a)(8)(i)(D) of this section, any debt instrument which is described in both paragraphs (a)(1)(ii) and (2)(i) of this section shall be treated as a commodity.

(iv) *Procedure for making the election provided in section 988(c)(1)(E)(iii)(V).* A partnership shall make the election provided in section 988(c)(1)(E)(iii)(V) by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled “QUALIFIED FUND ELECTION UNDER SECTION 988(c)(1)(E)(iii)(V)” that contains the following:

(A) The partnership’s name, address, and taxpayer identification number;

(B) The name, address and taxpayer identification number of the general partner making the election on behalf of the partnership;

(C) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(D) A brief description of the activity of the partnership;

(E) A statement that the partnership is making the election provided in section 988(c)(1)(E)(iii)(V);

(F) The date of the beginning of the taxable year for which the election is being made;

(G) If the election is filed after the first day of the taxable year, then a statement regarding whether the partnership previously held an instrument referred to in section 988(c)(1)(E)(i) during such taxable year and, if so, the first date during the taxable year on which such contract was held; and

(H) The signature of the general partner making the election.

The election shall be made by a general partner with management responsibility of the partnership’s activities and a copy of such election shall be attached to the partnership’s income tax return (Form 1065) for the first taxable year it is effective. It is not required to be attached to subsequent returns.

(v) *Time for making the election.* The election under section 988(c)(1)(E)(iii)(V) for any taxable year shall be made on or before the first day of the taxable year or, if later, on or before the first day during such year on which the partnership holds an instrument described in section 988(c)(1)(E)(i). The election under section 988(c)(1)(E)(iii)(V) shall apply to the taxable year for which made and all succeeding taxable years. Such election may only be revoked with the consent of the Commissioner. In determining whether to grant revocation of the election, recapture by the partners of the tax benefit derived from the election in previous taxable years will be considered.

(vi) *Operative rules applicable to qualified funds—(A) In general.* In the case of a qualified fund, any bank forward contract or any foreign currency futures contract traded on a foreign exchange which is not otherwise a section 1256 contract shall be treated as a section 1256 contract for purposes of section 1256.

(B) *Gains and losses treated as short-term.* In the case of any instrument treated as a section 1256 contract under paragraph (a)(8)(vi)(A) of this section, subparagraph (A) of section 1256(a)(3) shall be applied by substituting “100

percent” for “40 percent” (and subparagraph (B) of such section shall not apply).

(vii) *Transition rule.* An election made prior to September 21, 1989, which satisfied the requirements of Notice 88-124, 1988-51 I.R.B. 6, shall be deemed to satisfy the requirements of § 1.988-1(a)(8)(iv) and (v).

(viii) *General effective date rules—(A)* The requirements of subclause (IV) of section 988(c)(1)(E)(iii) shall not apply to contracts entered into or acquired on or before October 21, 1988.

(B) In the case of any partner in an existing partnership, the 20 percent ownership requirements of subclause (I) of section 988(c)(1)(E)(iii) shall be treated as met during any period during which such partner does not own a percentage interest in the capital or profits of such partnership greater than 33 $\frac{1}{3}$ percent (or, if lower, the lowest such percentage interest of such partner during any period after October 21, 1988, during which such partnership is in existence). For purposes of the preceding sentence, the term “existing partnership” means any partnership if—

(1) Such partnership was in existence on October 21, 1988, and principally engaged on such date in buying and selling options, futures, or forwards with respect to commodities; or

(2) A registration statement was filed with respect to such partnership with the Securities and Exchange Commission on or before such date and such registration statement indicated that the principal activity of such partnership will consist of buying and selling instruments referred to in paragraph (a)(8)(viii)(B)(I) of this section.

(9) *Exception for certain transactions entered into by an individual—(i) In general.* A transaction entered into by an individual which otherwise qualifies as a section 988 transaction shall be considered a section 988 transaction only to the extent expenses properly allocable to such transaction meet the requirements of section 162 or 212 (other than the part of section 212 dealing with expenses incurred in connection with taxes).

(ii) *Examples.* The following examples illustrate the application of paragraph (a)(9) of this section.

Example 1. X is a U.S. citizen who therefore has the U.S. dollar as his functional currency. On January 1, 1990, X enters into a spot contract to purchase 10,000 British pounds (£) for \$15,000 for delivery on January 3, 1990. Immediately upon delivery, X acquires at original issue a pound denominated bond with an issue price of £10,000. The bond matures on January 3, 1993, pays interest in pounds at a rate of 10% compounded semi-annually, and has no original issue discount. Assume that all expenses properly allocable to these transactions would meet the requirements of section 212. Under § 1.988-2(d)(1)(ii), entering into the spot contract on January 1, 1990, is not a section 988 transaction. The acquisition of the pounds on January 3, 1990, under the spot contract is a section 988 transaction for purposes of establishing X’s basis in the pounds. The disposition of the pounds and the acquisition of the bond by X are section 988 transactions. These transactions are not excluded from the definition of a section 988 transaction under paragraph (a)(9) of this section because expenses properly allocable to such transactions meet the requirements of section 212.

Example 2. X is a U.S. citizen who therefore has the dollar as his functional currency. In preparation for X’s vacation, X purchases 1,000 British pounds (£) from a bank on June 1, 1989. During the period of X’s vacation in the United Kingdom beginning June 10, 1989, and ending June 20, 1989, X spends £500 for hotel rooms, £300 for food and £200 for miscellaneous vacation expenses. The expenses properly allocable to such dispositions do not meet the requirements of section 162 or 212. Thus, the disposition of the pounds by X on his vacation are not section 988 transactions.

(10) *Intra-taxpayer transactions—(i) In general.* Except as provided in paragraph (a)(10)(ii) of this section, transactions between or among the taxpayer and/or qualified business units of that taxpayer (“intra-taxpayer transactions”) are not section 988 transactions. See section 987 and the regulations thereunder.

(ii) *Certain intra-taxpayer transfers of section 988 transactions that result in the recognition of section 988 gain or loss—(A) In general.* Exchange gain or loss with respect to nonfunctional currency or any item described in paragraph (a)(2) of this section entered into with another taxpayer shall be realized upon a transfer (as defined under § 1.987-2(c)) of such currency or item from an owner to a section 987 QBU or from a section 987 QBU to an owner if as a result of such transfer—

(1) The currency or item loses its character as nonfunctional currency or as an item described in paragraph (a)(2) of this section; or

(2) The source of the exchange gain or loss could be altered absent the application of paragraph (a)(10)(ii)(B) of this section.

(B) *Computation of exchange gain or loss.* Exchange gain or loss described in section (a)(10)(ii)(A) of this section shall be computed in accordance with §1.988-2 (without regard to §1.988-2(b)(8)) as if the nonfunctional currency or item described in paragraph (a)(2) of this section had been sold or otherwise transferred at fair market value between unrelated taxpayers. For purposes of the preceding sentence, a taxpayer must use a translation rate that is consistent with the translation conventions of the section 987 QBU to or from which, as the case may be, the item is being transferred. In the case of a gain or loss incurred in a transaction described in this paragraph (a)(10)(ii) that does not have a significant business purpose, the Commissioner may defer such gain or loss.

(iii) *Example.* The following example illustrates the provisions of this paragraph (a)(10).

Example. (A) X, a corporation with the U.S. dollar as its functional currency, operates through foreign branches Y and Z. Y and Z are qualified business units as defined in section 989(a) with the LC as their functional currency. X computes Y's and Z's income under section 987 (relating to branch transactions). On November 12, 1988, Y transfers \$25 to the home office of X when the fair market value of such amount equals LC120. Y has a basis of LC100 in the \$25. Under paragraph (a)(10)(ii) of this section, Y realizes foreign source exchange gain of LC20 (LC120—LC100) as the result of the \$25 transfer. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(B) If instead Y transfers the \$25 to Z, exchange gain is not realized because the \$25 is nonfunctional currency with respect to Z and if Z were to immediately convert the \$25 into LCs, the gain would be foreign source. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(11) *Authority to include or exclude transactions from section 988—(i) In gen-*

eral. The Commissioner may recharacterize a transaction (or series of transactions) in whole or in part as a section 988 transaction if the effect of such transaction (or series of transactions) is to avoid section 988. In addition, the Commissioner may exclude a transaction (or series of transactions) which in form is a section 988 transaction from the provisions of section 988 if the substance of the transaction (or series of transactions) indicates that it is not properly considered a section 988 transaction.

(ii) *Example.* The following example illustrates the provisions of this paragraph (a)(11).

Example. B is an individual with the U.S. dollar as its functional currency. B holds 500,000 Swiss francs which have a basis of \$100,000 and a fair market value of \$400,000 as of October 15, 1989. On October 16, 1989, B transfers the 500,000 Swiss francs to a newly formed U.S. corporation, X, with the dollar as its functional currency. On October 16, 1989, B sells the stock of X for \$400,000. Assume the transfer to X qualified for non-recognition under section 351. Because the sale of the stock of X is a substitute for the disposition of an asset subject to section 988, the Commissioner may recharacterize the sale of the stock as a section 988 transaction. The same result would obtain if B transferred the Swiss francs to a partnership and then sold the partnership interest.

(b) *Spot contract.* A spot contract is a contract to buy or sell nonfunctional currency on or before two business days following the date of the execution of the contract. See §1.988-2 (d)(1)(ii) for operative rules regarding spot contracts.

(c) *Nonfunctional currency.* The term “nonfunctional currency” means with respect to a taxpayer or a qualified business unit (as defined in section 989 (a)) a currency (including the European Currency Unit) other than the taxpayer's or the qualified business unit's functional currency as defined in section 985 and the regulations thereunder. For rules relating to non-recognition of exchange gain or loss with respect to certain dispositions of nonfunctional currency, see §1.988-2 (a)(1)(iii).

(d) *Spot rate—(1) In general.* Except as otherwise provided in this paragraph, the term “spot rate” means a rate demonstrated to the satisfaction of the

District Director or the Assistant Commissioner (International) to reflect a fair market rate of exchange available to the public for currency under a spot contract in a free market and involving representative amounts. In the absence of such a demonstration, the District Director or the Assistant Commissioner (International), in his or her sole discretion, shall determine the spot rate from a source of exchange rate information reflecting actual transactions conducted in a free market. For example, the taxpayer or the District Director or the Assistant Commissioner (International) may determine the spot rate by reference to exchange rates published in the pertinent monthly issue of "International Financial Statistics" or a successor publication of the International Monetary Fund; exchange rates published by the Board of Governors of the Federal Reserve System pursuant to 31 U.S.C. section 5151; exchange rates published in newspapers, financial journals or other daily financial news sources; or exchange rates quoted by electronic financial news services.

(2) *Consistency required in valuing transactions subject to section 988.* If the use of inconsistent sources of spot rate quotations results in the distortion of income, the District Director or the Assistant Commissioner (International) may determine the appropriate spot rate.

(3) *Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.* If consistent with the taxpayer's financial accounting, a taxpayer may utilize a spot rate convention determined at intervals of one quarter year or less for purposes of computing exchange gain or loss with respect to payables and receivables denominated in a nonfunctional currency that are incurred in the ordinary course of business with respect to the acquisition or sale of goods or the obtaining or performance of services. For example, if consistent with the taxpayer's financial accounting, a taxpayer may accrue all payables and receivables incurred during the month of January at the spot rate on December 31 or January 31 (or at an average of any spot rates occurring between these two dates) and record the payment or

receipt of amounts in satisfaction of such payables and receivables consistent with such convention. The use of a spot rate convention cannot be changed without the consent of the Commissioner.

(4) *Currency where an official government established rate differs from a free market rate—(i) In general.* If a currency has an official government established rate that differs from a free market rate, the spot rate shall be the rate which most clearly reflects the taxpayer's income. Generally, this shall be the free market rate.

(ii) *Examples.* The following examples illustrate the application of this paragraph (d)(4).

Example 1. X is an accrual method U.S. corporation with the dollar as its functional currency. X owns all the stock of a Country L subsidiary, CFC. CFC has the currency of Country L, the LC, as its functional currency. Country L imposes restrictions on the remittance of dividends. On April 1, 1990, CFC pays a dividend to X in the amount of LC100. Assume that the official government established rate is \$1 = LC1 and the free market rate, which takes into account the remittance restrictions and which is the rate that most clearly reflects income, is \$1 = LC4. On April 1, 1990, X donates the LC100 in a transaction that otherwise qualifies as a charitable contribution under section 170 (c). Both the amount of the dividend income and the deduction under section 170 is \$25 (LC100 × the free market rate, \$.25).

Example 2. X, a corporation with the U.S. dollar as its functional currency, operates in foreign country L through branch Y. Y is a qualified business unit as defined in section 989 (a). X computes Y's income under the dollar approximate separate transactions method as described in § 1.985-3. The currency of L is the LC. X can purchase legally United States dollars (\$) in L only from the L government. In order to take advantage of an arbitrage between the official and secondary dollar to LC exchange rates in L:

(i) X purchases LC100 for \$60 in L on the secondary market when the official exchange rate is \$1 = LC1;

(ii) X transfers the LC100 to Y;

(iii) Y purchases \$100 for LC100; and

(iv) Y transfers \$65 (\$100 less an L tax withheld of \$35 on the transfer) to the home office of X.

Under paragraph (a)(7) of this section, the transfer of the LC100 by X to Y is a realization event. X has a basis of \$60 in the LC100. Under these facts, the appropriate dollar to LC exchange rate for computing the amount realized by X is the official exchange rate.

Therefore, X realizes \$40 (\$100-\$60) of U.S. source gain from the transfer to Y. The same result would obtain if Y rather than X purchased the LC100 on the secondary market in L with \$60 supplied by X, because the substance of this transaction is that X is performing the arbitrage.

(e) *Exchange gain or loss.* The term “exchange gain or loss” means the amount of gain or loss realized as determined in §1.988-2 with respect to a section 988 transaction. Except as otherwise provided in these regulations (e.g., §1.98B-5), the amount of exchange gain or loss from a section 988 transaction shall be separately computed for each section 988 transaction, and such amount shall not be integrated with gain or loss recognized on another transaction (whether or not such transaction is economically related to the section 988 transaction). See §1.988-2 (b)(8) for a special rule with respect to debt instruments.

(f) *Hyperinflationary currency—(1) Definition—(i) General rule.* For purposes of section 988, a hyperinflationary currency means a currency described in §1.985-1(b)(2)(ii)(D). Unless otherwise provided, the currency in any example used in §§1.988-1 through 1.988-5 is not a hyperinflationary currency.

(ii) *Special rules for determining base period.* In determining whether a currency is hyperinflationary under §1.985-1(b)(2)(ii)(D) for purposes of this paragraph (f), the following rules will apply:

(A) The base period means the thirty-six calendar month period ending on the last day of the taxpayer’s (or qualified business unit’s) current taxable year. Thus, for example, if for 1996, 1997, and 1998, a country’s annual inflation rates are 6 percent, 11 percent, and 90 percent, respectively, the cumulative inflation rate for the three-year base period is 124% [$((1.06 \times 1.11 \times 1.90) - 1.0) \times 100 = 124\%$]. Accordingly, assuming the QBU has a calendar year as its taxable year, the currency of the country is hyperinflationary for the 1998 taxable year. This change in the §1.985-1(b)(2)(ii)(D) base period shall not apply to any section 988 transaction of an entity described in section 851 (regulated investment company (RIC)) or section 856 (real estate investment trust (REIT)). The Service may, by notice, provide that the foregoing

change in the §1.985-1(b)(2)(ii)(D) base period does not apply to any section 988 transaction of an entity with distribution requirements similar to a RIC or REIT.

(B) The last sentence of §1.985-1(b)(2)(ii)(D) shall not apply to alter the base period for purposes of this paragraph (f) in determining whether a currency is hyperinflationary for purposes of section 988. Accordingly, generally accepted accounting principles may not apply to alter the base period for purposes of this paragraph (f).

(2) *Effective date.* Paragraph (f)(1) of this section shall apply to transactions entered into after February 14, 2000.

(g) *Fair market value.* The fair market value of an item shall, where relevant, reflect an appropriate premium or discount for the time value of money (e.g., the fair market value of a forward contract to buy or sell nonfunctional currency shall reflect the present value of the difference between the units of nonfunctional currency times the market forward rate at the time of valuation and the units of nonfunctional currency times the forward rate set forth in the contract). However, if consistent with the taxpayer’s method of financial accounting (and consistently applied from year to year), the preceding sentence shall not apply to a financial instrument that matures within one year from the date of issuance or acquisition. Unless otherwise provided, the fair market value given in any example used in §§1.988-1 through 1.988-5 is deemed to reflect appropriately the time value of money. If the use of inconsistent sources of forward or other market rate quotations results in the distortion of income, the District Director or the Assistant Commissioner (International) may determine the appropriate rate.

(h) *Interaction with sections 1092 and 1256.* Unless otherwise provided, it is assumed for purposes of §§1.988-1 through 1.988-5 that any contract used in any example is not a section 1256 contract and is not part of a straddle as defined in section 1092. No inference is intended regarding the application of section 1092 or 1256 unless expressly stated.

(i) *Effective date.* Except as otherwise provided in this section, this section

§ 1.988-1T

shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section. Generally, the revisions to paragraphs (a)(3), (a)(4), and (a)(10)(ii) of this section shall apply to taxable years beginning one year after the first day of the first taxable year following December 7, 2016. If pursuant to § 1.987-11(b) a taxpayer applies §§ 1.987-1 through 1.987-11 beginning in a taxable year prior to the earliest taxable year described in § 1.987-11(a), then the revisions to paragraphs (a)(3), (a)(4), and (a)(10)(ii) of this section shall apply to taxable years of the taxpayer beginning on or after the first day of such prior taxable year.

[T.D. 8400, 57 FR 9178, Mar. 17, 1992, as amended by T.D. 8914, 66 FR 280, Jan. 3, 2001; T.D. 9794, 81 FR 88850, Dec. 8, 2016; T.D. 9795, 81 FR 88879, Dec. 8, 2016]

§ 1.988-1T Certain definitions and special rules (temporary).

(a)(1) through (a)(2) [Reserved] For further guidance, see § 1.988-1(a)(1) through (2).

(3) *Specified owner functional currency transactions of a section 987 QBU not treated as section 988 transactions.* Specified owner functional currency transactions, as defined in § 1.987-3T(b)(4)(ii), held by a section 987 QBU are not treated as section 988 transactions. Thus, no currency gain or loss shall be recognized by a section 987 QBU under section 988 with respect to such transactions.

(4) through (i) [Reserved] For further guidance, see § 1.988-1(a)(4) through (i).

(j) *Effective/applicability date.* This section applies to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then this section applies to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

(k) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88879, Dec. 8, 2016]

26 CFR Ch. I (4-1-23 Edition)

§ 1.988-2 Recognition and computation of exchange gain or loss.

(a) *Disposition of nonfunctional currency—(1) Recognition of exchange gain or loss—(i) In general.* Except as otherwise provided in this section, § 1.988-1(a)(7)(ii), and § 1.988-5, the recognition of exchange gain or loss upon the sale or other disposition of nonfunctional currency shall be governed by the recognition provisions of the Internal Revenue Code which apply to the sale or disposition of property (*e.g.*, section 1001 or, to the extent provided in regulations, section 1092). The disposition of nonfunctional currency in settlement of a forward contract, futures contract, option contract, or similar financial instrument is considered to be a sale or disposition of the nonfunctional currency for purposes of the preceding sentence.

(ii) *Clarification of section 1031.* An amount of one nonfunctional currency is not “property of like kind” with respect to an amount of a different nonfunctional currency.

(iii) *Coordination with section 988(c)(1)(C)(ii).* No exchange gain or loss is recognized with respect to the following transactions—

(A) An exchange of units of nonfunctional currency for different units of the same nonfunctional currency;

(B) The deposit of nonfunctional currency in a demand or time deposit or similar instrument (including a certificate of deposit) issued by a bank or other financial institution if such instrument is denominated in such currency;

(C) The withdrawal of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution if such instrument is denominated in such currency;

(D) The receipt of nonfunctional currency from a bank or other financial institution from which the taxpayer purchased a certificate of deposit or similar instrument denominated in such currency by reason of the maturing or other termination of such instrument; and

(E) The transfer of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution to

another demand or time deposit or similar instrument denominated in the same nonfunctional currency issued by a bank or other financial institution.

The taxpayer's basis in the units of nonfunctional currency or other property received in the transaction shall be the adjusted basis of the units of nonfunctional currency or other property transferred. See paragraph (b) of this section with respect to the timing of interest income or expense and the determination of exchange gain or loss thereon.

(iv) *Example.* The following example illustrates the provisions of paragraph (a)(1)(iii) of this section.

Example. X is a corporation on the accrual method of accounting with the U.S. dollar as its functional currency. On January 1, 1989, X acquires 1,500 British pounds (£) for \$2,250 (£1 = \$1.50). On January 3, 1989, when the spot rate is £1 = \$1.49, X deposits the £1,500 with a British financial institution in a non-interest bearing demand account. On February 1, 1989, when the spot rate is £1 = \$1.45, X withdraws the £1,500. On February 5, 1989, when the spot rate is £1 = \$1.42, X purchases inventory in the amount of £1,500. Pursuant to paragraph (a)(1)(iii) of this section, no exchange loss is realized until February 5, 1989, when X disposes of the £1,500 for inventory. At that time, X realizes exchange loss in the amount of \$120 computed under paragraph (a)(2) of this section. The loss is not an adjustment to the cost of the inventory.

(2) *Computation of gain or loss—(i) In general.* Exchange gain realized from the sale or other disposition of nonfunctional currency shall be the excess of the amount realized over the adjusted basis of such currency, and exchange loss realized shall be the excess of the adjusted basis of such currency over the amount realized.

(ii) *Amount realized—(A) In general.* The amount realized from the disposition of nonfunctional currency shall be determined under section 1001(b). A taxpayer that uses a spot rate convention under § 1.988-1(d)(3) to determine exchange gain or loss with respect to a payable shall determine the amount realized upon the disposition of nonfunctional currency paid in satisfaction of the payable in a manner consistent with such convention.

(B) *Exchange of nonfunctional currency for property.* For purpose of paragraph (a)(2) of this section, the ex-

change of nonfunctional currency for property (other than nonfunctional currency) shall be treated as—

(1) An exchange of the units of nonfunctional currency for units of functional currency at the spot rate on the date of the exchange, and

(2) The purchase or sale of the property for such units of functional currency.

(C) *Example.* The following example illustrates the provisions of paragraph (a)(2)(ii)(B) of this section.

Example. G is a U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1989, G enters into a contract to purchase a paper manufacturing machine for 10,000,000 British pounds (£) for delivery on January 1, 1991. On January 1, 1991, when G exchanges £10,000,000 (which G purchased for \$12,000,000) for the machine, the fair market value of the machine is £17,000,000. On January 1, 1991, the spot exchange rate is £1 = \$1.50. Under paragraph (a)(2)(ii)(B) of this section, the transaction is treated as an exchange of £10,000,000 for \$15,000,000 and the purchase of the machine for \$15,000,000. Accordingly, in computing G's exchange gain of \$3,000,000 on the disposition of the £10,000,000, the amount realized is \$15,000,000. G's basis in the machine is \$15,000,000. No gain is recognized on the bargain purchase of the machine.

(iii) *Adjusted basis—(A) In general.* Except as provided in paragraphs (a)(2)(iii)(B) and (C) of this section, the adjusted basis of nonfunctional currency is determined under the applicable provisions of the Internal Revenue Code (e.g., sections 1011 through 1023). A taxpayer that uses a spot rate convention under § 1.988-1(d)(3) to determine exchange gain or loss with respect to a receivable shall determine the basis of nonfunctional currency received in satisfaction of such receivable in a manner consistent with such convention.

(B) *Determination of the basis of nonfunctional currency withdrawn from an account with a bank or other financial institution—(1) In general.* The basis of nonfunctional currency withdrawn from an account with a bank or other financial institution shall be determined under any reasonable method that is consistently applied from year to year by the taxpayer to all accounts denominated in a nonfunctional currency. For example, a taxpayer may

§ 1.988-2

26 CFR Ch. I (4-1-23 Edition)

use a first in first out method, a last in first out method, a pro rata method (as illustrated in the example below), or any other reasonable method that is consistently applied. However, a method that consistently results in units of nonfunctional currency with the highest basis being withdrawn first shall not be considered reasonable.

(2) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iii)(B).

Example. (i) X, a cash basis individual with the dollar as his functional currency, opens a demand account with a Swiss bank. Assume expenses associated with the demand account are deductible under section 212. The following chart indicates Swiss franc deposits to the account, Swiss franc interest credited to the account, the dollar basis of each deposit, and the determination of the aggregate dollar basis of all Swiss francs in the account. Assume that the taxpayer has properly translated all the amounts specified in the chart and that all transactions are subject to section 988.

| Date | Swiss francs deposited | Interest received | U.S. dollar basis | Aggregate U.S. dollar basis |
|----------------|------------------------|-------------------|-------------------|-----------------------------|
| 1/01/89 | 1000 Sf | | \$500 | \$500 |
| 3/31/89 | | 50 Sf | 25 | 525 |
| 6/30/89 | | 50 Sf | 24 | 549 |
| 9/30/89 | | 50 Sf | 25 | 574 |
| 12/31/89 | | 50 Sf | 26 | 600 |

(ii) On January 1, 1990, X withdraws 500 Swiss francs from the account. X may determine his basis in the Swiss francs by multiplying the aggregate U.S. dollar basis of Swiss francs in the account by a fraction the numerator of which is the number of Swiss francs withdrawn from the account and the denominator is the total number of Swiss francs in the account. Under this method, X's basis in the 500 Swiss francs is \$250 computed as follows:

$$\frac{500 \text{ Sf}}{1200 \text{ Sf}} \times \$600 = \$250$$

(iii) X's basis in the Swiss francs remaining in the account is \$350 (\$600 - \$250). X must use this method consistently from year to year with respect to withdrawals of nonfunctional currency from all of X's accounts.

(C) *Basis in refunded foreign income tax.* See § 1.986(a)-1(e) for rules relating to the determination of basis in refunded foreign income tax denominated in nonfunctional currency.

(iv) Purchase and sale of stock or securities traded on an established securities market by cash basis taxpayer—

(A) *Amount realized.* If stock or securities traded on an established securities market are sold by a cash basis taxpayer for nonfunctional currency, the amount realized with respect to the stock or securities (as determined on the trade date) shall be computed by translating the units of nonfunctional currency received into functional currency at the spot rate on the settle-

ment date of the sale. This rule applies notwithstanding that the stock or securities are treated as disposed of on a date other than the settlement date under another section of the Code. See section 453(k).

(B) *Basis.* If stock or securities traded on an established securities market are purchased by a cash basis taxpayer for nonfunctional currency, the basis of the stock or securities shall be determined by translating the units of nonfunctional currency paid into functional currency at the spot rate on the settlement date of the purchase.

(C) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iv).

Example. On November 1, 1989 (the trade date), X, a calendar year cash basis U.S. individual, purchases stock for £100 for settlement on November 5, 1989. On November 1, 1989, the spot value of the £100 is \$140. On November 5, 1989, X purchases £100 for \$141 which X uses to pay for the stock. X's basis in the stock is \$141. On December 30, 1990 (the trade date), X sells the stock for £110 for settlement on January 5, 1991. On December 30, 1990, the spot value of £110 is \$165. On January 5, 1991, X transfers the stock and receives £110 which, translated at the spot rate, equal \$166. Under section 453(k), the stock is considered disposed of on December 30, 1990. The amount realized with respect to such disposition is the value of the £110 on January 5, 1991 (\$166). Accordingly, X's gain realized on December 30, 1990, from the disposition of the stock is \$25 (\$166 amount realized less \$141

basis). X's basis in the £110 received from the sale of the stock is \$166.

(v) *Purchase and sale of stock or securities traded on an established securities market by accrual basis taxpayer.* For taxable years beginning after March 17, 1992, an accrual basis taxpayer may elect to apply the rules of paragraph (a)(2)(iv) of this section. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently from year to year and cannot be changed without the consent of the Commissioner.

(b) *Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments—*
 (1) *Translation of interest income received with respect to a nonfunctional currency demand account.* Interest income received with respect to a demand account with a bank or other financial institution which is denominated in (or the payments of which are determined by reference to) a nonfunctional currency shall be translated into functional currency at the spot rate on the date received or accrued or pursuant to any reasonable spot rate convention consistently applied by the taxpayer to all taxable years and to all accounts denominated in nonfunctional currency in the same financial institution. For example, a taxpayer may translate interest income received with respect to a demand account on the last day of each month of the taxable year, on the last day of each quarter of the taxable year, on the last day of each half of the taxable year, or on the last day of the taxable year. No exchange gain or loss is realized upon the receipt or accrual of interest income with respect to a demand account subject to this paragraph (b)(1).

(2) *Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in § 1.988-1(a)(1)(ii) and (2)(i)—*
 (i) *Scope—*(A) *In general.* Paragraph (b) of this section only applies to debt instruments described in § 1.988-1(a)(1)(ii) and (2)(i) where all payments are denominated in, or determined with reference to, a single nonfunctional currency. Except as provided in paragraph

(b)(2)(i)(B) of this section, this paragraph (b) shall not apply to contingent payment debt instruments.

(B) *Nonfunctional currency contingent payment debt instruments—*(1) *Operative rules.* See § 1.988-6 for rules applicable to contingent payment debt instruments for which one or more payments are denominated in, or determined by reference to, a nonfunctional currency.

(2) *Certain instruments are not contingent payment debt instruments.* For purposes of sections 163(e) and 1271 through 1275 and the regulations thereunder, a debt instrument does not provide for contingent payments merely because the instrument is denominated in, or all payments of which are determined with reference to, a single nonfunctional currency. See § 1.988-6 for the treatment of nonfunctional currency contingent payment debt instruments.

(ii) *Determination and translation of interest income or expense—*(A) *In general.* Interest income or expense on a debt instrument described in paragraph (b)(2)(i) of this section (including original issue discount determined in accordance with sections 1271 through 1275 and 163(e) as adjusted for acquisition premium under section 1272(a)(7), and acquisition discount determined in accordance with sections 1281 through 1283) shall be determined in units of nonfunctional currency and translated into functional currency as provided in paragraphs (b)(2)(ii)(B) and (C) of this section. For purposes of sections 483, 1273(b)(5) and 1274, the nonfunctional currency in which an instrument is denominated (or by reference to which payments are determined) shall be considered money.

(B) *Translation of interest income or expense that is not required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense received or paid that is not required to be accrued by the taxpayer prior to receipt or payment shall be translated at the spot rate on the date of receipt or payment. No exchange gain or loss is realized with respect to the receipt or payment of such interest income or expense (other than the exchange gain or loss that might be realized under paragraph

(a) of this section upon the disposition of the nonfunctional currency so received or paid).

(C) *Translation of interest income or expense that is required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense that is required to be accrued prior to receipt or payment (e.g., under section 1272, 1281 or 163(e) or because the taxpayer uses an accrual method of accounting) shall be translated at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the interest accrual period or, with respect to an interest accrual period that spans two taxable years, at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the partial period within the taxable year. See paragraphs (b)(3) and (4) of this section for the determination of exchange gain or loss on the receipt or payment of accrued interest income or expense.

(iii) *Determination of average rate or other accrual convention—(A) In general.* For purposes of this paragraph (b), the average rate for an accrual period (or partial period) shall be a simple average of the spot exchange rates for each business day of such period or other average exchange rate for the period reasonably derived and consistently applied by the taxpayer.

(B) *Election to use spot accrual convention.* For taxable years beginning after March 17, 1992, a taxpayer may elect to translate interest income and expense at the spot rate on the last day of the interest accrual period (and in the case of a partial accrual period, the spot rate on the last day of the taxable year). If the last day of the interest accrual period is within five business days of the date of receipt or payment, the taxpayer may translate interest income or expense at the spot rate on the date of receipt or payment. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently to all debt instruments from year to year and cannot be changed without the consent of the Commissioner.

(3) *Exchange gain or loss recognized by the holder with respect to accrued interest income.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest income on the date such accrued interest income is received or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (e.g., paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest income shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest income is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest income received with respect to such accrual period (as determined under the ordering rules of paragraph (b)(7) of this section) into functional currency at the spot rate on the date the interest income is received or the instrument is disposed of (or deemed disposed of), and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest income accrued with respect to such income received at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the accrual period.

(4) *Exchange gain or loss recognized by the obligor with respect to accrued interest expense.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest expense on the date such accrued interest expense is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (e.g., paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest expense shall be recognized in accordance

with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest expense is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest expense accrued with respect to the amount of interest paid into functional currency at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for such accrual period; and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest paid (or, if the obligation to make payments is extinguished or transferred, the units accrued) with respect to such accrual period (as determined under the ordering rules in paragraph (b)(7) of this section) into functional currency at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(5) *Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is received from the obligor or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the holder's purchase price in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the holder acquired the instrument in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to the holder shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (e.g.,

paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal amount shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the holder with respect to principal is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date payment is received or the instrument is disposed of (or deemed disposed of); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date the holder (or a transferor from whom the nonfunctional principal amount is carried over) acquired the instrument (is deemed to acquire the instrument).

(6) *Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the amount received by the obligor for the debt instrument in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the obligor became the obligor in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to such obligor shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (e.g., paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal shall be recognized in accordance with

the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the obligor is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date the obligor (or a transferor from whom the principal amount is carried over) became the obligor (or is deemed to have become the obligor); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(7) *Payment ordering rules*—(i) *Debt instruments subject to the rules of sections 163(e), or 1271 through 1288.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is subject to the rules of sections 163(e), or 1272 through 1288, units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instrument shall be treated first as a receipt or payment of periodic interest under the principles of section 1273 and the regulations thereunder, second as a receipt or payment of original issue discount to the extent accrued as of the date of the receipt or payment, and finally as a receipt or payment of principal. Units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) treated as a receipt or payment of original issue discount under the preceding sentence are attributed to the earliest accrual period in which original issue discount has accrued and to which prior receipts or payments have not been attributed. No portion thereof shall be treated as prepaid interest. These rules are illustrated by *Example 10* of paragraph (b)(9) of this section.

(ii) *Other debt instruments.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is not subject to the rules of section 163(e) or 1272 through 1288, whether units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instru-

ment are treated as interest or principal shall be determined under section 163 or other applicable section of the Code.

(8) *Limitation of exchange gain or loss on payment or disposition of a debt instrument.* When a debt instrument described in paragraph (b)(2)(i) of this section is paid or disposed of, or when the obligation to make payments thereunder is satisfied by another person, or extinguished or assumed by another person, exchange gain or loss is computed with respect to both principal and any accrued interest (including original issue discount), as provided in paragraph (b)(3) through (7) of this section. However, pursuant to section 988(b)(1) and (2), the sum of any exchange gain or loss with respect to the principal and interest of any such debt instrument shall be realized only to the extent of the total gain or loss realized on the transaction. The gain or loss realized shall be recognized in accordance with the general principles of the Code. See *Examples 3, 4 and 6* of paragraph (b)(9) of this section.

(9) *Examples.* The preceding provisions are illustrated in the following examples. The examples assume that any transaction involving an individual is a section 988 transaction.

Example 1. (i) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1992, X converts \$13,000 to 10,000 British pounds (£) at the spot rate of £1 = \$1.30 and loans the £10,000 to Y for 3 years. The terms of the loan provide that Y will make interest payments of £1,000 on December 31 of 1992, 1993, and 1994, and will repay X's £10,000 principal on December 31, 1994. Assume the spot rates for the pertinent dates are as follows:

| Date | Spot rate (pounds to dollars) |
|---------------------|-------------------------------|
| Jan. 1, 1992 | £1 = \$1.30 |
| Dec. 31, 1992 | £1 = \$1.35 |
| Dec. 31, 1993 | £1 = \$1.40 |
| Dec. 31, 1994 | £1 = \$1.45 |

(ii) Under paragraph (b)(2)(ii)(B) of this section, X will translate the £1,000 interest payments at the spot rate on the date received. Accordingly, X will have interest income of \$1,350 in 1992, \$1,400 in 1993, and \$1,450 in 1994. Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of interest income.

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 principal amount determined by translating the £10,000 at the spot rate on the date it is received ($£10,000 \times \$1.45 = \$14,500$) and subtracting from such amount, the amount determined by translating the £10,000 at the spot rate on the date the loan was made ($£10,000 \times \$1.30 = \$13,000$). Accordingly, X will realize an exchange gain of \$1,500 on the repayment of the loan on December 31, 1994.

Example 2. (i) Assume the same facts as in *Example 1* except that X is an accrual method taxpayer and that average rates are as follows:

| Accrual period | Average rate (pounds to dollars) |
|----------------|----------------------------------|
| 1992 | £1 = \$1.32 |
| 1993 | £1 = \$1.37 |
| 1994 | £1 = \$1.42 |

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will accrue the £1,000 interest payments at the average rate for the accrual period. Accordingly, X will have interest income of \$1,320 in 1992, \$1,370 in 1993, and \$1,420 in 1994. Because X is an accrual basis taxpayer, X determines exchange gain or loss for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting the amounts of interest income accrued for such period. Thus, X will realize \$90 of exchange gain with respect to interest received under the loan, computed as follows:

| Year | Spot value interest received | Accrued interest @ average rate | Exch. gain |
|-------------|------------------------------|---------------------------------|------------|
| 1992 | \$1,350 | \$1,320 | \$30 |
| 1993 | 1,400 | 1,370 | 30 |
| 1994 | 1,450 | 1,420 | 30 |
| Total | | | \$90 |

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1*. Accordingly, X will realize an exchange gain of \$1,500 on the repayment of the loan principal on December 31, 1994.

Example 3. Assume the same facts as in *Example 1* except that X is a calendar year taxpayer on the accrual method of accounting that elects to use a spot rate convention to translate interest income as provided in §1.988-2(b)(2)(iii)(B). Interest income is received by X on the last day of each accrual period. Under paragraph (b)(2)(ii)(C), X will translate the interest income at the spot rate on the last day of each interest accrual period. Accordingly, X will have interest in-

come of \$1,350 in 1992, and \$1,400 in 1993, \$1,450 in 1994. Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income. Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1*. Accordingly, X will realize an exchange gain of \$1,500 on the repayment of the loan principal on December 31, 1994.

Example 4. Assume the same facts as in *Example 1* except that on December 31, 1993, X sells Y's note for 9,821.13 British pounds (£) after the interest payment. Under paragraph (b)(8) of this section, X will compute exchange gain on the £10,000 principal. The exchange gain is \$1,000 [$(£10,000 \times \$1.40) - (£10,000 \times \$1.30)$]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X's total gain is \$749.58 [$(£9,821.13 \times \$1.40) - (£10,000 \times \$1.30)$]. Thus, X will realize \$749.58 of exchange gain (and will realize no market loss).

Example 5. (i) The facts are the same as in *Example 1* except that Y becomes insolvent and fails to repay the full £10,000 principal when due. Instead, X and Y agree to compromise the debt for a payment of £8,000 on December 31, 1994. Under paragraph (b)(8) of this section, X will compute exchange gain on the £10,000 originally booked. The exchange gain is \$1,500 [$(£10,000 \times \$1.45) - (£10,000 \times \$1.30) = \$1,500$]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X realizes an overall loss on the disposition of \$1,400 [$(£8,000 \times \$1.45) - (£10,000 \times \$1.30) = (\$1,400)$]. Thus, X will realize no exchange gain (and a \$1400 market loss).

(ii) If the exchange rate on December 31, 1994, were £1 = \$1.25, rather than £1 = \$1.45, X would compute exchange loss under paragraph (b)(8) of this section, on the £10,000 originally booked. The exchange loss would be \$500 [$(£10,000 \times \$1.25) - (£10,000 \times \$1.30) = (\$500)$]. X's total loss on the disposition would be \$3,000 [$(£8,000 \times \$1.25) - (£10,000 \times \$1.30) = (\$3,000)$]. Thus, X would realize \$500 of exchange loss and a \$2,500 market loss on the disposition.

Example 6. (i) X is an individual with the dollar as his functional currency. X is on the cash method of accounting. On January 1, 1989, X borrows 10,000 British pounds (£) from Y, an unrelated person. The terms of the loan provide that X will make interest payments of £1,200 on December 31 of 1989 and 1990 and will repay Y's £10,000 principal on December 31, 1990. The spot rates for the pertinent dates are as follows:

| Date | Spot rate ¹ |
|---------------------|------------------------|
| Jan. 1, 1989 | 1 = \$1.50 |
| Dec. 31, 1989 | 1 = 1.60 |

| Date | Spot rate ¹ |
|---------------------|------------------------|
| Dec. 31, 1990 | 1 = 1.70 |

¹Pounds to dollars.

Assume that the basis of the £1,200 paid as interest by X on December 31, 1989, is \$2,000, the basis of the £1,200 paid as interest by X on December 31, 1990, is \$2,020 and the basis of the £10,000 principal paid by X on December 31, 1990, is \$16,000.

(ii) Under paragraph (b)(2)(ii)(B) of this section, X translates the £1,200 interest payments at the spot rate on the day paid. Thus, X paid \$1,920 ($£1,200 \times \1.60) of interest on December 31, 1989, and \$2,040 ($£1,200 \times \1.70) of interest on December 31, 1990. In addition, X will realize exchange gain or loss on the disposition of the £1,200 on December 31, 1989 and 1990, under paragraph (a) of this section. Pursuant to paragraph (a)(2) of this section, X will realize an exchange loss of \$80 [$(£1,200 \times \$1.60) - \$2,000$] on December 31, 1989, and exchange gain of \$20 [$(£1,200 \times \$1.70) - \$2,020$] on December 31, 1990.

(iii) Under paragraph (b)(6) of this section, X will realize exchange loss on December 31, 1990, upon repayment of the £10,000 principal amount determined by translating the £10,000 received at the spot rate on January 1, 1989 ($£10,000 \times \$1.50 = \$15,000$) and subtracting from such amount, the amount determined by translating the £10,000 paid at the spot rate on December 31, 1990 ($£10,000 \times \$1.70 = \$17,000$). Thus, under paragraph (b)(6) of this section, X has an exchange loss with respect to the £10,000 principal of \$2,000. Further, under paragraph (a)(2) of this section, X will realize an exchange gain upon disposition of the £10,000 on December 31, 1990. Under paragraph (a)(2) of this section, X will subtract his adjusted basis in the £10,000 (\$16,000) from the amount realized upon the disposition of the £10,000 ($£10,000 \times \$1.70 = \$17,000$) resulting in a gain of \$1,000. Accordingly, X's combined exchange gain and loss realized on December 31, 1990, with respect to the repayment of the £10,000 is a \$1,000 exchange loss.

Example 7. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. On January 1, 1989, X purchases at original issue for 82.64 Canadian dollars (C\$) M corporation's 2 year note maturing on December 31, 1990, at a stated redemption price of C\$100. The yield to maturity in Canadian dollars is 10 percent and the accrual period is the one year period beginning January 1 and ending December 31. The note has C\$17.36 of original issue discount. Assume that the spot rates are as follows: C\$1 = U.S.\$.72 on January 1, 1989; C\$1 = U.S.\$.80 on January 1, 1990; C\$1 = U.S.\$.82 on December 31, 1990. Assume further that the average rate for 1989 is C\$1 = U.S.\$.76 and for 1990 is C\$1 = U.S.\$.81.

(ii) Under paragraph (b)(2)(ii)(A) of this section, X will determine its interest income in Canadian dollars. Accordingly, under section 1272, X must take into account original issue discount in the amount of C\$8.26 on December 31, 1989, and C\$9.10 on December 31, 1990. Pursuant to paragraph (b)(2)(ii)(C) of this section, X will translate these amounts into U.S. dollars at the average exchange rate for the relevant accrual period. Thus, the amount of interest income taken into account in 1989 is U.S.\$6.28 ($C\$8.26 \times U.S.\$.76$) and in 1990 is U.S.\$7.37 ($C\$9.10 \times U.S.\$.81$). Pursuant to paragraph (b)(3)(i) of this section, X will realize exchange gain or loss with respect to the accrued interest determined for each accrual period by translating the Canadian dollars received with respect to such accrual period into U.S. dollars at the spot rate on the date the interest is received and subtracting from that amount the amount accrued in U.S. dollars. Thus, the amount of exchange gain realized on December 31, 1990, is U.S.\$.58 (U.S.\$.49 from 1989 + U.S.\$.09 from 1990). Pursuant to paragraph (b)(5) of this section, X shall realize exchange gain or loss with respect to the principal (C\$82.64) on December 31, 1990, computed by translating the C\$82.64 at the spot rate on December 31, 1990 (U.S.\$67.76) and subtracting the C\$82.64 translated at the spot rate on January 1, 1989 (U.S.\$59.50) for an exchange gain of U.S.\$8.26. Thus, X's combined exchange gain is U.S.\$8.84 (U.S.\$.49 + U.S.\$.09 + U.S.\$8.26).

(iii) Assume instead that on January 1, 1990, X sells the note for C\$86.95, which it immediately converts to U.S. dollars. X's exchange gain is computed under paragraph (b)(8) of this section with reference to the nonfunctional currency denominated principal amount (C\$82.64) and the nonfunctional currency denominated accrued original issue discount (C\$8.26). X will compute an exchange gain of U.S.\$6.61 with respect to the issue price [$(C\$82.64 \times U.S.\$.80) - (C\$82.64 \times U.S.\$.72)$] and an exchange gain of U.S.\$.33 with respect to the accrued original issue discount [$(C\$8.26 \times U.S.\$.80) - (C\$8.26 \times U.S.\$.76)$]. Accordingly, prior to the application of paragraph (b)(8) of this section, X's total exchange gain is U.S.\$6.94 (U.S.\$6.61 + U.S.\$.33), and X's market loss is U.S.\$3.16 [$(C\$90.90 - C\$86.95) \times U.S.\$.80$]. Pursuant to paragraph (b)(8) of this section, however, X's market loss on the note of U.S.\$3.16 is netted against X's exchange gain of U.S.\$6.94, resulting in a realized exchange gain of U.S.\$3.78 and no market loss.

Example 8. (i) The facts are the same as in Example 7 (i) except that on January 1, 1990, X contributes the M corporation note to Y, a wholly-owned U.S. subsidiary of X with the dollar as its functional currency, and Y collects C\$100 from M corporation at maturity on December 31, 1990, when the spot rate is C\$1 = U.S.\$.82. The transfer of the note from

X to Y qualifies for nonrecognition of gain under section 351(a). On December 31, 1990, Y includes C\$9.10 of accrued interest in income which translated at the average exchange rate of C\$1 = U.S.\$81 for the year results in U.S.\$7.37 of interest income.

(ii) Y's exchange gain is computed under paragraph (b)(3) of this section with respect to accrued interest income and paragraph (b)(5) of this section with respect to the non-functional currency principal amount. Under paragraph (b)(3) of this section, Y will realize exchange gain or loss for each accrual period computed by translating the units of non-functional currency interest income received with respect to such accrual period at the spot rate on the day received and subtracting the amounts of interest income accrued for such period. Thus, Y will realize \$.49 of exchange gain with respect to original issue discount accrued in 1989 [(C\$8.26 × U.S.\$82) - (C\$8.26 × U.S.\$76) = U.S. \$.49] and \$.09 of exchange gain with respect to original issue discount accrued in 1990 [(C\$9.10 × U.S.\$82) - (C\$9.10 × U.S.\$81) = \$.09].

(iii) Pursuant to paragraph (b)(5) of this section, the nonfunctional currency principal amount of the M bond in the hands of Y is C\$82.64, the amount carried over from X, the transferor. Y's exchange gain with respect to the nonfunctional currency principal amount is \$8.26 [(C\$82.64 × U.S.\$82) - (C\$82.64 × U.S.\$72) = U.S. \$8.26]. Accordingly, Y's combined exchange gain is U.S. \$8.84 (\$49 + \$.09 + \$8.26). Because the amount realized in Canadian dollars equals the adjusted issue price (C\$100) on retirement of the M note, there is no market loss, and the netting rule of paragraph (b)(8) of this section does not limit realization of the exchange gain.

Example 9. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. X elects to use the spot rate convention to translate interest income as provided in paragraph (b)(2)(iii)(B) of this section. On January 31, 1992, X loans £1000 to Y, an unrelated person. Under the terms of the loan, Y will pay X interest of £50 on July 31, 1992, and January 31, 1993, and will repay the £1000 principal on January 31, 1993. Assume the following spot exchange rates:

| Date | Spot rate ¹ |
|---------------------|------------------------|
| Jan. 31, 1992 | £1 = \$1.50 |
| July 31, 1992 | £1 = 1.55 |
| Dec. 31, 1992 | £1 = 1.60 |
| Jan. 31, 1993 | £1 = 1.61 |

¹ Pounds to dollars.

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will translate the interest income at

the spot rate on the last day of each interest accrual period (and in the case of a partial accrual period, at the spot rate on the last day of the taxable year). Accordingly, X will have interest income of \$77.50 (£50 × \$1.55) on July 31, 1992. Assuming under X's method of accounting that interest is accrued daily, X will accrue \$66.50 (153 / 184 × £50) × \$1.60) of interest income on December 31, 1992. On January 31, 1993, X will have interest income of \$13.60 ((31/184 × £50) × \$1.61). Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income received on July 31, 1992. However, X will realize exchange gain on the £41.50 (153/184 × £50) of accrued interest income of \$.41 [(£41.50 × \$1.61) - (£41.50 × \$1.60) = \$.41].

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £100 principal amount determined by translating the £100 at the spot rate on the date it is received (£100 × \$1.61 = \$161.00) and subtracting from such amount, the amount determined by translating the £100 at the spot rate on the date the loan was made (£100 × \$1.50 = \$150.00). Accordingly, X will realize an exchange gain of \$11 on the repayment of the loan on January 31, 1993.

Example 10. (i) X, a cash basis taxpayer with the dollar as its functional currency, has the calendar year as its taxable year. On January 1, 1992, X purchases at original issue for 65.88 British pounds (£) M corporation's 5-year bond maturing on December 31, 1996, having a stated redemption price at maturity of £100. The bond provides for annual payments of interest in pounds of 1 pound per year on December 31 of each year. The bond has 34.12 British pounds of original issue discount. The yield to maturity is 10 percent in British pounds and the accrual period is the one year period beginning January 1 and ending December 31 of each calendar year. The amount of original issue discount is determined in pounds for each accrual period by multiplying the adjusted issue price expressed in pounds by the yield and subtracting from such amount the periodic interest payments expressed in pounds for such period. The periodic interest payments are translated at the spot rate on the payment date (December 31 of each year). The original issue discount is translated at the average rate for the accrual period (January 1 through December 31). The following chart describes the determination of interest income with respect to the facts presented and provides other pertinent information.

|-------------------|---|--|--|---|---|--|--|--|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Issue Date: | | | 65.88 | 1 = \$1.20 | | | | | \$79.06 |
| 1992 | 1 | 5.59 | 71.47 | 1 = 1.30 | 1 = \$1.25 | \$1.30 | \$6.99 | \$8.29 | 86.05 |
| 1993 | 1 | 6.15 | 77.62 | 1 = 1.40 | 1 = 1.35 | 1.40 | 8.30 | 9.70 | 94.35 |
| 1994 | 1 | 6.76 | 84.38 | 1 = 1.50 | 1 = 1.45 | 1.50 | 9.80 | 11.30 | 104.15 |
| 1995 | 1 | 7.44 | 91.82 | 1 = 1.60 | 1 = 1.55 | 1.60 | 11.53 | 13.13 | 115.68 |
| 1996 | 1 | 8.18 | 100.00 | 1 = 1.70 | 1 = 1.65 | 1.70 | 13.50 | 15.20 | 129.18 |

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1996 totaling \$7.88 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional

currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the average rate for the period. The following chart illustrates this computation:

|-------------|---|--|--|--|--|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1992 | 5.59 | 1 = \$1.70 | \$9.50 | 1 = \$1.25 | \$6.99 | \$2.51 |
| 1993 | 6.15 | 1 = 1.70 | 10.46 | 1 = 1.35 | 8.30 | 2.16 |
| 1994 | 6.76 | 1 = 1.70 | 11.49 | 1 = 1.45 | 9.80 | 1.69 |
| 1995 | 7.44 | 1 = 1.70 | 12.65 | 1 = 1.55 | 11.53 | 1.12 |
| 1996 | 8.18 | 1 = 1.70 | 13.90 | 1 = 1.65 | 13.50 | .40 |
| Total | | | | | | \$7.88 |

(iii) X will also realize exchange gain with respect to the principal of the loan (i.e., the issue price of 65.88 British pounds) on December 31, 1996 computed by translating the units of nonfunctional currency principal received at the spot rate on the date principal is received (65.88 British pounds × \$1.70 = \$112.00) and subtracting from such amount, the units of nonfunctional currency principal received translated at the spot rate on the date the instrument was acquired (65.88 British pounds × \$1.20 = \$79.06). Accordingly, X's exchange gain on the principal is \$32.94 and X's total exchange gain with respect to the accrued interest and principal is \$40.82. It should be noted that, under this fact pattern, the total exchange gain may be determined in an alternative fashion. Exchange gain

may be computed by subtracting the adjusted issue price in dollars at maturity (\$129.18—see column 10 of Table 1) from the amount computed by multiplying the stated redemption price at maturity in pounds times the spot rate on the maturity date (£100 × \$1.70 = \$170), which equals \$40.82.

Example 11. (i) The facts are the same as in Example 10 except that X makes an election under paragraph (b)(2)(iii) of this section to translate accrued interest on the last day of the accrual period. Accordingly, columns 8, 9 and 10 in Table 1 would change as follows:

| Year (Dec. 31) | Original issue discount in pounds multiplied by the spot rate on last day of accrual period (Dec. 31) | Total interest income in dollars (column 7 plus column 8) | Adjusted issue price in dollars |
|----------------|---|---|---------------------------------|
| 1 | 8 | 9 | 10 |
| | | | \$79.06 |
| 1992 | \$7.27 | \$8.57 | 87.63 |
| 1993 | 8.61 | 10.01 | 97.64 |
| 1994 | 10.14 | 11.64 | 109.28 |
| 1995 | 11.90 | 13.50 | 122.78 |
| 1996 | 13.91 | 15.61 | 138.39 |

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1993 totaling \$6.18 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the spot rate on the last day of the accrual period. Accordingly, columns 5, 6 and 7 of Table 2 would change as follows:

| Year | Spot rate on last day of accrual period | OID in pounds times the spot rate on the last day of the accrual period (col 2 times col. 3) | Exchange gain or loss (col. 4 less col. 6) |
|------------|---|--|--|
| 1 | 5 | 6 | 7 |
| 1992 | \$1.30 | \$7.27 | \$2.23 |
| 1993 | 1.40 | 8.61 | 1.85 |
| 1994 | 1.50 | 10.14 | 1.35 |
| 1995 | 1.60 | 11.90 | 0.75 |
| 1996 | 1.70 | 13.90 | 0.00 |
| | | | 6.18 |

(iii) X will realize exchange gain with respect to the principal amount of the loan as provided in the preceding example.

Example 12. (i) C is a corporation that is a calendar year accrual method taxpayer with the dollar as its functional currency. On January 1, 1989, C lends 100 British pounds (£) in exchange for a note under the terms of which C will receive two equal payments of £57.62 on December 31, 1989, and December 31, 1990. Each payment of £57.62 represents the annual payment necessary to amortize the £100 principal amount at a rate of 10% compounded annually over a two year period. The following tables reflect the amounts of principal and interest that compose each pay-

ment and assumptions as to the relevant exchange rates:

| Date | Principal | Interest |
|---------------------|-----------|----------|
| Dec. 31, 1989 | £47.62 | £10.00 |
| Dec. 12, 1990 | £52.38 | £5.24 |

| Date | Spot rate £1= | Average rate for year ending |
|---------------------|---------------|------------------------------|
| Jan. 1, 1989 | \$1.30 | |
| Dec. 31, 1989 | 1.40 | 1.35 |
| Dec. 31, 1990 | 1.50 | 1.45 |

(ii) Because each interest payment is equal to the product of the outstanding principal balance of the obligation and a single fixed rate of interest, each stated interest payment constitutes periodic interest under the principles of section 1273. Accordingly, there is no original issue discount.

(iii) Because C is an accrual basis taxpayer, C will translate the interest income at the average rate for the annual accrual period pursuant to paragraph (b)(2)(ii)(C) of this section. Thus, C's interest income is \$13.50 (£10.00 × \$1.35) in 1989, and \$7.60 (£5.24 × \$1.45) in 1990. C will realize exchange gain or loss upon receipt of accrued interest computed in accordance with paragraph (b)(3) of this section. Thus, C will realize exchange gain in the amount of \$.50 [(£10.00 × \$1.40) - \$13.50] in 1989, and \$.26 [(£5.24 × \$1.50) - \$7.60] in 1990.

(iv) In addition, C will realize exchange gain or loss upon the receipt of principal each year computed under paragraph (b)(5) of this section. Thus, C will realize exchange gain in the amount of \$4.76 [(£47.62 × \$1.40) - (£47.62 × \$1.30)] in 1989, and \$10.48 [(£52.38 × \$1.50) - (£52.38 × \$1.30)] in 1990.

(10) *Treatment of bond premium*—(i) *In general.* Amortizable bond premium on a bond described in paragraph (b)(2)(i) of this section shall be computed in the units of nonfunctional currency in which the bond is denominated (or in which the payments are determined). Amortizable bond premium properly taken into account under section 171 or §1.61-12 (or the successor provision thereof) shall reduce interest income or expense in units of nonfunctional currency. Exchange gain or loss is realized with respect to bond premium described in the preceding sentence by treating the portion of premium amortized with respect to any period as a return of principal. With respect to a holder that does not elect to amortize bond premium under section 171, the amount of bond premium will constitute a market loss when the bond matures. See paragraph (b)(8) of this

section. The principles set forth in this paragraph (b)(10) shall apply to determine the treatment of acquisition premium described in section 1272(a)(7).

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(10).

Example. (A) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1989, X purchases Y corporation's note for 107.99 British pounds (£) from Z, an unrelated party. The note has an issue price of £100, a stated redemption price at maturity of £100, pays interest in pounds at the rate of 10% compounded annually, and matures on December 31, 1993. X elects to amortize the bond premium of £7.99 under the rules of section 171. Pursuant to paragraph (b)(10)(i) of this section, bond premium is determined and amortized in British pounds. Assume the amortization schedule is as follows:

| Year ending 12/31 | Bond premium amortized | Unamortized premium plus principal | Interest |
|-------------------|------------------------|------------------------------------|----------|
| 1989 | £1.36 | £107.99 | £8.64 |
| 1990 | £1.47 | £106.63 | £8.53 |
| 1991 | £1.59 | £105.16 | £8.41 |
| 1992 | £1.71 | £103.57 | £8.29 |
| 1993 | £1.85 | £101.86 | £8.29 |
| | | £100.00 | £8.15 |

(B) The bond premium reduces X's pound interest income under the note. For example, the £10 stated interest payment made in 1989 is reduced by £1.36 of bond premium, and the resulting £8.64 interest income is translated into dollars at the spot rate on December 31, 1989. Exchange gain or loss is realized on the £1.36 bond premium based on the difference between the spot rates on January 1, 1989, the date the premium is paid to acquire the bond, and December 31, 1989, the date the bond premium is returned as part of the stated interest. The £1.36 bond premium reduces the unamortized premium plus principal to £106.63 (£107.99 - £1.36). On December 31, 1993, when the bond matures and the £7.99 of bond premium has been fully amortized, X will realize exchange gain or loss with respect to the remaining purchase price of £100.

(11) *Market discount*—(i) *In general.* Market discount as defined in section 1278(a)(2) shall be determined in units of nonfunctional currency in which the market discount bond is denominated (or in which the payments are determined). Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) shall be translated into functional currency at the spot rate on the

date the market discount bond is disposed of. No part of such accrued market discount is treated as exchange gain or loss. Accrued market discount currently includible in income pursuant to section 1278(b) shall be translated into functional currency at the average exchange rate for the accrual period. Exchange gain or loss with respect to accrued market discount currently includible in income under section 1278(b) shall be determined in accordance with paragraph (b)(3) of this section relating to accrued interest income.

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(11).

Example. (A) X is a calendar year corporation with the U.S. dollar as its functional currency. On January 1, 1990, X purchases a bond of M corporation for 96,530 British pounds (£). The bond, which was issued on January 1, 1989, has an issue price of £100,000, a stated redemption price at maturity of £100,000, and provides for annual pound payments of interest at 8 percent. The bond matures on December 31, 1991. X purchased the bond at a market discount of 3,470 pounds and did not elect to include the market discount currently in income under section 1278(b). X holds the bond to maturity and on December 31, 1991, receives payment of £100,000 (plus £8,000 interest) when the exchange rate is £1 = \$1.50.

(B) Pursuant to paragraph (b)(11) of this section, X computes market discount in units of nonfunctional currency. Thus, the market discount as defined under section 1278(a)(2) is £3,470. Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) is translated at the spot rate on the date the market discount bond is disposed of. Accordingly, X will translate the accrued market discount of £3,470 at the spot rate on December 31, 1991 (£3,470 × \$1.50 = \$5,205). No exchange gain or loss is realized with respect to the £3,470 of accrued market discount. See paragraphs (b)(3) and (5) of this section for the realization and recognition of exchange gain or loss with respect to accrued interest and principal.

(12) *Tax exempt bonds.* See § 1.988-3(c)(2), which characterizes exchange loss realized with respect to a nonfunctional currency tax exempt bond as a reduction of interest income.

(13) *Nonfunctional currency debt exchanged for stock of obligor*—(i) *In general.* Notwithstanding any other section of the Code other than section 267,

1091 or 1092, exchange gain or loss shall be realized and recognized by the holder and the obligor in accordance with the rules of paragraphs (b)(3) through (7) of this section with respect to the principal and accrued interest of a debt instrument described in paragraph (b)(2)(i) of this section that is acquired by the obligor in exchange for its stock, provided however, that such gain or loss shall be recognized only to the extent of the total gain or loss on the exchange (regardless of whether such gain or loss would otherwise be recognized). This rule shall apply whether the debt instrument is converted into stock according to its terms or exchanged pursuant to a separate agreement between the obligor and the holder. A debt instrument that is acquired by the obligor from a shareholder as a contribution to capital shall be treated for purposes of this section as exchanged for stock, whether or not additional stock is issued.

(ii) *Coordination with section 108.* Section 988 and this section shall apply before section 108. Exchange gain realized by the obligor on an exchange described in paragraph (b)(13)(i) of this section shall not be treated as discharge of indebtedness income, but shall be considered to reduce the amount of the liability for purposes of computing the obligor's income on the exchange under section 108(e)(4), section 108(e)(6) or section 108(e)(10).

(iii) *Effective date.* This paragraph (b)(13) shall be effective for exchanges of debt for stock effected after September 21, 1989.

(iv) *Examples.* The following examples illustrate the operation of this paragraph (b)(13). In each such example, assume that sections 267, 1091 and 1092 do not apply.

Example 1. (i) X is a calendar year U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1990 (the issue date), X acquired a convertible bond maturing on December 31, 1998, issued by Y corporation, a U.K. corporation with the British pound (£) as its functional currency. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. The terms of the bond also provide that at any time prior to December 31, 1998, the holder may surrender all of his interest in the bond in ex-

change for 20 shares of Y common stock. On January 1, 1994, X surrenders his interest in the bond for 20 shares of Y common stock. Assume the following: (a) The spot rate on January 1, 1990, is £1 = \$1.30, (b) The spot rate on January 1, 1994, is £1 = \$1.50, and (c) The 20 shares of Y common stock have a market value of £200,000 on January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange gain with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is converted to stock. X will compute exchange gain pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the conversion date ($£100,000 \times \$1.50 = \$150,000$) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond ($£100,000 \times \$1.30 = \$130,000$). Thus, X will realize and recognize \$20,000 of exchange gain. X's basis in the 20 shares of Y common stock is \$150,000 (\$130,000 substituted basis + \$20,000 recognized gain).

Example 2. (i) X, a foreign corporation with the British pound (£) as its functional currency, lends £100 at a market rate of interest to Y, its wholly-owned U.S. subsidiary, on January 1, 1990, on which date the spot exchange rate is £1 = \$1. Y's functional currency is the U.S. dollar. On January 1, 1992, when the spot exchange rate is £1 = \$.50, X cancels the debt as a contribution to capital. Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the £100 issue price of the debt instrument on January 1, 1992. Y will compute exchange gain pursuant to paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor ($£100 \times \$1 = \100) and subtracting from such amount the issue price translated at the spot rate on the date of extinguishment ($£100 \times \$.50 = \50). Thus, Y will realize and recognize \$50 of exchange gain.

(ii) Under section 108(e)(6), on the acquisition of its indebtedness from X as a contribution to capital Y is treated as having satisfied the debt with an amount of money equal to X's adjusted basis in the debt (£100). For purposes of section 108(e)(6), X's adjusted basis is translated into United States dollars at the spot rate on the date Y acquires the debt (£1 = \$.50). Therefore, Y is treated as having satisfied the debt for \$50. Pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the exchange gain from \$100 to \$50. Accordingly, Y recognizes \$50 of exchange gain and no discharge of indebtedness income on the extinguishment of its debt to X.

(iii) If X were a United States taxpayer with a dollar functional currency and a \$100 basis in Y's obligation, X would realize and

recognize an exchange loss of \$50 under paragraph (b)(5) of this section on the contribution of the debt to Y. The recognized loss would reduce X's adjusted basis in the debt from \$100 to \$50, so that for purposes of applying section 108(e)(6) Y is treated as having satisfied the debt for \$50. Accordingly, under these facts as well Y would recognize \$50 of exchange gain and no discharge of indebtedness income.

Example 3. (i) X and Y are unrelated calendar year U.S. corporations with the U.S. dollar as their functional currency. On January 1, 1990 (the issue date), X acquires Y's bond maturing on December 31, 1999. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. On January 1, 1994, X and Y agree that Y will redeem its bond from X in exchange for 20 shares of Y common stock. Assume the following:

(a) The spot rate on January 1, 1990, is £1 = \$1.00.

(b) The spot rate on January 1, 1994, is £1 = \$.50.

(c) Interest rates on equivalent bonds have increased so that as of January 1, 1994, the value of Y's bond has declined to £90,000, and

(d) The 20 shares of Y common stock have a market value of £90,000 as of January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange loss with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is exchanged for stock. X will compute exchange loss pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the exchange date ($£100,000 \times \$.50 = \$50,000$) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond ($£100,000 \times \$1.00 = \$100,000$). Thus, X will compute \$50,000 of exchange loss, all of which will be realized and recognized because it does not exceed the total \$55,000 realized loss on the exchange (\$45,000 worth of stock received less \$100,000 basis in the exchanged bond).

(iii) Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the issue price, computed under paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor ($£100,000 \times \$1.00 = \$100,000$) and subtracting from such amount the issue price translated at the spot rate on the exchange date ($£100,000 \times \$.50 = \$50,000$). Thus, Y will realize and recognize \$50,000 of exchange gain. Under section 108(e)(10), on the transfer of stock to X in satisfaction of its indebtedness Y is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the stock ($£90,000 \times \$.50 = \$45,000$). Pursuant to paragraph (b)(13) of this

section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from \$100,000 to \$50,000. Accordingly, Y recognizes an additional \$5,000 of discharge of indebtedness income on the exchange.

Example 4. (i) The facts are the same as in *Example 3* except that interest rates on equivalent bonds have declined, rather than increased, so that the value of Y's bond on January 1, 1994, has risen to £112,500; and X and Y agree that Y will redeem its bond from X on that date in exchange for 25 shares of Y common stock worth £112,500. Pursuant to paragraphs (b)(13) and (b)(5) of this section, X will compute \$50,000 of exchange loss on the exchange with respect to the £100,000 issue price of the bond. See *Example 3*. However, because X's total loss on the exchange is only \$43,750 (\$56,250 worth of stock received less \$100,000 basis in the exchanged bond), under the netting rule of paragraph (b)(13) of this section the realized exchange loss is limited to \$43,750.

(ii) Pursuant to paragraphs (b)(13) and (b)(6) of this section, Y will compute \$50,000 of exchange gain with respect to the issue price. See *Example 3*. Under section 108(e)(10), Y is treated as having satisfied the \$100,000 indebtedness with an amount of money equal to the fair market value of the stock ($£112,500 \times \$.50 = \$56,250$), resulting in a total gain on the exchange of \$43,750. Accordingly, under paragraph (b)(13) of this section Y's realized (and recognized) exchange gain on the exchange is limited to \$43,750. Also pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from \$100,000 to \$56,250. Accordingly, Y recognizes no discharge of indebtedness income on the exchange.

(14) [Reserved]

(15) *Debt instruments and deposits denominated in hyperinflationary currencies*—(i) *In general.* If a taxpayer issues, acquires, or otherwise enters into or holds a hyperinflationary debt instrument (as defined in paragraph (b)(15)(vi)(A) of this section) or a hyperinflationary deposit (as defined in paragraph (b)(15)(vi)(B) of this section) on which interest is paid or accrued that is denominated in (or determined by reference to) a nonfunctional currency of the taxpayer, then the taxpayer shall realize exchange gain or loss with respect to such instrument or deposit for its taxable year determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the instrument was entered into (or an amount deposited); and

(B) The earlier of the last day of the taxable year, or the date the instrument (or deposit) is disposed of or otherwise terminated.

(ii) *Only exchange gain or loss is realized.* No gain or loss is realized under paragraph (b)(15)(i) by reason of factors other than movement in exchange rates, such as the creditworthiness of the debtor.

(iii) *Special rule for synthetic, non-hyperinflationary currency debt instruments—(A) General rule.* Paragraph (b)(15)(i) does not apply to a debt instrument that has interest and principal payments that are to be made by reference to a currency or item that does not reflect hyperinflationary conditions in a country (within the meaning of § 1.988-1(f)).

(B) *Example.* Paragraph (b)(15)(iii)(A) is illustrated by the following example:

Example. When the Turkish lira (TL) is a hyperinflationary currency, A, a U.S. corporation with the U.S. dollar as its functional currency, makes a 5 year, 100,000 TL-denominated loan to B, an unrelated corporation, at a 10% interest rate when 1,000 TL equals \$1. Under the terms of the debt instrument, B must pay interest annually to A in amount of Turkish lira that is equal to \$100. Also under the terms of the debt instrument, B must pay A upon maturity of the debt instrument an amount of Turkish lira that is equal to \$1,000. Although the principal and interest are payable in a hyperinflationary currency, the debt instrument is a synthetic dollar debt instrument and is not subject to paragraph (b)(15)(i) of this section.

(iv) *Source and character of gain or loss—(A) General rule for hyperinflationary conditions.* The rules of this paragraph (b)(15)(iv)(A) shall apply to any taxpayer that is either an issuer of (or obligor under) a hyperinflationary debt instrument or deposit and has currency gain on such debt instrument or deposit, or a holder of a hyperinflationary debt instrument or deposit and has currency loss on such debt instrument or deposit. For purposes of subtitle A of the Internal Revenue Code, any exchange gain or loss realized under paragraph (b)(15)(i) of this section is directly allocable to

the interest expense or interest income, respectively, from the debt instrument or deposit (computed under this paragraph (b)), and therefore reduces or increases the amount of interest income or interest expense paid or accrued during that year with respect to that instrument or deposit. With respect to a debt instrument or deposit during a taxable year, to the extent exchange gain realized under paragraph (b)(15)(i) of this section exceeds interest expense of an issuer, or exchange loss realized under paragraph (b)(15)(i) of this section exceeds interest income of a holder or depositor, the character and source of such excess amount shall be determined under §§ 1.988-3 and 1.988-4.

(B) *Special rule for subsiding hyperinflationary conditions.* If the taxpayer is an issuer of (or obligor under) a hyperinflationary debt instrument or deposit and has currency loss, or if the taxpayer is a holder of a hyperinflationary debt instrument or deposit and has currency gain, then for purposes of subtitle A of the Internal Revenue Code, the character and source of the currency gain or loss is determined under §§ 1.988-3 and 1.988-4. Thus, if an issuer has both interest expense and currency loss, the currency loss is sourced and characterized under section 988, and does not affect the determination of interest expense.

(v) *Adjustment to principal or basis.* Any exchange gain or loss realized under paragraph (b)(15)(i) of this section is an adjustment to the functional currency principal amount of the issuer, functional currency basis of the holder, or the functional currency amount of the deposit. This adjusted amount or basis is used in making subsequent computations of exchange gain or loss, computing the basis of assets for purposes of allocating interest under §§ 1.861-9T through 1.861-12T and 1.882-5, or making other determinations that may be relevant for computing taxable income or loss.

(vi) *Definitions—(A) Hyperinflationary debt instrument.* A hyperinflationary debt instrument is a debt instrument that provides for—

(1) Payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in

§ 1.988-2

26 CFR Ch. I (4-1-23 Edition)

§ 1.988-1(f) at the time the taxpayer enters into or otherwise acquires the debt instrument; or

(2) Payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in § 1.988-1(f) during the taxable year, and the terms of the instrument provide for the adjustment of principal or interest payments in a manner that reflects hyperinflation. For example, a debt instrument providing for a variable interest rate based on local conditions and generally responding to changes in the local consumer price index will reflect hyperinflation.

(B) *Hyperinflationary deposit.* A hyperinflationary deposit is a demand or time deposit or similar instrument issued by a bank or other financial institution that provides for—

(1) Payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in § 1.988-1(f) at the time the taxpayer enters into or otherwise acquires the deposit; or

(2) Payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in § 1.988-1(f) during the taxable year, and the terms of the deposit provide for the adjustment of the deposit amount or interest payments in a manner that reflects hyperinflation.

(vii) *Interaction with other provisions—*

(A) *Interest allocation rules.* In determining the amount of interest expense, this paragraph (b)(15) applies before §§ 1.861-9T through 1.861-12T, and 1.882-5.

(B) *DASTM.* With respect to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985-3, paragraph (b)(15)(i) of this section does not apply.

(C) *Interaction with section 988(a)(3)(C).* Section 988(a)(3)(C) does not apply to a debt instrument subject to the rules of paragraph (b)(15)(i) of this section.

(D) *Hedging rules.* To the extent § 1.446-4 or 1.988-5 apply, the rules of paragraph (b)(15)(i) of this section will not apply. This paragraph (b)(15)(vii)(D) does not apply if the application of § 1.988-5 results in hyperinflationary debt instrument or

deposit described in paragraph (b)(15)(vi)(A) or (B) of this section.

(viii) *Effective date.* This paragraph (b)(15) applies to transactions entered into after February 14, 2000.

(16) [Reserved] For further guidance, see § 1.988-2T(b)(16).

(17) *Coordination with installment method under section 453.* [Reserved]

(18) *Interaction of section 988 and § 1.1275-2(g)—(i) In general.* If a principal purpose of structuring a debt instrument subject to section 988 and any related hedges is to achieve a result that is unreasonable in light of the purposes of section 163(e), section 988, sections 1271 through 1275, or any related section of the Internal Revenue Code, the Commissioner can apply or depart from the regulations under the applicable sections as necessary or appropriate to achieve a reasonable result. For example, if this paragraph (b)(18) applies to a multicurrency debt instrument and a hedge or hedges, the Commissioner can wholly or partially integrate transactions or treat portions of the debt instrument as separate instruments where appropriate. See also § 1.1275-2(g).

