INDIAN TRIBAL DETENTION FACILITIES

WEDNESDAY, JUNE 23, 2004

U.S. SENATE, COMMITTEE ON INDIAN AFFAIRS, Washington, DC.

The committee met, pursuant to other business, at 10:15 a.m. in room 485, Russell Senate Building, Hon. Ben Nighthorse Campbell (chairman of the committee) presiding.

Present: Senators Campbell, Inouye, Johnson, and Smith.

STATEMENT OF HON. BEN NIGHTHORSE CAMPBELL, U.S. SENATOR FROM COLORADO, CHAIRMAN, COMMITTEE ON INDIAN AFFAIRS

The CHAIRMAN. We will now convene our hearing for the morning. I will tell all of our witnesses who are in the audience, though, we are told we are going to have five votes in a row at 11:15 a.m., so we have a choice of finishing this up by 11:15 or waiting and coming back in about 2 hours from now, and I do not think most of our witnesses are going to want to do that. So I would ask all of our witnesses to be relatively brief. We will include all of your written testimony, but if you will try to keep it down to about 5 minutes apiece or so, I think we can get through it and still have some time to ask some questions.

This committee's oversight hearing is on issues and problems related to conditions in tribal detention facilities. Several weeks ago, this issue caught my attention when I read a series of articles regarding a Federal probe on tribal prison deaths in the newspaper,

USA Today and other newspapers as well.

The articles spoke about abuse, neglect, and inhumane conditions, overcrowding as well as staffing shortages, inmate access to weapons and poor prisoner monitoring and supervision. In fact, one story reported that the lack of prison monitoring resulted tragically in the death of a 16-year-old girl. I believe that is not only deplorable, but inexcusable and just should not be happening.

In order to determine exactly what has happened and what is happening, and what we can do about it, this morning the committee will hear from witnesses from Federal agencies and Indian tribes to share their thoughts and experiences with us. I will submit my full statement for the record, in light of our short time.

Prepared statement of Chairman Campbell appears in appen-

The CHAIRMAN. Senator Johnson, did you have any opening statement on this issue before we proceed?

STATEMENT OF HON. TIM JOHNSON, U.S. SENATOR FROM SOUTH DAKOTA

Senator JOHNSON. Mr. Chairman, I would like to make a couple of comments. There are numerous problems in Indian country today that require immediate attention. Unfortunately, we are faced with a crisis surrounding the state of our detention facilities.

If the conditions of our off-reservation facilities were found in the same conditions as many of our reservation facilities, there would be widespread public outrage. We are grateful for new construction going on in my State of South Dakota, but it has been a constant battle to receive appropriate maintenance and staffing funding.

One of the prominent problems that needs immediate attention is the lack of appropriate care given to juveniles. Juveniles must not be held in the same holding cells as adults. This is a safety issue, among other things. In Crow Creek, young people, many of them juveniles who had attempted or were suspected of committing suicide, were being held in the only jail facility on the reservation, a condemned adult detention facility. That is simply unacceptable. We have to do better to address the situation and I look forward to reviewing the recommendations that arise as a result of this hearing.

The CHAIRMAN. Thank you, Senator Johnson.

We will now start with our first witness, Earl Devaney, the Inspector General, Department of the Interior, Washington, DC. Welcome, Inspector General Devaney. If you would go ahead and proceed. As I mentioned, your complete testimony will be in the record. You can abbreviate if you wish.

STATEMENT OF EARL DEVANEY, INSPECTOR GENERAL, DEPARTMENT OF THE INTERIOR

Mr. Devaney. Thank you, Mr. Chairman. I am pleased to be here today to speak about Indian detention centers in Indian country.

In September 2003, my office began an assessment of these facilities. I initiated this assessment following a conversation with the Chair of the Attorney General's Advisory Committee on Indian country, U.S. Attorney Thomas Heffelfinger, who had expressed his concerns to me about overcrowding and poor conditions in Indian country jails. I then discovered that these same concerns have been articulated for years by the Department of Justice in a variety of reports. My office had also begun to receive anecdotal reports of appalling conditions at detention facilities in Indian country.

With all this information, I felt compelled to address these concerns immediately. I would like to point out that we began our assessment well before the confirmation of Assistant Secretary Anderson and prior to any of the recent media disclosures of allega-

tions made by a former BIA law enforcement official.

While we have completed all of our planned site visits, we have not finished our analytical work, nor have we even written a draft report. However, given the committee's interest in this issue, I would gladly share with the committee the same concerns I shared with Secretary Norton in April of this year when I gave her an interim report on the deplorable conditions we were finding at some of these facilities.

For many years, the BIA's detention program has been characterized as drastically understaffed, underfunded, and poorly managed. Unfortunately, we have now reached a similar conclusion. Simply stated, BIA's detention program is riddled with problems, and in our opinion is a national disgrace, with many facilities having conditions comparable to those found in third world countries.

Unfortunately, BIA appears to have had a laissez faire attitude in regard to these horrific conditions at these detention facilities. In most of the 27 facilities we have visited, basic jail administration procedures are not followed, and many detention managers and their staff have not received professional certified training in how to run a detention facility. In fact, BIA OLES officials admitted to us that none of their detention facilities come close to even meeting BIA standards for operations, which supposedly derive from nationally recognized detention standards.

Based on our visits, we discovered that serious incidents are almost never communicated up the chain of command. In fact, during the last 3-year timeframe, we found well over 500 serious incidents, including deaths, suicide attempts and escapes that were either undocumented or not reported to BIA's Office of Law Enforcement Services

We learned 10 deaths from the facilities we visited. Five of these deaths were suicides and five were non-suicides. Inexplicably, only five of these deaths were reported to OLES. Among those deaths reported to OLES was the recent death of a 16-year-old student who died while in a detention cell at the Chemawa Indian Boarding School in Oregon. This case is under active investigation by my office, in conjunction with the U.S. Attorney's office in Portland, OR

Based on our findings, suicide attempts appear to be a regular occurrence at many of these facilities. At one facility in Washington State, there have been an alarming 53 suicide attempts within the last 3 years. None of those incidents were reported to OLES.

At many of the facilities, we found multiple suicide attempts made by the same inmate. For example, during 2001 an individual detained at a detention facility in New Mexico attempted to hang himself seven separate times using articles of clothing or towels left in the cell. The corrections officer's response was quite elementary. If the inmate tried to hang himself with his socks, take the socks away. If the inmate tried to hang himself with a towel, take the towel away. Until finally, the inmate was left in the cell without any clothing or any towels.

For the most part, the corrections officers at these facilities convey stories of prisoner escapes with an air of casual inevitability. We found that some facilities do not even notify local law enforcement of prisoner escapes. This is not only disconcerting, but it is irresponsible to allow escaped prisoners to travel freely in the community while local law enforcement authorities have no information about their escapes.

One of the most common problems we found while visiting these facilities is a lack of staffing. This factor has an enormous impact on officer safety. In many cases, having only one correctional officer on duty per shift is not unusual. It is actually common practice.

One BIA district commander told us, "every officer here has been assaulted."

Aside from the lack of officers on staff, the current officers at these facilities are for the most part poorly trained. This lack of training not only hinders the officers' ability to properly document incidents and follow standard procedures, but also leaves the officers unprepared to prevent physical harm that may be targeted against them or against other inmates. One district commander quipped, "most BIA standards cannot be met, so why even try?"

In addition to officer safety, the safety of inmates themselves must be considered. Officers who are improperly trained and who have not undergone a thorough background investigation may become a liability. Recently, a corrections officer at an Indian youth detention center in Montana was convicted of raping a 17-year-old

female inmate while transporting her to a medical facility.

During my discussions with the Secretary in April, I made a number of recommendations to her, including instituting new reporting protocols and the prompt investigation by BIA of any serious incidents. I was pleased by her immediate response to my briefing. Following our meeting, she tasked Associate Deputy Secretary James Cason, along with Assistant Secretary Dave Anderson, to begin addressing the concerns that I had raised. To assist them in this effort, she also made a request to DOJ for an experienced corrections professional from the Bureau of Prisons to be detailed to BIA. I am now beginning to detect a new sense of urgency about these concerns at BIA.

Finally, Mr. Chairman, the responsibility for these failings we have found at Indian detention facilities cannot be attributed to any particular individual or administration. Some of these problems are decades old, thus the solutions will not be easy to achieve and may take considerable time, effort and additional funding. Nothing, however, less than a herculean effort to turn these conditions around would be morally acceptable.

Mr. Chairman, this concludes my oral remarks. I would welcome the opportunity to answer any questions from you or any of the

members of the committee.

[Prepared statement of Mr. Devaney appears in appendix.]

The CHAIRMAN. Thank you, Mr. Devaney. I have several questions and I think other members have several, too, and some we will put in writing to you.

First of all, what percent of tribal police or corrections officers on

reservations attend Federal training through FLETC?

Mr. Devaney. I think it is actually a requirement, Mr. Chairman. The problem is that the moneys that are made available for this training are not always there. So you might have, for instance, a corrections officer being brought on board and not get to that training for 2 or 3 years. We actually found cases where officers had been at the facility for multiple years without that training. I think the intention is to give everybody that training, but it is a matter of money and getting the opportunity to send these folks there.

The CHAIRMAN. Give me some feedback on this. I visited one reservation and asked them why they were having such retention trouble keeping either tribal policemen or corrections officers, and

I do not know if this is true or not, or if it is throughout all Indian country or not, but they told me that that particular reservation, the policemen are only law enforcement officials when they are on duty, and the corrections officers when they were off duty had no police powers. Consequently, the police, as an example, would arrest someone and then when they got off duty, guess what? The first time the people got out that they arrested, they would lay for them and there would be some altercation, and the guys that did the arresting would end up getting beat up. Did you find anything along that line in this investigation?

Mr. DEVANEY. To be honest with you, sir, we did not find that, but it would not surprise me that that is the situation. It is very,

very difficult to recruit corrections officers.

The CHAIRMAN. Have you visited any facilities personally, the 74 facilities?

Mr. DEVANEY. Yes; I had an opportunity to. I wanted to visit one because I thought it would be appropriate if I did. So I did go with a team out to the Yakama Detention Facility in Yakama, WA last month. I could make a few observations. Before I was the Inspector General, I spent about 30 years in Federal law enforcement. I have been in hundreds, maybe thousands of jails, State, local, and Federal during my career.

I have seen some jails as unclean or in poor condition as this jail. But I have never seen jails that are so prone to suicide or easy to escape from, and so dangerous to not only officers that work in

these jails, but dangerous to the inmates as well.

Quite coincidentally, Yakama turned out to have the highest number of suicide attempts, 53 in the last 3 years. I can recall visiting in a cell with a young woman who told me that she had not been outside in over 5 days. I then turned to the officer that was giving the tour, and I said, "well, when can she expect to be outside." He said, probably not for another week.

The CHAIRMAN. Some of those conditions, wouldn't you consider

a violation of basic civil rights?

Mr. Devaney. Well, I think so, yes. I think 12 days without seeing sunshine in a windowless cell could drive someone to attempt suicide. I would note for you that the standards, for instance, for the State of Virginia for condemned inmates is that they get outside 1 hour a day for 5 days a week. So there is quite a parity difference here.

The CHAIRMAN. Of the 74 facilities, 20 are operated by the BIA and 46 are operated by tribes under contract. Did your auditors find any qualitative differences in how the tribal facilities were run or compare with the BIA-operated ones? Which ones were in better

shape, if there was a conclusion to that?

Mr. DEVANEY. First of all, as I mentioned earlier, we only visited 27 of the 74 facilities. Of those 27, 12 were operated by BIA and 15 were 638 facilities. In terms of some of the better facilities we found, quite frankly, they were 638 jails. We found that some of those jails were, even despite the poor condition, the physical conditions of the jails, they actually had very good management, former corrections folks running those jails. Somehow they were making it happen even over and above the lousy maintenance and the poor conditions that we found there.

So from a perspective of some of the better things we saw, they were principally at the 638 jails.

The CHAIRMAN. I am glad you mentioned that, because some of us think around here that Indians can run their own affairs a whole lot better than the Government can anyway. So that is good. I live at Southern Ute which has, in my view, one of the newer and better-run jails in the country, and that gets done under the 638 program.

You mentioned that most of the facilities you visited failed to follow basic jail administrative procedures. Is there any national framework for procedures that go out through the BIA that tribes

adhere to?

Mr. DEVANEY. That is something I think BIA's detention program is going to have to work on. There are, of course, national correctional standards at the Federal level, at the State level and most counties have those standards. BIA purports to model their standards after those correctional standards, but I think a lot of work needs to be done to bring those in line.

