**SEC. 317. DEPARTMENT OF DEFENSE ENVIRONMENTAL RESTORATION PROGRAMS.**

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense has identified nearly 39,500 sites that fall under the installation restoration program sites and munitions response sites.

(2) The installation response program addresses contamination from hazardous substances, pollutants, or contaminants and active military installations, formerly used defense site properties, and base realignment and closure locations in the United States.

(3) Munitions response sites are known or suspected to contain unexploded ordnance, discarded military munitions, or munitions constitues are addressed through the military munitions response program.

(4) The installation restoration program sites and munitions response sites have had significant impacts on state and local governments that have had to bear the increased costs of environmental degradation, notably groundwater contamination, and local populations that have had to live with the consequences of contaminated drinking, including increased health concerns and decreasing property values.

(5) Through the end of fiscal year 2017, the Department of Defense had achieved response complete at 86 percent of installation restoration program sites and munitions response sites, but projects that it will fall short of meeting its goal of 90 percent by the end of fiscal year 2018.

(6) The fiscal year 2019 budget request for environmental restoration and base realignment and closure amounted to nearly \$1,318,320,000, a decrease of \$53,429,000 from the amount authorized in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91).

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the environmental restoration and base realignment and closure programs are important for the protection of the environment, the health of the military and civilian personnel and their families who live and work on military installations, to ensure that current and legacy military operations do not adversely affect the health or environments of surrounding communities;

(2) the Department of Defense and the Armed Forces should seek to reduce the financial burden on state and local government who are bearing significant costs of cleanup stemming from defense related activities;

(3) the Department of Defense and the Armed Forces should expedite and streamline cleanup at locations where contamination is having a direct impact on civilian access to clean drinking water;

(4) the Department of Defense and the Armed Forces should continue to engage with and help allay local community concerns about the safety of the drinking water due to environmental degradation caused by defense related activities; and

(5) the Department of Defense should seek opportunities to accelerate environmental restoration efforts where feasible, to include programming additional resources for response actions, investing in technology solutions that may expedite response actions, improving contracting procedures, increasing contracting capacity, and seeking opportunities for partnerships and other cooperative approaches.

(5) The cumulative impacts of multiple wind farms near a single radar on the ability of the National Oceanic and Atmospheric Administration and the National Weather Service to warn or forecast hazardous weather.

(6) An analysis of whether certain wind turbine projects, based on project layout, turbine orientation, number of tur-

bines, density of turbines, proximity to radar, or turbine height result in greater impacts to the missions of Department of Defense, the National Oceanic and Atmospheric Administration, and the National Weather Service, and if so, how can those projects be better cited to reduce or eliminate NEXRAD impacts.

(7) Case studies where the Department of Defense, the National Weather Service, and industry have worked together to implement solutions.

(8) Mitigation options, including software and hardware upgrades, which the National Oceanic and Atmospheric Administration and the National Weather Service have researched and analyzed, and the results of such research and analysis.

**SEC. 334. SURFACE WARFARE TRAINING IMPROVEMENT.**

(a) FINDINGS.—Congress makes the following findings:

(1) In 2017, there were three collisions and one grounding involving United States Navy ships in the Western Pacific. The two most recent mishaps involved separate incidents of a Japan-based United States Navy destroyer colliding with a commercial merchant vessel, resulting in the combined loss of 17 sailors.

(2) The causal factors in these four mishaps are linked directly to a failure to take sufficient action in accordance with the rules of good seamanship.

(3) Because risks are high in the maritime environment, there are widely accepted standards for safe seamanship and navigation. In the United States, the International Convention on Standards of Training, Certification and Watchkeeping (hereinafter in this section referred to as the “STCW”) for Seafarers, standardizes the skills and foundational knowledge a maritime professional must have in seamanship and navigation.

(4) Section 568 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328; 130 Stat. 2139) endorsed the STCW process and required the Secretary of Defense to maximize the extent to which Armed Forces service, training, and qualifications are creditable toward meeting merchant mariner licenses and certifications.