(ii) *Unreasonable result.* Whether a result is unreasonable is determined based on all the facts and circumstances. In making this determination, a significant fact is whether the treatment of the debt instrument is expected to have a substantial effect on the issuer's or a holder's U.S. tax liability. Another significant fact is whether the result is obtainable without the application of § 1.988-6 and any related provisions (*e.g.*, if the debt instrument and the contingency were entered into separately). A result will not be considered unreasonable, however, in the absence of an expected substantial effect on the present value of a taxpayer's tax liability.

(iii) *Effective date.* This paragraph (b)(18) shall apply to debt instruments issued on or after October 29, 2004.

(c) *Item of expense or gross income or receipts which is to be paid or received after the date accrued—(1) In general.* Except as provided in § 1.988-5, exchange gain or loss with respect to an item described in § 1.988-1(a)(1)(ii) and (2)(ii) (other than accrued interest income or expense subject to paragraph

(b) of this section) shall be realized on the date payment is made or received. Except as provided in the succeeding sentence, such exchange gain or loss shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. If the taxpayer's right to receive income, or obligation to pay an expense, is transferred or modified in a transaction in which gain or loss would otherwise be recognized, exchange gain or loss shall be realized and recognized only to the extent of the total gain or loss on the transaction.

(2) *Determination of exchange gain or loss with respect to an item of gross income or receipts.* Exchange gain or loss realized on an item of gross income or receipts described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency received by the spot rate on the payment date, and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency received by the spot rate on the booking date. The term "spot rate on the payment date" means the spot rate determined under § 1.988-1(d) on the date payment is received or otherwise taken into account. Pursuant to § 1.988-1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the payment date. The term "spot rate on the booking date" means the spot rate determined under § 1.988-1(d) on the date the item of gross income or receipts is accrued or otherwise taken into account. Pursuant to § 1.988-1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date.

(3) *Determination of exchange gain or loss with respect to an item of expense.* Exchange gain or loss realized on an item of expense described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency paid by the spot rate on the booking date and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency paid by the spot rate on the payment date. The term "spot rate on the booking date" means the spot rate determined under § 1.988-1(d) on the date the item of ex-

pense is accrued or otherwise taken into account. Pursuant to § 1.988-1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date. The term "spot rate on the payment date" means the spot rate determined under § 1.988-1(d) on the date payment is made or otherwise taken into account. Pursuant to § 1.988-1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the date.

(4) *Examples.* The following examples illustrate the application of paragraph (c) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. X is on the accrual method of accounting. On January 15, 1989, X sells inventory for 10,000 Canadian dollars (C\$). The spot rate on January 15, 1989, is C\$1 = U.S. \$.55. On February 23, 1989, when X receives payment of the C\$10,000, the spot rate is C\$1 = U.S. \$.50. On February 23, 1989, X will realize exchange loss. X's loss is computed by multiplying the C\$10,000 by the spot rate on the date the C\$10,000 are received (C\$10,000 × .50 = U.S. \$5,000) and subtracting from such amount, the amount computed by multiplying the C\$10,000 by the spot rate on the booking date (C\$10,000 × .55 = U.S. \$5,500). Thus, X's exchange loss on the transaction is U.S. \$500 (U.S. \$5,000 - U.S. \$5,500).

Example 2. The facts are the same as in *Example 1* except that X uses a spot rate convention to determine the spot rate as provided in § 1.988-1(d)(3). Pursuant to X's spot rate convention, the spot rate at which a payable or receivable is booked is determined monthly for each nonfunctional currency payable or receivable by adding the spot rate at the beginning of the month and the spot rate at the end of the month and dividing by two. All payables and receivables in a nonfunctional currency booked during the month are translated into functional currency at the rate described in the preceding sentence. Further, the translation of nonfunctional currency paid with respect to a payable, and nonfunctional currency received with respect to a receivable, is also performed pursuant to the spot rate convention. Assume the spot rate determined under the spot rate convention for the month of January is C\$1 = U.S. \$.54 and for the month of February is C\$1 = U.S. \$.51. On the last date in February, X will realize exchange loss. X's loss is computed by multiplying the C\$10,000 by the spot rate convention for the month of February (C\$10,000 × U.S. \$.51 = U.S. \$5,100) and subtracting from such amount, the amount computed by multiplying the C\$10,000 by the spot rate convention for the

month of January (C\$10,000 × U.S. \$.54 = \$5,400). Thus, X's exchange loss on the transaction is U.S. \$300 (U.S. \$5,100 - U.S. \$5,400). X's basis in the C\$10,000 is U.S. \$5,400.

Example 3. The facts are the same as in *Example 2* except that X has a standing order with X's bank for the bank to convert any nonfunctional currency received in satisfaction of a receivable into U.S. dollars on the day received and to deposit those U.S. dollars in X's U.S. dollar bank account. X may use its convention to translate the amount booked into U.S. dollars, but must use the U.S. dollar amounts received from the bank with respect to such receivables to determine X's exchange gain or loss. Thus, if X receives payment of the C\$10,000 on February 23, 1989, when the spot rate is C\$1 = U.S.\$.50, X determines exchange gain or loss by subtracting the amount booked under X's convention (U.S.\$5,400) from the amount of U.S. dollars received from the bank under the standing conversion order (assume \$5,000). X's exchange loss is U.S.\$400.

(d) *Exchange gain or loss with respect to forward contracts, futures contracts and option contracts*—(1) *Scope*—(i) *In general.* This paragraph (d) applies to forward contracts, futures contracts and option contracts described in § 1.988-1(a)(1)(ii) and (2)(iii). For rules applicable to currency swaps and notional principal contracts described in § 1.988-1(a)(1)(ii) and (2)(iii), see paragraph (e) of this section.

(ii) *Treatment of spot contracts.* Solely for purposes of this paragraph (d), a spot contract as defined in § 1.988-1(b) to buy or sell nonfunctional currency is not considered a forward contract or similar transaction described in § 1.988-1(a)(2)(iii) unless such spot contract is disposed of (or otherwise terminated) prior to making or taking delivery of the currency. For example, if a taxpayer with the dollar as its functional currency enters into a spot contract to purchase British pounds, and takes delivery of such pounds under the contract, the delivery of the pounds is not a realization event under section 988(c)(5) and paragraph (e)(4)(ii) of this section because the contract is not considered a forward contract or similar transaction described in § 1.988-1(a)(2)(iii). However, if the taxpayer sells or otherwise terminates the contract before taking delivery of the pounds, exchange gain or loss shall be realized and recognized in accordance

with paragraphs (d)(2) and (3) of this section.

(2) *Realization of exchange gain or loss*—(i) *In general.* Except as provided in § 1.988-5, exchange gain or loss on a contract described in § 1.988-2(d)(1) shall be realized in accordance with the applicable realization section of the Internal Revenue Code (*e.g.*, sections 1001, 1092, and 1256). See also section 988(c)(5). For purposes of determining the timing of the realization of exchange gain or loss, sections 1092 and 1256 shall take precedence over section 988(c)(5).

(ii) *Realization by offset*—(A) *In general.* Except as provided in paragraphs (d)(2)(ii)(B) and (C) of this section, exchange gain or loss with respect to a transaction described in § 1.988-1(a)(1)(ii) and (2)(iii) shall not be realized solely because such transaction is offset by another transaction (or transactions).

(B) *Exception where economic benefit is derived.* If a transaction described in § 1.988-1(a)(1)(ii) and (2)(iii) is offset by another transaction or transactions, exchange gain shall be realized to the extent the taxpayer derives, by pledge or otherwise, an economic benefit (*e.g.*, cash, property or the proceeds from a borrowing) from any gain inherent in such offsetting positions. Proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain taken into account by reason of the preceding sentence. This paragraph (d)(2)(ii)(B) shall apply to transactions creating an offset after September 21, 1989.

(C) *Certain contracts traded on an exchange.* If a transaction described in § 1.988-1(a)(1)(ii) and (2)(iii) is traded on an exchange and it is the general practice of the exchange to terminate offsetting contracts, entering into an offsetting contract shall be considered a termination of the contract being offset.

(iii) *Clarification of section 988(c)(5).* If the delivery date of a contract subject to section 988(c)(5) and paragraph (d)(4)(ii) of this section is different than the date the contract expires, then for purposes of determining the date exchange gain or loss is realized, the term delivery date shall mean expiration date.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (d)(1) and (2).

Example 1. On August 1, 1989, X, a calendar year corporation with the dollar as its functional currency, enters into a forward contract with Bank A to buy 100 New Zealand dollars for \$80 for delivery on January 31, 1990. (The forward purchase contract is not a section 1256 contract.) On November 1, 1989, the market price for the purchase of 100 New Zealand dollars for delivery on January 31, 1990, is \$76. On November 1, 1989, X cancels its obligation under the forward purchase contract and pays Bank A \$3.95 (the present value of \$4 discounted at 12% for the period) in cancellation of such contract. Under section 1001 (a), X realizes an exchange loss of \$3.95 on November 1, 1989, because cancellation of the forward purchase contract for cash results in the termination of X's contract.

Example 2. X is a corporation with the dollar as its functional currency. On January 1, 1989, X enters into a currency swap contract with Bank A under which X is obligated to make a series of Japanese yen payments in exchange for a series of dollar payments. On February 21, 1992, X has a gain of \$100,000 inherent in such contract as a result of interest rate and exchange rate movements. Also on February 21, 1992, X enters into an offsetting swap with Bank A to lock in such gain. If on February 21, 1992, X pledges the gain inherent in such offsetting positions as collateral for a loan, X's initial swap contract is treated as being terminated on February 21, 1992, under paragraph (d)(2)(ii)(B) of this section. Proper adjustment is made in the amount of any gain or loss subsequently realized for the gain taken into account by reason of paragraph (d)(2)(ii)(B) of this section.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, X enters into a forward contract to buy 100,000 Swiss francs (Sf) for delivery on March 1, 1990, for \$51,220. Assume that the contract is a section 1256 contract under section 1256(g)(2) and that section 1256(e) does not apply. Pursuant to section 1256(a)(1), the forward contract is treated as sold for its fair market value on December 31, 1989. Assume that the fair market value of the contract is \$1,000 determined under § 1.988-1(g). Thus X will realize an exchange gain of \$1,000 on December 31, 1989. Such gain is subject to the character rules of § 1.988-3 and the source rules of § 1.988-4.

(v) *Extension of the maturity date of certain contracts.* An extension of time for making or taking delivery under a contract described in paragraph (d)(1) of this section (e.g., a historical rate

rollover as defined in § 1.988-5(b)(2)(iii)(C)) shall be considered a sale or exchange of the contract for its fair market value on the date of the extension and the establishment of a new contract on such date. If, under the terms of the extension, the time value of any gain or loss recognized pursuant to the preceding sentence adjusts the price of the currency to be bought or sold under the new contract, the amount attributable to such time value shall be treated as interest income or expense for all purposes of the Code. However, the preceding sentence shall not apply and the amount attributable to the time value of any gain or loss recognized shall be treated as exchange gain or loss if the period beginning on the first date the contract is rolled over and ending on the date payment is ultimately made or received with respect to such contract does not exceed 183 days.

(3) *Recognition of exchange gain or loss.* Except as provided in § 1.988-5 (relating to section 988 hedging transactions), exchange gain or loss realized with respect to a contract described in paragraph (d)(1) of this section shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. For example, a loss realized with respect to a contract described in paragraph (d)(1) of this section which is part of a straddle shall be recognized in accordance with the provisions of section 1092 to the extent such section is applicable.

(4) *Determination of exchange gain or loss—(i) In general.* Exchange gain or loss with respect to a contract described in § 1.988-2(d)(1) shall be determined by subtracting the amount paid (or deemed paid), if any, for or with respect to the contract (including any amount paid upon termination of the contract) from the amount received (or deemed received), if any, for or with respect to the contract (including any amount received upon termination of the contract). Any gain or loss determined according to the preceding sentence shall be treated as exchange gain or loss.

(ii) *Special rules where taxpayer makes or takes delivery.* If the taxpayer makes or takes delivery in connection with a contract described in paragraph (d)(1)

of this section, any gain or loss shall be realized and recognized in the same manner as if the taxpayer sold the contract (or paid another person to assume the contract) on the date on which he took or made delivery for its fair market value on such date. See paragraph (d)(2)(iii) of this section regarding the definition of the term "delivery date." This paragraph (d)(4)(ii) shall not apply in any case in which the taxpayer makes or takes delivery before June 11, 1987.

(iii) *Examples.* The following examples illustrate the application of paragraph (d)(4) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, when the six month forward rate is \$.4907, X enters into a forward contract to buy 100,000 New Zealand dollars (NZD) for delivery on March 1, 1990. On March 1, 1990, when X takes delivery of the 100,000 NZD, the spot rate is 1NZD equals \$.48. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery of nonfunctional currency under a forward contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery is taken. If X sold the contract on March 1, 1990, the transferee would require a payment of \$1,070 [$[(\$.48 \times 100,000\text{NZD}) - (\$.4907 \times 100,000\text{NZD})]$] to compensate him for the loss in value of the 100,000NZD. Therefore, X realizes an exchange loss of \$1,070. X has a basis in the 100,000NZD of \$48,000.

Example 2. Assume the same facts as in *Example 1* except that the contract is for Swiss francs and is a section 1256 contract. Assume further that on December 31, 1989, the value to X of the contract as marked to market is \$1,000. Pursuant to section 1256(a), X realizes an exchange gain of \$1,000. Such gain, however, is characterized as ordinary income under § 1.988-3 and will be sourced under § 1.988-4.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On May 2, 1989, X enters into an option contract with Bank A to purchase 50,000 Canadian dollars (C\$) for U.S. \$42,500 (C\$1 = U.S. \$.85) for delivery on or before September 18, 1989. X pays a \$285 premium to Bank A to obtain the option contract. On September 18, 1989, when X exercises the option and takes delivery of the C\$50,000, the spot rate is C\$1 equals U.S. \$.90. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery under an option contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery

is taken. If X sold the contract for its fair market value on September 18, 1989, X would receive U.S. \$2,500 [$[(\text{C}\$50,000 \times \text{U.S. } \$.90) - (\text{C}\$50,000 \times \text{U.S. } \$.85)]$]. Accordingly, X is deemed to have received U.S. \$2,500 on the sale of the contract at its fair market value. X will realize U.S. \$2,215 (\$2,500 deemed received less \$285 paid) of exchange gain with respect to the delivery of Canadian dollars under the option contract. X's basis in the 50,000 Canadian dollars is U.S. \$45,000.

(5) *Hyperinflationary contracts*—(i) *In general.* If a taxpayer acquires or otherwise enters into a hyperinflationary contract (as defined in paragraph (d)(5)(ii) of this section) that has payments to be made or received that are denominated in (or determined by reference to) a nonfunctional currency of the taxpayer, then the taxpayer shall realize exchange gain or loss with respect to such contract for its taxable year determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the contract was acquired or entered into; and

(B) The earlier of the last day of the taxable year, or the date the contract is disposed of or otherwise terminated.

(ii) *Definition of hyperinflationary contract.* A hyperinflationary contract is a contract described in paragraph (d)(1) of this section that provides for payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in § 1.988-1(f)) at the time the taxpayer acquires or otherwise enters into the contract.

(iii) *Interaction with other provisions*—(A) *DASTM.* With respect to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985-3, this paragraph (d)(5) does not apply.

(B) *Hedging rules.* To the extent § 1.446-4 or 1.988-5 apply, this paragraph (d)(5) does not apply.

(C) *Adjustment for subsequent transactions.* Proper adjustments must be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of this paragraph (d)(5).

(iv) *Effective date.* This paragraph (d)(5) is applicable to transactions acquired or otherwise entered into after February 14, 2000.

(e) *Currency swaps and other notional principal contracts*—(1) *In general.* Except as provided in paragraph (e)(2) of this section or in § 1.988-5, the timing of income, deduction and loss with respect to a notional principal contract that is a section 988 transaction shall be governed by section 446 and the regulations thereunder. Such income, deduction and loss is characterized as exchange gain or loss (except as provided in another section of the Internal Revenue Code (or regulations thereunder), § 1.988-5, or in paragraph (f) of this section).

(2) *Special rules for currency swaps*—(i) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section, the provisions of this paragraph (e)(2) shall apply solely for purposes of determining the realization, recognition and amount of exchange gain or loss with respect to a currency swap contract, and not for purposes of determining the source of such gain or loss, or characterizing such gain or loss as interest. Except as provided in § 1.988-3(c), any income or loss realized with respect to a currency swap contract shall be characterized as exchange gain or loss (and not as interest income or expense). Any exchange gain or loss realized in accordance with this paragraph (e)(2) shall be recognized unless otherwise provided in an applicable section of the Code. For purposes of this paragraph (e)(2), a currency swap contract is a contract defined in paragraph (e)(2)(ii) of this section. With respect to a contract which requires the payment of swap principal prior to maturity of such contract, see paragraph (f) of this section. For purposes of this paragraph (e), the rules of paragraph (d)(2)(ii) of this section (regarding realization by offset) apply. See Example 2 of paragraph (d)(2)(iv) of this section.

(ii) *Definition of currency swap contract*—(A) *In general.* A currency swap contract is a contract involving different currencies between two or more parties to—

(1) Exchange periodic interim payments, as defined in paragraph (e)(2)(ii)(C) of this section, on or prior to maturity of the contract; and

(2) Exchange the swap principal amount upon maturity of the contract.

A currency swap contract may also require an exchange of the swap principal amount upon commencement of the agreement.

(B) *Swap principal amount.* The swap principal amount is an amount of two different currencies which, under the terms of the currency swap contract, is used to determine the periodic interim payments in each currency and which is exchanged upon maturity of the contract. If such amount is not clearly set forth in the contract, the Commissioner may determine the swap principal amount.

(C) *Exchange of periodic interim payments.* An exchange of periodic interim payments is an exchange of one or more payments in one currency specified by the contract for one or more payments in a different currency specified by the contract where the payments in each currency are computed by reference to an interest index applied to the swap principal amount. A currency swap contract must clearly indicate the periodic interim payments, or the interest index used to compute the periodic interim payments, in each currency.

(iii) *Timing and computation of periodic interim payments*—(A) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section and § 1.988-5, the timing and computation of the periodic interim payments provided in a currency swap agreement shall be determined by treating—

(1) Payments made under the swap as payments made pursuant to a hypothetical borrowing that is denominated in the currency in which payments are required to be made (or are determined with reference to) under the swap, and

(2) Payments received under the swap as payments received pursuant to a hypothetical loan that is denominated in the currency in which payments are received (or are determined with reference to) under the swap.

Except as provided in paragraph (e)(2)(v) of this section, the hypothetical issue price of such hypothetical borrowing and loan shall be the swap principal amount. The hypothetical stated redemption price at maturity is the total of all payments (excluding any exchange of the swap principal amount at the inception of the

contract) provided under the hypothetical borrowing or loan other than periodic interest payments under the principles of section 1273. For purposes of determining economic accrual under the currency swap, the number of hypothetical interest compounding periods of such hypothetical borrowing and loan shall be determined pursuant to a semiannual compounding convention unless the currency swap contract indicates otherwise. For purposes of determining the timing and amount of the periodic interim payments, the principles regarding the amortization of interest (see generally, sections 1272 through 1275 and 163(e)) shall apply to the hypothetical interest expense and income of such hypothetical borrowing and loan. However, such principles shall not apply to determine the time when principal is deemed to be paid on the hypothetical borrowing and loan. See paragraph (d)(2)(iii) of this section and *Example 2* of paragraph (d)(5) of this section with respect to the time when principal is deemed to be paid. With respect to the translation and computation of exchange gain or loss on any hypothetical interest income or expense, see § 1.988-2(b). The amount treated as exchange gain or loss by the taxpayer with respect to the periodic interim payments for the taxable year shall be the amount of hypothetical interest income and exchange gain or loss attributable to such interest income from the hypothetical borrowing and loan for such year less the amount of hypothetical interest expense and exchange gain or loss attributable to the interest expense from such hypothetical borrowing and loan for such year.

(B) *Effect of prepayment for purposes of section 956.* For purposes of section 956, the Commissioner may treat any prepayment of a currency swap as a loan.

(iv) *Timing and determination of exchange gain or loss with respect to the swap principal amount.* Exchange gain or loss with respect to the swap principal amount shall be realized on the day the units of swap principal in each currency are exchanged. (See paragraph (e)(2)(ii)(A)(2) of this section which requires that the entire swap principal amount be exchanged upon maturity of the contract.) Such gain or

loss shall be determined on the date of the exchange by subtracting the value (on such date) of the units of swap principal paid from the value of the units of swap principal received. This paragraph (e)(2)(iv) does not apply to an equal exchange of the swap principal amount at the commencement of the agreement at a market exchange rate.

(v) *Anti-abuse rules—(A) Method of accounting does not clearly reflect income.* If the taxpayer's method of accounting for income, expense, gain or loss attributable to a currency swap does not clearly reflect income, or if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may apply principles analogous to those of section 1274 or such other rules as the Commissioner deems appropriate to clearly reflect income. For example, in order to clearly reflect income the Commissioner may determine the hypothetical issue price, the hypothetical stated redemption price at maturity, and the amounts required to be taken into account within a taxable year. Further, if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may integrate the swap with another transaction (or transactions) in order to clearly reflect income.

(B) *Terms must be clearly stated.* If the currency swap contract does not clearly set forth the swap principal amount in each currency, and the periodic interim payments in each currency (or the interest index used to compute the periodic interim payments in each currency), the Commissioner may defer any income, deduction, gain or loss with respect to such contract until termination of the contract.

(3) *Amortization of swap premium or discount in the case of off-market currency swaps—(i) In general.* An "off-market currency swap" is a currency

swap contract under which the present value of the payments to be made is not equal to that of the payments to be received on the day the taxpayer enters into or acquires the contract (absent the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section). Generally, such present values may not be equal if the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) is not the spot rate, or the interest indices used to compute the periodic interim payments do not reflect current values, on the day the taxpayer enters into or acquires the currency swap.

(ii) *Treatment of taxpayer entering into or acquiring an off-market currency swap.* If a taxpayer that enters into or acquires a currency swap makes a payment (that is, the taxpayer pays a premium, "swap premium," to enter into or acquire the currency swap) or receives a payment (that is, the taxpayer enters into or acquires the currency swap at a discount, "swap discount") in order to make the present value of the amounts to be paid equal the amounts to be received, such payment shall be amortized in a manner which places the taxpayer in the same position it would have been in had the taxpayer entered into a currency swap contract under which the present value of the amounts to be paid equal the amounts to be received (absent any swap premium or discount). Thus, swap premium or discount shall be amortized as follows—

(A) The amount of swap premium or discount that is attributable to the difference between the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) and the spot rate on the date the contract is entered into or acquired shall be taken into account as income or expense on the date the swap principal amounts are taken into account; and

(B) The amount of swap premium or discount attributable to the difference in values of the periodic interim payments shall be amortized in a manner consistent with the principles of economic accrual. *Cf.*, section 171.

Any amount taken into account pursuant to this paragraph (e)(3)(ii) shall be treated as exchange gain or loss.

(iii) *Definition of swap exchange rate.* The swap exchange rate is the single exchange rate set forth in the contract at which the swap principal amounts are determined. If the swap exchange rate is not clearly set forth in the contract, the Commissioner may determine such rate.

(iv) *Coordination with § 1.446-3(g)(4) regarding swaps with significant nonperiodic payments.* The rules of § 1.446-3(g)(4) apply to any currency swap with a significant nonperiodic payment. Section 1.446-3(g)(4) applies before this paragraph (e)(3). Thus, if § 1.446-3(g)(4) applies, currency gain or loss may be realized on the loan. This paragraph (e)(3)(iv) applies to transactions entered into after February 14, 2000.

(4) *Treatment of taxpayer disposing of a currency swap.* Any gain or loss realized on the disposition or the termination of a currency swap is exchange gain or loss.

(5) *Examples.* The following examples illustrate the application of this paragraph (e).

Example 1. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, C enters into a currency swap with J with the following terms:

(1) the principal amount is \$150 and 100 British pounds (£) (the equivalent of \$150 on the effective date of the contract assuming a spot rate of £1 = \$1.50 on January 1, 1989);

(2) C will make payments equal to 10% of the dollar principal amount on December 31, 1989, and December 31, 1990;

(3) J will make payments equal to 12% of the pound principal amount on December 31, 1989, and December 31, 1990; and

(4) on December 31, 1990, C will pay to J the \$150 principal amount and J will pay to C the £100 principal amount.

Assume that the spot rate is £1 = \$1.50 on January 1, 1989, £1 = \$1.40 on December 31, 1989, and £1 = \$1.30 on December 31, 1990. Assume further that the average rate for 1989 is £1 = \$1.45 and for 1990 is £1 = \$1.35.

(ii) Solely for determining the realization of gain or loss in accordance with paragraph (e)(2) of this section (and not for purposes of determining whether any payments are treated as interest), C will treat the dollar payments made by C as payments made pursuant to a dollar borrowing with an issue price of \$150, a stated redemption price at maturity of \$150, and yield to maturity of 10%. C will treat the pound payments received as payments received pursuant to a

§ 1.988-2

26 CFR Ch. I (4-1-23 Edition)

pound loan with an issue price of £100, a stated redemption price at maturity of £100, and a yield of 12% to maturity. Pursuant to § 1.988-2(b), C is required to compute hypothetical accrued pound interest income at the average rate for the accrual period and then determine exchange gain or loss on the day payment is received with respect to such accrued amount. Accordingly, C will accrue \$17.40 ($£12 \times \1.45) in 1989 and \$16.20 ($£12 \times \1.35) in 1990. C also will compute hypothetical exchange loss of \$.60 on December 31, 1989 [$(£12 \times \$1.40) - (£12 \times \$1.45)$] and hypothetical exchange loss of \$.60 on December 31, 1990 [$(£12 \times \$1.30) - (£12 \times \$1.35)$]. All such hypothetical interest income and exchange loss are characterized and sourced as exchange gain and loss. Further, C is treated as having paid \$15 ($\$150 \times 10\%$) of hypothetical interest on December 31, 1989, and again on December 31, 1990. Such hypothetical interest expense is characterized and sourced as exchange loss. Thus, C will have a net exchange gain of \$1.80 ($\$17.40 - \$.60 - \15.00) with respect to the periodic interim payments in 1989 and a net exchange gain of \$.60 ($\$16.20 - \$.60 - \15.00) with respect to the periodic interim payments in 1990. Finally, C will realize an exchange loss on December 31, 1990, with respect to the exchange of the swap principal amount. This loss is determined by subtracting the value of the units of swap principal paid (\$150) from the value of the units of swap principal received ($£100 \times \$1.30 = \130) resulting in a \$20 exchange loss.

Example 2. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, when the spot rate is £1 = \$1.50, C enters into a currency swap contract with J under which C agrees to make and receive the following payments:

| Date | C pays | J pays |
|-------------------------|---------|--------|
| December 31, 1989 | \$15.00 | £12.00 |
| December 31, 1990 | 41.04 | 12.00 |
| December 31, 1991 | 0.00 | 12.00 |
| December 31, 1992 | 150.00 | 112.00 |

(ii) Under paragraph (e)(2)(iii) of this section, C must treat the dollar periodic interim payments under the swap as made pursuant to a hypothetical dollar borrowing. The hypothetical issue price is \$150 and the stated redemption price at maturity is \$206.04. The amount of hypothetical interest expense must be amortized in accordance with economic accrual. Thus J must include and C must deduct periodic interim payment amounts as follows:

| | Amount taken into account | Adjusted issue price |
|-------------------------|---------------------------|----------------------|
| December 31, 1989 | \$15.00 | 150.00 |
| December 31, 1990 | \$15.00 | 123.96 |

| | Amount taken into account | Adjusted issue price |
|-------------------------|---------------------------|----------------------|
| December 31, 1991 | \$12.40 | 136.36 |
| December 31, 1992 | \$13.64 | |

(iii) Gain or loss with respect to the periodic interim payments of the currency swap is determined under paragraph (e)(2)(iii)(A) of this section with respect to the dollar cash flow amortized as set forth above and the corresponding pound cash flow as stated in the currency swap contract. Gain or loss with respect to the principal payments (*i.e.*, \$150 and £100) exchanged on December 31, 1992, is determined under paragraph (e)(2)(iv) of this section on December 31, 1992, notwithstanding that under the principles regarding amortization of interest \$26.04 would have been regarded as a payment of principal on December 31, 1990.

Example 3. (i) X is a corporation on the accrual method of accounting with the dollar as its functional currency and the calendar year as its taxable year. On January 1, 1989, X enters into a three year currency swap contract with Y with the following terms. The swap principal amount is \$100 and the Swiss franc (Sf) equivalent of such amount which equals Sf200 translated at the swap exchange rate of \$1 = Sf2. There is no initial exchange of the swap principal amount. The interest rates used to compute the periodic interim payments are 10% compounded annually for U.S. dollar payments and 5% compounded annually for Swiss franc payments. Thus, under the currency swap, X agrees to pay Y \$10 ($10\% \times \100) on December 31st of 1989, 1990 and 1991 and to pay Y the swap principal amount of \$100 on December 31, 1991. Y agrees to pay X Sf10 ($5\% \times Sf200$) on December 31st of 1989, 1990 and 1991 and to pay X the swap principal amount of Sf200 on December 31, 1991. Assume that the average rate for 1989 and the spot rate on December 31, 1989, is \$1 = Sf2.5.

(ii) Under paragraph (e)(2)(iii) of this section, on December 31, 1989, X will realize an exchange loss of \$6 (the sum of \$10 of loss by reason of the \$10 periodic interim payment paid to Y and \$4.00 of gain, the value of Sf10 on December 31, 1989, from the receipt of Sf10 on such date).

(iii) On January 1, 1990, X transfers its rights and obligations under the swap contract to Z, an unrelated corporation. Z has the dollar as its functional currency, is on the accrual method of accounting, and has the calendar year as its taxable year. On January 1, 1990, the exchange rate is \$1 = Sf2.50. The relevant dollar interest rate is 8% compounded annually and the relevant Swiss franc interest rate is 5% compounded annually. Because of the movement in exchange and interest rates, the agreement between X and Z to transfer the currency swap requires

X to pay Z \$23.56 (the swap discount as determined under paragraph (e)(3) of this section).

(iv) Pursuant to paragraph (e)(4) of this section, X may deduct the loss of \$23.56 in 1990. The loss is characterized under § 1.988-3 and sourced under § 1.988-4.

(v) Pursuant to paragraph (e)(3)(ii) of this section, Z is required to amortize the \$23.56 received as follows. The amount of the \$23.56 payment that is attributable to movements in exchange rates (§20) is taken into account on December 31, 1991, the date the swap principal amounts are exchanged, under paragraph (e)(3)(ii)(A) of this section. This amount is the present value (discounted at 10%, the rate under the currency swap contract used to compute the dollar periodic interim payments) of the financial asset required to compensate Z for the loss in value of the hypothetical Swiss franc loan resulting from movements in exchange rates between January 1, 1989, and January 1, 1990. This amount is determined by assuming that interest rates did not change from the date the swap originally was entered into (January 1, 1989), but that the exchange rate is \$1 = Sf2.50. Under this assumption, a taxpayer undertaking the obligation to pay dollars under the currency swap on January 1, 1990, would only agree to pay \$8 for Sf10 on December 31, 1990, and \$88 for Sf210 on December 31, 1991, because the exchange rates have moved from \$1 = Sf2 to \$1 = Sf2.50. Thus, Z requires \$2 on December 31, 1990, and \$22 on December 31, 1991, to compensate for the amount of dollar payments Z is required to make in exchange for the Swiss francs received on December 31, 1990 and 1991. The present value of \$2 on December 31, 1990, and \$22 on December 31, 1991, discounted at the rate for U.S. dollar payments of 10% is \$20 (\$1.82 + \$18.18). This amount is discounted at the rate for U.S. dollar payments (i.e., at the historic rate) because the amount of the \$23.56 payment received by Z that is attributable to movements in interest rates is computed and amortized separately as provided in the following paragraph.

(vi) Pursuant to paragraph (e)(3)(ii)(B) of this section, Z is required to amortize the portion of the \$23.56 payment attributable to movements in interest rates under principles of economic accrual over the term of the currency swap agreement. The amount of the \$23.56 payment that is attributable to movements in interest rates (assuming that exchange rates have not changed) is the present value (\$3.56) of the excess (\$2.00 in 1990 and \$2.00 in 1991) of the periodic interim payments Z is required to pay under the currency swap agreement (\$10 in 1990 and \$10 in 1991) over the amount Z would be required to pay if the currency swap agreement reflected current interest rates on the day Z acquired the swap contract (\$8 in 1990 and \$8 in 1991) discounted at the appropriate dollar interest rate on January 1, 1990. Thus, under prin-

ciples of economic accrual (e.g., see section 171 of the Code), Z will include in income \$1.72 on December 31, 1990, the amount that, when added to the interest (\$.28) on the \$3.56 computed at the 8% rate on the date Z acquired the currency swap contract, will equal the \$2.00 needed to compensate Z for the movement in interest rates between January 1, 1989, and January 1, 1990. Z also will include in income \$1.85 on December 31, 1991, the amount that, when added to the interest (\$.15) on the \$1.85 (the remaining balance of the \$3.56 payment) computed at the 8% rate on the date Z acquired the currency swap contract, will equal the \$2.00 needed to compensate Z for the movement in interest rates between January 1, 1990, and January 1, 1991. This amount is computed assuming exchange rates have not changed because the amount attributable to movements in exchange rates is computed and amortized separately under the preceding paragraph.

(6) *Special effective date for rules regarding currency swaps.* Paragraph (e)(3) of this section regarding amortization of swap premium or discount in the case of off-market currency swaps shall be effective for transactions entered into after September 21, 1989, unless such swap premium or discount was paid or received pursuant to a binding contract with an unrelated party that was entered into prior to such date. For transactions entered into prior to this date, see Notice 89-21, 1989-8 I.R.B. 23.

(7) *Special rules for currency swap contracts in hyperinflationary currencies—(i) In general.* If a taxpayer enters into a hyperinflationary currency swap (as defined in paragraph (e)(7)(iv) of this section), then the taxpayer realizes exchange gain or loss for its taxable year with respect to such instrument determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the instrument was entered into (by the taxpayer); and

(B) The earlier of the last day of the taxable year, or the date the instrument is disposed of or otherwise terminated.

(ii) *Adjustment to principal or basis.* Proper adjustments are made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of this paragraph (e)(7).

§ 1.988-2

(iii) *Interaction with DASTM.* With respect to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985-3, this paragraph (e)(7) does not apply.

(iv) *Definition of hyperinflationary currency swap contract.* A hyperinflationary currency swap contract is a currency swap contract that provides for—

(A) Payments denominated in or determined by reference to a currency that is hyperinflationary (as defined in § 1.988-1(f)) at the time the taxpayer enters into or otherwise acquires the currency swap; or

(B) Payments that are adjusted to take into account the fact that the currency is hyperinflationary (as defined in § 1.988-1(f)) during the current taxable year. A currency swap contract that provides for periodic payments determined by reference to a variable interest rate based on local conditions and generally responding to changes in the local consumer price index is an example of this latter type of currency swap contract.

(v) *Special effective date for nonfunctional hyperinflationary currency swap contracts.* This paragraph (e)(7) applies to transactions entered into after February 14, 2000.

(f) *Substance over form—(1) In general.* If the substance of a transaction described in § 1.988-1(a)(1) differs from its form, the timing, source, and character of gains or losses with respect to such transaction may be recharacterized by the Commissioner in accordance with its substance. For example, if a taxpayer enters into a transaction that it designates a “currency swap contract” that requires the prepayment of all payments to be made or to be received (but not both), the Commissioner may recharacterize the contract as a loan. In applying the substance over form principle, separate transactions may be integrated where appropriate. See also § 1.861-9T(b)(1).

(2) *Example.* The following example illustrates the provisions of this paragraph (f).

Example. (i) On January 1, 1990, X, a U.S. corporation with the dollar as its functional currency, enters into a contract with Y under which X will pay Y \$100 and Y will pay

X LC100 on January 1, 1990, and X will pay Y LC109.3 and Y will pay X \$133 on December 31, 1992. On January 1, 1990, the spot exchange rate is LC1 = \$1 and the 3 year forward rate is LC1 = \$.8218. X’s cash flows are summarized below:

| Date | Dollar | LC |
|----------------|--------|---------|
| 1/1/90 | (100) | 100 |
| 12/31/90 | 0 | 0 |
| 12/31/91 | 0 | 0 |
| 12/31/92 | 133 | (109.3) |

(ii) X and Y designate this contract as a “currency swap.” Notwithstanding this designation, for purposes of determining the timing, source, and character with respect to the transaction, the transaction is characterized by the Commissioner in accordance with its substance. Thus, the January 1, 1990, exchange by X of \$100 for LC 100 is treated as a spot purchase of LCs by X and the December 31, 1992, exchange by X at 109.3LC for \$133 is treated as a forward sale of LCs by X. Under such treatment there would be no tax consequences to X under paragraph (e)(2) of this section in 1990, 1991, and 1992 with respect to this transaction other than the realization of exchange gain or loss on the sale of the LC109.3 on December 31, 1992. Calculation of such gain or loss would be governed by the rules of paragraph (d) of this section.

(g) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

(h) *Timing of income and deductions from notional principal contracts.* Except as otherwise provided (e.g., in § 1.988-5 or § 1.446-3(g)), income or loss from a notional principal contract described in § 1.988-1(a)(2)(iii)(B) (other than a currency swap) is exchange gain or loss. For the rules governing the timing of income and deductions with respect to notional principal contracts, see § 1.446-3. See paragraph (e)(2) of this section with respect to currency swaps.

(i) [Reserved] For further guidance, see § 1.988-2T(i).

[T.D. 8400, 57 FR 9183, Mar. 17, 1992, as amended by T.D. 8491, 58 FR 53135, Oct. 14, 1993; T.D. 8860, 65 FR 2028, Jan. 13, 2000; T.D. 9157, 69 FR 52819, Aug. 30, 2004; T.D. 9795, 81 FR 88879, Dec. 8, 2016; T.D. 9882, 84 FR 69123, Dec. 17, 2019]

§ 1.988-2T Recognition and computation of exchange gain or loss (temporary).

(a) through (b)(15) [Reserved] For further guidance, see § 1.988-2(a) through (b)(15).

(16) *Deferral of loss on certain related-party debt instruments*—(i) *Treatment of creditor.* For rules applicable to a corporation included in a controlled group that is a creditor under a debt instrument see § 1.267(f)-1(e).

(ii) *Treatment of debtor*—(A) *In general.* Exchange loss realized under § 1.988-2(b)(4) or (b)(6) is deferred if—

(1) The loss is realized by a debtor with respect to a loan from a person that has a relationship to the debtor described in section 267(b) or section 707(b); and

(2) The transaction resulting in the realization of exchange loss has as a principal purpose the avoidance of Federal income tax.

(B) *Recognition of deferred loss.* Any exchange loss that is deferred under paragraph (b)(16)(ii)(A) of this section is deferred until the end of the term of the loan, determined immediately prior to the transaction.

(17) through (h) [Reserved] For further guidance, see § 1.988-2(b)(17) through (h).

(i) *Special rules for section 988 transactions of a section 987 QBU.* For rules regarding section 988 transactions of a section 987 QBU, see § 1.987-3T(b)(4) for section 987 QBUs in general and § 1.987-1T(b)(6) for dollar QBUs.

(j) *Effective/applicability date.* Paragraph (b)(16) of this section applies to any exchange loss realized on or after December 7, 2016. Paragraph (i) of this section applies to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. Notwithstanding the preceding sentence, if a taxpayer makes an election under § 1.987-11(b), then paragraph (i) of this section applies to taxable years to which §§ 1.987-1 through 1.987-10 apply as a result of such election.

(k) *Expiration date.* The applicability of this section expires on December 6, 2019.

[T.D. 9795, 81 FR 88879, Dec. 8, 2016]

§ 1.988-3 Character of exchange gain or loss.

(a) *In general.* The character of exchange gain or loss recognized on a section 988 transaction is governed by section 988 and this section. Except as otherwise provided in section 988(c)(1)(E), section 1092, § 1.988-5 and this section, exchange gain or loss realized with respect to a section 988 transaction (including a section 1256 contract that is also a section 988 transaction) shall be characterized as ordinary gain or loss. Accordingly, unless a valid election is made under paragraph (b) of this section, any section providing special rules for capital gain or loss treatment, such as sections 1233, 1234, 1234A, 1236 and 1256(f)(3), shall not apply.

(b) *Election to characterize exchange gain or loss on certain identified forward contracts, futures contracts and option contracts as capital gain or loss*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a taxpayer may elect, subject to the requirements of paragraph (b)(3) of this section, to treat any gain or loss recognized on a contract described in § 1.988-2(d)(1) as capital gain or loss, but only if the contract—

(i) Is a capital asset in the hands of the taxpayer;

(ii) Is not part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)); and

(iii) Is not a regulated futures contract or nonequity option with respect to which an election under section 988(c)(1)(D)(ii) is in effect.

If a valid election under this paragraph (b) is made with respect to a section 1256 contract, section 1256 shall govern the character of any gain or loss recognized on such contract.

(2) *Special rule for contracts that become part of a straddle after an election is made.* If a contract which is the subject of an election under paragraph (b)(1) of this section becomes part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)) after the date of the election, the election shall be invalid with respect to gains from such contract and the Commissioner, in his sole discretion,

§ 1.988-3

26 CFR Ch. I (4-1-23 Edition)

may invalidate the election with respect to losses.

(3) *Requirements for making the election.* A taxpayer elects to treat gain or loss on a transaction described in paragraph (b)(1) of this section as capital gain or loss by clearly identifying such transaction on its books and records on the date the transaction is entered into. No specific language or account is necessary for identifying a transaction referred to in the preceding sentence. However, the method of identification must be consistently applied and must clearly identify the pertinent transaction as subject to the section 988(a)(1)(B) election. The Commissioner, in his sole discretion, may invalidate any purported election that does not comply with the preceding sentence.

(4) *Verification.* A taxpayer that has made an election under § 1.988-3(b)(3) must attach to his income tax return a statement which sets forth the following:

(i) A description and the date of each election made by the taxpayer during the taxpayer's taxable year;

(ii) A statement that each election made during the taxable year was made before the close of the date the transaction was entered into;

(iii) A description of any contract for which an election was in effect and the date such contract expired or was otherwise sold or exchanged during the taxable year;

(iv) A statement that the contract was never part of a straddle as defined in section 1092; and

(v) A statement that all transactions subject to the election are included on the statement attached to the taxpayer's income tax return.

In addition to any penalty that may otherwise apply, the Commissioner, in his sole discretion, may invalidate any or all elections made during the taxable year under § 1.988-3(b)(1) if the taxpayer fails to verify each election as provided in this § 1.988-3(b)(4). The preceding sentence shall not apply if the taxpayer's failure to verify each election was due to reasonable cause or bona fide mistake. The burden of proof to show reasonable cause or bona fide mistake made in good faith is on the taxpayer.

(5) *Independent verification—(i) Effect of independent verification.* If the taxpayer receives independent verification of the election in paragraph (b)(3) of this section, the taxpayer shall be presumed to have satisfied the requirements of paragraphs (b)(3) and (4) of this section. A contract that is a part of a straddle as defined in section 1092 may not be independently verified and shall be subject to the rules of paragraph (b)(2) of this section.

(ii) *Requirements for independent verification.* A taxpayer receives independent verification of the election in paragraph (b)(3) of this section if—

(A) The taxpayer establishes a separate account(s) with an unrelated broker(s) or dealer(s) through which all transactions to be independently verified pursuant to this paragraph (b)(5) are conducted and reported.

(B) Only transactions entered into on or after the date the taxpayer establishes such account may be recorded in the account.

(C) Transactions subject to the election of paragraph (b)(3) of this section are entered into such account on the date such transactions are entered into.

(D) The broker or dealer provides the taxpayer a statement detailing the transactions conducted through such account and includes on such statement the following: "Each transaction identified in this account is subject to the election set forth in section 988(a)(1)(B)."

(iii) *Special effective date for independent verification.* The rules of this paragraph (b)(5) shall be effective for transactions entered into after March 17, 1992.

(6) *Effective date.* Except as otherwise provided, this paragraph (b) is effective for taxable years beginning on or after September 21, 1989. For prior taxable years, any reasonable contemporaneous election meeting the requirements of section 988(a)(1)(B) shall satisfy this paragraph (b).

(c) *Exchange gain or loss treated as interest—(1) In general.* Except as provided in this paragraph (c)(1), exchange gain or loss realized on a section 988 transaction shall not be treated as interest income or expense. Exchange gain or

loss realized on a section 988 transaction shall be treated as interest income or expense as provided in paragraph (c)(2) of this section with regard to tax exempt bonds, §1.988-2(e)(2)(ii)(B), §1.988-5, and in administrative pronouncements. See §1.861-9T(b), providing rules for the allocation of certain items of exchange gain or loss in the same manner as interest expense.

(2) *Exchange loss realized by the holder on nonfunctional currency tax exempt bonds.* Exchange loss realized by the holder of a debt instrument the interest on which is excluded from gross income under section 103(a) or any similar provision of law shall be treated as an offset to and reduce total interest income received or accrued with respect to such instrument. Therefore, to the extent of total interest income, no exchange loss shall be recognized. This paragraph (c)(2) shall be effective with respect to debt instruments acquired on or after June 24, 1987.

(d) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section. Thus, for example, a payment made prior to January 1, 1987, under a forward contract that results in the deferral of a loss under section 1092 to a taxable year beginning after December 31, 1986, is not characterized as an ordinary loss by virtue of paragraph (a) of this section because payment was made prior to January 1, 1987.

[T.D. 8400, 57 FR 9197, Mar. 17, 1992]

§ 1.988-4 Source of gain or loss realized on a section 988 transaction.

(a) *In general.* Except as otherwise provided in §1.988-5 and this section, the source of exchange gain or loss shall be determined by reference to the residence of the taxpayer. This rule applies even if the taxpayer has made an election under §1.988-3(b) to characterize exchange gain or loss as capital gain or loss. This section takes precedence over section 865.

(b) *Qualified business unit—(1) In general.* The source of exchange gain or loss shall be determined by reference to the residence of the qualified business unit of the taxpayer on whose books the asset, liability, or item of income or expense giving rise to such gain or loss is properly reflected.

(2) *Proper reflection on the books of the taxpayer or qualified business unit—(i) In general.* For purposes of paragraph (b)(1) of this section, the principles of §1.987-2(b) shall apply in determining whether an asset, liability, or item of income or expense is reflected on the books and records of a qualified business unit.

(ii) *Effective/applicability date.* Generally, paragraph (b)(2)(i) of this section shall apply to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. If pursuant to §1.987-11(b) a taxpayer applies §§1.987-1 through 1.987-11 beginning in a taxable year prior to the earliest taxable year described in §1.987-11(a), then paragraph (b)(2)(i) of this section shall apply to taxable years of the taxpayer beginning on or after the first day of such prior taxable year.

(c) *Effectively connected exchange gain or loss.* Notwithstanding paragraphs (a) and (b) of this section, exchange gain or loss that under principles similar to those set forth in §1.864-4(c) arises from the conduct of a United States trade or business shall be sourced in the United States and such gain or loss shall be treated as effectively connected to the conduct of a United States trade or business for purposes of sections 871(b) and 882 (a)(1).

(d) *Residence—(1) In general.* Except as otherwise provided in this paragraph (d), for purposes of sections 985 through 989, the residence of any person shall be—

(i) In the case of an individual, the country in which such individual's tax home (as defined in section 911(d)(3)) is located;

(ii) In the case of a corporation, partnership, trust or estate which is a United States person (as defined in section 7701(a)(30)), the United States; and

(iii) In the case of a corporation, partnership, trust or estate which is

not a United States person, a country other than the United States.

If an individual does not have a tax home (as defined in section 911(d)(3)), the residence of such individual shall be the United States if such individual is a United States citizen or a resident alien and shall be a country other than the United States if such individual is not a United States citizen or resident alien. If the taxpayer is a U.S. person and has no principal place of business outside the United States, the residence of the taxpayer is the United States. Notwithstanding paragraph (d)(1)(ii) of this section, if a partnership is formed or availed of to avoid tax by altering the source of exchange gain or loss, the source of such gain or loss shall be determined by reference to the residence of the partners rather than the partnership.

(2) *Exception.* In the case of a qualified business unit of any taxpayer (including an individual), the residence of such unit shall be the country in which the principal place of business of such qualified business unit is located.

(3) *Partner in a partnership not engaged in a U.S. trade or business under section 864(b)(2).* The determination of residence shall be made at the partner level (without regard to whether the partnership is a qualified business unit of the partners) in the case of partners in a partnership that are not engaged in a U.S. trade or business by reason of section 864(b)(2).

(e) *Special rule for certain related party loans—(1) In general.* In the case of a loan by a United States person or a related person to a 10 percent owned foreign corporation, or a corporation that meets the 80 percent foreign business requirements test of section 861(c)(1), other than a corporation subject to § 1.861-11T(e)(2)(i), which is denominated in, or determined by reference to, a currency other than the U.S. dollar and bears interest at a rate at least 10 percentage points higher than the Federal mid-term rate (as determined under section 1274(d)) at the time such loan is entered into, the following rules shall apply—

(i) For purposes of section 904 only, such loan shall be marked to market annually on the earlier of the last business day of the United States person's

(or related person's) taxable year or the date the loan matures; and

(ii) Any interest income earned with respect to such loan for the taxable year shall be treated as income from sources within the United States to the extent of any notional loss attributable to such loan under paragraph (d)(1)(i) of this section.

(2) *United States person.* For purposes of this paragraph (e), the term "United States person" means a person described in section 7701(a)(30).

(3) *Loans by related foreign persons—(i) In general.* [Reserved]

(ii) *Definition of related person.* For purposes of this paragraph (e), the term "related person" has the meaning given such term by section 954(d)(3) except that such section shall be applied by substituting "United States person" for "controlled foreign corporation" each place such term appears.

(4) *10 percent owned foreign corporation.* For purposes of this paragraph (e), the term "10 percent owned foreign corporation" means any foreign corporation in which the United States person owns directly or indirectly (within the meaning of section 318(a)) at least 10 percent of the voting stock.

(f) *Exchange gain or loss treated as interest under § 1.988-3.* Notwithstanding the provisions of this section, any gain or loss realized on a section 988 transaction that is treated as interest income or expense under § 1.988-3(c)(1) shall be sourced or allocated and apportioned pursuant to section 861(a)(1), 862(a)(1), or 864(e) as the case may be.

(g) *Exchange gain or loss allocated in the same manner as interest under § 1.861-9T.* The allocation and apportionment of exchange gain or loss under § 1.861-9T shall not affect the source of exchange gain or loss for purposes of sections 871(a), 881, 1441, 1442 and 6049.

(h) *Effective date.* This section shall be effective for taxable years beginning after December 31, 1986. Thus, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

[T.D. 8400, 57 FR 9199, Mar. 17, 1992, as amended by T.D. 9794, 81 FR 88851, Dec. 8, 2016]

§ 1.988-5 Section 988(d) hedging transactions.

(a) *Integration of a nonfunctional currency debt instrument and a § 1.988-5(a) hedge*—(1) *In general.* This paragraph (a) applies to a qualified hedging transaction as defined in this paragraph (a)(1). A qualified hedging transaction is an integrated economic transaction, as provided in paragraph (a)(5) of this section, consisting of a qualifying debt instrument as defined in paragraph (a)(3) of this section and a § 1.988-5(a) hedge as defined in paragraph (a)(4) of this section. If a taxpayer enters into a transaction that is a qualified hedging transaction, no exchange gain or loss is recognized by the taxpayer on the qualifying debt instrument or on the § 1.988-5(a) hedge for the period that either is part of a qualified hedging transaction, and the transactions shall be integrated as provided in paragraph (a)(9) of this section. However, if the qualified hedging transaction results in a synthetic nonfunctional currency denominated debt instrument, such instrument shall be subject to the rules of § 1.988-2(b).

(2) *Exception.* This paragraph (a) does not apply with respect to a qualified hedging transaction that creates a synthetic asset or liability denominated in, or determined by reference to, a currency other than the U.S. dollar if the rate that approximates the Federal short-term rate in such currency is at least 20 percentage points higher than the Federal short term rate (determined under section 1274(d)) on the date the taxpayer identifies the transaction as a qualified hedging transaction.

(3) *Qualifying debt instrument*—(i) *In general.* A qualifying debt instrument is a debt instrument described in § 1.988-1(a)(2)(i), regardless of whether denominated in, or determined by reference to, nonfunctional currency (including dual currency debt instruments, multi-currency debt instruments and contingent payment debt instruments). A qualifying debt instrument does not include accounts payable, accounts receivable or similar items of expense or income.

(ii) *Special rule for debt instrument of which all payments are proportionately hedged.* If a debt instrument satisfies

the requirements of paragraph (a)(3)(i) of this section, and all principal and interest payments under the instrument are hedged in the same proportion, then for purposes of this paragraph (a), that portion of the instrument that is hedged is eligible to be treated as a qualifying debt instrument, and the rules of this paragraph (a) shall apply separately to such qualifying debt instrument. See Example 8 in paragraph (a)(9)(iv) of this section.

(4) *Section 1.988-5(a) hedge*—(i) *In general.* A § 1.988-5(a) hedge (hereinafter referred to in this paragraph (a) as a “hedge”) is a spot contract, futures contract, forward contract, option contract, notional principal contract, currency swap contract, similar financial instrument, or series or combination thereof, that when integrated with a qualifying debt instrument permits the calculation of a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section).

(ii) *Retroactive application of definition of currency swap contract.* A taxpayer may apply the definition of currency swap contract set forth in § 1.988-2(e)(2)(ii) in lieu of the definition of swap agreement in section 2(e)(5) of Notice 87-11, 1987-1 C.B. 423 to transactions entered into after December 31, 1986 and before September 21, 1989.

(5) *Definition of integrated economic transaction.* A qualifying debt instrument and a hedge are an integrated economic transaction if all of the following requirements are satisfied—

(i) All payments to be made or received under the qualifying debt instrument (or amounts determined by reference to a nonfunctional currency) are fully hedged on the date the taxpayer identifies the transaction under paragraph (a) of this section as a qualified hedging transaction such that a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section) can be calculated. Any contingent payment features of the qualifying debt instrument must be fully offset by the hedge

such that the synthetic debt instrument is not classified as a contingent payment debt instrument. See Examples 6 and 7 of paragraph (a)(9)(iv) of this section.

(ii) The hedge is identified in accordance with paragraph (a)(8) of this section on or before the date the acquisition of the financial instrument (or instruments) constituting the hedge is settled or closed.

(iii) None of the parties to the hedge are related. The term “related” means the relationships defined in section 267(b) or section 707(b).

(iv) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the qualifying debt instrument and the hedge are properly reflected on the books of such qualified business unit throughout the term of the qualified hedging transaction.

(v) Subject to the limitations of paragraph (a)(5) of this section, both the qualifying debt instrument and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the qualifying debt instrument and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(vi) With respect to a foreign person engaged in a U.S. trade or business that enters into a qualifying debt instrument or hedge through such trade or business, all items of income and expense associated with the qualifying debt instrument and the hedge (other than interest expense that is subject to § 1.882-5), would have been effectively connected with such U.S. trade or business throughout the term of the qualified hedging transaction had this paragraph (a) not applied.

(6) *Special rules for legging in and legging out of integrated treatment*—(i) *Legging in*. “Legging in” to integrated treatment under this paragraph (a) means that a hedge is entered into after the date the qualifying debt instrument is entered into or acquired, and the requirements of this paragraph (a) are satisfied on the date the hedge is entered into (“leg in date”). If a tax-

payer legs into integrated treatment, the following rules shall apply—

(A) Exchange gain or loss shall be realized with respect to the qualifying debt instrument determined solely by reference to changes in exchange rates between—

(1) The date the instrument was acquired by the holder, or the date the obligor assumed the obligation to make payments under the instrument; and

(2) The leg in date.

(B) The recognition of such gain or loss will be deferred until the date the qualifying debt instrument matures or is otherwise disposed of.

(C) The source and character of such gain or loss shall be determined on the leg in date as if the qualifying debt instrument was actually sold or otherwise terminated by the taxpayer.

(ii) *Legging out*. With respect to a qualifying debt instrument and hedge that are properly identified as a qualified hedging transaction, “legging out” of integrated treatment under this paragraph (a) means that the taxpayer disposes of or otherwise terminates all or any portion of the qualifying debt instrument or the hedge before maturity of the qualified hedging transaction. For purposes of the preceding sentence, if the taxpayer changes a material term of the qualifying debt instrument (for example, exercises an option to change the interest rate or index, or the maturity date) or the hedge (for example, changes the interest or exchange rates underlying the hedge, or the expiration date) before maturity of the qualified hedging transaction, the taxpayer will be deemed to have disposed of or otherwise terminated all or any portion of the qualifying debt instrument or the hedge, as applicable. A taxpayer that disposes of or terminates a qualified hedging transaction (that is, disposes of or terminates both the qualifying debt instrument and the hedge in their entirety on the same day) is considered to have disposed of or otherwise terminated the synthetic debt instrument rather than legging out. See paragraph (a)(9)(iv) of this section, *Example 10* for an illustration of this rule. If a taxpayer legs out of integrated treatment, the following rules apply:

(A) The transaction will be treated as a qualified hedging transaction during the time the requirements of this paragraph (a) were satisfied.

(B) If all of the instruments comprising the hedge (each such instrument, a component) are disposed of or otherwise terminated, the qualifying debt instrument is treated as sold or otherwise terminated by the taxpayer for its fair market value on the date the hedge is disposed of or otherwise terminated (the leg-out date), and any gain or loss (including gain or loss resulting from factors other than movements in exchange rates) from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date is used to determine exchange gain or loss on the debt instrument for the period beginning on the leg-out date and ending on the date such instrument matures or is disposed of or otherwise terminated. Proper adjustment must be made to reflect any gain or loss taken into account. The netting rule of § 1.988-2(b)(8) applies. See paragraph (a)(9)(iv) of this section, *Example 4* and *Example 5* for an illustration of this rule.

(C) If a hedge has more than one component (and such components have been properly identified as being part of the qualified hedging transaction) and at least one but not all of the components that comprise the hedge has been disposed of or otherwise terminated, or if part of any component of the hedge has been terminated (whether a hedge consists of a single or multiple components), the date such component (or part thereof) is disposed of or terminated is considered the leg-out date and the qualifying debt instrument is treated as sold or otherwise terminated by the taxpayer for its fair market value in accordance with the rules of paragraph (a)(6)(ii)(B) of this section on such leg-out date. In addition, all of the remaining components (or parts thereof) that have not been disposed of or otherwise terminated are treated as sold by the taxpayer for their fair market value on the leg-out date, and any gain or loss from the identification date to the leg-out date is realized and recognized on the leg-out date. To the extent relevant, the

spot rate on the leg-out date is used to determine exchange gain or loss on the remaining components (or parts thereof) for the period beginning on the leg-out date and ending on the date such components (or parts thereof) are disposed of or otherwise terminated. See paragraph (a)(9)(iv) of this section, *Example 11* for an illustration of this rule.

(D) If the qualifying debt instrument is disposed of or otherwise terminated in whole or in part, the date of such disposition or termination is considered the leg-out date. Accordingly, the hedge (including all components making up the hedge in their entirety) that is part of the qualified hedging transaction is treated as sold by the taxpayer for its fair market value on the leg-out date, and any gain or loss from the identification date to the leg-out date is realized and recognized on the leg-out date. To the extent relevant, the spot rate on the leg-out date is used to determine exchange gain or loss on the hedge (including all components thereof) for the period beginning on the leg-out date and ending on the date such hedge is disposed of or otherwise terminated.

(E) Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), the part of the qualified hedging transaction that has not been disposed of or otherwise terminated (that is, the remaining debt instrument in its entirety even if partially hedged, or the remaining components of the hedge) cannot be part of a qualified hedging transaction for any period after the leg-out date.

(F) If a taxpayer legs out of a qualified hedging transaction and realizes a net gain with respect to the debt instrument that is disposed of or otherwise terminated, then paragraph (a)(6)(ii)(B), (C), and (D) of this section, as appropriate, will not apply if during the period beginning 30 days before the leg-out date and ending 30 days after that date the taxpayer enters into another transaction that, taken together with any remaining components of the hedge, hedges at least 50 percent of the remaining currency flow with respect to the qualifying debt instrument that was part of the qualified hedging transaction or, if appropriate, an equivalent

amount under the hedge (or any remaining components thereof) that was part of the qualified hedging transaction. Similarly, in a case in which a hedge has multiple components that are part of a qualified hedging transaction, if the taxpayer legs out of a qualified hedging transaction by terminating one such component or a part of one or more such components and realizes a net gain with respect to the terminated component, components, or portions thereof, then paragraphs (a)(6)(ii)(B), (C), and (D) of this section, as appropriate, will not apply if the remaining components of the hedge (including parts thereof) by themselves hedge at least 50 percent of the remaining currency flow with respect to the qualifying debt instrument that was part of the qualified hedging transaction. See paragraph (a)(9)(iv) of this section, *Example 11* for an illustration of this rule.

(7) *Transactions part of a straddle.* At the discretion of the Commissioner, a transaction shall not satisfy the requirements of paragraph (a)(5) of this section if the debt instrument making up the qualified hedging transaction is part of a straddle as defined in section 1092(c) prior to the time the qualified hedging transaction is identified.

(8) *Identification requirements—(i) Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record for each qualified hedging transaction the following information—

(A) The date the qualifying debt instrument and hedge were entered into;

(B) The date the qualifying debt instrument and the hedge are identified as constituting a qualified hedging transaction;

(C) The amount that must be deferred, if any, under paragraph (a)(6) of this section and the source and character of such deferred amount;

(D) A description of the qualifying debt instrument and the hedge; and

(E) A summary of the cash flow resulting from treating the qualifying debt instrument and the hedge as a qualified hedging transaction.

(ii) *Identification by trustee on behalf of beneficiary.* A trustee of a trust that

enters into a qualified hedging transaction may satisfy the identification requirements described in paragraph (a)(8)(i) of this section on behalf of a beneficiary of such trust.

(iii) *Identification by the Commissioner.* If—

(A) A taxpayer enters into a qualifying debt instrument and a hedge but fails to comply with one or more of the requirements of this paragraph (a), and

(B) On the basis of all the facts and circumstances, the Commissioner concludes that the qualifying debt instrument and the hedge are, in substance, a qualified hedging transaction,

then the Commissioner may treat the qualifying debt instrument and the hedge as a qualified hedging transaction. The Commissioner may identify a qualifying debt instrument and a hedge as a qualified hedging transaction regardless of whether the qualifying debt instrument and the hedge are held by the same taxpayer.

(9) *Taxation of qualified hedging transactions—(i) In general—(A) General rule.* If a transaction constitutes a qualified hedging transaction, the qualifying debt instrument and the hedge are integrated and treated as a single transaction with respect to the taxpayer that has entered into the qualified hedging transaction during the period that the transaction qualifies as a qualified hedging transaction. Neither the qualifying debt instrument nor the hedge that makes up the qualified hedging transaction shall be subject to section 263(g), 1092 or 1256 for the period such transactions are integrated. However, the qualified hedging transaction may be subject to section 263(g) or 1092 if such transaction is part of a straddle.

(B) *Special rule for income or expense of foreign persons effectively connected with a U.S. trade or business.* Interest income of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph (a)(5)(vii) of this section shall be treated as effectively connected with a U.S. trade or business. Interest expense of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph

(a)(5)(vii) of this section shall be allocated and apportioned under § 1.882-5 of the regulations.

(C) *Special rule for foreign persons that enter into qualified hedging transactions giving rise to U.S. source income not effectively connected with a U.S. trade or business.* If a foreign person enters into a qualified hedging transaction that gives rise to U.S. source interest income (determined under the source rules for synthetic asset transactions as provided in this section) not effectively connected with a U.S. trade or business of such foreign person, for purposes of sections 871(a), 881, 1441, 1442 and 6049, the provisions of this paragraph (a) shall not apply and such sections of the Internal Revenue Code shall be applied separately to the qualifying debt instrument and the hedge. To the extent relevant to any foreign person, if the requirements of this paragraph (a) are otherwise met, the provisions of this paragraph (a) shall apply for all other purposes of the Internal Revenue Code (e.g., for purposes of calculating the earnings and profits of a controlled foreign corporation that enters into a qualified hedging transaction through a qualified business unit resident outside the United States, income or expense with respect to such qualified hedging transaction shall be calculated under the provisions of this paragraph (a)).

(ii) *Income tax effects of integration.* The effect of integrating and treating a transaction as a single transaction is to create a synthetic debt instrument for income tax purposes, which is subject to the original issue discount provisions of sections 1272 through 1288 and 163(e), the terms of which are determined as follows:

(A) *Denomination of synthetic debt instrument.* In the case where the qualifying debt instrument is a borrowing, the denomination of the synthetic debt instrument is the same as the currency paid under the terms of the hedge to acquire the currency used to make payments under the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the denomination of the synthetic debt instrument is the same as the currency received under the terms of the hedge in exchange for amounts received

under the qualifying debt instrument. For example, if the hedge is a forward contract to acquire British pounds for dollars, and the qualifying debt instrument is a borrowing denominated in British pounds, the synthetic debt instrument is considered a borrowing in dollars.

(B) *Term and accrual periods.* The term of the synthetic debt instrument shall be the period beginning on the identification date and ending on the date the qualifying debt instrument matures or such earlier date that the qualifying debt instrument or hedge is disposed of or otherwise terminated. Unless otherwise clearly indicated by the payment interval under the hedge, the accrual period shall be a six month period which ends on the dates determined under section 1272(a)(5).

(C) *Issue price.* The issue price of the synthetic debt instrument is the adjusted issue price of the qualifying debt instrument translated into the currency in which the synthetic debt instrument is denominated at the spot rate on the identification date.

(D) *Stated redemption price at maturity.* In the case where the qualifying debt instrument is a borrowing, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be paid under the hedge to acquire the currency necessary to make interest and principal payments on the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be received under the hedge in exchange for the interest and principal payments received pursuant to the terms of the qualifying debt instrument.

(iii) *Source of interest income and allocation of expense.* Interest income from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be sourced by reference to the source of income under sections 861(a)(1) and 862(a)(1) of the qualifying debt instrument. The character for purposes of section 904 of interest income from a synthetic debt instrument shall be determined by reference to the

§ 1.988-5

26 CFR Ch. I (4-1-23 Edition)

character of the interest income from qualifying debt instrument. Interest expense from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be allocated and apportioned under §§1.861-8T through 1.861-12T or the successor sections thereof or under §1.882-5.

(iv) *Examples.* The following examples illustrate the application of this paragraph (a)(9).

Example 1. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1989, K agrees to close the following transaction on December 31, 1989. K will borrow from an unrelated party on December 31, 1989, 100 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(a) K will swap, on December 31, 1989, the £100 obtained from the borrowing for \$100; and

(b) K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make payments on the pound borrowing:

| Date | U.S. dollars | Pounds |
|-------------------------|--------------|--------|
| December 31, 1990 | 8 | 10 |
| December 31, 1991 | 8 | 10 |
| December 31, 1992 | 108 | 110 |

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1989. On December 31, 1989, K borrows the £100 and swaps such pounds for \$100. Assume K has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of \$100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., \$8 in 1990, \$8 in 1991, and \$108 in 1992).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is \$100. Because the stated redemption price equals the

issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of \$8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid \$100 as a return of principal in 1992.

(E) K must allocate and apportion its interest expense with respect to the synthetic dollar borrowing under the rules of §§1.861-8T through 1.861-12T.

Example 2. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On December 24, 1989, when the spot rate for Swiss francs (Sf) is Sf1 = \$1, K enters into a forward contract to purchase Sf100 in exchange for \$100.04 for delivery on December 31, 1989. The Sf100 are to be used for the purchase of a franc denominated debt instrument on December 31, 1989. The instrument will have a term of 3 years, an issue price of Sf100, and will bear interest at 6 percent, payable annually, with no repayment of principal until the final installment. On December 24, 1989, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

| Date | U.S. dollars | Francs |
|-------------------------|--------------|--------|
| December 31, 1990 | 6.12 | 6 |
| December 31, 1991 | 6.23 | 6 |
| December 31, 1992 | 112.16 | 106 |

(ii) On December 31, 1989, K takes delivery of the Sf100 and purchases the franc denominated debt instrument. Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated and treated as one transaction with the following consequences:

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument in an amount equal to the dollars exchanged under the forward contract to purchase the francs necessary to acquire the franc debt instrument. Accordingly, the issue price is \$100.04 (section 1273(b)(2) of the Code).

(B) The total amount of interest and principal received by K with respect to the synthetic dollar debt instrument is equal to the dollars received under the forward sales contracts (i.e., \$6.12 in 1990, \$6.23 in 1991, and \$112.16 in 1992).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is \$106.15 (i.e., \$6.12 of the payments in 1990, 1991, and 1992 are treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of \$6.11.

(D) The yield to maturity of the synthetic dollar debt instrument is 8.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of \$8.00 in 1990 (of which \$1.88 constitutes OID), \$8.15 in 1991 (of which \$2.03 constitutes OID), and \$8.32 in 1992 (of which \$2.20 constitutes OID). The amount of the final payment received by K in excess of the interest income includible is a return of principal and a payment of previously accrued OID.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

Example 3. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1 = \$1.50. On January 1, 1993, when the spot rate is £1 = \$1.60, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

| Date | U.S. dollars | Pounds |
|-------------------------|--------------|--------|
| December 31, 1993 | 12.80 | 10 |
| December 31, 1994 | 12.80 | 10 |
| December 31, 1994 | 160.00 | 100 |

(ii) Assume that British pound interest rates are still 10% and that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(8) of this section. Under paragraph (a)(6)(i) of this section, K must realize exchange gain or loss with respect to the pound borrowing determined solely by reference to changes in exchange rates between January 1, 1992 and January 1, 1993. (Thus, gain or loss from other factors such as movements in interest rates or changes in credit quality of K are not taken into account). Recognition of such gain or loss is deferred until K terminates its pound borrowing. Accordingly, K must defer exchange loss in the amount of \$10 [(£100 × 1.50) - (£100 × 1.60)].

(iii) Additionally, the qualified hedging transaction is treated as a synthetic U.S. dollar debt instrument with an issue date of January 1, 1993, and a maturity date of December 31, 1994. The issue price of the synthetic debt instrument is \$160 (£100 × 1.60, the spot rate on January 1, 1993) and the total amount of interest and principal is \$185.60. The accrual period is the one year period beginning on January 1 and ending December 31 of each year. The stated redemption price at maturity is \$160. Thus, K is treated as paying \$12.80 of interest in 1993, \$12.80 of interest in 1994, and \$160 of principal in 1994. The interest expense from the synthetic instrument is allocated and apportioned in accordance with the rules of §§ 1.861-8T through 1.861-12T. Sections 263(g), 1092, and 1256 do not apply to the positions comprising the synthetic dollar borrowing.

Example 4. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 2013, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 2013, is £1 = \$1.50. Also on January 1, 2013, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

| Date | U.S. dollars | Pounds |
|-------------------------|--------------|--------|
| December 31, 2013 | 12.00 | 10 |
| December 31, 2014 | 12.00 | 10 |
| December 31, 2015 | 162.00 | 110 |

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of \$150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., \$12 in 2013, \$12 in 2014, and \$162 in 2015).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is \$150. Because the stated redemption price equals the

§ 1.988-5

26 CFR Ch. I (4-1-23 Edition)

issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of \$12 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid \$150 as a return of principal in 2015.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861-8T through 1.861-12T.

(iv) Assume that on January 1, 2014, the spot exchange rate is £1 = \$1.60, interest rates have not changed since January 1, 2013, (accordingly, assume that the market value of K's bond in pounds has not changed) and that K transfers its rights and obligations under the currency swap contract in exchange for \$10. Under § 1.988-2(e)(3)(iii), K will include in income as exchange gain \$10 on January 1, 2014. Pursuant to paragraph (a)(6)(ii) of this section, the pound borrowing and the currency swap contract are treated as a qualified hedging transaction for 2013. The loss inherent in the pound borrowing from January 1, 2013, to January 1, 2014, is realized and recognized on January 1, 2014. Such loss is exchange loss in the amount of \$10.00 [(£100 × \$1.50, the spot rate on January 1, 2013) - (£100 × \$1.60, the spot rate on January 1, 2014)]. For purposes of determining exchange gain or loss on the £100 principal amount of the debt instrument for the period January 1, 2014, to December 31, 2015, the spot rate on January 1, 2014 is used rather than the spot rate on the issue date. Thus, assuming that the spot rate on December 31, 2015, the maturity date, is £1 = \$1.80, K realizes exchange loss in the amount of \$20 [(£100 × \$1.60) - (£100 × \$1.80)]. Except as provided in paragraph (a)(8)(iii) (regarding identification by the Commissioner), the pound borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 5. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On January 1, 2013, when the spot rate for Swiss francs (Sf) is Sf1 = \$.50, K converts \$100 to Sf200 and purchases a franc denominated debt instrument. The instrument has a term of 3 years, an adjusted issue price of Sf200, and will bear interest at 5 percent, payable annually, with no repayment of principal until the final installment. The U.S. dollar interest rate on an equivalent instrument is 8% on January 1, 2013, compounded annually. On January 1, 2013, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

| Date | U.S. dollars | Francs |
|-------------------------|--------------|--------|
| December 31, 2013 | 5.14 | 10 |

| Date | U.S. dollars | Francs |
|-------------------------|--------------|--------|
| December 31, 2014 | 5.29 | 10 |
| December 31, 2015 | 114.26 | 210 |

(ii) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. Assume further that on January 1, 2014, the spot exchange rate is Sf1 = U.S.\$143, the U.S. dollar interest rate is 10%, compounded annually, and the Swiss franc interest rate is the same as on January 1, 2013 (5%, compounded annually). On January 1, 2014, K disposes of the forward contracts that were to mature on December 31, 2014, and December 31, 2015 and incurs a loss of \$3.62 (the present value of \$.10 with respect to the 2014 contract and \$4.27 with respect to the 2015 contract).

(iii) The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated for the period beginning January 1, 2013, and ending January 1, 2014.

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument with an issue price of \$100.

(B) The total amount of interest and principal to be received by K with respect to the synthetic dollar debt instrument is equal to the dollars to be received under the forward sales contracts (i.e., \$5.14 in 2013, \$5.29 in 2014, and \$114.26 in 2015).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is \$109.27 (i.e., \$5.14 of the payments in 2013, 2014, and 2015 is treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of \$9.27.

(D) The yield to maturity of the synthetic dollar debt instrument is 8.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of \$8.00 in 2013 (of which \$2.86 constitutes OID).