The CHAIRMAN. And your review found nearly 500 serious incidents not being reported to the BIA office or law enforcement services. In reading notes provided by staff, I am very sorry to say that 41 suicide attempts were attempted in the last 3 years in Lame Deer, MT where I happen to be enrolled. I was not aware that it was that bad, very frankly.

Did your auditors find out why these cases were not reported, the 500 that were not?

Mr. DEVANEY. Well, I think there are probably a variety of reasons for that. Sometimes it is a matter of they did not know they were supposed to report these incidents. Other times, we were told, quite frankly, Mr. Chairman, we rarely found correctional officials that had anything good to say about BIA's detention program. In fact, in that jail that I visited, the Yakama detention facility, the chief told me that he had not seen or heard from BIA in 5 years.

So there is a disconnect there. I am hopeful that the folks that the Secretary has put in charge of fixing this problem will address those issues.

The CHAIRMAN. Another report I have heard over and over is that they do not have adequate separate facilities for men and women, and sometimes the interaction between them leads to some real problems of rape or intimidation or so on. Did you find that also?

Mr. DEVANEY. Yes; we did. We found incidents where unfortunately female inmates were put in with male inmates, inadvertently, but nonetheless it happened, and bad things happen when that occurs. Of course, there is the issue that was raised earlier on the juvenile facilities, and the fact that juveniles almost on a regular basis are housed in some of these jails in situations which actually the law forbids them to be housed in.

There is the sight and sound provision in the regulations that suggests that juveniles should not be within sight and sound of adult prisoners. We found widespread abuse of that particular regulation.

The CHAIRMAN. I see. I have some further questions I would like to submit in writing, if you would get back to us, but I want to move along because of the impending votes.

Mr. Devaney. Yes, sir.

The CHAIRMAN. Before I yield to our vice chairman, Senator Smith has shown up. Did you have any opening comments before we move along with our questions?

Senator Smith. I will put those in the record.

The CHAIRMAN. Okay.

Senator SMITH. I do have some questions.

The CHAIRMAN. All right, fine.

Senator Inouye.

Senator Inouye. I just have one question, Mr. Chairman. I note that up until fiscal year 2003, the Department of Justice was expending about \$34 million a year for facilities, and suddenly the following year it dropped to \$5 million and now it is \$2 million.

Can you explain why?

Mr. DEVANEY. I really cannot. I know there is a witness from DOJ that is going to follow, so maybe that witness could. There is an issue in our minds about the disconnect between the facilities that BIA would like to see built in terms of priority, and the facilities that actually get the grants at the end of the day. At some level, that process needs to work better.

There needs to be a better coordination between DOI and DOJ to ensure that the actual facilities that need to be built are the ones that are being built, and that there is not a difference of opinion between DOI and DOJ. There may be some difference of opinion at the end of the day, but a closer coordination is clearly called for here. Monies should not be given to the best grant writer.

Senator INOUYE. Thank you very much. I would like to submit

other questions. The CHAIRMAN. Thank you.

In the order of appearance, Senator Johnson, you were next.

Senator JOHNSON. Thank you, Mr. Chairman, and thank you, Mr. Devaney. I think this is very sobering testimony you have provided to the committee.

The only question I would have this morning would be your investigation is ongoing. Can you give us any sense of when the final report would be issued?

Mr. DEVANEY. Sir, we are targeting the end of the summer. I

would say late August or early September.

Senator JOHNSON. Very good. We look forward to that. This is one report that I hope will not be one of those gathering dust reports, but will be truly an impetus to very major action on the part of this committee and this Congress. Thank you.

The CHAIRMAN. Senator Smith.

STATEMENT OF HON. GORDON SMITH, U.S. SENATOR FROM **OREGON**

Senator Smith. Thank you, Mr. Chairman. Mr. Devaney, thank you for being here.

As I listened to your testimony, frankly, I am fearful we have an epidemic, and this BIA really needs to get on top of this. We need to make sure they have the resources. Normally, we do not think of jails as suicide prevention centers, but frankly that may be what

we have to begin factoring in.

You mentioned the case of Cindy Sohappy from the Chemawa Indian School in Salem, OR. Representing the State of Oregon, I have particular concern about what happened there. It is clearly not the Department of the Interior's fault that she drank so much that she killed herself. But clearly, if we have places where we hold them; if education and prevention of alcohol abuse have failed and you resort to detention, there ought to be some way to monitor, help and medically assist those who because of their own choices and actions put themselves in such grave danger.

I echo the comments of all of my colleagues that I hope the Department will put in place procedures, systems, and facilities that are equal to what is clearly an epidemic problem. So I do not know that I have a question other than can you give us any more information as to what has happened to Cindy, what might be done differently in the future, and then adjust the admonition to deal with

a crisis.

Mr. Devaney. Senator, as I mentioned earlier, that case is under active investigation. We are working with the U.S. Attorney's office, and the U.S. Attorney in Oregon is obviously quite interested in this case. So I hesitate to say a whole lot about the investigation or where we might be headed. But having said that, I personally was shocked to find a detention center or a detention cell, if you will, and this was a cell. This was like any jail cell in any jail we have ever seen on television, at a boarding school, and particularly unmanned by a professional. At the time, I think, of her death, there was a woman who I understand is some sort of a dormitory counselor who could have observed a television screen to see this child in crisis, but apparently did not.

When I was told about this, I was not interested, quite frankly, in assessing blame at that level. I am interested in knowing who knew about this condition and for how long and why did they let it exist. I will stop short of giving you too many details, but we are working our way up the chain of command on both the law enforcement side and the school side of BIA to figure out who knew what

and when and how far up that was.

The CHAIRMAN. Thank you, Mr. Devaney. I appreciate your time. I am going to ask you to do something for us that I am going to ask all of the witnesses today, and that is we obviously have a big problem in Indian country with law enforcement. If you have any recommendations how we can help from the standpoint of framing up legislation. I do not know if the answer is just more money, although obviously the resources in the form of money certainly help. But if you would give the committee some recommendations of how we might try to make it better, I would appreciate it.

Mr. DEVANEY. I would be glad to do that.

The CHAIRMAN. Thank you. Mr. DEVANEY. Thank you.

The CHAIRMAN. Thank you for being here.

Our next witnesses will be Dave Anderson, Assistant Secretary of Interior; and Tracy Henke, the Deputy Assistant Attorney General at the Department of Justice.

As with the last witness, your complete testimony will be in the record. If you would abbreviate, that would be fine.

Nice to see you, Dave.

STATEMENT OF DAVID ANDERSON, ASSISTANT SECRETARY FOR INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

Mr. ANDERSON. Good morning, Mr. Chairman and Mr. Vice Chairman, and members of the committee. My name is David Anderson, Assistant Secretary for Indian Affairs.

Thank you for allowing me to speak today about the Administration's vision to improve the Bureau of Indian Affairs' [BIA] detention center program. Recent events have highlighted the need to continue to implement improvements, in addition to those changes already underway. The ultimate goal is to improve the delivery of services to tribes and individuals who are serviced by the Bureau's owned and funded detention facilities.

Until the 1960's, jail construction on Indian lands was very limited. The Department of Justice, Law Enforcement Administration assistance grants were provided for the construction of jails in Indian country. Many of these facilities, now 40 years old, are still in operation today. All of the detention centers present many challenges such as ongoing maintenance and needed improvement to these aging high-use facilities.

There are 75 confinement facilities, detention centers, jails and other facilities to be referred to in this testimony as detention centers, operated by tribal authorities or the Bureau of Indian Affairs in Indian country. Thirty-nine facilities are Bureau-owned; 19 facilities are Bureau-operated. Three of these detention centers do not house inmates and are used for law enforcement offices. The remaining 36 detention centers are owned and operated by tribes, either independently or through Public Law 93–638 contracts or self-governance compacts. All of the Indian detention facilities are designed for short-term detention and have difficulties accommodating long-term sentences.

In February 2004, when I became assistant secretary, I was briefed on Indian country detention programs and the ongoing challenges related to physical conditions and management structure. I want to thank Mr. Devaney and his office for bringing this to my attention. At this briefing, I immediately determined that critical improvements were needed, in addition to those that were already underway.

Since February, we have taken immediate and proactive steps to identify the deficiencies at these detention centers and take appropriate action. I would just like to say that prior to my coming on board, my previous background was in the restaurant industry where we take the health, safety and welfare of our guests to be the highest priority. When I was made aware of this by Mr. Devaney, I took the same reaction, that this was a very important priority and I tackled that problem with a sense of urgency. In fact, within the first 24 hours, I had gathered members of my staff and discussed a detailed plan of action that I wanted taken and expressed that the current conditions of the Bureau's detention facilities were totally unacceptable to me.

Within the next 48 hours, we had assembled a task force to start working on this problem. By the end of the week, we had mobilized over 100 people to start our own investigation throughout Indian country, especially the Bureau facilities that we run, to take and do an investigation on what was actually taking place.

I just want to highlight that. I cannot answer for what happened before, but upon my hearing about it, we did not waste one day;

we acted immediately to start putting things in place.

Even though it is not in my testimony, I would like to address the concerns that you have regarding Chemawa. Like Mr. Devaney, since it is under active investigation, I cannot comment specifically on it. But I want to share with you that when I had heard about this, we stopped that practice of holding children in detention cells. There are currently no detention cells in our school systems that are being used.

In addition, we also implemented a safety procedure that if any of our children are inebriated, that we have totally changed how they are treated. They are immediately sent to a hospital and placed under a physicians' care until they can be released. When they are released, and brought back, they are under supervision. There are many things that we have implemented regarding the health and safety of our youth, so an incident like the one at Chemawa's should never happen again.

Also, even though it is not in my testimony, one of the things that we did was to stop including juveniles adult facility. we have stopped that process immediately. There are no juveniles being held in adult facilities. It has caused some problems in the past, but we have put a stop to that practice.

It is important to get across we have not treated this as business as usual. We have taken this to be a high priority and have treated

it with a sense of urgency and immediacy.

Thirty-nine of the Bureau-owned detention centers were inspected for operational health and safety concerns by March 10, 2004. The 20 worst detention centers that are owned by the Bureau were also inspected for structural, plumbing, electrical and environmental concerns by March 10, 2004. The remaining 19 were inspected for structural, plumbing, electrical and environmental con-

cerns by June 1, 2004.

Inspections were completed in compliance with BIA handbooks that are based upon national standards such as the American Correctional Association standards, uniform building codes, national fire life safety codes, and all pertinent environmental standards. Thirty-nine Bureau-owned detention centers were inspected to determine necessary repairs, whether minor or major. All needed repairs were entered into the Bureau's facility and management computer information system for tracking of project completion and full financial accountability.

I would like to further comment that our staff put in a very herculean effort to put this report together so that I would have correct and full information; so that I knew what I was dealing with. I would like to acknowledge the work done our staff on that.

The CHAIRMAN. Can we have that report? I do not think we have a copy of that report. Could you provide that so we can include that in our record?

Mr. Anderson. Yes.
The Chairman. Thank you.
Mr. Anderson. This year, in 2004, we have dedicated a total of \$6.4 million to address normal annual facilities operations, as well as facilities safety and environmental deficiency concerns. Prior to that, the budget was \$1.4 million. Within the first several weeks, we had identified another \$2 million, and since then we have raised that to a total of \$6.4 million. I think it shows that we have reacted swiftly to take care of the things that we could do immediately.

About 84 percent of this funding has already been distributed to the detention centers for completion of identified repairs and normal annual operating expenses. In addition, about 45 percent of these immediate repairs have been completed since we started this.

The Office of Facilities Management and Construction and the Office of Law Enforcement Services have already begun corrective actions to reduce threats of harm to life and property. These actions include, number one, closing unsafe facilities, revising procedures for reporting and reviewing serious accidents, which was one of the concerns of Mr. Devaney's office, the reporting. I would also like to recognize Mr. Walt Lamar who is our Acting Director for Law Enforcement. He is here with me. If necessary, he is willing to help answer questions.

I would like to say that he has done a terrific job. He has set up a war room in the Department of the Interior, bringing in his best officers. They have been working night and day. They have worked through weekends and even this past weekend, missing Father's Day, to work on restructuring our reporting procedures.

A lot has happened, and I want to say that much of this has happened even before it was brought up in the newspapers. I want to assure the committee that this was not something that just happened because there was something in the newspapers; these officers have done a remarkable job considering the constraints that they are under. We have good police officers and I know they are. I would like to recognize that before this committee.

[Prepared statement of Mr. Anderson appears in appendix.]

The CHAIRMAN. I am pleased to see that the Department of the Interior and the Bureau takes the issue so seriously, and that you have provided some very strong leadership in trying to correct it.

Let me ask you a couple of things. I think there is a movement, or maybe not a movement, but certainly some discussion about whether it would be wiser to try to establish regional correctional facilities, rather than having every tribe have one. What would your view be on that?

