Approximately 60 armed suspected Khmer Rouge militants attacked two fishing villages on the Tonle Sap lake in Kampong Chhnang Province, killing 21 persons and wounding at least nine others, according to press accounts. Twelve of the victims were Vietnamese nationals. The attack occurred in the early morning when the victims were asleep.

Yemen

Press reported that tribesmen kidnapped a British Council official, along with his wife and son, as they traveled from Aden to Sanaa. The kidnappers released the hostages on 3 May.

18 April

India

Muslim militants attacked Barankot village in Udhampur district, Kashmir, killing 29 persons, according to press reports. Lashkar-i-Taiba claimed responsibility for the massacre.

19 April

Venezuela

Unidentified Colombian guerrillas kidnapped a Venezuelan cattleman in Los Flores hacienda. On 23 April the Venezuelan Directorate of Intelligence and Prevention Services rescued the hostage.

22 April

Angola

Suspected secessionists from the Front for the Liberation of the Cabinda Enclave abducted a Portuguese citizen and nine Angolans in Cabinda, according to press reports. The victims are employed by Mota & Company, a Portuguese construction company. The Portuguese hostage was released unharmed on 24 June.

Iraq

A gunman shot and killed an Iranian clergyman and injured his two companions in An Najaf, according to press reports. No one claimed responsibility for the attack.

23 April

Yemen

A police officer from the Al-Marakesha tribe kidnapped a Ukrainian citizen on his way to Sanaa and handed him over to the tribe, according to press reports. Tribesmen released the hostage the next day.

24 April

Yemen

A bomb exploded in the courtyard of the Al-Kheir mosque after midday prayers in Sanaa, according to US Embassy reporting. The explosion killed two persons and wounded 26 others, including two United States citizens, one Canadian, one Libyan, and several Somalis.

25 April

Colombia

FARC guerrillas kidnapped a Palestinian connected to the Palestine Liberation Organization in Bogota. The victim is a Colombian citizen who has resided in Colombia for the past 20 years. On 17 July the FARC rebels released the hostage, reportedly at the request of the International Red Cross and of a special envoy of the Palestinian Authority.

Late April

Angola

Militants thought to be from the National Union for the Total Independence of Angola (UNITA) abducted a Portuguese couple involved in trading, according to the press. An administrative source told the Angolan Press Agency that the abduction occurred after 150 armed men occupied the commune of Ebanga. UNITA does not have a history of kidnapping foreigners, and the motive is unclear.

1 May

India

A bomb exploded under a crowded bus in Shupiyan, injuring six persons, according to press reports. Muslim militants are suspected.

4 May

India

Near Manchar, east of Jammu, Kashmir, police reported that suspected Muslim militants killed four members of a village defense committee, four other villagers and one police officer.

5 May

India

Armed Islamic militants reportedly entered a home in Surankote, north of Jammu and killed four persons.

6 May

India

Suspected Muslim militants killed five Hindu family members during a funeral procession outside the town of Punch, Kashmir, according to US Embassy reports.

16 May

Colombia

Six unidentified heavily armed men kidnapped an Italian engineer near Medellin. The engineer, who was overseeing the construction of a tunnel, was taken from his car and forced to enter a taxi with the gunmen, according to police reports. Police said it was unclear whether the kidnappers were leftist guerrillas.

India

In Binola Chuora village, Kashmir, militants killed at least seven persons. According to press accounts, the victims were former mili-

tants who had become police informants or members of village defense groups opposed to the militants.

19 May

Angola

Armed assailants attacked a marked United Nations vehicle at Calandula, killing one Angolan interpreter working for the UN and wounding two other UN employees and one Angolan police officer. A UN spokesperson blamed UNITA.

22 May

Sudan

Guerrillas from the Sudan People's Liberation Army (SPLA) abducted a British contractor for the World Food Program (WFP) and held him for ransom in an SPLA-controlled area of southern Sudan, according to official sources. The victim is employed by Terra Firma and was on a survey mission for WFP when he was abducted. SPLA demanded $58,000 and 125 drums of diesel fuel. The contractor was released on 19 June.

23 May

India

A provincial legislator, his driver, a bodyguard, and three others were injured seriously when a bomb detonated on the outskirts of Srinagar, according to police reports. Their armored car was totally destroyed. Pakistani-supported Muslim militants are suspected.

26 May

Venezuela

Three armed FARC guerrillas kidnapped a Venezuelan engineer in La Victoria. On 18 June the rebels released the engineer and gave him money to travel home. The hostage told authorities that the FARC stated they intended to kidnap a businessman from that area but took him by mistake.

27 May

Colombia

In Santa Marta, 20 National Liberation Army (ELN) rebels bombed the offices of a subsidiary of the US-owned Dole company. The guerrillas overpowered the guards, gagged the employees, and destroyed files before detonating four bombs, partially destroying the headquarters. The rebels painted graffiti accusing the company owners of assisting paramilitary groups in the region. The rebels opened fire on the police as they escaped.

1 June

India

Local press reported that a bomb exploded at a busy market in the heart of Jammu, Kashmir, killing one child and injuring 19 other persons. At least 10 shops were damaged. Indian officials suspect that Muslim militants are responsible.

India

A bomb exploded at an Army base in Jammu, Kashmir, killing two civilians and damaging the Army's intelligence wing. Indian officials suspect that Muslim militants are responsible.

3 June

Turkey
Armed PKK militants kidnapped a German tourist and a Turkish truck driver at a roadblock in Agri, according to press reports. The German tourist was found unharmed the next morning near the kidnapping site, but the truck driver still is missing.

7 June

Pakistan
Police reported that a bomb ripped through an 18-car passenger train en route from Karachi to Peshawar, killing 23 persons and wounding at least 32 others, and destroying one railcar. Pakistan blames India's Research and Analysis Wing for the bombing. Indian officials deny the accusation.

18 June

Iraq
Unidentified assailants shot and killed an Iranian Shiite cleric, two of his relatives, and his driver. The victims were driving back to An Najaf after a pilgrimage to a shrine in Karbala'.

Yemen
Tribesmen kidnapped nine Italian tourists and their Yemeni driver in Husn al-Ghurab in the Bir Ali area of Mayfaah District. The tribesmen demanded the government pay them 800,000 riyals that were pledged to them in a previous agreement, compensation for a car lost in the civil war in 1994, and construction of a school and health facility in their region. The kidnappers released two elderly women and the driver on 19 June and the remaining seven hostages on 21 June.

19 June

India
Five armed militants attacked Hindu villagers in Champnari village in Jammu's Doda District, killing at least 25 persons and injuring seven others, according to police reports. The victims were members of two wedding parties. Indian officials blame Pakistani-backed Muslim militants.

21 June

Lebanon
Unknown assailants fired four rocket-propelled grenades in the direction of the US Embassy in Beirut. The rockets exploded immediately after being launched, missing the Embassy.

23 June

India
A remote-controlled bomb exploded under the Delhi-bound Shalimar Express in Kashmir, injuring at least 35 of the 2,000 passengers and derailing seven cars, according to press reports. A police spokesperson stated that Muslim militants are suspected.

25 June

Ethiopia
Six staff members of the International Committee of the Red Cross were abducted when they were traveling from Gode to Degeh Bur in three marked vehicles. The ICRC members include one Swiss national and five ethnic Somalis. On 3 July the Islamic group al-

Ittihad al-Islami claimed responsibility, stating that the hostages were under investigation for spying. On 10 July the hostages were released.

Colombia

FARC rebels kidnapped a Canadian, a Bolivian, and a Colombian citizen in Santander Department. The Bolivian citizen works for a Colombian-German firm, while both the Canadian and Colombian work for a Canadian mining company. The three men were kidnapped while driving on a rural road.

28 June

India

According to press reports, a bomb hidden in a lunchbox detonated in Achaval Gardens, a popular picnic site in Anantnag, Kashmir. Two persons were killed and at least fifteen persons were injured in the blast.

8 July

Uganda

A United Nations World Food Program (WFP) worker was killed instantly when guerrillas from the Uganda National Rescue Front II fired a rocket-propelled grenade at his WFP truck.

14 July

Colombia

FARC rebels kidnapped an Ecuadorian citizen near Medellin. The victim, a US resident, was enroute to visit his family in Ecuador when he was abducted. The FARC demanded $1 million for his release.

17 July

India

An unidentified militant threw a grenade in the Jehangir Chowk area in Srinagar, Kashmir, injuring 13 persons, according to press accounts. A police official stated that the grenade was thrown at a Border Security Force post but exploded in the road instead. No one claimed responsibility, but police believe that Muslim militants are behind the attack.

18 July

Ecuador

The Indigenous Defense Front for Pastaza Province (FDIP) kidnapped three employees of an Ecuadorian pipeline maker subcontracted by a US oil company in Pastaza Province. The group accuses the company of causing environmental damage in its oilfield developments. On 28 July the FDIP released one hostage, and it released the remaining two hostages the next day.

20 July

Tajikistan

Unidentified assailants ambushed and killed four members of the United Nations Mission of Observers in the Tavildara area. The victims included military observers from Poland and Uruguay, a Japanese Civil Affairs officer, and a Tajikistani interpreter.

22 July

Yemen

An assailant possibly associated with the Abu Nidal organization murdered an Egyptian citizen in Sanaa. The victim, Muhammad Salah Sha'ban, was the Imam of al-Husayni Mosque in Sanaa. The motive for the murder of Sha'ban—reportedly a member of the Egyptian al-Gama'at-al-Islamiyya—is unclear.

24 July

India

A bomb exploded near the railroad tracks moments after the Shalimar Express passed by in Jammu and Kashmir, killing one soldier and injuring two civilians. Indian officials believe that Muslim militants are responsible.

25 July

Yemen

A Yemeni shot and killed three Catholic nuns, one Filipino, and two Indians in the Red Sea port city of Al Hudaydah. Press reports stated that the assailant considers himself a Muslim fundamentalist and that he trained in Bosnia as a fighter, but Yemeni officials described him as "deranged."

26 July

India

A bomb exploded on an empty bus parked at the interstate bus terminal in New Delhi, killing two persons and injuring at least eight others, according to police reports. The bomb destroyed the bus and caused major damage to six others.

28 July

India

According to police reports, suspected Muslim militants killed ten villagers in a predawn attack northwest of Doda, Kashmir. Five persons are reported missing.

India

In Doda, Kashmir, suspected Muslim militants killed at least eight members of two Hindu families and wounded three others. Eyewitnesses reported that the gunmen lined up the victims and shot them at point blank range.

1 August

Northern Ireland

A 500-pound car bomb exploded outside a shoe store in Banbridge, injuring 35 persons and damaging at least 200 homes. Authorities had received a warning telephone call and were evacuating the area when the bomb went off. The Real IRA, the Republic of Ireland-based military wing of the 32 County Sovereignty Council, claimed responsibility.

4 August

India

Suspected militants from the Harakat ul-Mujahidin (HUM) gunned down 19 persons near Surankot, Kashmir, according to the Indian Border Security Force and press reports. Two survivors traveled six hours on foot to report the attack to authorities. The victims were family members of a rival group that reportedly had been collaborating with Indian security forces.

India
Unidentified assailants with automatic rifles opened fire on a group of sleeping laborers at a remote construction site in Himachal Pradesh, killing 26 persons and wounding eight others. As the militants headed back to Kashmir they attacked a second group of workers, killing eight persons and wounding three others. Authorities suspect Pakistani-backed militants.

India
According to eyewitness reports, militants detonated a grenade in a crowded marketplace in Lal Chowk, Srinagar, Kashmir, injuring seven persons.

7 August

Kenya
A bomb exploded at the rear entrance of the US Embassy in Nairobi, killing 12 US citizens, 32 Foreign Service Nationals (FSNs), and 247 Kenyan citizens. Approximately 5,000 Kenyans, six US citizens, and 13 FSNs were injured. The US Embassy building sustained extensive structural damage. The US Government is holding terrorist financier Usama Bin Ladin responsible.

Tanzania
Almost simultaneously, a bomb detonated outside the US Embassy in Dar es Salaam, killing seven FSNs and three Tanzanian citizens, and injuring one US citizen and 76 Tanzanians. The explosion caused major structural damage to the US Embassy facility. The US Government holds Usama Bin Ladin responsible.

10 August

India
Unidentified assailants threw a grenade and fired automatic weapons into a crowded bus in Anantnag, Kashmir, killing four persons and injuring seven others, according to police reports. Authorities suspect Pakistani-backed separatists.

12 August

Democratic Republic of the Congo
Suspected former Rwandan soldiers abducted six tourists—one Canadian, two Swedes, and three New Zealanders—after the tourists crossed into the Congo from Uganda. Two of the New Zealanders escaped one week later, and the Canadian was released on 19 August with a statement from a previously unknown group called People in Action for the Liberation of Rwanda. The group claimed responsibility and stated that the remaining captives would be freed if a message from the group was read over BBC broadcasts in Africa. The remaining hostages reportedly were sighted in the forests in eastern Congo.

14 August

Sri Lanka
The Liberation Tigers of Tamil Eelam (LTTE) seized a Dubai-owned cargo ship and abducted 21 crew-members, including 17 Indian nationals. The LTTE evacuated the crew before the Sri Lankan Air Force bombed and destroyed the ship, on the suspicion that the vessel was transporting supplies to the LTTE. The 17 Indian hostages were released to the International Committee of the

Red Cross on 19 August. The LTTE continues to hold four Sri Lankans hostage.

15 August

Northern Ireland

A 500-pound car bomb exploded outside a local courthouse in Omag's central shopping district, killing 29 persons and injuring more than 330. Authorities were in the process of clearing the shopping area around the courthouse when the bomb exploded. On 17 August authorities arrested five local men suspected of involvement in the bombing. The Real IRA claimed responsibility.

25 August

India

Separatist guerrillas threw a grenade at a vehicle carrying security personnel in Srinagar. According to police, the grenade missed its target and exploded in the crowded street, injuring 12 persons.

India

Police reported that unidentified militants threw a grenade in downtown Srinagar, killing one civilian and injuring 11 others.

South Africa

A bomb exploded in the Planet Hollywood restaurant in Capetown, killing one person and injuring at least 24 others—including nine British citizens—and causing major damage. The Muslims Against Global Oppression (MAGO) claimed responsibility in a phone call to a local radio station, stating that the bomb was in retaliation for the US missile attacks on terrorist facilities in Sudan and Afghanistan. Police believe that People Against Gangsterism and Drugs (PAGAD) are responsible.

29 August

Belgium

Arsonists firebombed a McDonald's restaurant in Puurs, destroying the restaurant and causing up to $1.4 million in damage. The Animal Liberation Front (ALF) claimed responsibility for the attack.

2 September

India

Police reported that Muslim militants detonated a landmine under a bus carrying troops from Jammu to Punch, killing the civilian driver and seriously injuring 15 soldiers.

8 September

Philippines

Approximately 30 suspected Muslim militants armed with rifles and grenade launchers abducted an Italian priest and 12 Filipinos from a cooperative store in the parish church. The Filipino hostages were released the next day, but the priest still is being held. No ransom has been demanded. Police suspect either the Abu Sayyaf Group (ASG) or the Moro Islamic Liberation Front (MILF).

9 September

Philippines

Suspected ASG members kidnapped three Hong Kong businessmen in Mindanao. The victims are employed by the Jackaphil Company.

No ransom demand has been made. On 23 December the three kidnapped victims were released unharmed.

21 September

Georgia

Unidentified assailants opened fire on a bus in Sukhumi, wounding three UN military observers and one other UN mission employee, according to UN officials. The injured include two Bangladeshis and one Nigerian.

22 September

Colombia

Suspected FARC members kidnapped a Japanese businessman from his farm in Bogota.

India

Police and doctors reported that unidentified gunmen shot and wounded a French tourist near the Jama Masjid mosque in Srinagar. Witnesses said that two assailants fired at the victim. Muslim guerrillas are suspected.

29 September

Ecuador

A bomb exploded at the Ecuadorian Bishops' Conference, injuring one Spanish missionary and causing major damage. The explosion released leaflets calling for improved cost of living and utility services. Police believe the bombing is linked to a national strike protesting the economic package implemented by the Ecuadorian President.

3 October

Russia

On 3 October 1998 in Groznyy, Chechnya, 20 unidentified armed assailants kidnapped three Britons and one New Zealander. On 8 December partial remains of the hostages were discovered on a roadside.

5 October

Ecuador

Three employees of the Santa Fe Oil Company, two US citizens and one Ecuadorian, were kidnapped, according to local press accounts. One US citizen escaped the next day.

6 October

India

According to police reports, suspected Muslim militants threw a bomb at a vehicle carrying a prominent former militant in Tral, Kashmir, killing him and 10 others.

8 October

India

According to police officials, Muslim militants threw a grenade at a police post in Srinagar, Kashmir, injuring five civilians, four police officers and four soldiers.

India

Police reported that Muslim militants detonated a bomb near the state secretariat building in Srinagar, Kashmir, injuring 13 persons and causing minor damage.

9 October

Pakistan

Police reported that unidentified assailants opened fire on the Iranian Cultural Center in Multan, killing one Pakistani security guard and wounding another.

12 October

Colombia

People's Liberation Army (EPL) rebels kidnapped 20 persons, including four foreigners at a road block on the Northeastern Highway. The rebels burned three cars and released two hostages to report the situation to the media.

18 October

Colombia

A bomb exploded on the Ocensa pipeline in Antioquia Department, killing approximately 71 persons and injuring at least 100 others. The explosion caused major damage when the spilled oil caught fire and burned nearby houses in the town of Machuca. The pipeline is jointly owned by the Colombia State Oil Company Ecopetrol and a consortium including US, French, British, and Canadian companies. On 19 October the ELN claimed responsibility.

26 October

Colombia

Guerrillas abducted a Danish engineer and two Colombians at a roadblock in San Juan. Local authorities suspect the FARC or ELN is responsible. (On 21 January 1999 in Carmen de Bolivar EPL rebels freed the Danish hostage. There have been no reports on the two Colombians.)

28 October

Yemen

Armed tribesmen in the Mahfad region kidnapped two Belgian citizens, demanding the release of a tribesman sentenced to death by a Yemeni court. On 29 October tribesmen released the hostages.

8 November

Angola

In Lunde Norte Province at least 50 armed assailants attacked a Canadian-owned diamond mine, killing one Portuguese national, two Britons, three Angolans, and wounding 18 others. The assailants also took four workers hostage, including one South African, one Briton, and two Filipinos. Angolan officials blame the attack on UNITA. The secretary general of UNITA claimed responsibility for the attack but denied taking hostages.

14 November

India

In Budgam, near Srinagar, Kashmir, a police spokesman reported that militants threw a grenade near a telephone booth, seriously injuring one person.

India

Police reported an explosion at a taxi stand near Srinagar that injured four persons and damaged four vehicles.

15 November

Colombia

Armed assailants followed a US businessman and his family home in Cundinamarca Department and kidnapped his 11-year-old son after stealing money, jewelry, one automobile, and two cell phones. The kidnappers demanded $1 million in ransom.

On 21 January 1999 the US Embassy reported that the kidnappers released the boy to his mother and uncle in Tolima Department. It is not known if any ransom was paid. The kidnappers claim to be members of the Leftist Revolutionary Armed Commandos for Peace in Colombia.

Sierra Leone

Sierra Leone authorities report that rebels led by Sierra Leone's ousted junta leader, Solomon Musa, kidnapped an Italian Catholic missionary from his residence. Musa leads a faction of the Armed Forces Revolutionary Council. Musa demanded a satellite telephone, medical supplies, and radio contact with his wife for release of the priest. His wife, Tina Musa, was arrested in September and is being detained in Freetown.

17 November

Greece

According to press reports, a bomb exploded outside a Citibank branch in Athens, causing major damage. An unidentified telephone caller to a local newspaper claimed the attack was to protest against arrests made during a student march.

India

A bomb exploded near the Madana bridge in Surankot, Kashmir, killing four persons and injuring several others, according to press reporting. Muslim militants are suspected.

India

Press reported a bomb detonated near a crowded bus stand in Anantnag, killing three persons and wounding 38 others.

India

Police reported Muslim militants detonated a grenade in Anantnag, killing three persons and injuring 35 others.

24 November

Yemen

A car bomb exploded near the German Embassy in Sanaa, killing two persons and injuring several others, according to reports from German and Yemeni officials. The German Embassy confirmed that no Germans were killed or injured.

25 November

India

In Handwara, Kashmir, police reported that Muslim militants threw a grenade at a wedding party, injuring 11 persons.

27 November

Uganda

Ugandan officials state that 30 Lord's Resistance Army rebels attacked a World Food Program (WFP) convoy, killing seven persons and wounding 28 others. An eyewitness reported the rebels also abducted five persons believed to be WFP officials, and one other person.

3 December

Colombia

Guerrillas kidnapped one German citizen and two Colombians from a bus at a false roadblock in Cauca Department. The guerrillas set the bus on fire and dynamited a tollbooth after stealing the money. Authorities suspect the FARC or ELN is responsible. On 8 January the ELN released the German citizen unharmed.

6 December

Yemen

Local press reported that armed tribals kidnapped four German tourists in Sanaa, demanding $500,000 ransom and improvements to local health and educational facilities. On 30 December the guerrillas released the hostages.

7 December

Italy

During the week of 7 December the ALF sent panettone cakes laced with rat poison to two branches of the Italian news agency ANSA. Two Italian subsidiaries of Swiss Nestle were forced to halt production, costing the company $30 million. According to Italy's ALF founder, the poisoned cakes were sent to protest Nestle's genetic manipulation of food.

8 December

Colombia

A Spanish newspaper reported that FARC guerrillas kidnapped one Spanish citizen and three Colombians. No ransom demands have been made.

9 December

India

A bomb exploded in a shop in the Punch District of Kashmir, wounding the shopkeeper. Police suspect Muslim militants are responsible.

India

In Bandipura, Kashmir, local press reported that Muslim militants threw a grenade at a group near a bus station, killing three persons and injuring 20 others.

Yemen

In Sanaa, Yemeni passengers on a chartered Egyptian airliner demanded to be flown to Libya. The Egyptian pilot landed the plane in Tunisia and told the 150 passengers he could not fly the plane to Libya due to the UN sanctions. The plane and passengers remained on the ground for 15 hours before returning to Yemen.

23 December

India

Muslim militants forced their way into three homes in three separate villages in Kulham District, Kashmir, killing nine persons, ac-

cording to police reports. The victims were all close relatives of former militants who now support the pro-Indian government militia. Kashmir authorities blame the attacks on the Hizbul Mujahidin.

26 December

Angola

United Nations officials report that a transport plane carrying 10 UN officials and four crew members was shot down over an area of intense fighting between UNITA rebels and government troops. National Radio Services state that UNITA shot down the plane. A UN rescue team arrived at the crash site on 8 January 1999, reporting that no one survived the crash and that the bodies of all 14 persons aboard the plane were accounted for.

28 December

Yemen

Armed militants kidnapped a group of tourists traveling on the main road from Habban to Aden. The victims included two US citizens, twelve Britons, and two Australians. On 29 December Yemeni security forces undertook a rescue attempt, during which three Britons and one Australian were killed, and one US citizen was injured seriously. Yemeni officials reported that the kidnappers belong to the Islamic Jihad, but the investigation is ongoing.

APPENDIX B: BACKGROUND INFORMATION ON TERRORIST GROUPS

The following list of terrorist groups is not exhaustive. It focuses on the groups that were designated foreign terrorist organizations on 8 October 1997 pursuant to the Antiterrorism and Effective Death Penalty Act of 1996 (denoted by an asterisk) but also includes other major groups that were active in 1998. Terrorist groups whose activities were limited in scope in 1998 are not included.

ABU NIDAL ORGANIZATION (ANO)*

a.k.a.: Fatah Revolutionary Council, Arab Revolutionary Council, Arab Revolutionary Brigades, Black September, and Revolutionary Organization of Socialist Muslims

Description: International terrorist organization led by Sabri al-Banna. Split from PLO in 1974. Made up of various functional committees, including political, military, and financial.

Activities: Has carried out terrorist attacks in 20 countries, killing or injuring almost 900 persons. Targets include the United States, the United Kingdom, France, Israel, moderate Palestinians, the PLO, and various Arab countries. Major attacks included the Rome and Vienna airports in December 1985, the Neve Shalom synagogue in Istanbul and the Pan Am Flight 73 hijacking in Karachi in September 1986, and the City of Poros day-excursion ship attack in July 1988 in Greece. Suspected of assassinating PLO deputy chief Abu Iyad and PLO security chief Abu Hul in Tunis in January 1991. ANO assassinated a Jordanian diplomat in Lebanon in January 1994 and has been linked to the killing of the PLO representative there. Has not attacked Western targets since the late 1980s.

Strength: Several hundred plus militia in Lebanon and limited overseas support structure.

Location/Area of Operation: Al-Banna may have relocated to Iraq in December 1998, where the group maintains a presence. Has an operational presence in Lebanon in the Bekaa Valley and several Palestinian refugee camps in coastal areas of Lebanon. Also has a presence in Sudan and Syria, among others. Has demonstrated ability to operate over wide area, including the Middle East, Asia, and Europe.

External Aid: Has received considerable support, including safehaven, training, logistic assistance, and financial aid from Iraq, Libya, and Syria (until 1987), in addition to close support for selected operations.

ABU SAYYAF GROUP (ASG)*

Description: Smallest and most radical of the Islamic separatist groups operating in the southern Philippines. Split from the Moro National Liberation Front in 1991 under the leadership of Abdurajik Abubakar Janjalani, who was killed in a clash with Philippine police on 18 December 1998. Some members have studied or worked in the Middle East and developed ties to Arab mujahidin while fighting and training in Afghanistan.

Activities: Uses bombs, assassinations, kidnappings, and extortion payments to promote an independent Islamic state in western

Mindanao and the Sulu Archipelago, areas in the southern Philippines heavily populated by Muslims. Raided the town of Ipil in Mindanao in April 1995, the group's first large-scale action. Suspected of several small-scale bombings and kidnappings in 1998.

Strength: Unknown, but believed to have about 200 members.

Location/Area of Operation: The ASG operates in the southern Philippines and occasionally in Manila.

External Aid: Probably receives support from Islamic extremists in the Middle East and South Asia.

AL-JIHAD

(see under J)

ALEX BONCAYAO BRIGADE (ABB)

Description: The ABB, the urban hit squad of the Communist Party of the Philippines, was formed in the mid–1980s.

Activities: Responsible for more than 100 murders and believed to have been involved in the 1989 murder of US Army Col. James Rowe in the Philippines. Although reportedly decimated by a series of arrests in late 1995, the murder in June 1996 of a former high-ranking Philippine official, claimed by the group, demonstrates that it still maintains terrorist capabilities. In March 1997 the group announced that it had formed an alliance with another armed group, the Revolutionary Proletarian Army.

Strength: Approximately 500.

Location/Area of Operation: Operates exclusively in Manila.

External Aid: Unknown.

ARMED ISLAMIC GROUP (GIA)*

Description: An Islamic extremist group, the GIA aims to overthrow the secular Algerian regime and replace it with an Islamic state. The GIA began its violent activities in early 1992 after Algiers voided the victory of the Islamic Salvation Front (FIS)—the largest Islamic party—in the first round of legislative elections in December 1991.

Activities: Frequent attacks against civilians, journalists, and foreign residents. In the last several years the GIA has conducted a terrorist campaign of civilian massacres, sometimes wiping out entire villages in its area of operations and frequently killing hundreds of civilians. Since announcing its terrorist campaign against foreigners living in Algeria in September 1993, the GIA has killed more than 100 expatriate men and women—mostly Europeans—in the country. Uses assassinations and bombings, including car bombs, and it is known to favor kidnapping victims and slitting their throats. The GIA hijacked an Air France flight to Algiers in December 1994, and suspicions centered on the group for a series of bombings in France in 1995.

Strength: Unknown, probably several hundred to several thousand.

Location/Area of Operation: Algeria.

External Aid: Algerian expatriates and GIA members abroad, many of whom reside in Western Europe, provide some financial and logistic support. In addition, the Algerian Government has ac-

cused Iran and Sudan of supporting Algerian extremists and severed diplomatic relations with Iran in March 1993.

AUM SUPREME TRUTH (AUM)*

a.k.a.: Aum Shinrikyo

Description: A cult established in 1987 by Shoko Asahara, Aum aims to take over Japan and then the world. Its organizational structure mimicks that of a nation-state, with "finance," "construction," and "science and technology" ministries. Approved as a religious entity in 1989 under Japanese law, the group ran candidates in a Japanese parliamentary election in 1990. Over time, the cult began to emphasize the imminence of the end of the world and stated that the United States would initiate"Armageddon" by starting World War III with Japan. The Japanese Government revoked its recognition of Aum as a religious organization in October 1995, but in 1997 a government panel decided not to invoke the Anti-Subversive Law against the group, which would have outlawed the cult.

Activities: On 20 March 1995 Aum members simultaneously released sarin nerve gas on several Tokyo subway trains, killing 12 persons and injuring up to 6,000. The group was responsible for other mysterious chemical incidents in Japan in 1994. Its efforts to conduct attacks using biological agents have been unsuccessful. Japanese police arrested Asahara in May 1995, and he remained on trial facing seventeen counts of murder at the end of 1998. In 1997 and 1998 the cult resumed its recruiting activities in Japan and opened several commercial businesses. Maintains an Internet homepage that indicates Armageddon and anti-US sentiment remain a part of the cult's world view.

Strength: At the time of the Tokyo subway attack, the group claimed to have 9,000 members in Japan and up to 40,000 worldwide. Its current strength is unknown.

Location/Area of Operation: Operates in Japan, but previously had a presence in Australia, Russia, Ukraine, Germany, Taiwan, Sri Lanka, the former Yugoslavia, and the United States.

External Aid: None.

BASQUE FATHERLAND AND LIBERTY (ETA)*

a.k.a: Euzkadi Ta Askatasuna

Description: Founded in 1959 with the aim of establishing an independent homeland based on Marxist principles in Spain's Basque region and the southwestern French provinces of Labourd, Basse-Navarra, and Soule.

Activities: Primarily bombings and assassinations of Spanish Government officials, especially security and military forces, politicians, and judicial figures. In response to French operations against the group, ETA also has targeted French interests. Finances its activities through kidnappings, robberies, and extortion. Has killed more than 800 persons since it began lethal attacks in the early 1960s; responsible for murdering 6 persons in 1998. ETA declared a "unilateral and indefinite" cease-fire on 17 September 1998.

Strength: Unknown; may have hundreds of members, plus supporters.

Location/Area of Operation: Operates primarily in the Basque autonomous regions of northern Spain and southwestern France, but also has bombed Spanish and French interests elsewhere.

External Aid: Has received training at various times in the past in Libya, Lebanon, and Nicaragua. Some ETA members allegedly have received sanctuary in Cuba. Also appears to have ties to the Irish Republican Army through the two groups' legal political wings.

CONTINUITY IRISH REPUBLICAN ARMY (CIRA)

a.k.a.: Continuity Army Council

Description: Radical terrorist group formed in 1994 as the clandestine armed wing of Republican Sinn Fein, a political organization dedicated to the reunification of Ireland. Established to carry on the republican armed struggle after the Irish Republican Army announced a cease-fire in September 1994.

Activities: Bombings, assassinations, kidnappings, extortion, and robberies. Targets include British military and Northern Irish security targets and Northern Irish Loyalist paramilitary groups. Also has launched bomb attacks against predominantly Protestant towns in Northern Ireland. Does not have an established presence or capability to launch attacks on the UK mainland.

Strength: Fewer than 50 activists. The group probably receives limited support from IRA hardliners, who are dissatisfied with the IRA cease-fire, and other republican sympathizers.

Location/Area of Operation: Northern Ireland, Ireland.

External Aid: Suspected of receiving funds and arms from sympathizers in the United States.

DEMOCRATIC FRONT FOR THE LIBERATION OF PALESTINE (DFLP)*

Description: Marxist-Leninist organization founded in 1969 when it split from the Popular Front for the Liberation of Palestine (PFLP). Believes Palestinian national goals can be achieved only through revolution of the masses. In early 1980s occupied political stance midway between Arafat and the rejectionists. Split into two factions in 1991; Nayif Hawatmah leads the majority and more hardline faction, which continues to dominate the group. Joined with other rejectionist groups to form the Alliance of Palestinian Forces (APF) to oppose the Declaration of Principals signed in 1993. Broke from the APF—along with the Popular Front for the Liberation of Palestine (PFLP)—over ideological differences. Has made limited moves toward merging with the PFLP since the mid–1990s.

Activities: In the 1970s conducted numerous small bombings and minor assaults and some more spectacular operations in Israel and the occupied territories, concentrating on Israeli targets. Involved only in border raids since 1988, but continues to oppose the Israel-PLO peace agreement.

Strength: Estimated at 500 (total for both factions).

Location/Area of Operation: Syria, Lebanon, and the Israeli-occupied territories; terrorist attacks have taken place entirely in Israel and the occupied territories. Conducts occasional guerrilla operations in southern Lebanon.

External Aid: Receives limited financial and military aid from Syria.

AL-GAMA'AT AL-ISLAMIYYA (ISLAMIC GROUP, IG) *

Description: Egypt's largest militant group, active since the late 1970s; appears to be loosely organized. Has an external wing with a worldwide presence. Signed Usama Bin Ladin's fatwa in February 1998 calling for attacks against US civilians but publicly has denied that it supports Bin Ladin. Shaykh Umar Abd al-Rahman is al-Gama'at's preeminent spiritual leader, and the group publicly has threatened to retaliate against US interests for his incarceration. Primary goal is to overthrow the Egyptian Government and replace it with an Islamic state.

Activities: Armed attacks against Egyptian security and other government officials, Coptic Christians, and Egyptian opponents of Islamic extremism. Al-Gama'at has launched attacks on tourists in Egypt since 1992, most notably the attack in November 1997 at Luxor that killed 58 foreign tourists. Also claimed responsibility for the attempt in June 1995 to assassinate Egyptian President Hosni Mubarak in Addis Ababa, Ethiopia.

Strength: Unknown, but probably several thousand hardcore members and another several thousand sympathizers.

Location/Area of Operation: Operates mainly in the Al Minya, Asyu't, Qina, and Soha Governorates of southern Egypt. Also appears to have support in Cairo, Alexandria, and other urban locations, particularly among unemployed graduates and students. Has a worldwide presence, including in the United Kingdom, Afghanistan, and Austria.

External Aid: Unknown. The Egyptian Government believes that Iranian, Sudanese, and Afghan militant groups support the IG.

HAMAS (ISLAMIC RESISTANCE MOVEMENT)*

Description: Formed in late 1987 as an outgrowth of the Palestinian branch of the Muslim Brotherhood. Various HAMAS elements have used both political and violent means, including ter-

rorism, to pursue the goal of establishing an Islamic Palestinian state in place of Israel. Loosely structured, with some elements working clandestinely and others working openly through mosques and social service institutions to recruit members, raise money, organize activities, and distribute propaganda. HAMAS's strength is concentrated in the Gaza Strip and a few areas of the West Bank. Also has engaged in peaceful political activity, such as running candidates in West Bank Chamber of Commerce elections.

Activities: HAMAS activists, especially those in the Izz el-Din al-Qassam Brigades, have conducted many attacks—including large-scale suicide bombings—against Israeli civilian and military targets, suspected Palestinian collaborators, and Fatah rivals.

Strength: Unknown number of hardcore members; tens of thousands of supporters and sympathizers.

Location/Area of Operation: Primarily the occupied territories, Israel, and Jordan.

External Aid: Receives funding from Palestinian expatriates, Iran, and private benefactors in Saudi Arabia and other moderate Arab states. Some fundraising and propaganda activity take place in Western Europe and North America.

HARAKAT UL-MUJAHIDIN (HUM)

Description: Formerly the Harakat ul-Ansar, which was designated a foreign terrorist organization in October 1997. HUM is an Islamic militant group based in Pakistan that operates primarily in Kashmir. Leader Fazlur Rehman Khalil has been linked to Bin Ladin and signed his fatwa in February 1998 calling for attacks on US and Western interests. Operates terrorist training camps in eastern Afghanistan and suffered casualties in the US missile strikes on Bin Ladin-associated training camps in Khowst in August 1998. Fazlur Rehman Khalil subsequently said that HUM would take revenge on the United States.

Activities: Has conducted a number of operations against Indian troops and civilian targets in Kashmir. Linked to the Kashmiri militant group al-Faran that kidnapped five Western tourists in Kashmir in July 1995; one was killed in August 1995, and the other four reportedly were killed in December of the same year.

Strength: Has several thousand armed supporters located in Azad Kashmir, Pakistan, and India's southern Kashmir and Doda regions. Supporters are mostly Pakistanis and Kashmiris, and also include Afghans and Arab veterans of the Afghan war. Uses light and heavy machineguns, assault rifles, mortars, explosives, and rockets.

Location/Area of Operation: Based in Muzaffarabad, Pakistan, but members conduct insurgent and terrorist activities primarily in Kashmir. The HUM trains its militants in Afghanistan and Pakistan.

External Aid: Collects donations from Saudi Arabia and other Gulf and Islamic states and from Pakistanis and Kashmiris. The source and amount of HUA's military funding are unknown.

HIZBALLAH (PARTY OF GOD)*

a.k.a.: Islamic Jihad, Revolutionary Justice Organization, Organization of the Oppressed on Earth, and Islamic Jihad for the Liberation of Palestine

Description: Radical Shia group formed in Lebanon; dedicated to creation of Iranian-style Islamic republic in Lebanon and removal of all non-Islamic influences from the area. Strongly anti-West and anti-Israel. Closely allied with, and often directed by, Iran but may have conducted operations that were not approved by Tehran.

Activities: Known or suspected to have been involved in numerous anti-US terrorist attacks, including the suicide truck bombing of the US Embassy and US Marine barracks in Beirut in October 1983 and the US Embassy annex in Beirut in September 1984. Elements of the group were responsible for the kidnapping and detention of US and other Western hostages in Lebanon. The group also attacked the Israeli Embassy in Argentina in 1992.

Strength: Several thousand.

Location/Area of Operation: Operates in the Bekaa Valley, the southern suburbs of Beirut, and southern Lebanon. Has established cells in Europe, Africa, South America, North America, and elsewhere.

External Aid: Receives substantial amounts of financial, training, weapons, explosives, political, diplomatic, and organizational aid from Iran and Syria.

IRISH REPUBLICAN ARMY (IRA)

a.k.a.: Provisional Irish, Republican Army (PIRA), the Provos

Description: Radical terrorist group formed in 1969 as clandestine armed wing of Sinn Fein, a legal political movement dedicated to removing British forces from Northern Ireland and unifying Ireland. Has a Marxist orientation. Organized into small, tightly knit cells under the leadership of the Army Council.

Activities: Bombings, assassinations, kidnappings, extortion, and robberies. Before its cease-fire in 1994, targets included senior British Government officials, British military and Royal Ulster Constabulary targets in Northern Ireland, and a British military facility on the European Continent. The IRA has been observing a cease-fire since July 1997; the group's previous cease-fire was from 1 September 1994 to February 1996.

Strength: Several hundred, plus several thousand sympathizers.

Local/Area of Operation: Northern Ireland, Ireland, Great Britain, and Europe.

External Aid: Has received aid from a variety of groups and countries and considerable training and arms from Libya and, at one time, the PLO. Is suspected of receiving funds and arms from sympathizers in the United States. Similarities in operations suggest links to the ETA.

ISLAMIC RESISTANCE MOVEMENT (SEE HAMAS)

JAMAAT UL-FUQRA

Description: Islamic sect that seeks to purify Islam through violence. Led by Pakistani cleric Shaykh Mubarik Ali Gilani, who es-

tablished the organization in the early 1980s. Gilani now resides in Pakistan, but most cells are located in North America and the Caribbean. Members have purchased isolated rural compounds in North America to live communally, practice their faith, and insulate themselves from Western culture.

Activities: Fuqra members have attacked a variety of targets that they view as enemies of Islam, including Muslims they regards as heretics and Hindus. Attacks during the 1980s included assassinations and firebombings across the United States. Fuqra members in the United States have been convicted of criminal violations, including murder and fraud.

Strength: Unknown.

Location/Area of Operation: North America, Pakistan.

External Aid: None.

JAPANESE RED ARMY (JRA)*

a.k.a.: Anti-Imperialist International Brigade (AIIB)

Description: An international terrorist group formed around 1970 after breaking away from Japanese Communist League-Red Army Faction. Led by Fusako Shigenobu, believed to be in Syrian-garrisoned area of Lebanon's Bekaa Valley. Stated goals are to overthrow Japanese Government and monarchy and help foment world revolution. Organization unclear but may control or at least have ties to Anti-Imperialist International Brigade (AIIB). Also may have links to Antiwar Democratic Front, an overt leftist political organization in Japan. Details released following arrest in November 1987 of leader Osamu Maruoka indicate that JRA may be organizing cells in Asian cities, such as Manila and Singapore. Has had close and longstanding relations with Palestinian terrorist groups—based and operating outside Japan—since its inception.

Activities: During the 1970s JRA conducted a series of attacks around the world, including the massacre in 1972 at Lod Airport in Israel, two Japanese airliner hijackings, and an attempted takeover of the US Embassy in Kuala Lumpur. In April 1988, JRA operative Yu Kikumura was arrested with explosives on the New Jersey Turnpike, apparently planning an attack to coincide with the bombing of a USO club in Naples and a suspected JRA operation that killed five, including a US servicewoman. Kikumura was convicted of these charges and is serving a lengthy prison sentence in the United States. In March 1995, Ekita Yukiko, a longtime JRA activist, was arrested in Romania and subsequently deported to Japan. Eight others have been arrested since 1996, but leader Shigenobu remains at large.

Strength: About eight hardcore members; undetermined number of sympathizers.

Location/Area of Operation: Location unknown, but possibly based in Syrian-controlled areas of Lebanon.

External Aid: Unknown.

AL-JIHAD*

a.k.a.: Jihad Group, Islamic Jihad, Vanguards of Conquest, Talaa' al-Fateh

Description: Egyptian Islamic extremist group active since the late 1970s. Appears to be divided into two factions: one led by

Ayman al-Zawahiri—who currently is in Afghanistan and is a key leader in terrorist financier Usama Bin Ladin's new World Islamic Front—and the Vanguards of Conquest (Talaa' al-Fateh) led by Ahmad Husayn Agiza. Abbud al-Zumar, leader of the original Jihad, is imprisoned in Egypt and recently joined the group's jailed spiritual leader, Shaykh Umar Abd al-Rahman, in a call for a "peaceful front." Primary goal is to overthrow the Egyptian Government and replace it with an Islamic state. Increasingly willing to target US interests in Egypt.

Activities: Specializes in armed attacks against high-level Egyptian Government officials. The original Jihad was responsible for the assassination in 1981 of Egyptian President Anwar Sadat. Appears to concentrate on high-level, high-profile Egyptian Government officials, including cabinet ministers. Claimed responsibility for the attempted assassinations of Interior Minister Hassan al-Alfi in August 1993 and Prime Minister Atef Sedky in November 1993. Has not conducted an attack inside Egypt since 1993 and never has targeted foreign tourists there. Has threatened to retaliate against the United States, however, for its incarceration of Shaykh Umar Abd al-Rahman and, more recently, for the arrests of its members in Albania, Azerbaijan, and the United Kingdom.

Strength: Not known, but probably several thousand hardcore members and another several thousand sympathizers among the various factions.

Location/Area of Operation: Operates in the Cairo area. Has a network outside Egypt, including Afghanistan, Pakistan, the United Kingdom, and Sudan.

External Aid: Not known. The Egyptian Government claims that Iran, Sudan, and militant Islamic groups in Afghanistan—including Usama Bin Ladin—support the Jihad factions. Also may obtain some funding through various Islamic nongovernmental organizations.

KACH* AND KAHANE CHAI*

Description: Stated goal is to restore the biblical state of Israel. Kach (founded by radical Israeli-American rabbi Meir Kahane) and its offshoot Kahane Chai, which means "Kahane Lives," (founded by Meir Kahane's son Binyamin following his father's assassination in the United States) were declared to be terrorist organizations in March 1994 by the Israeli Cabinet under the 1948 Terrorism Law. This followed the groups' statements in support of Dr. Baruch Goldstein's attack in February 1994 on the al-Ibrahimi Mosque—Goldstein was affiliated with Kach—and their verbal attacks on the Israeli Government.

Activities: Organize protests against the Israeli Government. Harass and threaten Palestinians in Hebron and the West Bank. Have threatened to attack Arabs, Palestinians, and Israeli Government officials. Claimed responsibility for several shootings of West Bank Palestinians that killed four persons and wounded two in 1993.

Strength: Unknown.

Location/Area of Operation: Israel and West Bank settlements, particularly Qiryat Arba' in Hebron.

External Aid: Receives support from sympathizers in the United States and Europe.

KHMER ROUGE

(see The Party of Democratic Kampuchea)

KURDISTAN WORKERS' PARTY (PKK)*

Description: Established in 1974 as a Marxist-Leninist insurgent group primarily composed of Turkish Kurds. In recent years has moved beyond rural-based insurgent activities to include urban terrorism. Seeks to establish an independent Kurdish state in southeastern Turkey, where the population is predominantly Kurdish.

Activities: Primary targets are Turkish Government security forces in Turkey but also has been active in Western Europe against Turkish targets. Conducted attacks on Turkish diplomatic and commercial facilities in dozens of West European cities in 1993 and again in spring 1995. In an attempt to damage Turkey's tourist industry, the PKK has bombed tourist sites and hotels and kidnapped foreign tourists.

Strength: Approximately 10,000 to 15,000. Has thousands of sympathizers in Turkey and Europe.

Location/Area of Operation: Operates in Turkey, Europe, the Middle East, and Asia.

External Aid: Has received safehaven and modest aid from Syria, Iraq, and Iran. The Syrian Government claims to have expelled the PKK from its territory in October 1998.

LIBERATION TIGERS OF TAMIL EELAM (LTTE)*

Known front organizations: World Tamil Association (WTA), World Tamil Movement (WTM), the Federation of Associations of Canadian Tamils (FACT), the Ellalan Force, the Sangillan Force.

Description: The most powerful Tamil group in Sri Lanka, founded in 1976. Uses overt and illegal methods to raise funds, acquire weapons, and publicize its cause of establishing an independent Tamil state. Began its armed conflict with the Sri Lankan Government in 1983 and relies on a guerrilla strategy that includes the use of terrorist tactics.

Activities: Has integrated a battlefield insurgent strategy with a terrorist program that targets not only key government personnel in the countryside but also senior Sri Lankan political and military leaders in Colombo. LTTE political assassinations and bombings have become commonplace, including suicide attacks against Sri Lankan President Ranasinghe Premadasa in 1993 and Indian Prime Minister Rajiv Gandhi in 1991. Has refrained from targeting Western tourists out of fear that foreign governments would crack down on Tamil expatriates involved in fundraising activities abroad. Prefers to attack vulnerable government facilities and withdraw before reinforcements arrive.

Strength: Approximately 10,000 armed combatants in Sri Lanka; about 3,000 to 6,000 form a trained cadre of fighters. The LTTE also has a significant overseas support structure for fundraising, weapons procurement, and propaganda activities.

Location/Area of Operation: Controls most of the northern and eastern coastal areas of Sri Lanka and has conducted operations throughout the island. Headquartered in the Jaffna peninsula, LTTE leader Velupillai Prabhakaran has established an extensive network of checkpoints and informants to keep track of any outsiders who enter the group's area of control.

External Aid: The LTTE's overt organizations support Tamil separatism by lobbying foreign governments and the United Nations. Also uses its international contacts to procure weapons, communications, and bombmaking equipment. Exploits large Tamil communities in North America, Europe, and Asia to obtain funds and supplies for its fighters in Sri Lanka. Some Tamil communities in Europe also are involved in narcotics smuggling.

LOYALIST VOLUNTEER FORCE (LVF)

Description: Extremist terrorist group formed in 1996 as a splinter of the mainstream loyalist Ulster Volunteer Force (UVF). Seeks to subvert a political settlement with Irish nationalists in Northern Ireland by attacking Catholic politicians, civilians, and Protestant politicians who endorse the Northern Ireland peace process. Composed of hardliners formerly associated with the UVF. Mark "Swinger" Fulton now leads the LVF following the assassination in December 1997 of LVF founder Billy"King Rat" Wright. Announced a unilateral cease-fire on 15 May and, in a move unprecedented among Ulster terrorist groups, decommissioned a small but significant amount of weapons on 18 December 1998.

Activities: Bombings, kidnappings, and close-quarter shooting attacks. LVF bombs often have contained Powergel commercial explosives, typical of many loyalist groups. LVF attacks have been particularly vicious: LVF terrorists killed an 18-year old Catholic girl in July 1997 because she had a Protestant boyfriend. Murdered numerous Catholic civilians with no political or terrorist affiliations following Billy Wright's assassination. Also has conducted successful attacks against Irish targets in Irish border towns.

Strength: British press speculates about 500 activists.

Location/Area of Operation: Northern Ireland, Ireland

External Aid: None.

MANUEL RODRIGUEZ PATRIOTIC FRONT (FPMR)*

Description: Founded in 1983 as the armed wing of the Chilean Communist Party and named for the hero of Chile's war of independence against Spain. Splintered into two factions in the late 1980s, and one faction became a political party in 1991. The dissident wing FPMR/D is Chile's only remaining active terrorist group.

Activities: FPMR/D attacks civilians and international targets, including US businesses and Mormon churches. In 1993, FPMR/D bombed two McDonald's restaurants and attempted to bomb a Kentucky Fried Chicken restaurant. Successful government counterterrorist operations have undercut the organization significantly. Four FPMR/D members escaped from prison using a helicopter in December 1996. One of them, Patricio Ortiz Montenegro, fled to Switzerland where he requested political asylum. Chile requested Ortiz's extradition, but the Swiss Government—fearing

Chile would not safeguard Ortiz's physical and psychological well-being—denied the request. Chilean authorities continued to pursue the whereabouts of the three others who escaped with Ortiz.

Strength: Now believed to have between 50 and 100 members.

Location/Area of Operation: Chile.

External Aid: None.

MUJAHEDIN-E KHALQ ORGANIZATION (MEK OR MKO)*

a.k.a.: The National Liberation Army of Iran (NLA, the militant wing of the MEK), the People's Mujahidin of Iran (PMOI), National Council of Resistance (NCR), Muslim Iranian Student's Society (front organization used to garner financial support)

Description: Formed in the 1960s by the college-educated children of Iranian merchants, the MEK sought to counter what it perceived as excessive Western influence in the Shah's regime. Following a philosophy that mixes Marxism and Islam, has developed into the largest and most active armed Iranian dissident group. Its history is studded with anti-Western activity, and, most recently, attacks on the interests of the clerical regime in Iran and abroad.

Activities: Worldwide campaign against the Iranian Government stresses propaganda and occasionally uses terrorist violence. During the 1970s the MEK staged terrorist attacks inside Iran and killed several US military personnel and civilians working on defense projects in Tehran. Supported the takeover in 1979 of the US Embassy in Tehran. In April 1992 conducted attacks on Iranian embassies in 13 different countries, demonstrating the group's ability to mount large-scale operations overseas. Recent attacks in Iran include three explosions in Tehran in June 1998 that killed three persons and the assassination of Asadollah Lajevardi, the former director of the Evin Prison.

Strength: Several thousand fighters based in Iraq with an extensive overseas support structure. Most of the fighters are organized in the MEK's National Liberation Army (NLA).

Location/Area of Operation: In the 1980s the MEK's leaders were forced by Iranian security forces to flee to France. Most resettled in Iraq by 1987. In the mid–1980s did not mount terrorist operations in Iran at a level similar to its activities in the 1970s. In recent years has claimed credit for a number of operations in Iran.

External Aid: Beyond support from Iraq, the MEK uses front organizations to solicit contributions from expatriate Iranian communities.

MRTA

(see Tupac Amaru Revolutionary Movement)

NATIONAL LIBERATION ARMY (ELN)—COLOMBIA*

Description: Pro-Cuban, anti-US guerrilla group formed in January 1965. Primarily rural based, although has several urban fronts, particularly in the Magdalena Medio region. Entered peace talks with Colombian Civil Society in mid–1998 and was preparing to participate in a national convention in early 1999.

Activities: Conducted weekly assaults on oil infrastructure (typically pipeline bombings) and has inflicted massive oil spills. Extor-

tion and bombings against US and other foreign businesses, especially the petroleum industry. Annually conducts several hundred kidnappings for profit, including foreign employees of large corporations. Forces coca and opium poppy cultivators to pay protection money and attacks government efforts to eradicate these crops.

Strength: Approximately 3,000–5,000 armed combatants and an unknown number of active supporters.

Location/Area of Operation: Colombia, border regions of Venezuela.

External Aid: None.

NEW PEOPLE'S ARMY (NPA)

Description: The guerrilla arm of the Communist Party of the Philippines (CPP), NPA is an avowedly Maoist group formed in December 1969 with the aim of overthrowing the government through protracted guerrilla warfare. Although primarily a rural-based guerrilla group, the NPA has an active urban infrastructure to conduct terrorism and uses city-based assassination squads called sparrow units. Derives most of its funding from contributions of supporters and so-called revolutionary taxes extorted from local businesses.

Activities: Has suffered setbacks since the late 1980s because of splits within the CPP, lack of money, and successful government operations. The NPA primarily targets Philippine security forces, corrupt politicians, and drug traffickers. Opposes any US military presence in the Philippines and attacked US military interests before the US base closures in 1992.

Strength: Estimated between 6,000 to 8,000.

Location/Area of Operation: Operates in rural Luzon, Visayas, and parts of Mindanao. Has cells in Manila and other metropolitan centers.

External Aid: Unknown.

THE PALESTINE ISLAMIC JIHAD (PIJ)*

Description: Originated among militant Palestinians in the Gaza Strip during the 1970s; a series of loosely affiliated factions rather than a cohesive group. Committed to the creation of an Islamic Palestinian state and the destruction of Israel through holy war. Because of its strong support for Israel, the United States has been identified as an enemy of the PIJ. Also opposes moderate Arab governments that it believes have been tainted by Western secularism.

Activities: Has threatened to retaliate against Israel and the United States for the murder of PIJ leader Fathi Shaqaqi in Malta in October 1995. Conducted suicide bombings against Israeli targets in the West Bank, Gaza Strip, and Israel. Has threatened to attack US interests in Jordan.

Strength: Unknown.

Location/Area of Operation: Primarily Israel and the occupied territories and other parts of the Middle East, including Jordan and Lebanon. The largest faction is based in Syria.

External Aid: Receives financial assistance from Iran and limited assistance from Syria.

PALESTINE LIBERATION FRONT (PLF)*

Description: Broke away from the PFLP-GC in mid–1970s. Later split again into pro-PLO, pro-Syrian, and pro-Libyan factions. Pro-PLO faction led by Muhammad Abbas (Abu Abbas), who became member of PLO Executive Committee in 1984 but left it in 1991.

Activities: The Abu Abbas-led faction has conducted attacks against Israel. Abbas's group also was responsible for the attack in 1985 on the cruise ship Achille Lauro and the murder of US citizen Leon Klinghoffer. A warrant for Abu Abbas's arrest is outstanding in Italy.

Strength: At least 50.

Location/Area of Operation: PLO faction based in Tunisia until Achille Lauro attack. Now based in Iraq.

External Aid: Receives support mainly from Iraq. Has received support from Libya in the past.

THE PARTY OF DEMOCRATIC KAMPUCHEA (KHMER ROUGE)*

Description: Communist insurgency trying to overthrow the Cambodian Government. Under Pol Pot's leadership, conducted a campaign of genocide, killing more than 1 million persons during its four years in power in the late 1970s. Defections starting in 1996 and accelerating in spring 1998 appear to have shattered the Khmer Rouge as a military force, but hardline remnants still may pose a threat in remote areas.

Activities: Virtually has disintegrated as a viable insurgent organization because of defections, but hardline remnants continue low-level attacks against government troops in isolated areas. Some small groups may have turned to banditry. Also targets Cambodian and ethnic Vietnamese villagers and occasionally has kidnapped and killed foreigners traveling in remote rural areas.

Strength: Fewer than 500, possibly no more than 100.

Location/Area of Operation: The Khmer Rouge operates in outlying provinces in Cambodia, particularly in the northwest along the border with Thailand.

External Aid: The Khmer Rouge currently does not receive external assistance.

PKK

(see Kurdistan Workers' Party)

POPULAR FRONT FOR THE LIBERATION OF PALESTINE (PFLP)*

Description: Marxist-Leninist group founded in 1967 by George Habash as a member of the PLO. Joined the Alliance of Palestinian Forces (APF) to oppose the Declaration of Principles signed in 1993 and has suspended participation in the PLO. Broke away from the APF, along with the DFLP, in 1996 over ideological differences. Has made limited moves toward merging with the DFLP since the mid–1990s.

Activities: Committed numerous international terrorist attacks during the 1970s. Since 1978 has conducted numerous attacks against Israeli or moderate Arab targets, including killing a settler and her son in December 1996.

Strength: Some 800.

Location/Area of Operation: Syria, Lebanon, Israel, and the occupied territories.

External Aid: Receives most of its financial and military assistance from Syria and Libya.

POPULAR FRONT FOR THE LIBERATION OF PALESTINE-GENERAL COMMAND (PFLP-GC)*

Description: Split from the PFLP in 1968, claiming it wanted to focus more on fighting and less on politics. Violently opposed to Arafat's PLO. Led by Ahmad Jabril, a former captain in the Syrian Army. Closely tied to both Syria and Iran.

Activities: Has conducted numerous cross-border terrorist attacks into Israel using unusual means, such as hot-air balloons and motorized hang gliders.

Strength: Several hundred.

Location/Area of Operation: Headquartered in Damascus with bases in Lebanon and cells in Europe.

External Aid: Receives logistic and military support from Syria and financial support from Iran.

PROVISIONAL IRISH REPUBLICAN ARMY (PIRA)

(see Irish Republican Army)

AL-QAIDA

Description: Established by Usama Bin Ladin about 1990 to bring together Arabs who fought in Afghanistan against the Soviet invasion. Helped finance, recruit, transport, and train Sunni Islamic extremists for the Afghan resistance. Current goal is to "reestablish the Muslim State" throughout the world. Works with allied Islamic extremist groups to overthrow regimes it deems "non-Islamic" and remove Westerners from Muslim countries. Issued statement under banner of "The World Islamic Front for Jihad Against The Jews and Crusaders" in February 1998, saying it was the duty of all Muslims to kill US citizens, civilian or military, and their allies everywhere.

Activities: Conducted the bombings of the US Embassies in Nairobi, Kenya and Dar es Salaam, Tanzania, on 7 August that killed at least 301 persons and injured more than 5,000 others. Claims to have shot down US helicopters and killed US servicemen in Somalia in 1993 and to have conducted three bombings targeted against the US troop presence in Aden, Yemen in December 1992. Linked to plans for attempted terrorist operations, including the assassination of the Pope during his visit to Manila in late1994; simultaneous bombings of the US and Israeli Embassies in Manila and other Asian capitals in late 1994; the midair bombing of a dozen US trans-Pacific flights in 1995; and a plan to kill President Clinton during a visit to the Philippines in early 1995. Continues to train, finance, and provide logistic support to terrorist groups that support these goals.

Strength: May have from several hundred to several thousand members. Also serves as the core of a loose umbrella organization that includes many Sunni Islamic extremist groups, including fac-

tions of the Egyptian Islamic Jihad, the Gama'at al-Islamiyya, and the Harakat ul-Mujahidin.

Location/Area of Operation: The Embassy bombings in Nairobi and Dar es Salaam underscore al-Qaida's global reach. Bin Ladin and his key lieutenants reside in Afghanistan, and the group maintains terrorist training camps there.

External Aid: Bin Ladin, son of a billionaire Saudi family, is said to have inherited around $300 million that he uses to finance the group. Al-Qaida also maintains money-making businesses, collects donations from like-minded supporters, and illicitly siphons funds from donations to Muslim charitable organizations.

QIBLA AND PEOPLE AGAINST GANGSTERISM AND DRUGS (PAGAD)

Description: Qibla is a small radical Islamic group led by Achmad Cassiem, who was inspired by Iran's Ayatollah Khomeini. Cassiem founded Qibla in the 1980s, seeking to establish an Islamic state in South Africa. PAGAD began in 1996 as a community anticrime group fighting drug lords in Cape Town's Cape Flats section. PAGAD now shares Qibla's anti-Western stance as well as some members and leadership. Though distinct, the media often treat the two groups as one.

Activities: Qibla routinely protests US policies toward the Muslim world and uses radio station 786 to promote its message and mobilze Muslims. PAGAD is suspected of conducting 170 bombings and 18 other violent actions in 1998 alone. Qibla and PAGAD may have masterminded the bombing on 15 August of the Cape Town Planet Hollywood. Often use the front names Muslims Against Global Oppression (MAGO) and Muslims Against Illegitimate Leaders (MAIL) when anti-Western campaigns are launched.

Strength: Qibla is estimated at 250 members. Police estimate there are at least 50 gunmen in PAGAD, and the size of PAGAD-organized demonstrations suggests it has considerably more adherents than Qibla.

Location/Area of Operation: Operate mainly in the CapeTown area, South Africa's foremost tourist venue.

External Aid: Probably have ties to Islamic extremists in the Middle East.

REAL IRA (RIRA)

a.k.a: True IRA

Description: Formed in February-March 1998 as clandestine armed wing of the 32-County Sovereignty Movement, a "political pressure group" dedicated to removing British forces from Northern Ireland and unifying Ireland. The 32-County Sovereignty Movement opposed Sinn Fein's adoption in September 1997 of the Mitchell principles of democracy and nonviolence and opposed the amendment in May 1998 of Articles 2 and 3 of the Irish Constitution, which lay claim to Northern Ireland. Former IRA "quartermaster general" Mickey McKevitt leads the group; Bernadette Sands-McKevitt, his common-law wife, is the vice-chair of the 32-County Sovereignty Movement.

Activities: Bombings, assassinations, and robberies. Most Real IRA activists are former IRA members; the group has inherited a wealth of experience in terrorist tactics and bombmaking. Targets

include British military and police in Northern Ireland and Northern Irish Protestant communities. Claimed responsibility for the car bomb attack in Omagh, Northern Ireland on 15 August, which killed 29 and injured 220 persons. Announced a cease-fire after that bombing. Has attempted several unsuccessful bomb attacks on the UK mainland.

Strength: About 70, plus limited support from IRA hardliners dissatisfied with the current IRA cease-fire and other republican sympathizers.

Location/Area of Operation: Northern Ireland, Ireland, Great Britain.

External Aid: Suspected of receiving funds from sympathizers in the United States. Press reports claim Real IRA leaders also have sought support from Libya.

REVOLUTIONARY ARMED FORCES OF COLOMBIA (FARC)*

Description: The largest, best-trained, and best-equipped insurgent organization in Colombia. Established in 1964 as a rural-based, pro-Soviet guerrilla army. Organized along military lines and includes several urban fronts. Has been anti-United States since its inception. The FARC agreed in 1998 to enter into preliminary peace talks with the Colombian Government. The Pastrana administration demilitarized five large rural municipalities to meet FARC conditions for peace talks. (President Pastrana traveled to this area on 7 January 1999 to inaugurate peace talks with guerrilla leaders, although the FARC's senior-most leader failed to attend.)

Activities: Armed attacks against Colombian political, economic, military, and police targets. Many members pursue criminal activities, carrying out hundreds of kidnappings for profit annually. Foreign citizens often are targets of FARC kidnappings. Group has well-documented ties to narcotics traffickers, principally through the provision of armed protection for coca and poppy cultivation and narcotics production facilities, as well as through attacks on government narcotics eradication efforts. Also began in 1998 a bombing campaign against oil pipelines.

Strength: Approximately 8,000–12,000 armed combatants and an unknown number of supporters, mostly in rural areas.

Location/Area of Operation: Colombia, with occasional operations in border areas of Venezuela, Panama, Peru, Brazil, and Ecuador.

External Aid: None.

REVOLUTIONARY ORGANIZATION 17 NOVEMBER (17 NOVEMBER)*

Description: Radical leftist group established in 1975 and named for the student uprising in Greece in November 1973 that protested the military regime. Anti-Greek establishment, anti-US, anti-Turkey, anti-NATO, and committed to the ouster of US bases, removal of Turkish military presence from Cyprus, and severing of Greece's ties to NATO and the European Union (EU). Possibly affiliated with other Greek terrorist groups.

Activities: Initial attacks were assassinations of senior US officials and Greek public figures. Added bombings in 1980s. Since 1990 has expanded targets to include EU facilities and foreign

firms investing in Greece and has added improvised rocket attacks to its methods.

Strength: Unknown, but presumed to be small.

Location/Area of Operation: Athens, Greece.

External Aid: Unknown.

REVOLUTIONARY PEOPLE'S LIBERATION PARTY/FRONT (DHKP/C)*

a.k.a.: Devrimci Sol (Revolutionary Left), Dev Sol

Description: Originally formed in 1978 as Devrimci Sol, or Dev Sol, a splinter faction of the Turkish People's Liberation Party/Front. Renamed in 1994 after factional infighting, it espouses a Marxist ideology and is virulently anti-US and anti-NATO. Finances its activities chiefly through armed robberies and extortion.

Activities: Since the late 1980s has concentrated attacks against current and retired Turkish security and military officials. Began a new campaign against foreign interests in 1990. Assassinated two US military contractors and wounded a US Air Force officer to protest the Gulf war. Launched rockets at US Consulate in Istanbul in 1992. Assassinated prominent Turkish businessman in early 1996, its first significant terrorist act as DHKP/C.

Strength: Unknown.

Location/Area of Operation: Conducts attacks in Turkey—primarily in Istanbul—Ankara, Izmir, and Adana. Raises funds in Western Europe.

External Aid: Unknown.

REVOLUTIONARY PEOPLE'S STRUGGLE (ELA)*

Description: Extreme leftist group that developed from opposition to the military junta that ruled Greece from 1967 to 1974. Formed in 1971, ELA is a self-described revolutionary, anti-capitalist, and anti-imperialist group that has declared its opposition to "imperialist domination, exploitation, and oppression." Strongly anti-US and seeks the removal of US military forces from Greece.

Activities: Since 1974 has conducted bombings against Greek Government and economic targets as well as US military and business facilities. In 1986 stepped up attacks on Greek Government and commercial interests. Raid on a safehouse in 1990 revealed a weapons cache and direct contacts with other Greek terrorist groups, including 1 May and Revolutionary Solidarity. In 1991, ELA and 1 May claimed joint responsibility for over 20 bombings. Greek police believe they have established a link between the ELA and the Revolutionary Organization 17 November. Has not claimed responsibility for a terrorist attack since January 1995.

Strength: Unknown.

Location/Area of Operation: Greece.

External Aid: No known foreign sponsors.

SENDERO LUMINOSO (SHINING PATH, SL)*

Description: Larger of Peru's two insurgencies, SL is among the world's most ruthless guerrilla organizations. Formed in the late 1960s by then university professor Abimael Guzman. Stated goal is to destroy existing Peruvian institutions and replace them with peasant revolutionary regime. Also wants to rid Peru of foreign in-

fluences. Guzman's capture in September 1992 was a major blow, as were arrests of other SL leaders in 1995, defections, and Peruvian President Fujimori's amnesty program for repentant terrorists.

Activities: Has engaged in particularly brutal forms of terrorism, including the indiscriminate use of bombs. Conducted fewer attacks in 1998, generally limited to rural areas. Almost every institution in Peru has been a target of SL violence. Has bombed diplomatic missions of several countries in Peru, including the US Embassy. Conducts bombing campaigns and selective assassinations. Has attacked US businesses since its inception. Involved in cocaine trade.

Strength: Approximately 1,500 to 2,500 armed militants; larger number of supporters, mostly in rural areas.

Location/Area of Operation: Rural based, with few violent attacks in the capital.

External Aid: None.

17 NOVEMBER

(see Revolutionary Organization 17 November)

SIKH TERRORISM

Description: Sikh terrorism is sponsored by expatriate and Indian Sikh groups who want to carve out an independent Sikh state called Khalistan (Land of the Pure) from Indian territory. Active groups include Babbar Khalsa, International Sikh Youth Federation, Dal Khalsa, Bhinderanwala Tiger Force. A previously unknown group, the Saheed Khalsa Force, claimed credit for the marketplace bombings in New Delhi in 1997.

Activities: Attacks in India are mounted against Indian officials and facilities, other Sikhs, and Hindus; they include assassinations, bombings, and kidnappings. Attacks have dropped markedly since 1992, as Indian security forces have killed or captured numerous senior Sikh militant leaders and have conducted successful army, paramilitary, and police operations. Many low-intensity bombings that might be attributable to Sikh extremists now occur without claims of credit.

Strength: Unknown.

Location/Area of Operation: Northern India, western Europe, Southeast Asia, and North America.

External Aid: Militant cells are active internationally and extremists gather funds from overseas Sikh communities. Sikh expatriates have formed a variety of international organizations that lobby for the Sikh cause overseas. Most prominent are the World Sikh Organization and the International Sikh Youth Federation.

TUPAC AMARU REVOLUTIONARY MOVEMENT (MRTA)*

Description: Traditional Marxist-Leninist revolutionary movement formed in 1983. Aims to rid Peru of imperialism and establish Marxist regime. Has suffered from defections and government counterterrorist successes in addition to infighting and loss of leftist support.

Activities: Bombings, kidnappings, ambushes, assassinations. Previously responsible for large number of anti-US attacks; recent

activity has dropped off dramatically. Most members have been jailed. Nonetheless, in December 1996, 14 MRTA members overtook the Japanese Ambassador's residence in Lima during a diplomatic reception, capturing hundreds. Government forces stormed the residence in April, 1997 rescuing all but one of the remaining hostages. Has not conducted a significant terrorist operation since then.

Strength: Believed to have fewer than 100 remaining members.
Location/Area of Operation: Peru.
External Aid: None.

AL UMMAH

Description: Radical Indian Muslim group founded in 1992 by S.A. Basha.

Activities: Believed responsible for the Coimbatore bombings in Southern India in February 1998. Basha and 30 of his followers were arrested and await trial for those bombings.

Strength: Unknown. No estimate available.
Location/Area of Operation: Southern India.
External Aid: Unknown.

ZVIADISTS

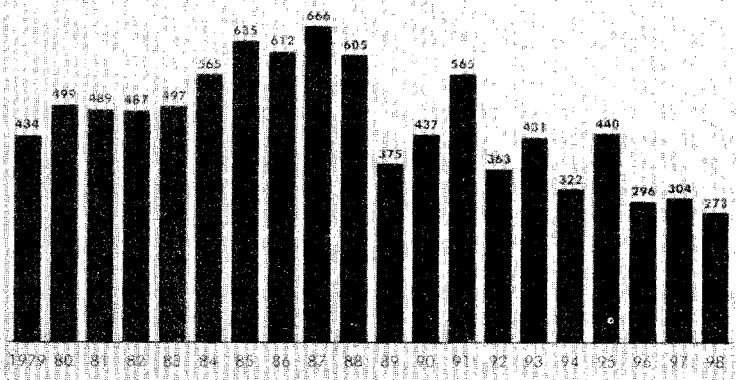
Description: Extremist supporters of deceased former Georgian President Zviad Gamsakhurdia. Following Gamsakhurdia's ouster in 1991, his supporters launched a revolt against his successor, Eduard Shevardnadze. Suppressed in late 1993, and Gamsakhurdia committed suicide in January 1994. Some Gamsakhurdia sympathizers have formed a weak legal opposition in Georgia, but others remain violently opposed to Shevardnadze's rule and seek to overthrow him. Some Gamsakhurdia government officials fled to Russia following Gamsakhurdia's ouster and now use Russia as a base of operations to bankroll anti-Shevardnadze activities.

Activities: Bombings and kidnappings. Attempted two assassinations against Shevardnadze in August 1995 and February 1998. Took UN personnel hostage following the February 1998 attempt, but released the hostages unharmed.

Strength: Unknown.
Location/Area of Operation: Georgia, especially Mingrelia, and Russia.
External Aid: May have received support and training in Chechen terrorist training camps. Chechen mercenaries participated in the assassination attempt against Shevardnadze in February 1998.

Apendix C
Statistical Review

Total International Terrorist Attacks, 1979-98



In past years, serious violence by Palestinians against other Palestinians in the occupied territories was included in the database of worldwide international terrorist incidents because Palestinians are considered stateless people. This resulted in such incidents being treated differently from intraethnic violence in other parts of the world. In 1989, as a result of further review of the nature of intra-Palestinian violence, such violence stopped being included in the US Government's statistical database on international terrorism. The figures shown above for the years 1984 through 1988 have been revised to exclude intra-Palestinian violence, thus making the database consistent.

Investigations into terrorist incidents sometimes yield evidence that necessitates a change in the information previously held true (such as whether the incident fits the definition of international terrorism, which group or state sponsor was responsible, or the number of victims killed or injured). As a result of these adjustments, the statistics given in this report may vary slightly from numbers cited in previous reports.

b. Antiterrorism Assistance Program: Annual Report—Fiscal Year 1997 [Pursuant to Public Law 99–83, sec. 502]

EXECUTIVE SUMMARY

The Office of Antiterrorism Assistance, Bureau of Diplomatic Security, is responsible for managing the Antiterrorism Assistance (ATA) Program under policy guidance from the Office of the Coordinator for Counterterrorism (S/CT). The two offices work closely to ensure excellence in training and overall program effectiveness.

In FY1997 the ATA Program provided assistance to 65 countries. Since the first country took part in the ATA Program in 1984 over 19,000 persons from 104 countries have participated.

ATA Program course materials and instructors continue to be important resources in the U.S. Government's coordinated efforts to combat international terrorism. This section summarizes the priorities and accomplishments of the ATA Program.

Selected Program Activities

During FY1997 the Antiterrorism Assistance Program carried out the following activities:

- Trained 1,171 students from 27 countries;
- Conducted 58 courses in 19 subject areas;
- Provided $658,000 in equipment and commodities to 27 countries.
- Participated in 23 technical consultations, and conferences;
- Conducted seven in-country program evaluations;
- Conducted six in-country training needs assessments;
- Implemented an increased regional program in the Middle East, and resumed assistance to Sri Lanka; and
- Conducted six Airport Security Management Courses.

INTRODUCTION

The Department of State's Antiterrorism Assistance (ATA) Program is a major pillar of the U.S. Government's efforts to work closely with friendly nations in the international fight against terrorism.

Since its inception in 1983 as a means of providing specialized training and equipment to nations facing terrorist threats, the program has provided training and assistance to over 19,000 law enforcement personnel from 104 countries. In this process, the program has raised the consciousness of foreign decision makers for greater international cooperation and preparedness.

By increasing each country's ability to defend itself against terrorism, the program achieves an ancillary U.S. policy objective -- greater security for U.S. personnel and facilities worldwide.

The Antiterrorism Assistance Program is also utilized to underscore the United States' concerns for Human Rights. Prior to any nation receiving assistance, the Department conducts a current review of that country's human rights record.

Training

The following criteria are utilized to qualify countries for equipment and training assistance:

- The country or region is categorized as critical or high threat for terrorism and cannot adequately protect U.S. facilities and personnel in the country (i.e., official, business, and tourism);
- The country is served by a U.S. air carrier or is the last point of departure for flights to the United States;
- There are important bilateral policy interests which may be supported through the provision of antiterrorism assistance.

Policy and Coordination

Policy direction for the Antiterrorism Assistance Program is provided by the Office of the Coordinator for Counterterrorism (S/CT). As assistance needs far exceed availability of program resources, offerings are prioritized to reflect national and Department policy objectives.

Responsibility for program design, implementation, oversight and evaluation rests with the Department's Bureau of Diplomatic Security, Office of Antiterrorism Assistance. Individual assistance plans are formulated based upon assessment findings conducted by joint S/CT and ATA functional specialist assessment teams.

Training provided under the ATA Program seeks to address deficiencies noted in any of five major areas:

The ability to protect national borders
The ability to protect vital installations
The ability to protect the national leadership
The ability to respond to and resolve a terrorist incident
The ability to conduct and manage a post-terrorism investigation

In addition to ATA-provided training, coordination of all other U.S. Government terrorism related training falls under the Department's Coordinator for Counterterrorism. This includes assistance provided by the Departments of Defense, Justice, Transportation, Treasury, and the Central Intelligence Agency. Not all law enforcement training programs have a specific terrorism mandate. However, training such as that provided under the Department of Justice International Criminal Investigative Training Assistance Program (ICITAP) complements the investigative procedures provided under the ATA program.

The formal coordination mechanism for all such training is provided by the training subcommittee of the Interagency Working Group for Counterterrorism, (IWG/CT), also headed by the Coordinator for Counterterrorism. The goal of the subcommittee is to minimize duplication of effort and ensure policy achievement. Coordination between the Office of International Law Enforcement and the ATA program is continuous, ensuring all Department-provided assistance is mutually supportive.

U.S. Embassies play a continual role in the development, implementation, and oversight of all ATA provided assistance. As with the initial needs assessment, Embassy assessment of program effectiveness and selection of training candidates are essential to policy achievement. Coordination for such activity rests with the Embassy country team or, if available, the law enforcement council, which consists of the U.S. law enforcement agencies represented in the host country.

International cooperation is fostered at the embassy and international level utilizing local and bilateral forums. While joint training is not provided, informal consultations with countries such as Australia, Canada, France, and the United Kingdom seek to avoid duplicative training. In response to a call for greater cooperation, the U.S., during its chairmanship of the Eight (formerly the Summit 7), sponsored a three-day conference on major event security management, September 3-5, 1997. Sixteen nations participated in the conference.

The international terrorist threat remains complex and dynamic. In meeting this challenge, the United States draws upon a variety of capabilities, including diplomatic efforts, economic sanctions, physical security measures and intelligence sharing and training. The following section of this report provides an overview of ATA activities in support of this effort.

PROGRAM IMPACT

Program evaluations often provide a measure of the success of ATA training but they are not the only means to gauge the effectiveness of the ATA Program. The following illustrations are drawn from the results of evaluations and U.S. Embassy reporting cables:

- ATA trained one of two SWAT Teams in Lima, Peru. An ATA-trained negotiator secured the release of the first hostages shortly after the takeover of the Japanese Ambassador's residence by Tupac Amaru guerillas. Further, Peruvian authorities credited ATA training as contributing to the capture of Abimael Guzman, founder of Sendero Luminoso.

- A Mediterranian nation, which only two months previously completed an ATA course in Maritime Security, credited this training with securing almost six tons of cocaine in a failed smuggling attempt.