(E) The source of the interest income is determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

(iv) Because K disposed of the forward contracts on January 1, 2014, the rules of paragraph (a)(6)(ii) of this section shall apply. Accordingly, the \$3.62 loss from the disposition of the forward contracts is realized and recognized on January 1, 2014. Additionally,

K is deemed to have sold the franc debt instrument for \$102.86, its fair market value in dollars on January 1, 2014. K will compute gain or loss with respect to the deemed sale of the franc debt instrument by subtracting its adjusted basis in the instrument (\$102.86—the value of the Sf200 issue price at the spot rate on the identification date plus \$2.86 of original issue discount accrued on the synthetic dollar debt instrument for 2013) from the amount realized on the deemed sale of \$102.86. Thus K realizes and recognizes no gain or loss from the deemed sale of the debt instrument. The dollar amount used to determine exchange gain or loss with respect to the franc debt instrument is the Sf200 issue price on January 1, 2014, translated into dollars at the spot rate on January 1, 2014, of Sf1 = U.S.\$5143. Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), the franc borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 6. (i) K is a U.S. corporation with the dollar as its functional currency. On January 1, 1992, K issues a debt instrument with the following terms: the issue price is \$1,000, the instrument pays interest annually at a rate of 8% on the \$1,000 principal amount, the instrument matures on December 31, 1996, and the amount paid at maturity is the greater of zero or \$2,000 less the U.S. dollar value (determined on December 31, 1996) of 150,000 Japanese yen.

(ii) Also on January 1, 1992, K enters into the following hedges with respect to the instrument described in the preceding paragraph: a forward contract under which K will sell 150,000 yen for \$1,000 on December 31, 1996 (note that this forward rate assumes that interest rates in yen and dollars are equal); and an option contract that expires on December 31, 1996, under which K has the right (but not the obligation) to acquire 150,000 yen for \$2,000. K will pay for the option by making payments to the writer of the option equal to \$5 each December 31 from 1992 through 1996.

(iii) The net economic effect of these transactions is that K has created a liability with a principal amount and amount paid at maturity of \$1,000, with an interest cost of 8.5% (8% on debt instrument, 0.5% option price) compounded annually. For example, if on December 31, 1996, the spot exchange rate is \$1 = 100 yen, K pays \$500 on the bond [\$2,000 – (150,000 yen/\$100)], and \$500 in satisfaction of the forward contract [\$1,000 – (150,000 yen/\$100)]. If instead the spot exchange rate on December 31, 1996 is \$1 = 200 yen, K pays \$1,250 on the bond [\$2,000 – (150,000 yen/\$200)] and K receives \$250 in satisfaction of the forward contract [\$1,000 – (150,000 yen/\$200)]. Finally, if the spot exchange rate on December 31, 1996 is \$1 = 50 yen, K pays \$0 on the bond [\$2,000 – (150,000

yen/\$50), but the bond holder is not required under the terms of the instrument to pay additional principal]; K exercises the option to buy 150,000 yen for \$2,000; and K then delivers the 150,000 yen as required by the forward contract in exchange for \$1,000.

(iv) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The debt instrument described in paragraph (i) of this *Example 6* (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the forward contract and option contract described in paragraph (ii) of this example (which constitute a hedge under paragraph (a)(4) of this section and are collectively referred to hereafter as “the contracts”) together are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to K, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of \$1000, a stated redemption price at maturity of \$1000 and a yield to maturity of 8.5% compounded annually (with no original issue discount). K must allocate and apportion its annual interest expense of \$85 under the rules of §§1.861-8T through 1.861-12T.

Example 7. (i) R is a U.S. corporation with the dollar as its functional currency. On January 1, 1995, R issues a debt instrument with the following terms: the issue price is 504 British pounds (£), the instrument pays interest at a rate of 3.7% (compounded semi-annually) on the £504 principal amount, the instrument matures on December 31, 1999, with a repayment at maturity of the £504 principal plus the proportional gain, if any, in the “Financial Times” 100 Stock Exchange (FTSE) index (determined by the excess of the value of the FTSE index on the maturity date over the value of the FTSE on the issue date, divided by the value of the FTSE index on the issue date, multiplied by the number of FTSE index contracts that could be purchased on the issue date for £504).

(ii) Also on January 1, 1995, R enters into a contract with a bank under which on January 1, 1995, R will swap the £504 for \$1,000 (at the current spot rate). R will make U.S. dollar payments to the bank equal to 8.15% on the notional principal amount of \$1,000 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. R will receive pound payments from the bank equal to 3.7% on the notional principal amount of £504 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. On December 31, 1999, R will swap with the bank \$1,000 for £504 plus the proportional gain, if any, in the FTSE index (computed as provided above).

(iii) Economically, both the indexed debt instrument and the hedging contract are hybrid instruments with the following components. The indexed debt instrument is composed of a par pound debt instrument that is assumed to have a 10.85% coupon (compounded semi-annually) plus an embedded FTSE equity index option for which the investor pays a premium of 7.15% (amortized semi-annually) on the pound principal amount. The combined effect is that the premium paid by the investor partially offsets the coupon payments resulting in a return of 3.7% (10.85% - 7.15%). Similarly, the dollar payments under the hedging contract to be made by R are computed by multiplying the dollar notional principal amount by an 8.00% rate (compounded semi-annually) which the facts assume would be the rate paid on a conventional currency swap plus a premium of 0.15% (amortized semi-annually) on the dollar notional principal amount for an embedded FTSE equity index option.

(iv) Assume R satisfies the identification requirements of paragraph (a)(8) of this section. The indexed debt instrument described in paragraph (i) of this *Example 7* constitutes a qualifying debt instrument under paragraph (a)(3) of this section. The hedging contract described in paragraph (ii) of this *Example 7* constitutes a hedge under paragraph (a)(4) of this section. Since both the pound exposure of the indexed debt instrument and the exposure to movements of the FTSE embedded in the indexed debt instrument are hedged such that a yield to maturity can be determined in dollars, the transaction satisfies the requirement of paragraph (a)(5)(i) of this section. Assuming the transactions satisfy the other requirements of paragraph (a)(5) of this section, the indexed debt instrument and hedge are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to R, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of \$1000, a stated redemption price at maturity of \$1000 and a yield to maturity of 8.15% compounded semi-annually (with no original issue discount). K must allocate and apportion its interest expense from the synthetic instrument under the rules §§1.861-8T through 1.861-12T.

Example 8. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1992, K agrees to close the following transaction on December 31, 1992. K will borrow from an unrelated party on December 31, 1992, 200 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(A) K will swap, on December 31, 1992, £100 obtained from the borrowing for \$100; and

(B) K will exchange dollars for pounds pursuant to the following table:

| Date | U.S. dollars | Pounds |
|-------------------------|--------------|--------|
| December 31, 1993 | 8 | 10 |
| December 31, 1994 | 8 | 10 |
| December 31, 1995 | 108 | 110 |

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1992. On December 31, 1992, K borrows the £200 and swaps £100 for \$100. Assume K has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The £200 debt instrument satisfies the requirements of paragraph (a)(3)(i) of this section. Because all principal and interest payments under the instrument are hedged in the same proportion (50% of all interest and principal payments are hedged), 50% of the payments under the £200 instrument (principal amount of £100 and annual interest of £10) are treated as a qualifying debt instrument for purposes of paragraph (a) of this section. Thus, the distinct £100 borrowing and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, £100 of the pound borrowing and the swap are integrated and treated as one synthetic dollar transaction with the following consequences:

(A) The integration of £100 of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of \$100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., \$8 in 1993, \$8 in 1994, and \$108 in 1995).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is \$100. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of \$8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid \$100 as a return of principal in 1995.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§1.861-8T through 1.861-12T.

That portion of the £200 pound debt instrument that is not hedged (i.e., £100) is treated as a separate debt instrument subject to the rules of §1.988-2 (b) and §§1.861-8T through 1.861-12T.

Internal Revenue Service, Treasury

§ 1.988-5

Example 9. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. On the same day, K enters into a currency swap agreement with an unrelated bank under which K agrees to the following:

(A) On January 1, 1992, K will exchange the £100 borrowed for \$150.

(B) For the period beginning January 1, 1992 and ending December 31, 1994, K will pay at the end of each month an amount determined by multiplying \$150 by one month LIBOR less 65 basis points and receive from the bank on December 31st of 1992, 1993, and 1994, £10.

(C) On December 31, 1994, K will exchange \$150 for £100.

Assume K satisfies the identification requirements of paragraph (a)(8) of this section.

(i) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of \$150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract.

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is \$150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the monthly variable interest payments under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid \$150 as a return of principal in 1994.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§1.861-8T through 1.861-12T.

Example 10. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K loans 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1 = \$1.50. Also on January 1, 1992, K enters into a currency swap con-

tract with an unrelated counterparty under the terms of which K will exchange pounds for dollars pursuant to the following table:

| Date | Pounds | Dollars |
|-------------------------|--------|---------|
| December 31, 1992 | 10 | 12 |
| December 31, 1993 | 10 | 12 |
| December 31, 1994 | 110 | 162 |

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound loan (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound loan and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound loan and the swap results in a synthetic dollar loan with an issue price of \$150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar loan is equal to the dollar payments received by K under the currency swap contract (i.e., \$12 in 1992, \$12 in 1993, and \$162 in 1994).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is \$150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar loan.

(D) K must include in income as interest \$12 in 1992, 1993, and 1994.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the pound interest income that would have been received had the transaction not been integrated.

(iv) On January 1, 1993, K transfers both the pound loan and the currency swap to B, its wholly owned U.S. subsidiary, in exchange for B stock in a transfer that satisfies the requirements of section 351. Under paragraph (a)(6) of this section, the transfer of both instruments is not "legging out." Rather, K is considered to have transferred the synthetic dollar loan to B in a transaction in which gain or loss is not recognized. B's basis in the loan under section 362 is \$100.

Example 11. (i) K is a domestic corporation with the U.S. dollar as its functional currency. On January 1, 2013, K borrows 100 British pounds (£) for two years at a 10% rate of interest payable on December 31 of each year with no principal payment due until maturity on December 31, 2014. Assume that the spot rate on January 1, 2013, is £1=\$1. On the same date, K enters into two swap contracts with an unrelated counterparty that economically results in the transformation

of the fixed rate £100 borrowing to a floating rate dollar borrowing. The terms of the swaps are as follows:

(A) *Swap #1, Currency swap.* On January 1, 2013, K will exchange £100 for \$100.

(1) On December 31 of both 2013 and 2014, K will exchange \$8 for £10;

(2) On December 31, 2014, K will exchange \$100 for £100.

(B) *Swap #2, Interest rate swap.* On December 31 of both 2013 and 2014, K will pay LIBOR times a notional principal amount of \$100 and will receive 8% times the same \$100 notional principal amount.

(i) Assume that K properly identifies the pound borrowing and the swap contracts as a qualified hedging transaction as provided in paragraph (a)(8)(i) of this section and that the other relevant requirements of paragraph (a) of this section are satisfied.

(iii) On January 1, 2014, the spot exchange rate is £1=\$2; the U.S. dollar LIBOR rate of interest is 9%; the market value of K's note in pounds has not changed; and K terminates swap #2. Because interest rates have increased from 8% to 9%, K will incur a loss of (\$.92) (the present value of the (\$1) difference between the 8% and 9% interest payments discounted at the current interest rate of 9%) with respect to the termination of such swap on January 1, 2014. Pursuant to paragraph (a)(6)(ii)(C) of this section, K must treat swap #1 as having been sold for its fair market value on the leg-out date, which is the date swap #2 is terminated. K must realize and recognize gain of \$100.92 (the present value of £110 discounted in pounds to equal £100 × \$2 (\$200) less the present value of \$108 (\$99.08)). The loss inherent in the pound borrowing from January 1, 2013 to January 1, 2014 is realized and recognized on January 1, 2014. Such loss is exchange loss in the amount of \$100 (the present value of £110 that was to be paid at the end of the year discounted at pound interest rates to equal £100 times the change in exchange rates: (£100 × \$1, the spot rate on January 1, 2013) - (£100 × \$2, the spot rate on January 1, 2014)). Pursuant to paragraph (a)(6)(ii)(E) of this section, except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), the pound borrowing and currency swap cannot be part of a qualified hedging transaction for any period after the leg-out date.

(iv) Assume the facts are the same as in paragraph (iii) of this *Example* except that on January 1, 2014, the U.S. dollar LIBOR rate of interest is 7% rather than 9%. When K terminates swap #2, K will realize gain of \$0.93 (the present value of the (\$1) difference between the 8% and 7% interest payments discounted at the current interest rate of 7%) received with respect to the termination on January 1, 2014. Fifty percent or more of the remaining pound cash flow of the pound borrowing remains hedged after the termination

of swap #2. Accordingly, under paragraph (a)(6)(ii)(F) of this section, paragraphs (a)(6)(ii)(B) and (C) of this section do not apply, and the gain on swap #1 and the loss on the qualifying debt instrument are not taken into account. Thus, K will include in income \$0.93 realized from the termination of swap #2.

(10) *Transition rules and effective dates for certain provisions—(i) Coordination with Notice 87-11.* Any transaction entered into prior to September 21, 1989, which satisfied the requirements of Notice 87-11, 1987-1 C.B. 423, shall be deemed to satisfy the requirements of paragraph (a) of this section.

(ii) *Prospective application to contingent payment debt instruments.* In the case of a contingent payment debt instrument, the definition of qualifying debt instrument set forth in paragraph (a)(3)(i) of this section applies to transactions entered into after March 17, 1992.

(iii) *Prospective application of partial hedging rule.* Paragraph (a)(3)(ii) of this section is effective for transactions entered into after March 17, 1992.

(iv) *Effective/applicability dates for legging in and legging out rules.* (A) The rules of paragraph (a)(6)(i) of this section are effective for qualified hedging transactions that are legged into after March 17, 1992.

(B) The rules of paragraph (a)(6)(ii) and *Example 11* of paragraph (a)(9)(iv) of this section apply to leg-outs that occur on or after September 6, 2012.

(b) *Hedged executory contracts—(1) In general.* If the taxpayer enters into a hedged executory contract as defined in paragraph (b)(2) of this section, the executory contract and the hedge shall be integrated as provided in paragraph (b)(4) of this section.

(2) *Definitions—(i) Hedged executory contract.* A hedged executory contract is an executory contract as defined in paragraph (b)(2)(ii) of this section that is the subject of a hedge as defined in paragraph (b)(2)(iii) of this section, provided that the following requirements are satisfied—

(A) The executory contract and the hedge are identified as a hedged executory contract as provided in paragraph (b)(3) of this section.

(B) The hedge is entered into (*i.e.*, settled or closed, or in the case of nonfunctional currency deposited in an account with a bank or other financial institution, such currency is acquired and deposited) on or after the date the executory contract is entered into and before the accrual date as defined in paragraph (b)(2)(iv) of this section.

(C) The executory contract is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3) of this section and ending on or after the accrual date.

(D) None of the parties to the hedge are related. The term related means the relationships defined in section 267(b) and section 707(c)(1).

(E) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the executory contract and the hedge are properly reflected on the books of the same qualified business unit.

(F) Subject to the limitations of paragraph (b)(2)(i)(E) of this section, both the executory contract and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the executory contract and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(G) With respect to a foreign person engaged in a U.S. trade or business that enters into an executory contract or hedge through such trade or business, all items of income and expense associated with the executory contract and the hedge would have been effectively connected with such U.S. trade or business throughout the term of the hedged executory contract had this paragraph (b) not applied.

(ii) *Executory contract*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, an executory contract is an agreement entered into before the accrual date to pay nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the purchase of property used in the ordinary course of the taxpayer's business, or the ac-

quisition of a service (or services), in the future, or to receive nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the sale of property used or held for sale in the ordinary course of the taxpayer's business, or the performance of a service (or services), in the future. Notwithstanding the preceding sentence, a contract to buy or sell stock shall be considered an executory contract. (Thus, for example, a contract to sell stock of an affiliate is an executory contract for this purpose.) On the accrual date, such agreement ceases to be considered an executory contract and is treated as an account payable or receivable.

(B) *Exceptions.* An executory contract does not include a section 988 transaction. For example, a forward contract to purchase nonfunctional currency is not an executory contract. An executory contract also does not include a transaction described in paragraph (c) of this section.

(C) *Effective date for contracts to buy or sell stock.* That part of paragraph (b)(2)(ii)(A) of this section which provides that a contract to buy or sell stock shall be considered an executory contract applies to contracts to buy or sell stock entered into on or after March 17, 1992.

(iii) *Hedge*—(A) *In general.* For purposes of this paragraph (b), the term hedge means a deposit of nonfunctional currency in a hedging account (as defined paragraph (b)(3)(iii)(D) of this section), a forward or futures contract described in §1.988-1(a)(1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations by reference to the taxpayer's functional currency with respect to nonfunctional currency payments made or received under an executory contract. The term hedge also includes an option contract described in §1.988-1(a)(1)(ii) and (2)(iii), but only if the option's expiration date is on or before the accrual date. The premium paid for an option that lapses shall be integrated with the executory contract.

(B) *Special rule for series of hedges.* A series of hedges as defined in paragraph (b)(3)(iii)(A) of this section shall be considered a hedge if the executory contract is hedged in whole or in part

throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3)(i) of this section and ending on or after the accrual date. A taxpayer that enters into a series of hedges will be deemed to have satisfied the preceding sentence if the hedge that succeeds a hedge that has been terminated is entered into no later than the business day following such termination.

(C) *Special rules for historical rate rollovers—(1) Definition.* A historical rate rollover is an extension of the maturity date of a forward contract where the new forward rate is adjusted on the rollover date to reflect the taxpayer's gain or loss on the contract as of the rollover date plus the time value of such gain or loss through the new maturity date.

(2) *Certain historical rate rollovers considered a hedge.* A historical rate rollover is considered a hedge if the rollover date is before the accrual date.

(3) *Treatment of time value component of certain historical rate rollovers that are hedges.* Interest income or expense determined under § 1.988-2(d)(2)(v) with respect to a historical rate rollover shall be considered part of a hedge if the period beginning on the first date a hedging contract is rolled over and ending on the date payment is made or received under the executory contract does not exceed 183 days. Such interest income or expense shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract. For the treatment of such interest income or expense that is not considered part of a hedge, see § 1.988-2(d)(2)(v).

(D) *Special rules regarding deposits of nonfunctional currency in a hedging account.* A hedging account is an account with a bank or other financial institution used exclusively for deposits of nonfunctional currency used to hedge executory contracts. For purposes of determining the basis of units in such account that comprise the hedge, only those units in the account as of the accrual date shall be taken into consideration. A taxpayer may adopt any rea-

sonable convention (consistently applied to all hedging accounts) to determine which units comprise the hedge as of the accrual date and the basis of the units as of such date.

(E) *Interest income on deposit of nonfunctional currency in a hedging account.* Interest income on a deposit of nonfunctional currency in a hedging account may be taken into account for purposes of determining the amount of a hedge if such interest is accrued on or before the accrual date. However, such interest income shall be included in income as provided in section 61. For example, if a taxpayer with the dollar as its functional currency enters into an executory contract for the purchase and delivery of a machine in one year for 100 British pounds (£), and on such date deposits £90.91 in a properly identified bank account that bears interest at the rate of 10%, the interest that accrues prior to the accrual date shall be included in income and may be considered a hedge.

(iv) *Accrual date.* The accrual date is the date when the item of income or expense (including a capital expenditure) that relates to an executory contract is required to be accrued under the taxpayer's method of accounting.

(v) *Payment date.* The payment date is the date when payment is made or received with respect to an executory contract or the subsequent corresponding account payable or receivable.

(3) *Identification rules—(i) Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record a clear description of the executory contract and the hedge and indicate that the transaction is being identified in accordance with paragraph (b)(3) of this section.

(ii) *Identification by the Commissioner.* If a taxpayer enters into an executory contract and a hedge but fails to satisfy one or more of the requirements of paragraph (b) of this section and, based on the facts and circumstances, the Commissioner concludes that the executory contract in substance is hedged, then the Commissioner may apply the provisions of paragraph (b) of this section as if the taxpayer had satisfied all

of the requirements therein, and may make appropriate adjustments. The Commissioner may apply the provisions of paragraph (b) of this section regardless of whether the executory contract and the hedge are held by the same taxpayer.

(4) *Effect of hedged executory contract*—(i) *In general.* If a taxpayer enters into a hedged executory contract, amounts paid or received under the hedge by the taxpayer are treated as paid or received by the taxpayer under the executory contract, or any subsequent account payable or receivable, or that portion to which the hedge relates. Also, the taxpayer recognizes no exchange gain or loss on the hedge. If an executory contract, on the accrual date, becomes an account payable or receivable, the taxpayer recognizes no exchange gain or loss on such payable or receivable for the period covered by the hedge.

(ii) *Partially hedged executory contracts.* The effect of integrating an executory contract and a hedge that partially hedges such contract is to treat the amounts paid or received under the hedge as paid or received under the portion of the executory contract being hedged, or any subsequent account payable or receivable. The income or expense of services performed or received under the executory contract, or the amount realized or basis of property sold or purchased under the executory contract, that is attributable to that portion of the executory contract that is not hedged shall be translated into functional currency on the accrual date. Exchange gain or loss shall be realized when payment is made or received with respect to any payable or receivable arising on the accrual date with respect to such unhedged amount.

(iii) *Disposition of a hedge or executory contract prior to the accrual date*—(A) *In general.* If a taxpayer identifies an executory contract as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of (or otherwise terminates) the executory contract prior to the accrual date, the hedge shall be treated as sold for its fair market value on the date the executory contract is disposed of and any gain or loss shall be realized and recognized on such date. Such gain

or loss shall be an adjustment to the amount received or expended with respect to the disposition or termination, if any. The spot rate on the date the hedge is treated as sold shall be used to determine subsequent exchange gain or loss on the hedge. If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge prior to the accrual date, any gain or loss realized on such disposition shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract.

(B) *Certain events in a series of hedges treated as a termination of the hedged executory contract.* If the rules of paragraph (b)(2)(iii)(B) of this section are not satisfied, the hedged executory contract shall be terminated and the provisions of paragraph (b)(4)(iii)(A) of this section shall apply to any gain or loss previously realized with respect to such hedge. Any subsequent hedging contracts entered into to reduce the risk of exchange rate movements with respect to such executory contract shall not be considered a hedge as defined in paragraph (b)(2)(iii) of this section.

(C) *Executory contracts between related persons.* If an executory contract is between related persons as defined in sections 267(b) and 707(b), and the taxpayer disposes of the hedge or terminates the executory contract prior to the accrual date, the Commissioner may redetermine the timing, source, and character of gain or loss from the hedge or the executory contract if he determines that a significant purpose for disposing of the hedge or terminating the executory contract prior to the accrual date was to affect the timing, source, or character of income, gain, expense, or loss for Federal income tax purposes.

(iv) *Disposition of a hedge on or after the accrual date.* If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge on or after the accrual date, no gain or loss is recognized on the hedge

and the booking date as defined in § 1.988-2(c)(2) of the payable or receivable for purposes of computing exchange gain or loss shall be the date such hedge is disposed of. See *Example 3* of paragraph (b)(4)(iv) of this section.

(v) *Sections 263(g), 1092, and 1256 do not apply.* Sections 263(g), 1092, and 1256 do not apply with respect to an executory contract or hedge which comprise a hedged executory contract as defined in paragraph (b)(2) of this section. However, sections 263(g), 1092 and 1256 may apply to the hedged executory contract if such transaction is part of a straddle.

(vi) *Examples.* The principles set forth in paragraph (b) of this section are illustrated in the following examples. The examples assume that K is an accrual method, calendar year U.S. corporation with the dollar as its functional currency.

Example 1. (i) On January 1, 1992, K enters into a contract with JPF, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Also on January 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for \$250,000 for delivery on June 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3)(i) of this section. On June 1, 1993, K takes delivery of the 500,000 Swiss francs (in exchange for \$250,000) under the forward contract and makes payment of 500,000 Swiss francs to JPF in exchange for the machine. Assume that the accrual date is June 1, 1993.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore, K is deemed to have paid \$250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. K's basis in the machine is \$250,000. Section 1256 does not apply to the forward contract.

Example 2. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for \$250,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of machine. Assume that under K's method of accounting the delivery date is the accrual date. On September 1, 1993, K takes delivery of the 500,000 Swiss

francs (in exchange for \$250,000) under the forward contract and makes payment of 500,000 Swiss francs to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid \$250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. Thus K's basis in the machine is \$250,000. In addition, no exchange gain or loss is recognized on the payable in existence from June 1, 1993, to September 1, 1993. Section 1256 does not apply to the forward contract.

Example 3. The facts are the same as in *Example 2* except that K disposed of the forward contract on August 1, 1993 for \$10,000. Pursuant to paragraph (b)(4)(iv) of this section, K does not recognize the \$10,000 gain. K's basis in the machine is \$250,000 (the amount fixed by the forward contract), regardless of the amount in dollars that K actually pays to acquire the Sf500,000 when K pays for the machine. K has a payable with a booking date of August 1, 1993, payable on September 1, 1993 for 500,000 Swiss francs. Thus, K will realize exchange gain or loss on the difference between the amount booked on August 1, 1993 and the amount paid on September 1, 1993 under § 1.988-2(c).

Example 4. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine repair firm, to pay 500,000 Swiss francs for repairs to be performed on June 1, 1992. Under the contract, K is not obligated to pay for the repairs until September 1, 1992. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for \$250,000 for delivery on August 1, 1992. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1992, S performs the repair services. Assume that under K's method of accounting this date is the accrual date. On August 1, 1992, K takes delivery of the 500,000 Swiss francs (in exchange for \$250,000) under the forward contract. On the same day, K deposits the Sf500,000 in a separate account with a bank and properly identifies the transaction as a continuation of the hedged executory contract. On September 1, 1992, K makes payment of the Sf500,000 in the account to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid \$250,000 for the services and there is no exchange gain or loss on the foreign currency forward contract or on the disposition of Sf500,000 in the account. Any interest on the Swiss francs in the account is included in income but is not considered part of the hedge (because the amount paid for the services must be set on or before the accrual date). In addition, no exchange gain or loss is recognized on the payable in existence from June

1, 1992, to September 1, 1992. Section 1256 does not apply to the forward contract.

Example 5. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 250,000 Swiss francs for \$125,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of the machine. Assume that under K's method of accounting the delivery date is the accrual date. Assume further that the exchange rate is $\text{Sf}1 = \$.50$ on June 1, 1993. On August 30, 1993, K purchases $\text{Sf}250,000$ for \$135,000. On September 1, 1993, K takes delivery of the 250,000 Swiss francs (in exchange for \$125,000) under the forward contract and makes payment of 500,000 Swiss francs (the $\text{Sf}250,000$ received under the contract plus the $\text{Sf}250,000$ purchased on August 30, 1993) to S. Assume the spot rate on September 1, 1993, is $1 \text{ Sf} = \$.5420$ ($\text{Sf}250,000$ equal \$135,500).

(ii) Under paragraph (b)(1) of this section, the partial hedge is integrated with the executory contract. K is deemed to have paid \$250,000 for the machine [$\$125,000$ on the hedged portion of the $\text{Sf}500,000$ and $\$125,000$ ($\$.50$, the spot rate on June 1, 1993, times $\text{Sf}250,000$) on the unhedged portion of the $\text{Sf}500,000$]. K's basis in the machine therefore is \$250,000. K recognizes no exchange gain or loss on the foreign currency forward contract but K will realize exchange gain of \$500 on the disposition of the $\text{Sf}250,000$ purchased on August 30, 1993 under § 1.988-2(a). In addition, exchange loss is realized on the unhedged portion of the payable in existence from June 1, 1993, to September 1, 1993. Thus, K will realize exchange loss of \$10,500 ($\$125,000$ booked less \$135,500 paid) under § 1.988-2(c) on the payable. Section 1256 does not apply to the forward contract.

Example 6. (i) On January 1, 1990, K enters into a contract with S, a Swiss steel manufacturer, to buy steel for 1,000,000 Swiss francs (Sf) for delivery and payment on December 31, 1990. On January 1, 1990, the spot rate is $\text{Sf}1 = \$.50$, the U.S. dollar interest rate is 10% compounded annually, and the Swiss franc rate is 5% compounded annually. Under K's method of accounting, the delivery date is the accrual date.

(ii) Assume that on January 1, 1990, K enters into a foreign currency forward contract to buy $\text{Sf}1,000,000$ for \$523,800 for delivery on December 31, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract constitutes a hedge. Assuming that the requirements of

paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward contract are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid \$523,800 for the steel and will have a basis in the steel of \$523,800. No gain or loss is realized with respect to the forward contract and section 1256 does not apply to such contract.

(iii) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy $\text{Sf}1,000,000$ for \$512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is $\text{Sf}1 = \$.53$, K cancels the forward contract in exchange for \$17,800 ($\$530,000 - \$512,200$). On July 1, 1990, K enters into a second forward agreement to buy $\text{Sf}1,000,000$ for \$542,900 for delivery on December 31, 1990. K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered into on January 1, 1990, and the forward contract entered into on July 1, 1990, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid \$525,100 for the steel (the forward price in the second forward agreement of \$542,900 less the gain on the first forward agreement of \$17,800) and will have a basis in the steel of \$525,100. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(iv) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy $\text{Sf}1,000,000$ for \$512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is $\text{Sf}1 = \$.53$, K enters into a historical rate rollover of its \$17,800 gain ($\$530,000 - \$512,200$) on the forward agreement. Thus, K enters into a second foreign currency forward agreement to buy $\text{Sf}1,000,000$ for \$524,210 for delivery on December 31, 1990. (The forward price of \$524,210 is the market forward price on July 1, 1990, for the purchase of $\text{Sf}1,000,000$ for delivery on December 31, 1990, of \$542,900 less the \$17,800 gain on January 1, 1990, contract and less the time value of such gain of \$890.) K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. On December 31, 1990, when the spot rate is $\text{Sf}1 = \$.54$, K takes delivery of the $\text{Sf}1,000,000$ (in exchange for \$524,210) and purchases the steel for $\text{Sf}1,000,000$. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered

into on January 1, 1990, and the forward contract entered into on July 1, 1990, which incorporates the rollover of K's gain on the January 1, 1990, contract, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Because the period from the rollover date to the date payment is made under the executory contract does not exceed 183 days, the \$890 of interest income is considered part of the hedge and is not recognized. Thus, K is deemed to have paid \$524,210 for the steel and will have a basis in the steel of \$524,210. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(v) Assume instead that on January 1, 1990, K purchases Sf952,380.95 (the present value of Sf1,000,000 to be paid on December 31, 1990) for \$476,190.48 and on the same day deposits the Swiss francs in a separate bank account that bears interest at a rate of 5%, compounded annually. K properly identifies the transaction as a hedged executory contract. Over the period beginning January 1, 1990, and ending December 31, 1990, K receives Sf47,619.05 in interest on the account that is included in income and that has a basis of \$25,714.29. (Assume that under § 1.988-2(b)(1), K uses the spot rate of Sf1 = \$.54 to translate the interest income). On December 31, 1990, K makes payment of the Sf1,000,000 principal and accrued interest in the account to S. Pursuant to paragraph (b)(2)(iii) of this section, the principal in the bank account and the interest constitute a hedge. Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid \$501,904.77 (the basis of the principal deposited plus the basis of the interest) for the steel and there is no exchange gain or loss on the disposition of the Sf1,000,000. K's basis in the steel therefore is \$501,904.77.

(5) *References to this paragraph (b).* If the rules of this paragraph (b) are referred to in another paragraph of this section (e.g., paragraph (c) of this section), then the rules of this paragraph (b) shall be applied for purposes of such other paragraph by substituting terms appropriate for such other paragraph. For example, paragraph (c)(2) of this section refers to the identification rules of paragraph (b)(3) of this section. Accordingly, for purposes of paragraph (c)(2), the rules of paragraph (b)(3) will be applied by substituting the term "stock or security" for "executory contract".

(c) *Hedges of period between trade date and settlement date on purchase or sale of publicly traded stock or security.* If a taxpayer purchases or sells stocks or securities which are traded on an established securities market and—

(1) Hedges all or part of such purchase or sale for any part of the period beginning on the trade date and ending on the settlement date; and

(2) Identifies the hedge and the underlying stock or securities as an integrated transaction under the rules of paragraph (b)(3) of this section;

then any gain or loss on the hedge shall be an adjustment to the amount realized or the adjusted basis of the stock or securities sold or purchased (and shall not be taken into account as exchange gain or loss). The term hedge means a deposit of nonfunctional currency in a hedging account (within the meaning of paragraph (b)(2)(iii)(D) of this section), or a forward or futures contract described in § 1.988-1(a)(1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations for any portion of the period beginning on the trade date and ending on the settlement date. The provisions of paragraphs (b)(2)(i)(D) through (G), and (b)(2)(iii)(D) and (E) of this section shall apply. Sections 263(g), 1092, and 1256 do not apply with respect to stock or securities and a hedge which are subject to this paragraph (c).

(d) [Reserved]

(e) *Advance rulings regarding net hedging and anticipatory hedging systems.* In his sole discretion, the Commissioner may issue an advance ruling addressing the income tax consequences of a taxpayer's system of hedging either its net nonfunctional currency exposure or anticipated nonfunctional currency exposure. The ruling may address the character, source, and timing of both the section 988 transaction(s) making up the hedge and the underlying transactions being hedged. The procedures for obtaining a ruling shall be governed by such pertinent revenue procedures and revenue rulings as the Commissioner may provide. The Commissioner will not issue a ruling regarding hedges of a taxpayer's investment in a foreign subsidiary.

(f) [Reserved]

(g) *General effective date.* Except as otherwise provided in this section, the rules of this section shall apply to qualified hedging transactions, hedged executory contracts and transactions described in paragraph (c) of this section entered into on or after September 21, 1989. This section shall apply even if the transaction being hedged (*e.g.*, the debt instrument) was entered into or acquired prior to such date. The effective date regarding advance rulings for net and anticipatory hedging shall be governed by such revenue procedures that the Commissioner may publish.

[T.D. 8400, 57 FR 9199, Mar. 17, 1992, as amended at T.D. 9598, 77 FR 54809, Sept. 6, 2012; T.D. 9736, 80 FR 53733, 53735, Sept. 8, 2015]

§ 1.988-6 Nonfunctional currency contingent payment debt instruments.

(a) *In general*—(1) *Scope.* This section determines the accrual of interest and the amount, timing, source, and character of any gain or loss on nonfunctional currency contingent payment debt instruments described in this paragraph (a)(1) and to which § 1.1275-4(a) would otherwise apply if the debt instrument were denominated in the taxpayer's functional currency. Except as provided by the rules in this section, the rules in § 1.1275-4 (relating to contingent payment debt instruments) apply to the following instruments—

(i) A debt instrument described in § 1.1275-4(b)(1) for which all payments of principal and interest are denominated in, or determined by reference to, a single nonfunctional currency and which has one or more non-currency related contingencies;

(ii) A debt instrument described in § 1.1275-4(b)(1) for which payments of principal or interest are denominated in, or determined by reference to, more than one currency and which has no non-currency related contingencies;

(iii) A debt instrument described in § 1.1275-4(b)(1) for which payments of principal or interest are denominated in, or determined by reference to, more than one currency and which has one or more non-currency related contingencies; and

(iv) A debt instrument otherwise described in paragraph (a)(1)(i), (ii) or (iii) of this section, except that the

debt instrument is described in § 1.1275-4(c)(1) rather than § 1.1275-4(b)(1) (*e.g.*, the instrument is issued for non-publicly traded property).

(2) *Exception for hyperinflationary currencies*—(i) *In general.* Except as provided in paragraph (a)(2)(ii) of this section, this section shall not apply to an instrument described in paragraph (a)(1) of this section if any payment made under such instrument is determined by reference to a hyperinflationary currency, as defined in § 1.985-1(b)(2)(ii)(D). In such case, the amount, timing, source and character of interest, principal, foreign currency gain or loss, and gain or loss relating to a non-currency contingency shall be determined under the method that reflects the instrument's economic substance.

(ii) *Discretion as to method.* If a taxpayer does not account for an instrument described in paragraph (a)(2)(i) of this section in a manner that reflects the instrument's economic substance, the Commissioner may apply the rules of this section to such an instrument or apply the principles of § 1.988-2(b)(15), reasonably taking into account the contingent feature or features of the instrument.

(b) *Instruments described in paragraph (a)(1)(i) of this section*—(1) *In general.* Paragraph (b)(2) of this section provides rules for applying the noncontingent bond method (as set forth in § 1.1275-4(b)) in the nonfunctional currency in which a debt instrument described in paragraph (a)(1)(i) of this section is denominated, or by reference to which its payments are determined (the denomination currency). Paragraph (b)(3) of this section describes how amounts determined in paragraph (b)(2) of this section shall be translated from the denomination currency of the instrument into the taxpayer's functional currency. Paragraph (b)(4) of this section describes how gain or loss (other than foreign currency gain or loss) shall be determined and characterized with respect to the instrument. Paragraph (b)(5) of this section describes how foreign currency gain or loss shall be determined with respect to accrued interest and principal on the instrument. Paragraph (b)(6) of this section provides rules for determining

the source and character of any gain or loss with respect to the instrument. Paragraph (b)(7) of this section provides rules for subsequent holders of an instrument who purchase the instrument for an amount other than the adjusted issue price of the instrument. Paragraph (c) of this section provides examples of the application of paragraph (b) of this section. See paragraph (d) of this section for the determination of the denomination currency of an instrument described in paragraph (a)(1)(ii) or (iii) of this section. See paragraph (e) of this section for the treatment of an instrument described in paragraph (a)(1)(iv) of this section.

(2) *Application of noncontingent bond method*—(i) *Accrued interest.* Interest accruals on an instrument described in paragraph (a)(1)(i) of this section are initially determined in the denomination currency of the instrument by applying the noncontingent bond method, set forth in § 1.1275-4(b), to the instrument in its denomination currency. Accordingly, the comparable yield, projected payment schedule, and comparable fixed rate debt instrument, described in § 1.1275-4(b)(4), are determined in the denomination currency. For purposes of applying the noncontingent bond method to instruments described in this paragraph, the applicable Federal rate described in § 1.1275-4(b)(4)(i) shall be the rate described in § 1.1274-4(d) with respect to the denomination currency.

(ii) *Net positive and negative adjustments.* Positive and negative adjustments, and net positive and net negative adjustments, with respect to an instrument described in paragraph (a)(1)(i) of this section are determined by applying the rules of § 1.1275-4(b)(6) (and § 1.1275-4(b)(9)(i) and (ii), if applicable) in the denomination currency. Accordingly, a net positive adjustment is treated as additional interest (in the denomination currency) on the instrument. A net negative adjustment first reduces interest that otherwise would be accrued by the taxpayer during the current tax year in the denomination currency. If a net negative adjustment exceeds the interest that would otherwise be accrued by the taxpayer during the current tax year in the denomination currency, the excess is treated as

ordinary loss (if the taxpayer is a holder of the instrument) or ordinary income (if the taxpayer is the issuer of the instrument). The amount treated as ordinary loss by a holder with respect to a net negative adjustment is limited, however, to the amount by which the holder's total interest inclusions on the debt instrument (determined in the denomination currency) exceed the total amount of the holder's net negative adjustments treated as ordinary loss on the debt instrument in prior taxable years (determined in the denomination currency). Similarly, the amount treated as ordinary income by an issuer with respect to a net negative adjustment is limited to the amount by which the issuer's total interest deductions on the debt instrument (determined in the denomination currency) exceed the total amount of the issuer's net negative adjustments treated as ordinary income on the debt instrument in prior taxable years (determined in the denomination currency). To the extent a net negative adjustment exceeds the current year's interest accrual and the amount treated as ordinary loss to a holder (or ordinary income to the issuer), the excess is treated as a negative adjustment carryforward, within the meaning of § 1.1275-4(b)(6)(iii)(C), in the denomination currency.

(iii) *Adjusted issue price.* The adjusted issue price of an instrument described in paragraph (a)(1)(i) of this section is determined by applying the rules of § 1.1275-4(b)(7) in the denomination currency. Accordingly, the adjusted issue price is equal to the debt instrument's issue price in the denomination currency, increased by the interest previously accrued on the debt instrument (determined without regard to any net positive or net negative adjustments on the instrument) and decreased by the amount of any noncontingent payment and the projected amount of any contingent payment previously made on the instrument. All adjustments to the adjusted issue price are calculated in the denomination currency.

(iv) *Adjusted basis.* The adjusted basis of an instrument described in paragraph (a)(1)(i) of this section is determined by applying the rules of § 1.1275-4(b)(7) in the taxpayer's functional currency. In accordance with those rules,

a holder's basis in the debt instrument is increased by the interest previously accrued on the debt instrument (translated into functional currency), without regard to any net positive or net negative adjustments on the instrument (except as provided in paragraph (b)(7) or (8) of this section, if applicable), and decreased by the amount of any noncontingent payment and the projected amount of any contingent payment previously made on the instrument to the holder (translated into functional currency). See paragraph (b)(3)(iii) of this section for translation rules.

(v) *Amount realized.* The amount realized by a holder and the repurchase price paid by the issuer on the scheduled or unscheduled retirement of a debt instrument described in paragraph (a)(1)(i) of this section are determined by applying the rules of §1.1275-4(b)(7) in the denomination currency. For example, with regard to a scheduled retirement at maturity, the holder is treated as receiving the projected amount of any contingent payment due at maturity, reduced by the amount of any negative adjustment carryforward. For purposes of translating the amount realized by the holder into functional currency, the rules of paragraph (b)(3)(iv) of this section shall apply.

(3) *Treatment and translation of amounts determined under noncontingent bond method*—(i) *Accrued interest.* The amount of accrued interest, determined under paragraph (b)(2)(i) of this section, is translated into the taxpayer's functional currency at the average exchange rate, as described in §1.988-2(b)(2)(iii)(A), or, at the taxpayer's election, at the appropriate spot rate, as described in §1.988-2(b)(2)(iii)(B).

(ii) *Net positive and negative adjustments*—(A) *Net positive adjustments.* A net positive adjustment, as referenced in paragraph (b)(2)(ii) of this section, is translated into the taxpayer's functional currency at the spot rate on the last day of the taxable year in which the adjustment is taken into account under §1.1275-4(b)(6), or, if earlier, the date the instrument is disposed of or otherwise terminated.

(B) *Net negative adjustments.* A net negative adjustment is treated and, where necessary, is translated from the

denomination currency into the taxpayer's functional currency under the following rules:

(1) The amount of a net negative adjustment determined in the denomination currency that reduces the current year's interest in that currency shall first reduce the current year's accrued but unpaid interest, and then shall reduce the current year's interest which was accrued and paid. No translation is required.

(2) The amount of a net negative adjustment treated as ordinary income or loss under §1.1275-4(b)(6)(iii)(B) first is attributable to accrued but unpaid interest accrued in prior taxable years. For this purpose, the net negative adjustment shall be treated as attributable to any unpaid interest accrued in the immediately preceding taxable year, and thereafter to unpaid interest accrued in each preceding taxable year. The amount of the net negative adjustment applied to accrued but unpaid interest is translated into functional currency at the same rate used, in each of the respective prior taxable years, to translate the accrued interest.

(3) Any amount of the net negative adjustment remaining after the application of paragraphs (b)(3)(ii)(B)(1) and (2) of this section is attributable to interest accrued and paid in prior taxable years. The amount of the net negative adjustment applied to such amounts is translated into functional currency at the spot rate on the date the debt instrument was issued or, if later, acquired.

(4) Any amount of the net negative adjustment remaining after application of paragraphs (b)(3)(ii)(B)(1), (2) and (3) of this section is a negative adjustment carryforward, within the meaning of §1.1275-4(b)(6)(iii)(C). A negative adjustment carryforward is carried forward in the denomination currency and is applied to reduce interest accruals in subsequent years. In the year in which the instrument is sold, exchanged or retired, any negative adjustment carryforward not applied to interest reduces the holder's amount realized on the instrument (in the denomination currency). An issuer of a debt instrument described in paragraph (a)(1)(i) of this section who takes into income a negative adjustment

carryforward (that is not applied to interest) in the year the instrument is retired, as described in § 1.1275-4(b)(6)(iii)(C), translates such income into functional currency at the spot rate on the date the instrument was issued.

(iii) *Adjusted basis*—(A) *In general.* Except as otherwise provided in this paragraph and paragraph (b)(7) or (8) of this section, a holder determines and maintains adjusted basis by translating the denomination currency amounts determined under § 1.1275-4(b)(7)(iii) into functional currency as follows:

(1) The holder's initial basis in the instrument is determined by translating the amount paid by the holder to acquire the instrument (in the denomination currency) into functional currency at the spot rate on the date the instrument was issued or, if later, acquired.

(2) An increase in basis attributable to interest accrued on the instrument is translated at the rate applicable to such interest under paragraph (b)(3)(i) of this section.

(3) Any noncontingent payment and the projected amount of any contingent payments determined in the denomination currency that decrease the holder's basis in the instrument under § 1.1275-4(b)(7)(iii) are translated as follows:

(i) The payment first is attributable to the most recently accrued interest to which prior amounts have not already been attributed. The payment is translated into functional currency at the rate at which the interest was accrued.

(ii) Any amount remaining after the application of paragraph (b)(3)(iii)(A)(3)(i) of this section is attributable to principal. Such amounts are translated into functional currency at the spot rate on the date the instrument was issued or, if later, acquired.

(B) *Exception for interest reduced by a negative adjustment carryforward.* Solely for purposes of this § 1.988-6, any amounts of accrued interest income that are reduced as a result of a negative adjustment carryforward shall be treated as principal and translated at the spot rate on the date the instrument was issued or, if later, acquired.

(iv) *Amount realized*—(A) *Instrument held to maturity*—(1) *In general.* With respect to an instrument held to maturity, a holder translates the amount realized by separating such amount in the denomination currency into the component parts of interest and principal that make up adjusted basis prior to translation under paragraph (b)(3)(iii) of this section, and translating each of those component parts of the amount realized at the same rate used to translate the respective component parts of basis under paragraph (b)(3)(iii) of this section. The amount realized first shall be translated by reference to the component parts of basis consisting of accrued interest during the taxpayer's holding period as determined under paragraph (b)(3)(iii) of this section and ordering such amounts on a last in first out basis. Any remaining portion of the amount realized shall be translated by reference to the rate used to translate the component of basis consisting of principal as determined under paragraph (b)(3)(iii) of this section.

(2) *Subsequent purchases at discount and fixed but deferred contingent payments.* For purposes of this paragraph (b)(3)(iv) of this section, any amount which is required to be added to adjusted basis under paragraph (b)(7) or (8) of this section shall be treated as additional interest which was accrued on the date the amount was added to adjusted basis. To the extent included in amount realized, such amounts shall be translated into functional currency at the same rates at which they were translated for purposes of determining adjusted basis. See paragraphs (b)(7)(iv) and (b)(8) of this section for rules governing the rates at which the amounts are translated for purposes of determining adjusted basis.

(B) *Sale, exchange, or uncheduled retirement*—(1) *Holder.* In the case of a sale, exchange, or uncheduled retirement, application of the rule stated in paragraph (b)(3)(iv)(A) of this section shall be as follows. The holder's amount realized first shall be translated by reference to the principal component of basis as determined under paragraph (b)(3)(iii) of this section, and then to the component of basis consisting of accrued interest as

determined under paragraph (b)(3)(iii) of this section and ordering such amounts on a first in first out basis. Any gain recognized by the holder (*i.e.*, any excess of the sale price over the holder's basis, both expressed in the denomination currency) is translated into functional currency at the spot rate on the payment date.

(2) *Issuer.* In the case of an unsecured retirement of the debt instrument, any excess of the adjusted issue price of the debt instrument over the amount paid by the issuer (expressed in denomination currency) shall first be attributable to accrued unpaid interest, to the extent the accrued unpaid interest had not been previously offset by a negative adjustment, on a last-in-first-out basis, and then to principal. The accrued unpaid interest shall be translated into functional currency at the rate at which the interest was accrued. The principal shall be translated at the spot rate on the date the debt instrument was issued.

(C) *Effect of negative adjustment carryforward with respect to the issuer.* Any amount of negative adjustment carryforward treated as ordinary income under § 1.1275-4(b)(6)(iii)(C) shall be translated at the exchange rate on the day the debt instrument was issued.

(4) *Determination of gain or loss not attributable to foreign currency.* A holder of a debt instrument described in paragraph (a)(1)(i) of this section shall recognize gain or loss upon sale, exchange, or retirement of the instrument equal to the difference between the amount realized with respect to the instrument, translated into functional currency as described in paragraph (b)(3)(iv) of this section, and the adjusted basis in the instrument, determined and maintained in functional currency as described in paragraph (b)(3)(iii) of this section. The amount of any gain or loss so determined is characterized as provided in § 1.1275-4(b)(8), and sourced as provided in paragraph (b)(6) of this section.

(5) *Determination of foreign currency gain or loss—(i) In general.* Other than in a taxable disposition of the debt instrument, foreign currency gain or loss is recognized with respect to a debt instrument described in paragraph

(a)(1)(i) of this section only when payments are made or received. No foreign currency gain or loss is recognized with respect to a net positive or negative adjustment, as determined under paragraph (b)(2)(ii) of this section (except with respect to a positive adjustment described in paragraph (b)(8) of this section). As described in this paragraph (b)(5), foreign currency gain or loss is determined in accordance with the rules of § 1.988-2(b).

(ii) *Foreign currency gain or loss attributable to accrued interest.* The amount of foreign currency gain or loss recognized with respect to payments of interest previously accrued on the instrument is determined by translating the amount of interest paid or received into functional currency at the spot rate on the date of payment and subtracting from such amount the amount determined by translating the interest paid or received into functional currency at the rate at which such interest was accrued under the rules of paragraph (b)(3)(i) of this section. For purposes of this paragraph, the amount of any payment that is treated as accrued interest shall be reduced by the amount of any net negative adjustment treated as ordinary loss (to the holder) or ordinary income (to the issuer), as provided in paragraph (b)(2)(ii) of this section. For purposes of determining whether the payment consists of interest or principal, see the payment ordering rules in paragraph (b)(5)(iv) of this section.

(iii) *Principal.* The amount of foreign currency gain or loss recognized with respect to payment or receipt of principal is determined by translating the amount paid or received into functional currency at the spot rate on the date of payment or receipt and subtracting from such amount the amount determined by translating the principal into functional currency at the spot rate on the date the instrument was issued or, in case of the holder, if later, acquired. For purposes of determining whether the payment consists of interest or principal, see the payment ordering rules in paragraph (b)(5)(iv) of this section.

(iv) *Payment ordering rules*—(A) *In general.* Except as provided in paragraph (b)(5)(iv)(B) of this section, payments with respect to an instrument described in paragraph (a)(1)(i) of this section shall be treated as follows:

(1) A payment shall first be attributable to any net positive adjustment on the instrument that has not previously been taken into account.

(2) Any amount remaining after applying paragraph (b)(5)(iv)(A)(1) of this section shall be attributable to accrued but unpaid interest, remaining after reduction by any net negative adjustment, and shall be attributable to the most recent accrual period to the extent prior amounts have not already been attributed to such period.

(3) Any amount remaining after applying paragraphs (b)(5)(iv)(A)(1) and (2) of this section shall be attributable to principal. Any interest paid in the current year that is reduced by a net negative adjustment shall be considered a payment of principal for purposes of determining foreign currency gain or loss.

(B) *Special rule for sale or exchange or unscheduled retirement.* Payments made or received upon a sale or exchange or unscheduled retirement shall first be applied against the principal of the debt instrument (or in the case of a subsequent purchaser, the purchase price of the instrument in denomination currency) and then against accrued unpaid interest (in the case of a holder, accrued while the holder held the instrument).

(C) *Subsequent purchaser that has a positive adjustment allocated to a daily portion of interest.* A positive adjustment that is allocated to a daily portion of interest pursuant to paragraph (b)(7)(iv) of this section shall be treated as interest for purposes of applying the payment ordering rule of this paragraph (b)(5)(iv).

(6) *Source of gain or loss.* The source of foreign currency gain or loss recognized with respect to an instrument described in paragraph (a)(1)(i) of this section shall be determined pursuant to § 1.988-4. Consistent with the rules of § 1.1275-4(b)(8), all gain (other than foreign currency gain) on an instrument described in paragraph (a)(1)(i) of this section is treated as interest income

for all purposes. The source of an ordinary loss (other than foreign currency loss) with respect to an instrument described in paragraph (a)(1)(i) of this section shall be determined pursuant to § 1.1275-4(b)(9)(iv). The source of a capital loss with respect to an instrument described in paragraph (a)(1)(i) of this section shall be determined pursuant to § 1.865-1(b)(2).

(7) *Basis different from adjusted issue price*—(i) *In general.* The rules of § 1.1275-4(b)(9)(i), except as set forth in this paragraph (b)(7), shall apply to an instrument described in paragraph (a)(1)(i) of this section purchased by a subsequent holder for more or less than the instrument's adjusted issue price.

(ii) *Determination of basis.* If an instrument described in paragraph (a)(1)(i) of this section is purchased by a subsequent holder, the subsequent holder's initial basis in the instrument shall equal the amount paid by the holder to acquire the instrument, translated into functional currency at the spot rate on the date of acquisition.

(iii) *Purchase price greater than adjusted issue price.* If the purchase price of the instrument (determined in the denomination currency) exceeds the adjusted issue price of the instrument, the holder shall, consistent with the rules of § 1.1275-4(b)(9)(i)(B), reasonably allocate such excess to the daily portions of interest accrued on the instrument or to a projected payment on the instrument. To the extent attributable to interest, the excess shall be reasonably allocated over the remaining term of the instrument to the daily portions of interest accrued and shall be a negative adjustment on the dates the daily portions accrue. On the date of such adjustment, the holder's adjusted basis in the instrument is reduced by the amount treated as a negative adjustment under this paragraph (b)(7)(iii), translated into functional currency at the rate used to translate the interest which is offset by the negative adjustment. To the extent related to a projected payment, such excess shall be treated as a negative adjustment on the date the payment is made. On the date of such adjustment, the holder's

adjusted basis in the instrument is reduced by the amount treated as a negative adjustment under this paragraph (b)(7)(iii), translated into functional currency at the spot rate on the date the instrument was acquired.

(iv) *Purchase price less than adjusted issue price.* If the purchase price of the instrument (determined in the denomination currency) is less than the adjusted issue price of the instrument, the holder shall, consistent with the rules of § 1.1275-4(b)(9)(i)(C), reasonably allocate the difference to the daily portions of interest accrued on the instrument or to a projected payment on the instrument. To the extent attributable to interest, the difference shall be reasonably allocated over the remaining term of the instrument to the daily portions of interest accrued and shall be a positive adjustment on the dates the daily portions accrue. On the date of such adjustment, the holder's adjusted basis in the instrument is increased by the amount treated as a positive adjustment under this paragraph (b)(7)(iv), translated into functional currency at the rate used to translate the interest to which it relates. For purposes of determining adjusted basis under paragraph (b)(3)(iii) of this section, such increase in adjusted basis shall be treated as an additional accrual of interest during the period to which the positive adjustment relates. To the extent related to a projected payment, such difference shall be treated as a positive adjustment on the date the payment is made. On the date of such adjustment, the holder's adjusted basis in the instrument is increased by the amount treated as a positive adjustment under this paragraph (b)(7)(iv), translated into functional currency at the spot rate on the date the adjustment is taken into account. For purposes of determining the amount realized on the instrument in functional currency under paragraph (b)(3)(iv) of this section, amounts attributable to the excess of the adjusted issue price of the instrument over the purchase price of the instrument shall be translated into functional currency at the same rate at which the corresponding adjustments are taken into account under this paragraph (b)(7)(iv)

for purposes of determining the adjusted basis of the instrument.

(8) *Fixed but deferred contingent payments.* In the case of an instrument with a contingent payment that becomes fixed as to amount before the payment is due, the rules of § 1.1275-4(b)(9)(ii) shall be applied in the denomination currency of the instrument. For this purpose, foreign currency gain or loss shall be recognized on the date payment is made or received with respect to the instrument under the principles of paragraph (b)(5) of this section. Any increase or decrease in basis required under § 1.1275-4(b)(9)(ii)(D) shall be taken into account at the same exchange rate as the corresponding net positive or negative adjustment is taken into account.

(c) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples. In each example, assume that the instrument described is a debt instrument for federal income tax purposes. No inference is intended, however, as to whether the instrument is a debt instrument for federal income tax purposes. The examples are as follows:

Example 1. Treatment of net positive adjustment. (i) *Facts.* On December 31, 2004, Z, a calendar year U.S. resident taxpayer whose functional currency is the U.S. dollar, purchases from a foreign corporation, at original issue, a zero-coupon debt instrument with a non-currency contingency for £1000. All payments of principal and interest with respect to the instrument are denominated in, or determined by reference to, a single nonfunctional currency (the British pound). The debt instrument would be subject to § 1.1275-4(b) if it were denominated in dollars. The debt instrument's comparable yield, determined in British pounds under paragraph (b)(2)(i) of this section and § 1.1275-4(b), is 10 percent, compounded annually, and the projected payment schedule, as constructed under the rules of § 1.1275-4(b), provides for a single payment of £1210 on December 31, 2006 (consisting of a noncontingent payment of £975 and a projected payment of £235). The debt instrument is a capital asset in the hands of Z. Z does not elect to use the spot-rate convention described in § 1.988-2(b)(2)(iii)(B). The payment actually made on December 31, 2006, is £1300. The relevant pound/dollar spot rates over the term of the instrument are as follows:

| Date | Spot rate
(pounds to dollars) |
|---------------------|----------------------------------|
| Dec. 31, 2004 | £1.00 = \$1.00 |
| Dec. 31, 2005 | £1.00 = \$1.10 |
| Dec. 31, 2006 | £1.00 = \$1.20 |

| Accrual period | Average rate
(pounds to dollars) |
|----------------|-------------------------------------|
| 2005 | £1.00 = \$1.05 |
| 2006 | £1.00 = \$1.15 |

(i) *Treatment in 2005*—(A) *Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £100 of interest on the debt instrument for 2005 (issue price of £1000 × 10 percent). Under paragraph (b)(3)(i) of this section, Z translates the £100 at the average exchange rate for the accrual period ($\$1.05 \times \text{£}100 = \105). Accordingly, Z has interest income in 2005 of \$105.

(B) *Adjusted issue price and basis.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued in 2005. Thus, on January 1, 2006, the adjusted issue price of the debt instrument is £1100. For purposes of determining Z's dollar basis in the debt instrument, the \$1000 basis ($\$1.00 \times \text{£}1000$ original cost basis) is increased by the £100 of accrued interest, translated at the rate at which interest was accrued for 2005. See paragraph (b)(3)(iii) of this section. Accordingly, Z's adjusted basis in the debt instrument as of January 1, 2006, is \$1105.

(iii) *Treatment in 2006*—(A) *Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £110 of interest on the debt instrument for 2006 (adjusted issue price of £1100 × 10 percent). Under paragraph (b)(3)(i) of this section, Z translates the £110 at the average exchange rate for the accrual period ($\$1.15 \times \text{£}110 = \126.50). Accordingly, Z has interest income in 2006 of \$126.50.

(B) *Effect of net positive adjustment.* The payment actually made on December 31, 2006, is £1300, rather than the projected £1210. Under paragraph (b)(2)(ii) of this section, Z has a net positive adjustment of £90 on December 31, 2006, attributable to the difference between the amount of the actual payment and the amount of the projected payment. Under paragraph (b)(3)(ii)(A) of this section, the £90 net positive adjustment is treated as additional interest income and is translated into dollars at the spot rate on the last day of the year ($\$1.20 \times \text{£}90 = \108). Accordingly, Z has a net positive adjustment of \$108 resulting in a total interest inclusion for 2006 of \$234.50 ($\$126.50 + \$108 = \234.50).

(C) *Adjusted issue price and basis.* Based on the projected payment schedule, the adjusted issue price of the debt instrument imme-

diately before the payment at maturity is £1210 (£1100 plus £110 of accrued interest for 2006). Z's adjusted basis in dollars, based only on the noncontingent payment and the projected amount of the contingent payment to be received, is \$1231.50 ($\1105 plus $\$126.50$ of accrued interest for 2006).

(D) *Amount realized.* Even though Z receives £1300 at maturity, for purposes of determining the amount realized, Z is treated under paragraph (b)(2)(v) of this section as receiving the projected amount of the contingent payment on December 31, 2006. Therefore, Z is treated as receiving £1210 on December 31, 2006. Under paragraph (b)(3)(iv) of this section, Z translates its amount realized into dollars and computes its gain or loss on the instrument (other than foreign currency gain or loss) by breaking the amount realized into its component parts. Accordingly, £100 of the £1210 (representing the interest accrued in 2005) is translated at the rate at which it was accrued ($\text{£}1 = \$1.05$), resulting in an amount realized of \$105; £110 of the £1210 (representing the interest accrued in 2006) is translated into dollars at the rate at which it was accrued ($\text{£}1 = \$1.15$), resulting in an amount realized of \$126.50; and £1000 of the £1210 (representing a return of principal) is translated into dollars at the spot rate on the date the instrument was purchased ($\text{£}1 = \$1$), resulting in an amount realized of \$1000. Z's total amount realized is \$1231.50, the same as its basis, and Z recognizes no gain or loss (before consideration of foreign currency gain or loss) on retirement of the instrument.

(E) *Foreign currency gain or loss.* Under paragraph (b)(5) of this section Z recognizes foreign currency gain under section 988 on the instrument with respect to the consideration actually received at maturity (except for the net positive adjustment), £1210. The amount of recognized foreign currency gain is determined based on the difference between the spot rate on the date the instrument matures and the rates at which the principal and interest were taken into account. With respect to the portion of the payment attributable to interest accrued in 2005, the foreign currency gain is \$15 [$\text{£}100 \times (\$1.20 - \$1.05)$]. With respect to interest accrued in 2006, the foreign currency gain equals \$5.50 [$\text{£}110 \times (\$1.20 - \$1.15)$]. With respect to principal, the foreign currency gain is \$200 [$\text{£}1000 \times (\$1.20 - \$1.00)$]. Thus, Z recognizes a total foreign currency gain on December 31, 2006, of \$220.50.

(F) *Source.* Z has interest income of \$105 in 2005, interest income of \$234.50 in 2006 (attributable to £110 of accrued interest and the £90 net positive adjustment), and a foreign currency gain of \$220.50 in 2006. Under paragraph (b)(6) of this section and section 862(a)(1), the interest income is sourced by reference to the residence of the payor and is therefore from sources without the United States.

Under paragraph (b)(6) of this section and §1.988-4, Z's foreign currency gain of \$220.50 is sourced by reference to Z's residence and is therefore from sources within the United States.

Example 2. Treatment of net negative adjustment. (i) *Facts.* Assume the same facts as in *Example 1*, except that Z receives £975 at maturity instead of £1300.

(ii) *Treatment in 2005.* The treatment of the debt instrument in 2005 is the same as in *Example 1*. Thus, Z has interest income in 2005 of \$105. On January 1, 2006, the adjusted issue price of the debt instrument is £1100, and Z's adjusted basis in the instrument is \$1105.

(iii) *Treatment in 2006—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section and based on the comparable yield, Z's accrued interest for 2006 is £110 (adjusted issue price of £1100 × 10 percent). Under paragraph (b)(3)(i) of this section, the £110 of accrued interest is translated at the average exchange rate for the accrual period ($\$1.15 \times \pounds 110 = \126.50).

(B) *Effect of net negative adjustment.* The payment actually made on December 31, 2006, is £975, rather than the projected £1210. Under paragraph (b)(2)(ii) of this section, Z has a net negative adjustment of £235 on December 31, 2006, attributable to the difference between the amount of the actual payment and the amount of the projected payment. Z's accrued interest income of £110 in 2006 is reduced to zero by the net negative adjustment. Under paragraph (b)(3)(ii)(B)(1) of this section the net negative adjustment which reduces the current year's interest is not translated into functional currency. Under paragraph (b)(2)(ii) of this section, Z treats the remaining £125 net negative adjustment as an ordinary loss to the extent of the £100 previously accrued interest in 2005. This £100 ordinary loss is attributable to interest accrued but not paid in the preceding year. Therefore, under paragraph (b)(3)(ii)(B)(2) of this section, Z translates the loss into dollars at the average rate for such year ($\pounds 1 = \$1.05$). Accordingly, Z has an ordinary loss of \$105 in 2006. The remaining £25 of net negative adjustment is a negative adjustment carryforward under paragraph (b)(2)(ii) of this section.

(C) *Adjusted issue price and basis.* Based on the projected payment schedule, the adjusted issue price of the debt instrument immediately before the payment at maturity is £1210 (£1100 plus £110 of accrued interest for 2006). Z's adjusted basis in dollars, based only on the noncontingent payments and the projected amount of the contingent payments to be received, is \$1231.50 (\$1105 plus \$126.50 of accrued interest for 2006).

(D) *Amount realized.* Even though Z receives £975 at maturity, for purposes of determining the amount realized, Z is treated under paragraph (b)(2)(v) of this section as receiving the projected amount of the con-

tingent payment on December 31, 2006, reduced by the amount of Z's negative adjustment carryforward of £25. Therefore, Z is treated as receiving £1185 (£1210 - £25) on December 31, 2006. Under paragraph (b)(3)(iv) of this section, Z translates its amount realized into dollars and computes its gain or loss on the instrument (other than foreign currency gain or loss) by breaking the amount realized into its component parts. Accordingly, £100 of the £1185 (representing the interest accrued in 2005) is translated at the rate at which it was accrued ($\pounds 1 = \$1.05$), resulting in an amount realized of \$105; £110 of the £1185 (representing the interest accrued in 2006) is translated into dollars at the rate at which it was accrued ($\pounds 1 = \$1.15$), resulting in an amount realized of \$126.50; and £975 of the £1185 (representing a return of principal) is translated into dollars at the spot rate on the date the instrument was purchased ($\pounds 1 = \$1$), resulting in an amount realized of \$975. Z's amount realized is \$1206.50 (\$105 + \$126.50 + \$975 = \$1206.50), and Z recognizes a capital loss (before consideration of foreign currency gain or loss) of \$25 on retirement of the instrument ($\$1206.50 - \$1231.50 = -\$25$).

(E) *Foreign currency gain or loss.* Z recognizes foreign currency gain with respect to the consideration actually received at maturity, £975. Under paragraph (b)(5)(ii) of this section, no foreign currency gain or loss is recognized with respect to unpaid accrued interest reduced to zero by the net negative adjustment resulting in 2006. In addition, no foreign currency gain or loss is recognized with respect to unpaid accrued interest from 2005, also reduced to zero by the ordinary loss. Accordingly, Z recognizes foreign currency gain with respect to principal only. Thus, Z recognizes a total foreign currency gain on December 31, 2006, of \$195 [$\pounds 975 \times (\$1.20 - \$1.00)$].

(F) *Source.* In 2006, Z has an ordinary loss of \$105, a capital loss of \$25, and a foreign currency gain of \$195. Under paragraph (b)(6) of this section and §1.1275-4(b)(9)(iv), the \$105 ordinary loss generally reduces Z's foreign source passive income under section 904(d) and the regulations thereunder. Under paragraph (b)(6) of this section and §1.865-1(b)(2), the \$25 capital loss is sourced by reference to how interest income on the instrument would have been sourced. Therefore, the \$25 capital loss generally reduces Z's foreign source passive income under section 904(d) and the regulations thereunder. Under paragraph (b)(6) of this section and §1.988-4, Z's foreign currency gain of \$195 is sourced by reference to Z's residence and is therefore from sources within the United States.

Example 3. Negative adjustment and periodic interest payments. (i) *Facts.* On December 31, 2004, Z, a calendar year U.S. resident taxpayer whose functional currency is the U.S. dollar, purchases from a foreign corporation, at original issue, a two-year debt instrument

with a non-currency contingency for £1000. All payments of principal and interest with respect to the instrument are denominated in, or determined by reference to, a single nonfunctional currency (the British pound). The debt instrument would be subject to § 1.1275-4(b) if it were denominated in dollars. The debt instrument's comparable yield, determined in British pounds under §§ 1.988-2(b)(2) and 1.1275-4(b), is 10 percent, compounded semiannually. The debt instrument provides for semiannual interest payments of £30 payable each June 30, and December 31, and a contingent payment at maturity on December 31, 2006, which is projected to equal £1086.20 (consisting of a noncontingent payment of £980 and a projected payment of £106.20) in addition to the interest payable at maturity. The debt instrument is a capital asset in the hands of Z. Z does not elect to use the spot-rate convention described in § 1.988-2(b)(2)(iii)(B). The payment actually made on December 31, 2006, is £981.00. The relevant pound/dollar spot rates over the term of the instrument are as follows:

| Date | Spot rate
(pounds to dollars) |
|---------------------|----------------------------------|
| Dec. 31, 2004 | £1.00 = \$1.00 |
| June 30, 2005 | £1.00 = \$1.20 |
| Dec. 31, 2005 | £1.00 = \$1.40 |
| June 30, 2006 | £1.00 = \$1.60 |
| Dec. 31, 2006 | £1.00 = \$1.80 |

| Accrual period | Average rate
(pounds to dollars) |
|----------------------|-------------------------------------|
| Jan.-June 2005 | £1.00 = \$1.10 |
| July-Dec. 2005 | £1.00 = \$1.30 |
| Jan.-June 2006 | £1.00 = \$1.50 |
| July-Dec. 2006 | £1.00 = \$1.70 |

(ii) *Treatment in 2005—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £50 of interest on the debt instrument for the January-June accrual period (issue price of £1000 × 10 percent/2). Under paragraph (b)(3)(i) of this section, Z translates the £50 at the average exchange rate for the accrual period ($\$1.10 \times £50 = \55.00). Similarly, Z accrues £51 of interest in the July-December accrual period [$(£1000 + £50 - £30) \times 10 \text{ percent}/2$], which is translated at the average exchange rate for the accrual period ($\$1.30 \times £51 = \66.30). Accordingly, Z accrues \$121.30 of interest income in 2005.

(B) *Adjusted issue price and basis—(1) January-June accrual period.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued, and decreased by the interest payment made, in the January-June accrual period. Thus, on July 1, 2005, the adjusted issue price of the debt instrument is £1020 ($£1000 + £50 - £30 = £1020$). For purposes

of determining Z's dollar basis in the debt instrument, the \$1000 basis is increased by the £50 of accrued interest, translated, under paragraph (b)(3)(iii) of this section, at the rate at which interest was accrued for the January-June accrual period ($\$1.10 \times £50 = \55). The resulting amount is reduced by the £30 payment of interest made during the accrual period, translated, under paragraph (b)(3)(iii) of this section and § 1.988-2(b)(7), at the rate applicable to accrued interest ($\$1.10 \times £30 = \33). Accordingly, Z's adjusted basis as of July 1, 2005, is \$1022 ($\$1000 + \$55 - \33).

(2) *July-December accrual period.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued, and decreased by the interest payment made, in the July-December accrual period. Thus, on January 1, 2006, the adjusted issue price of the instrument is £1041 ($£1020 + £51 - £30 = £1041$). For purposes of determining Z's dollar basis in the debt instrument, the \$1022 basis is increased by the £51 of accrued interest, translated, under paragraph (b)(3)(iii) of this section, at the rate at which interest was accrued for the July-December accrual period ($\$1.30 \times £51 = \66.30). The resulting amount is reduced by the £30 payment of interest made during the accrual period, translated, under paragraph (b)(3)(iii) of this section and § 1.988-2(b)(7), at the rate applicable to accrued interest ($\$1.30 \times £30 = \39). Accordingly, Z's adjusted basis as of January 1, 2006, is \$1049.30 ($\$1022 + \$66.30 - \39).

(C) *Foreign currency gain or loss.* Z will recognize foreign currency gain on the receipt of each £30 payment of interest actually received during 2005. The amount of foreign currency gain in each case is determined, under paragraph (b)(5)(ii) of this section, by reference to the difference between the spot rate on the date the £30 payment was made and the average exchange rate for the accrual period during which the interest accrued. Accordingly, Z recognizes \$3 of foreign currency gain on the January-June interest payment [$£30 \times (\$1.20 - \$1.10)$], and \$3 of foreign currency gain on the July-December interest payment [$£30 \times (\$1.40 - \$1.30)$]. Z recognizes in 2005 a total of \$6 of foreign currency gain.

(D) *Source.* Z has interest income of \$121.30 and a foreign currency gain of \$6. Under paragraph (b)(6) of this section and section 862(a)(1), the interest income is sourced by reference to the residence of the payor and is therefore from sources without the United States. Under paragraph (b)(6) of this section and § 1.988-4, Z's foreign currency gain of \$6 is sourced by reference to Z's residence and is therefore from sources within the United States.

(iii) *Treatment in 2006—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of

this section, and based on the comparable yield, Z's accrued interest for the January-June accrual period is £52.05 (adjusted issue price of £1041 × 10 percent/2). Under paragraph (b)(3)(i) of this section, Z translates the £52.05 at the average exchange rate for the accrual period ($\$1.50 \times £52.05 = \78.08). Similarly, Z accrues £53.15 of interest in the July-December accrual period [$(£1041 + £52.05 - £30) \times 10 \text{ percent}/2$], which is translated at the average exchange rate for the accrual period ($\$1.70 \times £53.15 = \90.35). Accordingly, Z accrues £105.20, or \$168.43, of interest income in 2006.

(B) *Effect of net negative adjustment.* The payment actually made on December 31, 2006, is £981.00, rather than the projected £1086.20. Under paragraph (b)(2)(ii)(B) of this section, Z has a net negative adjustment of £105.20 on December 31, 2006, attributable to the difference between the amount of the actual payment and the amount of the projected payment. Z's accrued interest income of £105.20 in 2006 is reduced to zero by the net negative adjustment. Elimination of the 2006 accrued interest fully utilizes the net negative adjustment.

(C) *Adjusted issue price and basis—(1) January-June accrual period.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued, and decreased by the interest payment made, in the January-June accrual period. Thus, on July 1, 2006, the adjusted issue price of the debt instrument is £1063.05 ($£1041 + £52.05 - £30 = £1063.05$). For purposes of determining Z's dollar basis in the debt instrument, the \$1049.30 adjusted basis is increased by the £52.05 of accrued interest, translated, under paragraph (b)(3)(iii) of this section, at the rate at which interest was accrued for the January-June accrual period ($\$1.50 \times £52.05 = \78.08). The resulting amount is reduced by the £30 payment of interest made during the accrual period, translated, under paragraph (b)(3)(iii) of this section and § 1.988-2(b)(7), at the rate applicable to accrued interest ($\$1.50 \times £30 = \45). Accordingly, Z's adjusted basis as of July 1, 2006, is \$1082.38 ($\$1049.30 + \$78.08 - \45).

(2) *July-December accrual period.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued, and decreased by the interest payment made, in the July-December accrual period. Thus, immediately before maturity on December 31, 2006, the adjusted issue price of the instrument is £1086.20 ($£1063.05 + £53.15 - £30 = £1086.20$). For purposes of determining Z's dollar basis in the debt instrument, the \$1082.38 adjusted basis is increased by the £53.15 of accrued interest, translated, under paragraph (b)(3)(iii)

of this section, at the rate at which interest was accrued for the July-December accrual period ($\$1.70 \times £53.15 = \90.36). The resulting amount is reduced by the £30 payment of interest made during the accrual period, translated, under paragraph (b)(3)(iii) of this section and § 1.988-2(b)(7), at the rate applicable to accrued interest ($\$1.70 \times £30 = \51). Accordingly, Z's adjusted basis on December 31, 2006, immediately prior to maturity is \$1121.74 ($\$1082.38 + \$90.36 - \51).

