

Method of shipment	How weight of shipment is determined
(b) Crated shipments	When crated the net weight will not include the weight of the crating material. The net weight will be computed as being 60 percent of the gross weight. However, if the net weight computed in this manner exceeds the applicable weight limitation and if it is determined that, for reasons beyond the employee's control, unusually heavy crating and packing materials were necessarily used, the net weight may be computed at less than 60 percent of the gross weight.
(c) Containerized shipments (Special containers designed, e.g., lift vans, CONEX transporters, HHG shipping boxes, for repeated use).	When the known tare weight does not include the weight of interior bracing and padding materials but only the weight of the container, the net weight will be 85 percent of the gross weight less the weight of the container. If the known tare weight includes such material, so that the net weight is the same as it would be for uncrated shipments in interstate commerce, the net weight will not be subject to reduction.
(d) Constructive weight	If adequate scales are not available at origin, en route or at destination, a constructive weight based on 7 pounds per cubic foot of properly loaded van space may be used. Such weight may be used for a part-load when its weight could not be obtained, without first unloading it or other part-loads being carried in the same vehicle or when the HHG are not weighed because the carrier's charges for local or metropolitan area moves are properly computed on the basis other than weight or volume of the shipment (as when payment is based on an hourly rate and distance involved). In such instances a statement from the carrier showing the properly loaded van space required for the shipment should be obtained with respect to proof of entitlement to a commuted rate payment when net weight cannot be shown.

§ 302-7.14 What methods of transporting and paying for the movement of HHG, PBP&E and temporary storage are authorized?

There are two authorized methods of transporting and paying for the movement of HHG, PBP&E and temporary storage. Your agency will determine which of the following methods will be authorized.

(a) *Commuted rate system.* Under the commuted rate system you assume total responsibility for arranging and paying for, at least the following services: packing/unpacking, crating/uncrating, pickup/delivery, weighing, line-haul, drayage, and temporary storage of your HHG and PBP&E with a commercial HHG carrier or by renting self drive equipment for a do-it-yourself move. When any PBP&E is transported as an administrative expense of your agency, all arrangements (e.g., packing/unpacking, pickup/delivery, weighing, temporary storage, etc.) will be handled and paid for by your agency.

(b) *Actual expense method.* Under the actual expense method, your agency assumes the responsibility for arranging and paying for all aspects (e.g., packing/unpacking, pickup/delivery, weighing, line-haul, drayage, temporary storage, etc.), of transporting

your HHG and PBP&E with a commercial HHG carrier.

§ 302-7.15 Are there any disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage?

Yes. The disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage are that the:

- (a) Government cannot take advantage of any special rates that may be offered only to Government shipments;
- (b) Commuted rate method does not apply to intrastate moves; and
- (c) Commuted rate method may not fully reimburse your out-of-pocket expenses.

§ 302-7.16 Must I use the methods selected by my agency for transportation and temporary storage of my HHG and PBP&E?

No, you do not have to use the method selected (*see* § 302-7.401) by your agency for transportation and temporary storage of your HHG and