- The success of the Explosive Detector Dog program is notable. Besides routine discoveries of weapons and ammunition, one canine found a landmine in preparation for a VIP visit and another found a pipe bomb during the search of a residence.

- In a Central American country the police assigned an ATA-trained negotiator to act as intermediary between the family of a kidnapped American citizen and the kidnapping gang which abducted her. This, and extensive ATA training provided to the national police, contributed to the breakup of a multinational kidnapping ring.

- The ATA Program sponsored two international conferences of far-reaching importance. One was a symposium composed of the directors of 16 Latin American national police academies on methods to institutionalize and improve the delivery of antiterrorism training in the region.* The other was a conference on security at major international events such as the Olympics. Australia, Canada, France, Japan, and the United Kingdom, served as associate hosts for the conference.

*Countries participating:

Argentina	Guatemala	Panama
Bolivia	Guyana	Paraguay
Chile	Honduras	Surinam
Costa Rica	Mexico	Uruguay
Ecuador	Nicaragua	Venezuela
El Salvador		

PROGRAM EVALUATIONS AND NEEDS ASSESSMENTS

Program evaluations are conducted to determine the results and effectiveness of the assistance which has been provided through the ATA Program. An in-country program evaluation is performed by a team which includes representatives of ATA, the Office of the Coordinator for Counterterrorism, and various subject-matter experts. The information obtained through this process enables ATA managers to identify possible ways to strengthen course material, and to provide specifics for determining appropriate additional assistance.

Country	Date	Topics Covered
Tunisia	10/96	VIP Protection, Explosives Incident Counter-Measures (EIC), Post Blast Investigation (PBI), Crisis Response Teams (CRT)
Thailand	5/97	VIP, EIC, PBI
St.Kitts & Nevis	6/97	VIP, EIC
Trinidad & Tobago	6/97	VIP, EIC
Bolivia	7/97	VIP, PBI, EIC, CRT, Hostage Negotiations.
Peru	9/97	VIP, PBI, EIC, CRT, Hostage Negotiations.
Ecuador	9/97	VIP, PBI, EIC, CRT, Hostage Negotiations.

A similar process is applied to determine the training needs of countries new to the program, or for establishing a comprehensive point of reference for expanding an ongoing program. Training needs assessments were conducted in the following countries during FY1997:

Country	Date
Morocco	10/96
Malaysia	10/96
Panama	11/96
Bosnia-Herzegovina	2/97
Kuwait	4/97
Bahrain	4/97
Qatar	4/97
Yemen	5/97
Oman	5/97
United Arab Emirates	5/97
Egypt	7/97
Ethiopia	8/97

TECHNICAL CONSULTATIONS & CONFERENCES

The ATA Program conducts periodic technical consultations with participating countries with the aid of State Department and outside experts. These consultations, which can be held either in the United States or the participating country, focus on a specific area or areas of concern.

The ATA Program conducted the following consultations in FY1997:

Country	Dates	Focus
Argentina	10/96	Border Control
Brazil	10/96	Border Control
Paraguay	10/96	Border Control
Jordan	10/96	Detector Dogs
Italy	10/96	Detector Dogs
Turkey	11/96	Border Control
Israel	1/97	Explosives Detection Conference
ARA Regional*	1/97	Police Academy Directors
Sri Lanka	1/97	Explosives Detection Conference
Cyprus	1/97	Detector Dog Check-Back
Ecuador	3/97	Police Academy Development
United Kingdom	3/97	Explosive Search Methods
United Kingdom	3/97	Training Coordination
Morocco	3/97	Police Academy
Jordan	4/97	Bomb Detector Dogs
Israel	6/97	Airborne Border Surveillance
Tunisia	6/97	Detector Dogs
Israel	6/97	Border Control
Egypt	7/97	Detector Dog Check-Back
Australia	8/97	Preparations for Detector Dog Training
Malaysia	8/97	Preparations for Detector Dog Training
Israel	9/97	Border Control
Multi-National **	9/97	Major Event Security Conference

Participating countries:

*Argentina, Bolivia, Chile, Costa Rica, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Mexico, Nicaragua, Panama, Paraguay, Surinam, Uruguay, Venezuela

** Australia+, Brunei, Canada+, Chile, France+, Germany, Italy, Japan+, Korea, Malaysia, New Zealand, Philippines, Singapore, South Africa, United Kingdom+

(+ designates Associate Host)

EQUIPMENT

The ATA Program is authorized to obligate up to 30 percent of its annual budget to provide training-related equipment and commodities to participating countries. During FY1997, $658,000 of program funds were obligated for the following items:

Type of Equipment

Body Armor
Bomb Robot
Bomb X-Ray Machines
Dogs for Explosives Detection
Hostage Rescue Team Equipment
Kits for Crime Scene Investigation
Metal Detectors
Radios and Related Equipment
Portable Telephones for Hostage Negotiations
Tool Kits for Bomb Countermeasure Teams
Veterinary Supplies for Bomb Detector Dogs
X-Ray Machines for Airport Security

Equipment and commodities were provided to the following 27 countries:

Antigua
Barbados
Bolivia
Brazil
Bulgaria
Cyprus
Dominica
Egypt
F.Y.R.O.M.*
Grenada
Hungary
India
Israel
Italy
Jordan
Lithuania
Malaysia
Morocco
Paraguay
Saudi Arabia
St. Kitts/Nevis
St. Lucia
St. Vincent
Thailand
Trinidad & Tobago
Tunisia
Venezuela

*Former Yugoslav Republic of Macedonia

TRAINING AND TRAINING-RELATED ACTIVITIES

* New in FY1997

c. Foreign Terrorist Organizations

Designation and list of foreign terrorist organizations

OFFICE OF THE COORDINATOR FOR COUNTERTERRORISM
U.S. DEPARTMENT OF STATE
OCTOBER 8, 1997

THE DESIGNATIONS

- The Secretary of State has designated 30 groups as foreign terrorist organizations. Her action sends a powerful signal that the United States will not tolerate support for international terrorism.
- The Secretary acted under the authority provided by the Antiterrorism and Effective Death Penalty Act of 1996, with the concurrence of the Attorney General and the Secretary of the Treasury.
- On October 1, the State Department notified Congress of the Secretary's intent to designate 30 foreign terrorist organizations. Congress also received the factual bases for her decisions on each of the 30 designations.
- A formal announcement of the designations was placed in the Federal Register on October 8, and the Department of the Treasury has notified financial institutions to block funds of the designated organization.
- The designations are a significant addition to our enforcement tools against international terrorists and their supporters. They supplement the Executive Order the President signed in January 1995 (and has renewed annually), which blocks funds of 12 Middle Eastern organizations that use or threaten to use violence to disrupt the Middle East Peace Process.

LEGAL CONSEQUENCES

- The 1996 law makes it a criminal offense to provide funds or other forms of material support or resources, such as weapons or safehouses, to designated foreign terrorist organizations.
  —The law applies to anyone within the United States or subject to the jurisdiction of the United States.
  —Violators are subject to fines and up to 10 years in prison.
- Aliens abroad who are members or representatives of designated foreign terrorist organizations are ineligible for visas to the U.S. and are subject to exclusion from the U.S.
- U.S. financial institutions are required to block those funds of designated foreign terrorist organizations or their agents over which they have possession or control. They are subject to civil penalties and possible criminal prosecution if they do not conform with the law and regulations.

THE PROCESS

- The designations are subject to judicial review, as the statute required, and extensive administrative records were created to substantiate each recommendation to the Secretary of State. A major interagency effort included the examination of thousands of pages of documents and the preparation of a complete administrative record on each group.
  —The administrative records are and will remain classified. Unclassified descriptions of terrorist organizations, including those formally designated, appear in the annex of the Department's annual report, Patterns of Global Terrorism, which is available on the State Department's web site.
- The designations expire in two years unless renewed. The law also allows groups to be added at any time following a decision by the Secretary, in consultation with the Attorney General and the Secretary of the Treasury. Designations can also be revoked if the Secretary determines that there are grounds for doing so and notifies Congress. Congress can also pass legislation to revoke designations.

BACKGROUND

- The law responded to concerns that foreign terrorist organizations were raising money in the United States. Some groups have tried to broaden their financial base because state sponsors were becoming less reliable sources of money.
- Some terrorist organizations have tried to portray themselves as raising money for charitable activities such as clinics or schools. These activities have helped recruit supporters and activists.
- Congress noted in the statement of findings in the legislation:
  —Foreign organizations that engage in terrorist activity are so tainted by their criminal conduct that any contribution to such an organization facilitates that conduct." (Section 301(a)(7)).
  —Therefore, any contribution to a foreign terrorist organization, regardless of the intended purpose, is prohibited by the statute, unless the contribution is limited to medicine or religious materials.

FOREIGN TERRORIST ORGANIZATIONS

OFFICE OF THE COORDINATOR FOR COUNTERTERRORISM
DEPARTMENT OF STATE, OCTOBER 8, 1997.

- Abu Nidal Organization (ANO)
- Abu Sayyaf Group (ASG)
- Armed Islamic Group (GIA)
- Aum Shinrikyo (Aum)
- Euzkadi Ta Askatasuna (ETA)
- Democratic Front for the Liberation of Palestine-Hawatmeh Faction (DFLP)
- HAMAS (Islamic Resistance Movement)
- Harakat ul-Ansar (HUA)
- Hizballah (Party of God)

- Gama'a al-Islamiyya (Islamic Group, IG)
- Japanese Red Army (JRA)
- al-Jihad
- Kach
- Kahane Chai
- Khmer Rouge
- Kurdistan Workers' Party (PKK)
- Liberation Tigers of Tamil Eelam (LTTE)
- Manuel Rodriguez Patriotic Front Dissidents (FPMR/D)
- Mujahedin-e Khalq Organization (MEK, MKO)
- National Liberation Army (ELN)
- Palestine Islamic Jihad-Shaqaqi Faction (PIJ)
- Palestine Liberation Front-Abu Abbas Faction (PLF)
- Popular Front for the Liberation of Palestine (PFLP)
- Popular Front for the Liberation of Palestine-General Command (PFLP-GC)
- Revolutionary Armed Forces of Colombia (FARC)
- Revolutionary Organization 17 November (17 November)
- Revolutionary People's Liberation Party/Front (DHKP/C)
- Revolutionary People's Struggle (ELA)
- Shining Path (Sendero Luminoso, SL)
- Tupac Amaru Revolutionary Movement (MRTA)

d. Report To Congress Concerning the Administration's Comprehensive Counterterrorism Strategy: Agency Resource Requirements, April 29, 1997 (unclassified excerpts)

3. AGENCY RESOURCE REQUIREMENTS

A. DEPARTMENT OF JUSTICE

The Department of Justice is requesting $417,683,000 and 2,984 positions (1,579 agents and attorneys) in FY 1998 for counterterrorism programs, an increase of more than $50,000,000 over the FY 1997 appropriations level. The Department's counterterrorism budget has increased 360 percent since 1993, reflecting the heightened threat from domestic and international terrorism and the substantial expansion in the Department's counterterrorism responsibilities pursuant to PDD–39, the 1996 anti-terrorism law, the President's Executive order on critical infrastructure protection, and recent Congressional appropriations initiatives. (U)

A substantial portion of the increase in FY 1998 is required to annualize the enhancements provided in the FY 1997 appropriations process, which more than doubled the Department's counterterrorism resources. The Department is requesting a limited number of enhancements in FY 1998, primarily to bolster the Department's ability to locate, apprehend and prosecute persons suspected of terrorist activities. (U)

Federal Bureau of Investigation. In FY 1998, the FBI is requesting $287,598,000 for 2,632 positions (1,350 agents) and 2,592 FTEs for counterterrorism activities, an increase of more than $40,000,000 over the FY 1997 enacted level. The increase is required to annualize the enhancements provided in the FY 1997 counterterrorism appropriations amendment. In addition, the 1998 budget requests $6,000,000 for additional regional computer crime squads. (U)

The resource requirements of the FBI are dictated largely' by its responsibilities under PDD–39. The FBI has lead-agency responsibility for investigating terrorist acts in the United States by foreign or domestic terrorist groups and for such attacks against U.S. citizens or interests abroad; providing an operational. response to terrorist incidents in the United States; leading and managing the Domestic Emergency Support Team in domestic incidents; collecting, analyzing and disseminating intelligence on terrorist groups in the United States, including threat warnings; and preventing, detecting and deterring terrorist attacks involving weapons of mass destruction. (U)

To meet the FBI's responsibility to investigate terrorist acts committed in the United States or directed at U.S. citizens or interests abroad, the FY 1997 counterterrorism appropriations amendment

provided $27,800,000 and 331 positions for emerging domestic terrorism; $2,700,000 for Joint Terrorism Task Force matters; and $17,900,000 and 216 positions for infrastructure vulnerability and key asset matters. The FBI's FY 1998 budget request seeks annualized base-level funding for each of these and related programs funded in FY 1997. (U)

The FBI also is responsible for identifying critical national information and other infrastructure and developing plans to harden such targets against terrorist attack and/or respond to actual terrorist attacks. The FBI's Critical Infrastructure Threat Assessment Center (CITAC) and infrastructure vulnerability/key asset program require continued funding for the 63 CITAC and 216 key asset positions provided in FY 1997. (U)

To enhance FBI's ability to coordinate the collection, analysis and dissemination of counterterrorism information, the FBI is seeking annualized base-level funding for 31 positions in the counterterrorism Center, continued funding for state and local participation in the Center, and two field translation centers staffed with contract translators. (U)

The FBI resource requirements discussed above are in addition to the $77,140,000 enhancement provided in the 1995 supplemental terrorism bill, including initial funding for the FBI's Counterterrorism Center ($10,000,000), evidence response teams ($2,900,000), lab equipment modernization ($2,100,000), 427 new positions for counterterrorism investigations, intelligence collection and analysis, and technical support ($48,040,000) . Approximately $52,100,000 of the 1995 supplement appropriation had been obligated as of January 31, 1997, with the multi-year capital projects constituting the balance of the unobligated funds. (U)

Criminal Division. The Department is requesting 82 positions, 55 attorneys, and $11,064,000 for the Criminal Division's counterterrorism activities. This represents a program increase of 22 positions, 10 attorneys, and $3,113,000 from the Division's FY 1998 base level. (U)

The Criminal Division plays an important role in implementing the components of the terrorism strategy involving the swift investigation, apprehension and prosecution of domestic and international terrorists; the identification and protection of national information infrastructure; and the training of foreign and U.S. State and local law enforcement personnel in counterterrorism investigations and prosecutions. The Division also maintains a cadre of experienced prosecutors with expertise in terrorism cases who handle major terrorism cases together with Assistant United States Attorneys in the particular districts. (U)

Congress recently ratified twelve new extradition and mutual legal assistance treaties, including the first extradition treaty with an Arab country (Jordan) . Two additional criminal Division attorneys are needed to address the anticipated increase in requests for extradition and/or mutual legal assistance under these new agreements as well as to handle the explosive growth in requests from federal, state and local agencies under existing international agreements. (U)

The Division also is requesting funding to expand its presence overseas in areas where an on-the-ground presence will facilitate

more effective cooperation in sensitive extradition cases and cooperative law enforcement investigations. Three new attorney positions are sought for placement in the following strategic locations: Manila to support East Asia, Brasilia to support South America, and Athens to support the Middle East. In addition, with the assumption by the United States of the Presidency of the Eight in 1997, and as summit agendas focus increasingly on terrorism, the Criminal Division will be relied upon, and has requested one attorney and two support positions, to provide support and assistance to the myriad task forces originating front the Eight. (U)

Similarly, the Division is requesting new funds for the creation of an Analysis Unit in the Office of International Affairs. The Analysis Unit will collect, organize, and critically analyze sensitive international law enforcement and terrorism information, with the goal of developing specific enforcement strategies for particular countries, regions, or forms of terrorist and criminal activity. The Division's FY 1998 request seeks nine positions (five analysts and four support staff) for this new unit. (U)

Last year, Congress approved the creation of a new Computer, Crime Section within the Division. The Section is coordinating and/or participating in the implementation of key aspects of the Administration's effort to identify and protect the national information infrastructure. Additional resources also are needed to prosecute computer terrorists, strengthen network integrity, cooperate with foreign entities and governments in efforts' to harmonize computer crime laws, and eliminate procedural impediments in international computer terrorism investigations. The Division's FY 1998 budget request seeks funding for an additional four attorneys and one support staff for the Computer Crime Section. (U)

U.S. Attorneys. Additional resources for the U.S. Attorneys' Offices are needed to respond to the increasing number of cases involving radi ' cal militias and extremist groups, the use of explosives, and other domestic terrorism matters. Moreover, to address the need for greater coordination of counterterrorism efforts at the district level, the Department's FY 1998 budget request seeks $3,100,000 and 18 additional AUSAs for the appointment of a terrorism coordinator in U.S. Attorneys' Offices around the country. The coordinator would be responsible for assessing the terrorist threat in their district; working with federal, state and local officials to prepare and update emergency response plans for terrorist attacks; and effectively prosecuting terrorism cases in their district. (U)

Counterterrorism Fund. Recent experience has demonstrated the need for a mechanism to marshal massive and sustained counterterrorism resources in response to specific terrorist incidents or threats, and much of the U.S. strategy focuses on the continuing development of such capabilities it the tactical and operational level. The creation of the Counterterrorism Fund in the 1995 supplement appropriation provided an effective resource response mechanism for the Department of Justice, while ensuring adequate accountability and oversight of counter-terrorism spending. The Administration is requesting $29,450,000 for the Counterterrorism Fund in FY 1998, the same as the FY 1997 appropriations level. (U)

Other DOJ Programs. Other DOJ components have important responsibilities under PDD–39 and the U.S. terrorism strategy, including the Office of intelligence Policy and Review (assisting in the investigation of terrorism cases under the Foreign Intelligence Surveillance Act) ; Executive Office for Immigration Review (expeditiously expelling suspected terrorists who are in the United States unlawfully) ; and office of Justice Programs (providing funds to state and local law enforcement agencies to bolster their preparedness in the event of a terrorist attack, particularly involving chemical or biological weapons). (U)

Additional DOJ components with responsibilities under the strategy are the Justice Management Division (security and emergency planning staff); Immigration and Naturalization Service (arrest and exclusion and/or incarceration of foreign alien terrorists); U.S. National Central Bureau-Interpol; Drug Enforcement Administration (protection of DEA facilities and personnel in the United States and abroad); and the U.S. Marshals Service (security at high-risk facilities and proceedings). Each of these components received substantial funding increases in FYs 1996 or 1997, and the Department is seeking an increase in appropriations to provide full-year funding for each of these components. (U)

B. DEPARTMENT OF STATE

PDD–39 continued the designation of the State Department as the lead agency for international terrorism outside U.S. territory and within the jurisdiction of another nation. State also is responsible for counterterrorism training programs for foreign security personnel; operating the international terrorism rewards program; and ensuring that visas to enter the United States are not issued to persons involved in terrorist activities. In addition, the Department bears the responsibility for protecting diplomatic facilities and U.S. government personnel against terrorist attack. (U)

The State Department's expenditures for countering terrorism include both identifiable budget items such as those described below, and difficult-to-quantify efforts by various elements of the Department and overseas missions on diplomatic activities related to countering terrorism, or dealing with a specific terrorist incident. For FY 1998, the State Department's request for specific components and programs is $325 million, an increase of about $11 million above the FY 1997 estimates. (U)

Policy-level guidance and coordination for international terrorism is the responsibility of the Department's Coordinator for Counterterrorism. Approximately $2,250,000 is required in FY 1998 for salaries and expenses, equipment, and deployment and exercises. Further, the State Department is requesting $19,000,000 for the Antiterrorism Assistance Training (ATA) program, $1,800,000 for the Department's contribution of the interagency counterterrorism research and development program, and $1,500,000 for the rewards program. (U)

The Department requires $600,000 in FY 1998 funds to support the TIPOFF initiative, which serves as the interface between the highly classified intelligence products of U.S. agencies and U.S. personnel and consular officials, who must have access to such in-

formation in adjudicating visa applications and requests to enter the United States. (U)

The Department's Bureau of Diplomatic Security (DS) provides the security platform for the protection of U.S. government personnel, national security information, and diplomatic facilities under the authority of the Chiefs of Mission overseas, as well as for the protection of State Department personnel and facilities in the United States. The Department is requesting $285,200,000 in FY 1998 for diplomatic security and law enforcement operations, including DS operations, along with $7,900,000 to reimburse state and local jurisdictions for "extraordinary" protective services associated with the activities of foreign missions and officials. The Security and Maintenance of United States Missions account supports overseas buildings which must be built and maintained to withstand terrorist attacks. In addition, for FY 1998, $5,000,000 is requested specifically for physical security upgrades for buildings. (U)

The Fiscal Year 1997 Counterterrorism Budget Amendment, provided an additional $38 million in no-year funding to help combat the threat of terrorism worldwide, especially in the Middle East, and to make an initial down payment on the security infrastructure gap that has to addressed over the next several years. The operating portion of that amendment, which is essential for continuing the security improvements now underway, has been included in the FY 98 request. (U)

C. DEPARTMENT OF DEFENSE

The Department of Defense spends approximately $3.5 to 4.0 billion each year to combat overseas and domestic terrorism. DOD's combatting terrorism program consists of all actions taken to oppose terrorism including defensive measures used to reduce vulnerability to terrorist acts and offensive measures taken to prevent, deter, and respond to terrorism. The program includes resources (personnel and dollars) for physical security; security and investigative matters, counterintelligence; and counterterrorism. The effort excludes costs associated with counterproliferation, information assurance and intelligence activities since these activities do not directly focus upon combatting terrorism. (U)

In addition, DOD received $100 million in FY 1997 for defense against weapons of mass destruction. The FY 1998/FY 1999 President's Budget submission includes $49.5 million in FY 1998 and $52.1 million in FY 1999 to continue to provide emergency response preparedness, first responder training, and assistance to metropolitan area agencies, and to conduct exercises and preparedness tests in coordination with federal, state, and local agencies. It is DOD's intention to transition the first responder training and expert assistance programs to other agencies after FY 1999 as allowed for in section 1412 of the National Defense Authorization Act (NDAA) for FY 1997. Similarly, DOD intends to fund exercises and preparedness tests only through FY 2001 in accordance with section 1415 of the NDAA. (U)

Approximately $350 million of the Administration's $1.1 billion supplemental to the FY 1997 budget was earmarked for DOD, including measures to tighten security at U.S. facilities in the Persian Gulf; general overseas facilities and force protection upgrades;

and training, awareness, and other programs designed to combat terrorism. (U)

D. INTELLIGENCE AGENCIES

Although the preparation of this Report was coordinated through appropriate channels within the U.S. intelligence community,. the Report does not address the counterterrorism resource requirements of the Central Intelligence Agency or other components of the National Foreign Intelligence Program. (U)

Pursuant to Executive Order 12333, the Director of Central Intelligence is responsible for developing an annual budget specifically for the NFIP components, which is reviewed by the Executive Branch and Congress outside the normal budget process. A substantial portion of the counterterrorism assets of U.S. intelligence agencies fall within the NFIP. Persons interested in reviewing the terrorism resource requirements in the NFIP are referred to the classified NFIP budget and analysis prepared by the staff elements within the DCI. (U)

e. PLO Commitments Compliance Act—Report to Congress, November 20, 1997

Report to Congress pursuant to Title VIII of Public Law 101–246 [Foreign Relations Authorization Act for Fiscal Year 1990–91], as amended

This document is submitted in accordance with Title VIII of Public Law 101–246 (the PLO Commitments Compliance Act of 1989—PLOCCA), as amended. This report covers the period from the date of submission of the last combined PLOCCA/Middle East Peace Facilitation Act (MEPFA) report on January 22, 1997 to November 20, 1997.

This report describes actions and statements of the Palestine Liberation Organization (PLO) and, as relevant, the performance of the Palestinian Authority (PA) with respect to commitments set forth in Chairman Arafat's September 9, 1993 letters to Israeli Prime Minister Rabin and Norwegian Foreign Minister Holst and those in, and resulting from, the good faith implementation of the Declaration of Principles (DOP) and subsequent agreements. Under the commitments in these letters and accords, the PLO, *inter alia*, (1) recognizes Israel's right to exist in peace and security; (2) accepts UN Security Council Resolutions 242 and 338; (3) commits itself to the Middle East peace process and to a peaceful resolution of its conflict with Israel; (4) undertakes to submit to the Palestine National Council (PNC) changes to the PLO Covenant necessary to eliminate articles that deny Israel's right to exist; (5) renounces the use of terrorism and other acts of violence, states that it will call on Palestinians to refrain from violence, and assumes responsibility over all PLO elements and personnel to assure their compliance, prevent violations and discipline violators; and (6) agrees to strengthen cooperation with Israel on a wide range of security issues. Even though a MEPFA report is not required at this time, because of Congressional interest this report also addresses MEPFA topics.

INCIDENTS OF VIOLENCE/TERRORISM

The month following the signing on January 15, 1997 of the Hebron redeployment agreement was relatively calm and free of violence. In accordance with the terms of that agreement, Israel-Palestinian joint security patrols—suspended since the September 1996 violence—resumed operation. Tensions increased significantly, however, following announcement by Israel in late February that construction was to begin on the Har Homa/Jebel Abu Ghunaym housing project in Jerusalem. Palestinian demonstrators in the West Bank and Gaza routinely clashed with settlers and Israeli security forces. While there were reports that the PA organized large-scale demonstrations in the major cities under its control, we have

no evidence that the PA or Chairman Arafat at any time directed participants to use violence.

As Israel-Palestinian confrontations grew in scope and intensity throughout March (Har Homa construction began March 18), PA security and police forces were ordered to refrain from using arms or resorting to violence against Israeli forces, whatever the circumstances. As a result of the violent clashes between Palestinian and Israeli security forces near Hebron in September 1996, the PA confiscated weapons from Palestinian police in the West Bank. During the demonstrations this spring, the police in the West Bank were not issued arms in order to avoid an escalation of the conflict as had occurred in September 1996. Muhammad Dahlan, head of the Palestinian Preventive Security Organization in Gaza, stated "I am certainly concerned about an outbreak of violence. We do not want an escalation which would only serve HAMAS and the Popular Front. However, we will not be able to prevent the protest activities. In any case, even if there are confrontations with Israel, we will not reach a situation in which firearms will be used, because this would only lead to casualties and exacerbate our relations. We will not permit anybody to use firearms or carry out terrorist attacks."

Confrontations diminished following the March 21 "Cafe Apropos" bombing in Tel Aviv (discussed below). However, a new and more violent series of demonstrations—primarily occurring on the separation line between Palestinian and Israeli-controlled areas in the city of Hebron—followed the mid-June Congressional Concurrent Resolution expressing the sense of Congress regarding Jerusalem as the capital of Israel. Palestinian security forces were initially slow to respond to the increasing intensity of the clashes, which included incendiary and explosive devices thrown at Israeli forces.

Israel claimed that Palestinian police were deliberately not acting as required by the Hebron accord to impose calm on the demonstrators and prevent confrontation. By mid-July, however, following the serious wounding of an Israeli soldier, the Palestinian police took up positions along the confrontation line and were able to reinstate calm in the city of Hebron and elsewhere. Senior IDF commanders and Israeli Defense Minister Mordechai praised the Palestinian security officers for their cooperation in bringing the situation under control.

We have no information that any PLO element under Arafat's control was involved in terrorism during the period covered by this report. Nor do we have any information that the PLO has provided financial or material assistance or training to any group to carry out actions inconsistent with the Declaration of Principles. PLO rejectionist groups such as the Popular Front for the Liberation of Palestine (IPFLP) and the Democratic Front for the Liberation of Palestine (DFLP) do not participate in PLO decision-making and are beyond Arafat's political and physical control. These groups actively seek to undermine the Palestinian Authority and to disrupt the peace process. Statements made by leaders of these factions do not reflect official PLO policy.

In March, the Government of Israel stated its belief that Arafat had given a "green light" to terror by failing to crack down on ter-

rorist groups and signaling to these groups that the PA would not act against them. We do not have any information to suggest that a "green light" was given, but it is clear that a sufficiently "red light" was not given either. We have made clear to the PA that anything less than a serious, sustained and concrete effort to uproot the terrorist infrastructure is unacceptable.

In addition to the ongoing confrontations between Palestinians and Israeli security forces, the following is a list of incidents of violence and terrorism in relevant areas during the period from January 22 through November 20, 1997:

6 March.

A settler reported that Palestinians tried to murder him and that the assailants escaped in a car in the direction of Hebron. The man sustained light injuries. The car was found abandoned near the entrance to Hebron.

In Jerusalem a 50 year old man was stabbed near the King David Hotel by a young Arab man. A suspect was later detained by Israeli authorities and the attack was deemed to be criminal in nature.

21

March A bomber killed himself and 3 others at the Cafe Apropos in Tel Aviv. A HAMAS caller to the Israeli Channel 1 Television news room said his "organization carried out the operation but was not responsible for the action. The responsible party is the Government of Israel which attacked Jerusalem."

23 March

A fire bomb was thrown at an IDF post in Hebron; no casualties were reported.

1 April

A bomb detonated at approximately 7:00 a.m. local time near Netzarim in Gaza, killing only the bomber.

Around 7:30 a.m. local time a second bomb exploded on Gaza's main north-south road (Rte 4) near the Israeli settlement of Kfar Darom. The suicide bomber involved reportedly wore a Palestinian police uniform. The blast occurred close to a local (Palestinian) taxi. Five Palestinians were injured.

27 April

Two Israeli women were stabbed to death in Wadi Kelt. A Palestinian Bedouin was eventually arrested and confessed to the attack. The Bedouin was not affiliated with any terrorist organization and the attack was treated as a crime by Israeli authorities.

29 May

Three terrorists, reportedly armed with an automatic weapon and knives, attacked Jewish merchants visiting a Gazan greenhouse. The Palestinian owner of the greenhouse hid the Jewish woman in his house and defended her husband with his own body. The Gazan was wounded in the attack, the couple was unharmed.

13 June

An Israeli woman was shot and wounded by terrorists as she drove out of Har Adar, northwest of Jerusalem. Six Palestinians from a nearby village were arrested by Israeli Defense Forces.

20 June

An Israeli thief discovered a bomb in a bag he had stolen from a beach in Tel Aviv. Israeli police were able to disarm the bomb.

9 July

Two border policemen were lightly injured when a small explosive device detonated close to their jeep as they escorted a bus of students from the 'Od Yosef Hay Yeshiva at Joseph's Tomb.

10 July

A Rabbi's car was shot at near Elon Moreh; no one was hurt.

15 July

Israeli security forces arrested three Palestinian policemen who allegedly planned to attack a guard at the Har Bracha settlement near Nablus. According to Israeli police, the three were also responsible for the shooting attack on the Rabbi's car near Elon Moreh on July 10.

Israeli officials later stated their belief that the Palestinian policemen were operating on orders from the Palestinian Authority's Chief of Civil Police, Ghazi Al-Jabali. The Palestinian Authority is conducting its own, internal investigation of these allegations.

20 July

Palestinian security forces uncovered a bomb making factory in Bayt Sahur near Bethlehem. The discovery came as part of the investigation into the death of a HAMAS activist who blew himself up while making a bomb on July 14.

30 July

Two suicide bombs detonated in the Mahane Yehuda Jerusalem market place. Sixteen people, including the 2 bombers, were killed in the blast and over 160 were injured. HAMAS distributed leaflets claiming responsibility for the attack and vowed that the attacks would continue if Palestinian prisoners were not released.

4 September

Suicide bombers detonated 3 explosive charges on Ben Yehuda street in downtown Jerusalem, killing 8 people and wounding over 100.

Israeli security forces detained 69 Palestinians throughout the territories in the wake of the Jerusalem bombing on suspicion of aiding terrorist infrastructures.

12 September

Israel issued an arrest warrant and extradition request to the Palestinian Authority for Ghazi Al-Jibali.

13 September

A young Arab woman tried to stab a border policeman near the gate of an IDF base on the Jerusalem-Ramallah highway. The policeman was not hurt and the woman was detained.

29 September

A Palestinian suspect was detained by Israel for abetting the kidnappers of soldier Nachshon Wachsman, who was murdered three years ago.

30 September
An Israeli court convicted Musa Mustafa, head of Palestinian security in Jericho, of kidnapping and aggravated extortion. The conviction stemmed from a case 15 months prior, in which a resident of East Jerusalem was kidnapped, tortured, and detained for over five months on suspicion of having committed murder while under the employment of Israeli intelligence.

6 November
Shots were fired at a school bus near Elon Moreh. No one was injured.

19 November
A yeshiva student was killed and a second wounded in a suspected terrorist attack inside the old city of Jerusalem. The students were ambushed while returning to their residence, a settler-owned home in the Muslim Quarter.

PLO RENUNCIATION OF TERRORISM

The Palestinian Authority in general, and Chairman Arafat in particular, consistently condemned acts of violence and terrorism during this period. Following the March 21 Cafe Apropos bombing Marwan Kanafani, adviser to and spokesman for Chairman Arafat, spoke on Voice of Palestine radio saying "the bombing incident today was condemned by the [Palestinian] Authority." Chairman Arafat spoke to Israeli President Weizman and reiterated his condemnation of the bombing, stating that "the Palestinian National Authority is against any violence." Palestinian Council member Ziad Abu Ziad told Israeli TV "the bombing truly pains me. I condemn it sharply. I think condemnations are not enough to express the anger and pain we feel as we see the region reverting to the era of bombings, dead, and wounded. I sincerely hope the situation will not become like it was before, that this was an isolated event."

Likewise, Orient House head Faisel Husseini stated that the bombing "is a painful thing. We hope that it is an isolated event, that it is even not a political one; that it is not a terrorist attack. But if it is, we condemn it. We are against hurting, injuring innocent people. I am not for violence and my heart is with those who have been injured."

In the aftermath of the two apparently botched suicide bombings on April 1 in the Gaza strip that killed only the bombers themselves and wounded five Palestinians, the Palestinian Authority mounted a campaign against Islamic militants particularly members of the Palestinian Islamic Jihad (PIJ) in the Gaza strip.

As he had done following the March 21 bombing, Chairman Arafat strongly condemned the July 30 double suicide bombing in Jerusalem saying, "today's explosions ... aim to undermine the peace process." Mahmud Abbas ("Abu Mazen") also condemned the attack saying it was "tantamount to a crime against the peace process." In an interview with London's MBC television Faisel Husseini condemned the attack saying "First of all we expressed,

and have always expressed, our rejection and denunciation of any incident that involves the killing of civilians, Palestinians or Israelis ... Moreover, there can be no security for us if there is no security for the Israelis. So, we feel that we have to provide security, not only for ourselves, but also for the Israelis."

SECURITY MATTERS

The Palestinian Authority has constituted law enforcement institutions for carrying out its security responsibilities in areas subject to its jurisdiction. The Palestinian Police Force (PPF) was established in May 1994 and consists of the Palestinian National Security Force (PNSF); the Palestinian civil police; the Preventive Security Organization (PSO); Palestinian intelligence, or the Mukhabarat; the civil defense force; and the Palestinian Presidential Security Force. Palestinian police are responsible for security and law enforcement for Palestinians and other non-Israelis in Gaza and five West Bank towns and surrounding villages. The establishment of these security forces is pursuant to the Interim Agreement.

The PA inherited a court system based on structures and legal codes of differing origins. The Gaza legal code derives from the British Mandate, Egyptian, and some locally generated law. Pre-1967 Jordanian law applies in those areas in the West Bank under PA control. However, the body of law in both Gaza and the West Bank was substantially modified by Israeli military orders. The PA is continuing efforts to unify the Gaza and West Bank legal codes.

In February 1995 the PA established a security court in Gaza to try cases involving terrorism. The PA has also established military courts to handle cases of abuse of authority. In each case, three judges, drawn from senior ranks of the security forces, preside over the civilian law court. There is no right of appeal, but verdicts may be either ratified or repealed by the head of the PA. A similar system operates in the West Bank under the same guidelines as the Gaza court. On June 2, five PA intelligence officers (Mukhabarat) were brought before the military courts on charges of having caused the death of a suspect in custody. The courts convicted the officers who received sentences from 2 months to 5 years in prison.

In a highly publicized case, the eight Palestinian policemen allegedly responsible for the death of Nasir Radwan, a Gazan who died June 30, 1997, as a result of violent beating in the hands of Palestinian security service members, were immediately brought before the military courts. The officers were charged with unlawful detention and perpetrating gross abuse which led to death. In an unprecedented move Chairman Arafat ordered that this trial be open to the public. Six of the eight officers were found guilty with three receiving death sentences and the other three receiving sentences from six months to five years.

Human rights organizations have reported that the PA continues to engage in arbitrary arrests, denial of due process rights and abusive treatment. The U.S. government has urged the PA to respect the rule of law, even as it pursues those who defy it. In an effort to address these issues, the PA has established a team of legal advisors to provide guidance to interrogators who are stationed at PA security facilities.

Security coordination and cooperation diminished in the period between March and September, largely as a result of tension between Israel and the Palestinians. Both sides had publicly announced a severing of the security dialogue: the Israelis in reaction to Palestinian accusations of Israeli involvement in the April 1 Gaza bombings, and the Palestinians in reaction to the late February Israeli decision to build at Har Homa/Jebel Abu Ghunaym.

Despite the public posturing regarding security cooperation, and an absence of high level, public cooperation, some security cooperation continued at lower levels prior to October. For example, Joint Patrols were halted in March after Har Homa construction began and the Cafe Apropos bombing, but were gradually resumed as the situation normalized. They were halted again by the Government of Israel after the July 30 Mahane Yehuda bombing. In general Joint Patrols have been linked to closure by the Israeli government. At times when closure is imposed the Joint Patrols are also stopped. As of this report, Joint Patrols had resumed in all areas of the West Bank and Gaza Strip. Likewise, both bilateral and trilateral meetings to coordinate and facilitate security cooperation (with U.S. participation) took place over the period of this report, totaling over 20 meetings held between April and November 20, 1997.

During her September 9-15 trip to the region, Secretary Albright emphasized the paramount importance of the Palestinian Authority's resuming security cooperation with Israel and undertaking unilateral security measures as a sine qua non for moving the peace process forward. In conjunction with the Secretary's visit, the Palestinian Authority gave assurances that it would adopt a systematic approach to uprooting the HAMAS terrorist infrastructure.

Partially as a result of this trip and a follow-up meeting in New York between the Secretary, Israeli Foreign Minister David Levy and chief Palestinian negotiator Abu Mazen (Mahmud Abbas), Israel and the Palestinians resumed direct bilateral negotiations on October 6 with SMEC Ross present. Since then, the quality and frequency of security cooperation has improved significantly. Following meetings between Israeli and Palestinian security chiefs in mid-October, an Israeli government source was quoted as saying that security cooperation had nearly reached the level. extant at the beginning of the year. SMEC Ross attended a trilateral security meeting on October 21 with PA Chairman Arafat, Israeli Defense Minister Mordechai, and their respective security chiefs to review security cooperation between the two sides. Most recently, the Joint Security Committee met on November 19 chaired by senior Israeli and Palestinian military officials.

The following list highlights on-going security relations between the Israelis and the Palestinians as well as specific examples of Palestinian efforts to control violence and terrorist acts during this period:

26 Feb. An IDF undercover unit in the Palestinian town of Hizma near Jerusalem fired at residents, killing 1 and injuring 3 others. Principal Palestinian peace process negotiator Sa'eb Erekat said "We condemn this act and regard it as a planned terrorist action

against our people. We strongly condemn this act and demand from all the sponsors of the peace process to stand against the Israeli government and request it to adhere to the peace process." West Bank Preventive Security Organization (PSO) chief Jibril al Rajoub and his forces intervened rapidly to quiet demonstrations which followed the shootings.

17 March

A senior PSO official claimed that a planned terrorist attack in Jerusalem had been thwarted by Palestinian security forces. At the same time, he cautioned that a HAMAS squad was believed to be at large and planning an attack in Jerusalem. The Palestinian Authority reported that recent raids on HAMAS activists resulted in 60 arrests and the confiscation of 1500 kilos of explosive material and 14 pistols.

21 March

In the aftermath of the Cafe Apropos bombing in Tel Aviv, PSO chiefs Rajoub (West Bank) and Dahlan (Gaza) met immediately with the head of Israel's Shin Bet to coordinate actions. Rajoub also met with the Israeli Security Minister and the two established a hotline to improve cooperation between their offices. The PA immediately launched a wave of arrests, detaining over 30 HAMAS activists within the first two days. By the end of the week, Palestinian security forces reported the arrest of over 100 people. The raids and arrests resulted in the confiscation of 8 machine guns, 10 pistols, 3 remote control explosive devises, 20 kilos of inflammable liquid, 15 thousand rounds of ammunition, 25 hand grenades, 5 suitcase bombs, and 150 kilos of TNT, and arrested five trained suicide bombers.

30 March

Palestinian police effectively intervened to avoid violence during Palestinian Land day demonstrations in Nablus and Ramallah. Israeli Defense Minister Mordechai said "I have to say that in most places the Palestinian police made visible efforts to deal with the incident. I think the majority of the Palestinian forces, policemen, were working with us against the violence in the area."

8 April

An Israeli settler shot and killed a Palestinian in the Hizbi market area of Hebron and a female settler driving a car struck and injured a 16 year old Palestinian also in Hebron.

Palestinian authorities condemned the settlers' actions but acted to quell the street violence in Hebron. Senior IDF commanders praised the Palestinian police forces for controlling the situation.

9 April

Joint Israeli-Palestinian coordination led to the break-up of a previously-unknown terrorist cell in Surif. The arrest of one of the cell members produced information which led Israeli forces to the body of long-missing, slain Israeli soldier Sharon Edri. In addition to Edri's kidnapping and murder, the cell was also implicated in the Cafe Apropos bombing.

7 May

Chairman Arafat announced that Palestinian security officials would participate in a trilateral meeting that evening with the aim of resuming security coordination with Israel.

14 May

The Palestinian Authority uncovered and destroyed a tunnel at the Gaza-Israel border adjacent to Burayj camp. The tunnel was 35 meters long, heading in the direction of Israeli territory.

15 May

The PSO conducted a campaign of arrests against the PIJ, detaining some 200 activists, including a group of doctors who reportedly held positions in the top echelon of the PIJ's military wing and were responsible for the planning and execution of attacks in Israel. Israeli security sources praised the PSO actions as a step aimed at crippling the PIJ.

7 June

In response to an Israeli request that the Palestinian police help search for a missing family feared to have been victims of terrorist activities, Palestinian security forces immediately responded with a widespread search resulting in location of the family. Joint Israeli-Palestinian investigation showed the family had died in a car accident and no foul play was involved.

21 June

Palestinian police intervened to quell large-scale demonstrations in Nablus. Palestinian protesters were blocked from going to Joseph's tomb—a flash point for earlier violent confrontations.

2 July

Palestinian Public Security Commander Brig. Gen. al-Hajj Isma'il Jabber met with Major General Gabi Ofir, Commander of IDF troops in the West Bank, to discuss the resumption of security cooperation. Jibril al-Rajoub traveled to Hebron, the site of ongoing clashes, to restore calm and meet with the commander of IDF troops in the area.

12 July

Palestinian and Israeli security forces worked jointly to search for a missing Israeli businessman. He was found unharmed within 24 hours.

14 July

Palestinian security forces took up positions in Hebron to prevent Palestinians from confronting IDF troops.

18 July

Following the arrest of three Palestinian policemen by Israeli security forces, Chairman Arafat appointed an inquiry committee to investigate allegations that the police were involved in planning terrorist attacks.

20 July

Palestinian police, under direct orders from Chairman Arafat, arrested Nablus police commander Colonel Jihad Masimi, accused by Israel of being connected to the Palestinian policemen who were allegedly planning to carry out terrorist attacks against Israel.

Palestinian Security forces uncovered a bomb making factory in Bayt Sahur near Bethlehem. The discovery came as part of the investigation into the death of a HAMAS activist who blew himself up while making a bomb on July 14.

22 July

Prime Minister Netanyahu's special envoy, Yitzhaq Molkho, delivered a message from the Prime Minister to Chairman Arafat expressing the Prime Minister's satisfaction with the PA's cooperation with Israel on the issue of the Palestinian policemen.

25 July

Palestinian security officials announced they had apprehended a wanted PIJ terrorist.

28 July

Prime Minister Netanyahu, in an Israeli television interview "the Palestinians have taken measures to restrain (Hamas and the PIJ). I set the goal of lowering the level of terrorism and stopping the horror that was happening here. This was hard and required a concentrated effort, but we did it."

30 July

In the wake of the Mahane Yehuda suicide bombing, three high-level security meetings took place. At this time, the Israelis shared the preliminary information they had gained from the bomb site, including photographs of the suicide bombers. Palestinian authorities provided Israel with samples of explosive material from the Bayt Sahui bomb factory for comparison.

31 July

Palestinian security forces arrested over 20 Hamas and Islamic Jihad members in the wake of the July 30 suicide bombings.

1 August

The PA detained two of the most senior HAMAS fugitives wanted by the Israelis, Muhammad Sanwar, a member of the military branch and Muhammad Dayf's long-time partner, and Abd-al-Fatah Sutari, another senior member of HAMAS.

8 August

Palestinian police uncovered a arms cache in Qalqilyah. Police confiscated the weapons and arrested a person connected to the cache.

11 August

Palestinian police in Hebron stopped protesters from heading to an Israeli checkpoint, avoiding violent clashes between the demonstrators and Israeli security forces.

16 August

Israeli security forces asked the PA for help in locating an Israeli taxi driver missing since August 14.

Palestinian police located his body in a well near Jericho and found his taxi near the Aqabat Jabr refugee camp. Three suspects were arrested by the Palestinian police and immediately brought to trial and convicted of the driver's murder. Two of the men were given life sentences and the third 15 years in prison. Israeli au-

thorities praised the action of the PA and Prime Minister Netanyahu's advisor Yitzhaq Molkho met with Arafat to thank him for his cooperation.

27 August

Israeli soldiers and Palestinian police held a first-ever joint exercise, simulating a car-bomb attack in the Gaza Strip.

9 September

September Palestinian security forces arrested more than 30 Hamas activists throughout PA-controlled territory in response to the September 4 bombing.

12 September

Israeli and Palestinian security personnel worked together to search for an Israeli man missing for two days. He was found in an burning abandoned building, tied up and in a state of shock. It was later learned that the kidnapping was a hoax orchestrated by the victim himself.

16 September

September Palestinian security services shut down the Gaza Headquarters of the Islamic Bloc Youth Union, a student organization with ties to Hamas.

23 September

Israeli security services announced that they had identified four of the five suicide bombers involved in the Mahane Yehuda and Ben Yehuda incidents.

According to the Government of Israel, all four were residents of Azira Shamaliya, a village near Nablus, and had been arrested by the Palestinian Authority in the spring of 1996. In September 1996 the four men escaped and had been fugitives ever since. According to the Government of Israel, the four were included in a list of 88 individuals the Government of Israel had requested the Palestinian Authority to arrest.

According to information from the PA, these individuals were sought by the PA but were fugitives from justice. The PA also noted that the town of Azira Shamaliya is in an area in which Israel retains responsibility for internal security; the Palestinian authority has responsibility only for public order for Palestinians.

Israeli and Palestinian security officials met in Ramallah to discuss the results of Israel's investigation.

According to press reports, this was the first time the two sides had met since the September 4 bombing.

5 September

Thirteen people were detained by Palestinian security forces in Qaiqilya as part of the crackdown against Hamas.

The Palestinian Authority ordered the closing of sixteen Hamas-affiliated associations and institutions in response to the news that several of those responsible from the recent bombings in Jerusalem had come from an area jointly administered by Israel and the PA.

13 October

Shin Bet Chief Ayalon conducted a series of meetings over the previous weekend with his Palestinian counterparts Amin al-Hindi,

Mohammed Dahlan and Jibril al-Rajoub aimed at renewing security cooperation. Commenting on these meetings, an unnamed Israeli government official was quoted on Israel Channel One as saying that "we are on our way to being where we were early this year when the level of intelligence sharing was ongoing, thorough and serious." He added that the sides had "reached understandings" on holding regular meetings.

21 October

PA Chairman Yassir Arafat, Israeli Defense Minister Yitzhak Mordechai, and U.S. Special Middle East Coordinator Dennis Ross held a trilateral security meeting at Erez crossing. The meeting was attended by Israeli Defense Forces Chief of Staff Shahak, Shin Bet Chief Ayalon, the Chief of Israeli Military Intelligence, and Palestinian security chiefs Jibril Rajoub, Amin al-Hindi and Mohammed Dahlan. The goal of the meeting was to rebuild trust and mutual confidence between the two security apparatuses. Amidst a positive atmosphere, Arafat pledged to step up counter-terrorism efforts.

29 October

Israeli Shin Bet established the identity of the third suicide bomber who carried out the Ben-Yehuda street attack.

13 November

Israeli security forces seized two Hamas activists from members of the Palestinian Preventative Security Organization (PSO) who were transporting them from one prison to another in the West Bank. The action took place near the West Bank village of Hawara within "Zone B." The PSO escorts were detained briefly as well. The Government of Israel stated that the two detainees, from the West Bank village of Surif, ran a Hamas terrorist cell responsible for the deaths of eleven Israelis.

17 November

Major General Abdel Razek al-Majaydah, Palestinian director of public security for Gaza, denied Hamas' public accusation that the PA had voluntarily handed over the two Hamas activists seized by Israel on November 13. Describing the Israeli action as an "abduction," al-Majaydah demanded that Israel return the two suspects.

19 November

The Joint Security Committee met to discuss issues of security cooperation and coordination. The Israeli side was headed by Major General Shlomo Yanai and included Brig. General Shlomo Brom and Colonel Michael Herzog. The Palestinian side was represented by General Abdul Rizaq al-Yahya.

PLO COVENANT

The April 24, 1996 action by the Palestinian National Council (PNC) honored the important commitment to Israel to make the necessary changes to the PLO covenant. At that time, the Israeli Government accepted the PNC vote as the fulfillment of the PLO's commitment to abandon violence and all other actions that endanger peace and stability.

The PNC action is best understood through a comparison of the actual text of the PLO commitment—as contained in the September 9, 1993 and May 4, 1994 letters from Chairman Arafat to Prime Minister Rabin and Article XXXI(9) of the September 1995 Interim Agreement between Israel and the PLO—with the official English language text of the PNC resolution adopted on April 24.

Arafat's September 9, 1993 letter to Rabin states:

> In view of the promise of a new era and the signing of the Declaration of Principles and based on Palestinian acceptance of Security Council Resolutions 242 and 338, the PLO affirms that those articles of the Palestinian Covenant which deny Israel's right to exist, and the provisions of the Covenant which are inconsistent with the commitments of this letter are now inoperative and no longer valid. Consequently, the PLO undertakes to submit to the Palestinian National Council for formal approval the necessary changes in regard to the Palestinian Covenant.

The commitments in the September 9, 1993 letter include: recognition of the right of the State of Israel to exist in peace and security, PLO acceptance of Security Council resolutions 242 and 338, PLO commitment to the Middle East peace process and the peaceful resolution of the conflict through negotiations, PLO renunciation of the use of terrorism and its assumption of responsibility over all PLO elements to assure their compliance.

In a May 4, 1994 letter to Rabin, Arafat further stated:

> The PLO undertakes to submit to the next meeting of the Palestinian National Council for formal approval the necessary changes in regard to the Palestinian Covenant, as undertaken in the letter dated September 9, 1993 signed by the Chairman of the PLO and addressed to the Prime Minister of Israel.

In the September 1995 Interim Agreement, Article XXXI(9), the PLO undertook that "within two months of the date of the inauguration of the Council, the Palestinian National Council will convene and formally approve the necessary changes in regard to the Palestinian Covenant, as undertaken in the letters signed by the Chairman of the PLO and addressed to the Prime Minister of Israel, dated September 9, 1993 and May 4, 1994."

The key sections of the April 24, 1996 PNC resolution to amend the Covenant read as follows:

> 1. The Palestinian National Charter is hereby amended by canceling the articles that are contrary to the letters exchanged between the PLO and the Government of Israel 9-10 September 1993.
>
> 2. Assigns its legal committee with the task of redrafting the Palestinian National Charter in order to present it to the first session of the Palestinian central council.

This resolution was approved overwhelmingly by a vote of 504-54 (with 14 abstentions), easily sufficient for amending the Covenant. The PNC delegated to its legal committee the responsibility of writing a new Covenant but did not fix a timetable for this undertaking.

PLO Chairman Yasser Arafat conveyed this decision in a May 4, 1996 letter to Prime Minister Peres, which stated:

> As part of our commitment to the peace process, and in adhering to the mutual recognition between the Palestinian Liberation Organization and the Government of Israel, the PNC was held in Gaza City between 22-25 of April 1996, and in an extraordinary session decided that the Palestine National Charter is hereby amended by canceling the provisions that are contrary to the letters exchanged between the PLO and the Government of Israel on 9/10 September 1993.

The White House issued the following statement after the PNC decision:

> President Clinton warmly welcomes the Palestine National Council's vote to revoke the sections of the Palestinian Covenant that called for the destruction of the State of Israel. By an overwhelming majority, the Palestine National Council has honored an important commitment made in the Interim Agreement signed here in September 1995. It is a major step forward on the road to a lasting peace between Israel and the Palestinians. The President applauds this action as a decisive statement, at this difficult moment, that those who champion peace will not be deterred by the murderous acts of those desperate to prevent the people of the Middle East from building a better future.

During the Hebron negotiations (October 1996–January 1997), Chairman Arafat undertook to complete the process of revising the Palestinian National Charter.

On March 5, 1997, Chairman Arafat told assembled Permanent Representatives of the UN Security Council that 29 paragraphs in the Covenant were annulled, all of them concerning the elimination of the state of Israel. He also noted that a Palestinian legal committee was working on a revised charter.

ARAB LEAGUE BOYCOTT OF ISRAEL

The PLO reiterated its stand against the Arab boycott of Israel when it signed the September 28, 1995 Joint Declaration of the Washington Summit. That declaration called, *inter alia,* for an end to the boycott as soon as possible. Additionally, senior Palestinian Authority economic and trade official Ahmed Quray (now Speaker of the Palestinian Legislative Council) made the following commitment in an October 17, 1996 letter to then U.S. Trade Representative Mickey Kantor: "The PLO and the Palestinian Authority and its successors will support all efforts to end the boycott of Israel and will not enforce any elements of the boycott within the West Bank and Gaza Strip."

Three weeks after the July 30 Israeli closure of the West Bank and Gaza, the Palestinian Authority (PA) began urging Palestinians to stop purchasing certain Israeli products and items imported by Israelis that are considered luxury items or which can be produced within the West Bank and Gaza. Enforcement appears to be

lax, but there have been reports of zealous officials barring the entry of certain goods, especially in Gaza. PA officials have generally avoided referring to this measure as a "boycott." While it is impossible at this time to gauge the effectiveness of the PA's urging, there have been extensive reports of exceptions granted to Palestinian businessmen who have approached the PA for clearance to import products covered by the action. The extensive easing of closure measures brought no change in the PA's call for restricted imports. Although some officials have referred to the need for the GOI to lift its 'blockade" against the West Bank and Gaza in order for the PA's action to be rescinded, the exact measures that must be taken for this to occur have not been made clear.

STATUS OF THE PLO OFFICE

The State Department's Office of Foreign Missions designated the PLO office in Washington a "foreign mission" under the Foreign Missions Act on June 21, 1994, to provide a statutory basis for regulating the office. The designation was published in the Federal Register on July 20, 1994. The PLO office and personnel are not accorded diplomatic status, privileges or immunities. The office may not portray itself as a diplomatic mission or embassy, but may portray itself as representing the PLO. Office personnel support U.S. travel by members of the PLO and the Palestinian Authority and have testified before Congress and participated in discussions with U.S. government officials and in numerous meetings and media events. The office has approximately ten employees, all of whom are permanent resident aliens or U.S. citizens. The office is currently headed by Mr. Hassan Abdel Rahman.

On August 8, the PLO Office in Washington was informed by the Department of State that effective midnight, August 12, with the expiration of the Middle East Peace Facilitation Act and accompanying Presidential waiver of statutory restrictions on the PLO, the PLO Office was required to suspend its activities.

PALESTINIAN ASSISTANCE

The U.S. is working with the international donor community to meet the legitimate development needs of the Palestinians as they seek to build self-governing institutions and implement their agreements with Israel. We also have worked to ensure that all U.S. assistance is handled in a transparent and accountable manner. The largest single international assistance program has been the World Bank's Holst Fund, to which the U.S. has contributed $39.9 million and other donors $187.2 million (as of December 7, 1996). A total amount of $227.1 million for the Holst Fund has been disbursed. This fund sustains Palestinian Authority operations and is subject to rigorous World Bank auditing.

There have been no credible reports of irregularities in the use of the Holst Fund, nor is there any information to indicate that other U.S. assistance projects have been used for other than their intended purposes. The U.S. Agency for International Development continues to implement scrupulously its procedures for the monitoring and supervision of activities performed by USG-funded nongovernmental organizations and contractors.

The U.S. has been actively engaged, together with other donors, in supporting ongoing efforts to increase the accountability of the Palestinian Authority's financial operations. We have also taken a leadership role in ensuring that the fiscal control steps in the Tripartite Action Plan (TAP), a document signed by the Palestinian Authority, Israel and the donor community, are functioning. The PA reiterated its commitment to fulfill its TAP obligations regarding account consolidation at the December 10 meeting of the Ad Hoc Liaison Committee in Brussels. According to the IMF, higher than anticipated revenues and extraordinary expenditure control resulted in a slight budget surplus for the first quarter of 1997. The PA and the IMF are still projecting an overall budget deficit of $52 million for this year, significantly lower than the deficit of $95 million recorded in 1996. Major Western based accounting and consulting firms are involved in the monitoring and supervision of Palestinian financial activities on a regular basis.

OTHER ISSUES

Finally, the PLO Commitments Compliance Act calls for information on several other issues:

- The status of Muhammad Rashid and Abu Abbas were last discussed in the January 22, 1997 report. The status of Rashid and Abu Abbas has not changed since that time.
- We have raised with the PLO the issue of PLO compensation to American citizen victims of PLO terrorism. Lawyers representing the PLO, the family of Leon Klinghoffer (who was murdered in 1985 when terrorists seized the cruise ship Achille Lauro) and Crown Travel Service Inc. reached a settlement on compensation that was entered into the US district court in Manhattan on August 6, 1997. The State Department was not a participant in the litigation and has no information on the terms of the settlement.
- Issues relating to the Hawari group and others were last reported in the January 1994 report. Their status has remained unchanged since that time.
- The PLO has cooperated in the past with our requests for information available to them that could shed light on the status of U.S. nationals known to have been held by the PLO or factions thereof in the past. There have been no new developments.
- In the Interim Agreement, both Israel and the PLO agreed that, "Neither side shall initiate or take any step that will change the status of the West Bank and the Gaza Strip pending the outcome of the permanent status negotiations." The PLO has respected this commitment. Under Israeli-Palestinian agreements, the Palestinian Authority may only maintain offices in the areas under its jurisdiction, which do not include Jerusalem. Oft-repeated Palestinian rhetoric about the future "state of Palestine with its capital in Jerusalem," constitutes a statement of position only.
- Several Palestinian institutions were given a closure notice by Israeli authorities in August 1995, but were allowed to remain open after they signed a declaration that they were not con-

nected with or funded by the PA. Similarly, PLO Executive Committee member and Orient House head Faisal Husseini has consistently refused appointment as an official of the PA, nor did he seek election to the Palestinian legislative council. His most recent disavowal came on July 1.

- The Palestinian Authority Minister of Religious Affairs, Hassan Tahbub maintains offices in Ramallah and Gaza for the conduct of his official PA duties. He is also president of the Higher Islamic Council, which has been headquartered in Jerusalem's Old City since its establishment in 1967. He occupied this office prior to being named minister of religious affairs. Tahboub has publicly said that his Jerusalem office pre-dates the existence of the Palestinian Authority and has nothing to do with the PA.
- In response to Israeli concerns, the PA announced that three offices (the Vocational Training Center, the Mapping and Geography Department, and the Youth and Sports Department) were to be closed in August. Israeli officials welcomed this move.
- We have no evidence the PLO has signed any agreements not within the areas allowed in its agreements with Israel (economic agreements, agreements with donor countries for the purpose of implementing arrangements for the provision of assistance to the Council, agreements for the purpose of implementing the regional development plans, cultural, scientific, and educational agreements), nor have we seen any evidence that Palestinian offices abroad issue Palestinian passports or other Palestinian travel documents.
- We continue to monitor the size and composition of the Palestinian police. Israel alleges that the force totals more than the 30,000 allowed in the Interim Agreement. The PA acknowledges employing about 34,500, but contends that the excess is due to the employment of five to six thousand Palestinians as unarmed, non-uniformed clerical and support staff and informants. The PA indicates that it routinely notifies the GOI of all regular police hires, but not of clerical staff or informants. The PA, as part of the agreement on Hebron, reaffirmed its commitment on the size of the Palestinian police forces, in accordance with the Interim Agreement.
- Israel has alleged that the Palestinian Authority has not transferred suspected terrorists. The PA has deferred action on the transfer of some of those requested, citing Annex IV, article II, section 7(f)(2) of the Interim Agreement, covering delays in transfers to the requesting side for the duration of a suspect's detention or imprisonment. The PA notes that in other cases the Israeli government has not officially requested a transfer in accordance with the procedures outlined in the agreement. In still other cases, the PA indicates that the suspects are at large, their whereabouts unknown.

f. Report on Rewards for Information Relating to International Narcoterrorism July 12, 1994 [Pursuant to P.L. 84–885, sec. 36(h)]

United States Department of State
Washington, D.C. 20520
June 20, 1994

The Honorable Thomas S. Foley,
Speaker of the House of Representatives

Dear Mr. Speaker:

I am writing to advise the Congress that a reward has been paid pursuant to 22 U.S.C. § 2708. The enclosed documentation provides information required under paragraph (h) of that statute.

Sincerely,

Wendy R. Sherman
Assistant Secretary
Legislative Affairs

AMOUNT OF THE REWARD PAID

Special Agents of the Diplomatic Security Service met with Mr. Adnan Awad and provided him with a reward of $750,000.

TO WHOM THE REWARD WAS PAID

The reward recipient is Mr. Adnan Awad. Although normally we do not reveal the identity of a reward recipient, in this case the recipient has publicly revealed his participation in the Rewards Program. His role in the trial of terrorist Mohamed Rashed is also public knowledge.

ACTS WITH RESPECT TO WHICH THE REWARD WAS PAID

Over the span of more than a decade, Mr. Adnan Awad provided crucial information to the United States regarding the "15 May" organization. This terrorist organization was responsible for at least fifteen bombings during the early and mid-1980s, three of which involved aircraft. In one particular case, a top aide to the organization, Mohamed Rashed, placed a bomb on board a Pan American World Airways aircraft. The bomb exploded en route from Tokyo to Honolulu on August 11, 1982, killing a teenager.

Terrorist Mohamed Rashed was arrested in Greece in 1988. Rashed's trial for the Pan American aircraft bombing started in 1991 and was conducted within the Greek legal system. As a result of Mr. Awad's cooperation and testimony, provided at extreme personal risk, the "15 May" organization was dismantled; and Mohamed Rashed was convicted in 1992, receiving eighteen years in prison. Rashed appealed the verdict which was upheld on June

18, 1993, followed another trial by a higher court. Mr. Awad provided testimony in both of Rashed's trials in Greece and also testified before a U.S. Grand Jury.

SIGNIFICANCE OF THE INFORMATION

Mr. Adnan Awad's information was pivotal to the dismantling of the "15 May" terrorist organization and the conviction of terrorist Mohamed Rashed. Particularly significant were the sustained nature of Mr. Awad's contributions and the powerful signal his court testimony sent to terrorists everywhere about our commitment to defeat international terrorism.

g. Determination Placing Sudan on Terrorism List (Public Notice 1878), October 7, 1993

DEPARTMENT OF STATE
OFFICE OF THE SECRETARY
[PUBLIC NOTICE 1878]

DETERMINATION SUDAN

On August 12, 1993, Secretary of State Warren Christopher made the following determination:

"In accordance with section 6(j) of the Export Administration Act (50 U.S.C. App. 2405(j)), I hereby determine that Sudan is a country which has repeatedly provided support for acts of international terrorism. The list of 6(j) countries as of this time therefore includes Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria."

Warren Christopher,
Secretary of State.

Billing Code 4710-10-M

h. Counter-Terrorism Rewards Program [1] (Bureau of Diplomatic Security, U.S. Department of State)

U.S. Offers up to $7 Million for Information About Terrorists

The U.S. Department of State offers substantial rewards for information preventing acts of international terrorism against United States persons or property, or leading to the arrest or conviction of terrorist criminals responsible for such acts. The reward level is up to $7 million when U.S. civil aviation is targeted by terrorists.

The Counter-Terrorism Rewards Program was established by the 1984 Act to Combat International Terrorism, Public Law 98–533. Under the Rewards Program, cooperating individuals and their immediate family members may be relocated to the U.S., or elsewhere, and they are assured complete confidentiality. Rewards, totaling millions of dollars, have been paid in dozens of cases. Innocent lives have been saved and terrorists put behind bars.

In 1994, Congress expanded the definition of "international terrorism", authorizing rewards for information regarding " . . . any act substantially contributing to the acquisition of unsafeguarded special nuclear material . . . or any nuclear explosive device . . . by an individual, group, or non-nuclear-weapon state."

Public-Private Partnership

In 1990, the State Department forged a unique public-private partnership with the Air Transport Association of America and the Air Line Pilots Association, International, in which each organization pledges up to $1 million to supplement rewards paid by the U.S. Government for information that prevents a terrorist act against U.S. civil aviation, or leads to the arrest and conviction of any person who has committed such an act. This has resulted in a maximum reward of up to $7 million in such cases.

The U.S. Government's standing reward offer of up to $5 million applies in all cases not addressed by the partnership agreement. Moreover, efforts are underway to expand the Government partnership with the private sector, so that rewards at the $7 million level can be offered outside the sphere of civil aviation.

Interagency Rewards Committee

The Director of the Diplomatic Security Service, or his/her designee, chairs an interagency committee which identifies reward candidates and then recommends rewards to the Secretary of State. This committee serves as the forum for discussion of many aspects of the Program. The Interagency Rewards Committee is comprised

[1] U.S. Department of State HEROES Homepage: http://www.heroes.net/pub/heroes/content2.html

of representatives from the White House National Security Council staff, the Central Intelligence Agency, the Department of Justice, the Federal Bureau of Investigation, the Drug Enforcement Administration, the U.S. Marshals Service Witness Security Program, the Immigration and Naturalization Service, the Federal Aviation Administration, the Department of Energy, and the Department of State.

EVERY GOVERNMENT AND EVERY CITIZEN

While the law governing the Rewards Program is aimed at terrorism directed against Americans, the United States shares information with other nations whose citizens are at risk. Every government and every citizen has a stake in bringing terrorists to justice and in preventing acts of terrorism. Terrorists are violent criminals. They must be stopped.

- On August 7, 1998, terrorist bombings in Nairobi, Kenya and Dar es Salaam, Tanzania tragically resulted in hundreds of deaths and the savage maimings of thousands, those murdered included U.S. Embassy personnel in Nairobi.
- On the morning of November 12, 1997, Ephrahim C. Egbu, Joel B. Enlow, William L. Jennings, and Tracy L. Ritchie, employees of the Union Texas Petroleum Company (UTP) who were in Karachi on temporary assignment, were picked up from the Sheraton Hotel for a ride to UTP headquarters along the waterfront. As the station wagon in which they were traveling proceeded across the only bridge leading to the UTP office building, a red Honda Civic pulled in front and two gunmen jumped out. The gunmen fired into the UTP station wagon, brutally murdering the Pakistani driver, Anwar Mirza, and Messrs. Egbu, Enlow, Jennings and Ritchie.
- During the period December 1996 to January 1997, sixteen letter bombs disguised as holiday greeting cards were delivered through the mail to recipients in the United States and the United Kingdom.
- On June 25, 1996, the brutal and cowardly terrorist attack on a multi-national peacekeeping force in Dhahran, Saudi Arabia left 19 dead and hundreds injured. These peacekeepers were enforcing United Nations sanctions and the dead and injured represent citizens from several nations. The Department of State is offering a reward of up to $5 million for information leading to the arrest and/or conviction of those responsible for the Khobar Towers bombing. Additionally, the Government of Saudi Arabia is offering a reward of $3 million.
- On July 4, 1995, Dr. Donald Hutchings, a respected American medical professional, was abducted by unknown persons in the hill country of Kashmir. Please help us find Dr. Hutchings.
- On March 8, 1995 in Karachi, Pakistan, terrorists armed with automatic rifles murdered two American Consulate employees and wounded a third as they traveled in the Consulate shuttle bus.
- On January 6, 1995, a fire broke out in an apartment in Manila occupied by Khaled Shaikh Mohammad. The information developed from an investigation revealed that in August 1994

through January 1995, in this apartment and elsewhere, Khaled Shaikh Mohammad unlawfully and willfully conspired to bomb U.S. civilian airliners by placing explosive devices on twelve airliners flying over the Pacific Ocean during a two-day period in January 1995.

- On February 26, 1993, terrorists bombed the New York World Trade Center, murdering six innocent people, injuring over 1,000 others and trapping terrified school children in a smoke-filled elevator for hours.
- On January 25, 1993, Mir Aimal Kansi allegedly murdered two persons and injured seriously three others, allegedly firing an AK–47 assault rifle into cars waiting at a stoplight.
- On December 21, 1988, terrorists destroyed Pan American Flight 103. The terrorist bombing of Pan Am 103 over Scotland points to the global impact of terrorism. The plane carried 259 citizens from 30 nations, including Americans, when it was destroyed over Lockerbie, Scotland; another 11 persons perished on the ground.
- In April 1986, one of the youngest victims of terrorism, nine-month-old Demetra Stylian Klug, was killed in the terrorist bombing of TWA Flight 840.
- On June 13, 1985, terrorists hijacked TWA Flight 847. During a violent rampage against passengers and crew, they beat Robert Stethem to death then dumped his body onto the tarmac.
- On October 23, 1983, 243 U.S. Marines were murdered in a cowardly truck bomb attack, ending their mission to help establish peace for the people of Lebanon.
- During the 1980's, in conditions of the utmost cruelty and deprivation, kidnapped American citizens—as many as nine at one time—were held hostage in Lebanon. For long and painful years, they were chained in the dark, beaten, and denied medical care. Three were murdered during their captivity.
- In the past 22 years, terrorist actions in Greece have resulted in the deaths of four Americans: Richard Welch, George Tsantes, William Nordeen, and Ronald Stewart, injuries to 28 other Americans, and a rocket attack on the Embassy compound in February 1996.

EMPHASIS ON PREVENTION

During the first four years of the Program, the State Department offered specific rewards for information leading to the arrest or conviction of those responsible for specific terrorist attacks. In December 1988, however, new emphasis was placed on provisions of the law which allowed for payment of rewards in cases where information led to the "prevention, frustration, or favorable resolution of terrorist attacks against United States persons." Specific reward amounts for particular terrorist incidents were no longer announced. It was instead announced the Secretary of State is authorized to pay for information regarding any past, present, or planned future act of terrorism. This policy reaped benefits during Operation Desert Storm, during which the Program was heavily publicized.

OPERATION DESERT STORM

At the start of the Persian Gulf War, an informant in an East Asian country came forward with alarming information about a series of terrorist attacks planned by the Iraqi intelligence service. The terrorists had already surveyed their intended targets. They had acquired automatic weapons, grenades and high explosives. The attacks were beyond the planning stage and about to be carried out. One of the attacks, a planned terrorist bombing and strafing of airline ticket counters at a major airport, was scheduled to be carried out within 48 hours. The cooperating individual provided information which was essential in thwarting the planned terror attacks; and the terrorists were stopped in their tracks by U.S. and host nation authorities. Had the planned attacks succeeded, scores of Americans and citizens of our coalition partners would have been murdered. The informant, and his/her immediate family, were relocated under the Rewards Program to a place of safety in the United States. He/She was given a reward of approximately $1/2 million for coming forward and saving lives.

NEW YORK WORLD TRADE CENTER BOMBING

On February 26, 1993, the phenomenon of terrorism struck home for Americans in New York. A large improvised explosive device, concealed in a vehicle, was detonated in the sub-ground garage of the 110-story World Trade Center complex. One of the terrorists responsible, when subsequently captured, admitted the attackers sought to collapse one or both of the twin towers, killing tens of thousands of innocent people. The terrorists who bombed the World Trade Center succeeded in murdering six innocent people, injuring 1,000 others, and trapping terrified school children in a smoke-filled elevator for hours. Suspected terrorists Abdul Rahman Yasin and Ramzi Ahmed Yousef fled the United States following the bombing. Yasin is believed to be hiding in Iraq. Immediately following the indictments of Yasin and Yousef, the U.S. launched a massive international manhunt for the two fugitives. Wanted posters offering up to $5 million rewards for information leading to their capture were distributed in a variety of languages. Multi-language leaflets containing the reward offers were also sent throughout the world. Even matchbooks containing photos of the fugitives have been distributed. On February 8, 1995, based upon information provided through the Counter-Terrorism Rewards Program, Ramzi Ahmed Yousef was captured in Pakistan. He is currently in jail.

PUBLIC EFFORTS

The State Department has an ongoing public campaign to promote awareness of the Rewards Program. Advertisements have been placed both to promote awareness of the Program and to reach those with information. Ads in English, Arabic, Spanish, French, German and Russian have appeared in publications as far-ranging as The New York Times, Al Hayat, Paris Match, Die Welt, and Pravda. Additionally, public service announcements featuring entertainment personalities Charlton Heston, Charles Bronson, and Charlie Sheen have been widely distributed.

4. Department of Defense

a. Weapons of Mass Destruction (WMD) Reserve Component Integration Plan

Partial text of the Department of Defense Plan for Integrating National Guard and Reserve Component Support for Response to Attacks Using Weapons of Mass Destruction, January 1998

MEMORANDUM FOR THE UNDER SECRETARY OF THE ARMY

SUBJECT: Transmittal of the Weapons of Mass Destruction (WMD) Tiger Team—Reserve Component Integration Plan [1]

This plan was developed at the direction of the Deputy Secretary of Defense. It is based on using the premise that disaster relief is primarily a state mission. Given the unique nature of a WMD attack, we anticipate requests for federal assets much earlier than during typical disasters. Accordingly, we focused on the most likely tasks that DoD would be asked to support as the Federal Response Plan is implemented in support of a WMD event. With integration of the RC as our cornerstone, our work focused on the vulnerabilities from a United States' state, territory and possession perspective.

During the mission analysis we assessed current DoD capabilities. Our analysis concluded we are insufficiently prepared to perform likely tasks which other federal agencies may request within consequence management. Additionally, there is a significant void in the response community chemical, biological and radiological assessment capability. As a result, we found it necessary to create a DoD response capability that does not exist today. These Rapid Assessment and Initial Detection Elements will assist with agent identification and appropriate hazard mitigation in the affected areas of a WMD release. Operationally, these elements will be responsible for identifying the areas to evacuate and where it is safer to remain. The elements are intended to respond under the State control and, if necessary, be available for military contingencies. We recommend fielding teams in every state. We were reminded frequently during our survey process, if the responders were not in the geographic proximity, then they were likely to be too late. This plan represents a beginning, a start point, of a larger effort that requires support of senior leadership. So too must be our overall commitment to prepare for WMD attacks. Preparing for this mission requires a multi-year effort.

Finally I would like to recognize the Team that made this integration plan possible. Lt Col Jay Steinmetz from the Forces Com-

mand Domestic Plans Branch served as the Tiger Team Chief. In that capacity, he performed superbly and represents a real DoD treasure. The core group included: Mr. William McCoy, Office of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict; COL Chuck Winn, Office of the Assistant Secretary of Defense for Reserve Affairs; LTC Tim Madere, Office of the Under Secretary of the Army; Maj Keith McCullough, Office of Air Force National Security Emergency Preparedness; LTC Pete Aylward, Directorate of Military Support, LTC Dutch Thomas, National Guard Bureau, and MAJ Alicia Tate-Nadeau, U.S. Army Reserve Command.

Special recognition is due to Captain Todd Burton of the Army National Guard Military Support Branch, and Major Tom Welch of the U.S. Army Reserve 100th Division, whose technical contributions to the team and their agencies, truly ensured a quality final product. This Team, truly experts in their respective fields, have exceeded the standards by every measure. Their work must be regarded as "above and beyond" the call.

(signed)
Roger C. Schultz
Brigadier General, USA
Executive Director

FOREWORD

BACKGROUND

The Defense Against Weapons of Mass Destruction Act of 1996 sponsored by Senators Nunn, Lugar, and Domenici mandates the enhancement of domestic preparedness and response capability for terrorist attacks involving nuclear, radiological, biological, and chemical weapons. The Legislation provided funding to improve the capability of the federal, state and local emergency response agencies to prevent and, if necessary, respond to domestic terrorist incidents involving weapons of mass destruction (WMD).

The Secretary of Defense (SECDEF) designated the Secretary of the Army (SECARMY) as the Executive Agent for DoD program implementation. The Assistant Secretary of the Army for Installations, Logistics, and Environment (ASA(ILE)) provides oversight for the Director of Military Support (DOMS) as the Staff Action Agent. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD(SO/LIC)) provides policy and funding oversight for the DoD Domestic Preparedness Program.

A Senior Interagency Coordinating Group (SICG), chaired by the Federal Emergency Management Agency (FEMA), provides direction for orchestration of the overall program, ensuring that terrorism-related federal preparedness programs are coordinated nationally to enhance state and local response capabilities. ASD (SO/LIC) and DOMS represent DoD on the SICG. The SICG receives guidance from the National Security Council (NSC).

The Interagency Strategic Plan, developed in concert with our federal interagency partners represented on the SICG, was written to enhance response using a peacetime context addressing incident models such as the World Trade Center and the Tokyo Subway. While many facets of response are included in this program, its

overwhelming emphasis is on training first responders in large U.S. cities. Interagency teams coordinate with local city officials including fire, law enforcement and medical responders to tailor training to meet their specific needs and requirements.

As a result of an October 3, 1997 Defense Review Board meeting, the Deputy Secretary of Defense asked the ASD (SO/LIC), ASD (Reserve Affairs), and the ASA (ILE) to provide an assessment for integrating the National Guard and Reserves into ongoing Nunn-Lugar-Domenici sponsored WMD Domestic Preparedness programs. On October 19, 1997 the Deputy Secretary of Defense (DEPSECDEF) returned the initial Reserve Component (RC) plan seeking a more complete RC integration model.