(D) *Amount realized.* Even though Z receives £981.00 at maturity, for purposes of determining the amount realized, Z is treated under paragraph (b)(2)(v) of this section as receiving the projected amount of the contingent payment on December 31, 2006. Therefore, Z is treated as receiving £1086.20 on December 31, 2006. Under paragraph (b)(3)(iv) of this section, Z translates its amount realized into dollars and computes its gain or loss on the instrument (other than foreign currency gain or loss) by breaking the amount realized into its component parts. Accordingly, £20 of the £1086.20 (representing the interest accrued in the January-June 2005 accrual period, less £30 interest paid) is translated into dollars at the rate at which it was accrued ($£1 = \$1.10$), resulting in an amount realized of \$22; £21 of the £1086.20 (representing the interest accrued in the July-December 2005 accrual period, less £30 interest paid) is translated into dollars at the rate at which it was accrued ($£1 = \$1.30$), resulting in an amount realized of \$27.30; £22.05 of the £1086.20 (representing the interest accrued in the January-June 2006 accrual period, less £30 interest paid) is translated into dollars at the rate at which it was accrued ($£1 = \$1.50$), resulting in an amount realized of \$33.08; £23.15 of the £1086.20 (representing the interest accrued in the July 1-December 31, 2006 accrual period, less the £30 interest payment) is translated into dollars at the rate at which it was accrued ($£1 = \$1.70$), resulting in an amount realized of \$39.36; and £1000 (representing principal) is translated into dollars at the spot rate on the date the instrument was purchased ($£1 = \$1$), resulting in an amount realized of \$1000. Accordingly, Z's total amount realized is \$1121.74 ($\$22 + \$27.30 + \$33.08 + \$39.36 + \1000), the same as its basis, and Z recognizes no gain or loss (before consideration of foreign currency gain or loss) on retirement of the instrument.

(E) *Foreign currency gain or loss.* Z recognizes foreign currency gain with respect to each £30 payment actually received during 2006. These payments, however, are treated as payments of principal for this purpose because all 2006 accrued interest is reduced to zero by the net negative adjustment. See paragraph (b)(5)(iv)(A)(3) of this section. The amount of foreign currency gain in each case is determined, under paragraph (b)(5)(iii) of this section, by reference to the difference

between the spot rate on the date the £30 payment is made and the spot rate on the date the debt instrument was issued. Accordingly, Z recognizes \$18 of foreign currency gain on the January-June 2006 interest payment [$£30 \times (\$1.60 - \$1.00)$], and \$24 of foreign currency gain on the July-December 2006 interest payment [$£30 \times (\$1.80 - \$1.00)$]. Z separately recognizes foreign currency gain with respect to the consideration actually received at maturity, £981.00. The amount of such gain is determined based on the difference between the spot rate on the date the instrument matures and the rates at which the principal and interest were taken into account. With respect to the portion of the payment attributable to interest accrued in January-June 2005 (other than the £30 payments), the foreign currency gain is \$14 [$£20 \times (\$1.80 - \$1.10)$]. With respect to the portion of the payment attributable to interest accrued in July-December 2005 (other than the £30 payments), the foreign currency gain is \$10.50 [$£21 \times (\$1.80 - \$1.30)$]. With respect to the portion of the payment attributable to interest accrued in 2006 (other than the £30 payments), no foreign currency gain or loss is recognized under paragraph (b)(5)(ii) of this section because such interest was reduced to zero by the net negative adjustment. With respect to the portion of the payment attributable to principal, the foreign currency gain is \$752 [$£940 \times (\$1.80 - \$1.00)$]. Thus, Z recognizes a foreign currency gain of \$42 on receipt of the two £30 payments in 2006, and \$776.50 ($\$14 + \$10.50 + \752) on receipt of the payment at maturity, for a total 2006 foreign currency gain of \$818.50.

(F) *Source.* Under paragraph (b)(6) of this section and § 1.988-4, Z's foreign currency gain of \$818.50 is sourced by reference to Z's residence and is therefore from sources within the United States.

Example 4. Purchase price greater than adjusted issue price. (i) *Facts.* On July 1, 2005, Z, a calendar year U.S. resident taxpayer whose functional currency is the U.S. dollar, purchases a debt instrument with a non-currency contingency for £1405. All payments of principal and interest with respect to the instrument are denominated in, or determined by reference to, a single nonfunctional currency (the British pound). The debt instrument would be subject to § 1.1275-4(b) if it were denominated in dollars. The debt instrument was originally issued by a foreign corporation on December 31, 2003, for an issue price of £1000, and matures on December 31, 2006. The debt instrument's comparable yield, determined in British pounds under §§ 1.988-2(b)(2) and 1.1275-4(b), is 10.25 percent, compounded semiannually, and the projected payment schedule for the debt instrument (determined as of the issue date under the rules of § 1.1275-4(b)) provides for a single payment at maturity of £1349.70 (consisting of a noncontingent payment of £1000

and a projected payment of £349.70). At the time of the purchase, the adjusted issue price of the debt instrument is £1161.76, assuming semiannual accrual periods ending on June 30 and December 31 of each year. The increase in the value of the debt instrument over its adjusted issue price is due to an increase in the expected amount of the contingent payment. The debt instrument is a capital asset in the hands of Z. Z does not elect to use the spot-rate convention described in § 1.988-2(b)(2)(iii)(B). The payment actually made on December 31, 2006, is £1400. The relevant pound/dollar spot rates over the term of the instrument are as follows:

| Date | Spot rate
(pounds to dollars) |
|---------------------|----------------------------------|
| July 1, 2005 | £1.00 = \$1.00 |
| Dec. 31, 2006 | £1.00 = \$2.00 |

| Accrual period | Average rate
(pounds to dollars) |
|----------------------------|-------------------------------------|
| July 1–Dec. 31, 2005 | £1.00 = \$1.50 |
| Jan. 1–June 30, 2006 | £1.00 = \$1.50 |
| July 1–Dec. 31, 2006 | £1.00 = \$1.50 |

(ii) *Initial basis.* Under paragraph (b)(7)(ii) of this section, Z's initial basis in the debt instrument is \$1405, Z's purchase price of £1405, translated into functional currency at the spot rate on the date the debt instrument was purchased ($£1 = \$1$).

(iii) *Allocation of purchase price differential.* Z purchased the debt instrument for £1405 when its adjusted issue price was £1161.76. Under paragraph (b)(7)(iii) of this section, Z allocates the £243.24 excess of purchase price over adjusted issue price to the contingent payment at maturity. This allocation is reasonable because the excess is due to an increase in the expected amount of the contingent payment and not, for example, to a decrease in prevailing interest rates.

(iv) *Treatment in 2005—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £59.54 of interest on the debt instrument for the July-December 2005 accrual period (issue price of $£1161.76 \times 10.25$ percent/2). Under paragraph (b)(3)(i) of this section, Z translates the £59.54 of interest at the average exchange rate for the accrual period ($\$1.50 \times £59.54 = \89.31). Accordingly, Z has interest income in 2005 of \$89.31.

(B) *Adjusted issue price and basis.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued in July-December 2005. Thus, on January 1, 2006, the adjusted issue price of the debt instrument is

£1221.30 (£1161.76 + £59.54). For purposes of determining Z's dollar basis in the debt instrument on January 1, 2006, the \$1405 basis is increased by the \$59.54 of accrued interest, translated at the rate at which interest was accrued for the July-December 2005 accrual period. Paragraph (b)(3)(iii) of this section. Accordingly, Z's adjusted basis in the instrument, as of January 1, 2006, is \$1494.31 [\$1405 + (£59.54 × \$1.50)].

(v) *Treatment in 2006*—(A) *Determination of accrued interest*. Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £62.59 of interest on the debt instrument for the January-June 2006 accrual period (issue price of £1221.30 × 10.25 percent/2). Under paragraph (b)(3)(i) of this section, Z translates the £62.59 of accrued interest at the average exchange rate for the accrual period ($\$1.50 \times £62.59 = \93.89). Similarly, Z accrues £65.80 of interest in the July-December 2006 accrual period [(£1221.30 + £62.59) × 10.25 percent/2], which is translated at the average exchange rate for the accrual period ($\$1.50 \times £65.80 = \98.70). Accordingly, Z accrues £128.39, or \$192.59, of interest income in 2006.

(B) *Effect of positive and negative adjustments*—(1) *Offset of positive adjustment*. The payment actually made on December 31, 2006, is £1400, rather than the projected £1349.70. Under paragraph (b)(2)(ii) of this section, Z has a positive adjustment of £50.30 on December 31, 2006, attributable to the difference between the amount of the actual payment and the amount of the projected payment. Under paragraph (b)(7)(iii) of this section, however, Z also has a negative adjustment of £243.24, attributable to the excess of Z's purchase price for the debt instrument over its adjusted issue price. Accordingly, Z will have a net negative adjustment of £192.94 (£50.30 - £243.24 = £192.94) for 2006.

(2) *Offset of accrued interest*. Z's accrued interest income of £128.39 in 2006 is reduced to zero by the net negative adjustment. The net negative adjustment which reduces the current year's interest is not translated into functional currency. Under paragraph (b)(2)(ii) of this section, Z treats the remaining £64.55 net negative adjustment as an ordinary loss to the extent of the £59.54 previously accrued interest in 2005. This £59.54 ordinary loss is attributable to interest accrued but not paid in the preceding year. Therefore, under paragraph (b)(3)(ii)(B)(2) of this section, Z translates the loss into dollars at the average rate for such year (£1 = \$1.50). Accordingly, Z has an ordinary loss of \$89.31 in 2006. The remaining £5.01 of net negative adjustment is a negative adjustment carryforward under paragraph (b)(2)(ii) of this section.

(C) *Adjusted issue price and basis*—(1) *January-June accrual period*. Under paragraph (b)(2)(iii) of this section, the adjusted issue price of the debt instrument on July 1, 2006,

is £1283.89 (£1221.30 + £62.59 = £1283.89). Under paragraphs (b)(2)(iv) and (b)(3)(iii) of this section, Z's adjusted basis as of July 1, 2006, is \$1588.20 (\$1494.31 + \$93.89).

(2) *July-December accrual period*. Based on the projected payment schedule, the adjusted issue price of the debt instrument immediately before the payment at maturity is £1349.70 (£1283.89 + £65.80 accrued interest for July-December). Z's adjusted basis in dollars, based only on the noncontingent payments and the projected amount of the contingent payments to be received, is \$1686.90 (\$1588.20 plus \$98.70 of accrued interest for July-December).

(3) *Adjustment to basis upon contingent payment*. Under paragraph (b)(7)(iii) of this section, Z's adjusted basis in the debt instrument is reduced at maturity by £243.24, the excess of Z's purchase price for the debt instrument over its adjusted issue price. For this purpose, the adjustment is translated into functional currency at the spot rate on the date the instrument was acquired (£1 = \$1). Accordingly, Z's adjusted basis in the debt instrument at maturity is \$1443.66 (\$1686.90 - \$243.24).

(D) *Amount realized*. Even though Z receives £1400 at maturity, for purposes of determining the amount realized, Z is treated under paragraph (b)(2)(v) of this section as receiving the projected amount of the contingent payment on December 31, 2006, reduced by the amount of Z's negative adjustment carryforward of £5.01. Therefore, Z is treated as receiving £1344.69 (£1349.70 - £5.01) on December 31, 2006. Under paragraph (b)(3)(iv) of this section, Z translates its amount realized into dollars and computes its gain or loss on the instrument (other than foreign currency gain or loss) by breaking the amount realized into its component parts. Accordingly, £59.54 of the £1344.69 (representing the interest accrued in 2005) is translated at the rate at which it was accrued (£1 = \$1.50), resulting in an amount realized of \$89.31; £62.59 of the £1344.69 (representing the interest accrued in January-June 2006) is translated into dollars at the rate at which it was accrued (£1 = \$1.50), resulting in an amount realized of \$93.89; £65.80 of the £1344.69 (representing the interest accrued in July-December 2006) is translated into dollars at the rate at which it was accrued (£1 = \$1.50), resulting in an amount realized of \$98.70; and £1156.76 of the £1344.69 (representing a return of principal) is translated into dollars at the spot rate on the date the instrument was purchased (£1 = \$1), resulting in an amount realized of \$1156.76. Z's amount realized is \$1438.66 (\$89.31 + \$93.89 + \$98.70 + \$1156.76), and Z recognizes a capital loss (before consideration of foreign currency gain or loss) of \$5 on retirement of the instrument (\$1438.66 - \$1443.66 = -\$5).

(E) *Foreign currency gain or loss*. Z recognizes foreign currency gain under section 988

on the instrument with respect to the entire consideration actually received at maturity, £1400. While foreign currency gain or loss ordinarily would not have arisen with respect to £50.30 of the £1400, which was initially treated as a positive adjustment in 2006, the larger negative adjustment in 2006 reduced this positive adjustment to zero. Accordingly, foreign currency gain or loss is recognized with respect to the entire £1400. Under paragraph (b)(5)(ii) of this section, however, no foreign currency gain or loss is recognized with respect to unpaid accrued interest reduced to zero by the net negative adjustment resulting in 2006, and no foreign currency gain or loss is recognized with respect to unpaid accrued interest from 2005, also reduced to zero by the ordinary loss. Therefore, the entire £1400 is treated as a return of principal for the purpose of determining foreign currency gain or loss, and Z recognizes a total foreign currency gain on December 31, 2001, of $£1400 [£1400 \times (\$2.00 - \$1.00)]$.

(F) *Source.* Z has an ordinary loss of \$89.31, a capital loss of \$5, and a foreign currency gain of \$1400. Under paragraph (b)(6) of this section and § 1.1275-4(b)(9)(iv), the \$89.31 ordinary loss generally reduces Z's foreign source passive income under section 904(d) and the regulations thereunder. Under paragraph (b)(6) of this section and § 1.865-1(b)(2), the \$5 capital loss is sourced by reference to how interest income on the instrument would have been sourced. Therefore, the \$5 capital loss generally reduces Z's foreign source passive income under section 904(d) and the regulations thereunder. Under paragraph (b)(6) of this section and § 1.988-4, Z's foreign currency gain of \$1400 is sourced by reference to Z's residence and is therefore from sources within the United States.

Example 5. Sale of an instrument with a negative adjustment carryforward. (i) *Facts.* On December 31, 2003, Z, a calendar year U.S. resident taxpayer whose functional currency is the U.S. dollar, purchases at original issue a debt instrument with non-currency contingencies for £1000. All payments of principal and interest with respect to the instrument are denominated in, or determined by reference to, a single nonfunctional currency (the British pound). The debt instrument would be subject to § 1.1275-4(b) if it were denominated in dollars. The debt instrument's comparable yield, determined in British pounds under §§ 1.988-2(b)(2) and 1.1275-4(b), is 10 percent, compounded annually, and the projected payment schedule for the debt instrument provides for payments of £310 on December 31, 2005 (consisting of a noncontingent payment of £50 and a projected amount of £260) and £990 on December 31, 2006 (consisting of a noncontingent payment of £940 and a projected amount of £50). The debt instrument is a capital asset in the hands of Z. Z does not elect to use the spot-rate convention described in § 1.988-2(b)(2)(iii)(B). The

payment actually made on December 31, 2005, is £50. On December 30, 2006, Z sells the debt instrument for £940. The relevant pound/dollar spot rates over the term of the instrument are as follows:

| Date | Spot rate
(pounds to dollars) |
|---------------------|----------------------------------|
| Dec. 31, 2003 | £1.00 = \$1.00 |
| Dec. 31, 2005 | £1.00 = \$2.00 |
| Dec. 30, 2006 | £1.00 = \$2.00 |

| Accrual period | Average rate
(pounds to dollars) |
|----------------------------|-------------------------------------|
| Jan. 1-Dec. 31, 2004 | £1.00 = \$2.00 |
| Jan. 1-Dec. 31, 2005 | £1.00 = \$2.00 |
| Jan. 1-Dec. 31, 2006 | £1.00 = \$2.00 |

(ii) *Treatment in 2004—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £100 of interest on the debt instrument for 2004 (issue price of £1000 × 10 percent). Under paragraph (b)(3)(i) of this section, Z translates the £100 at the average exchange rate for the accrual period ($\$2.00 \times £100 = \200). Accordingly, Z has interest income in 2004 of \$200.

(B) *Adjusted issue price and basis.* Under paragraphs (b)(2)(iii) and (iv) of this section, the adjusted issue price of the debt instrument determined in pounds and Z's adjusted basis in dollars in the debt instrument are increased by the interest accrued in 2004. Thus, on January 1, 2005, the adjusted issue price of the debt instrument is £1100. For purposes of determining Z's dollar basis in the debt instrument, the \$1000 basis ($\$1.00 \times £1000$ original cost basis) is increased by the £100 of accrued interest, translated at the rate at which interest was accrued for 2004. See paragraph (b)(3)(iii) of this section. Accordingly, Z's adjusted basis in the debt instrument as of January 1, 2005, is \$1200 ($\$1000 + \200).

(iii) *Treatment in 2005—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z's accrued interest for 2005 is £110 (adjusted issue price of £1100 × 10 percent). Under paragraph (b)(3)(i) of this section, the £110 of accrued interest is translated at the average exchange rate for the accrual period ($\$2.00 \times £110 = \220).

(B) *Effect of net negative adjustment.* The payment actually made on December 31, 2005, is £50, rather than the projected £310. Under paragraph (b)(2)(ii) of this section, Z has a net negative adjustment of £260 on December 31, 2005, attributable to the difference between the amount of the actual payment and the amount of the projected payment. Z's accrued interest income of £110 in 2005 is reduced to zero by the net negative adjustment. Under paragraph (b)(3)(ii)(B)(I) of this section, the net negative adjustment which

reduces the current year's interest is not translated into functional currency. Under paragraph (b)(2)(ii) of this section, Z treats the remaining £150 net negative adjustment as an ordinary loss to the extent of the £100 previously accrued interest in 2004. This £100 ordinary loss is attributable to interest accrued but not paid in the preceding year. Therefore, under paragraph (b)(3)(ii)(B)(2) of this section, Z translates the loss into dollars at the average rate for such year (£1 = \$2.00). Accordingly, Z has an ordinary loss of \$200 in 2005. The remaining £50 of net negative adjustment is a negative adjustment carryforward under paragraph (b)(2)(ii) of this section.

(C) *Adjusted issue price and basis.* Based on the projected payment schedule, the adjusted issue price of the debt instrument on January 1, 2006 is £900, *i.e.*, the adjusted issue price of the debt instrument on January 1, 2005 (£1100), increased by the interest accrued in 2005 (£110), and decreased by the projected amount of the December 31, 2005, payment (£310). See paragraph (b)(2)(iii) of this section. Z's adjusted basis on January 1, 2006 is Z's adjusted basis on January 1, 2005 (\$1200), increased by the functional currency amount of interest accrued in 2005 (\$220), and decreased by the amount of the payments made in 2005, based solely on the projected payment schedule, (£310). The amount of the projected payment is first attributable to the interest accrued in 2005 (£110), and then to the interest accrued in 2004 (£100), and the remaining amount to principal (£100). The interest component of the projected payment is translated into functional currency at the rates at which it was accrued, and the principal component of the projected payment is translated into functional currency at the spot rate on the date the instrument was issued. See paragraph (b)(3)(iii) of this section. Accordingly, Z's adjusted basis in the debt instrument, following the increase of adjusted basis for interest accrued in 2005 (\$1200 + \$220 = \$1420), is decreased by \$520 (\$220 + \$200 + \$100 = \$520). Z's adjusted basis on January 1, 2006 is therefore, \$900.

(D) *Foreign currency gain or loss.* Z will recognize foreign currency gain on the receipt of the £50 payment actually received on December 31, 2005. Based on paragraph (b)(5)(iv) of this section, the £50 payment is attributable to principal since the accrued unpaid interest was completely eliminated by the net negative adjustment. The amount of foreign currency gain is determined, under paragraph (b)(5)(iii) of this section, by reference to the difference between the spot rate on the date the £50 payment was made and the spot rate on the date the debt instrument was issued. Accordingly, Z recognizes \$50 of foreign currency gain on the £50 payment. [(\$2.00—\$1.00) × £50 = \$50]. Under paragraph (b)(6) of this section and § 1.988-4, Z's foreign currency gain of \$50 is sourced by ref-

erence to Z's residence and is therefore from sources within the United States.

(iv) *Treatment in 2006—(A) Determination of accrued interest.* Under paragraph (b)(2)(i) of this section, and based on the comparable yield, Z accrues £90 of interest on the debt instrument for 2006 (adjusted issue price of £900 × 10 percent). Under paragraph (b)(3)(i) of this section, Z translates the £90 at the average exchange rate for the accrual period (\$2.00 × £90 = \$180). Accordingly, prior to taking into account the 2005 negative adjustment carryforward, Z has interest income in 2006 of \$180.

(B) *Effect of net negative adjustment.* The £50 negative adjustment carryforward from 2005 is a negative adjustment for 2006. Since there are no other positive or negative adjustments, there is a £50 negative adjustment in 2006 which reduces Z's accrued interest income by £50. Accordingly, after giving effect to the £50 negative adjustment carryforward, Z will accrue \$80 of interest income. [(£90—£50) × \$2.00 = \$80]

(C) *Adjusted issue price.* Under paragraph (b)(2)(iii) of this section, the adjusted issue price of the debt instrument determined in pounds is increased by the interest accrued in 2006 (prior to taking into account the negative adjustment carryforward). Thus, on December 30, 2006, the adjusted issue price of the debt instrument is £990.

(D) *Adjusted basis.* For purposes of determining Z's dollar basis in the debt instrument, Z's \$900 adjusted basis on January 1, 2006, is increased by the accrued interest, translated at the rate at which interest was accrued for 2006. See paragraph (b)(3)(iii)(A) of this section. Note, however, that under paragraph (b)(3)(iii)(B) of this section the amount of accrued interest which is reduced as a result of the negative adjustment carryforward, *i.e.*, £50, is treated for purposes of this section as principal, and is translated at the spot rate on the date the instrument was issued, *i.e.*, £1.00 = \$1.00. Accordingly, Z's adjusted basis in the debt instrument as of December 30, 2006, is \$1030 (\$900 + \$50 + \$80).

(E) *Amount realized.* Z's amount realized in denomination currency is £940, *i.e.*, the amount of pounds Z received on the sale of the debt instrument. Under paragraph (b)(3)(iv)(B)(1) of this section, Z's amount realized is first translated by reference to the principal component of basis (including the amount which is treated as principal under paragraph (b)(3)(iii)(B) of this section) and then the remaining amount realized, if any, is translated by reference to the accrued unpaid interest component of adjusted basis. Thus, £900 of Z's amount realized is translated by reference to the principal component of adjusted basis. The remaining £40 of Z's amount realized is treated as principal under paragraph (b)(3)(iii)(B) of this section, and is also translated by reference to the

principal component of adjusted basis. Accordingly, Z's amount realized in functional currency is \$940. (No part of Z's amount realized is attributable to the interest accrued on the debt instrument.) Z realizes a loss of \$90 on the sale of the debt instrument (\$1030 basis—\$940 amount realized). Under paragraph (b)(4) of this section and § 1.1275-4(b)(8), \$80 of the loss is characterized as ordinary loss, and the remaining \$10 of loss is characterized as capital loss. Under §§ 1.988-6(b)(6) and 1.1275-4(b)(9)(iv) the \$80 ordinary loss is treated as a deduction that is definitely related to the interest income accrued on the debt instrument. Similarly, under §§ 1.988-6(b)(6) and 1.865-1(b)(2) the \$10 capital loss is also allocated to the interest income from the debt instrument.

(F) *Foreign currency gain or loss.* Z recognizes foreign currency gain with respect to the £940 he received on the sale of the debt instrument. Under paragraph (b)(5)(iv) of this section, the £940 Z received is attributable to principal (and the amount which is treated as principal under paragraph (b)(3)(iii)(B) of this section). Thus, Z recognizes foreign currency gain on December 31, 2006, of \$940. [$(\$2.00 - \$1.00) \times \text{£}940$]. Under paragraph (b)(6) of this section and § 1.988-4, Z's foreign currency gain of \$940 is sourced by reference to Z's residence and is therefore from sources within the United States.

(d) *Multicurrency debt instruments—(1) In general.* Except as provided in this paragraph (d), a multicurrency debt instrument described in paragraph (a)(1)(ii) or (iii) of this section shall be treated as an instrument described in paragraph (a)(1)(i) of this section and shall be accounted for under the rules of paragraph (b) of this section. Because payments on an instrument described in paragraph (a)(1)(ii) or (iii) of this section are denominated in, or determined by reference to, more than one currency, the issuer and holder or holders of the instrument are required to determine the denomination currency of the instrument under paragraph (d)(2) of this section before applying the rules of paragraph (b) of this section.

(2) *Determination of denomination currency—(i) In general.* The denomination currency of an instrument described in paragraph (a)(1)(ii) or (iii) of this section shall be the predominant currency of the instrument. Except as otherwise provided in paragraph (d)(2)(ii) of this section, the predominant currency of the instrument shall be the currency with the greatest value determined by

comparing the functional currency value of the noncontingent and projected payments denominated in, or determined by reference to, each currency on the issue date, discounted to present value (in each relevant currency), and translated (if necessary) into functional currency at the spot rate on the issue date. For this purpose, the applicable discount rate may be determined using any method, consistently applied, that reasonably reflects the instrument's economic substance. If a taxpayer does not determine a discount rate using such a method, the Commissioner may choose a method for determining the discount rate that does reflect the instrument's economic substance. The predominant currency is determined as of the issue date and does not change based on subsequent events (*e.g.*, changes in value of one or more currencies).

(ii) *Difference in discount rate of greater than 10 percentage points.* This § 1.988-6(d)(2)(ii) applies if no currency has a value determined under paragraph (d)(2)(i) of this section that is greater than 50% of the total value of all payments. In such a case, if the difference between the discount rate in the denomination currency otherwise determined under (d)(2)(i) of this section and the discount rate determined under paragraph (d)(2)(i) of this section with respect to any other currency in which payments are made (or determined by reference to) pursuant to the instrument is greater than 10 percentage points, then the Commissioner may determine the predominant currency under any reasonable method.

(3) *Issuer/holder consistency.* The issuer determines the denomination currency under the rules of paragraph (d)(2) of this section and provides this information to the holders of the instrument in a manner consistent with the issuer disclosure rules of § 1.1275-2(e). If the issuer does not determine the denomination currency of the instrument, or if the issuer's determination is unreasonable, the holder of the instrument must determine the denomination currency under the rules of paragraph (d)(2) of this section. A holder that determines the denomination currency itself must explicitly disclose this fact on a statement attached to

the holder's timely filed federal income tax return for the taxable year that includes the acquisition date of the instrument.

(4) *Treatment of payments in currencies other than the denomination currency.* For purposes of applying the rules of paragraph (b) of this section to debt instruments described in paragraph (a)(1)(ii) or (iii) of this section, payments not denominated in (or determined by reference to) the denomination currency shall be treated as non-currency-related contingent payments. Accordingly, if the denomination currency of the instrument is determined to be the taxpayer's functional currency, the instrument shall be accounted for under §1.1275-4(b) rather than under this section.

(e) *Instruments issued for nonpublicly traded property—(1) Applicability.* This paragraph (e) applies to debt instruments issued for nonpublicly traded property that would be described in paragraph (a)(1)(i), (ii), or (iii) of this section, but for the fact that such instruments are described in §1.1275-4(c)(1) rather than §1.1275-4(b)(1). For example, this paragraph (e) generally applies to a contingent payment debt instrument denominated in a nonfunctional currency that is issued for nonpublicly traded property. Generally the rules of §1.1275-4(c) apply except as set forth by the rules of this paragraph (e).

(2) *Separation into components.* An instrument described in this paragraph (e) is not accounted for using the noncontingent bond method of §1.1275-4(b) and paragraph (b) of this section. Rather, the instrument is separated into its component payments. Each noncontingent payment or group of noncontingent payments which is denominated in a single currency shall be considered a single component treated as a separate debt instrument denominated in the currency of the payment or group of payments. Each contingent payment shall be treated separately as provided in paragraph (e)(4) of this section.

(3) *Treatment of components consisting of one or more noncontingent payments in the same currency.* The issue price of each component treated as a separate debt instrument which consists of one or more noncontingent payments is the sum of the present values of the non-

contingent payments contained in the separate instrument. The present value of any noncontingent payment shall be determined under §1.1274-2(c)(2), and the test rate shall be determined under §1.1274-4 with respect to the currency in which each separate instrument is considered denominated. No interest payments on the separate debt instrument are qualified stated interest payments (within the meaning of §1.1273-1(c)) and the *de minimis* rules of section 1273(a)(3) and §1.1273-1(d) do not apply to the separate debt instrument. Interest income or expense is translated, and exchange gain or loss is recognized on the separate debt instrument as provided in §1.988-2(b)(2), if the instrument is denominated in a nonfunctional currency.

(4) *Treatment of components consisting of contingent payments—(i) General rule.* A component consisting of a contingent payment shall generally be treated in the manner provided in §1.1275-4(c)(4). However, except as provided in paragraph (e)(4)(ii) of this section, the test rate shall be determined by reference to the U.S. dollar unless the dollar does not reasonably reflect the economic substance of the contingent component. In such case, the test rate shall be determined by reference to the currency which most reasonably reflects the economic substance of the contingent component. Any amount received in nonfunctional currency from a component consisting of a contingent payment shall be translated into functional currency at the spot rate on the date of receipt. Except in the case when the payment becomes fixed more than six months before the payment is due, no foreign currency gain or loss shall be recognized on a contingent payment component.

(ii) *Certain delayed contingent payments—(A) Separate debt instrument relating to the fixed component.* The rules of §1.1275-4(c)(4)(iii) shall apply to a contingent component the payment of which becomes fixed more than 6 months before the payment is due. For this purpose, the denomination currency of the separate debt instrument relating to the fixed payment shall be the currency in which payment is to be

§ 1.989(a)-1

26 CFR Ch. I (4-1-23 Edition)

made and the test rate for such separate debt instrument shall be determined in the currency of that instrument. If the separate debt instrument relating to the fixed payment is denominated in nonfunctional currency, the rules of § 1.988-2(b)(2) shall apply to that instrument for the period beginning on the date the payment is fixed and ending on the payment date.

(B) *Contingent component.* With respect to the contingent component, the issue price considered to have been paid by the issuer to the holder under § 1.1275-4(c)(4)(iii)(A) shall be translated, if necessary, into the functional currency of the issuer or holder at the spot rate on the date the payment becomes fixed.

(5) *Basis different from adjusted issue price.* The rules of § 1.1275-4(c)(5) shall apply to an instrument subject to this paragraph (e).

(6) *Treatment of a holder on sale, exchange, or retirement.* The rules of § 1.1275-4(c)(6) shall apply to an instrument subject to this paragraph (e).

(f) *Rules for nonfunctional currency tax exempt obligations described in § 1.1275-4(d)*—(1) *In general.* Except as provided in paragraph (f)(2) of this section, section 1.988-6 shall not apply to a debt instrument the interest on which is excluded from gross income under section 103(a).

(2) *Operative rules.* [Reserved]

(g) *Effective date.* This section shall apply to debt instruments issued on or after October 29, 2004.

[T.D. 9157, 69 FR 52819, Aug. 30, 2004]

§ 1.989(a)-1 Definition of a qualified business unit.

(a) *Applicability*—(1) *In general.* This section provides rules relating to the definition of the term “qualified business unit” (QBU) within the meaning of section 989.

(2) *Effective date.* These rules shall apply to taxable years beginning after December 31, 1986. However, any person may apply on a consistent basis § 1.989(a)-1T (c) of the Temporary Income Tax Regulations in lieu of § 1.989(a)-1 (c) to all taxable years beginning after December 31, 1986, and on or before February 5, 1990. For the text of the temporary regulation, see 53 FR 20612 (June 8, 1988).

(b) *Definition of a qualified business unit*—(1) *In general.* A QBU is any separate and clearly identified unit of a trade or business of a taxpayer provided that separate books and records are maintained.

(2) *Application of the QBU definition*—(i) *Persons*—(A) *Corporations.* A corporation is a QBU.

(B) *Individuals.* An individual is not a QBU.

(C) *Partnerships.* A partnership, other than a section 987 aggregate partnership as defined in § 1.987-1(b)(5), is a QBU.

(D) *Trusts and estates.* A trust or estate is a QBU of a beneficiary.

(ii) *Activities.* Activities of a corporation, partnership, trust, estate, or individual qualify as a QBU if—

(A) The activities constitute a trade or business; and

(B) A separate set of books and records is maintained with respect to the activities.

(3) *Special rule.* Any activity (whenever conducted and regardless of its frequency) that produces income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States shall be treated as a separate QBU, provided the books and records requirement of paragraph (d)(2) of this section is satisfied.

(4) *Effective/applicability date.* Generally, the revisions to paragraph (b)(2)(i) of this section shall apply to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. If pursuant to § 1.987-11(b) a taxpayer applies §§ 1.987-1 through 1.987-11 beginning in a taxable year prior to the earliest taxable year described in § 1.987-11(a), then the effective date of the revisions to paragraph (b)(2)(i) of this section with respect to the taxpayer shall apply to taxable years of the taxpayer beginning on or after the first day of such prior taxable year.

(c) *Trade or business.* The determination as to whether activities constitute a trade or business is ultimately dependent upon an examination of all the facts and circumstances. Generally, a trade or business for purposes of section 989(a) is a specific unified group of activities that constitutes (or could

constitute) an independent economic enterprise carried on for profit, the expenses related to which are deductible under section 162 or 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes). To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. Such group of activities must ordinarily include the collection of income and the payment of expenses. It is not necessary that the activities carried out by a QBU constitute a different trade or business from those carried out by other QBUs of the taxpayer. A vertical, functional, or geographic division of the same trade or business may be a trade or business for this purpose provided that the activities otherwise qualify as trade or business under this paragraph (c). However, activities that are merely ancillary to a trade or business will not constitute a trade or business under this paragraph (c). Activities of an individual as an employee are not considered by themselves to constitute a trade or business under this paragraph (c).

(d) *Separate books and records*—(1) *General rule.* Except as provided in paragraph (d)(2) of this section, a separate set of books and records shall include books of original entry and ledger accounts, both general and subsidiary, or similar records. For example, in the case of a taxpayer using the cash receipts and disbursements method of accounting, the books of original entry include a cash receipts and disbursements journal where each receipt and each disbursement is recorded. Similarly, in the case of a taxpayer using an accrual method of accounting, the books of original entry include a journal to record sales (accounts receivable) and a journal to record expenses incurred (accounts payable). In general, a journal represents a chronological account of all transactions entered into by an entity for an accounting period. A ledger account, on the other hand, chronicles the impact during an accounting period of the specific transactions recorded in the journal for that period upon the various items shown on the entity's balance sheet

(i.e., assets, liabilities, and capital accounts) and income statement (i.e., revenues and expenses).

(2) *Special rule.* For purposes of paragraph (b)(3) of this section, books and records include books and records used to determine income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States.

(3) *Proper reflection on the books of the taxpayer or qualified business unit.* The principles of §1.987-2(b) shall apply in determining whether an asset, liability, or item of income or expense is reflected on the books of a qualified business unit (and therefore is attributable to such unit).

(4) *Effective/applicability date.* Generally, the revisions to paragraph (d)(3) of this section shall apply to taxable years beginning on or after one year after the first day of the first taxable year following December 7, 2016. If pursuant to §1.987-11(b) a taxpayer applies §§1.987-1 through 1.987-11 beginning in a taxable year prior to the earliest taxable year described in §1.987-11(a), then the revisions to paragraph (b)(2)(i) of this section shall apply with respect to taxable years of the taxpayer beginning on or after the first day of such prior taxable year.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Corporation X is a domestic corporation. Corporation X manufactures widgets in the U.S. for export. Corporation X sells widgets in the United Kingdom through a branch office in London. The London office has its own employees and solicits and processes orders. Corporation X maintains in the U.S. a separate set of books and records for all transactions conducted by the London office. Corporation X is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. The London branch office is a QBU under paragraph (b)(2)(ii) of this section because (1) the sale of widgets is a trade or business as defined in paragraph (c) of this section; and (2) a complete and separate set of books and records (as described in paragraph (d) of this section) is maintained with respect to its sales operations.

Example 2. A domestic corporation incorporates a wholly-owned subsidiary in Switzerland. The domestic corporation is a manufacturer that markets its product abroad primarily through the Swiss subsidiary. To facilitate sales of the parent's product in Europe, the Swiss subsidiary has branch offices

in France and West Germany that are responsible for all marketing operations in those countries. Each branch has its own employees, solicits and processes orders, and maintains a separate set of books and records. The domestic corporation and the Swiss subsidiary are both QBUs under paragraph (b)(2)(i) of this section because of their corporate status. The French and West German branches are QBUs of the Swiss subsidiary. They satisfy paragraph (b)(2)(ii) because each constitutes a trade or business (as defined in paragraph (c) of this section) and because separate sets of books and records (as described in paragraph (d) of this section) of their respective operations is maintained. Each branch is considered to have a trade or business although each is a geographical division of the same trade or business.

Example 3. W is a domestic corporation that manufactures product X in the United States for sale worldwide. All of W's sales functions are conducted exclusively in the United States. W employs individual Q to work in France. Q's sole function is to act as a courier to deliver sales documents to customers in France. With respect to Q's activities in France, a separate set of books and records as described in paragraph (d) is maintained. Under paragraph (c) of this section, Q's activities in France do not constitute a QBU since they are merely ancillary to W's manufacturing and selling business. Q is not considered to have a QBU because an individual's activities as an employee are not considered to constitute a trade or business of the individual under paragraph (c).

Example 4. The facts are the same as in example (3) except that the courier function is the sole activity of a wholly-owned French subsidiary of W. Under paragraph (b)(2)(i) of this section, the French subsidiary is considered to be a QBU.

Example 5. A corporation incorporated in the Netherlands is a subsidiary of a domestic corporation and a holding company for the stock of one or more subsidiaries incorporated in other countries. The Dutch corporation's activities are limited to paying its directors and its administrative expenses, receiving capital contributions from its United States parent corporation, contributing capital to its subsidiaries, receiving dividend distributions from its subsidiaries, and distributing dividends to its domestic parent corporation. Under paragraph (b)(2)(i) of this section, the Netherlands corporation is considered to be a QBU.

Example 6. Taxpayer A, an individual resident of the United States, is engaged in a trade or business wholly unrelated to any type of investment activity. A also maintains a portfolio of foreign currency-denominated investments through a foreign broker. The broker is responsible for all activities necessary to the management of A's invest-

ments and maintains books and records as described in paragraph (d) of this section, with respect to all investment activities of A. A's investment activities qualify as a QBU under paragraph (b)(2)(ii) of this section to the extent the activities engaged in by A generate expenses that are deductible under section 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes).

Example 7. Taxpayer A, an individual resident of the United States, is the sole shareholder of foreign corporation (FC) whose activities are limited to trading in stocks and securities. FC is a QBU under paragraph (b)(2)(i) of this section.

Example 8. Taxpayer A, an individual resident of the United States, markets and sells in Spain and in the United States various products produced by other United States manufacturers. A has an office and employs a salesman to manage A's activities in Spain, maintains a separate set of books and records with respect to his activities in Spain, and is engaged in a trade or business as defined in paragraph (c) of this section. Therefore, under paragraph (b)(2)(ii) of this section, the activities of A in Spain are considered to be a QBU.

Example 9. Foreign corporation FX is incorporated in Mexico and is wholly owned by a domestic corporation. The domestic corporation elects to treat FX as a domestic corporation under section 1504(d). FX operates entirely in Mexico and maintains a separate set of books and records with respect to its activities in Mexico. FX is a QBU under paragraph (b)(2)(i) of this section. The activities of FX in Mexico also constitute a QBU under paragraph (b)(2)(ii) of this section.

Example 10. F, a foreign corporation, computes a gain of \$100 from the disposition of a United States real property interest (as defined in section 897(c)). The gain is taken into account as if F were engaged in a trade or business in the United States and as if such gain were effectively connected with such trade or business. F is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. F's disposition activity constitutes a separate QBU under paragraph (b)(3) of this section.

[T.D. 8279, 55 FR 284, Jan. 4, 1990, as amended by T.D. 9794, 81 FR 88851, Dec. 8, 2016]

§ 1.989(b)-1 Definition of weighted average exchange rate.

For purposes of section 989(b)(3) and (4), the term "weighted average exchange rate" means the simple average of the daily exchange rates (determined by reference to a qualified source of exchange rates described in § 1.988-1(d)(1)), excluding weekends,

holidays and any other nonbusiness days for the taxable year.

[T.D. 8263, 54 FR 38664, Sept. 20, 1989. Redesignated by T.D. 8367, 56 FR 48437, Sept. 25, 1991; 57 FR 6060, Feb. 18, 1992; T.D. 9452, 74 FR 27890, June 11, 2009]

DOMESTIC INTERNATIONAL SALES
CORPORATIONS

§ 1.991-1 Taxation of a domestic international sales corporation.

(a) *In general.* A corporation which is a DISC for a taxable year is not subject to any tax imposed by subtitle A of the Code (sections 1 through 1564) for such taxable year, except for the tax imposed by chapter 5 thereof (sections 1491 through 1494) on certain transfers to avoid tax. Thus, for example, a corporation which is a DISC for a taxable year is not subject for such year to the corporate income tax (section 11), the minimum tax on tax preferences (sections 56 through 58), or the accumulated earnings tax (sections 531 through 537). A DISC is liable for the payment of all taxes payable by corporations under other subtitles of the Code, such as, for example, income taxes withheld at the source and other employment taxes under subtitle C and the interest equalization tax and other miscellaneous excise taxes imposed by subtitle D. In addition, a DISC is subject to the provisions of chapter 3 of subtitle A (including section 1461), relating to withholding of tax on non-resident aliens and foreign corporations and tax-free covenant bonds. See § 1.992-1 for the definition of the term "DISC."

(b) *Determination of taxable income—*

(1) *In general.* Although a DISC is not subject to tax under subtitle A of the Code (other than chapter 5 thereof), a DISC's taxable income shall be determined for each taxable year in order to determine, for example, the amount deemed distributed for that taxable year to its shareholders pursuant to § 1.995-2. Except as otherwise provided in the Code and the regulations thereunder, the taxable income of a DISC shall be determined in the same manner as if the DISC were a domestic corporation which had not elected to be treated as a DISC. Thus, for example, a DISC chooses its method of deprecia-

tion, inventory method, and annual accounting period in the same manner as if it were a corporation which had not elected to be treated as a DISC. Any elections affecting the determination of taxable income shall be made by the DISC. Thus, as a further example, a DISC which makes an installment sale described in section 453 is able to avail itself of the benefits of section 453: *Provided*, The DISC complies with the election requirements of such section. See § 1.995-2(e) and § 1.996-8 and the regulations thereunder for rules relating to the application for a taxable year of a DISC of a deduction under section 172 for a net operating loss carryback or carryover or of a capital loss carryback or carryover under section 1212.

(2) *Choice of method of accounting.* A DISC may, generally, choose any method of accounting permissible under section 446(c) and the regulations thereunder. However, if a DISC is a member of a controlled group (as defined in § 1.993-1(k)), the DISC may not choose a method of accounting which, when applied to transactions between the DISC and other members of the controlled group, will result in a material distortion of the income of the DISC or any other member of the controlled group. Such a material distortion of income would occur, for example, if a DISC chooses to use the cash method of accounting where the DISC acts as commission agent in a substantial volume of sales of property by a related corporation which uses the accrual method of accounting and which customarily pays commissions to the DISC more than 2 months after such sales. As a further example, a material distortion of income would occur if a DISC chooses to use the accrual method of accounting where the DISC leases a substantial amount of property from a related corporation which uses the cash method of accounting, if the DISC customarily accrues any portion of the rent on such property more than 2 months before the rent is paid. Changes in the method of accounting of a DISC are subject to the requirements of section 446(e) and the regulations thereunder.

(3) *Choice of annual accounting period—*(i) *In general.* A DISC may choose its annual accounting period without

regard to the annual accounting period of any of its stockholders. In general, changes in the annual accounting period of a DISC are subject to the requirements of section 442 and the regulations thereunder.

(ii) *Transition rule for change in taxable year in order to become a DISC.* A corporation may, without the consent of the Commissioner, change its annual accounting period and adopt a new taxable year beginning on the first day of any month in 1972: *Provided, That—*

(a) Such change has the effect of accelerating the time as of which such corporation can become a DISC,

(b) The Commissioner is notified of such change by means of a statement filed (with the regional service center with which such corporation files its election to be treated as a DISC) not later than the end of the period during which such corporation may file an election to be treated as a DISC for such new taxable year, and

(c) The short period required to effect such change is not a taxable year in which such corporation has a net operating loss as defined in section 172.

Thus, for example, if a corporation which uses the calendar year for its taxable year does not complete arrangements to become a DISC until May 15, 1972, such corporation can, pursuant to this subdivision, change its annual accounting period and adopt a taxable year beginning on the first day of any month in 1972 after May. A change to a new annual accounting period made pursuant to this subdivision is effective only if the corporation which makes such change qualifies as a DISC for such new period. A corporation may change its annual accounting period and adopt a new taxable year pursuant to this subdivision without regard to the provisions of § 1.1502-76 (relating to the taxable year of members of a group). A copy of the statement described in (b) of this subdivision shall be attached to the return of a corporation for the new taxable year to which such corporation changes pursuant to this subdivision. A corporation which changes its annual accounting period pursuant to this subparagraph will not be permitted under section 442 to change its annual accounting period at any time before 1982, ex-

cept with the consent of the Commissioner as provided in § 1.442-1(b)(1) or pursuant to subparagraph (4) of this paragraph.

(4) *Transition rule for change of taxable year of certain DISC's.* In the case of a DISC all of the shares of which are held by a single shareholder or by members of a group who file a consolidated return, such DISC may (without the consent of the Commissioner) change its annual accounting period and adopt a taxable year beginning in 1972 which is the same as the taxable year of such shareholder or the members of such group. A change to a new annual accounting period may be made by a DISC pursuant to this subparagraph even if such DISC has changed its annual accounting period pursuant to subparagraph (3)(ii) of this paragraph.

(5) *Transition rule for beginning of first taxable year of certain corporations.* If a corporation organized before January 1, 1972, neither acquires assets (other than cash or other property acquired as consideration for the issuance of stock) nor begins doing business prior to January 1, 1972, the first taxable year of such corporation is deemed to begin at the time such corporation acquires any asset (other than cash or other property acquired as consideration for the issuance of stock) or begins doing business, whichever is earlier: *Provided, That* such corporation is a DISC for such first taxable year. For purposes of § 1.6012-2(a), such corporation is treated as not coming into existence until the beginning of such first taxable year.

(c) *Effective date.* The provisions of this section and the regulations under sections 992 through 997 apply with respect to taxable years ending after December 31, 1971, except that a corporation may not be a DISC for any taxable year beginning before January 1, 1972.

(d) *Related statutes.* For rules relating to the transfer, during a taxable year beginning before January 1, 1976, to a DISC of assets of an export trade corporation (as defined in section 971), where a parent owns all the outstanding stock of both such DISC and such export trade corporation, see section 505(b) of the Revenue Act of 1971 (85 Stat. 551). For rules regarding limitations on the qualification of a corporation as an export trade corporation

for any taxable year beginning after October 31, 1971, see section 971(a)(3).

[T.D. 7323, 39 FR 34402, Sept. 25, 1974, as amended by T.D. 7854, 47 FR 51738, Nov. 17, 1982]

§ 1.992-1 Requirements of a DISC.

(a) *“DISC” defined.* The term “DISC” refers to a domestic international sales corporation. The term “DISC” means a corporation which, for a taxable year—

(1) Is duly incorporated and existing under the laws of any State or the District of Columbia,

(2) Satisfies the gross receipts test described in paragraph (b) of this section,

(3) Satisfies the assets test described in paragraph (c) of this section,

(4) Satisfies the capitalization requirement described in paragraph (d) of this section,

(5) Satisfies the requirement that an election to be treated as a DISC be in effect for such year, as described in paragraph (e) of this section,

(6) [Reserved]

(7) Maintains separate books and records, and

(8) Is not an ineligible corporation described in paragraph (f) of this section.

A corporation which satisfies the requirements described in subparagraphs (1) through (8) of this paragraph for a taxable year is treated as a separate corporation for Federal tax purposes and qualifies as a DISC, even though such corporation would not be treated (if it were not a DISC) as a corporate entity for Federal income tax purposes. An association cannot qualify as a DISC even if such association is taxable as a corporation pursuant to section 7701(a)(3). In addition, a corporation created or organized in, or under the law of, a possession of the United States cannot qualify as a DISC. The rules contained in this paragraph constitute a relaxation of the general rules of corporate substance otherwise applicable under the Code. The separate incorporation of a DISC is required under section 992(a)(1) to make it possible to keep a better record of the income which is subject to the special treatment provided by sections 991 through 996, but this does not necessitate in all

other respects the separate relationships which otherwise would be required between a parent corporation and its subsidiary. However, this relaxation of the general rules of corporate substance does not apply with respect to other corporations in other contexts. In the case of a transaction between a DISC and a person related to such DISC for purposes of section 482, see § 1.993-1(1) for rules for determining whether income is income of a DISC to which the intercompany pricing rules authorized by section 994 apply.

(b) *Gross receipts test.* In order for a corporation described in paragraph (a)(1) of this section to be a DISC for a taxable year, 95 percent or more of its gross receipts (as defined in § 1.993-6) for such year must consist of qualified export receipts (as defined in § 1.993-1). Gross receipts for a taxable year are determined in accordance with the method of accounting adopted by the corporation pursuant to § 1.991-1(b)(2). However, for rules regarding gross receipts in the case of a commission sale by such corporation, see § 1.993-6.

(c) *Assets test—(1) In general.* In order for a corporation described in paragraph (a)(1) of this section to be a DISC for a taxable year, the adjusted basis (determined under section 1011) of its qualified export assets at the close of such year must equal or exceed 95 percent of the sum of the adjusted bases (determined under section 1011) of all assets of such corporation at the close of such year.

(2) *Assets acquired to meet assets test.* For purposes of determining whether the requirements of subparagraph (1) of this paragraph are satisfied by a corporation at the end of a taxable year, an asset which is a qualified export asset is treated as not being an asset of such corporation at such time if such asset is held for a total of 60 days or less and is acquired directly or indirectly through borrowing, unless the acquisition of such asset is established to the satisfaction of the Commissioner or his delegate to have been for bona fide purposes. Such acquisition is deemed to have been for bona fide purposes if, for example, it is made in the usual course of the corporation's trade or business.

(d) *Capitalization requirement*—(1) *In general.* To qualify as a DISC for a taxable year, a corporation must have, on each day of that taxable year, only one class of stock. The par value (or, in the case of stock without par value, the stated value) of the corporation's outstanding stock must be on each day of the taxable year at least \$2,500. In the case of a corporation which elects to be treated as a DISC for its first taxable year, the requirements of this paragraph (d)(1) are satisfied if the corporation has no more than one class of stock at any time during the year and if the par value (or, in the case of stock without par value, the stated value) of the corporation's outstanding stock is at least \$2,500 on the last day of the period within which the election must be made and on each succeeding day of the year. For purposes of this paragraph (d)(1), the stated value of shares is the aggregate amount of the consideration paid for such shares which is not allotted to paid in surplus, or other surplus. The law of the State of incorporation of the DISC determines what consideration may be used to capitalize the DISC. A corporation will not be a qualified DISC unless at least \$2,500 of valid consideration was used for this purpose. If a corporation has a realized or unrealized loss during a taxable year which results in the impairment of all or part of the capital required under this paragraph (d)(1), that impairment does not result in disqualification under this paragraph (d)(1), provided that the corporation does not take any legal or formal action under State law to reduce capital for that year below the amount required under this paragraph (d)(1).

(2) *Treatment of debt payable to shareholders*—(i) *In general.* Purported debt of a DISC payable to any person, whether or not such person is a shareholder or a member of a controlled group (as defined in § 1.993-1(k)) of which such DISC is a member, is treated as debt for all purposes of the Code, provided that such purported debt—

(a) Would qualify as debt for purposes of the Code if the DISC were a corporation which did not qualify as a DISC,

(b) Qualifies under subdivision (ii) of this subparagraph, or

(c) Are trade accounts payable described in subdivision (iii) of this subparagraph.

Such debt is not treated as stock, and interest payable by the DISC on such debt is treated as interest by both the DISC and the holder of such debt. Payment of the principal of such debt by a DISC does not constitute the payment of a dividend by such DISC. The provisions of this subparagraph apply for a taxable year of a DISC, even though debt described in this subparagraph would be treated as stock of the corporation if such corporation did not qualify as a DISC for such year.

(ii) *Safe harbor rule.* Purported debt of a DISC will in no event be treated as other than debt for purposes of subdivision (i) of this subparagraph if—

(a) It is a written obligation to pay a sum certain on or before a fixed maturity date,

(b) Interest is payable on such purported debt at an arm's length interest rate (as determined under § 1.482-2(a)(2)), expressed as a fixed dollar amount or a fixed percentage of principal,

(c) Such purported debt is not convertible into stock or into other purported debt unless such other purported debt qualifies under this subparagraph as debt of the DISC,

(d) Such purported debt does not confer voting rights upon its holder, except in the event of default thereon, and

(e) Interest and principal are paid in accordance with the terms of such purported debt or with any modification of such terms consistent with (a) through (d) of this subdivision.

The determination of whether purported debt of a DISC constitutes debt described in this subdivision is made without regard to the proportion of debt of the DISC held by any of its shareholders, to the ratio of the outstanding debt of the DISC to its equity, or to the amount of outstanding debt of such DISC. The provisions of (e) of this subdivision do not prevent the modification of the terms of debt of a DISC where, for example, a DISC becomes unable to make timely payments of principal required under such terms, provided that such modification

is consistent with (a) through (d) of this subdivision.

(iii) *Trade accounts payable.* Trade accounts payable of a DISC which arise in the normal course of its trade or business (such as in consideration for inventory or supplies) constitute debt of the DISC (whether or not such accounts payable are debt described in subdivision (i) (a) or (b) of this subparagraph), provided that such accounts are payable within 15 months after they arise. If such accounts are payable more than 15 months after they arise, they are debt of such DISC only if they are debt described in subdivision (i) (a) or (b) of this subparagraph.

(iv) *Relation of subparagraph to other corporations.* The provisions of this subparagraph generally constitute a relaxation of the ordinary rules used in determining whether purported debt of a corporation is debt or equity. This relaxation is in recognition of the principle that a corporation may qualify as a DISC even though it has relatively little capital. This relaxation does not apply with respect to purported debt of other corporations in other contexts. The provisions of subdivisions (i), (ii), and (iii) of this subparagraph apply only for taxable years for which a corporation qualifies (or is treated) as a DISC.

(3) *Classes of stock.* [Reserved]

(e) *Election in effect.* In order for a corporation to be a DISC for a taxable year, an election to be treated as a DISC must be made by such corporation pursuant to §1.992-2 and must be in effect for such taxable year. A corporation does not become or remain a DISC solely by making such an election. A corporation is a DISC for a taxable year only if such an election is in effect for that year and the corporation also satisfies the requirements of paragraphs (a) through (d) of this section. See §1.992-2 for rules regarding the time and manner of making such an election.

(f) *Ineligible corporations.* The following corporations shall not be eligible to be treated as a DISC—

(1) A corporation exempt from tax by reason of section 501,

(2) A personal holding company (as defined in section 542),

(3) A financial institution to which section 581 or 593 applies,

(4) An insurance company subject to the tax imposed by subchapter L,

(5) A regulated investment company (as defined in section 851(a)),

(6) A China Trade Act corporation receiving the special deduction provided in section 941(a), or

(7) An electing small business corporation (as defined in section 1371(b)).

(g) *Status as DISC after having filed return as a DISC.* Under section 992(a)(2), notwithstanding the failure of a corporation to meet the requirements of paragraph (a) of this section for a taxable year, such corporation will be treated as a DISC for purposes of the Code for such taxable year (and, thus, will not be able to claim that it is not eligible to be a DISC) if—

(1) Such corporation files a return as a DISC for such taxable year,

(2) Such corporation does not notify the district director, more than 30 days before the expiration of the period of limitation (including extensions thereof) on assessment for underpayment of tax for such taxable year (as determined under section 6501 and the regulations thereunder), that it is not a DISC for such taxable year, and

(3) The Internal Revenue Service has not issued, within such period of limitation (including extensions thereof) on assessment for underpayment of tax for such taxable year, a notice of deficiency based on a determination that such corporation is not a DISC for such taxable year.

A corporation is treated as a DISC, for all purposes, pursuant to the provisions of this paragraph for any taxable year for which it meets the requirements of this paragraph, even if such corporation is an ineligible corporation described in paragraph (f) of this section for such taxable year. Thus, for example, a corporation which is treated as a DISC for a taxable year pursuant to this paragraph is treated as a DISC for that taxable year for purposes of §1.992-2(e)(3) (relating to the termination of a DISC election if a corporation is not a DISC for each of any 5 consecutive taxable years). If a corporation is treated as a DISC for a taxable year pursuant to this paragraph,

persons who held stock of such corporation at any time during such taxable year are treated, with respect to such stock, as holders of stock in a DISC for the period or periods during which they held such stock within such taxable year.

(h) *Definition of "former DISC"*. Under section 992(a)(3), the term "former DISC" refers to a corporation which is not a DISC for a taxable year but which was (or was treated as) a DISC for a prior taxable year. However, a corporation is not a former DISC for a taxable year unless such corporation has, at the beginning of such taxable year, undistributed previously taxed income (as defined in § 1.996-3(c) or accumulated DISC income (as defined in § 1.996-3(b)). A corporation which is a former DISC for a taxable year is a former DISC for all purposes of the Code.

(Secs. 385 and 7805 of the Internal Revenue Code of 1954 (83 Stat. 613 and 68A Stat. 917; 26 U.S.C. 385 and 7805))

[T.D. 7323, 39 FR 34403, Sept. 25, 1974, as amended by T.D. 7420, 41 FR 20654, May 20, 1976; 41 FR 22267, June 2, 1976; T.D. 7747, 45 FR 86459, Dec. 31, 1980; T.D. 7920, 48 FR 50712, Nov. 3, 1983; T.D. 8371, 56 FR 55234, Oct. 25, 1991]

§ 1.992-2 Election to be treated as a DISC.

(a) *Manner and time of election*—(1) *Manner*—(i) *In general*. A corporation can elect to be treated as a DISC for a taxable year beginning after December 31, 1971. Except as provided in paragraph (a)(1)(ii) of this section, the election is made by the corporation filing Form 4876 with the service center with which it would file its income tax return if it were subject for such taxable year to all the taxes imposed by subtitle A of the Internal Revenue Code of 1954. The form shall be signed by any person authorized to sign a corporation return under section 6062, and shall contain the information required by such form. Except as provided in paragraphs (b)(3) and (c) of this section, such election to be treated as a DISC shall be valid only if the consent of every person who is a shareholder of the corporation as of the beginning of the first taxable year for which such election is effective is on or attached

to such Form 4876 when filed with the service center.

(ii) *Transitional rule for corporations electing during 1972*. If the first taxable year for which an election by a corporation to be treated as a DISC is a taxable year beginning after December 31, 1971, and on or before December 31, 1972, such election may be made either in the manner prescribed in subdivision (i) of this subparagraph or by filing, at the place prescribed in subdivision (i) of this subparagraph, a statement captioned "Election to be Treated as a DISC." Such statement of election shall be valid only if the consent of each shareholder is filed with the service center in the form, and at the time, prescribed in paragraph (b) of this section. Such statement shall be signed by any person authorized to sign a corporation return under section 6062 and shall include the name, address, and employer identification number (if known) of the corporation, the beginning date of the first taxable year for which the election is effective, the number of shares of stock of the corporation issued and outstanding as of the earlier of the beginning of the first taxable year for which the election is effective or the time the statement is filed, the number of shares held by each shareholder as of the earlier of such dates, and the date and place of incorporation. As a condition of the election being effective, a corporation which elects to become a DISC by filing a statement in accordance with this subdivision must furnish (to the service center with which the statement was filed) such additional information as is required by Form 4876 by March 31, 1973.

(2) *Time of making election*—(i) *In general*. In the case of a corporation making an election to be treated as a DISC for its first taxable year, such election shall be made within 90 days after the beginning of such taxable year. In the case of a corporation which makes an election to be treated as a DISC for any taxable year beginning after March 31, 1972 (other than the first taxable year of such corporation), the election shall be made during the 90-day period immediately preceding the first day of such taxable year.

(ii) *Transitional rules for certain corporations electing during 1972.* In the case of a corporation which makes an election to be treated as a DISC for a taxable year beginning after December 31, 1971, and on or before March 31, 1972 (other than its first taxable year), the election shall be made within 90 days after the beginning of such taxable year.

(b) *Consent by shareholders—(1) In general—(i) Time and manner of consent.* Under paragraph (a)(1)(i) of this section, subject to certain exceptions, the election to be treated as a DISC is not valid unless each person who is a shareholder as of the beginning of the first taxable year for which the election is effective signs either the statement of consent on Form 4876 or a separate statement of consent attached to such form. A shareholder's consent is binding on such shareholder and all transferees of his shares and may not be withdrawn after a valid election is made by the corporation. In the case of a corporation which files an election to become a DISC for a taxable year beginning after December 31, 1972, if a person who is a shareholder as of the beginning of the first taxable year for which the election is effective does not consent by signing the statement of consent set forth on Form 4876, such election shall be valid (except in the case of an extension of the time for filing granted under the provisions of subparagraph (3) of this paragraph or paragraph (c) of this section) only if the consent of such shareholder is attached to the Form 4876 upon which such election is made.

(ii) *Form of consent.* A consent other than the statement of consent set forth on Form 4876 shall be in the form of a statement which is signed by the shareholder and which sets forth (a) the name and address of the corporation and of the shareholder and (b) the number of shares held by each such shareholder as of the time the consent is made and (if the consent is made after the beginning of the corporation's taxable year for which the election is effective) as of the beginning of such year. If the consent is made by a recipient of transferred shares pursuant to paragraph (c) of this section, the statement of consent shall also set forth the

name and address of the person who held such shares as of the beginning of such taxable year and the number of such shares. Consent shall be made in the following form: "I (insert name of shareholder), a shareholder of (insert name of corporation seeking to make the election) consent to the election of (insert name of corporation seeking to make the election) to be treated as a DISC under section 992(b) of the Internal Revenue Code. The consent so made by me is irrevocable and is binding upon all transferees of my shares in (insert name of corporation seeking to make the election)." The consents of all shareholders may be incorporated in one statement.

(iii) *Who may consent.* Where stock of the corporation is owned by a husband and wife as community property (or the income from such stock is community property), or is owned by tenants in common, joint tenants, or tenants by the entirety, each person having a community interest in such stock or the income therefrom and each tenant in common, joint tenant, and tenant by the entirety must consent to the election. The consent of a minor shall be made by his legal guardian or by his natural guardian if no legal guardian has been appointed. The consent of an estate shall be made by the executor or administrator thereof. The consent of a trust shall be made by the trustee thereof. The consent of an estate or trust having more than one executor, administrator, or trustee, may be made by any executor, administrator, or trustee, authorized to make a return of such estate or trust pursuant to section 6012(b)(5). The consent of a corporation or partnership shall be made by an officer or partner authorized pursuant to section 6062 or 6063, as the case may be, to sign the return of such corporation or partnership. In the case of a foreign person, the consent may be signed by any individual (whether or not a U.S. person) who would be authorized under sections 6061 through 6063 to sign the return of such foreign person if he were a U.S. person.

(2) *Transitional rule for corporations electing during 1972.* In the case of a corporation which files an election to be treated as a DISC for a taxable year beginning after December 31, 1971, and on

or before December 31, 1972, such election shall be valid only if the consent of each person who is a shareholder as of the beginning of the first taxable year for which such election is effective is filed with the service center with which the election was filed within 90 days after the first day of such taxable year or within the time granted for an extension of time for filing such consent. The form of such consent shall be the same as that prescribed in subparagraph (1) of this paragraph. Such consent shall be attached to the statement of election or shall be filed separately (with such service center) with a copy of the statement of election. An extension of time for filing a consent may be granted in the manner, and subject to the conditions, described in subparagraph (3) of this paragraph.

(3) *Extension of time to consent.* An election which is timely filed and would be valid except for the failure to attach the consent of any shareholder to the Form 4876 upon which the election was made or to comply with the 90-day requirement in subparagraph (2) of this paragraph or paragraph (c)(1) of this section, as the case may be, will not be invalid for such reason if it is shown to the satisfaction of the service center that there was reasonable cause for the failure to file such consent, and if such shareholder files a proper consent to the election within such extended period of time as may be granted by the Internal Revenue Service. In the case of a late filing of a consent, a copy of the Form 4876 or statement of election shall be attached to such consent and shall be filed with the same service center as the election. The form of such consent shall be the same as that set forth in paragraph (b)(1)(ii) of this section. In no event can any consent be made pursuant to this paragraph on or after the last day of the first taxable year for which a corporation elects to be treated as a DISC.

(c) *Consent by holder of transferred shares*—(1) *In general.* If a shareholder of a corporation transfers—

(i) Prior to the first day of the first taxable year for which such corporation elects to be treated as a DISC, some or all of the shares held by him without having consented to such election, or

(ii) On or before the 90th day after the first day of the first taxable year for which such corporation elects to be treated as a DISC, some or all of the shares held by him as of the first day of such year (or if later, held by him as of the time such shares are issued) without having consented to such election, then consent may be made by any recipient of such shares on or before the 90th day after the first day of such first taxable year. If such recipient fails to file his consent on or before such 90th day, an extension of time for filing such consent may be granted in the manner, and subject to the conditions, described in paragraph (b)(3) of this section. In addition, if the transfer occurs more than 90 days after the first day of such taxable year, an extension of time for filing such consent may be granted to such recipient only if it is determined under paragraph (b)(3) of this section that an extension of time would have been granted the transferor for the filing of such consent if the transfer had not occurred. A consent which is not attached to the original Form 4876 or statement of election (as the case may be) shall be filed with the same service center as the original Form 4876 or statement of election and shall have attached a copy of such original form or statement of election. The form of such consent shall be the same as that set forth in paragraph (b)(1)(ii) of this section. For the purposes of this paragraph, a transfer of shares includes any sale, exchange, or other disposition, including a transfer by gift or at death.

(2) *Requirement for the filing of an amended Form 4876 or statement of election.* In any case in which a consent to a corporation's election to be treated as a DISC is made pursuant to subparagraph (1) of this paragraph, such corporation must file an amended Form 4876 or statement of election (as the case may be) reflecting all changes in ownership of shares. Such form must be filed with the same service center with which the original Form 4876 or statement of election was filed by such corporation.

(d) *Effect of election*—(1) *Effect on corporation.* A valid election to be treated as a DISC remains in effect (without

regard to whether the electing corporation qualifies as a DISC for a particular year) until terminated by any of the methods provided in paragraph (e) of this section. While such election is in effect, the electing corporation is subject to sections 991 through 997 and other provisions of the Code applicable to DISC's for any taxable year for which it qualifies as a DISC (or is treated as qualifying as a DISC pursuant to §1.992-1(g)). Such corporation is also subject to such provisions for any taxable year for which it is treated as a former DISC as a result of qualifying or being treated as a DISC for any taxable year for which such election was in effect.

(2) *Effect on shareholders.* A valid election by a corporation to be treated as a DISC subjects the shareholders of such corporation to the provisions of section 995 (relating to the taxation of the shareholders of a DISC or former DISC) and to all other provisions of the Code relating to the shareholders of a DISC or former DISC. Such provisions of the Code apply to any person who is a shareholder of a DISC or former DISC whether or not such person was a shareholder at the time the corporation elected to become a DISC.

(e) *Termination of election*—(1) *In general.* An election to be treated as a DISC is terminated only as provided in subparagraph (2) or (3) of this paragraph.

(2) *Revocation of election*—(i) *Manner of revocation.* An election by a corporation to be treated as a DISC may be revoked by the corporation for any taxable year of the corporation after the first taxable year for which the election is effective. Such revocation shall be made by the corporation filing a statement that the corporation revokes its election under section 992(b) to be treated as a DISC. Such statement shall indicate the corporation's name, address, employer identification number, and the first taxable year of the corporation for which the revocation is to be effective. The statement shall be signed by any person authorized to sign a corporation return under section 6062. Such revocation shall be filed with the service center with which the corporation filed its election, except that, if it filed an annual

information return under section 6011(e)(2), the revocation shall be filed with the service center with which it filed its last such return.

(ii) *Years for which revocation is effective.* If a corporation files a statement revoking its election to be treated as a DISC during the first 90 days of a taxable year (other than the first taxable year for which such election is effective), such revocation will be effective for such taxable year and all taxable years thereafter. If the corporation files a statement revoking its election to be treated as a DISC after the first 90 days of a taxable year, the revocation will be effective for all taxable years following such taxable year.

(3) *Continued failure to be a DISC.* If a corporation which has elected to be treated as a DISC does not qualify as a DISC (and is not treated as a DISC pursuant to §1.992-1(g)) for each of any 5 consecutive taxable years, such election terminates and will not be effective for any taxable year after such fifth taxable year. Such termination will be effective automatically, without notice to such corporation or to the Internal Revenue Service. If, during any 5-year period for which an election is effective, the corporation should qualify as a DISC (or be treated as a DISC pursuant to §1.992-1(g)) for a taxable year, a new 5-year period shall automatically start at the beginning of the following taxable year.

(4) *Election after termination.* If a corporation has made a valid election to be treated as a DISC and such election terminates in either manner described in subparagraph (2) or (3) of this paragraph, such corporation is eligible to reelect to be treated as a DISC at any time by following the procedures described in paragraphs (a) through (c) of this section. If a corporation terminates its election and subsequently reelects to be treated as a DISC, the corporation and its shareholders continue to be subject to sections 995 and 996 with respect to the period during which its first election was in effect. Thus, for example, distributions upon disqualification includible in the gross incomes of shareholders of a corporation pursuant to section 995(b)(2) continue to be so includible for taxable years for

which a second election of such corporation is in effect without regard to the second election.

[T.D. 7323, 39 FR 34405, Sept. 25, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976]

§ 1.992-3 Deficiency distributions to meet qualification requirements.

(a) *In general.* A corporation which meets the requirements described in § 1.992-1 for treatment as a DISC for a taxable year, other than the 95 percent of gross receipts test described in § 1.992-1(b) or the 95-percent assets test described in § 1.992-1(c), or both tests, may nevertheless qualify as a DISC for such year by making deficiency distributions (attributable to its gross receipts other than qualified export receipts and its assets other than qualified export assets) if all of the following requirements are satisfied:

(1) The corporation distributes the amount determined under paragraph (b) of this section as a deficiency distribution. The amount of a deficiency distribution is determined without regard to the amount by which the corporation fails to meet either test.

(2) The reasonable cause requirements prescribed in paragraph (c)(1) of this section are satisfied with respect to both the corporation's failure to meet either test and its failure to make a deficiency distribution prior to the time the distribution is made.

(3) The corporation makes such deficiency distribution pro rata to all its shareholders.

(4) The corporation designates the distribution, at the time of the distribution, as a deficiency distribution, pursuant to section 992(c), to meet the qualification requirements to be a DISC. Such designation shall be in the form of a communication sent at the time of such distribution to each shareholder and to the service center with which the corporation has filed or will file its return for the taxable year to which the distribution relates. A corporation may not retroactively designate a prior distribution as a deficiency distribution to meet qualification requirements. Subject to the limitation described in paragraph (c)(3) of this section, a corporation may make a deficiency distribution with respect to

a taxable year at any time after the close of such taxable year or, in the case of a deficiency distribution made on or before September 29, 1975, at any time during or after such taxable year.

See sections 246(d), 904(f), 995, and 996 for rules regarding the treatment of a deficiency distribution to meet qualification requirements by the shareholders and the corporation.

(b) *Amount of deficiency distribution—*
(1) *In general.* In order to meet the requirements of paragraph (a) of this section, the amount of a deficiency distribution must be, if the corporation fails to meet—

(i) The 95 percent of gross receipts test, the amount determined in subparagraph (2) of this paragraph,

(ii) The 95-percent assets test, the amount determined in subparagraph (3) of this paragraph, and

(iii) Both such tests, except as provided in subparagraph (4) of this paragraph, the sum of the amounts determined in subparagraphs (2) and (3) of this paragraph.

(2) *Computation of deficiency distribution to meet 95 percent of gross receipts test—*(i) *In general.* If a corporation fails to meet the 95 percent of gross receipts test described in § 1.992-1(b) for its taxable year, the amount of the deficiency distribution required by this subparagraph is an amount equal to the sum of its taxable income (if any) from each transaction giving rise to gross receipts (as defined in § 1.993-6) which are not qualified export receipts (as defined in § 1.993-1). A corporation's taxable income from a transaction shall be the amount of such gross receipts from such transaction reduced only by (a) its cost of goods sold attributable to such gross receipts, and by (b) its expenses, losses, and other deductions properly apportioned or allocated thereto in a manner consistent with the rules set forth in § 1.861-8. For purposes of this subdivision, however, any expenses, losses, or other deductions which cannot definitely be allocated to some item or class of gross income in such manner shall not reduce such gross receipts. If the corporation is a commission agent for a principal in a transaction, the corporation's taxable income is the amount of the commission from such transaction reduced

only by the amounts described in (b) of this subdivision.

(ii) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example. (a) X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, which seeks to qualify as a DISC for 1973. During 1973, X manufactures a machine which is eligible to be export property as defined in § 1.993-3. Y is made a commission agent with respect to exporting such machine. Thereafter, during 1973 Y is considered to receive gross receipts of \$100,000, as determined under section 993(f), attributable to X's sale of the machine in a manner which causes the gross receipts to be excluded receipts pursuant to section 993(a)(2) and, therefore, not qualified export receipts. Y's total gross receipts for 1973 are \$1 million of which \$900,000 (i.e., 90 percent) are qualified export receipts. Therefore, Y does not satisfy the 95 percent of gross receipts test for 1973 because less than 95 percent of its gross receipts are qualified export receipts. Y has \$9,000 of expenses properly apportioned or allocated to its gross income from such sale and \$1,000 of other expenses which cannot definitely be allocated to some item or class of gross income, determined in a manner consistent with the rules set forth in § 1.861-8. In order to satisfy the 95 percent of gross receipts test for 1973, if the commission due from X to Y were \$15,000, Y must make a deficiency distribution of \$6,000 computed as follows:

| | |
|--|----------|
| Y's commission (gross income) from the transaction | \$15,000 |
| Less: Y's expenses apportioned or allocated to its gross income from the transaction | 9,000 |

| | |
|---|-------|
| Required deficiency distribution by reason of \$100,000 of gross receipts which are not qualified export receipts | 6,000 |
|---|-------|

(b) If the commission due from X to Y were \$9,400, resulting in a net loss of \$600 to Y (\$9,400 to \$10,000), Y must make a deficiency distribution of \$400 computed as follows:

| | |
|--|---------|
| Y's commissions (gross income) from the transaction | \$9,400 |
| Less: Y's expenses apportioned or allocated to its gross income from the transaction | 9,000 |

| | |
|---|-----|
| Required deficiency distribution by reason of \$100,000 of gross receipts which are not qualified export receipts | 400 |
|---|-----|

(c) If the commission due from X to Y were \$8,500, Y would not be required to make a deficiency distribution since, under this subparagraph, there would be no taxable income attributable to gross receipts from the sale.

(3) *Computation of deficiency distribution to meet 95 percent assets test—(i) In general.* If a corporation fails to meet the 95 percent assets test described in

§ 1.992-1(c) for its taxable year, the amount of the deficiency distribution required by this subparagraph is an amount equal to the fair market value as of the last day of such taxable year of the assets which are not qualified export assets held by such corporation on such last day.

(ii) *Asset held for more than 1 year.* In the case of a corporation which holds continuously an asset which is not a qualified export asset at the close of more than 1 taxable year, it must distribute an amount equal to its fair market value (or, if greater, the amount determined under subparagraph (4) of this paragraph) only once if, at the close of the first such taxable year, such corporation reasonably believed that such asset was a qualified export asset. This subdivision shall not apply for any taxable year beginning after the date the corporation knows (or a reasonable man would have known) that an asset is not a qualified export asset and in order to qualify for each such year, the corporation must distribute the fair market value of such asset for each such year.

(4) *Computation in the case of a failure to meet both tests as a result of a single transaction.* If a corporation fails to meet both the 95 percent of gross receipts test and the 95 percent assets test for a taxable year, and if the corporation holds at the end of such year assets (other than cash or qualified export assets) which were received as proceeds of a sale or exchange during such year which resulted in gross receipts other than qualified export receipts, then the amount of the deficiency distribution required by this paragraph with respect to such sale or exchange and assets held is the larger of the amount required by subparagraph (2) of this paragraph with respect to the sale or exchange or the amount required by subparagraph (3) of this paragraph with respect to such assets held. Thus, for example, if a corporation sells property which is not a qualified export asset for \$100, receives \$85 in cash and a note for \$15, and derives \$25 of taxable income from the sale as determined under subparagraph (2) of this paragraph, it must distribute \$25. If the provisions of this subparagraph are applied with respect

to assets of a DISC (other than qualified export assets), such provisions do not apply to any property received as proceeds from a sale or exchange of such assets.

(c) *Reasonable cause for failure*—(1) *In general.* If for a taxable year, a corporation has failed to meet the 95 percent of gross receipts test, the 95 percent assets test, or both tests, such corporation may satisfy any such test for such year by means of a deficiency distribution in the amount determined under paragraph (b) of this section only if the reasonable cause requirements of this subparagraph are satisfied. Such reasonable cause requirements are satisfied if—

(i) There is reasonable cause (as determined in accordance with subparagraph (2) of this paragraph) for such corporation's failure to satisfy such test and to make such distribution prior to the date on which it was made, the time limit in subparagraph (3) of this paragraph for making the distribution is satisfied, and interest (if required) is paid in the amount and in the manner prescribed by subparagraph (4) of this paragraph, or

(ii) The time and "70-percent" requirements of the reasonable cause test of paragraph (d) of this section are satisfied.

(2) *Determination of reasonable cause.* In general, whether a corporation's failure to meet the 95 percent of gross receipts test, the 95 percent assets test, or both tests for a taxable year and its failure to make a pro rata distribution prior to the date on which it was made will be considered for reasonable cause where the action or inaction which resulted in such failure occurred in good faith, such as failure to meet the 95 percent assets test resulting from blocked currency or expropriation, or failure to meet either test because of reasonable uncertainty as to what constitutes a qualified export receipt or a qualified export asset. For further examples, if a corporation's reasonable determination of the percentage of its total gross receipts that are qualified export receipts is subsequently redetermined to be less than 95 percent as a result of a price adjustment by the Internal Revenue Service under section 482, or if the corporation has a casualty

loss for which it receives an unanticipated insurance recovery which causes its qualified export receipts to be less than 95 percent of its total gross receipts, then the failure to satisfy the 95 percent of gross receipts test is considered to be due to reasonable cause.

(3) *Time limit for deficiency distribution.* Except as otherwise provided in this subparagraph, the time limit prescribed by this subparagraph for making a deficiency distribution is satisfied if the amount of the distribution required by paragraph (b) of this section is made within 90 days from the date of the first written notification to the corporation by the Internal Revenue Service that it had not satisfied the 95 percent of gross receipts test or the 95 percent assets test or both tests, for a taxable year. Upon a showing by the corporation that an extension of the 90-day time limit is reasonable and necessary, the Commissioner may grant such extension of such time limit. In any case in which a corporation contests the decision of the Internal Revenue Service that such corporation has not met the 95 percent of gross receipts test, the 95 percent assets test, or both tests, an extension of the 90-day time limit will be allowed until 30 days after the final determination of such contest. The date of the final determination of such contest shall, for purposes of section 992(c), be established in the manner specified in subdivisions (i) through (iv) of this subparagraph:

(i) The date of final determination by a decision of the United States Tax Court is the date upon which such decision becomes final, as prescribed in section 7481.

(ii) The date of final determination in a case which is contested in a court (and upon which there is a judgment) other than the Tax Court is the date upon which the judgment becomes final and will be determined on the basis of the facts and circumstances of each particular case. For example, ordinarily a judgment of a United States district court becomes final upon the expiration of the time allowed for taking an appeal, if no such appeal is duly taken within such time; and a judgment of the United States Court of

Claims becomes final upon the expiration of the time allowed for filing a petition for certiorari if no such petition is duly filed within such time.

(iii) The date of a final determination by a closing agreement, made under section 7121, is the date such agreement is approved by the Commissioner.

(iv) A final determination under section 992(c) may be made by an agreement signed by the district director or director of the service center with which the corporation files its annual return or by such other official to which authority to sign has been delegated, and by or on behalf of the taxpayer. The agreement shall set forth the total amount of the deficiency distribution to be paid to the shareholders of the DISC for the taxable year or years. An agreement under this subdivision shall be sent to the taxpayer at his last known address by either registered or certified mail. For further guidance regarding the definition of last known address, see §301.6212-2 of this chapter. If registered mail is used for such purpose, the date of registration is considered the date of final determination; if certified mail is used for such purpose, the date of postmark on the sender's receipt for such mail is considered the date of final determination. If the corporation makes a deficiency distribution before such registration or postmark date but on or after the date the district director or director of the service center or other official has signed the agreement, the date of signature by the district director or director of the service center or other official is considered the date of final determination. If the corporation makes a deficiency distribution before the district director or director of the service center or other official signs the agreement, the date of final determination is considered to be the date of the making of the deficiency distribution. During any extension of time the interest charge provided in subparagraph (4) of this paragraph will continue to accrue at the rate provided for in such subparagraph.

(4) *Payment of interest for delayed distribution*—(i) *In general.* If a corporation makes a deficiency distribution after the 15th day of the ninth month after the close of the taxable year with re-

spect to which such distribution is made, such distribution will not be deemed to satisfy the 95 percent of gross receipts test or the 95 percent assets test for such year unless such corporation pays to the Internal Revenue Service a charge determined by multiplying (a) an amount equal to 4½ percent of such distribution by (b) the number of its taxable years which begin (1) after the taxable year with respect to which the distribution is made and (2) before such distribution is made. Such charge must be paid, within the 30-day period beginning with the day on which such distribution is made, to the service center with which the corporation files its annual information return for its taxable year in which the distribution is made. For purposes of the Internal Revenue Code, such charge is considered interest.

(ii) *Example.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. X corporation, which uses the calendar year as its taxable year, meets the 95 percent assets test but fails to meet the 95 percent of gross receipts test for 1972 and does not by September 15, 1973, make the deficiency distribution required by reason of its failure to meet such test. Assume that reasonable cause exists for the corporation's failure to meet the 95 percent of gross receipts test and failure to make the required deficiency distribution. If X makes the required deficiency distribution, in the amount of \$10,000, on April 1, 1976, X must pay on or before April 30, 1976, to the service center with which it files its annual information return a charge of \$1,800, computed as follows:

| | |
|---|----------|
| Deficiency distribution made by X | \$10,000 |
| Multiplied by 4½ percent | .045 |
| <hr/> | |
| Intermediate product | 450 |
| Multiplied by: Number of X's taxable years beginning after 1972 and before April 1, 1976 .. | 4 |
| <hr/> | |
| Charge to be paid service center because of late deficiency distribution (which is considered interest) | 1,800 |

(d) *Certain distributions deemed for reasonable cause.* If a corporation makes a distribution in the amount required by paragraph (b) of this section with respect to a taxable year on or before the 15th day of the ninth month after the close of such year, it will be deemed to have acted with reasonable cause with respect to its failure to satisfy the 95 percent of gross receipts test, the 95

§ 1.992-4

26 CFR Ch. I (4-1-23 Edition)

percent assets test, or both tests, for such year and its failure to make such distribution prior to the date on which the distribution was made if—

(1) At least 70 percent of the gross receipts of such corporation for such taxable year consist of qualified export receipts, and

(2) The sum of the adjusted bases of the qualified export assets held by such corporation on the last day of each month of the taxable year equals or exceeds 70 percent of the sum of the adjusted bases of all assets held by the corporation on each such day.

[T.D. 7323, 39 FR 34407, Sept. 25, 1974; 39 FR 36009, Oct. 7, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976; T.D. 7854, 47 FR 51739, Nov. 17, 1982; T.D. 8939, 66 FR 2819, Jan. 12, 2001]

§ 1.992-4 Coordination with personal holding company provisions in case of certain produced film rents.

(a) *In general.* Section 992(d)(2) provides that a personal holding company is not eligible to be treated as a DISC. Section 543(a)(5)(B) provides that, for purposes of section 543, the term “produced film rents” means payments received with respect to an interest in a film for the use of, or the right to use, such film, but only to the extent that such interest was acquired before substantial completion of production of such film. Under section 992(e), if such produced film rents are included in the ordinary gross income (as defined in section 543(b)(1)) of a qualified subsidiary for a taxable year of such subsidiary, and such interest was acquired by such subsidiary from its parent, such interest is deemed (for purposes of the application of sections 541, 543(b)(1), and 992(d)(2), and § 1.992-1(f) for such taxable year) to have been acquired by such subsidiary at the time such interest was acquired by such parent. Thus, for example, if a parent acquires an interest in a film before it is substantially completed, then substantially completes such film prior to transferring an interest in such motion picture to a qualified subsidiary, the qualified subsidiary is considered as having acquired such interest prior to substantial completion of such motion picture for purposes of determining whether payments from the rental of

such motion picture will be classified as produced film rents of such subsidiary. The provisions of section 992(e) and this section are not applicable in determining whether payments received with respect to an interest in a film are included in the ordinary gross income of a parent or a qualified subsidiary. Thus, even though a qualified subsidiary is treated pursuant to this section as having acquired an interest in a film at the time such interest was acquired by such subsidiary’s parent, payments received by such parent with respect to such interest prior to the transfer of such interest to such subsidiary are includible in the ordinary gross income of such parent and not includible in the ordinary gross income of such subsidiary.

(b) *Definitions—(1) Qualified subsidiary.* For purposes of this section, a corporation is a qualified subsidiary for a taxable year if—

(i) Such corporation was established for the purpose of becoming a DISC,

(ii) Such corporation would qualify (or be treated) as a DISC for such taxable year if it is not a personal holding company, and

(iii) On every day of such taxable year on which shares of such corporation are outstanding, at least 80 percent of such shares are held directly by a second corporation.

(2) *Parent.* For purposes of this section, the term “parent” means a second corporation referred to in subparagraph (1)(iii) of this paragraph.

[T.D. 7323, 39 FR 34409, Sept. 25, 1974]

§ 1.993-1 Definition of qualified export receipts.

(a) *In general.* For a corporation to qualify as a DISC, at least 95 percent of its gross receipts for a taxable year must consist of qualified export receipts. Under section 993(a), the term “qualified export receipts” means any of the eight amounts described in paragraphs (b) through (i) of this section, except to the extent that any of the eight amounts is an excluded receipt within the meaning of paragraph (j) of this section. For purposes of this section and §§ 1.993-2 through 1.993-6—

(1) *DISC.* All references to a DISC mean a DISC, except when the context

indicates that such term means a corporation in the process of meeting the conditions necessary for that corporation to become a DISC, or a corporation being tested as to whether it qualifies as a DISC.

(2) *Sale, lease, and license.* The term “sale” includes an exchange or other disposition and the term “lease” includes a rental or a sublease. The term “license” includes a sublicense. All rules under this section and §§1.993-2 through 1.993-6 applicable to leases of export property apply in the same manner to licenses of export property. See §1.993-3(f)(3) for a description of intangible property which cannot be export property.

(3) *Gross receipts.* The term “gross receipts” is defined by section 993(f) and §1.993-6.

(4) *Qualified export assets.* The term “qualified export assets” is defined by section 993(b) and §1.993-2.

(5) *Export property.* The term “export property” is defined by section 993(c) and §1.993-3.

(6) *Related person.* The term “related person” means a person who is related to another person if either immediately before or after a transaction—

(i) The relationship between such persons would result in a disallowance of losses under section 267 (relating to disallowance of losses, etc., between related taxpayers), or section 707(b) (relating to losses disallowed, etc., between partners and controlled partnerships), and the regulations thereunder, or

(ii) Such persons are members of the same controlled group of corporations, as defined in section 1563(a) (relating to definition of controlled group of corporations), except that (a) “more than 50 percent” shall be substituted for “at least 80 percent” each place it appears in section 1563(a) and the regulations thereunder, and (b) the provisions of section 1563(b) shall not apply in determining whether such persons are members of the same controlled group.

(7) *Related supplier.* The term “related supplier” is defined by §1.994-1(a)(3)(ii).

(8) *Controlled group.* The term “controlled group” is defined by paragraph (k) of this section.

(b) *Sales of export property.* Qualified export receipts of a DISC include gross

receipts from the sale of export property by such DISC, or by any principal for whom such DISC acts as a commission agent (whether or not such principal is a related supplier), pursuant to the terms of a contract entered into with a purchaser by such DISC or by such principal at any time or by any other person and assigned to such DISC or such principal at any time prior to the shipment of such property to the purchaser. Any agreement, oral or written, which constitutes a contract at law, satisfies the contractual requirement of this paragraph. Gross receipts from the sale of export property, whenever received, do not constitute qualified export receipts unless the seller (or the corporation acting as commission agent for the seller) is a DISC at the time of the shipment of such property to the purchaser. For example, if a corporation which sells export property under the installment method is not a DISC for the taxable year in which the property is shipped to the purchaser, gross receipts from such sale do not constitute qualified export receipts for any taxable year of the corporation.

(c) *Leases of export property—(1) In general.* Qualified export receipts of a DISC include gross receipts from the lease of export property provided that—

(i) Such property is held by such DISC (or by a principal for whom such DISC acts as commission agent with respect to the lease) either as an owner or lessee at the beginning of the term of such lease, and

(ii) Such DISC qualified (or was treated) as a DISC for its taxable year in which the term of such lease began.

(2) *Prepayment of lease receipts.* If part or all of the gross receipts from a lease of property are prepaid, then—

(i) All such prepaid gross receipts are qualified export receipts of a DISC if it is reasonably expected at the time of such prepayment that throughout the term of such lease they would be qualified export receipts if received not as a prepayment; or

(ii) If it is reasonably expected at the time of such prepayment that throughout the term of such lease they would not be qualified export receipts if received not as a prepayment, then only

those prepaid receipts, for the taxable years of the DISC for which they would be qualified export receipts, are qualified export receipts.

Thus, for example, if a lessee makes a prepayment of the first and last years' rent, and it is reasonably expected that the leased property will be export property for the first half of the lease period but not the second half of such period, the amount of the prepayment which represents the first year's rent will be considered qualified export receipts if it would otherwise qualify, whereas the amount of the prepayment which represents the last year's rent will not be considered qualified export receipts.

(d) *Related and subsidiary services*—(1) *In general.* Qualified export receipts of a DISC include gross receipts from services furnished by such DISC which are related and subsidiary to any sale or lease (as described in paragraph (b) or (c) of this section) of export property by such DISC or with respect to which such DISC acts as a commission agent, provided that such DISC derives qualified export receipts from such sale or lease. Such services may be performed within or without the United States.

(2) *Services furnished by DISC.* Services are considered to be furnished by a DISC for purposes of this paragraph if such services are provided by—

(i) The person who sold or lease the export property to which such services are related and subsidiary, provided that the DISC acts as a commission agent with respect to the sale or lease of such property and with respect to such services,

(ii) The DISC as principal, or any other person pursuant to a contract between such person and such DISC, provided the DISC acted as principal or commission agent with respect to the sale or lease of such property, or

(iii) A member of the same controlled group as the DISC where the sale or lease of the export property is made by another member of such controlled group provided, however, that the DISC act as principal or commission agent with respect to such sale or lease and as commission agent with respect to such services.

(3) *Related services.* A service is related to a sale or lease of export property if—

(i) Such service is of the type customarily and usually furnished with the type of transaction in the trade or business in which such sale or lease arose and

(ii) The contract to furnish such service—

(a) Is expressly provided for in or is provided for by implied warranty under the contract of sale or lease,

(b) Is entered into on or before the date which is 2 years after the date on which the contract under which such sale or lease was entered into, provided that the person described in subparagraph (2) of this paragraph which is to furnish such service delivers to the purchaser or lessor a written offer or option to furnish such services on or before the date on which the first shipment of goods with respect to which the service is to be performed is delivered, or

(c) Is a renewal of the services contract described in (a) or (b) of this subdivision. Services which may be related to a sale or lease of export property include but are not limited to warranty service, maintenance service, repair service, and installation service. Transportation (including insurance related to such transportation) may be related to a sale or lease of export property, provided that the cost of such transportation is included in the sale price or rental of the property or, if such cost is separately stated, is paid by the DISC (or its principal) which sold or leased the property to the person furnishing the transportation service. Financing or the obtaining of financing for a sale or lease is not a related service for purposes of this paragraph.

(4) *Subsidiary services*—(i) *In general.* Services related to a sale or lease of export property are subsidiary to such sale or lease only if it is reasonably expected at the time of such sale or lease that the gross receipts from all related services furnished by the DISC (as defined in subparagraphs (2) and (3) of this paragraph) will not exceed 50 percent of the sum of (a) the gross receipts from such sale or lease and (b) the gross receipts from related services furnished by the DISC (as described in

subparagraph (2) of this paragraph). In the case of a sale, reasonable expectations at the time of the sale are based on the gross receipts from all related services which may reasonably be expected to be performed at any time before the end of the 10-year period following the date of such sale. In the case of a lease, reasonable expectations at the time of the lease are based on the gross receipts from all related services which may reasonably be expected to be performed at any time before the end of the term of such lease (determined without regard to renewal options).

(ii) *Allocation of gross receipts from services.* In determining whether the services related to a sale or lease of export property are subsidiary to such sale or lease, the gross receipts to be treated as derived from the furnishing of services may not be less than the amount of gross receipts reasonably allocated to such services as determined under the facts and circumstances of each case without regard to whether—

(a) Such services are furnished under a separate contract or under the same contract pursuant to which such sale or lease occurs or

(b) The cost of such services is specified in the contract of sale or lease.

(iii) *Transactions involving more than one item of export property.* If more than one item of export property is sold or leased in a single transaction pursuant to one contract, the total gross receipts from such transaction and the total gross receipts from all services related to such transaction are each taken into account in determining whether such services are subsidiary to such transaction. However, the provisions of this subdivision apply only if such items could be included in the same product line, as determined under § 1.994-1(c)(7).

(iv) *Renewed service contracts.* If under the terms of a contract for related services, such contract is renewable within 10 years after a sale of export property, or during the term of a lease of export property, related services to be performed under the renewed contract are subsidiary to such sale or lease if it is reasonably expected at the time of such renewal that the gross receipts from all related services which

have been and which are to be furnished by the DISC (as described in subparagraph (2) of this paragraph) will not exceed 50 percent of the sum of (a) the gross receipts from such sale or lease and (b) the gross receipts from related services furnished by the DISC (as so described). Reasonable expectations are determined as provided in subdivision (i) of this subparagraph.

(v) *Parts used in services.* In a services contract described in subparagraph (3) of this paragraph provides for the furnishing of parts in connection with the furnishing of related services, gross receipts from the furnishing of such parts are not taken into account in determining whether under this subparagraph the services are subsidiary. See paragraph (b) or (c) of this section to determine whether the gross receipts from the furnishing of parts constitute qualified export receipts. See § 1.993-3(c)(2)(iv) and (e)(3) for rules regarding the treatment of such parts with respect to the manufacture of export property and the foreign content of such property, respectively.

(5) *Relation to leases.* If the gross receipts for services which are related and subsidiary to a lease of property have been prepaid at any time for all such services which are to be performed before the end of the term of such lease, then as of the time of the prepayment the rules in paragraph (c)(2) of this section (relating to prepayment of lease receipts) will determine whether prepaid services under this subdivision are qualified export receipts. Thus, for example if it is reasonably expected that leased property will be export property for the first year of the term of the lease but will not be export property for the second year of the term, prepaid gross receipts for related and subsidiary services to be furnished in the first year may be qualified export receipts. However, any prepaid gross receipts for such services to be furnished in the second year cannot be qualified export receipts.

(6) *Relation with export property determination.* The determination as to whether gross receipts from the sale or lease of export property constitute qualified export receipts does not depend upon whether services connected with such sale or lease are related and

subsidiary to such sale or lease. Thus, for example, assume that a DISC receives gross receipts of \$1,000 from the sale of export property and gross receipts of \$1,100 from installation and maintenance services which are to be furnished by such DISC within 10 years after the sale and which are related to such sale. The \$1,100 which the DISC receives for such services would not be qualified export receipts since the gross receipts from the services exceed 50 percent of the sum of the gross receipts from the sale and the gross receipts from the related services furnished by such DISC. The \$1,000 which the DISC receives from the sale of export property would, however, be a qualified export receipt if the sale met the requirements of paragraph (b) of this section.

(e) *Gains from sales of certain qualified export assets.* Qualified export receipts of a DISC include gross receipts from the sale by such DISC of any assets (wherever located) which, as of the date of such sale, are qualified export assets as defined in § 1.993-2 even though such assets are not export property (as defined in § 1.993-3). Gross receipts are derived from the sale of such assets only where such sale results in recognized gain (see § 1.993-6(a)). For purposes of this paragraph, losses from the sale of such qualified export assets shall not be taken into account for purposes of determining the DISC's qualified export receipts.

(f) *Dividends.* Qualified export receipts of a DISC for a taxable year include all dividends includible in the gross income of such DISC for such taxable year with respect to the stock of related foreign export corporations (as defined in § 1.993-5) and all amounts includible in the gross income of such DISC with respect to such corporations pursuant to section 951 (relating to amounts included in the gross income of U.S. shareholders of controlled foreign corporations).

(g) *Interest on obligations which are qualified export assets.* Qualified export receipts of a DISC include interest on any obligation which is a qualified export asset of such DISC, including any amount includible in gross income as interest (such as, for example, an amount treated as original issue dis-

count pursuant to section 1232) or as imputed interest under section 483. Gain from the sale of obligations described in this paragraph is treated (to the extent such gain is not treated as interest on such obligations) as qualified export receipts pursuant to paragraph (e) of this section.

(h) *Engineering and architectural services—(1) In general.* Qualified export receipts of a DISC include gross receipts from engineering services (as described in subparagraph (5) of this paragraph) or architectural services (as described in subparagraph (5) of this paragraph) or architectural services (as described in subparagraph (6) of this paragraph) furnished by such DISC (as described in subparagraph (7) of this paragraph) for a construction project (as defined in subparagraph (8) of this paragraph) located, or proposed for location, outside the United States. Such services may be performed within or without the United States.

(2) *Services included.* Engineering and architectural services include feasibility studies for a proposed construction project whether or not such project is ultimately initiated.

(3) *Excluded services.* Engineering and architectural services do not include—

- (i) Services connected with the exploration for minerals or
- (ii) Technical assistance or knowhow.

For purposes of this paragraph, the term "technical assistance or knowhow" includes activities or programs designed to enable business, commerce, industrial establishments, and governmental organizations to acquire or use scientific, architectural, or engineering information.

(4) *Other services.* Receipts from the performance of construction activities other than engineering and architectural services constitute qualified export receipts to the extent that such activities are related and subsidiary services (within the meaning of paragraph (d) of this section) with respect to a sale or lease of export property.

(5) *Engineering services.* For purposes of this paragraph, engineering services in connection with any construction project (within the meaning of subparagraph (8) of this paragraph) include

any professional services requiring engineering education, training, and experience and the application of special knowledge of the mathematical, physical, or engineering sciences to such professional services as consultation, investigation, evaluation, planning, design, or responsible supervision of construction for the purpose of assuring compliance with plans, specifications, and design.

(6) *Architectural services.* For purposes of this paragraph, architectural services include the offering or furnishing of any professional services such as consultation, planning, aesthetic, and structural design, drawings and specifications, or responsible supervision of construction (for the purpose of assuring compliance with plans, specifications, and design) or erection, in connection with any construction project (within the meaning of subparagraph (8) of this paragraph).

(7) *Definition of "furnished by such DISC".* For purposes of this paragraph, architectural and engineering services are considered furnished by a DISC if such services are provided—

- (i) By the DISC,
- (ii) By another person (whether or not a United States person) pursuant to a contract entered into by such person with the DISC at any time prior to the furnishing of such services, provided that the DISC acts as principal with respect to the furnishing of such services, or
- (iii) By another person (whether or not a United States person) pursuant to a contract for the furnishing of such services entered into at any time prior to the furnishing of such services provided that the DISC acts as commission agent with respect to such services.

(8) *Definition of "construction project".* For purposes of this paragraph, the term "construction project" includes the erection, expansion, or repair (but not including minor remodeling or minor repairs) of new or existing buildings or other physical facilities including, for example, roads, dams, canals, bridges, tunnels, railroad, tracks, and pipelines. The term also includes site grading and improvement and installation of equipment necessary for the construction. Gross receipts from the

sale or lease of construction equipment are not qualified export receipts unless such equipment is export property (as defined in §1.993-3).

(i) *Managerial services—(1) In general.* Qualified export receipts of a first DISC for its taxable year include gross receipts from the furnishing of managerial services provided for another DISC, which is not a related person, to aid such unrelated DISC in deriving qualified export receipts, provided that at least 50 percent of the gross receipts of the first DISC for such year consists of qualified export receipts derived from the sale or lease of export property and the furnishing of related and subsidiary services, as described in paragraph (b), (c), and (d) of this section, respectively.

For purposes of this paragraph, managerial services are considered furnished by a DISC if such services are provided—

- (i) By the first DISC,
- (ii) By another person (whether or not a United States person) pursuant to a contract entered into by such person with the first DISC at any time prior to the furnishing of such services, provided that the first DISC acts as principal with respect to the furnishing of such services, or
- (iii) By another person (whether or not a United States person) pursuant to a contract for the furnishing of such services entered into at any time prior to the furnishing of such services provided that the DISC acts as commission agent with respect to such services.

(2) *Definition of "managerial services."* The term "managerial services" as used in this paragraph means activities relating to the operation of another unrelated DISC which derives qualified export receipts from the sale or lease of export property and from the furnishing of services related and subsidiary to such sales or leases. Such term includes staffing and operational services necessary to operate such other DISC, but does not include legal, accounting, scientific, or technical services. Examples of managerial services are: (i) Export market studies, (ii) making shipping arrangements, and (iii) contracting potential foreign purchasers.

(3) *Status of recipient of managerial services*—(i) *In general.* Qualified export receipts of a first DISC include receipts from the furnishing of managerial services during any taxable year of a recipient if such recipient qualifies as a DISC (within the meaning of § 1.992-1(a) for such taxable year.

(ii) *Recipient deemed to qualify as a DISC.* For purposes of subdivision (i) of this subparagraph, a recipient is deemed to qualify as a DISC for its taxable year if the first DISC obtains from such recipient a copy of such recipient's election to be treated as a DISC as described in § 1.992-2(a) together with such recipient's sworn statement that such election has been filed with the Internal Revenue Service Center. The recipient may mark out the names of its shareholders on a copy of its election to be treated as a DISC before submitting it to the first DISC. The copy of the election and the sworn statement of such recipient must be received by the first DISC within 6 months after the beginning of the first taxable year of the recipient during which such first DISC furnishes managerial services for such recipient. The copy of the election and the sworn statement of the recipient need not be obtained by the first DISC for subsequent taxable years of the recipient.

(iii) *Recipient not treated as a DISC.* For purposes of subdivision (i) of this subparagraph, a recipient of managerial services is not treated as a DISC with respect to such services performed during a taxable year for which such recipient does not qualify as a DISC if the DISC performing such services does not believe or if a reasonable person would not believe (taking into account the furnishing DISC's managerial relationship with such recipient DISC) at the beginning of such taxable year that the recipient will qualify as a DISC for such taxable year.

(j) *Excluded receipts*—(1) *In general.* Notwithstanding the provisions of paragraphs (b) through (i) of this section, qualified export receipts of a DISC do not include any of the five amounts described in subparagraphs (2) through (6) of this paragraph.

(2) *Sales and leases of property for ultimate use in the United States.* Property which is sold or leased for ultimate use

in the United States does not constitute export property. See § 1.993-3(d)(4) (relating to determination of where the ultimate use of the property occurs). Thus, qualified export receipts of a DISC described in paragraph (b) or (c) of this section do not include gross receipts of the DISC from the sale or lease of such property.

(3) *Sales of export property accomplished by subsidy.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (b) of this section if the sale of export property (whether or not such property consists of agricultural products) is pursuant to any of the following:

(i) The development loan program, or grants under the technical cooperation and development grants program of the Agency for International Development, or grants under the military assistance program administered by the Department of Defense, pursuant to the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2151), unless the DISC shows to the satisfaction of the district director that, under the conditions existing at the time of the sale, the purchaser had a reasonable opportunity to purchase, on competitive terms and from a seller who was not a U.S. person, goods which were substantially identical to such property and which were not manufactured, produced, grown, or extracted (as described in § 1.993-3(c)) in the United States,

(ii) The Pub. L. 480 program authorized under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701-1710),

(iii) For taxable years ending before January 1, 1974, the Barter program of the Commodity Credit Corporation authorized by section 4(h) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714b(h)), and section 303 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1692) but only if the taxpayer treats such sales as sales giving rise to excluded receipts,

(iv) The Export Payment program of the Commodity Credit Corporation authorized by sections 5(d) and (f) of the Commodity Credit Corporation Charter

Act, as amended (15 U.S.C. 714c (d) and (f)),

(v) The section 32 export payment programs authorized by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c), and

(vi) For taxable years beginning after November 3, 1972, the Export Sales program of the Commodity Credit Corporation authorized by sections 5 (d) and (f) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714c (d) and (f)), other than the GSM-4 program provided under 7 CFR part 1488, and section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), for the purpose of disposing of surplus agricultural commodities and exporting or causing to be exported agricultural commodities, except that for taxable years beginning on or before November 3, 1972, the taxpayer may treat such sales as sales giving rise to excluded receipts.

(4) *Sales or lease of export property and furnishing of engineering or architectural services for use by the United States*—(i) *In general.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (b), (c), or (h) of this section if a sale or lease of export property, or the furnishing of engineering or architectural services, is for use by the United States or an instrumentality thereof in any case in which any law or regulation requires in any manner the purchase or lease of property manufactured, produced, grown, or extracted in the United States or requires the use of engineering or architectural services performed by a U.S. person. For example, a sale by a DISC of export property to the Department of Defense for use outside the United States would not produce qualified export receipts for such DISC if the Department of Defense purchased such property from appropriated funds subject to any provisions of the Armed Services Procurement Regulations (32 CFR subchapter A, part 6, subpart A) or any appropriations act for the Department of Defense for the applicable year which restricts the availability of such appropriated funds to the procurement of items which are grown, reprocessed, reused, or produced in the United States.

(ii) *Direct or indirect sales or leases.* Any sale or lease of export property is for use by the United States or an instrumentality thereof if such property is sold or leased by a DISC (or by a principal for whom such DISC acts as commission agent) to—

(a) A person who is a related person with respect to such DISC or such principal and who sells or leases such property for use by the United States or an instrumentality thereof or

(b) A person who is not a related person with respect to such DISC or such principal if, at the time of such sale or lease, there is an agreement or understanding that such property will be sold or leased for use by the United States or an instrumentality thereof (or if a reasonable person would have known at the time of such sale or lease that such property would be sold or leased for use by the United States or an instrumentality thereof) within 3 years after such sale or lease.

(iii) *Excluded programs.* The provisions of subdivisions (i) and (ii) of this subparagraph do not apply in the case of a purchase by the United States or an instrumentality thereof if such purchase is pursuant to—

(a) The Foreign Military Sales Act, as amended (22 U.S.C. 2751 *et seq.*), or a program under which the U.S. Government purchases property for resale, on commercial terms, to a foreign government or agency or instrumentality thereof, or

(b) A program (whether bilateral or multilateral) under which sales to the U.S. Government are open to international competitive bidding.

(5) *Services.* Qualified export receipts of a DISC do not include gross receipts described in paragraph (d) of this section (concerning related and subsidiary services) if the services from which such gross receipts are derived are related and subsidiary to the sale or lease of property which results in excluded receipts pursuant to this paragraph.

(6) *Receipts within controlled group*—(i) *In general.* Gross receipts of a corporation do not constitute qualified export receipts for any taxable year of such corporation if—

(a) At the time of the sale, lease, or other transaction resulting in such

gross receipts, such corporation and the person from whom such receipts are directly or indirectly derived (whether or not such corporation and such person are the same person) are members of the same controlled group (as defined in paragraph (k) of this section) and

(b) Such corporation and such person each qualifies (or is treated under section 992(a)(2)) as a DISC for its taxable year in which its receipts arise.

Thus, for example, assume that R, S, X, and Y are members of the same controlled group and that X and Y are DISC's. If R sells property to S and pays X a commission relating to that sale and if S sells the same property to an unrelated foreign party and pays Y a commission relating to that sale, the receipts received by X from the sale of such property by R to S will be considered to be derived from Y, a DISC which is a member of the same controlled group as X, and thus will not result in qualified export receipts to X. The receipts received by Y from the sale to an unrelated foreign party may, however, result in qualified export receipts to Y. For another example, if R and S both assign the commissions to X, receipts derived from the sale from R to S will be considered to be derived from X acting as commission agent for S and will not result in qualified export receipts to X. Receipts derived by X from the sale of property by S to an unrelated foreign party, may, however, constitute qualified export receipts.

(ii) *Leased property.* See § 1.993-3(f)(2) regarding property not constituting export property in certain cases where such property is leased to any corporation which is a member of the same controlled group as the lessor.

(k) *Definition of "controlled group".* For purposes of sections 991 through 996 and the regulations thereunder, the term "controlled group" has the same meaning as is assigned to the term "controlled group of corporations" by section 1563(a), except that (1) the phrase "more than 50 percent" is substituted for the phrase "at least 80 percent" each place the latter phrase appears in section 1563(a), and (2) section 1563(b) shall not apply. Thus, for example, a foreign corporation subject to tax under section 881 may be a member

of a controlled group. Furthermore, two or more corporations (including a foreign corporation) are members of a controlled group at any time such corporations meet the requirements of section 1563(a) (as modified by this paragraph).

(1) *DISC's entitlement to income—(1) Application of section 994.* A corporation which meets the requirements of § 1.992-1(a) to be treated as a DISC for a taxable year is entitled to income, and the intercompany pricing rules of section 994(a)(1) or (2) apply, in the case of any transactions described in § 1.994-1(b) between such DISC and its related supplier (as defined in § 1.994-1(a)(3)). For purposes of this subparagraph, such DISC need not have employees or perform any specific function.

(2) *Other transactions.* In the case of a transaction to which the provisions of subparagraph (1) of this paragraph do not apply but from which a DISC derives gross receipts, the income to which the DISC is entitled as a result of the transaction is determined pursuant to the terms of the contract for such transaction and, if applicable, section 482 and the regulations thereunder.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. P Corporation forms S Corporation as a wholly-owned subsidiary. S qualifies as a DISC for its taxable year. S has no employees on its payroll. S is granted a franchise with respect to specified exports of P. P will sell such exports to S for resale by S. Such exports are of a type which produce qualified export receipts as defined in paragraph (b) of this section. P's sales force will solicit orders in the name of S using S's order forms. S places orders with P only when S itself has received orders. No inventory is maintained by S. P makes shipments directly to customers of S. Employees of P will act for S and billings and collections will be handled by P in the name of S. Under these facts, the income derived by S for such taxable year from the purchase and resale of the specified export is treated for Federal income tax purposes as the income of S, and the amount of income allocable to S will be determined under section 994 of the Code.

Example 2. P Corporation forms S Corporation as a wholly-owned subsidiary. S qualifies as a DISC for its taxable year. S has no employees on its payroll. S is granted a sales franchise with respect to specified exports of P and will receive commissions with respect

to such exports. Such exports are of a type which will produce gross receipts for S which are qualified export receipts as defined in paragraph (b) of this section. P's sales force will solicit orders in the name of P. Billings and collections are handled directly by P. Under these facts, the commissions paid to S for such taxable year with respect to the specified exports shall be treated for Federal income tax purposes as the income of S, and the amount of income allocable to S is determined under section 994 of the Code.

[T.D. 7514, 42 FR 55454, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977, as amended by T.D. 7854, 47 FR 51739, Nov. 17, 1982]

§ 1.993-2 Definition of qualified export assets.

(a) *In general.* For a corporation to qualify as a DISC, at the close of its taxable year it must have qualified export assets with adjusted bases equal to at least 95 percent of the sum of the adjusted bases of all its assets. An asset which is a qualified export asset under more than one paragraph of this section shall be taken into account only once in determining the sum of the adjusted bases of all qualified export assets. Under section 993(b), the qualified export assets held by a corporation are—

- (1) Export property as defined in § 1.993-3 (see paragraph (b) of this section),
- (2) Business assets described in paragraph (c) of this section,
- (3) Trade receivables described in paragraph (d) of this section,
- (4) Temporary investments to the extent described in paragraph (e) of this section,
- (5) Producer's loans as defined in § 1.993-4 (see paragraph (f) of this section),
- (6) Stock or securities (described in paragraph (g) of this section) of related foreign export corporations as defined in § 1.993-5,
- (7) Export-Import Bank and other obligations described in paragraph (h) of this section,
- (8) Financing obligations described in paragraph (i) of this section, and
- (9) Funds awaiting investment described in paragraph (j) of this section.

(b) *Export property.* In general, export property is certain property held for sale or lease which meets the requirements of § 1.993-3.

(c) *Business assets.* For purposes of this section, business assets are assets used by a DISC (other than as a lessor) primarily in connection with—

(1) The sale, lease, storage, handling, transportation, packaging, assembly, or servicing of export property, or

(2) The performance of engineering or architectural services (described in § 1.993-1(h)) or managerial services (described in § 1.993-1(i)) in furtherance of the production of qualified export receipts.

Assets used primarily in the manufacture, production, growth, or extraction (within the meaning of § 1.993-3(c)) of property are not business assets.

(d) *Trade receivables*—(1) *In general.* For purposes of this section, trade receivables are accounts receivable and evidences of indebtedness which arise by reason of transactions of such corporation or of another corporation which is a DISC and which is a member of a controlled group which includes such corporation described in subparagraph (A), (B), (C), (D), (G), or (H), of section 993(a)(1) and which are due the DISC (or, if it acts as an agent, due its principal) and held by the DISC.

(2) *Trade receivables representing commissions.* If a DISC acts as commission agent for a principal in a transaction described in § 1.993-1 (b), (c), (d), (e), (h), or (i) which results in qualified export receipts for the DISC, and if an account receivable or evidence of indebtedness held by the DISC and representing the commission payable to the DISC as a result of the transaction arises (and, in the case of an evidence of indebtedness, designated on its face as representing such commission), such account receivable or evidence of indebtedness shall be treated as a trade receivable. If, however, the principal is a related supplier (as defined in § 1.994-1(a)(3)) with respect to the DISC, such account receivable or evidence of indebtedness will not be treated as a trade receivable unless it is payable and paid in a time and manner which satisfy the requirements of § 1.994-1(e)(3) or (5) (relating to initial payment of transfer price or commission and procedure for adjustments to transfer price or commission, respectively), as the case may be. However, see subparagraph (3) of

this paragraph for rules regarding certain accounts receivable representing commissions payable to a DISC by its related supplier.

(3) *Indebtedness arising under § 1.994-1(e)*. An indebtedness arising under § 1.994-1(e)(3)(iii) (relating to initial payment of transfer price or commission) in favor of a DISC is not a qualified export asset. An indebtedness arising under § 1.994-1(e)(5)(i) (relating to procedure for adjustments to transfer price or commission) in favor of a DISC is a trade receivable if it is paid in the time and manner described in § 1.994-1(e)(5)(i) and (ii) and if it otherwise satisfies the requirements of subparagraph (2) of this paragraph. If such an indebtedness is not paid in the time and manner described in § 1.994-1(e)(5)(i) and (ii), it is not a qualified export asset.

(e) *Temporary investments*—(1) *In general*. For purposes of this section, temporary investments are money, bank deposits (not including time deposits of more than 1 year), and other similar temporary investments to the extent maintained by a DISC as reasonably necessary to meet its requirements for working capital. For purposes of this paragraph, a temporary investment is an obligation, including an evidence of indebtedness as defined in paragraph (d)(1) of this section, which is a demand obligation or has a period remaining to maturity of not more than 1 year at the date it is acquired by the DISC. A temporary investment does not include trade receivables.

(2) *Determination of amount of working capital maintained*. For purposes of this paragraph—

(i) The working capital of a DISC is the excess of its current assets over current liabilities.

(ii) Current assets are cash and other assets (other than trade receivables) which may reasonably be expected to be converted into cash or sold or consumed during the current normal operating cycle of the DISC's trade or business.

(iii) Current liabilities are obligations (or portions of obligations) due within the current normal operating cycle of the trade or business of the DISC whose satisfaction when due is reasonably expected to require the use of current assets.

(iv) Generally accepted financial accounting treatments will be accepted, and

(v) Current assets (other than temporary investments) are taken into account before temporary investments, and trade receivables are never taken into account, in determining whether such temporary investments are maintained by the DISC as reasonably necessary to meet his current liabilities and its requirements for working capital.

(3) *Determination of amount of working capital reasonably required*. For purposes of this paragraph, a determination of the amount of money, bank deposits, and other similar temporary investments reasonably necessary to meet the requirements of the DISC for working capital will depend upon the nature and volume of the activities of the DISC existing at the end of the DISC's taxable year for which such determination is made, such as, for example—

(i) In the case of a DISC which purchases and sells inventory, the amount of working capital reasonably required is limited to an amount reasonably necessary to meet the ordinary operating expenses during the current normal operating cycle of the trade or business of the DISC, an amount reasonably needed to meet specific and definite plans for expansion and any amounts necessary for reasonably anticipated extraordinary business expenses.

(ii) In the case of a DISC which actively conducts a trade or business (including the employment of a sales force) and receives commissions in respect of goods to which such DISC does not have title, the amount of working capital required will depend upon the nature and volume of the activities of the DISC which produce such income as they exist on the applicable determination date. In determining the amount of working capital which is reasonably required for the production of such income, the anticipated future needs of the business will be taken into account to the extent that such needs relate to the year of the DISC following the applicable determination date. Anticipated future needs relating to a later period will not be taken into account unless it is clearly established

that such needs are reasonably related to the production of such income as of the applicable determination date.

(iii) In the case of a DISC which does not actively conduct a trade or business, and which receives commissions solely by reason of section 994(a)(1), (a)(2), or (b) with respect to goods to which such DISC does not have title, no working capital would be required beyond a de minimis amount unless it appears from the facts and circumstances that additional working capital will be required.

(iv) In the case of a DISC deriving income from the leasing of property, the amount of working capital required will be determined on the basis of the facts and circumstances in such case.

(4) *Relationship of working capital to other qualified export assets.* If a temporary investment is a qualified export asset under any provision of this section (other than this paragraph), this paragraph shall not affect its status as a qualified export asset. However, any such temporary investment is taken into account before other temporary investments in determining whether such other temporary investments are maintained by a DISC as reasonably necessary to meet its requirements for working capital. Current assets (other than temporary investments) are taken into account before temporary investments, and trade receivables are never taken into account, in determining whether such temporary investments are maintained by the DISC as reasonably necessary requirements for working capital. An obligation issued or incurred by a member of a controlled group (as defined in §1.993-1(k)) of which the DISC is a member is not a qualified export asset under this paragraph. For rules regarding working capital as of the end of each month of a taxable year for purposes of the 70-percent reasonableness standard with respect to certain deficiency distributions, see paragraph (j)(3) of this section.

(f) *Producer's loans.* For purposes of this section, a producer's loan is an evidence of indebtedness arising in connection with producer's loans which are made by a DISC and which meet the requirements of §1.993-4. If a producer's loan is a qualified export asset,

interest accrued with respect to the producer's loan will also be treated as a qualified export asset provided that payment is made in the form of money, property (valued at its fair market value on its date of transfer and including accounts receivable for sales by or through a DISC), a written obligation which qualifies as a debt under the safe harbor rule of §1.992-1(d)(2)(ii), or an accounting entry offsetting the account receivable against an existing debt owed by the person in whose favor the account receivable was established to the person with whom it engaged in the transaction and that payment is made no later than 60 days following the close of the taxable year of accrual of the interest. This paragraph (f) is effective for taxable years beginning after January 10, 1985 except that the taxpayer may at its option apply the provisions of this paragraph to taxable years ending after December 31, 1971.

(g) *Stock or securities of related foreign corporations.* For purposes of this section, the term "stock or securities", with respect to a related foreign export corporation (as defined in §1.993-5), has the same meaning as such term has as used in section 351 (relating to transfers to controlled corporations), except that the term "securities" does not include obligations which are repaid, in whole or in part, at any time during the taxable year of the DISC following the taxable year of the DISC during which such obligations were acquired by the DISC or were issued, unless the DISC demonstrates to the satisfaction of the district director that the repayment was for bona fide business purposes and not for the purpose of avoidance of Federal income taxes.

(h) *Export-Import Bank obligations.* For purposes of this section, the term "Export-Import Bank obligations" means obligations issued, guaranteed, insured, or reinsured (in whole or in part) by the Export-Import Bank of the United States or by the Foreign Credit Insurance Association, but only if such obligations are acquired by the DISC—

(1) From the Export-Import Bank of the United States,

(2) From the Foreign Credit Insurance Association, or

(3) From the person selling or purchasing the goods or services by reason

of which such obligations arose, or from any corporation which is a member of the same controlled group (as defined in § 1.993-1(k)) as such person.

For purposes of this paragraph, obligations issued by a person described in subparagraphs (1), (2), and (3) of this paragraph are treated as acquired from such person by the DISC if acquired from any person not more than 90 days after the date of original issue (as defined in § 1.1232-3(b)(3)). Examples of specific types of Export-Import Bank obligations include debentures issued by such bank and certificates of loan participation.

(i) *Financing obligations.* For purposes of this section, financing obligations are obligations (held by a DISC) of a domestic corporation organized solely for the purpose of financing sales of export property pursuant to an agreement with the Export-Import Bank of the United States under which such corporation makes export loans guaranteed by such Bank.

(j) *Funds awaiting investment—(1) In general.* For purposes of this section, subject to the limitation described in subparagraph (2) of this paragraph, if, at the close of a DISC's taxable year, the sum of the DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section to exceed an amount reasonably necessary to meet the DISC's requirements for working capital, the amount of the DISC's bank deposits in the United States to the extent of the amount of this excess are funds awaiting investment at the close of such taxable year.

(2) *Limitation.* Bank deposits described in subparagraph (1) of this paragraph are funds awaiting investment only if, by the last day of each of the sixth, seventh, and eighth months after the close of such taxable year, the sum of the adjusted bases of the qualified export assets of the DISC (other than such bank deposits) equals or exceeds 95 percent of the sum of the adjusted bases of all assets of the DISC (including such bank deposits) it held on the last day of such taxable year. For purposes of this subparagraph, the adjusted bases of assets of a DISC are determined as of the end of each of the months referred to in this subpara-

graph. Funds awaiting investment as described in this paragraph need not be traceable to any of the qualified export assets held by the DISC at the end of any of the months referred to in this subparagraph.

(3) *Coordination with certain deficiency distribution provisions.* Under section 992(c)(3) and § 1.992-3(d) a deficiency distribution made on or before the 15th day of the ninth month after the end of a corporation's taxable year is deemed to be for reasonable cause if certain requirements are met, including the requirement (described in section 992(c)(3)(B) and § 1.992-3(d)(2)) that the sum of the adjusted bases of the qualified export assets held by the corporation on the last day of each month of such year equals or exceeds 70 percent of the sum of the adjusted bases of all assets held by the corporation on each such last day. If, on any such last day, the sum or a DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section to exceed an amount reasonably necessary to meet the DISC's requirements for working capital, the amount of the DISC's bank deposits to the extent of the amount of this excess are funds awaiting investment on such last day, if either—

(i) The requirements of subparagraph (2) of this paragraph are satisfied with respect to the taxable year of the DISC which includes such month or

(ii) At the close of such taxable year the sum of the DISC's money, bank deposits, and other similar temporary investments is determined under paragraph (e) of this section not to exceed an amount reasonably necessary to meet the DISC's requirements for working capital.

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7514, 42 FR 55459, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977, as amended by T.D. 7854, 47 FR 51740, Nov. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§ 1.993-3 Definition of export property.

(a) *General rule.* Under section 993(c), except as otherwise provided with respect to excluded property in paragraph (f) of this section and with respect to certain short supply property in paragraph (i) of this section, export property is property in the hands of any person (whether or not a DISC)—

(1) Manufactured, produced, grown, or extracted in the United States by any person or persons other than a DISC (see paragraph (c) of this section),

(2) Held primarily for sale or lease in the ordinary course of a trade or business to any person for direct use, consumption, or disposition outside the United States (see paragraph (d) of this section),

(3) Not more than 50 percent of the fair market value of which is attributable to articles imported into the United States (see paragraph (e) of this section), and

(4) Which is not sold or leased by a DISC, or with a DISC as commission agent, to another DISC which is a member of the same controlled group (as defined in § 1.993-1(k)) as the DISC.

(b) *Services.* For purposes of this section, services (including the written communication of services in any form) are not export property. Whether an item is property or services shall be determined on the basis of the facts and circumstances attending the development and disposition of the item. Thus, for example, the preparation of a map of a particular construction site would constitute services and not export property, but standard maps prepared for sale to customers generally would not constitute services and would be export property if the requirements of this section were otherwise met.

(c) *Manufacture, production, growth, or extraction of property—(1) By a person other than a DISC.* Export property may be manufactured, produced, grown, or extracted in the United States by any person, provided that such person does not qualify (and is not treated) as a DISC. Property held by a DISC which was manufactured, produced, grown, or extracted by it at a time when it did not qualify (and was not treated) as a DISC is not export property of the

DISC. Property which sustains further manufacture or production outside the United States prior to sale or lease by a person but after manufacture or production in the United States will not be considered as manufactured, produced, grown, or extracted in the United States by such person.

(2) *Manufactured or produced—(i) In general.* For purposes of this section, property which is sold or leased by a person is considered to be manufactured or produced by such person if such property is manufactured or produced (within the meaning of either subdivision (ii), (iii), or (iv) of this subparagraph) by such person or by another person pursuant to a contract with such person. Except as provided in subdivision (iv) of this subparagraph, manufacture or production of property does not include assembly or packaging operations with respect to property.

(ii) *Substantial transformation.* Property is manufactured or produced by a person if such property is substantially transformed by such person. Examples of substantial transformation of property would include the conversion of woodpulp to paper, steel rods to screws and bolts, and the canning of fish.

(iii) *Operations generally considered to constitute manufacturing.* Property is manufactured or produced by a person if the operations performed by such person in connection with such property are substantial in nature and are generally considered to constitute the manufacture or production of property.

(iv) *Value added to property.* Property is manufactured or produced by a person if with respect to such property conversion costs (direct labor and factory burden including packaging or assembly) of such person account for 20 percent of more of—

(a) The cost of goods sold or inventory amount of such person for such property is such property is sold or held for sale, or

(b) The adjusted basis of such person for such property, as determined in accordance with the provisions of section 1011, if such property is held for lease or leased.

The value of parts provided pursuant to a services contract, as described in § 1.993-1 (d)(4)(v), is not taken into account in applying this subdivision.

(d) *Primary purpose of which property is held*—(1) *In general*—(i) *General rule.* Under paragraph (a)(2) of this section, export property (a) must be held primarily for the purpose of sale or lease in the ordinary course of trade or business to a DISC, or to any other person, and (b) such sale or lease must be for direct use, consumption, or disposition outside the United States. Thus, property cannot qualify as export property unless it is sold or leased for direct use, consumption or disposition outside the United States. Property is sold or leased for direct use, consumption, or disposition outside the United States if such sale or lease satisfies the destination test described in subparagraph (2) of this paragraph, the proof of compliance requirements described in subparagraph (3) of this paragraph, and the use outside the United States test described in subparagraph (4) of this paragraph.

(ii) *Factors not taken into account.* In determining whether property which is sold or leased to a DISC is sold or leased for direct use consumption, or disposition outside the United States, the fact that the acquiring DISC holds the property in inventory or for lease prior to the time it sells or leases it for direct use, consumption, or disposition outside the United States will not affect the characterization of the property as export property. Export property need not be physically segregated from other property.

(2) *Destination test.* (i) For purposes of subparagraph (1) of this paragraph the destination test in this subparagraph is satisfied with respect to property sold or leased by a seller or lessor only if it is delivered by such seller or lessor (or an agent of such seller or lessor) regardless of the F.O.B. point or the place at which title passes or risk of loss shifts from the seller or lessor—

(a) Within the United States to a carrier or freight forwarder for ultimate delivery outside the United States to a purchaser or lessee (or to a subsequent purchaser or sublessee),

(b) Within the United States to a purchaser or lessee, if such property is ultimately delivered, directly used, or directly consumed outside the United States (including delivery to a carrier or freight forwarder for delivery out-

side the United States) by the purchaser or lessee (or a subsequent purchaser or sublessee) within 1 year after such sale or lease,

(c) Within or outside the United States to a purchaser or lessee which, at the time of the sale or lease, is a DISC and is not a member of the same controlled group (as defined in §1.993-1(k)) as the seller or lessor,

(d) From the United States to the purchaser or lessee (or a subsequent purchaser or sublessee) at a point outside the United States by means of a ship, aircraft, or other delivery vehicle, owned, leased, or chartered by the seller or lessor,

(e) Outside the United States to a purchaser or lessee from a warehouse, a storage facility, or assembly site located outside the United States, if such property was previously shipped by such seller or lessor from the United States, or

(f) Outside the United States to a purchaser or lessee if such property was previously shipped by such seller or lessor from the United States and if such property is located outside the United States pursuant to a prior lease by the seller or lessor, and either (1) such prior lease terminated at the expiration of its term (or by the action of the prior lessee acting alone), (2) the sale occurred or the term of the subsequent lease began after the time at which the term of the prior lease would have expired, or (3) the lessee under the subsequent lease is not a related person (as defined in §1.993-1(a)(6)) with respect to the lessor and the prior lease was terminated by the action of the lessor (acting alone or together with the lessee).

(ii) For purposes of this subparagraph (other than (c) and (f)(3) of subdivision (i) thereof), any relationship between the seller or lessor and any purchaser, subsequent purchaser, lessee, or sublessee is immaterial.

(iii) In no event is the destination test of this subparagraph satisfied with respect to property which is subject to any use (other than a resale or sublease), manufacture, assembly, or other processing (other than packaging) by any person between the time of the sale or lease by such seller or lessor and the delivery or ultimate delivery

outside the United States described in this subparagraph.

(iv) If property is located outside the United States at the time it is purchased by a person or leased by a person as lessee, such property may be export property in the hands of such purchaser or lessee only if it is imported into the United States prior to its further sale or lease (including a sublease) outside the United States. Paragraphs (a)(3) and (e) of this section (relating to 50 percent foreign content test) are applicable in determining whether such property is export property. Thus, for example, if such property is not subjected to manufacturing or production (as defined in paragraph (c) of this section) within the United States after such importation, it does not qualify as export property.

(3) *Proof of compliance with destination test*—(i) *Delivery outside the United States.* For purposes of subparagraph (2) of this paragraph (other than subdivision (i)(c) thereof), a seller or lessor shall establish ultimate delivery, use, or consumption of property outside the United States by providing—

(a) A facsimile or carbon copy of the export bill of lading issued by the carrier who delivers the property,

(b) A certificate of an agent or representative of the carrier disclosing delivery of the property outside the United States,

(c) A facsimile or carbon copy of the certificate of lading for the property executed by a customs officer of the country to which the property is delivered,

(d) If such country has no customs administration, a written statement by the person to whom delivery outside the United States was made,

(e) A facsimile or carbon copy of the shipper's export declaration, a monthly shipper's summary declaration filed with the Bureau of Customs, or a magnetic tape filed in lieu of the Shipper's Export Declaration, covering the property,

(f) Any other proof (including evidence as to the nature of the property or the nature of the transaction) which establishes to the satisfaction of the Commissioner that the property was ultimately delivered, or directly sold, or directly consumed outside the

United States within 1 year after the sale or lease.

(ii) The requirements of subdivision (i) (a), (b), (c), or (e) of this subparagraph will be considered satisfied even though the name of the ultimate consignee and the price paid for the goods is marked out provided that, in the case of a Shipper's Export Declaration or other document listed in such subdivision (e) or a document such as an export bill of lading such document still indicates the country in which delivery to the ultimate consignee is to be made and, in the case of a certificate of an agent or representative of the carrier, that such document indicates that the property was delivered outside the United States.

(iii) A seller or lessor shall also establish the meeting of the requirement of subparagraph (2)(i) of this paragraph (other than subdivision (c) thereof), that the property was delivered outside the United States without further use, manufacture, assembly, or other processing within the United States.

(iv) *Sale or lease to an unrelated DISC.* For purposes of subparagraph (2)(i)(c) of this paragraph, a purchaser or lessee of property is deemed to qualify as a DISC for its taxable year if the seller or lessor obtains from such purchaser or lessee a copy of such purchaser's or lessee's election to be treated as a DISC as described in § 1.992-2(a) together with such purchaser's or lessee's sworn statement that such election has been filed with the Internal Revenue Service Center. The copy of the election and the sworn statement of such purchaser or lessee must be received by the seller or lessor within 6 months after the sale or lease. A purchaser or lessee is not treated as a DISC with respect to a sale or lease during a taxable year for which such purchaser or lessee does not qualify as a DISC if the seller or lessor does not believe or if a reasonable person would not believe at the time such sale or lease is made that the purchaser or lessee will qualify as a DISC for such taxable year.

(v) *Failure of proof.* If a seller or lessor fails to provide proof of compliance with the destination test as required by this subparagraph, the property sold or leased is not export property.

(4) *Sales and leases of property for ultimate use in the United States*—(i) *In general.* For purposes of subparagraph (1) of this paragraph, the use test in this subparagraph is satisfied with respect to property which—

(a) Under subdivisions (ii) through (iv) of this subparagraph is not sold for ultimate use in the United States or

(b) Under subdivision (v) of this subparagraph is leased for ultimate use outside the United States.

(ii) *Sales of property for ultimate use in the United States.* For purposes of subdivision (i) of this subparagraph, a purchaser of property (including components, as defined in subdivision (vii) of this subparagraph) is deemed to use such property ultimately in the United States if any of the following conditions exists:

(a) Such purchaser is a related person (as defined in § 1.993-1(a)(6)) with respect to the seller and such purchaser ultimately uses such property, or a second product into which such property is incorporated as a component, in the United States.

(b) At the time of the sale, there is an agreement or understanding that such property, or a second product into which such property is incorporated as a component, will be ultimately used by the purchaser in the United States.

(c) At the time of the sale, a reasonable person would have believed that such property or such second product would be ultimately used by such purchaser in the United States unless, in the case of a sale of components, the fair market value of such components at the time of delivery to the purchaser constitutes less than 20 percent of the fair market value of the second product into which such components are incorporated (determined at the time of completion of the production, manufacture or assembly of such second product).

For purposes of (b) of this subdivision, there is an agreement or understanding that property will ultimately be used in the United States if, for example, a component is sold abroad under an express agreement with the foreign purchaser that the component is to be incorporated into a product to be sold back to the United States. As a further example there would also be such an

agreement or understanding if the foreign purchaser indicated at the time of the sale or previously that the component is to be incorporated into a product which is designed principally for the United States market. However, such an agreement or understanding does not result from the mere fact that a second product, into which components exported from the United States have been incorporated and which is sold on the world market, is sold in substantial quantities in the United States.

(iii) *Use in the United States.* For purposes of subdivision (ii) of this subparagraph, property (including components incorporated into a second product) is or would be ultimately used in the United States by such purchaser if, at any time within 3 years after the purchase of such property or components, either such property or components (or the second product into which such components are incorporated) is resold by such purchaser for use by a subsequent purchaser within the United States or such purchaser or subsequent purchaser fails, for any period of 365 consecutive days, to use such property or second product predominantly outside the United States as defined in subdivision (vi) of this subparagraph).

(iv) *Sales to retailers.* For purposes of subdivision (ii)(c) of this subparagraph, property sold to any person whose principal business consists of selling from inventory to retail customers at retail outlets outside the United States will be considered as property for ultimate use outside the United States.

(v) *Leases of property for ultimate use outside the United States.* For purposes of subdivision (i) of this subparagraph a lessee of property is deemed to use such property ultimately outside the United States during a taxable year of the lessor if such property is used predominantly outside the United States (as defined in subdivision (vi) of this subparagraph) by the lessee during the portion of the lessor's taxable year which is included within the term of the lease. A determination as to whether the ultimate use of leased property satisfies the requirements of this subdivision is made for each taxable year of the lessor. Thus, leased property may be used predominantly outside the

United States for a taxable year of the lessor (and thus, constitute export property if the remaining requirements of this section are met) even if the property is not used predominantly outside the United States in earlier taxable years or later taxable years of the lessor.

(vi) *Predominant use outside the United States.* For purposes of this subparagraph, property is used predominantly outside the United States for any period if, during such period, such property is located outside the United States more than 50 percent of the time. An aircraft, railroad rolling stock, vessel, motor vehicle, container, or other property used for transportation purposes in deemed to be used predominantly outside the United States for any period if, during such period, either such property is located outside the United States more than 50 percent of the time or more than 50 percent of the miles traversed in the use of such property are traversed in outside the United States. However, any such property is deemed to be within the United States at all times during which it is engaged in transport between any two points within the United States, except where such transport constitutes uninterrupted international air transportation within the meaning of section 4262(c)(3) and the regulations thereunder (relating to tax on air transportation of persons). For purposes of applying section 4262(c)(3) to this subdivision, the term "United States" has the same meaning as in § 1.993-7.

(vii) *Component.* For purposes of this subparagraph, a component is property which is (or is reasonably expected to be) incorporated into a second product by the purchaser of such component by means of production, manufacture, or assembly.

(e) *Foreign content of property—(1) The 50 percent test.* Under paragraph (a)(3) of this section, no more than 50 percent of the fair market value of export property may be attributable to the fair market value of articles which were imported into the United States. For purposes of this paragraph, articles imported into the United States are referred to as "foreign content". The fair market value of the foreign content of

export property is computed in accordance with subparagraph (4) of this paragraph. The fair market value of export property which is sold to a person who is not a related person with respect to the seller is the sale price for such property (not including interest finance or carrying charges, or similar charges)

(2) *Application of 50 percent test.* The 50 percent test described in subparagraph (1) of this paragraph is applied on an item-by-item basis. If, however, a person sells or leases a substantial volume of substantially identical export property in a taxable year and if all of such property contains substantially identical foreign content is substantially the same proportion, such person may determine the portion of foreign content contained in such property on an aggregate basis.

(3) *Parts and services.* If, at the time property is sold or leased the seller or lessor agrees to furnish parts pursuant to a services contract (as provided in § 1.993-1(d)(4)(v)) and the price for the parts is not separately stated, the 50 percent test described in subparagraph (1) of this paragraph is applied on an aggregate basis to the property and parts. If the price for the parts is described in subparagraph (1) of this paragraph is applied separately to the property and to the parts.

(4) *Computation of foreign content—(i) Valuation.* For purposes of applying the 50 percent test described in subparagraph (1) of this paragraph, it is necessary to determine the fair market value of all articles which constitute foreign content of the property being tested to determine if it is export property. The fair market value of such imported articles is determined as of the time such articles are imported into the United States. With respect to articles imported into the United States before July 1, 1980, the fair market value of such articles is their appraised value as determined under section 402 or 402a of the Tariff Act of 1930 (19 U.S.C. 1401a or 1402) in connection with their importation. With respect to articles imported into the United States on or after July 1, 1980, the fair market value of such articles is their appraised value as determined under section 402 of the Tariff Act of 1930 (19 U.S.C.

1401a) in connection with their importation. The appraised value of such articles is the full dutiable value of such articles, determined, however, without regard to any special provision in the United States tariff laws which would result in a lower dutiable value. Thus, an article which is imported into the United States is treated as entirely imported even if all or a portion of such article was originally manufactured, produced, grown, or extracted in the United States.

(ii) *Evidence of fair market value.* For purposes of subdivision (i) of this subparagraph, the fair market value of imported articles constituting foreign content may be evidenced by the customs invoice issued on the importation of such articles into the United States. If the holder of such articles is not the importer (or a related person with respect to the importer), the fair market value of such articles may be evidenced by a certificate based upon information contained in the customs invoice and furnished to the holder by the person from whom such articles (or property incorporating such articles) were purchased. If a customs invoice or certificate described in the preceding sentence is not available to a person purchasing property, such person shall establish that no more than 50 percent of the fair market value of such property is attributable to the fair market value of articles which were imported into the United States.

(iii) *Interchangeable component articles.* (a) Where identical or similar component articles can be incorporated interchangeably into property and a person acquires some such component articles that are imported into the United States and other such component articles that are not imported into the United States, the determination whether imported component articles were incorporated in such property as is exported from the United States shall be made on a substitution basis as in the case of the rules relating to drawback accounts under the customs laws. See section 313(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1313(b)).

(b) The provisions of (a) of this subdivision may be illustrated by the following example:

Example. Assume that a manufacturer produces a total of 20,000 electronic devices. The manufacturer exports 5,000 of the devices and subsequently sells 11,000 of the devices to a DISC which exports the 11,000 devices. The major single component article in each device is a tube which represents 60 percent of the fair market value of the device at the time the device is sold by the manufacturer. The manufacturer imports 8,000 of the tubes and produces the remaining 12,000 tubes. For purposes of this subdivision, in accordance with the substitution principle used in the customs drawback laws, the 5,000 devices exported by the manufacturer are each treated as containing an imported tube because the devices were exported prior to the sale to the DISC. The remaining 3,000 imported tubes are treated as being contained in the first 3,000 devices purchased and exported by the DISC. Thus, since the 50 percent test is not met with respect to the first 3,000 devices purchased and exported by the DISC, those devices are not export property. The remaining 8,000 devices purchased and exported by the DISC are treated as containing tubes produced in United States, and those devices are export property (if they otherwise meet the requirements of this section).

(f) *Excluded property—(1) In general.* Notwithstanding any other provision of this section, the following property is not export property—

(i) Property described in subparagraph (2) of this paragraph (relating to property leased to a member of a controlled group),

(ii) Property described in subparagraph (3) of this paragraph (relating to certain types of intangible property),

(iii) Products described in paragraph (g) of this section (relating to depletable products), and

(iv) Products described in paragraph (h) of this section (relating to certain export controlled products).

(2) *Property leased to member of controlled group—(i) In general.* Property leased to a person (whether or not a DISC) which is a member of the same controlled group (as defined in §1.993-1(k)) as the lessor constitutes export property for any period of time only if during the period—

(a) Such property is held for sublease, or is subleased, by such person to a third person for the ultimate use of such third person;

(b) Such third person is not a member of the same controlled group; and

(c) Such property is used predominantly outside the United States by such third person.

(ii) *Predominant use.* The provisions of paragraph (d)(4)(vi) of this section apply in determining under subdivision (i)(c) of this subparagraph whether such property is used predominantly outside the United States by such third person.

(iii) *Leasing rule.* For purposes of this subparagraph, leased property is deemed to be ultimately used by a member of the same controlled group as the lessor if such property is leased to a person which is not a member of such controlled group but which subleases such property to a person which is a member of such controlled group. Thus, for example, if X, a DISC for the taxable year, leases a movie film to Y, a foreign corporation which is not a member of the same controlled group as X, and Y then subleases the film to persons which are members of such group for showing to the general public, the film is not export property. On the other hand, if X, a DISC for the taxable year, leases a movie film to Z, a foreign corporation which is a member of the same controlled group as X, and Z then subleases the film to Y, another foreign corporation, which is not a member of the same controlled group for showing to the general public, the film is not disqualified under this subparagraph from being export property.

(iv) *Certain copyrights.* With respect to a copyright which is not excluded by subparagraph (3) of this paragraph from being export property, the ultimate use of such property is the sale or exhibition of such property to the general public. Thus, if A, a DISC for the taxable year, leases recording tapes to B, a foreign corporation which is a member of the same controlled group as A, and if B makes records from the recording tape and sells the records to C, another foreign corporation, which is not a member of the same controlled group, for sale by C to the general public, the recording tape is not disqualified under this subparagraph from being export property, notwithstanding the leasing of the recording tape by A to a member of the same controlled group, since the ultimate use of the tape is the sale of the records (*i.e.*,

property produced from the recording tape).

(3) *Intangible property.* Export property does not include any patent, invention, model, design, formula, or process, whether or not patented, or any copyright (other than films, tapes, records, or similar reproductions, for commercial or home use), goodwill, trademark, tradebrand, franchise, or other like property. Although a copyright such as a copyright on a book does not constitute export property, a copyrighted article (such as a book) if not accompanied by a right to reproduce it is export property if the requirements of this section are otherwise satisfied. However, a license of a master recording tape for reproduction outside the United States is not disqualified under this subparagraph from being export property.

(g) *Depletable products*—(1) *In general.* Under section 993(c)(2)(C), a product or commodity which is a depletable product (as defined in subparagraph (2) of this paragraph) or contains a depletable product is not export property if—

(i) It is a primary product from oil, gas, coal, or uranium (as described in subparagraph (3) of this paragraph), or

(ii) It does not qualify as a 50-percent manufactured or processed product (as described in subparagraph (4) of this paragraph).

(2) *Definition of “depletable product”.* For purposes of this paragraph, the term “depletable product” means any product or commodity of a character with respect to which a deduction for depletion is allowable under section 613 or 613A. Thus, the term depletable product includes any mineral extracted from a mine, an oil or gas well, or any other natural deposit, whether or not the DISC or related supplier is allowed a deduction, or is eligible to take a deduction, for depletion with respect to the mineral in computing its taxable income. Thus, for example, iron ore purchased by a DISC from a broker is a depletable product in the hands of the DISC for purposes of this paragraph even though the DISC is not eligible to take a deduction for depletion under section 613 or 613A.

(3) *Primary product from oil, gas, coal, or uranium.* A primary product from oil, gas, coal, or uranium is not export

property. For purposes of this paragraph—

(i) *Primary product from oil.* The term “primary product from oil” means crude oil and all products derived from the destructive distillation of crude oil, including—

- (a) Volatile products,
- (b) Light oils such as motor fuel and kerosene,
- (c) Distillates such as naphtha,
- (d) Lubricating oils,
- (e) Greases and waxes, and
- (f) Residues such as fuel oil.

For purposes of this paragraph, a product or commodity derived from shale oil which would be a primary product from oil if derived from crude oil is considered a primary product from oil.

(ii) *Primary product from gas.* The term “primary product from gas” means all gas and associated hydrocarbon components from gas wells or oil wells, whether recovered at the lease or upon further processing, including—

- (a) Natural gas,
- (b) Condensates,
- (c) Liquefied petroleum gases such as ethane, propane, and butane, and
- (d) Liquid products such as natural gasoline.

(iii) *Primary product from coal.* The term “primary product from coal” means coal and all products recovered from the carbonization of coal including—

- (a) Coke,
- (b) Coke-oven gas,
- (c) Gas liquor,
- (d) Crude light oil, and
- (e) Coal tar.

(iv) *Primary product from uranium.* The term “primary product from uranium” means uranium ore and uranium concentrates (known in the industry as “yellow cake”), and nuclear fuel materials derived from the refining of uranium ore and uranium concentrates, or produced in a nuclear reaction, including—

- (a) Uranium hexafluoride,
- (b) Enriched uranium hexafluoride,
- (c) Uranium metal,
- (d) Uranium compounds, such as uranium carbide,
- (e) Uranium dioxide, and
- (f) Plutonium fuels.

(v) *Primary products and changing technology.* The primary products from oil, gas, coal, or uranium described in subdivisions (i) through (iv) of this subparagraph and the processes described in those subdivisions are not intended to represent either the only primary products from oil, gas, coal, or uranium, or the only processes from which primary products may be derived under existing and future technologies, such as the gasification and liquefaction of coal.

(vi) *Petrochemicals.* For purposes of this paragraph, petrochemicals are not considered primary products from oil, gas, or coal.

(4) *50-percent manufactured or processed product—(i) In general.* A product or commodity (other than a primary product from oil, gas, coal, or uranium) which is or contains a depletable product is not excluded from the term “export property” by reason of section 993(c)(2)(C) if it is a 50-percent manufactured or processed product. Such a product or commodity is a “50-percent manufactured or processed product” if, after the cutoff point of the depletable product, it is manufactured or processed (as defined in subdivision (ii) of this subparagraph) and either the cost test described in subdivision (iv) of this subparagraph or the fair market value test described in subdivision (v) of this subparagraph is satisfied. To determine cutoff point, see subdivisions (vi) and (vii) of this subparagraph.

(ii) *Manufactured or processed.* A product is manufactured or processed if it is manufactured or produced within the meaning of paragraph (c)(2) of this section, except that for purposes of this subdivision the term manufacturing or processing does not include any excluded process (as defined in subdivision (iii) of this subparagraph) and the term conversion costs (as used in subdivision (iv) of such paragraph (c)(2)) does not include any costs attributable to any excluded process.

(iii) *Excluded processes.* For purposes of this paragraph, excluded processes are extracting (*i.e.*, all processes which are applied before the cutoff point of the mineral to which such processes are applied), and handling, packing, packaging, grading, storing, and transporting.