Mr. Anderson. I think that is something we are considering. We are looking at being able to maximize the resources that we do

have. It is something that is being looked at.

The CHAIRMAN. The second thing is that some tribes, as I understand, they have, for lack of a better term I guess, over-capacity. They have more cells. They have more space than they need. They are renting those out to other tribes, which helps offset the cost of running the facility, too. Is that something the Bureau encourages?

Mr. ANDERSON. I think that what we are doing is using whatever facilities are available. I think in some instances we have extra space. In other facilities, we find ourselves overcrowded. We have had to move prisoners to appropriate facilities.

The CHAIRMAN. Have you initiated any special training or partnerships with other agencies to try to reduce the terrible suicide at-

tempts in BIA jails?

Mr. ANDERSON. Yes, sir; we have. We have recently met with the Department of Health and Human Services. We have also been working with Justice. I would like to say this, you know, the suicides that happen are not a product of detention centers.

The CHAIRMAN. Yes; they come in with emotional problems or additions to drug or alcohol or something, and that is contributing.

Mr. Anderson. This is one of my concerns as assistant secretary. I have gone on record that we need to declare war on drugs, alcohol and gangs in Indian country. As you are aware, I have spent much of my time visiting tribes in the short time I have been on board, and have visited almost 40 schools throughout Indian country in talking to our Indian youth. I really believe that the high suicide, high alcoholism and substance abuse, the dropout rate and the unemployment in Indian country are not a result of Federal interference, but it are really a result of young people growing up with-

We had an opportunity to talk the other day. One of my goals is to be able to work within our school systems to turn our schools into leadership academies, to start addressing the mental health of our children, being able to teach them success principles because I really believe that when our young people do not have hope in their future, that this is what causes the despair. I really believe that one of my roles and the reason why I was brought on board, because I think you could have found many other people that could have addressed some of the trust issues and other things like that, but I really believe that the message that I bring to Indian country is that as Indian people, we have a future; if we work together, we can achieve great things. That is the message that our children need to hear.

The CHAIRMAN. I commend you for that attitude. It is sorely needed. Thank you.

One other thing, the Department of Justice said in their testimony that there are roughly 500 unreported incidents. Is there any changes in detention staff being trained or something on how to report incidents in the Bureau's jails?

Mr. Anderson. Yes, sir; there is. Again, as I stated earlier, we have treated this with an immediacy, a sense of urgency, to the point that we have a war room within the Department. It is something to see, we have taken every aspect of law enforcement and detention centers and we are addressing every single issue. We have 32 high-priority elements that we feel must be taken care of or we are going to continue to experience these same problems.

One of our priorities is the reporting of suicides and attempted escapes. I will share with you that throughout law enforcement the Department and the Bureau know that this is of the utmost concern to me. It is something that I do not take lightly, and it is something that we have implemented as part of the job performance.

The CHAIRMAN. Thank you. Again, thank you for your leadership on this issue.

Senator Inouye, did you have questions of Secretary Anderson?

Senator Inouye. Just a couple of questions.

Mr. Secretary, I want to commend you for the proactive attitude you have adopted and for the work carried out by you and your team. I think it is safe to assume that these conditions existed before you took over. Was BIA notified of these conditions? Does the record show that they knew about it? Or did it suddenly become obvious?

Mr. Anderson. I cannot answer what happened before me. I do know that it is being investigated by Mr. Devaney and his office. I will assure you that when I came on board, that not 1 day went by before we took action on it. I believe that the health, safety, and welfare of our Indian people or those who are non-Indian who are within our jurisdiction are a very high priority and the issues raise by Mr. Devaney should be treated with the utmost of urgency.

Senator INOUYE. I have participated in many hearings, and this is one of the most depressing, obviously. If you had to select one facility or one tribe as having a good arrangement, can you pick one so we can have a model prison? Is there such a thing? I would

like to have something positive in the record. [Laughter.]

Mr. Anderson. We have the Southern Ute who will be testifying. They are highly regarded for the work that they have done within

their law enforcement and detention center.

Senator Inouye. So this is a model that Indian country should look at?

Mr. Anderson. Yes.

Senator Inouye. Thank you, sir. The Chairman Richards of the Southern Utes is here and he will be testifying. We will ask him some particular questions about that facility.

Now we will move to Ms. Henke. If you could go ahead and proceed. The same thing, we will submit some questions for the record and please abbreviate.

STATEMENT OF TRACY HENKE, PRINCIPAL DEPUTY ASSISTANT ATTORNEY GENERAL, DEPARTMENT OF JUSTICE

Ms. Henke. Certainly. Due to time, I will abbreviate

Mr. Chairman, Vice Chairman Inouye, my name is Tracy Henke and I do serve as the Deputy Associate Attorney General for the Department of Justice. I want to thank you for the opportunity to discuss the Department's limited role with tribal detention facili-

There are two groups of Indian offenders who may be in Federal custody. First, there are prisoners who have committed an offense under Federal law. Often, these offenses fall under 18 USC Sections 1152 and 1153. Section 1153 is known as the Major Crimes Act and 1152 is the Indian Country Crimes Act. Offenders in this category are under the jurisdiction of the Bureau of Prisons and not in Indian tribal facilities.

The second group of prisoners have committed offenses under tribal law. Indian prisoners in this group are under the jurisdiction of the tribe whose law has been violated. As part of their inherent sovereignty, Indian tribes have jurisdiction to prosecute all crimes committed under tribal law by Indians in Indian country. These prisoners are generally in facilities operated by the BIA or the trib-

al government.

The Department of Justice's involvement with Indian country detention facilities is generally limited to our correctional facilities on tribal lands program. This program provides funds to American Indian and Alaska Native tribes to construct correctional facilities on tribal lands for the incarceration of offenders subject to tribal jurisdiction.

Specifically, the Department of Justice has administered tribal correctional facility grants. It is important to understand that these grants are statutorily limited to brick and mortar construction costs only. Grantees are responsible for fully supporting, operating

and maintaining these correctional facilities.

Since the inception of funding of the program, the Department of Justice has provided funding to 23 tribes for jail construction. Of these 23 facilities, 8 facilities are exclusively juvenile, 12 are combined adult-juvenile; and 3 are exclusively adult. All 23 tribes are actively implementing design or construction initiatives. Some have added beds to existing facilities, but most involve new construction.

Proposed facilities range in size from 8 to 68 beds.

In addition to the correctional facilities on tribal lands program, the Department's Bureau of Justice Statistics compiles statistics relating to detention facilities in Indian country. In November 2003, the BJS published Jails in Indian country 2002, the most recent survey of adult and juvenile detention centers in Indian country. Data for this bulletin was obtained by mailed questionnaires, accompanied by phone calls and faxes. In total, 68 of the facilities in Indian country responded. For the committee's review, copies of the bulletin, as well as the questionnaire, have been provided to the committee.

It is important to note that while the Bureau of Justice Statistics Bulletin contains statistical information about the Indian detention facilities, it does not gather information regarding conditions in jails. As the Administration, through the BIA, works to improve Indian detention facilities, the Department of Justice will continue to assist as we are able. Most recently, as pointed out, an experienced administrator from the Department's Bureau of Prisons, has been detailed to the BIA to assist in the development of strategies to improve the delivery of detention services in Indian country. The Department of Justice looks forward to this opportunity to work with the Department of the Interior to address this issue.

Mr. Chairman, this Administration, specifically Attorney General John Ashcroft, has pledged to honor our Federal trust responsibility and to work with sovereign Indian nations on a government-togovernment basis. The Attorney General and the entire Justice Department will honor this commitment and continue to assist tribal

justice systems in their effort to promote safe communities.

As you have pointed out, Mr. Chairman, often the most effective solutions to address the problems facing Indians and the tribes come from the tribes themselves. Our role is to help them to develop and implement their own law enforcement detention and criminal justice strategies.

This concludes my statement. I am happy to answer any questions that you might have.

[Prepared statement of Ms. Henke appears in appendix.] The CHAIRMAN. Thank you. Just a couple of quick questions.

You mentioned the funding that the DOJ has provided. How is

that funding distributed? Does it go through the Bureau?

Ms. HENKE. Actually, sir, the funding that has been provided, Congress has specifically directed the Department on where those funds are to go.

The CHAIRMAN. Okay. Is there a formula for that, based on the number of enrolled people in the tribe?

Ms. Henke. It is done through congressional earmarks through the appropriations process.

The CHAIRMAN. I see.

Also, you stated that an experienced administrator was assigned to help the Bureau develop strategies to improve detention facilities services. How long has that person been in that position? Have you measured any progress in that period of time?

Ms. Henke. He has only been there about two weeks.

The CHAIRMAN. Okay.

Senator Inouye, do you have further questions?

Senator Inouye. Ms. Henke, if I may ask, for fiscal year 2000 until 2002, the Justice Department devoted about \$35 million in funding to tribal detention facilities. Then in fiscal year 2003, it went down to \$5 million and then in 2004, to \$2 million. Can you

explain why?

Ms. Henke. There are a couple of reasons, sir. As pointed out by the Chairman earlier, not all the facilities were operating at capacity. On average, according to the Bureau of Justice Statistics report, during the month of June 2002, the average capacity was approximately 79 percent. In addition to that, the Administration believes that we have to identify, because the Department of Justice grant program is only for construction, not for operation and maintenance et cetera, funds for those activities have to be identified.

Finally, sir, Congress has not provided the Department of Justice any discretion in working with the BIA on how to allocate those resources. Congress has specifically directed. There has been no disagreement in the past between the BIA and the Department of Justice on where those resources should go. We just have not been given the discretion to allocate those accordingly.

So in making some tough budget decisions, the Department currently has not requested additional new construction costs.

Senator INOUYE. So you are suggesting that the sudden drop in funding was a congressional decision?

Ms. Henke. Well, Congress has appropriated the dollars and has specifically earmarked where those funds should go.

Senator Inouye. Did Justice request more funds?

Ms. Henke. The Department of Justice, the Administration, has not requested additional funds for new construction. We believe funds need to be identified to address the current situation facing the current facilities, and those issues are maintenance and operation, before we request funds for new construction.

Senator Inouye. Thank you very much.

Ms. Henke. You are welcome.

The Chairman. One follow-up, Ms. Henke. You mentioned that sometimes the construction is based on earmarks from the Hill here that does not go through some formula. Would you support eliminating that current system and going to some kind of a needbased program that is determined by the Administration?

Ms. Henke. The Administration has stated on numerous occasions that they do not support the earmarks through the appropriations process in general. So we would support having the ability to have a needs-based or additional formula-based process to distribute those funds.

The CHAIRMAN. Okay. I thank both of you for appearing here today. As with our first panel, if you have any recommendations how we might get involved to make things a little better, we would

certainly appreciate it.

Mr. Anderson. Thank you. Ms. Henke. Thank you.

The CHAIRMAN. Thank you, Dave, and if you have the time you might want to stay and hear our last panel, or at least some of our

last panel, I think their testimony is very important.

We have Howard Richards, the chairman of the Southern Ute Tribe; Vivian Juan-Saunders, chairperson of Tohono O'odham Tribe from Arizona; and Hope MacDonald-Lonetree, chairperson of the Navajo Council Public Safety Committee; Darrell Martin, president of Fort Belknap Indian Community Council; and Fred Guardipee, council member for the Blackfeet Tribe of Montana.

We will go ahead and proceed with Chairman Richards, my friend and colleague and neighbor from Southern Ute. They have a facility at Southern Ute that I think very frankly could be a model for the tribal jails and courts that could be used nationwide. If any of you have an opportunity to visit that, you should get a hold of Chairman Richards.

Go ahead and start, Howard.

STATEMENT OF HOWARD D. RICHARDS, SR., CHAIRMAN, SOUTHERN UTE TRIBE

Mr. RICHARDS. Mr. Chairman, Mr. Vice Chairman, members of the committee, thank you for allowing the Southern Ute Tribe to provide testimony on an age-old issue that has been around since the Government detention facilities.

I am the chairman of the Southern Ute Indian Tribe from Ignacio, Colorado. I am not out here to magnify or illustrate what has already been said to this point. We all understand that there is a problem in Indian country in the field of detention facilities, a problem that has existed when I first became a tribal police officer in 1979. I experienced the horrors of a government-run detention facility up until my departure from the tribal police department in 1991, when I was then elected to the tribal council. So in short, been there, done that, and seen everything that the issue brings forward today.

I would just like to offer recommendations based upon what Southern Ute has experienced. They are five recommendations that I bring to this committee. Recommendation number one is that Congress must allocate enough money to build and maintain facilities that are secure and legally sufficient. Having said that, the

tribe itself funded construction of the new facility in 1999. Given what was happening in Indian country specific to Southern Ute, we had enough of the government. We had enough of the BIA-run program.

gram.