(5) The Surface Warfare Officer Course Curriculum is being modified to include ten individual Go/No Go Mariner Assessments/Competency Check Milestones to ensure standardization and quality of the surface warfare community.

(6) The Military-to-Mariner Transition report of September 2017 notes the Army maintains an extensive STCW qualifications program and that a similar Navy program does not exist.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Secretary of the Navy should establish a comprehensive individual proficiency assessment process and include such an assessment prior to all operational surface warfare officer tour assignments; and

(2) the Secretary of the Navy should significantly expand the STCW qualifications process to improve seamanship and navigation individual skills training for surface warfare candidates, surface warfare officers, quartermasters and operations specialists to include an increased set of courses that directly correspond to STCW standards.

(c) REPORT.—Not later than March 1, 2019, the Secretary of the Navy shall submit to the congressional defense committees a report that includes each of the following:

## Subtitle A—Committee on Foreign Investment in the United States

**SEC. 1701. [50 U.S.C. 4501 note] SHORT TITLE: FOREIGN INVESTMENT RISK REVIEW MODERNIZATION ACT OF 2018.**

This subtitle may be cited as the “Foreign Investment Risk Review Modernization Act of 2018”.

**SEC. 1702. FINDINGS; SENSE OF CONGRESS.**

(a) **[50 U.S.C. 4565 note] FINDINGS.**—Congress makes the following findings:

(1) According to a February 2016 report by the International Trade Administration of the Department of Commerce, 12,000,000 United States workers, equivalent to 8.5 percent of the labor force, have jobs resulting from foreign investment, including 3,500,000 jobs in the manufacturing sector alone.

(2) In 2016, new foreign direct investment in United States manufacturing totaled \$129,400,000,000.

(3) The Bureau of Economic Analysis of the Department of Commerce concluded that, in 2015—

- (A) foreign-owned affiliates in the United States—
- (i) contributed \$894,500,000,000 in value added to the United States economy;
  - (ii) exported goods valued at \$352,800,000,000, accounting for nearly a quarter of total exports of goods from the United States; and
  - (iii) undertook \$56,700,000,000 in research and development; and

(B) the 7 countries investing the most in the United States, all of which are United States allies (the United Kingdom, Japan, Germany, France, Canada, Switzerland, and the Netherlands) accounted for 72.1 percent of the value added by foreign-owned affiliates in the United States and more than 80 percent of research and development expenditures by such entities.

(4) According to the Government Accountability Office, from 2011 to 2016, the number of transactions reviewed by the Committee on Foreign Investment in the United States (commonly referred to as “CFIUS”) grew by 55 percent, while the staff of the Committees assigned to the reviews increased by 11 percent.

(5) According to a February 2018 report of the Government Accountability Office on the Committee on Foreign Investment in the United States (GAO-18-249): “Officials from Treasury and other member agencies are aware of pressures on their CFIUS staff given the current workload and have expressed concerns about possible workload increases.”. The Government Accountability Office concluded: “Without attaining an understanding of the staffing levels needed to address the current and future CFIUS workload, particularly if legislative changes to CFIUS’s authorities further expand its workload, CFIUS may be limited in its ability to fulfill its objectives and address threats to the national security of the United States.”.

(6) On March 30, 1954, Dwight David Eisenhower—five-star general, Supreme Allied Commander, and 34th President of the United States—in his “Special Message to the Congress on Foreign Economic Policy”, counseled: “Great mutual advantages to buyer and seller, to producer and consumer, to investor and to the community where investment is made, accrue from high levels of trade and investment.”. President Eisenhower continued: “The internal strength of the American economy has evolved from such a system of mutual advantage. In the press of other problems and in the haste to meet emergencies, this nation—and many other nations of the free world—have all too often lost sight of this central fact.”. President Eisenhower concluded: “If we fail in our trade policy, we may fail in all. Our domestic employment, our standard of living, our security, and the solidarity of the free world—all are involved.”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) foreign investment provides substantial economic benefits to the United States, including the promotion of economic growth, productivity, competitiveness, and job creation, thereby enhancing national security;