(iv) *Cost test.* A product or commodity will qualify as a 50-percent manufactured or processed product if—

(a) Its manufacturing and processing costs (that is, the portion of the cost of goods sold or inventory amount of the product or commodity attributable to the aggregate cost of manufacturing or processing each mineral contained therein) equal or exceed—

(b) An amount equal to either of the following:

(1) 50 percent of its cost of goods sold or inventory amount (decreased, at the DISC's option, by the portion of such cost or amount the DISC establishes is allocable to the difference between each prior owner's selling price for each depletable product contained in such product or commodity and such prior owner's cost of goods sold with respect thereto).

(2) The aggregate of the cost at the cutoff point (see subdivisions (vi) and (vii) of this subparagraph) properly attributable to each mineral contained in such product or commodity. However, if this subdivision (2) is applied, then the amount in (a) of this subparagraph (iv) shall be decreased and the amount in this subdivision (2) shall be increased, by so much of the cost of goods sold or inventory amount of the product or commodity as is properly allocable to any process other than transportation applied after the cutoff point of such mineral which would be a mining process (within the meaning of §1.613-4) were it applied before such point.

(v) *Fair market value test.* A product or commodity will qualify as a 50-percent manufactured or processed product if—

(a) The excess of its fair market value on the date it is sold, exchanged, or otherwise disposed of (or, if not sold, exchanged, or otherwise disposed of, the last day of the DISC's taxable year) over the portion thereof properly allocable to excluded processes other than extracting is equal to or greater than

(b) Twice the aggregate of the fair market value at the cutoff point for each mineral contained in such product or commodity.

For purposes of this subdivision (v), the fair market value of a product or commodity on the date it is sold, ex-

changed, or otherwise disposed of is the price at which it is disposed of, subject to any adjustment that may be required under the arm's length standard of section 482 and the regulations thereunder. If such product or commodity is not sold, exchanged, or otherwise disposed of, then, for purposes of section 992(a)(1)(B) (relating to the 95-percent test with respect to qualified export assets), the fair market value of a product or commodity on the last day of the DISC's taxable year is the arm's length price at which such product or commodity would have been sold on such date, determined by applying the principles of section 482 and the regulations thereunder.

(vi) *Cutoff point of a mineral.* For purposes of this subparagraph:

(a) The cutoff point is the point at which gross income from the property (within the meaning of section 613(a)) was in fact determined.

(b) The cost at the cutoff point is deemed to be the amount of the gross income from the property of the taxpayer eligible for a depletion deduction with respect to the mineral.

(c) The fair market value at the cutoff point is deemed to be the amount of the gross income from the property of the taxpayer eligible for a depletion deduction with respect to the mineral, except that, if (1) the fair market value of a product or commodity on the date specified in subdivision (v)(a) of this subparagraph exceeds the aggregate of the fair market value at the cutoff point for each mineral contained therein and (2) 10 percent or more of such excess is attributable to a net increase in the fair market values of such minerals by reason of factors other than manufacturing or processing or the application of excluded processes (such as, for example, increases in the fair market values of some minerals by reason of inflation or speculation exceed decreases in such values of other minerals by reason of deflation or speculation), then the aggregate of the fair market value at the cutoff point for each such mineral shall be increased to reflect the net excess so attributable.

(d) The provisions of this subdivision (vi) are illustrated by the following example.

Example. An integrated manufacturer, X, on February 1, 1976, had gross income from the property (within the meaning of section 613(a)) of \$50 with respect to a specified volume of a mineral. Thus, the cost at the cutoff point of the mineral was \$50. X converted the mineral into a product which it sold on July 15, 1976, for \$75. Of the \$25 excess of the selling price over the gross income from the property, \$23 was attributable to manufacturing, processing, and the application or excluded processes, and \$2 was attributable to an increase in the fair market value of the mineral due to inflation between February 1 and July 15, 1976. Since only 8 percent of such excess (\$2/\$25) was attributable to factors other than manufacturing, processing, and the application of excluded processes, the fair market value at the cutoff point of the mineral is \$50. However, had \$3 of the \$25 excess, or 12 percent, been attributable to an increase in the fair market value of the mineral due to inflation, then the fair market value at the cutoff point of the mineral would be \$53.

(vii) [Reserved]

(viii) *Special rule for certain used products and scrap products.* If a product or commodity is a used 50-percent manufactured or processed product, or is recovered as scrap from a 50-percent manufactured or processed product, such product or commodity will be treated as a 50-percent manufactured or processed product.

(ix) *Special rule for byproducts and waste products.* For purposes of applying the cost test or fair market value test of subdivision (iv) or (v) of this subparagraph if a depletable product is recovered from a manufacturing process as a byproduct or waste product, then the cost and fair market value at the cutoff point are each deemed to be the lesser of—

(a) The fair market value of the waste product or byproduct containing the depletable product, determined as of the date the byproduct or waste product is recovered, or

(b) The amount the cost at the cutoff point would be for a depletable product of like kind and grade which is extracted, determined as of the date the byproduct or waste product is recovered.

For purposes of (b) of this subdivision the cutoff point for the depletable product of like kind and grade is deemed to be the point at which gross income from the property would be de-

termined if such depletable product were sold by the taxpayer eligible to take a deduction for depletion after the completion of all mining processes applied to the depletable product and before the application of any nonmining process.

(x) *Proof of satisfaction of 50-percent manufactured or processed test.* (a) No substantiation is required to establish that either the cost test or the fair market value test of subdivisions (iv) or (v) of this subparagraph is satisfied or that a product or commodity qualifies under (viii) of this subdivision as either a used 50-percent manufactured or processed product or as scrap from a 50-percent manufactured or processed product as long as it is reasonably obvious, on the basis of all relevant facts and circumstances, that either the cost test or fair market value test is satisfied, or that the product or commodity qualifies as either as used 50-percent manufactured or processed product or as scrap from a 50-percent manufactured or processed product. Thus, for example, in the case of a DISC exporting a high precision lens at least 50 percent of the fair market value of which is obviously attributable to grinding, no substantiation of gross income from the property properly allocable to the depletable products contained in the lens, cost, or fair market values will be required.

(b) In cases in which satisfaction of either the cost test or the fair market value test is not reasonably obvious, a DISC will be required to substantiate the gross income from the property properly allocable to each depletable product in a product or commodity and either all costs or fair market values relied upon the DISC.

(c) For purposes of substantiating (1) gross income from the property properly allocable to a depletable product, (2) costs, and (3) fair market values, the DISC and related supplier shall each identify items in (or that were in) inventory in the same manner each used to identify items in inventory for purposes of computing Federal income tax.

(xi) *Application of 50-percent test.* The 50-percent test described in this subparagraph is applied on an item-by-item basis. If, however, a DISC sells a

substantial volume of substantially identical products or commodities and if all or a group of such products or commodities contain substantially identical depletable products in substantially the same proportions and have cost or fair market value relationships (as the case may be) that are in substantially the same proportions, such DISC may apply the 50-percent test on an aggregate basis with respect to all such products or commodities, or group, as the case may be.

(5) *Effective dates.* Except as provided in subparagraph (6) of this paragraph, section 993(c)(2)(C) applies—

(i) With respect to any product or commodity not owned by a DISC, to sales, exchanges, or other dispositions made after March 18, 1975, with respect to which the DISC derives gross receipts.

(ii) With respect to any product or commodity acquired by a DISC after March 18, 1975.

(iii) With respect to any product or commodity owned by a DISC on March 18, 1975, to sales, exchanges, or other dispositions made after March 18, 1976, and to owning such product or commodity after such date.

For purposes of this paragraph and subparagraph (6) of this paragraph, the date of a sale, exchange, or other disposition of a product or commodity is the date as of which title to such product or commodity passes. The accounting method of a person is not determinative of the date of a sale, exchange, or other disposition.

(6) *Fixed contracts.* Section 1101(f) of the Tax Reform Act of 1976 provides an exception to the effective date rules in this paragraph and in paragraph (h) of this section. Section 1101(f)(2) of the Act provides that section 993(c)(2)(C) and (D) shall not apply to sales, exchanges, and other dispositions made after March 18, 1975, but before March 19, 1980, if they are made pursuant to a fixed contract. Section 1101(f)(2) also defines fixed contract. Under that definition, if the seller can vary the price of the product for unspecified cost increases (which could include tax cost increases), or if the quantity of products or commodities to be sold can be increased or decreased under the contract by the seller without penalty, the

contract is not to be considered a fixed contract with respect to the amount over which the seller has discretion. For example, if a contract calls for a minimum delivery of x amount of a product but allows the seller to refuse to deliver goods beyond that minimum amount (or allows a renegotiation of the sales price of goods beyond that amount), then with respect to the amount above the minimum the contract is not a fixed quantity contract.

(h) *Export controlled products—(1) In general.* An export controlled product is not export property. A product or commodity may be an export controlled product at one time but not an export controlled product at another time. For purposes of this paragraph, a product or commodity is an “export controlled product” at a particular time if at that time the export of such product or commodity is prohibited or curtailed under section 4(b) of the Export Administration Act of 1969 or section 7(a) of the Export Administration Act of 1979, to effectuate the policy relating to the protection of the domestic economy set forth in such Acts (paragraph (2)(A) of section 3 of the Export Administration Act of 1969 and paragraph (2)(C) of section 3 of the Export Administration Act of 1979). Such policy is to use export controls to the extent necessary “to protect the domestic economy from the excessive drain of scarce materials and to reduce the serious inflationary impact of foreign demand.”

(2) *Products considered export controlled products—(i) In general.* For purposes of this paragraph, an export controlled product is a product or commodity which is subject to short supply export controls under 15 CFR part 377. A product or commodity is considered an export controlled product for the duration of each control period which applies to such product or commodity. A control period of a product or commodity begins on and includes the initial control date (as defined in subdivision (ii) of this subparagraph) and ends on and includes the final control date (as defined in subdivision (iii) of this subparagraph).

(ii) *Initial control date.* The initial control date of a product or commodity which was subject to short supply export controls on March 19, 1975, is

March 19, 1975. The initial control date of a product or commodity which is subject to short supply export controls after March 19, 1975, is the effective date stated in the regulations to 15 CFR part 377 which subjects such product or commodity to short supply export controls. If there is no effective date stated in such regulations, the initial control date of such product or commodity is the date on which such regulations are filed for publications in the FEDERAL REGISTER.

(iii) *Final control date.* The final control date of a product or commodity is the effective date stated in the regulations to 15 CFR part 377 which removes such product or commodity from short supply export controls. If there is no effective date stated in such regulations, the final control date of such product or commodity is the date on which such regulations are filed for publication in the FEDERAL REGISTER.

(iv) *Expiration of Export Administration Act.* An initial control date and a final control date cannot occur after the expiration date of the Export Administration Act under the authority of which the short supply export controls were issued.

(3) *Effective dates—(i) Products controlled on March 19, 1975.* Except as provided in paragraph (g)(6) of this section, if a product or commodity was subject to short supply export controls on March 19, 1975, this paragraph applies—

(a) With respect to any such product or commodity not owned by a DISC, to sales, exchanges, other dispositions, or leases made after March 18, 1975, with respect to which the DISC derives gross receipts.

(b) With respect to any such product or commodity acquired by a DISC after March 18, 1975, and

(c) With respect to any such product or commodity owned by a DISC on March 18, 1975, to sales, exchanges, other dispositions, and leases made after March 18, 1976, and to owning such product or commodity after such date.

(ii) *Products first controlled after March 19, 1975.* If a product or commodity becomes subject to short supply export controls after March 19, 1975, this paragraph applies to sales,

exchanges, other dispositions, or leases of such product or commodity made on or after the initial control date of such product or commodity, and to owning such product or commodity on or after such date.

(iii) *Date of sale, exchange, lease, or other disposition.* For purposes of this subparagraph, the date of sale, exchange, or other disposition of a product or commodity is the date as of which title to such product or commodity passes. The date of a lease is the date as of which the lessee takes possession of a product or commodity. The accounting method of a person is not determinative of the date of sale, exchange, other disposition, or lease.

(iv) *Property in short supply.* If the President determines that the supply of any property which is otherwise export property as defined in this section is insufficient to meet the requirements of the domestic economy, he may by Executive order designate such property as in short supply. Any property so designated will be treated as property which is not export property during the period beginning with the date specified in such Executive order and ending with the date specified in an Executive order setting forth the President's determination that such property is no longer in short supply.

[T.D. 7514, 42 FR 55461, Oct. 17, 1977, as amended by T.D. 7513, 42 FR 57309, Nov. 2, 1977; T.D. 7854, 47 FR 51740, Nov. 17, 1982]

§ 1.993-4 Definition of producer's loans.

(a) *General rule—(1) Definition.* Under section 993(d), a loan made by a DISC to a person, referred to in this section as the "borrower," is a producer's loan if—

(i) The loan is made out of accumulated DISC income within the meaning of subparagraph (3) of this paragraph.

(ii) The loan is evidenced by an obligation described in subparagraph (4) of this paragraph.

(iii) The requirement as to the trade or business of the borrower described in subparagraph (5) of this paragraph is satisfied.

(iv) At the time the loan is made, the obligation referred to in subdivision (ii) of this subparagraph bears a legend stating "This Obligation Is Designated

A Producer's Loan Within The Meaning of section 993(d) of the Internal Revenue Code'' or words of substantially the same meaning.

(v) The limitation as to the export-related assets of the borrower described in paragraph (b) of this section is satisfied.

(vi) The requirement as to the increased investment of the borrower in export-related assets described in paragraph (c) of this section is satisfied, and

(vii) The requirement of paragraph (d) of this section as to proof of compliance with paragraphs (b) and (c) of this section is satisfied.

(2) *Application of this section*—(i) *In general.* A loan which is a producer's loan is a qualified export asset of the DISC (see §1.993-2(a)(5) and (F)). The interest on a producer's loan is a qualified export receipt of the DISC (see §1.993-1(g)). A producer's loan is not a dividend to a borrower which is also a shareholder of the DISC making the loan. For rules with respect to deemed distributions by reason of the amount of foreign investment attributable to producer's loans, see section 995(b)(1)(G) and (d) and the regulations thereunder.

(ii) *No tracing of loan proceeds.* For purposes of applying this section, in order to qualify as a producer's loan, the proceeds of the loan need not be traced to an investment in any specific asset.

(iii) *Unrelated borrower.* For purposes of applying this section, it is not necessary for a borrower to be a related person with respect to the DISC from which it receives a producer's loan, or a member of the same controlled group as the DISC.

(iv) *Unpaid balance of producer's loans.* For purposes of applying this section, the unpaid balance of producer's loans does not include the unpaid balance of any producer's loan to the extent the loan has been deducted or charged off by the DISC as totally or partially worthless under section 165 or 166.

(v) *Refinancing, renewal, and extension.* For purposes of applying this section, the refinancing, renewal, or extension of a producer's loan shall be treated as the making of a new loan which may qualify as a producer's loan

only if the requirements of subparagraph (1) of this paragraph are met.

(vi) *Events subsequent to time loan is made.* The determination as to whether a loan qualifies as a producer's loan is made on the basis of the relevant facts taken into account for purposes of determining whether the loan was a producer's loan when made. Thus, for example, if the accumulated DISC income of the lender is later reduced below the unpaid balance of all producer's loans previously made by the DISC, such subsequent decrease in the amount of accumulated DISC income will not result in later disqualification of such loan (or part thereof) as a producer's loan. Similarly, if a loan (or part of a loan) does not qualify as a producer's loan because of an insufficient amount of accumulated DISC income at the time the loan is made, a subsequent increase in the amount of accumulated DISC income will not result in later qualification of such loan (or part thereof) as a producer's loan. As a further example, for purposes of applying the borrower's export related assets limitation described in paragraph (b) of this section, a loan which qualifies as a producer's loan when made will not later be disqualified if property, the gross receipts from the sale or lease of which were includible in the numerator of the fraction described in paragraph (b)(3)(i) of this section at the time of sale or lease by the borrower, is later characterized as excluded property (as defined in §1.993-3(f)).

(vii) *Application of tests under paragraphs (b) and (c) on controlled group bases.* If the borrower is a member of a controlled group (as defined in §1.993-1(k)) at the time a loan is made, all amounts that must be determined for purposes of applying the limitation and increased investment requirement with respect to the export-related assets of the borrower (described in paragraphs (b) and (c), respectively, of this section) may be determined at the election of the borrower by aggregating such amounts for all members of the controlled group, determined for the taxable year of each member of the controlled group during which the loan is made, excluding only such members of the group as are DISC's or foreign

corporations for such year. However, such amounts may be included only to the extent that such amounts have not already been taken into account in applying the limitation and increased investment requirement with respect to any other borrower. Amounts to be aggregated for all such members if such election is made include, for example, gross receipts (described in paragraphs (b)(3)(i) and (ii) of this section) and export-related assets (described in paragraph (b)(2) of this section). The borrower may make such election by causing its written statement of election to be attached to the lending DISC's return under section 6011(e)(2) for the first taxable year of the lending DISC within which or with which the borrower's taxable year for which the election is to apply ends. An election once made is binding on all members of the controlled group which includes the borrower with respect to all taxable years of the borrower beginning with its first taxable year for which the election is made. A borrower who makes such election may revoke it only if it secures the consent of the Commissioner to such revocation upon application made through the lending DISC.

(3) *Loan out of accumulated DISC income*—(i) *In general.* A loan is a producer's loan only to the extent that it is made out of accumulated DISC income. A loan is made out of accumulated DISC income only if the amount of the loan, when added to the unpaid balance at the time such loan is made of all other producer's loans made by a DISC, does not exceed the amount of accumulated DISC income of the DISC at the beginning of the month in which the loan is made. The amount of accumulated DISC income at the beginning of any month is determined as if the DISC's taxable year closed at the end of the immediately preceding month.

(ii) *Presumption.* A loan made during a taxable year shall be deemed under subdivision (i) of this subparagraph to have been made out of accumulated DISC income if the balance of producer's loans at the beginning of the year and those made during the year do not exceed accumulated DISC income at the end of the year.

(iii) *Deemed distributions.* For purposes of this subparagraph, accumulated DISC income as of the end of any taxable year (or month) shall be determined without regard to deemed distributions under section 995(b)(1)(G) for the amount of foreign investment attributable to producer's loans for such year (or for the taxable year for which such month is a part) but actual distributions shall be taken into account.

(4) *Evidence and terms of obligation.* A loan is a producer's loan only if the loan is evidenced by a note or other evidence of indebtedness which is made by the borrower and which has a stated maturity date not more than 5 years from the date the loan is made. Accordingly, a loan which does not have a stated maturity date or which has a stated maturity date more than 5 years from the date such loan is made can never meet the 5-year requirement of this subparagraph. Thus, for example, even if there is a period of less than 5 years remaining to the stated maturity date of a loan, the loan can never be a producer's loan if it had a stated maturity date more than 5 years from the date it was made. For a further example, if a loan having a period remaining to maturity of 2 years is extended for a further period of 3 years (making a total of 5 years to maturity from the date of the extension), the extension of the loan would under subparagraph (2)(v) of this paragraph constitute the making of a new producer's loan and the original producer's loan would terminate. If, however, a loan having a period remaining to maturity of 2 years is extended for a further period of 4 years (making a total of 6 years to maturity from the date of the extension), the original producer's loan will terminate and the new loan will not be a producer's loan. If a producer's loan is not paid in full at its maturity date and is not formally refinanced, renewed, or extended, such loan shall be deemed to be a new loan which does not have a stated maturity date and, thus, will not be a producer's loan. For purposes of this subparagraph, an evidence of indebtedness is a written instrument of indebtedness. Section 482 and the regulations thereunder are applicable to determine, in the case of a loan by the DISC to a borrower which

is owned or controlled directly or indirectly by the same interests as the DISC within the meaning of section 482, whether the interest charged on such loan is at an arm's length rate.

(5) *Borrower's trade or business.* A loan is a producer's loan only if the loan is made to a person engaged in the United States in the manufacture, production, growth, or extraction (within the meaning of § 1.993-3(c)) of export property determined without regard to § 1.993-3(f)(1)(iii) and (iv). The borrower may also be engaged in other trades or businesses and the loan need not be traceable to specific investments in export property.

(b) *Borrower's export related assets limitation—(1) General rule.* A loan to a borrower is a producer's loan only to the extent that the amount of the loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower which are outstanding at the time the loan is made, does not exceed an amount equal to the amount of the borrower's export-related assets (determined under subparagraph (2) of this paragraph) multiplied by the fraction set forth in subparagraph (3) of this paragraph.

(2) *Amount of export-related assets—(i) In general.* For purposes of subparagraph (1) of this paragraph, the amount of the borrower's export-related assets is the sum of the amounts described in subdivisions (ii), (iii), and (iv) of this subparagraph.

(ii) *Borrower's plant and equipment.* The amount described in this subdivision is the sum of the borrower's adjusted bases (determined as of the beginning of the borrower's taxable year in which a loan is made to it) for plant, machinery, equipment, and supporting production facilities, which are located in the United States. Supporting production facilities are all property used primarily in connection with the manufacture, production, growth, or extraction (within the meaning of § 1.993-3(c)) or storage, handling, transportation, or assembly of property by the borrower.

(iii) *Borrower's property held primarily for sale or lease.* The amount described in this subdivision is the amount of the borrower's property (at the beginning of the taxable year of the borrower in

which a loan is made to it) held primarily for sale or lease to customers in the ordinary course of its trade or business. The amount of such property held for sale is determined under the methods of identifying and valuing inventory normally used by the borrower. The amount of such property held for lease or leased is the borrower's adjusted bases, determined under section 1011, for such property.

(iv) *Borrower's research and experimental expenditures.* The amount described in this subdivision is the aggregate amount, whether or not charged to capital account, of research and experimental expenditures (within the meaning of section 174) incurred in the United States by the borrower during each of its taxable years which begin after December 31, 1971, and precede the taxable year in which the loan is made to the borrower. Such research and experimental expenditures need bear no relationship to export property (as defined in § 1.993-3) of the borrower. The aggregate amount of all such expenditures for each of such preceding taxable years is taken into account for purposes of this subparagraph, regardless of whether all or any portion of the aggregate amount has been taken into account with respect to producer's loans made to the borrower by any DISC in preceding taxable years. The aggregate amount of all such expenditures shall include such expenditures of a corporation, the assets of which were acquired by the borrower in a distribution or a transfer described in section 381(a)(1) or (2) (relating to carryovers in certain corporate acquisitions).

(3) *Fraction referred to in subparagraph (1) of this paragraph—(i) Numerator of fraction.* The numerator of the fraction set forth in this subparagraph is the sum of the borrower's gross receipts for each of its 3 taxable years immediately preceding the taxable year in which the loan is made (but not including any taxable year beginning before January 1, 1972) from the sale or lease of export property (determined without regard to § 1.993-3(f)(1)(iii) and (iv)) which is manufactured, produced, grown, or extracted (within the meaning of § 1.993-3(c)) by the borrower whether or not

sold or leased directly or through a related domestic person (notwithstanding § 1.993-3(a)(4) and (f)(2)). For purposes of the preceding sentence, with respect to a sale or lease to a related DISC in which the transfer price is determined under section 994(a)(1) or (2), the rules under § 1.994-1(c)(5) (relating to incomplete transactions) shall be applied, and with respect to all other sales and leases the rules under § 1.994-1(c)(5) other than subdivision (i)(d) thereof shall be applied.

(ii) *Denominator of fraction.* The denominator of the fraction set forth in this subparagraph is the sum of the amount included in the numerator and all other gross receipts of the borrower, for each of its taxable years for which gross receipts are included in the numerator of the fraction, from all sales or leases of all property held by the borrower primarily for sale or lease to customers in the ordinary course of its trade or business. For purposes of subdivision (i) of this subparagraph and this subdivision, if such property is sold or leased to a domestic related person which resells or subleases such property, the borrower's gross receipts shall be the gross receipts derived by the domestic related person from the resale or sublease of the export property.

(iii) *Taxable years.* If the borrower has not engaged in the sale or lease of property (as described in this subparagraph) for the 3 immediately preceding taxable years, or if 3 taxable years beginning after December 31, 1971, have not elapsed, the fraction will be computed on the basis of such gross receipts for its taxable years immediately preceding the loan and beginning after December 31, 1971, during which the borrower has so engaged. No producer's loans can be made to a borrower until after the end of the first taxable year of the borrower beginning after December 31, 1971.

(c) *Requirement for increased investment in export-related assets—(1) In general.* A loan to a borrower is a producer's loan only to the extent that the amount of the loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower during the borrower's taxable year during which such loan is made,

does not exceed the amount of the borrower's increase for the year in investment in export-related assets. Such increase for any taxable year is the sum of—

(i) The increase (if any) in the borrower's adjusted basis of certain types of assets as determined under subparagraph (2) of this paragraph and

(ii) The amount (if any) during the year of its research and experimental expenditures as determined under paragraph (b)(2)(iv) of this section.

(2) *Increase in adjusted basis.* The amount under this subparagraph is the amount (not less than zero) by which—

(i) The borrower's adjusted basis (determined as of the end of its taxable year in which the producer's loan is made) in all of its property which is described in paragraph (b)(2)(ii) (plant and equipment), and (iii) (property held primarily for sale or lease) of this section, including any such property acquired by it during such taxable year, exceeds

(ii) Its adjusted bases in all such property (determined as of the beginning of such year).

(3) *Ordering rule.* If during the borrower's taxable year the amount of increase in investment in export-related assets determined under this subparagraph is exceeded by amounts loaned to the borrower during such year that would otherwise qualify as producer's loans, such loans shall be applied in the order made against the amount of such increase in order to determine which loans qualify as producer's loans.

(d) *Proof of borrower's compliance with paragraphs (b) and (c) of this section.* For purposes of paragraphs (b) and (c) of this section, a DISC shall be prepared to establish initially the compliance of the borrower with the requirements of such paragraphs by providing the written statement of the borrower, certified by a certified public accountant, stating that the borrower has complied with the limitation and increased investment requirement in section 993(d)(2) and (3) of the Internal Revenue Code of 1954. In lieu of certification by a certified public accountant, the DISC may attach to its return a statement signed by the borrower under penalties of perjury on a form provided by the Internal Revenue Service certifying

that the borrower has complied with the limitation and increased investment requirement in section 993(d)(2) and (3) of the Internal Revenue Code of 1954. For taxable years ending after October 17, 1977, the DISC must attach either the certification by the certified public accountant or the certification by the borrower to its return. Additional full substantiation of the borrower's compliance with the requirements of such paragraphs may be required by the district director. If full substantiation of such compliance is not provided by the DISC (or the borrower) when required, the loan shall be deemed not to be a producer's loan.

(e) *Special limitation in the case of domestic film maker*—(1) *General rule.* The limitation of paragraph (b) of this section as to the export-related assets of the borrower will be considered satisfied if the DISC—

(i) Is engaged in the trade or business of selling or leasing films which are export property, or is acting as a commission agent for a person who is so engaged,

(ii) Makes a loan to a borrower which is a domestic film maker (as defined in subparagraph (5) of this paragraph) for the purpose of making a film, and

(iii) The amount of such loan, when added to the unpaid balance of all other producer's loans made by all DISC's to the borrower which are outstanding at the time the loan is made, does not exceed an amount determined by multiplying—

(a) The sum of (1) the amount of the export-related assets of the borrower (determined under paragraph (b)(2)(i) of this section as of the beginning of the borrower's taxable year in which the loan is made), plus (2) the amount of a reasonable estimate of the amount of such export related assets obtained or to be obtained by the borrower during such year and subsequent years with respect to films as to which filming begins within such year by

(b) The percentage which, based on the experience of other film makers of similar films for the 5 calendar years preceding the calendar year in which the loan is made, the annual gross receipts (as described in §1.993-6(a)(1), whether or not such films constitute property described therein) of such

other film makers from the sale or lease of such films outside the United States is of the annual gross receipts of such other film makers from all sales or leases of such films.

(2) *Purpose of loan.* A loan by a DISC will be deemed to be for the making of a film if there exists a written agreement between the DISC and the borrower, executed at or before the time the loan is made, stating that the loan is made or to be made to enable the borrower to make such film.

(3) *Reasonable estimate of amounts.* For purposes of subparagraph (1)(iii)(a)(2) of this paragraph, a reasonable estimate shall be based on the conditions known by the DISC and borrower to exist at the time a loan is made (or which the DISC and borrower have reason to know to exist at such time).

(4) *Experience of film makers.* For purposes of subparagraph (1)(iii)(b) of this paragraph, the experience of other film makers of similar films for the 5 calendar years preceding the calendar year in which the loan is made shall be derived from such records and statistics as are acknowledged in the trade as reasonably reliable.

(5) *Domestic film maker.* For purposes of this section, a borrower is a domestic film maker with respect to a film if—

(i) The borrower is a U.S. person within the meaning of section 7701(a)(30), except that (a) with respect to a partnership all of the partners must be U.S. persons and (b) with respect to a corporation all of its officers and at least a majority of its directors must be U.S. persons,

(ii) The borrower is engaged in the trade or business of making the film with respect to which the loan is made,

(iii) Each studio, if any, used or to be used for filming or for recording sound incorporated into such film is located in the United States (as defined in section 7701(a)(9)),

(iv) At least 80 percent of the aggregate playing time of the film is or will be photographed within the United States (as defined in section 7701(a)(9)), and

(v) At least 80 percent of the total amount (not including any amount which is contingent upon receipts or profits of such film and which is fully

taxable by the United States) paid or to be paid for services performed in the making of the film is either paid or to be paid to persons who are U.S. persons at the time such services are performed or consists of amounts which are fully taxable by the United States.

(6) *Amounts as fully taxable.* For purposes of subparagraph (5)(v) of this paragraph, an amount is considered fully taxable by the United States if the entire amount is included in gross income under section 61 or is subject to withholding under any provision of U.S. law or treaty to which the U.S. is a party and is not exempt from taxation under any provision of such law or treaty. Where a nonresident alien individual is engaged for the making of a film or where a foreign corporation is engaged to furnish the services of one of its officers or employees for the making of a film, the amount paid such individual or corporation will be considered as fully taxable by the United States only if it meets the test of this subparagraph.

[T.D. 7514, 42 FR 55464, Oct. 17, 1977, as amended by T.D. 7513, 42 FR 57311, Nov. 2, 1977; T.D. 7514, 42 FR 60910, Nov. 30, 1977; T.D. 7854, 47 FR 51741, Nov. 17, 1982]

§ 1.993-5 Definition of related foreign export corporation.

(a) *General rule—(1) Definition.* Under section 993(e), a foreign corporation is a related foreign export corporation with respect to a DISC if—

(i) It is a foreign international sales corporation described in paragraph (b) of this section,

(ii) It is a real property holding company described in paragraph (c) of this section, or

(iii) It is an associated foreign corporation described in paragraph (d) of this section.

(2) *Application of this section.* It is necessary to determine whether a foreign corporation is a related foreign export corporation with respect to a DISC for the following two purposes:

(i) *Qualified export assets.* Under § 1.993-2(g), the stock or securities of a related foreign export corporation held by the DISC are qualified export assets.

(ii) *Qualified export receipts.* Under § 1.993-1 (e), (f), and (g), certain receipts of the DISC with respect to stock or se-

curities of a related foreign export corporation held by the DISC are qualified export receipts.

(b) *Foreign international sales corporation—(1) In general.* A foreign corporation is a foreign international sales corporation with respect to a taxable year of a DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC owns directly stock of the foreign corporation possessing more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote as determined under the principles of § 1.957-1(b) (relating to definition of controlled foreign corporation),

(ii) 95 percent or more of such foreign corporation's gross receipts (as defined in § 1.993-6) for its taxable year ending with or within such taxable year of the DISC consists of qualified export receipts described in § 1.993-1 (b) through (e) or interest described in § 1.993-1(g) derived from any obligations described in § 1.993-2 (d) or (e), and

(iii) The sum of the adjusted bases of the assets of the foreign corporation which are qualified export assets described in § 1.993-2 (b) through (e) and which are held by the foreign corporation at the close of its taxable year which ends with or within such taxable year of the DISC equals or exceeds 95 percent of the sum of the adjusted bases of all assets held by the foreign corporation at the close of such taxable year.

(2) *Certain determinations.* The determinations as to whether gross receipts are qualified export receipts described in subparagraph (1)(ii) of this paragraph and as to whether assets are qualified export assets described in subparagraph (1)(iii) of this paragraph are made by applying the requirements of §§ 1.993-1 and 1.993-2 to the foreign corporation as if it were a domestic corporation being tested to determine whether it is a DISC. For purposes of making either of such determinations, the principles of accounting applicable for purposes of computing earnings and profits under § 1.964-1 (relating to a controlled foreign corporation's earnings and profits) shall apply.

(c) *Real property holding company*—(1) *In general.* A foreign corporation is a real property holding company with respect to a taxable year of a DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC owns directly stock of the foreign corporation possessing more than 50 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote as determined under the principles of §1.957-1(b) and

(ii) The sole function of the foreign corporation is to hold title to real property situated outside the United States for the exclusive use of the DISC, title to which may not be held by the DISC (and, if the DISC subleases such property to a related supplier, as described in subparagraph (3) of this paragraph, by such related supplier) under the law of the country in which such property is situated.

(2) *Activities of the foreign corporation.* For purposes of subparagraph (1)(ii) of this paragraph, a foreign corporation which holds title to real property situated outside the United States may also perform activities with respect to such property (such as management, maintenance, and payment of taxes) which are ancillary to its function of holding title to such property.

(3) *Exclusive use by the DISC.* Real property held by the foreign corporation must be used exclusively by the DISC whether under a lease or any other arrangement. Real property is not so used by the DISC if the DISC subleases such property to any other person. If, however, during a taxable year of the DISC—

(i) 90 percent or more of the qualified export receipts of the DISC for such year are derived from transactions with respect to which it is a commission agent for a related supplier (as defined in §1.994-1(a)(3)(ii)), and

(ii) The DISC subleases such property to such related supplier

then such property will be considered as used exclusively by the DISC during such year if such related supplier does not sublease such property.

(d) *Associated foreign corporation*—(1) *In general.* A foreign corporation is an

associated foreign corporation with respect to a taxable year of the DISC if—

(i) On each day during such taxable year of the DISC on which the foreign corporation has stock issued and outstanding, the DISC, or one or more members of the same controlled group of corporations (as defined in subparagraph (2) of this paragraph) as the DISC, owns (within the meaning of section 1563 (d) and (e)) stock of the foreign corporation possessing less than 10 percent of the total combined voting power of all classes of stock of the foreign corporation entitled to vote, as determined under the principles of §1.957-1(b), or owns no stock of such corporation, and

(ii) The ownership of stock, or of securities (as defined in §1.993-2(g)), of the foreign corporation by the DISC or by one or more members of such controlled group of corporations reasonably furthers a transaction or transactions giving rise to qualified export receipts for the DISC.

(2) *Controlled group of corporations.* For purposes of this paragraph, the term “controlled group of corporations” has the same meaning assigned to the term in section 1563(a) and not section 993(a)(3) and §1.993-1(k). Thus, for purposes of this paragraph, the test of control is 80 percent control and, since the rules of section 1563(b) apply, only domestic members are considered to be members of the controlled group.

(3) *Furtherance of qualified export receipts.* Ownership of stock or securities of a foreign corporation will be considered as reasonably furthering a transaction or transactions giving rise to qualified export receipts for a DISC if—

(i) The ownership is necessary to obtain or maintain the foreign corporation as a customer of the DISC or of a related supplier, as defined in §1.994-1(a)(3)(ii) of the DISC or to aid the sales distribution system of the DISC or of such related supplier, and

(ii) The amount of the investment in the foreign corporation bears a reasonable relationship to the amount of the DISC’s annual net profit from transactions in its trade or business which it may reasonably expect to derive on account of such ownership.

In determining whether the amount of the investment is reasonable, there

shall be taken into account any stock or securities of the foreign corporation owned by any other foreign corporation which, if it were a domestic corporation, would be a member of the same controlled group of corporations as the DISC.

[T.D. 7514, 42 FR 55467, Oct. 17, 1977; 42 FR 60910, Nov. 30, 1977]

§ 1.993-6 Definition of gross receipts.

(a) *General rule.* Under section 993(f), for purposes of sections 991 through 996, the gross receipts of a person for a taxable year are—

(1) The total amounts received or accrued by the person from the sale or lease of property held primarily for sale or lease in the ordinary course of a trade or business, and

(2) Gross income recognized from all other sources, such as, for example, from—

(i) The furnishing of services (whether or not related to the sale or lease of property described in subparagraph (1) of this paragraph),

(ii) Dividends and interest,

(iii) The sale at a gain of any property not described in subparagraph (1) of this paragraph, and

(iv) Commission transactions as and to the extent described in paragraph (e) of this section.

(b) *Nongross receipts items.* For purposes of paragraph (a) of this section, gross receipts do not include amounts received or accrued by a person from—

(1) The proceeds of a loan or of the repayment of a loan, or

(2) A receipt of property in a transaction to which section 118 (relating to contribution to capital) or 1032 (relating to exchange of stock for property) applies.

(c) *Nonreduction of total amounts.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person are not reduced by returns and allowances, costs of goods sold, expenses, losses, a deduction for dividends received under section 243, or any other deductible amounts.

(d) *Method of accounting.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person shall be determined under the method of accounting used in computing its taxable income. If, for exam-

ple, a DISC receives advance or installment payments for the sale or lease of property described in paragraph (a)(1) of this section, for the furnishing of services, or which represent recognized gain from the sale of property not described in paragraph (a)(1) of this section, any amount of such advance payments is considered to be gross receipts of the DISC for the taxable year for which such amount is included in the gross income of the DISC.

(e) *Commission transactions.* (1) In the case of transactions which give rise to a commission on the sale or lease of property or the furnishing of services by a principal, the amount recognized by the commission agent as gross income from all such transactions shall be the gross receipts derived by the principal from the sale or lease of the property, or the gross income derived by the principal from the furnishing of services, with respect to which the commissions are derived. In the case of a commission agent for a related supplier (as defined in §1.994-1(a)(3)(ii)), the gross receipts or gross income of such agent shall be determined as if it used the same method of accounting as its related supplier. In the case of a commission agent for a principal other than a related supplier, the gross receipts or gross income of such principal shall be determined as if such principal used the same method of accounting as its agent.

(2) If the commission arrangement provides that the commission agent will receive a commission only with respect to sales or leases of export property, or the furnishing of services, which result in qualified export receipts, the commission agent will not take into account the gross receipts or gross income, as the case may be, derived by the principal from any transaction for which the commission agent would not be entitled to a commission under the commission arrangement.

(f) *Example.* The provisions of this section may be illustrated by the following example:

Example. During 1973, M, a related supplier (as defined in §1.994-1(a)(3)(ii)) of N, is engaged in the manufacture of machines in the United States. N, a calendar year taxpayer,

is engaged in the sale and lease of such machines in foreign countries. N furnishes services which are related and subsidiary to its sale and lease of such machines. N also acts as a commission agent in foreign countries for Z, an unrelated supplier, with respect to Z's sale of products. N receives dividends on stock owned by it in a related foreign export corporation (as defined in §1.993-5), interest on producer's loans made to M, and proceeds from sales of business assets located outside the United States resulting in a recognized gain and losses. N's gross receipts for 1973 are \$3,550, computed on the basis of the additional facts assumed in the table below:

| | |
|--|--------------|
| (1) N's sales receipts for machines manufactured by M (without reduction for cost of goods sold and selling expenses) | \$1,500 |
| (2) N's lease receipts for machines manufactured by M (without reduction for depreciation and leasing expenses) | 500 |
| (3) N's gross income from services for machines manufactured by M (without reduction for service expenses) | 400 |
| (4) Z's sale receipts for products manufactured by Z (without reduction for Z's cost of goods sold, commissions on sales, and commission sales expenses) | 550 |
| (5) Dividends received by N | 150 |
| (6) Interest received by N on producer's loans | 200 |
| (7) Proceeds received by N representing recognized gain (but not losses) from sales of business assets located outside the United States | 250 |
| (8) N's gross receipts | <u>3,550</u> |

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

§ 1.993-7 Definition of United States.

Under section 993(g), the term "United States" includes the States, the District of Columbia, the Commonwealth of Puerto Rico, and possessions of the United States. For the requirement that a DISC must be incorporated and existing under the laws of a State or the District of Columbia, see §1.992-1(a)(1).

[T.D. 7514, 42 FR 55468, Oct. 17, 1977]

§ 1.994-1 Inter-company pricing rules for DISC's.

(a) *In general*—(1) *Scope*. In the case of a transaction described in paragraph (b) of this section, section 994 permits a person related to a DISC to determine the allowable transfer price charged the DISC (or commission paid the DISC) by its choice of three methods described in paragraph (c)(2), (3), and (4) of this section: The "4 percent" gross receipts method, the "50-50" combined taxable income method, and the section 482 method. Under the first

two methods, the DISC is entitled to 10 percent of its export promotion expenses as additional taxable income. When the gross receipts method or combined taxable income method is applied to a transaction, the Commissioner may not make distributions, apportionments, or allocations as provided by section 482 and the regulations thereunder. For rules as to certain "incomplete transactions" and for computing combined taxable income, see paragraph (c)(5) and (6) of this section. Grouping of transactions for purposes of applying the method chosen is provided by paragraph (c)(7) of this section. The rules in paragraph (c) of this section are directly applicable only in the case of sales or exchanges of export property to a DISC for resale, and are applicable by analogy to leases, commissions, and services as provided in paragraph (d) of this section. For rules limiting the application of the gross receipts method and combined taxable income method so that the supplier related to the DISC will not incur a loss on transactions, see paragraph (e)(1) of this section. Paragraph (e)(2) of this section provides for the applicability of section 482 to resales by the DISC to related persons. Paragraph (e)(3) of this section provides for the time by which a reasonable estimate of the transfer price (including commissions and other payments) should be paid. The subsequent determination and further adjustments to transfer prices are set forth in paragraph (e)(4) of this section. Export promotion expenses are defined in paragraph (f) of this section. Paragraph (g) of this section has several examples illustrating the provisions of this section. Section 1.994-2 prescribes the marginal costing rules authorized by section 994(b)(2).

(2) *Performance of substantial economic functions*. The application of section 994(a)(1) or (2) does not depend on the extent to which the DISC performs substantial economic functions (except with respect to export promotion expenses). See paragraph (1) of §1.993-1.

(3) *Related party and related supplier*. For the purposes of this section—

(i) The term “related party” means a person which is owned or controlled directly or indirectly by the same interests as the DISC within the meaning of section 482 and § 1.482-1(a).

(ii) The term “related supplier” means a related party which singly engages in a transaction directly with the DISC which is subject to the rules of section 994 and this section. However, a DISC may have different related suppliers with respect to different transactions. If, for example, X owns all the stock of Y, a corporation, and of Z, a DISC, and sells a product to Y which is resold to Z, only Y is the related supplier of Z, and, thus, only the resale from Y to Z is subject to section 994 and this section. If, however, X sells directly to Z and Y also sells directly to Z, then, as to the transactions involving direct sales to Z, each of X and Y is a related supplier of Z.

(b) *Transactions to which section 994 applies.* Section 994(a)(3) may be applied, as described in paragraph (a) of this section, to any transaction between a related supplier and a DISC. Section 994(a)(1) or (2) may be applied, as described in paragraph (a) of this section, to a transaction between a related supplier and a DISC only in the following cases:

(1) Where the related supplier sells export property to the DISC for resale or where the DISC is commission agent for the related supplier on sales by the related supplier of export property to third parties whether or not related parties. For purposes of this section, references to sales include exchanges.

(2) Where the related supplier leases export property to the DISC for sublease for a comparable period with comparable terms of payment or where the DISC is commission agent for the related supplier on leases by the related supplier of export property to third parties whether or not related parties.

(3) Where services are furnished by a related supplier which are related and subsidiary to any sale or lease by the DISC, acting as principal or commission agent, of export property under subparagraph (1) or (2) of this paragraph.

(4) Where engineering or architectural services for construction projects

located (or proposed for location) outside of the United States are furnished by a related supplier where the DISC is acting as principal or commission agent with respect to the furnishing of such services to a third party whether or not a related party.

(5) Where the related supplier furnishes managerial services in furtherance of the production of qualified export receipts of an unrelated DISC where the related DISC is acting as principal or commission agent with respect to the furnishing of such services to an unrelated DISC.

Transactions are included, for purposes of this paragraph, only if they give rise to qualified export receipts (within the meaning of section 993(a)) in the hands of the related DISC. If a transaction is not included in subparagraph (1), (2), (3), (4), or (5) of this paragraph, the rules of section 994(a)(1) or (2) do not apply. Thus, for example, the rules of section 994(a)(1) or (2) would not apply if a DISC purchased export property from its related supplier and leased such property to a third party.

(c) *Transfer price for sales of export property*—(1) *In general.* Under this paragraph, rules are prescribed for computing the allowable price for a transfer from a related supplier to a DISC in the case of a sale of export property described in paragraph (b)(1) of this section.

(2) *The “4-percent” gross receipts method.* Under the gross receipts method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 4 percent of the qualified export receipts of the DISC derived from the sale of the export property (as defined in section 993 (c)) and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(3) *The “50-50” combined taxable income method.* Under the combined taxable income method of pricing, the transfer price for a sale by the related supplier to the DISC is the price as a result of which the taxable income derived by the DISC from the sale will not exceed the sum of (i) 50 percent of

the combined taxable income (as defined in subparagraph (6) of this paragraph) of the DISC and its related supplier attributable to the qualified export receipts from such sale and (ii) 10 percent of the export promotion expenses (as defined in paragraph (f) of this section) of the DISC attributable to such qualified export receipts.

(4) *Section 482 method.* If the rules of subparagraphs (2) and (3) of this paragraph are inapplicable to a sale or a taxpayer does not choose to use them, the transfer price for a sale by the related supplier to the DISC is to be determined on the basis of the sale price actually charged but subject to the rules provided by section 482 and the regulations thereunder.

(5) *Incomplete transactions.* (i) For purposes of the gross receipts and combined taxable income methods, where property (encompassed within a transaction or group chosen under subparagraph (7) of this paragraph) is transferred by a related supplier to a DISC during a taxable year of either the DISC or related supplier, but some or all of such property is not sold by the DISC during such year—

(a) The transfer price of such property sold by the DISC during such year shall be computed separately from the transfer price of the property not sold by the DISC during such year,

(b) With respect to such property not sold by the DISC during such year, the transfer price paid by the DISC for such year shall be the related supplier's cost of goods sold (see subparagraph (6)(ii) of this paragraph) with respect to the property, except that, with respect to such taxable years ending on or before August 15, 1975, the transfer price paid by the DISC shall be at least (but need not exceed) the related supplier's cost of goods sold with respect to the property.

(c) For the subsequent taxable year during which such property is resold by the DISC, an additional amount shall be paid by the DISC (to be treated as income for such year by the related supplier) equal to the excess of the amount which would have been the transfer price under this section had the transfer to the DISC by the related supplier and the resale by the DISC taken place during the taxable year of

the DISC during which it resold the property over the amount already paid under (b) of this subdivision.

(d) The time and manner of payment of transfer prices required by (b) and (c) of this subdivision shall be determined under paragraphs (e)(3), (4), and (5) of this section.

(ii) For purposes of this paragraph, a DISC may determine the year in which it receives property from a related supplier and the year in which it sells property in accordance with the method of identifying goods in its inventory properly used under section 471 or 472 (relating respectively to general rule for inventories and to LIFO inventories). Transportation expense of the related supplier in connection with a transaction to which this subparagraph applies shall be treated as an item of cost of goods sold with respect to the property if the related supplier includes the cost of intracompany transportation between its branches, divisions, plants, or other units in its cost of goods sold (see subparagraph (6)(ii) of this paragraph).

(6) *Combined taxable income.* For purposes of this section, the combined taxable income of a DISC and its related supplier from a sale of export property is the excess of the gross receipts (as defined in section 993(f)) of the DISC from such sale over the total costs of the DISC and related supplier which relate to such gross receipts. Gross receipts from a sale do not include interest with respect to the sale. Combined taxable income under this paragraph shall be determined after taking into account under paragraph (e)(2) of this section all adjustments required by section 482 with respect to transactions to which such section is applicable. In determining the gross receipts of the DISC and the total costs of the DISC and related supplier which relate to such gross receipts, the following rules shall be applied:

(i) Subject to subdivisions (ii) through (v) of this subparagraph, the taxpayer's method of accounting used in computing taxable income will be accepted for purposes of determining amounts and the taxable year for which items of income and expense (including depreciation) are taken into account. See § 1.991-1(b)(2) with respect

to the method of accounting which may be used by a DISC.

(ii) Cost of goods sold shall be determined in accordance with the provisions of § 1.61-3. See sections 471 and 472 and the regulations thereunder with respect to inventories. With respect to property to which an election under section 631 applies (relating to cutting of timber considered as a sale or exchange), cost of goods sold shall be determined by applying § 1.631-1(d)(3) and (e) (relating to fair market value as of the beginning of the taxable year of the standing timber cut during the year considered as its cost).

(iii) Costs (other than cost of goods sold) which shall be treated as relating to gross receipts from sales of export property are (a) the expenses, losses, and other deductions definitely related, and therefore allocated and apportioned, thereto, and (b) a ratable part of any other expenses, losses, or other deductions which are not definitely related to a class of gross income, determined in a manner consistent with the rules set forth in § 1.861-8.

(iv) The taxpayer's choice in accordance with subparagraph (7) of this paragraph as to the grouping of transactions shall be controlling, and costs deductible in a taxable year shall be allocated and apportioned to the items or classes of gross income of such taxable year resulting from such grouping.

(v) If an account receivable arising with respect to a sale of export property is transferred by the related supplier to a DISC which is a member of the same controlled group within the meaning of § 1.993-1(k) for an amount reflecting a discount from the selling price taken into account in computing (without regard to this subdivision) combined taxable income of the DISC and its related supplier, then the combined taxable income from such sale shall be reduced by the amount of the discount.

(7) *Grouping transactions.* (i) Generally, the determinations under this section are to be made on a transaction-by-transaction basis. However, at the annual choice of the taxpayer some or all of these determinations may be made on the basis of groups consisting of products or product lines.

(ii) A determination by a taxpayer as to a product or a product line will be accepted by a district director if such determination conforms to any one of the following standards: (a) A recognized industry or trade usage, or (b) the 2-digit major groups (or any inferior classifications or combinations thereof, within a major group) of the Standard Industrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President.

(iii) A choice by the taxpayer to group transactions for a taxable year on a product or product line basis shall apply to all transactions with respect to that product or product line consummated during the taxable year. However, the choice of a product or product line grouping applies only to transactions covered by the grouping and, as to transactions not encompassed by the grouping, the determinations are made on a transaction-by-transaction basis. For example, the taxpayer may choose a product grouping with respect to one product and use the transaction-by-transaction method for another product within the same taxable year.

(iv) For rules as to grouping certain related and subsidiary services, see paragraph (d)(3)(ii) of this section.

(d) *Rules under section 994(a)(1) and (2) for transactions other than sales.* The following rules are prescribed for purposes of applying the gross receipts method or combined taxable income method to transactions other than sales:

(1) *Leases.* In the case of a lease of export property by a related supplier to a DISC for sublease by the DISC to produce gross receipts, for any taxable year the amount of rent the DISC must pay to the related supplier shall be determined under the DISC's lease with its related supplier but must be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales and resales of export property under the gross receipts method or combined taxable income method. For purposes of applying this subparagraph, transactions may not be so grouped on a product or product line basis under the rules of paragraph (c)(7)

of this section as to combine in any one group of transactions both lease transactions and sale transactions involving the same product or product line.

(2) *Commissions.* If any transaction to which section 994 applies is handled on a commission basis for a related supplier by a DISC and such commissions give rise to qualified export receipts under section 993(a)—

(i) The amount of the income that may be earned by the DISC in any year is the amount, computed in a manner consistent with paragraph (c) of this section, which the DISC would have been permitted to earn under the gross receipts method, the combined taxable income method, or section 482 method if the related supplier had sold (or leased) the property or service to the DISC and the DISC in turn sold (or subleased) to a third party, whether or not a related party, and

(ii) The maximum commission the DISC may charge the related supplier is the sum of the amount of income determined under subdivision (i) of this subparagraph plus the DISC's total costs for the transaction as determined under paragraph (c)(6) of this section.

(3) *Receipts from services—(i) Related and subsidiary services attributable to the year of the export transaction.* The gross receipts for related and subsidiary services described in paragraph (b)(3) of this section shall be treated as part of the receipts from the export transaction to which such services are related and subsidiary, but only if, under the arrangement between the DISC and its related supplier and the accounting method otherwise employed by the DISC, the income from such services is includible for the same taxable year as income from such export transaction.

(ii) *Other services.* In the case of related and subsidiary services to which subdivision (i) of this subparagraph does not apply and other services described in paragraph (b)(4) or (5) of this section performed by a related supplier (relating respectively to engineering and architectural services and certain managerial services), the amount of taxable income which the DISC may derive for any taxable year shall be determined under the arrangement between the DISC and its related supplier

and shall be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales for resale of export property under the gross receipts method or combined taxable income method. Related and subsidiary services to which subdivision (i) of this subparagraph does not apply may be grouped, under the rules for grouping of transactions in paragraph (c)(7) of this section, with the products or product lines to which they are related and subsidiary, so long as the grouping of services chosen is consistent with the grouping of products or product lines chosen for the taxable year in which either the product or product lines were sold or in which payment for such services is received or accrued. The rules for grouping of transactions in paragraph (c)(7) of this section shall not apply with respect to the determination of taxable income which the DISC may derive from other services described in paragraph (b)(4) or (5) of this section performed by a related supplier or commissions on such services, and such determination shall be made only on a transaction-by-transaction basis.

(e) *Methods of applying paragraphs (c) and (d) of this section—(1) Limitation on DISC income (“no loss” rule)—(i) In general.* Except as otherwise provided in this subparagraph, neither the gross receipts method nor the combined taxable income method may be applied to cause in any taxable year a loss to the related supplier, but either method may be applied to the extent it does not cause a loss. A loss to a related supplier would result if the taxable income of the DISC would exceed the combined taxable income of the related supplier and the DISC. If, however, there is no combined taxable income of the DISC and the related supplier (because, for example, a combined loss is incurred), a transfer price (or commission) will not be deemed to cause a loss to the related supplier if it allows the DISC to recover an amount not in excess of its costs (if any).

(ii) *Special rule for applying “4 percent” gross receipts method to sales.* A

transfer price or commission, determined under the “4 percent” gross receipts method (determined without regard to subdivision (i) of this subparagraph), for a sale of export property referred to in paragraph (b)(1) of this section, will not be considered to cause a loss for the related supplier if for the DISC’s taxable year, the ratio that (a) the taxable income of the DISC derived from such sale by using such price or commission bears to (b) the DISC’s gross receipts from such sale is not greater than the ratio that (c) all of the taxable income of the related supplier and the DISC from all sales of the same product or product line (domestic and foreign) to third parties whether or not related parties bears to (d) the total gross receipts of the related supplier and the DISC from such sales. For purposes of the preceding sentence, sales between the DISC and its related suppliers shall not be taken into account under (c) or (d) of this subdivision. For example, assume that for a taxable year of a DISC the total costs of the related supplier and the DISC with respect to all sales (\$150 for domestic and \$44 for foreign) of a product line are \$194 and the total gross receipts of the related supplier and the DISC with respect to such sales are \$200 so that the total taxable income of the related supplier and the DISC with respect to such sales is \$6. The parties would thus be entitled to compute a transfer price determined under the gross receipts method on any given sale of product A of such product line by the related supplier to the DISC which would allocate to the DISC taxable income equal to not more than 3 percent (*i.e.*, \$6/\$200) of its gross receipts derived from its resale of such product. If the DISC were to resell an item of product A for \$10, the transfer price paid by the DISC to the related supplier determined under the gross receipts method could be as low as \$9.70.

(iii) *Grouping transactions.* For purposes of subdivision (i) of this subparagraph, the basis for grouping transactions chosen by the taxpayer under paragraph (c)(7) of this section for the taxable year shall be applied. For purposes of making the computations of subdivision (ii) (c) and (d) of this subparagraph, however, the taxpayer may

choose any basis for grouping transactions permissible under paragraph (c)(7) of this section, even though it may not be the same basis as that already chosen under paragraph (c)(7) of this section for computing transfer prices or commissions to a DISC. If, for example, the taxpayer has chosen to group transactions on a product basis for computing transfer prices or commissions to a DISC for a taxable year, the taxpayer may still group transactions on a product line basis for purposes of computing taxable income and total gross receipts under subdivision (ii) (c) and (d) of this subparagraph. For a further example, if the taxpayer computes taxable income for one group of transactions under the gross receipts method and computes taxable income for a second group of transactions under the combined taxable income method, the taxpayer may aggregate these transactions for purposes of computing taxable income and total gross receipts under subdivision (ii) (c) and (d) of this subparagraph.

(2) *Relationship to section 482.* In applying the rules under section 994, it may be necessary to first take into account the price of a transfer (or other transaction) between the DISC (or related supplier) and a related party which is subject to the arm’s length standard of section 482. Thus, for example, where a related supplier sells export property to a DISC which the related supplier purchased from related parties, the costs taken into account in computing the combined taxable income of the DISC and the related supplier are determined after any necessary adjustment under section 482 of the price paid by the related supplier to the related parties. In applying section 482 to a transfer by a DISC, however, the DISC and its related supplier are treated as if they were a single entity carrying on all the functions performed by the DISC and the related supplier with respect to the transaction and the DISC shall be allowed to receive under the section 482 standard the amount the related supplier would have received had there been no DISC.

(3) *Initial payment of transfer price or commission.* (i) The amount of a transfer price (or reasonable estimate thereof) actually charged by a related supplier

to a DISC, or a sales commission (or reasonable estimate thereof) actually charged by a DISC to a related supplier, in a transaction to which section 994 applies must be paid no later than 60 days following the close of the taxable year of the DISC during which the transaction occurred.

(ii) Payment must be in the form of money, property (including accounts receivable from sales by or through the DISC), a written obligation which qualifies as debt under the safe harbor rule of §1.992-1(d)(2)(ii), or an accounting entry offsetting the account receivable against an existing debt owed by the person in whose favor the account receivable was established to the person with whom it engaged in the transaction. The form of the payment to a DISC need not be a qualified export asset under §1.993-2. However, for the requirement that the adjusted basis of the qualified export assets of the DISC at the close of its taxable year must equal or exceed 95 percent of the sum of the adjusted bases of all assets of the DISC at the close of its taxable year, see section 992(a)(1)(B).

(iii) If the district director can demonstrate, based upon the data available as of the 60th day after the close of such taxable year, that the amount actually paid did not represent a reasonable estimate of the transfer price or commission (as the case may be) to be determined under section 994 and this section, an indebtedness will be deemed to arise, from the person required to make the payment in favor of the person to whom the payment is required to be made, in an amount equal to the difference between the amount of the transfer price or commission determined under section 994 and this section and the amount (if any) actually paid and received. Such indebtedness will be deemed to arise as of the date the transaction occurred which gave rise to the indebtedness, except that, if such transaction occurred in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the indebtedness will be deemed to arise as of the date by which payment was required under subdivision (i) of this paragraph (e)(3). Such indebtedness owed to a DISC shall be treated as an asset but shall not be treated as a

trade receivable or other qualified export asset (see §1.993-2(d)(3)) as of the end of the taxable year of the DISC in which the indebtedness is deemed to arise.

(iv)(a) Except with respect to incomplete transactions to which paragraph (c)(5)(i)(b) of this section applies, if the amount actually paid results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction as reported in its tax return for the taxable year the transaction is completed, then the amount actually paid shall be deemed to be a reasonable estimate of such transfer price or commission.

(b) With respect to incomplete transactions to which paragraph (c)(5)(i)(b) of this section applies and which were initiated during a taxable year ending after August 15, 1975, the amount actually paid shall be deemed to be a reasonable estimate of such transfer price if any one of the following three tests is met:

(1) The amount actually paid by the DISC to the related supplier in respect of the property does not exceed the related supplier's cost of goods sold (see paragraph (c)(6)(ii) of this section) with respect to the property.

(2) If the transaction is completed by the date on which the DISC's return is required to be filed for the year in which the transaction was initiated, the amount actually paid by the DISC to the related supplier in respect of the property results in the DISC realizing at least 50 percent of the DISC's taxable income from the transaction when completed.

(3) The percentage that (i) an amount equal to (a) the amount actually paid by the DISC to the related supplier in respect of the property minus (b) the related supplier's cost of goods sold with respect to the property, bears to (ii) the related supplier's cost of goods sold in respect of the property, is not greater than 50 percent of the percentage that (iii) the combined taxable income for completed transactions of the same group as the property during the DISC's taxable year in which the incomplete transaction was initiated, bears to (iv) the cost of goods sold of the related supplier and DISC with respect to such transactions.

(c) For purposes of this subdivision (iv), whether the transfer price or commission actually paid is deemed a reasonable estimate may be determined on the basis for grouping transactions chosen by the taxpayer under paragraph (c)(5) and (7) of this section.

(v) An indebtedness arising under subdivision (iii) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by § 1.482-2(a)(2) from the 61st day after the close of the DISC's taxable year in which the transaction occurred which gave rise to the indebtedness to the date of payment. The interest so computed shall be accrued and included in the taxable income of the person to whom the indebtedness is owed for each taxable year during which the indebtedness is unpaid.

(4) *Subsequent determination of transfer price or commission.* The DISC and its related supplier would ordinarily determine under section 994 and this section the transfer price payable by the DISC (or the commission payable to the DISC) for a transaction before the DISC files its return for the taxable year of the transaction. After the DISC has filed its return, a redetermination of the transfer price (or commission) may only be made if permitted by the Code and the regulations thereunder. Such a redetermination would include a redetermination by reason of an adjustment under section 482 and the regulations thereunder or section 861 and § 1.861-8 which affects the amounts which entered into the determination of the transfer price or commission.

(5) *Procedure for adjustments to transfer price or commission—(i)(a)* If the transfer price (or commission) for a transaction determined under section 994 is different from the price (or commission) actually charged, the person who received too small a transfer price (or commission) or paid too large a transfer price (or commission) shall establish (or be deemed to have established), at the date of the determination or redetermination under subparagraph (4) of this paragraph of the transfer price (or commission) under section 994, an account receivable due the DISC from the person with whom it engaged in the transaction equal to the difference in amount between the transfer

price (or commission) so determined and the transfer price (or commission) previously paid and received. If the account receivable is paid within 90 days after the date it is established (or deemed established), then as of the end of the taxable year of the DISC in which the transaction occurred which gave rise to the indebtedness, the account receivable shall be treated as an asset and, under § 1.993-2(d)(3) as a trade receivable, and thus as a qualified export asset.

(b) If, for example, during 1972, a DISC which uses the calendar year as its taxable year sold a product which it purchased that year from its related supplier and paid a price of \$10,000 which price is a reasonable estimate under subparagraph (3)(iii) of this paragraph but is later determined under section 994 to be \$8,000 immediately before the DISC filed its return for 1972, the DISC must be paid \$2,000 (i.e., \$10,000 - \$8,000) by its related supplier or establish an account receivable from its related supplier of \$2,000. The account receivable may be paid without tax consequences, provided that such account receivable is paid within 90 days after the date it is established (or deemed established). Such account receivable paid within such 90 days will be considered to relate to the taxable year in which the transaction occurred which gave rise thereto rather than the taxable year during which it is established or paid.

(ii) Payment must be in a form specified in subparagraph (3) of this paragraph.

(iii) If an account receivable of a DISC described in subdivision (i) of this paragraph (e)(5) is not paid within 90 days of the date it is established (or deemed established), then, as of the end of the taxable year of the DISC in which the transaction occurred which gives rise to the indebtedness, the account receivable shall be treated as an asset except that, if the account receivable is established (or deemed established) in a taxable year of the DISC ending on or before August 15, 1975, at the taxpayer's option, the account receivable shall be treated as an asset as of the end of such taxable year. However, under § 1.993-2(d)(3), an account receivable referred to in the preceding

sentence shall not be treated as a trade receivable or other qualified export asset.

(iv) An account receivable established in accordance with subdivision (i) of this subparagraph shall bear interest at an arm's length rate, computed in the manner provided by § 1.482-2(a)(2) from the day after the date the account receivable is deemed established to the date of payment. The interest so computed shall be accrued and included in the taxpayer's taxable income for each taxable year during which the account receivable is outstanding.

(v)(a) In lieu of establishing an account receivable in accordance with subdivision (i) of this subparagraph for all or part of an amount due a related supplier, the related supplier and DISC are permitted to treat all or part of any distribution which was made by the DISC out of its previously taxed income with respect to the year to which the determination or redetermination relates as an additional payment of transfer price or repayment of commission (and not as a distribution) made as of the date the distribution was made. Any additional amount arising on the determination or redetermination due the related supplier after this treatment shall be represented by an account receivable established under subdivision (i) of this subparagraph. To the extent that a distribution is so treated under this subdivision (v), it shall cease to qualify as distribution for any Federal income tax purpose, and the DISC's account for previously taxed income shall be adjusted accordingly. If all or part of any distribution made to a shareholder other than the related supplier is recharacterized under this subdivision (v), the related supplier shall establish an account receivable from that shareholder for the amount so recharacterized. Such account receivable shall be paid in the time and manner set forth in this paragraph (e)(5). In order to obtain the relief provided by this subdivision (v), the conditions and procedures prescribed by Revenue Procedure 84-3 must be met. The provisions of this paragraph (e)(5)(v) shall apply to all open taxable years ending after December 31, 1971.

(b) If, for example, during 1982, a DISC commission from a related supplier with respect to a transaction completed in 1980 was redetermined to be \$1,000 less than the commission actually charged by, and paid to, the DISC, the amount of any distribution previously made by the DISC from its 1980 previously taxed income to the related supplies as a shareholder may, to the extent of \$1,000, be treated not as a distribution but as a repayment of the commission.

(vi) The procedure for adjustments to transfer price provided by this subparagraph does not apply to incomplete transactions described in paragraph (c)(5)(i)(b) of this section. Such procedure will, however, be applied to any such transaction with respect to the taxable year in which the transaction is completed.

(6) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. (i) During 1975, a DISC which uses the calendar year as its taxable year purchased a product from its related supplier and made an initial payment of \$8,500. If \$3,500 were determined to be the transfer price under section 994, the DISC's taxable income from the transaction would be \$1,000. Immediately before the DISC filed its return for 1975, under section 994 it is determined that the transfer price is \$8,000 and the DISC's taxable income is \$1,500. Thus, the requirement of a reasonable estimate under subparagraph (3) of this paragraph was met because the amount (\$8,500) actually paid resulted in the DISC realizing taxable income of \$1,000 which is not less than 50 percent of the DISC's taxable income (\$1,500) from the transaction as determined under section 994.

(ii) Pursuant to subparagraph (5) of this paragraph, an account receivable due the DISC for \$500, i.e., \$8,500 - \$8,000, is established on September 15, 1976, the date the DISC files its return for 1975, and is paid on December 1, 1976. The account receivable for \$500 will be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto and will be a qualified export asset under § 1.993-2(d)(3) for the last day of such year.

Example 2. Assume the same facts as in example 1 except that the account receivable for \$500 is paid on January 1, 1977. The account receivable for \$500 will still be considered to relate to the taxable year (1975) in which the transaction occurred which gave rise thereto. However, such account receivable will be treated as an asset which is not

§ 1.994-1

26 CFR Ch. I (4-1-23 Edition)

a qualified export asset under § 1.993-2(d)(3) for the last day of such year.

(f) *Export promotion expenses*—(1) *Purpose of expense.* (i) In order for an expense or cost of a type described in subparagraph (2) of this paragraph to be an export promotion expense, the expense or cost must be incurred or treated as incurred by the DISC (under subparagraph (7) of this paragraph) to advance the sale, lease, or other distribution of export property for use, consumption, or distribution outside the United States. Costs of services in performing installation (but not assembly) on the site and for meeting warranty commitments if such services are related and subsidiary (within the meaning of § 1.993-1(d)) to any qualified sale, lease, or other distribution of export property by the DISC (or with respect to which the DISC received a commission) will be considered to advance the sale, lease, or other distribution of export property. General and administrative expenses attributable to billing customers, other clerical functions of the DISC, or generally operating the DISC, will also be considered to advance the sale, lease, or other distribution of export property.

(ii) Where an expense or cost incurred or treated as incurred by the DISC qualifies only in part as an export promotion expense, such expense or cost must be allocated between the qualified portion and such other portion on a reasonable basis. See § 1.994-2(b)(2) for the option of the related supplier not to claim expenses as export promotion expenses.

(2) *Types of expenses.* The only expenses or costs which may be export promotion expenses are those expenses or costs meeting the test of subparagraph (1) of this paragraph which constitute—

(i) Ordinary and necessary expenses of the DISC paid or incurred during the DISC's taxable year in carrying on any trade or business, allowable as deductions under section 162, such as expenses for market studies, advertising, salaries and wages (including contributions or compensations deductible under section 404) of sales, clerical, and other personnel, rentals on property, sales commissions, warehousing, and other selling expenses,

(ii) A reasonable allowance under section 167 for exhaustion, wear and tear, or obsolescence of the property of the DISC,

(iii) Costs of freight (subject to the limitations of subparagraph (4) of this paragraph),

(iv) Costs of packaging for export (as defined in subparagraph (5) of this paragraph), or

(v) Costs of designing and labeling packages exclusively for export markets (under subparagraph (6) of this paragraph).

(3) *Ineligible expenses.* Items ineligible to be export promotion expenses include, for example, interest expenses, bad debt expenses, freight insurance, State and local income and franchise taxes, the cost of manufacture or assembly operations, and items of cost of goods sold (except as otherwise provided in this paragraph in the case of certain freight, packaging, and designing and labeling expenses). Income or similar taxes eligible for a foreign tax credit under sections 901 and 903 are also not eligible to be export promotion expenses.

(4) *Freight expenses*—(i) *In general.* Export promotion expenses include one-half of the freight expense (not including insurance) for shipping export property aboard a U.S.-flag carrier in those cases where law or regulation of the United States or of any State or political subdivision thereof or of any agency or instrumentality of any of these does not require that the export property be shipped aboard a U.S.-flag carrier. For purposes of this paragraph, the term “freight expense” includes charges paid for c.o.d. service, miscellaneous ground charges, such as charges incurred for services normally performed by U.S.-flag carriers, charges for services of loading aboard U.S.-flag carriers normally performed by such carriers, freight forwarders, or independent contractors engaged in loading property, and charges attributable to a freight consolidation function normally performed by freight forwarders. In order for one-half of freight expenses paid to the owner (or the agent of the owner) of a U.S.-flag carrier to be claimed as an export promotion expense, the DISC must obtain

a written statement (such as, for example, a bill of lading) from the owner (or the agent) disclosing that the export property was shipped aboard the owner's U.S.-flag carrier or another U.S.-flag carrier, and the DISC must have no reasonable basis for disbelieving such statement of the owner (or the agent). For the requirement of a written statement from a freight forwarder, see subdivision (iv) of this subparagraph.

(ii) *U.S.-flag carrier defined.* For purposes of this paragraph, the term "U.S.-flag carrier" is an airplane owned and operated by a U.S. person or persons (as defined in section 7701(a)(30)) or a ship documented under the laws of the United States. Shipment initiated by delivery to the U.S. Postal Service shall be considered shipment aboard a U.S.-flag carrier, but not if shipped to a place to which mail shipments from the United States are ordinarily accomplished by land transportation, such as to Canada or Mexico, unless airmail is specified.

(iii) *Shipment pursuant to law or regulation.* Shipment pursuant to law or regulation includes instances where a U.S.-flag carrier must be used in order to obtain permission from the Government to make the export. If the law or regulation requires a fixed portion of the export property to be shipped aboard a U.S.-flag carrier, the freight expense on that portion of such export property that was so shipped in order to satisfy such requirement cannot qualify as an export promotion expense.

(iv) *Freight forwarders.* A payment to a freight forwarder shall be considered freight expense within the meaning of this paragraph to the extent the forwarder utilizes a U.S.-flag carrier. For purposes of this paragraph, the term "freight forwarder" includes air freight consolidators and carriers owned and operated by U.S. persons utilizing U.S.-flag carriers such as non-vessel-owning common carriers. In order for one-half of freight expenses paid to a freight forwarder to be claimed as export promotion expenses, the DISC must obtain a written statement (such as, for example, a bill of lading) from the freight forwarder disclosing that the export property was shipped aboard a U.S.-flag

carrier, and the DISC must have no reasonable basis for disbelieving such statement of the freight forwarder.

(v) *Freight within the United States.* A DISC may not claim as export promotion expense any amount that is attributable to carriage of export property between points within the United States. If, however, export property is carried from the United States to a foreign country on a through shipment pursuant to a single bill of lading or similar document aboard one or more U.S.-flag carriers, the freight expense of such carriage shall not be apportioned between the domestic and foreign portions of such carriage, even though a carrier may stop en route within the United States or the export property may be shifted from one carrier to another, and one-half of such freight expense may be claimed as an export promotion expense. Freight expense does not include the cost of transporting the export property to the depot of the U.S.-flag carrier or freight forwarder for shipment abroad. The expense of shipment of export property initiated by delivery to the U.S. Postal Service for ultimate delivery outside the United States shall be considered as attributable entirely to carriage of such property outside the United States.

(5) *Packaging for export.* (i) Export promotion expenses include the direct and indirect cost of packaging export property (including the cost of the package) for export whether or not the packaging is the same as domestic packaging. Such packaging costs do not include costs of manufacturing (as defined in the regulations under section 993) and assembly. Thus, if a DISC buys and packages export property for resale, its costs of packaging the export property are export promotion expenses. If, however, the process of such packaging by the DISC is physically integrated with the process of manufacturing the export property by the related supplier, the costs of such packaging are not export promotion expenses.

(ii) The cost of containers leased from a shipping company to which the DISC also pays freight for the property packaged is not a cost of packaging. However, in such circumstances, one-

half of the rental charge may be allowable as a freight expense if permitted under subparagraph (4) of this paragraph.

(6) *Designing and labeling packages.* Export promotion expenses include the direct and indirect costs of designing and labeling packages, including bottles, cans, jars, boxes, cartons, or containers, to the extent incurred for export markets. Thus, for example, to the extent incurred for supplying export markets, the cost of designing labels in a foreign language and the cost of printing such labels are export promotion expenses.

(7) *DISC must incur export promotion expenses*—(i) *In general.* In order for an expense to be an export promotion expense it must be incurred or treated as incurred under this subparagraph by the DISC. For example, an expense is incurred by a DISC if the expense results from (a) the DISC incurring an obligation to pay compensation to its employees, (b) depreciation of property owned by the DISC and used by its employees, (c) the DISC incurring an obligation to pay for office supplies used by its employees, (d) the DISC incurring an obligation to pay space costs for use by its employees, or (e) the DISC incurring an obligation to pay other costs supporting efforts by its employees.

(ii) *Payments to independent contractors.* A payment to an independent contractor, directly or indirectly, is treated as incurred by the DISC if the cost of performing the function performed by the independent contractor would be considered an export promotion expense described in subparagraphs (1) and (2) of this paragraph if performed by the DISC, and if, in a case where the services of the independent contractor were engaged by a party related to the DISC, such related party and such DISC agreed in writing before the contract was entered into that a specified portion or all of the contract was for the benefit of the DISC and that all of the expenses of the contract (eligible to be considered as export promotion expenses) with respect to such portion would be borne by the DISC.