The tribe actually funded the total project cost in excess of \$9 million to build the corrections facility at Southern Ute. Why did we do that? We felt that we would have better control of the facility outside of 638 contracting with regard to detention, without the BIA regulations hindering the tribe. The other reason why we chose to go it alone is that the Southern Ute Tribal Council looked at rehabilitation of inmates versus warehousing of inmates as you see today.

The tribe subsidizes the operation and costs by intergovernmental agreements. Today, we have 18 IGA's with 17 tribes, many of the Pueblo Tribes of New Mexico. We have one presently with a tribe from California. We have two other IGAs with the Federal Government, that being the Immigration and Naturalization Serv-

ice and the Federal Marshall's program.

Point number two is to allow tribes more flexibility for involvement in management of Federally funded tribal detention centers. The flexibility that I am talking about is rehabilitation that our program, our tribal detention center has 13 proactive programs. You will find in my testimony that I submitted, with rehabilitation in mind, that the Southern Ute Tribal Council wanted the inmates, once they were released from our detention center to be productive members of the society, as well as productive members of the Southern Ute Indian Tribe.

Point number three is the need to separate detention from police functions which is very critical, very important. You will hear testimony to that. At the Southern Ute Indian Tribe, detention has been separated. It has a separate administration and budget. The reason for that is that when we looked at the Federal funding on the government side, that Federal money for law enforcement programs usually means detention. Funding takes a back seat to other spending. We lived with that for many years, so the attitude in changing to a tribal control where we would run our own programs

and separate that from the police action.

Point number four is to hire detention professionals to manage detention centers. That is what the Southern Ute Tribe did in 1999, with the separation of detention from tribal police for many reasons. When you hire professionals that deal only with detention, you have a better control of the inmates. When you combine police and detention facilities, the majority of the times, nine out of ten or ten out of ten, you will have tribal police officers acting as detention officers at that point, which can be viewed by police officers as punishment for whatever, or to be utilized as a training grounds. They also would dispatch for law enforcement in addition to supervising inmates.

Point number five, for detention, the need to have good operating policies and procedures in place are very critical, as found at Southern Ute. Our principal policies are reviewed on an annual basis. We have adopted the American correctional standard as far

as detention facilities at Southern Ute.

In conclusion, Mr. Chairman, Mr. Vice Chairman, we realize that few tribes can afford to build and operate their own detention center without any Federal funding, as we have done. We hope however that our experience and our recommendations might give you some ideas on how to improve conditions in Indian tribal corrections facilities.

I want to thank you for inviting me to testify before this committee. On behalf of the people of the Southern Ute Indian Tribe, thank you very much.

[Prepared statement of Mr. Richards appears in appendix.]

The CHAIRMAN. Thank you, Chairman Richards.
We are going to run out of time before we get to ask everyone questions. So before going to Vivian Juan-Saunders, let me ask you a couple of things, and Senator Inouye may, too, before we have to run to vote.

The Southern Utes, a very progressive tribe, have an alcohol recovery program called Peaceful Spirit. Does that work in conjunction with the tribe on what you call rehabilitation of people that are in the jail?

Mr. RICHARDS. That is correct. The inmates have an option of moving into and taking treatment at the Peaceful Spirit Center, but also we provide AA-type rehabilitation while they are incarcerated in the jail itself, in the detention facility.

The CHAIRMAN. In that program, you use the modern systems of rehabilitation, which is counseling. But also I noticed that they also have sweat lodges and things that try and use the traditional and

religious way of recovery, too. Is that correct?

Mr. RICHARDS. That is correct, Mr. Chairman. The Southern Ute Tribal Council felt that because of the process that we were experiencing, that there was no spiritual or traditional healing within the justice system. So therefore we chose to run our own detention center that would allow traditional and cultural healing within our people.

The CHAIRMAN. Good.

Senator Inouye, did you have any questions of Chairman Richards before we move on? I guess we have kind of run out of time. Okay, then let's go ahead. Vivian Juan-Saunders, if you would pro-

STATEMENT OF VIVIAN JUAN-SAUNDERS, CHAIRWOMAN, TOHONO O'ODHAM NATION

Ms. JUAN-SAUNDERS. Good morning. Thank you for the opportunity to testify. My name is Vivian Juan-Saunders, chairwoman of the Tohono O'odham Nation in Southern Arizona.

The BIA built our detention facility in 1961. It was built to hold a capacity of 34 inmates. The BIA owns the facility and through 638 contracting the Nation operates the facility. For many years, the detention facility on our Nation has had the unfortunate distinction of being one of the most overcrowded jails in Indian country. Our average daily population ranges from 110 to 115. This has resulted in a 300 to 350 percent overcapacity rate.

In 1987, the BIA renovated the facility. However, it did not address the overcapacity issues. It costs approximately \$3.4 million per year to operate this facility. The BIA provides only one-third of the funding. The Tohono O'odham Nation uses our own tribal funds to pay for two-thirds of the operations, or approximately \$2.3 million. Our juvenile corrections program is separate from the adult facility and is operated by our tribal court system. Once again, the tribe pays for the juvenile program with no support from the BIA.

Our adult detention facility has a staff of 40 people. In our testimony you have a listing of the positions. However, five of the positions are frozen due to funding limitations. From our own experience, we know that proper and ongoing training is essential to effective jail management. Through our own efforts, without any direction from BIA, we have established policies and procedures that are in accordance with standard corrections operations. We have ongoing staff development and training practices. We implemented a classification system that assesses an inmate's psychological background, reviews past offenses, and evaluates the prevalence of mental illness and other relevant factors to establish the appropriate placement and treatment of the inmate.

The corrections staff attends the Indian Police Academy for basic corrections training and participates in a structured in-service field training program. We continue to operate with a philosophy to respect inmates. However, oftentimes because of our shortfalls with staffing, we do fall by the wayside. However, that is our common

philosophy.

We have many programs funded by the tribe, volunteers who come into the facility to provide help, prevention, addictions, religion, traditional services and contact visitations. One of the concerns that I am hearing from our tribal behavioral staff is they are trained to address alcohol and drug addictions, and not mental health issues. So they are concerned going into the detention facility about their own safety because of the lack of training, but increase in mental health issues of inmates coming in.

A recent report issued by the Inspector General in the Department of the Interior gave our adult detention facility a fair rating. While we are stretching our resources as far as possible, the facility continues to suffer from extreme overcapacity and need for basic capital improvements, such as upgrading the ventilation system,

fixing showers, and replacing old backup generators.

In the wake of the USA Today articles, we were informed by local BIA officials that additional resources have been identified to address deficient jail conditions. However, we have not been provided specific information regarding what additional resources or

funding will be available.

I am happy to report that we are in the design stage for a new facility in tended to house minimum security inmates that will be constructed with funding from the Department of Justice, a total of \$6.7 million. Our timeline for operations is September 2005. The facility will be designed for 52 beds for both adults and juveniles. This will solve part of the problem. However, we still do need a maximum security facility to address violent criminals, sexual offenders, and gang members whose activities are increasing on our reservation.

Another related problem that must be addressed is the lack of prosecution by the Arizona U.S. District Attorney for serious felony-level offenses. For example, we have had people in custody for murder who after the maximum tribal sentence, walked free with no Federal prosecution. We believe that additional Federal resources must be provided to address this serious problem. A specialized Indian country crime unit should be created in the Arizona U.S. District Attorney's office with Federal law enforcement personnel assigned to work exclusively with tribal police and prosecutors. Without appropriately prosecuting violent crimes in Indian country, the crime rates will continue to rise and repeat offenders will continue to go unpunished.

A model is the FBI Safe Trails Program, where the Tohono O'odham Nation has access to five FBI agents to assist our tribal police with homicides, crimes against children, gang-related violence and serious aggravated crimes. So there is a model out there

through the FBI.

Also within the Department of Justice, sufficient funding for tribal detention facilities must be included in its annual budget. Within the BIA, sufficient funds must be budgeted for facility operations. Both of these Federal agencies must consult with tribal governments and undertake a strategic and comprehensive planning effort to implement reform of tribal corrections facilities. The BIA should create a separate line item for corrections programs which includes adequate funding for staffing, equipment and operation and maintenance of facilities.

Along these lines, proper respect and recognition must be accorded to the corrections profession. This means we must provide competitive wages, professional development opportunities, and training incentives to attract and retain qualified individuals.

In conclusion, the appalling condition of jails in Indian country have been ignored for too long. Sometimes it takes an unfortunate tragedy to bring attention to these needs. We have not reached that level on the Tohono O'odham Nation, but based on our experience, jails in Indian country need immediate attention.

Thank you for the opportunity to testify today.

[Prepared statement of Ms. Juan-Saunders appears in appendix.] The CHAIRMAN. Ms. Juan-Saunders, you were here last July and testified that your tribe annually spends about \$2 million to \$3 million on border patrol. We all know that border patrol is supposed to be a function of the Federal Government, the cost of it, but you are sort of stuck with it, being on the border where your tribe is. Is any of that money reimbursed by any of the agencies of the

Is any of that money reimbursed by any of the agencies of the Federal Government, like the Bureau of Immigration and Customs

Enforcement?

Ms. JUAN-SAUNDERS. The total cost is \$7 million and, no, we are not reimbursed.

The CHAIRMAN. You do not get any reimbursement for that. Okay, thank you. We will have some further questions. We will move on to Ms. MacDonald-Lonetree please.

STATEMENT OF HOPE MACDONALD-LONETREE, CHAIR-PERSON, NAVAJO COUNCIL PUBLIC SAFETY COMMITTEE, NAVAJO NATION

Ms. MacDonald-Lonetree. Good morning, Mr. Chairman, Vice Chairman Inouye, members of the committee. Thank you for the

opportunity to provide the Navajo Nation's statement on Indian tribal detention facilities.

On behalf of the Navajo Nation, I want to thank you for your support and your funding of these facilities in Indian country. The Navajo people directly benefit from your concern and your support.

For the record again, my name is Hope MacDonald-Lonetree. I am an elected Navajo leader and serve as the chairperson of the

Public Safety Committee of the Navajo Nation Council.

As the nation with the largest population and the largest Indian reservation, we have various unique geographic, demographic and intergovernmental features that require significant congressional awareness, leadership and budgetary considerations. Navajo does not have enough detention facilities, personnel and equipment. This leads to unsafe communities and a lack of economic opportunity. We need the resources to provide more detention facilities, personnel and equipment to make our communities secure.

Navajo currently only has 103 jail bed spaces for a nation of more than 300,000 people. Detention facilities were built in the late 1950's and early 1960's, and they became so deteriorated that in 1992 the Navajo Nation court ordered all facilities closed as health hazards. The court and Federal inspectors told the tribe that the jail facilities were not fit for human occupants and not even safe

for detention personnel.

I have provided you with a page of major incidents and fatalities as a part of my written testimony.

The Chairman. It will be included in the record.

Ms. MacDonald-Lonetree. Thank you.

After minor renovations, by consent decree the jails were reopened with limited bed space and that resulted in the 103-beds now available. Those often close intermittently due to the environmental health inspections because of the unsafe nature of those old facilities.

We have only three juvenile detention facilities and one of these has been recently closed due to a lack of funds to make those repairs. Despite this lack of jail bed space, we have over 33,000 ar-

rests a year on our reservation.

Members of the committee, I urge you to come and see for your-selves the deplorable condition of our detention facilities. But more than that, I hope that you will see for yourselves the need for immediate resources to ensure Navajo public safety. We need additional facilities, new facilities. We need increased law enforcement personnel. We need adequate and up-to-date equipment.

Mr. Chairman, members of the committee, the tremendous rise in crime on the reservation is not due to the lack of resolve on the part of the Navajo Nation. It is not due to the lack of dedicated officers who are well-trained and committed. It is due to the lack of sufficient annual funds to address the need for detention facilities,

more personnel and adequate equipment.

The high crime rate is directly related to high unemployment and poverty. Very few companies want to come to an unsafe community. Therefore, economic opportunity and jobs for our nation are adversely affected by the lack of safe and secure communities.

The U.S. Attorney's office of Flagstaff, Arizona estimates that violent crime on the Navajo reservation is six times higher than

that of the national average. Increased crimes include alcohol and drug abuse, domestic violence and child sexual abuse. We cannot even address domestic violence on Navajo because we cannot even separate the abuser from the victim due to the lack of facilities, and the abusers know that.

We cannot even protect our children from sexual predators. Just in one community, there were over 100 reported incidents of child sex abuse in 1 month. We cannot protect our families from somewhere to put the perpetrators threatening our communities. Navajo Nation averages one officer for every 4,000 people, compared to the national average of three officers per 1,000. Our officers perform alone without partners and without radio communication for backup. As you heard earlier from the Inspector General, we often only have one detention officer for a facility, and that is very dangerous for our officers.