On November 3, 1997 the DEPSECDEF directed that the Under Secretary of Defense for Personnel and Readiness oversee the development of a plan to integrate the Reserve Components into the DoD response to attacks using WMD. During a November 7, 1997 meeting, the Under Secretary of Defense directed the construction of a complete model for integrating the Reserve Components into a consequence management response for domestic terrorism incidents involving weapons of mass destruction. The formation of a core group of experts, with support from agencies throughout the Department, was formed to complete the plan. In a November 14, 1997, memorandum, the Under Secretary of Defense placed the Under Secretary of the Army in charge of the plan development. Subsequently, the Under Secretary of the Army directed this core group "Tiger Team", to incorporate the capabilities of the RC into the plan. The Tiger Team tasking included developing the concept, model, overall direction for the program, and the funding necessary to support the RC integration. The Team's focus on the appropriate, substantive and integrated DoD support model to local, state, and federal government authorities responding to a WMD attack form the basis for this plan.

In developing this plan, the Tiger Team reviewed existing programs, applied scenario-driven analysis, and sought the opinions of other recognized experts in the Emergency Preparedness field. The Tiger Team recognized statutory restrictions and training limitations as part of their analysis and used the Interagency Strategic Plan and the Federal Response Plan (FRP) as the framework for roles and missions definition.

This plan outlines the evolutionary process to fill existing gaps in consequence management response capabilities. It focuses on improving DoD support for the response to a WMD event. In particular, response options were developed to incorporate and leverage the unique assets and capabilities of the Reserve Component into the overarching WMD strategy.

METHODOLOGY

The Tiger Team mission and charter focused on producing a comprehensive plan to incorporate work from many previous efforts and leverage all available assets. The Tiger Team recognized that any response effort must be accomplished within the statutory and regulatory provisions that govern Military Support to Civil Authorities (MSCA). A questionnaire designed to assess current DoD capabilities was developed. This survey resulted in a response pro-

file outlining DoD capabilities to support the Emergency Support Functions in the FRP.

More specifically, the team used Annex C to the U.S. Government Interagency CONPLAN entitled "Combating Domestic Weapons of Mass Destruction (WMD) Terrorism (Draft- November 10, 1997)". The annex lists the tasks the Interagency Group deemed critical to successfully respond to a WMD incident. The Tiger Team grouped these tasks to correspond with the Emergency Support Functions in the FRP. Next the Team identified vital response tasks and requested the Services assess their capability to perform the tasks that DoD would likely be asked to support. The Team consolidated the Service responses to identify existing gaps in the DoD capability to respond to a WMD event. The results form a snapshot baseline of capabilities and assets.

Following the assessment of current capabilities, the Team developed a model for a prototype National Guard response concept that enhances and supports the existing and planned federal response structure. The model was tested for appropriateness by querying experts in the field representing the first responder community, primary federal agencies tasked to support state and local governments, and knowledgeable representatives from DoD organizations. These experts provided the Team with comments and recommendations. The Tiger Team also reviewed and considered numerous authoritative DoD sanctioned studies. These included the findings of the 1997 Defense Science Board (DSB) Summer Study on Transnational Terrorism, and the Chem-Bio 2010 (Foss-Downing) Report. It is recognized that some interagency partners possess a robust capability, and may already have sufficient resources to deal with small-scale WMD events. This plan capitalizes on these existing resources and provides a basis for modeling, analysis and prototyping for further exercise. As a result, a framework for even more enhanced integration of the Total Force into the WMD program is clearly possible. The existing DoD Directives, policies, and MSCA related statutes were also considered in the development of this plan.

The Tiger Team recognized the federal response concepts identified in the May 1, 1997 Report to Congress and the SICG Strategic Plan. In addition, the Tiger Team reviewed the United States Atlantic Command (USACOM) and Chemical and Biological Defense Command (CBDCOM) response plans which included Response Task Force (RTF) and Chem-Bio Rapid Response Team concepts. Upon review, it was evident that few military elements are currently focused, trained or equipped to respond to WMD events. Hence the purpose of the project -- to increase the DoD response capabilities while developing the potential within the Reserve Component units.

While this project focuses on the RC response to a WMD attack on cities, there are other areas potentially at even greater risk. With our military today primarily CONUS based, the ability to project our Nation's military power becomes crucial to our military response options. By leveraging the Reserve Component capability, the DoD response model takes on a new and different dimension. Even further as certain RC units qualify for direct deployment, a local WMD response capability becomes all the more important.

The employment of a WMD in the United States against our power projection systems during a Major Theater War could severely degrade our ability to respond during a crisis. Both the Chem-Bio 2010 Study and the 1997 DSB Summer Study on Transnational Terrorist Threats found that no dedicated force structure exists to address potential CB use on military and civilian facilities in CONUS or in theater. At issue - projecting our Nation's military power at the appropriate time and place.

The concept for an integrated DoD consequence management model recognizes that the same or similar capabilities are required against this asymmetric threat. The response model in this plan includes force protection concepts, research & development, and resource allocations that could be applied to CONUS Major Theater of War enabling facilities. Here again, using the RC integrated response capability would support both the National Military Strategy of Force Projection by providing support to United States bases prior to and during operational deployments and also provides a response capability to WMD attacks on other U.S. targets. In addition to current tactical battlefield CB defense units, the Total Army Analysis (TAA) has documented the need for additional CB structure. As these new units are stationed, the USAR and ARNG leadership will be informed of the gaps in state and regional coverage. These new MTOE units will greatly enhance the capability to respond to WMD emergencies. Again, the existing RC unit capability is being leveraged. Since there is a relationship between the WMD skills and the unit's wartime mission, a complementary outcome clearly exists.

The methods for the first phase of this project and during the mission analysis were oriented first on the units in the current force and their capabilities to respond to WMD attacks. In the final analysis, the concept outlined here reaches far beyond just local WMD contingencies. Over time, these response elements will develop the skills necessary to be employed at US military bases or at other strategic points of U.S. interest under Title 10 U.S.C. In addition to the current force structure, this plan outlines a requirement for new structure. This proposed structure is not large by any measure but the potential impact is enormous. Further detailed in this plan, the Rapid Assessment and Initial Detection (RAID) Element provides the core capability for the technical DoD response. Early assessment and detection of a WMD agent, determining the concentration of the release and the areas to evacuate or remain are the likely technical areas the DoD will be asked to support.

These questions form the most significant challenge facing communities and states as they respond to WMD attacks. Here again, National Guard and RC integration will enhance the DoD capability in response to WMD attacks.

EXECUTIVE SUMMARY

This plan was developed by direction of the Deputy Secretary of Defense. Its aim is to improve the military capabilities required to effectively support local, state, and federal agency consequence management response to terrorist attacks. These attacks may include the use of nuclear, radiological, biological, and chemical weapons - Weapons of Mass Destruction.

The Quadrennial Defense Review and National Defense Panel Report underscore the need to fully address the possibility that a future adversary will use biological or chemical weapons and integrate that threat into defense planning. Appropriate acquisition, intelligence and domestic response operations will result. Emerging doctrine, training and equipment requirements must be developed in concert with this theme. Recognizing the importance and understanding the complexities involved, we must provide the force with a capability to defend against and respond to asymmetric attacks at military installations or support the response to attacks on our homeland.

The very nature of a WMD attack places tremendous pressure on the local response community. As a result, consequence management planning is just as demanding and even evolutionary in many respects. This plan outlines the concept to fill existing gaps in consequence management response capabilities. It defines the concepts, model, direction, and funding required for appropriate, substantive, integrated military support to local, state, and federal government authorities responding to the use of weapons of mass destruction. Specifically, the plan focuses on improving DoD's support for the response to a WMD attack. This plan includes response options. Options that explore ways to incorporate and leverage unique Reserve Component assets and capabilities into the overarching local, state, and federal interagency effort to assist first responders.

This effort reinforces the Department of Defense supporting role in the overall domestic response capability. Furthermore, an efficient response requires cooperation among federal departments and agencies, as well as state and local authorities. Each of these governmental organizations possesses unique responsibilities, priorities, and demands on resources. Success depends on a fully integrated effort that shares both a common vision and mutual goals and objectives. Consequently, this plan builds upon previous interagency work (most notably the Senior Interagency Coordinating Group Strategic Plan written August 29, 1997) and develops DoD capabilities to support those concepts and initiatives.

The complementary skills of the Reserve Component create a more robust DoD response capability that must be integrated into a comprehensive WMD consequence management response. The realities of an operational environment are characterized by the proliferation of weapons of mass destruction, rapidly changing technologies, and a smaller military with severely constrained resources. This plan reinforces the principles in the Defense Reform Initiative and conveys the structure and direction required for implementing and institutionalizing changes necessary in the DoD for successful program execution.

The first part (Chapters 1-3) defines the plan's purpose and scope, identifies the nature of the problems we face as a nation in responding to WMD attacks, and assesses current capabilities to respond. It sets the conceptual foundation of the response process and highlights the need to enhance currently limited response capabilities. The second part (Chapters 4-6) identifies the tasks for improving military response capabilities, describes the required re-

sponse elements, and outlines the training requirements necessary to establish and sustain the essential skill levels.

Functional tasks which the military anticipates from local, state, and other federal agencies have been defined for the DoD response elements based on the Emergency Support Functions in the Federal Response Plan. Specific elements have been identified to perform these functional tasks. The integration of these elements into the current response model provides a flexible, robust response capability that can be applied to support local, state, and federal responders.

Finally, the annexes provide the framework for a continued effort by the program office. They provide additional information, references, points of contact, and specific equipment and training requirements for those elements that will be initially organized. The first year program sets the foundation to establish a Rapid Assessment and Initial Detection capability in every state and territory. It also begins the identification of, training for, and equipping of reconnaissance and decontamination elements from the existing chemical companies in National Guard and Reserve Component. Other elements will necessarily be refined and focused during the first year of the program. The plan provides sufficient detail to establish a program office to integrate these activities, execute the FY99 budget request, and field the initial military support elements. As this program develops, the new program office performs a key role in synchronizing the RC integration activities with existing interagency programs.

Since the Tiger Teams effort was executed in short measure, portions of this plan will require additional study and development. Of particular note are the results of the DoD capability survey. It was evident early on in the survey process that the Department sponsored training in the Domestic Preparedness Program that could also be of real benefit to selected members of the RC. It is envisioned during the first year of this integration program that a small cadre at each installation, reserve center and armory will receive the (Awareness Biological Chemical Plus) ABC+ training. ABC+ is based on the Nuclear, Biological, and Chemical (NBC) awareness course currently being taught in the NLD City Training Program. In addition to the awareness training, key leaders and individuals will receive training in WMD emergency procedures. These procedures will also reinforce the proper techniques, protocols, and references that are essential to first responders. The intent is to answer questions that might be asked and provide an awareness of particular items to be alert to as the events develop during a WMD event. An ABC+ checklist will be provided that will guide the person through a series of questions that provide a profile of a potential WMD attack. ABC+ training will be provided on an interactive CD-ROM. At a minimum, full time National Guard and Reserve Component staff members need to complete the ABC+ training.

Overall, this is an integration effort, one that requires a long-term commitment. The Program Office must assume sponsorship and follow the major themes outlined in this work -- both now and into the future.

CHAPTER 1: OVERVIEW

INTRODUCTION

The United States is beginning to realize that terrorists may attack individuals, institutions, and facilities with weapons of considerable destructive power. Under Secretary of State Bartholomew, during testimony before the House Armed Services Committee in 1993, delivered an almost prophetic warning when he said,

> "We are especially concerned about the spread of biological and toxin weapons falling into the hands of terrorists. . . . To date we have no evidence that any known terrorist organization has the capability to employ such weapons . . . However, we cannot dismiss the possibilities . . . It may be only a matter of time before terrorists do acquire and use these weapons."

While not employing true weapons of mass destruction, the 1993 terrorist bombing of the World Trade Center in New York and the 1995 bombing of the Murrah Federal Building in Oklahoma City portend the tremendous response necessary if a WMD is used in the US. Few communities, including military installations and facilities, have the full array of response assets and expertise required to adequately deal with the effects of radiological, biological, or chemical weapons or the necessary depth to sustain these response operations. They must rely on the concerted effort of local, state, and federal government agencies, cooperating with private organizations, to meet the technological, medical, and engineering demands posed by such attacks. The DoD anticipates requests from civilian agencies responding to WMD attacks and plans to augment the local response capability with expertise, manpower, and equipment. Conversely, the DoD may also require mutual community and state support to respond to attacks on military installations, bases, or ports necessary to deploy and sustain military forces employed overseas.

PURPOSE AND SCOPE

The DEPSECDEF directed the development of this plan which includes the concepts, model, direction, and funding required to deliver an appropriate, substantive, integrated military support to local, state, and federal government authorities responding to the use of WMD. This plan provides a comprehensive and cohesive program consistent with national policy and DoD Directives. It integrates and advances many ongoing efforts throughout the Department and specifically addresses issues identified in a number of studies and reports. The plan supports evolving interagency plans including the FRP and the evolving Interagency Plan for WMD Response. It specifically identifies the actions required to leverage the capabilities of United States military forces. These capabilities are vital to fill the gaps in civil response assets currently prepared to respond throughout the United States. Many cities, states, and other federal agencies simply do not have the focus, the equipment, or the trained personnel needed in such a demanding environment. This plan addresses the DoD role within that context and the emergency management tasks that may require a DoD response.

This plan develops capabilities for operational response to nuclear, biological, and chemical threats within the confines of the United States, its territories, and possessions. These capabilities can and should be used outside the United States when required to support validated Commander-in-Chief requirements.

DEFINITION OF WEAPONS OF MASS DESTRUCTION

For the purpose of this strategic plan, WMD include any weapon or device that are intended, or have the capability, to cause death or serious bodily injury to a significant number of people through the release of toxic or poisonous chemicals or their precursors, a disease organism, or radiation or radioactivity.

THE THREAT OF WEAPONS OF MASS DESTRUCTION

The threat to the US posed by WMD is characterized by several factors. Recent events illustrate a real threat of domestic terrorism. Today terrorists have an improved ability to collect information, raise money, and disseminate rhetoric. Advanced information technology available through the Interned allows extremists to communicate widely and efficiently. Additionally, publicly available databases serve as repositories for technical information relating to weapons production.

Another important factor is that WMD, together with the materials and technology used to make them, are increasingly available. Many of these materials are widely available for legitimate commercial purposes. Moreover, the disintegration of the former Soviet Union increased concerns about the protection, control, and accountability of WMD, related materials and technologies, and the potential unemployment and proliferation of thousands of scientists skilled in this field. Transnational threats arising from the collapse of the eastern bloc, including the development of Chem-Bio capabilities by terrorist organizations, have increased the potential for attacks within our borders. A final factor is the relative ease of manufacture and delivery of WMD. Facilities required to produce radiological, biological, and chemical weapons are small and hard to detect, compared with those associated with nuclear weapons.

The Defense Against Weapons of Mass Destruction Act contains several findings which define the requirement for an enhanced domestic response capability. Among these findings are:

> ". . . the capability of potentially hostile nations and terrorist groups to acquire nuclear, radiological, biological, and chemical weapons is greater than at any time in history."
>
> "There is a significant and growing threat of attack of weapons of mass destruction on targets that are not military targets in the usual sense."
>
> ". . . the threat posed to the citizens of the United States by nuclear, radiological, biological, and chemical weapons delivered by unconventional means is significant and growing."
>
> "The United States lacks adequate planning and countermeasures to address the threat of nuclear, radiological, biological, and chemical terrorism."

PLANNING PRINCIPLES

The plan underscores the principle that domestic disaster relief is fundamentally a State mission falling with the State's broad authority/responsibility for public safety and welfare within its borders. Consequence management of a WMD incident is a category of disaster relief over which the State usually will have primary responsibility. Federal assistance in WMD consequence management situations generally will be in support of the State's disaster relief efforts, to include efforts in response to a WMD incident. Recognizing these basic principles, the plan focuses on filling the void in the State's initial assessment capability and the United States' ability to rapidly facilitate required assistance in excess of the State's capability to respond.

Two organizing principles were considered in developing this plan:

To structure the force based on the State disaster relief mission
To structure the force based on the Federal national defense/ MSCA mission

The team chose the Federal mission as the organizing principle. Under this organizing principle, the immediate response elements act as the tip of the Federal MSCA spear. Although immediate WMD response would be in a State status, under the control of the Governor, the unit's force structure would also support homeland defense, MSCA missions, and provide a secondary warfighting capability.

This organizing principle is consistent with the use of Federal military funds and other resources in support of this plan, and the extension of Federal military personnel benefits to National Guard personnel assigned to units engaged in these operations. This choice also avoids the legal and policy difficulties inherent in Federally funding and organizing a National Guard unit solely to conduct a State mission and is consistent with the general organizing principle of the National Guard for other missions.

OPERATIONAL CONCEPT

The operational concepts outlined in this plan are based on the principles noted above. The Rapid Assessment and Initial Detection (RAID) Elements, in their immediate response capacity, will assist in confirming the nature of a WMD attack. In most instances, the response elements will remain under State control. Under a worst-case scenario, Federal resources may also be requested very early in a WMD incident. We must anticipate these cases in planning for a coordinated local, state and federal response.

CHAPTER 2: THE PROBLEM

RESPONSE CAPABILITIES TODAY

Terrorist attacks using Sarin gas (a nerve agent) in the Tokyo subway affected more than 5,000 people. Concern for similar or larger events using chemical, biological, or radiological weapons have spurred legislation and programs to prepare local firefighters, emergency medical technicians, and other first responders. Despite

these commendable efforts, significant shortfalls remain in trained and equipped response capability throughout the United States. The relatively small-area bombing in Oklahoma City required 11 of today's 27 national Urban Search and Rescue Task Forces. Even these highly skilled teams are not prepared to operate in or around chemical, biological, or radiological hazards. The sheer size of WMD events may demand the support of many other properly trained and equipped personnel. First response organizations, state support agencies, and other federal agencies require major efforts to develop adequate capabilities. Until this occurs the DoD will continue to be tasked to support the WMD response. Even military units prepared to fight in a nuclear, biological, or chemical environment are not fully focused, trained, or equipped to support response to victims of attacks in the United States. Furthermore, our own ability to project combat power may be severely degraded by asymmetric attacks on sea and air ports of embarkation. Military units must also be prepared to respond to attacks on our facilities and installations.

LEVEL OF CURRENT PREPAREDNESS

Local, state, and federal governments are applying tremendous resources in many ongoing efforts to improve their WMD response capabilities. All responder agencies of local, state, and the federal governments must prioritize resources to address deficiencies in their plans for responding to a domestic WMD event. Military units identified to perform functions in and around the hazard areas will require additional personal protective gear, special training, and periodic exercises to ensure their safety and ability for timely and effective responses. This plan highlights those areas and provides sound solutions to meet those needs.

ASSESSMENTS

Results of the assessments conducted by the Catastrophic Disaster Response Group (CDRG) were highlighted in a report to the President in February 1997. These same shortfalls were identified in the SICG Strategic Plan produced in August 1997. The critical areas of concern which are highlighted below:

- Tailored and timely Federal Response to augment stat and local responders.
- Specialized equipment and coordinated training.
- Capability to deal with a large number of victims.
- Adequate medical supplies and pharmaceuticals: available and stockpiled.
- Baseline information of capability at federal, state and local levels.
- Better planning interface among federal, state and local authorities.
- Prioritization of transportation infrastructure for rapid movement of time-sensitive response resources.
- Timely and accurate emergency information.
- Electronic information management and communications capability.
- Manage stringent Public Safety measures.
- Finalize FRP Terrorism Incident Annex.

In addition to the CDRG assessment, DoD has identified four additional areas not addressed in the existing NLD Domestic Preparedness Program highlighted below:

- Current NLD program targets 120 cities—11 states and 4 territories are not included in this program.
- Federal assets are not well dispersed geographically.
- Military personnel require additional equipment and training to reach an adequate response capability.
- The RC has some statutory limitations that impede response decisions.

MILITARY PREPAREDNESS TO SUPPORT WMD RESPONSE

While many military units possess basic skills and capabilities that can be applied to WMD response requirements, few have been specifically focused on the precise tasks or equipped with the appropriate assets to immediately respond to such an event. During the development of this plan, Services were asked to identify units that might perform the response tasks identified in the interagency WMD response plan and to indicate if those units were adequately organized, trained, and equipped to perform these specific tasks. This survey dramatically displayed existing gaps in procedures, training, and equipment necessary for appropriate response.

For many of the WMD response tasks, focusing units on the missions they may be asked to perform and developing their awareness of the Incident Command System (ICS) is all that may be necessary. For others, specific tasks will require training. In a WMD scenario, selected members will be tasked to deploy to the Hot Zone and operate for extended periods of time, quite different from our wartime practices. Even more demanding, the tasks requiring total decontamination must be anticipated. These are very different practices when compared to our military doctrine today. Here again, the value of training to the same standards, using common terminology and exercising with first responders, we have the opportunity to prepare for this most demanding mission. In general terms today, the Department is not prepared for the WMD response. This plan addresses the areas requiring DoD attention and isolates in some detail the response options the Department may be asked to perform. In the end, the solution to the WMD response mission requires a partnership - military and civilian.

CHAPTER 3: THE RESPONSE

INTEGRATED RESPONSE CONCEPT

Local

Local response to an emergency situation uses the Incident Command System (ICS) to ensure that all responders and their support assets are coordinated for an effective and efficient response. The Incident Commander is normally the senior responder of the organization with the preponderance of responsibility for the event (e.g., fire chief, police chief, or emergency medical). If local assets are not sufficient to meet the emergency response requirements, they request state (or regional) assets through the State Office of Emergency Services.

State

The state's substantial resources, including the National Guard in state status, are coordinated through the state's response plan(s) and are normally coordinated by the state's Office of Emergency Services. If state assets are not sufficient to meet the emergency response requirements, they request federal assets through the FEMA Regional Operations Center.

Federal

The Presidential Decision Directive 39 entitled "U.S. Policy on Counterterrorism" recognizes that there must be a rapid and decisive capability to protect U.S. citizens, defeat or arrest terrorists, respond against terrorist sponsors, and provide relief to victims. The goals during the immediate response phase of an incident are to terminate the terrorist attack so that terrorists do not accomplish their objectives or maintain their freedom, and to minimize loss of life and damage and to provide emergency assistance to the affected area. In responding to a terrorist incident, Federal departments and agencies rapidly deploy the needed Federal capabilities to the scene, including specialized elements for dealing with specific types of incidents resulting from the threat or actual use of WMD. To coordinate the Federal response, the Federal Bureau of Investigation (FBI) and FEMA have been assigned lead agency responsibility for crisis and consequence management, respectively, in response to a domestic terrorist threat or incident.

The FBI is the lead agency for crisis management response to acts of domestic terrorism, which includes measures to identify, acquire, and plan the use of resources needed to anticipate, prevent, or resolve a threat or act of terrorism. The laws of the United States assign primary authority to the Federal government to prevent and respond to acts of terrorism; State and local governments provide assistance as required. Crisis management is predominantly a law enforcement response.

Crisis management activities include active measures for prevention, immediate incident response, and post-incident response. Activities include command of the operational response as the onscene manager for an incident in coordination with other Federal agencies and State and local authorities. The FBI provides guidance on the crisis management response in the FBI Nuclear Incident Contingency Plan (classified) and the FBI Chemical/Biological Incident Contingency Plan (classified).

FEMA is the lead agency for consequence management, which entails both preparedness for and dealing with the consequences of a terrorist incident. Although the affected State and local governments have primary jurisdiction for emergencies, a terrorist attack involving weapons of mass destruction could create havoc beyond their capability to respond. If this were to happen, FEMA would coordinate consequence management activities including measures to alleviate damage, loss, hardship, or suffering caused by the incident; to protect public health and safety; to restore essential government services; and to provide emergency assistance. FEMA would implement the Federal Response Plan, cooperating with State and local emergency response agencies. Final authority to make decisions onscene regarding the consequences of the incident

(rescue and treatment of casualties, protective actions for the affected community) rests with the local Incident Commander.

The federal government, including the DoD, responds to emergency requests from the states through the FRP. After the President declares a major disaster or emergency, the resources of the federal government needed to support the state response are managed by the Federal Coordinating Officer (FCC). When the State Coordinating Officer makes specific requests for assistance, he or she certifies that the state does not have the capability to meet the requirements. The FCO assigns the request to one of the 12 Emergency Support Functions (ESF) represented within the Emergency Response Team. If the lead agency of any ESF is not able to meet the requirements, it may ask the Defense Coordinating Officer (DCO) to provide the necessary response. The DCO coordinates all federal military assistance provided during the consequence management response.

Military Support

The DoD supports local, state, and federal government agencies in planning for and responding to domestic emergencies. Local units may respond under the immediate response doctrine when necessary to save lives, prevent human suffering, or mitigate great property damage. Many units execute memorandums of understanding for mutual support of emergency services with local jurisdictions or municipalities. National Guard units may also respond under state control when directed by appropriate state authorities. Upon the declaration of an emergency or major disaster by the President, the Secretary of Defense or his Executive Agent directs a supported CINC to provide federal military support to the FCO through a DCO and Defense Coordinating Element (DCE). For most domestic emergency responses requiring DoD assets, the DCO controls all DoD response elements. Because of the potentially large number of DoD requirements, the supported CINC may activate a Response Task Force to command and control all federal military personnel responding for consequence management (with the exception the Joint Special Operations Task Force). The RTF deploys to support the federal crisis and consequence management operations in support of the Lead Federal Agency (LFA) during domestic operations. A Chem-Bio Rapid Response Team (CBRRT) under the RTF has been established to provide technical expertise and assessment support to the local officials. A network of Reserve Emergency Preparedness Liaison Officers (EPLOs) from all Services in each state and federal region supports the DCO and provides the military interface to coordinate response requirements and activities with each state and federal region.

At the local, state, and federal levels, a task force oriented structure and process responds to the emergency requirements. The missing elements in most structures are the task-oriented, trained and equipped task force elements that actually perform the required response functions. The local civil Incident Commander directs these response elements. Task-organized elements that can be plugged into the task forces at the local, state, or federal level must be formed.

Active Duty, National Guard, and Reserve forces possess expertise, trained manpower, and equipment that can support response to chemical, biological, radiological attacks at DoD installations and in civilian communities. As the Department of Defense supports all Emergency Support Functions identified in the FRP, we must be prepared to perform those functions which other agencies are not capable of supporting or simply do not have adequate resources to meet the demand. Specific response functions have been identified that may require substantial military augmentation for execution. Units capable of performing these functions must be focused, task organized, adequately trained, and properly equipped to work in and around nuclear, biological, and chemical hazards.

Today's task organized response assets in the DoD are very limited. Expert and capable response organizations like Explosive Ordnance Disposal teams, the Army's Technical Escort Unit, and the Marine Corps Chemical Biological Incident Response Force have been involved in the development of response plans and procedures. The RTF staffs have also been instrumental in organizing and employing military assets to support requests for assistance.

Certain DoD laboratories can also be called upon to respond with specialized equipment and capabilities. One such laboratory is the AMC Treaty Laboratory that was established to verify compliance with the Chemical Weapons Convention (CWC). It is an ISO 9001 registered quality system that was pre-deployed to support the FBI during the Olympics in Atlanta. The US Army Medical Research Institute of Infectious Diseases (USAMRIID) is capable of deploying an Aeromedical Isolation Team consisting of physicians, nurses, medical assistants and laboratory technicians. These team members are specially trained to provide care for and transport of patients with diseases caused by either biological warfare agents or infectious diseases requiring high containment. Also, Edgewood Research, Development and Engineering Center (ERDEC) maintains a rapidly deployable mobile environmental monitoring and technical assessment system. This Mobile Analytical Response System (MARS) provides a state-of-the-art analytical assessment of chemical or biological hazards at incident sites. The Naval Medical Research Institute (NMRI), through their Biological Defense Research Program (BDRP), has designed reagents, assays and procedures for agents classically identified as biological threat, as well as non-classical threat agents in environmental and clinical specimens. This program has developed rapid, hand-held screening assays that can be deployed globally. Though highly capable in their areas of expertise, these teams are extraordinarily limited in their response capacity and could be easily consumed by a WMD event.

The Office of Naval Research Science & Technology Reserve Program (S&T Reserve Program, or Program 38) has a small cadre dedicated to chemical, biological, and radiological defense (CBRD). These include medical service corps officers, hospital corpsmen, and officers of assorted line designators. Program 38's lead CBRD unit--NR NRL Chemical, Biological, and Radiological Defense Detachment 106 (NR NRL CBRD106)--drills at the headquarters of CBDCOM in the spaces of the Naval Research Laboratory's Detachment to CBDCOM. Program 38 members comprise the Navy's intellectual capital of military personnel in CBRD, and can help

the National Team to deal with problems of an unexpected nature; (e.g., one might imagine generically engineered microbes being used against us in which case we can provide Ph.D. microbiologists with connections into academia and industry who could help deal with this problem.) The main contribution of Program 38 officers is probably in providing a reach back resource that responders can tap into to better assess the situation at hand, and formulate the best action to take.

Overall, the group consensus was that the local preparedness for response to WMD terrorist incidents is nominal. To the extent that hazardous material preparedness applies to the NBC arena, some basic military skill levels exist. The group recognized that there are other programs that have specific statutory authority to provide support including the Chemical Stockpile Emergency Preparedness Program and the Non-Stockpile Chemical Material Program. Leveraging the resources provided by these programs as well as the National Disaster Medical System will improve the linkage between expert assistance and the first responders. However, much needed attention must be applied to resourcing, planning, and training for the unique nature of NBC terrorist incidents.

RESPONSE POLICY

The Stafford Act (P.L. 93-288) establishes the authority and process for "all hazards" response to natural and man-made disasters in the United States. It is implemented through Executive Order 12656 and the FRP.

Presidential Decision Directive (PDD) 39 established the policy for crisis and consequence management of terrorist incidents involving the use of weapons of mass destruction.

DoD has assigned the CINCs planning, coordinating, and execution authorities for responding to "all hazards" disasters in the United States and its territories. Response to the consequences of WMD should use the same process as response to other natural and man-made disasters, as specified in the "all-hazard" concepts of the Stafford Act and the FRP and laid out in DoD Directive 3025.1. CINCs have developed plans to support this response as the DoD planning agents for their respective areas. They, in turn, have designated regional planning agents to interface with the other federal agencies and the states. A network of EPLO's from all Services has been established and trained to represent the federal military in each state and in each of the ten federal regions.

DoD support of a federal response to a domestic terrorism incident will be personally managed by the Secretary of Defense, with the assistance of the Chairman of the Joint Chiefs of Staff (CJCS) and the Secretary of the Army. The DoD crisis management response will be provided through the national interagency terrorism response system. DoD response forces will be employed either under the operational control of the Joint Special Operations Task Force or a Response Task Force assigned to the appropriate Unified Combatant Commander.

The Nunn-Lugar-Domenici Defense Against Weapons of Mass Destruction Act of 1996 mandates training and development of capability to respond to WMD attacks in the United States. Response to WMD attacks or accidents must be consistent with the concepts,

response model, and responsibilities for other domestic emergencies. We may often be in the situation that we do not know who or what caused the event to which we are responding. Section 1414, Title IV of the Defense Appropriation, mandates that the SECDEF "shall develop and maintain at least one domestic terrorism rapid response team composed of members of the Armed Forces and employees of DoD who are capable of aiding Federal, state, and local officials in the detection, neutralization, containment, dismantlement, and disposal of weapons of mass destruction containing chemical, biological, or related materials." The DoD has formed the RTF and the CBRRT to meet this requirement. The elements described in this plan further support this requirement.

DoD has developed two consequence management RTFs under the command of U.S. Atlantic Command (USACOM). The headquarters elements of these RTFs are assigned to First and Fifth U.S. Army for responses east and west of the Mississippi River respectively. Forces of the RTF will be tailored and assigned based on the situation. Central to these forces will be technical and specialized units capable of supporting a response to a chemical, biological or radiological incident. One concept being studied is the chemical and biological quick response cell.

Responsibilities for oversight and execution of Title XIV, Subtitle A, Domestic Preparedness, are spread among several organizations. ASD(SO/LIC) has responsibility for policy and resource oversight. The Assistant to the Secretary of Defense (Nuclear, Chemical & Biological Defense Programs) provides resource oversight for equipment procurement. Additionally, in accordance with Section 1413, Title XIV, the Secretary of Defense (SECDEF) designated the Secretary of the Army (SECARMY) to serve as the Executive Agent for the coordination of DoD training assistance to Federal, state, and local officials to better assist them in responding to threats involving chemical and biological weapons or related materials or technologies, including assistance in identifying, neutralizing, dismantling, and disposing of biological and chemical weapons and related materials and technologies. As the Executive Agent, the Secretary is responsible for developing the planning guidance, plans, implementation, and procedures for the Domestic Preparedness Program. The SECARMY subsequently named the ASA(ILE) as the focal point for all matters in which the Army has executive agency, and the DOMS as the DoD Staff Action Agent. In a separate directive, the SECARMY directed the Commander, Army Materiel Command (AMC) to appoint a DoD Program Director. AMC subsequently directed Commander, CBDCOM to appoint a DoD Program Director with the primary responsibility to implement the basic elements of Title XIV. Also under Title XIV, for nuclear and radiological preparedness, the Secretary of Energy has specific responsibilities. The Secretary of Energy is responsible to test and improve the responses of Federal, State and local agencies involving nuclear and radiological weapons or related materials. Here again, agency responsibility must be communicated clearly and the value of PDD 39 becomes even more evident.

Co-Chaired by FEMA, the Senior Interagency Coordination Group (SICG) on Terrorism was established to facilitate the interagency coordination of policy issues and program activities in sup-

port of Federal initiatives to assist Federal, state, and local first responders in responding to WMD incidents. The SICG is composed of senior members from DoD, FEMA, the FBI, the Public Health Service (PBS), the Environmental Protection Agency (EPA), the Department of Energy (DoE), the Department of Justice (DoJ), the Department of Transportation (DoT), United States Department of Agriculture (USDA), General Services Administration (GSA), and the National Communications System (NCS).

CHAPTER 4: IMPROVING THE RESPONSE

WMD RESPONSE INTEGRATION PROGRAM GOALS

The Interagency Strategic Plan laid out an ambitious list of objectives that are part of the overall goal to improve the nation's WMD response capability. A program to coordinate and integrate DoD's capabilities to support local, state, and federal consequence management response to WMD events must be established. This program supports the Military Support to Civil Authorities policies of the Department and the plans of the supported CINCs charged to execute that response. It must coordinate and orchestrate many on-going efforts throughout the DoD to meet requirements for response to WMD attacks at our installations and facilities and within civilian communities. The program should:

1. Establish a fully operational DoD preparedness and response capability to deal with potential effects of domestic terrorism involving weapons of mass destruction.
2. Leverage Reserve Component preparedness and response capabilities to deal with these threats.
3. Enhance local, state, and other federal agency access to military capabilities and expertise.

PLAN FOR IMPROVING RESPONSE

Key actions required to implement this program

1. Establish a Reserve Component Consequence Management Program Integration Office to implement this plan. Assign program management responsibility and transfer functions to the program office. A program office of at least 14 people will be established with contractor support to ensure the integration of research & development, procurement, training, and doctrine development for response to WMD. The program director should report to the Secretary of the Army, as the DoD Executive Agent for Military Support to Civil Authorities, through the DoD Director of Military Support and hold quarterly program reviews on project status.

2. Review DoD Directives 3025.1, 3025.15, 3025.12, 3020.26, 5160.54 and others that may require updating as the RC integration effort matures. Assist in the coordination of policy as applied to the many DoD organizations that may become involved in a WMD response.

3. Coordinate the development of legislation that facilitates Reserve Component activation for WMD response.

4. Modify Defense Planning Guidance and the Unified Command Plan to reflect WMD response requirements.

5. Coordinate the development of an OPLAN to respond to terrorist on U. S. installations, facilities, ports, and the states and communities.

Reserve Component Consequence Management Program Integration Office Functions

1. Identify and task military response elements. The Departments will identify specific units to provide the response elements, so the program office can coordinate the training and equipment necessary for each. Each Service will task these units to be prepared to perform the response element mission.

2. Develop and publish individual position descriptions and doctrine for integrated employment of the teams.

3. Integrate WMD training for DCOs, EPLOs, RTFs, and military response elements. Leverage existing responder training programs as the core and develop required specialized training. The program office will coordinate training and exercises to ensure the identified response elements, EPLOs, DCOs, and RTFs receive training identified in the plan. The DoD Emergency Preparedness Course and other regional training programs provide a solid foundation for individual responsibilities of the command and liaison elements. Interagency exercises conducted at the state or regional levels will be used to validate concepts of employment and response integration with local, state, and federal response assets. This training will leverage existing federal training for WMD response (currently led by CBDCOM). Response elements will interface with local and state exercises and federal interagency response exercises. The program office will ensure crossflow of lessons learned and coordinate improvement recommendations between similar response elements.

4. Purchase equipment for the military response elements. In year one, equipment will be purchased for the Rapid Assessment and Initial Detection (RAID) Elements, the reconnaissance and decontamination elements, some of the medical personnel and the laptop computers for the Emergency Preparedness Liaison officers (EPLOs).

5. Identify DoD WMD response assets and capabilities. U.S. Army Forces Command (FORSCOM) will include DoD's WMD response assets and capabilities in the DoD Resources Data Base and coordinate with FEMA to include appropriate information in the Rapid Response Information System. The program office will coordinate this effort with the Joint Staff and Unified Commands.

6. Facilitate training exercises for the military response elements under the CINC's RTF. Coordinate these exercises with local, state, and federal agencies.

7. Identify and coordinate the WMD related interests with the Advanced Concepts and Research & Development initiatives. The program office will identify equipment that requires prototyping, simulation, or testing. There are currently a number of Chemical Defense Equipment (CDE) initiatives of significant value to the WMD response effort. ASA(RDA) initiatives are of particular interest and require attention by the program office. The ASD(SO/LIC) Technical Support Working Group will be a key office to facilitate development of this equipment. The OSD Office for

Counterproliferation will be an additional resource for testing advanced concepts and newly developed equipment.

8. Establish and maintain linkages with the processes of the CJCS Readiness System to include:

The Joint Monthly Readiness Review (JMRR)

- Joint Warfare Capabilities Assessment (JWCA) Teams
- Joint Requirements Oversight Council (JROC)
- Senior Readiness Oversight Council (SROC)

9. Coordinate with the Department of Health and Human Services, Veterans Affairs, FEMA, and other federal agencies in development of the Presidential Report on Preparations for a National Response to Medical Emergencies Arising From the Terrorist Use of Weapons of Mass Destruction, and leverage the results of the report to ensure that the Reserve Components are trained and ready to provide this support.

10. Work with the National Guard Bureau to develop a plan to reprogram current resources to fully resource RAID Elements if additional full time spaces are not authorized.

11. Evaluate geographic dispersion of Reserve Component assets for support within the U.S.

12. Develop or revise procedures and doctrine to address:

- Capability to deal with a large number of contaminated victims.
- Use of chemical units to perform patient decontamination
- Response element tactics, techniques, and procedures
- Response to attacks on U. S. facilities and installations.
- Additional doctrinal shortfalls

13. Ensure medical supplies and pharmaceuticals are rapidly available to military response elements for use in U. S. WMD incidents.

14. Ensure that designated response elements have readily accessible Personal Protective Equipment for rapid deployment to respond within the United States.

15. Develop and publish individual position descriptions and doctrine for integrated employment of the teams.

16. Coordinate the new response capabilities into the ongoing interagency exercise program in order to validate concepts of employment and response integration with local, state, and federal response assets.

17. Ensure communication of lessons learned and coordinate improvement recommendations between similar response elements.

18. Establish at least a partial Rapid Assessment and Initial Detection Element in each State and Territory.

19. Integrate Civilian Hazardous Material (HAZMAT) operations into existing Chemical Training programs.

20. Develop FY00-03 POM requirements.

21. Develop a program to train leaders on HAZMAT, ICS, the FRP and how all of the local, state, and federal agencies interrelate to support the operations.

22. Leverage the existing NLD training programs to provide training to DoD responders.

23. Provide Reserve Component medical personnel with additional specialized training in the management of nuclear, chemical, and biological agent casualties.
24. Develop a rapid systematic notification process to notify military medical personnel when an incident occurs.
25. Upgrade JANUS, Spectrum, or other simulations for use in WMD exercises and execute a proof of concept for using SPECTRUM and JANUS to conduct WMD response exercises.
26. Fund participation by response elements including DCOs, EPLOs, and the RTF staffs in the Nunn-Lugar-Domenici city visits and training.
27. Integrate WMD response elements and assets into the DoD Resources Database.
28. Define requirements for additional number and types of military response elements.
29. Document the authorization document for the RAID Elements and the requirements for any new force structure.
30. Coordinate the development of training material for the NBC Defense Teams.
31. Coordinate the DoD WMD training efforts using distance learning techniques.

5-Year Integration Concept for WMD Response

The program office will develop a schedule of milestones to ensure that the elements identified in this plan are tasked, trained, and equipped in a smooth and efficient manner.

The first year of the program will start with the RAID, reconnaissance, and decontamination elements. Training for medical personnel will also begin the first year. Follow on work will expand training to the other elements, analyze equipment requirements, and orchestrate integration of the response concepts and models.

The chart below[2] shows a phased approach that begins to develop domestic response in FY 99 and certifies coverage by FY 02. The most critical elements to develop, task, train, and equip are the RAID Elements. This will ensure a minimal assessment and requirement definition capability in each state and territory. Additionally, the Reconnaissance and Decontamination Elements, which leverage the capabilities of Army Chemical Companies and Air Force Patient Decontamination Teams, will be trained and equipped over a two-year period. Medical Elements will begin their individual training and development of concepts for fielding and equipment purchases in the second and subsequent years. The other less technical elements may not require as much training to be fully prepared for a WMD response. By phasing in the element tasking, training, and equipping over time, less stress will be placed on doctrine development, training delivery, and procurement activities. Lessons learned from evolving military and civil assets will allow for review and improvement of element procedures and structures in the latter years.

The program office will develop and integrate operational plans and doctrine for the domestic WMD response elements, working closely with the supported CINCs. The program office will prepare

[2] See *http://www.defenselink.mil/pubs/wmdresponse/chapter__4*.html.

specific procedures for each response element and evolve those procedures as the response elements mature. These procedures will be based on established and evolving interagency plans and procedures. Integrated exercises and training will ensure elements can operate together as military units and with corresponding civilian responders.

CHAPTER 5: RESPONSE ELEMENTS

OVERVIEW

The Rapid Assessment and Initial Detection (RAID) and other elements have been identified to support local, state, and federal agencies responding to a WMD. The basis for developing these elements is the four elements of the Incident Command System (Information and Planning, Operations, Logistics, and Finance) and the 12 Emergency Support Functions of the Federal Response Plan. Elements are designed to "plug into" existing task force structures required by the incident commander, the Governor, or the CINC responding in support of the FRP. A potential model response is portrayed in the figure below.

COMMAND

Military command elements are established by the Adjutant General for the National Guard responding as state resources and by the CINC for the area (s) affected for federal military assets. In most cases, the pre-designated DCO coordinates for any federal military assets. A RTF may be deployed to provide command and control during a major federal response. The CINC's RTF is responsible for the command and control of all responding military elements, less the Joint Special Operations Task Force. It is comprised of command, staff, and technical experts required to support the WMD consequence management response.

[Organization Chart] [3]

RESPONSE ELEMENTS

Most military elements called to respond to a WMD attack will perform operations supporting the incident commander, state authorities, or federal agencies requiring their help. These elements include:

Rapid Assessment and Initial Detection Element

The point of the military response spear is the National Guard Rapid Assessment and Initial Detection Element. This element is comprised of highly trained experts in a cross-discipline of functional areas that can deploy and assess the situation, advise the local, state and federal response elements, define requirements, and expedite employment of state and federal military support.

Mission: Provide early assessment, initial detection, and technical advice to the incident commander during an incident involving weapons of mass destruction. Facilitate identification of DoD asset requirements.

[C2 Cell Organization Chart] [3]

---

[3] See *http://www.defenselink.mil/pubs/wmdresponse/chapter__5*.html.

C2 Cell: Provides overall command and control of the assessment team and conducts hazard modeling.

Recon Cell: Provides early detection, initial sample collection, and NBC reconnaissance.

Medical Support Cell: Provides an initial DoD medical assessment.

Security Cell: Provides initial assessment of security requirements and manages force protection/assessment element security.

Logistics Cell: Determines initial resource requirements and provides supply and maintenance support for the assessment element.

Air Liaison Cell: Coordinates for transportation and/or air movement of assessment element.

Communications Cell: Provides internal communications within the assessment element, coordinates for communications connectivity with civilian responders, and maintains a reach back capability for additional technical expertise.

Units Employed: The RAID Elements assigned to each state/territory represent the first military responders. Regardless of the full-time and traditional member mix, the reconnaissance team will likely be the primary area that technical assistance will be requested. Given the goal of four-hour on-scene, the demands of the RAID Elements will be significant. While not ideal in terms of fully developed response capability, teams from surrounding states or even use of the regional assets may well be necessary if the disaster escalates quickly.

Employment: The RAID Element is organized as an element under the peacetime control of the Adjutant General. Given its rapid response and assessment mission, the RAID Element is designed to assist incident commanders with the initial detection and the nature of the emergency. There is also a wartime RAID Element mission: to provide force protection support within the state during mobilization. As with the other elements of the response module, these elements can also be used as part of a federal (Title 10) response to support the National Military Strategy (NMS) requirements.

The RAIDs have the capability to rapidly deploy to an incident site and provide initial support to the Incident Commander. The element has the capability to conduct reconnaissance, provide medical advice and assistance, perform detection, assessment, and hazard prediction, and can provide technical advice concerning WMD incidents and agents. Equipping the RAIDs requires both military standard and commercial-off-the-shelf components. The equipment list can be found in Annex F.

Information and Planning Element

Mission: Collect, process and disseminate information about WMD emergency to facilitate the overall response activities. The scope of this functional element is to coordinate the overall information activities. Provide an initial assessment of disaster impacts including the identification of boundaries of the affected area and distribution, type and severity of damages, including the status of critical facilities. The information and planning activities are grouped among the following functions:

- Information Processing function to collect and process essential elements of information from the State, and other sources, disseminate it for operations, and provide input for reports, briefings, displays and plans;
- Reports function to consolidate information into reports and other materials to describe and document overall response activities and to keep follow-on support personnel informed of the status of the response operations;
- Displays function to maintain displays of pertinent information and facilitate briefings using maps, charts and status boards other means, such as computer bulletin boards or electronic mail, as available;
- Consolidate information to support the action planning process initiated by ICS.

Units Employed: Air Force Information Management staffs and Army Information Operations staffs.

Employment: When activated, this functional element will provide information processing support to military response activities. Information may be obtained from a variety of sources to include but not limited to ICS representatives. This functional element will proactively seek information that is a viable to develop an accurate picture of the emergency condition. The collection and processing of critical information is forwarded to the operational element in order to create an overall perspective of the situation. The release of information directly to the public or media remains a Public Affairs function. These elements deploy to an incident site between 8-72 hours after an incident to assist the Incident Commander.

NBC Reconnaissance Element

Mission: Provide NBC Reconnaissance Support to the local Incident Commander.

NBC reconnaissance operations include search, survey, surveillance, and sampling missions.

Search: Reconnaissance undertaken to obtain significant information about the NBC condition of routes, areas, and zones. This information confirms or denies the presence of NBC hazards with detection and identification equipment. Visual observation or the collection of samples in the specified location or region can also provide this information.

Surveys: Missions conducted to collect detailed information of NBC contamination hazards. The survey determines the type of contamination, the degree (extent/intensity), and the boundaries.

Surveillance: The systematic observation of an area to provide early warning.

Sampling: Provides physical evidence of NBC attacks and technical intelligence concerning NBC weapons systems.

Units Employed: Each National Guard and USAR Chemical Company will train a platoon-sized element to perform reconnaissance operations. (The Separate Brigade Chemical Platoons will also train to provide recon support.)

Employment: These elements should be prepared to deploy to an incident site after an incident to assist the incident commander to:

- Confirm or deny contaminated areas.

- Confirm the area is clear of contamination.

Units will operate primarily using standard MTOE and TDA equipment. Additional equipment requirements are attached (Annex F.)

NBC Patient Decontamination Element

Mission: Provide patient decontamination support to the local Incident Commander. Prepare to:

- Perform casualty decontamination near the incident site, prior to evacuation, or;
- Establish decontamination/detection stations at community hospitals.

Decontamination of non-ambulatory casualties is normally performed prior to evacuation. However, in a terrorist incident, many ambulatory casualties will self evacuate, arriving at the hospital still contaminated. Hospitals must have the capability to detect contamination, and decontaminate when necessary.

Casualty decontamination is done by trained non-medical personnel under the supervision of the medical personnel in accordance with procedures outlined in FM 8-10-7.

Units Employed: Each National Guard and USAR Chemical Company, and each Air National Guard and Air Force Reserve Medical Patient Decontamination Team will train platoon-sized elements to perform patient decontamination. (Separate Brigade Chemical Platoons will also train to provide decon support.) This training will be conducted during a weekend drill by the unit squad and platoon level leadership. A train-the-trainer program will be established and a program of instruction will be developed.

Employment: Each decontamination team will consist of twenty non-medical personnel and is capable of decontaminating 12 casualties per hour.

Three teams are required per decontamination site to run 24-hour operations (4 hours on and 8 hours off shifts).

This team requires three to five medical personnel from either the supported hospital/EMS or a medical unit to supervise the process and perform triage and immediate treatment of casualties. Equipment requirements are defined in Annex F.

NBC Medical Response Element

- The Medical Response Elements require further study and analysis. Noted below are the initial concepts for tasking and element employment. The ongoing medical studies must be considered before the DoD response plan is finalized. With many initiatives in various stages of fielding, a more detailed medical response element missions and tasks will be developed further during the first year of the program. The medical response plan requires coordination with our partners, in both the private and public sector.

Mission: Provide medical advice to incident commander and local authorities on protection of first responders and health care personnel in an NBC environment. Provide advice on casualty decontamination procedures, first aid and initial medical treatment. Provide medical threat information and characterize the health risks

to civilian and military populations. Provide initial medical advice to include signs, symptoms, and first aid.

Units Employed: NBC Medical elements consist of 6 medical personnel and is capable of providing medical advice to include signs, symptoms, and first aid of NBC agents. Teams consist of: 1 Preventative Medicine Officer, 1 Preventive Medicine NCO, 1 Acute Care Physician, 1 Nurse, 1 Preventive Medicine Science Officer, 1 Practical Nurse, 1 NBC NCO, 1 Nuclear Medical Science Officer, 1 Nuclear Medical Officer, 1 Nuclear Medicine Specialist/Health Physics Specialist.

Employment: After the initial assessment National Guard/Reserve Component NBC medical elements will provide periodic updates to the incident commander and local authorities on protection of first responders and health care personnel in an NBC environment. Elements may elect to use telemedicine reach back capabilities to provide medical advice to local hospitals on appropriate management of care issues. These elements deploy to an incident site between 8-72 hours after an incident to assist the Incident Commander.

Triage Medical Response Element

Mission: Provide triage support to the Incident Commander including the sorting and assignment of treatment priorities to various categories of wounded, and providing immediate emergency care.

Units Employed: Each National Guard, USAR, AFRES, USNR triage team will be trained to perform triage using the Simple Triage and Rapid Treatment (START) system and deploy to an incident site within 72 hours to assist the Incident Commander with a Mass Casualty Incident (MCI).

Employment: Each triage team will consist of 26 personnel and is capable of treating 100 patients per hour.

Trauma Medical Response Element

Mission: Provide expertise in triage, resuscitation, and damage control medicine near the incident site or at a definitive care location. Specific tasks are:

- Perform damage control surgery for up to four patients.
- Augment community hospital systems overwhelmed by NBC casualties.
- Augment hospital/Metropolitan Medical Strike Teams (MMST) after 24 hours to conduct sustainment operations.
- Provide support to local hospitals or MMST triage and immediate treatment of casualties.
- Provides Analgesia and anesthesia for patients under their care.

Units Employed: Each National Guard, USAR, and USNR, AFRES trauma team will be trained in the treatment of chemical, biological and radiological casualties and associated effects from blasts and crush injuries. Teams consist of: 2 General Surgeons, 1 Anesthesiologist, 1 Emergency Medical Physician/Orthopedic Surgeon, 1 Critical Care Nurse, 1 ER Nurse

Employment: These elements deploy to an incident site between 8-72 hours after an incident to assist the Incident Commander.

Preventive Medicine Element

Mission: Provides initial disease and environmental health threat assessments during early or continuing assistance stages of a disaster. Specific tasks are:

- Provide medical threat information and characterize the health risks to civilian and military populations.
- Prepare preventive medicine estimates; conduct rapid hazard sampling, monitoring and analysis.
- Sampling including endemic and epidemic disease indicators.
- Provide initial disease and environmental health threat assessments prior to or in the initial stages of a disaster.

Units Employed: Each National Guard, USAR, and Naval Reserve preventive medicine team will be trained in initial disease and environmental health threat assessments. Teams may require information from the Center for Disease Control and other agencies with endemic disease and environmental effect information to prepare their database for the area. Teams consist of: 1 Preventative Medicine Officer, 1 Industrial Hygienist/Health Physicist, 1 Environmental Science/Engineering, 1 Community Health Nurse, 1 Entomologist, 1 Biologist, 1 Preventive Medicine NCO. This team should attend the HHS/FEMA public health aspects of natural disasters and civil emergencies.

Employment: These elements deploy to an incident site between 8-72 hours after an incident to assist the Incident Commander. Personnel are alerted using pagers and deploy to incident site.

Stress Management Element

Mission: Provides initial stress management for military and civilian responder and incident survivors.

Units Employed: This element is highly trained in stress management and neuropsychiatry. It is capable of providing limited neuropsychiatric triage and stabilization of clinical cases in order to reduce the disabling effects associated with post traumatic stress disorder.

Personnel: Each NBC element will consist of 6 medical personnel and is capable of providing medical advice to include signs, symptoms, and first aid of NBC agents. Teams consist of: 1 Psychiatrist , 1 Clinical Psychologist, 1 Social Work Officer, 1 Psychiatric Nurse, 2 Mental Health NCOs, 1 Chaplain, 1 Occupational Therapy Officer, 1 Occupational Therapy NCO and require training victim assistance, psychological trauma, post traumatic stress disorder, mental health risks associated with relief workers (burn out syndrome) critical events management course.

Employment: These elements deploy to an incident site between 18 and 48 hours after an incident to assist the Incident Commander.

Security/Law Enforcement Element

Mission: The National Guard provides support for the Incident Commander IAW state and local emergency response plans to as-

sist in maintaining order, ensuring public safety and providing assistance to the law enforcement officials. Specific tasks and capabilities include:

Access Control: The potential for mass panic following a WMD incident will overwhelm the ability of hospitals to function effectively without additional personnel to control access to the facilities. National Guard troops could be called upon to augment law enforcement and hospital security personnel to maintain efficient access control in the hospitals. Because arriving victims may be contaminated, the personnel assigned this function require both awareness level knowledge and training in performing security operations in personal protective equipment (PPE). The units assigned this responsibility need ready access to PPE which allows for rapid mobilization from a local armory to an incident site.

Site Security: Once the limits of the contaminated area are established, a cordon will need to be established to prevent people from entering the area. Because this mission will be performed outside the hot zone and National Guard units regularly perform this type of mission in other disaster situations, no additional training beyond basic awareness will be required.

Civil Disturbances: The potential for lawlessness and disorder will exist following any WMD incident. Units designated with on-street civil disturbance missions need to have awareness level training on WMD incidents.

Quarantine: The National Guard could be called on to assist in the implementation of a quarantine if public health officials determine that a biological attack using a communicable disease agent occurs.

Evacuation: National Guard units will be required to assist in any evacuation ordered by the local officials. Military Police and other types of units may be called upon to assist in managing the flow of traffic during an evacuation. Because this mission will be performed outside the hot zone and National Guard units regularly perform this type of mission in other disaster situations, no additional training beyond basic awareness will be required.

Mass Care Elements

Mission: Provide support to the incident commander in providing shelter, feeding, emergency first aid, and bulk distribution of emergency relief supplies. Specific tasks and capabilities include:

Shelter: The provision of emergency shelter for disaster victims includes the use of pre-identified shelter sites in existing structures; creation of temporary facilities such as tent cities, or the temporary construction of shelters; and use of similar facilities outside the disaster-affected area, should evacuation be necessary. Military installations and facilities such as the armories and reserve centers can be used. The military can also be tasked to provide tentage, cots, etc. in the event of an incident.

Feeding: The provision for feeding disaster victims and emergency workers through a combination of fixed sites, mobile feeding units, and bulk food distribution. Such operations will be based on sound nutritional standards and will include provisions for meeting dietary requirements of disaster victims with special dietary needs.

Mobile kitchens and MAE's may be requested from the military to support mass feeding operations.

Emergency First Aid: Emergency first aid services will be provided to disaster victims and workers at mass care facilities and at designated sites within the disaster area. This emergency first aid service will be supplemental to emergency health and medical services established to meet the needs of disaster victims.

Bulk Distribution of Emergency Relief Items: Sites will be established within the affected area for distribution of emergency relief items. The bulk distribution of these relief items will be determined by the requirement to meet urgent needs of disaster victims for essential items. Military units can be tasked to man these operations.

Mortuary Affairs Element

Mission: Provide mortuary support to include identification, processing, storage, and disposition of remains following a mass casualty WMD incident. Specific tasks and capabilities include: assist in providing victim identification and mortuary services, temporary morgue facilities; victim identification utilizing latent fingerprint, forensic dental, and/or forensic pathology/anthropology methods; and processing, preparation, and disposition of remains.

Communications Element

Mission: This function is to assure the provision of telecommunications support to the response forces following a WMD emergency. This functional element coordinates actions to assure the provision of required telecommunications support. This functional element will coordinate the establishment of required temporary telecommunications. Support includes Government-furnished telecommunications, commercially leased communications, and telecommunications.

Units Employed: Tactical Army, Navy, and Air Force communications units may provide communications elements to link key command and control and deployed assets. Each NBC command element will consist of an information specialist.

Employment: These elements deploy to an incident site between 8-72 hours after an incident to assist the incident commander. Personnel are alerted using pagers and deploy to incident site. This functional element serves as a basis for planning and use of military telecommunications assets and resources in a WMD emergency.

Engineering Element

Mission: Public Works and Engineering support includes technical advice and evaluations, engineering services, construction management and inspection, emergency contracting, emergency repair of waste water and solid waste facilities, and real estate support for the stated purposes. The United States Army Corps of Engineers is the lead for this Emergency Support Function.

Specific tasks include:

Emergency clearance of debris for reconnaissance of the damage areas and passage of emergency personnel and equipment for lifesaving, life protecting, health and safety purposes during the initial response phase,

Temporary construction of emergency access routes which include damaged streets, roads, bridges, ports, waterways, airfields, and any other facilities necessary for passage of rescue personnel,

Emergency restoration of critical public services and facilities including supply of adequate amounts of potable water, temporary restoration of water supply systems, and the provision of water for fire fighting,

Emergency demolition or stabilization of damaged structures and facilities designated by State or local government as immediate hazards to the public health and safety, or as necessary to facilitate the accomplishment of life saving operations (undertake temporary protective measures to abate immediate hazards to the public for health and safety reasons until demolition is accomplished),

Technical assistance and damage assessment, including structural inspection of structures.

Units Employed: ARNG & USAR Engineer units and ANG/AFRES Civil Engineering units could be tasked.

Transportation Elements

Mission: Provide support for the incident commander (through the SCO or FCO/DCO) IAW state and local emergency response plans and the Federal Response Plan to satisfy the requirements of Federal agencies, State and local governmental entities, and voluntary organizations requiring transportation capacity (service, equipment, facilities, and systems) to perform their assigned WMD response missions.

Units Employed:

Air (Fixed): The Air Force (including ANG and AFRES) will be tasked to transport both civil and military response assets and elements to the site of an incident. Pilots and aircrews require awareness training.

Air assets may be tasked under the National Disaster Medical System to provide transport of patients (post-decontamination) to medical facilities around the nation. Pilots and aircrews require only an awareness level of training.

Air (Rotary): Military rotary wing assets will be critical to the operations of the other military response elements and in support of the local Incident Commander. Potential missions include:

Transport of the RAID: In order to meet a four-hour response window, many of the RAID's will be stationed at or near air units. Rapid activation of pilots and crews will be necessary. The RAID air liaison cell needs to coordinate with the supporting aviation element to ensure that adequate cargo capacity is available. The pilots and crews will require an awareness level of training.

Air Ambulance: The potential for mass casualties in a WMD incident will quickly overwhelm the hospital capacity in a local community. The use of aeromedical ambulance companies to transport patients to more distant treatment facilities can help to alleviate this problem. This transport capability is post decontamination and outside the hot zone. (Helicopters should not be used within a chemically contaminated area because their rotors tend to spread

agents/contamination.) Pilots and crews will therefore only require an awareness level of training.

Survey/Reconnaissance: Helicopters may be used to conduct an aerial reconnaissance of a radiologically contaminated area to determine the spread/level of contamination. Pilots need to receive training in the conduct of this type of operation.

Ground: Military vehicles such as military busses, HMMWV's, trucks, etc. can be operated in support of ESF#1 if not otherwise required to carry out the unit's emergency mission. Potential assets include transportation units that can be activated to provide additional transportation support. Only an awareness level of training will be required for those vehicles operating outside the hot zone. The assigned drivers of vehicles operating within the hot zone (such as ambulances) will require training on vehicle operations while wearing protective clothing.

USCG National Strike Force

The Coast Guard's National Strike Force's capabilities and responsibilities are available for responding beyond port areas. The Strike Teams are regularly deployed throughout the US on behalf of both USCG and EPA On-Scene Coordinators (OSCs). Further, the Strike Teams are key tactical response units for the EPA to call upon when responding under the Federal Response Plan Emergency Support Function #10. The potential exists that the Coast Guard OSCs could very well be the first Federal presence in a WMD scenario. Coast Guard OSCs have a pre-established response organization in coastal areas (including rivers and Great Lakes) with state and local responders as well as fire and police. USCG OSCs have experience coordinating support services (NOAA Scientific Support Coordinators, CDC, etc.) and other government agencies with response capabilities into a cohesive unified command.

CHAPTER 6: TRAINING REQUIREMENTS

TRAINING OVERVIEW

Training and exercises are the two key components of the overall training program. Achieving a level of enhanced readiness is directly linked to both. The challenge is to utilize the limited resources available during the development phases through a rigorous training and exercise program. Training must be conducted to ensure an efficient and effective response. Exercises offer an opportunity to practice response operations and to validate training preparations. Ultimately the real test will be when the first unit responds to an event—turning victims into patients, rather than collecting casualties for body bags.

This challenge is complicated by the fact that this effort is evolutionary. Instruction must focus on the unique aspects of a domestic WMD response. On the surface, responding to civilian casualties in a downtown metropolitan area would seem to have similar tasks that a soldier would perform when responding to a fellow member on the battlefield. The key difference is in the emergency operational environment. One is a wartime theater and the other is just as chaotic, just as lethal but CONUS based. Of course there is a

correlation to the individual tasks and the circumstances surrounding the event, the response and the associated functions the unit will perform when it arrives on scene. Yet, the specific conditions may vary greatly given the unique nature of a WMD attack in a CONUS setting. Performance based objectives will define the overall training needed for these teams to effectively respond.

Identification of the Performance Based Training Objectives for the first responder community has been an ongoing CBDCOM effort. This program should reap the benefits of that hard work by leveraging the already developed CBDCOM compendium of courses and program of instruction and then tailoring them to meet the training requirements of the state response teams. Orchestrating that effort will have to be accomplished by the program office. Concept development and rigorously exercising the response elements will help refine doctrine development. To meet the challenges of such an incident, an integrated training approach must be applied for both civilian and military personnel. Training for and response to a WMD incident is an interwoven process that must be viewed and analyzed as a total system.

In addition to leveraging CBDCOM's programs of instruction, a "Center for Excellence" should be established as the accrediting body to oversee WMD training to ensure a complete crosswalk between both civilian and military training. One solution would leverage the seven Institutional Training Division's TRADOC approved chemical training battalions and medical training brigades to support the Center for Excellence. Another solution could include expanding the current training base through the use of mobile training teams to satisfy training requirements. The program office needs to determine the cost reduction potential realized through innovative training technologies such as distance learning and interactive CD-ROM. Utilizing these capabilities could dramatically reduce the costs associated with training large numbers of military response elements. TRADOC schools and courses should integrate the Incident Command System, Civilian HAZMAT procedures and the Federal Response Plan into lesson plans and programs of instruction.

In addition, simulation exercises will provide city leaders, first responders and other federal partners a cost-effective method of testing current response procedures. In conjunction with training objectives, exercises can be tailored to individual city or state needs, allowing them to improve their process to meet specific training requirements.

INDIVIDUAL TRAINING

In particular, first responder training is viewed as the single most critical area for enhancing the nation's capability to respond to domestic terrorism. This training addresses the competence of skills needed to execute WMD response missions. There does exist a training gap between battlefield skills and the unique response skills required for civil WMD missions. In addition to providing individual training for the teams outlined in this plan, awareness training to the entire Reserve Component community will enhance our nation's overall response capability. Awareness training linked to ongoing unit training delivered using distance learning tech-

nology or via interactive CDROM capability provides low cost solutions with a high impact yield. Course material developed by CBDCOM for training first responders under the Nunn-Lugar-Domenici program is a readily available training source.

AWARENESS CHEMICAL BIOLOGICAL PLUS (ABC+) PROGRAM

Early detection, identification and notification of the emergency management system is essential to saving lives and mitigating the effects of a WMD event. Situational awareness, recognizing symptoms and effects, knowing what to do and who to call, is the theme of the ABC+ training program. During the first year of this integration program, a small cadre at each installation, reserve center and armory will receive the ABC+ training. ABC+ is based on the NBC awareness course currently being taught in the NLD City Training Program. In addition to the awareness training, key leaders and individuals will receive training in WMD emergency procedures. These procedures will also reinforce the proper techniques, protocols, and references that are essential to first responders. The intent is to answer questions that might be asked and provide an awareness of particular items to be alert to as the events develop during a WMD event. An ABC+ checklist will be provided that will guide the person through a series of questions that provide a profile of a potential WMD attack. ABC+ training will be provided on an interactive CD-ROM. At a minimum, full time National Guard and Reserve Component staff members need to complete the ABC+ training.

UNIT TRAINING

Preparing for a WMD response requires a focus on new and different tasks for some units. While many of these tasks are complementary to the unit's mission, some tasks have a new focus. Unit training builds on the individual skill proficiency to achieve unit domestic readiness. Rigorous training exercises are most appropriate for units with a WMD mission. These exercises require an understanding of the critical infrastructure nodes and emergency response protocols within the state and local communities to allow response units to refine "battle drill" techniques. The focus of unit training should provide immediate feedback to participants, which reinforces individual skills training. Also, measuring the effectiveness of completed training will identify areas that require further improvement. Unit NBC Defense Team's provide a WMD response capability as well. These teams are trained today for their military NBC mission and a basic orientation on the unique WMD tasks will be necessary. Annually, these defense teams exercise for their wartime mission, which is their primary orientation. With a minimum investment, a special training module could be developed that would provide a WMD track for the NBC Defense Teams. The Program will coordinate this initiative with the appropriate proponent school.

COURSE EVALUATION AND DEVELOPMENT

The timely evaluation of training courses and materials is critical to ensuring that course content is properly focused. In this way

emerging tactics, techniques, and procedures applicable to WMD responses will be made available to units.

EXERCISES

Exercises allow the teams, elements and units to practice for the WMD mission. A critical step in this process is learning the roles and responsibilities that individuals will assume should an actual incident occur. Exercises provide the opportunity to practice and develop skills as well as foster teamwork among responders and between agencies. Exercises ensure that a crisis is not the first opportunity for interagency coordination among responders. Lessons learned and opportunities to improve should be documented and shared with our interagency partners.

Exercises complement and enhance training activities. Since the Regional Training Brigades have the mission to conduct exercises using simulation, WMD scenarios can be developed for this capability.

TRAINING OBJECTIVE

The overarching training objective is to employ joint, interagency, and intergovernmental efforts to mitigate the effects of a WMD incident. The specific training objective may be broad or narrow in scope. A broad application of this training objective is focused on training interagency leaders and staffs in response management. A narrow application focuses on a specific sub-system not normally exercised by local emergency services such as planning decontamination of urban infrastructure assisting survivors, preventing additional casualties from chemical or radioactive agent drift, or restoration of public order.

SIMULATION EXERCISES

WMD Simulation Training Exercises (WMD SIMEX) will be conducted after initial training has been completed. The WMD SIMEX is a modified SPECTRUM or JANUS driven training event focusing on key leaders and response agencies. A CD-ROM and/or Internet based interactive computer-assisted training program with learner controls, practical exercises, and comprehensive assessments will be developed to support this program. The concept behind a WMD SIMEX is similar to the military's use of simulation training prior to field training exercises in order to maximize scarce operational dollars.

This methodology parallels the Army Battle Command Training Program. A read-ahead package made available provides selected materials appropriate to the training audience. Seminars bring interagency teams together to learn the process of reducing risk and mitigating the effects of a WMD attack. The exercise concludes with an Incident Command Post Exercise which brings interagency teams together in their actual operations centers to deal with issues, including fog and friction, generated by the separation in time and space from an event. The CBDCOM sponsored training provides a model for developing future training simulations.

REGIONAL TRAINING EXERCISE

This event brings all regional responders to a training incident and evaluates the entire response. The exercise is a joint, city, state, and federal effort. The leadership of these organizations should have completed a WMD SIMEX prior to a regional training exercise in order to maximize the benefit of the training event. Lessons learned will generate improvements in response.

A read-ahead package provides selected materials appropriate to the training audience. Civic leaders choose tasks they wish to exercise. Training scenarios will pull together the interagency team in a focused training exercise that allows them to operate together to reduce and mitigate the effects of a WMD. Through realistic execution the teams will test emergency response plans and coordination of responsibilities which will serve as the basis for formulating and testing alternatives to developing capabilities. Finally, an after action review process emphasizes lessons learned from and a take home packet provides direction for future interagency training events.

MODELING AND SIMULATIONS

Many elaborate simulation models and simulation tools have been developed for Major Theater Warfare scenarios using current Active and Reserve Component data. These models can be adapted to scenarios which impact the civilian populace at large. Data generated from these models can produce hazard effects, which would be useful identifying "hot zones", evacuation areas and safe areas. Custom reports generated from these databases could instantaneously identify units within the geographic proximity of an event by zip code. This will be helpful for identifying gaps in the existing capability. More important, it will facilitate decisions about fielding force structure that could be used to fill current force structure gaps.

Two agencies that provided invaluable help to the Tiger Team include the Concepts Analysis Agency and Defense Special Weapons Agency. Each organization has extensive experience in developing modeling and simulations for the Department of Defense. Furthermore, each organization has the technical expertise to assist the future efforts of the program office in many ways including doctrine and training development. Areas of interest for the program office include: determine WMD impact, number of casualties in a contaminated area, downwind hazard, areas to avoid and evacuate, neutralization procedures, analyze and determine tasks and their priority, and estimate response force size and composition.

When used properly, simulations and models can create the environment and stress needed for effective response options. Proper use ensures quality training that can compensate for fiscal constraints that limit live exercises. In addition, simulations and modeling efforts will provide leaders at all levels effective training alternatives.

NUNN-LUGAR-DOMENICI SUSTAINMENT TRAINING

The Senior Interagency Coordination Group Sustainment Training Process Action Team has recommended four Courses of Action

for providing training to first responders following the initial 120 cities:

1. Maintain the Domestic Preparedness Training Teams for the cities beyond the current mandate.

2. Use or expand the existing training infrastructure to include NBC models.

3. Enable the cities to train themselves.

4. Empower the states to execute sustainment training by providing them a menu of approved Domestic Preparedness training courses.

Their plan provides multiple options depending on funding availability. Integration of Reserve Component personnel into each of the courses of action could leverage the unique capabilities and geographic dispersion to provide a cost-effective training opportunity.

3. Chem-Bio 2010: Assessment of the impact of Chem/Bio Weapons on Joint Operations in 2010 (Joint Staff - September 1997).

4. The Role of the National Guard in Emergency Preparedness and Response for the United States Congress and Federal Emergency Management Agency (January 1997).

5. Defense Science Board: DoD Responses to Transnational Threats (August 1997).

6. Proliferation: Threat and Response. Office of the Secretary of Defense (November 1997).

7. Report of the National Defense Panel: Transforming Defense National Security for the 21st Century (December 1997).

8. NBC Terrorism Response Focus Group for Local Government Report (October 1996).

9. National Governor's Association Workshop with Interagency Partners (FEMA, DoD, EPA, FBI, DHHS and DVA) (September 1996).

Twenty six states participated in assessing capabilities to respond to and manage the consequences of nuclear, biological, or chemical (NBC) terrorism. These 26 states were chosen because their large urban areas and other factors could make them potential targets for a terrorist incident.

10. FEMA—September 1996

During September 1996, FEMA met with representatives from Boston, MA; Denver, CO; Los Angeles, CA; and Philadelphia, PA. They focused on the capabilities and needs of local government to respond to terrorist incidents involving WMD. Input and feedback from this sampling of U.S. metropolitan areas was intended to provide an indication of the spectrum of nationwide preparedness at the local level. Participants primarily represented emergency response and public health organizations from the respective state and local governments. Policy and subject matter experts included Federal officials from FEMA, the FBI, DHHS, and DoD.

Overall, the group consensus was that the local preparedness for response to WMD terrorist incidents is nominal. To the extent that hazardous material preparedness applies to the NBC arena, some base level exists. However, a great deal of progress remains to be made on resource, planning, and training fronts regarding the unique nature of NBC terrorist incidents.

11. FEMA/FBI Report to Congress (January 1997).

FEMA and FBI submitted a Joint Report to Congress in January 1997. It addressed both crisis management/prevention and con-

sequence management/response activities. This report focused on capabilities and interagency roles and responsibilities to respond to an incident involving WMD. In the assessment summary, the impact of a WMD incident and significant response requirement were recognized.

A NBC terrorist incident may occur as a local event with potentially profound national implications. In responding to a NBC incident, first responders must be able to provide critical resources within minutes to mitigate the effects of the incident. Since the ability of the local government to deal with the immediate effects of an incident is essential to the success of any NBC response, enhancing and maintaining the local capability with trained and adequately equipped responders is a key component of a viable national terrorism response capability.

12. DoD Focus Group Meetings (February 1997).

DoD, with the support of other Federal agencies, conducted a series of focus group meetings with first responders during February 1997. The findings and recommendations of the groups formed the basis of a comprehensive set of training performance objectives. Based upon the focus group's review, a training course development program was begun to modify existing training courses, and develop programs of instruction and instructional material.

13. DoD/DoE Report to Congress (April 1996).

DoD and DoE, in consultation with FEMA, submitted a report to Congress in 1996 on current plans, resources, and capabilities to respond to a nuclear, radiological, biological, or chemical terrorist attack. The report covered consequence management plans and capabilities. Key points made were, first, there is a fundamental shift from the local or regional level of Federal involvement and decision-making authority to Washington, DC and the SECDEF's personal involvement during a WMD domestic terrorist incident. Second, there are some highly trained personnel available and excellent capabilities in many consequence management organizations to respond to a domestic NBC disaster. Finally, first responders need training, equipment, and supplies, yet there are limited quantities of DoD combat supplies available for NBC contingencies.

ANNEX G: LEGAL ISSUES

PLANNING PRINCIPLES

As mentioned in Chapter 1, the team selected the Federal mission as the principle to guide the organization of the response elements. Under this organizing principle, the immediate response elements act as the tip of the Federal MSCA spear. It is anticipated the initial WMD response would be in a State status, under the control of the Governor. Since the unit's outlined in this plan remain DoD assets, the unit's force structure would also be available to support the homeland defense and MSCA missions, and provide a secondary warfighting capability.

CURRENT LEGISLATIVE INITIATIVES

Status of full time personnel: The team analyzed a number of options regarding the status of full time personnel. These included: state active duty (SAD), full time National Guard duty for special work (Title 32), full time Active Guard and Reserve duty (AGR)(Title 32) and active duty for special work (Title 10). The team recommends full time Active Guard and Reserve duty (AGR)(Title 32), for National Guard personnel. This status best enables the personnel to perform required missions within the envisioned command and control structure and with federal military personnel benefits. This status provides a career track for soldiers who will be highly skilled and in high demand. A change to current statutes covering Title 32 is necessary since the WMD mission is operational in nature. The specific language has been included in the fast-track legislative package being staffed separate from this plan.

Stafford Act Amendments: The team also recommends amending provisions of the Stafford Disaster Assistance Act that concern Federal and State disaster preparedness programs and disaster response, to include WMD incidents within the definition of a disaster under the act and to authorize the use of the National Guard (as defined in section (101)(3) of Title 32) or the reserve components (as named in Section 10101 of Title 10) "to take such actions that may be necessary to provide an immediate response to a disaster involving a weapon of mass destruction" (as that term is defined in Section 102 of the Act, as it would be amended). The act would also be amended to also require that DoD be reimbursed for any expenses incurred by the department for disaster preparedness programs conducted by the National Guard or the reserve Components from funds "appropriated for the purposes of the Act" and to authorize the Secretary of Defense, at the request of the Director of FEMA, to direct the National Guard and Reserve Components to conduct training exercises, preposition equipment and other items, and to take such other actions that may be necessary to provide an immediate response to an incident involving a weapon of mass destruction (as that term is defined in Section 102 of the Act, as it would be amended). The Department of Defense would be reimbursed with funds made available for the purposes of disaster relief. These changes facilitate use of the reserve component in WMD response under the Stafford Act.