(2) maintaining the commitment of the United States to an open investment policy encourages other countries to reciprocate and helps open new foreign markets for United States businesses;

(3) it should continue to be the policy of the United States to enthusiastically welcome and support foreign investment, consistent with the protection of national security;

(4) at the same time, the national security landscape has shifted in recent years, and so has the nature of the investments that pose the greatest potential risk to national security, which warrants an appropriate modernization of the processes and authorities of the Committee on Foreign Investment in the United States and of the United States export control system;

(5) the Committee on Foreign Investment in the United States plays a critical role in protecting the national security of the United States, and, therefore, it is essential that the member agencies of the Committee are adequately resourced and able to hire appropriately qualified individuals in a timely manner, and that those individuals' security clearances are processed as a high priority;

(6) the President should conduct a more robust international outreach effort to urge and help allies and partners of the United States to establish processes that are similar to the Committee on Foreign Investment in the United States to screen foreign investments for national security risks and to facilitate coordination;

(7) the President should lead a collaborative effort with allies and partners of the United States to strengthen the multilateral export control regime;

(8) any penalties imposed by the United States Government with respect to an individual or entity pursuant to a determination that the individual or entity has violated sanctions imposed by the United States or the export control laws of the United States should not be reversed for reasons unrelated to the national security of the United States; and

(9) the Committee on Foreign Investment in the United States should continue to review transactions for the purpose of protecting national security and should not consider issues of national interest absent a national security nexus.

(c) SENSE OF CONGRESS ON CONSIDERATION OF COVERED TRANSACTIONS.—It is the sense of Congress that, when considering national security risks, the Committee on Foreign Investment in the United States may consider—

(1) whether a covered transaction involves a country of special concern that has a demonstrated or declared strategic goal of acquiring a type of critical technology or critical infrastructure that would affect United States leadership in areas related to national security;

(2) the potential national security-related effects of the cumulative control of, or pattern of recent transactions involving, any one type of critical infrastructure, energy asset, critical material, or critical technology by a foreign government or foreign person;

(3) whether any foreign person engaging in a covered transaction with a United States business has a history of complying with United States laws and regulations;

(4) the control of United States industries and commercial activity by foreign persons as it affects the capability and capacity of the United States to meet the requirements of national security, including the availability of human resources, products, technology, materials, and other supplies and services, and in considering “the availability of human resources”, should construe that term to include potential losses of such availability resulting from reductions in the employment of United States persons whose knowledge or skills are critical to national security, including the continued production in the United States of items that are likely to be acquired by the Department of Defense or other Federal departments or agencies for the advancement of the national security of the United States;

(5) the extent to which a covered transaction is likely to expose, either directly or indirectly, personally identifiable information, genetic information, or other sensitive data of United States citizens to access by a foreign government or foreign person that may exploit that information in a manner that threatens national security; and

(6) whether a covered transaction is likely to have the effect of exacerbating or creating new cybersecurity vulnerabilities in the United States or is likely to result in a foreign government gaining a significant new capability to engage in malicious cyber-enabled activities against the United States, including such activities designed to affect the outcome of any election for Federal office.

**SEC. 1703. DEFINITIONS.**

“(BB) SUBSTANTIAL INTEREST DEFINED.—In this item, the term ‘substantial interest’ has the meaning given that term in regulations which the Committee shall prescribe. ## PART I—AUTHORITY AND ADMINISTRATION OF CONTROLS

### SEC. 1751. [50 U.S.C. 4801 note] SHORT TITLE.

This part may be cited as the “Export Controls Act of 2018”.

### SEC. 1752. [50 U.S.C. 4811] STATEMENT OF POLICY.

The following is the policy of the United States:

(1) To use export controls only after full consideration of the impact on the economy of the United States and only to the extent necessary—

(A) to restrict the export of items which would make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States; and

(B) to restrict the export of items if necessary to further significantly the foreign policy of the United States or to fulfill its declared international obligations.