Let me share an incident that will enlighten you on some of the situations that we face on Navajo. An officer responded to a call and found a man beating his wife and family. The wife did not want him arrested. She knew that he would be detained for a few hours due to the lack of facilities, and feared that he would return more violent. Because she did not want him arrested, she attacked the officer herself and tried to get his gun. The officer managed to get away, leaving the abuser with his family. That is because the people know we have no jails.

Another sad incident, and this is included in the written statement, a young boy was arrested for attacking his brother. After a short hour in jail, he was let out. A week later he was arrested for attacking his sibling again. He was again released after a short time in jail. The third time he was arrested was for stabbing his mother. This is because we cannot detain these individuals and we have no facilities.

Criminal incidents and recidivism are high on the reservation, all due to the factors I have described. Criminals are allowed to return to their community without incarceration. We cannot incarcerate criminals without putting them at significant physical and health risk. In many instances, the tribal court is a revolving door for our criminals. Criminals and their victims have a complete disregard for our criminal justice system. Communities across the reservation and neighboring towns are at risk. Public safety officers are at risk.

From all statistics and reports we are receiving, Navajo crime rates will continue to increase unless we address this problem now. We need sufficient funds to replace and build seven new facilities. These facilities must include sufficient personnel and equipment to manage a growing epidemic of criminal activities on the reservation.

Yes; we need your help now. Just to bring our detention facilities up to the national standard will require \$140 million from Navajo. This is just to cover the basic need for facilities. This does not even include services that can be provided in the jails.

Members of this distinguished Committee on Indian Affairs and the U.S. Senate, I urge you to help us correct years of neglect and underfunding and help us to secure our communities. I have provided you with a written statements and recommendations on behalf of Navajo and I am available for any questions.

Thank you.

[Prepared statement of Ms. MacDonald-Lonetree appears in appendix.]

The CHAIRMAN. Thank you.

Did I hear the numbers right? To me, they were just absolutely astounding, but 33,000 arrests per year?

Ms. MacDonald-Lonetree. Yes.

The CHAIRMAN. And you only have 103 beds?

Ms. MacDonald-Lonetree. At the maximum, and like I said, some of them close off and on, so we can sometimes have 50 to 70 beds available.

The CHAIRMAN. I see.

So with that kind of arrest rate and that few places to put them, you mentioned the word "revolving door." It must be a revolving door in the police departments when they are arrested, too. They keep them for a while and then just turn them back out. Is that what happens?

Ms. MacDonald-Lonetree. That is correct. And also, in the attachment that I gave you, inmates are often held in back of the police cars or panels for hours because there is no place for them.

The CHAIRMAN. Because there is no place for them. So if they get arrested, sometimes is it correct to assume that they get turned right back out on the street before they even come to trial?

Ms. MacDonald-Lonetree. That is true, because the officers, as a matter of fact, on Navajo say they are very frustrated. Before the ink dries on the report, the person they arrested is out.

The CHAIRMAN. So then that leads to the question you probably have a repeat offender program for a repeat offender problem of people that are being arrested for the same thing over and over. You mentioned the young man that beat his brother up and then ended up stabbing his mother.

Ms. MacDonald-Lonetree. Absolutely. That is what also causes the violent crime, because they know there is no law and order on Navajo.

The CHAIRMAN. Senator Inouye.

Senator Inouye. I have just one question. I realize that on a matter of this magnitude, you cannot point fingers and say the Administration is at fault or the Congress is at fault or Indian country. I think all of us have our share of fault. But I am looking over your prepared statement and it says the following: "In February 2002, DOI estimated that the deferred maintenance backlog was between \$8.1 billion and \$11.4 billion." I have been on this committee now for nearly 30 years and I have been chairman at times or vice chairman. But I must confess that I have never heard figures of this magnitude. There is some disconnect in the information. But I thank you very much for your testimony.

Ms. MACDONALD-LONETREE. Thank you.

The CHAIRMAN. Thank you.

Now we will proceed with President Martin.

STATEMENT OF DARRELL MARTIN, PRESIDENT, FORT BELKNAP INDIAN COMMUNITY COUNCIL

Mr. MARTIN. Thank you, Mr. Chairman, Mr. Vice Chairman, members of the committee. I want to thank you for giving me the

opportunity to testify on this important issue.

I speak on behalf of the Gros Ventre and Assiniboine Tribes of Fort Belknap. I serve as the president on the tribal council. Fort Belknap is located in north-central Montana, about 200 miles north

of Billings, which is the largest city in Montana.

The tribal headquarters is also 350 miles from Great Falls, which is the only city that has a certified juvenile detention facility. Adult detention facilities at Fort Belknap is a single jail providing adult detention facilities for over 5,000 enrolled members. We only have eight beds in that one facility. The jails are reviewed and deemed defunct and can no longer be housing inmates for no longer than 72 hours.

Inmates in need of transport will have to be transported for 1 hour because we have no room to house them in our own facility, or they will be shipped to Fort Peck Reservation that is at least a 3-hour drive from Fort Belknap. We asked for reconstruction money and did not receive any money to reconstruct this deplorable situation on Fort Belknap. In 35 years, we have only renovated the current facility.

The cost of transportation has been significant. It has often required overtime by our police officers to shuttle prisoners back and forth on drives that are often 6 hours round trip in good weather. In winters, with long and often bitter cold, and poor weather trips, can delay a trip up to 10 hours for a round trip to transport a pris-

oner or a juvenile to Great Falls.

The families of detainees that have to visit their families to Great Falls or Billings have to travel long distances in cold weather. They have no money to travel these long distances to visit their families that are incarcerated, because we have no facility in Fort

Belknap to house them.

Juvenile detention facilities, we have never had a juvenile detention facility on our reservation. For several years, we have contracted for placement in Blaine County youth detention facility about 25 miles away. However, this facility will close shortly. It does not meet State standards. It has not provided counseling or treatment for the youth detention. I want to put on the record, too, there is no mental health help for these individuals as well.

Limited funding has exhausted the youth, and they have to be detained on Fort Belknap in the same environment as adults. There is limited funding for counseling and treatment for youth and their families. Many families simply do not have the resources

to travel to Great Falls and visit their children.

For nearly 6 months of the year, traveling such distances is simply dangerous because of the cold weather and difficult roads. We need a solution at Fort Belknap to detain youth locally, provide timely return to the youth to make a difference in their lives; to encourage them to go on.

I want to thank the committee for listening to our testimony today. We ask the committee to please help provide funding for jail and detention facilities. I want to thank the committee. Thank you. [Prepared statement of Mr. Martin appears in appendix.]

The CHAIRMAN. Thank you for your testimony. In listening to all of your testimony, I just mentioned to staff, my gosh, the numbers sound like something you would find in Iraq, not the United States. They are just deplorable.

Go ahead, our last person who will testify is Fred Guardipee.

STATEMENT OF FRED GUARDIPEE, COUNCIL MEMBER, CHAIRMAN OF HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE, BLACKFEET TRIBAL BUSINESS COUNCIL

Mr. GUARDIPEE. Good morning, Mr. Chairman. I want to thank the Chairman, Vice Chairman and members of the committee. My name is Fred Guardipee. I am a member of the Blackfeet Tribal Business Council for the Blackfeet Tribe in Browning, MT. We are in the northwestern part of the State. I am also the chairman of the Blackfeet Tribal Council Business Law and Order Committee.

I want to talk about the detention facilities on the Blackfeet Nation. Our reservation jail was built back in 1970, as were most of the facilities we were discussing this morning. It was built to hold 35 prisoners. At the time I was working there as a law enforcement officer, it was probably one of the most modern facilities in that area.

However, today that facility has deteriorated. In 1995, the Black-feet Nation was operating the facility. It was then under a 638-contract that the BIA took over the operations of that facility. Then the tribe operated it in conjunction with the Bureau under a 638-contract until 2002, on a resumption of the BIA law enforcement services

However, that facility now, it has become a problem. It is unsanitary. There is no ventilation. The heating system does not work, the showers. It was made to hold 35 prisoners, but as many as 250 prisoners have been held in there at one time. They are sleeping on floors. They have very little bathroom facilities. Consequently, they are urinating and defecating on the floors. When you enter the facility, that smell stays with you. It stays with your clothing when you leave. I worked in that building for a number of years.

The plumbing system is inadequate. It does not work. We have had shut downs of our water. Our water system that is used to provide drinking water is not drinkable. It is very bad. We have had to utilize the bottled water system for years, for our prisoners.

to utilize the bottled water system for years, for our prisoners. On the Blackfeet Nation, we have around 15,000 tribal members enrolled. We have about 10,000 living on the reservation. We are bordered on the north by the Canadian border and on the west by Glacier National Park. Those 10,000 members are there year-round residents. However, during the summer months that population increases to over 2 million people passing through our Blackfeet Nation.

We hold tribal, State and Federal prisoners, from murderers to vagrants in our facility. Yet it is not adequate. It is not safe. There is a danger to our staff. Our staff have been assaulted and seriously injured in this facility over the years.

The suicide rate, the attempt rate, it is almost one attempt daily, and we have had over the past 5 years at least five successful suicides or deaths in our facility.

We have brought this to the attention of the BIA. I have myself personally on many occasions, the conditions of this facility, asking for renovations. They do bring paint. In a couple of instances, we painted the place and found out the paint was not suitable. It was contaminated and we ha to scrape the whole thing back out and start over again.

The ventilation system is so bad that there is no fresh air coming into the facility in the summertime. There was no control over the heat. The heat runs consistently. The furnace is full blast. There

is no cool air coming in there.

So if it is 90 degrees outside, it is probably 110 degrees inside those facilities. These inmates are being held from 6 hours to one year in that facility, due to the nature of the crimes. We have every major crime on our reservation, unfortunately. With the drugs, the meth operations, we have ongoing operations on the Blackfeet Nation.

We also have the manufacturing of drugs, and drugs being transported from the Canadian side, passing through unprotected border stations that are not patrolled by the Border Patrol or anyone else. We have about five entrances from Canada, where they are unprotected. The Canadian individuals have keys to the gates. They enter our Nation without any supervision at all. They just come through, open the gate and go, and lock it back up and come into our Nation, into the United States, and they are not asked by anyone or stopped by any Federal agency to check whatever they are bringing in.

Just recently, we had what we call the mad cow. We had livestock entering our Nation through those unprotected border stations. We have chemicals that are banned in the United States that are being brought down through our Nation on these unprotected

stations on our border.

But yet we receive no homeland security funding, or very minimal. We have asked for additional patrol officers. We have asked the Border Patrol, the Customs to increase their patrols. Officers were sent into our area, but they are not specifically working the Blackfeet Nation. We have about 80 miles of border there with Canada that is unprotected.

On the west, we have the Glacier National Park. We have three entrances for tourists and other folks. Employees enter, and a lot of things are brought into our Nation, drugs and individuals that are hiding from law enforcement are found in our Nation, in our forests. Several of these people have been caught hiding out in our

forests up there.

Over the years, this facility has been very underfunded. We have asked many times to beef up the staff, the Blackfeet Tribe. We have about a \$5-million budget that we are called upon to serve the Blackfeet Nation of almost 10,000 people that live there. We were operating under 638 contracts that when they were originally written were for about \$4.5 million, but were never funded beyond \$1.2 million for law enforcement services for the Blackfeet Nation.

Presently, the Bureau took over operations, an emergency reassumption in 2000. The conditions have not changed. The law enforcement services are still inadequate. We have seven communities that are not being served by law enforcement. We are now in a process, and have been for a while, to augment those law enforcement officers with tribal officers funded under the COPS pro-

However, that funding is now reaching the stage where those funds are running out, and there is no money available for the Indian nation, the Blackfeet Nation in particular, to hire these officers who we hired over the years that were trained by us or trained

at the Indian Police Academy. We need additional dollars.

Our recommendation is that the committee take a serious look at what is going on in our Indian Nations. We had Mr. Anderson come out to Montana. However, he only visited two reservations. We would like to have seen him visit the rest of the Indian Nations. There are seven reservations in the State of Montana. Only two were visited. I think he needs to look at all of them.

I do not know if you have seen the movie that was done by a former BIA officer. That movie clearly illustrates the condition of the Blackfeet facility. I do not have that movie with me today, but I think it is available. We will make that available or leave it as part of our record that does show the condition of the Blackfeet fa-

cility.

We are recommending funding for all Indian Nations, but in particular the Blackfeet Nation. To look at our facility right now, we are proposing, we have set aside land. We look at a facility that would cost around \$45 million right now to combine our services. We have a little different philosophy than other nations in that we like to look at one-stop shopping. We want all of our facilities in one area, so our people do not have to run all over the villages to find this service or that service. They come to one place and all their needs are met, the courts, the social services, the detention facilities, adult and juvenile.

