

§ 3030.140**39 CFR Ch. III (7-1-24 Edition)**

(2) For each affected class, the sum of all rate increases included in de minimis rate increases since the most recent rate adjustment resulting in a rate increase, or the most recent rate adjustment due to extraordinary and exceptional circumstances, that was not a de minimis rate increase does not result in the percentage change in rates for the class equaling or exceeding 0.001 percent.

(c) If the rate adjustments are de minimis, no unused rate adjustment authority will be added to the schedule of banked rate adjustment authority maintained under subpart G of this part as a result of the de minimis rate increase.

(d) If the rate adjustments are de minimis, no rate decreases may be taken into account when determining whether rate increases comply with paragraphs (b)(1) and (2) of this section.

(e) In the next rate adjustment filing proposing to increase rates for a class that is not a de minimis rate increase:

(1) The maximum rate adjustment authority shall be calculated as if the de minimis rate increase had not been filed; and

(2) For purposes of calculating the percentage change in rates, the current rate shall be the current rate from the de minimis rate increase.

(f) The Postal Service shall file supporting workpapers with each request to review a de minimis rate increase that demonstrate that the sum of all rate increases included in de minimis rate increases since the most recent rate adjustment resulting in a rate increase that was not de minimis, or the most recent rate adjustment due to extraordinary and exceptional circumstances, does not result in a percentage change in rates for the class equaling or exceeding 0.001 percent.

(g) For any product where the attributable cost for that product exceeded the revenue from that product as determined by the Commission, rates may not be reduced.

Subpart C—Consumer Price Index Rate Authority**§ 3030.140 Applicability.**

The Postal Service may adjust rates based upon changes in the Consumer

Price Index for all Urban Consumers (CPI-U) identified in § 3030.141. If rate adjustment filings involving rate increases are filed 12 or more months apart, rate adjustments are subject to a full year limitation calculated pursuant to § 3030.142. If rate adjustment filings involving rate increases are filed less than 12 months apart, rate adjustments are subject to a partial year limitation calculated pursuant to § 3030.143.

§ 3030.141 CPI-U data source.

The monthly CPI-U values needed for the calculation of rate adjustment limitations under this subpart shall be obtained from the Bureau of Labor Statistics (BLS) Consumer Price Index—All Urban Consumers, U.S. All Items, Not Seasonally Adjusted, Base Period 1982-84 = 100. The current Series ID for the index is “CUUR0000SA0.”

§ 3030.142 CPI-U rate authority when rate adjustment filings are 12 or more months apart.

(a) If a rate adjustment filing involving a rate increase is filed 12 or more months after the most recent rate adjustment filing involving a rate increase, then the calculation of an annual limitation for the class (full year limitation) involves three steps. First, a simple average CPI-U index is calculated by summing the most recently available 12 monthly CPI-U values from the date of the rate adjustment filing and dividing the sum by 12 (Recent Average). Second, a second simple average CPI-U index is similarly calculated by summing the 12 monthly CPI-U values immediately preceding the Recent Average and dividing the sum by 12 (Base Average). Third, the full year limitation is calculated by dividing the Recent Average by the Base Average and subtracting 1 from the quotient. The result is expressed as a percentage, rounded to three decimal places.

(b) The formula for calculating a full year limitation for a rate adjustment filing filed 12 or more months after the last rate adjustment filing is as follows: Full Year Limitation = (Recent Average/Base Average)–1.

Postal Regulatory Commission

§ 3030.162

§ 3030.143 CPI-U rate authority when rate adjustment filings are less than 12 months apart.

(a) If a rate adjustment filing involving a rate increase is filed less than 12 months after the most recent rate adjustment filing involving a rate increase, then the annual limitation for the class (partial year limitation) will recognize the rate increases that have occurred during the preceding 12 months. When the effects of those increases are removed, the remaining partial year limitation is the applicable restriction on rate increases.

(b) The applicable partial year limitation is calculated in two steps. First, a simple average CPI-U index is calculated by summing the 12 most recently available monthly CPI-U values from the date of the rate adjustment filing and dividing the sum by 12 (Recent Average). Second, the partial year limitation is then calculated by dividing the Recent Average by the Recent Average from the most recent previous rate adjustment filing (Previous Recent Average) applicable to each affected class of mail and subtracting 1 from the quotient. The result is expressed as a percentage, rounded to three decimal places.

(c) The formula for calculating the partial year limitation for a rate adjustment filing filed less than 12 months after the last rate adjustment filing is as follows: Partial Year Limitation = (Recent Average/Previous Recent Average) - 1.

Subpart D—Density Rate Authority

§ 3030.160 Applicability.

(a) This subpart allocates rate authority to address the effects of decreases in the density of mail as measured by the sources identified in § 3030.161. The calculation of the additional rate authority corresponding to the change in density is described in § 3030.162.

(b) The Postal Service shall file a notice with the Commission by December 31 of each year that calculates the amount of density rate authority that is eligible to be authorized under this subpart.

(c) The Commission shall review the Postal Service's notice and determine

how much, if any, rate authority will be authorized under this subpart. Any rate authority allocated under this subpart:

(1) Shall be made available to the Postal Service as of the date of the Commission's determination;

(2) Must be included in the calculation of the maximum rate adjustment authority in the first generally applicable rate adjustment filed after the Commission's determination; and

(3) May be used to generate unused rate authority, if unused, within 12 months of the Commission's announcement.

§ 3030.161 Density calculation data sources.

(a) The data needed for the calculation of the density rate authority in § 3030.162 shall be obtained from the values reported by the Postal Service as specified in paragraphs (b) through (d) of this section. When both originally filed and annually revised data are available, the originally filed data shall be used. When the originally filed data are corrected through a refiling or in the Commission's Annual Compliance Determination report, the corrected version of the originally filed data shall be used.

(b) Market dominant volume and total volume from the Revenue, Pieces, and Weight report, filed by the Postal Service under § 3050.25 of this chapter;

(c) Institutional costs and total costs from the Cost and Revenue Analysis report, filed with the Postal Service's section 3652 report (see § 3050.1(g) of this chapter); and

(d) The number of delivery points, from the input data used to produce the Total Factor Productivity estimates, filed with the Postal Service's section 3652 report.

§ 3030.162 Calculation of density rate authority.

(a) *Formulas.* (1) The formula for calculating the amount of density rate authority, in conformance with paragraph (b)(1) of this section, is as follows:
