

**THE SECRETARY OF VETERANS AFFAIRS  
WASHINGTON**

May 10, 2024

The Honorable Jerry Moran  
Ranking Member  
Committee on Veterans' Affairs  
United States Senate  
Washington, DC 20510

Dear Senator Moran:

In accordance with the requirements of the Commander John Scott Hannon Veterans Mental Health Care Improvement Act of 2019, P.L. 116-171 § 201(k)(1), enclosed is the Department of Veterans Affairs (VA) interim report on the Staff Sergeant Parker Gordon Fox Suicide Prevention Grant Program (SSG Fox SPGP). SSG Fox SPGP is uniquely positioned to help tailor resources to meet the diverse needs of Veterans in their communities, while enhancing partnerships and building community capacity to deliver suicide prevention services. VA remains committed to honoring the Nation's Veterans by ensuring a safe environment to deliver exceptional health care.

In addition, as required by 38 U.S.C. § 116, a statement of cost for preparing the report is included. This report has been sent to the leaders of the House and Senate Committees on Veterans' Affairs.

Sincerely,

A handwritten signature in black ink, appearing to read "AmAyl", written over the printed name Denis McDonough.

Denis McDonough

**THE SECRETARY OF VETERANS AFFAIRS  
WASHINGTON**

May 10, 2024

The Honorable Mark Takano  
Ranking Member  
Committee on Veterans' Affairs  
U.S. House of Representatives  
Washington, DC 20515

Dear Representative Takano:

In accordance with the requirements of the Commander John Scott Hannon Veterans Mental Health Care Improvement Act of 2019, P.L. 116-171 § 201(k)(1), enclosed is the Department of Veterans Affairs (VA) interim report on the Staff Sergeant Parker Gordon Fox Suicide Prevention Grant Program (SSG Fox SPGP). SSG Fox SPGP is uniquely positioned to help tailor resources to meet the diverse needs of Veterans in their communities, while enhancing partnerships and building community capacity to deliver suicide prevention services. VA remains committed to honoring the Nation's Veterans by ensuring a safe environment to deliver exceptional health care.

In addition, as required by 38 U.S.C. § 116, a statement of cost for preparing the report is included. This report has been sent to the leaders of the House and Senate Committees on Veterans' Affairs.

Sincerely,

A handwritten signature in black ink, appearing to read "Annyl", written over the printed name Denis McDonough.

Denis McDonough

## Introduction

The Commander John Scott Hannon Veterans Mental Health Care Improvement Act of 2019, P.L. 116-171 § 201 requires the Department of Veterans Affairs (VA) to implement a three-year community-based grant program to award grants to eligible entities to provide or coordinate the provision of outreach, suicide prevention services, and connection to VA and community resources for eligible individuals and their families. This program is known as the Staff Sergeant Parker Gordon Fox Suicide Prevention Grant Program (SSG Fox SPGP). Congress authorized a total of \$174 million to be appropriated for Federal fiscal years (FY) 2021 through 2025 for the implementation of this grant program. Section 201 of the Hannon Act specified 1) which entities are eligible for grants; 2) specified those individuals eligible to receive suicide prevention services; 3) defined the suicide prevention services that may be provided; 4) described grant application requirements; 5) explained instances in which eligible entities must refer individuals to VA for additional care; and other requirements (38 C.F.R § 78.115).

The SSG Fox SPGP began on September 19, 2022, when VA awarded \$52.5 million to 80 community-based organizations in 43 states, the District of Columbia, and American Samoa. Grantees have the opportunity to apply to renew grant awards from year to year throughout the length of the program. Award amounts vary but do not exceed \$750,000 per year.

The grants are a core aspect of VA's 10-year National Strategy for Preventing Veteran Suicide (2018).<sup>1</sup> The SSG Fox SPGP also supports and aligns with the priority goals in the 2021 White House's strategy on Reducing Military and Veteran Suicide.<sup>2</sup> Given the multiple factors associated with suicide, preventing suicide requires a comprehensive public health approach that harnesses the full breadth of the Federal Government in close coordination with states, territories, tribes, and local governments, as well as collaboration with industry, academia, communities, community-based organizations, families, and individuals. Reducing suicide requires a long-term strategic vision and commitment designed to create and implement systemic changes in how we support Service members, Veterans, and their families across the full continuum of risk and wellness.

Grants are awarded to organizations that provide or coordinate suicide prevention services for eligible individuals at risk of suicide and their families, which may include one or more of the following:

- 1) Outreach;
- 2) Baseline mental health screening for risk;

---

<sup>1</sup> U.S. Department of Veterans Affairs. (2018) National Strategy for Preventing Veteran Suicide 2018-2028. [https://www.mentalhealth.va.gov/suicide\\_prevention/docs/Office-of-Mental-Health-and-Suicide-Prevention-National-Strategy-for-Preventing-Veterans-Suicide.pdf](https://www.mentalhealth.va.gov/suicide_prevention/docs/Office-of-Mental-Health-and-Suicide-Prevention-National-Strategy-for-Preventing-Veterans-Suicide.pdf)

<sup>2</sup> The White House. (2021). Reducing Military and Veteran Suicide: Advancing a Comprehensive, Cross-Sector, Evidence-Informed Public Health Strategy. <https://www.whitehouse.gov/wp-content/uploads/2021/11/Military-and-Veteran-Suicide-Prevention-Strategy.pdf>

- 3) Education on suicide risk and prevention to families and communities;
- 4) Provision of clinical services for emergency treatment;
- 5) Case management services;
- 6) Peer support services;
- 7) Assistance in obtaining any benefits from the VA that the eligible individual and their family may be eligible to receive and assistance in obtaining and coordinating the provision of other benefits provided by the Federal Government, a state or local government, or an eligible entity;
- 8) Nontraditional and innovative approaches;<sup>3</sup> and
- 9) Other services as defined by § 201 and approved by VA.

Baseline mental health screening for risk is the only required suicide prevention service for all grantees. Each grantee's program concept is comprised of a unique menu of approved services. These services are implemented in varied ways to meet the community's assessed needs and are focused upon VA's priority populations such as rural areas, Tribal lands, U.S. Territories, or other high-need communities.<sup>4</sup> Some grantees proposed nontraditional, innovative, or other services, such as equine assisted therapy, which were reviewed and approved by VA. Grantee program concepts vary by the type of eligible entity, such as State, Tribal or community-based entity. The proposed number of eligible individuals to serve varies in relation to the anticipated cost of delivering services, types of services offered, and the size and geographic location of the service area. It is noted that one to one comparison between grantees within this report is limited due to program concepts being tailored to each community. VA is evaluating the data to inform if, and what, future benchmarks are appropriate while retaining the program's ability to support innovative, culturally competent, and non-traditional approaches to reach at-risk Veterans who may otherwise not engage in care.

Most grantees began services in or around January 2023, needing to first adjust the services and budgets proposed in their applications to align fully with regulations, then complete the hiring and onboarding of staff, and write policies and procedures for local implementation of the grant program.