We do want to thank the BIA. Over the past two years they have funded, limited funding on a juvenile facility. However, that facility was also built back in 1970 and is in bad need of renovations. The foundations are starting to crack. It is made to hold at least 24 children, and we have instituted a program there to look at rehabilitation. As a Nation, we have turned a ranch over to these children, to their supervisors, for the rehabilitation of those children. That seems to be working very well at this point. That facility also is in bad need of funding. It is going to need to be replaced here

One of our goals was to improve that facility, to contract with other tribes who are in need of places to have their juveniles taken

Again, I just want to urge the committee to take a serious look at all the Indian Nations, but in particular the Blackfeet Nation in Montana, as well as our neighbor the Assiniboine, who is here testifying today. The great need is of replacement of facilities. I heard testimony earlier that they are looking at renovation and operations. To date, those have only been cosmetic. You throw paint down. You do not do anything with the basic infrastructure there. They need to be torn down and replaced. They are unsafe. They are unsanitary. They are inhumane to the people that have to be in those facilities for a long time.

Thank you.

The CHAIRMAN. Thank you, Mr. Guardipee.

I have a couple of questions. I might mention, though, Secretary Anderson has stayed around to hear your testimony. I am sure this emphasizes the magnitude of the problems. With 240 Alaskan villages and roughly 300 reservations nationwide, and him only being in office 6 months, give him a little time. He has been on the road almost constantly trying to visit reservations. I think he is doing his very best to do that.

Let me ask, particularly since we have two tribes from Montana, I mentioned earlier the question of regional facilities. Would you think in Montana that that would work, to have a regional correc-

tional facility in Montana so all the tribes could use it?

Mr. Martin. I do not know if it will work because every tribe has their different ways of rehabilitation through spiritual or through medical. Plus, you have to put in the cost of transportation. Where is it going to be? The nearest McDonald's for us is 91 miles; or the nearest jail for our children is 150 miles. So every reservation, and there are seven reservations in Montana, where are you going to put it where one tribe can be equally driven. Then you are going to look at overtime for your police officers because there is not enough money for police officers, and there is a shortage of police officers.

So I really do not think that would work. In my own opinion, just

for the budgetary problems that each tribe has individually.

The Chairman. Let me ask something else then. The Southern Utes have testified that they got tired of waiting for Federal funding and so they finally built a new facility with tax-exempt bonding. Is that correct, Chairman Richards?
Mr. RICHARDS. That is correct.

The Chairman. Have the other tribes, the Navajos or your tribe, thought of doing that?

Mr. GUARDIPEE. Yes; we are in the process of doing that, Mr. Chairman. We are exploring that, working with financial institu-

tions within our area.

On the first question you asked, Mr. Chairman, we have a little different philosophy in that we need to improve the facilities on Indian Nations themselves. I agree with Mr. Martin. However, there is a regional facility that is being discussed in the State of Montana for holding juveniles, rather than adults. We are looking at that proposal and it is being discussed by the Montana-Wyoming tribal leaders council, to look at maybe possibly three juvenile regional facilities, because there are none, basically, outside of Blackfeet, that these people can utilize. We discussed that about 1 month ago at our meeting in Billings, that we would like to look at that proposal for the juveniles.

The CHAIRMAN. There is some kind of a facility in Sheridan, WY that a lot of Wyoming and Montana tribal members go to. I think it is a hospital, though. Is that just an alcohol recovery program

or are there detention programs there, too?

Mr. GUARDIPEE. What I know, Mr. Chairman, is that it is an alcohol and drug recovery program at this point. They do not necessarily hold detention.

The CHAIRMAN. Ms. MacDonald-Lonetree, what do you think

about bonding as a mechanism for building facilities?

Ms. MacDonald-Lonetree. The Navajo Nation has been exploring other options for our detention facilities. But one thing is paramount, and that is that our program, as Ms. Juan-Saunders had mentioned earlier, is 638. We do have a 638-contract. We have been severely underfunded through that contract to even maintain what we have.

So as we look at options, one of them is a bond option that the Navajo Nation is exploring, and that has yet to even come before the full Navajo Nation Council for approval. But from the Division of Public Safety for Navajo, we are exploring other options for funding, but we would like to work with our trustee, the BIA, to find out how we might be able to get or reorganize some of the funding that they have there to meet our needs on Navajo. Thank you.

The CHAIRMAN. Thank you.

Senator Inouye, did you have further questions?

Senator INOUYE. All I can say is, once again this has been the most depressing hearing I have participated in. I can assure you that we will do our very best.

My only regret is that our colleagues are not here. They should have heard this.

The CHAIRMAN. I think so, too. The numbers you expressed are something, as one of the panelists mentioned, are like a third world country. It is hard to believe that those problems could actually exist in a country that can fly to the moon or provide miracle drugs worldwide for people who are in poor health, or things of that nature. It is just phenomenal numbers.

But as with the other panels, I would request if you have some specific suggestions about what we might frame up. I understand that the lack of resources, that is, money, is always a problem and will probably continue to be, with a very fast birth rate in Indian country, but there might be something we can do that is concrete and advantageous to tribes. If you would maybe submit some suggestions to staff, I certainly would appreciate it.

Thank you again. We will keep the record open for two weeks for any additional comments from our panelists or anybody in the audience, and we may submit some questions in writing to have you answer.

Thank you. This hearing is adjourned.

[Whereupon, at 11:45 a.m., the committee was adjourned, to reconvene at the call of the Chair.]

APPENDIX

ADDITIONAL MATERIAL SUBMITTED FOR THE RECORD

PREPARED STATEMENT OF HON. BEN NIGHTHORSE CAMPBELL, U.S. SENATOR FROM COLORADO, CHAIRMAN, COMMITTEE ON INDIAN AFFAIRS

Good morning and welcome. This morning the committee is conducting an oversight hearing on "Issues and Problems Related to Conditions of Tribal Detention Facilities".

Several weeks back this matter was splashed across the pages of major newspapers—such as USA Today—across the country. The articles discussed the ongoing Federal probe into tribal prison deaths that, as we now know, has revealed instances of inmate abuse, prison mismanagement, neglect, escapes, deaths, attempted suicides, inhumane conditions, overcrowding, as well as safety issues, staffing shortages, inmate access to weapons and poor prisoner monitoring and supervision

In fact, one story reported that the lack of prison monitoring resulted in the tragic death of a 16-year-old girl in Oregon.

This situation is inexcusable and should not be happening.

In April 2004, the Inspector General of the Department of the Interior issued an interim report on the dire conditions and operations of these facilities. In its report, the Inspector General discussed the many problems associated with these detention facilities and made four recommendations to be implemented immediately to prevent further life-threatening situations.

The Inspector General's report does not place the physical condition or operation of these facilities in a good light and justifies immediate action.

In order to determine exactly what is happening and what we can do about it, this morning the committee will hear from witnesses from Federal agencies and Indian tribes to share their thoughts and experiences with us.

I thank all the witnesses for appearing today and I look forward to hearing their testimony as well as any recommendations they may have to improve this situation.

PREPARED STATEMENT OF HON. TOM DASCHLE, U.S. SENATOR FROM SOUTH DAKOTA

Good morning, Mr. Chairman, Mr. Vice Chairman, and members of the committee. As many of you know, USA Today recently reported that Federal investigators have uncovered evidence of abuse, neglect, and inhumane conditions in Native American prisons and jails. This troubling report suggests that the conditions in Indian detention facilities are not improving, and, in fact, appear to be getting worse. It is my hope that this hearing will help to shed additional light on these allegations, and lead to solutions to improve conditions in facilities across Indian country.

According to recent statistics, from the Department of Justice report on Indian jails and prisons, there are 70 detention facilities in Indian country, supervising approximately 2,100 inmates. Many of these facilities are in an appalling state of disrepair, and face problems that range from overcrowding and understaffing to sheer neglect and abuse.

According to the most, recent statistics from the Department of Justice, over onehalf of all detention facilities in Indian country were operating at 100-percent capacity in 2002, and 19 were operating at 150-percent or higher capacity. Of those 19, three are located in my State of South Dakota: Rosebud's Medicine Root Detention Center, operating at 250-percent capacity; Crow Creek's Fort Thompson Jail, operating at 242-percent capacity; and the Pine Ridge Correctional Facility, which is operating the correctional facility.

ating at a staggering 400 percent of its capacity.

Inmates in South Dakota's BIA facilities are housed in dilapidated buildings and are forced to endure extraordinarily harsh conditions. Even though the Lower Bruletribal detention facility was condemned by the BIA in 1987, it was still being used to house inmates as recently as 2 years ago. Because the new facility is still under construction, Lower Brule prisoners are sent 13 miles away, across the Missouri River, to the Crow Creek facility in Fort Thompson. Because there aren't enough BIA officers to transport them back to Lower Brule, detainees released from Crow Creek are forced to make the return twin to Lower Brule on foot. It is shocking Creek are often forced to make the return trip to Lower Brule on foot. It is shocking that this is allowed to happen in South Dakota, which routinely experiences harsh winters and sub zero temperatures. Moreover, the Fort Thompson facility is in equally bad shape. One person serves as both police dispatcher and detention officer in a facility that houses up to 30 prisoners.

These conditions have a devastating impact on prisoners. Nationally, between July 1, 2001, and June 30, 2002, 282 inmates in tribal jails attempted suicide, up from 169 the previous year. In the last 5 years, the number of admissions rose 32 percent, and the annual number of attempted suicides more than doubled from 133 to 282. On Crow Creek, which encompasses most of one of the most impoverished counties in the United States and experiences inordinate suicide rates among its

general population, several suicides have occurred in the local jail.

Even more troubling, inadequate detention facilities pose a serious threat to the surrounding communities. With a limited number of officers responsible for large inmate populations, the risk of prisoner violence—against both prison staff and, in the event of an escape, local citizens is much greater. Moreover, the culture of neglect and abuse found in many of our Indian jails is indicative of broader trends within the communities. The Crow Creek jail doubles as a suicide watch center for troubled teens, since there is nowhere else in the community to take them. Several Emergency Medical Technicians [EMT's] and law enforcement personnel have either resigned, or are on the brink of resigning, due to the stress of the situation. Law enforcement officials are at a loss about how to address this disturbing pattern, and are overwhelmed by the feelings of hopelessness that accompany it.

Clearly, the impact that overcrowding, dilapidated conditions, and neglect is having on inmates in these facilities, as well as local communities, is reaching a critical mass-both in South Dakota and across the Nation-and we must act now to reverse the trend. While addressing the problems that exist in jails and prisons clearly isn't the whole answer, such an approach will meet a critical need in Indian country, and will represent an important step toward increasing public safety and reduc-

ing incidences of abuse and neglect.
We can start by increasing funding for BIA facilities. Unfortunately, this Administration has demonstrated a complete unwillingness to give Indian detention facilities the resources they need, and has actually reduced funding for jails and prisons in Indian country. It wasn't always so bad. Under the Clinton Administration, then-Attorney General Janet Reno created the Department of Justice-Department of Inte-rior Indian Law Enforcement initiative with the objective of creating an effective way to address law enforcement, facilities, juvenile justice, and rehabilitation efforts in Indian country. Although funding for these programs—which increased under the Clinton Administration and was consistent until the fiscal year 2002 appropriations cycle-was not enough to meet all of Indian country's needs, the initiative represented an unprecedented step toward addressing some of these problems.
Unfortunately, the current Administration, while budgeting hundreds of millions

of dollars for Federal prison construction, has proposed eliminating the tribal facility program for the second year in a row. While Congress appropriated \$35 million per year for construction of BIA detention facilities between 2000 and 2002, we appropriated only \$2 million in fiscal year 2004. Now, with an even tighter budget to work with, the outlook for this year is especially bleak, and conditions at BIA facili-

ties are likely to get even worse.

For too long, we have neglected our obligations to Native Americans. We are seeing the effects of that neglect in South Dakota. These are once again examples of the abrogation of the trust responsibility by the Federal Government to the tribes

We need to do a better job funding Indian detention centers, and we need to do more to address public safety, tribal courts, and rehabilitation efforts. We cannot ask tribes to choose between funding crisis intervention and law enforcement. We cannot force tribes to make the choice between funding education and after-school programs for their children, and repairing cracked walls and inoperable surveillance cameras in their jails.

While national rates are the lowest in years, crime on Indian lands continues to rise. Particularly disturbing is the violent nature of this crime; violence against women, juvenile and gang crime, and child abuse remain serious problems. The Bureau of Justice Statistics. reports that American Indians experience the highest crime victimization rates in the Nation—almost twice the national average.