(iii) *Expenses incurred by related parties.* Reimbursements or other payments by a DISC to a related party are

export promotion expenses only if the expenses of the related party for which reimbursement is made are for space in a building actually used by employees of the DISC or for export property owned by the DISC. Except as otherwise provided in the preceding sentence, expenses incurred by a foreign international sales corporation (FISC) or a real property holding company (as defined in section 993(e)(1) and (2), respectively) shall not be treated as export promotion expenses of its DISC.

(iv) *Selling commissions paid by a DISC.* A commission paid by a DISC to a person other than a related person, with respect to a transaction which gives rise to qualified export receipts of the DISC, is an export promotion expense of the DISC. A commission paid by a DISC to a related person is not an export promotion expense.

(v) *Sales of promotional material.* If a DISC sells promotional material to a buyer of export property from the DISC at a price which is greater than the costs of the DISC for such material, such costs are not export promotion expenses. If, however, the DISC sells promotional material at a price which is less than its costs for such material, the excess of such costs over such price is an export promotion expense. For rules relating to the status of promotional material as qualified export assets and export property, see §§1.993-2 and 1.993-3, respectively.

(vi) An expense may be incurred by the DISC under subdivisions (i) through (v) of this subparagraph even if the accounting for and payment of such expense is handled by a related party and the DISC reimburses the related party for such expenses.

(8) *Incomplete transactions.* Expenses eligible to be treated as export promotion expenses which are attributable to the sale, lease, or other distribution of export property and which are incurred prior to the taxable year of sale, lease, or other distribution by the DISC are not treated as export promotion expenses until the taxable year of sale, lease, or other distribution or until the taxable year in which it is first determined that no transaction is reasonably expected to result from the expense incurred (whether or not a transaction subsequently results).

Thus, for example, if a DISC incurs a packaging cost which is otherwise eligible to be treated as an export promotion expense, the DISC may not include such charge as an export promotion expense until the year in which the export property with respect to which the packaging cost was incurred is actually sold by the DISC. If no transaction is reasonably expected to result from the packaging cost, such cost should be allocated as an export promotion expense to the group of transactions to which such cost is most closely related.

(g) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. J and K are calendar year taxpayers. J, a domestic manufacturing company, owns all the stock of K, a DISC for the taxable year. During 1972, J manufactures only 100 units of a product (which is eligible to be export property as defined in section 993(c)). J enters into a written agreement with K whereby K is granted a sales franchise with respect to exporting such property and K will receive commissions with respect to such exports equal to the maximum amount permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold for \$1,000. J's cost of goods sold attributable to the 100 units is \$650. J's direct selling expenses so attributable are \$100. Although J has other deductible expenses, for purposes of this example assume that J has no other deductible expenses. K pays \$230 to independent contractors which qualify as export promotion expenses under paragraph (f)(7)(ii) of this section. K does not perform functions substantial enough to entitle it to an allocation of income which meets the arm's length standard of section 482. The income which K may earn under section 994 under the franchise is \$20, computed as follows:

| | | |
|--|---------|----|
| (1) Combined taxable income: | | |
| (a) K's sales price | \$1,000 | |
| (b) Less deductions: | | |
| J's cost of goods sold | \$650 | |
| J's direct selling expenses | 100 | |
| K's export promotion expenses | 230 | |
| Total deductions | 980 | |
| (c) Combined taxable income | | 20 |
| <hr/> | | |
| (2) K's profit under combined taxable income method (before application of loss limitation): | | |
| (a) 50 percent of combined taxable income | | 10 |
| (b) Plus: 10 percent of K's export promotion expenses (10% of \$230) | | 23 |
| (c) K's profit | | 33 |

| | | |
|---|--|----|
| (3) K's profit under gross receipts method (before application of loss limitation): | | |
| (a) 4 percent of K's sales price (4% of \$1,000) | | 40 |
| (b) Plus: 10 percent of K's export promotion expenses (10% of \$230) | | 23 |
| (c) K's profit | | 63 |

Since combined taxable income (\$20) is lower than both K's profit under the combined taxable income method (\$33) and under the gross receipts method (\$63), the maximum income K may earn is \$20. Accordingly, the commissions K may receive from J are \$250, *i.e.*, K's expenses (\$230) plus K's profit (\$20).

Example 2. M and N are calendar year taxpayers. M, a domestic manufacturing company, owns all the stock of N, a DISC for the taxable year. During 1972, M produces and sells a particular product line of export property to N for \$75, a price which can be justified as satisfying the standard of arm's length price of section 482. N performs substantial functions with respect to the transaction and resells the export property for \$100. M's cost of goods sold attributable to the export property is \$60. M's direct selling expenses so attributable (relating to advertising of the product line in foreign markets) are \$12. Although M has other deductible expenses, for purposes of this example, assume that M has no other deductible expenses. N's expenses attributable to resale of the export property are \$22 of which \$20 are export promotion expenses. The maximum profit which N may earn with respect to the product line is \$6, computed as follows:

| | | |
|--|-------|-----|
| (1) Combined taxable income: | | |
| (a) N's sales price | \$100 | |
| (b) Less deductions: | | |
| M's cost of goods sold | \$60 | |
| M's direct selling expenses | 12 | |
| N's expenses | 22 | |
| Total deductions | 94 | |
| (c) Combined taxable income | | 6 |
| <hr/> | | |
| (2) N's profit under combined taxable income method (before application of loss limitation): | | |
| (a) 50 percent of combined taxable income | | 3 |
| (b) Plus: 10 percent of N's export promotion expenses (10% of \$20) | | 2 |
| (c) N's profit | | 5 |
| <hr/> | | |
| (3) N's profit under gross receipts method (before application of loss limitation): | | |
| (a) 4 percent of N's sales price (4% of \$100) | | 4 |
| (b) Plus: 10 percent of N's export promotion expenses (10% of \$20) | | 2 |
| (c) N's profit | | 6 |
| <hr/> | | |
| (4) N's profit under section 482 method: | | |
| (a) N's sales price | | 100 |
| (b) Less deductions: | | |
| N's cost of goods sold (price paid by N to M) | 75 | |
| N's expenses | 22 | |

§ 1.994-1

26 CFR Ch. I (4-1-23 Edition)

| | |
|------------------------|----------|
| Total deductions | 97 |
| (c) N's profit | <u>3</u> |

Since the gross receipts method results in greater profit to N (\$6) than does the combined taxable income method (\$5) or section 482 method (\$3), and does not exceed combined taxable income (\$6), N may earn a maximum profit of \$6. Accordingly, the transfer price from M to N may be readjusted as long as the transfer price is not readjusted below \$72, computed as follows:

| | |
|---------------------------------|-----------|
| (5) Transfer price from M to N: | |
| (a) N's sales price | \$100 |
| (b) Less: | |
| N's expenses | \$22 |
| N's profit | <u>6</u> |
| Total subtractions | 28 |
| (c) Transfer price | <u>72</u> |

Example 3. Q and R are calendar year taxpayers. Q, a domestic manufacturing company, owns all the stock of R, a DISC for the taxable year. During 1972, Q produces and sells a product line of export property to R for \$170, a price which can be justified as satisfying the standards of arm's length price of section 482, and R resells the export property for \$200. Q's cost of goods sold attributable to the export property is \$115 so that the combined gross income from the sale of the export property is \$85 (i.e., \$200 minus \$115). Q's expenses incurred in connection with the property sold are \$35. Q's deductible overhead and other supportive expenses allocable to all gross income are \$6. Apportionment of these supportive expenses on the basis of gross income does not result in a material distortion of income and is a reasonable method of apportionment. Q's gross income from sources other than the transaction is \$170 making total gross income of Q and R (excluding the transfer price paid by R) \$255 (i.e., \$85 plus \$170). R's expenses attributable to resale of the export property are \$20, all of which are export promotion expenses. The maximum profit which R may earn with respect to the product line is \$16, computed as follows:

| | |
|---|--------------|
| (1) Combined taxable income: | |
| (a) R's sales price | \$200 |
| (b) Less deductions: | |
| (i) Q's cost of goods sold | 115 |
| (ii) Q's expenses incurred in connection with the property sold | 35 |
| (iii) Apportionment of Q's supportive expenses: | |
| Q's supportive expenses | \$6 |
| Combined gross income from sale of export property | 85 |
| Total gross income of Q and R | 255 |
| Apportionment | (6 × 85)/255 |
| R's expenses | <u>20</u> |

| | |
|-----------------------------------|-----------|
| Total deductions | 172 |
| (c) Combined taxable income | <u>28</u> |

(2) R's profit under combined taxable income method (before application of loss limitation):

| | |
|---|-----------|
| (a) 50 percent of combined taxable income | 14 |
| (b) Plus: 10 percent of R's export promotion expenses (10% of \$20) | <u>2</u> |
| (c) R's profit | <u>16</u> |

(3) R's profit under gross receipts method (before application of loss limitation):

| | |
|---|-----------|
| (a) 4 percent of R's sales price (4% of \$200) | 8 |
| (b) Plus: 10 percent of R's export promotion expenses (10% of \$20) | <u>2</u> |
| (c) R's profit | <u>10</u> |

(4) R's profit under section 482 method:

| | |
|---|-----------|
| (a) R's sales price | 200 |
| (b) Less deductions: | |
| R's cost of goods sold (price paid by R to Q) | 170 |
| R's expenses | <u>20</u> |
| Total deductions | 190 |
| (c) R's profit | <u>10</u> |

Since the combined taxable income method results in greater profit to R (\$16) than does the gross receipts method (\$10) or section 482 method (\$10), and does not exceed combined taxable income (\$28), R may earn a maximum profit of \$16. Accordingly, the transfer price from Q to R may be readjusted as long as the transfer price is not readjusted below \$164 computed as follows:

| | |
|---------------------------------|------------|
| (5) Transfer price from Q to R: | |
| (a) R's sales price | \$200 |
| (b) Less: | |
| R's expenses | \$20 |
| R's profit | <u>16</u> |
| Total | 36 |
| (c) Transfer price | <u>164</u> |

Example 4. S and T are calendar year taxpayers. S, a domestic manufacturing company, owns all the stock of T, a DISC for the taxable year. During 1972, S produces and sells 100 units of a particular product to T under a written agreement which provides that the transfer price between S and T shall be that price which allocates to T the maximum permitted to be received under the intercompany pricing rules of section 994. Thereafter, the 100 units are sold by T for \$950. S's cost of goods sold attributable to the 100 units is \$650. S's other deductible expenses so attributable are \$300. Although S has other deductible expenses, for purposes of this example, assume that S has no deductible expenses not definitely allocable to any item of gross income. T's expenses attributable to the resale of the 100 units are \$50. S chooses not to apply the section 482 method. T may not earn any income under

Internal Revenue Service, Treasury

§ 1.994-1

the gross receipts or combined taxable income method with respect to resale of the 100 units because combined taxable income is a negative figure, computed as follows:

| | | |
|--|-------|---------------|
| (1) Combined taxable income: | | |
| (a) T's sales price | | \$950 |
| (b) Less deductions: | | |
| S's cost of goods sold | \$650 | |
| S's expenses | 300 | |
| T's expenses | 50 | |
| Total deductions | | 1,000 |
| (c) Combined taxable income (loss) | | <u>(\$50)</u> |

Under paragraph (e)(1)(i) of this section, T is permitted to recover its expenses attributable to the 100 units (\$50) even though such recovery results in a loss or increased loss to the related supplier. Accordingly, the transfer price from S to T may be readjusted as long as the transfer price is not readjusted below \$900, computed as follows:

| | | |
|---------------------------------|-------|------------|
| (2) Transfer price from S to T: | | |
| (a) T's sales price | \$950 | |
| (b) Less: T's expenses | 50 | |
| (c) Transfer price | | <u>900</u> |

Example 5. Assume the same facts as in example 4 except that S chooses to apply the section 482 method and that under arm's length dealings T would have derived \$10 of income. Accordingly, the transfer price from S to T may be set at an amount not less than \$890, computed as follows:

| | | |
|---------------------------------|-------|------------|
| (1) Transfer price from S to T: | | |
| (a) T's sales price | \$950 | |
| (b) Less: | | |
| T's expenses | \$50 | |
| T's profit | 10 | |
| Total deductions | | 60 |
| (c) Transfer price | | <u>890</u> |

Example 6. X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, a DISC for the taxable year. During March 1972, X manufactures a particular product of export property which it leases on April 1, 1972, to Y for a term of 1 year at a monthly rental of \$1,000, a rent which satisfies the standard of arm's length rental under section 482. Y subleases the product on April 1, 1972, for a term of 1 year at a monthly rental of \$1,200. X's cost for the product leased is \$40,000. X's other deductible expenses attributable to the product are \$900, all of which are incurred in 1972. Although X has other deductible expenses, for purposes of this example, assume that X has no other deductible expenses. Y's expenses attributable to sublease of the export property are \$450, all of which are incurred in 1972 and are export promotion expenses. X depreciates the property on a straight line basis without the use of an averaging convention, assuming a useful life of 8 years and no sal-

vage value. The profit which Y may earn with respect to the transaction is \$2,895 for 1972 and \$1,175 for 1973, computed as follows:

| | | |
|--|---------|--------------|
| COMPUTATION FOR 1972 | | |
| (1) Combined taxable income: | | |
| (a) Y's sublease rental receipts for year (\$1,200 × 9 months) | | \$10,800 |
| (b) Less deductions: | | |
| X's depreciation (\$40,000 × 1/8 × 9/12) | \$3,750 | |
| X's other expenses | 900 | |
| Y's expenses | 450 | |
| Total deductions | | 5,100 |
| (c) Combined taxable income | | <u>5,700</u> |

| | | |
|--|-------|--------------|
| (2) Y's profit under combined taxable income method (before application of loss limitation): | | |
| (a) 50 percent of combined taxable income | 2,850 | |
| (b) Plus: 10 percent of Y's export promotion expenses (10% of \$450) | 45 | |
| (c) Y's profit | | <u>2,895</u> |

| | | |
|---|-----|------------|
| (3) Y's profit under gross receipts method (before application of loss limitation): | | |
| (a) 4 percent of Y's sublease rental receipts for year (4% of \$10,800) | 432 | |
| (b) Plus: 10 percent of Y's export promotion expenses (10% of \$450) | 45 | |
| (c) Y's profit | | <u>477</u> |

| | | |
|---|----------|--------------|
| (4) Y's profit under section 482 method: | | |
| (a) Y's sublease rental receipts for year | \$10,800 | |
| (b) Less deductions: | | |
| Y's lease rental payments for year | \$9,000 | |
| Y's expenses | 450 | |
| Total deductions | | 9,450 |
| (c) Y's profit | | <u>1,350</u> |

Since the combined taxable income method results in greater profit to Y (\$2,895) than does the gross receipts method (\$477) or section 482 method (\$1,350), Y may earn a profit of \$2,895 for 1972. Accordingly, the monthly rental payable by Y to X for 1972 may be readjusted as long as the monthly rental payable is not readjusted below \$828.33, computed as follows:

| | | |
|--|-------------|-----------------|
| (5) Monthly rental payable by Y to X for 1972: | | |
| (a) Y's sublease rental receipts for year | \$10,800.00 | |
| (b) Less: | | |
| Y's expenses | 450.00 | |
| Y's profit | 2,895.00 | |
| Total | | 3,345.00 |
| (c) Rental payable for 1972 | | <u>7,455.00</u> |
| (d) Rental payable each month (\$7,455 ÷ 9 months) | | <u>828.33</u> |

| | | |
|--|---------|--|
| COMPUTATION FOR 1973 | | |
| (1) Combined taxable income: | | |
| (a) Y's sublease rental receipts for year (\$1,200 × 3 months) | \$3,600 | |
| (b) Less: X's depreciation (\$40,000 × 1/8 × 3/12) | 1,250 | |

§ 1.994-2

| | |
|--|------------|
| (c) Combined taxable income | 2,350 |
| (2) Y's profit under combined taxable income method (before application of loss limitation): | |
| (a) 50 percent of combined taxable income | \$1,175 |
| (b) Y's profit | 1,175 |
| (3) Y's profit under gross receipts method (before application of loss limitation): | |
| (a) 4 percent of Y's sublease rental receipts for year (4% of \$3,600) | 144 |
| (b) Y's profit | 144 |
| (4) Y's profit under section 482 method: | |
| (a) Y's sublease rental receipts for year | 3,600 |
| (b) Less: Y's lease rental payments for year | 3,000 |
| (c) Y's profit | 600 |
| <p>Since the combined taxable income method results in greater profit to Y (\$1,175) than does the gross receipts method (\$144) or section 482 method (\$600), Y may earn a profit of \$1,175 for 1973. Accordingly, the monthly rental payable by Y to X for 1973 may be readjusted as long as the monthly rental payable is not readjusted below \$808.33, computed as follows:</p> | |
| (5) Monthly rental payable by Y to X for 1973: | |
| (a) Y's sublease rental receipts for year | \$3,600.00 |
| (b) Less: Y's profit | 1,175.00 |
| (c) Rental payable for 1973 | 2,425.00 |
| (d) Rental payable for each month (\$2,425 ÷ 3 months) | 808.33 |

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7364, 40 FR 29827, July 16, 1975, as amended by T.D. 7435, 41 FR 43142, Sept. 30, 1976; T.D. 7854, 47 FR 51741, Nov. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§ 1.994-2 Marginal costing rules.

(a) *In general.* This section prescribes the marginal costing rules authorized by section 994(b)(2). If under paragraph (c)(1) of this section a DISC is treated for its taxable year as seeking to establish or maintain a foreign market for sales of an item, product, or product line of export property (as defined in § 1.993-3) from which qualified export receipts are derived, the marginal costing rules prescribed in paragraph (b) of this section may be applied to allocate costs between gross receipts derived from such sales and other gross receipts for purposes of computing, under the "50-50" combined taxable income method of § 1.994-1(c)(3), the combined

taxable income of the DISC and related supplier derived from such sales. Such marginal costing rules may be applied whether or not the related supplier manufactures, produces, grows, or extracts (within the meaning of § 1.993-3(c)) the export property sold. Such marginal costing rules do not apply to sales of export property which in the hands of a purchaser related under section 954(d)(3) to the seller give rise to foreign base company sales income as described in section 954(d) unless, for the purchaser's year in which it resells the export property, section 954(b)(3)(A) is applicable or such income is under the exceptions in section 954(b)(4). Such marginal costing rules do not apply to leases of property or the performance of any services whether or not related and subsidiary services (as defined in § 1.994-1(b)(3)).

(b) *Marginal costing rules for allocations of costs—(1) In general.* Marginal costing is a method under which only marginal or variable costs of producing and selling a particular item, product, or product line are taken into account for purposes of section 994. Where this section is applicable, costs attributable to deriving qualified export receipts for the DISC's taxable year from sales of an item, product, or product line may be determined in any manner the related supplier (as defined in § 1.994-1(a)(3)(ii)) chooses, provided that the requirements of both subparagraphs (2) and (3) of this paragraph are met.

(2) *Variable costs taken into account.* There are taken into account in computing the combined taxable income of the DISC and its related supplier from sales of an item, product, or product line the following costs:

- (i) Direct production costs (as defined in § 1.471-11(b)(2)(i)) and
- (ii) Costs which are export promotion expenses, but only if they are claimed as export promotion expenses in determining taxable income derived by the DISC under the combined taxable income method of § 1.994-1(c)(3).

At the taxpayer's option, all, a part, or none of the costs which qualify as export promotion expenses may be so claimed as export promotion expenses.

(3) *Overall profit percentage limitation.* As a result of such determination of

costs attributable to such qualified export receipts for the DISC's taxable year, the combined taxable income of the DISC and its related supplier from sales of such item, product, or product line for the DISC's taxable year does not exceed gross receipts (determined under §1.993-6) of the DISC derived from such sales, multiplied by the overall profit percentage (determined under paragraph (c)(2) of this section).

(c) *Definitions*—(1) *Establishing or maintaining a foreign market.* A DISC shall be treated for its taxable year as seeking to establish or maintain a foreign market with respect to sales of an item, product, or product line of export property from which qualified export receipts are derived if the combined taxable income computed under paragraph (b) of this section is greater than the combined taxable income computed under §1.994-1(c)(6).

(2) *Overall profit percentage.* (i) For purposes of this section, the overall profit percentage for a taxable year of the DISC for a product or product line is the percentage which—

(a) The combined taxable income of the DISC and its related supplier plus all other taxable income of its related supplier from all sales (domestic and foreign) of such product or product line during the DISC's taxable year, computed under the full costing method, is of

(b) The total gross receipts (determined under §1.993-6) from all such sales.

(ii) At the annual option of the related supplier, the overall profit percentage for the DISC's taxable year for all products and product lines may be determined by aggregating the amounts described in subdivision (i) (a) and (b) of this subparagraph of the DISC, and all domestic members of the controlled group (as defined in §1.993-1(k)) of which the DISC is a member, for the DISC's taxable year and for taxable years of such members ending with or within the DISC's taxable year.

(iii) For purposes of determining the amounts in subdivisions (i) (b) and (ii) of this subparagraph, a sale of property between a DISC and its related supplier or between domestic members of the controlled group shall be taken into account only during the DISC's taxable

year (or taxable year of the member ending within the DISC's taxable year) during which the property is ultimately sold to a person which is neither the DISC nor such a domestic member.

(3) *Grouping of transactions.* (i) In general, for purposes of this section, an item, product, or product line is the item or group consisting of the product or product line pursuant to §1.994-1(c)(7) used by the taxpayer for purposes of applying the intercompany pricing rules of §1.994-1.

(ii) However, for purposes of determining the overall profit percentage under subparagraph (2) of this paragraph, any product or product line grouping permissible under §1.994-1(c)(7) may be used at the annual choice of the taxpayer, even though it may not be the same item or grouping referred to in subdivision (i) of this subparagraph, as long as the grouping chosen for determining the overall profit percentage is at least as broad as the grouping referred to in such subdivision (i).

(4) *Full costing method.* For purposes of this section, the term "full costing method" is the method for determining combined taxable income set forth in §1.994-1(c)(6).

(d) *Application of limitation on DISC income ("no loss" rule).* If the marginal costing rules of this section are applied, the combined taxable income method of §1.994-1(c)(3) may not be applied to cause in any taxable year a loss to the related supplier, but such method may be applied to the extent it does not cause a loss. For purposes of the preceding sentence, a loss to a related supplier would result if the taxable income of the DISC would exceed the combined taxable income of the related supplier and the DISC determined in accordance with paragraph (b) of this section. If, however, there is no combined taxable income (so determined), see the last sentence of §1.994-1(e)(1)(i).

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X and Y are calendar year taxpayers. X, a domestic manufacturing company, owns all the stock of Y, a DISC for the taxable year. During 1973, X manufactures a

§ 1.994-2

26 CFR Ch. I (4-1-23 Edition)

product line which is eligible to be export property (as defined in §1.993-3). X enters into a written agreement with Y whereby Y is granted a sales franchise with respect to exporting such product line from which qualified export receipts will be derived and Y will receive commissions with respect to such exports equal to the maximum amount permitted to be received under the intercompany pricing rules of section 994. Commissions are computed using the combined taxable income method under §1.994-1(c)(3). For purposes of applying the combined taxable income method, X and Y compute their combined taxable income attributable to the product line of export property under the marginal costing rules in accordance with the additional facts assumed in the table below:

| | |
|---|---------|
| (1) Maximum combined taxable income (determined under paragraph (b)(2) of this section): | |
| (a) Y's gross receipts from export sales | \$95.00 |
| (b) Less: | |
| (i) Direct materials | 40.00 |
| (ii) Direct labor | 20.00 |
| (iii) Y's export promotion expenses claimed in determining Y's DISC taxable income | 5.00 |
| (iv) Total deductions | 65.00 |
| (c) Maximum combined taxable income | 30.00 |
| (2) Overall profit percentage limitation (determined under paragraph (b)(3) of this section): | |
| (a) Gross receipts of X and Y from all domestic and foreign sales | 400.00 |
| (b) Less deductions: | |
| (i) Direct materials | 160.00 |
| (ii) Direct labor | 80.00 |
| (iii) Other costs (of which \$8 are costs of the DISC including \$5 of export promotion expenses claimed in determining Y's taxable income) | 40.00 |
| (c) Total deductions | 280.00 |
| (d) Total taxable income from all sales computed on a full costing method | 120.00 |
| (e) Overall profit percentage (line (d) (\$120) divided by line (a) (\$400)) (percent) | 30% |
| (f) Multiply by gross receipts from Y's export sales (line (1)(a)) | \$95.00 |
| (g) Overall profit percentage limitations | 28.50 |

Since the overall profit percentage limitation under line (2)(g) (\$28.50) is less than maximum combined taxable income under line (1)(c) (\$30), combined taxable income under marginal costing is limited to \$28.50. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is \$28.50. Accordingly, the costs attributable to export sales (other than for direct material, direct labor, and export promotion expenses) are \$1.50, *i.e.*, line (1)(c) (\$30) minus line (2)(g) (\$28.50). Under the com-

bined taxable income method of §1.994-1(c)(3), Y will have taxable income attributable to the sales of \$14.75, *i.e.*, the sum of ½ of combined taxable income (1/2 of \$28.50) and 10 percent of Y's export promotion expenses claimed in determining Y's taxable income (10 percent of \$5). Accordingly, the commissions Y receives from X are \$22.75, *i.e.*, Y's costs (\$8, see line (2)(b)(iii)) plus Y's profit (\$14.75).

Example 2. (1) Assume the same facts as in example 1, except that gross receipts from export sales are only \$85 and gross receipts from all sales remain at \$400. For purposes of applying the combined taxable income method, X and Y may compute their combined taxable income attributable to the product line of export property under the marginal costing rules as follows:

| | |
|---|---------|
| (1) Maximum combined taxable income (determined under paragraph (b)(2) of this section): | |
| (a) Y's gross receipts from export sales | \$85.00 |
| (b) Less: | |
| (i) Direct materials | 40.00 |
| (ii) Direct labor | 20.00 |
| (iii) Y's export promotion expenses claimed in determining Y's taxable income | 5.00 |
| (iv) Total deductions | 65.00 |
| (c) Maximum combined taxable income | 20.00 |
| (2) Overall profit percentage limitation (determined under paragraph (b)(3) of this section): | |
| (a) Gross receipts from Y's export sales (line (1)(a)) | 85.00 |
| (b) Multiply by overall profit percentage (as determined in example 1) (percent) | 30% |
| (c) Overall profit percentage limitation | 25.50 |

Since maximum combined taxable income under line (1)(c) (\$20) is less than the overall profit percentage limitation under line (2)(c) (\$25.50), combined taxable income under marginal costing is limited to \$20. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is \$20. Accordingly, no costs (other than for direct material, direct labor, and export promotion expenses) will be attributed to export sales. Under the combined taxable income method of §1.994-1(c)(3), Y will have taxable income attributable to the sales of \$10.50, *i.e.*, the sum of ½ of combined taxable income (1/2 of \$20) and 10 percent of Y's export promotion expenses claimed in determining Y's taxable income (10 percent of \$5). Accordingly, the Commissions Y receives from X are \$18.50, *i.e.*, Y's costs (\$8, see line (2)(b)(iii) of example 1) plus Y's profit (\$10.50).

(2) If export promotion expenses are not claimed in determining taxable income of Y under the combined taxable income method, the taxable income of Y would be increased

Internal Revenue Service, Treasury

§ 1.995-1

to \$12.50 and commissions payable to Y would be increased to \$20.50, computed as follows:

| | |
|--|---------|
| (3) Maximum combined taxable income (determined under paragraph (b)(2) of this section): | |
| (a) Y's gross receipts from export sales | \$85.00 |
| (b) Less: | |
| (i) Direct materials | 40.00 |
| (ii) Direct labor | 20.00 |
| (iii) Total deductions | 60.00 |
| (c) Maximum combined taxable income | 25.00 |
| (4) Overall profit percentage limitation (line (2)(c)) ... | 25.50 |

Since maximum combined taxable income under line (3)(c) (\$25) is less than the overall profit percentage under line (4) (\$25.50), combined taxable income under marginal costing is limited to \$25. Since under the franchise agreement Y is to earn the maximum commission permitted under the intercompany pricing rules of section 994, combined taxable income on the transactions is \$25. Accordingly, no costs (other than for direct material and direct labor) will be attributed to export sales. Under the combined taxable income method of §1.994-1(c)(3), Y will have taxable income attributable to the sales of \$12.50, i.e., ½ of combined taxable income (½ of \$25). Accordingly, the commissions Y receives from X are \$20.50, i.e., Y's costs (\$8, see line (2)(b)(iii) of example 1) plus Y's profit (\$12.50).

Example 3. (1) Assume the same facts as in example 1, except that gross receipts from export sales are only \$85, gross receipts from all sales remain at \$400, and Y has costs of \$40 consisting of Y's export promotion expenses of \$35 and costs of \$5 other than for direct material, direct labor, or export promotion expenses. For purposes of applying the combined taxable income method, X and Y may compute their combined taxable income attributable to the product line of export property under the marginal costing rules as follows:

| | |
|--|---------|
| (1) Maximum combined taxable income (determined under paragraph (b)(2) of this section): | |
| (a) Y's gross receipts from export sales | \$85.00 |
| (b) Less: | |
| (i) Direct materials | 40.00 |
| (ii) Direct labor | 20.00 |
| (iii) Y's export promotion expenses claimed in determining Y's taxable income | 35.00 |
| (iv) Total deductions | 95.00 |
| (c) Maximum combined taxable income (loss) .. | (10.00) |
| (2) Overall profit percentage limitation (as determined in example 2) | 25.50 |

Since maximum combined taxable income under line (1)(c) (which is a loss of \$10) is less than the overall profit percentage limitation under line (2)(c) (\$25.50), combined taxable income under marginal costing is a loss of \$10 and, under the combined taxable income method of §1.994-1(c)(3), Y will have no taxable income or loss attributable to the sales. Accordingly, the commissions Y receives from X are \$40, i.e., Y's costs (\$40).

(2) If export promotion expenses are not claimed in determining Y's taxable income under the combined taxable income method, the taxable income of Y would be increased to \$12.50 and commissions payable to Y would be increased to \$52.50 computed as follows:

| | |
|--|---------|
| (3) Maximum combined taxable income (determined under paragraph (b)(2) of this section) (line (3)(c) of example 2) | \$25.00 |
| (4) Overall profit percentage limitation (as determined in example 2) | 25.50 |

The results would be the same as in part (2) of example 2, except that the commissions Y receives from X are \$52.50, i.e., Y's costs (\$40) plus Y's profit (\$12.50).

[T.D. 7364, 40 FR 29836, July 16, 1975; 40 FR 33972, Aug. 13, 1975]

§ 1.995-1 Taxation of DISC income to shareholders.

(a) *In general.* (1) Under §1.991-1(a), a corporation which is a DISC for a taxable year is not subject to any tax imposed by subtitle A of the Code (sections 1 through 1564) for the taxable year, except for the tax imposed by chapter 5 thereof (sections 1491 through 1494) on certain transfers to avoid tax.

(2) Under section 995(a), the shareholders of a DISC, or a former DISC, are subject to taxation on the earnings and profits of the DISC in accordance with the provisions of chapter 1 of the Code generally applicable to shareholders, but subject to the modifications provided in sections 995, 996, and 997.

(3) Under §1.996-3, three divisions of earnings and profits of a DISC, or former DISC, are defined: "accumulated DISC income", "previously taxed income", and "other earnings and profits". Under §1.995-2, certain amounts of the DISC's earnings and profits are deemed to be distributed as dividends to shareholders of the DISC at the close of the DISC's taxable year in which such earnings were derived. Such deemed distributions do not cause a reduction in the DISC's earnings and profits, but are taken into account in

§ 1.996-3(c) as an increase in previously taxed income. To the extent the DISC's earnings and profits are paid out in a subsequent distribution which is, under § 1.996-1, treated as made out of such "previously taxed income," they will not be taxable to the shareholders a second time.

(4) In general, "accumulated DISC income" is the earnings and profits of the DISC which have not been deemed distributed and which may be deferred from taxation so long as they are not actually distributed with respect to its stock. However, deferral of taxation on "accumulated DISC income" may be terminated, in whole or in part, in the event of: (i) Certain foreign investment attributable to producer's loans (see § 1.995-2(a)(5) and § 1.995-5); (ii) revocation of the election to be treated as a DISC or other disqualification (see § 1.995-3); and (iii) certain dispositions of DISC stock in which gain is realized (see § 1.995-4).

(5) Since a DISC is not taxed on its taxable income, section 246(d) and § 1.246-4 provide that the deduction otherwise allowed under section 243 shall not be allowed with respect to a dividend from a DISC, or former DISC, paid or treated as paid out of accumulated DISC income or previously taxed income or with respect to a deemed distribution in a qualified year under § 1.995-2(a).

(b) *Amounts and character of amounts includible in shareholder's gross income.* Each shareholder of a corporation which is a DISC, or former DISC, shall include in his gross income—

(1) Amounts actually distributed to him that are includible in his gross income in accordance with paragraph (c) of this section.

(2) Amounts which, pursuant to § 1.995-2, he is deemed to receive as a distribution taxable as a dividend on the last day of each of the corporation's taxable years for which it qualifies as a DISC,

(3) Amounts which, pursuant to § 1.995-3, he is deemed to receive as a distribution taxable as a dividend in the event the corporation revokes its election to be treated as a DISC or otherwise is disqualified as a DISC, and

(4) Gain realized on certain dispositions of stock in the corporation

which, under § 1.995-4, is includible in his gross income as a dividend.

(c) *Treatment of actual distributions.*

(1) Except as provided in subparagraph (3) of this paragraph, amounts actually distributed to a shareholder of a DISC, or former DISC, with respect to his stock are includible in his gross income in accordance with section 301.

(2) Since a deemed distribution does not reduce the earnings and profits of a DISC, it does not affect the determination as to whether a subsequent actual distribution is a "dividend" under section 316(a). Since, however, the amount of a deemed distribution increases "previously taxed income", it does affect the determination as to whether a subsequent actual distribution is excluded (as described in subparagraph (3) of this paragraph) from gross income.

(3) Under § 1.996-1(c), the amount of any actual distribution (including a deficiency distribution made pursuant to § 1.992-3), with respect to stock in a DISC, or former DISC, which is treated under § 1.996-1 as made out of previously taxed income, is excluded by the distributee from gross income, but only to the extent that such amount does not exceed the adjusted basis of the distributee's stock. Under § 1.996-5(b), that portion of any actual distribution which is treated as made out of previously taxed income shall be applied against and reduce the adjusted basis of the stock and, to the extent that it exceeds the adjusted basis of the stock, it shall be treated as gain from the sale or exchange of property.

(4) A deficiency distribution pursuant to § 1.992-3 may be made after the close of the DISC's taxable year with respect to which it is made. The determinations as to whether such deficiency distribution is a dividend under section 301 and as to which division of earnings and profits is the source thereof depend upon the status of the DISC's earnings and profits account and divisions thereof at the time the distribution is actually made. See § 1.996-1(d) for the priority of such deficiency distribution over other actual distributions made during the same taxable year.

(d) *Personal holding company income.*

(1) Any amount includible in a shareholder's gross income as a dividend with respect to the stock of a DISC, or

former DISC, pursuant to paragraph (b) of this section shall be treated as a dividend for all purposes of the Code, except that for purposes of determining whether such shareholder is a personal holding company within the meaning of section 542 any amount deemed distributed for qualified years under § 1.995-2 or upon disqualification under § 1.995-3, any amount of gain on certain dispositions of DISC stock to which § 1.995-4 applies, and any amount treated under § 1.996-1 as distributed out of accumulated DISC income or previously taxed income shall not be treated as a dividend or any other kind of income described in section 543(a).

(2) Notwithstanding subparagraph (1) of this paragraph, the shareholder may treat as an item of income described under section 543 (for example, rents) any amount to which the exception in such subparagraph (1) applies, if it establishes to the satisfaction of the district director that such amount is attributable to earnings and profits derived from such item of income.

[T.D. 7324, 39 FR 35109, Sept. 30, 1974]

§ 1.995-2 Deemed distributions in qualified years.

(a) *General rule.* Under section 995 (b)(1), each shareholder of a DISC shall be treated as having received a distribution taxable as a dividend with respect to his stock on the last day of each taxable year of the DISC, in an amount which is equal to his pro rata share of the sum (as limited by paragraph (b) of this section), of the following seven items:

(1) An amount equal to the gross interest derived by the DISC during such year from producer's loans (as defined in § 1.993-4).

(2) An amount equal to the lower of—

(i) Any gain recognized by the DISC during such year on the sale or exchange of property (other than property which in the hands of the DISC is a qualified export asset) which was previously transferred to it in a transaction in which the transferor realized gain which was not recognized in whole or in part, or

(ii) The amount of the transferor's gain which was not recognized on the previous transfer of the property to the DISC.

For purposes of this subparagraph, each item of property shall be considered separately. See paragraph (d) of this section for special rules with respect to certain tax-free acquisitions of property by the DISC.

(3) An amount equal to the lower of—

(i) Any gain recognized by the DISC during such year on the sale or exchange of property which in the hands of the DISC is a qualified export asset (other than stock in trade or property described in section 1221(1)) and which was previously transferred to the DISC in a transaction in which the transferor realized gain which was not recognized in whole or in part, or

(ii) The amount of the transferor's gain which was not recognized on the previous transfer of the property to the DISC and which would have been includible in the transferor's gross income as ordinary income if its entire realized gain had been recognized upon the transfer.

For purposes of this subparagraph, each item of property shall be considered separately. See paragraph (d) of this section for special rules with respect to certain tax-free acquisitions of property by the DISC.

(4) For taxable years beginning after December 31, 1975, an amount equal to 50 percent of the taxable income of the DISC for the taxable years attributable to military property (as defined in § 1.995-6).

(5) For taxable years beginning after December 31, 1975, the taxable income for the taxable year attributable to base period export gross receipts (as defined in § 1.995-7).

(6) The sum of—

(i)(A) In the case of a corporate shareholder, an amount equal to 57.5 percent of the excess (if any) (one-half for DISCs' taxable years beginning before January 1, 1983) of the taxable income of the DISC for such year (computed as provided in § 1.991-1(b)(1)) over the sum of the amounts deemed distributed for the taxable year in accordance with subparagraphs (1), (2), (3), (4) and (5) of this paragraph, or

(B) In the case of a non-corporate shareholder, an amount equal to one-half of the excess (if any) of the taxable income of the DISC for such year (computed as provided in § 1.991-1(b)(1)) over

the sum of the amounts deemed distributed for the taxable year in accordance with subparagraphs (1), (2), (3), (4), and (5) of this paragraph.

(ii)(A) An amount equal to the amount under subdivision (i) of paragraph (a)(6) of this section multiplied by the international boycott factor as determined under section 999 (c)(1), or

(B) In lieu of the amount determined under subdivision (ii)(A) of paragraph (a)(6) of this section, the amount described under section 999 (c)(2) of such international boycott income, and

(iii) An amount equal to the sum of any illegal bribes, kickbacks, or other payments paid by or on behalf of the DISC directly or indirectly to an official, employee, or agent in fact of a government. An amount is paid by a DISC where it is paid by any officer, director, employee, shareholder, or agent of the DISC for the benefit of such DISC. For purposes of this section, the principles of section 162 (c) and the regulations thereunder shall apply. The fair market value of an illegal payment made in the form of property or services shall be considered the amount of such illegal payment.

(7) The amount of foreign investment attributable to producer's loans of the DISC, as of the close of the "group taxable year" ending with such taxable year of the DISC, determined in accordance with § 1.995-5. The amount of such foreign investment attributable to producer's loans so determined for any taxable year of a former DISC shall be deemed distributed as a dividend to the shareholders of such former DISC on the last day of such taxable year. See § 1.995-3(e) for the effect that such deemed distribution has on scheduled installments of deemed distributions of accumulated DISC income under § 1.995-3(a) upon disqualification.

(b) *Limitation on amount of deemed distributions under section 995(b)(1).* (1) The sum of the amounts described in paragraph (a)(1) through (a)(6) of this section which is deemed distributed pro rata to the DISC's shareholders a dividend for any taxable year of the corporation shall not exceed the DISC's earnings and profits for such year.

(2) The amount of foreign investment attributable to producer's loans of the DISC (as described in paragraph (a)(7)

of this section) which is deemed to be distributed pro rata to the DISC's shareholders as dividends for any taxable year of the corporation shall not exceed the lower of the corporation's accumulated DISC income at the beginning of such year or the corporation's accumulated earnings and profits at the beginning of such year (but not less than zero)—

(i) Increased by any DISC income of the corporation for such year as defined in § 1.996-3(b)(2) (*i.e.*, any excess of the DISC's earnings and profits for such year over the sum of the amounts described in paragraph (a)(1) through (a)(6) of this section), or

(ii) Decreased by any deficit in the corporation's earnings and profits for such year.

Thus, for example, if a DISC has a deficit in accumulated earnings and profits at the beginning of a taxable year of \$10,000, current earnings and profits of \$12,000, no amounts described in paragraphs (a)(1) through (a)(6) of this section for the year, and foreign investment attributable to producer's loans for the taxable year of \$5,000, the DISC would have a deemed distribution described in paragraph (a)(7) of this section of \$5,000 for the taxable year. On the other hand, suppose the DISC had accumulated earnings and profits of \$13,000 at the beginning of the taxable year, accumulated DISC income of \$10,000 at the beginning of the taxable year, a deficit in earnings and profits for the taxable year of \$12,000, no amounts described in paragraphs (a)(1) through (a)(6) of this section for the taxable year, and foreign investment attributable to producer's loans for the taxable year of \$5,000. Under these facts the DISC would have no deemed distribution described in paragraph (a)(7) of this section because the corporation had no DISC income for the taxable year and the current year's deficit in earnings and profits subtracted from the DISC's accumulated DISC income at the beginning of the year produces a negative amount. For rules relating to the carryover to a subsequent year of the \$5,000 of foreign investment attributable to producer's loans, see § 1.995-5(a)(6).

(3) If, by reason of the limitation in subparagraph (1) of this paragraph, less

than the sum of the amounts described in paragraphs (a)(1) through (a)(6) of this section is deemed distributed, then the portion of such sum which is deemed distributed shall be attributed first to the amount described in subparagraph (1) of such paragraph, to the extent thereof; second to the amount described in subparagraph (2) of such paragraph, to the extent thereof; third to the amount described in subparagraph (3) of such paragraph, to the extent thereof; and so forth, and finally to the amount described in paragraph (b)(6) of this paragraph.

(c) *Examples.* Paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example 1. Y is a corporation which uses the calendar year as its taxable year and which elects to be treated as a DISC beginning with 1972. X is its sole shareholder. In 1972, X transfers certain property to Y in exchange for Y's stock in a transaction in which X does not recognize gain or loss by reason of the application of section 351(a). Included in the property transferred to Y is depreciable property described in paragraph (a)(3) of this section on which X realizes, but does not recognize by reason of the application of section 1245(b)(3), a gain of \$20,000. If X had sold such property for cash, the \$20,000 gain would have been recognized as ordinary income under section 1245. Also included in the transfer to Y is 100 shares of stock in a third corporation (which is not a related foreign export corporation) on which X realizes, but does not recognize, a gain of \$5,000. In 1973, Y sells such property and recognizes a gain of \$25,000 on the depreciable property and \$8,000 on the 100 shares of stock. Y has accumulated earnings and profits at the beginning of 1973 of \$5,000, earnings and profits for 1973 of \$72,000, and taxable income for 1973 of \$100,000. At the beginning of 1973, Y has \$6,000 of accumulated DISC income, no previously taxed income, and a deficit of \$1,000 of other earnings and profits. Under these facts and the additional facts assumed in the table below, X is treated as having received a deemed distribution taxable as a dividend of \$76,000 on December 31, 1973, determined as follows:

| | |
|---|---------|
| (1) Gross interest derived by Y in 1973 from producer's loans | \$7,000 |
| (2) Amount of gain on depreciable property (lower of Y's recognized gain (\$25,000) or X's gain not recognized on section 1245 property (\$20,000)) ... | 20,000 |
| (3) Amount of gain on stock (lower of X's gain not recognized or Y's recognized gain (\$8,000) (\$5,000)) | 5,000 |
| (4) One-half excess of taxable income for 1973 over the sum of lines (1), (2), and (3) (1/2 of (\$100,000 minus \$32,000)) | 34,000 |

| | |
|--|--------|
| (5) Limitation on lines (1) through (4): | |
| (a) Sum of lines (1) through (4) | 66,000 |
| (b) Earnings and profits for 1973 | 72,000 |
| (c) Lower of lines (a) and (b) | 66,000 |
| (6) Amount under paragraph (a)(5) of this section: | |
| (a) Foreign investment attributable to producer's loans under § 1.995-5 | 10,000 |
| (b) Sum of the lower of accumulated earnings and profits at beginning of 1973 (\$5,000) or accumulated DISC income at beginning of 1973 (\$6,000) and excess of earnings and profits for 1973 over line (5)(c) (\$72,000 minus \$66,000) | 11,000 |
| (c) Lower of lines (a) and (b) | 10,000 |
| (7) Total deemed distribution (sum of lines (5)(c) and (6)(c)) | 76,000 |

Example 2. Assume the facts are the same as in example 1, except that earnings and profits for 1973 amount to only \$60,000. Under these facts, X is treated as receiving a deemed distribution taxable as a dividend of \$65,000 on December 31, 1973, determined as follows:

| | |
|---|----------|
| (5) Limitation on lines (1) through (4): | |
| (a) Line (5)(a) of example 1 | \$66,000 |
| (b) Earnings and profits for 1973 | 60,000 |
| (c) Lower of lines (a) and (b) | 60,000 |
| (6) Amount under paragraph (a)(5) of this section: | |
| (a) Line (6)(a) of example 1 | 10,000 |
| (b) Sum of the lower of accumulated earnings and profits at beginning of 1973 (\$5,000) or accumulated DISC income at beginning of 1973 (\$6,000) plus excess of earnings and profits for 1973 over line (5)(c) (\$60,000 minus \$60,000) | 5,000 |
| (c) Lower of lines (a) and (b) | 5,000 |
| (7) Total deemed distribution (sum of lines (5)(c) and (6)(c)) | 65,000 |

Example 3. Assume the facts are the same as in example 1, except that Y has a deficit in accumulated earnings and profits at the beginning of 1973 of \$4,000. Such deficit is comprised of accumulated DISC income of \$1,000, no previously taxed income, and a deficit in other earnings and profits of \$5,000. Under these facts, X is treated as receiving a deemed distribution taxable as a dividend in the amount of \$72,000 on December 31, 1973, determined as follows:

| | |
|--|----------|
| (5) Limitation on lines (1) through (4): | |
| (a) Line (5)(a) of example 1 | \$66,000 |
| (b) Earnings and profits for 1973 | 72,000 |
| (c) Lower of lines (a) and (b) | 66,000 |
| (6) Amount under paragraph (a)(5) of this section: | |
| (a) Line (6)(a) of example 1 | 10,000 |

| | |
|--|--------|
| (b) Sum of accumulated earnings and profits at beginning of 1973 (not less than \$0), and excess of earnings and profits for 1973 over amount in line (5)(c) (\$72,000 minus \$66,000) | 6,000 |
| (c) Lower of lines (a) and (b) | 6,000 |
| (7) Total deemed distribution sum of lines (5)(c) and (6)(c) | 72,000 |

(d) *Special rules for certain tax-free acquisitions of property by the DISC.* (1) For purposes of paragraph (a)(2)(i) and (3)(i) of this section, if—

(i) A DISC acquires property in a first transaction and in a second transaction it disposes of such property in exchange for other property, and

(ii) By reason of the application of section 1031 (relating to like-kind exchanges) or section 1033 (relating to involuntary conversions), the basis in the DISC's hands of the other property acquired in such second transaction is determined in whole or in part with reference to the basis of the property acquired in the first transaction,

then upon a disposition of such other property in a third transaction by the DISC such other property shall be treated as though it had been transferred to the DISC in the first transaction. Thus, if the first transaction is a purchase of the property for cash, then paragraphs (a)(2) and (3) of this section will not apply to a sale by the DISC of the other property acquired in the second transaction.

(2) For purposes of paragraphs (a)(2)(i) and (3)(i) of this section, if a DISC acquires property in a first transaction and it transfers such property to a transferee DISC in a second transaction in which the transferor DISC's gain is not recognized in whole or in part, then such property shall be treated as though it had been transferred to the transferee DISC in the same manner in which it was acquired in the first transaction by the transferor DISC. For example, if X and Y both qualify as DISC's and X transfers property to Y in a second transaction in which gain or loss is not recognized, paragraph (a)(2) or (3) of this section does not apply to a sale of such property by Y in a third transaction if X had acquired the property in a first transaction by a purchase for cash. If, however, X acquired the property from

a transferor other than a DISC in the first transaction in which the transferor's realized gain was not recognized, then paragraph (a)(2) or (3) of this section may apply to the sale by Y if the other conditions of such paragraph (a)(2) or (3) are met.

(3) If a DISC acquires property in a second transaction described in subparagraph (1) or (2) of this paragraph in which it (or, in the case of a second transaction described in subparagraph (2) of this paragraph, the transferor DISC) recognizes a portion (but not all) of the realized gain, then the amount described in paragraph (a)(2)(ii) or (a)(3)(ii) of this section with respect to a disposition by the DISC of such acquired property in a third transaction shall not exceed the transferor's gain which was not recognized on the first transaction minus the amount of gain recognized by the DISC (or transferor DISC) on the second transaction.

(4) The provisions of this paragraph may be illustrated by the following examples:

Example 1. X and Y are corporations each of which qualifies as a DISC and uses the calendar year as its taxable year. In 1972, X acquires section 1245 property in a first transaction in which the transferor's entire realized gain of \$17 is not recognized. In 1973, X transfers such property to Y in a second transaction in which X realizes a gain of \$20 of which only \$4 is recognized. (On December 31, 1973, X's shareholders are treated as having received a deemed distribution of a dividend which includes such \$4 under paragraph (a)(3) of this section, provided the limitation in paragraph (b) of this section is met.) In a third transaction in 1974, Y sells such property and recognizes a gain of \$25. With respect to Y's shareholders on December 31, 1974, the amount described in paragraph (a)(3)(ii) of this section would be limited to \$13, which is the amount of the transferor's gain which was not recognized on the first transaction (\$17) minus the amount of gain recognized by X on the second transaction (\$4).

Example 2. Z is a DISC using the calendar year as its taxable year. In a first transaction in 1972, in exchange for its stock, Z acquires section 1245 property from A, an individual who is its sole shareholder, in a transaction in which A's realized gain of \$30 is not recognized by reason of the application of section 351(a). In a second transaction in 1973, Z exchanges such property for other property in a like-kind exchange to which section 1031(b) applies and recognizes \$10 of a realized gain of \$35. (On December 31, 1973, A

is treated as having received a deemed distribution of a dividend which includes such \$10 under paragraph (a)(3) of this section, provided the limitation in paragraph (b) of this section is met.) In a third transaction in 1974, Z sells the property acquired in the like-kind exchange and recognizes a gain of \$25. With respect to A on December 31, 1974, the amount described in paragraph (a)(3)(ii) of this section is limited to \$20, which is the amount of A's gain which was not recognized on the first transaction (\$30) minus the amount of gain recognized by Z on the second transaction (\$10).

(e) *Carry back of net operating loss and capital loss to prior DISC taxable year.* For purposes of sections 991, 995, and 996, the amount of the deduction for the taxable year under section 172 for a net operating loss carryback or carryover or under section 1212 for a capital loss carryback or carryover shall be determined in the same manner as if the DISC were a domestic corporation which had not elected to be treated as a DISC. Thus, the amount of the deduction will be the same whether or not the corporation was a DISC in the year of the loss or in the year to which the loss is carried. For provisions setting forth adjustments to the DISC's, or former DISC's, deemed distributions, adjustments to its divisions of earnings and profits, and other tax consequences arising from such carrybacks, see § 1.996-8.

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7324, 39 FR 35110, Sept. 30, 1974, as amended by T.D. 7862, 47 FR 56492, Dec. 17, 1982; T.D. 7984, 49 FR 40018, Oct. 12, 1984]

§ 1.995-3 Distributions upon disqualification.

(a) *General rule.* Under section 995 (b)(2), a shareholder of a corporation which is disqualified from being a DISC, either because pursuant to § 1.992-2(e)(2) it revoked its election to be treated as a DISC or because it has failed to satisfy the requirements as set forth in § 1.992-1 to be a DISC for a taxable year, shall be deemed to have received (at the times specified in paragraph (b) of this section) distributions taxable as dividends aggregating an amount equal to his pro rata share of

the accumulated DISC income (as defined in § 1.996-3(b)) of such corporation which was accumulated during the immediately preceding consecutive taxable years for which the corporation was a DISC. The pro rata share referred to in the preceding sentence shall be determined as of the close of the last of such consecutive taxable years for which the corporation was a DISC. See § 1.996-7(c) for rules relating to the carryover of, and maintaining a separate account for, such accumulated DISC income in certain reorganizations.

(b) *Time of receipt of deemed distributions.* Distributions described in paragraph (a) of this section shall be deemed to be received in equal installments on the last day of each of the 10 taxable years of the corporation following the year of the disqualification described in paragraph (a) of this section, except that in no case may the number of equal installments exceed the number of the immediately preceding consecutive taxable years for which the corporation was a DISC.

(c) *Transfer of shares.* Deemed distributions are includible under paragraphs (a) and (b) of this section in a shareholder's gross income as a dividend only so long as he continues to hold the shares with respect to which the distribution is deemed made. Thus, the transferee of such shareholder will include in his gross income under paragraphs (a) and (b) of this section the remaining installments of the deemed distribution which the transferor would have included in his gross income as a dividend had he not transferred the shares. However, if the transferee acquires the shares in a transaction in which the transferor's gain is treated under § 1.995-4 in whole or in part as a dividend, then under § 1.996-4(a) such transferee does not include subsequent installments in his gross income to the extent that the transferee treats such subsequent installments as made out of previously taxed income.

(d) *Effect of requalification.* Deemed distributions under paragraphs (a) and (b) of this section continue and are includible in gross income as dividends by the shareholders whether or not the corporation subsequently requalifies and is treated as a DISC.

(e) *Effect of actual distributions and deemed distributions under section 995(b)(1)(G).* If, during the period a shareholder of a DISC, or former DISC, is taking into account deemed distributions under paragraphs (a) and (b) of this section, an actual distribution is made to him out of accumulated DISC income or a deemed distribution because of foreign investment attributable to producer's loans is made under § 1.995-2(a)(5) out of accumulated DISC income, such actual or deemed distribution shall first reduce the last installment of the deemed distributions scheduled to be included in the shareholder's gross income as a dividend, and then the preceding scheduled installments in reverse order. If deemed distributions are scheduled to be included in gross income for two or more disqualifications, an actual distribution or a deemed distribution under § 1.995-2 (a)(5) which is treated as made out of accumulated DISC income reduces the deemed distributions resulting from the earlier disqualification first.

(f) *Examples.* This section may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. X qualifies as a DISC for taxable years 1972 through 1975, but, pursuant to § 1.992-2(e)(2), revokes its election as of January 1, 1976, and is disqualified as a DISC. On that date, X has \$24,000 of accumulated DISC income. X's shareholders will be deemed to receive \$6,000 in distributions taxable as a dividend on the last day of each of X's four succeeding taxable years (1977, 1978, 1979, and 1980).

Example 2. Assume the same facts as in example 1, except that in 1978 X makes an actual distribution of \$22,000 to its shareholders of which \$10,000 is treated under § 1.996-1 as made out of accumulated DISC income. (The remaining \$12,000 of such distribution is treated as made out of previously taxed income.) The actual distribution would first reduce the \$6,000 deemed distribution scheduled for 1980 to zero and then reduce the \$6,000 deemed distribution scheduled for 1979 to \$2,000. Thus, X's shareholders include in 1978 \$16,000 as gross income as dividends (\$10,000 of actual distributions and the \$6,000 deemed distribution scheduled for that year) and \$2,000 as a dividend in 1979.

Example 3. Assume the same facts as in example 2, except that X requalifies as a DISC for taxable year 1977 during which it derives \$7,000 of DISC income (computed after taking

into account a deemed distribution under § 1.995-2(a)(4) of \$7,000), but is again disqualified in 1978. In addition X makes an actual distribution in 1977 equal to the deemed distribution of \$7,000. Such actual distribution is excluded from gross income under § 1.996-1(c). In 1977, X's shareholders include in gross income as dividends the \$6,000 deemed distribution upon disqualification (in addition to the deemed distributions of \$7,000 under § 1.995-2 for 1977 when it was treated as a DISC). The actual distribution in 1978 still reduces the installments resulting from the earlier disqualification. Thus, in 1978, X's shareholders include \$16,000 in gross income as dividends. In 1979, X's shareholders include \$9,000 in gross income as dividends (the final installment of \$2,000 from the earlier disqualification plus the single deemed distribution of \$7,000 resulting from the later disqualification).

[T.D. 7324, 39 FR 35112, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51741, Nov. 17, 1982]

§ 1.995-4 Gain on disposition of stock in a DISC.

(a) *Disposition in which gain is recognized—(1) In general.* If a shareholder disposes, or is treated as disposing, of stock in a DISC, or former DISC, then any gain recognized on such disposition shall be included in the shareholder's gross income as a dividend, notwithstanding any other provision of the Code, to the extent of the accumulated DISC income amount (described in paragraph (d) of this section). To the extent the recognized gain exceeds the accumulated DISC income amount, it is taxable as gain from the sale or exchange of the stock.

(2) *Nonapplication of subparagraph (1).* The provisions of subparagraph (1) of this paragraph do not apply (i) to the extent gain is not recognized (such as, for example, in the case of a gift or an exchange of stock to which section 354 applies) and (ii) to the amount of any recognized gain which is taxable as a dividend (such as, for example, under section 301 or 356(a)(2)) or as gain from the sale or exchange of property which is not a capital asset. The amount taxable as a dividend under section 301 or 356(a)(2) is subject to the rules provided in § 1.995-1(c) for the treatment of actual distributions by a DISC.

(b) *Disposition in which separate corporate existence of DISC is terminated—(1) General.* If stock in a corporation

that is a DISC, or former DISC, is disposed of in a transaction in which its separate corporate existence as a DISC, or former DISC, is terminated, then, notwithstanding any other provision of the Code, an amount of realized gain shall be recognized and included in the transferor's gross income as a dividend. The realized gain shall be recognized to the extent that such gain—

(i) Would not have been recognized but for the provisions of this paragraph, and

(ii) Does not exceed the accumulated DISC income amount (described in paragraph (d) of this section).

(2) *Cessation of separate corporate existence as a DISC, or former DISC.* For purposes of subparagraph (1) of this paragraph, separate corporate existence as a DISC, or former DISC, will be treated as having ceased if, as a result of the transaction, there is no separate entity which is a DISC and to which is carried over the accumulated DISC income and other tax attributes of the DISC, or former DISC, the stock of which is disposed of. Thus, for example, if stock in a DISC, or former DISC, is exchanged in a transaction described in section 381(a) (relating to carryovers in certain corporate acquisitions), the gain realized on the transfer of such stock will not be recognized under subparagraph (1) of this paragraph if the assets of such DISC, or former DISC, are acquired by a corporation which immediately after the acquisition qualifies as a DISC. For a further example, if a DISC, or former DISC, is liquidated in a transaction to which section 332 (relating to complete liquidations of subsidiaries) applies, the transaction will be subject to subparagraph (1) of this paragraph if the basis to the transferee corporation of the assets acquired on the liquidation is determined under section 334(b)(2) (as in effect prior to amendment by the Tax Equity and Fiscal Responsibility Act of 1982) or if immediately after such liquidation the transferee of such assets does not qualify as a DISC. However, separate corporate existence as a DISC, or former DISC, will not be treated as having ceased in the case of a mere change in place of organization, however effected. See §1.996-7 for rules for the carryover of the divisions of a

DISC's earnings and profits to one or more DISC's.

(c) *Disposition to which section 311, 336, or 337 applies*—(1) *In general.* If, after December 31, 1976, a shareholder distributes, sells, or exchanges stock in a DISC, or former DISC, in a transaction to which section 311, 336, or 337 applies, then an amount equal to the excess of the fair market value of such stock over its adjusted basis in the hands of the shareholder shall, notwithstanding any other provision of the Code, be included in gross income of the shareholder as a dividend to the extent of the accumulated DISC income amount (described in paragraph (d) of this section).

(2) *Nonapplication of subparagraph (1).* Subparagraph (1) shall not apply if the person receiving the stock in the disposition has a holding period for the stock which includes the period for which the stock was held by the shareholder disposing of such stock.

(d) *Accumulated DISC income amount*—(1) *General.* For purposes of this section, the accumulated DISC income amount is the accumulated DISC income of the DISC or former DISC which is attributable to the stock disposed of and which was accumulated in taxable years of such DISC or former DISC during the period or periods such stock was held by the shareholder who disposed of such stock.

(2) *Period during which a shareholder has held stock.* For purposes of this section, the period during which a shareholder has held stock includes the period he is considered to have held it by reason of the application of section 1223 and, if his basis is determined in whole or in part under the provisions of section 1014(d) (relating to special rule for DISC stock acquired from decedent) or section 1022 (relating to property acquired from certain decedents who died in 2010), the holding period of the decedent. Such holding period is to exclude the day of acquisition but include the day of disposition. Thus, for example, if A purchases stock in a DISC on December 31, 1972, and makes a gift of such stock to B on June 30, 1973, then on December 31, 1974, B will be treated as having held the stock for 2 full years. If the basis of the stock in C's hands is determined under section 1014(d) upon

a transfer from B's estate on December 31, 1976, by reason of B's death on June 30, 1974, then on December 31, 1976, C will be treated as having held the stock for 4 full years.

(e) *Accumulated DISC income allocable to shareholder under section 995(c)(2)—(1) In general.* Under this paragraph, rules are prescribed for purposes of paragraph (d) of this section as to the manner of determining, with respect to the stock of a DISC, or former DISC, disposed of, the amount of accumulated DISC income which is attributable to such stock and which was accumulated in taxable years of the corporation during the period or periods the stock disposed of was held or treated under paragraph (d)(2) of this section as held by the transferor. Subparagraphs (2), (3), and (4) of this paragraph set forth a method of computation which may be employed to determine such amount. Any other method may be employed so long as the result obtained would be the same as the result obtained under such method.

(2) *Step 1.* Determine the increase (or decrease) in accumulated DISC income for each taxable year of the DISC, or former DISC, by subtracting from the amount of accumulated DISC income (as defined in § 1.996-3(b)) at the close of each taxable year the amount thereof as of the close of the immediately preceding taxable year.

(3) *Step 2.* (i) Determine for each taxable year of the DISC, or former DISC, the increase (or decrease) in accumulated DISC income per share by dividing such increase (or decrease) for the year by the number of shares outstanding or deemed outstanding on each day of such year.

(ii) If the number of shares of stock in the corporation outstanding on each day of a taxable year of the DISC, or former DISC, is not constant, then the number of such shares deemed out-

standing on each day of such year shall be the sum of the fractional amounts in respect of each share which was outstanding on any day of the taxable year. The fractional amount in respect of a share shall be determined by dividing the number of days in the taxable year on which such share was outstanding (excluding the day the share became outstanding, but including the day the share ceased to be outstanding), by the total number of days in such taxable year.

(iii) If for any taxable year of a DISC, or former DISC, the share disposed of was not held (or treated under paragraph (d)(2) of this section as held) by the disposing shareholder for the entire year, then the amount of increase (or decrease) in accumulated DISC income attributable to such share for such year is the amount determined as if he held the share until the end of such year multiplied by a fraction the numerator of which is the number of days in the taxable year on which the shareholder held (or under paragraph (d)(2) of this section is treated as having held) such share and the denominator of which is the total number of days in the taxable year.

(4) *Step 3.* Add the amounts computed in step 2 for each taxable year of the DISC, or former DISC, in which the shareholder held such share of stock.

(5) *Examples.* This paragraph may be illustrated by the following examples:

Example 1. X Corporation uses the calendar year as its taxable year and elects to be a DISC for the first time for 1973. On January 1, 1973, X has 20 shares issued and outstanding. A and B each own 10 shares. On July 1, 1976, X issues 10 shares to C. On December 31, 1977, A sells his 10 shares to D and recognizes a gain of \$120. Under these facts and other facts assumed in the table below, A includes in his gross income for 1977 a dividend under paragraph (b) of this section of \$61.30 and long-term capital gain of \$58.70.

| Year | (a)—Year end accumulated DISC income | (b)—Increase (decrease) in accumulated DISC income | (c)—Shares outstanding | (d)—Increase (decrease) per share (column (b) divided by column (c)) |
|------------|--------------------------------------|--|------------------------|--|
| 1973 | \$80 | \$80 | 20 | \$4.00 |
| 1974 | 50 | (30) | 20 | (1.50) |
| 1975 | 80 | 30 | 20 | 1.50 |
| 1976 | 100 | 20 | 25 | .80 |
| 1977 | 140 | 40 | 30 | 1.33 |

| Year | (a)—Year end accumulated DISC income | (b)—Increase (decrease) in accumulated DISC income | (c)—Shares outstanding | (d)—Increase (decrease) per share (column (b) divided by column (c)) |
|---|--------------------------------------|--|------------------------|--|
| (1) Total increase in accumulated DISC income for each share disposed of (sum of amounts in column (d)) | | | | 6.13 |
| Multiply by number of shares disposed of | | | | 10 |
| (2) Total amount of accumulated DISC income attributable to A's shares disposed of | | | | 61.30 |
| (3) A's gain | | | | 120.00 |
| (4) Portion of A's gain taxable as a dividend (lower of lines (2) and (3)) | | | | 61.30 |
| (5) Portion of A's gain taxable as long-term capital gain (line (3) minus line (4)) | | | | 58.70 |

¹ Under subparagraph (3)(ii) of this paragraph, the aggregate fractional amounts of the 10 shares issued on July 1, 1976, is 5 shares, i.e., 10 shares, multiplied by (183 days/366 days). Thus, the number of shares deemed outstanding for 1976 is 25 shares, i.e., 20 shares plus 5 shares.

Example 2. Assume the same facts as in example 1, except that A sells his 10 shares to D on July 1, 1977. Under subparagraph (3)(iii) of this paragraph, the amount of increase in accumulated DISC income for 1977 which is attributable to each share disposed of is limited to \$.67, i.e., \$1.33 multiplied by 182 days/365 days. Therefore, the sum of the yearly increases (and decreases) in accumulated DISC income for each share is reduced by \$.66 (i.e., \$1.33 minus \$.67). The total increase in accumulated DISC income for each share disposed of is \$5.47 (i.e., \$6.13 minus \$.66). Under these facts, A would include in his gross income for 1977 a dividend of \$54.70 and long-term capital gain of \$65.30 determined as follows:

| | |
|---|--------|
| (1) Total increase in accumulated DISC income for each share disposed of | \$5.47 |
| Multiplied by number of shares disposed of | 10 |
| (2) Total amount of accumulated DISC income attributable of to all shares disposed of | 54.70 |
| (3) A's gain | 120.00 |
| (4) Portion of A's gain taxable as a dividend (lower of lines (2) and (3)) | 54.70 |
| (5) Portion of A's gain taxable as long-term capital gain (line (3) minus line (4)) | 65.30 |

(f) *Effective/applicability date.* This section applies on and after January 19, 2017. For rules before January 19, 2017, see § 1.995-4 as contained in 26 CFR part 1 revised as of April 1, 2016.

[T.D. 7324, 39 FR 35112, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51741, Nov. 17, 1982; T.D. 9811, 82 FR 6240, Jan. 19, 2017]

§ 1.995-5 Foreign investment attributable to producer's loans.

(a) *In general—(1) Limitation.* Under section 995(d), the amount as of the close of a "group taxable year" (as defined in subparagraph (3) of this paragraph) of foreign investment attributable to producer's loans of a DISC for

purposes of section 995(b)(1)(G) shall be the excess (as of the close of such year) of—

- (i) The smallest of—
 - (a) The amount of the net increase in foreign assets (as defined in paragraph (b) of this section) by domestic and foreign members of the controlled group which includes the DISC,
 - (b) The amount of the actual foreign investment by the domestic members of such group (as determined under paragraph (c) of this section), or
 - (c) The amount of outstanding producer's loans (as determined under § 1.993-4) by such DISC to members of such controlled group, over
- (ii) The amount (determined under § 1.995-2 (a)(5) and (b)(2)) of foreign investment attributable to producer's loans treated under section 995(b)(1)(G) as deemed distributions by the particular DISC taxable as dividends for prior taxable years of that particular DISC.

Thus, for example, if the shareholders of a DISC which uses the calendar year as its taxable year (and which is a member of a controlled group in which all of the members use the calendar year as their taxable year) are treated under section 995(b)(1)(G) as receiving foreign investment attributable to producer's loans of a DISC of \$0 in 1972, \$10 in 1973, and \$30 in 1974, or a total of \$40, and if the smallest of the amounts described in subdivision (i) of this subparagraph at the end of 1975 is \$90, then the amount of the foreign investment attributable to producer's loans of a DISC at the end of 1975 is \$50, i.e., the

excess (as of the close of 1975) of the smallest of the amounts described in subdivision (i) of this subparagraph (\$90) over the sum of the amounts of foreign investment attributable to producer's loans treated under section 995(b)(1)(G) as deemed distributions by the DISC taxable as dividends for prior taxable years of the DISC (\$40). If the separate corporate existence of the DISC as to which the amount described in subdivision (ii) of this subparagraph relates ceases to exist within the meaning of § 1.995-4(c)(2), then such amount shall no longer be taken into account by the group for any purpose. For inclusion of amounts because of certain corporate acquisitions, see paragraph (d) of this section.

(2) *Controlled group; domestic and foreign member.* For purposes of this section—

(i) The term “controlled group” has the meaning assigned to such term by § 1.993-1(k).

(ii) The term *domestic member* means a domestic corporation which is a member of a controlled group, and the term *foreign member* means a foreign corporation which is a member of a controlled group.

(3) *Group taxable year.* (i) The term *group taxable year* refers collectively to the taxable year of the DISC and to the taxable year of each corporation in the controlled group which includes the DISC ending with or within the taxable year of the DISC. Thus, for example, if a corporation has a subsidiary which uses the calendar year as its taxable year and which elects to be treated as a DISC, and if the parent has a taxable year ending on October 31, the “group taxable year” for 1973 would refer to calendar year 1973 for the DISC and to the parent's taxable year ending October 31, 1973.

(ii) In cases in which the DISC makes a return for a short taxable year, that is, for a taxable year consisting of a period of less than 12 months, pursuant to section 443 and the regulations thereunder, or § 1.991-1(b)(3), the following rules shall apply—

(a) In the case of a change in the annual accounting period of the DISC resulting in a short taxable year, the *group taxable year* refers collectively to the short taxable year and to the tax-

able year of each corporation in the controlled group which includes the DISC ending with or within the short taxable year.

(b) In the case of a DISC which is in existence during only part of what would otherwise be its taxable year, the *group taxable year* refers collectively to the short period during which the DISC was in existence and to the taxable year of each corporation in the controlled group which includes the DISC ending with or within the 12-month period ending on the last day of the short period.

(iii) With respect to periods prior to the first taxable year for which a member of the group qualified (or is treated) as a DISC, each group taxable year shall be determined under subdivision (i) of this subparagraph as if such member was in existence, it qualified as a DISC, and its taxable year ended on that date corresponding to the date such member's first taxable year ended after it qualified (or is treated) as a DISC whether or not the corporation which qualifies (or is treated) as a DISC used the same taxable year before it so qualified (or is so treated). Thus, for example, if a corporation which is organized on March 3, 1975, uses the calendar year as its taxable year, and is a member of a controlled group which does not include a DISC, first qualifies (or is treated) as a DISC for calendar year 1975, then the term “group taxable year” with respect to years prior to 1975 refers collectively to such prior calendar years and to the taxable year of each corporation in the group ending with or within such prior calendar years.

(iv) For special rules in the case of a group which includes more than one DISC, see paragraph (g) of this section.

(4) *Amounts determined for prior years.* Unless the 3-year limitation is properly elected under subparagraph (5) of this paragraph, the amounts described in paragraphs (b) (relating to net increase in foreign assets) and (c) (relating to actual foreign investments by domestic members) of this section reflect, as of the close of a group taxable year, amounts for all taxable years of members of the group beginning after December 31, 1971 (and amounts arising after December 31, 1971, or such other

date prescribed in paragraph (b)(7) of this section), provided that such amounts relate to such group taxable year and preceding group taxable years. Thus, for example, if all members of a controlled group use the calendar year as the taxable year, and 1980 is the first taxable year for which any member of the group qualifies (or is treated) as a DISC, then, unless the 3-year limitation is elected under subparagraph (5) of this paragraph, the amounts described in paragraphs (b) and (c) of this section will be taken into account beginning with the dates specified in the preceding sentence. For rules as to carryovers on certain corporate acquisitions and reorganizations, see paragraph (d) of this section.

(5) *Three-year elective limitation.* (i) A DISC may elect to take into account only amounts described in paragraphs (b) (relating to net increase in foreign assets) and (c) (relating to actual foreign investment by domestic members) of this section for the 3 taxable years of each member immediately preceding its taxable year included in that first group taxable year which includes a member's first taxable year during which it qualifies (or is treated) as a DISC. For purposes of the preceding sentence, determinations shall be made by reference to the taxable year of the issuer or transferor (as the case may be). If an election is made under this subdivision, the offset for uncommitted transitional funds under paragraph (b)(7) of this section is not allowed. If an election is made under this subdivision, the 3-year limitation applies to amounts described in paragraphs (b)(4) and (c)(1) and (2) of this section.

(ii) An election under subdivision (i) of this subparagraph shall not apply with respect to amounts which must be carried over under paragraph (d) of this section in the case of certain corporate acquisitions and reorganizations.

(iii) An election under subdivision (i) of this subparagraph shall be made by the DISC attaching to its first return, filed under section 6011(e)(2), a statement to the effect that the 3-year limitation is being elected under § 1.995-5(a)(5)(i).

(6) *Cumulative basis.* Pursuant to section 995(d)(5), all determinations of amounts specified in this section are to

be made on a cumulative basis from the 1st year (or date) provided for in this section. Thus, each such determination shall take into account a net increase or a net decrease during the year, as the case may be. However, if the 3-year limitation is elected under subparagraph (5) of this paragraph, then only amounts with respect to periods specified in such subparagraph (5) are amounts taken into account for years before a member of the group qualifies (or is treated) as a DISC. The computations described in this section may be made in any way chosen by the DISC (including a corporation being tested as to whether it qualifies as a DISC), provided such method results in the amount prescribed by this section.

