JUNE 1971

POLITICAL BROADCASTING SURVEY-1970

INTRODUCTORY NOTES

1. The data in this report is based upon responses to a questionnaire sent to all broadcast licensees. Every reasonable attempt was made within the time constraints involved to eliminate errors made by stations in the designation of candidates for major offices (Governor, Lt. Governor, U.S. Senator, U.S. Representative). These efforts included contacting every State for an official list of candidates. Not every State was able to comply with this request. Therefore, some candidates whose proper designation was not readily ascertainable either from lists furnished by the States or other available published sources may still be classified erroneously as major candidates.

2. Although reference is made to Cablecasting and CATV systems in some of the tables, the FCC did not require cable television systems to file reports in 1970. All data shown are for broadcast activities only.