Mr. Chairman, the issues we are discussing today are of critical importance. If this were happening in any other part of the country, it would be met with public outrage and swift Government action. However, in Indian country, it is met with silence and reduced funding. For the safety of our Indian people and the well-being of their communities, we must take action.

I look forward to working with this committee, and other relevant committees, to address these important issues.

PREPARED STATEMENT OF EARL E. DEVANEY, INSPECTOR GENERAL, DEPARTMENT OF THE INTERIOR, WASHINGTON, DC

Mr. Chairman and members of the committee, I want to thank you for the opportunity to address the committee this morning concerning the state of detention facilities in Indian country.

In September 2003, my office began an assessment of Indian country detention facilities. I initiated this assessment following a conversation with the Chair of the Attorney General's Advisory Committee on Indian country, U.S. Attorney for the District of Minnesota, Thomas Heffelfinger, who had expressed his general concerns to me about the overcrowding and poor conditions of Indian country jails. I then discovered that these same concerns had been articulated for years by the Department of Justice in numerous reports. My office had also been receiving unofficial reports of appalling conditions at the detention facilities in Indian country. With all this information, I felt compelled to address these concerns immediately.

We selected a team of seasoned investigators and auditors to visit a predetermined number of facilities and collect information about their management and operation. Our focus was on whether the funds designated for Indian country detention facilities were being properly expended and whether these facilities were safe and secure.

I would like to point out that we began our assessment well before the confirmation of the present Assistant Secretary for Indian Affairs, and prior to any of the recent media disclosures of allegations made by a former BIA law enforcement official. While we have completed all our planned site visits, we have not finished our analysis of the funding issues or BIA's management of the Detention Program. However, given the committee's interest in this issue, I will gladly summarize our findings, thus far, and share with the committee the same concerns I shared with Secretary Norton in April of this year when I gave her an interim report on the deplorable conditions we were finding at some of these facilities. Thus, my report to her then and to you today, focuses primarily on deaths, attempted suicides, escapes of inmates and officer safety issues. While we have visited only 27 of the 74 detention facilities in Indian country, we assume that similar incidents have occurred at other detention facilities. Therefore, we believe it is imperative that BIA takes immediate action to alleviate these potentially life-threatening situations at all Indian detention facilities.

Under the Indian Law Enforcement Reform Act of 1990, BIA is required to provide law enforcement services on reservations. In addition, under the Indian Self-Determination Act, BIA provides funding to tribes for detention services. Of the 74 detention facilities in Indian country, 20 are operated by BIA's Office of Law Enforcement Services [OLES], 46 receive BIA funding for detention services under Public Law 96–638, and 8 are operated by tribes. Of the 74 facilities, 28 house adult inmates, 11 house juveniles, and 35 house a combination of both adults and juveniles.

For many years the BIA detention program has been characterized as drastically understaffed, underfunded, and poorly managed. BIA's Director of Law Enforcement has oversight authority for BIA-operated and 638-contract detention facilities. Until very recently the Director oversaw these facilities through six district commanders and with a three person detention staff at OLES Headquarters.

In most of the facilities we have visited, basic jail administration procedures are not followed and many detention managers and their staff have not received professional, certified training in detention procedures. In fact, BIA OLES officials admitted to us that none of their detention facilities "come close" to meeting BIA's standards for operation, which derive from nationally recognized detention standards. BIA's detention program is riddled with problems and, in our opinion, is a national disgrace with many facilities having conditions comparable to those found in thirdworld countries. Unfortunately, BIA appears to have had a "laissez-faire" attitude in regard to these horrific conditions at its detention facilities.

Based on our visits, we discovered that serious incidents are not always communicated up the chain of command. Our review of the Serious Incident Log maintained by the OLES detention program and a similar log kept by the OLES internal affairs unit revealed that many of the incidents we identified occurring within the last 3 years were not contained in these logs. In fact, during this 3-year timeframe we found close to 500 serious incidents—including deaths, suicide attempts, and escapes that were either undocumented or not reported to the BIA/OLES.

The following are some examples of the serious situations we have identified so far in our assessment.

Deaths and Suicides: We learned of 10 deaths from the facilities we visited. Five of these deaths were suicides and five were non-suicides. Inexplicably, only five of these deaths had been reported to OLES. Among those deaths reported to OLES is the recent death of a 16-year-old student who died while in a detention cell at the Chemawa Indian School in Oregon. BIA operates the boarding school which has a detention facility. This case is under active investigation by my office in conjunction with the U.S. Attorney in Portland, OR.

In March 2003, a 15-year-old inmate hanged herself at the BIA-operated Zuni

In March 2003, a 15-year-old inmate hanged herself at the BIA-operated Zuni Adult and Juvenile Detention Facility in New Mexico. According to the facility director, correctional officers at the time were "off-line for approximately 30 minutes," handling other duties, and were not properly overseeing the cell population.

Similarly, at the BIA-operated Hopi Adult and Juvenile Facility in Arizona, an intoxicated inmate died of asphyxiation in 2003. According to the Acting Lead Correctional Officer, this occurred because the two officers on duty were "more interested in cleaning up the office" than observing inmates.

Attempted Suicides: Based on our findings, suicide attempts appear to be a regular occurrence at many of these facilities. At the BIA-run Northern Cheyenne Detention Facility in Montana there have been an alarming 41 suicide attempts within the last 3 years. Only two of those incidents were actually reported to the OLES.

At many of the facilities, we found multiple suicide attempts made by the same inmate. For example, during 2001, an individual detained at the Shiprock facility in New Mexico attempted to hang himself seven times using articles of clothing or towels left in the cell. The correction officer's response was quite elementary—if the inmate tried to hang himself with his socks, they took his socks away; if he tried to hang himself with his towel, they took the towel away—until finally the inmate was left in his cell without any clothing.

Prisoner Escapes: For the most part, the correctional officers at these facilities convey stories of prisoner escapes with an air of casual inevitability. In fact, our impression is one of collective acceptance. In our interviews, correctional officers who discussed escapes also told us that it is simply not possible to prevent inmates from escaping. Since the majority of these facilities often function with only a single officer on duty, officers explained that they simply cannot "keep an eye" on everyone. In addition, we found that some facilities do not notify local law enforcement of prisoner escapes. This is not only disconcerting, it is irresponsible to allow escaped prisoners to travel freely in a community and surrounding areas while the local law enforcement authorities have no information about their escapes.

Physically rundown and deplorably maintained, many of the facilities provide ample opportunity for escape. At one facility, the chain-link fence surrounding the outdoor recreation yard was held together and locked by a set of handcuffs because the inmates had learned the combination to the cipher lock on the gate. While many of the recreation yards at these facilities are fenced-in and crowned with barbed wire, there seems to be a universal acceptance among the correctional officers that if inmates want to climb over the fence and escape, they will.

From weakened and deteriorating locks on cell doors to broken windows in inmate dormitories, the interior of many of these facilities is in extremely poor condition and therefore does nothing to deter prisoners who set out to escape. For example, the wire-meshed windows in many of the cells at the White Buffalo Youth Detention Center in Montana are loosely encased in a crumbling wall and, with the application of some pressure, can be easily removed from their housing. According to the acting director at the detention center, these "removable windows" have, in the past, provided a vehicle of escape for a number of detained youths.

Perhaps even more disturbing than the actual circumstances and frequency of inmate escapes at these facilities are the lack of response and importance placed on these incidents by those working at the facilities, both correctional officers and facility directors, alike. At the Shiprock Adult detention facility in New Mexico, one officer chuckled in response to our question about escapes, and said, "Oh yeah, they happen." She then said that a prisoner had escaped from her in June 2003, on foot and in ankle-shackles while she was ushering a line of prisoners from the facility to the courthouse across the courtyard. Since she was the only officer on duty at the time, she said that she could not pursue the fleeing inmate and leave the other prisoners unattended. The officer told us that to the best of her knowledge that prisoner had not yet the out any other ded. oner had not yet been apprehended.

Officer Safety: One of the most common problems we found while visiting these facilities is lack of staffing. In many cases, having only one correctional officer on duty per shift is not unusual; it is common practice.

At Mescalero in New Mexico, a female correctional officer was working alone when she was confronted at knife-point by a former inmate who entered the facility through an unlocked door. Tragedy was averted when the officer locked herself into a detention cell. An inmate at the jail convinced the intruder to leave the officer

alone, while a second inmate summoned the police.

The San Carlos facility in Arizona has only four correctional officers on staff to operate what they feel is an overcrowded facility. To address this situation, the facility has placed a 24-hour, 7-day-a-week "lockdown" on inmates. Although lockdown is not unusual as a short-term solution for an acute problem in a detention facility, it could lead to an unsafe and dangerous environment long-term. At San Carlos, a detention officer on duty has no one for back up if a medical emergency or conduct problem arises. When an officer is working alone, he or she must either wait for assistance or act independently, both of which risk placing themselves or inmates

in a potentially life-threatening situation.

At the Blackfeet facility in Montana, staff told us there is never more than one correctional officer on duty. Furthermore, twice a week, the officer on duty also functions as the facility cook to prepare inmates' meals, leaving the facility unsupervised during meal preparation time. At this same facility, one of the dispatchers said that her husband, a correctional officer at the facility, had been working alone and was attacked by an inmate. According to the dispatcher, the sound of the other inmates banging on doors was the only thing that alerted her to the incident and prevented a potential fatality. Unfortunately, this incident does not appear to be an exceptional case; the BIA district commander told us, "Every officer here has been

assaulted.

Aside from a lack of officers on staff, the current officers at these facilities are, for the most part, poorly trained. This lack of training not only hinders the officers' ability to properly document incidents and follow standard procedures, but also leaves the officers unprepared to prevent physical harm that may be targeted against them or against inmates. In fact, one district commander stated, "We've never received any training on how to operate a detention facility." When asked if his facility followed BIA standards, the commander quipped, "Most BIA standards can't be met, so why even try?

In addition to officer safety, the safety of the inmates themselves must be considered. Officers who are improperly trained or who have not undergone thorough background investigations may become a liability. Recently, a correctional officer working at the White Buffalo Youth Detention Center in Montana was convicted of raping a 17-year-old female inmate while transporting her from the facility to re-

ceive medical treatment.

During my discussion with the Secretary in April, I made a number of recommendations to her including instituting new reporting protocols and the prompt investigation by BIA of any serious incident such as those I have cited today. I was pleased by her immediate response to my briefing. Following our meeting, she tasked Associate Deputy Secretary James Cason along with Assistant Secretary David Anderson to begin addressing the concerns I raised. To assist them in this effort, she also made a request to DOJ for an experienced corrections professional from the Bureau of Prisons to be detailed to BIA. That person is now on board and I detect a new sense of urgency about these concerns at BIA.

Our final report, which we hope to have finished at the end of the summer, will provide the Department with additional findings and recommendations regarding funding, detention standards and policies, detention facility maintenance, health care and social services at the detention facilities, and training and hiring practices

of detention personnel.

The responsibility for the conditions and failings we have found at Indian detention facilities can not be attributed to any particular individual or Administration. Some of these problems are decades old. Thus, the solutions will not be easy to achieve and may take considerable time, effort and funding. However, nothing less than a Herculean effort to turn these conditions around would be morally accept-

PREPARED STATEMENT OF DARREL MARTIN, PRESIDENT, FORT BELKNAP INDIAN COM-MUNITY COUNCIL OF THE GROS VENTRE AND ASSINIBOINE TRIBES, FORT BELKNAP AGENCY, MT

Greetings from the Gros Ventre and Assiniboine Tribes of the Fort Belknap Indian Community, Montana. On behalf of the tribal government of the tribes, I thank you for the opportunity to provide testimony to this committee on the important topic of tribal detention facilities.

I am an enrolled member of the Gros Ventre Tribe, and serve our tribal council as the tribal president. The Fort Belknap Indian Reservation is located in North Central Montana, approximately 200 miles north of Billings, the largest city in Montana. Fort Belknap Agency, the location of tribal headquarters, lies about 150 miles porthead of Crot Follo MT. The closest city with a service of Crot Follo MT. The closest city with a service of Crot Follo MT. northeast of Great Falls, MT, the closest city with a certified juvenile detention fa-

Adult Detention Facilities. At Fort Belknap, a single tribal jail provides adult detention facilities to over 5,000 enrolled members. The jail was recently reviewed, was determined deficient and can no longer house inmates for more than 72 hours. Inmates needing to be detained are housed at the Blaine County jail, a 1-hour drive from some of our reservation communities, or at facilities on the Fort Peck Reservation, at least a 3-hour drive from Fort Belknap Agency.
Our jail, reconstructed from other facilities about 35 years ago, is located at Fort

Belknap Agency in the northern part of our Reservation. It was condemned 10 years ago, as not meeting jail standards. It was rehabilitated less than 10 years ago, only

to be redetermined as deficient in the last 6 months.