This report aims to provide early indicators of the program's reach and impact. Through September 2023, SSG Fox SPGP grantees reported over 16,500 distinct outreach efforts promoting the program to the wider community. Grantees have enrolled over 3,200 eligible individuals with an additional 864 individuals in the screening process at time of this data collection which corresponds to the first year (September 19, 2022-September 30, 2023) of program implementation. Approximately 4,250 individuals were

---

<sup>3</sup> Nontraditional and innovative services that were included in grants funded include Adaptive Performance, art therapy, creative arts, equine assisted therapy, family support circles, food security, healing touch therapy, mindfulness, moral injury education, music therapy, native: risking connections (Hawaiian), Alaska native cultural health and resilience gathering, outdoor recreation, recreation therapy, resilience strength training, service Dogs, Warrior PATHH, water sports, and yoga.

<sup>4</sup> Funding decisions reflect VA's authority to prioritize the distribution of grants to rural communities, tribal lands, territories of the United States, medically underserved areas, areas with a high number or percentage of minority and/or women Veterans and areas with a high number or percentage of calls to the Veterans Crisis Line (38 C.F.R. § 78.30).

deemed ineligible, primarily as they did not meet the program criteria for suicide risk and were referred out for services to mitigate their presenting issues. Grantees successfully intervened to provide over 300 emergency mental health referrals for those with signs of imminent risk. Additionally, 2,396 non-emergency mental health referrals were made for those on a pathway to risk, as the program takes an upstream approach to reach Veterans with some, but not necessarily acute and/or chronic, risk for suicide. The SSG Fox SPGP facilitates engagement with (and reduces barriers to) clinical mental health care and is unique in that most services are non-clinical. SSG Fox SPGP grantees have facilitated 3,441 social services referrals on behalf of participants. As the Nation continues to recognize, and as research evidence confirms,<sup>5</sup> social determinants of health which include economic hardship, unemployment, barriers to health care are drivers of suicide risk; the SSG Fox SPGP takes a critical step to acknowledge and meet the need for suicide prevention services beyond the clinical mental health continuum.

In March 2023, VA published the FY 2023 Notice of Funding Opportunity (NOFO) to announce the application period for the second round of grant awards. VA awarded \$52.5 million in grants on September 20, 2023, to 80 awardees in 43 states, Washington, D.C., American Samoa, and Guam.

- Seventy-seven awardees were renewals and 3 were new awardees, as 3 FY 2022 grantees declined to apply for or accept renewal.
- Twenty-one grantees serve tribal lands including Navajo Nation, Cherokee Nation, Choctaw Nation, Alaskan Natives, and others.

## **Report Language**

The Hannon Act requires that, no later than 18 months after the date of the first grant award, VA provide an interim report to the Committee on Veterans Affairs of the Senate and the Committee on Veterans' Affairs of the House of Representatives regarding the provision of SSG Fox SPGP community-based grants (P.L. 116-171 § 201(k)(1)). Additionally, VA is required to submit a final report no later than 3 years from the date of first award (September 19, 2025) and an annual report thereafter for each year in which the program is in effect (P.L. 116-171 § 201(k)(2)). This interim report addresses the mandatory components outlined in section § 201(k)(1)(B)(i-xii), organized into three sections:

- A. Grant Program Operations
- B. Assessment of Effectiveness
- C. Demographics of Participants

For purposes of this report, all definitions follow those noted in the NOFO and regulations (38 C.F.R, Part 78).

## **Methodology**

---

<sup>5</sup> U.S. Department of Veterans Affairs. (2023). *2023 National Veteran Suicide Prevention Annual Report*. <https://www.mentalhealth.va.gov/docs/data-sheets/2023/2023-National-Veteran-Suicide-Prevention-Annual-Report-FINAL-508.pdf>.

VA's Office of Mental Health and Suicide Prevention (OMHSP) initially partnered with the Behavioral Health (BH) Quality Enhancement Research Initiative's (QUERI) Rapid Response Team (RRT) in 2021 to develop the SSG Fox SPGP evaluation plans in alignment with the design of the program. We collaboratively developed two evaluation plans to guide the implementation of the grant management program and to monitor the grantees performance of work and outcomes, both in support of this Congressionally mandated and new grant management program. The evaluation plans were informed by statutory requirements and designed by and in consultation with a cadre of VA mental health and suicide prevention evaluation subject matter experts within OMHSP and the Central Arkansas Veteran Health System (CAVHS). The evaluation plan's methodology is representative of existing literature on feasibility pilot studies (Orsmond & Cohn, 2015) and the U.S. Government Accountability Office (GAO) guidance on pilot studies (U.S.GAO, 2016, 2022).

This interim report provides an overview of the implementation approach while outlining the methods used for assessment of effectiveness of SSG Fox SPGP, which will be presented in the final report.

Data were collected through 80 grantees from September 19, 2022, until September 30, 2023.<sup>6</sup> The MITRE Corporation provides VA with the mechanism for data collection, operating under a Federally funded research and development center services contract.

The data collected used a mixed methods approach suited to understanding both quantitative elements including the number of grantees or number of eligible individuals and qualitative elements such as narrative responses to questions on the grantee progress report aspects of the program. Data were analyzed using descriptive statistics to include frequencies, percentages, means, and ranges, as noted and where appropriate. Qualitative data were content analyzed using rapid template analysis by a team of master's level trained analysts.

Data collected from the grantees included the following:

- eligibility status, suicide risk, and psychosocial need to determine eligibility;
- psychometrically valid instruments and measures as determined by the Department to complete the required program evaluation;
- progress monitoring; and
- financial management and business audits.

These data are necessary and beneficial for program operations and management as required by section 201. Data were obtained and submitted monthly as part of the grantees' workflow in delivering suicide prevention services to participants (Appendix 2). VA has various efforts in place to minimize missing data from participants and grantees, such as making data collection user friendly, offering technical assistance for data collection, and minimizing the amount of data collected. Due to delays in the availability of the web-based data collection tool, data collection was achieved for this report's

---

<sup>6</sup> This end data point of the reporting period was chosen to comply with the timeline for Congressionally Mandated Report requirements, grantee funding periods, and to align with future Congressional annual reporting requirements.

timeframe via Adobe forms. The tool's release in November 2023 reduces burden and will improve data collection processes going forward. The tool tracks outreach, participant demographic data, services provided, and referrals made with the ability to assess potential best practices or technical assistance needed.

Additional data used in this report include qualitative data provided by grantees within biannual progress reporting; program management data specific to financial records; and other program data curated and maintained by the SSG Fox SPGP. For the qualitative data, grantees provide narrative responses to a series of questions that pertain to the operation of their programs. Data are qualitatively analyzed, summarized, and reviewed for program challenges and improvements, and are monitored over time by the SSG Fox SPGP. Quotes selected from this data for presentation in this report were chosen to illustrate the ongoing process of program development, implementation, and impact. Program management data includes each grantee organization's legal name, annual award amount and drawdown.