FAST TRACK LEGISLATION

As mentioned previously in this document, WMD response activity will be quite different. In fact, federal resources may be required much earlier than during a typical disaster response. Given this potential, access to federal resources takes on a new and perhaps even demanding dimension. With quick access in mind, now is the time to work the accessibility issues, not after an event has occurred. Both have unique features but it appears that at a minimum, the amendment to 10 USC 12301(b) deserves favorable consideration. The 10 USC 12304 amendment addresses access but extends the current PSRC authority to WMD related incidents. The nature of just these amendments is an example of the issues re-

quiring attention. More work remains necessary. Perhaps, in the end, a new status covering operational missions will be most appropriate for the type duty outlined in this plan. The two categories for consideration are listed below:

1. Extension of Involuntary Call-up Authority to 30 Days: Amendment to 10 USC 12301(b). That section currently authorizes the Secretary of a military department to order, without the consent of the persons affected, any unit, and any member not assigned to a unit organized to serve as a unit, in an active status in a reserve component under the jurisdiction of the Secretary to active duty for not more than 15 days a year. This amendment would increase a period of active duty from 15 to 30 days a year. This authority would enable the military departments to initially respond more effectively to a domestic incident involving a weapon of mass destruction and to make members of the ready reserve more readily available to participate in other operational missions.

2. Enhanced access to the Reserve Components: Amendment to 10 USC 12304(b) concerning the authority of the President to authorize the Secretary of Defense to order members of the Selective Reserve to active duty not in time of war or during a national emergency declared by Congress and amendments to the Stafford Act to authorize and facilitate DoD preparation for and response in WMD consequence management situations. Currently, Section 12304(b) prohibits such an order to active duty "to provide assistance to either the Federal Government or a State in time of a serious natural or manmade disaster, accident, or catastrophe." The amendment inserts a very limited exception to section 12304(b) that would allow a unit or member to be ordered to active duty to provide assistance in responding to an emergency involving a "weapon of mass destruction."

* * * * * * *

b. Combating Terrorism: Status of DOD Efforts to Protect Its Force Overseas (Letter Report, July 21, 1997, GAO/NSIAD–97–207).[1]

GAO reviewed the Department of Defense's (DOD) efforts to protect U.S. forces from terrorist attacks, focusing on: (1) measures taken at overseas U.S. bases to enhance the security of deployed personnel; and (2) recent DOD initiatives to improve its antiterrorism program.

GAO reviewed that: (1) many deployed U.S. forces are better protected today from terrorist attacks similar to the one that occurred at Khobar Towers; (2) during March and April 1997, GAO visited 30 overseas sites and found that security improvements were most evident where the risk of terrorism is the greatest, such as Turkey and the Middle East; (3) DOD has placed less emphasis on addressing vulnerabilities in countries that are currently considered to have a lower threat; (4) senior military commanders and defense officials GAO met with emphasized that they can reduce, but not eliminate, vulnerabilities and that further terrorist attacks against U.S. forces should be expected; (5) they also observed that efforts to defend against terrorism are complicated by a number of factors, including the ability of terrorists to decide where and when to attack and to choose from a wide selection of targets; (6) nevertheless, the officials said, some risk must be accepted as the United States pursues its national security strategy abroad; (7) since the bombing at Khobar Towers, DOD has initiated a number of changes aimed at improving its antiterrorism program; (8) for example, DOD has established a new office for combating terrorism on the Joint Staff, enhanced the antiterrorism responsibilities of the geographic combatant commands, and instituted a vulnerability assessment process under the aegis of the joint staff; (9) these initiatives, however, have not resulted in a comprehensive, consistent approach to antiterrorism as called for by the Downing task force; (10) for instance, DOD's force protection focal point has not provided the geographic combatant commanders the guidance the commanders believe they need to carry out their expanded antiterrorism responsibilities; (11) such guidance would include establishing standards for assessing vulnerabilities and agencywide physical security requirements designed to provide a minimum level of protection to U.S. forces no matter where they are located; (12) a comprehensive, consistent approach to antiterrorism using common standards would give commanders a more objective basis for determining whether they are providing adequate protection to their facilities and personnel; and (13) DOD would have a capability to compare vulnerabilities at different sites on a worldwide basis and thus ensure that sufficient emphasis is being placed on the most vulnerable areas.

c. Domestic Preparedness Program in the Defense Against Weapons of Mass Destruction, May 1, 1997.[1]

EXECUTIVE SUMMARY

This report summarizes the Department of Defense (DoD) actions as requested by Public Law 104–201, National Defense Authorization Act for Fiscal Year 1997, Title XIV: Defense Against Weapons of Mass Destruction (WMD), Subtitle A: Domestic Preparedness. The Conference Report accompanying Public Law 104–208 Omnibus Consolidated Appropriations Act, 1997, requested DoD to submit a report to Congress by May 1, 1997 on four specific issues: assess the types and characteristics of chemical and biological threats; identify unmet training, equipment and other requirements for first responders; identify chemical/biological warfare information, expertise and equipment that could be adapted to civilian application; and present a detailed plan for DoD assistance in equipping, training and providing other necessary assistance for first responders to such incidents.

A threat assessment has been prepared and is contained in Volume II of this report. It assesses the types and characteristics of chemical and biological threats against U.S. citizens and Government assets in the United States.

Over the past few years, several studies, discussions, workgroups, and focus groups have identified capabilities, specific requirements and shortfalls in requirements that are needed by first responders to meet the threat of a chemical, biological or nuclear terrorist attack. The findings of these studies and workgroups show a common trend in unmet training, equipment, and other resources, such as technical information for first responders.

The DoD is using existing interagency programs as the foundation to build links between these programs and initiatives outlined in Title XIV. These programs include a nationwide training support plan with an initial focus on 27 cities. Modular training courses will then be available to other cities throughout the nation. Through the Helpline in non-emergency, and the Hotline in emergency situations, first responders will have access to DoD chemical/biological agent/warfare information and technical expertise to enhance their preparedness. Local Metropolitan Medical Strike Teams and their supporting systems are being geographically developed to respond to medical consequence management issues related to NBC terrorism. A Chemical-Biological Quick Response Force has been developed for rapid deployment to detect, neutralize, contain, dismantle, and dispose of Weapons of Mass Destruction (WMD). Operational control of committed response forces will be provided by two geographically located Response Task

[1] Source: http://www.defenselink.mil/pubs/domestic/.

Forces. Other Federal departments and agencies are enhancing their response capabilities. Lessons learned from completed exercises will be applied to developing exercises/tests to be executed in the next five successive fiscal years to improve the response of Federal, state, and local agencies to emergencies involving WMD incidents.

All programs and initiatives outlined within this report are supported by congressional legislation. The overall success is dependent upon combined cooperation of all Federal agencies participating in efforts related to domestic preparedness for WMD. The key to success, however, is continued funding through the outyears to ensure that all agencies, local, state, regional and Federal, are adequately prepared to respond to a WMD terrorist attack.

VOLUMES 1–6

1. INTRODUCTION

This report summarizes the Department of Defense (DoD) actions as requested by Public Law 104–201, National Defense Authorization Act for Fiscal Year 1997, Title XIV: Defense Against Weapons of Mass Destruction (WMD), Subtitle A: Domestic Preparedness. The Conference Report accompanying Public Law 104–208 Omnibus Consolidated Appropriations Act, 1997, requested DoD to submit a report to Congress on four specific issues that are outlined in the Scope of the Report.

1.1 Background

Within the last five years at least eleven states as well as other nations have experienced terrorist incidents. Some of the most widely publicized incidents were the bombing of the World Trade Center in 1993, the chemical terrorist attack on the Tokyo Subway system in 1995, the bombing of the Alfred P. Murrah Federal Building in Oklahoma City in 1995, and the Centennial Park bombing in Atlanta in 1996. With the increasing availability of raw materials and technology from worldwide sources, the potential use of WMD by subversive groups has mounted dramatically. In response to the growing concern of the potential use of WMD in a terrorist attack, Title XIV was established.

1.2 Responsibilities

Under Title XIV, Subtitle A, Domestic Preparedness, responsibilities for oversight and execution are as follows. The Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) has responsibility for policy and resource oversight. The Assistant to The Secretary of Defense (Nuclear, Chemical & Biological Defense Programs) provides resource oversight for equipment procurement. Additionally, in accordance with Section 1413, Title XIV, the Secretary of Defense (SECDEF) designated the Secretary of the Army (SECARMY) to serve as the Executive Agent for the coordination of DoD training assistance to Federal, state, and local officials to better assist them in responding to threats involving chemical and biological weapons or related materials or technologies, including assistance in identifying, neutralizing, dismantling, and disposing of biological and chemical weapons and related materials and tech-

nologies. As the Executive Agent, the Secretary is responsible for developing the planning guidance, plans, implementation, and procedures for the Domestic Preparedness Program. The SECARMY subsequently named the Assistant Secretary of the Army (Installations, Logistics and Environment) (ASA(IL&E)) as the focal point for all matters in which the Army has executive agency, and the Director of Military Support (DOMS) as the DoD staff action agent. In a separate directive, the SECARMY directed the Commander, Army Materiel Command (AMC) to appoint a DoD Program Director. AMC subsequently directed Commander, Chemical Biological Defense Command (CBDCOM) to appoint a DoD Program Director with the primary responsibility to implement the basic elements of Title XIV.

The Senior Interagency Coordination Group (SICG) on Terrorism was established to facilitate the interagency coordination of policy issues and program activities in support of Federal initiatives to assist Federal, state, and local first responders in responding to WMD incidents. The SICG is composed of senior members from DoD, the Federal Emergency Management Agency (FEMA), the Federal Bureau of Investigation (FBI), the Public Health Service (PHS), the Environmental Protection Agency (EPA), the Department of Energy (DoE), the Department of Justice (DoJ), the Department of Transportation (DoT), United States Department of Agriculture (USDA), General Services Administration (GSA), and the National Communications System (NCS).

1.3 Scope of the Report

This report responds to four issues outlined by Congress. The report will assess the types and characteristics of chemical and biological threats against the U.S. and the capabilities of civilian agencies to respond to these threats; identify unmet training, equipment, and other requirements of civilian first responders necessary to provide a basic capability to respond to domestic chemical and biological attacks; identify DoD chemical/biological warfare information, expertise and equipment that could be adapted to civilian application to help meet identified requirements; and present a detailed plan for DoD assistance in equipping, training, and providing other necessary assistance for first responders to such incidents.

This report provides information to Congress on the status of the existing programs and initiatives required to enhance Federal, state, and local capabilities to respond to terrorist incidents involving WMD. The overall initiative uses existing Federal agencies' chemical and biological assets and programs as the foundation for its program. The SICG members are building links between participating agencies to develop new programs to ensure that the intent of Congress is met as outlined in Title XIV and subsequent legislation. The DoD initiative is an evolving program. This report will provide information on the status of the individual components of the DoD program and plan. Volume I of this report is unclassified. Volume II provides an assessment which is classified SECRET US ONLY.

2. TYPES AND CHARACTERISTICS OF CHEMICAL AND BIOLOGICAL THREATS AGAINST U.S. CITIZENS AND GOVERNMENT ASSETS IN THE U.S. AND THE CAPABILITY OF CIVILIAN AGENCIES TO RESPOND TO THESE THREATS

This portion of the Report to Congress is contained in Domestic Preparedness Program, Volume II: Assessment of the Chemical and Biological Transnational Terrorist Threat in the Continental United States (U). The assessment is classified SECRET US ONLY.

3. UNMET TRAINING, EQUIPMENT, AND OTHER REQUIREMENTS OF CIVILIAN FIRST RESPONDERS NECESSARY TO PROVIDE BASIC CAPABILITY TO RESPOND TO A DOMESTIC CHEMICAL OR BIOLOGICAL ATTACK

3.1 Introduction

Several Federal agencies have conducted studies and focus group discussions with different local, state, and regional representatives over the past several years in an attempt to determine the needs of first responders in the event of a WMD incident. These studies focused on areas such as plans, capabilities, procedures, training, equipping and response integration at different levels. The findings from several of the studies/discussions are summarized below.

3.2 Studies

3.2.1 National Governors Association - September 1996

In September 1996 the National Governors Association (NGA) conducted a workshop for the NGA policy advisors with representatives from FEMA, DoD, DoE, EPA, FBI, Department of Health and Human Services (DHHS), and the Department of Veterans Affairs (VA). The workshop sought to 1) identify the nature, impact, and response issues associated with a nuclear, biological or chemical terrorist incident; 2) discuss the adequacy of both Federal and state plans and response capabilities to an incident involving mass casualties; and 3) formulate the next steps for developing a coordinated Federal, state, and local response framework.

In preparation for the workshop, NGA conducted a survey of the 26 participating states to assess the capabilities of these states to respond to and manage the consequences of nuclear, biological, or chemical (NBC) terrorism. These 26 states were chosen because their large urban areas and other factors could make them potential targets for a terrorist incident.

Most states acknowledged they receive satisfactory intelligence about potential terrorist groups operating in their state and could adequately respond to a nuclear terrorist attack due to their planning and training for possible nuclear power plant accidents. However, in the arena of chemical and biological terrorism, the states felt they were not adequately resourced or trained. The NGA findings indicate a need for more information on the types of resources available to combat chemical or biological attacks and indicated a need for Federal assistance in areas of monitoring and detection equipment, technical assistance, manpower, and recovery efforts. FEMA recommended holding regional meetings to review resources

and discuss issues of mutual concern between the Federal and state governments.

First responder issues focused on the states capabilities to respond to an NBC terrorist incident, recognizing that first responders are essentially on their own for the first six to ten hours after an incident has occurred. Participants discussed resources the Federal government could provide and the role of Federal agencies during the early stages of the crisis; leveraging existing capabilities and expertise; improving interaction between emergency management organizations and first responders; acquiring low cost NBC equipment and protective clothing; improving decontamination capabilities; conducting specialized training; and providing opportunities for partnerships with industry to advance current expertise and develop tools and techniques.

Public information issues explained the need to present fully coordinated, timely, and accurate emergency information to the public and the importance of considering the objectives in consequence management versus crisis management.

Law enforcement and intelligence issues centered on the collection, analysis, production, and dissemination of terrorist intelligence information between state and Federal agencies. Participants also addressed public safety issues and agency roles regarding the responsibility for maintaining order and discipline during and after an incident.

Health and medical service issues focused on the states capabilities and capacities, and the type and quantity of assistance available from the Federal government.

When discussing how the states and Federal agencies could best work together on the issue of NBC terrorism, most states suggested that FEMA should hold regional meetings. To develop a coordinated framework for states and Federal agencies to work together, FEMA proposed the following: imitate the Federal Response Plan (FRP) review process at the state level; host a series of workshops at the regional level; establish a national information clearinghouse; visit/assist each reviewing state; pool Federal and state capabilities data; develop a national plan outlining state and Federal responsibilities, priorities, and approaches to develop/sustain capability; secure state and Federal funding support; and implement a multi-year plan.

3.2.2 FEMA—September 1996

During September 1996 FEMA met with representatives from Boston, MA; Denver, CO; Los Angeles, CA; and Philadelphia, PA. They focused on the capabilities and needs of local government to respond to terrorist incidents involving WMD. Input and feedback from this sampling of U.S. metropolitan areas was intended to provide an indication of the spectrum of nationwide preparedness at the local level. Participants primarily represented emergency response and public health organizations from the respective state and local governments. Policy and subject matter experts included Federal officials from FEMA, the FBI, DHHS, and DoD.

Four concurrent sessions were held to discuss the local response to terrorism scenarios involving NBC incidents tailored to reflect specifics of each city's jurisdiction. A surprising number of common

response issues were identified among the four different types of incidents.

Participants believed that local government had the ability to meet normal emergency response needs: performing the fire-fighting, law enforcement, emergency medical services and rescue tasks they do so effectively on a day-to-day basis. In addition, some personal protective equipment and some hazardous materials response equipment is generally in place at the local level and would be available to respond to a very small WMD incident. However, they identified a critical need for access to information and expert advice as well as training. They also thought that local government was ready, willing and able to do more with the proper training and equipment.

The groups highlighted the need for subject matter experts to be identified and available within the first few hours of an incident. These subject matter experts would provide advice and reference materials describing the hazards, the effects and recommended protective response actions.

Beyond technical experts, personnel resources would be required by local governments to assist with the potentially massive public impacts of such incidents - whether it be mass casualties or large-scale evacuation. National Guard (NG), state police, and additional fire and emergency medical personnel from outlying municipalities were noted as probable sources to meet these needs. The cities indicated that in many cases mutual aid agreements were in place to obtain resources from neighboring communities. In other cases, they recognized the need for such agreements and that this was a local responsibility.

The need for hazard-specific procedures was uniformly supported. Local responders do not have enough knowledge of the requirements for response to NBC threats to develop their own procedures. Guidance from state and Federal experts is needed on procedures to monitor, treat, protect and decontaminate after release of NBC contaminants.

Participants highlighted training as a key component in building local, state, and Federal response capabilities. First responders need awareness training specific to NBC hazards so that they could quickly recognize victim symptoms and other characteristics of such an incident which may distinguish them from other hazardous material incidents. Participants also felt that first responders needed training on routes of exposure, means of protection, health effects, treatment and monitoring, and decontamination methods. Training on handling of mass casualties and on the requirements of triage was also highlighted as a need for the emergency medical community.

Multi-jurisdictional exercises were noted by the groups as another critical element of the preparedness program that was currently missing. They felt that local plans and procedures were evaluated on a frequent basis, but that opportunities to test integration and coordination with state and Federal agencies were lacking. The groups encouraged the Federal government to promote more full-scale integrated exercises.

Overall, the group consensus was that the local preparedness for response to WMD terrorist incidents is nominal. To the extent that

hazardous material preparedness applies to the NBC arena, some base level exists. However, a great deal of progress remains to be made on resource, planning, and training fronts regarding the unique nature of NBC terrorist incidents.

3.2.3 FEMA/FBI - January 1997

FEMA and FBI submitted a Joint Report to Congress in January 1997. It addressed both crisis management/prevention and consequence management/response activities. This report focused on capabilities and interagency roles and responsibilities to respond to an incident involving WMD. In the assessment summary, the impact of a WMD incident and significant response requirement were recognized.

A NBC terrorist incident may occur as a local event with potentially profound national implications. In responding to a NBC incident, first responders must be able to provide critical resources within minutes to mitigate the effects of the incident. Since the ability of the local government to deal with the immediate effects of an incident is essential to the success of any NBC response, enhancing and maintaining the local capability with trained and adequately equipped responders is a key component of a viable national terrorism response capability.

While the assessment of the FRP and Federal capabilities found some deficiencies, it also identified several current capabilities being expanded to ensure a more viable national level NBC response capability. Current initiatives for supplementing existing plans, enhancing operational response capabilities, and increasing the availability of training are ongoing. These new efforts, coupled with ongoing preparedness efforts, will facilitate a better coordinated and more effective response by local, state, and Federal governments to the consequences of domestic NBC terrorist incidents.

3.2.4 DoD—February 1997

DoD, with the support of other Federal agencies, conducted a series of focus group meetings with first responders during February 1997. The findings and recommendations of the groups formed the basis of a comprehensive set of training performance objectives (Annex A). Based upon the focus groups review, a training course development program was begun to modify existing training courses, and develop programs of instruction and instructional material.

3.2.5 DoD/DoE—April 1996

DoD and DoE, in consultation with FEMA, submitted a report to Congress in 1996 on current plans, resources, and capabilities to respond to a nuclear, radiological, biological, or chemical terrorist attack. The report covered consequence management plans and capabilities. Key points made were, first, there is a fundamental shift from the local or regional level of Federal involvement and decision-making authority to Washington, DC and the SECDEF's personal involvement during a WMD domestic terrorist incident. Second, there are some highly trained personnel available and excellent capabilities in many consequence management organizations to respond to a domestic NBC disaster. Finally, first responders

need training, equipment, and supplies, yet there are limited quantities of DoD combat supplies available for NBC contingencies.

The shift in the level of involvement was due to recognizing the mass casualties, physical damage, and potential for civil disorder resulting from a WMD detonation. Simply stated, a terrorist use or potential use of a WMD is considered a vital threat to the national security of the United States.

The interagency community found that including consequence management experts from the very beginning of a crisis management response was absolutely essential for minimizing casualties, reducing public panic, and ensuring a rapid Federal response to state and local communities. The interagency counterterrorism community has also taken steps to include senior policy decisionmakers for consequence management in their Washington deliberations on crisis management.

The FRP, involving 28 departments and agencies, provides a framework for response to most natural and manmade domestic civil emergencies. A recently published Terrorism Annex to the FRP, addresses how the various agencies, including DoD, would respond to a domestic NBC disaster. While DoD, DoE and other Federal agencies currently have some very highly trained and well equipped teams available to respond to such an event, NBC response personnel and equipment are limited compared to the potential threat. The Federal response community continues to work together to increase their capabilities but there is still much room for improvement.

This report recognizes that state and local authorities, as first responders, are in need of their own NBC equipment and supplies, and greater access to up-to-date NBC training. DoD has an inventory of combat supplies for NBC contingencies, but in many cases this equipment is not suitable for civilian use during a terrorist incident. Additionally, the use of DoD stockpiles of NBC supplies and materials for domestic emergencies will have a direct adverse impact on military readiness and force protection.

3.3 Summary

DoD has extensively used the findings of these studies and reports to formulate the Domestic Preparedness Program. The specific elements of the program are discussed in Section 5. The ongoing program of activities in FY 97 encompassing planning and guidance development, training and exercises, and capability enhancement involving Federal, state, and local governments will improve the current levels of preparedness and response.

4. DOD CHEMICAL/BIOLOGICAL WARFARE INFORMATION, EXPERTISE, AND EQUIPMENT THAT COULD BE ADAPTED TO CIVILIAN APPLICATIONS TO MEET IDENTIFIED REQUIREMENTS.

4.1 Information and Expertise

DoD and other Federal agencies routinely provide support to first responders at the local, state, and Federal level in the form of expert advice and assistance. A major source of the information comes from a vast knowledge base at CBDCOM and the Medical Research and Materiel Command (MRMC). The Defense Technical

Response Group, part of the Naval Explosive Ordnance Disposal (EOD) Technical Division, is a joint-service manager for explosive ordnance disposal. Finally, the 52nd Ordnance Group can be called upon for OD assistance. Specially trained EOD operators in DoD special mission units are the primary experts to be called upon by the FBI for access and device disablement operations involving weapons of mass destruction.

The current process used to identify and link up first responders and technical expertise is somewhat cumbersome. The initiative of establishing a Helpline and a Hotline focuses on streamlining the process so first responders know how to obtain information in both non-emergency and emergency situations.

4.2 Equipment

An annual report to Congress entitled "Department of Defense Nuclear/ Biological/Chemical (NBC) Warfare Defense" submitted as required by Section 1703 of the National Defense Authorization Act for Fiscal Year 1994 documents quantities, characteristics, and capabilities of fielded chemical and biological defense equipment which would be used in an NBC combat scenario. Although DoD does have a program for loaning equipment to civilian agencies, personal protective equipment such as the mask or protective suit, if adapted for civilian use, would require National Institute For Occupational Safety and Health or National Fire Protection Association approval.

Equipment currently used by chemical depot workers is listed in Department of the Army Pam 385–61, Toxic Chemical Agent Safety Standards. However, commercial protective equipment alternatives have been tested and are currently in use at many locations. A program will begin in 4th Quarter of FY 97 to evaluate and test additional commercial protective equipment in a chemical agent environment in order to provide a much larger database on commercially available equipment. The test results will be available for use by the local, state, and Federal agencies as they go through the decision-making process in selecting various items of protective equipment for their use.

5. DOD PLAN FOR ASSISTANCE IN EQUIPPING, TRAINING, AND PROVIDING OTHER NECESSARY ASSISTANCE FOR FIRST RESPONDERS TO INCIDENTS

5.1 General

5.1.1 Program Intent

Under Title XIV, Congress directed a program to enhance the capability of the Federal Government to prevent and respond to terrorist incidents involving weapons of mass destruction, and provide enhanced support to improve the capabilities of state and local emergency response agencies to prevent and respond to such incidents at both the national and the local level. DoD will implement the necessary training and assistance programs, but intends to transition this responsibility to other agencies after FY 1999 as allowed for in Section 1412 of Title XIV.

5.1.2 Program Scope

DoD's Domestic Preparedness Program encompasses the nine programs outlined in Title XIV. As shown in Figure 5.1, the program is aimed at improving the preparedness and the responsiveness of first responders and other elements that may support them in a time of crisis.

5.1.2.1 Preparedness

The training and exercise programs shown in Figure 5.1 are intended to improve the local ability to respond to an incident involving WMD. In almost all cases, the local first responders will be the first on the scene and the actions that they take may significantly affect the overall success of the response. Accordingly, the major portion of the programs effort and funding is directed toward this end. In addition, the availability of Federal-level expert advice, data bases, and inventories will greatly assist planning at all levels.

5.1.2.2 Response

If a WMD incident were to occur, the NG, serving in a Title 32 status, provides the state a readily available asset to augment the first responders. Normally within 12 hours, NG units can be mobilized to their armory and prepare to deploy to an incident site. In all cases, NG plans call for mobilizing and being prepared to deploy within 24 hours.

Additionally, when authorized to do so by statute or regulation, U.S. Army Reserve (USAR) units may also be available to provide prompt support and augmentation to the Chemical/Biological Quick Response Force (CBQRF) and other Federal agencies. However, before USAR units can be deployed to provide such support, the request must be made and approved in accordance with DoD Directive 3025.15, "Military Assistance to Civil Authorities." Both components possess appropriate force structure to respond to a domestic terrorist incident involving WMD. The DoD policy for disaster support and response has established that the inherent command and control, and communications capabilities of a unit is of primary importance in a domestic response mission. The specific technical requirements of a WMD incident are best addressed by a CBQRF with augmentation support by the NG and other Army Reserve Components force structure that is locally in place or available under the provisions of an Emergency Management Assistance Compact (EMAC).

Under existing agreements such as the EMAC, neighboring states can augment immediate response efforts during times of emergency. Compacts resolve fiscal and legal issues facilitating emergency response across state lines. The 104th Congress ratified EMAC as PL 104–321 in October 1996. To establish an EMAC, states must enact the necessary legislation. Once states pass new legislation to participate in an EMAC and comply with the necessary statutory requirement of submission to Congress for a 60 day review/approval process, no further Congressional action is required for the states to provide mutual support.

Federal support to the local governments consequence management response will be greatly enhanced by fielding the CBQRF and

the Public Health Services specially trained and equipped medical response teams. In addition, the availability of Federal-level expert advice, data bases, and inventories could greatly assist the local response and make the Federal support more responsive.

5.1.3 Program Implementation

5.1.3.1 Interagency Approach

From the beginning of the program, DoD has sought the active participation of the other Federal agencies. This interagency approach has allowed a comprehensive and interagency Federal approach to meet the needs of local communities. In addition, the synergism of the interagency cooperation has started to meld several Federal programs related to WMD preparedness into a single Federal effort under the direction of the SICG.

5.1.3.2 The Senior Interagency Coordination Group

The SICG on Terrorism was established to facilitate the interagency coordination of Federal policy issues and program activities in support of Federal consequence management training initiatives concerning terrorist incidents involving WMD. The SICG is chaired by FEMA.

The SICG serves as the interagency policy level forum for identification, discussion, and resolution of issues involving the interagency strategy to provide guidance and training support to Federal, state and local first responders who may be called upon to respond to a terrorist WMD event. The SICG focuses on emergency response training in support of established US Government counterterrorism response procedures as directed by Presidential Decision Directive –39 (PDD–39). This includes coordination with other Federal agencies of DoD Domestic Preparedness Program activities under Title XIV, in conjunction with local and state governments. Since October 1996, the SICG has met at least monthly with member agencies providing valuable input on the overall direction and focus of the training effort. It is expected that the SICG will continue to provide interagency coordination and assistance to DoD in implementing program activities as long as required.

5.1.3.3 Funding

Approximately $52.6 million is provided for the Domestic Preparedness Program during FY97. It is allocated as follows:

- The Emergency Response Assistance Program to include the training, expertise advice, Hotline and Helpline programs described below: $16.4 million.
- The development and fielding of the Metropolitan Emergency Medical Response Teams, which is called Metropolitan Mobile Strike Team (MMST) Systems: $6.6 million.
- The coordination of the NBC response capability to include the development and fielding of the CBQRF described below: $9.8 million.
- The testing of preparedness for emergencies involving nuclear, radiological, chemical, and biological weapons: $9.8 million.

- The upgrade of equipment for the Marine Corps Chemical Biological Incident Response Force (CBIRF), including funds for prepositioned equipment at key domestic locations: $10 million.

The FY 1998/FY 1999 Presidents Budget includes $49.5 million in FY 1998 and $52.1 million in FY 1999 to continue to provide emergency response preparedness first responder training and assistance to metropolitan area agencies, and to conduct exercises and preparedness tests in coordination with Federal, State, and local agencies. After

FY 1999, DoD will no longer fund first responder training nor expert assistance, since we plan to transfer these responsibilities to another agency in accordance with Title XIV, Section 1412 provisions. Also, DoD support for exercises and preparedness tests will terminate after FY 2001.

5.2 Programs

5.2.1 Training Program

Section 1412, Title XIV, directs the SECDEF to carry out a program that provides training to civilian personnel of Federal, state, and local agencies. The training program is to include the use, operation, and maintenance of equipment for detecting, monitoring, protecting, and decontaminating. It will also include other aspects regarding emergency responses to the use or threatened use of WMD or related materials. The training support programs outlined below include existing and new programs needed for first responders.

5.2.1.1 Training Support to 120 Cities

Currently, the Federal government offers various programs to train agencies in responding to a WMD attack. For example, DoE offers 15 training programs to first responders that train them in various aspects of WMD. For instance, DoE offers a course that provides a basic knowledge of nuclear radiation, radiation health effects and medical considerations, and nuclear weapons effects. This course is primarily given to first responders such as physicians, Emergency Medical Technicians and firefighters. They also offer a joint course with the Defense Special Weapons Agency (DSWA) that teaches DoD and the intelligence community professionals how to identify technologies associated with weapons program and roles, and responsibilities and capabilities when responding to threats. The DoD also has provided training courses to first responders. These include first responder training prior to the 1996 Summer Olympics, and a course offered to civilian personnel in Federal, state and local agencies at the US Army Chemical School. The four day course, Chemical-Biological Countermeasures for First Responders, includes one day of live agent training at the Chemical Defense Training Facility. These courses, which have been taught to civilian agencies, are being incorporated into the overall training program.

The DoD Program Director held four focus group meetings during February 1997 to determine core competencies and to develop comprehensive training performance objectives (Annex A). Firefighters, hazardous materials (HAZMAT) handlers, and on-scene

incident commanders; emergency medical specialists and doctors; law enforcement officials; and 911 operators and call takers, as well as the appropriate Federal agencies, participated in this effort. In addition, a concurrent effort was initiated to identify existing NBC training modules within DoD and other Federal agencies to fulfill these training needs. Concurrent with the effort to develop the performance objectives and to identify the training modules to support them, the DoD Program Director developed a discussion document to assist local governments assess their level of training against stated performance objectives. The city's self assessment will drive the city's individual training plan.

The proposed training is expected to provide a basic response capability for first responders. In most cases, it will be train-the-trainer type training to be embedded in existing local institutions. As the Federal Domestic Preparedness Program evolves, modifications will be made to the training program as necessary.

Denver, Colorado has been selected as the pilot city for the program. It was selected because of its involvement in the Oklahoma City Bombing Trials and the Summit of 8 Conference in June 1997. An initial meeting was conducted with local and state leaders on March 19, 1997. Within this forum, they were provided an overview of the training and exercise program. First responder training is expected to be conducted prior to the June 20–22, 1997 Summit of 8 Conference. In addition, an integrated exercise will be conducted prior to the Summit of 8 Conference.

Using Denver as the benchmark, self assessments will be conducted by the remaining 26 targeted cities. An April 18, 1997 "Kick-Off" meeting with Mayors, Governors, and other regional representatives of the 27 target cities and their representative states will provide an overview on the overall training program and self assessments. Also, each city will be given information and material for conducting a self assessment. In addition to Denver being the pilot city, New York City, Los Angeles, Chicago, Houston, the District of Columbia, Philadelphia, San Diego, and Kansas City should begin their training during FY 97. The training program will assess the requirements for the first 27 cities in 1997 and, contingent on funding, has a goal of providing training to 120 cities by the end of 1999.

5.2.1.2 Nationwide Training Support

In addition to the individual training plans designed for selected cities and states, the DoD Program Director is designing low cost training packages which will receive wide dissemination via an inexpensive media (e.g. Internet, etc). This training initiative should make training packages available to state and local agencies as rapidly and inexpensively as possible. The DoD has already produced a CD-ROM in October 1996 entitled "Management of Chemical Warfare Injuries" which provides:

- technical information on chemical warfare agents (i.e., nerve, blister, choking and riot control agents and cyanides)
- self-test for evaluating mastery of key learning objectives
- dramatized scenarios offering opportunities for practicing differential diagnoses of patients
- extensive reference materials.

Another CD-ROM will be available in October 1997 entitled "Medical Management of Biological Casualties" which will provide:

- dual learning tracks (one for medical professionals; e.g., physicians, nurses, and physician assistants, and one for first responders; e.g., military medics, emergency medical technicians, and paramedics)
- physiology of and signs and symptoms of exposure to those biological warfare agents identified by United States Army Medical Research Institute of Infectious Disease (USAMRIID) as posing the greatest threat to military personnel (bacteria: anthrax, plague, tularemia, Q fever; viruses: smallpox, Venezuelan equine encephalitis, viral hemorrhagic fever; and toxins: botulinum toxins, staphylococcal enterotoxin B, ricin, trichothecene mycotoxins)
- self-test for evaluating mastery of key learning objectives
- dramatized scenarios offering opportunities for practicing differential diagnoses of patients
- extensive reference materials.

In addition, DoD expects to publish the performance objectives (Annex A) on the Internet.

The NG's Distance Learning Initiative at the National Interagency Counterdrug Institute (NICI) in California may also be included in the nationwide training support program. NICI is developing a course to train civilians and military leaders on the interagency processes necessary to plan for and coordinate with a joint response to a major terrorist incident. Their intent is to conduct one pilot and three more classes before the end of FY 97. The NG has trained over 6,000 soldiers in 1996 and 1997 via their Distance Learning Initiative.

Another alternative is for the U.S. Army Reserve (USAR) to provide training to first responders through the seven USAR Divisions (Institutional Training) [DIV(IT)]. Organic to each DIV(IT) is a Chemical Training Battalion and a Medical Health Services Brigade. The DIV(IT)s are regionally located throughout the United States in Richmond, VA; Milwaukee, WI; Oklahoma City, OK; Rochester, NY; Louisville, KY; Vancouver, WA; and Charlotte, NC.

5.2.2 Chemical/Biological (CB) Hotline/Helpline

5.2.2.1 CB Hotline

As stated in section 1412, Title XIV, DoD will establish "a designated telephone link to a designated source of relevant data and expert advice for the use of state or local officials responding to emergencies involving WMD or related materials." As depicted in Figure 5.3, DoD will tie into the National Response Center (NRC) to establish access to expert Chemical/Biological (CB) advice and assistance readily available to state and local agencies during emergency situations. To establish the Hotline, the existing NRC automated checklist will be modified to include chemical or biological incidents. The NRC will link the caller with personnel from CBDCOM's operations center. The NRC will concurrently notify the designated Federal On-Scene Coordinator/Regional Response Team and other supporting agencies. Access to nuclear expertise in DoE

continues to be in place through the DoE's 24 hour emergency operations center.

The NRC, located in Washington DC, is operational 24 hours a day. The NRC personnel scan incident reports and classify them according to a prescribed decision tree. Once the report is classified, the NRC executes the notification process to the prescribed Federal agencies. In the case of a WMD incident, a direct link would be made between NRC, CBDCOM, and U.S. Army Medical Research and Material Command (MRMC), or between NRC and DoE. These agencies would then respond directly to the local, state, or Federal agencies requesting assistance.

To meet the requirements of Section 1412, additional personnel and software will be added to ensure that expert advice and timely response are given 24 hours a day. The Hotline is expected to be operational by July 1997.

5.2.2.2 CB Helpline

DoD is establishing a Technical Assistance Chemical/Biological (CB) Helpline to support Federal, state, and local agencies by assisting them as they prepare for emergencies. The Helpline is for non-emergency situations and is a pipeline to the vast knowledge base at CBDCOM and the MRMC. The Helpline provides access to technical experts who can advise or assist on a wide variety of subjects, including personal protective equipment, decontamination systems, medical treatment, sources of equipment, symptoms, detectability and detection equipment, organization of responders, and many other technical aspects of CB incident operations. As depicted in Figure 5.4, incoming calls will be checked against the CB database. If not covered by the database, then the calls will be forwarded to the appropriate technical expert. The Helpline will provide first responders and planners with single source access to required technical information. This Helpline is anticipated to be operational by July 1997.

5.2.3 Expert Advice

DoD and other Federal agencies routinely provide expert advice to local, state and other Federal agencies. For instance, DoD's Technical Escort Unit (TEU), working with the EPA, recently provided technical assistance at the Evor-Phillips Superfund Site in New Jersey to safely dispose of buried containers labeled "Poisonous Gas". The DoD will continue these efforts. The DoD intends to expand, and make more readily available, this level of assistance by establishing the CB Helpline.

5.2.4 Loan of Equipment

DoD may loan "appropriate equipment" upon request. The loan of equipment will be accomplished under the normal DoD procedures established for Military Assistance to Civil Authorities (MACA), DoD Directive 3025.15. Additionally, by using EMACs states can provide cross-state border assistance without additional Congressional approval.

5.2.5 Metropolitan Medical Strike Team (MMST) Systems

Through the assistance of DoD support in FY 1997, DHHS will be assisting 27 major cities throughout the United States in the initial planning and development of MMSTs and their related MMST systems, the procurement of special antidotes and pharmaceuticals, initiation of necessary special equipment procurements, and training of selected personnel. This will be done through direct contracts with the cities and is expected to be completed within 15 months after contract award. However, DoD intends to provide no funding to support these DHHS teams beyond FY 1997.

The MMST is a highly trained, readily deployable, and fully equipped local response team organized and equipped to address WMD effects on human health. It would have specialized skills, pharmaceuticals, and equipment that would enable it to assist in identifying a WMD agent and initiating victim decontamination, conduct medical triage, and initiate appropriate therapy prior to transportation to emergency and definitive medical care facilities.

Each MMST will operate within a system that not only provides an initial, on-site response, but also provides for safe patient transportation to hospital emergency rooms, provides definitive medical and mental health care to victims of this type of attack and can prepare patients for onward movement to other regions should local health care resources be insufficient to meet the total demand for health services. This complete local WMD health care response system is referred to as an MMST system. Experience with two MMSTs formed to support the 1996 Summer Olympics and 1997 Presidential Inaugural indicates the formation and training of each team could take between six and twelve months.

5.2.6 Rapid Response Team

Section 1414, Title XIV, mandates that the SECDEF "shall develop and maintain at least one domestic terrorism rapid response team composed of members of the Armed Forces and employees of Department of Defense who are capable of aiding Federal, state, and local officials in the detection, neutralization, containment, dismantlement, and disposal of weapons of mass destruction containing chemical, biological, or related materials." The DoD has formed the Response Task Force (RTF) and the CBQRF to fulfill this requirement. This CBQRF would fall under the RTF who is responsible for operational control of DoD response forces, less the Joint Special Operations Task Force. The RTF deploys to support the Federal crisis and consequence management operations in support of the Lead Federal Agency (LFA) during domestic operations.

5.2.6.1 Concept

Currently there are established procedures for a U.S. Government response to a terrorist incident involving a weapon of mass destruction. Within the United States the Department of Justice, acting through the FBI, has lead responsibility for managing terrorist incidents. The FBI functions as the on-scene manager for the US Government. FEMA, with the support of the agencies within the Federal Response Plan, acts in support of the FBI in Washington, DC and on the scene of the crisis until such time as the Attorney General transfers lead Federal Agency role to FEMA. The

Department of Justice and FBI have developed, with interagency concurrence, operational guidelines that further define procedures and responsibilities. DoJ/FBI as LFA may request DoD to deploy the CBQRF to assist under three distinct scenarios: no notice; credible threat; and planned event scenarios.

The no-notice scenario assumes that an agent has been released. FEMA, acting in support of the DoJ/FBI, will request DoD assistance to manage the consequences of the incident in accordance with established interagency guidelines and DoD Directive 3025.15. DoD will utilize a quick response team to deploy and assess the incident site and coordinate for additional augmentation. Within this scenario, the CBQRF will be deployed upon notification and at the direction of the SECDEF to support the LFA. The number of individuals deployed may vary and the capabilities may change based on the location of the incident, existing assets available to first responders, and proximity of Federal assets.

The credible threat scenario assumes that intelligence sources have indicated a high probability of a known threat and that deployment of a response force is warranted prior to the actual use of a WMD. Within this scenario, the FBI will request WMD EOD and technical assistance from DoD special mission units as defined under DoD plans and interagency guidelines. Those elements will be called upon by the FBI to detect, render safe, and turn over for disposition any rendered safe WMD devices with EOD potential. Upon request from FEMA, acting in support of the FBI, DoD will deploy the CBQRF, whose focus will be the consequence management aspects of the incident. This response will include a command and control element, appropriate forces from TEU, and the US Marine Corps CBIRF, reinforced as necessary with additional specialized teams for both crisis and consequence management. The task organization for this scenario is directed by the SECDEF, after coordination with the LFA, who will coordinate with local and state official.

The planned event scenario assumes that predetermined WMD response elements will be prepositioned based upon coordination with the LFAs. This scenario is usually associated with special events such as political conventions, inaugurations or large public gatherings of personnel that would be vulnerable to a terrorist incident. The planned event scenario response may include a larger command and control element and will include an additional response team reinforced, if necessary, by trained medical, decontamination, and monitoring teams. The task organization for this response will also be directed by the SECDEF, after coordination with the LFA, who will coordinate with local and state official.

Based on the threat scenario, a three-tiered consequence management organization and response capability will be deployed to augment existing first responders capabilities.

5.2.6.1.1 Phase 1/Tier I (NLT 4 hours)

The lead elements of the CBQRF respond to a notification of an incident at the direction of the SECDEF. The team will be on 24 hour alert status and ready to depart within 4 hours after receiving their orders. This small team will have a limited capability to detect, neutralize, contain, dismantle and dispose of a chemical or bi-

ological device. Their primary purpose is to assess the situation, and provide advice and assistance to the local officials until the response force arrives. This team will also provide advice to the LFA and local officials on the task organization of the follow-on elements.

5.2.6.1.2 Phase 2/Tier II (NLT 18 hours)

The main element of the CBQRF will be ready to deploy within 18 hours after notification. In addition to command and control and liaison elements, the capabilities brought by this force will include decontamination stations, medical triage stations, agent detection, low level agent monitoring, perimeter entry control and support elements which are currently available for deployment. During June 1997 in Denver, DoD plans to validate the headquarters element. The exercise will also test the headquarters' interoperability with other DoD units and Federal agencies, as well as its ability to respond to a WMD incident.

5.2.6.1.3 Phase 3/Tier III (NLT 24–96 hours)

Tier III response elements will be specialized units that augment the capabilities of the CBQRF. Configuration of these augmentation units will be driven by the local situation and assets available. For instance, certain DoD laboratories could be called upon to respond with specialized equipment and capabilities. One such laboratory is the AMC Treaty Laboratory that was established to verify compliance with the Chemical Weapons Convention (CWC). It is a ISO 9001 registered quality system that was pre-deployed to support the FBI during the Olympics in Atlanta. The US Army Medical Research Institute of Infectious Diseases (USAMRIID) is capable of deploying an Aeromedical Isolation Team consisting of physicians, nurses, medical assistants and laboratory technicians. These team members are specially trained to provide care for and transport of patients with diseases caused by either biological warfare agents or infectious diseases requiring high containment. Also, Edgewood Research, Development and Engineering Center (ERDEC) maintains a rapidly deployable mobile environmental monitoring and technical assessment system, the Mobile Analytical Response System (MARS). The MARS provides a state-of-the-art analytical assessment of chemical or biological hazards at incident sites. The Naval Medical Research Institute (NMRI), through their Biological Defense Research Program (BDRP), has designed reagents, assays and procedures for agents classically identified as biological threat, as well as non-classical threat agents in environmental and clinical specimens. This program has developed rapid, hand-held screening assays that can be deployed globally. Other units that could be utilized would be Active Army, National Guard and U.S. Army Reserve chemical decontamination and medical units.

5.2.7 Exercises

5.2.7.1 Testing

Section 1415, Title XIV mandates that the SECDEF, in conjunction with the FBI, FEMA, DoE and other Federal agencies, "shall

develop and carry out a program for testing and improving the responses of the Federal, state, and local agencies to emergencies involving biological weapons and related materials and emergencies involving chemical weapons and related materials." The program will include exercises to be carried out during five successive fiscal years beginning with fiscal year 1997 and ending with FY 2001.

5.2.7.2 Exercise Approach

Over the last two years, a wide variety of exercises have addressed accidents and incidents involving use of WMD. These include MIRRORED IMAGE, CALYPSO WIND, CAPITOL REACTION and TERMINAL BREEZE. The ILL WIND series of exercises and DISPLAY SELECT, a nuclear weapons accident exercise, have also provided valuable insights and a baseline for future exercise design. Additionally, there have been over a much longer period classified exercises dealing with WMD terrorism. There is an established interagency Counterterrorism exercise program that has been in existence since the early 1980's. Over the past four years there has been an increased emphasis on WMD terrorism exercises. The Counterterrorism interagency exercises committee is working to integrate various agency exercises to ensure synergism and efficiency. DoD's Program Director is examining how to meet the domestic preparedness program exercise requirements by coordination with the counterterrorism committee and FEMA on the National exercise schedule. The exercise approach is still evolving, given the many exercises already planned by other Federal agencies and state and local governments.

The first component of the exercise program is to train-the-trainers. Then, conduct tabletop exercises that lead to practical or "muddy boots" exercises for first responders. The underlying philosophy is to get the trainer trained and then build upon his/her growing experience base.

The tabletop exercise would test city and state response to chemical or biological weapon incidents. The exercise would involve the local and state responders and would occur immediately after they were trained. A practical exercise for a WMD incident would emphasize city and state response functions unique to WMD incidents with simulation role playing of Federal support. This series of exercises will accomplish the follow objectives: 1) Provide immediate feedback to participants; 2) Reinforce training; and 3) Evaluate the effectiveness of training.

A second component of the exercise program will involve conducting systematic preparedness testing in two model cities. The purpose of the test will be to conduct a systematic comprehensive evaluation of available and alternative concepts, procedures, approaches and equipment for responding to a range of terrorist WMD incidents in each city. The results of systematic preparedness testing would be to develop an integrated model or system of procedures, equipment, response approaches that could be applied throughout the nation at the Federal, state, and local levels. This integrated model could then be implemented in the United States to improve domestic preparedness. Results from the program will continually be transitioned to the on-going training program.

The third component of the exercise program will seek to coordinate and integrate the WMD exercises through the interagency exercise program which are already planned by various Federal agencies. By the different Federal agencies participating in each others exercises and by involving state and local players, response force personnel could capitalize on the training potential of each exercise and gain an additional synergistic effect. In these situations where cross-level participation in exercises would occur, the response force personnel would sharpen their individual skills and be better prepared in the event of a WMD situation.

5.2.7.3 Exercises

Two WMD-related exercises have occurred and two are planned during FY 97.

The exercise CAPITOL REACTION was the first exercise to be conducted since the passage of the Defense Against Weapons of Mass Destruction Act of 1996. It addressed a local-state-Federal response to a potential terrorist use of a WMD during the Inaugural. Overall, CAPITOL REACTION enhanced the interagency cooperation by providing a forum to discuss and resolve interagency policy issues resulting from a crisis and consequence response in support of the Inauguration. Furthermore, it provided the operating parameters for future interagency exercises. It also established a process for interagency communication in the events of an incident. In addition, the FBI sponsored and the DoE funded and organized a WMD Interagency Support Exercise (WISE) to assist interagency contingency preparation for a nuclear, chemical or biological terrorist incident during the Presidential Inauguration. The WISE included a WMD counterterrorism crisis response tabletop seminar and a field training exercise to rehearse current procedures for nuclear, chemical or biological terrorist incidents.

In May 1997, the interagency community will conduct an Interagency Terrorism Response Awareness Program (I-TRAP) tabletop seminar which will focus on consequence management in response to a WMD incident. Just prior to the Summit of 8 Conference in Denver (June 20–22, 1997), DoD will host a chemical-biological exercise to validate the Headquarters, CBQRF, improve local, state and Federal operational plans and to evaluate the domestic preparedness training provided to the first responders. The interagency community will conduct a tabletop and limited on-the-ground exercise to assist Denver and Colorado in preparing for the Summit of 8 Conference.

5.2.8 Military Assistance to Civil Law Enforcement Officials

The DoD and DoJ are developing statutorily mandated regulations for DoD to support the DoJ during emergency situations involving NBC weapons. These regulations are based upon draft interagency guidelines implementing PDD–39 as well as agreed upon DoJ-DoD procedures used for the 1996 Summer Olympics and Presidential Inaugural. These regulations would apply to those situations where technical assistance is requested by the Attorney General in emergencies involving biological weapons, chemical weapons, nuclear material, or nuclear byproduct material. The DoD and DoJ have developed a draft which should be completed, coordi-

nated, and approved this summer. The intent is to make these regulations an appendix to DoD Directive 3025.15, "Military Assistance to Civil Authorities," and then examine the best method to disseminate these regulations to appropriate Federal agencies.

5.2.9 Rapid Response Information System

The components required by section 1417, Title XIV, that form the Rapid Response Information System are covered below.

5.2.9.1 Master Inventory

The FEMA is currently compiling a master inventory which will contain information on physical equipment and assets owned by each of the FRP agencies that could be made available for use to aid state and local officials in emergency situations involving WMD. The master inventory will include assets associated with search and rescue, detection and analysis, personnel protection, medical treatment, monitoring and decontamination. The compilation of the master inventory is scheduled to be completed by December 31, 1997.

5.2.9.2 Database on Chemical and Biological Materials

The FEMA, with the support of DoD and other agencies, is preparing a database which will provide a source of information on chemical and biological agents, munitions characteristics and safety precautions for civilian use. DoD is supporting FEMA in the development of the database by providing technical expertise needed to prepare the database. Officials from DoD and FEMA are determining the design and specific information that will be included on the database. The initial design and compilation of the database will be completed not later than December 31, 1997, and updated annually thereafter.

6.0 Conclusions

This report reflects the programs that are ongoing or planned in order to improve the domestic preparedness in response to WMD incidents. Provided adequate Congressional funding in the outyears is available, DoD and the interagency community will continue to provide direct training to 120 cities over the next several years. DoD will continue to provide nationwide training and support to local, state and other Federal agencies to ensure that first responders as well as supporting agencies are prepared to react in the event of an emergency involving WMD.

ANNEX A: First Responders Performance Objectives to the Domestic Preparedness Program in the Defense Against Weapons of Mass Destruction

		Performance Requirements Legend for requirements: o—basic level •—advanced level *—specialized				
		Awareness				
Competency Level	Ref	Employees	Responders	Operations	Technician/ Specialist	Incident Command
Examples		Facility workers, hospital support personnel, janitors, security guards	Initial firefighters, police officers, HAZMAT personnel on scene: 911 operators/ dispatchers	Incidents response teams, EMS basic	Incident response team specialists, technicians, EMS advanced, and medical specialsts	Incident commanders.
1. Know the potential for terrorist use of NBC weapons:	C,F,M,m,G					
—what nuclear/biological/ chemical (NBC) weapons substances are,		o	•	•	•	•
—their hazards, and risks associated with them,		o	•	•	*	•
—likely locations for their use,		o	•	•	•	•
—the potential outcomes of their use by terrorists.		o	•	•	•	•
—indicators of possible criminal or terrorist activity involving such agents,			•	•	•	•
—behavior of NBC agents				•	*	•

ANNEX A: First Responders Performance Objectives to the Domestic Preparedness Program in the Defense Against Weapons of Mass Destruction—Continued

Competency Level	Ref	Performance Requirements Legend for requirements: o—basic level •—advanced level *—specialized Awareness				
		Employees	Responders	Operations	Technician/ Specialist	Incident Command
2. Know the indicators, signs and symptoms for exposure to NBC agents, and identify the agents from signs and symptoms, if possible.	C, F,M,m	o	•	•	*	•
2a. Knowledge of questions to ask caller to elicit critical information regarding an NBC incident.	G,m		• (911 only)			
2b. Recognize unusual trends which may indicate an NBC incident	G,m		•	•	*	•
3. Understand relevant NBC response plans and SOPs and your role in them.	C,F,M,m	o	•	•	•	•
4. Recognize and communicate the need for additional resources during a NBC incident.	C,m,G	o	•	•	•	•
5. Make proper notification and communicate the NBC hazard.	C,F,M,m	o	•	•	•	•
6. Understand: —NBC agent terms	C,F,m	o	•	•	•	•

—NBC toxicology terms				• (EMS-B only)	•	•
7. Individual protection at a NBC incident:	C,F,M,m					
—Use self-protection measures		o	•	•	*	•
—Properly use assigned NBC protective equipment				•	*	•
—Select and use proper protective equipment						
8. Know protective measures, and how to initiate actions to protect other and safeguard property in an NBC incident.	F,M	o	•	•	•	•
8a. Know measures for evacuation of personnel in a downwind hazare area for an NBC incident.	M,G		•	•		•
9. CB decontamination procedures for self, victims, site/equipment and mass casualties:	C,F,M,m					
—Understand & implement		o (self)	•	•	*	•
—Determine						
10. Know crime scene and evidence preservation at an NBC incident.	F,M,m	o	• (except 911)	•	•	•
10a. Know procedures and safety precautions for collecting legal evidence at an NBC incident.	F,G,m		•	•	*	•

d. The Protection of U.S. Forces Deployed Abroad: Report to the President from the Secretary of Defense, September 15, 1996 [1]

The attack on U.S. forces at Khobar Towers has dramatically underscored that for U.S. forces deployed overseas, terrorism is a fact of life. Every terrorist attack provides lessons on how to prevent further tragedies. However, the Khobar Towers attack should be seen as a watershed event pointing the way to a radically new mind-set and dramatic changes in the way we protect our forces deployed overseas from this growing threat. This report reviews the Khobar Towers attack, the context of our Persian Gulf force deployments, the force protection measures taken before and after the attack, and lessons learned for all of our military operations.

THE ATTACK AGAINST KHOBAR TOWERS ON JUNE 25TH

Khobar Towers is a compound built by the Saudi Government near Dhahran that housed the residential quarters of almost 3,000 U. S. military personnel of the 4404th Air Wing (Provisional), along with military personnel from the United Kingdom, France, and Saudi Arabia. U.S. military personnel first occupied this compound in 1991 during the Coalition force buildup before the Gulf War.

Shortly before 10:00 p.m. local time on Tuesday, June 25, 1996, a fuel truck parked next to the northern perimeter fence at the Khobar Towers complex. Air Force guards posted on top of the closest building, Building 131, immediately spotted the truck and suspected a bomb as its drivers fled the scene in a nearby car. The guards began to evacuate the building, but were unable to complete this task before a tremendous explosion occurred. The blast completely destroyed the northern face of the building, blew out windows from surrounding buildings, and was heard for miles. Nineteen American service members were killed and hundreds more were seriously injured. Many Saudis and other nationals were also injured.

The response of our forces at Khobar Towers to this tragedy reflected their thorough training and bravery. The buddy system worked, and every injured airman received on-the-spot first aid before being escorted to the clinics. Medical teams, both military and civilian, American and Saudi Arabian, performed commendably without rest for many hours and, in some cases, despite their own wounds.

Once the immediate steps were taken to care for the injured, search for survivors, and account for everyone, the command of the 4404th Air Wing began to reconstitute itself to carry out its Southern Watch mission. In less than three days, the skies over southern Iraq once again were being patrolled by the Coalition in full force.

The June 25 bombing attack remains under investigation by the Saudi Arabian Government, assisted by large numbers of forensic experts from the U.S. Federal Bureau of Investigation, which has

[1] Source: http://www.defenselink.mil/pubs/downing__rpt/report__f.html.

responsibility within the U. S. government for investigating terrorist attacks against Americans overseas. The Department of Defense (DoD) knows neither who the perpetrators of this attack are, nor who sponsored them.

WHY ARE WE IN THE PERSIAN GULF?

The attack on Khobar Towers has raised questions about the need for our presence in the Arabian Gulf Region, and Saudi Arabia in particular.

Our security interests in Saudi Arabia date back to 1945 when President Franklin Roosevelt met with King Abdul Aziz on his way home from the Yalta Conference. The United States has had a military presence in Saudi Arabia since the early 1950s. During most of this time, our presence has been well under 1,000 uniformed personnel and civilian employees, in addition to their families, engaged in training and advising the Saudi Arabian military. The United States Military Training Mission to Saudi Arabia (USMTM) was established in 1953 to assist the regular Saudi military under the Ministry of Defense and Aviation. In 1965 a U.S. Army program manager's office (OPM/SANG) was established to help in the modernization of the Saudi Arabian National Guard.

Our presence in helping the Saudis modernize their military and absorb new equipment was welcomed and unobtrusive. The Kingdom was a benign environment in which tens of thousands of American civilians lived and worked, particularly since the oil boom of the 1970s. Since 1977, our military assistance, including the salaries and expenses of our uniformed personnel and civilian employees, has been fully funded by the Saudi Arabian Government.

Saudi Arabia has never hosted foreign military bases of any nation. While Saudi Arabia and its Gulf neighbors generally welcomed an American military presence in the region after Great Britain ended its security responsibilities east of Suez in the early 1970s, they preferred that presence to be "over the horizon." For the United States, this presence was manifested primarily by our naval Middle East Force in the Arabian Gulf. While the United States made use of the Saudi air base at Dhahran in the early years of the Cold War, U.S. combatant forces were rarely deployed to the Kingdom. The major exception before the Gulf War was during the Iran-Iraq war in the 1980s when American AWACs and tanker aircraft were deployed to Riyadh.

The Iraqi invasion of Kuwait on August 2, 1990, dramatically changed the security dynamics, and the U.S. presence, in the region. The United States, acting to protect its vital interests, led a coalition of Western and Islamic forces that deployed over half a million men and women to the Gulf to defend Saudi Arabia and the smaller Gulf states and to free Kuwait from Iraq's brutal occupation. Through Operations Desert Shield and Desert Storm they won an impressive victory, although the threats to the region from aggressor states were not completely destroyed.

The primary American interest that we acted decisively to protect in the Gulf War was access to the vast energy resources of the region, i.e., nearly two-third of the world's proven oil reserves upon which our own economy and those of the entire industrial world de-

pend so heavily. This fact alone would have justified our actions in 1990–1991, but America also has other vital interests in the region. The security of Israel and Egypt and the Gulf states themselves was endangered by Iraq's aggression and desire to dominate the politics of the region. Coupled with the end of the Cold War, the Coalition victory allowed the United States to move forward on the Middle East peace process in a manner not previously possible. America also has vital interests in protecting U.S. citizens and property abroad, and in ensuring freedom of navigation through the air and sea lanes that connect Europe and the West with Africa, Asia, and the Indian Ocean, all of which pass through and alongside the Arabian Peninsula.

THE NATURE OF OUR CURRENT MISSION

When President Bush sought King Fahd's permission to deploy American forces to Saudi Arabia in 1990 for the build-up to Desert Shield/Desert Storm, he made a commitment that we would depart when our wartime mission was concluded. The United States sought no permanent bases or operational presence on the Arabian Peninsula, and that continues to be our policy.

However, the threat to U.S. vital interests in the region from Saddam Hussein's regime did not end with Desert Storm. While the Desert Storm coalition ejected the Iraqi army from Kuwait in 1991, the goal of the Coalition was not to dismember Iraq or advance to Baghdad to change the regime. Saddam Hussein has remained in power in Baghdad and continues to ignore or obstruct the U.N. Security Council resolutions that defined the terms of the cease-fire, particularly the requirement to disclose and destroy all weapons of mass destruction (WMD), nuclear, chemical, and biological, and their long-range means of delivery. Consequently, at the invitation of the Gulf countries, a coalition of forces, primarily from the United States, Great Britain and France, has remained in the region to enforce the U.N. Resolutions. These forces include the 4404th Air Wing, the unit that occupied the Khobar Towers facility.

In the years since the Gulf War, Saddam Hussein's regime has undertaken overt acts threatening peace in the region. In 1992, in response to Iraqi repression of the Shia, the Coalition created Operation Southern Watch. In 1993, the Iraqi regime plotted to assassinate former President George Bush during a visit to Kuwait. In response, the United States launched cruise missile strikes against the Iraqi intelligence headquarters. In 1994, the Iraqi regime again moved forces toward the Kuwaiti border with an intent to launch another invasion. U.S. forces responded with a rapid buildup, using host nation bases, including those in Saudi Arabia, and the Iraqis turned back. The U.N. subsequently passed UNSCR 949, which limits Iraq's right to deploy military forces in Southern Iraq—the area defined by the Coalition as south of 32 degrees North. In August 1996, Saddam Hussein, again in violation of U.N. resolutions, attacked without provocation the Kurdish city of Irbil. He then declared the two No Fly Zones, established in the terms of the cease-fire and after Saddam's repression of the Kurds, null and void. The United States and the United Kingdom extended the southern No

Fly Zone to 33 degrees parallel and launched a series of missile attacks against Iraqi air defenses.

We have been able to respond to Iraq's continued provocations and threats to the peace and stability of its neighbors because the United States, together with its coalition partners, France and the United Kingdom, has maintained a strong military presence on the Arabian Peninsula, principally Saudi Arabia, since the end of Operation Desert Storm. Our forward presence not only allows us to respond quickly, but to monitor Iraq's compliance with U.N. Security Council resolutions, with respect to both repression of the Kurds and direct military threats to the Gulf states. This forward presence includes:

Nearly 5,000 U.S. Air Force men and women in Operation Southern Watch who conduct combat air missions from Saudi Arabia and Kuwait, enforcing the No Fly Zone over southern Iraq that restricts Saddam Hussein's ability to oppress his people and threaten the peace and stability of the region.

U.S. servicemen and women who support the work of the United Nations Special Commission (UNSCOM) charged with discovering and destroying Saddam's programs to develop and produce weapons of mass destruction, efforts which Iraq continues to oppose. This effort includes U–2 surveillance missions over Iraq to assist with UNSCOM's monitoring responsibilities.

U.S. Army PATRIOT air defense batteries that have been deployed to protect our forces and major Saudi population centers at Dhahran and Riyadh since 1991 and regular rotations of battalion-sized armor units that exercise in Kuwait.

The U.S. Navy Middle East Force that has been greatly expanded from a few surface combatant ships to include the presence of an Aircraft Carrier Battle Group and a Marine Amphibious Ready Group throughout most of the year.

Robust military exercise programs with every Gulf state, unheard of before Desert Storm, that contribute to the operational readiness of all our military forces and help deter Iraq as well as Iran, which also has hegemonic ambitions coupled with a military modernization program that is out of all proportion to its defensive needs.

Prepositioned equipment—a full brigade's worth in Kuwait, another two brigades' worth afloat, and we are building up to a fourth brigade's worth in Qatar. This equipment allows us to insert a substantial deterrent force onto the Arabian Peninsula in a fraction of the time that it took us in 1990.

Maintaining the U.S. military presence in the Arabian Gulf has not been easy for our uniformed personnel who have served repeated tours of duty in a harsh environment. It places a serious strain on ships, aircraft, and other equipment operating at high tempo. While the cost of our presence has been greatly eased through generous Host Nation Support contributions from Saudi Arabia, Kuwait and the other Gulf countries, the monetary cost to the United States remains high. But this residual cost and the other sacrifices associated with our presence, are justified because they protect vital U.S. national interests at stake in the region.

Our experience clearly shows that an immediate and forceful response to Saddam Hussein's provocative actions has been effective in causing his regime to back off from threatening moves each time it has been foolish enough to try them. It is far more cost-effective to be in a position to deter Saddam Hussein than have to fight another war.

In addition, should deterrence fail, we are, without question, in a better position to defeat aggression than we were in the Summer of 1990, prior to Desert Shield. Then, it took more than four weeks to place meaningful combat power ashore. Today, we can do so in four to five days, using the combination of forward presence and measures that we have taken to improve our ability to deploy rapidly. We demonstrated this potential in October 1994 with great success, and we continue to exercise with the equipment for both training and deterrent purposes.

TERRORIST ATTACKS

The terrorist attacks on the OPM/SANG in Riyadh last November and on Khobar Towers in Dhahran last June were not only attacks on American citizens and forces, they were also an assault on our security strategy in the region.

Our military presence in the region is opposed by Iran and Iraq, obviously, but also by home-grown dissidents in some countries of the region. The opposition includes extremist groups who are not only coldblooded and fanatical, but also clever. They know that they cannot defeat us militarily, but they may believe they can defeat us politically, and they have chosen terror as the weapon to try to achieve this. They estimate that if they can cause enough casualties or threat of casualties to our forces, they can weaken support in the United States for our presence in the region, or weaken support in the host nations for a continued U.S. presence. They seek to drive a wedge between the U.S. security strategy in the Gulf and the American public, and between the United States and our regional allies.

Before the terrorist attacks, Saudi Arabia had long been seen as an oasis of calm and safety in the turbulent Middle East. Americans, both military and civilians alike, felt secure and generally welcome, albeit within a very different and restrictive culture compared to the United States or in Western Europe and elsewhere our forces were stationed overseas. Our approach to security matters in the Kingdom reflected this attitude, which was the reality until recent years. We lived and worked in urban environments and considered them on a par with Europe or Japan. While U.S. military security practices around the world were tightened following the Beirut bombings in 1983, we felt little danger in Saudi Arabia. Our presence in Saudi Arabia after the Gulf War had been requested and agreed to by the Saudi Government. Indeed, our presence contributed significantly to our host's defense.

The location of a large number of our personnel and our major combat air operations in the Dhahran region reflected this sense of well-being. The air facilities were excellent and the Saudi Government provided good quality residences and office facilities in the nearby Khobar Towers complex. That complex had been built by the Saudi Government and was offered to the U.S. military for use

during the Gulf War. It continued to be used by U.S. military personnel after Operation Southern Watch began.

The depth of feeling among strongly conservative Saudi elements that opposed inviting Western forces to the Kingdom in 1990 and remained opposed to our continued presence was slow to emerge clearly. There was evidence of anti-regime activity and a rise in anonymous threats against American interests, especially following the additional troop deployment in October 1994. Resentment over the costs of the Gulf War and the continued high costs of military modernization, and discontent over strains in the social fabric of the Kingdom, even from normally pro-Western Saudis, were recognized but not considered a threat to American military security. Since our personnel worked on Saudi military installations and lived in guarded compounds, any risks were seen as manageable by maintaining a low profile and following standard personal security practices. Force protection was actively pursued, but in the context of a stable and secure environment.

Following the November OPM/SANG bombing, that environment was re-evaluated, the threat level assessment was raised to "High" and extensive improvements were made in all our Arabian Gulf region facilities. In addition, we received a number of intelligence indications that new attacks were being contemplated against American forces and that Khobar Towers could be a target. What these indications lacked was warning of the specific kind of attack that occurred. However, they caused our commanders to put in place a wide variety of new security measures. At Khobar Towers alone, over 130 separate force protection enhancements were undertaken—barriers were raised and moved out, fences strengthened, entrances restricted, guard forces increased. The enhancements were aimed at a variety of potential threats, ranging from bombs to attempts to poison food and water supplies. The enhancements may well have saved hundreds of lives by preventing penetration by bombers into the center of the compound. The approach, however, was one of enhancing security of existing facilities despite their overall limitations, and this proved insufficient to protect our forces.

The climate of calm and safety in Saudi Arabia vanished with the November 1995 bombing of the OPM/SANG office in Riyadh and the highly sophisticated attack on Khobar Towers, which used a bomb now estimated at more than 20,000 pounds. It became clear that we needed to radically re-think the issue of force protection in the region, and that our conclusions from this effort would carry implications for the protection of our forces around the world.

Response to the Khobar Towers Bombing: Relocate, Restructure and Refocus

Immediately following the Khobar Towers bombing attack, we undertook a fundamental re-evaluation of our force posture in the Arabian Gulf region. The guiding principles were: (1) We would continue to perform our missions; (2) Force protection would be a major consideration; and (3) Other tradeoffs could be made. Essentially, we looked at the mission tasks as if we were planning the operation from scratch within a very high threat environment. Consequently, we came to the conclusion that a far different force pos-

ture was appropriate. After extensive discussions with the senior Saudi leadership, I ordered a major realignment of our force posture in Saudi Arabia, an effort known as Operation Desert Focus. This new posture will greatly enhance force protection, while still permitting us to accomplish our missions. The effort, which is nearing completion, is two-pronged.

First, with the full cooperation and support of the Saudi Arabian Government, we began immediately to relocate our deployed air forces (the 4404th Air Wing) from the Saudi air bases located in urban concentrations at Riyadh and Dhahran to an isolated location at the uncompleted Prince Sultan Air Base near Al Kharj, where many Coalition forces were located during the Gulf War. While our personnel will be living in tents initially, we will be able to construct very effective defenses against terrorist attacks. This relocation effort, which will require over 1,400 truck loads to accomplish, is well underway. More than 500 tents, most of them air-conditioned, have been erected to house more than 4,000troops and provide dining and recreation facilities, communications sites, and maintenance and operations facilities. The refueling tankers and reconnaissance aircraft from Riyadh were the first to arrive last month, and the move of the fighters and other aircraft from Dhahran is almost complete. More than 2,000 additional military personnel were deployed to Saudi Arabia temporarily to assist in this effort to provide security for the moves, erect facilities, and provide services at the base until permanent arrangements are in place. The Saudi Arabian Government has assumed responsibility for constructing permanent facilities. The isolated location and large size of the Prince Sultan Air Base allows for extensive perimeters and avoids intense concentrations of troops.

Some of the units in Saudi Arabia cannot be relocated without degrading their effectiveness. Our USMTM and OPM/SANG security assistance personnel who train and advise the Saudi military must be in close proximity to their Saudi counterparts in the capital and at various bases. Our PATRIOT missile battery crews must be located near the urban areas and air bases that they defend. While these units must continue to work where they are now, we are taking steps to improve their security by consolidating them and moving them to more secure housing areas, providing more guards and barriers, and taking other steps to enhance their protection and lessen the impact of any future attacks.

Second, the Department has re-examined its personnel assignment policies for Saudi Arabia. While the majority of the operational forces with the 4404th Air Wing are on temporary duty and deploy on rotational assignments for up to 179 days at a time before returning to their home bases, many of the DoD personnel permanently assigned to Saudi Arabia with OPM/SANG and USMTM are on multi-year tours accompanied by their family members. At the time of the Khobar Towers bombing, we sponsored nearly 800 military dependents in Saudi Arabia alone. This no longer seems prudent.

At my request, the Department of State implemented an "authorized departure" of all U.S. Government dependents from Saudi Arabia in July 1996, which provides monetary entitlements to any families who wish to leave. In addition, DoD has withdrawn com-

mand sponsorship for dependents of most permanently assigned military members, which had the practical effect of an orderly, mandatory return. Nearly 300 dependents arrived by charter aircraft in Charleston, South Carolina, on August 18. While families are disrupted and some are undoubtedly displeased by this change in policy, I believe it was the correct choice. Military members understand personal risk and accept it by the nature of their profession. That is not true of their dependents, especially children, and we cannot allow them to remain in harm's way.

In the future, nearly all permanent assignments in Saudi Arabia will be one-year unaccompanied tours. There are some assignments where the nature of the job requires longer tours for continuity and familiarization with the host government, and we have identified 59 billets that will be permitted to be accompanied by dependents. School-aged children will not be allowed under any circumstance under current conditions.

OTHER REGIONAL AND WORLDWIDE INITIATIVES

We also looked beyond Saudi Arabia, first to the other countries on the Arabian Peninsula where we have DoD personnel, both combatants and noncombatants alike. In Kuwait, we will move exposed Air Force personnel onto the Ali Al Salem Air Base where they will live temporarily in tents, as at Prince Sultan Air Base at Al Kharj in Saudi Arabia. In the United Arab Emirates (UAE), we have completed moving our Air Force personnel from an urban hotel onto a UAE air base where they will also live in temporary facilities. In both cases we have received strong support from the host countries.

The situation in each country in the Gulf is different in terms of dependent numbers, threat, and security exposure. We decided to reduce the number of family members in Kuwait through a program of accelerated attrition. In the future, there will be only about 30 billets designated for accompanied tours. In Bahrain we are looking at reducing our numbers through gradual attrition matching the normal rotation cycles of personnel. We have decided to leave the dependent status as is in the UAE, Qatar, Oman, and Yemen, affecting approximately 65 family members.

After the Khobar Towers bombing, I also undertook a process to examine more closely the adequacy of our force protection measures for our troops around the world. On July 17 I sent a message directing all Commanders-in-Chief (CINCs) to look at force protection in their areas of responsibility and report back to me by August 1 on how best to deal with the rapidly escalating threat to U.S. forces. I urged them to be innovative in their approaches to dealing with the terrorist problem. As a minimum, I asked that they answer the following questions:

- Should our troops remain in all present locations?
- Should they be moved from urban areas?
- Is an adjustment required in dependent status?
- How much should force protection interfere with the mission?
- Is intelligence focused to deal with the terrorist threat?
- How can we work more effectively with host nations on force protection measures?

I have incorporated many of the recommendations and ideas from the CINCs in the force protection initiative the Department is undertaking. Each of the CINCs responded personally with detailed suggestions of additional force protection improvements that could be undertaken without compromising the mission. The CINCs suggestions fell into the following key categories:

- Establish location of forces as a critical factor in force protection considerations. Cross check with dependent security assessment.
- Tailor anti-terrorism training to increase situational awareness of deploying personnel.
- Provide more focused anti-terrorism intelligence to field units.
- Improve interchange with host nations on intelligence and security matters.

I have incorporated many of the recommendations and ideas in the force protection initiative the Department is undertaking. Terrorists will always search out and strike at the weakest link in our chain of defenses. Our goal is to find and strengthen those weak spots and we are doing just that.

FORCE PROTECTION VS. MISSION

The relocation of our forces in Saudi Arabia and the change in personnel assignment policies are just two examples of the need to rethink fundamentally our approach to force protection around the world. Prior to the Khobar Towers bombing, our force protection measures focused on incremental fixes to existing arrangements, rather than consideration of radical changes in force posture. Incremental fixes in force protection can always be trumped by attacks of greater magnitude.

To stay ahead of the threat, we now see that we must always put force protection up front as a major consideration with key other mission goals as we plan operations, and that that parity must be maintained throughout the operation. Changes in threat level must trigger fundamental reconsiderations of force protection and cause commanders to reexamine this issue as if they were designing a new mission. Moreover, commanders must be empowered to do this.

The task of protecting our forces would be easy if we were willing to abandon or compromise our missions, but that is not an option. We have global interests and global responsibilities. Those require our forces to be deployed overseas to protect our national security interests. And our troops cannot successfully complete their tasks if they are required to live in bunkers 24 hours a day.

How then can we accomplish our missions without compromising their success or abandoning them altogether? The answer is that we will require tradeoffs in other areas, such as cost, convenience, and quality of life. This is a tough answer for our men and women in uniform who will live in less comfortable surroundings and spend more time avoiding and defending against terrorism, and it is a tough answer for them and their families, who must experience the loneliness of unaccompanied tours. We will have to compensate for these changes and greater hardships in order to continue to maintain the superb quality force we have today.

Putting force protection up front as a major consideration along with other mission objectives around the world will require a fundamental change in the mind-set with which we plan and carry out operations. It also requires structural changes in the Department. Many of the initial actions we are taking are directed only in part at the Southwest Asia theater. They all have global implications.

COMMISSIONING OF DOWNING ASSESSMENT

On June 28, three days after the Khobar Towers bombing, I issued a charter for an assessment of the facts and circumstances surrounding the tragedy and appointed General Wayne A. Downing, United States Army (Retired), to head the assessment effort. I asked General Downing to give me a fast, unvarnished and independent look at what happened there and offer ideas on how we can try to prevent such a tragedy in the future. The final report was delivered to me on August 30.

General Downing has given me that unvarnished and independent review of the Khobar Towers bombing and a tough critique of past practices and attitudes. His report confirms my belief that we must make a fundamental change in our mind-set. On the whole, I accept General Downing's recommendations and I believe we can take effective action to deal with each of the problems identified in his comprehensive report. His conclusions have by and large validated the initiatives we have already launched, and many of his recommendations already have been implemented through the changes we have made. Where his recommendations have identified additional changes that should be considered, we have a process underway either to implement them or to put them on a fast track to decision. General Downing's report is an important contribution to changing our entire approach to force protection and provides evidence of the need for changes in the way we do business.

Annex (B) contains a detailed response to each recommendation included in the Downing report. We have taken the following actions in response to the principal recommendations regarding force protection in the report.

ISSUE DOD-WIDE STANDARDS FOR PROVIDING FORCE PROTECTION

DoD has maintained a variety of directives and standards related to force protection. These documents have been of great use to organizations and have served us well. However, as General Downing has indicated, the diversity of these documents, and their "advisory" rather than "directive" nature, may have caused confusion. In my judgment, this is largely a result of the continuing transition the Department is making under Goldwater-Nichols to joint operations under combatant commands. To correct this situation, I have revised and am reissuing this day DoD Directive 2000.12, "DoD Combating Terrorism Program." This new directive requires that the approaches previously set forth as suggestions in DoD Handbook O–2000.12-H be implemented as the DoD standard. In applying this standard, commanders and managers must take account of the mission, the threat, and specific circumstances. The new direc-

tive also implements other new initiatives I have identified elsewhere in this report.

GIVE LOCAL COMMANDERS OPERATIONAL CONTROL WITH REGARD TO FORCE PROTECTION MATTERS.

Under the traditional peacetime command and control arrangements, force protection is the responsibility of the CINC, through the service component commanders, to the local commanders in the field. In the U.S. Central Command (CENTCOM), whose area of responsibility includes Saudi Arabia, the service component commanders exercised operational control of deployed forces from their headquarters, including for force protection. But the Commander, Joint Task Force Southwest Asia (CJTF-SWA) exercised tactical control over forces in theater that are operating specific missions in support of Operation Southern Watch. Thus force protection responsibilities and tactical control were not in the same hands.