Our police department has had to transport prisoners on a regular basis to other facilities. The cost of transportation has been significant, as it often requires overtime for officers to shuttle prisoners back and forth on a drive that can be 6 hours round trip in good weather. Our winters are long and often bitterly cold. In poor weather, trips can be delayed or extended to as long as 10 hours, round trip.

The lack of a local jail has caused logistical difficulties for our tribal court. The transportation of prisoners to other jails has continued to cause budget difficulties for our police department. Paying for offsite detention has similarly caused budget difficulties for our police department. The lack of a local jail has affected detention decisions by both our police department and tribal court judges. Because of the difficulties in detaining individuals, it happens that people are released who should be detained. This causes risks to the community.

The families of detainees are often unable to travel the distances required to visit family members. Counseling alternatives available on reservation are seldom avail-

able at distant locations.

In the last 35 years, we have watched as every other tribe in Montana has had a new jail facility built. We don't begrudge such facilities. Other tribes certainly have needed jails. But Fort Belknap has equally needed a facility, and has only been able to secure moneys to rehabilitate starkly inadequate buildings. Those short term fixes have not worked. We need a long-term solution.

We can fully appreciate that money is hard to come by right now. Nevertheless, basic law enforcement and the ability to detain people who break the law is the most basic of governmental functions. We urgently call on Congress to help us in

this effort

Juvenile Detention Facilities. We have never had a juvenile detention facility on our reservation. For several years, we have contracted to place youth in the Blaine County youth detention facility, about 25 miles away. However, this facility will close shortly, as it does not meet state standards. It has not provided counseling and treatment to youths detained.

The closest certified facility is located in Great Falls, MT, approximately 150 miles from Fort Belknap Agency, and nearly 200 miles from the southern communities on our reservation. These distances are simply unworkable in providing ade-

quate services to youth and their parents.

Limited funding exists to detain youths. Limited funding exists to provide counseling and treatment to youth and their families. Many families simply don't have the resources to travel to Great Falls to visit their children. For nearly 6 months of each year, traveling such distances is simply dangerous, because of cold weather and difficult roads.

We need a solution at Fort Belknap to detain youth locally. Providing timely, routine consequences to youth can make a difference in their lives. We urgently call on Congress to help us in this effort also. Thank you for your willingness to address these important concerns.

Prepared Statement of John Yellow Bird Steele, President, Oglala Sioux Tribe, Pine Ridge, SD

The Oglala Sioux Reservation is over 2 million acres in size and has a population of approximately 50,000. We currently have three detention facilities, one of which is a juvenile facility. Our facilities are tribally operated under a Pub. Law 93–638 contract.

The adult detention centers in Kyle and Pine Ridge contain 24 and 22 beds, respectively. The Pine Ridge Correctional Facility is currently staffed by nine correctional officers, one lead officer, one facility administrator and two cooks. We house both male and female inmates with an average daily occupancy rate of 33 inmates per day, therefore overcrowding is a constant problem. This is particularly true on the first of every month throughout the year, when 100 arrests a day occur. The overcrowding often forces us to allow offenders to go free. We are drastically underfunded which, in addition to causing overcrowding, has burdened us with inadequate facilities and problems which arise from being understaffed. Our juvenile facility is understaffed due to lack of adequate funding and our inmate to staff ratio at the Kyle Correctional facility is 35 to 1. These problems have translated into our inability to properly secure the facilities and the inmates.

Our facilities are inadequate. Because the volume of inmates is greater than the maximum capacity of the facilities, the buildings have deteriorated so that they are in disrepair and suitable for condemnation. At the adult facilities we are unable to provide adequate drinking water or bathroom facilities. Since we do not have sufficient shower facilities, we must move inmates from cell to cell to provide them access to a working shower. This is both time-consuming and poses security threats particularly in regard to officers' safety. Additionally, we have facility maintenance deficiencies such as our ventilation system which breaks down often, particularly in the summer months, so we are forced to use fans in the cell doorways. This too has affected our ability to maintain a secure environment. At the Pine Ridge Correctional Facility, we are plagued with inadequate lighting, no sprinkler system, and no exercise or outdoor areas for the inmates.

Inadequate facilities and under-staffing have led to a number of escapes. From January 1, 2004 to May 31, 2004, 30 individuals have been charged with escape from the Pine Ridge Correctional Facility. These escapes have occurred both inside the facility due to a lack of a secure perimeter fence and inoperable gate, and outside the facility during the transportation of inmates to court or to obtain health care. Any one of these inadequacies alone is cause for concern, and yet we must deal with all of them on a daily basis.

Equally distressing is our inability to provide onsite rehabilitation services such as alcoholics anonymous, counseling, and traditional ceremonies. Since alcohol is illegal on the reservation, we have a high number of prisoners who are arrested for intoxication, but no way to provide treatment.

To address these problems, the Oglala Sioux Tribe participates in the "Circle Project," a Department of Justice Demonstration Program for enhancing tribal criminal justice programs. The Circle Project is designed to introduce a multi-disciplinary approach to unique and long-standing problems of high alcohol-related crime rates on Reservations such as Pine Ridge. As part of the Circle Project, the tribe has enhanced its community policing program and improved the administration of its Public Safety Department, It has also designed and is receiving construction funds from Department of Justice [DOJ] for a multi-disciplinary direct-supervision corrections facility on the reservation. The new facility shall combine in-patient alcohol counseling with detentions, for the first time. It will be for sentenced individuals only. Since the new facilities. Therefore, overcrowding will continue to be a problem and we will be forced to transport/relocate inmates to other detention facilities in other States thereby increasing our costs associated with housing and transportation. Additionally, we are forced to use new facility transition money to supplement existing facilities. Without this source of funding we would be forced to cut much-needed current detention staff.

While construction efforts progress, our growing concern is the lack of funds for the facility's operation. The state-of-the-art facility cannot be left to sit empty or to run inefficiently. An estimated \$2,176,395.00 is needed for detention operations and facilities maintenance. This funding would flow through the BIA's Office of Law Enforcement Services and Office of Facilities Management and Construction budgets. The BIA supports our estimated costs and has requested an increase in their appro-

The BIA supports our estimated costs and has requested an increase in their appropriations for these purposes.

We also need funding for the operation of the detoxification aspect of the facility. Our immediate need is the hiring of a Detox/Treatment Director to develop facility operating standards; the estimated cost is \$124,265.00. We also need overall detox/treatment operating funds to cover staff (including the aforementioned Director) and program costs; the estimated annual cost totals \$1,602,227.00. For efficient and continuous convertions this funding must be required each year new terms therefore.

tinuous operation, this funding must be recurring each year, not grant based, and could be earmarked in the SAMHSA budget.

We urge Congress to look at the need for overall increases in the national budget for these issues. We are in a crisis situation. Tribes submit their unmet needs each year, but they are only addressed in a piecemeal manner. Long-term change is needed in the area of Indian Detention Facilities and increased funding is a necessary first step in meeting our specific needs, of course, but also in the overall national budget for detention center funding. We look forward to working with Congress to address these important issues.

STATEMENT

OF

DAVID W. ANDERSON

ASSISTANT SECRETARY - INDIAN AFFAIRS
U.S. DEPARTMENT OF THE INTERIOR
AT THE HEARING
Before the

COMMITTEE ON INDIAN AFFAIRS UNITES STATES SENATE ON THE INDIAN TRIBAL DETENTION FACILITIES June 23, 2004

Good morning, Mr. Chairman and Members of the Committee. I am David Anderson, Assistant Secretary – Indian Affairs. Thank you for inviting me to speak with you today about the Administration's vision to improve the Bureau of Indian Affairs' (BIA) detention center program. Recent events have highlighted the need to continue to implement improvement, in addition to those changes already under way. The ultimate goal is to improve the delivery of services to tribes and individuals who are serviced by BIA owned and funded detention facilities.

Until the 1960's, jail construction on Indian lands was very limited. Department of Justice Law Enforcement Administration Assistance grants were provided for construction of jails in Indian country. Many of these facilities, now forty years old, are still in operation today. Older detention centers present many challenges, such as ongoing maintenance and needed improvements to these aging, high-use facilities.

There are seventy-four confinement facilities, detention centers, jails, and other facilities – to be referred to in this testimony as "detention centers" – operated by tribal authorities or the Bureau of Indian Affairs in Indian Country. Thirty-nine facilities are BIA owned. Nineteen facilities are BIA operated. Three of these detention centers do not house inmates and are used for Law Enforcement offices. The remaining thirty-five detention centers are owned and operated by tribes, either independently or through P.L. 93-638 contracts or self-governance compacts. All of the Indian detention facilities are designed for short-term detention and have difficulties accommodating long-term sentences.

In February 2004, when I became Assistant Secretary – Indian Affairs, I was briefed on Indian country detention programs and the ongoing challenges related to the physical conditions and management structure. At this briefing I immediately determined that critical improvements were needed, in addition to those that were already underway. Since February, the BIA has taken immediate and proactive steps to identify the deficiencies at the detention centers and to take appropriate action.

Within forty-eight hours of my February briefing, I assigned key personnel to be responsible for identifying and addressing detention center issues. Thirty-nine of the BIA owned detention centers were inspected for operational, health, and safety concerns by March 10, 2004. The twenty worst detention centers that are owned by the BIA were also inspected for structural, plumbing, electrical and environmental concerns by March 10, 2004. The remaining nineteen were inspected for structural, plumbing, electrical and environmental concerns by June 1, 2004. Inspections were completed in compliance with BIA handbooks that are based upon national standards such as American Correctional Association Standards, uniform building codes, National Fire Life - Safety codes, and all pertinent environmental standards.

The thirty-nine BIA owned detention centers were inspected to determine necessary repairs, whether minor or major. All needed repairs are entered into the BIA's Facility Management Information System for tracking of project completion and full financial accountability. Facilities staff members were instructed to immediately make low cost repairs.

This year, 2004, we have dedicated a total of about \$6.4 million to address the normal annual facilities operations as well as facilities, safety and environmental deficiencies concerns. Approximately \$4 million of this amount will be used for repair of the deficiency items and the balance will be used for operational costs such as utilities and staffing. About 84% of this funding has already been distributed to the detention centers for completion of the identified repairs and normal annual operating expenses. In addition, about 40% of the immediate repairs have been completed.

The Office of Facilities Management and Construction and the Office of Law Enforcement Services have already begun corrective actions to reduce threats of harm to life and property. These actions include: (1) closing unsafe facilities; (2) revising the procedures for reporting and reviewing serious incidents; (3) inspecting Indian Country detention centers for compliance with national law enforcement, facility, safety and environmental standards; (4) initiating capital improvements to correct imminently hazardous or mission critical deficiencies; (5) identifying funds to address immediate shortfalls in law enforcement staffing and operations for BIA-funded facilities; and (6) standardizing detention facility inspections.

In 2003, the BIA developed and implemented a strategy for improving the corrections program. As part of this strategy, a Detention Specialist Position was created at the law enforcement central office to provide assistance to staff for its implementation. I have made this issue a priority. Within the past four months, I have taken critical steps to continue to improve the detention program management system. I have further assigned a person within the Office of Facilities Management and Construction to work only on oversight of detention center projects. I have directed the hiring of District Detention Specialists for the purpose of providing improved on site assistance for Indian communities.

I have also directed the BIA to enter into partnerships with outside entities in order to improve the overall management of the Indian Country detention and corrections program. One such partnership is with the Bureau of Prisons. The Bureau of Prisons will evaluate the Indian Country detention and corrections program. This summer, within a four to five week period, representatives from the Bureau of Prisons will visit both BIA and tribal detention centers.

In the near future, a multi-disciplinary Federal-Tribal workgroup, which will include representatives from the Bureau of Prisons, will develop a performance-based management model to respond to the needs of Indian country. This model will also incorporate measurable outcome-based performance goals that will improve the management of misdemeanant populations in Indian country detention centers. Additionally, we envision the model will put into practice nationally-recognized standards and institutionalized systems of control to ensure compliance with program standards and promote best practices.

We are also working closely with the Department of Justice to implement vital Indian Country law enforcement best practices. For example, twenty new detention centers, funded by Department of Justice grants, have been constructed in Indian country and we have developed plans to adequately staff, operate and maintain these new facilities.

The BIA plans to work with tribes to find solutions to the long-term challenges of providing safe conditions at Indian country detention centers. The Office of Law Enforcement Services is working cooperatively with tribes and tribal law enforcement to: reduce overcrowding, place juveniles in appropriate facilities, develop uniform management standards, and gather detention statistics. These efforts are already underway. Based on our success thus far, I am optimistic about our ongoing and future improvements in Indian Country detention centers.

This concludes my prepared statement. I will be happy to answer any questions you may have.