At the time of this report, the Department has not shared any of these data with partners. VA anticipates sharing the data as part of the Congressionally mandated report process to include future communications with stakeholders after publication of this report. VA has no anticipation of specifically working with certain identified partners to release data-specific information beyond what is included within this report. (§ 201(k)(1)(B)(vii)).

## Measures

The validated instruments were chosen by the SSG Fox SPGP in consultation with subject matter experts to align with program goals of improving mental health status, wellbeing, social support, and financial stability, and reducing suicide risk of eligible individuals and their families (§ 201(h)(2)). The measurement tools noted in Table 1 include those used to assess the effectiveness of the SSG Fox SPGP. A detailed description of the validated instruments and measures can be found in Appendix 3.

Table 1 below describes the validated instruments that are completed by participants at various times of engagement: 1) as part of determining eligibility for services (see Appendix 4); 2) as baseline screenings to inform the participants' suicide prevention service plans; and 3) participants complete the same screenings used at baseline when their services end. Five instruments are administered twice, at baseline and upon completion of the grantee program, while one instrument related to suicide risk, is administered once to determine program eligibility related to suicide risk level.

**Table 1: Validated Instruments and Measures**

Domain	Eligibility Screener
<b>Suicide Risk</b>	Columbia Suicide Severity Rating Scale (C-SSRS)
<b>Domain</b>	Instruments for Baseline and Post Screening
<b>Financial Stability</b>	Socio Economic Status (SES)
<b>Mental Health Status</b>	Patient Health Questionnaire (PHQ-9)
<b>Wellbeing</b>	Warwick-Edinburgh Mental Wellbeing Scale (WEMWBS)

	Generalized Self-Efficacy (GSE)
<b>Social Support</b>	Interpersonal Support Evaluation List (ISEL-12)

## **Interim Report Mandatory Components**

### **(A) Grant Program Operations**

This section provides information on VA and grantee operations costs to include the following elements required for the interim report:

1. Operating Costs: A detailed account of how the grant funds were used, including executive compensation, overhead costs, and other indirect costs. (section 201(k)(1)(B)(x)).
2. Grant Recipients: A list of grant recipients and their partner organizations, if any, that delivered services funded by the grant and the amount of such grant received by each recipient and partner organization. (section 201(k)(1)(B)(ii)).

#### **1. VA Program Operations Costs**

The grant program was designed after consulting with the Centers for Disease Control (CDC) and the U.S. Departments of Health and Human Services' Substance Abuse Mental Health Services Administration (HHS SAMHSA) in addition to reviewing VA's Homeless Program Office (HPO) grants management organization.

The 5-year budget for grants operations which includes VA executive compensation, total overhead cost and other indirect costs is \$173,676,243 and is reflected as total regulatory budget impact in Table 2 found on page 7. This includes the \$52.5 million awarded to grantees annually in FY 2022-24. Costs began in FY 2021 to support the regulation and program development.

**Table 2: SSG Fox SPGP Grant Operations Budget**

<b>FY</b>	<b>Full Time Employee (FTE) Salary and Benefits Costs</b>	<b>Travel Costs</b>	<b>Admin and Implementation Costs</b>	<b>Net Costs</b>	<b>Net Transfers: Grant Appropriations</b>	<b>Total Regulatory Budget Impact</b>
2021	\$7,133	\$0	\$1,978,059	\$1,985,192	\$0	\$1,985,192
2022	\$704,777	\$26,530	\$3,577,134	\$4,308,441	\$52,500,000	\$56,808,441
2023	\$973,408	\$32,573	\$3,796,532	\$4,802,513	\$52,500,000	\$57,302,513
2024	\$1,006,504	\$36,000	\$1,767,967	\$2,810,471	\$52,500,000	\$55,310,471
2025	\$1,040,725	\$36,000	\$1,189,901	\$2,266,626	\$0	\$2,266,626
All	\$3,732,547	\$131,103	\$12,309,593	\$16,173,243	\$157,500,000	\$173,676,243

Note: FY 2024 and 2025 reflects projected costs; all others actual.

**FTE Salary and Benefits:** To implement the grant program, VA hired six FTE staff to execute and oversee necessary operations. Positions are virtual with no leased space required. See Table 3 for the list of VA SSG Fox SPGP staff titles with General Schedule (GS) level and onboarding date.

**Table 3: VA Full-Time SSG Fox Suicide Prevention Grant Program Staff**

Position Title	GS Level	Onboarding Date
Director	GS-14	09/12/2021
Reporting and Correspondence Coordinator	GS-13	10/24/2021
Business Operations Manager	GS-13	01/30/2022
Grant Manager	GS-13	12/19/2021
Grant Manager	GS-13	02/28/2022
Administrative Coordinator	GS-9	05/05/2022

**Travel Costs:** VA staff travel expenses were \$0 in FY 2021, \$26,530 in FY 2022, \$32,573 in FY 2023, and then an estimated \$72,000 over 2 years (FY 2024-25). Travel expenses are comparable to those of a similar VA grant program: Supportive Services for Veterans and Families. Through December 2023, the FTE traveled to assist grantees with technical assistance through 12 individual grantee site visits, 2 regional meetings, and 2 national meetings. FTE traveled to provide oversight and strategic planning for grantee training, education, and program evaluation.

**Administrative and Implementation Costs:** The total administrative and implementation costs are estimated to be \$12,309,593 over 5 years (FY 2021-25), which are reflected in Table 2 above. Administrative and Implementation costs are based on four components: Information Technology- Grant Lifecycle Tracking System and Website, Operations- Payment Management System, Evaluations and Assessments, and Technical Assistance in training, grants management, monitoring/auditing. VA engaged in 7 service level agreements and contracts for a total cost of \$6,664,217 to ensure deliverables in these areas. See Table 4 below for details on the cost and purpose of the service level agreements and contracts.

**Table 4: SSG Fox SPGP Administrative and Implementation Costs through September 30, 2023.**

Name	Total Cost	Purpose	Type
VA Office of Business Oversight	\$132,500	Conduct grantee audits	Service Level Agreement
VA Central Arkansas Health Care System	\$403,529	Evaluation plan, grantee technical assistance, CMR support	Service Level Agreement
The MITRE Corporation	\$4,703,683	Data collection; grantee data technical assistance	Contract
Verve, LLC	\$856,290	Grantee operations technical assistance and training	Contract

Name	Total Cost	Purpose	Type
HHS Payment Management System	\$5,000	Grant disbursements, cash management, accounting support services.	Interagency Agreement
eTranservices	\$194,215	Grant lifecycle tracking system and website	Expansion of VA HPO contract
Capital Solutions Design	\$369,000	Reconfigured Behavioral Health Lab Touch for the data collection tool	Contract

## 2. Grantee Operations Costs

Appendix 5 includes a table of the grant recipients and their total grant award as required by section 201(k)(1)(B)(ii)) and also includes an accounting of how grant funds were used by grantees as directed by (section 201(k)(1)(B)(x)) to the extent available in the interim report.

A final detailed summation of how the grant funds were used will not be available until the end of the grantees' final project period which includes budget period extensions. Extensions to budget periods up to 1 year were granted upon request by grantees in order to fully expend their FY 2022 funds as per 2 C.F.R. Part 200.<sup>7</sup> Seventy-three of the 80 FY 2022 grantees requested and were granted an extension. Though a full summary of grantee final expenditure data is not yet available; the budgeted operating costs and the percentage drawn down as of November 7, 2023, are provided in Appendix 5. This drawdown end date was chosen to reflect the grantees' reconciliation of expenses as of September 30, 2023, and subsequent drawdown. As of February 29, 2024, 11/80 grantees are under 50% drawdown, and are receiving increased technical assistance.

VA reviews how grantees spend their funds to ensure they are spent in a timely manner and in accordance with regulatory requirements. VA monitors grantee expenditures monthly which affords insights into service demands and projected spend rates and can lead to troubleshooting fund management queries to align with requirements. VA provides technical assistance to grantees and formulates strategies to ensure that they can disperse their entire authorized year one funds. During these meetings, VA works with grantees on strategies for future spending to ensure 100% of drawdowns are completed before the end of the pilot program (September 2025). Many of the year one grantees started utilizing their drawdowns later in the program year due to the process necessary for implementing a new program, such as hiring and retaining new staff and establishing SSG Fox SPGP program specific operational requirements. Now that the expected implementation ramp-up has been completed, drawdowns are becoming more frequent to prevent under execution of funds for year two and year three. Additionally, through the Office of Business and Oversight, VA conducts grantee audits for all grantees at least once in pilot phase that include comprehensive evaluations of cost

<sup>7</sup> 2 C.F.R. § 200.308, Revision of Budget and Program Plans <https://www.ecfr.gov/current/title-2/subtitle-A/chapter-II/part-200/subpart-D/section-200.308>

compliance. The objective of the audit reviews is to evaluate programs to obtain reasonable assurance that transactions are completed in compliance with SSG Fox SPGP and Federal requirements and that Federal assets are adequately safeguarded. An itemized accounting of fund use will be included in the final report.

## **(B) Assessment of Effectiveness**

This section includes the following information related to the required components for the interim report:

1. Effectiveness of Outreach: The effectiveness of grant recipients and their grant partners, if any, in conducting outreach to eligible individuals (§ 201(k)(1)(B)(i)(I))
  - A description of any outreach activities conducted by the eligible entity in receipt of a grant with respect to services provided using the grant. (§ 201(k)(1)(B)(xi))
2. Effectiveness of Increasing Services: The effectiveness of increasing eligible individuals' engagement in suicide prevention services. (§ 201(k)(1)(B)(i)(II))
3. Measured Outcomes: Such other validated instruments and additional measures as determined by the Secretary. (§ 201(k)(1)(B)(i)(III))

### **1. Effectiveness of Outreach**

For the purposes of this grant program, outreach is defined as efforts to promote awareness of the program in order to identify and engage potential eligible individuals in the grantee's suicide prevention services, particularly those most at risk or not connected to VA care. Grantees reported conducting 16,591 distinct outreach efforts through September 30, 2023. Grantees may endorse multiple outreach activities within each unique outreach effort or event. However, outreach is not a required service, therefore, a comparison of outreach efforts by grantee are not offered in this report. Some grantees have robust existing referral streams such that no additional outreach is needed to identify prospective individuals to enroll in the program.

### **Description of Grantee Outreach Efforts and Activities**

Grantees provided data on outreach activities fitting 46 different data elements. These were grouped into five main categories following VA's established internal guidance on suicide prevention outreach:<sup>8</sup> training, awareness activities, mailings, coalition meeting, and media, or marketing. For the purposes of this grant program, training is suicide prevention education as specified in 38 C.F.R. § 78.55; awareness activities encompass efforts to provide information and promote awareness of programs; mailings may be to potential eligible individuals, caregivers, or community partners; coalition meeting is specific to sharing program information at a local suicide prevention coalition meeting; and media and marketing may entail an interview, social media, paid campaign, or public service announcement.

---

<sup>8</sup> U.S. Department of Veterans Affairs. (2010). Guidance for Entering Suicide Prevention Application Network (SPAN) Outreach. Internal VA document: unpublished.

A sampling of the 46 data elements reported, organized by category, are described here. Trainings included webinars and in-person presentations to community service providers, Veterans, and families. The awareness activities involved community health fairs, Veteran Service Organization events, gun shows, National Guard and military base contacts, faith-based gatherings, and military family events. Mailings were used to extend support and awareness of program offerings to potential eligible individuals and potential referral sources. Grantees presented on their programs to local suicide prevention coalition meetings. Media and marketing campaigns promoted program awareness through web-based, newspaper, radio, podcast, and other platforms.

Grantees endorsed outreach efforts that were intended for certain high-risk Veteran groups or areas. The percentage of all outreach efforts with a specific focus through September 30, 2023, included: 17% rural, 13.2% highly rural, 12% American Indian/Alaskan Native, 10.2% women, 8.9% Black/African American, 7.6% Hispanic, 7.2% LGBTQ, 6.3% Asian, 5% Native Hawaiian, and 4.9% Other Pacific Islander.

Outreach efforts began as early as the day of the initial award, September 19, 2022, and most grantees focused on conducting outreach prior to delivering any other services. Most grantees began providing direct services beyond outreach in January 2023. Table 1 below depicts the type and number of outreach activities over time, categorized by training, awareness activities, mailings, coalition building or meeting, and media and marketing. Within each distinct outreach effort (16,591 total), grantees may have reported one or more activities.

**Table 1: Grantee Reported Outreach Activities by Category from September 19, 2022, to September 30, 2023**

<b>Suicide Prevention Outreach Category</b>	<b>Activities 09/19/22-12/31/22</b>	<b>Activities 01/01/23-03/31/23</b>	<b>Activities 04/01/23-06/30/23</b>	<b>Activities 07/01/23-09/30/23</b>	<b>Total Outreach Activities 09/19/22-09/30/23</b>
Training	131	1,158	1,414	1,506	4,209
Awareness Activities	831	8,129	11,117	12,114	32,191

## 2. Effectiveness of Increasing Services

During this reporting period, 3,204 participants (eligible individuals and family members) were engaged in suicide prevention services provided by grantees. All grantees are required to provide the baseline mental health screening. Beyond that, grantees offer a unique combination of suicide prevention services, as approved in their grant agreement. Table 2 found below provides a list of total services provided by type over time. Participants received an average of 1.4 types of services.

Service types in Table 2 are aligned to statute, with several subcategories of services grouped accordingly. Assistance in obtaining VA benefits may include, for example, linkage to supportive services for homeless Veterans, vocational and rehabilitation counseling assistance, or education assistance. Assistance with obtaining other public benefits and emergent needs may include linkage to transportation assistance, daily living assistance, health care support services, personal financial planning, childcare assistance, and fiduciary and representative payee assistance. Appendix 6h lists participant services by grantee.