Following the attack on OPM/SANG in Riyadh last November, the Commander-in-Chief, U.S. Central Command (CINCCENT) gave additional responsibilities to the Commander, JTF-SWA, for coordination of force protection in the Kingdom of Saudi Arabia. Following the subsequent attack on Khobar Towers in June, CINCCENT has directed the Commander, CJTF-SWA, to assume full responsibility for force protection of all combatant forces deployed in support of Operation Southern Watch. With respect to force protection, CJTF-SWA now has authority and responsibility to establish policy, and directive authority to implement and enforce the CINCCENT force protection policies and directives. Tactical control and force protection are now in the same hands. Service component commanders continue to maintain operational control of combatant forces deployed in support of JTF-SWA. CENTCOM will also investigate the feasibility and advisability of establishing a CENTCOM forward headquarters that could assume responsibilities for all forces on the Arabian Peninsula. I have also directed all CINCs to review and make recommendations on similar command structure changes for force protection in their areas of responsibility.

The DoD directive I have issued establishing DoD-wide standards for providing force protection now requires that each CINC review the command arrangements for every Joint Task Force when it is established and periodically thereafter with regard to force protection responsibilities. The directive also requires that the CINCs report to me any decisions to vest operational control for force protection matters outside a Joint Task Force Commander and to detail the reasons why this decision has been made.

DESIGNATE THE CHAIRMAN OF THE JOINT CHIEFS OF STAFF AS THE PRINCIPAL ADVISOR AND THE SINGLE DOD-WIDE FOCAL POINT FOR FORCE PROTECTION ACTIVITIES. GENERAL DOWNING'S REPORT CORRECTLY RECOGNIZES THE NEED FOR A STRONGER CENTRALIZED APPROACH TO FORCE PROTECTION WITHIN DOD. THERE INDEED SHOULD BE A SINGLE INDIVIDUAL DESIGNATED AS RESPONSIBLE FOR ENSURING THAT OUR POLICIES WILL RESULT IN ADEQUATE FORCE PROTECTION MEASURES BEING TAKEN AND FOR AUDITING THE PERFORMANCE OF OUR UNITS.

Because force protection measures must be carried out by our uniformed military organizations, I have therefore designated the Chairman of the Joint Chiefs of Staff as the principal advisor and the single DoD-wide focal point for force protection activities. He will review and coordinate these activities in the context of broader national security policy matters with the Under Secretary of Defense for Policy. The Chairman will establish an appropriate force protection element within the Joint Staff to perform this function.

As the primary, high-level advocate for force protection, the Chairman will help ensure that this requirement is placed as a major consideration along with other mission goals as we plan military operations, and that focus on force protection is maintained throughout the operation. The Chairman will also ensure that adequate force protection is a top priority for every commander at every level within our military organization, and that commanders will be empowered to ensure that force protection measures respond to the unique situation on the ground. As the key military advisor to the President and the Secretary of Defense, the Chairman can also ensure that force protection receives a high priority in budgetary allocations. And as the representative of the joint forces, the Chairman is also in the position to ensure a joint and uniform approach to force protection throughout the Service components.

The instructions carrying out this recommendation are included in DoD Directive 2000.12 being issued today.

MOVE FORCE PROTECTION RESPONSIBILITIES FROM THE DEPARTMENT OF STATE TO THE DEPARTMENT OF DEFENSE WHERE POSSIBLE.

In some cases, the Department of State, rather than the Department of Defense, is responsible for the security of military forces overseas, including force protection. This division of responsibilities can result in different standards of force protection, as highlighted by the bombing of the OPM/SANG in Riyadh, in November 1995.

Immediately following that event, I directed that the Chairman create a DoD Anti-Terrorism Task Force to assess DoD anti-terrorism worldwide and to provide a report with recommendations to improve anti-terrorism readiness. The Task Force highlighted the bifurcated responsibilities for security of DoD personnel. In particular, combatant forces were under the authority of the CINCCENT, but U.S. military personnel assigned to OPM/SANG and USMTM were under the control of the U.S. Ambassador for security matters. The final report and recommendations, completed just days before the bombing of Khobar Towers, called for a clari-

fication of the division of responsibilities, including consideration of changes to the President's Letter to Chiefs of Mission.

Because the Department of State was responsible for security at OPM/SANG, the Secretary of State, in accordance with the law, created an Accountability Review Board to review the security procedures in effect at the time of the bombing. The Board's report also highlighted the bifurcation of responsibilities and noted it caused a confusion and a lack of clear guidance as to security responsibilities.

In light of that report, and the subsequent attack on Khobar Towers (a facility under the security cognizance of the regional CINC) DoD has, working closely with the Department of State, undertaken to realign security responsibilities on the Saudi Arabian Peninsula.

The Secretary of State and I have agreed that he should delegate force protection responsibility and authority to me for all DoD activities within the Arabian Peninsula that are not already assigned to, or otherwise under the command of, the CINCCENT. I will, in turn, delegate this responsibility to the CINCCENT. The only DoD elements that will remain under the security responsibility of the Chief of Mission will be the integral elements of the country team (i.e. the Defense Attach@ Office, the USMC Security Detachment, and the Security Assistance Offices that are located within or in close proximity to their respective U. S. Embassies, in Qatar, the UAE, Bahrain and Oman), those sensitive intelligence and counterintelligence activities that are conducted under the direction and control of the Chief of Mission/Chief of Station, and any DoD personnel detailed to other U.S. Government agencies or departments.

As force protection and anti-terrorism requirements are addressed in more detail by the other regional CINCs, similar realignments of force protection responsibility may need to be worked out with the Secretary of State.

This arrangement balances the requirement for protecting DoD forces with the overall mission of the U.S. Government overseas. The Ambassador must be in charge of all activities that have a direct impact on the conduct of our nation's foreign policy. However, in those high threat instances where the number of DoD forces in country assigned to the embassy exceeds the country team's ability to provide for their security, the regional CINC will be charged with ensuring their safety from terrorist attack.

IMPROVE THE USE OF AVAILABLE INTELLIGENCE AND INTELLIGENCE COLLECTION CAPABILITIES.

Passive protective measures are always important, but the real key to better, more effective force protection against terrorism is to take active measures against the terrorists. This brings me to another major action we are taking in Saudi Arabia—improving our intelligence capabilities. We do not want to simply sit and wait for terrorists to act. We want to seek them out, find them, identify them, and do what we can to disrupt or preempt any planned operation. The key to this is better intelligence.

In Saudi Arabia, the U.S. intelligence community was providing 24-hour a day coverage of terrorist and terrorist related activity. All of the available intelligence was widely distributed in theater.

This intelligence support for force protection was very good in some areas, sufficient in others, and lacking in at least one key area—that of providing tactical warning of impending attack.

There was a strong relationship between intelligence threat reporting and the theater security posture. The physical and personnel security enhancements that were in place at the time of the bombing were based on vulnerability analysis that came from general intelligence threat reporting. The linkage between intelligence reporting and the operational commander's action is critically important whether it involves intelligence threat information feeding physical security improvements or supporting target selection for precision weapons. In the case of the threat to U.S. forces in Saudi Arabia, the available intelligence clearly formed the basis for security planning and procedures. Intelligence reports drove the extensive security enhancements that were completed prior to the attack. We must not lose sight of the fact that U.S. forces in Saudi Arabia acted on the general threat intelligence available prior to the bombing and that information saved lives and injuries. We had intelligence and we acted on it, but we lacked the specificity necessary that would have made the critical difference in this incident. What was missing was the hard tactical warning of impending attack—the information we needed to thwart the operation before it reached fruition.

There is no doubt that we can always have better and more precise intelligence and we are continuously striving for that level of detail. I am reviewing the Department's ability to meet this long-term requirement and I have the active assistance of the Director of Central Intelligence in reviewing intelligence policies and capabilities to acquire better tactical threat information from all intelligence assets.

I am also taking steps to address General Downing's specific recommendations that we look at both how we make intelligence available and how we use it at small unit levels. I will work with CENTCOM and the Military Departments to implement those recommendations.

The goal is not only to have better intelligence collection, but to be better able to use it. We need to sort out the real and useful intelligence from the misinformation and disinformation that is also collected. One key to improved analysis at the Washington level is the Counter Terrorist Center, which is now receiving higher priority in the face of the higher threat. But even with improved analysis in Washington, we still have to make this intelligence available in a timely way to the forces threatened, and to combine national intelligence with the local intelligence being collected. Among the steps we are taking to improve intelligence in the Gulf region is augmentation of the Southern Watch fusion cell with counter-terrorism analysts. We developed the model for intelligence fusion cells in Bosnia. We are replicating this model now not only in the Gulf region, but around the world wherever our forces are deployed. A fusion cell combines, in a timely way, national strategic intelligence, which we gather around the world, with local or tactical intelligence. That allows us to quickly "fuse" together the global picture and the regional picture to help us see patterns, keep information from falling through the cracks, and to focus U.S. and

our allies' intelligence services on the same pieces of information at the same time. Equally important, it emphasizes the timely delivery of useful information to the tactical commander. We also are leveraging technology to build the tools we need to manage information better over the long term.

General Downing rightly identified that we must commit ourselves to sustained in-depth, long-term analysis of trends, intentions, and capabilities of terrorists. This is a systemic issue, not just in terrorism analysis, that we must address across the board in our intelligence analysis and reporting. In recognition of this systemic problem, the Department developed an initiative earlier this year for the intelligence community that will make a career-long investment in selective intelligence analysis to provide the skills and expertise the community needs to sustain proficiency against hard target problems.

ESTABLISH A WORKABLE DIVISION OF RESPONSIBILITIES ON FORCE PROTECTION MATTERS BETWEEN THE UNITED STATES AND HOST NATIONS.

General Downing correctly identified close and cooperative relationships with the host government as a key component of successful force protection programs in peacetime environments overseas. Without strong working relationships at all levels between U.S. and host nation officials, many force protection measures cannot be implemented.

Formal, structured relationships have their place and should be established where appropriate and possible. It is most important that those U.S. officials with responsibility for force protection, including all commanders responsible for activities in the field, work consciously to build personal relationships of trust and confidence with their foreign counterparts.

The Department is examining its personnel policies and practices to ensure that they support this important objective. For example, we are increasing tour length for additional key U.S. personnel in Saudi Arabia, including the commanders of the USAF Office of Special Investigations and Security Police allowing them to form deeper relationships with their counterparts.

RAISE THE FUNDING LEVEL AND PRIORITY FOR FORCE PROTECTION AND GET THE LATEST TECHNOLOGY INTO THE FIELD AND INTO THE DEPARTMENT OF DEFENSE.

Since force protection is an integral part of every military mission, the costs are dispersed among the various mission expenditures such as training, equipment, and operations and maintenance. As a consequence, force protection expenditures traditionally are not isolated and treated as separate budget items. Moreover, when we are faced with unique force protection requirements, we fund them on an ad hoc basis. For example, on August 9, after the Khobar Towers attack, Deputy Secretary White invoked the Food and Forage authority to pay for moving our forces in Saudi Arabia and improving security. And on August 23, I requested additional funding for FY 1996 and FY 1997 force protection and anti-terrorism requirements in Saudi Arabia and around the world.

However, with force protection now given a higher overall mission priority, we need to ensure force protection also is given a higher overall budget priority in the allocation of defense resources. To do so, we must be able to collect, consolidate and track our disparate expenditures for force protection, and measure our total expenditures against the requirements.

I have initiated a comprehensive review of future funding for force protection and I have designated force protection as a major issue for the FY 1998–2003 program review. All DoD components are scrubbing the latest budget estimates to ensure that no key projects related to force protection and anti-terrorism were omitted. Based on the responses received, the Program Review Group will assemble options to augment spending for force protection activities in the defense program. The Defense Resources Board is scheduled to review the proposals and make decision recommendations to me in October.

Based on these budget reviews, the standard procedures for preparation of the program budget will be amended to facilitate the review of force protection requirements in future budgets. First, the existing procedures will be used to emphasize the high priority I am placing on force protection and counter terrorism. The Joint Requirements Oversight Council will continue to evaluate force protection and provide recommendations to me. I will ask the CINCs to include force protection programs in the Integrated Priority Lists they submit to me. This process will insure that specific programs or program areas highlighted by the CINCs will be included in the Program Objective Memoranda prepared by the Services for the next defense program (FY 1999–2003). To enhance further this process, detailed program and budget displays will be required for all force protection and anti-terrorism programs to track funding patterns and to provide a solid basis for reviewing proposed force protection enhancements.

I have designated the Under Secretary of Defense for Acquisition and Technology as responsible for anti-terrorism technology development and asked him to expedite the adoption of new advanced technologies to meet force protection needs. This effort includes working with our allies, especially Israel and Great Britain, who have extensive experience in countering terrorism.

DETERMINE CULPABILITY OF INDIVIDUALS RESPONSIBLE FOR FORCE PROTECTION MATTERS IN THE CHAIN OF COMMAND.

On August 30, 1996, without prior review, I transmitted the Downing report to the Secretary of the Air Force for evaluation and appropriate action. Specifically, the Air Force was asked to examine issues raised in the report concerning how the Air Force organizes, trains, and equips in order to support forces deployed to combatant commands. Additionally, I deferred to Secretary Widnall on any issues regarding the adequacy of individual acts or omissions. In turn, the Secretary of the Air Force and Chief of Staff designated the Commander, 12th Air Force, as the disciplinary review authority and General Court-Martial Convening Authority regarding any actions or omissions by Air Force personnel associated with the Khobar Towers bombing. He is charged with reporting findings

and recommendations to the Secretary of the Air Force and Chief of Staff within 90 days.

Additionally, the Air Force is pursuing a top-to-bottom review of force protection policies that include procedures for physical security, training and equipment available for security police, intelligence support and personnel practices.

As we look at questions of accountability we also need to concentrate on learning lessons for the future. The U.S. military has a long, and admirable, record of self-examination and correction. That process must not be sacrificed. Nor must we lose sight of the fact that the bombing at Khobar Towers was not an accident. It was a heinous act of murder committed by persons as yet unknown.

SUMMARY AND CONCLUSIONS

We live in an era of great hope. Our hopes are nurtured by the emergence of democracies around the globe, by the growth of global trade relationships and by expansion of global communications.

Terrorism hangs over this bright future like a dark cloud, threatening our hope for a future of freedom, democracy and cooperation among all nations. It is the antithesis of everything America stands for. It is an enemy of the fundamental principles of human rights—freedom of movement, freedom of expression and freedom of religion. Perpetrators and sponsors of terrorist acts reject the rule of law and basic human decency. They seek to impose their will on others through acts of violence. Terrorism is a tool of states, a vehicle of expression for organizations and even a way of life for individuals. We can expect the terrorists to continue to seek out vulnerabilities and attack. Terrorists normally prey on the weak, but even militaries have vulnerabilities and present targets with high publicity value.

America has global interests and responsibilities. Our national security strategy for protecting those interests and carrying out those interests requires deployment of our forces to the far reaches of the globe. When terrorists aim their attacks at U.S. military forces overseas, they are attacking our ability to protect and defend our vital interests in the world. Our military presence in many areas provides the crucial underpinning that has made progress towards democracy and economic growth possible. We have the ability to project power far from our borders and influence events on a scale unmatched by any other country or organization. But as General Downing points out in his report, terrorism provides less capable nations, or even organizations, the means to project a particularly insidious form of power, even across borders, and contest U.S. influence.

But terrorists cannot win unless we let them. Sacrificing our strategic interests in response to terrorist acts is an unacceptable alternative. We cannot be a great power and live in a risk-free world. Therefore we must gird ourselves for a relentless struggle in which there will be many silent victories and some noisy defeats. There will be future terrorist acts attempted against U.S. military forces. Some will have tragic consequences. No force protection approach can be perfect, but the responsibility of leaders is to use our nation's resources, skills, and creativity to minimize them. We

must learn from the Khobar Towers tragedy, taking advantage of the U.S. military's tradition of strengthening itself out of adversity. The actions outlined in this report, the lessons articulated by General Downing and the ideas we have garnered from our military commanders around the world, will strengthen our defenses.

5. Department of Commerce

1999 Report on Foreign Policy Export Controls [1]

Partial text of the Bureau of Export Administration's Annual Report to Congress

FOREIGN POLICY EXPORT CONTROLS

1. INTRODUCTION

Export controls maintained for foreign policy purposes require annual extension according to the provisions of Section 6 of the Export Administration Act of 1979, as amended (the Act). Section 6(f) of the Act requires the Secretary of Commerce, through authority delegated by the President, to submit a report to Congress to extend the controls. Sections 6(b) and 6(f) of the Act require the report to include certain considerations [2] and determinations [3] on the criteria established in that section. This report complies with all the requirements set out in the Act for extending, amending or imposing foreign policy controls.

The Department of Commerce is acting under the authority conferred by Executive Order No. 12924 of August 19, 1994, and continued by notices of August 15, 1995, August 14, 1996, August 13, 1997 and August 13, 1998. Therein, the President, by reason of the expiration of the Act, invoked his authority, including authority under the International Emergency Economic Powers Act, to continue in effect the system of controls that had been maintained under the Act. Under a policy of conforming actions under the Executive Order to those under the Act, the Department of Commerce, insofar as appropriate, is following the provisions of Section 6 of the Act with regard to extending foreign policy controls.

With this report, the United States is extending all foreign policy controls in effect on December 31, 1998. The Department of Commerce is taking this action at the recommendation of the Secretary of State. As further provided by the Act, foreign policy controls remain in effect for replacement parts and for parts contained in goods subject to such controls. The controls administered in accordance with procedures established pursuant to Section 309(c) of the Nuclear Non-Proliferation Act of 1978 likewise remain in effect.

---

[1] Pursuant to sections 6(b) and 6(f) of the Export Administration Act of 1979, as amended (Public Law 96–72 [S. 737], 93 Stat. 503). The full text of this report can be found on the World Wide Web at *http://www.bxa.doc.gov/PRESS/99/Repts/ForeignPolicyTOC.html.*

[2] Section 6(b)(2) requires the Department to consider the criteria set forth in Section 6(b)(1) when extending controls in effect prior to July 12, 1985. In addition, the report must include the elements set forth in Sections 6(f)(2)(A) (purpose of the controls); 6(j)(2)(C) (consultation with industry and other countries); 6(f)(2)(D) (alternative means attempted); and 6(f)(2)(E) (foreign availability).

[3] Section 6(b)(1) requires the Department to make determinations regarding the criteria set forth therein when extending controls in effect after July 12, 1985. The report must also contain the additional information required in Section 6(f)(2)(A), (C)-(E) (as set forth in endnote 1, supra.)

Each chapter that follows describes a particular category of foreign policy controls and delineates modifications that have taken place over the past year. One particular category of foreign policy controls has attracted additional attention in the last year. This is the use of unilateral sanctions by the United States. Since 1993, the United States has turned to sanctions with increasing frequency. More than half of the sanctions that the United States has applied since World War 11 have been levied in the past five years. While the United States has imposed broad unilateral economic sanctions only in the most egregious cases, such as North Korea, Iran, Cuba and Sudan, as the use of sanctions has increased, the effectiveness of sanctions and of the guidelines by which the United States applies them have come under increasing review.

Multilateral sanctions are generally more effective in enforcing international norms, advancing U.S. interests and defending U.S. values. Sanctions seem to be moderately to highly effective when the United States is able to garner the support and participation of a significant number of countries with economic and political weight to impose sanctions based on shared multilateral norms related to international peace, non-proliferation or prevention of a military buildup. Multilateral sanctions maximize international pressure on the offending state while minimizing damage to U.S. competitiveness. Examples of multilateral financial or trade sanctions which have been effective include Iraq, Libya, the Federal Republic of Yugoslavia, and South Africa.

However, there are also times when important national interests or core values are at stake, and the United States must show leadership by acting unilaterally in imposing sanctions on another State whose behavior warrants it. Unilateral sanctions against Cuba for the past 37 years, Iran for the past four years, as well as Sudan and Burma for the past two years, serve vital U.S. interests.

Unilateral sanctions are of varying degrees of effectiveness, depending on their goal and the nature of the country they are targeted against. In general, they are less likely to be effective than are multilateral sanctions. In today's interdependent, global economy, the ability of the United States to unilaterally deny certain trade or financial benefits to a target country is limited. Within the realm of unilateral sanctions, some measures which are not subject to foreign substitution such as denial of a U.S. quota, withdrawal of port privileges or landing rights, and actions in international financial institutions to withhold loans and assistance cannot be undone or overcome by the target country. Unilateral financial or trade sanctions, however, appear much less likely to advance United States goals.

Financial sanctions seem to be somewhat more effective than trade sanctions, given the central position of the United States in international finance. The United States plays a pivotal role in the international financial market, so the nonparticipation of U.S. financial institutions in a given transaction make it relatively more difficult for sanctioned countries to gain foreign financing. It is yet unclear whether the European Union's adoption of a single currency, the Euro, and the emergence of foreign financial centers will diminish the effect of U.S. financial sanctions. Increasing resort to

unilateral financial sanctions could, however, erode international confidence in the U.S. financial system and its international role.

Since there are few products or services for which the United States is the sole provider, the economic effectiveness of trade sanctions in most cases is measured in terms not of denial but of a potentially higher price to an end-user in a sanctioned country. Removing U.S. firms from the market could restrict supply, especially for large projects or high-technology items. For widely available items, such as trucks or personal computers, the large number of alternative suppliers probably results in no increase in purchase price for the sanctioned country. Trade sanctions could impose a cost on the sanctioned country by making it pay more for imports of less widely available items such as power plants, earth moving equipment, and commercial aircraft, and there has been some evidence that end-users in sanctioned countries may pay a higher price to acquire items from a foreign supplier who faces less competition for the sale as a result of sanctions. This potential increase in cost to the sanctioned country could be weighed against the cost to the U.S. in lost sales to provide one measure of the utility of sanctions.

Unilateral sanctions are not only less likely than multilateral sanctions to be effective, but they also impose costs on other U.S. interests ranging from conflicts with key allies to losses for American businesses and U.S. workers. With regard to the recently imposed unilateral trade sanctions on India and Pakistan, for example, exporters have provided examples of Indian companies who have announced they will no longer do business with U.S. companies and are designing out U.S. parts or components. This "designing out" phenomenon, as has been frequently noted, can damage the position of U.S. exporters beyond the loss of markets in the sanctioned country itself.

Most of the statistical data presented in the report are based on fiscal year export licensing statistics, unless otherwise noted. Commerce generates that data from the computer automated system it uses to process and track export license activity. Due to the tabulating procedures used by the system in accounting for occasional license applications that list more than one country or destination, the system has certain limitations as a means of gathering data. In addition, Commerce based the data in the report on values contained in export licenses it issued. Such values may not represent the values of actual shipments made against those licenses, because in some cases an exporter may ship only a portion of the value of an approved license.

HIGHLIGHTS OF 1998

EMBARGOED COUNTRIES AND ENTITIES:

On March 20, 1998, the President announced that the United States would take a number of steps to expand the flow of humanitarian assistance to the people of Cuba, and to help strengthen independent civil society and religious freedom in that country. On May 13, 1998, Commerce helped implement these measures of resuming licensing of direct humanitarian flights to Cuba and streamlining procedures for the sale of medicines and medical

equipment to Cuba. [Note: The President imposed the ban in 1996 and lifted it partially in 1998 for humanitarian flights.]

On July 29, 1998, Commerce revised the Entity List in Supplement 1 to Part 744 of the Export Administration Regulations (EAR) to add seven Russian entities under investigation by the Russian government for suspected export control violations involving weapons of mass destruction and missile technology. Exports or reexports of all items subject to the EAR to these entities require a license, and applications will be reviewed with a presumption of denial.

ENCRYPTION:

In July 1998, Secretary Daley announced that the Clinton Administration had finalized guidelines to allow the export of encryption under a license exception to 45 eligible countries. This affects encryption exports for the world's 100 largest banks and almost 70 percent of the world's financial institutions. On September 22, 1998, Commerce issued regulations implementing these changes.

On September 16, 1998, Vice President Gore announced an update to the encryption policy which was based on input from industry groups but consistent with the protection of national security and law enforcement interests. This update will permit the export of strong encryption when used to protect sensitive financial, health, medical, and business proprietary information in electronic form. The new export guidelines will further streamline exports of key recovery products and other recoverable encryption products. In particular, for exports of non-recovery 56-bit products, the new guidelines eliminate the requirement for a commitment and business plan to develop key recovery encryption.

COMMERCE CONTROL LIST:

In January 1998, Commerce published comprehensive changes to the Export Administration Regulations to implement the Wassenaar Arrangement's List of Dual-Use Goods and Technologies into the Commerce Control List (CCL). To simplify the classification process for exporters, Commerce also harmonized items on the CCL to conform to the European Union dual-use list and lists of other international control regimes to which the United States belongs. This January 1998 rule also imposed new requirements on exporters to report to Commerce exports of certain items made under the authority of certain license exceptions. BAA provides this information, excluding the exporter's name and dollar value of the export, to other participating countries to enhance international security and stability through the sharing of information. This rule also removed the ability for some Wassenaar Arrangement Very Sensitive List dual-use items to be exported from the United States without a license.

On July 14, 1998, the United States imposed an arms embargo on the Federal Republic of Yugoslavia (Serbia and Montenegro) in reaction to the use of excessive force by Serbian police forces against civilians in Kosovo and the acts of violence by the Kosovar Albanian extremists, consistent with United States obligations under United Nations Security Council Resolution 1160. Working

in concert with the Department of State, the Department of Commerce maintains new license requirements and a policy of denial on the export on arms-related items and "crowd control" items that could be used in support of terrorist activities or to repress civilian populations. "Crowd Control" items consist of all items already controlled for crime control reasons plus three new U.N.-based controls on water cannons (ECCN OA989), bomb detection equipment (ECCN 2A993) and explosives (ECCN IC998).

On December 15, 1998, Commerce notified Congress, via a Foreign Policy Report, on revisions to the Export Administration Regulations to strengthen controls on exports and reexports to Specially Designated Terrorists (STDS) and Foreign Terrorist Organizations (FTOs). A license is required for all exports and reexports by any person to SDTs and FTOs of items on the Commerce Control List (CCL) and for all exports and reexports by a U.S. person of an item subject to the EAR. License applications will be reviewed under a general policy of denial. The interim rule was published in the Federal Register on January 8, 1999.

On December 31, 1998, Commerce notified Congress, via a Foreign Policy Report, that the Department was expanding controls on firearms items based on the Organization of American States (OAS) Model Regulations for the Control of the International Movement of Firearms. These regulations are designed to harmonize import and export controls over the legal international movement of firearms and to establish procedures to prevent the illegal trafficking of firearms among OAS member countries. Commerce anticipates publication of the interim rule in the Federal Register in the first quarter of 1999.

Under these provisions, the Commerce will require a license for the export of certain firearms, including shotguns, and parts, buckshot shotgun shells and parts, shotgun shells and parts, and optical sighting devices for firearms to all OAS member countries, including Canada, to prevent illegal trafficking in firearms. The Commerce already requires a license for export of all these items to all OAS member countries for human rights reasons, with the exception of Canada. In support of the OAS Model Regulations, the Commerce imposed a Import Certificate requirement on the export to all OAS member countries of those items affected by the regulations. In general, Commerce will approve license applications for the export of firearms to OAS member countries if the application is supported by an Import Certificate. Commerce will deny applications that involve end uses linked to drug trafficking, terrorism, international organized crime, and mercenary and other criminal activities.

UNILATERAL NUCLEAR CONTROLS:

In January 1998, a major decontrol of nuclear items took effect with the liberalization of unilateral U.S. controls on exports of pipes, valves, cranes, and pipe fittings that are used in the non-nuclear, or "balance of plant" portion of civilian nuclear power plants. Before this liberalization took effect, the turbines and generators in the non-nuclear portion of nuclear power plants did not require a license for export, while the export of the pipes, valves, and related

equipment required to install them were subject to a license requirement.

On March 18, 1998, the President certified that China had complied with the nuclear nonproliferation conditions required for implementation of the 1985 U.S.-China Agreement for Peaceful Nuclear Cooperation and for lifting the 1989 Tiananmen Square Sanctions on nuclear technology exports to China. The certification allows the Commerce to approve the export of items to China controlled by the Department under the EAR, technology controlled by the Department of Energy (DOE) under 10 CFR part 810 and equipment and materials controlled by the Nuclear Regulatory Commission (NRC) under 10 CFR part 110. Lifting the sanctions had no direct effect on the Department's export control program. Items controlled for nuclear proliferation reasons still require a license and continue to be subject to interagency review by the Departments of Commerce, State, Energy, and Defense and the Arms Control and Disarmament Agency. The licensing process is the same as that accorded license applications for similar goods to other destinations.

LEGISLATIVE EVENTS:

In 1998, Commerce implemented provisions of the National Defense Authorization Act (NDAA) which require advance notification and post-shipment verification of exports or reexports of high performance computers above 2000 million theoretical operations per second (MTOPS) to end users in countries known in the EAR as Tier 3 countries (See Appendix IV). Exporters are required to submit notices to Commerce which are evaluated in conjunction with the Departments of Defense, Energy and State and the Arms Control and Disarmament Agency. If an agency raises an objection to the proposed export within ten days, the Commerce requires an export license; otherwise the exporter may ship. The Act also requires a post-shipment visit in each case, whether or not we required a license.

Signed into law on October 27, 1998, the International Religious Freedom Act of 1998 provides for the imposition of one or more diplomatic or economic sanctions against countries that have engaged in violations of religious freedom. The act also provides for the imposition of one or more economic sanctions against countries the President determines have engaged in or tolerated particularly severe violations of religious freedom. For such countries, the act also provides that the Commerce Department, with State Department concurrence, shall include on the Commerce Control List for reasons of crime control or detection and require export licenses for, items that are being used or are intended for use directly to carry out particularly severe violations of religious freedom. A general policy of denial for such items will apply to license applications to export to any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights, pursuant to a determination under the Foreign Assistance Act.

In the 1998 National Defense Authorization Act, Congress mandated that all commercial communications satellites, including both those transferred by Presidential decision in 1992 and those trans-

ferred by Presidential decision in 1996, be returned to the U.S. Munitions List by March 15, 1999.

INDIA AND PAKISTAN:

President Clinton reported to the Congress on May 13th with regard to India and May 30th with regard to Pakistan his determinations that those non-nuclear weapon states had each detonated a nuclear explosive device. The President directed Department of Commerce to take the necessary actions to impose the sanctions described in section 102 (b)(2) of the Arms Export Control Act. On June 18, 1998, consistent with the President's directive, Commerce announced certain sanctions on India and Pakistan, as well as certain supplementary export control measures. On November 19, 1998, Commerce amended the EAR to codify the June announcement. Consistent with section 102 (b)(2) of the Arms Export Control Act, Commerce added § 742.16 to the EAR codifying a license review policy of denial for the export and reexport of items controlled for nuclear proliferation (N-P) and missile technology (MT) reasons to all end-users in India and Pakistan.

To supplement the sanctions of § 742.16, Commerce added certain Indian and Pakistani government, parastatal, and private entities determined to be involved in nuclear, missile, or conventional weapons activities to the Entity List in Supplement No. 4 to part 744 of the EAR. License requirements for these entities are set forth in the newly added § 744.11 and § 744.12. Exports and reexports of all items subject to the EAR to government, parastatal, and private entities listed for their involvement in nuclear or missile activities require a license. Exports and reexports of all items subject to the EAR having a classification other than EAR99 require a license to listed military entities. The license applications will be reviewed with a presumption of denial, with limited exceptions.

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

This part defines the export controls maintained for a particular foreign policy purpose that are imposed or extended for the year 1999. The licensing requirements and policy applicable to a particular control are described in this section.

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

This part outlines the considerations or determinations, as required by Section 6(f)(2) of the Act, on the purpose of the control, criteria, alternative means, consultation efforts, and foreign availability. For each control program, the Department's conclusions are based on the following required criteria:

A. The Purpose of the Control

This section provides the foreign policy purpose and rationale for each particular control.

B. Considerations and/or Determinations of the Secretary of Commerce

1. *Probability of Achieving the Intended Foreign Policy Purpose.* This section considers or determines whether such controls are likely to achieve the intended foreign policy purpose, in light of other factors, including the availability from other countries of the goods or technology subject to control, and whether the foreign policy purpose can not be achieved through negotiations or other alternative means.

2. *Compatibility with Foreign Policy Objectives.* This section considers or determines whether the controls are compatible with foreign policy objectives of the United States and with overall U.S. policy toward the country or the proscribed end-use subject to the controls.

3. *Reaction of Other Countries.* This section considers or determines whether the reaction of other countries to the extension of such export controls by the United States is likely to render the controls ineffective in achieving the intended foreign policy purpose or to be counterproductive to other U.S. foreign policy interests.

4. *Economic Impact on United States Industry.* This section considers or determines the effect of the controls on the export performance of the United States, its competitive position in the international economy, the international reputation of the United States as a reliable supplier of goods and technology, or the economic well-being of individual U.S. companies and their employees and communities exceeds the benefit to U.S. foreign policy objectives.[4]

5. *Enforcement of Control.* This section considers or determines the ability of the United States to enforce the controls. Some enforcement problems are common to all foreign policy controls.[5] Others are associated with only one or a few controls. Each individual control has been assessed to determine if it has presented, or is expected to present, an uncharacteristic enforcement problem.

C. Consultation with Industry

This section discusses the results of consultations with industry leading up to the extension or imposition of controls. It also includes comments provided to Commerce by the Technical Advisory Committees (TACs); such comments are attributed to the TAC unless otherwise indicated.

D. Consultation with Other Countries

This section reflects consultations on the controls with countries that cooperate with the United States on multilateral controls, as well as with other countries as appropriate.

---

[4] Limitations exist when assessing the economic impact of certain controls because of the unavailability of data or because of the prevalence of other factors, e.g., currency values, foreign economic activity, or foreign political regimes, which may restrict imports of U.S. products more stringently than the United States restricts exports.

[5] When controls are implemented without the imposition of corresponding restrictions by other countries, it is difficult to guard against reexports from third countries to the target country, to secure third country cooperation in enforcement efforts, and to detect violations abroad and initiate proper enforcement action. The relative ease or difficulty of identifying the movement of controlled goods or technical data is also a factor. Controls on items that are small, inexpensive, easy to transport or conceal, or that have many producers and end-users, are harder to enforce.

E. Alternative Means

This section specifies the nature and results of any alternative means attempted to accomplish the foreign policy purpose, or the reasons for extending the controls without attempting any such alternative means.

F. Foreign Availability

This section considers the availability from other countries of goods or technology comparable to those subject to the proposed export control. It also describes the nature and results of the efforts made pursuant to Section 6(h) of the Act to secure the cooperation of foreign governments in controlling the foreign availability of such comparable goods or technology. In accordance with the Act, foreign availability considerations do not apply to export controls in effect prior to June 12, 1985, to controls maintained for human rights and anti-terrorism reasons, or to controls in support of the international obligations of the United States.

GENERAL COMMENTS FROM INDUSTRY

On October 13, 1998, the Department of Commerce, via the Federal Register, solicited comments from Industry on the effectiveness of export policy. In general, the comments indicated that Industry does not feel that unilateral sanctions are effective. A more detailed review of the comments is available in Appendix I.

4. Anti-Terrorism Controls (Section 742.8, 742.9, 742.10, 744.10)

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

These controls reflect U.S. opposition to acts of international terrorism supported by a foreign government.

Pursuant to Section 6(j) of the Export Administration Act, the Secretary of State has designated seven countries Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria as nations whose governments have repeatedly provided support for acts of international terrorism. As noted below, Commerce controls multilateral list items destined to military or other sensitive end-users in designated terrorist countries for anti-terrorism reasons under Section(j) of the Act. Commerce also controls additional items to Iran, Sudan and Syria for anti-terrorism reasons under the general authority of Section 6(a) of the Act.

The Department of the Treasury maintains comprehensive trade embargoes against Cuba, Libya, Iran, Iraq, North Korea and Sudan under other provisions of law. To avoid duplicate licensing requirements, Commerce and Treasury have allocated licensing responsibilities for exports and reexports to these countries. Broadly speaking, Commerce has licensing responsibility for exports and reexports to Cuba and North Korea and for reexports to Libya; Treasury has licensing responsibilities for exports and reexports to Iran and Iraq. Both Treasury and Commerce maintain license requirements for exports and reexports to Sudan. This report does not describe the restrictions administered by Treasury against Iran, Iraq and Sudan. See chapter 5 for a more complete discussion of controls on Cuba and North Korea and chapter 6 for a description of controls on Libya.

This chapter describes the anti-terrorism controls that apply to all designated terrorist countries, but focuses on the additional anti-terrorism controls maintained against Iran, Syria and Sudan under the EAR. This chapter also summarizes briefly a revision of the EAR which prohibits exports and certain reexports to Specially designated Terrorists and Foreign Terrorist Organizations, wherever located.

On December 15, 1998, Commerce notified Congress, via a Foreign Policy Report, on revisions to the Export Administration Regulations to strengthen controls on exports and reexports to Specially Designated Terrorists (SDTs) and Foreign Terrorist Organizations (FTOs). A license is required for all exports and reexports to SDTs and FTOs by any person of items on the Commerce Control List (CCL) and for all exports and reexports by a U.S. person of an item subject to the EAR. License applications will be reviewed under a general policy of denial. The interim rule was published in the Federal Register on January 8,1999.

EAA Section 6(i) determinations: The Secretary of State has determined that Libya (in 1979), Syria (1979), Cuba (1982), Iran (1984)[6], North Korea (1988), Iraq (1990) and Sudan (1993)[7] are countries whose governments have repeatedly provided support for acts of international terrorism.

Effective December 28, 1993, the Acting Secretary of State determined the United States would control five categories of dual-use items subject to multilateral controls to certain sensitive government end-users under Section 6(j) of the Act, since these items meet the criteria set forth in Section 6(j)(1)(B). Specifically, the Acting Secretary determined that these items, when exported to military, police or intelligence organizations or to other sensitive end-users in a designated terrorist country, could make a significant contribution to that country's military potential or could enhance its ability to support acts of international terrorism. These anti-terrorism controls apply to all designated terrorist-list countries.

The Acting Secretary also advised that the United States should continue to control other items not specifically controlled under Section 6(j) for general foreign policy purposes under Section 6(a) to terrorist-list countries, and that the United States will continue to review the export of such items prior to approval to evaluate whether, under the circumstances of the application, the requirements of Section 6(j) apply. These measures are described in detail below.

Paragraph A below reflects the Section 6(j) controls; paragraphs (B), (C) and (D) reflect the Section 6(a) controls on Iran, Sudan, and Syria.

---

[6] On August 19, 1997, the President issued Executive Order 13059 to confirm that the embargo on Iran prohibits all trade and investment activities by United States persons, wherever located, and to consolidate in one Order the various prohibitions previously imposed to deal with the national emergency declared on March 15, 1995. Executive Order 12957 of March 5, 1995, prohibits U.S. persons from entering into contracts for the financing or the overall management or supervision of the development of petroleum resources located in Iran or over which Iran claims jurisdiction. Executive Order 2959 of May 6, 1995, imposed a comprehensive trade and investment embargo on Iran.

[7] On November 3, 1997, the President issued Executive Order 13067, which imposed an embargo on Sudan, effective November 4, 1997. The President delegated to the Treasury Department the authority to promulgate regulations to administer the embargo on Sudan.

A. The Acting Secretary of State determined, effective December 28, 1993, that the export of certain categories of goods and technologies when destined to military, police, intelligence entities and other sensitive end-users, as determined by the Department of State, in any country designated under Section 6(j) of the Act as a country that has repeatedly provided support for acts of international terrorism, "could make a significant contribution to the military potential of such country, including its military logistics capability, or could enhance the ability of such country to support acts of international terrorism." As a result of this determination, the Secretaries of State and Commerce will notify Congress thirty days prior to the issuance of any license for the export of any item from the five categories listed below to sensitive end-users in the terrorist countries.

Pursuant to Section 6(j) of the Act, Commerce requires a license for the export of the following items to military or other sensitive end-users in designated terrorist countries:

1) All items subject to national security controls, except computers with a performance level of less than 500 million theoretical operations per second (MTOPS) (Wassenaar Arrangement);[8]

2) All items subject to chemical and biological weapons proliferation controls (Australia Group);

3) All dual-use items subject to missile-proliferation controls (Missile Technology Control Regime);

4) All items subject to nuclear weapons-proliferation controls (Nuclear Referral List); and

5) All military-related items (items controlled by Commerce Control List (CCL) entries ending with the number 18).

B. Pursuant to Section 6(a) of the Act, the Commerce requires a license for the categories of items listed below for Iran, Sudan, and Syria to promote U.S. foreign policy goals. Sudan (as of November 4, 1997) and Iran (as of May 7, 1995) are also subject to comprehensive trade and investment embargoes administered by the Department of the Treasury under the authority granted by the President under IEEPA.[9] The Department of State reviews license applications for items controlled under Section 6(a) of the Act before approval to determine whether the requirements of Section 6(j) apply. If the Secretary of State determines that the particular export "could make a significant contribution to the military potential of such country, including its military logistics capability, or could enhance the ability of such country to support acts of international terrorism," Commerce and State will notify the appropriate congressional committees thirty days before issuing a license. The categories of items controlled under Section 6(a) are as follows:

- Categories of items listed in paragraph A to non-military or non-sensitive end-users
- Aircraft, Including Helicopters, Engines and Parts
- Heavy Duty On-Highway Tractors
- Off-Highway Wheel Tractors (>10 tons)
- Cryptographic, Cryptanalytic and Cryptologic Equipment
- Navigation, Direction Finding and Radar Equipment

[8] The Department of Commerce requires a license under Section 6(a) of the Act for all computers going to Iran, Sudan or Syria with a CTP of 6 MTOPS or above.

[9] Ibid.

- Electronic Test Equipment
- Mobile Communications Equipment
- Acoustic Underwater Detection Equipment
- Vessels and Boats (Including Inflatable Boats)
- Marine and Submarine Engines
- Underwater Photographic Equipment
- Submersible Systems
- CNC Machine Tools
- Vibration Test Equipment
- Certain Digital Computers (CTP≥)
- Certain Telecommunications Transmission Equipment
- Certain Microprocessors (Clock Speed >25 MHZ)
- Certain Semiconductor Manufacturing Equipment
- Software Specially Designed for CAD/CAM IC Production
- Packet Switches
- Software Specially Designed for Air Traffic Control Applications
- Gravity Meters (Static Accuracy <100 Microgal or with Quartz Element)
- Certain Magnetometers with Sensitivity <1.0 nt rms per root Hertz
- Certain Fluorocarbon Compounds for Cooling Fluids for Radar and Supercomputers
- High-Strength Organic and Inorganic Fibers
- Certain Machines for Gear-Cutting (Up to 1.25 Meters)
- Certain Aircraft Skin and Spar Milling Machines
- Certain Manual Dimensional Inspection Machines (Linear Positioning Accuracy ±3+L/300)
- Robots Employing Feedback Information in Real Time
- Explosive device detectors, used in airports

C. Exports of the following additional items to Iran and Sudan are subject to a license requirement under the Export Administration Regulations (EAR) for foreign policy reasons:

- Large Diesel Engines (>400 hp)
- Scuba Gear
- Pressurized Aircraft Breathing Equipment

D. Exports of the following additional items to Iran are subject to a license requirement under the EAR for foreign policy reasons:

- Portable Electric Power Generators

E. Licensing Policy

1. The Commerce has a policy of denial for all items controlled for national security or foreign policy reasons that require a license for export to Iran. All exports and certain specified reexports are also subject to the comprehensive trade and investment embargo, which the Department of the Treasury administers.

2. Pursuant to Executive Order 13067 of November 3, 1997 (effective November 4, 1997), exports and reexports to Sudan are subject to comprehensive trade restrictions administered by the Department of the Treasury. The Commerce maintains a general policy of denial for items requiring a license to Sudan.

3. Commerce will generally deny items subject to chemical and biological weapons proliferation controls proposed for export to Sudan.

4. Commerce will general deny military-related items controlled for national security reasons proposed for export to Sudan.

5. Commerce will generally deny items controlled for missile proliferation reasons proposed for export to Sudan.

6. Commerce will generally deny all aircraft, helicopters, engines and related spare parts and components proposed for export to Sudan.

7. The Commerce will generally deny cryptographic, cryptanalytic and Cryptologic items proposed for export to Sudan.

8. Commerce will generally deny explosive device detectors controlled under ECCN 2A993 proposed for export to Sudan.

9. Commerce will generally deny all other controlled items destined for military end-users or end-use proposed for export to Sudan.

10. Commerce will generally deny applications for export to Syria of national security-controlled items if the export is destined to a military or other sensitive end-user or end-use. Commerce will consider applications for other end-users or end-uses in Syria on a case-by-case basis.

11. Commerce will generally deny all items subject to chemical and biological weapons (CBS) proliferation controls proposed for export to Syria.

12. Commerce will generally deny applications for export to Syria of all items subject to missile technology controls.

13. Commerce will generally deny applications for export to Syria of military-related items (CCL entries ending in the number 18).

14. Commerce will generally deny applications to export Nuclear Referral List items to military end-users in Syria. Commerce will consider applications for export of such items to civilian end-users on a case-by-case basis.

15. There is a presumption of denial for applications for export to military end-users and end-uses in Syria of other items. For other end-users and end-uses in Syria, Commerce will review license applications on a case-by-case basis.

16. Commerce will consider applications for export and reexport to Syria on a case-by-case basis if they meet the following conditions:

a. the transaction involves the reexport to Syria of items where Syria was not the intended ultimate destination at the time of original export from the United States, provided that the export from the United States occurred prior to the applicable contract sanctity date;

b. the U.S. content value of foreign-produced commodities is 20 percent or less; or

c. the commodities are medical equipment.

17. Applicants wishing to have contract sanctity considered in reviewing their applications must submit adequate documentation demonstrating the existence of a contract that predates the imposition or expansion of controls on the item(s) intended for export.

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

A. THE PURPOSE OF THE CONTROL

The controls effectively distance the United States from nations that have repeatedly supported acts of international terrorism. Further, the controls demonstrate the firm resolve of the United States not to conduct unrestricted export trade with nations or entities that do not adhere to acceptable norms of international behavior. The licensing mechanism provides the United States with the means to control any U.S. goods or services that might contribute to the military potential of designated countries and to limit the availability of such goods for use in support of international terrorism.

Iran. These controls respond to continued Iranian sponsorship of terrorism. The purposes of the controls are to restrict equipment that would be useful in enhancing Iran's military or terrorist-supporting capabilities, and to address other U.S. foreign policy concerns, including human rights, non-proliferation and regional stability.

The controls also allow the United States to prevent shipments of U.S.-origin equipment for uses that could pose a direct threat to U.S. interests. Iran continues to support groups that practice terrorism, including terrorism to disrupt the Middle East Peace Process. By restricting items with military use, the controls demonstrate the resolve of the United States not to provide any direct or indirect military support for Iran and to support other U.S. foreign policy concerns.

Syria. Although there is no evidence of direct Syrian Government involvement in the planning or implementing of terrorist acts since 1986, Syria continues to provide support and safe haven to groups that engage in terrorism. The groups include the Popular Front for the Liberation of Palestine General Command; Hamas; Hizballah; the Abu Nidal Organization; the Popular Front for the Liberation of Palestine; the Democratic Front for the Liberation of Palestine; the Japanese Red Army; the Kurdistan Workers Party (PKK); DHKP/C (formerly known as Dev Sol); and the Palestinian Islamic Jihad. The trade controls reflect U.S. opposition to Syria's support and safe-haven to terrorist groups and prevent a significant U.S. contribution to Syria's military capabilities.

Sudan. Evidence indicates that Sudan allows the use of its territory as sanctuary for terrorists including the Abu Nidal Organization, Hizballah, Hamas, Palestinian Islamic Jihad and components of the Usama bin Ladin organization. Safe houses and other facilities used to support radical groups exist in Sudan with the apparent approval of the Sudanese Government's leadership. Further, some extremists who commit acts of sabotage in neighboring countries receive training in Sudan. The embargo and the export controls demonstrate U.S. opposition to Sudan's support for international terrorism, while restricting access to items that could make a significant contribution to Sudan's military capability or ability to support international terrorism.

Specially Designated Terrorists (SDT) and Foreign Terrorist Organizations (FTO). The purpose of the new regulation is to further the general counterterrorism policy of the United States by expand-

ing restrictions on exports and reexports of dual-use items to SDT and FTO, wherever located. These new controls will enable Commerce to use its enforcement mechanisms to investigate supplies to such entities of U.S.-origin goods and technology and to use its resources to increase public awareness of U.S. counterterrorism measures.

B. CONSIDERATIONS AND/OR DETERMINATIONS OF THE SECRETARY OF COMMERCE

1. Probability of Achieving the Intended Foreign Policy Purpose. Although widespread availability of comparable goods form foreign sources greatly limits the economic effect of these controls, they do restrict access by these countries and persons to U.S.-origin commodities, technology and software, and demonstrate the determination of the United States to oppose and distance itself from acts of international terrorism. In extending controls toward Iran, Syria and Sudan, the Secretary has determined that they are likely to achieve the intended foreign policy purpose.

Iran. The controls on Iran restrict its access to specified items of U.S.-origin that could be used to threaten U.S. interests. The United States has sought, and will continue to seek, the cooperation of other countries in cutting off the flow of military and military-related equipment to Iran.

Sudan. The controls on Sudan affirm the commitment of the United States to oppose international terrorism by limiting Sudan's ability to obtain and use U.S.-origin items in support of terrorist or military activity. These controls send a clear message to Sudan of strong U.S. opposition to its support for terrorist groups.

Syria. These controls are an important means of demonstrating U.S. resolve by limiting Syria's ability to obtain U.S.-origin items that could be used to support terrorist activities or contribute significantly to Syria's military potential. Although other nations produce many of the items subject to U.S. anti-terrorism controls, this does not obviate the need to send a strong signal to the Syrian Government of U.S. disapproval of its support for groups involved in terrorism.

Specially Designated Terrorists (SDT) and Foreign Terrorist Organizations (FTO): The Secretary of Commerce has determined that the SDT and FTO controls are likely to achieve their intended foreign policy objectives of the United States. Imposing a license requirement under the EAR on both exports and reexports to SDT and FTO and enabling the Commerce Department to enforce these controls will further the policy of counterterrorism of the United States.

2. Compatibility with Foreign Policy Objectives. In extending these controls, the Secretary determined that they are compatible with the foreign policy objectives of the United States toward nations and persons who support terrorism. They are also compatible with overall U.S. policy toward Iran, Sudan, Syria, FTOs and SDTS. In addition, the controls are consistent with U.S. efforts to restrict the flow of items that these countries could use for military or terrorist purposes.

3. Reaction of Other Countries. Most other countries are generally supportive of U.S. efforts to fight terrorism and the stop pro-

liferation of weapons of mass destruction in countries of concern. However, almost none have imposed embargoes similar to those imposed by the U.S. for civil goods. One aspect of U.S. controls—their extraterritorial application—has excited opposition in may of our major trading partners, including some close allies and has become a point of contention with EU countries. This reaction to extraterritorial application has had a counterproductive effect as foreign firms design out U.S. components or cite the lack of their own national sanctions as a marketing tool. In some instances, foreign firms are instructed by their governments to ignore U.S. reexport controls as extraterritorial.

Iran. Regarding the controls on specific product categories, other countries share the U.S. concern over Iran's support of terrorism, human rights abuses, and attempts to acquire weapons of mass destruction. The thirty-three members of the Wassenaar Arrangement on Conventional Arms and Dual-Use Goods and Technologies (including the United States) have recognized Iran as a country whose behavior is a cause of concern. Most other nations, however, do not have as stringent a policy of denial for commercial goods as does the United States and Iran's trade partners include Germany, Japan, the United Kingdom and many other OECD nations.

Sudan. The United States imposed these controls (and the subsequent embargo) in response to credible evidence that Sudan assists international terrorist groups. The President imposed the embargo after finding that Sudan has continued to support international terrorism, destabilized neighboring governments and violated human rights. The United States has consulted with key allies and urged them to take all possible measures to convince Sudan to halt its support for terrorism. Some countries have shown their disapproval of Sudan's support for terrorism. For example, the Organization of African Unity (OAU), in an unprecedented action criticizing a member, passed a resolution in September 1995 calling on Sudan to extradite to Ethiopia three suspects charged with the June 1995 assassination attempt against President Mubarak of Egypt. In 1996, the United Nations Security Council adopted three resolutions reaffirming the OAU resolution, calling on Sudan to desist from supporting terrorism, and imposing diplomatic and travel sanctions.

Syria. The United States maintains controls in response to Syria's lack of concrete steps against international terrorist groups that maintain a presence in Syria and Syrian controlled areas of Lebanon.

Specially Designated Terrorists (SDT) and Foreign Terrorist Organizations (FTO): The Secretary has determined that the reaction of other countries to these controls is not likely to render the controls ineffective in achieving their intended foreign policy purpose or be counterproductive to U.S. foreign policy interests. A number of other countries recognize the need to restrict exports and reexports of items that could contribute to terrorist activities.

4. *Economic Impact on United States Industry*

* * * * * * *

Specially Designated Terrorists (SDT) and Foreign Terrorist Organizations (FTO): The Secretary has determined that the economic impact of these controls is likely to be minimal. The Depart-

ment of Treasury already prohibits the U.S. persons from engaging in transactions involving SDT, which include the making or receiving of any contribution of funds, goods or services to or for the benefit of such persons. Treasury also requires U.S. financial institutions to block all financial transactions involving the assets of FTO within the possession or control of U.S. financial institutions. This new rule imposes license requirements on exports and reexports by U.S. persons to designated FTO, and new license requirements on non-U.S. persons who wish to export from third countries items subject to the EAR on the Commerce Control List to SDT or FTO. Commerce anticipates that the additional burden this regulation will impose on U.S. industry will be negligible.

5. *Enforcement of Control.* In general, unauthorized reexports of unilaterally controlled goods to these destinations is a continuing enforcement concern in this area and one which the U.S. is very hard pressed to prevent, absent an embargo imposed by our major trading partners in the European Union and Asia. The large number of items exported in normal trade to other countries—including some aircraft items and consumer goods that have many producers and end-users around the world create procurement opportunities for brokers, agents, and front companies working for these countries. In addition, differences in export laws and standards of evidence for violations also complicate law enforcement cooperation between countries. Control over direct exports to Iran are aided by the general negative public perception of the country. In the case of Sudan, the United States has a limited number of direct exports and reexports of controlled items to track which eases any enforcement problems. In regard to SDT and FTO, Commerce recognizes that enforcement of these controls will require special coordination with other countries to help identify certain items subject to the EAR that may be reexported to SDT and FTO. Because certain persons on the SDT FTO lists are well-known and because the U.S. public generally supports U.S. counterterrorism policies, Commerce expects that the majority of U.S. industry will cooperate with enforcement efforts.

Commerce views these controls as a key enforcement target, using regular outreach efforts to keep businesses informed of concerns. Visits to verify end-use and end-users of U.S. commodities and other programs to maintain a strong enforcement effort. Commerce is also moving aggressively to develop a strong program to deal with procurement by or for terrorist groups. This program includes enhanced agent training, development of a targeted outreach program to familiarize U.S. business with concerns, and close cooperation with lead agencies working terrorism issues.

C. CONSULTATION WITH INDUSTRY

On October 13, 1998, the Department of Commerce, via the Federal Register, solicited comments from Industry on the effectiveness of export policy. In general, the comments indicated that Industry does not feel that unilateral sanctions are effective. A more detailed review of the comments is available in Appendix I.

Commerce has also received comments from the President's Export Council and the Regulations and Procedures Technical Advi-

sory Committee regarding streamlining the Commerce Control List unilateral anti-terrorism entries.

D. CONSULTATION WITH OTHER COUNTRIES

The United States has also consulted with other nations regarding Iran and Sudan's support for terrorism, as well as their dismal human rights record. The United States has provided specific information to interested countries on the justification for designating Sudan a state sponsor of terrorism and urged them to do what they can to influence Sudan's behavior favorably.

E. ALTERNATIVE MEANS

The United States has taken a wide range of diplomatic, political, and security-related steps, in addition to economic measures such as export controls, in an effort to persuade countries supporting terrorism to drop their backing for terrorist activities. The exact combination has varied according to circumstances and judgments as to the best approaches at a particular time. International fora, G–7/8 meetings and summits are all used as opportunities to multi-lateralize export controls on states which support terrorism.

F. FOREIGN AVAILABILITY

The foreign availability provision does not apply to items determined by the Secretary of State to require control under Section 6(j) of the Act.[10] Cognizant of the value of such controls in emphasizing the U.S. position toward countries supporting international terrorism, Congress specifically excluded them from foreign availability assessments otherwise required by the Act. However, the Department has considered the foreign availability of the items controlled to terrorist-designated countries under Section 6(a). For Syria and Iran, there are numerous foreign sources for commodities similar to those subject to these controls. While most of Sudan's imports are low-technology items for which foreign sources exist, the poor health of Sudan's economy and thus its inability to import these goods makes foreign availability less of an issue.

5. *Embargoed Countries and Entities (Part 746)*

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

The United States maintains comprehensive economic embargoes against Cuba, Iran, Iraq, Libya, North Korea and Sudan. (These are six of the seven countries designated by the Secretary of State as state sponsors of international terrorism.) The United States also maintains arms embargoes on Liberia, Rwanda, Somalia and the Federal Republic of Yugoslavia (Serbia and Montenegro) and an arms and other commodity embargo on UNITA (in Angola).

On July 14, 1998, the United States imposed an arms embargo on the Federal Republic of Yugoslavia (Serbia and Montenegro) in reaction to the use of excessive force by Serbian police forces

[10] Provisions pertaining to foreign availability do not apply to export controls in effect before July 12, 1985, under sections 6(i) (International Obligations), 6(j) (Countries Supporting International Terrorism), and 6(n) (Crime Control Instruments). See the Export Administration Amendments Act of 1985, Public Law 99–64, section 108(g)(2), 99 Stat. 120, 134–35. Moreover, sections 6(i), 6(j) and 6(n) require that controls be implemented under certain conditions without consideration of foreign availability.

against civilians in Kosovo and the acts of violence by the Kosovar Albanian extremists and in compliance with United States obligations under United Nations Security Council Resolution 1160. Supplementing the arms ban maintained by the Department of State, the Department of Commerce maintains new license requirements and a policy of denial on the export on arms-related items and "crowd control" items that could be used in support of terrorist activities or to repress civilian populations. "Crowd Control" items consist of all items already controlled for crime control reasons plus three new U.N.-based controls on water cannons (ECCN OA989), bomb detection equipment (ECCN 2A993) and explosives (ECCN lC998).

The Department of Commerce and the Department of the Treasury jointly administer the trade embargoes against Cuba and North Korea, under the Trading With the Enemy Act of 1917, the Cuban Democracy Act of 1992, and other statutes. Commerce licenses U.S. exports and reexports to both countries; Treasury licenses travel by U.S. persons to Cuba and North Korea, and financial transactions by U.S. persons with those countries.

The Department of the Treasury administers the embargoes against Iran, Iraq, Libya, Sudan and UNITA in Angola under the International Emergency Economic Powers Act (IEEPA) and, in some cases, the United Nations Participation Act. Commerce maintains comprehensive restrictions against Iran, Iraq, Libya and Sudan, and exercises licensing responsibility for exports and reexports to Sudan and reexports to Libya. Treasury has licensing responsibility for exports of arms-related and other specific commodities to UNITA in Angola; Commerce licenses such items to non-UNITA entities in Angola. Commerce maintains comprehensive export and reexport controls against Libya and exercises licensing responsibility for reexports to Libya, which are discussed in Chapter 6 of this report.

* * * * * * *

The Department of Commerce and other agencies formed an interagency group to consider export requests made in conjunction with the visit to Cuba of Pope John Paul 11 in January of 1998. The United States considered such license requests on a case-by-case basis, consistent with existing regulations and the humanitarian needs of the Cuban people. Exceptions to the Presidential ban on direct flights from the United States to Cuba were also considered on a case-by-case basis if in conjunction with the Pope's visit.

More recently, the President on March 20, 1998 announced that the United States would take a number of steps to expand the flow of humanitarian assistance to the people of Cuba, and to help strengthen independent civil society and religious freedom in that country. Commerce implemented measures by resuming licensing of aircraft for direct humanitarian flights to Cuba, and streamlining procedures for the sale of medicines and medical equipment to Cuba.

The resumption of direct humanitarian cargo flights enables assistance to reach the Cuban people more expeditiously at a reduced cost. The United States requires a license for all aircraft bound on such flights that do not qualify under Export Administration Regu-

lation (EAR) License Exception AVS. Commerce reviews license applications involving flights for humanitarian reasons on a case-by-case basis. The United States has also streamlined its procedures for exporting medicines and medical equipment to Cuba, either for sale or donation and reduced license processing time. Commerce is taking steps to facilitate compliance with the on-site verification and monitoring requirement for medical sales and certain donations to Cuba. On-site monitors in Cuba can include, but are not limited to, representatives of the license applicant, religious or charitable groups, western diplomats and international nongovernmental organizations.

The following paragraphs outline existing licensing policies for Cuba and North Korea:

A. The Department of Commerce requires a license for export to Cuba and North Korea of virtually all commodities, technology and software, except:

- technology generally available to the public and informational materials;
- some types of personal baggage, crew baggage, vessels and certain aircraft on temporary sojourn, ship stores (except as prohibited by the CDA to Cuba) and plane stores under certain circumstances;
- certain foreign-origin items in transit through the United States;
- shipments for U.S. Government personnel and agencies;
- gift parcels not exceeding $400 for North Korea of commodities such as food, clothing (non-military), medicines, and other items normally given as gifts by an individual; and
- gift parcels for Cuba are limited to food, clothing (non-military), vitamins, seeds, medicines, medical supplies and devices, hospital supplies and equipment, equipment for the handicapped, personal hygiene items, veterinary medicines and supplies, fishing equipment and supplies, soap making equipment, certain radio equipment, and batteries for such equipment. The value of the gift parcels may not exceed $200 per month, excluding the value of any food in the package. There are no limits on the frequency or dollar value on food contained in gift parcels to Cuba.

(NOTE: The Department of the Treasury licenses cash donations from U.S. citizens for humanitarian assistance, channeled through U.N. agencies, the International Federation of the Red Cross (IFRC) and U.S. non-overnmental organizations; and humanitarian related commodities obtained from sources in third countries and donated to North Korea through the above organizations.)

B. The Department of Commerce generally denies export license applications for exports to Cuba and North Korea; however, Commerce will consider applications for the following on a case-by-case basis:

- exports to meet basic human needs;
- exports to Cuba from foreign countries of non-strategic foreign-made products containing 20 percent or less United States-origin parts, components or materials, provided the exporter is

not a United States-owned or controlled subsidiary in a third country;
- exports to Cuba of telecommunications equipment, to the extent permitted as part of a telecommunications project approved by the Federal Communications Commission, necessary to deliver a signal to an international telecommunications gateway in Cuba;
- exports to support projects under the U.S.-North Korea Agreed Framework of 1994 (including Korean Energy Development Organization initiatives).
- Certain exports to Cuba intended to provide support for the Cuban people.

C. The Department of Commerce reviews applications for exports of donated and commercially-supplied medicine or medical items to Cuba on a case-by-case basis. The United States will not restrict exports of these items, except in the following cases:

- to the extent Section 5(m) of the Export Administration Act of 1979 or Section 203(b)(2) of the IEEPA would permit such restrictions;
- in a case in which there is a reasonable likelihood that the item to be exported will be used for purposes of torture or other human rights abuses;
- in a case in which there is a reasonable likelihood that the item to be exported will be reexported; or
- in a case in which the item to be exported could be used in the production of any biotechnological product; and
- in a case where the U.S. Government determines that it would be unable to verify, by on-site inspection and other appropriate means, that the item to be exported will be used for the purpose for which it was intended and only for the use and benefit of the Cuban people. This exception does not apply to donations of medicine for humanitarian purposes to a nongovernmental organization in Cuba.

* * * * * * *

The licensing policies for the Federal Republic of Yugoslavia (Serbia and Montenegro) (FRY) are as follows:

A. The Department of Commerce requires a license for the export of arms-related items and certain other items on the CCL that could be used for terrorist activities or to repress the civilian population to FRY. Items requiring licenses include shotguns, ammunition, military vehicles, equipment for the production of military explosives, bulletproof vests, night vision equipment, crime and crowd control equipment, and items that may be used to arm and train individuals for terrorist activities. Many of these items are already subject to license application requirements under the EAR for export to FRY. However, this action imposes export license requirements on additional items, including water cannons bomb detection equipment and explosives.

B. The Department of Commerce reviews all license applications to export the items listed above to FRY under a policy of denial.

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

The United States has administered the embargoes on exports to Cuba and North Korea under the Act and other statutes, in a manner consistent with Treasury sanctions adopted under the Trading with the Enemy Act, as amended. The latter authority continues in effect by virtue of Sections 101(b) and (c), and 207, of Public Law 95–223, which the President has extended annually, pursuant to national interest determinations.

A. THE PURPOSE OF THE CONTROL

Originally, the United States imposed embargoes on each of these countries for foreign policy purposes, among other reasons. Although the original circumstances that prompted the United States to impose controls have changed, these controls continue. These embargoes demonstrate the unwillingness of the United States to maintain normal trade with these countries until they take steps to change their policies to conform to recognized international standards.

Cuba. This embargo was imposed several decades ago when Cuban actions seriously threatened the stability of the Western Hemisphere, and the Cuban Government had expropriated property from U.S. citizens without compensation. Because of Cuba's support for insurgent groups that have engaged in terrorism, the Secretary of State designated it as a state sponsor of terrorism under Section 6(j) of the Act in March 1982.

North Korea. North Korea continues to maintain an offensive military capability and to suppress human rights. The planting of a bomb aboard a South Korean airliner by North Korean agents in November 1987 prompted the Secretary of State to designate North Korea as a state sponsor of international terrorism, under Section 6(j) of the Act, in January 1988. This designation has not been revoked.

Rwanda. The controls remain in place to prevent any U.S. contribution to potential conflict in that country and to conform to United Nations-mandated sanctions.

The Federal Republic of Yugoslavia (Serbia and Montenegro): The controls remain in place to prevent U.S. contribution to potential conflict and the repression of the civilian population in that country and to conform with United Nations-mandated sanctions.

B. CONSIDERATIONS AND/OR DETERMINATIONS OF THE SECRETARY OF COMMERCE:

1. *Probability of Achieving Intended Foreign Policy Purpose.* The embargoes have denied these nations the substantial benefits of normal trade relations with the United States. The controls continue to put pressure on the governments of these countries to modify their policies, since the United States will not lift these embargoes without a general improvement in relations. For Rwanda and the Federal Republic of Yugoslavia, the applicable controls may serve to reduce the potential for conflict.

2. *Compatibility with Foreign Policy Objectives.* The controls complement U.S. foreign policy in other aspects of U.S. relations with these countries. They encourage the governments to modify their

policies, thereby improving their relations with the United States. For Rwanda and the Federal Republic of Yugoslavia, these controls are consistent with U.S. foreign policy goals of promoting peace and stability and preventing human rights abuses.

3. *Reaction of Other Countries.* Although most countries recognize the right of the United States to determine its own foreign policy and security concerns, many countries, particularly Canada, Mexico and the members of the European Union, opposed the Cuban Liberty and Democratic Solidarity (Libertad) Act of 1996 (Helms-Burton), which they perceive as an extraterritorial application of U.S. law. Most countries respect U.S. unilateral controls toward North Korea in light of the unresolved situation on the Korean peninsula and the aggressive nature of North Korean support for international terrorism and the proliferation of weapons of mass destruction. The U.S. arms embargoes on Rwanda and the Federal Republic of Yugoslavia are consistent with the objectives of the United Nations; the United States has received no significant objections to these controls.

4. *Economic Impact on United States Industry.*

* * * * * * *

F. FOREIGN AVAILABILITY

Since Cuba and North Korea are also designated terrorism-supporting countries, as well as embargoed destinations, the foreign availability provision does not apply to items determined by the Secretary of State to require control under Section 6(j) of the Act.[10] Cognizant of the value of such controls in emphasizing the U.S. position toward countries supporting international terrorism, Congress specifically excluded them from foreign availability assessments otherwise required by the Act. For Rwanda and the Federal Republic of Yugoslavia, the U.S. human rights policies and concerns about the situation in those countries outweigh foreign availability considerations.

* * * * * * *

6. *Libya (Section 746–4)*

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

On August 5, 1996, the President signed into law the Iran and Libya Sanctions Act in an effort to deny Iran and Libya the ability to support acts of international terrorism and to develop and acquire weapons of mass destruction. The Act requires the President to sanction a person who made an investment of $40 million or more that directly and significantly contributed to Libya's ability to develop its petroleum resources, and to sanction persons who provide Libya with certain goods and services proscribed under United Nations Security Council Resolutions 748 and 883 that significantly and materially contribute to Libya's military, aviation, or certain petroleum development capabilities. ILSA requires the imposition of at least two sanctions from six available sanctions categories (one of which is an export sanction) against an entity determined to have engaged in sanctionable activity described in ILSA.

ILSA is one action in a long history of action the United States has taken against Libya. Libya is one of the countries designated by the Secretary of State as a repeated state sponsor of acts of international terrorism. In January 1986, the President imposed a comprehensive embargo against Libya under the authority of the International Emergency Economic Powers Act (IEEPA). The Department of the Treasury is responsible for licensing exports under the Libyan Sanctions Regulations (31 CFR Part 550). Since February 1, 1986, exports from the United States and transshipments via third countries to Libya require authorization in the form of a general or specific license from Treasury.[11] All direct trade with Libya is prohibited and certain Libyan Government-owned or -controlled assets subject to U.S. jurisdiction—estimated at $1 billion—are frozen by the Department of the Treasury.

On November 14, 1991, a grand jury in the U.S. District Court for the District of Columbia returned an indictment against two Libyan nationals accused of bombing Pan Am Flight 103 en route from London to New York. On the same day, Scottish authorities obtained a petition warrant for the two Libyans on similar charges.

On January 21, 1992, the United Nations Security Council (UNSC) adopted Resolution 731, which condemned the Pan Am bombing, as well as the bombing of a French UTA flight, and urged Libya to fully and effectively respond to requests that the United States, the United Kingdom, and France had made upon it in connection with the investigation, apprehension, and prosecution of those responsible for the bombings. On March 31, 1992, after concluding that Libya had not made satisfactory responses to such requests, the UNSC adopted Resolution 748, which imposed mandatory sanctions on Libya, effective April 15, 1992, until such time as the Security Council determined that Libya had complied with the requests made by the United States, the United Kingdom, and France, and renounced terrorism. Resolution 748 requires U.N. member states to prohibit, by their nationals or from their territory, inter alia, the supply of any aircraft or aircraft components to Libya or the provision of engineering and maintenance servicing of Libyan aircraft. Resolution 748 also requires member states to prohibit, by their nationals or from their territory, the provision of arms and related material of all types, including the sale or transfer of weapons and ammunition, military vehicles and equipment, paramilitary police equipment and spare parts for such equipment. Finally, Resolution 748 requires member states to deny any flight in their airspace, or landing or taking off in their territory, by aircraft which are flying to or from Libya, to prevent operation of Libyan Arab Airlines and to reduce significantly Libyan diplomatic representation abroad.

Continued Libyan non-compliance with UNSC demands resulted in the adoption by the UNSC of Resolution 883 on November 11, 1993, which imposed additional sanctions, including a limited assets freeze, and provisions closing certain gaps in the civil aviation sanctions provided for in Resolution 748. Resolution 883 requires

[11] Though Treasury's Libyan Sanctions Regulations duplicate the restrictions in the Export Administration Regulations (EAR) on exports from the United States to Libya, all the Department of Commerce controls are being extended. These controls can be reevaluated in the event the Treasury regulations issued under IEEPA authorities are revoked.

States to freeze any funds or financial resources owned or controlled by the Government of Libya or a Libyan undertaking and ensure that such funds, or any other funds or financial resources, are not made available to the Government of Libya or any Libyan undertaking. Also, Resolution 883 requires member states to prohibit the provision to Libya, by their nationals or from their territory of materials destined for the construction, improvement or maintenance of Libyan civilian or military airfields and associated facilities and equipment, of any engineering or other services or components destined for the maintenance of any Libyan civil or military airfields, with certain exceptions, and of certain oil terminal and refining equipment, as listed in Appendix III. Furthermore, Resolution 883 required that States immediately close all Libyan Arab Airlines offices, and prohibit any commercial transactions with Libyan Arab Airlines, and prohibit, by their nationals or from their territory, the entering into or renewal of arrangements for the making available for operation within Libya of any aircraft or aircraft components.

In December 1993, the President instructed the Commerce Department to reinforce the trade embargo on the reexport to Libya of U.S.-origin items. The Commerce Department thereupon tightened licensing policy on the reexport of items covered by UNSC Resolutions 748 and 883. Furthermore, in 1995, the U.S. Government adopted a general policy of denial for all exports and reexports to Libya, except for those with a humanitarian purpose.

* * * * * * *

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

A. THE PURPOSE OF THE CONTROL

The purpose of export and reexport controls toward Libya is to demonstrate United States opposition to, and to distance the United States from, that nation's support for acts of international terrorism, international subversive activities, and intervention in the affairs of neighboring states. The controls also reinforce implementation of UNSC resolutions.

B. CONSIDERATIONS AND/OR DETERMINATIONS OF THE SECRETARY OF COMMERCE:

1. *Probability of Achieving Intended Foreign Policy Purpose.* The controls deny Libya U.S.-origin national security-controlled items, oil and gas equipment unavailable from outside sources, and items for the Ras Lanuf Petrochemical complex. The controls restrict Libyan capability to use U.S.-origin aircraft, aircraft components and accessories, and off-highway tractors in military ventures, or in its efforts to destabilize nations friendly to the United States. Consistent with UN resolutions 748 and 883, the United States reinforced the reexport, prohibitions for certain oil terminal and refining equipment, plus items used to service or maintain Libyan aircraft and airfields, and all other items subject to the EAR. The combined effect of these controls has been to prevent a United States contribution to Libya's ability to engage in activities detrimental to United States foreign policy. Furthermore, they send a

clear signal that the United States is unwilling to permit trade in light of Libya's behavior.

2. *Compatibility with Foreign Policy Objectives.* Because these controls are intended to prevent a U.S. contribution to Libyan economic activities, force Libya to abide by international law, and thereby diminish Libya's ability to undermine regional stability and support international terrorism, they are consistent with U.S. foreign policy goals and with policies on sales to Libya.

3. *Reaction of Other Countries.* As indicated by the adoption of UNSC Resolutions 73 1, 748 and 883, there is a general understanding by other countries of the threat posed by Libya's policies of subversion, terrorism, and military aggression. When the United States imposed the bulk of its controls in 1986, the United States explained its policies to other governments and urged them to adopt comparable policies. There was some favorable response, but no country has matched the extent of U.S. controls. In 1986, the European Union and the Group of Seven approved unanimous steps against Libya, including restrictions on Libyan officials in Europe and a ban on new arms sales. The international community has effectively implemented the sanctions imposed by the UN Security Council. The United States closely monitors all trade with Libya and swiftly brings any noncompliance with the most recent UN resolutions to the attention of appropriate foreign authorities.

* * * * * * *

5. *Enforcement of Control.* In light of the widespread perception of Libya as a supporter of international terrorism, along with UN sanctions, there is substantial voluntary compliance on the part of U.S. companies and their subsidiaries overseas. Nonetheless, the Department of Commerce remains concerned about the continuing potential for unauthorized re-export of goods controlled for national security/nonproliferation reasons. It is virtually impossible to monitor the full extent to which such transfers may occur, given the variety of goods involved, the opportunities created by differences in export laws between countries, and the ease of transshipment through free ports such as Malta. In particular, control of U.S. origin aircraft parts, components, and avionics or foreign-manufactured aircraft with any U.S. content requires a major commitment of enforcement resources. Commerce will continue to aggressively enforce these controls.

C. CONSULTATION WITH INDUSTRY

The Department of Commerce published a notice in the Federal Register on October 8, 1997, requesting public comments on its foreign policy-based export controls. As of the date of publication of this report, Commerce had received no comments on its export controls on Libya.

D. CONSULTATION WITH OTHER COUNTRIES

On October 13, 1998, the Department of Commerce, via the Federal Register, solicited comments from industry on the effectiveness of export policy. In general, the comments indicated that industry does not feel that unilateral sanctions are effective. A more detailed review of the comments is available in Appendix I.

Extensive consultation with other nations has taken place under UN auspices. The United States also intends to continue consulting friendly governments in order to achieve full compliance with UN sanctions.

E. ALTERNATIVE MEANS

U.S. controls complement diplomatic measures that we have, and will continue to use, to influence Libyan behavior.

F. FOREIGN AVAILABILITY

The foreign availability provision does not apply to items determined by the Secretary of State to require control under Section 6(j) of the Act.[10] Cognizant of the value of such controls in emphasizing the U.S. position toward countries supporting international terrorism, Congress specifically excluded them from foreign availability assessments otherwise required by the Act. The foreign availability of items controlled under Section 6(a) has been considered by the Department of Commerce. In general, numerous foreign sources of commodities similar to those subject to these controls are known, especially for items controlled by the United States.

7. Chemical Precursors and Associated Equipment, Technology and Software (Sections 742.2, 744.4 and 744.6)

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

The United States maintains export controls over certain chemicals, equipment, materials, software, technology and whole plants to further U.S. foreign policy opposing the proliferation and use of chemical weapons.[12] The United States implements these controls in coordination with the Australia Group (AG), an informal forum of 30 nations cooperating to halt the proliferation of chemical and biological weapons. (See table in Appendix II for complete list of members.) The Department of Commerce has primary responsibility for overseeing the compliance of industry with the Chemical Weapons Convention (CWC), which bans the development, production, stockpiling, and retention of chemical weapons, and provides for an extensive verification regime.[13] Chemical warfare agents deemed to have direct military application are controlled by the State Department under the International Traffic in Arms Regulations.

Pursuant to passage of the CWC Implementation Act (CWCIA) on October 21, 1998, Commerce expects to be responsible for industry compliance with the Convention and will promulgate two regulations in the near future: (1) amendment to the EAR addressing new export controls and end-use requirements; and (2) Chemical Weapons Convention Regulations (CWCR) addressing data declaration and inspection requirements. After publication of the final CWCR, Commerce will collect industry declarations regarding production, processing, consumption, import, and export of toxic

[12] Anti-terrorism controls also apply to exports of these items to countries designated as state sponsors of terrorism by the Secretary of State.

[13] The CWC was ratified by the United States on April 25, 1997 and entered into force on April 29, 1997. As of September 30, 1997, 100 nations were States Parties to the treaty.

chemicals for purposes not prohibited by the Convention (e.g., industrial, agricultural, and other peaceful purposes) and will forward the information to the Organization for the Prohibition of Chemical Weapons (OPCW). Commerce will also escort inspections of certain U.S. chemical production facilities by the OPCW.

* * * * * * *

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

A. THE PURPOSE OF THE CONTROL

These controls are to prevent a U.S. contribution to, and to support multilaterally coordinated efforts to control, the proliferation and use of chemical weapons. They also provide regulatory authority to control the export of any item from the United States when there is a significant risk that it will be used for chemical weapon purposes. These controls implement certain measures specified in Executive Order 12735 of November 16, 1990, and its successor, Executive Order 12938 of November 14, 1994, and the Enhanced Proliferation Control Initiative (EPCI) announced by President Bush on December 13,1990 (and endorsed by President Clinton).

These controls advance U.S. implementation of multilateral export control commitments made by members of the AG to further non-proliferation objectives. The AG works to accomplish this objective through the harmonization of export controls, the exchange of information, and other diplomatic means. In addition, these controls assist the United States in implementing its obligation under the Convention on the Prohibition of the Development, Production, Stockpiling, and Use of Chemical Weapons and on their Destruction (the Chemical Weapons Convention, or CWC) not to assist anyone, in any way, in chemical weapons activities. The controls also support the goals of the 1925 Geneva Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or other Gases, and of Bacteriological Methods of Warfare, which prohibits the use of chemical or biological weapons.

B. CONSIDERATIONS AND/OR DETERMINATIONS OF THE SECRETARY OF COMMERCE

1. *Probability of Achieving the Intended Foreign Policy Purpose.* These export controls demonstrate U.S. commitment to curtail the spread of chemical weapons and to uphold multilateral agreements to cooperate in this effort. However, many of the items covered by these controls are available in chemical producing nations that are not members of the AG. These controls, however, continue to be a significant part of the United States' overall strategy to prevent the proliferation of weapons of mass destruction. Accordingly, the Secretary has determined that these controls are likely to achieve the intended foreign policy purpose.

2. *Compatibility with Foreign Policy Objectives.* In extending these controls, the Secretary has determined that the controls are compatible with the foreign policy objectives of the United States. The United States has a strong interest in remaining in the forefront of international efforts to stem the proliferation of chemical weapons. These controls are compatible with the multilateral ex-

port controls for chemicals and related equipment and technology agreed to by the AG. Moreover, the United States has a binding international commitment under the CWC to the complete prohibition and elimination of all chemical weapons and of assistance to chemical weapons programs.

3. *Reaction of Other Countries.* The Secretary has determined that the reaction of other countries to these controls by the United States is not likely to render the controls ineffective in achieving the intended foreign policy purpose or to be counterproductive to U.S. foreign policy interests. Some non-aligned countries, that are parties to the CWC and the Biological Weapons Convention (BWC), have voiced opposition to the export controls of the AG and have called for its elimination claiming that it discriminates against developing economies. They falsely imply that the AG's export controls deprive nonproliferating States of economic and technological development in the chemical field. They state that the CWC should be looked to as the governing legal instrument for the elimination of chemical weapons, and therefore, incorrectly claim that AG export controls are obsolete. The United States in coordination with its AG partners has sought to dispel this perception in international fora by clarifying the purpose of the controls.

4. *Economic Impact on United States Industry.*

* * * * * * *

E. ALTERNATIVE MEANS

The United States continues to address the problem of the proliferation of chemical weapons on a number of fronts. Direct negotiations with countries intent on acquiring chemical weapons are not likely to prevent the use of U.S.-origin materials in such activities, nor are such negotiations likely to affect the behavior of these countries.

Alternative means to curtail the acquisition and development of chemical warfare capabilities, such as diplomatic negotiations, do not obviate the need for controls. The following are some examples of additional means that the United States has used and will continue to use in an attempt to curb the use and spread of chemical weapons:

- U.S. legislation: The Chemical and Biological Weapons Control and Warfare Elimination Act of 1991 (Title III, Pub. L. 102–182) provides for the imposition of sanctions on foreign entities and countries for certain kinds of chemical and biological weapons related activity. The United States has imposed sanctions on certain entities for chemical weapons-related activities;
- The Chemical Weapons Convention: As another tool for stemming the proliferation of chemical weapons, the Convention imposes a global ban on the development, production, stockpiling, retention and use of chemical weapons (CW). The Convention also prohibits the direct or indirect transfers of CW as well as restricting trade in chemicals to non-Parties, and creates an international organization to monitor the destruction of CW and the production of toxic chemicals for industrial, agricul-

tural, medical and other peaceful purposes in countries party to the Convention.

The Department has participated in international fora to negotiate positions which minimize burdens and maximize protections to industry.

Pursuant to passage of the CWC Implementation Act (CWCIA) on October 21, 1998, Commerce expects to be responsible for industry compliance with the Convention and will promulgate two regulations in the near future: (1) amendment to the EAR addressing new export controls and end-use requirements; and (2) Chemical Weapons Convention Regulations (CWCR) addressing data declaration and inspection requirements. After publication of the final CWCR, Commerce will collect industry declarations regarding production, processing, consumption, import, and export of toxic chemicals for purposes not prohibited by the Convention (e.g., industrial, agricultural, and other peaceful purposes) and will forward the information to the Organization for the Prohibition of Chemical Weapons (OPCW). Commerce will also escort inspections of certain U.S. chemical production facilities by the OPCW.

F. FOREIGN AVAILABILITY

Past reviews conducted by Commerce revealed that there was availability from non-AG countries for a wide range of AG chemical precursors and production equipment. Non-AG suppliers of precursors and/or related production equipment include Brazil, Chile, Colombia, India, Mexico, China (PRC), South Africa, the countries of the former Soviet Union, Taiwan, Thailand, and Turkey. However, most of these countries are parties to the CWC and will take steps under this treaty to prevent CW proliferation.

8. Biological Agents and Associated Equipment and Technical Data (Sections 742.2, 744.4 and 744.6)

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

The Bureau of Export Administration (BXA) exercises export controls over certain microorganisms and toxins and biological equipment and related technology, to further U.S. foreign policy opposing the proliferation and use of biological weapons. The United States implements these export controls multilaterally in coordination with the Australia Group (AG), an informal forum of 30 nations cooperating to halt the proliferation of chemical an biological weapons. The United States also participates in international efforts to effect a total ban on biological weapons in compliance with the Convention on the Prohibition of the Development Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction (BWC).

* * * * * * *

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

A. THE PURPOSE OF THE CONTROL

These controls are to prevent U.S. contribution to the proliferation and use of biological weapons, and to support multilaterally co-

ordinated control efforts. The controls also provide the regulatory authority to stop the export of any item from the United States when there is a significant risk that it will be used for biological weapons purposes. The controls implement certain measures directed in Executive Order 12735 of November 16, 1990, and its successor, Executive Order 12938 of November 14, 1994, and the Enhanced Proliferation Control Initiative of December 13, 1990.

The United States implements these controls in coordination with the AG, a forum of thirty nations that cooperate to halt the spread of chemical and biological weapons. The AG works to accomplish this objective through the harmonization of export controls, the exchange of information, and other diplomatic means. In addition, these controls demonstrate the United States' commitment to its obligation under the BWC [14] not to develop, produce, stockpile, acquire or retain biological agents, weapons, equipment or the means of delivery for warfare purposes and not in any way assist such activities. The controls also advance the goals of the 1925 Geneva Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous, or other Gases, and of Bacteriological Methods of Warfare, to prohibit the use of chemical or biological weapons.

B. CONSIDERATIONS AND/OR DETERMINATIONS OF THE SECRETARY OF COMMERCE

1. *Probability of Achieving the Intended Foreign Policy Purpose.* The Secretary has determined that the control is likely to achieve the intended foreign policy purpose even in light of other factors, including availability of these items from other sources. These controls continue to affirm U.S. opposition to the development, proliferation and use of biological weapons and serves to distance the United States from such activities.

2. *Compatibility with Foreign Policy Objectives.* In extending these controls, the Secretary has determined that the controls are compatible with the foreign policy objectives of the United States. The United States has a strong interest in remaining in the forefront of international efforts to stem the proliferation of biological weapons. These controls are compatible with the multilateral export controls for biological materials agreed to by the AG. Moreover, the United States has a binding international commitment under the BWC and the Geneva Protocol to the complete prohibition and elimination of all biological weapons and to their nonproliferation.

3. *Reaction of Other Countries.* Some non-aligned countries—those which are party to the BWC and the Chemical Weapons Convention (CWC), but not the AG—have voiced opposition to the AG's export controls incorrectly claiming they discriminate against developing countries. Countries claim to be concerned that the controls could hinder their right, under Article X of the BWC, to participate in the fullest possible exchange of equipment, materials and technology for the agents and toxins for peaceful purposes. In

[14] The full title of the BWC is the "Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction. The treaty was signed in 1972 and ratified by the United States in 1975.

international fora, the U.S. Government has sought to dispel this perception by clarifying the purpose of the controls.

* * * * * * *

5. *Enforcement of Control.* Enforcing controls on biological weapons materials poses problems similar to the enforcement of chemical controls, but with additional difficulties. Biological materials are microscopic organisms that require technical expertise and specialized facilities to identify and to handle. Because of their size, the biological agents can be concealed and transported with ease.

To meet the challenge of effective enforcement of these proliferation controls, Commerce has redirected resources towards preventive enforcement. Enforcement personnel have recently begun conducting an extensive on-going outreach program to educate appropriate industries about export controls. The program is also designed to increase the industry's awareness of suspicious orders for products or equipment that could be used for biological weapons proliferation. A significant number of investigations have been opened into allegations of illegal activity related to these concerns. In cases when unlicensed shipments of biological materials have already taken place, Commerce has found that investigations and prosecutions are successfully conducted on the basis of routine documentation, as in other export control enforcement cases.

* * * * * * *

D. CONSULTATION WITH OTHER COUNTRIES

The United States continues to address the problem of biological weapons proliferation through a variety of international fora, and urges other AG members to pursue export control cooperation with non-members on a bilateral or regional basis.

Recognizing that multilateral coordination of export controls and enforcement actions is the most effective means of restricting proliferation activities, the United States coordinates its controls on biological items with 29 other countries in the AG. At the annual AG plenary, held last October 12–15, 1998, members reviewed export controls on certain biological agents and toxins and biological equipment items.

The U.S. continues to urge key non-AG countries to adopt AG biological export controls. In 1998, BXA interacted with several of the Newly Independent States, including Russia, to raise awareness about the problems of proliferation and the need to develop export control systems that support nonproliferation goals.

In addition, during 1998, there was further discussion on completing a protocol to the BWC. The BWC, which entered into force in 1975, is an international arms control agreement among 140 nations that bans the development, production, stockpiling, acquisition, or retention of biological agents or toxins that have no justification for prophylactic, protective or other peaceful purposes. Discussions on a protocol included mandatory data declarations, on-site inspections, enhanced information exchange, and a permanent BWC international oversight organization.

E. ALTERNATIVE MEANS

The United States continues to address the problem of proliferation of biological weapons on a number of fronts. Direct negotiations with countries intent on acquiring biological weapons are not likely to prevent the use of U.S.-origin materials in such activities. Neither are such negotiations likely to affect the behavior of these countries.

Alternative means to curtail the acquisition and development of biological warfare capabilities, such as diplomatic negotiations, do not obviate the need for controls. The following examples demonstrate additional means that have been and will continue to be used in an attempt to curb the use and spread of biological weapons:

- U.S. Legislation—Regulations issued by the Public Health Service (42 CFR Part 72) pursuant to the "The Antiterrorism and Effective Death Penalty Act of 1996" (Sec. 511 of Pub. L.104–132), places additional shipping and handling requirements on laboratory facilities that transfer or receive select infectious agents capable of causing substantial harm to human health.

  The Chemical and Biological Weapons Control and Warfare Elimination Act of 1991 (Title III, Pub. L.102–182) provides for the imposition of sanctions on foreign persons and countries for certain kinds of chemical and biological weapons related activity. To date, no sanctions have been imposed for biological weapons related activities.
- Trilateral US/UK/Russian Statement—In September 1992, the United States, United Kingdom and Russia confirmed their commitment to full compliance with the Biological Weapons Convention and agreed to a number of steps including data exchanges, visits to sites, and further consultations to enhance cooperation and confidence.
- Biological Weapons Convention—An Ad Hoc Group continues to work to develop a protocol to strengthen the effectiveness and build confidence in compliance with the BWC.

F. FOREIGN AVAILABILITY

Past reviews conducted by BXA identified the availability of AG-controlled viruses and bacteria in the non-AG countries of Brazil, Bulgaria, India, Indonesia, Iran, Jordan, Mexico, PRC, Senegal, Singapore, Taiwan, and Thailand and related AG-controlled equipment items available in Brazil, Bulgaria, Hong Kong, India, Israel, Malaysia, Pakistan, PRC, Russia, Saudi Arabia, Singapore, South Africa, Taiwan and Ukraine. (Most of this equipment has application in the food processing and pharmaceutical industries.) Many of the countries listed above are parties to the BWC and BXA is working with other U.S. agencies as part of ongoing international efforts to strengthen the effectiveness of this Convention.

10. High Performance Computers (Section 742.12)

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

The revision of export controls on computers will continue to be a high priority for the Administration as improvements in computer technology continue to enhance system performance. Major revisions occurred in February 1994, and again in January 1996. In April 1998, an independent study was completed under a contract funded by the Commerce Department to review computer system improvements and the parameters for measuring performance. The United States Government is reviewing the results of this study for its implications for U.S. export control policy.

Congress added provisions to the National Defense Authorization Act for Fiscal Year 1998 (NDAA), which President Clinton signed on November 18, 1997, requiring exporters to notify the Department of Commerce of their intent to export or reexport high performance computers (HPCS) with a performance capability of between 2,000 and 7,000 million theoretical operations per second (MTOPS) to end-users in countries known in the Export Administration Regulations (EAR) as Tier 3 countries. On February 3, 1998, Department of Commerce revised the EAR through a Federal Register notice to implement this new legal requirement. Under the new procedures, the Secretaries of Commerce, Defense, Energy and State, and the Director of the Arms Control and Disarmament Agency have ten days to review each notification. If no agency raises a specific objection to the proposed export or reexport, the exporter may ship. If an agency objects to the transaction, the United States will require a license application. The law also requires the Department of Commerce to perform post-shipment visits on exports of HPCs with a performance capability over 2,000 MTOPS to Tier 3 countries, whether or not a license was required.

The controls in force during 1998, listed by Tier group limits and requirements, are as follows (See Appendix IV for a list of the countries in each Tier group):

Computer Country Tier 1—The first level of the sliding scale allows exports to most of the industrialized democracies to proceed without prior government review (i.e., export under a license exception), and with no limitation on MTOPS. Exporters are required to maintain records of shipments. Reexport and retransfer restrictions also apply.

Computer Country Tier 2—The second level applies to countries with low risk proliferation and export control records. There is no prior government review for exports of up to 10,000 MTOPS. Reexport and retransfer restrictions apply. Exports above 10,000 MTOPS to these countries require prior government review (an export license).

Computer Country Tier 3—The third level applies to countries posing proliferation or other security risks. Licenses are required for computers with a capability above 2,000 MTOPS for military and proliferation end-uses and users, and at 7,000 MTOPS for all other end-uses and users. As stated above, prior government review under the "NDAA" notification process, is now required for all exports of computers between 2,000 and 7,000 MTOPS intended for civil end users and uses. These computers may be exported without a license, provided no reviewing government agency raises an ob-

jection within the first ten days of the reviewing process. If an objection is raised, a license is required. Exporters are required to provide a written report to the government within 30 days of the export of a computer without a license. Using this information and licensing data, the government will perform post-shipment visits on exports of HPCS over 2,000 MTOPS to Tier 3 countries, regardless of whether a license was issued. Reexport and retransfer restrictions apply.

Computer Country Tier 4—The fourth level applies to terrorism-supporting countries (Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria). The President decided to continue to deny high performance computers to these destinations. A license is required from Commerce to export or reexport to any end-user in Syria computers with a CTP greater than or equal to 6 MTOPS. Cuba, Iran, Iraq, Libya, North Korea and Sudan are subject to comprehensive trade embargoes and hence U.S. government authorization is required for exports of any computer, regardless of MTOP level, to Cuba, Libya, Iran, Iraq, North Korea, and Sudan, and for reexport of computers with a CTP equal to or above 6 MTOPS to Iran.[15] (The Department of the Treasury's Office of Foreign Assets Control administers these trade embargoes. However, to avoid duplication in license requirements, Commerce and Treasury have allocated licensing responsibility in many instances. Commerce exercises licensing responsibility for exports and reexports to Cuba and North Korea and for reexports to Libya; Treasury exercises licensing responsibility for exports and reexports to Iran and Iraq and for exports to Libya.) Applications to export or reexport controlled computers to designated terrorist supporting countries will generally be denied.

* * * * * * *

11. Encryption (Section 742.15)

EXPORT CONTROL PROGRAM DESCRIPTION AND LICENSING POLICY

* * * * * * *

ANALYSIS OF CONTROL AS REQUIRED BY SECTION 6(F) OF THE ACT

A. *The Purpose of the Control*

These controls are maintained to protect U.S. national security and foreign policy interests, including the safety of U.S. citizens here and abroad. Encryption can be used to conceal the communications or data of terrorists, drug smugglers, or others intent on taking hostile action against U.S. facilities, personnel, or security interests. Policies concerning the export control of cryptographic products are based on the fact that the proliferation of such products will make it more difficult for the U.S. Government to have access to information vital to national security and foreign policy interests. Also, cryptographic products and software have military and intelligence applications. These controls are consistent with E.O. 13026 of November 15, 1996, and a Presidential Memorandum of the same date.

[15] The scope of the embargo as pertains to reexports to Sudan has not been determined as of the submission of this report.

B. *Considerations and/or Determinations of the Secretary of Commerce:*

1. *Probability of Achieving the Intended Foreign Policy Purpose.* Consistent with Executive Order 13026 of November 15, 1996, and a Presidential Memorandum of the same date, the Secretary has determined that the control achieves the intended purpose of restricting the export of commercial encryption items, including products with key recovery features, if their export would be contrary to U.S. national security or foreign policy interests.

2. *Compatibility with Foreign Policy Objectives.* The Secretary has also determined that the controls are compatible with the foreign policy objectives of the United States. The control is consistent with U.S. foreign policy goals to promote peace and stability and to prevent U.S. exports that might contribute to destabilizing military capabilities and international terrorist or criminal activities against the United States. The controls also contribute to public safety by promoting the protection of U.S. citizens overseas.

3. *Reaction of Other Countries.* The Secretary has determined that the reaction of other countries to this control has not rendered the control ineffective in achieving its intended foreign policy purpose or counterproductive to U.S. foreign policy interests. Other allied countries recognize the need to control exports of encryption products for national security and law enforcement reasons. These countries also recognize the desirability of restricting goods that could compromise shared security and foreign policy interests.

* * * * * * *

APPENDIX I

SUMMARY OF COMMENTS ON FOREIGN POLICY CONTROLS

In the *Federal Register* of October 13, 1998, the Department of Commerce requested comments from the public on existing foreign policy-based controls maintained under Section 6 of the Export Administration Act. In the notice, the Department sought comments on how existing foreign policy-based controls have affected exporters and the overall public. Specifically, the notice invited public comments about the effectiveness of controls where foreign availability exists; whether the goals of the controls can be achieved through other means such as negotiations; the compatibility of the overall U.S. policy toward the country in question; the effect of controls on U.S. economic performance; and the enforceability of the controls. The Department also requested comments from the member companies of its Technical Advisory Committees (TACS) and the President's Export Council Subcommittee on Export Administration (PECSEA).

The Department received eight responses to this request, from the Regulations and Procedures Technical Advisory Committee (RPTAC), MTS Systems Corporation, William A. Root, Electronic Industries Alliance (EIA), the Industry Coalition on Technology Transfer (ICOTT), Semiconductor Equipment and Materials International (SEMI) the National Association of Manufacturers (NAM), and Balzers und Leybold Deutschland Holding AG. The Bureau of Export Administration (BXA) makes the comments available for

public review upon request. This Appendix summarizes the comments received and some of the various reports issued in 1998 on unilateral sanctions.

INDUSTRY COMMENTS

MTS System Corporation's response centered on the negative effects of unilateral export controls and embargoes. MTS System believes that unilateral controls and embargoes do not deny equipment to the sanctioned entity and result in a significant losses of business and reputation for U.S. companies. Business opportunities lost in China, India and Iran were used to illustrate MTS System's comments.

William Root wrote urging complete harmonization of U.S. controls with multilateral regimes. Mr. Root advocates revamping U.S. export controls to include multilateral items not currently on the CCL, to bring CCL items currently above and/or below the standard of multilateral controls in line, and to remove unilateral controls. Additionally, his letter identifies fifteen unilateral ECCNs that are identified by numbers indicating that they are multilateral, and 105 ECCNs listed with their respective unilateral and multilateral portions incorrectly identified.

ICOTT wrote in support of William Root's comments in regard to accurate identification of controls on the CCL and harmonization of the CCL with multilateral regimes. In addition, ICOTT opposes the imposition of export controls for symbolic reasons (such as distancing the United States from the actions of other countries) and urges the Administration to fulfill its promise that controls should not be imposed on items with demonstrated foreign availability. Finally, ICOTT urges the Administration to fulfill its promise to publish the names of all suspect end-users in the *Federal Register*.

Electronic Industries Alliance focused its response on two negative effects of unilateral controls: first, their negative impact on the international competitiveness of American industry, and second, the inability of unilateral controls to prevent sanctioned states from engaging in prohibited activities. EIA believes that when formulating export policy, the Department of Commerce should identify the actual effect of the controls on the target country, the potential effect of the proposed controls on U.S. industry, and the level of multilateral cooperation (catchalls, etc.) available to support the controls. Development of these criteria to analyze the effectiveness of the controls would establish the rationale (or lack thereof) of the controls and therefore lead to a better balance between the level of international competition needed to maintain the health of the U.S. economy and the protection of foreign policy and national security interests.

The comments submitted by SEMI were also in opposition to unilateral export controls. In particular, SEMI believes that the continuation of unilateral EPCI controls penalizes U.S. business through the loss of sales revenues that could support domestic research and development efforts. SEMI urges the Department of Commerce to assess the costs of unilateral controls and to work in tandem with U.S. allies in pursuit of effective multilateral sanction policies.

The RPTACs comments promote the use of unilateral controls when the control is demonstrably effective in achieving its intended purpose. RPTAC believes that unilateral controls should be regulated within specific parameters, including design of the control to meet specific objectives and the use of unilateral controls only when the control's objective can (as compared to may) be achieved. The India-Pakistan sanctions, NDAA computer controls, the Department of Commerce's relationship with China (PRC), the deemed export rule and the lack of conformity of some EAR revisions with multilateral requirements are all cited as examples of foreign-policy based controls that do not address their objective and result in unintended consequences for U.S. industry.

Balzer und Leybold Deutschland Holding AG (BLDH) commented that under the EAR, U.S. firms have a great number of advantages in exporting controlled goods as compared to their European counterparts. As an example, BLDH cited ECCNs 2B350 through 2B352, under which the U.S. Government allows exports from the United States to 154 countries under "No License Required" standards but requires licenses for the same goods being reexported from Germany to all but 21 countries. Additionally, BLDH stated that the EAR is too complicated, citing Section 744 (Control Policy: End-User and End-Use Based) as an overly complex section, the whole of which is contained in a few lines in the European Community's Council Regulation No. 3381/94.

UNILATERAL SANCTIONS

Much attention in 1998 focused on the issue of U.S. unilateral sanctions. Many industry associations and research institutes published reports on sanctions. In addition, the USDA released a report analyzing the impact of U.S. sanctions on U.S. agricultural trade. This Appendix, while not inclusive, summarizes some of the reports published this year and highlights their major conclusions.

The report released by USDA during the summer of 1998 concluded that U.S. sanctions on six specific countries cost the United States a minimum of $500 million in lost trade during 1996. Industry response to the report estimates the loss as much higher. The Foreign Agricultural Service's contribution to the report included an analysis of sanctions concluding that normalization of investment flows and the ability to get foreign investment into sanctioned countries (i.e., Cuba, North Korea, Iran, Iraq, etc.) would do more to expand consumption of U.S. agricultural products than would simply lifting agricultural sanctions.

In July, 1998, the Council on Foreign Relations published a book—*Economic Sanctions and American Diplomacy,* edited by Richard N. Haass, exploring the paradoxical role of sanctions in American foreign policy. The book focuses on the concept that although sanctions are often ineffective, they have become one of the foreign policy tools of choice for the United States in the post-Cold War world. In addition to exploring the role that sanctions play in American foreign policy, the book suggests reforms that would enable Congress and the Administration to make better decisions about sanctions and to implement them more effectively.

A policy brief released by The Brookings Institution in June, 1998, "Economic Sanctions: Too Much of a Bad Thing," explores the

increasing use of sanctions to promote the full range of American foreign policy objectives. The brief concludes that sanctions too often turn out to be expressions of U.S. preferences that hurt American business interests without positively changing the target's behavior.

The Center for Strategic and International Studies released the interim report from its Steering Committee on Economic Sanctions in June, 1998. The theme of the report is that unilateral economic sanctions are ineffective and damage U.S. national interests.

NAM provided the Department of Commerce with two of its reports: "A Catalog of New U.S. Unilateral Economic Sanctions for Foreign Policy Purposes, 1993–96", and "Unilateral Economic Sanctions 1997–98." Although NAM recognizes the necessity of multilateral controls, it does not believe that the EPCI items the U.S. controls unilaterally are controllable and/or are sufficiently critical to proliferation programs to justify controls. Additionally, NAM believes that unilateral controls are an impediment to the international competitiveness of U.S. business.

6. Department of the Treasury

a. Terrorist Assets Report

1998 Annual Report to the Congress on Assets in the United States Belonging to Terrorist Countries or International Terrorist Organizations, January 1999

SUMMARY

More than $3.4 billion of assets of seven state sponsors of terrorism are located within U.S. jurisdiction. Of that amount, more than $3.3 billion are blocked by the U.S. Department of the Treasury pursuant to economic sanctions imposed by the United States against six of the terrorist countries. In addition, approximately $675,000 in assets of international terrorist organizations which were identified and blocked within the United States in 1995, remain blocked in 1998. Approximately $23.6 million in funds are currently blocked based upon an interest of Usama Bin Ladin.

BACKGROUND

Section 304 of Public Law 102–138, as amended by Public Law 103–236 (22 U.S.C. § 2656g), requires the Secretary of the Treasury, in consultation with the Attorney General and appropriate investigative agencies, to provide annual reports to the Congress concerning the nature and extent of assets held in the United States by terrorist countries and organizations engaged in international terrorism. The Department of the Treasury submitted its first Terrorist Assets Report to the Congress in April 1993. The current report, covering calendar year 1998, is the seventh successive Terrorist Assets Report. The Terrorist Assets Report on Foreign Relations and the Committee on Foreign Relations and the Committee on Finance in the Senate and to the Committee on International Relations and the Committee on Ways and Means in the House. It was prepared by the Department of the Treasury's office of Foreign Assets Control ("OFAC"), which has the responsibility for administering and enforcing economic sanctions programs mandated by the President pursuant to his declaration of a national emergency with respect to particular foreign countries and non-state parties. Almost ninety-nine percent of the identified U.S.-based assets of state sponsors of terrorism and all blocked assets of international terrorist organizations are under the sanctions controls of OFAC.

More than a dozen Federal agencies and offices were polled in developing the report. They included:

Department of State Joint Chiefs of Staff
Department of Justice U.S. Customs Service
Federal Bureau of Investigation Internal Revenue Service
U.S. Secret Service Department of Defense

Intelligence Community Office of Foreign Assets Control
Bureau of Alcohol, Tobacco and Firearms
Committee on Foreign Investment in the United States (CFIUS)
Financial Crimes Enforcement Network (U.S. Treasury)

State Sponsors of Terrorism: State sponsors of terrorism are those countries designated by the Secretary of State under Section 40(d) of the Arms Export Control Act, Title 22, U.S.C. § 2780(d). States currently listed as sponsors of terrorism are: Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria, however blockings are only available for the first six countries, and not for Syria. The existing asset freezes, financial prohibitions, trade embargoes, and travel and transportation-related restrictions are promulgated under the authority of the Trading with the Enemy Act, Title 50, U.S.C., Appendix, §§ 1–44 (Cuba and North Korea), the International Emergency Economic Powers Act, Title 50 U.S.C., §§ 1701–1706 ("IEEPA") (Iran, Iraq, Libya, and Sudan), the United Nations Participation Act, Title 22, U.S.C., § 287c (Iraq andLibya), the International Security and Development Cooperation Act, Title 22, U.S.C., § 2349aa–8 & 9 (Iran and Libya), and the Antiterrorism and Effective Death Penalty Act of 1996 (Pub. L. 104–132, 110 Stat. 1214–1319 (the "Antiterrorism Act") (Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria). Section 321 of the Antiterrorism Act (18 U.S.C. 2332d) makes it a criminal offense for United States persons, except as provided in regulations issued by the Secretary of the Treasury in consultation with the Secretary of State, to engage in financial transactions with the governments of countries designated under section 6(j) of the Export Administration Act (50 U.S.C. App. 2405) as supporting international terrorism.

Information concerning the known holdings in the United States of the seven state sponsors of terrorism is reported below in Part I. It should be noted that, with the exception of Syria, the totals represent amounts frozen under United States sanctions programs which, in most cases, block all property in which the target is believed to have any interest. In some instances the interest may be partial, or fall short of undisputed title to the property. Determinations concerning these interests are made based on all relevant information before OFAC. Many of the assets are also the subject of other claims, sometimes by, multiple parties. Blocked assets may not be attached, however, by any claimant unless authorized by OFAC consistent with U.S. policy.

International Terrorist Organizations: Section 304 of Public Law 102–138 also requires the Secretary of the Treasury to report to the Congress annually on those assets of international terrorist organizations that are held within the United States. For purposes of this report, Treasury has used three documents to establish a baseline for determining which groups may fall within the definition of "international terrorist organization."

Section 302 of the Antiterrorism and Effective Death Penalty Act of 1996 ("Antiterrorism Act") authorizes the Secretary of State to designate organizations meeting stated requirements as foreign terrorist organizations, with prior notification to the Congress of the intent to designate. Upon that notification to the Congress, the Secretary of the Treasury may require U.S. financial institutions to block certain financial transactions involving assets of the foreign

organizations proposed for designation. Section 303 of the Act makes it a crime for persons within the U.S. or subject to U.S. jurisdiction to knowingly provide material support or resources to a foreign terrorist organization designated under section 302. Additionally, except as authorized by the Treasury Department, institutions in possession or control of funds in which a foreign terrorist organization or its agent has an interest are required to block such funds and file reports in accordance with Treasury Department regulations.

The first baseline document (Tab 1) is the list of Foreign Terrorist Organizations ("FTOs") designated by the Secretary of State on October 8, 1997 pursuant to the Antiterrorism Act, which became effective on April 24, 1996 (Tab 2). The Antiterrorism Act authorizes the Secretary of State, in consultation with the Departments of the Treasury and Justice, to designate certain organizations as foreign terrorist organizations. Thirty groups worldwide were designated by the Secretary of State as Foreign Terrorist Organizations. Notice of the groups that comprise the Foreign Terrorist Organizations (Tabs 1 and 14) are discussed in more detail in Part II.

The second baseline document (Tab 2) is Executive Order 12947, which became effective on January 24, 1995, and which blocks assets in the United States or within the possession or control of U.S. persons of terrorists who threaten to disrupt the Middle East Peace Process. Twelve Middle East terrorist groups were identified in the Executive order. Accompanying and subsequent notices of the groups and individuals who comprise the "List of Specially Designated Terrorists Who Threaten To Disrupt the Middle East Peace Process" (Tab 4), are discussed in more detail in Part II, which addresses international terrorists organizations, assets in the United States, and are included as individual attachments.

The third baseline document (Tab 3) is Executive order 13099, which became effective on August 25, 1998, and amended Executive Order 12947 by blocking the assets of three additional terrorists and one organization. Specifically, this order identifies Usama bin Muhammad bin Awad bin Ladin, the Islamic Army (and it's aliases), Abu Hafs al-Masri, and Rifa' i Ahmad Taha Musa as the individuals and organization added to the Annex of E.O. 12947.

PART I—KNOWN ASSETS OF STATE SPONSORS OF TERRORISM

The following information describes the nature and extent of assets within United States jurisdiction that belong to countries identified as state sponsors of terrorism. These countries and the gross amounts of their reported U.S.-based assets are (in millions): Cuba—$170.6; Iran—$22.5; Iraq—$2,200.2; Libya—$951.3; North Korea—$26.3; Sudan—$17.3; and Syria—$51.0. The total of their gross assets within U.S. jurisdiction is $3.439 billion dollars.

The assets reported for Iran in Exhibit A are diplomatic properties remaining blocked since the 1979–81 hostage crisis. A variety of other obligations to Iran may ultimately be determined to exist, depending on the outcome of cases before the Iran-U.S. Claims Tribunal.

Almost ninety-nine percent of the known assets within U.S. jurisdiction of state sponsors of terrorism are blocked by the Depart-

ment of the Treasury. However, not all of the blocked assets are literally within the United States. Substantial amounts, identified further below, are in foreign branches of U.S. banks. They are blocked because, under U.S. law, those bank branches are subject to United States jurisdiction. Consequently, those assets are not blocked at institutions within the United States.

Changes in the value, location, and composition of the blocked assets identified below occur over time as OFAC receives reports from holders of blocked assets identifying additional assets of sanctioned countries, updates information received from holders of blocked accounts on accrued interest and fluctuating market values, or licenses various transactions in accordance with U.S. foreign policy objectives and applicable law.

Exhibit A: Known Assets of State Sponsors of Terrorism

(amounts in millions of U.S. dollars)

Country	Amount	Explanation
Cuba	$170.6	Government of Cuba's blocked assets. Primarily bank accounts Source: OFAC, Treasury.

	$23.5	*Net Blocked North Korean Assets in U.S.*
Sudan	$17.3	Sudan's blocked bank deposits. Source: OFAC, Treasury.
	(0.4)	(Blocked in U.S. banks' foreign branches.)
	$16.9	*Net Blocked Sudan Assets in U.S.*
Syria	*$51.0*	Total liabilities of U.S. banking and non-banking institutions to Syrian institutions. Source: Treasury Bulletin, December 1998.
TOTALS:	$3,439.2	Total state sponsor assets within U.S. jurisdiction.
	($51.0)	(Unencumbered assets of Syria.)
	$3,388.2	Total blocked state sponsor assets within U.S. jurisdiction.
	($544.8)	(Total blocked in U.S. banks' foreign branches.)
	($211.0)	(UNSCR 778 loan [Iraq].)
	$*2,632.4*	*Total blocked state sponsor assets within the United States.*

PART II—ASSETS OF INTERNATIONAL TERRORIST ORGANIZATIONS

On January 23, 1995, President declared a national emergency pursuant to IEEPA (50 U.S.C. § 1701 et seq.) and other authorities and signed Executive Order 12947, "Prohibiting Transactions With Terrorists Who Threaten To Disrupt the Middle East Peace Process." Twelve Middle East terrorist organizations were named in the annex to the Order.[1] The Order prohibits transfers, including "charitable contributions," of funds, goods, or services to any orga-

[1] Tab 2—Executive Order 12947, 60 Federal Register 5–79 (January 25, 1995). The terrorist organizations identified in the Annex as originally published are: (1) Abu Nidal Organization (ANO), (2) Democratic Front for the Liberation of Palestine (DFLP), (3) Hizballah, (4) Islamic Gama' at (IG), (5) Islamic Resistance Movement (HAMAS), (6) Jihad, (7) Kach, (8) Kahane Chai, (9) Palestinian Islamic Jihad—Shiqaqi faction (PIJ), (10) Palestine Liberation Front—Abu Abbas faction (PFL-Abu Abbas), (11) Popular Front for the Liberation of Palestine (PFLP), and (1) Popular Front for the Liberation of Palestine—General Command (PFLP-GC).

On January 18, 1996, and again on January 21, 1997, January 21, 1998, and January 21, 1999 President Clinton signed a Notice that continues the national emergency with respect to foreign terrorists who threaten to disrupt the Middle East Peace Process. Those Notices (Tabs 8, 9, 10, and 11 of this report) were published on January 21, 1996, (61 *Federal Register* 1695), January 23, 1997, (62 *Federal Register* 3439), January 22, 1998, (63 *Federal Register* 3445), and January 22, 1999, (64 *Federal Register* 3393), respectively.

nizations or individuals designated under its authority; and it blocks all property in the United States or within the possession or control of a U.S. person in which there is an interest of any designated terrorist.

The Order also applies to persons determined by the Secretary of the Treasury, in consultation with the Secretary of State and the Attorney General, to be owned or controlled by, or to act for or on behalf of, any person designated under the order. Collectively, these prohibited persons are known as "Specially Designated Terrorists" or "SDTs." A concurrent notice from Treasury published 31 pseudonyms and name variations for the twelve terrorist organizations and added the identities of 18 individuals who have important roles with the terrorist groups.[2]

The Order also blocks the property and interests in property of persons found by the Secretary of State, in coordination with the Secretary of the Treasury and the Attorney General, (1) to have committed, or to pose a significant risk of committed acts of violence that have the purpose or effect of disrupting the Middle East Peace, or (2) to be assisting in, sponsoring or providing financial, material, or technological support for, or services in support of, terrorist activities.

On August 20, 1998, President Clinton signed Executive Order 13099, "Prohibiting Transactions With Terrorists Who Threaten To Disrupt the Middle East Peace Process" (Tab 3) to amend E.O. 12947 by adding three individuals and one organization to the annex of E.O. 12947:

Usama bin Muhammad bin Awad bin Ladin
Islamic Army (and it's aliases)
Abu Hafs al-Masri
Rifa' i Ahmad Taha Musa

Executive Order 13099 was issued under the same authority as E.O. 12947.

SDT Blockings under E.O. 12947 and E.O. 13099. Total current blockings by OFAC under the terrorism Executive orders are $24.4 million. These blockings involve assets of individuals added to the list of Specially Designated Terrorists subsequent to the publication of the first SDT list in January 1995. Accounts of agents acting on behalf of the terrorist organization HAMAS[3] are blocked in U.S. banks; and $200,000[4] of their U.S. real estate holdings are blocked. On June 9, 1998, the Department of Justice seized both the real estate holdings and the bank accounts of an SDT under

---

[2] Tab 4—60 *Federal Register* 5084 (January 25, 1995). This *Federal Register* Notice of the Specially Designated Terrorists List included the 12 organizations named in E.O. 12947, 31 pseudonyms and name variations for the groups, and 18 key individuals, including 9 aliases for them. See Tabs 5, 6 and 7 for additional individuals who have been added to the SDT list.

[3] Tab 5—The designation of Mohammad Abd El-Hamid Khalil SALAH as a Specially Designated Terrorist was published in the *Federal Register* on August 11, 1995. (60 *Federal Register* 41152).

Tab 6—The designation of Mousa Mohammed ABU MARZOOK as Specially Designated Terrorist was published in the *Federal Register* on August 29, 1995. (60 *Federal Register* 44932). The Israeli government had requested MARZOOK's extradition, but after the Israelis dropped their request, he was released from a jail in New York and went to Jordan.

[4] Two properties valued at $260,000 and that were blocked in August 1995, were sold in the summer of 1998. OFAC learned of the sale subsequently. OFAC enforcement action is pending.

an asset forfeiture statute. The matter is still pending in the Northern District of Illinois.

Furthermore, a bank account belonging to Ramadan Abdullah SHALLAH,[5] the head of the terrorist organization Palestinian Islamic Jihad (PIJ), has been blocked; and a related organization's account over which SHALLAH has held signature authority has been blocked. In addition, approximately $23.6 million in funds are currently blocked based upon an interest of Usama Bin Ladin.

The following chart (Exhibit B) details the assets of international terrorist organizations that have been blocked pursuant to E.O. 12947 and E.O. 13099.

Exhibit B: Blocked Assets Under the SDT Program

SDT Organization	Description	Amount
Hamas	Bank Accounts	$196,116.26
	Credit/Debit Cards	$671.83
	Real Estate	$460,000.00
	Total (Hamas)	$656,788.09
Palestinian Islamic Jihad	Bank Accounts	$18,293.31
Usama bin Ladin		$23,685,731.30
Total blocked assets of SDTs		$24,360,812.70

On April 24, 1996, Congress passed the Antiterrorism and Effective Death Penalty Act of 1996 ("Antiterrorism Act") (Tab 12) which in part prohibits persons within the U.S. or subject to the jurisdiction of the United States from knowingly providing material support or resources to a foreign terrorist organization.[6] Pursuant to the Antiterrorism Act, on October 8, 1997, 30 organizations were designated by the Secretary of State, in consultation with the Secretary of the Treasury and the Attorney General, as Foreign Terrorist Organizations ("FTOs") (Tab 1).

The 30 FTOs include the 12 Middle East terrorist organizations previously designated under Executive Order 12947 and 18 other foreign organizations in South America, Europe, and Asia. Subsequent to the State Department's designation, the Treasury Department published a duplicate list of the 30 FTOs (Tab 14) in the Federal Register[7] in furtherance of section 303 of the Antiterrorism

[5] Tab 7—The designation of Dr. Ramadan Abdullah SHALLAH as a Specially Designated Terrorist was published in the *Federal Register* on November 27, 1995. (60 *Federal Register* 58435).

[6] Tab 12, Section 303.

[7] Tab 1—62 *Federal Register* 52650 (October 8, 1997). The 30 Foreign Terrorists Organizations designated by the Department of State are: (1) Abu Nidal Organization, (2) Abu Sayyaf Group, (3) Armed Islamic Group, (4) Aum Shinrikyo, (5) Democratic Front for the Liberation of Palestine, (6) Euzkadi Ta Askatasuna, (7) Gama'a al-Islamiyya, (8) HAMAS, (9) Harakat ul-Ansar, (10) Hizballah, (11) Japanese Red Army, (12) al-Jihad, (13) Kach, (14) Kahane Chai, (15) Khmer Rouge, (16) Kurdistan Worker's Party, (17) Liberation Tigers, (18) Manuel Rodriguez Patriotic Front Dissidents, (19) Mujahedin-e Khalq Organization, (20) National Liberation Army, (21) Palestinian Islamic Jihad—Shaqaqi Faction, (22) Palestine Liberation Front—Abu Abbas Faction, (23) Popular Front for the Liberation of Palestine, (24) Popular Front for the Liberation of Palestine—General Command, (25) Revolutionary Armed Forces of Colombia, (26) Revolutionary

Act which was implemented in part by the Foreign Terrorist Organizations Sanctions Regulations (31 CFR Part 597) published on October 8, 1997 (62 Federal Register 52493).

Section 302 of the Antiterrorism Act requires U.S. financial institutions to block financial transactions involving a proposed FTO's assets pursuant to an order of the Secretary of the Treasury. Pursuant to Section 303 of the Antiterrorism Act, financial institutions must retain or control those funds in which an FTO has an interest and report that information to the Treasury Department.

FTO Blockings under the Antiterrorism Act. To date, the Treasury Department has not blocked any financial transactions under the Antiterrorism Act. All blockings of foreign terrorist assets to date have occurred in the SDT program under the authority of IEEPA and Executive Orders 12947 and 13099. The Treasury Department continues to work closely with other agencies in seeking information concerning possible assets within the jurisdiction of the United States in which there may be an interest of any of the 30 FTOs.

Organization 17 November, (27) Revolutionary People's Liberation Party/Front, (28) Revolutionary People's Struggle, (29) Shining Path, and (30) Tupac Amaru Revolutionary Movement.

b. Office of Foreign Assets Control

(1) Terrorism: What You Need to Know about U.S. Sanctions

A summary of the "Terrorism Sanctions Regulations," Title 31 Part 595 of the U.S. Code of Federal Regulations, the "Terrorism List Governments Sanctions Regulations," Title 31 Part 596 of the U.S. Code of Federal Regulations, and the "Foreign Terrorist Organizations Sanctions Regulations," Title 31 Part 597 of the U.S. Code of Federal Regulations.

TERRORISM SANCTIONS REGULATIONS

On January 23, 1995, President Clinton signed Executive Order 12947, "Prohibiting Transactions with Terrorists Who Threaten to Disrupt the Middle East Peace Process." The Order blocked all property subject to U.S. jurisdiction in which there is any interest of 12 Middle East terrorist organizations included in an Annex to the Order. On August 21, 1998, the President amended Executive Order 12947, adding additional names. Executive Order 12947 blocks the property and interests in property of persons designated by the Secretary of State, in coordination with the Secretary of Treasury and the Attorney General, who are found (1) to have committed or to pose a significant risk of disrupting the Middle East peace process, or (2) to assist in, sponsor or provide financial, material, or technological support for, or services in support of, such acts of violence. The Order further blocks all property and interests in property subject to U.S. jurisdiction in which there is any interest of persons determined by the Secretary of the Treasury, in coordination with the Secretary of State and the Attorney General, to be owned or controlled by, or to act for or on behalf of any other person designated pursuant to the Order (collectively "Specially Designated Terrorists" or "SDTs"), designated by an "[SDT]" in the list at the end of this publication. The Order prohibits any transaction or dealing by a United States person or within the United States in property or interests in property of SDTs, including the making or receiving of any contribution of funds, goods, or services to or for the benefit of such persons. In implementation the Treasury Department has issued the Terrorism Sanctions Regulations.

Blockings must be reported within 10 days by fax to OFAC's Compliance Programs Division at 202/622–1657. Blocked accounts must be interest-bearing, at rates similar to those currently offered other depositors on deposits of comparable size and maturity. Maturities on blocked accounts may not exceed 90 days. Debits to blocked customer accounts are prohibited, although credits are authorized.

Corporate criminal penalties for violations of the International Emergency Economic Powers Act range up to $500,000; individual penalties range up to $250,000 and 10 years in jail. Civil penalties of up to $11,000 may also be imposed administratively.

TERRORISM LIST GOVERNMENTS SANCTIONS REGULATIONS

On April 24, 1996, President Clinton signed into law the Antiterrorism and Effective Death Penalty Act of 1996, Public Law 104–132, 110 Stat. 1214–1319. Section 321 of the Act makes it a criminal offense for U.S. persons, except as provided in regulations issued by the Secretary of the Treasury in consultation with the Secretary of State, to engage in financial transactions with the governments of countries designated under section 6(j) of the Export Administration Act of 1979, 50 U.S.C. App. 2405, as supporting international terrorism. U.S. persons who engage in such transactions are subject to criminal penalties under title 18, United States Code. In implementation of section 321, the Treasury Department has issued the Terrorism List Governments Sanctions Regulations.

The countries currently designated under section 6(j) of the Export Administration Act are Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria. The provisions of existing OFAC regulations governing Cuba, Iran, Iraq, Libya and North Korea continue in effect with the added authority of section 321. Financial transactions of U.S. persons with the governments of those five countries are governed by the separate parts of Title 31 Chapter V of the U.S. Code of Federal Regulations imposing economic sanctions on those countries and information about those programs is available in separate OFAC brochures.

Regarding the governments of countries designated under section 6(j) that are not otherwise subject to economic sanctions administered by OFAC, at present the government of Syria, the Terrorism List Governments Sanctions Regulations prohibit U.S. persons from receiving unlicensed donations and from engaging in financial transactions with respect to which the U.S. person knows or has reasonable cause to believe that the financial transaction poses a risk of furthering terrorist acts in the United States. Banks located in the United States and U.S. banks located offshore must reject transfers in the form of gifts or charitable contributions from the government of Syria, or from entities owned or controlled by the government of Syria, unless the bank knows or has reasonable cause to believe that the transaction poses a risk of furthering terrorism in the United States, in which case the funds must be retained by the bank. Banks should immediately notify OFAC Compliance about any retained items. Reject items must be reported within 10 business days of rejection. For the purposes of this program only, a financial transaction not originated by the government of Syria (including its central bank and government owned-or-controlled banks acting for their own accounts), but transferred to the United States through one of those banks, is not considered to be a prohibited financial transaction with the government of Syria.

FOREIGN TERRORIST ORGANIZATIONS SANCTIONS REGULATIONS

Section 302 of the Antiterrorism and Effective Death Penalty Act of 1996 also authorizes the Secretary of State to designate organizations as "Foreign Terrorist Organizations" ("FTOs"). The Act makes it a criminal offense for U.S. persons to provide material

support or resources to FTOs and requires financial institutions to block all funds in which FTOs or their agents have an interest. The term "financial institutions" comes from 31 U.S.C. 5312(a)(2) and is defined very broadly. Among the types of businesses covered by Treasury's Foreign Terrorist Organizations Sanctions Regulations, which implement Section 302 of the Act, are banks, securities and commodities broker/dealers, investment companies, currency exchanges, issuers, redeemers, and cashiers of traveler's checks, checks, money orders, or similar instruments, credit card system operators, insurance companies, dealers in precious metals, stones or jewels, pawnbrokers, loan and finance companies, travel agencies, licensed money transmitters, telegraph companies, businesses engaged in vehicle sales, including automobile, airplane or boat sales, persons involved in real estate closings or settlements, and casinos. Such "financial institutions" must notify OFAC Compliance about any blocked funds within ten days of blocking. The Act provides for civil penalties to be assessed against financial institutions for failing to block or report the blocking of FTO funds in an amount equal to $50,000 per violation or twice the amount which ought to have been blocked or reported, whichever is greater. Foreign Terrorist Organizations and their agents are identified by an "[FTO]" in the list which follows.

Named Terrorist Organizations

17 NOVEMBER (a.k.a. REVOLUTIONARY ORGANIZATION 17 NOVEMBER; a.k.a. EPANASTATIKI ORGANOSI 17 NOEMVRI) [FTO]

A.I.C. COMPREHENSIVE RESEARCH INSTITUTE (a.k.a. AUM SUPREME TRUTH; a.k.a. A.I.C. SOGO KENKYUSHO; a.k.a. AUM SHINRIKYO) [FTO]

(2) Cuba: What You Need To Know About The U.S. Embargo

An overview of the Cuban Assets Control Regulations—Title 31 Part 515 of the U.S. Code of Federal Regulations

INTRODUCTION

The Cuban Assets Control Regulations, 15 CFR Part 515 (the "Regulations") were issued by the U.S. Government on 8 July 1963 under the Trading With the Enemy Act in response to certain hostile actions by the Cuban government. They are still in force today and affect all U.S. citizens and permanent residents wherever they are located, all people and organizations physically in the United States, and all branches and subsidiaries of U.S. organizations throughout the world. The Regulations are administered by the U.S. Treasury Department's Office of Foreign Assets Control. The basic goal of the sanctions is to isolate the Cuban government economically and deprive it of U.S. dollars. Criminal penalties for violating the sanctions range up to 10 years in prison, $1,000,000 in corporate fines, and $250,000 in individual fines. Civil penalties up to $55,000 per violation may also be imposed. Please note that the Regulations require those dealing with Cuba to maintain records and, upon request from the U.S. Treasury Department, to furnish information regarding such dealings.

EXPORTING TO CUBA

Except for publications, other informational materials (such as CDs and works of art), certain donated food, and certain goods licensed for export by the U.S. Department of Commerce (such as medicine and medical supplies, food, and agricultural commodities), no products, technology, or services may be exported from the United States to Cuba, either directly or through third countries, such as Canada or Mexico. This prohibition includes dealing in or assisting the sale of goods or commodities to or from Cuba, even if done entirely offshore. Such brokering is considered to be dealing in property in which Cuba has an interest. Provision of consulting services is also prohibited. Thus, no U.S. citizen or permanent resident alien, wherever located, and no foreign subsidiary or branch of a U.S. organization may export products, technology, or services to Cuba or to any Cuban national, wherever they may be located, or broker the sale of goods or commodities to or from Cuba or any Cuban national.

The Commerce Department may authorize the sale and export of food and agricultural commodities (including fertilizers, seeds, pesticides, insecticides, and herbicides) to independent nongovernmental entities (including religious groups and private sector undertakings such as family restaurants and private farmers) in

Cuba. Although certain sales may be licensed, U.S. banks are not authorized to provide trade financing for the transactions.

Section 1705(b) of the Cuban Democracy Act (the "CDA") provides for donations of food to independent non-governmental organizations or individuals in Cuba. Shipments of food can be donated to non-governmental organizations from the U.S. or from third countries without the need for a license from the U.S. government. Under Section 1705(c) of the CDA, exports of medicines and medical supplies are allowed, but require a license issued by the U.S. Commerce Department. The Act specifically provides that payments to Cuba involving telecommunications may be made pursuant to specific license. In the mid–1970s, Section 515.559 was added to the Regulations to allow OFAC to license foreign subsidiaries of U.S. firms to conduct trade in commodities with Cuba so long as several specific criteria were met. Section 1706(a) of the CDA, however, prohibits the issuance of a license that would have been issued pursuant to 515.559, except where a contract was entered into prior to enactment of the CDA or where the exports at issue are medicines or medical supplies.

Unless otherwise authorized, no vessel carrying goods or passengers to or from Cuba or carrying goods in which Cuba or a Cuban national has any interest may enter a U.S. port. The prohibition also applies to vessels which enter only to take on fuel and supplies (bunker), whether from U.S. fuel providers within the port limits or at offshore points, as well as vessels discharging or loading merchandise offshore, by lighter or otherwise. In addition, vessels which enter a port or place in Cuba to engage in the trade of goods or services are prohibited from loading or unloading any freight at any place in the U.S. for 180 days. Prohibited entry does not apply to vessels engaging in trade with Cuba authorized by license or exempt from the Regulations (e.g., vessels carrying donations of food to nongovernmental organizations or individuals).

IMPORTING CUBAN-ORIGIN GOODS OR SERVICES

Goods or services of Cuban origin may not be imported into the United States either directly or through third countries, such as Canada or Mexico. The only exceptions are: $100 worth of Cuban merchandise which may be brought into the United States as accompanied baggage by authorized travelers arriving from Cuba; publications, artwork, or other informational materials; merchandise other than tobacco or alcohol and not in commercial quantities carried as accompanied baggage by foreign persons legally entering the United States; and merchandise for which a specific license has been received.

TRANSACTIONS INVOLVING PROPERTY IN WHICH CUBA OR A CUBAN NATIONAL HAS AN INTEREST

In addition to the prohibitions on exports to and imports from Cuba, the Regulations prohibit any person subject to U.S. jurisdiction from dealing in any property in which Cuba or a Cuban national has an interest. Under the Regulations, "property" includes but is not limited to contracts and services. For example, unless otherwise authorized, persons subject to U.S. jurisdiction (including

U.S. overseas subsidiaries) may not purchase Cuban cigars in Mexico; may not sign a contract with a U.K. firm if the contract terms include Cuba-related provisions (even if those provisions are contingent upon the lifting of the embargo); and may not provide accounting, marketing, sales, or insurance services to a Cuban company or to a foreign company with respect to the foreign company's Cuba-related business.

SPECIALLY DESIGNATED NATIONALS

The Regulations prohibit buying from or selling to Cuban nationals whether they are physically located on the island of Cuba or doing business elsewhere on behalf of Cuba. Individuals or organizations who act on behalf of Cuba anywhere in the world are considered by the U.S. Treasury Department to be "Specially Designated Nationals" of Cuba. A non-exhaustive list of their names is published in the Federal Register, an official publication of the U.S. Government. This list may be obtained by calling the Office of Foreign Assets Control at 202/622–2490. The listing, however, is a partial one and any individual or organization subject to U.S. jurisdiction engaging in transactions with foreign nationals must take reasonable care to make certain that such foreign nationals are not acting on behalf of Cuba. Individuals and organizations subject to U.S. jurisdiction who violate the Regulations by transacting business with Specially Designated Nationals of Cuba are subject to criminal prosecution or civil monetary penalties.

ACCOUNTS AND ASSETS

There is a total freeze on Cuban assets, both governmental and private, and on financial dealings with Cuba; all property of Cuba, of Cuban nationals, and of Specially Designated Nationals of Cuba in the possession or control of persons subject to U.S. jurisdiction is "blocked." Any property in which Cuba has an interest which comes into the United States or into the possession or control of persons subject to U.S. jurisdiction is automatically blocked by operation of law. Banks receiving unlicensed wire transfer instructions in which there is a Cuban interest, or any instrument in which there is a Cuban interest, must freeze the funds on their own books or block the instrument, regardless of origin or destination. "Suspense accounts" are not permitted. Blocking imposes a complete prohibition against transfers or transactions of any kind. No payments, transfers, withdrawals, or other dealings may take place with regard to blocked property unless authorized by the Treasury Department. Banks are permitted to take normal service charges. Blocked deposits of funds must be interest-bearing. "Setoffs" are not allowed.

Persons subject to U.S. jurisdiction are required to exercise extreme caution in order not to knowingly involve themselves in unlicensed transactions in which Cuba has an interest. Except as authorized, no bank in the U.S. or overseas branch or subsidiary of a U.S. bank may advise a letter of credit involving Cuba nor may it process documents referencing Cuba. All such "property" must be blocked as soon as it comes within the bank's possession or control. All persons in possession of blocked property are required to reg-

ister with the Office of Foreign Assets Control. Persons subject to U.S. jurisdiction who engage in any commercial dealings that involve unauthorized trade with Cuba, either directly or indirectly, risk substantial monetary penalties and criminal prosecution.

SENDING GIFTS

Gift parcels may be sent or carried by an authorized traveler to an individual or to a religious, charitable, or educational organization in Cuba for the use of the recipient or of the recipient's immediate family (and not for resale), subject to the following limitations: the combined total domestic retail value of all items in the parcel must not exceed $200 (with the exception of donations of food, which are not so restricted); not more than one parcel may be sent or given by the same person in the U.S. to the same recipient in Cuba in any one calendar month; and the content must be limited to food, vitamins, seeds, medicines, medical supplies and devices, hospital supplies and equipment, equipment for the handicapped, clothing, personal hygiene items, veterinary medicines and supplies, fishing equipment and supplies, soap-making equipment, or certain radio equipment and batteries for such equipment. Organizations that consolidate and send multiple gift parcels in single shipments must obtain a validated license from the U.S. Department of Commerce. Each gift parcel in the single shipment must meet commodity, dollar-value, and frequency limitations. If a parcel being shipped or carried to Cuba fails to meet these standards, it is subject to seizure by the U.S. Government.

CUBA-RELATED TRAVEL TRANSACTIONS

Only persons whose travel falls into the categories discussed below are authorized to spend money related to travel to, from, or within Cuba. Persons licensed to engage in travel-related transactions in Cuba may spend up to the State Department Travel Per Diem Allowance for Havana, Cuba (currently $183 per day) for purchases directly related to travel in Cuba, such as hotel accommodations, meals, local transportation, and goods personally used by the traveler in Cuba (travelers can check the current per diem rate on the Internet at <<http://www.state.gov/www/perdiems/index.html>>). Most licensed travelers may also spend additional money for transactions directly related to the activities for which they received their license. For example, journalists traveling in Cuba under the journalism general license (described below) may spend money over and above the current per diem for extensive local transportation, the hiring of cable layers, and other costs that are directly related to covering a story in Cuba. Licensed travelers may also spend an additional $100 on the purchase of Cuban merchandise to be brought back with them to the United States as accompanied baggage, but this $100 authorization may be used only once in any 6-month period. Purchases of services unrelated to travel or a licensed activity, such as non-emergency medical services, are prohibited. The purchase of publications and other informational materials is not restricted.

General license: The following categories of travelers are permitted to spend money for Cuban travel and to engage in other

transactions directly incident to the purpose of their travel under a general license without the need to obtain special permission from the U.S. Treasury Department:

- Official Government Travelers - U.S. and foreign government officials, including representatives of international organizations of which the United States is a member, who are traveling on official business.
- Persons regularly employed as journalists by a news reporting organization and persons regularly employed as supporting broadcast or technical personnel who travel to Cuba to engage in journalistic activities.
- Persons who are traveling to visit close relatives in Cuba in circumstances of humanitarian need. This authorization is valid without a specific license from the Office of Foreign Assets Control only once every twelve months. Persons traveling under this general license may not spend money on transactions that will cause them to exceed the current per diem allowance.
- Full-time professionals whose travel transactions are directly related to professional research in their professional areas, provided that their research (1) is of a noncommercial, academic nature; (2) comprises a full work schedule in Cuba; and (3) has a substantial likelihood of public dissemination.
- Full-time professionals whose travel transactions are directly related to attendance at professional meetings or conferences in Cuba organized by an international professional organization, institution, or association that regularly sponsors such meetings or conferences in other countries. The organization, institution, or association sponsoring the meeting or conference may not be headquartered in the United States unless it has been specifically licensed to sponsor the meeting. The purpose of the meeting or conference cannot be the promotion of tourism in Cuba or other commercial activities involving Cuba, or to foster production of any biotechnological products.
- Amateur or semi-professional athletes or teams traveling to participate in Cuba in an athletic competition held under the auspices of the relevant international sports federation. The athletes must have been selected for the competition by the relevant U.S. sports federation, and the competition must be one that is open for attendance, and in relevant situations participation, by the Cuban public.

Specific licenses for educational institutions: Specific licenses authorizing travel transactions related to certain educational activities by any students or employees affiliated with a licensed academic institution may be issued by the Office of Foreign Assets Control. Such licenses are only available to U.S. academic institutions accredited by an appropriate national or regional accrediting association, and such licenses must be renewed after a period of two years. Once an academic institution has applied for and received such a specific license, the following categories of travelers affiliated with that academic institution are authorized to engage in travel-related transactions incident to the following activities

without seeking further authorization from the Office of Foreign Assets Control:

- Undergraduate or graduate students participating in a structured educational program as part of a course offered at a licensed college or university. Students planning to engage in such transactions must carry a letter from the licensed institution stating 1) the institution's license number, 2) that the student is enrolled in an undergraduate or graduate degree program at the institution, and 3) that the travel is part of an educational program of the institution.
- Persons doing noncommercial Cuba-related academic research in Cuba for the purpose of qualifying academically as a professional (e.g., research toward a graduate degree). Students planning to engage in such transactions must carry a letter from the licensed institution stating 1) the institution's license number, 2) that the student is enrolled in a graduate degree program at the institution, and 3) that the Cuba research will be accepted for credit toward that graduate degree.
- Undergraduate or graduate students participating in a formal course of study at a Cuban academic institution, provided the Cuban study will be accepted for credit toward a degree at the licensed U.S. institution. A student planning to engage in such transactions must carry a letter from the licensed U.S. institution stating 1) the institution's license number, 2) that the student is currently enrolled in an undergraduate or graduate degree program at the institution, and 3) that the Cuban study will be accepted for credit toward that degree.
- Persons regularly employed in a teaching capacity at a licensed college or university who plan to teach part or all of an academic program at a Cuban academic institution. An individual planning to engage in such transactions must carry a letter from the licensed institution stating 1) the institution's license number, and 2) that the individual is regularly employed by the licensed institution in a teaching capacity.
- Cuban scholars teaching or engaging in other scholarly activities at a licensed college or university in the United States. Licensed institutions may sponsor such Cuban scholars, including payment of a stipend or salary.
- Secondary school students participating in educational exchanges sponsored by Cuban or U.S. secondary schools and involving the students' participation in a formal course of study or in a structured educational program offered by a secondary school or other academic institution and led by a teacher or other secondary school official. A reasonable number of adult chaperones may accompany the students to Cuba. A secondary school group planning to engage in such transactions in Cuba must carry a letter from the licensed secondary school sponsoring the trip stating 1) the school's license number, and 2) the list of names of all persons traveling with the group.
- Full-time employees of a licensed institution organizing or preparing for the educational activities described above. An individual engaging in such transactions must carry a letter from the licensed institution stating 1) the institution's license number, and 2) that the individual is regularly employed there.

Specific licenses for religious organizations: Specific licenses authorizing travel transactions related to religious activities by any individuals or groups affiliated with a religious organization may be issued by the Office of Foreign Assets Control. Such licenses are only available to religious organizations located in the United States, and such licenses must be renewed after a period of two years. Once a religious organization has applied for and received such a specific license, travelers affiliated with that religious organization are authorized to engage in travel-related transactions incident to a full-time program of religious activities in Cuba under the auspices of the licensed religious organization without seeking further authorization from the Office of Foreign Assets Control. Individuals planning to engage in such transactions must carry a letter from the licensed religious organization stating 1) the organization's license number, 2) that they are affiliated with the licensed organization, and 3) that they are traveling to Cuba to engage in religious activities under the auspices of the licensed organization.

Other specific licenses: Specific licenses may be issued by the Office of Foreign Assets Control on a case-by-case basis authorizing travel transactions by the following categories of persons in connection with the following activities:

- Humanitarian Travel - (1) persons, and persons traveling with them who share a common dwelling with them, traveling to Cuba more than once in a twelve-month period to visit close relatives in cases involving humanitarian need; (2) persons traveling to Cuba to accompany licensed humanitarian donations (other than gift parcels) or exempt donations of food; (3) persons traveling in connection with activities of recognized human rights organizations investigating specific human rights violations; and (4) persons whose travel transactions are directly related to certain humanitarian projects in or related to Cuba that are designed to directly benefit the Cuban people. Licenses authorizing transactions for multiple trips over an extended period of time are available for travel under (3) and (4) above.
- Free-Lance Journalism - Persons with a suitable record of publication who are traveling to Cuba to do research for a free-lance article. Licenses authorizing transactions for multiple trips over an extended period of time are available for applicants demonstrating a significant record of free-lance journalism.
- Professional Research and Professional Meetings - Persons traveling to Cuba to do professional research or to attend a professional meeting that does not meet the requirements of the relevant general license (described above). Licenses authorizing transactions for multiple trips over an extended period of time are available.
- Educational Activities - Persons traveling to engage in educational activities that are not authorized pursuant to an academic institution's specific license, including educational exchanges not involving academic study pursuant to a degree program when those exchanges take place under the auspices of an organization that sponsors and organizes such programs to promote people-to-people contact.

- Religious Activities - Persons traveling to Cuba to engage in religious activities that are not authorized pursuant to a religious organization's specific license. Licenses authorizing transactions for multiple trips over an extended period of time are available.
- Public Performances, Clinics, Workshops, Athletic and Other Competitions, and Exhibitions - Persons traveling to participate in a public performance, clinic, workshop, athletic or other competition (that does not meet the requirements of the general license described above), or exhibition. The event must be open for attendance, and in relevant situations participation, by the Cuban public, and all profits from the event after costs must be donated to an independent nongovernmental organization in Cuba or a U.S.-based charity, with the objective, to the extent possible, of promoting people-to-people contacts or otherwise benefitting the Cuban people.
- Activities of Private Foundations or Research or Educational Institutions - Persons traveling to Cuba on behalf of private foundations or research or educational institutes that have an established interest in international relations to collect information related to Cuba for noncommercial purposes. Licenses authorizing transactions for multiple trips over an extended period of time are available.
- Exportation, Importation, or Transmission of Information or Informational Materials - Persons traveling to engage in activities directly related to the exportation, importation, or transmission of information or informational materials.
- Licensed Exportation - Persons traveling to Cuba to engage in activities directly related to marketing, sales negotiation, accompanied delivery, or servicing of exports of health care products or other exports that may be considered for authorization under existing Department of Commerce regulations and guidelines with respect to Cuba or engaged in by U.S.-owned or -controlled foreign firms.

Applying for a specific license: Persons wishing to travel to Cuba under a specific license should send a letter specifying the details of the proposed travel, including any accompanying documentation, to Steven Pinter, Chief of Licensing, Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Ave., NW, Washington, DC 20220. Academic institutions wishing to obtain one of the two-year specific licenses described above should send a letter to the same address requesting such a license and establishing that the institution is accredited by an appropriate national or regional accrediting association. Religious organizations wishing to obtain one of the two-year specific licenses described above should send a letter to the same address requesting such a license and setting forth examples or religious activities to be undertaken in Cuba.

Provision of travel services: U.S. travel service providers, such as travel agents and tour operators, who handle travel arrangements to, from, or within Cuba must hold special authorizations from the Office of Foreign Assets Control to engage in such activities. These authorizations are issued based on written applications from the service providers, subject to appropriate checks by the Treasury

Department. A traveler should not use any travel service provider that does not hold valid Treasury authorization. If in doubt about the status of a service provider's authorization, travelers should call the Office of Foreign Assets Control at 305/810–5140. Only carrier service providers that have been authorized by OFAC may operate direct humanitarian passenger charter flights between Miami and Havana.

Unauthorized travel-related transactions: Unless otherwise exempted or authorized, any person subject to U.S. jurisdiction who engages in any travel-related transaction in Cuba violates the Regulations. Persons not licensed to engage in travel- related transactions may travel to Cuba without violating the Regulations only if all Cuba-related expenses are covered by a person not subject to U.S. jurisdiction and provided that the traveler does not provide any service to Cuba or a Cuban national. Such travel is called "fully-hosted" travel. Travel to Cuba may be considered fully hosted even if the traveler pays for a plane ticket provided that the travel is not aboard a Cuban carrier. Travel to Cuba is not fully hosted if a person subject to U.S. jurisdiction pays—before, during, or after the travel—any expenses relating to the travel, including travel to Cuba on a Cuban carrier, even if the payment is made to a third-country person or entity that is not subject to U.S. jurisdiction. Examples of costs commonly incurred by persons traveling to, from, and within Cuba are expenses for meals, lodging, transportation, bunkering of vessels or aircraft, visas, entry or exit fees, and gratuities. Fully-hosted travel to and from Cuba cannot be aboard a direct flight between the United States and Cuba. The authorization for licensed travelers to purchase and return to the United States with $100 worth of Cuban merchandise does not apply to fully-hosted travelers.

Any person subject to U.S. jurisdiction determined to have traveled to Cuba without an OFAC general or specific license is presumed to have engaged in prohibited travel-related transactions. In order to overcome this presumption, any traveler who claims to have been fully hosted or not to have engaged in any travel-related transactions may be asked by Federal enforcement agencies to provide a signed explanatory statement accompanied by any relevant supporting documentation.

Sending or Carrying Money to Cuba

U.S. persons aged 18 or older may send to the household of any individual in Cuba "individual-to-household" cash remittances of up to $300 per household in any consecutive three-month period, provided that no member of the household is a senior-level Cuban government or senior-level Cuban communist party official.

U.S. persons aged 18 or older may send to the household of any close relative of the remitter or the remitter's spouse "family" cash remittances of up to $300 per household in any consecutive three-month period. No more than a combined total of $300 of individual-to-household and family remittances may be sent by a remitter to any one household in any consecutive three-month period, regardless of the number of close relatives or other persons residing in that household. A close relative means a spouse, child, grandchild, parent, grandparent, great-grandparent, uncle, aunt, brother, sis-

ter, nephew, niece, first cousin, mother-in-law, father-in-law, daughter-in-law, son-in-law, sister-in-law, brother-in-law, or spouse, widow, or widower of any of those people.

U.S. persons also may send up to $1,000 per payee on a one-time basis as an "emigration-related" remittance to a Cuban national to enable the payee to emigrate from Cuba to the United States. Specifically, up to $500 may be remitted to a Cuban national prior to the payee's receipt of a valid U.S. visa or other U.S. immigration document, and up to $500 may be remitted to the Cuban national after the payee receives a valid U.S. visa or other U.S. immigration document.

Remittances may be transferred through a financial institution or through an OFAC-licensed remittance forwarder. Service providers, including financial institutions originating transfers on behalf of non-aggregating customers, must obtain an affidavit from the remitter certifying that each individual-to-household and family remittance does not exceed $300 in any consecutive three month period and that each emigration-related remittance meets the requirements of the Regulations (see TD F 90–22.52 at the end of this brochure). Remitters can expect to have their identity, date of birth, address, and telephone number verified.

Persons licensed to engage in travel-related transactions (this does not include fully-hosted travelers) may carry their own remittances, provided that they may carry no more than a combined total of $300 of individual-to-household and family remittances, and provided that no emigration-related remittances may be carried before the payee has received a valid U.S. visa or other immigration document and the traveler can supply the visa number and the date of issuance.

Specific licenses may be issued on a case-by-case basis authorizing remittances:

- to independent nongovernmental organizations in Cuba;
- by Cuban scholars authorized to teach or engage in scholarly activity at a U.S. college or university who wish to repatriate earnings in excess of $300;
- to households of Cuban nationals living outside of Cuba in excess of $300 per quarter from blocked accounts; or
- to individuals in Cuba to facilitate their non-immigrant travel to the United States under circumstances where humanitarian need is demonstrated, including illness or medical emergency.

Fair Business Practices

Anyone authorized by the U.S. Department of the Treasury to provide Cuban travel services or services in connection with sending money to Cuba is prohibited from participating in discriminatory practices of the Cuban government against individuals or particular classes of travelers. The assessment of consular fees by the Cuban government, which are applicable worldwide, is not considered to be a discriminatory practice. However, requiring the purchase of services not desired by the traveler is not permitted. Persons wishing to provide information on such activities should call 305/810–5170. All information regarding arbitrary fees, payments

for unauthorized purposes, or other possible violations furnished to the U.S. Treasury Department will be handled confidentially.

ESTATES AND SAFE DEPOSIT BOXES

An estate becomes blocked whenever a Cuban national is an heir or is the deceased; money from a life insurance policy is blocked whenever the deceased is a Cuban resident. The heir of a person who died in Cuba, or the beneficiary of a life insurance policy of a person who died in Cuba, may apply for a license from the Office of Foreign Assets Control to unblock the estate or insurance proceeds. Persons administering or interested in a blocked estate should contact the Office of Foreign Assets Control at 202/622–2480 for more information. A safe-deposit box is blocked whenever a Cuban has an interest in the property contained in the box. Access to a blocked safe deposit box for inventory purposes may be granted under certain conditions, but the contents of the box remain blocked and may not be removed without the permission of the Office of Foreign Assets Control.

PAYMENTS FOR OVERFLIGHTS

Private and commercial aviators must obtain a specific license authorizing payments for overflight charges to Cuba. Banks will ask to see the originals of such licenses before executing transfers and keep a copy for their files. Such transfers must be in a currency other than U.S. dollars.

If you have information regarding possible violations of the Cuban Assets Control Regulations, please call the Office of Foreign Assets Control at 305/810–5170. Your call will be handled confidentially.

* * * * * * *

This document is explanatory only and does not have the force of law. The statutes, Executive Orders, and implementing regulations relating to Cuba contain the legally binding provisions governing the sanctions and this document does not supplement or modify those statutes, Executive Orders or regulations.

The Treasury Department's Office of Foreign Assets Control also administers sanctions programs involving Iraq, Libya, the Federal Republic of Yugoslavia (Serbia and Montenegro), the Republic of Serbia, North Korea, the National Union for the Total Independence of Angola (UNITA), the Taliban in Afghanistan, Iran, Syria, Sudan, Burma (Myanmar), Foreign Terrorist Organizations, designated terrorists and narcotics traffickers, and designated foreign persons who have engaged in activities related to the proliferation of weapons of mass destruction. For additional information about these programs or about the Cuban sanctions program, please contact the:

(3) Iran: What You Need to Know about U.S. Economic Sanctions

An overview of O.F.A.C. Regulations involving Sanctions against Iran

IRANIAN TRANSACTIONS REGULATIONS—31 C.F.R. PART 560

As a result of Iran's support for international terrorism and its aggressive actions against non-belligerent shipping in the Persian Gulf, President Reagan, on October 29, 1987, issued Executive Order 12613 imposing a new import embargo on Iranian-origin goods and services. Section 505 of the International Security and Development Cooperation Act of 1985 ("ISDCA") was utilized as the statutory authority for the embargo which gave rise to the Iranian Transactions Regulations (Title 31 Part 560 of the U.S. Code of Federal Regulations).

Effective March 16, 1995, as a result of Iranian sponsorship of international terrorism and Iran's active pursuit of weapons of mass destruction, President Clinton issued Executive Order 12957 prohibiting U.S. involvement with petroleum development in Iran. On May 6, 1995, he signed Executive Order 12959, pursuant to the International Emergency Economic Powers Act ("IEEPA") as well as the ISDCA, substantially tightening sanctions against Iran.

On August 19, 1997, the President signed Executive Order 13059 clarifying Executive Orders 12957 and 12959 and confirming that virtually all trade and investment activities with Iran by U.S. persons, wherever located, are prohibited. Corporate criminal penalties for violations of the Iranian Transactions Regulations can range up to $500,000, with individual penalties of up to $250,000 and 10 years in jail. Civil penalties of up to $11,000 may also be imposed administratively.

This fact sheet provides general information about the Iranian sanctions program under the Iranian Transactions Regulations, and incorporates sanctions imposed by Executive Orders 12957, 12959 and 13059. The sanctions are administered by the U.S. Treasury Department's Office of Foreign Assets Control ("OFAC").

IMPORTS FROM IRAN

Other than gifts valued at $100 or less and information or informational materials, goods or services of Iranian origin may not be imported into the United States, either directly or through third countries. U.S. persons are prohibited from providing financing for prohibited import transactions.

IRANIAN-ORIGIN CARPETS

Iranian-origin carpets may not be imported into the United States unless the carpet:

(a) is sent to or brought as a gift for a person in the United States and the value of the carpet, along with any other items of Iranian-origin, is not more than $100.00; or

(b) is imported as part of the household and personal effects of persons relocating their household and place of residence to the United States. To qualify for this exception, it must be demonstrated to the satisfaction of the U.S. Customs Service that such Iranian-origin carpets: (i) were actually used abroad by persons arriving in the United States or by other family members arriving from the same foreign household, (ii) are not intended for any other person or for sale, and (iii) are not otherwise prohibited from importation. In the case of U.S. citizens and permanent resident aliens relocating to the United States, Iranian-origin carpets must not have been acquired after May 6, 1995.

Persons claiming the right to import Iranian-origin carpets as gifts or household and personal effects, as described above, must satisfy the U.S. Customs Service at the port of importation that these conditions have been met. In accordance with current U.S. Government policy, the Office of Foreign Assets Control generally does not issue licenses to authorize importations of Iranian-origin carpets which the U.S. Customs Service has determined do not qualify for importation under these two exceptions.

EXPORTS TO IRAN

In general, unless licensed by OFAC, goods, technology (including technical data or other information subject to Export Administration Regulations), or services may not be exported, reexported, sold or supplied, directly or indirectly, from the United States or by a U.S. person, wherever located, to Iran or the Government of Iran. The ban on providing services includes any brokering function from the United States or by U.S. persons, wherever located. For example, a U.S. person, wherever located, or any person acting within the United States, may not broker offshore transactions that benefit Iran or the Government of Iran, including sales of foreign goods or arranging for third-country financing or guarantees.