(7) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. X Corporation, which uses the calendar year as its taxable year, is a member of a controlled group (within the meaning of subparagraph (2) of this paragraph). X elects to be treated as a DISC beginning with 1972. The amount of foreign investment attributable to X's producer's loans treated under section 995(b)(1)(G) as a distribution taxable as a dividend as of the close of each group taxable year with respect to each taxable year of X from 1972 through 1975 are set forth in the table below, computed on the basis of the facts assumed (the amounts on lines (1), (2), (3), and (5) being running balances):

| Taxable year of X | 1972 | 1973 | 1974 | 1975 |
|---|--------|------|-------|-------|
| (1) Net increase (or decrease) in foreign assets since January 1, 1972, at close of group taxable year | (\$30) | \$10 | \$100 | \$150 |
| (2) Actual foreign investment at close of group taxable year | 20 | 60 | 80 | 140 |
| (3) Outstanding producer's loans of X (the DISC) as of the close of group taxable year | 0 | 40 | 90 | 120 |
| (4) Smallest of lines (1), (2), or (3) (not less than zero) | 0 | 10 | 80 | 120 |
| (5) Less section 995(b)(1)(G) deemed distributions for prior taxable years (sum of lines (5) and (6) from prior year) | 0 | 0 | 10 | 80 |

§ 1.995-5

| Taxable year of X | 1972 | 1973 | 1974 | 1975 |
|--|------|------|------|------|
| (6) Section 995(b)(1)(G) deemed distribution as of close of taxable year | 0 | 10 | 70 | 40 |

(b) *Net increase in foreign assets*—(1) *In general.* (i) The term *net increase in foreign assets* when used in this section means the excess for the controlled group (as of the close of the group taxable year) of (a) the investment in foreign assets to be taken into account under subparagraph (2) of this paragraph over (b) the aggregate of the five offsets allowed by subparagraphs (3) through (7) of this paragraph.

(ii) No amount described in this paragraph (other than amounts described in subparagraphs (4) and (7) of this paragraph) with respect to a member of the group (or foreign branch of a member) shall be taken into account unless it is attributable to a taxable year of such member beginning after December 31, 1971. For a 3-year elective limitation with respect to the first taxable year for which a member qualifies (or is treated) as a DISC, see paragraph (a)(5) of this section. For manner of determining amounts on a cumulative basis, see paragraph (a)(6) of this section.

(2) *Investments made in foreign assets.*

(i) For purposes of subparagraph (1) of this paragraph, there shall be taken into account as investment in foreign assets the aggregate of the amounts expended (within the meaning of subdivision (ii) of this subparagraph) during the period described in subparagraph (1)(ii) of this paragraph by all members of the controlled group which includes the DISC to acquire assets described in section 1231(b) (determined without regard to any holding period therein provided) which are located outside the United States (as defined in § 1.993-7) reduced by the aggregate of the amounts received by all such members of the controlled group from the sale, exchange, or involuntary conversion of such assets described in section 1231(b) which are located outside the United States. For purposes of this section, amounts expended for assets which are qualified export assets (as defined in § 1.993-2) of a DISC (or which would be qualified export assets if owned by a DISC) shall not be taken into account.

Thus, for example, if a DISC acquires a qualified export asset located outside the United States, the asset is not to be taken into account for purposes of determining the net increase in foreign assets.

(ii) As used in subdivision (i) of this subparagraph, the term *amounts expended* (or *amounts received*) means the amount of any money or the fair market value (on the date of acquisition, sale, exchange, or involuntary conversion) of any property (other than money) used to acquire (or received for) the assets described in such subdivision (i).

(iii) For purposes of this subparagraph, an asset (other than an aircraft or vessel) is considered as located outside the United States if it was used predominantly outside the United States during the group taxable year. The determination as to whether such an asset is used predominantly outside the United States during the group taxable year in which it was acquired or sold, exchanged, or involuntarily converted shall be made by applying the rules of § 1.993-3(d) except that an aircraft described in section 48(a)(2)(B)(i) or a vessel described in section 48(a)(2)(B)(iii) shall be considered located in the United States and all other aircraft or vessels shall be considered located outside the United States. Thus, for example, if a member of a controlled group which includes a DISC acquires a vessel which is documented under the laws of a foreign country, the amount expended to acquire that vessel is an amount described in subdivision (i) of this subparagraph.

(iv) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, is a domestic member of a controlled group (within the meaning of paragraph (a)(2) of this section). During 1972, in a transaction to which section 1031 applies, X acquires a warehouse located outside the United States and having a fair market value of \$100. As consideration, X transfers \$20 in cash and a warehouse located within the United States and having a fair market value of \$80. Under these facts, \$100 will be taken into account as investment in foreign assets.

Example 2. The facts are the same as in example 1, except that the warehouse transferred by X as consideration is located outside the United States. Under these facts, only \$20 will be taken into account as investment in foreign assets because the amount expended for such assets (*i.e.*, \$100) is reduced by the fair market value of any property located outside the United States received in exchange for such assets (*i.e.*, \$80).

(3) *Depreciation with respect to all foreign assets of a controlled group.* (i) An offset allowed by this subparagraph is the depreciation (determined under subdivision (ii) of this subparagraph) or depletion (determined under subdivision (iii) of this subparagraph) attributable to taxable years of the member beginning after December 31, 1971, with respect to all of the group's foreign assets described in subparagraph (2) of this paragraph including such assets acquired prior to the date provided in such subparagraph (2), and without regard to whether the 3-year election in paragraph (a)(5) of this section is made. Thus, for example, depreciation for a taxable year of a member beginning after December 31, 1971, with respect to an asset described in section 1231(b) which is located outside of the United States and which was acquired during a taxable year of the member beginning before January 1, 1972, is an offset allowed by this subparagraph. For a further example, depreciation with respect to a qualified export asset is not such an offset.

(ii) The depreciation taken into account under subdivision (i) of this subparagraph shall be—

(a) In the case of an asset owned by a domestic member, only the amount allowed under section 167(b)(1) (relating to the allowance of the straight-line method of depreciation) and §1.162-11 (b) (relating to amortization in lieu of depreciation), but not the amount allowed under section 179 (relating to the additional first-year depreciation allowance).

(b) In the case of an asset owned by a foreign member, the depreciation and amortization (referred to in (a) of this subdivision) allowable for purposes of computing earnings and profits under subparagraph (5)(i) of this paragraph.

(iii) The depletion taken into account under subdivision (i) of this subparagraph shall be limited to cost de-

pletion computed under sections 611 and 612 and the regulations thereunder. Thus, percentage depletion is not to be taken into account in computing the offset under this subparagraph.

(4) *Amount of outstanding stock or debt.*

(i) An offset allowed by this subparagraph is the outstanding amount of stock (including treasury stock) or debt obligations of any member of the group issued, sold, or exchanged after December 31, 1971, by any member (whether or not the same member) to persons who (on the date of such issuance, sale, or exchange) were neither United States persons (within the meaning of section 7701(a)(30)) nor members of the group: *Provided*, That, in the case of a debt obligation, such obligation is not repaid within 12 months after such issuance, sale, or exchange. Thus, for example, if stock is issued to a member of the group before January 1, 1972, and after December 31, 1971, it is sold to a person who is neither a United States person nor a member of the group, an offset allowed by this subparagraph includes the outstanding amount of such stock. For purposes of this subparagraph, foreign branches of United States banks are not considered to be United States persons.

(ii) The outstanding amount of stock or debt obligations shall be determined in accordance with the following provisions:

(a) The outstanding amount of stock or debt obligations described in subdivision (i) of this subparagraph is equal to the net amount described in (b) of this subdivision reduced (but not below zero) by the amount described in (c) of this subdivision.

(b) The net amount described in this subdivision (b) is the excess of (1) the aggregate of the amount of money and the fair market value of property (other than money) transferred by persons who are not members of the group and who are not U.S. persons as consideration for such stock and debt obligations over (2) fees and commission expenses borne by the issuer or transferrer with respect to their issuance, sale, or exchange.

(c) The amount described in this subdivision (c) is the aggregate amount of

money and fair market value of property (other than money) distributed to such persons on distributions in respect of such stock from other than earnings and profits or on distributions in redemption of such stock and the amount of principal paid pursuant to such debt obligations.

(d) For purposes of this subdivision (ii), in the case of a redemption, the stock or debt redeemed shall be charged against the earliest of such stock or debt issued, sold, or exchanged in order to determine the amount by which the balance of outstanding stock or debt is to be reduced. For purposes of this subparagraph, the fair market value of property received as consideration shall be determined as of the date the transaction occurs, and a contribution to capital within the meaning of section 118 shall be treated as the issuance of stock.

(iii) The provisions of subdivision (i) of this subparagraph apply regardless of the treatment under the Code of the transaction in which the stock or debt was issued, sold, or exchanged. Thus, for example, if X Corporation, a member of a controlled group which includes a DISC, acquires from a non-resident alien individual in exchange solely for X's voting stock all of the stock of Y Corporation pursuant to a reorganization as defined in section 368(a)(1)(B), the fair market value of the Y stock on the date of the exchange would be an offset allowed by this subparagraph.

(iv) The provisions of this subparagraph may be illustrated by the following example:

Example. X Corporation is a member of a controlled group (within a meaning of paragraph (a)(2) of this section) every member of which uses the calendar year as its taxable year. On January 1, 1972, X issues in a public offering its stock to persons described in subdivision (i) of this subparagraph who, in the aggregate, pay \$1,000 as consideration. X pays \$100 in underwriting fees. On the same date, X receives \$425 upon issuing a \$500 debt obligation to such persons at a discount of \$75 and pays \$25 in underwriting fees. On December 31, 1972, the offset allowed under this subparagraph is \$1,300, i.e., (\$1,000 minus \$100) plus (\$425 minus \$25). If, during 1973, X makes a distribution of \$150 (not in redemption) from other than earnings and profits with respect to such stock, then the offset is reduced to \$1,150.

(5) *Earnings and profits.* (i) An offset allowed by this subparagraph is one-half the aggregate of the earnings and profits accumulated for all taxable years beginning after December 31, 1971, computed (without regard to any distributions from earnings and profits by a foreign corporation to a domestic corporation in accordance with § 1.964-1 (relating to a controlled foreign corporation's earnings and profits), of each foreign member of the group which is controlled directly or indirectly (as determined under the principles of section 958 and the regulations thereunder) by a domestic member of the group and each foreign branch of a domestic member of the group (computed as if the branch were a foreign corporation). The DISC is bound by any action on behalf of a foreign member that was taken pursuant to § 1.964-1(c)(3) or by any failure to take action by or on behalf of a foreign member within the time specified in § 1.964-1(c)(6). With respect to a foreign member for which action was not previously required under § 1.964-1(c)(6) to be taken, the DISC may take action on behalf of such member by attaching a statement to that effect to the return of the DISC under section 6011(e)(2) for the first taxable year during which it qualifies (or is treated) as a DISC and there is outstanding a producer's loan made by such DISC to a member of the controlled group which includes the DISC.

(ii) If the aggregate of the accumulated earnings and profits described in subdivision (i) of this subparagraph is a deficit, the amount allowable as an offset under this subparagraph is zero.

(6) *Royalties and fees.* An offset allowed by this subparagraph is one-half the royalties and fees paid by foreign members of the group to domestic members of the group and by foreign branches of domestic members of the group to domestic members of the group during the taxable years of such members beginning after December 31, 1971.

(7) *Uncommitted transitional funds.* (i) An offset allowed by this subparagraph for the uncommitted transitional funds of the group is the sum described in subdivision (ii) of this subparagraph of the amount of certain capital raised

under the foreign direct investment program and the amounts described in subdivision (iv) of this subparagraph of certain foreign excess working capital held on October 31, 1971.

(ii) The amount described in this subdivision of certain capital raised under the foreign direct investment program is the excess (if any) of—

(a) The amount of the offset allowed by subparagraph (4) of this paragraph, determined, however, with respect to the stock and debt obligations of domestic members of the group outstanding on December 31, 1971 (including amounts treated as stock outstanding by reason of a contribution to capital), whether or not outstanding after such date, which were issued, sold, or exchanged on or after January 1, 1968, by any member (whether or not the same member) to persons who (on the date of such issuance, sale, or exchange) were neither United States persons (within the meaning of section 7701(a)(30)) nor members of the group, but only to the extent the taxpayer establishes that such amount constitutes a long-term borrowing (see 15 CFR 1000.324¹) for purposes of the foreign direct investment program (see 15 CFR part 1000¹), over

(b) The amount (determined under paragraph (c) of this section) of actual foreign investment by the domestic members of the group during the portion of the period such stock or debt obligations have been outstanding prior to January 1, 1972, such determination to be made by substituting January 1, 1968, for the December 31, 1971, date specified in such paragraph (c) and by not taking into account the earnings and profits described in paragraph (c)(3) of this section.

For purposes of this subparagraph, foreign branches of United States banks are not considered to be United States persons.

(iii)(a) A taxpayer may establish that an amount under subdivision (ii) (a) of this subparagraph constitutes a long-term borrowing for purposes of the foreign direct investment program by keeping records sufficient to demonstrate that appropriate reports were

filed with the Office of Foreign Direct Investment of the Department of Commerce with respect to the foreign borrowing or by any other method satisfactory to the district director.

(b) The amounts described in subdivision (ii) (a) of this subparagraph include amounts with respect to which an election under section 4912(c), to subject certain obligations of a United States person to the interest equalization tax, has been made: *Provided*, That the obligations to which such amounts relate were issued by an "overseas financing subsidiary" described in 15 CFR part 1000¹ and were assumed by a United States person from such overseas financing subsidiary. Thus, for example, if an overseas financing subsidiary issues its notes to a foreign person in 1968, and such notes are assumed by its United States parent in 1973, which parent elects under section 4912(c) to have the notes subject to the interest equalization tax, then the amount of money received by the subsidiary is an amount described in subdivision (ii)(a) of this subparagraph.

(iv) The amount described in this subdivision of foreign excess working capital is the amount of liquid assets held by the foreign members of such group and foreign branches of domestic members of such group on October 31, 1971 (whether or not so held after such date) in excess of their reasonable working capital needs (as defined in § 1.993-2 (e)) on that date, but only to the extent not included in subdivision (ii) of this subparagraph. For purposes of this subdivision, the term *liquid assets* means money, bank deposits (not including time deposits), and indebtedness of any kind (including time deposits) which on the day acquired had a maturity of 2 years or less.

(8) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. X Corporation, which uses the calendar year as its taxable year is a member of a controlled group (within the meaning of paragraph (a)(2) of this section). X elects to be treated as a DISC beginning with 1972. The amount of net increase in foreign assets of the group at the close of each group taxable year with respect to each taxable year of X from 1972 through 1975 are set forth in the table below, computed on the basis of

¹EDITORIAL NOTE: 15 CFR part 1000 was removed at 39 FR 30481, Aug. 23, 1974.

§ 1.995-5

26 CFR Ch. I (4-1-23 Edition)

the facts assumed (the amounts on each line being running balances):

| Taxable year of X | 1972 | 1973 | 1974 | 1975 |
|--|-------|-------|-------|-------|
| (1) Investment in foreign assets | \$150 | \$165 | \$260 | \$300 |
| (2) Depreciation with respect to foreign assets of group | 20 | 40 | 60 | 80 |
| (3) Amount of stock or debt outstanding issued after December 31, 1971 | 30 | 30 | 30 | 30 |
| (4) One-half earnings and profits of foreign members | 40 | 70 | 100 | 130 |
| (5) Royalties and fees paid by foreign members to domestic members | 10 | 15 | 20 | 20 |
| (6) Uncommitted transitional funds | 10 | 10 | 10 | 10 |
| (7) Sum of lines (2) through (6) | 110 | 165 | 220 | 270 |
| (8) Net increase in foreign assets (line (1) minus line (6)) .. | 40 | 0 | 40 | 30 |

(c) *Actual foreign investment by domestic members.* For purposes of determining the limitation in paragraph (a) of this section, the amount of the actual foreign investment by domestic members of a controlled group is the sum (as of the close of the group taxable year) determined on a cumulative basis (see paragraph (a)(6) of this section) of—

(1) *Outstanding stock or debt (including contributions to capital).* The outstanding amount (determined in accordance with the principles of paragraph (b)(4)(ii) of this section, applied with respect to stock or debt obligations described in this subparagraph) of stock (including treasury stock) or debt obligations (other than normal trade indebtedness) of foreign members of the group issued, sold, or exchanged after December 31, 1971, by any person (whether or not a member) which is not a domestic member to domestic members of the group: *Provided,* That the outstanding amount of debt obligations of any foreign member shall be the greater of such amount outstanding at the close of the taxable year of such member or the highest such amount outstanding at any time during the immediately preceding 90 days.

(2) *Transfers to foreign branches.* The amount of money or the fair market

value of property (other than money) transferred by domestic members of the group after December 31, 1971, to foreign branches of such members in transactions which would, if the branch were a corporation, be in consideration for the sale of stock or debt obligations of (or a contribution of capital to) such foreign branches (as determined under subparagraph (1) of this paragraph), and

(3) *Earnings and profits of foreign members.* One-half of the earnings and profits (computed in accordance with paragraph (b)(5) of this section for purposes of computing net increase in foreign assets) of foreign members of the group which are controlled directly or indirectly (as determined under the principles of section 958 and the regulations thereunder) by a domestic member of the group and foreign branches (treated for this purpose as a corporation) of domestic members of the group accumulated during the taxable years of such foreign members (or branches) beginning after December 31, 1971, or, if later, the taxable year referred to in paragraph (a)(5)(i) of this section if the 3-year election provided for in such paragraph (a)(5)(i) is made.

(d) *Carryovers on certain corporate acquisitions and reorganizations—(1) Certain corporate acquisitions.* (i) If—

(a) A member of a controlled group (“first controlled group”) acquires in a transaction to which section 381 applies the assets of a corporation which is a member of a second controlled group or acquires stock in such a corporation pursuant to a reorganization as defined in section 368(a)(1)(B) to which section 361 applies, or

(b) A member or combination of members of the first controlled group acquire in a transaction not described in (a) of this subdivision a majority interest (as defined in paragraph (e)(2) of this section) in the stock of a corporation which is a member of a second controlled group which includes a DISC so that such DISC after the acquisition is a member of the new controlled group.

then, for purposes of computing foreign investment attributable to producer’s loans with respect to the new controlled group as constituted after such acquisition, all amounts described in

paragraphs (a) through (c) of this section, including the amount specified in paragraph (a)(1)(ii) of this section (relating to amounts treated under section 995(b)(1)(G) as deemed distributions by the DISC taxable as dividends for prior taxable years of the DISC), with respect to members of the second controlled group which become members of the new controlled group shall carry over to such new controlled group. For purposes of this subdivision (i), a controlled group may consist of only one member. With respect to certain transactions involving foreign corporations, see section 367.

(ii) If a member or combination of members of a controlled group, immediately after an acquisition of stock to which subdivision (i) of this subparagraph applies, do not control the total combined voting power (determined under §1.957-1(b)) of the corporation whose stock was acquired, proper apportionment consistent with the principles of paragraph (e)(5) of this section shall be made with respect to amounts to which paragraphs (a) through (c) of this section apply.

(iii)(a) If subdivision (i) of this subparagraph applies, then for purposes of determining the application of the 3-year elective limitation provided for in paragraph (a)(5) of this section, the rules in (b), (c), and (d) of this subdivision (iii) apply.

(b) If both the “first controlled group” and the “second controlled group” (as those terms are defined in subdivision (i) of this subparagraph) include a DISC, and a DISC in either group has elected the 3-year limitation provided in paragraph (a)(5) of this section, then only those amounts taken into account under such paragraph (a)(5) by the electing DISC or DISC’s shall be taken into account.

(c) If one of the groups includes a DISC and the other does not, and if the DISC has elected the 3-year limitation provided in paragraph (a)(5) of this section, then, for purposes of computing foreign investment attributable to producer’s loans with respect to the new controlled group as constituted after the acquisition, all amounts described in paragraphs (a) through (c) of this section with respect to members of the controlled group which did not include

the DISC shall carry over to such new controlled group, but only to the extent provided in such paragraph (a)(5), computed as if the group taxable year in which the acquisition occurred was the first group taxable year which includes a member’s first taxable year during which it qualifies (or is treated) as a DISC.

(d) If (c) of this subdivision (iii) applies, except that the DISC has not elected the 3-year limitation provided in paragraph (a)(5) of this section, then the DISC in the new controlled group as constituted after the acquisition may, with respect to members of the controlled group which did not include the DISC, make the election provided in such paragraph (a)(5), and treat the year in which the acquisition occurred as if it were the first group taxable year which includes a member’s first taxable year during which it qualifies (or is treated) as a DISC.

(iv) If a majority interest, or an interest in addition to a majority interest, is acquired in a transaction other than a transaction described in subdivision (i) of this subparagraph, then the rules in paragraph (e) of this section (relating to the acquisition of the foreign assets of a corporation) apply.

(2) *Corporation ceasing to be a member.* As of the date a corporation which is a member of a controlled group ceases to be a member of such group, the amounts of such group described in paragraphs (a) through (c) of this section will be reduced by such amounts which are attributable to the corporation which is no longer a member of the group.

(e) *Acquisition of a majority interest in a corporation—(1) In general.* If paragraph (d)(1)(i) of this section (relating to certain corporate acquisitions in which all amounts described in paragraphs (a) through (c) of this section carry over) does not apply, then, for purposes of determining under paragraph (b)(2) of this section the investments made in foreign assets by a controlled group, the acquisition of a majority interest (as defined in subparagraph (2) of this paragraph) or an interest in addition to a majority interest in a corporation by any member or

combination of members of the controlled group is considered an acquisition of the assets (to the extent provided in subparagraph (5) of this paragraph) of the acquired corporation by the group, including the assets of any foreign corporation in which the acquired corporation owns a majority interest (to the extent provided in subparagraph (5) of this paragraph). For the rules concerning the date upon which an acquisition of a majority interest is considered to have occurred, see subparagraph (3) of this paragraph.

(2) *Majority interest.* For purposes of this section, a majority interest is more than 50 percent of the total combined voting power of all classes of a corporation's stock entitled to vote, as determined under § 1.957-1(b).

(3) *Acquisition date.* For purposes of this paragraph, an acquisition of a majority interest shall be considered to have occurred on the day on which the combined voting power of the group first reached the percentage required in subparagraph (2) of this paragraph.

(4) *Valuation of assets.* For purposes of this section, the amount of a corporation's assets deemed acquired is the fair market value of the assets on the date a majority interest, or an interest in addition to a previously held majority interest, is acquired.

(5) *Apportionment in the case of the acquisition of less than all of the voting stock.* (i) If the acquisition described in subparagraph (1) of this paragraph of a majority interest is of less than 100 percent of the total combined voting power of all classes of stock of the acquired corporation entitled to vote, then for purposes of subparagraph (1) of this paragraph the amount of the foreign assets of the corporation deemed acquired as of the day the majority interest is considered acquired shall be an amount equal to the fair market value of all of the corporation's foreign assets described in paragraph (b)(2) of this section as of such day multiplied by the percentage of the total combined voting power (determined under § 1.957-1(b)) held by members of the group on the day the majority interest is considered acquired.

(ii) If any member or combination of members of the controlled group hold a majority interest in a corporation,

then for purposes of subparagraph (1) of this paragraph the acquisition of additional combined voting power by members of the controlled group shall be considered an acquisition of its foreign assets described in paragraph (b)(2) of this section in an amount equal to the fair market value of all such assets held by the foreign corporation on the date of the acquisition, multiplied by the increase (expressed in percentage points) in total combined voting power (as determined under § 1.957-1(b)) which occurred.

(6) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. M Corporation uses the calendar year as its taxable year. On November 18, 1973, M acquires from A, an individual United States person, for \$1 million cash all 10,000 shares of the voting stock of N, a foreign corporation. N's only asset is a warehouse located in France with a fair market value on the date of acquisition of \$1 million. Under subparagraph (1) of this paragraph, the controlled group of which M is a member is considered to have expended \$1 million for the acquisition of foreign assets described in paragraph (b)(2) of this section.

Example 2. The facts are the same as in example 1, except that on November 18, 1973, M acquires only 80 percent of N's voting stock. M is considered to have expended \$800,000 for the acquisition of assets described in paragraph (b)(2) of this section, computed as follows:

| | |
|--|-------------|
| (1) Fair market value of N's foreign assets described in paragraph (b)(2) of this section | \$1,000,000 |
| (2) Multiply by percentage of total combined voting power of all classes of N stock entitled to vote acquired by M | .8 |
| (3) Amount considered expended | \$800,000 |

Example 3. The facts are the same as in example 2, except that individual A is not a United States person, and M acquires the 80 percent of N voting stock in exchange for cash of \$100,000 and M stock having a fair market value on the date of the acquisition of \$700,000. M is considered to have acquired assets described in paragraph (b)(2) of this section in the amount of \$800,000 (see computations in example 2) and to have an offset under paragraph (b)(4) of this section (relating to outstanding stock or debt) of \$700,000 (the fair market value of the M stock transferred to A who is not a United States person). However, the controlled group of which

Internal Revenue Service, Treasury

§ 1.995-5

M is a member is not considered to have acquired any other amounts described in paragraphs (a) through (c) of this section with respect to N for taxable years prior to the taxable year of N during which the acquisition occurred.

Example 4. P Corporation, which uses the calendar year as its taxable year, is a member of a controlled group which includes a DISC. During 1973, P acquires from B, an individual United States person, for cash, 30 percent of the total combined voting power of all classes of stock entitled to vote of Q, a foreign corporation. All of Q's assets are assets described in paragraph (b)(2) of this section. No additional interest in Q is acquired by members of the group during 1973. The controlled group of which Q is a member is not considered to have made any investments in foreign assets described in such paragraph (b)(2) as of the close of 1973.

Example 5. Assume the same facts as in example 4. Assume further that during 1974, R Corporation, a member of the controlled group which includes P, acquires for cash 40 percent of the total combined voting power of all classes of stock of Q entitled to vote as follows: 20 percent on July 31, and 20 percent on December 31. Thus, on December 31, 1974, members of the controlled group own 70 percent of Q's voting power (30 + 20 + 20) and on that date are considered to have acquired a majority interest in Q. The fair market value of Q's assets on December 31, 1974, is \$5 million. The group is considered to have expended \$3,500,000 for the acquisition of assets described in paragraph (b)(2) of this section computed as follows:

| | |
|--|-------------|
| (1) Fair market value of Q's foreign assets described in paragraph (b)(2) of this section as of the date the acquisition is deemed to have occurred under subparagraph (3) of this paragraph (December 31, 1974) | \$5,000,000 |
| (2) Multiply by percentage of total combined voting power of all classes of Q stock entitled to vote held by members of the group on such date | .7 |
| | \$3,500,000 |

Example 6. The facts are the same as in example 5. Assume further that on July 15, 1975, P acquires the remaining 30 percent of the total combined voting power of all classes of Q stock entitled to vote, and on such date the fair market value of Q's assets is \$5,500,000. The group is considered to have expended \$5,150,000 for the acquisition of assets described in paragraph (b)(2) of this section as of the close of 1975, computed as follows:

| | |
|--|-------------|
| (1) Amount of prior years' investment | \$3,500,000 |
| (2) Investment during 1975: | |
| (a) Fair market value of Q's foreign assets described in paragraph (b)(2) of this section on July 15, 1975 | \$5,500,000 |

| | |
|---|-------------|
| (b) Multiply by additional percentage acquired of total combined voting power of all classes of Q stock entitled to vote | .3 |
| (c) Investment during 1975 | \$1,650,000 |
| (3) Amount considered expended for foreign assets described in paragraph (b)(2) of this section by reason of the acquisition of Q stock | \$5,150,000 |

(f) *Records.* A DISC shall keep or be readily able to produce such permanent books of account or records as are sufficient to establish the transactions and amounts described in this section. Where applicable, such books of account or records shall be cumulative and shall show transactions and amounts of the members of the controlled group which includes the DISC which occurred prior to the date the DISC qualified (or is treated) as a DISC.

(g) *Multiple DISC's—(1) Allocation among DISC's.* In the case of a controlled group which includes more than one DISC, the amounts described in paragraphs (b) and (c) of this section shall be allocated among the DISC's in order to determine the limitation in paragraph (a) of this section. Each DISC's allocable portion of these amounts shall be equal to the total of such amounts multiplied by a fraction the numerator of which is the individual DISC's outstanding producer's loans to members of the group, and the denominator of which is the aggregate amounts of outstanding producer's loans to members of the group by all DISC's which are members of the group.

(2) *Different taxable years.* If all of the DISC's which are members of the controlled group do not have the same taxable year, then one such DISC shall on behalf of all such DISC's elect to make all computations under section 995(d) as if all DISC's that are members of the group use the same taxable year as the actual taxable year of any one of the DISC's. The election as to which DISC's taxable year is to be used shall be made by the electing DISC attaching to its first return, filed under section 6011(e)(2), a statement indicating which such taxable year will be used. Once such an election is made it may not be revoked until such time as all of the DISC's which are members of the group use the same taxable year. If this

subparagraph applies, books and records must be kept by the group which are adequate to show the necessary computations under section 995(d).

(3) This paragraph may be illustrated by the following example:

Example. Corporation X and corporation Y are members of the same controlled group and each has elected to be treated as a DISC. X uses a taxable year ending March 31, and Y uses a taxable year ending November 30. Notwithstanding the fact that all other members of the group use the calendar year as their taxable year, all computations for purposes of determining the amount of foreign investment attributable to producer's loans under section 995(d) must be made as if both DISC's use a taxable year ending either March 31 (X's taxable year) or November 30 (Y's taxable year).

[T.D. 7324, 39 FR 35114, Sept. 30, 1974, as amended by T.D. 7420, 41 FR 20655, May 20, 1976; T.D. 7854, 47 FR 51742, Nov. 17, 1982]

§ 1.995-6 Taxable income attributable to military property.

(a) *Gross income attributable to military property.* For purposes of section 995(b)(3)(A)(i), the term "gross income which is attributable to military property" includes income from the sale, exchange, lease, or rental of military property (as described in paragraph (c) of this section). The term also includes gross income from the performance of services which are related and subsidiary (as defined in § 1.993-1(d)) to any qualified sale, exchange, lease, or rental of military property. Where gross income cannot be determined on an item by item basis, the gross income with respect to those items not so determinable shall be apportioned. Such apportionment shall be accomplished using appropriate facts and circumstances, so that the gross income apportioned to sale of military property bears a reasonably close factual relationship to the actual gross income earned on such sales. The apportionment shall be based on methods which include the fair market value of property sold or exchanged, the fair rental value of any leaseholds granted, the fair market value of any related or subsidiary services performed in connection with such sale or leases or methods based on gross receipts or costs of goods sold, where appropriate.

(b) *Deductions.* For purposes of section 995(b)(3)(A)(ii), deductions shall be properly allocated and apportioned to gross income, described in paragraph (a) of this section, in accordance with the rules of § 1.861-8. These deductions include all applicable deductions from gross income provided under part VI of subchapter B of chapter 1 of the Code.

(c) *Military property.* For purposes of this section, the term *military property* means any property which is an arm, ammunition, or implement of war designated in the munitions list published pursuant to section 38 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2778 which superseded 22 U.S.C. 1934) and the regulations thereunder (22 CFR 121.01).

(d) *Illustration.* The principles of this section may be illustrated by the following example:

Example. X Corporation elects to be a DISC for the first time in 1976. X has taxable income of \$50,000, of which \$30,000 is attributable to military property and \$10,000 to interest on producer's loans. The total deemed distributions with respect to X are as follows:

| | |
|--|----------|
| (1) Gross interest from Producer's loans in 1976 | \$10,000 |
| (2) 50 percent of the taxable income of the DISC attributable to military property in 1976 | 15,000 |
| (3) One-half of the excess of taxable income for 1976 over the sum of lines (1) and (2) (½ of (\$50,000 minus \$25,000)) | 12,500 |
| (4) Total deemed distributions (sum of total lines (1), (2), and (3)) | 37,500 |

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat 917, 26 U.S.C. 7805))

[T.D. 7984, 49 FR 40019, Oct. 12, 1984]

§ 1.996-1 Rules for actual distributions and certain deemed distributions.

(a) *General rule.* Under section 996(a)(1), any actual distribution (other than a distribution described in paragraph (b) of this section or to which § 1.995-4 applies) to a shareholder by a DISC, or former DISC, which is made out of earnings and profits shall be treated as made—

(1) First, out of "previously taxed income" (as defined in § 1.996-3(c)) to the extent thereof,

(2) Second, out of "accumulated DISC income" (as defined in § 1.996-3(b)) to the extent thereof, and

(3) Third, out of “other earnings and profits” (as defined in §1.996-3(d)) to the extent thereof.

(b) *Rules for qualifying distributions and deemed distributions under section 995(b)(1)(G)*—(1) *In general.* Except as provided in subparagraph (2), any actual distribution to meet qualification requirements made pursuant to §1.992-3 and any deemed distribution pursuant to §1.995-2(a)(5) (relating to foreign investment attributable to producer’s loans) which is made out of earnings and profits shall be treated as made—

(i) First, out of “accumulated DISC income” (as defined in §1.996-3(b)) to the extent thereof.

(ii) Second, out of “other earnings and profits” (as defined in §1.996-3(d)) to the extent thereof, and

(iii) Third, out of “previously taxed income” (as defined in §1.996-3(c)) to the extent thereof.

(2) *Special rule.* For taxable years beginning after December 31, 1975, paragraph (b)(1) of this section shall apply to one-half of the amount of an actual distribution made pursuant to §1.992-3 to satisfy the condition of §1.992-1(b) (the gross receipts test) and paragraph (a) of this section shall apply to the remaining one-half of such amount.

(c) *Exclusion from gross income.* Under section 996(a)(3), amounts distributed out of previously taxed income shall be excluded by the distributee from gross income. However, see §1.996-5(b) for treatment as gain from the sale or exchange of property of the portion of an actual distribution out of previously taxed income to the extent it exceeds the adjusted basis of the stock with respect to which the distribution is made.

(d) *Priority of distributions.* Under section 996(c), for purposes of determining their treatment under paragraphs (a), (b), and (c) of this section, distributions made during a taxable year shall be treated as being made in the following order—

(1) Deemed distributions under §§1.995-2 and 1.995-3.

(2) Actual distributions to meet qualification requirements made pursuant to §1.992-3 in the order in which they are made, and

(3) Other actual distributions in the order in which they are made.

Thus, the treatment of any distribution shall be determined after the divisions of earnings and profits have been properly adjusted by taking into account distributions of higher priority which are made or deemed made during the same taxable year.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Y Corporation, which uses the calendar year as its taxable year elects to be treated as a DISC beginning with 1972. During 1973, Y makes a cash distribution of \$100 to X Corporation, Y’s sole shareholder. For 1973, Y has no earnings and profits. As of the beginning of 1973, Y has \$300 of accumulated earnings and profits, which consist of \$70 of accumulated DISC income, \$40 of previously taxed income, and \$190 of other earnings and profits. The entire \$100 distribution is a dividend under section 316. However, \$40 thereof is treated as made out of previously taxed income and is thus excluded from gross income. Accordingly, only \$60 is treated as distributed out of accumulated DISC income and includible in gross income. See §1.246-4 for the inapplicability of the dividend received deduction with respect to the entire distribution of \$100.

Example 2. Assume the same facts as in example 1, except that the cash distribution is designated as a distribution to meet qualification requirements made pursuant to §1.992-3. Under these facts, X includes the entire distribution in its gross income as a dividend. Of the \$100 distributed, \$70 is treated as made out of accumulated DISC income and the remaining \$30 is treated as made out of other earnings and profits. The dividend received deduction under section 243 is available only with respect to such \$30.

Example 3. Y Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. As of the end of 1975, Y had failed to meet the gross receipts test for that year. In 1975 Y had \$100 of taxable income, \$80 of which was attributable to qualified export receipts and \$20 of which was attributable to receipts that did not qualify as qualified export receipts. As of the beginning of 1976, Y had \$300 of accumulated earnings and profits, which consisted of \$70 of accumulated DISC income, \$40 of previously taxed income, and \$190 of other earnings and profits. In 1976 Y makes a cash distribution of \$20 pursuant to §1.992-3 in order to satisfy the gross receipts test for 1975. For 1976 Y has no earnings and profits and no deemed distributions. The entire \$20 distribution is a dividend under section 316. Under §1.996-1(b)(2), half of the \$20 cash distribution is treated pursuant to §1.996-1(b)(1) and half is treated pursuant to §1.996-1(a).

§ 1.996-2

Thus, \$10 is treated as distributed out of accumulated DISC income and is includible in gross income. The other \$10 is treated as made out of previously taxed income and is thus excluded from gross income. As of the beginning of 1977, Y has \$280 of accumulated earnings and profits, which consists of \$60 of accumulated DISC income, \$30 of previously taxed income, and \$190 of other earnings and profits.

[T.D. 7324, 39 FR 35120, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51742, Nov. 17, 1982]

§ 1.996-2 Ordering rules for losses.

(a) *In general.* Under section 996(b), if for any taxable year a DISC, or a former DISC, incurs a deficit in earnings and profits, such deficit shall be charged—

(1) First, to other earnings and profits (as defined in § 1.996-3(d)) to the extent thereof,

(2) Second, to accumulated DISC income (as defined in § 1.996-3(b)) to the extent thereof, subject to the special rule in paragraph (b) of this section,

(3) Third, to previously taxed income (as defined in § 1.996-3(c)) to the extent thereof, and

(4) To the extent that the amount of such deficit exceeds the sum of the amounts charged in accordance with subparagraphs (1), (2), and (3) of this paragraph, to other earnings and profits (as defined in § 1.996-3(d)).

Thus, the excess deficit charged to other earnings and profits under subparagraph (4) of this paragraph will create a deficit therein in the amount of such excess. To determine the amount of any division of earnings and profits for the purpose of determining under § 1.996-1 the treatment of any actual and certain deemed distributions, the portion of a deficit in earnings and profits chargeable under this paragraph to such division prior to such distribution shall be determined in a manner consistent with the rules in § 1.316-2(b) for determining the amount of earnings and profits available on the date of any distribution.

(b) *Deficits subsequent to a disqualification.* A deficit in earnings and profits of a DISC, or former DISC, shall not be charged to accumulated DISC income which has been determined to be deemed distributed to the shareholders pursuant to § 1.995-3 as a result of a rev-

ocation of election or other disqualification. Thus, in accordance with paragraph (a) of this section as modified by this paragraph, a deficit incurred by a former DISC following such a revocation or disqualification shall be charged first to other earnings and profits and then to previously taxed income with any balance being charged to other earnings and profits and creating a deficit therein. The preceding sentence shall also apply in the case of a deficit incurred by a DISC which has no accumulated DISC income accumulated during its current taxable year and all immediately preceding consecutive taxable years for which it was a DISC. If as a result of the application of this paragraph the amount of a deficit in other earnings and profits exceeds the amount of a deficit in accumulated earnings and profits, then upon any subsequent actual distribution the deficit in other earnings and profits shall be reduced by the lower of (1) the amount of such actual distribution chargeable to accumulated DISC income or previously taxed income or (2) the amount of such excess.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. X Corporation, which uses the calendar year as its taxable year, becomes a DISC beginning with 1976. In addition to other facts assumed in the table below, X incurs a deficit in earnings and profits for 1979 of \$70. Such deficit is charged to the divisions of X's earnings and profits pursuant to paragraph (a) of this section in the manner set forth in such table.

| | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|-------------------------------|-------------------------|-------------------------|----------------------------|
| Balance January 1, 1976 | | | \$50 |
| Increase for 1976 | \$10 | \$8 | |
| Increase for 1977 | 10 | 8 | |
| Increase for 1978 | 10 | 8 | |
| Balance January 1, 1979 | 30 | 24 | 50 |
| Deficit for 1979 of \$70: | | | |
| Charge No. 1 | | | (50) |
| Charge No. 2 | (20) | | |
| Balance January 1, 1980 .. | 10 | | 0 |

Example 2. Assume the same facts as in example 1, except that effective for taxable years beginning with 1979, X revokes its election to be treated as a DISC. Under § 1.995-3,

X has \$30 of accumulated DISC income which is to be deemed distributed \$10 per year in 1980, 1981, and 1982. The deficit in earnings and profits for 1979 is charged to the divisions of X's earnings and profits pursuant to paragraph (b) of this section in the manner set forth in the table below:

| | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---------------------------------|-------------------------|-------------------------|----------------------------|
| Balance January 1, 1979 | \$30 | \$24 | \$50 |
| Deficit for 1979 of \$70: | | | |
| Charge No. 1 | | | (50) |
| Charge No. 2 | | (20) | |
| Balance January 1, 1980 .. | 30 | 4 | 0 |

Example 3. Assume the same facts as in example 2, except that the deficit in earnings and profits for 1979 is \$120. Assume further that for 1980, 1981, and 1982, during which years X's shareholders are receiving scheduled installments of the deemed distributions of accumulated DISC income under §1.995-3, X, a former DISC, has neither earnings and profits nor a deficit in earnings and profits. The \$120 deficit for 1979 is charged to the divisions of X's earnings and profits pursuant to paragraph (b) of this section in the manner set forth in the table below:

| | Accumulated DISC income | Previously taxed income | Other earnings and profits | Accumulated earnings and profits |
|--|-------------------------|-------------------------|----------------------------|----------------------------------|
| Balance January 1, 1979 .. | \$30 | \$24 | \$50 | \$104 |
| Deficit for 1979 of \$120 | | | | (120) |
| Charge No. 1 | | | (50) | |
| Charge No. 2 | | (24) | | |
| Charge No. 3 | | | (46) | |
| Balance January 1, 1980 | 30 | 0 | (46) | (16) |
| Deemed distributions in 1980 under § 1.995-3 | (10) | 10 | | |
| Balance January 1, 1981 | 20 | 10 | (46) | (16) |

Example 4. Assume the same facts as in example 3, except that on December 31, 1980, X makes an actual distribution of \$10 out of previously taxed income. On January 1, 1981, X has \$20 of accumulated DISC income, no previously taxed income, and a deficit of \$36 in other earnings and profits. The deficit of \$16 in accumulated earnings and profits remains the same.

[T.D. 7324, 39 FR 35120, Sept. 30, 1974]

§ 1.996-3 Divisions of earnings and profits.

(a) *In general.* For purposes of sections 991 through 997, the earnings and profits of a DISC, or former DISC, shall be treated as composed of the following three divisions:

- (1) Accumulated DISC income (as defined in paragraph (b) of this section),
- (2) Previously taxed income (as defined in paragraph (c) of this section), and
- (3) Other earnings and profits (as defined in paragraph (d) of this section).

(b) *Accumulated DISC income defined.* (1) Accumulated DISC income is that portion of a corporation's earnings and profits which were derived during taxable years for which it qualified as a DISC and which were deferred from taxation. Accumulated DISC income as of the close of each taxable year of the corporation is—

(i) The amount of accumulated DISC income as of the close of the immediately preceding taxable year increased by,

(ii) The amount of DISC income for the year (as determined in subparagraph (2) of this paragraph) and reduced (but not below zero) by,

(iii) The items enumerated in subparagraph (3) of this paragraph.

(2) Under section 996(f)(1), DISC income is (i) the earnings and profits derived by the corporation during a taxable year for which such corporation is a DISC minus (ii) amounts deemed distributed under §1.995-2 other than the amount of foreign investment attributable to producer's loans described in §1.995-2(a)(5). For example, the earnings and profits of a DISC for a taxable year include any amounts includible in such DISC's gross income pursuant to section 951(a) (relating to controlled foreign corporations). Deemed distributions under §1.995-2(a)(5) are taken into account under subparagraph (3) of this paragraph as a reduction in computing accumulated DISC income.

(3) The accumulated DISC income (as increased by DISC income for the year determined under subparagraph (2) of this paragraph) is reduced by each of the following items in the following order:

- (i) Any amount deemed distributed for such year under §1.995-3 (relating to

§ 1.996-3

26 CFR Ch. I (4-1-23 Edition)

deemed distributions upon disqualification),

(ii) Any amount of foreign investment attributable to producer's loans deemed distributed for such year under § 1.995-2(a)(5) to the extent it is charged to accumulated DISC income under § 1.996-1(b)(1)(i),

(iii) The amount of any adjustment to accumulated DISC income for such year under § 1.966-4(b)(1), and

(iv) To the extent they are treated, under § 1.996-1 (a) or (b) (relating to ordering rules for distributions), as made out of accumulated DISC income, the amounts of any actual qualifying distributions pursuant to § 1.992-3 in the order in which they are made, and thereafter by the amounts of any other actual distributions in the order in which they are made, except that, prior to each actual distribution, accumulated DISC income shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under § 1.996-2(a)(2) to accumulated DISC income.

(4) Every distribution or other reduction in accumulated DISC income pursuant to subparagraph (3) of this paragraph shall be charged to the most recently accumulated DISC income.

(c) *Previously taxed income.* Under section 996(f)(2), previously taxed income as of the close of each taxable year of the corporation is an amount equal to—

(1) The sum of—

(i) The amount of previously taxed income as of the close of the immediately preceding taxable year,

(ii) Amounts deemed distributed for the current year under § 1.995-2 (relating to deemed distributions in qualified years),

(iii) Amounts deemed distributed for the current year under § 1.995-3 (relating to deemed distributions upon disqualification),

(iv) With respect to a distribution in redemption to which § 1.996-4(b)(1) applies, an amount equal to the excess (if any) of (a) the amount of the reduction under § 1.996-4(b)(1) in accumulated DISC income over (b) the reduction in the corporation's earnings and profits (see section 312(e)), and

(v) Any amount by which accumulated DISC income is reduced under

paragraph (b)(3)(ii) of this section by reason of a deemed distribution as a dividend, under § 1.995-2(a)(5), of an amount of foreign investment attributable to producer's loans,

(2) Decreased (but not below zero), to the extent they are treated, under § 1.996-1 (a) or (b) (relating to ordering rules for distributions), as made out of previously taxed income, by the amounts of any actual qualifying distributions pursuant to § 1.992-3 in the order in which they are made, and thereafter by the amounts of any other actual distributions in the order in which they are made, except that, prior to any actual distribution, previously taxed income shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under § 1.996-2(a)(3) to previously taxed income.

(d) *Other earnings and profits.* Under section 996(f)(3), other earnings and profits consist of earnings and profits other than accumulated DISC income and previously taxed income described respectively in paragraphs (b) and (c) of this section. Other earnings and profits as of the close of each taxable year of the corporation is (subject to paragraph (e) of this section) an amount equal to the amount of other earnings and profits as of the close of the immediately preceding taxable year decreased (if necessary, below zero) in the following order by—

(1) To the extent they are treated, under § 1.996-1 (a) or (b) (relating to ordering rules for distributions), as made out of other earnings and profits, the amounts of any actual qualifying distributions pursuant to § 1.992-3 in the order in which they are made, and thereafter the amounts of any other actual distributions in the order in which they are made, except that, prior to any actual distribution, other earnings and profits shall be reduced by the portion of any deficit in earnings and profits for the taxable year chargeable at that time under § 1.996-2(a)(1) to other earnings and profits, and

(2) With respect to a distribution in redemption to which § 1.996-4(b)(1) applies, an amount equal to the excess (if any) of (a) the reduction in the corporation's earnings and profits (see section 312(e)) over (b) the amount of the

Internal Revenue Service, Treasury

§ 1.996-3

reduction under § 1.996-4(b)(1) in accumulated DISC income.

(e) *Distributions in kind.* (1) For purposes of determining, under paragraphs (b), (c), and (d) of this section, the amount by which any division of earnings and profits is reduced by reason of a distribution of property (other than money or the DISC's, or former DISC's, own obligations), the amount of such distribution is the fair market value of such property at the time of the distribution.

(2) For any taxable year in which the DISC makes a distribution of such property, the amount of other earnings and profits determined under paragraph (d) of this section (without regard to this subparagraph) shall be—

(i) Increased by the excess (if any) of the amount of such distribution treated as a dividend under section 316(a) over the adjusted basis of such property, and

(ii) Decreased by the excess (if any) of the adjusted basis of such property over the amount of such distribution treated as a dividend under section 316(a).

Each item of property shall be considered separately for purposes of making the adjustment under this subparagraph.

(f) *Examples.* The provisions of §§ 1.996-1, 1.996-2, and this section may be illustrated by the following examples:

Example 1. M Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1974. During 1975, M derives no earnings and profits and makes no deemed or actual distributions, except that on December 31, 1975, M's shareholders are treated as having received a dividend distribution of \$100 under § 1.995-2(a)(5) (relating to foreign investment attributable to producer's loans). M's earnings and profits are adjusted as shown on line (2) of the table below on the basis of facts assumed therein.

| | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1975 | \$450 | \$100 | \$250 | \$100 |
| (2) Adjustments (see paragraphs (b)(3)(ii) and (c)(1)(v) of this section) | 0 | (100) | 100 | 0 |
| (3) Balance January 1, 1976 | 450 | 0 | 350 | 100 |

Example 2. N Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1972. During 1973, N derives no earnings and profits for the year and makes no deemed or actual distributions, except that A, a shareholder, realized \$200 of gain upon receiving an actual cash distribution of \$300 in redemption of N stock having an adjusted basis of \$100 in his hands. The redemption is treated as an ex-

change under section 302(a) but, under section 995(c), A includes the \$200 of gain in his gross income as a dividend. Assuming that, under section 312(e), \$240 is properly chargeable to capital account of N and that, under § 1.996-4(b), accumulated DISC income is reduced by \$200, N's accounts are adjusted on line (2) of the table below on the basis of facts assumed therein.

| | Capital | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---|---------|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1973 | \$2,000 | \$400 | \$300 | \$100 | 0 |
| (2) Adjustments (see § 1.996-4(b) and paragraph (c)(1)(iv) of this section) | (240) | (60) | (200) | 140 | 0 |
| (3) Balance January 1, 1974 | 1,760 | 340 | 100 | 240 | 0 |

Example 3. P Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1973. During 1974, P derives no earnings and profits for

the year and makes no deemed or actual distributions, except for a distribution to B, its sole shareholder, of property with a fair market value of \$100 and an adjusted basis in P's

§ 1.996-3

26 CFR Ch. I (4-1-23 Edition)

hands of \$40. Under § 1.996-1(a)(1), B treats the entire amount of the distribution as being made out of previously taxed income and, under § 1.996-1(c), excludes it from his

gross income. P's earnings and profits, dividends are adjusted on lines (2) and (3) of the table below on the basis of facts assumed therein.

| | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|--|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1974 | \$200 | \$80 | \$120 | 0 |
| (2) Adjustment under paragraphs (c)(2) and (e)(1) this section | (40) | 0 | (100) | 0 |
| (3) Adjustment under paragraph (e)(2)(i) of this section | 0 | 0 | 0 | \$60 |
| (4) Balance January 1, 1975 | 160 | 80 | 20 | 60 |

Example 4. Q Corporation, which uses the calendar year as its taxable year, elects to be treated as a DISC beginning with 1974. On January 1, 1975, Q has accumulated earnings and profits of \$1,200 and, during 1975, Q incurs a deficit in earnings and profits of \$365. The amount of such deficit incurred as of any date before the close of 1975 cannot be shown. On July 1, 1975, Q makes a cash distribution of \$650, with respect to its stock to C, Q's sole shareholder. C subsequently transfers by

gift all of his Q stock to D. On December 31, 1975, Q makes a cash distribution of \$650, with respect to its stock, to D. Under these facts and additional facts assumed in the table below, C is treated as having received a dividend of \$650 of which \$320 is treated as distributed out of previously taxed income and excluded from gross income. D is treated as receiving a dividend of \$186. Adjustments to Q's earnings and profits accounts are illustrated in the table below:

| | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1975 | \$1,200 | \$800 | \$320 | \$80 |
| (2) Portion of 1975 deficit of \$365 chargeable as of June 30, 1975, pursuant to § 1.996-2(a) | (181) | (101) | 0 | (80) |
| (3) Balance July 1, 1975 | 1,019 | 699 | 320 | 0 |
| (4) \$650 distributed to C on July 1, 1975 | (650) | (330) | (320) | 0 |
| (5) Portion of 1975 deficit of \$365 chargeable as of December 30, 1975, pursuant to § 1.996-2(a) | (183) | (183) | 0 | 0 |
| (6) Balance December 31, 1975 | \$186 | \$186 | 0 | 0 |
| (7) \$650 distributed to D on December 31, 1975 ¹ | (186) | (186) | 0 | 0 |
| (8) Balance January 1, 1976 | 0 | 0 | 0 | 0 |

¹ \$60 treated as return of capital pursuant to section 301(c)(2).

Example 5. (1) Facts. R Corporation, which uses the calendar year as its taxable year elects to be treated as a DISC beginning with 1972. X Corporation is its sole shareholder. At the beginning of 1974, R has a deficit in earnings and profits of \$60 all of which is composed of "other earnings and profits". For 1974, R has earnings and profits of \$80 before reduction for any distributions and taxable income of \$70. On June 15, 1974, R makes a cash distribution to X of \$60, with respect to its stock, to which section 301 applies. On August 15, 1974, R makes a cash distribution to X of \$30 designated as a distribution to meet qualification requirements pursuant to § 1.992-3. Under § 1.995-2(a), X is deemed to receive, on December 31, 1974, a distribution of a dividend of \$35, i.e., one-half of R's taxable income of \$70. The tax consequences of these facts to X and their effect on R's earnings

and profits are set forth in the subsequent subparagraphs of this example.

(2) *Dividend treatment of actual distributions.* Since R had \$80 of earnings and profits for 1974 and a deficit in accumulated earnings and profits at the beginning of 1974, only \$80 of the actual distributions (\$90) are treated as dividends under sections 301(c)(1) and 316(a)(2). (\$10 of the actual distribution, which is not treated as a dividend is treated in the manner specified in section 301(c)(2) and (3).) Thus, under § 1.316-2(b), \$26.67 of the actual qualifying distribution made on August 15, 1974 (\$30 × \$80/\$90), and \$53.33 of the actual distribution made on June 15, 1974 (\$60 × \$80/\$90), are considered made out of earnings and profits.

(3) *Priority of distributions.* Under § 1.996-1(d), for purposes of adjusting the divisions of R's earnings and profits and determining

Internal Revenue Service, Treasury

§ 1.996-3

the treatment of subsequent distributions, the sequence in which each distribution is treated as having been made is—

- (i) First, the deemed distribution of \$35,
- (ii) Second, the actual qualifying distribution of \$30 made on August 15, 1974, pursuant to § 1.992-3, and
- (iii) Finally, the actual distribution of \$60 made on June 15, 1974.

(4) *Treatment and effect of deemed distribution.* Under § 1.995-2(a), on December 31, 1974, X includes the deemed distribution of \$35 in its gross income as a dividend. Under paragraph (c)(1)(ii) of this section, R's previously taxed income is increased by \$35 as shown on line (3) of the table in subparagraph (7) of this example. Under paragraph (b)(1)(ii) and (2) of this section, accumulated DISC income is increased by \$45 of DISC income, i.e., R's earnings and profits for 1974, \$80, minus the deemed distribution of \$35, as shown on line (4) of the table.

(5) *Treatment and effect of actual qualifying distribution of \$30.* As indicated in subparagraph (2) of this example, \$26.67 of the \$30 qualifying distribution on August 15, 1974, is treated as made out of earnings and profits for 1974. Under § 1.996-1(b)(1)(i), the entire \$26.67 is treated as distributed out of accumulated DISC income. Thus, on August 15, 1974, X includes \$26.67 in its gross income as

a dividend. No deduction is allowable under section 243. Under paragraph (b)(3)(iv) of this section, R's accumulated DISC income is reduced by \$26.67 as shown on line (6) of the table in subparagraph (7) of this example.

(6) *Treatment and effect of actual distribution of \$60.* As indicated in subparagraph (2) of this example, \$53.33 of the \$60 distribution on June 15, 1974, is treated as made out of earnings and profits for 1974. Under § 1.996-1(a), the \$53.33 is treated as distributed out of previously taxed income to the extent thereof, \$35, and then out of accumulated DISC income, \$18.33. Thus, on June 15, 1974, X includes \$18.33 in its gross income as a dividend. Under § 1.996-1(c), the distribution of \$35 out of previously taxed income is excluded from gross income. No deduction is allowable under section 243 with respect to the actual distribution of \$53.33. Under paragraph (b)(3)(iv) of this section, accumulated DISC income is reduced by \$18.33 and, under paragraph (c)(2) of this section, previously taxed income is reduced by \$35, as shown on line (7) of the table in subparagraph (7) of this example.

(7) *Summary.* The effects on earnings and profits and the divisions of earnings and profits are summarized in the following table:

| | Earnings and profits for year | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---|-------------------------------|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1974 | | (\$60.00) | | | (\$60.00) |
| (2) Earnings and profits for year before reduction for distributions | \$80.00 | | | | |
| (3) Deemed distribution of \$35 to X on December 31, 1974, under § 1.995-2(a) | | | | \$35.00 | |
| (4) DISC income for 1974 of \$45 as defined in paragraph (b)(2) of this section (line 2 (\$80) minus line 3 (\$35)) | | | \$45.00 | | |
| (5) Balance before actual distributions | 80.00 | (60.00) | 45.00 | 35.00 | (60.00) |
| (6) Qualifying distribution of \$30 to X on August 15, 1974, pursuant to § 1.992-3 | (26.67) | | (26.67) | | |
| (7) Actual distribution to P of \$60 on June 15, 1974 ... | (53.33) | | (18.33) | (35.00) | |
| (8) Balance January 1, 1975 | 0 | (60.00) | 0 | | (60.00) |

Example 6. Assume the facts are the same as in example 5, except that at the beginning of 1974 R's accumulated earnings and profits amount to \$60 consisting of accumulated DISC income of \$20, previously taxed income of \$10, and other earnings and profits of \$30. In addition, on August 1, 1974, X transfers all R's stock to Y Corporation in a reorganization described in section 368(a)(1)(B) in which under section 354 X recognizes no gain or loss. Under these facts, X includes in its gross income for 1974 a dividend of \$15 which is attributable to the actual distribution of \$60 paid out of earnings and profits on June 15, 1974. X excludes from gross income the

balance of the \$60 distribution (\$45) paid out of earnings and profits because, under § 1.996-1(a), it is treated as paid out of previously taxed income. Y includes in its gross income for 1974 a dividend of \$65 of which \$35 is attributable to the deemed distribution of a dividend to Y on December 31, 1974, under § 1.995-2(a) and \$30 is attributable to the qualifying distribution paid out of earnings and profits to Y on August 15, 1974. The adjustments to R's earnings and profits are summarized in the following table:

| | Earnings and profits for year | Accumulated earnings and profits | Accumulated DISC income | Previously taxed income | Other earnings and profits |
|---|-------------------------------|----------------------------------|-------------------------|-------------------------|----------------------------|
| (1) Balance January 1, 1974 | | \$60 | \$20 | \$10 | \$30 |
| (2) Earnings and profits for year before reduction for distributions | \$80 | | | | |
| (3) Deemed distribution of \$35 to Y on December 31, 1974, under § 1.995-2(a) | | | | 35 | |
| (4) DISC income for 1974 of \$45 as defined in paragraph (b)(2) of this section (line 2 (\$80) minus line 3 (\$35)) | | | 45 | | |
| (5) Balance before actual distributions | 80 | 60 | 65 | 45 | 30 |
| (6) Qualifying distribution of \$30 to Y on August 15, 1974, pursuant to § 1.992-3 | (26.67) | (3.33) | (30) | | |
| (7) Actual distribution to X of \$60 on June 15, 1974 ... | (53.33) | (6.67) | (15) | (45) | |
| (8) Balance January 1, 1975 | | 50 | 20 | 0 | 30 |

(g) *DISCs having corporate and noncorporate shareholders.* In the case of a DISC having one or more corporate shareholders but less than all of its shareholders subject to the special rules of section 291(a)(4), relating to certain deferred DISC income as a corporate preference item, accumulated DISC income and previously taxed income of the DISC are divided between the corporate shareholders, as a class, and the other shareholders, as a class, in proportion to amounts of DISC income not deemed distributed and amounts deemed distributed to each class. Subsequent taxation of actual and qualifying distributions shall be based upon this division. Thus, if a DISC is owned 50 percent by corporate shareholders and 50 percent by individual shareholders and has undistributed taxable income of \$2,000 for its year, the division is made as follows:

| | |
|--|-------|
| Corporate shareholders: | |
| Previously taxed income (57.5% of \$2,000 ÷ 2) | \$575 |
| Accumulated DISC income (42.5% of \$2,000 ÷ 2) | 425 |
| Individual shareholders: | |
| Previously taxed income (50% of \$2,000 ÷ 2) | 500 |
| Accumulated DISC income (50% of \$2,000 ÷ 2) | 500 |

(Secs. 995(e)(7), (8) and (10), 995(g) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1655, 26 U.S.C. 995 (e)(7), (8) and (10); 90 Stat. 1659, 26 U.S.C. 995(g); and 68A Stat. 917, 26 U.S.C. 7805))

[T.D. 7324, 39 FR 35121, Sept. 30, 1974, as amended by T.D. 7854, 47 FR 51742, Nov. 17, 1982; T.D. 7984, 49 FR 40024, Oct. 12, 1984]

§ 1.996-4 Subsequent effect of previous disposition of DISC stock.

(a) *Shareholder adjustment for previously taxed income.* (1) Under section 996(d)(1), except as provided in subparagraph (2) of this paragraph, if—

(i) Gain with respect to a share of stock of a DISC, or former DISC, is treated under § 1.995-4 as a dividend, and

(ii) With respect to such share, any person subsequently receives an actual distribution made out of accumulated DISC income, or a deemed distribution made, pursuant to § 1.995-3, by reason of disqualification, out of accumulated DISC income,

then such person shall treat such distribution in the same manner as a distribution from previously taxed income (and thus excludable from gross income under § 1.996-1(c)) to the extent that the gain referred to in subdivision (i) of this subparagraph exceeds the aggregate amount of any other distributions with respect to such share which were treated under this subparagraph as made from previously taxed income.

(2) In applying subparagraph (1) of this paragraph with respect to a share of stock in a DISC, or former DISC, the gain referred to in subparagraph (1)(i) of this paragraph does not include any gain to a shareholder on a redemption of such share which qualifies as an exchange under section 302(a) or any gain on a disposition of such share prior to such redemption. Distributions described in subparagraph (1)(ii) of this paragraph do not include a distribution in a redemption which qualifies as an

exchange under section 302(a). For adjustments to accumulated DISC income by reason of dividend treatment under §1.995-4 with respect to gain upon a redemption of DISC stock to which section 302(a) applies and upon a prior disposition of such stock, see paragraph (b) of this section.

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. In 1974, under §1.995-4, A, a shareholder of a DISC, on the sale of his DISC stock to B, is required to treat \$20 of his gain as a dividend. The DISC has no previously taxed income and \$40 of accumulated DISC income. Subsequently in the same year, B, the purchaser of the stock, receives an actual dividend distribution of \$15 with respect to such stock which, under §1.996-1(a), is treated as made out of accumulated DISC income. The amounts of the DISC's previously taxed income and accumulated DISC income were not adjusted by reason of the \$20 treated as a dividend on the prior sale. However, even though the DISC had no previously taxed income, the purchaser would treat the \$15 as though it had been paid out of previously taxed income and, therefore would not include the \$15 in gross income. If in 1975, B receives another actual distribution of \$9 with respect to such stock, \$5 (*i.e.*, \$20 dividend on A's sale less the \$15 distribution to B in 1974 which was treated under subparagraph (1) of this paragraph as made from previously taxed income) is treated as made from previously taxed income and excluded from gross income. The result would be the same if, on January 1, 1975, B had transferred such stock to C by gift and the \$9 distribution had been made to C.

(b) *Corporate adjustment upon redemption.* (1) Under section 996(d)(2), if by reason of §1.995-4 gain on a redemption of stock in a DISC, or former DISC, is included in the shareholder's gross income as a dividend, then the accumulated DISC income shall be reduced by an amount equal to the sum of—

(i) The amount of gain on such redemption which, under §1.995-4, is treated as a dividend, and

(ii) The amount of any gain with respect to such redeemed stock which, under §1.995-4, was treated as a dividend on a disposition prior to such redemption minus the amount of distributions with respect to such stock which have been treated as made out of previously taxed income by reason of the application of paragraph (a)(1) of this section.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. The entire stock of a DISC, which uses the calendar year as its taxable year, has been owned equally by A, B, C, and D since it was organized. At the close of 1976, when the DISC has \$100 of accumulated DISC income, it redeems all of A's shares in a transaction qualifying as an exchange under section 302(a) and A, under §1.995-4, includes \$25 in his gross income as a dividend. The redemption has the effect of reducing accumulated DISC income by \$25 to \$75.

Example 2. Assume the same facts as in example 1 except that the stock of the DISC has not been held equally by A, B, C, and D since its organization. A purchased his shares from X in 1974 in a transaction in which X, under §1.995-4, included in his gross income \$30 as a dividend. In 1975, A receives a distribution of \$10 out of accumulated DISC income which, under paragraph (a)(1) of this section, is treated as made out of previously taxed income. Under these facts, the redemption of A's stock in 1976 has the effect of reducing accumulated DISC income by \$45 to \$55 determined as follows:

| | |
|--|-------|
| (a) Accumulated DISC income | \$100 |
| (b) Minus sum of: | |
| (1) Dividend on redemption of A's stock | \$25 |
| (2) Excess of dividend on X's sale (\$30) over distribution to A treated as made out of previously taxed income (\$10) | \$20 |
| Total | 45 |
| (c) Accumulated DISC income on 12/31/76 | 55 |

[T.D. 7324, 39 FR 35121, Sept. 30, 1974]

§ 1.996-5 Adjustment to basis.

(a) *Addition to basis.* Under section 996(e)(1) amounts representing deemed distributions as provided in section 995(b) shall increase the basis of the stock with respect to which the distribution is made.

(b) *Reductions of basis.* Under section 996(e)(2), the portion of an actual distribution treated as made out of previously taxed income shall reduce the basis of the stock with respect to which it is made and, to the extent that it exceeds the adjusted basis of such stock, shall be treated as gain from the sale or exchange of property. In the case of stock includible in the gross estate of a decedent for which an election is made under section 2032 (relating to alternate valuation), this paragraph shall not apply to any distribution made after the date of the

§ 1.996-6

26 CFR Ch. I (4-1-23 Edition)

decendent's death and before the alternate valuation date provided by section 2032. See section 1014(d) for a special rule for determining the basis of stock in a DISC, or former DISC, acquired from a decedent.

[T.D. 7324, 39 FR 35124, Sept. 30, 1974]

§ 1.996-6 Effectively connected income.

In the case of a shareholder who is a nonresident alien individual or a foreign corporation, trust, or estate, amounts taxable as dividends by reason of the application of § 1.995-4 (relating to gain on disposition of stock in a DISC), amounts treated under § 1.996-1 as distributed out of accumulated DISC income, and amounts deemed distributed under § 1.995-2(a) (1) through (4) shall be treated as gains and distributions which are effectively connected with the conduct of a trade or business conducted through a permanent establishment of such shareholder within the United States, and shall be subject to tax in accordance with the provisions of section 871(b) and the regulations thereunder in the case of nonresident alien individuals, trusts, or estates, or section 882 and the regulations thereunder in the case of foreign corporations. In no case, however shall other income of such shareholder be taxable as effectively connected with the conduct of a trade or business through a permanent establishment in the United States solely because of the application of this section.

[T.D. 7324, 39 FR 35124, Sept. 30, 1974]

§ 1.996-7 Carryover of DISC tax attributes.

(a) *In general.* Carryover of a DISC's divisions of earnings and profits to acquiring corporations in nontaxable transactions shall be subject to rules generally applicable to other corporate tax attributes. For example, a DISC which acquires the assets of another DISC in a transaction to which section 381(a) applies shall succeed to, and take into account, the divisions of the earnings and profits of the transferor DISC in accordance with section 381(c)(2).

(b) *Allocation of divisions of earnings and profits in corporate separations.* (1) If one DISC transfers part of its assets to a controlled DISC in a transaction to

which section 368(a)(1)(D) applies and immediately thereafter the stock of the controlled DISC is distributed in a distribution or exchange to which section 355 (or so much of section 356 as relates to section 355) applies, then—

(i) The earnings and profits of the distributing DISC immediately before the transaction shall be allocated between the distributing DISC and the controlled DISC in accordance with the provisions of § 1.312-10.

(ii) Each of the divisions of such earnings and profits, namely previously taxed income, accumulated DISC income, and other earnings and profits, shall be allocated between the distributing DISC and the controlled DISC on the same basis as the earnings and profits are allocated.

(iii) Any assets of the distributing DISC whose status as qualified export assets is limited by its accumulated DISC income (e.g., producer's loans described in § 1.993-4, Export-Import Bank and other obligations described in § 1.993-2(h), and financing obligations described in § 1.993-2(i)) shall be treated as having been allocated, for the purpose of determining the classification of such assets in the hands of the distributing DISC or the controlled DISC, on the same basis as the earnings and profits are allocated regardless of how such assets are actually allocated.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. On January 1, 1974, P Corporation transfers part of its assets to S Corporation, a newly organized subsidiary of P, in a transaction described in section 368(a)(1)(D) and distributes all the S stock in a transaction which qualifies under section 355. Immediately before such transfer, P had earnings and profits of \$120,000 of which \$100,000 constitutes accumulated DISC income. The unpaid balance of P's producer's loans is \$80,000 all of which is retained by P. Pursuant to § 1.312-10, 25 percent of P's accumulated DISC income is allocated to S (i.e., \$25,000). P's producer's loans will be treated as allocated to S in the same proportion. Accordingly, for purposes of determining, under § 1.993-4(a)(3), the amount of producer's loans which S is entitled to make, S is treated as having an unpaid balance of producer's loans of \$20,000 (i.e., 25% × \$80,000) and P is treated as having an unpaid balance of \$60,000 (i.e., 75% × \$80,000).

(c) *Accumulated DISC income accounts of separate DISC's maintained after corporate combination.* If two or more DISC's combine to form a new DISC, or if the assets of one DISC are acquired by another DISC, in a transaction described in section 381(a), accumulated DISC income of the acquired DISC or DISC's shall carry over and be taken into account by the acquiring or new DISC, except that a separate account shall be maintained for the accumulated DISC income of any DISC scheduled to be received as a deemed distribution by its shareholders under §1.995-3 (relating to deemed distributions upon disqualification). If, as a part of such transaction, the stock of the DISC which has accumulated DISC income scheduled to be deemed distributed is exchanged for stock of the acquiring or new DISC to which such accumulated DISC income is carried over and which maintains a separate account, then such accumulated DISC income shall be deemed distributed pro rata to shareholders of the acquiring or new DISC on the basis of stock ownership immediately after the exchange.

[T.D. 7324, 39 FR 35125, Sept. 30, 1974]

§1.996-8 Effect of carryback of capital loss or net operating loss to prior DISC taxable year.

(a) Under §1.995-2(e), the deduction under section 172 for a net operating loss carryback or under section 1212 for a capital loss carryback is determined as if the DISC were a domestic corporation which had not elected to be treated as a DISC. A carryback of a net operating loss or of a capital loss of any corporation which reduces its taxable income for a preceding taxable year for which it qualified as a DISC will have the consequences enumerated in paragraphs (b) through (e) of this section.

(b) For such preceding taxable year, the amount of a deemed distribution of one-half of certain taxable income described in §1.995-2(a)(4) will ordinarily be reduced in effect (but not below zero) by one-half of the sum of the amount of the deduction under section 172 for such year for net operating loss carrybacks and the amount of the deduction under section 1212 for such year for capital loss carrybacks.

(c) The amount of reduction in the deemed distribution under paragraph (b) of this section will have the effect of increasing the limitation, provided in §1.995-2(b)(2), on the amount of foreign investment attributable to producer's loans which is deemed distributed under §1.995-2(a)(5).

(d) If the amount of a deemed distribution for a preceding taxable year is reduced as described in paragraph (b) of this section, then for such preceding taxable year the previously taxed income (as defined in §1.996-3(c)) shall be decreased by the amount of such reduction and the accumulated DISC income (as defined in §1.996-3(b)) shall be increased by the amount of such reduction. Such adjustments shall be made as of the time the deemed distribution for such preceding taxable year is treated as having occurred. See §1.996-1(d) for the priority of such deemed distribution in relation to other distributions made in that preceding taxable year.

(e) The amount and treatment of any actual distribution made in such preceding taxable year or a year subsequent to such preceding year, and the treatment of gain on a disposition (in any such year) of the DISC's stock to which §1.995-4 applies, shall be properly adjusted to reflect the adjustments to previously taxed income and accumulated DISC income described in paragraph (d) of this section.

[T.D. 7324, 39 FR 35125, Sept. 30, 1974]

§1.997-1 Special rules for subchapter C of the Code.

(a) For purposes of applying the provisions of sections 301 through 395 of the Code, any distribution in property to a corporation by a DISC, or former DISC, which is made out of previously taxed income or accumulated DISC income shall be treated as a distribution in the same amount as if such distribution of property were made to an individual, and have a basis, in the hands of the recipient corporation, equal to such amount treated as having been distributed.

(b) This section may be illustrated by the following example:

Example. X Corporation is the sole shareholder of Y Corporation which is a DISC. Y makes an actual distribution of property to

§§ 1.998-1.1000

X with respect to X's stock in Y. The property has a basis of \$50 and a fair market value of \$100. The distribution is treated as made out of accumulated DISC income under section 996(a) and is taxable as a dividend under section 301(c)(1). Even though X is a corporation, the amount of the distribution

26 CFR Ch. I (4-1-23 Edition)

is \$100 notwithstanding the provisions of section 301(b)(1)(B) and the basis the property in X's hands is \$100 notwithstanding the provisions of section 301(d)(2).

Table of OMB Control Numbers

The OMB control numbers for chapter I of title 26 were consolidated into §§ 601.9000 and 602.101 at 50 FR 10221, Mar. 14, 1985. At 61 FR 58008, Nov. 12, 1996, § 601.9000 was removed. Section 602.101 is reprinted below for the convenience of the user.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

AUTHORITY: 26 U.S.C. 7805.

§ 602.101 OMB Control numbers.

(a) *Purpose.* This part collects and displays the control numbers assigned to collections of information in Internal Revenue Service regulations by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The Internal Revenue Service intends that this part comply with the requirements of §§ 1320.7(f), 1320.12, 1320.13, and 1320.14 of 5 CFR part 1320 (OMB regulations implementing the Paperwork Reduction Act), for the display of control numbers assigned by OMB to collections of information in Internal Revenue Service regulations. This part does not display control numbers assigned by the Office of Management and Budget to collections of information of the Bureau of Alcohol, Tobacco, and Firearms.

(b) *Display.*

[T.D. 8011, 50 FR 10222, Mar. 14, 1985]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 602.101, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.govinfo.gov.

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations (CFR) that were made by documents published in the FEDERAL REGISTER since January 1, 2018 are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters, parts and subparts as well as sections for revisions.

For changes to this volume of the CFR prior to this listing, consult the annual edition of the monthly List of CFR Sections Affected (LSA). The LSA is available at *www.govinfo.gov*. For changes to this volume of the CFR prior to 2001, see the “List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000” published in 11 separate volumes. The “List of CFR Sections Affected 1986–2000” is available at *www.govinfo.gov*.