(2) The national security and foreign policy of the United States require that the export, reexport, and in-country transfer of items, and specific activities of United States persons, wherever located, be controlled for the following purposes:

(A) To control the release of items for use in—

(i) the proliferation of weapons of mass destruction or of conventional weapons;

(ii) the acquisition of destabilizing numbers or types of conventional weapons;  
(iii) acts of terrorism;  
(iv) military programs that could pose a threat to the security of the United States or its allies; or  
(v) activities undertaken specifically to cause significant interference with or disruption of critical infrastructure.

(B) To preserve the qualitative military superiority of the United States.

(C) To strengthen the United States defense industrial base.

(D) To carry out the foreign policy of the United States, including the protection of human rights and the promotion of democracy.

(E) To carry out obligations and commitments under international agreements and arrangements, including multilateral export control regimes.

(F) To facilitate military interoperability between the United States and its North Atlantic Treaty Organization (NATO) and other close allies.

(G) To ensure national security controls are tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States.

(3) The national security of the United States requires that the United States maintain its leadership in the science, technology, engineering, and manufacturing sectors, including foundational technology that is essential to innovation. Such leadership requires that United States persons are competitive in global markets. The impact of the implementation of this part on such leadership and competitiveness must be evaluated on an ongoing basis and applied in imposing controls under sections 1753 and 1754 to avoid negatively affecting such leadership.

(4) The national security and foreign policy of the United States require that the United States participate in multilateral organizations and agreements regarding export controls on items that are consistent with the policy of the United States, and take all the necessary steps to secure the adoption and consistent enforcement, by the governments of such countries, of export controls on items that are consistent with such policy.

(5) Export controls should be coordinated with the multilateral export control regimes. Export controls that are multilateral are most effective, and should be tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States and its allies.

(6) Export controls applied unilaterally to items widely available from foreign sources generally are less effective in preventing end-users from acquiring those items. Application of unilateral export controls should be limited for purposes of protecting specific United States national security and foreign policy interests.

(7) The effective administration of export controls requires a clear understanding both inside and outside the United States Government of which items are controlled and an efficient process should be created to regularly update the controls, such as by adding or removing such items.

(8) The export control system must ensure that it is transparent, predictable, and timely, has the flexibility to be adapted to address new threats in the future, and allows seamless access to and sharing of export control information among all relevant United States national security and foreign policy agencies.

(9) Implementation and enforcement of United States export controls require robust capabilities in monitoring, intelligence, and investigation, appropriate penalties for violations, and the ability to swiftly interdict unapproved transfers.

(10) Export controls complement and are a critical element of the national security policies underlying the laws and regulations governing foreign direct investment in the United States, including controlling the transfer of critical technologies to certain foreign persons. Thus, the President, in coordination with the Secretary, the Secretary of Defense, the Secretary of State, the Secretary of Energy, and the heads of other Federal agencies, as appropriate, should have a regular and robust process to identify the emerging and other types of critical technologies of concern and regulate their release to foreign persons as warranted regardless of the nature of the underlying transaction. Such identification efforts should draw upon the resources and expertise of all relevant parts of the United States Government, industry, and academia. These efforts should be in addition to traditional efforts to modernize and update the lists of controlled items under the multilateral export control regimes.

(11) The authority under this part may be exercised only in furtherance of all of the objectives set forth in paragraphs (1) through (10).

**SEC. 1753. [50 U.S.C. 4812] AUTHORITY OF THE PRESIDENT.**

(c) APPLICATION OF CONTROLS.—The President shall impose controls over the export, reexport, or in-country transfer of items for purposes of the objectives described in subsections (b)(1) or (b)(2) without regard to the nature of the underlying transaction or any circumstances pertaining to the activity, including whether such export, reexport, or in-country transfer occurs pursuant to a purchase order or other contract requirement, voluntary decision, inter-company arrangement, marketing effort, or during a joint venture, joint development agreement, or similar collaborative agreement.

This part may be cited as the “Anti-Boycott Act of 2018”.

### SEC. 1772. [50 U.S.C. 4841] STATEMENT OF POLICY.

Congress declares it is the policy of the United States—

(1) to oppose restrictive trade practices or boycotts fostered or imposed by any foreign country against other countries friendly to the United States or against any United States person;

(2) to encourage and, in specified cases, require United States persons engaged in the export of goods or technology or other information to refuse to take actions, including furnishing information or entering into or implementing agreements, which have the effect of furthering or supporting the restrictive trade practices or boycotts fostered or imposed by any foreign country against a country friendly to the United States or any United States person; and

(3) to foster international cooperation and the development of international rules and institutions to assure reasonable access to world supplies.

### SEC. 1773. [50 U.S.C. 4842] FOREIGN BOYCOTTS.

(a) PROHIBITIONS AND EXCEPTIONS.—

(1) PROHIBITIONS.—For the purpose of implementing the policies set forth in section 1772, the President shall issue regulations prohibiting any United States person, with respect to that person’s activities in the interstate or foreign commerce of the United States, from taking or knowingly agreeing to take any of the following actions with intent to comply with, fur-

The mere absence of a business relationship with or in the boycotted country with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person, does not indicate the existence of the intent required to establish a violation of regulations issued to carry out this subparagraph.

Nothing in this subparagraph shall prohibit the furnishing of normal business information in a commercial context as defined by the Secretary.

(E) Furnishing information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of any charitable or fraternal organization which supports the boycotted country.

(F) Paying, honoring, confirming, or otherwise implementing a letter of credit which contains any condition or requirement compliance with which is prohibited by regulations issued pursuant to this paragraph, and no United States person shall, as a result of the application of this paragraph, be obligated to pay or otherwise honor or implement such letter of credit.

(C) complying or agreeing to comply in the normal course of business with the unilateral and specific selection by a boycotting country, or national or resident thereof, of carriers, insurers, suppliers of services to be performed within the boycotting country or specific goods which, in the normal course of business, are identifiable by source when imported into the boycotting country;

(D) complying or agreeing to comply with export requirements of the boycotting country relating to shipments or transshipments of exports to the boycotted country, to any business concern of or organized under the laws of the boycotted country, or to any national or resident of the boycotted country;

(F) compliance by a United States person resident in a foreign country or agreement by such person to comply with the laws of that country with respect to his activities exclusively therein, and such regulations may contain exceptions for such resident complying with the laws or regulations of that foreign country governing imports into such country of trademarked, trade named, or similarly specifically identifiable products, or components of products for his own use, including the performance of contractual services within that country, as may be defined by such regulations.

(3) SPECIAL RULES.—Regulations issued pursuant to paragraphs (2)(C) and (2)(F) shall not provide exceptions from paragraphs (1)(B) and (1)(C).

(4) RULE OF CONSTRUCTION.—Nothing in this subsection may be construed to supersede or limit the operation of the antitrust or civil rights laws of the United States.

Such person shall also report to the Secretary whether such person intends to comply and whether such person has complied with such request. Any report filed pursuant to this paragraph shall be made available promptly for public inspection and copying, except that information regarding the quantity, description, and value of any goods or technology to which such report relates may be kept confidential if the Secretary determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Secretary shall periodically transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary, considers appropriate for carrying out the policies set forth in section 1772.

(c) PREEMPTION.—The provisions of this section and the regulations issued pursuant thereto shall preempt any law, rule, or regulation of any of the several States or the District of Columbia, or any of the territories or possessions of the United States, or of any governmental subdivision thereof, which law, rule, or regulation pertains to participation in, compliance with, implementation of, or the furnishing of information regarding restrictive trade practices or boycotts fostered or imposed by foreign countries against other countries friendly to the United States.

That Act established a formal process for the submission of claims for medical expenses and lump sum compensation for former employees and contractors and survivors of those former employees and contractors.

(3) As of the date of the enactment of this Act, more than 150,231 claims have been paid out under the Radiation Exposure Compensation Act and the Energy Employees Occupational Illness Compensation Program Act of 2000, for a total of at least \$17,400,000,000 in lump sum compensation and medical expenses.