**Table 2: Description of Total Services from September 19, 2022, to September 30, 2023**

Service Type	Services 09/19/22- 12/31/22	Services 01/01/23- 03/31/23	Services 04/01/23- 06/30/23	Services 07/01/23- 09/30/23	Total Services 09/19/22- 09/30/23	Mean Services (per Grantee)
Clinical services for emergency treatment	0	18	45	164	227	3
Case management	35	358	947	1,457	2,797	35
Peer Support Specialist	8	131	437	806	1,382	17
Assistance in obtaining VA benefits	110	717	1,448	1,649	3,924	49
Assistance in obtaining other public benefits and assistance with emergent needs	71	642	1,329	1,646	3,688	46
Nontraditional and innovative approaches and treatment practices	6	130	347	516	999	12
Other Services (as defined by § 201)	0	71	92	145	308	4

Note: This table does not include Baseline Mental Health Screening (required for all), nor Outreach and Education/Training, as the latter two are reflected within Table 1 on Outreach efforts above.

### 3. Measurement Outcomes

This section describes outcomes related to the use of validated screening instruments and additional measures as determined by the Secretary. (section 201(k)(1)(B)(i)(III)).

---

*“The SSG Fox SPGP team has been extremely helpful throughout this first grant year. The weekly and monthly meetings are always productive, informative, and engaging. The entire team has been patient with our requests and provides timely responses. There has been no part of the SSG Fox SPGP team that was unhelpful.”*

– SSG Fox SPGP Grantee

---

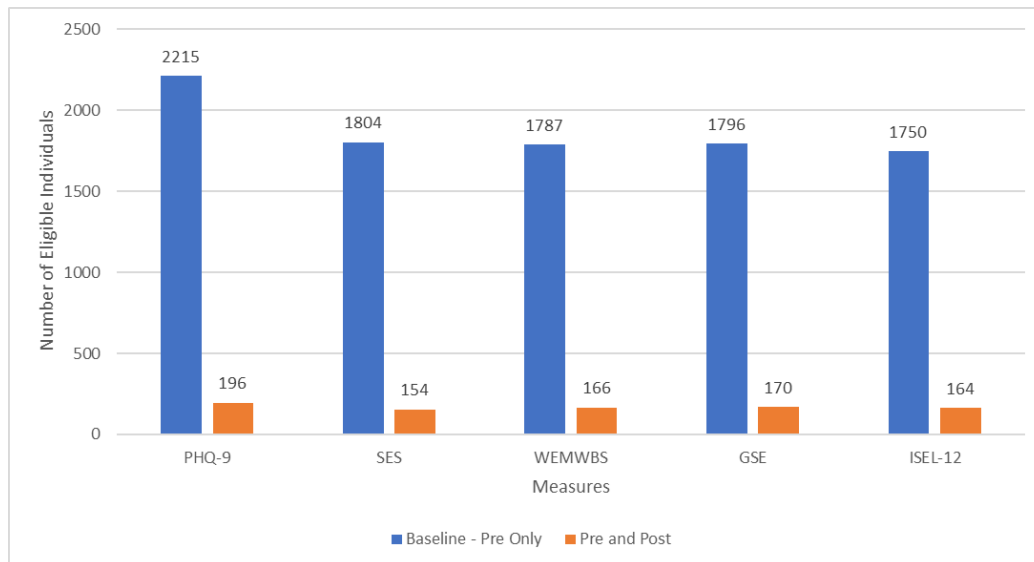

Grantee staff completed an eligibility determination screening (see Appendix 4) for 8,321 potentially eligible individuals. Of those deemed eligible (n=3,204), 73% (2338/3204) completed an initial mental health screening at baseline using at least 1 of the 4 validated instruments (see Appendix 3) and the additional SES measure. VA continues to provide grantees with performance feedback on the required baseline mental health screening.

Figure 2 found below demonstrates the number of eligible individuals whose mental health status, wellbeing, and suicide risk received a baseline measurement screening pre-services and will be measured over a period of time for any improvement. (section 201(k)(1)(B)(vi)). Thereafter are data on the number of eligible individuals who have repeated the screenings upon program completion. Results to date indicate that all five of the reported measures had statistically significant ( $p < .01$ ) changes different from zero.<sup>9</sup>

---

<sup>9</sup> Care should be taken in interpreting this result as it only reflects data collected from participants who completed the program and who elected to complete the forms on exit. A positive result as seen here provides confirmatory evidence (is consistent with) positive results overall but is preliminary and not definitive.

**Figure 2: Number of Screenings Using Measures at Baseline and Two Time Points for Eligible Individuals from September 19, 2022, to September 30, 2023**

Note: Participants reflected by the Baseline – Pre-Only data (blue column in this figure) were still engaged in services and had not completed the program yet to collect post data. The Pre and Post data (orange column in this figure) indicate only those who at the time of this report completed their program and provided both data points for analysis.

However, a full analysis of the changes between time points by grantee is not yet appropriate statistically with only a small sample of program completers at the time of this report preparation. Pre and post outcome measures are also not disaggregated to the grantee level in this interim report, as only 25 out of 80 grantees reported a post outcome measure at the time of data collection for inclusion in this report.

As noted earlier, this report reflects the first year of the award when grantees have spent the majority of time rapidly building and staffing their programs. Following this stage, they began providing services by screening potential eligible individuals, which for some grantees began in January 2023. The timeline supporting this start included monthly technical assistance webinars in fall 2023 focused on start-up, staffing and program operations, while the 2-day on-site event in December 2023 focused on service planning with participants, the flow of eligible participants through the grantees' programs, and strategies to attain each individuals' stated goals.

While not definitive, and considered preliminary at this time, the small number of program completers may be due to a variety of factors, to include varying program start dates, varying lengths of program services, and, at the time of this data collection, most participants were still actively engaged in services, leaving only a few participants as completers in their respective programs. Grantees may also be providing services to Veterans with more complex needs that could, upon comparison, would be inaccurately identified as poor performers. Finally, the complexity of individual needs and services may not be fully reflected in these selected outcome measures, yet data from these five

outcome measures do suggest some preliminary indications of program impact, with statistically significant ( $p < .01$ ) changes different from zero. VA anticipates that over time, more data will be available, with potentially more program completers. The final report will include an expanded view of these data and any changes identified in the measured outcomes.

### **(C) Demographics of Participants**

This section includes a description of the participants related to the required components of the interim report. See Appendix 6 for the disaggregated data related to all eligible individual demographic characteristics, enrollment, branch of service, era of service, type of service received, and whether the eligible individual was referred to VA for care.

- Participants and Ineligible Individuals: The number of eligible individuals supported by each grant recipient, including through services provided to family members and the number of individuals who seek services for the grant who were not deemed eligible (section 201(k)(1)(B)(iii, iv and xii). See Appendix 6 for participant demographic characteristics, service, and referral details.
  - There were 3,204 eligible individuals supported by grants including through services provided to family members.
  - There were 4,253 individuals seeking services from the grant recipients who were deemed ineligible.
  - An additional 864 individuals were in process of eligibility determination at the time of this data pull.
  - Across all eligible individuals, a majority of the 3,204 participants who received any services under the broad definition including mental health screening or referral at some time during this reporting period identified as male 75% ( $n=2,196$ ), followed by female 24% ( $n=716$ ), while other responses of transgender, prefer not to answer, non-binary, two or more answers, and other were together 1% ( $n=10$ ). With regard to marital status, 33% ( $n=960$ ) of eligible individuals report being married or having a domestic partner, with the remaining reporting 28% ( $n=837$ ) single, 25% ( $n=725$ ) divorced, 7% ( $n=193$ ) separated, 4% ( $n=111$ ) never married, and 3% ( $n=114$ ) as widow or widower.
  - For this reporting period, 20% of the eligible individuals were between the ages of 18-34 ( $n=641$ ), 43% were in the age group of 35-54 ( $n=1,378$ ), and 37% were in the age group of 55 and older ( $n=1,185$ ). With regard to ethnicity, the majority of participants (94%) identified as non-Hispanic ( $n=3,012$ ). With regard to race, 53% identified as Caucasian/White ( $n=1,698$ ), 28% as Black/African American ( $n=897$ ), 5% as Hispanic/Latino ( $n=160$ ), 6% as Two or More Races ( $n=192$ ), 3% as American Indian ( $n=84$ ), 3% as Pacific Islander ( $n=98$ ), 1% as Asian ( $n=58$ ), and less than 1% as Alaskan Native ( $n=3$ ).
- Newly Enrolled: The number of eligible individuals newly enrolled in the patient enrollment system of the Department under 38 U.S.C. §1705(a) based on a

referral to the Department from a grant recipient under subsection (e)(3)(C), disaggregated by grant recipient (section 201(k)(1)(B)(ix)).

- The SSG Fox SPGP is identifying and engaging eligible individuals who are not already enrolled in Veterans Health Administration (VHA) health care.
- Among eligible individuals who responded to this question, 934 or 29% (n=934/2941) self-reported they were not previously enrolled in VA care. See Appendix 6e. Note, data validating new patient enrollment is limited to the individual participant and grantee report; this was not verified by the Department at the national level.
- SSG Fox SPGP grantees reported facilitating new VHA enrollment for 24% of (769/3,204) eligible individuals, connecting Veterans at identified risk for suicide to VA health care. See Appendix 6j.
- Participants by Military Status Eligibility: The number of eligible individuals described in clause (iv) who were not previously receiving care furnished by the Department, with specific numbers for the population of eligible individuals described in subsection (q)(4)(B) (section 201(k)(1)(B)(v)).
  - Almost 57% of the eligible participants reported having served or are currently serving in the Army (n=1,672), 18% in the Navy (n=518), 12% Marine Corps (n=358), 10% Air Force (n=295), and less than 1% each Coast Guard (n=27) and Space Force (n=1). Other categories include not applicable, other, and Public Health Service. See Appendix 6f.
    - Note: Guard and Reserve personnel are reported under their parent service. As this information was based on self-report, another category was allowed.
  - Regarding era of service, 42% of participants represented as serving during Post 9/11 (n=1,227), 17% of participants reported service post-Vietnam war to pre-Gulf War (n=500), 17% of participants reported serving 2 or more eras (n=599), 12% of participants reported service during the Gulf War (n=352), 8% during the Vietnam War Era (n=240), less than 1% during the Korean conflict (n=5), and less than 1% during the post-Korean conflict to pre-Vietnam War (n=1). See Appendix 6g.
  - There were 934/3162 (30%) eligible individuals supported by grants who were not previously receiving care furnished by the Department (§ 201(k)(1)(B)(v)).
  - Eligible individuals described in subsection (q)(4)(B) are commonly referred to as having a discharge category of Other Than Honorable (OTH). The SSG Fox SPGP served 116/3162 (4%) eligible individuals with an OTH discharge status. (section 201(k)(1)(B)(v))
- VA Referrals: The number and percentage of eligible individuals referred to the point of contact at the Department under subsection (e)(3)(C) (section 201(k)(1)(B)(viii)). See Appendix 6i.
  - Of the 1,977 participants who received at least one referral, 1460 participants

were referred by SSG Fox SPGP grantees for clinical mental health services (including emergent and non-emergent). Of the 1216/1460 participants (83%) who were referred to VA for mental health services, 70% previously reported enrollment in VA Healthcare with 30% reporting no previous enrollment or pending enrollment.

- The total number and percentage of eligible individuals for whom grantees reported making a referral to the enrollment point of contact at the Department under subsection (e)(3)(C), was 769 or 24% of eligible individuals (n=769/3,204) (section 201(k)(1)(B)(viii). Note, data validating referrals to the Department is limited to individual and grantee report; this was not verified by the Department at the national level.

Overall, data collected from SSG Fox SPGP grantees has proven beneficial for required reporting, program management, and evaluation. Grantees performing below satisfactory on biannual performance reports receive written feedback on areas of concern, which could include low number of individuals screened and served relative to their projection, low spend down rates, etc. Grant managers facilitate group meetings monthly, meet with grantees one to one upon request, and have also established standing one to one meetings with lower performing grantees to support their program launch and ongoing performance. As noted in the introduction, each grantee's program concept, including the projected number of individuals to be served with their programs, is different. VA is using this first year's data to consider if, or what, benchmarks are appropriate for future performance standards. Grant managers and technical assistance partners continue to support and guide grantees to improve performance. Staff turnover and vacancies at several grantee sites have impacted timeliness for program implementation and services. The final report will provide a follow up on these data reported herein, an assessment of effectiveness, increased capacity, and the feasibility and advisability of extending or expanding the provision of grants.

## **Conclusion**

As of September 30, 2023, grantees have completed over 16,590 outreach contacts and engaged 3,204 participants. An additional 864 individuals were in process of onboarding at the time of this report's data pull. As these numbers reflect less than a full year of direct service provision, and as grantees now have the program infrastructure to move beyond the start-up phase, the program reach is expected to grow.

---

*“We currently have several more individuals pending enrollment, have created in-depth policy and procedure manuals for each agency involved, conducted an audit of the subcontracted agencies, meet on a regular basis ...and have provided hundreds of outreach events to the community. We are currently on a trajectory to expand our SSG Fox SPGP program and implement some additional innovative services to further enhance our program.”*

– SSG Fox SPGP GranteeA

---

As indicated in the quotes provided here and throughout this report, grantees stories of success continue to illustrate the program’s impact. For example, one grantee relayed that a young, pregnant Veteran fleeing interpersonal violence engaged the grantee for services. Their services helped this Veteran enroll in prenatal care at VA as well as other health care and mental health supports. She stated: “I could not have survived without your help.” Another grantee noted that a Marine Corps Veteran presented to a grantee with suicidal thoughts and seeking help for combat-related trauma. After getting linked to help, he confided that he had been taking steps toward ending his life prior to contacting the grantee. He noted that the services he received saved his life.