In general, a person may not export from the U.S. any goods, technology or services, if that person knows or has reason to know such items are intended specifically for supply, transshipment or reexportation to Iran. Further, such exportation is prohibited if the exporter knows or has reason to know the U.S. items are intended specifically for use in the production of, for commingling with, or for incorporation into goods, technology or services to be directly or indirectly supplied, transshipped or reexported exclusively or predominately to Iran or the Government of Iran. A narrow exception is created for the exportation from the United States or by U.S. persons wherever located of low-level goods or technology to third countries for incorporation or substantial transformation into foreign-made end products, provided the U.S. content is insubstantial, as defined in the regulations, and certain other conditions are met.

Donations of articles intended to relieve human suffering (such as food, clothing, and medicine), gifts valued at $100 or less, licensed exports of agricultural commodities and products, medicine, and medical equipment, and trade in "informational materials" are permitted. "Informational materials" are defined to include publica-

tions, films, posters, phonograph records, photographs, microfilms, microfiche, tapes, compact disks, CD ROMs, artworks, and news wire feeds, although certain Commerce Department restrictions still apply to some of those materials. To be considered informational material, artworks must be classified under chapter subheadings 9701, 9702, or 9703 of the Harmonized Tariff Schedule of the United States.

With certain exceptions, foreign persons who are not U.S. persons are prohibited from reexporting to Iran sensitive U.S.-origin goods, technology or services to Iran or the Government of Iran. Foreign persons involved in such reexports may be placed on the U.S. Commerce Department's "Export Denial Orders" list.

U.S. persons may not approve, finance, facilitate or guarantee any transaction by a foreign person where that transaction by a foreign person would be prohibited if performed by a U.S. person or from the United States.

DEALING IN IRANIAN-ORIGIN GOODS OR SERVICES

U.S. persons, including foreign branches of U.S. banks and trading companies, are prohibited from engaging in any transactions, including purchase, sale, transportation, swap, financing, or brokering transactions related to goods or services of Iranian origin or owned or controlled by the Government of Iran.

Services provided in the United States by an Iranian national already resident in the United States are not considered services of Iranian origin.

These prohibitions apply to transactions by United States persons in locations outside the United States with respect to goods or services which the United States person knows, or has reason to know, are of Iranian origin or are owned or controlled by the Government of Iran. U.S. persons may not import such goods or services into or export them from foreign locations. A U.S. person may, however, engage in transactions in third countries necessary to sell, dispose of, store, or maintain goods located in a third country which were legally acquired by that U.S. person prior to May 7, 1995 on the condition that the transactions do not result in an importation into the United States of goods of Iranian origin.

FINANCIAL DEALINGS WITH IRAN

New investments by U.S. persons, including commitments of funds or other assets, loans or any other extensions of credit, in Iran or in property (including entities) owned or controlled by the Government of Iran are prohibited. For your information, Appendix A contains a list of banks owned or controlled by the Government of Iran. While U.S. persons may continue to charge fees and accrue interest on existing Iranian loans, a specific license must be obtained to reschedule or otherwise extend the maturities of existing loans.

Payments for licensed sales of agricultural commodities and products, medicine and medical supplies must reference an appropriate OFAC license and may not involve a debit or credit to an account of a person in Iran or the Government of Iran maintained on the books of a U.S. depository institution. Payments for and financing of such licensed sales may be accomplished by cash in ad-

vance, sales on open account (provided the account receivable is not transferred by the person extending the credit), or by third country financial institutions that are neither U.S. persons nor government of Iran entities. Any other arrangements must be specifically authorized by OFAC. U.S. banks may advise and confirm letters of credit issued by third country banks covering licensed sales of agricultural commodities and products, medicine and medical supplies.

LETTERS OF CREDIT

Letters of credit and other financing arrangements with respect to trade contracts in force as of May 6, 1995 may be performed pursuant to their terms provided that the underlying trade transaction was completed prior to June 6, 1995 (February 2, 1996 for "agricultural commodities") or as specifically licensed by the Office of Foreign Assets Control. Standby letters of credit that serve as performance guarantees for services to be rendered after June 6, 1995 cannot be renewed and payment may not be made after that date without authorization by OFAC.

OTHER BANKING SERVICES

U.S. banks, including foreign branches, are prohibited from servicing accounts of the Government of Iran, including banks owned or controlled by the Government of Iran (as in Appendix A) or persons in Iran. However, they are authorized to pay interest, deduct reasonable and customary service charges, process transfers related to exempt transactions, such as the exportation of information or informational material, a travel-related remittance, or a payment for the shipment of a donation of articles to relieve human suffering or, at the request of an account holder, effect a lump sum closure of an account by payment to its owner. They may not otherwise directly credit or debit Iranian accounts.

U.S. banks may handle "U-turn" transactions—cover payments involving Iran that are by order of a third country bank for payment to another third country bank provided they do not directly credit or debit an Iranian account. They are also permitted to handle non-commercial family remittances involving Iran and non-commercial remittances involving humanitarian relief (such as for the victims of the earthquake in Khorasan), provided the transfers are routed to or from non-U.S. non-Iranian offshore banks.

U.S. banks initiating or receiving payment orders involving Iran on behalf of customers must determine prior to processing such payments that they do not involve transactions prohibited by the Iranian Transactions Regulations.

TRAVEL

All transactions ordinarily incident to travel to or from Iran, including the importation of accompanied baggage for strictly personal use, payment of maintenance and living expenses and acquisition of goods or services for personal use are permitted.

OVERFLIGHTS PAYMENTS

Payments to Iran for services rendered by the Government of Iran in connection with the overflight of Iran or emergency landing

in Iran of aircraft owned by United States persons or registered in the U.S. are authorized.

PERSONAL COMMUNICATIONS, INFORMATION AND INFORMATIONAL MATERIALS

The receipt or transmission of postal, telegraphic, telephonic or other personal communications, which does not involve the transfer of anything of value, between the United States and Iran is authorized. The exportation from the United States to Iran of information and informational materials, whether commercial or otherwise, regardless of format or medium of transmission, and any transaction incident to such exportation is authorized.

TRANSACTIONS INVOLVING U.S. AFFILIATES

No U.S. person may approve or facilitate the entry into or performance of transactions or contracts with Iran by a foreign subsidiary of a U.S. firm that the U.S. person is precluded from performing directly. Similarly, no U.S. person may facilitate such transactions by unaffiliated foreign persons.

IRANIAN PETROLEUM INDUSTRY

U.S. persons may not trade in Iranian oil or petroleum products refined in Iran, nor may they finance such trading. Similarly, U.S. persons may not perform services, including financing services, or supply goods or technology, that would benefit the Iranian oil industry.

APPENDIX A

BANKS OWNED OR CONTROLLED BY THE GOVERNMENT OF IRAN

AGRICULTURAL COOPERATIVE BANK OF IRAN (a.k.a. BANK TAAVON KESHAVARZI IRAN), No. 129 Patrice Lumumba Street, Jalal-Al-Ahmad Expressway, P.O. Box 14155/6395, Tehran, Iran

AGRICULTURAL DEVELOPMENT BANK OF IRAN (a.k.a. BANK JOSIAIYI KESHAHVARZI), Farahzad Expressway, Tehran, Iran

BANK JOSIAIYI KESHAHVARZI (a.k.a. AGRICULTURAL DEVELOPMENT BANK OF IRAN), Farahzad Expressway, Tehran, Iran

BANK MARKAZI JOMHOURI ISLAMI IRAN (a.k.a. THE CENTRAL BANK OF IRAN), Ferdowsi Avenue, P.O. Box 11365–8551, Tehran, Iran

BANK MASKAN (a.k.a. HOUSING BANK (of Iran)), Ferdowsi St., Tehran, Iran

BANK MELLAT, Park Shahr, Varzesh Avenue, P.O. Box 11365/5964, Tehran, Iran, and all offices worldwide, including, but not limited to:

- BANK MELLAT (Branch), Ziya Gokalp Bulvari No. 12, Kizilay, Ankara, Turkey
- BANK MELLAT (Branch), Binbir Cicek Sokak, Buyukdere Caddesi, P.O. Box 67, Levant, Istanbul, Turkey

BANK MELLAT (Branch), 48 Gresham Street, London EC2V 7AX, England
BANK MELLI, P.O. Box 11365–171, Ferdowsi Avenue, Tehran, Iran, and all offices worldwide, including, but not limited to:
BANK MELLI (Branch), 4 Moorgate, London EC2R 6AL, England
BANK MELLI (Branch), Schadowplatz 12, 4000 Dusseldorf 1, Germany
BANK MELLI (Branch), Friedenstrasse 4, P.O. Box 160 154, 6000 Frankfurt am Main, Germany
BANK MELLI (Branch), P.O. Box 112129, Holzbruecke 2, 2000 Hamburg 11, Germany
BANK MELLI (Branch), Odeonsplatz 18, 8000 Munich 22, Germany
BANK MELLI (Branch), 43 Avenue Montaigne, 75008 Paris, France
BANK MELLI (Branch), 601 Gloucester Tower, The Landmark, 11 Pedder Street, P.O. Box 720, Hong Kong
BANK MELLI (Representative Office), 333 New Tokyo Building, 3–1 Marunouchi, 3-chome, Chiyoda-ku, Tokyo, Japan
BANK MELLI (Representative Office), 818 Wilshire Boulevard, Los Angeles, California 90017, U.S.A
BANK MELLI (Representative Office), 767 Fifth Avenue, 44th Floor, New York, New York 10153, U.S.A
BANK MELLI (Representative Office), Smolensky Boulevard 22/14, Kv. S., Moscow, Russia
BANK MELLI (Branch), Flat No. 1, First Floor, 8 Al Sad El-Aaly, Dokki, P.O. Box 2654, Cairo, Egypt
BANK MELLI (Branch), Ben Yas Street, P.O. Box No. 1894, Riga Deira, Dubai, U.A.E
BANK MELLI (Branch), P.O. Box 2656, Shaikha Maryam Building, Liwa Street, Abu Dhabi, U.A.E
BANK MELLI (Branch), B.P.O. Box 1888, Clock Tower, Industrial Road, Al-Ain Club Building in from Emertel Al Ain, Al Ain, Abu Dhabi, U.A.E
BANK MELLI (Branch), P.O. Box 1894, Riqa, Ban Yas Street, Deira, Dubai, U.A.E
BANK MELLI (Branch), Mohd-Habib Building, Al-Fahidi Street, P.O. Box 3093, Bur Dubai, Dubai, U.A.E
BANK MELLI (Branch), P.O. Box 248, Fujairah, U.A.E
BANK MELLI (Branch), Sami Sagar Building Oman Street Al-Nakheel, P.O. Box 5270, Ras-Al Khaimah, U.A.E
BANK MELLI (Branch), P.O. Box 459, Al Bory Street, Sharjah, U.A.E.
BANK MELLI (Branch), P.O. Box 785, Government Road, Shaikh Mubarak Building, Manama, Bahrain
BANK MELLI (Branch), P.O. Box 23309, Shaikh Salman Street, Road No. 1129, Muharraq 211, Bahrain
BANK MELLI (Branch), P.O. Box 5643, Mossa Abdul Rehman Hassan Building, 238 Al Burj St., Ruwi, Muscat, Oman
BANK OF INDUSTRY AND MINE (of Iran) (a.k.a. BANK SANAT VA MADAN), Hafez Avenue, P.O. Box 11365/4978, Tehran, Iran

BANK REFAH KARGARAN (a.k.a. WORKERS WELFARE BANK (of Iran)), Moffettah No. 125, P.O. Box 15815 1866, Tehran, Iran

BANK SADERAT IRAN, Bank Saderat Tower, P.O. Box 15745–631, Somayeh Street, Tehran, Iran, and all offices worldwide, including, but not limited to:

- BANK SADERAT IRAN (Branch), Hamdam Street, Airport Road Intersection, P.O. Box 700, Abu Dhabi, U.A.E
- BANK SADERAT IRAN (Branch), Al-Am Road, P.O. Box 1140, Al Ein, Abu Dhabi, U.A.E
- BANK SADERAT IRAN (Branch), Liwara Street, P.O. Box 16, Ajman, U.A.E
- BANK SADERAT IRAN (Branch), 3rd Floor Dom Dasaf Building, Mejloka Street 7A, Ashkhabad, Turkmenistan
- BANK SADERAT IRAN (Branch), 25–29 Panepistimiou Street, P.O. Box 4308, GR–10210, Athens 10672, Greece

IRANIAN ASSETS CONTROL REGULATIONS—31 C.F.R PART 535

Separate Iranian sanctions regulations appear at 31 C.F.R. Part 535. On November 14, 1979, the assets of the Government of Iran in the United States were blocked in accordance with IEEPA, following the seizure of the American Embassy in Teheran and the taking of U.S. diplomats as hostages. Under the Iranian Assets Control Regulations (Title 31 Part 535 of the U.S. Code of Federal Regulations), some US$12 billion in Iranian Government bank deposits, gold, and other properties were frozen, including $5.6 billion in deposits and securities held by overseas branches of U.S. banks. The assets freeze was eventually expanded to a full trade embargo, which remained in effect until the Algiers Accords were signed with Iran on January 19, 1981. Pursuant to the Accords, most Iranian assets in the United States were unblocked and the trade embargo was lifted. The U.S. Government also canceled any attachments that U.S. parties had secured against Iranian assets in the United States, so that the assets could be returned to Iran or transferred to escrow accounts in third countries pursuant to the Accords. This action was upheld by the Supreme Court in 1981 in Dames & Moore v. Regan. Although greatly modified in scope, the old Iranian Assets Control Regulations remain in effect. Many U.S. nationals have claims against Iran or Iranian entities for products shipped or services rendered before the onset of the 1979 embargo or for losses sustained in Iran due to expropriation during that time. These claims are still being litigated in the Iran-United States Claims Tribunal at The Hague established under the Algiers Accords. Certain assets related to these claims remain blocked in the United States and consist mainly of military and dual-use property.

(4) Iraq: What You Need to Know about the U.S. Embargo

An overview of the Iraqi Sanctions Regulations—Title 31 Part 575 of the U.S. Code of Federal Regulations

INTRODUCTION

On August 2, 1990, upon Iraq's invasion of Kuwait, former President Bush issued Executive Order No. 12722 declaring a national emergency with respect to Iraq. The order, issued under the authority of the International Emergency Economic Powers Act (50 U.S.C. 1701), the National Emergencies Act (50 U.S.C. 1601), and section 301 of title 3 of the U.S. Code, imposed economic sanctions, including a complete trade embargo, against Iraq. In keeping with United Nations Security Council Resolution 661 of August 6, 1990 and the United Nations Participation Act (22 U.S.C. 287c), the President also issued Executive Order 12724 on August 9, 1990, which imposed additional restrictions. Similar sanctions were imposed on Kuwait to ensure that no benefit from the United States flowed to the Government of Iraq in military-occupied Kuwait. The Iraqi Sanctions Regulations implement Executive Orders No. 12722 and 12724. They were issued and are administered by the Treasury Department's Office of Foreign Assets Control (FAC). The summary which follows is intended as a broad overview of the Regulations.

Criminal penalties for violating the Iraqi Sanctions Regulations range up to 12 years in jail and $1,000,000 in fines. In addition, civil penalties of up to $275,000 per violation may be imposed administratively.

ASSETS BLOCKED

Effective August 2, 1990, the President blocked all property and interests in property of the Government of Iraq, its agencies, instrumentalities, and controlled entities, in the United States or within the possession or control of U.S. persons. Persons and organizations determined by the Secretary of the Treasury to fall within any of those categories are subject to treatment as if they were the government of Iraq itself. This enables Treasury to designate Iraqi "front" organizations that may be operating in third countries as "Specially Designated Nationals of Iraq," thus subjecting them to the Iraqi sanctions. Blocked accounts in U.S. financial institutions must earn interest at commercially reasonable rates; funds are not to be held in instruments with a maturity exceeding 90 days. Setoffs against blocked accounts are prohibited.

The following activities are prohibited, unless licensed by the Office of Foreign Assets Control:

BUYING FROM IRAQ

Except as provided for under UNSC Resolution 986 (see below) goods or services cannot be imported into the United States either

directly or through third countries. Any activity that promotes or is intended to promote such importation is prohibited.

SELLING TO IRAQ

Goods, technology or services cannot be exported from the United States, or, if subject to U.S. jurisdiction, exported or reexported from a third country, to Iraq (notwithstanding authorization from another government agency) with the exception of OFAC-licensed food, medical supplies intended to relieve human suffering and certain other humanitarian goods. In no circumstances has the use of blocked funds been authorized for humanitarian sales. Any activity that promotes or is intended to promote a prohibited exportation or reexportation, or the transshipment of goods, services, or technology subject to U.S. jurisdiction through a third country, is also prohibited.

An exporter who shipped merchandise to Iraq prior to August 2, 1990 and who is the beneficiary of a letter of credit, issued or confirmed by a U.S. bank, or a letter of credit involving a reimbursement confirmed by a U.S. bank may apply to OFAC for a specific license authorizing payment under the letter of credit. A specific license authorizing payment under such a letter of credit will only be issued for a delivery to Iraq which occurred after August 2 if the exporter made a good faith effort to divert the delivery.

OFFSHORE TRANSACTIONS

Generally, U.S. persons are prohibited from dealing in Iraqi-origin goods or in any other goods exported from Iraq to any country after August 6, 1990. U.S. persons are also prohibited from dealing in property intended for exportation to Iraq from any country.

Performance of contracts in support of industrial, commercial, public utility or governmental projects in Iraq is also generally prohibited. Provisions prohibiting performance are very broadly construed to prohibit any financial, sales, or service contract that will have an impact on projects in Iraq. U.S. persons may not, for example, provide financing or consulting services to a third-country company, where those services would inure to the benefit of a project in Iraq. Banks need to be very careful that their foreign corporate accounts are not used in connection with Iraqi projects or commercial activities.

While foreign subsidiaries of U.S. firms are not subject to the Regulations, U.S. parent corporations and all U.S. citizens or residents, wherever located, are strictly prohibited from approving or providing financial assistance, advice, consulting services, goods, or any other support to subsidiaries in connection with Iraqi projects.

UNSC RESOLUTION 986

On April 14, 1995, the United Nations Security Council adopted Resolution 986 ("UNSCR 986") which, subject to certain conditions, established a program to allow the Government of Iraq a six month window in which to sell $2 billion of petroleum and petroleum products, the proceeds of which would be used to purchase humanitarian supplies. Proceeds are to be deposited into a special account at Banque Nationale de Paris' New York branch which will be used

to fund the purchases. The Secretary General of the United Nations has now announced the implementation of the program and the Regulations have been amended accordingly.

U.S. persons are authorized to enter into executory contracts with the Government of Iraq relating to the following authorized transactions: the purchase and exportation from Iraq of Iraqi-origin petroleum and petroleum products; the trading, importation, exportation or other dealings in or related to Iraqi-origin petroleum and petroleum products outside Iraq; the sale and exportation to Iraq of parts and equipment that are essential for the safe operation of the Kirkuk-Yumurtalik pipeline system in Iraq; and the sale and exportation to Iraq of medicines, health supplies, foodstuffs, and materials and supplies for essential civilian needs.

All executory contracts must meet the following requirements: the executory contracts and all other related contracts must be consistant with the requirements of UNSCR 986, any other applicable UNSC Resolutions, memoranda, and any further guidance issued by the 661 Sanctions Committee and executory contracts involving any transactions subject to license application requirements by another Federal agency must be contingent upon prior authorization of such agency. Actual performance under any executory contract requires the issuance of a separate specific license by OFAC (see below). The authorization for executory contracts by U.S. persons includes contracts with third parties incidental to permissible executory contracts with the Government of Iraq.

Section 575.523 of the Regulations now provides a statement of licensing policy for U.S. persons seeking to purchase petroleum and petroleum products from the Government of Iraq or Iraq's State Oil Marketing Organization ("SOMO") pursuant to UNSCR 986. A specific license must be issued by OFAC to authorize a licensee to deal directly with the United Nations 661 Committee or its designee (the "overseers") appointed by the UN Secretary-General. Applications for specific licenses from OFAC must include the following information: (1) applicant's full legal name; (2) applicant's mailing and street addresses; (3) name of the individual(s) responsible for the license application and related commercial transactions and the individual's telephone and facsimile numbers; (4) if the applicant is a business entity, the state or jurisdiction of incorporation and principal place of business; (5) a written certification that the applicant has entered into an executory contract for the purchase of Iraqi-origin petroleum or petroleum products with the Government of Iraq, that the contract accords with normal arms-length commercial practice, and that the applicant is familiar with the Regulations, particularly Sections 575.601 and 575.602, and will make its executory contract and other documents related to the purchase of Iraqi-origin petroleum or petroleum products available to OFAC; and (6) a written certification that the applicant understands that issuance of a license does not authorize a licensee to provide goods, services, or compensation of any kind to the Government of Iraq other than that specifically provided in contracts entered into by the applicant and the Government of Iraq and submitted to and approved by the UN 661 Committee or its designee. Following the issuance of a specific license OFAC will coordinate with the U.S. State Department the provision of a list of licensed "national oil

purchasers" to the UN 661 Committee. OFAC licensees whose contracts are ultimately approved by UN overseers will be permitted to perform those contracts in accordance with their terms. Section 575.526 of the Regulations provides a general license for dealing in, and importation into the United States of, Iraqi-origin petroleum and petroleum products, the purchase and exportation of which have been authorized in accordance with UNSCR 986.

Section 575.524 of the Regulations provides a statement of licensing policy for the exportation to Iraq of pipeline parts and equipment necessary for the safe operation of the Iraqi portion of the Kirkuk-Yumurtalik pipeline system. Applications for such specific licenses must be made to OFAC in advance of the proposed sale and exportation and provide the following information: (1) identification of the applicant, including full legal name, mailing and street addresses, the name of the individual(s) responsible for the application and related commercial transactions and the individual's telephone and facsimile numbers, and, if the applicant is a business entity, the state or jurisdiction of incorporation and principal place of business; (2) the name and address of all parties involved in the transactions and their role, including financial institutions and any Iraqi broker, purchasing agent, or other participant in the purchase of the pipeline parts or equipment; (3) the nature, quantity, value and intended use of the pipeline parts and equipment; (4) the intended point(s) of entry into Iraq, proposed dates of entry and delivery, and the final destination in Iraq of the pipeline parts and equipment; (5) a copy of the concluded contract with the Government of Iraq and other relevant documentation, all of which must comply with the provisions of UNSC Resolution 986, other applicable Security Council resolutions, the Memorandum of Understanding, and applicable guidance issued by the 661 Committee; and (6) a statement that the applicant is familiar with the requirements of the above-referenced documents, particularly Memorandum of Understanding paragraph 24 and Guidelines paragraphs 35 and 45, and will conform the letter of credit and related financing documents to their terms.

Section 575.525 of the Regulations provides a statement of licensing policy for the sale of humanitarian items to Iraq. Applications for specific licenses must be made to OFAC in advance of the proposed sale and exportation and provide the following information: (1) identification of the applicant, including full legal name, mailing and street addresses, the name of the individual(s) responsible for the application and related commercial transactions and the individual's telephone and facsimile numbers, and, if the applicant is a business entity, the state or jurisdiction of incorporation and principal place of business; (2) the name and address of all parties involved in the transactions and their role, including financial institutions and any Iraqi broker, purchasing agent, or other participant in the purchase of the humanitarian aid; (3) the nature, quantity, value and the intended use of the humanitarian aid; (4) the intended point(s) of entry into Iraq, proposed dates of entry and delivery, and the final destination in Iraq of the humanitarian aid; (5) a copy of the concluded contract with the Government of Iraq or the United Nations Inter-Agency Humanitarian Programme and other relevant documentation, all of which must comply with the

provisions of UNSCR 986, other applicable Security Council resolutions, the Memorandum of Understanding, and applicable guidance issued by the 661 Committee; and (6) a statement that the applicant is familiar with the requirements of UNSCR 986, other applicable Security Council resolutions, the Memorandum of Understanding, and applicable guidance issued by the 661 Committee, particularly Memorandum of Understanding paragraph 24 and Guidelines paragraphs 35 and 45, and will conform the letter of credit and related financing documents to their terms.

Transactions related to travel to Iraq or activities within Iraq by U.S. persons are not authorized by the Regulations nor are debits to blocked accounts or direct financial transactions with the Government of Iraq. U.S. persons may, however, enlist and pay the expenses of non-U.S. nationals to travel to Iraq on their behalf for the purpose of assisting in obtaining an executory contract under UNSCR 986. Banking transfers into Iraq to persons in Iraq continue to be prohibited by Section 575.210 of the Regulations.

TRAVEL

All transportation-related transactions and services, or the use by U.S. persons of vessels or aircraft registered in Iraq, are prohibited. All travel-related transactions by U.S. persons are also prohibited, with narrow exceptions related to journalistic activity, official U.S. Government or United Nations business, reimbursement for the UNSCR 986 activities referenced above, or one's own departure from Iraq.

FINANCIAL

All transfers of funds by U.S. persons to the Government of Iraq or to persons in Iraq are prohibited, as are all commitments or transfers of credit, financial transactions, or contracts. Banks may not execute transfer instructions involving sending money to persons in Iraq, except as licensed, and must block any funds coming into their possession in which there is an interest of the Government of Iraq, including Specially Designated Nationals of Iraq or Iraqi financial institutions located anywhere in the world. "Suspense accounts" are not permitted. If banks receive instructions to transfer funds involving an interest of the Government of Iraq, they must block them on their own books.

Among other items, the Regulations provide the following guidance:

STANDBY LETTERS OF CREDIT

A number of companies were required to open bid, performance, or warranty bonds in the form of standby letters of credit to do business in or with Iraq before the Iraqi invasion of Kuwait. Special procedures have been established with regard to payment demands under standby letters of credit in favor of Iraq. Banks must "give prompt notice" to the party who opened the letter of credit (the account party) when there is an attempted drawing. The account party then has five days to apply to the Office of Foreign Assets Control for a specific license to prevent "payment" of the letter of credit into a blocked account. A bank may not make any pay-

ment, even into a blocked account, on behalf of an Iraqi beneficiary unless the account party fails to secure a Treasury Department license within 10 business days of notification from the bank. If the account party receives a license from the Treasury Department, the original of the license should be presented to the bank and a special blocked reserve account must be established on the account party's corporate ledger to reflect its outstanding obligation to Iraq in lieu of the bank "paying" the letter of credit. The account party must certify to the Treasury Department that it has established the blocked reserve account. Nothing in this procedure precludes the account party or any other person from at any time contesting the legality of the demand from the beneficiary or raising any other legal defense to payment. Moreover, the issuing bank must continue to maintain the letter of credit as a contingent liability on its own books, despite any reserve account established by the account party. The obligations of the various parties under the letter of credit remain in effect as long as the Iraqi assets are blocked. They may be reevaluated and renegotiated to the extent permitted by law once the assets have been unblocked.

SPECIAL REPORTS

All parties engaging in transactions involving Iraq must keep accurate and comprehensive records. The Office of Foreign Assets Control may require reports on such activities at any time. The Treasury Department has required the filing of special census data on claims by U.S. nationals against Iraq (TDF 90–22.41) and on blocked Iraqi government property (TDF 90–22.40).

If you have information regarding possible violations of any of these regulations, please call the Treasury Department's Office of Foreign Assets Control at 202/622–2430. Your call will be handled confidentially.

This document is explanatory only and does not have the force of law. The Executive Orders and implementing regulations dealing with Iraq contain the legally binding provisions governing the sanctions and this document does not supplement or modify those Executive Orders or regulations.

The Office of Foreign Assets Control also administers sanctions programs involving Libya, The Federal Republic of Yugoslavia (Serbia and Montenegro) and Serb-Controlled Bosnia, Cuba, North Korea, the National Union for the Total Independence of Angola (UNITA), Iran, Syria, Sudan, Burma (Myanmar), designated international terrorists and narcotics traffickers, Foreign Terrorist Organizations, and designated foreign persons who have engaged in activities relating to the proliferation of weapons of mass destruction. For additional information about these programs or about the Iraqi sanctions program, please contact the:

(5) Libya: What You Need to Know about the U.S. Embargo

An overview of the Libyan Sanctions Regulations—Title 31 Part 550 of the U.S. Code of Federal Regulations

INTRODUCTION

The Libyan Sanctions Regulations, authorized under the International Emergency Economic Powers Act and the International Security and Development Cooperation Act of 1985, established economic sanctions against Libya in January 1986. Citing terrorist attacks against the Rome and Vienna airports in December 1985, former President Reagan emphasized that he had authorized the sanctions in response to Libya's repeated use and support of terrorism against the United States, other countries, and innocent persons. The Regulations are still in force and affect all U.S. citizens and permanent residents wherever they are located, all people and organizations physically in the United States, and all branches of U.S. organizations throughout the world. They are administered by the U.S. Treasury Department's Office of Foreign Assets Control.

Criminal penalties for violating the sanctions range up to 10 years in prison, $500,000 in corporate and $250,000 in individual fines. In addition, civil penalties of up to $11,000 per violation may be imposed administratively.

This fact sheet is a broad overview of the Libyan Sanctions Regulations.

BUYING FROM LIBYA

Goods or services of Libyan origin may not be imported into the United States either directly or through third countries. There are two exceptions: (1) Libyan merchandise up to $100 in value in noncommercial quantities may be brought into the United States either for strictly personal use as accompanied baggage by an authorized traveler or sent as a gift to a person in the United States and (2) qualifying informational material may be imported without restriction.

SELLING TO LIBYA

Except for informational materials, such as books, magazines, films, and recordings and donated articles such as food, clothing, medicine, and medical supplies intended to relieve human suffering, and the licensed export of agricultural commodities and products, medicine and medical equipment, no goods, technology, or services may be exported from the United States to Libya, either directly or through third countries. No U.S. bank or foreign branch of a U.S. bank may finance, or arrange offshore financing for, third-country trade transactions where Libya is known to have an interest in the trade as its ultimate beneficiary. The U.S. Treasury De-

partment takes the view that arranging transactions which ultimately benefit Libya (for example, brokering third-country sales of Libyan crude oil or transportation for Libyan cargo) constitutes an exportation of brokerage services to Libya and a dealing in Libyan governmental property in violation of the Regulations. Banks should be careful, for example, not to become involved in transactions relating to shipments to or from South Korea involving ultimate delivery of merchandise to the Great Man-Made River Project in Libya. The only areas of trade that may involve Libya and still be permissible are: (1) the sale of parts and components to third countries, where the U.S. goods will be "substantially transformed" into new and different articles of commerce prior to shipment to Libya, and (2) the sale of goods which come to rest in the inventory of a third-country distributor whose sales are not predominantly to Libya. Even the first of those exceptions is not available if the finished product of the third country is destined for use in any aspect of the Libyan petroleum or petrochemical industries.

SPECIALLY DESIGNATED NATIONALS

Individuals or organizations who act on behalf of the Government of Libya anywhere in the world are considered by the U.S. Treasury Department to be "Specially Designated Nationals" of Libya. Their names are published in the Federal Register, an official publication of the U.S. Government. A listing of such Specially Designated Nationals may be obtained by calling the Office of Foreign Assets Control at 202/622–2420. The listing, however, is a partial one and any U.S. individual or organization engaging in transactions with foreign nationals must take reasonable care to make certain that such foreign nationals are not acting on behalf of Libya. The list includes certain banks domiciled in Europe and Africa as well as the names of individuals who are officers and directors of substantial international corporations. U.S. individuals or organizations who violate the Regulations by transacting business with Specially Designated Nationals of Libya may be subject to civil or criminal prosecution.

LIBYAN GOVERNMENT ASSETS BLOCKED

On January 8, 1986, the President blocked all Government of Libya assets in the United States or in the possession or control of U.S. persons anywhere in the world. This action prohibits all transfers of Libyan governmental assets without a specific license from the Office of Foreign Assets Control. All contracts, loans, and financial dealings with Libya are prohibited. The freeze covers all properties of the Libyan Government, and of entities owned or controlled by it, including all Libyan-organized and Libyan-owned or controlled banks (all banks in Libya are considered Government-controlled) and includes deposits held in banks in the United States and in U.S. banks' overseas branches. The prohibition against any transfer of property or interest in the property of Libya includes property that is now or in the future is located in the United States or is in or comes into the possession or control of U.S. persons. Any unlicensed funds transfer involving a direct or indirect interest of the Government of Libya (including any transfer routed through or to Libyan banks which are all considered

Specially Designated Nationals of Libya), for which banks subject to U.S. jurisdiction receive instructions, must be deposited into a blocked account on the books of the bank receiving the instructions. Such funds may not be returned to a remitter without a specific license from the Office of Foreign Assets Control. No unlicensed debits may be made to blocked Libyan accounts to pay obligations of U.S. or other persons, whether the obligations arose before or after the sanctions against Libya were imposed. Even payments from blocked accounts for goods, services, or technology exported prior to the sanctions program are prohibited.

FINANCIAL DEALINGS WITH LIBYA

Financial transactions, including trade financing, are generally prohibited. Payments for and financing of licensed sales of agricultural commodities and products, medicine and medical equipment may be accomplished by cash in advance, sales on open account (provided the account receivable is not transferred by the person extending the credit), or by third country financial institutions that are neither U.S. persons nor government of Libya entities. Any other arrangements must be specifically authorized by OFAC. U.S. banks may adise and confirm letters of credit issued by third country banks covering licensed sales.

Payments for licensed sales of agricultural commodities and products, medicine and medical equipment, which must reference an appropriate OFAC license, may not involve a debit to a blocked account on the books of a U.S. depository institution. Before a U.S. bank initiates a payment, or credits its customer for a licensed transaction, it must determine that the transfer is authorized.

CONTRACTS BENEFITING LIBYA

No U.S. person may perform any contract in support of an industrial or other commercial or governmental project in Libya. The prohibition includes sales or service agreements with non-Libyan persons located anywhere in the world, if it is known that Libya or a Libyan project will benefit from the transaction. Banks subject to U.S. jurisdiction must exercise extreme caution not to operate accounts for even non-U.S. companies which use those accounts for transactions connected with Libyan projects or commercial activities. Any such accounts must be blocked under U.S. law.

TRANSACTIONS INVOLVING U.S. SUBSIDIARIES

Independent transactions with Libya by foreign subsidiaries of U.S. firms are permitted if no U.S. person or permanent resident has a role. It should be emphasized that the facilitating actions of the U.S. parent, or of U.S. citizens (wherever resident) who manage or work for the subsidiary, are fully subject to the prohibitions of the Regulations.

STANDBY LETTERS OF CREDIT

A number of companies were required to open bid, performance, advance payment, or warranty bonds in the form of standby letters of credit to do business with Libya before the Libyan sanctions were imposed. Special procedures have been established with re-

gard to payment demands under standby letters of credit in favor of Libya. Banks must "give prompt notice" to the party who opened the letter of credit (the account party) when there is an attempted drawing. The account party then has five days to apply to the Office of Foreign Assets Control for a specific license to prevent "payment" of the letter of credit into a blocked account. A bank may not make any payment, even into a blocked account, on behalf of a Libyan beneficiary unless the account party fails to secure a Treasury license within 10 business days of notification from the bank. If the account party receives a license from the Treasury Department, the original of the license should be presented to the bank and a special blocked reserve account must be established on the account party's corporate books to reflect its outstanding obligation to Libya in lieu of the bank "paying" the letter of credit. The account party must certify to the Treasury Department that it has established the blocked reserve account. Neither the bank nor the account party are relieved from giving any notice of defense against payment or reimbursement that is required by applicable law. Moreover, the issuing bank must continue to maintain the letter of credit as a contingent liability on its own books, despite any reserve account established by the account party and, in the event the embargo is lifted, both the bank and the account party will be expected to negotiate concerning their outstanding obligation.

TRAVEL TO LIBYA

All transportation-related transactions involving Libya by U.S. persons are prohibited, including the sale in the United States of any transportation by air which includes any stop in Libya. All travel-related transactions are prohibited for U.S. citizens or residents with regard to Libya, except for (1) travel by close family members of Libyan nationals when the U.S. citizen or resident has registered with Treasury's Office of Foreign Assets Control or with the Embassy of Belgium in Tripoli, or (2) travel by journalists regularly employed in such capacity by a newsgathering organization, or (3) travel transactions for the sole purpose of negotiating executory contracts in connection with licensed sales or agricultural commodities and products, medicine, and medical equipment. Travel transactions related to the installation or servicing of medical equipment exported pursuant to OFAC license may be authorized by specific license.

If you have information regarding possible violations of any of these regulations, please call the Treasury Department's Office of Foreign Assets Control at 202/622–2430. Your call will be handled confidentially.

* * * * * * *

This document is explanatory only and does not have the force of law. The Executive Orders and implementing regulations relating to Libya contain the legally binding provisions governing the sanctions and this document does not supplement or modify those Executive Orders or regulations.

The Office also administers sanctions programs involving Iraq, the Federal Republic of Yugoslavia, the Republic of Serbia, North Korea, Cuba, the National Union for the Total Independence of An-

gola (UNITA), the Taliban in Afghanistan, Iran, Syria, Sudan, Burma (Myanmar), designated international terrorists and narcotics trafickers, Foreign Terrorist Organizations, and designated foreign persons who have engaged in activities related to the proliferation of weapons of mass destruction. (6) North Korea: What You Need to Know about the U.S. Embargo

An overview of the Foreign Assets Control Regulations as they relate to North Korea—Title 31 Part 500 of the U.S. Code of Federal Regulations

INTRODUCTION

The Foreign Assets Control Regulations, authorized under the Trading with the Enemy Act, established economic sanctions against the Democratic People's Republic of Korea ("North Korea") in 1950. Although recently modified as a result of commitments made to begin normalization of relations, the Regulations are still in force and affect all U.S. citizens and permanent residents wherever they are located, all people and organizations physically in the United States, and all branches, subsidiaries and controlled affiliates of U.S. organizations throughout the world. They are administered by the U.S. Treasury Department's Office of Foreign Assets Control. Penalties for violating the sanctions range up to 10 years in prison, $1,000,000 in corporate fines, and $250,000 in individual fines.

This fact sheet is a broad summary of the Regulations for all individuals intending to travel to or otherwise deal with North Korea.

SELLING TO NORTH KOREA

Except for information and informational materials, such as books, magazines, films, compact disks, CD ROMs, artworks, news wire feeds and recordings. U.S. products, technology or services generally may not be exported to North Korea, either directly or through third countries, unless licensed by the Bureau of Export Administration of the U.S. Department of Commerce. This prohibition includes dealing in or assisting the sale of goods or commodities to or from North Korea, since such brokering is considered to be the export of a service. Exports of commercially-supplied goods to meet basic human needs may be authorized under individual validated licenses by the U.S. Commerce Department on a case-by-case basis.

Licenses are also granted to U.S. persons by the U.S. Treasury Department to enable them to participate in transactions that further North Korea's transition to light-water reactor ("LWR") power plants. Such projects include LWR power plant design, site preparation, excavation, delivery of essential nonnuclear components (including turbines and generators), building construction, the disposition of spent nuclear fuel and the provision of heavy oil for heating and electricity generation pending completion of the first LWR unit. For information regarding licensing criteria, please contact the Licensing Division of the Office of Foreign Assets Control at 202/622–2480.

BUYING FROM NORTH KOREA

Goods or services of North Korean origin generally may not be imported into the United States either directly or through third countries, without authorization from the Office of Foreign Assets Control. The only exceptions are non-commercial quantities of North Korean merchandise up to $100 in value, which may be brought into the United States for strictly personal use as accompanied baggage by a person traveling to North Korea and informational materials, which may be imported without limitation. Receipts should be kept to document any goods purchased in North Korea and those receipts should be made available to U.S. Customs when entry is made into the United States.

Specific licenses may be issued by the Office of Foreign Assets Control to allow the importation into the United States of North Korean-origin Magnesite or magnesia. For further information regarding licensing criteria, please contact the Licensing Division of the Office of Foreign Assets Control at 202/622–2480.

SPECIALLY DESIGNATED NATIONALS

The Regulations prohibit buying from or selling to North Korean nationals whether they are physically located in North Korea or doing business elsewhere. Individuals or organizations who act for or on behalf of North Korea anywhere in the world are considered by the U.S. Treasury Department to be "Specially Designated Nationals" of North Korea. Their names are published in the Federal Register, an official publication of the U.S. Government. A listing of such Specially Designated Nationals may be obtained by calling the Office of Foreign Assets Control at 202/622–2420. The listing, however, is a partial one and any U.S. individual or organization engaging in transactions with foreign nationals must take reasonable care to make certain that such foreign nationals are not acting for or on behalf of North Korea. Specially Designated Nationals of North Korea operating in the United States are subject to criminal prosecution and U.S. individuals or organizations who violate the Regulations by transacting business with them are also subject to criminal prosecution.

SENDING GIFTS

Gift parcels may only be shipped or carried to an individual, or to a religious, charitable, or educational organization in North Korea for the use of the recipient or of the recipient's immediate family, subject to the following limitations: the combined total domestic retail value of all the items in the parcel must not exceed $400; not more than one parcel may be sent or given by the same person in the U.S. to the same recipient in North Korea in any month; and only items normally sent as gifts, such as food, clothing, toilet articles, or medicine, may be included in the gift parcel. Gold coins and gold bullion are not eligible for gift parcel treatment. Organizations that consolidate and send multiple gift parcels in single shipments must obtain a validated license from the U.S. Department of Commerce. Each gift parcel must meet commodity, dollar-value, and frequency limitations. If a parcel being shipped or carried to North Korea fails to meet these standards, the parcel,

and any parcel in a consolidated shipment with it, are subject to seizure by the U.S. Government.

TRAVELING TO NORTH KOREA

U.S. passports are valid for travel to North Korea and individuals do not need U.S. Government permission to travel there. All transactions ordinarily incident to travel to, from and within North Korea and to maintenance within North Korea are authorized. U.S. travel service providers are authorized to organize group travel to North Korea, including transactions with North Korean carriers. However, individuals may only spend money in North Korea to purchase items related to travel, such as hotel accommodations, meals, and goods for personal consumption by the traveler in North Korea. There is no longer any per diem restriction on these expenses, and the use of credit cards for these transactions is also authorized. A traveler returning from North Korea may bring back into the United States as accompanied baggage $100 worth of merchandise in non-commercial quantities, as well as informational materials without limitation. Because the sanctions program prohibits business dealings with North Korea unless licensed by the U.S. Treasury Department, purchases of other goods or services unrelated to travel are prohibited. At the present time, individuals who wish to travel to North Korea must obtain North Korean entry visas in third countries. Travelers should consult the U.S. State Department for any special travel advisories.

ACCOUNTS AND ASSETS

As a general rule, no U.S. person may have any dealings in North Korean assets, either governmental or private; nor may they have any financial dealings with North Korea, except for financial transactions incident to authorized activities, such as travel-related transactions and licensed trade. All property of North Korea, of North Korean nationals, and of Specially Designated Nationals of North Korea controlled by or in the possession of persons subject to U.S. jurisdiction is "blocked."

U.S. financial institutions may now rely on originators or beneficiaries of funds transfers with regard to compliance with the sanctions against North Korea and are authorized by general license to process the post-February 14, 1995 transfer of funds in which North Korea or a national thereof has an interest. Persons subject to U.S. jurisdiction who are originators or ultimate beneficiaries of such funds transfers, however, including U.S. banking institutions that are themselves originators or beneficiaries, may not initiate or receive such transfers if the underlying transactions to which they relate are prohibited.

Specific licenses may be issued on a case-by-case basis to authorize the unblocking of funds that were blocked by financial institutions pursuant to this part because of an interest of North Korea or a national thereof, that came into the financial institution's possession or control by wire transfer or check remittance prior to the effective date of the general license authorizing such activity. Such licenses will only authorize the return of funds to remitting parties, provided that no funds are released to the Government of North Korea, to any entity controlled by the Government, to any person

located in or controlled from North Korea, or to any entity organized under the laws of that country.

ESTATES AND INSURANCE POLICIES

An estate is blocked whenever a North Korean resident is an heir or is the deceased; money from a life insurance policy is blocked whenever the deceased or the beneficiary is a North Korean resident. It is possible for the heir of a person who died in North Korea, or the beneficiary of a life insurance policy of a person who died in North Korea, to apply for a license from the U.S. Treasury Department to unblock the estate or the insurance proceeds, provided the heir or beneficiary is not a North Korean national. Persons administering or interested in blocked estates or life insurance proceeds should contact the Licensing Division of the Office of Foreign Assets Control at 202/622–2480 to obtain further information concerning procedures for requesting a Treasury license.

DONATIONS OF FUNDS AND GOODS TO MEET BASIC HUMAN NEEDS

Donations of funds for the purpose of contributing to the provision of humanitarian assistance to victims of natural disasters in North Korea are authorized, provided that such donations may only be made through the United Nations, related UN programs and specialized agencies, the American Red Cross and the International Committee of the Red Cross. Transactions incident to the donation to North Korea from third countries of goods to meet basic human needs are also authorized.

OVERFLIGHT PAYMENTS

Effective April 7, 1997, a general license has been issued authorizing payments to North Korea for services rendered by the Government of North Korea in connection with overflights of North Korea or emergency landings in North Korea by aircraft registered in the United States or owned or controlled by persons subject to the jurisdiction of the United States. The publication date in the Federal Register is April 10, 1997.

CENSUS OF CLAIMS

The Regulations were amended on December 9, 1997 to require the reporting, no later than March 9, 1998, of all outstanding claims held by U.S. nationals against the Government of North Korea or any North Korean government entity.

This document is explanatory only and does not have the force of law. The Executive Orders and implementing regulations relating to North Korea contain the legally binding provisions governing the sanctions and this document does not supplement or modify those Executive Orders or regulations.

The Treasury Department's Office of Foreign Assets Control also administers sanctions programs involving Iraq, Libya, the Federal Republic of Yugoslavia (Serbia and Montenegro), Cuba, the National Union for the Total Independence of Angola (UNITA), Iran, Syria, Sudan, Burma (Myanmar), designated international terrorists and narcotics traffickers, Foreign Terrorist Organizations, and

designated foreign persons who have engaged in activities related to the proliferation of weapons of mass destruction. For additional information about these programs or about the North Korean sanctions program, please contact the:

(7) Sudan: What You Need to Know about the U.S. Embargo

An overview of the Sudanese Sanctions Regulations—Title 31 Part 538 of the U.S. Code of Federal Regulations

INTRODUCTION

On November 3, 1997, after finding that the policies and actions of the Government of Sudan, including continued support for international terrorism, ongoing efforts to destabilize neighboring governments, and the prevalence of human rights violations, including slavery and the denial of religious freedom, constituted an unusual and extraordinary threat to the national security and foreign policy of the United States, President Clinton issued Executive Order No. 13067, declaring a national emergency to deal with that threat. The order, issued under the authority of International Emergency Economic Powers Act (50 U.S.C. 1701–1706) ("IEEPA"), the National Emergencies Act (50 U.S.C. 1601 et seq.) and section 301 of title 3, United States Code, imposed a trade embargo against Sudan and a total asset freeze against the Government of Sudan. The Sudanese Sanctions Regulations, 31 C.F.R. Part 538 (the "Regulations") implement Executive Order No. 13067.

Criminal penalties for violating the Regulations range up to 10 years in jail, $500,000 in corporate, and $250,000 in individual fines. In addition, civil penalties of up to $11,000 per violation may be imposed administratively.

This fact sheet is a broad overview of the Regulations.

BUYING FROM SUDAN

Goods or services of Sudanese origin may not be imported into the United States either directly or through third countries without a license. Exceptions include: (1) Sudanese merchandise up to $100 in value in non-commercial quantities may be brought into the United States either for strictly personal use as accompanied baggage or sent as a gift to a person in the United States and (2) information or informational materials may be imported without restriction. All other imports of Sudanese origin must be authorized by the Office of Foreign Assets Control.

Importation into the United States from third countries of goods containing raw materials or components of Sudanese origin is not prohibited if those raw materials or components have been incorporated into manufactured products or otherwise substantially transformed in a third country.

SELLING TO SUDAN

Except for information or informational materials and donated articles intended to relieve human suffering, such as food, clothing and medicine, and the licensed export of agricultural commodities and products, medicine and medical equipment, no goods, tech-

nology, or services may be exported from the United States to Sudan, either directly or through third countries, without a license. Exportation of goods or technology from the United States to third countries is prohibited if the exporter knows, or has reason to know, that the goods or technology are intended for transshipment to Sudan. The exportation of goods or technology intended specifically for incorporation or substantial transformation into a third-country product is also prohibited if the particular product is to be used in Sudan, is being specifically manufactured to fill a Sudanese order, or if the manufacturer's sales of the particular product are predominantly to Sudan.

No U.S. bank, including its foreign branches, may finance, or arrange offshore financing for, third-country trade transactions where Sudan is known to be the ultimate destination of, or the Government of Sudan is the purchaser of, the goods. Arranging transactions which ultimately benefit Sudan (for example, brokering third-country sales to Sudan) constitutes an exportation of brokerage services to Sudan in violation of the Regulations. The Regulations also prohibit non-U.S. persons from unauthorized re-exportation of U.S. origin goods to Sudan.

SPECIALLY DESIGNATED NATIONALS

Individuals or organizations that are owned or controlled by, or act on behalf of, the Government of Sudan anywhere in the world may be named by the U.S. Treasury Department as "Specially Designated Nationals" ("SDNs") of Sudan. U.S. persons are prohibited from transacting business with these individuals and entities, and all of their property in the United States or in the possession or control of a U.S. person is blocked. Their names are published in the Federal Register, an official publication of the U.S. Government. A listing of such SDNs may be obtained by calling the Office of Foreign Assets Control ("OFAC") at 202/622–2490. The listing, however, is a partial one and any U.S. individual or organization engaging in transactions with foreign nationals must take reasonable care to make certain that such foreign nationals are not owned or controlled by or acting on behalf of Sudan. U.S. individuals or organizations who violate the Regulations by transacting business with Specially Designated Nationals may be subject to civil or criminal prosecution.

SUDANESE GOVERNMENT ASSETS BLOCKED

Effective November 4, 1997, all property and interests in property of the Government of Sudan, including its agencies, instrumentalities and controlled entities and SDNs, in the United States or in the possession or control of a U.S. person, including their overseas branches, are blocked. All transfers of such property must be authorized by the OFAC. Any unlicensed funds transfer involving a direct or indirect interest of the Government of Sudan (including any transfer routed to a Sudanese Government-controlled bank) for which banks subject to U.S. jurisdiction receive instructions must be deposited into a blocked account on the books of the bank receiving the instructions. Such funds may not be returned to a remitter without a specific license from the OFAC. No unlicensed debits may be made to blocked accounts to pay obligations of U.S.

or other persons, whether the obligations arose before or after the sanctions against Sudan were imposed. Setoffs against blocked accounts are prohibited.

FINANCIAL DEALINGS WITH SUDAN

Payments for and financing of licensed sales of agricultural commodities and products, medicine and medical equipment may be accomplished by cash in advance, sales on open account (provided the account receivable is not transferred by the person extending the credit), opr by third country financial institutions that are neither U.S. persons nor government of Sudan entities. U.S. banks may advise or confirm letters of credit issued by third country banks covering such licensed sales.

Payments for licensed sales of agricultural commodities and products, medicine and medical equipment, which must reference an appropriate OFAC license, may not involve a debit to a blocked account on the books of a U.S. depository institution. Before a U.S. bank initiates a payment, or credits its customer for a licensed transaction, it must determine that the transfer is authorized.

As a rule, all other financial dealings with Sudan are prohibited, including the performance by any U.S. person of any contract, including a financing contract, in support of an industrial, commercial, public utility, or governmental project in Sudan.

U.S. persons are authorized to send and receive personal remittances to and from Sudan, provided that such transfers are not processed through a bank owned or controlled by the Government of Sudan. Financing related to trade contracts involving Sudan which were in place prior to November 4, 1997, and for which underlying transactions were completed by December 4, 1997, may be completed in accordance with their terms, provided that no debits are made to a blocked account.

PROHIBITED FACILITATION

The Regulations prohibit the facilitation by a U.S. person of the direct or indirect exportation or reexportation of goods, technology or services to or from Sudan. Facilitation of a trade or financial transaction that could be lawfully engaged in directly by a U.S. person or from the United States is not prohibited. Likewise, performance of services of a purely clerical or reporting nature that does not further trade or financial transactions with Sudan or the Government of Sudan will not violate the prohibition on exportation of services to Sudan.

NON-GOVERNMENTAL ORGANIZATIONS

Registration numbers may be issued by OFAC on a case-by-case basis to nongovernmental organizations ("NGOs") involved in humanitarian or religious activities in Sudan. This registration number will enable the NGO to continue authorized operations in Sudan. Applications for registration must include the name and address of the NGO's headquarters; the name, title, and telephone number of a person to be contacted in connection with the registration; the NGO's local address in Sudan and name, if different; and a detailed description of its humanitarian or religious activities and

projects in Sudan. Registrants conducting transactions for their Sudanese operations should reference their registration number on all funds transfer, purchase, shipping, and financing documents.

If you have information regarding possible violations of any of these regulations, please call the Treasury Department's Office of Foreign Assets Control at 202/622–2430. Your call will be handled confidentially.

* * * * * * *

(8) Taliban: What You Need to Know about the U.S. Embargo

An overview of U.S. Sanctions against the Taliban (in Afghanistan)

President Clinton has issued the following Executive Order imposing an asset freeze and trade embargo against the Taliban in Afghanistan effective 12:01 a.m. Eastern Daylight time on July 6, 1999:

"EXECUTIVE ORDER

BLOCKING PROPERTY AND PROHIBITING TRANSACTIONS WITH THE TALIBAN

"By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.)("IEEPA"), the National Emergencies Act (50 U.S.C. 1601 et seq.), and section 301 of title 3, United States Code,

I, WILLIAM J. CLINTON, President of the United States of America, find that the actions and policies of the Taliban in Afghanistan, in allowing territory under its control in Afghanistan to be used as a safe haven and base of operations for Usama bin Ladin and the Al-Qaida organization who have committed and threaten to continue to commit acts of violence against the United States and its nationals, constitute an unusual and extraordinary threat to the national security and foreign policy of the United States, and hereby declare a national emergency to deal with that threat.

I hereby order:

Section 1. Except to the extent provided in section 203(b) of IEEPA (50 U.S.C. 1702(b)) and in regulations, orders, directives, or licenses that may be issued pursuant to this order, and notwithstanding any contract entered into or any license or permit granted prior to the effective date:

(a) all property and interests in property of the Taliban; and

(b) all property and interests in property of persons determined by the Secretary of the Treasury, in consultation with the Secretary of State and the Attorney General:

(i) to be owned or controlled by, or to act for or on behalf of the Taliban; or

(ii) to provide financial, material, or technological support for, or services in support of, any of the foregoing;

that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of United States persons, are blocked.

Sec. 2. Except to the extent provided in section 203(b) of IEEPA (50 U.S.C. 1702(b)) and in regulations, orders, directives, or licenses that may be issued pursuant to this order, and notwith-

standing any contract entered into or any license or permit granted prior to the effective date:

(a) any transaction or dealing by United States persons or within the United States in property or interests in property blocked pursuant to this order is prohibited, including the making or receiving of any contribution of funds, goods, or services to or for the benefit of the Taliban or persons designated pursuant to this order;

(b) the exportation, reexportation, sale, or supply, directly or indirectly, from the United States, or by a United States person, wherever located, of any goods, software, technology (including technical data), or services to the territory of Afghanistan controlled by the Taliban or to the Taliban or persons designated pursuant to this order is prohibited;

(c) the importation into the United States of any goods, software, technology, or services owned or controlled by the Taliban or persons designated pursuant to this order or from the territory of Afghanistan controlled by the Taliban is prohibited;

(d) any transaction by any United States person or within the United States that evades or avoids, or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions set forth in this order is prohibited; and

(e) any conspiracy formed to violate any of the prohibitions set forth in this order is prohibited.

Sec. 3. The Secretary of the Treasury, in consultation with the Secretary of State, is hereby directed to authorize commercial sales of agricultural commodities and products, medicine, and medical equipment for civilian end use in the territory of Afghanistan controlled by the Taliban under appropriate safeguards to prevent diversion to military, paramilitary, or terrorist end users or end use or to political end use.

Sec. 4. For the purposes of this order:

(a) the term "person" means an individual or entity;

(b) the term "entity" means a partnership, association, corporation, or other organization, group, or subgroup;

(c) the term "the Taliban" means the political/military entity headquartered in Kandahar, Afghanistan that as of the date of this order exercises de facto control over the territory of Afghanistan described in paragraph (d) of this section, its agencies and instrumentalities, and the Taliban leaders listed in the Annex to this order or designated by the Secretary of State in consultation with the Secretary of the Treasury and the Attorney General. The Taliban is also known as the "Taleban," "Islamic Movement of Taliban," "the Taliban Islamic Movement," "Talibano Islami Tahrik," and "Tahrike Islami'a Taliban";

(d) the term "territory of Afghanistan controlled by the Taliban" means the territory referred to as the "Islamic Emirate of Afghanistan," known in Pashtun as "de Afghanistan Islami Emarat" or in Dari as "Emarat Islami-e Afghanistan," including the following provinces of the country of Afghanistan: Kandahar, Farah, Helmund, Nimruz, Herat, Badghis, Ghowr, Oruzghon, Zabol, Paktiha, Ghazni, Nangarhar, Lowgar, Vardan, Faryab, Jowlan, Balkh, and Paktika. The Secretary of State, in consultation with the Secretary of the Treasury, is hereby authorized to modify the

description of the term "territory of Afghanistan controlled by the Taliban";

(e) the term "United States person" means any United States citizen, permanent resident alien, entity organized under the laws of the United States (including foreign branches), or any person in the United States.

Sec. 5. The Secretary of the Treasury, in consultation with the Secretary of State and the Attorney General, is hereby authorized to take such actions, including the promulgation of rules and regulations, and to employ all powers granted to me by IEEPA as may be necessary to carry out the purposes of this order. The Secretary of the Treasury may redelegate any of these functions to other officers and agencies of the United States Government. All agencies of the United States Government are hereby directed to take all appropriate measures within their authority to carry out the provisions of this order.

Sec. 6. Nothing contained in this order shall create any right or benefit, substantive or procedural, enforceable by any party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

Sec. 7.

(a) This order is effective at 12:01 a.m. Eastern Daylight Time on July 6, 1999.

(b) This order shall be transmitted to the Congress and published in the Federal Register."

THE WHITE HOUSE,
July 4, 1999

ANNEX

Mohammed Omar (Amir al-Mumineen [Commander of the Faithful])

STATE DETERMINATIONS (IN CONSULTATION WITH TREASURY):

Effective July 22, 1999, the term "territory of Afghanistan controlled by the Taliban" in the Executive Order was modified to include the city of Kabul, Afghanistan.

The Treasury Department's Office of Foreign Assets Control also administers sanctions programs involving, Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria, the Federal Republic of Yugoslavia (Serbia & Montenegro), the National Union for the Total Independence of Angola (UNITA), designated international terrorists and narcotics traffickers, foreign terrorist organizations, and designated foreign persons who have engaged in activities related to the proliferation of weapons of mass destruction. For additional information about these programs or about sanctions against the Taliban, please contact the:

7. Department of Transportation

a. Federal Aviation Administration

(1) Criminal Acts Against Civil Aviation—1998

Partial text of the 1988 report on Criminal Acts Against Civil Aviation, published by the Federal Aviation Administration's Office of Civil Aviation Security[1]

* * * * * * *

FOREWORD

Criminal Acts Against Civil Aviation is a publication of the Federal Aviation Administration's Office of Civil Aviation Security. This document records incidents that have taken place against civil aviation aircraft and interests worldwide. *Criminal Acts* has been published each year since 1986. Incidents recorded in this report are summarized in regional geographic overviews. Feature articles focus on case histories or on specific aviation-related issues. Incidents are also sorted into one of seven categories and compared over a five-year period. In addition, charts and graphs have been prepared to assist the reader in interpreting the data. The cutoff date for information in this report is December 31, 1998.

A new appendix, Appendix G, appears in this year's *Criminal Acts* report. This appendix identifies which aviation incidents in the past five years are considered politically motivated acts. Incidents for 1998 in this category are so identified in the individual incident summaries contained in the geographic regional reports.

The information contained in this publication is derived from a variety of foreign and domestic sources. In many cases, however, specific details of a particular incident may not be available, especially if it occurs outside the United States. While every effort has been made to provide complete and accurate information, it is not always possible to verify accounts of some incidents.

The FAA maintains records of aircraft hijackings, bombing attacks, and other significant criminal acts against civil and general aviation interests worldwide, which are used to compile this report. Offenses such as these represent serious threats to aviation safety and, in those incidents involving U.S. air carriers or facilities outside the United States, are often intended as symbolic attacks against the United States.

Hijacking and commandeering incidents are viewed within the context of the U.S. Federal criminal statute (49 USC 1472 (i)), which defines air piracy as any seizure or exercise of control, by force or violence or threat of force or violence, or by any other form

[1] The complete text of this publication can be viewed at the FAA Office of Civilian Security web site at: http://cas.faa.gov/crimacts/crim98/

of intimidation, and with wrongful intent, of any aircraft. This report does not distinguish between an act of air piracy and an attempted act of air piracy for statistical purposes.

The 1998 issue of *Criminal Acts Against Civil Aviation* [is] available on the world wide web at HTTP://SECURITY.FAA.GOV/CRIMACTS.[2] The 1996 and 1997 *Crimacts* reports are also available on this web site.

1998 IN REVIEW

[Image] [3]

Twenty-two incidents involving attacks against civil aviation interests worldwide were recorded in 1998. This is one fewer than the number of incidents recorded in 1997 and also the fewest recorded in *Criminal Acts Against Civil Aviation* since the report was first published in 1986. The sub-Saharan Africa region recorded the most incidents in 1998 with seven, while Europe ranked second with six incidents. Latin America and the Caribbean geographical area accounted for five incidents, three were recorded in Asia, and one was recorded in North America. Neither Central Eurasia nor the Middle East and North Africa region had any incidents during the year. The Democratic Republic of the Congo experienced the most incidents (four) of any one country in 1998; three of these were commandeerings that occurred between August 2 and 4. The highest percentage of incidents in 1998 (41% or nine incidents) were hijackings.

The three incidents recorded in Asia in 1998 included two hijackings and an airport attack. Both hijackings occurred on domestic flights. The first incident occurred in Pakistan when three hijackers attempted to divert the plane to India. This is considered a politically motivated incident. The second incident took place in China when the pilot himself diverted the plane to Taiwan. The airport attack occurred in Japan when three projectiles were launched at Tokyo's Narita Airport. This incident is also considered to have been politically motivated.

No incidents occurred in Central Eurasia during 1998.

Europe had the second highest number of incidents in 1998 with five hijackings and an off-airport facility attack. The off-airport attack, a bombing of an Olympic Airways office, was the only incident in that category during 1998. This bombing is considered a politically motivated incident. Europe had the most hijacking incidents during the year. One hijacking took place in Spain on an international flight. Of the remaining four hijackings, one began in Cyprus and three began in Turkey. All four incidents ended in Turkey. The three hijackings from Turkey are considered politically motivated incidents.

[Image] [3]

Five incidents took place in the Latin America and the Caribbean region during 1998. These incidents included two hijackings, a charter aviation commandeering, a shooting of an in-flight aircraft, and an airport attack. Both hijackings involved planes on domestic

[2] Should probably read http://cas.faa.gov/crimacts/.

[3] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/2.html.

routes: one in Nicaragua and one in Venezuela. The other incidents occurred in Colombia: Revolutionary Armed Forces of Colombia (FARC) guerrillas stormed an airstrip and commandeered a chartered plane, a helicopter was shot down during heavy fighting, and a car bomb exploded at the Medellin Airport.

No incidents were recorded in the Middle East and North Africa geographic region. North America, which had no incidents in the previous two years, was the site of a commandeering. In Canada, a man claiming to have a bomb locked himself in the cockpit of the plane and ordered the crew to fly him to Illinois. No incidents were recorded in the United States during 1998.

The most incidents in 1998 occurred in the sub-Saharan Africa region. Four incidents occurred in the Democratic Republic of the Congo (DROC) and three in Angola. Three of the DROC incidents were commandeerings that occurred between August 2 and 4. In all three incidents, civilian aircraft were commandeered to ferry troops and supplies. The fourth incident in the DROC was the shooting down of a plane that had been evacuating civilians. Tutsi-led rebels admitted to shooting down the plane with a missile. Two of the incidents in Angola occurred when planes were shot down in an area of heavy fighting between government troops and National Union for the Total Independence of Angola (UNITA) rebels. The total number of casualties is unknown. The third Angolan incident was a bombing of the Cabinda airport in which two people were killed and three injured. None of the incidents are considered to have been politically motivated.

*January 28, 1998—Shooting at Jakarta Airport—Indonesia **

Two incoming passengers who had just deplaned at Terminal F at the Soekarno-Hatta International Airport were shot by an unidentified assailant. One victim, a Japanese national, was shot in

[4] The map graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/3.html

the shoulder, while the other, an Indonesian national, was shot in the face. The attackers have not been identified.

February 2, 1998—Attack—Narita Airport—Japan

Three projectiles were launched at Tokyo's Narita Airport slightly injuring a cargo handler and prompting airport officials to temporarily shut down the airport runway. The steel-tube launchers were discovered embedded in the ground at a parking lot behind a Holiday Inn located near the airport. While police were investigating the site and before the launchers were rendered safe, three ten-inch projectiles were automatically fired by a timer. Two of the projectiles exploded on a paved area of the airport's apron near the hangers for cargo aircraft, while the third failed to explode and was found intact near the launch site. The runway was closed for just six minutes while airport authorities checked for damage. The Japanese radical group Kakurokyo (Revolutionary Worker's Association), Hazama faction, subsequently claimed responsibility for the attack, boasting that they had overcome the increased security put into effect for the Winter Olympic Games at Nagano.

This attack is considered a politically motivated incident.

*March 23, 1998—Incident on Aircraft—Taiwan **

A Taiwanese man attempted to set fire to a Great China Airlines de Havilland Dash 8–300 aircraft carrying 16 passengers and four crew during a domestic flight from Taipei to Chiayi. Eleven minutes after takeoff, the passenger suddenly got out of his seat and began to douse the cabin with gasoline, which he carried in two plastic tea bottles. After noticing the odor, a flight attendant saw the man preparing to light the gasoline with a cigarette lighter. A security officer aboard the flight and three other passengers subdued the man, however, before he was able to start a fire. The plane made an emergency landing at the Taichung Airport, and the suspect was taken into custody. He reportedly told police that he had been trying to kill himself. There were no injuries in this incident.

May 24, 1998—Hijacking—Pakistan International Airlines—Pakistan

Pakistan International Airlines flight 554 was hijacked during a domestic flight to Karachi from Turbat, a town in Baluchistan Province near the Iranian border. The plane, a twin-engine Fokker Friendship aircraft, carried 29 passengers and four crew members. Three hijackers armed with handguns and claiming to have explosives ordered the crew to fly to India. The hijackers also demanded (U.S.) $20 million for development in their native Baluchistan Province. Rather than fly to India, however, the crew took the plane to the airport in Hyderabad, Pakistan, located 90 miles from Karachi. The hijackers were led to believe that they had landed at a remote airstrip in Bhoj, India. Upon landing, the plane was immediately surrounded by security forces and vehicles were parked in front to prevent it from leaving. More than five hours later the hijackers reportedly told the "Indian negotiators" that Baluchistan needed development funds rather than nuclear tests by the Pakistani government in response to five Indian nuclear tests two

weeks before. The hijackers agreed to release the women and children aboard the aircraft. As the passengers were deplaning, Pakistani commandos overpowered the hijackers. A hijacker and an army officer were slightly injured in the ensuing scuffle.

This hijacking is considered a politically motivated incident.

October 28, 1998—Hijacking—Air China—China to Taiwan

Air China flight 905 was diverted by its pilot to Taiwan during a flight from Beijing to Kunming. The Boeing 737 aircraft was carrying nine crew members and 94 passengers, including the pilot's wife and child. The pilot reportedly made the diversion because of his dissatisfaction with his life on mainland China. The Taiwanese government dispatched four air force fighters to intercept and follow the plane to Taipei's Chiang Kai-Shek International Airport. The pilot, upon landing, then surrendered to Taiwanese officials without incident. On December 8 Taiwanese prosecutors indicted the pilot on hijacking-related charges, which carry a maximum penalty of death.

Chronology

August 9	Incident on Aircraft	Russia*

* Incident Not Counted in Statistics

*August 9, 1998—Incident on Aircraft—Russia **

A flight attendant on an East Line Aviation flight found an anonymous note demanding 651,000 rubles (approximately $100,000 U.S.) and fuel to fly the plane to another country. The note also explained that the airplane would be blown up if the demands were not met. The Tupolev TU–154 aircraft with 97 passengers was on a domestic flight from Irkutsk to Moscow. The plane landed at Moscow's Domodedovo Airport and was taken to a remote location where security forces had been positioned. No one on the plane came forward to claim the note or negotiate with authorities. Women and children were allowed to deplane; luggage and the 70 male passengers were checked for weapons and explosives but nothing was found. The men were taken to a terminal where handwriting samples were unsuccessfully compared to the note. Passengers later said that they were not told of the note but were advised that the plane was being held by health officials because someone with cholera was suspected of being aboard.

October 29	Hijacking—Turkish Airlines	Turkey

*Incident Not Counted in Statistics

February 24, 1998—Hijacking—Turkish Airlines—Turkey

A lone hijacker seized control of a Turkish Airlines (THY) Avro RJ100 aircraft with 63 passengers and five crew members shortly after takeoff from Adana. The plane was on a domestic flight en route to Ankara. The hijacker, a Turkish male, claimed to have an explosive device hidden in a toy panda bear and demanded to be taken to Tehran, Iran. The pilot told the hijacker that Tehran's airport was closed and persuaded him to allow the plane to land at Diyarbakir Airport in Turkey for refueling. Shortly after the plane landed, 20 passengers were released by the hijacker, but Turkish officials refused to refuel the plane. The hijacker then demanded a separate plane to fly him and seven hostages—the pilot, copilot, and five passengers—to Tehran. As Turkish security forces were preparing to assault the plane, several passengers overpowered the hijacker and he was taken into custody. No explosives or weapons were found on the plane, and no one was injured. The hijacker's motive is unknown, but he reportedly said that he was protesting the oppression of Muslims in Algeria. On December 15 the hijacker was sentenced to a prison term of eight years and four months.

This hijacking is considered a politically motivated incident.

March 30, 1998—Hijacking—Cyprus Turkish Airlines—Cyprus to Turkey

A Turkish male passenger hijacked a Cyprus Turkish Airlines Boeing 727 aircraft, carrying 97 passengers and eight crew members, shortly after takeoff from the Turkish-controlled part of Cyprus. The plane was en route to Ankara, Turkey. The hijacker, who acted alone and claimed to have a bomb, demanded to be flown to Bonn, Germany. The pilot told the hijacker that the aircraft did not have enough fuel and persuaded him to allow the plane to land at Esenboga Airport in Ankara. Turkish security forces surrounded the plane when it landed and, after a brief period of negotiations, stormed the plane and overpowered the hijacker. No weapons or explosives were found on the plane. There were no injuries to passengers or crew members.

May 17, 1998—Bombing—Olympic Airways Office—Greece

An improvised explosive device detonated in front of the Olympic Airways ticket office in central Athens. The blast caused consider-

able damage to the facility, but no injuries were reported. At approximately 7:30 p.m. local time, an unidentified caller notified an Athens television station that bombs would explode at an Olympic Airways ticket office and an Ionian Bank branch at 8:00 p.m. The caller claimed solidarity with the employees of both targets. The devices detonated at approximately 8:20 p.m. at the ticket office and several minutes later at the bank. A short time after the bombings two phone calls to different privately-owned television stations claimed credit for both attacks. The first call claimed the bombings on behalf of "May 98," and the second caller claimed them for the "Fighting Guerrillas of May." Neither group was previously known. Although the motive for the ticket office attack is unknown, it may be linked to an announcement earlier in the day by the Greek Economic Minister calling for the partial privatization of Olympic Airways, the national air carrier of Greece.

This bombing is considered a politically motivated incident.

June 23, 1998—Hijacking—Iberia—Spain

Approximately one hour after departing Seville, Iberia flight 1121 was hijacked and diverted to Valencia Airport. The hijacking occurred while the B–727 aircraft was flying from Seville to Barcelona, Spain, en route to Amsterdam, the Netherlands. It was initially thought that there were three hijackers, but there was only one. The hijacker told the pilot that he had a remote control device and could detonate a bomb in a suitcase in the plane's cargo hold. He initially demanded to be flown to Athens, Greece, but then requested to be taken to Tel Aviv, Israel. The aircraft landed in Valencia for fuel, and the hijacker began demanding food and drink and fuel for the flight to Israel. Approximately an hour later the hijacker agreed to release 18 people, mostly children. After several more hours, the Spanish National Police determined that only one hijacker was involved and they identified him as a psychiatric patient. The hijacker, after speaking to his psychiatrist, surrendered approximately four hours after seizing the plane. None of the 124 passengers and seven crew members were injured during the incident. A search of the plane found no bomb on board; the device held by the hijacker was a television remote control.

September 14, 1998—Hijacking—Turkish Airlines—Turkey

THY flight 145 was hijacked during a domestic flight from Ankara to Istanbul and diverted to the Black Sea coastal city of Trabzon. The Airbus A–310 aircraft carried 76 passengers and eight crew members. The plane landed safely, the passengers were released, and the hijacker surrendered to airport authorities. There were no injuries. According to a THY spokesman the hijacker claimed to have a package bomb; however, the Turkish Minister of Transportation stated that he had a plastic toy gun. Press reports indicate that the hijacker's motive was to protest the Turkish government's ban on women wearing the traditional Islamic head covering, the chador, at Turkish universities.

This hijacking is considered a politically motivated incident.

*October 2, 1998—Corporate Aircraft Hijacking—France **

A corporate jet belonging to the French aircraft manufacturer Dassault Aviation was hijacked during a routine flight shuttling employees between Marseille and Paris. The hijacker reportedly was a disgruntled former employee armed with a pump-action shotgun and a hand grenade. The plane left the Istres military base in the morning and landed at the Marseille Airport at 12:30 p.m. local time. After demanding to speak to a lawyer, the hijacker began to negotiate. He eventually released all 15 passengers and three crew members unharmed and surrendered.

October 29, 1998—Hijacking—Turkish Airlines—Turkey

A man with a handgun and a grenade hijacked THY flight 487, which had departed Adana at approximately 7:45 p.m. en route to Ankara. The B–737 aircraft carried approximately 40 passengers and crew. The hijacker demanded to be taken to Lausanne, Switzerland, but agreed to the pilot's request to land at Sofia, Bulgaria, for refueling. The pilot, however, landed at Ankara's Esenboga Airport at approximately 9:00 p.m., while the hijacker believed they were in Sofia. The hijacker told the passengers that he was protesting the Turkish government's "dirty war" against ethnic Kurds in Turkey. The pilot also read a statement from the hijacker demanding to be taken to Lausanne because it was there that the modern Turkish state was created in a treaty signed 75 years earlier. (The hijacking occurred during the 75th anniversary celebration of the Turkish Republic.) The hijacker's statement also praised "Chairman Apo," Abdullah Ocalan, the leader of the Kurdistan Worker's Party (PKK). Although negotiations were conducted, the hijacker did not release any passengers. Approximately seven hours after the plane landed (4:00 a.m.) Turkish National Police special action teams stormed the plane through the rear door, evacuated some passengers, and killed the hijacker in the cockpit. There were no other injuries. It is not known whether the hijacker acted on his own or on behalf of the PKK. Coincidentally, one week earlier this same plane was prevented from taking off in Strasbourg, France, by protesters trying to prevent the deportation of a Kurd to Turkey.

This hijacking is considered a politically motivated incident.

Chronology—Continued

July 25	Hijacking—Aviones de Oriente	Venezuela
October 27	Shooting at Helicopter	Colombia
November 25	Bombing—Medellin Airport	Colombia

January 31, 1998—Hijacking—Atlantic Airlines—Nicaragua to Costa Rica

A Nicaraguan hijacked an Atlantic Airlines twin-engine aircraft with 21 persons on board shortly after takeoff from Bluefields, Nicaragua. The aircraft was on a scheduled domestic flight to Little Corn Island. Shortly after takeoff, the hijacker doused a passenger and a portion of the aircraft's interior with gasoline and threatened to ignite it if the plane did not divert to San Andres Island, Colombia. The pilots told the hijacker they did not have sufficient fuel to reach San Andres and convinced him to go to Puerto Limon, Costa Rica. According to local press reports, the hijacker was arrested without incident by Costa Rican authorities upon his arrival. There were no injuries to passengers or crew members during this incident. The hijacker reportedly is mentally unstable and is an unemployed drug addict.

March 12, 1998—Charter Aviation Commandeering—Colombia

Twenty Revolutionary Armed Forces of Colombia (FARC) guerrillas reportedly stormed the airstrip at Palmerito, Cumbaribo Municipality, and seized control of a Cessna 182 aircraft that had just landed. The plane was to pick up officials from the Office of the National Registrar. The pilot and copilot were forced from the plane, and it was taken over by the guerrillas. The plane reportedly was flown to Llanos del Yari to pick up a wounded FARC leader and then used to take him to an unidentified country for medical treatment. The plane is owned by the Llanera de Aviacion air company and had been leased to mobilize electoral delegates throughout several municipalities. There is no additional information.

July 25, 1998—Hijacking—Aviones de Oriente—Venezuela

Four armed, masked hijackers seized control of an Aviones de Oriente plane during a domestic flight. The hijackers were among 22 people on board the Beechcraft 1900 aircraft, which was en route from Caracas to Barinas State. The hijackers forced the plane to divert to a remote airstrip at a cattle ranch. They released the passengers and crew and took the plane to Colombia, where it was recovered in early August. It is believed that drug traffickers were responsible for this hijacking as they have a history of stealing small and medium-sized aircraft for use in smuggling operations. Two people were arrested in Arauca Department, Colombia, in connection with this hijacking.

October 27, 1998—Shooting at Helicopter—Colombia

According to press reports, a helicopter was shot down during heavy fighting between FARC guerrillas and the Colombian mili-

tary in southern Putumayo Department. The helicopter, owned by the private company Helicol, was flying near the town of Orito when it reportedly was shot down with a rocket (not further identified). The helicopter crashed, and an unknown number of people were killed.