The significance of the SSG Fox SPGP on the lives of Veterans and family members is also highlighted by the grantees who note the following:

- The unique challenges of rural outreach;
- The life-changing case management support for resource navigation and linkage to benefits;
- The complementary approaches for managing pain and hopelessness;
- The engaging peer-led post-traumatic growth and moral injury programming,
- The inclusion of faith-based and family-involved efforts;
- The increase in first-time enrollment with VHA; and
- The ability to address unique needs and strengths of various communities, including American Indian, Alaskan Native, Native Hawaiian and American Samoan Veterans.

These impacts resound with messages of hope and continue to inspire grantees in their local communities to deliver critical interventions needed to prevent Veteran suicide across the Nation.

The SSG Fox SPGP is uniquely positioned to help tailor resources to meet the needs of diverse Veterans in their communities, while enhancing partnerships and building community capacity to deliver suicide prevention services. The program’s strength lies in allowing different approaches to be customized to each community’s needs in order to reach those individuals at risk of suicide, some of whom choose not to receive care at

VA. The program engages families, which is critical to reaching and serving those at risk.

The SSG Fox SPGP embodies VA's public health approach in that it moves away from a belief that suicide is solely a mental health problem and moves towards engaging Veterans within and outside of clinical health care delivery systems, to decrease both individual and societal risk factors for suicide. VA is eager to analyze and share outcomes in the final report that move our country toward identifying and amplifying community-led best practices in this critical mission of reducing Veteran suicide.

## Appendix 2 – Grantee Journey Map

### SOG Fox SPGP: Grantee Journey

Note: This model was produced by The MITRE Corporation in 2022

## Appendix 3 - Detailed Description of Instruments

### Suicide Risk Domain

**Suicide risk** is determined by administering the C-SSRS, a well validated<sup>10</sup> 6-item, non-clinical screening tool for a recent history of suicidal thoughts and behavior also used in the VHA. Two of the six items are related to past month death wishes or wishes to go to sleep and not wake up and any actual thoughts of killing themselves. Other items inquire about suicidal intent and behaviors. Response options include no and yes with higher scores indicting higher risk for suicidal behaviors. A 'Yes' response to items 1 and 2 indicates low risk, 3 and 6 moderate risk and a yes to 4, 5, and 6 indicate high risk.

### Mental Health Status Domain

**Mood related symptoms** are measured using the PHQ-9, a well validated, 9 item scale that measures depressive symptoms (Kroenke et al., 2001). Respondents report the presence of each symptom within the last 2 weeks, with response options ranging from 0 = Not at all to 3 = Nearly every day. Total scores ranged from 0 to 27, with cuts offs established for 1–4 minimal depression, 5–9 mild depression, 10–14 moderate depression, 15–19 moderately severe depression, 20–27 severe depression. Higher scores indicate more symptoms of depression. Published time estimates are between 5–10 min to administer.

### Financial Stability Domain

**Social Economic Status** is measured using a variety of sociodemographic characteristics and questions related to the topics of employment, education and finances to determine financial stability. Financial stress items were obtained from the CDC.<sup>11</sup> In addition to a range of demographic questions related to age, race, ethnicity, questions related to service in the Armed Forces are queried. A four item Traumatic Brain Injury Screen (Brenner, et al, 2013) is included to assess history of head or neck injuries and concussions. General health care information on enrollment in VA care and type of insurance as well as two items related to overall subject health and mental health were obtained from the VA National Survey of Veterans Questionnaire Instruments.<sup>12</sup>

**Well-being Domain Mental well-being** measured using the WEMWBS (Tennant, et al, 2007), a 14-item scale for mental well-being covering subjective well-being, and psychological functioning. The WEMWBS words all items positively and addresses aspects of positive mental health such as positive states of being, thinking, behaving and feeling. While there is a short version with seven items, the 14-item version has been used more extensively as a pre and post intervention measure. Responses are scored 1= None of the time, 2= Rarely, 3= Some of the time, 4= Often, 5= All of the

---

<sup>10</sup> [https://cssrs.columbia.edu/wp-content/uploads/CSSRS\\_Supporting-Evidence\\_Book\\_2022.pdf](https://cssrs.columbia.edu/wp-content/uploads/CSSRS_Supporting-Evidence_Book_2022.pdf)

<sup>11</sup> [https://stacks.cdc.gov/view/cdc/44275/cdc\\_44275\\_DS1.pdf](https://stacks.cdc.gov/view/cdc/44275/cdc_44275_DS1.pdf)

<sup>12</sup> <https://www.va.gov/vetdata/docs/SurveysAndStudies/AppendixAQuestionnaires.pdf>

time; summed scores range from 14-70. Population scores on WEMWBS approximate to a normal distribution with no ceiling or floor effects, making the scale suitable as a tool for monitoring mental well-being at a population level. The scale is not designed to identify individuals with exceptionally high or low positive mental health, so no 'cut off' has been developed.

**Self-efficacy** is measured using the GSE (Schwarzer and Jerusalem, 1995), a 10-item scale that measures self-efficacy related to minor daily stressors and major life events. Responses are scored 1= Not at all true, 2= Hardly true, 3= Moderately true, and 4= Exactly true; summed scores range from 10 to 40. Higher scores indicate stronger perceived self-efficacy. Published time estimates are four minutes to administer.

### **Social Support Domain**

**Social support** is measured with the ISEL-12 (Cohen et al., 1985), a 12-item scale that measures three dimensions of perceived social support: 1.) Appraisal Support - Items 2, 4, 6, and 11; 2.) Belonging Support - Items 1, 5, 7, and 9; and 3.) Tangible Support – Items, 3, 8, 10, and 12. Each dimension is measured by 4 items on a 4-point scale ranging from “Definitely true” to “Definitely false”. Responses are scored as 1= Definitely false, 2= Probably false, 3= Probably true, and 4= Definitely true; summed scores range from 12 to 48. Items 1, 2, 7, 8, 11, 12 are reverse scored. Higher scores indicate a higher degree of perceived availability of social support.

### **Appendix 4 – Eligibility Determination**

Eligible individuals as defined in § 201(q)(4) include (1) a person at risk of suicide who, in general, (2) served in the active military, naval, or air service and was discharged therefrom under conditions other than dishonorable as described in 38 U.S.C. 101(2), former Service members with OTH status described in 38 U.S.C. 1720I(b), or those who served on active duty in a theater of combat operations under 38 U.S.C. 1712A(a)(1)(C)(i)-(iv). The individual is deemed “eligible” when both conditions (1) and (2) are met.

Programmatically, eligibility for the SSG Fox SPGP is established as a process of eligibility determination conducted by the grantees in collaboration with prospective individuals that includes screening for 1) psychosocial unmet needs, 2) verifying eligible individual status, and 3) detecting suicide risk. All three aspects must be met to be eligible.

#### **1. Psychosocial Need for Suicide Prevention Services**

Eligibility determination for the SSG Fox SPGP involves a set of questions focusing on the current need for suicide prevention services. This is determined by the presence of at least one of 15 suicide risk factors including psychosocial needs that increase the risk for suicidal ideation or behaviors with response options of yes and no. Individuals who score greater than zero are considered eligible on this aspect, where as a score of zero is ineligible, meaning there is not a current psychosocial need to be met by the delivery of SSG Fox SPGP services.

## 2. Eligible Individual Status

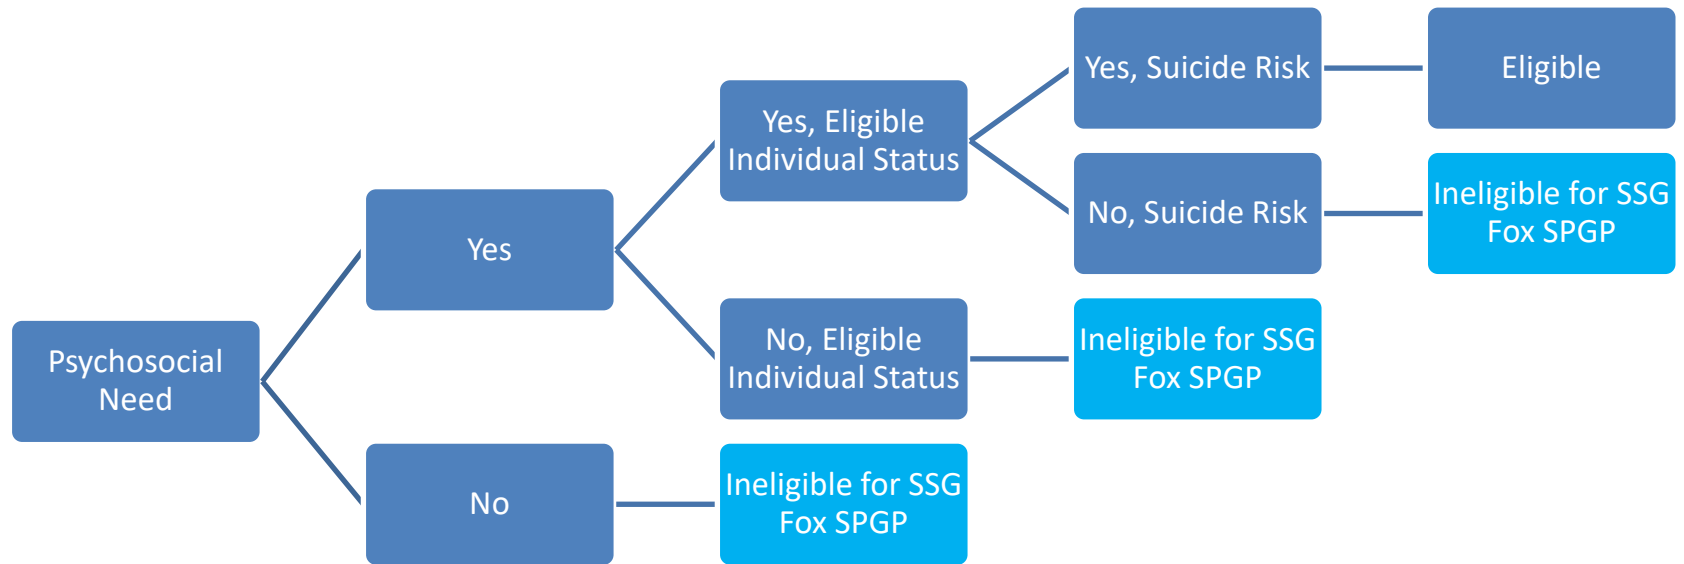

In addition to the Veterans or Service members specified in § 201(q)(4), statute also extended the authority of the program to include family members, defined as a parent, spouse, child, sibling, stepfamily member, extended family member, and any other individual who lives with the eligible individual. Collectively, the term participant means an eligible individual or their family who is receiving suicide prevention services for which they are eligible from a grantee.

## 3. Suicide Risk

Suicide risk is detected by administering the C-SSRS, with a score of at least low risk being necessary for eligibility for the SSG Fox SPGP. See Appendix 3 for details on this tool. If an individual screens high risk, they are referred for immediate crisis intervention and further clinical assessment, but once stabilized, may continue with SSG Fox SPGP services. Individuals screening high risk for suicide, who decline a referral to emergency treatment, may continue to participate in the program. Grantees have continued attempts to refer for clinical services and/or emergency treatment.

If all three of the elements noted above are not present, the individual is considered ineligible. Ineligible individuals are referred to other programs and services and could also be rescreened for SSG Fox SPGP in the future should risk change. The eligibility determination flow is outlined in Figure 1.

**Figure 1: Eligibility Determination and Participant Flow for SSG Fox SPGP**

## Appendix 5 - Grant Recipients, Grant Amounts and Budgeted Operating Costs

**Table 1. List of Grant Recipients, their Grant Award and Budgeted Operating Costs for FY 2023 Services, and Financial Drawdown as of November 7, 2023. Awards totaled \$52,500,000.00 with the average award in the first year being \$656,250 (range: \$100,000 - \$750,000).**

Organization Legal Name	Award Amount	Executive Costs	Overhead Costs	Indirect Costs	Financial Drawdown by 11/7/23

**Table 2. A list of the grant recipients with partner organizations that delivered services funded by the grant and the amount of such grant received by the partner organization (§ 201(k)(1)(B)(ii)).**

<b>Grant Recipient Organization Legal Name</b>	<b>Partner Organization(s)</b>	<b>Budgeted Annual Cost</b>
<b>Arizona Department of Veterans' Services</b>	Arizona Coalition of Military Families	\$323,570.00
<b>County of Oneida</b>	Neighborhood Center	\$258,353.00
	Utica Center for Development	\$354,035.00
<b>Maine Dept of Defense Veterans and Emergency Management</b>	Health Affiliates Maine	\$356,495.80
	Maine Medical Association	\$305,896.00
<b>Rhode Island Department of Health</b>	Newport Mental Health	\$106,965.00
	Family Services Center	\$120,940.00
<b>South Carolina Department of Veterans Affairs</b>	Vantage Point Foundation	\$277,696.00
<b>Washington State Department of Veterans Affairs</b>	Aletheia Riding Group	\$96,616.00

Note: Partner organization is defined as an entity in receipt of Federal financial assistance via a pass-through entity as defined in 38 CFR 50.1(d) to provide or carry out a service such as by contract, grant, or cooperative agreement. The only SSG Fox SPGP grantees eligible to operate as a pass-through entity are state, local or tribal government organizations.

## Appendix 6 - Demographic Characteristics Disaggregated by Grant Recipient

Disaggregated Data on Eligible Individuals including Family Members by alphabetical listing of Grant Recipients with data collected from September 19, 2022 – September 30, 2023, and displayed in tables organized under descriptive headings labeled from I-VI.