November 25, 1998—Bombing—Medellin Airport—Colombia

A stolen car packed with approximately 130 pounds of dynamite exploded outside a cargo warehouse at Medellin's Enrique Olaya Herrerra Airport. The explosion caused nearly $250,000 damage to air courier offices, a fire station, and six parked cars. The blast also injured nine people. It is believed that the attack was directed against offices of a local air courier service.

*February 6, 1998—Possible Prevented Hijacking—United States **

A plan to hijack an airplane may have been thwarted at a security checkpoint at the Fort Lauderdale-Hollywood International Airport in Florida. A handgun was discovered in a carry-on bag when the bag went through X-ray screening. No one claimed the bag, and when it was opened an unloaded .38 caliber revolver was found in addition to several notes. One note read: "Warning . . . I am a revolutionary and willful martyr . . . this is a hijacking to Cuba! I'm willing to die, are you?" The person who had placed the bag on the security conveyor belt could not be identified at the time of the incident. Several hours later, however, an individual came to claim the bag. Although initially refusing to identify himself, the individual said that he was a member of a "Muslim faction" and had been sent by the elders of his organization to pick up the bag which contained church documents. He also said he did not know that a gun was in the bag.

Police determined the man's identity and found that he had a series of prior arrests, was a convicted felon, and had been charged with first degree murder in New Mexico but fled while on bail. He was detained as a material witness for a federal grand jury investigation of the handgun episode at the airport and was subsequently indicted as a felon in possession of a firearm.

May 10, 1998—Commandeering—Air Luxor—Canada

A lone individual commandeered a Portuguese Air Luxor aircraft as passengers were being enplaned at Toronto's Pearson International Airport. The Lockheed L–1011 aircraft was being prepared for a flight to Lisbon, Portugal. The individual, a Toronto resident, forced his way past a security check point and onto the plane. He claimed to have a bomb, locked himself in the cockpit, and ordered the crew to fly him to Chicago, Illinois. The man became distracted enough to allow a crew member to unlock the door permitting police officers to subdue him. There were no injuries. The plane was searched for weapons or explosives, but none were found. A gym bag carried by the suspect contained only clothes and other innocuous items. The man was charged with assault, attempted hijacking, and endangering the safety of an aircraft.

On August 7, 1998, the suspect appeared in court to answer the charges. His psychiatric record was reviewed and he was found to be not criminally responsible. Charges against him were subsequently dropped.

*November 13, 1998—Incident at Atlanta Airport—United States **

An individual approached the main domestic checkpoint at Atlanta's Hartsfield International Airport and placed a loaded .45 caliber handgun at the back of a ticketed passenger. He told the passenger to keep walking and not turn around. When a checkpoint screener challenged the man holding the gun, he doused the back of his hostage with lighter fluid and tried to force his way through. He was immediately apprehended and arrested by police. The handgun was loaded with eight bullets, and the individual had matches and a knife in his pocket. The individual was charged with several offenses, including aggravated assault, terroristic threats, and carrying an incendiary device, and was incarcerated at the

Clayton County Jail in Jonesboro, Georgia. There is no information on the motive for his action.

SUB-SAHARAN AFRICA

[Image] [10]

Chronology

August 2 and 4	Aircraft Commandeerings	Democratic Republic of Congo (Three Incidents)
October 10	Shooting at Aircraft	Democratic Republic of Congo
October 22	Bombing—Cabinda Airport	Angola
December 14	Shooting at Aircraft	Angola
December 26	Shooting at Aircraft	Angola

August 2 and 4, 1998—Aircraft Commandeerings—Democratic Republic of Congo (Three Incidents)

During fighting between rebel forces and government troops, civilian aircraft were commandeered and the pilots forced to ferry troops and supplies in the planes. In each incident the plane was seized in Goma. In the August 2 incident Congolese rebels seized a Boeing 727 aircraft owned by Kinshasha-based Blue Airlines. Two days later, rebels commandeered a Congo Air Cargo B–707 aircraft and forced the pilot to fly soldiers to the Kitona military air base in the western part of the country. A third plane, belonging to Air Atlantic Cargo and chartered to Lina Congo (LAC), was also seized and forced to fly to Kitona after stopping to refuel and pick up ammunition in Kinshasha. There were also reports of private planes and transport aircraft being seized.

October 10, 1998—Shooting at Aircraft—Democratic Republic of Congo

An LAC B–727 aircraft crashed in the jungle near the town of Kindu after a missile, possibly a SA–7, struck a rear engine. There were no survivors among the reported 40 persons on board. A spokesman for LAC reported that the plane was evacuating civilians to Kinshasha from Kindu. Tutsi-led rebels admitted to shooting down the plane but claimed that it was landing and carrying government reinforcements and supplies. The rebels also stated that they had prior knowledge that the plane would be arriving with soldiers, but no civilians, on board.

This attack is not considered politically motivated because it occurred in a conflict zone and the plane may have been perceived as being used for military purposes.

[10] The map graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/9.html.

October 22, 1998—Bombing—Cabinda Airport—Angola

An improvised explosive device detonated in an airline passenger guest house at Cabinda Airport, killing two people and injuring three others. There were no claims of responsibility, although local officials believe that the explosives may have belonged to local smugglers. A second theory is that the device was placed by a faction of the Front for the Liberation of the Enclave of Cabinda.

December 14, 1998—Shooting at Aircraft—Angola

During fighting between Angolan government forces and National Union for the Total Independence of Angola (UNITA) rebels near the town of Kuito, an Antonov–12 cargo/passenger aircraft was shot down by rebel forces. The plane, apparently privately-owned and under contract to the provincial government, was carrying an unknown number of women, children, and wounded government troops. It had taken off from Kuito en route to Luanda and was flying at a low altitude when it was struck. Reports differ as to whether the plane was hit by antiaircraft fire or an "unspecified" surface-to-air missile. The exact number of casualties is unclear but, according to one report, five crew members and five passengers were killed.

This attack is not considered politically motivated because it occurred in a conflict zone and the plane may have been perceived as being used for military purposes.

December 26, 1998—Shooting at Aircraft—Angola

A C–130 aircraft was shot down near the village of Vila Nova during a flight between Huambo and Suriname. The plane was owned by TransAfric and chartered by the United Nations. Fourteen people—ten of whom were U.N. Observer Mission in Angola personnel—were reportedly on the plane. Despite reports of possible survivors there were none; a U.N. search team concluded that the plane had apparently disintegrated as it hit the ground and burst into flames. The area where the crash occurred had been the scene of heavy fighting between government troops and UNITA rebels for nearly a month. Each side blamed the other for shooting down the plane. There is no information regarding the type of weapon used to bring the plane down.

This attack is not considered politically motivated because it occurred in a conflict zone and the plane may have been perceived as being used for military purposes.

FEATURE ARTICLES

SHOOTING AT IN-FLIGHT AIRCRAFT INCIDENTS IN ANGOLA

Two planes were shot down in the central highlands of Angola during the last two weeks of December 1998. Both planes went down in an area between the cities of Kuito and Huambo. At the time of the crashes, this area was the site of heavy fighting between National Union for the Liberation of Angola (UNITA) rebels and the Angolan government.

On December 14, an Antonov 12 turbo-prop aircraft was shot down by UNITA rebels shortly after it took off from the airport in Kuito. The privately-owned plane had been contracted out to the

provincial government and was being used to deliver relief aid to Kuito. The plane was approximately 18 miles north of Kuito en route to Luanda when it was shot down. Reports differ as to whether antiaircraft fire or an "unspecified" surface-to-air missile was used in the attack. The plane went down in UNITA-controlled territory. Because the area was the site of heavy fighting it was difficult to reach the aircraft. However, it is believed that there were no survivors among the unknown number (but possibly ten) of women, children, and wounded government troops aboard the plane.

On December 26, a C–130 aircraft owned by TransAfric and chartered by the United Nations was struck by antiaircraft fire as it left Huambo en route to Saurime. The plane crashed near the village of Vila Nova, less than five miles from Huambo. There were 14 people reportedly on board: ten members of the U.N. Observer Mission in Angola and four crew members. The government and UNITA rebels accused the other of shooting down the plane. The government also accused UNITA of holding the survivors hostage, but UNITA, which controlled the area, contended that there were no survivors. A U.N. search team which briefly inspected the crash site concluded that the plane disintegrated as it hit the ground and burst into flames. The search team found charred bodies with the plane and further concluded that there had been no survivors. Further investigation could not be carried out because of heavy fighting in the area.

Because of the shoot-downs, the U.N. mission in Angola temporarily suspended all flights to and from Huambo. The U.N. also threatened to pull out some 1,000 observers deployed throughout Angola to oversee the implementation of peace accords. These incidents also illustrate the dangers posed to aircraft flying in areas where significant fighting or civil unrest is occurring.

THE HIJACKING OF TURKISH AIRLINES FLIGHT 487

On October 29, 1998, a Kurdish male armed with a pistol and a hand grenade hijacked Turkish Airlines flight 487 shortly after takeoff and demanded that the plane be diverted to Lausanne, Switzerland. Carrying 34 passengers and six crew, the Boeing 737 aircraft departed at approximately 7:45 p.m. from Adana International Airport in southern Turkey en route to Esenboga Airport in the capital of Ankara.

The hijacker forced the pilot-in-command to read a statement that made his motive clear. The Kurdish hijacker chose October 29 to coincide with Turkey's nationwide 75th anniversary celebrations, which included visits by 13 foreign leaders. He tried to divert the aircraft to Lausanne as an act of protest against a treaty signed there 75 years earlier that created the Turkish nation. The treaty has symbolic importance to Kurdish activists and insurgents because it denied Kurdish independence promised in an earlier treaty and gave territorial control to the Turkish government. The statement concluded by praising Abdullah Ocalan, the leader of the Kurdistan Workers' Party (PKK), an insurgent group and international terrorist organization.

The pilot convinced the hijacker to allow the plane to land in Sofia, Bulgaria, for refueling. However, the pilot circled over An-

kara to add air time in an effort to convince the hijacker that the flight was still en route to Sofia. The aircraft landed at Esenboga Airport at approximately 10:00 p.m. local time and stopped on the tarmac in front of Terminal C. Turkish National Police set up a crisis post in the control tower and began negotiations. As an additional security measure, Turkish security officials instructed local mosques to postpone their calls to prayer so that the hijacker would not suspect he was in Turkey. The hijacker reportedly warned the flight crew that he would detonate the hand grenade if any type of operation or rescue attempt were launched on the plane. He apparently did not threaten any of the passengers and spent most of the time in the cockpit. Negotiators pretended to be Bulgarian officials and spoke only English.

As negotiations through the night proved unsuccessful, a Turkish National Police Special Actions Team, comprised of officers specially trained to respond to aviation incidents, prepared to storm the aircraft. At approximately 4:35 a.m. on October 30, the team boarded the aircraft through the rear door, evacuated some of the passengers, and then fatally shot the hijacker, who was in the cockpit. None of the passengers or crew were injured in the incident.

The Special Actions Team found forged Turkish identification, a 7.65 mm pistol with five rounds, and a Russian T1 hand grenade with the pin still in place on the hijacker's body. Although the 33-year-old hijacker's statement praised the PKK, he most likely was a lone sympathizer acting in support of the Kurdish cause and not a trained PKK member.

Following this fourth hijacking in Turkish airspace in 1998, Turkey's Transport Minister Arif Ahmet Denizolgun announced a review of security measures at all Turkish airports. Turkish authorities also launched an investigation into how the hijacker was able to smuggle his weapons through screening at Adana and onto the aircraft.

TRENDS

1994–1998

INTRODUCTION

[Image] [11]

This section contains an examination of trends for the five-year period 1994–1998. Significant incidents involving civil aviation are separated into one of the following categories:

- "Hijackings of Civil Aviation Aircraft,"
- "Commandeerings of Civil Aviation Aircraft,"
- "Bombings/Attempted Bombings/ Shootings on Civil Aviation Aircraft,"
- "Shootings at In-Flight Aircraft,"
- "Attacks at Airports,"
- "Off-Airport Facility Attacks," and
- "Incidents Involving Charter and General Aviation Aircraft."

[11] The graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/12.html.

Charts are included to present a visual perspective of incidents in these categories. One fewer incident was recorded in 1998 than in 1997 (22 vice 23), which continues the trend of four out of the past five years. The only exception was in 1996, when more incidents were recorded than in the previous year. The 22 incidents in 1998 were also the fewest in the five-year period; the most were in 1994 (50 incidents). The total number of incidents for the five-year period is 154.

In comparing 1998 statistics with those of the previous year, increases occurred in two categories—"Commandeerings of Civil Aviation Aircraft" and "Shootings at In-Flight Aircraft." Two commandeering incidents were recorded in 1997, but four were recorded for 1998. Four shooting at aircraft incidents occurred in 1998 compared to none the previous year. Decreases were noted in four of the seven incident categories. There were three fewer "Attacks at Airports" incidents (3), two fewer "Off-Airport Facility Attacks" (1), one less "Hijacking of Civil Aviation Aircraft" incident (9), and one less "Bombings/Attempted Bombings/Shootings on Aircraft" incident (0). One "Charter/General Aviation Aircraft" incident was also recorded, the same as in 1997.

The 22 incidents in 1998 were slightly less than one-half of the 50 incidents recorded in 1994. The overall decline for the five-year period is shown quite distinctly on the chart on the previous page. Interpretation of the data is necessary, however, to avoid reaching incorrect conclusions.

The fact that the number of incidents against civil aviation has declined over the past five years, and longer, may be interpreted as an indication that the threat is decreasing. This, however, is not true, as several events in the past few years attest. The September 1996 conviction of Ramzi Yousef for his plan to place explosive devices on as many as 12 U.S. airliners flying out of the Far East in 1995 is proof that a threat to aviation exists. Yousef was also convicted of placing a device on a Philippine Airlines plane in December 1994 as a test for his more elaborate plan. One person was killed in this incident. Other examples of the continuing threat include the bombing of the Alas Chiricanas Airline plane in Panama in July 1994, in which 21 people died; the commandeering of the Air France flight in Algeria in December 1994 by members of the Armed Islamic Group; and the hijacking of the Ethiopian Airlines plane which crashed into the Indian Ocean in November 1996.

There is every reason to believe that civil aviation will continue to be an attractive target to terrorist groups. The publicity and fear generated by a terrorist hijacking or bombing of an airplane can be a powerful attraction to a group seeking to make a statement or promote a particular cause. Civil aviation will also continue to be used by individuals who are acting to further personal goals, such as asylum seekers. It matters not to them that most individuals who hijack an airplane for personal goals are prosecuted for their actions. So long as factors such as these exist, the threat to civil aviation will remain significant; that some years pass with fewer incidents does not necessarily indicate that the threat has diminished. Increased awareness and vigilance are necessary to deter future incidents—be they from terrorists like Ramzi Yousef or nonterrorists bent on suicide, as occurred in Brazil in 1997. It is impor-

tant to do the utmost to prevent such acts rather than to lower security measures by interpreting the statistics as an indication of a decreasing threat.

HIJACKINGS OF CIVIL AVIATION AIRCRAFT

An incident is defined as a hijacking rather than a commandeering when the aircraft is in an in-flight status, that is, once the doors are closed. By this definition, a hijacking can occur on the ground. Hijackings are distinguished from other in-flight situations (such as those involving unruly passengers) by one or more of the following criteria: the act involves the claim or use of a weapon; it is committed by a terrorist group or someone acting on behalf of a terrorist group; there are deaths or injuries to passengers or crew; or there is premeditation (hoax device, fake weapon, previously prepared note, more than one hijacker, etc.). There is no distinction made between incidents in which a plane does not divert from its flight plan and those which do. Hijacking incidents involving general aviation or charter aircraft are recorded separately and are not included in this category.

Between 1994 and 1998, sixty-five hijackings of civil aviation aircraft were recorded worldwide. Nine hijackings occurred in 1998, one fewer than in the previous year and the lowest total (by one incident) in the five-year period. Twenty-three incidents in 1994 were the highest for the period. Hijackings accounted for the majority of incidents for each year in the five-year period.

Five of the nine hijackings in 1998 were recorded in Europe; two were recorded in Asia and two in Latin America and the Caribbean. No hijackings occurred in North America (the last was in the United States in 1991). The number of hijackings in Europe and in Latin America and the Caribbean were more than occurred in these regions in 1997. Fewer hijackings were recorded in all other geographic regions except sub-Saharan Africa, where no incidents were recorded—the same as in 1997.

Seven of the nine hijacking incidents in 1998 took place on planes flying domestic routes, and 45 of the 65 hijackings between 1994 and 1998 occurred during domestic flights. In 1998, seven of the nine hijacked planes diverted from their original flight plan and landed in a location different from its intended destination. Three of the hijackings took place in Turkey—the most for any country in 1998—and involved Turkish Airlines aircraft—the most for any single carrier.

Of all geographic regions in the 1994–1998 period, Asia recorded the highest number of hijackings (18 incidents or 27.6%), with China having the most incidents (11). Europe had the second highest number of hijackings (14 incidents or 21.5%) with Spain and Turkey each recording three. The Middle East/North Africa region ranks third with 12 hijackings (18.4%), of which Saudi Arabia and Sudan each recorded four. The sub-Saharan Africa region and the Latin America and Caribbean region each recorded eight hijackings (12.3%); the four incidents in Ethiopia and three in Brazil were the most in these regions. Five incidents (7.6%) were recorded in Central Eurasia, of which four occurred in Russia. North America had the fewest number of incidents (0) in the five-year period. China had the highest number of incidents (11) of any country in the five-

year period; Ethiopia, Russia, Saudi Arabia, and Sudan each recorded four hijackings.

[Image] [12]

Personal factors, such as seeking to escape social, political or economic conditions in one's homeland, are often motives for hijacking aircraft. Forty-three of the 65 hijackings between 1994 and 1998 were committed for personal reasons. Eight incidents were criminally motivated, seven were politically motivated, and seven were committed for reasons that are unknown. Four politically-motivated incidents occurred in 1998. In each incident a lone hijacker was either protesting or bringing publicity to some issue. Among other incidents in 1998, only one was committed for personal reasons. In this incident the pilot of an Air China flight diverted the plane to Taiwan by himself. One of the 1998 incidents was criminally oriented (narcotics), and the motives behind three are unknown.

The most noteworthy hijacking of the five-year period was the incident involving an Ethiopian Airlines plane in November 1996. Three Ethiopians seeking to escape conditions of poverty demanded to be taken to Australia. The hijackers did not believe the pilot when told that the plane needed to be refueled. The plane ran out of fuel and crashed into the Indian Ocean killing 123 people, including the hijackers. Approximately 130 people (hostages, crew, hijackers) were killed in hijacking incidents between 1994 and 1998.

BOMBINGS/ATTEMPTED BOMBINGS/SHOOTINGS ON CIVIL AVIATION AIRCRAFT

Between 1994 and 1998, three bombings and two attempted bombings occurred on civil aviation aircraft. Three incidents were recorded in 1994 and one each in 1996 and 1997.

[Image] [13]

The three incidents in which explosive devices detonated on in-flight aircraft involved an Alas Chiricanas Airlines plane (Panama, July 1994), a Philippine Airlines plane (Philippines, December 1994), and a Transporte Aereo Mercosur (TAM) plane (Brazil, July 1997). In the Alas Chiricanas incident, the plane crashed and all 21 people on board were killed. The Philippine Airlines explosion killed one passenger, but the plane landed safely. The TAM plane also landed safely, but a passenger was killed from the explosion. In this incident, a passenger had placed the device for an apparent suicide attempt; however, he was not the individual killed in the blast, which tore a hole in the plane's fuselage.

The two attempted bombing incidents involved an Orbi Georgian Airways plane in the Republic of Georgia in September 1994 and an All Nippon Airways (ANA) flight in Japan in November 1996. In the first incident, the device was in luggage which the bomber had asked another passenger to take on-board. The ANA device was in checked luggage and was found when the bag could not be matched with a passenger on the flight.

[13] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/14.html.

The Philippine Airlines bombing was a test for a more elaborate plan, which involved placing explosive devices on as many as 12 U.S.-registered aircraft flying routes out of the Far East. Fortunately, the plot was uncovered before it could be implemented. Ramzi Yousef, convicted in the 1993 World Trade Center bombing in New York City, was behind the plot. He was apprehended in Pakistan, extradited to the United States, and convicted in both the Far East plot and the Philippine Airlines bombing. Had Yousef's plan succeeded, even partially, the results would have been catastrophic. The Philippine Airlines bombing and the Alas Chiricanas bombing are considered politically motivated incidents, and they are the only incidents of this type in this category.

SHOOTINGS AT IN-FLIGHT AIRCRAFT

These incidents include acts in which in-flight aircraft (commercial and general/charter aviation) are fired upon either from the ground (surface-to-air missiles, antiaircraft artillery, small arms fire, etc.) or the air. This category does not include all incidents of this type but only those judged to be of significance. This is determined by the target, the type of attack, or any resulting casualties. Attacks against law enforcement aircraft, such as drug eradication planes, are not counted. Similarly, attacks against military aircraft, even if carrying civilian passenger loads, or non-military aircraft serving a military function over an area where there is significant fighting, are not counted.

Eleven incidents have been recorded during the past five years in which civil and general aviation aircraft have been fired upon. Eight of these aircraft crashed, killing more than 80 people. Two people were killed in the three incidents in which the plane did not crash. The highest number of fatalities occurred in 1998 when four crashes killed at least 65 people, although exact figures are unknown. Four incidents were recorded in 1994 and 1998; two incidents occurred in 1996 and one in 1995. No incidents were recorded in 1997. Four incidents have been determined to be politically motivated.

More than half of the attacks (six of 11) between 1994 and 1998 occurred in sub-Saharan Africa. Antigovernment rebels are either credited with or believed responsible for the majority of these incidents. The planes crashed in five of the six incidents accounting for nearly all the known fatalities in the five-year period.

1998 was by far the deadliest year of the five-year period. Four aircraft were shot down claiming at least 64 of the 80+ fatalities recorded between 1994 and 1998. Three of the four incidents took place in sub-Saharan Africa. The most fatalities occurred in the Democratic Republic of Congo in October 1998 when at least 40 people were reported killed after antigovernment rebels shot down a plane with a missile. The rebels claimed the plane was bringing government troops and supplies into a war zone, but there were other claims that the plane was evacuating civilians. Two planes were also shot down during fighting in Angola in December 1998, in which at least 24 people died. An unknown number of people were also killed when a helicopter was shot down by rebels in Colombia in October 1998. In one other multi-fatality incident, the

presidents of Rwanda and Burundi and eight others were killed when their plane was shot down in Rwanda in April 1994.

[Image] [14]

OFF-AIRPORT FACILITY ATTACKS

Incidents in this category include attacks against civil aviation assets that are not located within the perimeter of an airport, such as air navigational aid equipment and airline ticket offices. These targets are attractive because they are usually unguarded and/or easily accessible. Thirteen such attacks have been recorded in the past five years. The greatest number of incidents in one year (5) occurred in 1995; the fewest (1) in 1994 and 1998. Three incidents were recorded in both 1996 and 1997.

All but two of the 13 off-airport facility attacks have been against ticket offices. These attacks include bombings (explosives or incendiary devices), attempted bombings, arsons, and various assaults. Aeroflot, Alitalia, and Turkish Airlines interests were each attacked twice in the past five years. Other targets included interests of Air France, Air India, Olympic Airlines, Singapore Airlines, and Swissair. The two non-ticket office attacks included a cut airport transmission line in Pakistan and a bombing of a navigation aid in the United States, both in 1995. Eight of the 13 incidents between 1994 and 1998 took place in Europe; four were recorded in Asia and one in North America.

[Image] [15]

Seven of the 13 incidents are considered politically motivated incidents. Seven of the eight incidents occurred in Europe; the other was in Asia. Three incidents were recorded in Greece, the most for any one country. No group claimed or is believed responsible for more than one attack. Three incidents were recorded in both 1995 and 1997; one incident was recorded in both 1996 and 1998.

ATTACKS AT AIRPORTS

Thirty-six attacks have been recorded at airports throughout the world during the past five years. These attacks include 17 bombings; 10 attempted bombings; and 9 other incidents such as shootings, shellings (artillery or mortar attacks), arsons, and similar incidents. Three incidents were recorded in 1998, one-half of the number recorded the previous year. These three incidents include two bombings (Angola and Colombia) and an attack in which explosive projectiles were fired (Japan). Two people were killed and three injured in the Angola incident, and nine were injured in the Colombia bombing; there were no injuries in the attack in Japan. The most incidents in one year (14) were recorded in 1994; the fewest (3) in 1998. Twenty-one people have been reported killed and more than 120 injured in attacks at airports during the five-year period.

[Image] [16]

[14] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/15.html.

[15] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/16.html.

[16] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/17.html.

The majority of the attacks in the past five years occurred in Europe (10 incidents). Eight incidents were recorded in Asia, seven in the Latin America and Caribbean region, seven in sub-Saharan Africa, three in Central Eurasia, and one in the Middle East/North Africa region. Worldwide, Colombia recorded the most incidents (5) for any one country in the five-year period. Three incidents were also recorded in both England and Spain during this time.

Twenty of the 36 airport attacks in the five-year period are considered politically motivated incidents. Eight of the 20 incidents were claimed. Among the groups claiming incidents were the Provisional Irish Republican Army, the Basque Fatherland and Liberty, the Revolutionary Worker's Association, the Alex Boncayao Brigade, and the Corsican National Liberation Front. Thirteen of the politically motivated incidents occurred in 1994; three were in 1996, two in 1995, and one each in 1997 and 1998. Colombia was the site of four of the politically motivated incidents; three incidents occurred in England and three in Spain.

The deadliest airport attack occurred in Pakistan in November 1994. Rebels had attacked and seized Saidu Sherif Airport, and at least 15 people died and 17 others were wounded when Pakistani forces counterattacked and regained control of the facility.

COMMANDEERINGS OF CIVIL AVIATION AIRCRAFT

[Image] [17]

Commandeerings occur when the aircraft is on the ground and the doors are open. There is no distinction made between commandeered aircraft that remain on the ground and those which become airborne. The criteria for determining a commandeering as opposed to other on-board situations are the same as those concerning a hijacking. Incidents of commandeered general aviation or charter aircraft are not included in this category.

Nine civil aviation aircraft were commandeered between 1994 and 1998. Four incidents were recorded in 1998, two incidents each were recorded in 1994 and 1997, and one incident was recorded in 1996. There were no commandeering incidents recorded in 1995. Of these nine incidents, the plane remained on the ground in four. The most noteworthy commandeering of the five-year period occurred on December 24, 1994, when four armed terrorists seized an Air France plane in Algiers, Algeria, and took it to Marseilles, France. The incident ended when French commandos stormed the plane and killed the gunmen. Other incidents of note included those in 1998 in the Democratic Republic of Congo (DROC). Three aircraft flying in a war zone were commandeered during fighting between government soldiers and rebels. The planes and their crews were then used to ferry troops and supplies into the war zone.

The Air France incident was the only politically motivated commandeering in the five-year period. One commandeering was committed for personal reasons, one was criminally motivated, and the motives for three others are unknown. The three incidents in the DROC were for military purposes.

[17] The pie chart graphic which appeared at this point can be seen at: http://cas.faa.gov/crimacts/crim98/18.html.

INCIDENTS INVOLVING GENERAL AVIATION/CHARTER AVIATION

[Image] [18]

During the past five years, 15 incidents involving general or charter aviation aircraft have been recorded. The majority of the incidents (11) were hijackings, and two were commandeerings. In addition, one instance of an aircraft being deliberately damaged and one robbery were recorded. Six incidents were recorded in 1996, four in 1995, three in 1994, and one in both 1997 and 1998.

The Latin America and Caribbean region recorded the most incidents (5) of any geographic area in the five-year period; Nicaragua and Papua New Guinea both recorded the most incidents (2 each) of any country. The single incident in 1998 was a commandeering in Colombia in which the plane was used to take a rebel guerrilla leader for medical treatment.

APPENDIX E

Chronology of Significant Acts Against Civil Aviation In 1998 By Category

	HIJACKINGS	
January 31	Atlantic Airlines	Nicaragua to Costa Rica
February 24	Turkish Airlines	Turkey
March 30	Cyprus Turkish Airlines	Cyprus to Turkey
May 24	Pakistan International Airlines	Pakistan
June 23	Iberia	Spain
July 25	Aviones de Oriente	Venezuela
September 14	Turkish Airlines	Turkey
October 28	Air China	China to Taiwan
October 29	Turkish Airlines	Turkey
	COMMANDEERINGS	
May 10	Air Luxor	Canada
August 2 and 4	Aircraft Commandeerings	Democratic Republic of Congo (Three Incidents)
	AIRPORT ATTACKS	
February 2	Attack—Narita Airport	Japan
October 22	Bombing—Cabinda Airport	Angola
November 25	Bombing—Medellin Airport	Colombia

Chronology of Significant Acts Against Civil Aviation In 1998 By Category—Continued

	GENERAL/CHARTER AVIATION	
March 12	Charter Aviation Commandeering	Colombia
	OFF-AIRPORT FACILITY ATTACKS	
May 17	Bombing—Olympic Airways Office	Greece
	SHOOTINGS AT AIRCRAFT	
October 10	Shooting at Aircraft	Democratic Republic of Congo
October 27	Shooting at Aircraft	Colombia
December 14	Shooting at Aircraft	Angola
December 26	Shooting at Aircraft	Angola
	INCIDENTS NOT COUNTED *	
January 28	Shooting at Jakarta Airport	Indonesia
February 6	Possible Prevented Hijacking	United States
March 23	Incident on Aircraft	Taiwan
July 2	Arrests of Persons with Explosives at Khartoum Airport	Sudan
August 9	Incident on Aircraft	Russia
October 2	Corporate Aircraft Hijacking	France
November 13	Incident at Atlanta Airport	United States

*These incidents are not included in the statistics for 1998. Because they are of interest, however, summaries are included in the regional areas. It is not to be inferred that these are the only incidents of this type that occurred.

APPENDIX G*

Politically-Motivated Incidents Involving Civil Aviation, 1994–1998

Date	Incident	Location	Remarks
	1994		
March 7	Attempted Bombing— Cali Airport	Colombia	No claim; possible disruption of elections
March 9	Mortar Attack— Heathrow Airport	England	Claim; Provisional Irish Republican Army (PIRA)
March 11	Mortar Attack— Heathrow Airport	England	Claim— PIRA
March 13	Mortar Attack— Heathrow Airport	England	Claim— PIRA
April 7	Shooting Down Presidential Aircraft	Rwanda	No claim; Rwandan Patriotic Front rebels suspected; assassination
April 27	Bombing— Johannesburg Airport	South Africa	No claim: right-wing extremists suspected
May 1	Arson— Frankfurt Airport	Germany	No claim; leftist extremists suspected

Politically-Motivated Incidents Involving Civil Aviation, 1994–1998—Continued

Date	Incident	Location	Remarks
May 14	Attempted Bombing— Malaga Airport	Colombia	National Liberation Army suspected; possible assassination attempt
July 17	Bombing— Puerto Asis Airport	Colombia	No claim; suspected Revolutionary Armed Forces of Colombia (FARC)
July 17	Bombing— Villa Garzon Airport	Colombia	No claim; suspected FARC
July 19	Bombing— Alas Chiricanas 901	Panama	Claim— Ansar Allah
August 16	Attempted Bombing— Alexandroupolis Airport	Greece	Claim— Turks of Western Thrace
November 3	Attack— Saidu Sharif Airport	Pakistan	Muslim militants; imposition of sharia law
November 3	Hijacking— Scandinavian Airlines System	Norway	Individual; humanitarian aid for Bosnia
November 6	Arson— Frankfurt Airport	Germany	No claim; leftist extremists suspected
November 17	Bombing— Lagos Airport	Nigeria	No claim; possibly anti-President Abacha
December 11	Bombing— Philippines Airlines 434	Philippines	Ramzi Yousef
December 24	Commandeering— Air France 8969	Algeria	Armed Islamic Group members
		1995	
February 21	Shooting at Airlink Aircraft	Papua New Guinea	Bougainville Revolutionary Army suspected
March 26	Attempted Bombing— Singapore Airlines Office	Philippines	Claim— Alex Boncayao Brigade
April 15	Firebombing— Turkish Airlines Office	Austria	Revolutionary People's Liberation Front literature found at scene
May 2	Firebombing— Turkish Airlines Office	Denmark	No claim; Kurdistan Workers' Party (PKK) suspected
May 12	Bombing— Narita Airport	Japan	Claim— Revolutionary Worker's Association
July 29	Attempted Bombing— Alicante Airport	Spain	No claim; Basque Fatherland and Liberty (ETA) suspected
September 3	Hijacking— Air Inter	Spain	Individual— protest against French nuclear tests
		1996	
February 24	Shooting at Cessna Aircraft (Two incidents)	Cuba	Cuban exile group aircraft
March 8	Hijacking— Cyprus Turkish Airlines	Cyprus	Individual— to win sympathy for Chechen separatists
April 28	Bombing— Aeroflot Russian International Airlines Office	Turkey	Claim— Organization for Solidarity with the Turkey Chechen Resistance Fighters
June 6	Bombing— Lusaka Airport	Zambia	No claim; political opposition groups suspected
July 20	Bombing— Reus Airport	Spain	Claim— ETA
October 20	Mortar Attack— Algeria Algiers Airport	No claim; Islamic militants suspected	
		1997	
January 6	Grenade Attack— Madrid Airport	Spain	Claim— ETA

Politically-Motivated Incidents Involving Civil Aviation, 1994–1998—Continued

Date	Incident	Location	Remarks
January 28	Bombing— Air France Office	France	Claim— Corsican National Liberation Front
April 4	Attempted Bombing— Alitalia Office	Greece	Claim— Fighting Guerrilla Formation
October 19	Bombing— Alitalia Office	Greece	Claim— Team of International Revolutionary Struggle
	1998		
February 2	Attack— Narita Airport	Japan	Claim— Revolutionary Worker's Association
February 24	Hijacking— Turkish Airlines	Turkey	Individual; allegedly to protest oppression of Muslims
May 17	Bombing— Olympic Airways Office	Greece	Two claims: May 98 and Fighting Guerrillas of May
May 24	Hijacking— Pakistan International Airlines	Pakistan	Three individuals; to protest nuclear testing
September 14	Hijacking— Turkish Airlines	Turkey	Individual; to protest ban on Islamic clothing
October 29	Hijacking— Turkish Airlines	Turkey	Individual; to protest treatment of ethnic Kurds

*This list includes incidents carried out by perpetrators having known or suspected political motivation. The following principles have been used to compile the list of incidents:

in cases in which the motivation has not been conclusively established, but political motivation is a possibility, the incident has been included;

acts by insurgent groups in open conflict with government forces are included only if they occur outside the theatre of conflict;

acts by individuals or groups carried out purely to improve personal circumstances (e.g., hijackers seeking political refuge in another country) are not included.

(2) Study and Report to Congress on Civil Aviation Security Responsibilities and Funding, 1998

Report of the Federal Aviation Administration to the United States Congress pursuant to section 301 of the Federal Aviation Reauthorization Act of 1996

* * * * * * *

EXECUTIVE SUMMARY

This report is provided to Congress by the Federal Aviation Administration (FAA) in response to the requirement for a study of and report regarding allocating civil aviation security responsibilities established by section 301 of the Federal Aviation Reauthorization Act of 1996 (Public Law 104–264).

The study examines the evolution of aviation security responsibilities and finds that a consensus exists to retain the current system of shared responsibilities. The report does not recommend a transfer of air carrier responsibilities to either airport operators or the Federal Government. As a result, the report does not contain methodologies for such a transfer.

The study recognizes the incremental increases in Federal Government involvement that have taken place and predicts that such increases will continue, perhaps in the field of aviation security training.

The study examines discussions of funding for aviation security and considers a number of views. The report contains options for aviation security funding and states the Administration's position that any FAA activities, including security activities, be derived from charges paid by users of the National Airspace System. The report offers no recommendations in the absence of a consensus on the source of funding. The FAA believes that there should be no change to the current system of shared responsibilities or funding at this time and therefore offers no legislative proposals.

I. BACKGROUND ON THE STUDY AND REPORT

The Federal Aviation Reauthorization Act of 1996 (Public Law 104–264) was approved by the President on October 9, 1996. Title III (AVIATION SECURITY) begins with the following provision:

> "SEC. 301. REPORT INCLUDING PROPOSED LEGISLATION ON FUNDING FOR AIRPORT SECURITY.
>
> (a) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Administrator of the Federal Aviation Administration, in cooperation with other appropriate persons, shall conduct a study and submit to Congress a report on whether, and if so how, to transfer certain responsibilities of air carriers under Federal law for security activities conducted onsite at commercial service airports to airport opera-

tors or to the Federal Government or to provide for shared responsibilities between air carriers and airport operators or the Federal Government.

(b) CONTENTS OF REPORT.—The report submitted under this section shall—

(1) examine potential sources of Federal and non-Federal revenue that may be used to fund security activities, including providing grants from funds received as fees collected under a fee system established under subtitle C of title II of this Act and the amendments made by that subtitle; and

(2) provide legislative proposals, if necessary, for accomplishing the transfer of responsibilities referred to in subsection (a).''

In January 1997, the FAA notified the House Committee on Transportation and Infrastructure and the Senate Committee on Commerce, Science, and Transportation that this report would be delayed pending receipt of final recommendations from the White House Commission on Aviation Safety and Security (White House Commission). Time would be needed to review and analyze those recommendations and to formulate implementation plans, as appropriate.

The White House Commission recommendations, as well as those of the Aviation Security Advisory Committee (ASAC) Baseline Working Group (BWG), would provide a foundation for the study of responsibilities for security required by the Act. Based on the need to consider the findings of the Commission, the BWG, and the National Civil Aviation Review Commission (NCARC) and the time anticipated to complete analytical work, the FAA notified Congress as indicated above that it would be unable to meet the reporting deadlines specified in the law. However, the FAA pledged to complete the report as expeditiously as possible.

The required elements of the study and report to Congress are as follows:

- Transfer air carrier security responsibilities to airport operators;
- Transfer air carrier security responsibilities to the Federal Government;
- Methodology for the transfer of air carrier security responsibilities to airport operators;
- Methodology for the transfer of air carrier security responsibilities to the Federal Government;
- Methodology for the provision of shared security responsibilities among air carriers and airport operators or the Federal Government;
- Potential sources of Federal and non-Federal revenue to fund security activities; and, if necessary,
- Legislative proposals for the transfer of responsibilities.

The scope of this study is the security of U.S. and foreign air carriers at airports within the United States. International aviation security will be discussed only insofar as it directly relates to the performance of domestic aviation security. A brief review of the responsibilities involved and the system in which they are performed is provided below.

II. The U.S. Aviation Transportation System

The U.S. domestic system is a highly concentrated hub and spoke system that includes 14 of the world's top 20 busiest airports. Ninety-eight percent of all U.S. passengers pass through the 50 busiest hubs. Connection times are down to 25 minutes or less.

Since 1990, annual U.S. air carrier passenger enplanements in the domestic system have increased from 424 million to 523 million in 1996, with 546 million forecast for 1997. The U.S. large commercial aircraft fleet increased from 4,007 in 1990 to 4,916 in January 1997. Including international traffic, systemwide U.S. air carrier enplanements grew from 465 million in 1990 to a forecast of 600 million in 1997. Passengers on U.S. and foreign flag carriers flying to and from the United States increased from 70 million in 1990 to over 100 million anticipated in 1997. Regional and commuter enplanements increased from 37 million in 1990 to a forecast of over 62 million for 1997, while the aircraft fleet increased from 1,819 in 1990 to 2,148 in January 1997. [1]

The basic regulations for aviation security apply to 165 U.S. air carriers, 164 foreign air carriers, and several thousand cargo forwarders at 459 U.S. airports and 244 foreign airports. For example, in fiscal year (FY) 1996, FAA aviation security special agents conducted 6,317 U.S. air carrier inspections both overseas and at home, as well as 643 foreign air carrier inspections at U.S. airports. The FAA performed 870 U.S. airport inspections, 267 facility security inspections, and 123 foreign airport assessments overseas while inspecting indirect air carriers, better known as air freight forwarders, 223 times.

As part of overall civil aviation system security, the FAA is also responsible for protecting nearly 10,000 FAA facilities. Of these, there are about 1,100 FAA facilities, such as control towers at airports and air route traffic control centers, staffed by FAA employees. The protection of these employees, their equipment, and the data and communications they exchange with aircraft in flight is vital to the security and operational integrity of the aviation system as a whole.

III. The Current Aviation Security System

The aviation system within the United States has been on security alert for the past 3 years, and protective measures overseas have been increased and adjusted a number of times over the same period. Increased security measures contained in previously designed contingency plans have been in effect within the United States since the spring of 1995. This is an unprecedented situation.

The events in Asia and the Pacific in 1995, coupled with the destruction of Pan Am Flight 103 in 1988 and the French airline UTA Flight 772 in 1989, remind us that aviation security is an international concern. Even though the threat of terrorism within the United States has increased, the threat still remains greater overseas.

[1] Federal Aviation Administration, "FAA Aviation Forecasts: Fiscal Years 1997–2008," March 1997, pp. I–1,2,11,13. See also White House Commission on Aviation Safety and Security, "Final Report to President Clinton," Washington, DC, February 12, 1997.

On October 1, 1995, the Secretary of Transportation asked the FAA to direct airports and air carriers within the United States to begin implementation of more stringent measures than those that had been announced by the Secretary just 2 months earlier, on August 9, 1995. Many adjustments to measures have been made in the intervening months.

Stringent security measures have been in place for flights departing the United States for overseas locations for many years. Although the details of the security program cannot be revealed in a published study, it may be stated that all items transported on board commercial passenger aircraft flying overseas have been subjected to security controls. As the President directed in July 1996, air carriers are performing preflight security inspections on all overseas international flights: "every plane, every cabin, every cargo hold, every time." [2]

During 1995 and 1996, the FAA and the Office of the Secretary of Transportation worked through the National Security Council to focus Government attention on the need to revise the domestic aviation security baseline, culminating in the creation by the Aviation Security Advisory Committee (ASAC) of the Baseline Working Group (BWG) on July 17, 1996. The destruction of TWA Flight 800, which followed by only a few hours the BWG's creation, accelerated a process already underway.

The President established the White House Commission on July 25, 1996. A preliminary report by the BWG was completed and provided to the Commission on August 30, 1996, in support of the President's call for an initial Commission report by September 9, 1996. The BWG was able to provide important data and analyses on aviation security to the Commission from its inception to its final report. The final report of the Baseline Working Group was published on December 12, 1996. [3] The White House Commission published its final report on February 12, 1997. [4]

IV. Responsibilities in the Current Aviation Security System

A. FAA Responsibilities

The mission for the FAA in civil aviation security is to protect the traveling public in air transportation throughout the world and provide for the integrity of the civil aviation system. FAA oversees a complex system composed of trained Government and private sector personnel, properly maintained and calibrated equipment, and appropriate procedures to provide multiple layers of security from the airport perimeter to the aircraft.

The Office of the FAA Associate Administrator for Civil Aviation Security develops and implements regulatory policies, programs, and procedures to prevent criminal, terrorist, and other disruptive acts against civil aviation; protect FAA employees, facilities, and

It is subject to the provisions of 14 CFR part 191. No part of it may be released without the express written permission of the Associate Administrator for Civil Aviation Security (ACS–1), Federal Aviation Administration, Washington, DC 20591.

[4] White House Commission on Aviation Safety and Security, "Final Report to President Clinton," Washington, DC, February 12, 1997, p. 27.

equipment; ensure FAA employees' suitability to serve in positions of trust; ensure the safe transportation of hazardous materials by air; assist in interdicting unlawful drugs and narcotics coming into the United States; and support national security.

The FAA is responsible for establishing and enforcing regulations, policies, and procedures; identifying potential threats and appropriate countermeasures; deploying Federal Air Marshals on selected U.S. air carrier flights; and providing overall guidance to ensure the security of passengers, crew, baggage, cargo, and aircraft. FAA personnel monitor and inspect air carrier and airport security, taking compliance and enforcement measures, such as finding violations and assessing civil penalties when necessary to maintain discipline in the system.

The FAA also has a responsibility to protect its own assets, thereby contributing to the maintenance of the safety and security of the commercial aviation system. FAA facility and National Airspace System security issues support the ability of the FAA to accomplish its mission. These latter security responsibilities are among those addressed by the President's Commission on Critical Infrastructure Protection, which was established in July 1996,[5] and published its final report in October 1997.[6]

In addition, the FAA must ensure that designated personnel at air route traffic control centers, terminal radar approach control facilities, and other staffed facilities are properly trained and equipped in matters related to security and that they meet the standards of integrity necessary for them to perform their security duties in support of the National Airspace System. Security is taken into account during the design and refurbishment of FAA facilities. The FAA strives to provide for effective air traffic control voice and data communications security, and ensure effective navigation system security, including that of the Global Positioning System.

The Office of the Associate Administrator for Civil Aviation Security maintains close ties to its customers: private sector air carriers; State and local governments and airport authorities; facility and air traffic control elements of FAA; and the traveling public. The current organizational structure is the result of exhaustive review and analysis by many entities since 1989. Many functions are codified in law. In addition to policy, intelligence, and operations functions, the organization's work includes aviation security training at the FAA's Mike Monroney Aeronautical Center, Oklahoma City, and the responsibility for guiding the aviation security research and development program conducted at the FAA's William J. Hughes Technical Center, Atlantic City.

The Office of Intelligence and Security in the Office of the Secretary of Transportation coordinates security and intelligence within the Department of Transportation.[7] Consultation and coordination between the Associate Administrator for Civil Aviation Security and the Director of the Office of Intelligence and Security is

[5] Executive Order 13010 of July 15, 1996, Critical Infrastructure Protection, 61 Fed. Reg. 37347 (1996).

close and continuous.[8] Cooperation among modal security elements has been encouraged and improved by the formation of a Department of Transportation Security Working Group under the leadership of the Director of the Office of Intelligence and Security.

The FAA's Office of Civil Aviation Security Intelligence provides intelligence analysis of the threat to civil aviation as the basis for determining the application of aviation security measures. This is accomplished by synthesizing intelligence and threat information into products such as security directives, information circulars, and threat assessments. These products are needed by the operations and planning offices for ruling on carrier amendments to approved security programs, determinations of foreign airport security effectiveness, and support in changing regulations. The highest level of security is applied in specific situations when there is credible and specific threat information. The FAA, in consultation with the aviation industry, has developed contingency plans that make it possible to implement only those security measures applicable to specific threat situations.

The Office of Civil Aviation Security Intelligence receives and analyzes all information regarding potential or direct threats to civil aviation. The information can be original or from other centers of analysis, classified and open source. It comes from agencies of the U.S. intelligence and law enforcement communities, foreign government authorities, and private sector elements. To keep abreast of rapidly changing threat situations worldwide and to determine their relevance to civil aviation, FAA intelligence analysts stay in contact with their counterparts in other agencies and with FAA special agents in field offices. Decisions to impose additional security measures result from coordinated effort among operations, policy, and intelligence specialists, U.S. and foreign air carriers, and airport operators.

Aviation security threat information and additional security requirements are disseminated to U.S. airlines and airports by official FAA communications called "information circulars" and "security directives," respectively, under section 108.18 of the Federal Aviation Regulations (14 CFR § 108.18), as well as other written and oral communications. The Department of State, pertinent U.S. Embassies, foreign government security officials, and others may also receive these communications. FAA information is passed to airline crews by their companies. If a specific and credible threat cannot be thwarted and security measures cannot counter it, either the specific flight(s) will be canceled or public notification will be made by both the Department of Transportation (DOT) and the Department of State for international flights, or by DOT for domestic flights.

Finally, to review FAA's responsibilities in customer service terms, the services listed on the next page are those provided by the FAA to industry in the field of aviation security.

[8] Id., section 103.

TABLE I

The FAA's Responsibilities for Aviation Security
• Establish and enforce aviation security and hazardous materials regulations, policies, and procedures; • Approve security programs and amendments to those programs; • Identify threats and appropriate countermeasures; • Provide guidance and assistance to ensure the safety and security of passengers, crew, baggage, cargo, and aircraft, particularly during times of increased threat; • Chair the Aviation Security Advisory Committee, an advisory body whose membership is drawn from the aviation industry, consumer advocacy and citizen's groups, unions, and U.S. Government agencies; • Determine requirements, conduct aviation security research and development, and provide assistance to equipment manufacturers; • Test, evaluate, and approve security equipment and certify explosives detection systems; • Provide funding and support for the canine explosives detection program; • Provide aviation security technical assistance, advice, education, and training; • Conduct foreign airport security assessments and make recommendations to foreign authorities for improvements; • Deploy Federal air marshals on selected U.S. air carrier flights; and • Represent U.S. aviation security interests abroad, including those of industry, in negotiations and discussions with foreign governments, air carriers, airport authorities, and international organizations.

These services enhance the overall security posture of U.S. air carriers through deterrence and many other ancillary benefits not directly related to terrorism prevention or Federal regulations.

B. AIR CARRIER AND AIRPORT RESPONSIBILITIES

Air carriers bear the primary responsibility for applying security measures to passengers, service and flight crews, baggage, and cargo. Airports, run by State or local government authorities, are responsible for maintaining a secure ground environment and for providing law enforcement support for implementation of airline and airport security measures.

There are about 100 entities conducting screening at airports in the United States. These include units conducting screening at small airports, air carriers that conduct their own screening, and

the large screening companies.[9] Five of the largest screening companies employ approximately 64 percent of the estimated 18,000 screeners nationwide. At least 16 different companies, including 2 air carriers, conduct screening at the 19 Category X[10] airports.

The baseline security required of air carriers and U.S. airport operators represents an effort to match the level of security with FAA's best estimate of the level of threat. The goal is to allocate industry and government resources efficiently to protect the critical entity, commercial air carrier operations. The Aviation Security Contingency Plan allows the FAA and the aviation industry to respond promptly to security emergencies, focusing on those measures that effectively counter threats while taking into account local conditions. Any change in the prevailing threat must be addressed by an adjustment to the baseline.

V. Discussion of Responsibilities and Costs in the Current Aviation Security System: An Examination of the Mandate

When hijacking was an all too frequent occurrence in the late 1960's and 1970–71, air carriers voluntarily cooperated with the Federal Government on measures to counter the threat, but not without some concern. One history describes the situation at the time as follows:

> "The airlines as a group had consistently argued that combatting hijacking and airport security were largely Federal responsibilities. They had therefore fought for Federal operation and payment for anti-hijacking programs. The airlines were especially unhappy about the prospect of their employees physically searching passengers or engaging in any other activities normally assigned to law enforcement officials. Most were, therefore, pleased with the infusion of Federal agents under the sky marshal program. When it became clear that security systems would have to be extended to virtually all of their boarding areas, the airlines began an intensive lobbying campaign for an expansion of the existing Federal security force to handle the operation."[11]

For 25 years, the executive branch of the Federal Government has maintained that providing security is a cost of doing business, which should be borne by the air carriers and airports just as they bear the cost of ensuring safe operations. The most authoritative

---

[9] An Advance Notice of Proposed Rulemaking (ANPRM) on Certification of Screening Companies was published in the "Federal Register" at 62 Fed. Reg. 12724 (1997) on March 17, 1997; the comment period closed on May 1, 1997. Comments were received and analyzed, a draft NPRM prepared, and concurrence scheduled for February 20, 1998. The critical element in this process is having a reliable and consistent way to measure actual screening performance. It was decided to add more specific screening improvements to the rule based on data gathered by threat image projection (TIP) systems. On March 4, the FAA decided to withdraw the ANPRM, and a notice to that effect was published on May 13, 1998. Special evaluations by field agents are being conducted to validate data gathered by TIP. Results in 1998 were promising; the NPRM should be published in 1999.

[10] Category X airports are generally among the busiest and most complex of all U.S. airports. Category I airports are also among the busiest airports, followed by progressively smaller airports in Categories II, III, and IV. The precise definitions of each category and the identification and location of airports within each category are sensitive information subject to the provision of 14 CFR § 191.1 et seq.

[11] Kent, Richard J., Jr., "Safe, Separated and Soaring: A History of Federal Civil Aviation Policy 1961–1972," U.S. Department of Transportation, Federal Aviation Administration, 1980, pp. 349–50.

statement of this position was recorded during the hearings in February and March 1973, which led to amendments to the Federal Aviation Act of 1958, now codified in title 49, United States Code. These amendments were contained in two related titles of Public Law 93–366: title I—the Antihijacking Act of 1974, and title II—the Air Transportation Security Act of 1974.

In those hearings, the views of a high-ranking Transportation Department official clearly indicated that the users of civil aviation should bear its costs, and those costs explicitly included those derived from the application of security measures. [12]

A. AVIATION SECURITY, NATIONAL SECURITY, AND TERRORISM

In 1986, a new aspect emerged in the executive branch's views on the cost of dealing with terrorism. In the 1986 report of his task force on terrorism, then Vice President George Bush asserted that the United States views terrorism as a threat to the national security. [13] A logical evolution of this view may lead to the conclusion that the Federal Government should be responsible for the costs of combating terrorism, just as it pays for the cost of providing for the common defense of the Nation.

In the late 1980's, a former Administration official extended this view further, including "freedom of the air," meaning the maintenance of civil aviation security, as a vital national interest. [14]

Several years later, Senator Lautenberg, who had been a member of the post-Pan Am Flight 103 President's Commission on Aviation Security and Terrorism, expressed similar views in his opening statement at a hearing of the Senate Commerce, Science, and Transportation Committee on August 1, 1996:

> "Congress, our Nation's airlines, and our airports have been unwilling to make the investments necessary to protect the public. Terrorism is an act of war against an entire nation, with civilians on the tragic front lines, and we have got to confront it with the same commitment and fervor that we must reserve for other threats to our national security." [15]

Ambassador Morris Busby, former U.S. Coordinator for Counterterrorism at the Department of State, agreed during testimony at the same hearing, saying:

> ". . . the idea that aviation security is a national security issue has received a lot of support around this room today, and I am absolutely 100 percent in support of that." [16]

[15] "Aviation Security": Hearings before the Senate Committee on Commerce, Science, and Transportation, 104th Cong. 13 (1996) (statement of Senator Lautenberg).

[16] Id., p.86 (statement of Morris D. Busby, President, BGI Inc.).

President Clinton and members of his Administration have recently made statements of policy indicating that the security of civil aviation should be treated as a matter of national security. In a speech at George Washington University on August 5, 1996, President Clinton stated:

> "We cannot reduce the threats to our people without reducing threats to the world beyond our borders. That's why the fight against terrorism must be both a national priority and a national security priority. We have pursued a concerted national and international strategy against terrorism on three fronts: First, beyond our borders, by working more closely than ever with our friends and allies; second, here at home, by giving law enforcement the most powerful counterterrorism tools available; and, third, in our airports and airplanes by increasing aviation security." [17]

On September 9, 1996, when receiving the initial report of the White House Commission on Aviation Safety and Security from Vice President Gore, the President reiterated this theme by saying:

> "We know we can't make the world risk-free, but we can reduce the risks we face and we have to take the fight to the terrorists. If we have the will, we can find the means. We have to continue to fight terrorism on every front by pursuing our three-part strategy: First, by rallying a world coalition with zero tolerance for terrorism; second, by giving law enforcement the strong counterterrorism tools they need; and, third, by improving security in our airports and on our airplanes." [18]

The White House Commission, in recommendation 3.1 of its final report, stated:

> "The federal government should consider aviation security as a national security issue, and provide substantial funding for capital improvements. The Commission believes that terrorist attacks on civil aviation are directed at the United States, and that there should be an ongoing federal commitment to reducing the threats that they pose." [19]

In section 314 of the Federal Aviation Reauthorization Act of 1996 (Public Law 104–264), the Senate appears to endorse these views, stating the "Sense of the Senate Regarding Acts of International Terrorism." After finding that ". . . there has been an increase in attempts by criminal terrorists to murder airline passengers through the destruction of civilian airliners and the deliberate fear and death inflicted through bombings of buildings and the kidnapping of tourists and Americans residing abroad," section 314 states:

> "It is the sense of the Senate that if evidence establishes beyond a clear and reasonable doubt that any act of hostility towards any United States citizen was an act of international

terrorism sponsored, organized, condoned, or directed by any nation, a state of war should be considered to exist or to have existed between the United States and that nation, beginning as of the moment that the act of aggression occurs."[20]

Again, the President's words are reflected in the White House publication, *A National Security Strategy for a New Century*:

"We further seek to uncover, reduce or eliminate foreign terrorist capabilities in our country; eliminate terrorist sanctuaries; counter state-supported terrorism and subversion of moderate regimes through comprehensive program of diplomatic, economic and intelligence activities; improve aviation security worldwide and at U.S. airports; ensure better security for all U.S. transportation systems; and improve protection for our personnel assigned overseas."[21]

B. AVIATION SECURITY AND OTHER CRIMINAL ACTS

Given that aviation security measures are designed to prevent acts of terrorism and thereby enhance national security, the Federal Government implicitly accepts increased responsibility for improving aviation security. Nevertheless, it is important to remember when discussing who should be responsible for security, that criminal acts against civil aviation are not committed exclusively by terrorists. Most crimes against civil aviation have been committed by mentally deranged persons, or fugitives and would-be refugees who resorted to hijacking only as a means of transportation with no clear intention of harming the aircraft or its occupants. Others are more deadly.

In 1955, a United Airlines aircraft disintegrated in flight 11 minutes after takeoff near Longmont, Colorado. A dynamite bomb detonated in a baggage compartment, Killing 39 passengers and 5 crew. One J. Graham was arrested, tried, and executed for the crime, for which the motive was insurance fraud.[22] Another incident of sabotage over Bolivia, North Carolina, in early 1960 killed 34 passengers and crew and was also related to insurance fraud. A ceiling on the amount of airline trip insurance passengers can purchase was imposed, and baggage screening was improved. Domestic airline sabotage declined until there were no fatal incidents in the 1970's.[23]

Air carriers also must counter other crimes unrelated to terrorism, such as theft and fraud.[24] Air carriers" security interests are inherently broader than the prevention of terrorism, and their security programs deal with more than is required by Federal Aviation Regulations.

VI. The Transfer of Air Carrier Security Responsibilities to Airport Operators

A. EARLY DISCUSSIONS, DEBATES, AND DIRECTIONS: 1960–1990

From the first implementation of security screening, nearly everyone agreed that the screening of passengers should be a responsibility of the airlines. In 1969, Eastern Air Lines voluntarily agreed to an FAA test of an "operational screening system for boarding airline passengers" with "weapon-detection devices" used in conjunction with "FAA's evolving psychological profile to identify and isolate suspicious individuals for further surveillance or search."[25] Eastern was joined later in that year by TWA, Pan Am, and Continental in "using the screening system."[26] The sharing of the costs of passenger screening was then and has continued to be a topic of debate and divided opinions.

A solution found in 1972 was to require air carriers to provide screening personnel and the airport operators to provide law enforcement support. In the 93rd Congress, 1st Session, Senator Cannon, Chairman of the Aviation Subcommittee of the Senate Committee on Commerce, introduced the "Air Transportation Security Act of 1973" as S.39, "A Bill to amend the Federal Aviation Act of 1958 to provide a more effective program to prevent aircraft piracy and for other purposes."[27] The Air Transportation Security Force proposal in S.39 envisioned Federal law enforcement officers as supporting air carrier screeners, not performing the screening functions themselves. They would only search after a bag or person alarmed a metal detection device and then only after consent was given. Everyone participating in the hearings seemed to believe that many more than 5,000 Federal agents would be needed to perform all functions envisioned. The airlines supported S.39.

Most of the arguments against a Federal force revolved around the philosophy of federalism; that this was a State and local police protection function. In his statement before the Aviation Subcommittee of the Senate Commerce Committee on January 10, 1973, then Secretary of Transportation John Volpe said:

> "To require the creation of a new Federal police force for the sole purpose of satisfying the security needs at airports, regardless of their size and level of operations is unnecessarily costly and wasteful. . . . The FBI will exhaustively investigate all air piracy incidents and subsequently bring to justice all violators. On the other hand, we do not feel the Federal Government should get into the day-to-day crime prevention business at our airports. This should properly be managed by local law enforcement officers."[28]

[25] Kent, Richard J., Jr., "Safe, Separated and Soaring: A History of Federal Civil Aviation Policy 1961 - 1972," U.S. Department of Transportation, Federal Aviation Administration, Washington, DC, 1980, p. 338. The recommendations and the test were devised by the FAA Task Force on Deterrence of Air Piracy, created by Acting Administrator Dave Thomas on February 17, 1969.

[26] Id., p. 340.

[27] S.39 was introduced on January 4, 1973. Senator Cannon then noted that there were more than 1,700 Federal security officers on duty at U.S. airports.

[28] "Emergency Antihijacking Regulations": Hearings before the Aviation Subcommittee of the Senate Committee on Commerce, 93rd Cong. 75 (1973) (statement of Hon. John A. Volpe, Secretary of Transportation).

None of the arguments suggested that there was a "national security" aspect to aviation security. While there were 134 domestic hijackings between 1961 and 1972, and 7 explosions aboard commercial aircraft between 1955 and 1976 in the United States, these domestic security incidents did not contain clearly "terrorist" elements until a hijacking at LaGuardia Airport in September 1976. A group called "Fighters for Free Croatia" hijacked a TWA flight bound for Chicago. After stops in Montreal, Quebec; Gander, Newfoundland; and Iceland for refueling, they dropped leaflets over London and Paris, landed in Paris and surrendered.[29] Ironically, the perpetrators believed that security screening was tight at LaGuardia and decided to use simulated explosives made from material smuggled on board rather than traditional weapons, which probably would have been discovered. The group met the profile and triggered more than usual rigorous searching. The ruse was bolstered by a genuine bomb that had been planted in a New York subway locker; the hijackers notified police, and the bomb exploded during examination.[29]

The 1980's saw a change in the nature of criminal acts against aviation. Hijacking, seemingly the preferred form of criminal and terrorist activity, was joined once again by the placement of explosive devices aimed at the total destruction of aircraft, passengers, and crew. The vast majority of criminal and terrorist acts against civil aviation during this decade occurred overseas rather than in the United States. The decline in hijacking may have been due to more effective security at airports.[31] The events of the 1980's may have stimulated some observers to suggest a large role for airport operators in aviation security. Still others disagreed.

The hearings of the House Subcommittee on Government Activities and Transportation on September 25, 1989, allowed for the presentation of opposing views about the security roles of air carriers and airport operators. Speaking to Isaac Yeffet, former Director of Security of El Al Airlines, then Congresswoman Boxer said:

> "Mr. Koch says in his testimony-and I am quoting—'The carriers should be responsible for safety, and they are. They do it superbly. Security is a separate problem far beyond their competence, and it shows.' He goes on to say that what we need to do-and I am quoting—'The terminal operator ought to have at least as large, if not a larger responsibility for security than the carriers.' Do you agree with that?"

Mr. Yeffet replied:

> "No. I disagree. I believe the airlines must be responsible for the security. They have to get help from the government by asking them what kind of procedures we have to follow; some-

body has to teach the airlines how to build a security system if they don't know how. But it is their business as they run their airlines to make sure that the flight will always remain safe and secure, and not to think that somebody else has to run their security." [32]

The continuation of the debate and the diversity of views on the delineation of responsibilities for security between air carriers and airport operators prompted a reexamination of the issues by the FAA in 1991.

B. FAA STUDY ON THE TRANSFER OF SECURITY RESPONSIBILITIES: 1991

An unpublished FAA study evaluated three alternatives for a shift in security responsibilities with respect to passengers, baggage, and cargo from the air carriers to airport operators to determine whether or not any alternative was likely to improve performance. The basic framework and content of the study, including conclusions reached at that time, are presented at appendix A without substantive modification. The options examined in 1991 reflect alternatives to the system then in place, and are reiterated in this paper as they were written in 1991. Most elements of these options remain valid today.

The study concluded that the system in 1991 was well understood and accepted by most major participants. Although the system had both pros and cons, it was fundamentally effective and efficient. While the study saw advantages to each of the three alternatives, there were also considerable disadvantages to shifting any of the major security functions from the air carriers to airport operators. The study concluded that there did not appear to be a net benefit in adopting any of the alternatives over the system current at the time. Consequently, it was recommended that the current system be continued. However, in recognition of the need for further analysis to study ways that the security system might be improved, the study recommended that the FAA consider running a trial at a selected domestic airport to test the viability of transferring certain security functions, particularly the screening checkpoints, from air carriers to the airport authority.

C. AIRPORT OPERATORS' VIEWS: 1996

In his testimony before the White House Commission on Aviation Safety and Security on September 5, 1996, Richard Marchi, Senior Vice President for Technical and Environmental Affairs for the Airports Council International-North America (ACI-NA), speaking for his organization and for the American Association of Airport Executives (AAAE), presented the airport operators' opinion when he stated:

"An important underlying aspect of controlling passenger flow and suspect baggage is continuity. The first point of contact is provided by airline agents at the check in point. Airline agents currently use a battery of relevant information to determine if a passenger or their baggage should be subjected to a more in-

[32] "The Bombing of Pan Am Flight 103: A Critical Look at American Aviation Security": Hearings before the Subcommittee on Government Activities and Transportation of the House Committee on Government Operations, 101st Cong. 56 (1989).

tense screening regime. This information is provided by the intelligence community and FAA directly to the airline security personnel, thus limiting the information to those with the quote-need to know-unquote and facilitating the dissemination of information to those employees who will be responsible for implementing the selection process. It is at this point that a suspect passenger and their baggage, either carry on or checked, can be removed from the standard screening process and subjected to more intense scrutiny. By interposing another controlling entity—an airport or federal employee—into the midst of the check-in process continuity is lost, and the suspect person and/or their baggage would have the opportunity to evade security control measures such as a positive passenger/baggage match. Currently, if a passenger is determined to be a risk, that individual is escorted to the gate and remains under the control of an agent until he boards the aircraft. That passenger's checked baggage is scrutinized and is placed aboard the aircraft only when the passenger boards. This system works because a single entity—in this case, the airline—is responsible for controlling all aspects of that passenger's screening process. If airport or federal government employees were to become responsible for effective screening of suspect passengers and/or baggage, they would multiply the number of points in the system where there must be a hand-off of responsibility and, in turn, multiply the number of opportunities for a miscue."[33]

Finally, moving responsibilities from air carriers to airport authorities could present a number of difficulties. An attempt had been made to exempt aviation safety and security from the Unfunded Mandates Reform Act of 1995 (Public Law 104–4), but the attempt failed.[34]

A certain percentage of Airport Improvement Program (AIP) grant money from the Airport and Airway Trust Fund is allocated by airport authorities for security measures. Under current law, air carriers are ineligible for such grant funding.[35] A legislative approach to this issue could be to permit AIP funds to be used by air carriers for security purposes, a solution unlikely to be supported by airport operators.

Again, Mr. Marchi, speaking for airport operators:

"While airports appreciate the provision found in H.R. 3953 expanding Passenger Facility Charge (PFC) and Airport Improvement Program (AIP) eligibility to help pay for explosive detection equipment and operational costs for activities to enhance aviation security, this departure from current PFC and AIP eligibility, which restricts these funds to capital improvements, should not be undertaken lightly. The use of Trust Fund resources for on-going and growing operating expenses puts

[33] Statement of Richard F. Marchi before the White House Commission on Aviation Safety and Security, Washington, DC, September 5, 1996.

[34] 141 Cong. Rec. H509-H512 (January 23, 1995). Representatives Mineta and Oberstar strongly supported Representative Collins' amendments Nos. 69 and 70, which were defeated 169 to 256.

[35] Section 308 of the Federal Aviation Reauthorization Act of 1966 (P.L. 104–264) may modify air carries eligibility.

these operations at grave risk when the inevitable Federal cost-cutting ax falls on DOT/FAA/Airport appropriations. And, while expanded eligibility may be helpful at the margins, it will only have real benefit if additional AIP funds are made available and the federal cap on PFCs is lifted. We need to remember that airport security investments are among the multitude of airport capital improvement programs that we have estimated will require at least $10 billion a year through the year 2002. (Source: ACI-NA/AAAE 1996 Capital Needs Survey.) AIP funding for airports has suffered major reductions, from $1.9 billion annually to only $1.45 billion, currently. Congress must address the need to invest in our nation's airports to provide greater capacity, safety and security for air travelers—by giving airports the means to generate needed funding through the time-tested and effective local Passenger Facility Charge program. For smaller airports, we must be willing to consider new options for providing the necessary investment." [36]

VII. The Transfer of Air Carrier Security Responsibilities to the Federal Government

Few have recommended the transfer of screening and other air carrier responsibilities to the Federal Government. [37] As stated in the next section on shared responsibilities, the BWG clearly opposed the transfer of air carrier responsibilities to the Federal Government for many of the same reasons raised over 20 years ago. Since the failure of their arguments in 1970–71 to transfer responsibility in this manner, the air carriers have repeatedly expressed the desire to retain screening duties and have opposed their transfer to "government" personnel, primarily so that airlines can facilitate passenger movement and better control customer services.

In testimony submitted to the Senate Aviation Subcommittee on January 9, 1973, Paul Ignatius, Executive Vice President of the Air Transport Association (ATA), wrote:

> "The airlines have consistently taken the position that law enforcement is a government responsibility. First, the behavioral profile is an important aspect of the screening process and this must be handled by airline personnel and coordinated with the metal-detecting operations. Secondly, the screening process must be carried out as part of the boarding of passengers. The airlines must be responsible for timely boarding and would lack the necessary control over it if the screening process were operated by government personnel." [38]

Senator Hollings expressed a different view over 20 years later in his prepared statement for the aviation security hearing of the Senate Commerce, Science, and Transportation Committee on August 1, 1996:

---

[36] Statement of Richard F. Marchi, *supra* note 33.

[37] One such discussion is in Nader, Ralph and Smith, Wesley J., "Collision Course: The Truth about Airline Safety," TAB Books, a division of McGraw-Hill, Inc., Blue Ridge Summit, Pennsylvania, 1994, pp. 230–31.

[38] "Emergency Antihijacking Regulations": Hearings before the Aviation Subcommittee of the Senate Committee on Commerce, 93rd Cong. 167 (1973) (statement of Paul Ignatius, ATA).

". . . the public deserves the best technology operated by the best trained individuals, to reduce the risks of a terrorist attack. Another thing is clear-security is going to be costly. The Federal Aviation Administration (FAA) has estimated that it will cost as much as $2.2 billion to install up to 1,800 machines at 75 airports. The FAA should be authorized to collect a fee to pay for the machines. Today, there are approximately 14,000–18,000 screeners, paid an average of $10,000 to $15,000 per year. These screeners are one line of defense, but a critical one in the fight against terrorism. They need training, and they need to be paid in accordance with their responsibilities. The present turnover rate among these employees is extremely high. Unless we change the way we provide security, we cannot upgrade it . . . I am considering whether the FAA should provide the screeners, thereby relieving the air carriers of this responsibility; this also will cost money." [39]

In contrast, and also on August 1, 1996, Senator McCain, speaking about legislation that became the FAA Reauthorization Act (which requires this study) during the Senate hearing, said that the bill would:

". . . require the FAA to study whether airports should be responsible-or who should be responsible-for airport security functions. We are in agreement, and the airlines are in agreement, that it should not be the airlines that are responsible for the security, especially passenger security." [40]

In his prepared statement, Senator McCain broadened the mandate by saying that the legislation would: "require FAA to study whether airports should be responsible for most or all security functions. . . ." [41]

Captain J. Randolph Babbitt, president of the Air Line Pilots Association, before the White House Commission on September 5, 1996, offered yet another alternative when he said:

"We believe the FAA's role in overseeing aviation security should be reviewed by the Commission, with a view toward making certain of its responsibilities a function of the Department of Justice. The establishment of aviation security policy and procedures by law enforcement professionals within the DOJ, working with their own intelligence officers, would enhance the ability of the U.S. to quickly adapt security measures to new and changing threats." [42]

Captain John J. O'Donnell, then president of the Air Line Pilots Association, accompanied at the Senate Aviation Subcommittee hearing on January 9, 1973, by two pilots who had been hijacked, supported the then current division of responsibilities, but for a different reason and with a significant caveat:

---

[39] "Aviation Security": Hearings before the Senate Committee on Commerce, Science, and Transportation, 104th Cong. 93 (1996) (statement of Senator Hollings).
[40] Id., p. 9. (statement of Senator McCain).
[41] Id., p. 10.
[42] Statement of Captain J. Randolph Babbitt, president, Air Line Pilots Association, before the White House Commission, Washington, DC, September 5, 1996.

"This committee is well aware of the action taken recently by the Secretary of Transportation which makes airport authorities and the airlines responsible for passenger screening, carry-on baggage search and the presence of law enforcement officers. We concurred in that action because little else was being done to develop airport security. However, we are greatly concerned that the fragmentation of responsibility will mean that training will be inconsistent, equipment maintenance will become lax and monitoring of the law enforcement presence will be subject to the whims of local government and airline budgets. The overall responsibility for the air transportation security system should be at a high governmental level in order to give consistency of training and competency to the total system." [43]

A. SCREENING OVERSEAS

Two significant questions are who would perform screening overseas when foreign entities are incapable or their performance is insufficient, and who would perform such (sometimes redundant) screening in any case? The most logical answer would be the air carriers, as now required by the FAA of U.S. air carriers in such cases. Even if carriers cease doing screening in the United States, they will most likely continue to do redundant screening [44] abroad as required by FAA regulations.

Foreign governments are willing to let private sector entities do redundant screening, but are loathe to allow foreign government employees to perform the same function. A request to foreign governments to allow U.S. Federal Government employees to perform screening overseas would most likely be rejected as an infringement on the national sovereignty of the host governments. Therefore, even if the Federal Government assumed air carrier responsibilities within the United States, air carriers would still need to develop and maintain expertise to perform screening services overseas.

The only Federal assistance that might be agreeable to foreign governments would perhaps be more civil aviation security liaison officers stationed at or near each airport to assist in the interface with foreign governments. The responsibility for the effective and efficient performance of screening functions would have to remain with either the host government or the air carriers.

B. ECONOMIC CONSIDERATIONS

The argument against Federal Government responsibility for security screening overseas is primarily legal or jurisdictional in nature. The argument against the Federal Government assuming air carrier security responsibilities at home contains some of those same concerns but major economic considerations as well.

---

[43] "Emergency Antihijacking Regulations": Hearings before the Aviation Subcommittee of the Senate Committee on Commerce, 93rd Cong. 187 (1973) (statement of Captain John J. O'Donnell, president, Air Line Pilots Association).

[44] "Redundant screening" refers to any additional or secondary screening that may be required after a passenger passes through a primary screening checkpoint, but prior to boarding the aircraft.

There are approximately 18,000 screeners working for over 100 entities, including air carriers and screening companies. These individuals would be the minimum number hired as Federal Government employees or as contract employees if the Federal Government chose to "contract out" security services currently provided by air carriers.

Provision for Federal Government screening personnel costs alone could exceed a half billion dollars a year. If costs for training are added to those operational costs, then combined with advanced security equipment procurements under the Facilities and Equipment account and research and development costs, the total could approach a billion dollars a year. Whether financed by the U.S. Treasury's General Fund as a national security expenditure or through the Airport and Airway Trust Fund as a cost of doing business or traveling, that is a substantial amount of money that the Federal Government would have to expend to assume air carrier screening responsibilities. [45]

On the other hand, a major benefit could be an increase in the professionalism of the security screening work force if sufficient funds were made available to conduct proper training for them at centralized locations; e.g., at the FAA Academy, in Oklahoma City.

Recent FAA personnel reform measures may allow for the creation of a professional FAA security screening force with career paths, appropriate compensation, a variety of assignments, and a sense of service commensurate with their responsibilities. Another perhaps more practical possibility could be the creation of a quasi-governmental work force independent of, although regulated by, the FAA.

In this case, the FAA could still arrange for the training of such a force. The certification of screening companies, as required by section 302 of P.L. 104–264, is a similar approach. The FAA expects to publish a notice of proposed rulemaking on this issue in 1999.

VIII. Shared Security Responsibilities: Air Carriers and Airport Operators or the Federal Government

Possible methodologies to provide for shared security responsibilities among air carriers and airport operators or the Federal Government will be discussed in this section. As has already been noted, the regulatory framework established by the FAA to ensure efficient and effective civil aviation security is currently based upon a system of shared responsibilities.

---

[45] Personnel costs are not based on the prevailing salaries paid to screeners under the current system. The assumption is that it will be necessary to increase screeners' salaries and benefits to increase the quality and professionalism of the screener work force, and a key reason for the Federal Government assuming screening responsibilities would be to ensure this change. Therefore, the personnel cost estimate is based on the postulation of 15,000 screeners in Federal Aviation Service Grades (FG) 5/7; 3,000 screening supervisors at FG–9/11; and 429 managers/program, policy, and support staff personnel (a ratio of 1 per 7 screening supervisors) ranging from FG–11 through FG–15, at an average grade of FG–13. Costs estimates are in 1997 dollars and are based on the Washington, DC, locality pay schedule for 1997 General Schedule/FG employees:

$25,897 (FG–7 Step 1) x .35 benefits x 15,000 screeners = $524,414,250
$31,680 (FG–11 Step 1) x .35 benefits x 3,000 supervisors = $128,304,000
$54,629 (FG–13 Step 1) x .35 benefits x 429 managers/staff = $31,638,385
$524,414,250 + $128,304,000 + $31,638,385 = $684,356,635

The FAA is responsible for: establishing and enforcing regulations, policies, and procedures; identifying potential threats and appropriate countermeasures; conducting research; and providing overall guidance to ensure the safety and security of the passengers, crew, baggage, cargo, and aircraft. The air carriers bear the primary responsibility for applying screening and other security measures to passengers, service and flight crews, baggage, and cargo. Airport operators are responsible for maintaining a secure ground environment and for providing local law enforcement support for the implementation of airline and airport security measures. The challenge of properly allocating responsibilities among the three groups to ensure effective and efficient civil aviation security has been difficult. Some views are presented below.

A. PRESIDENT'S COMMISSION ON AVIATION SECURITY & TERRORISM (1990): COMMENTS ON RESPONSIBILITIES

The 1990 President's Commission on Aviation Security and Terrorism did not specifically recommend that the FAA or the Federal Government assume the responsibility for passenger and baggage screening, or other security measures. Some statements seemed to endorse the existing division of responsibilities. However, while not suggesting an actual transfer of responsibility, the Commission did recommend changes to clarify accountability and made strong statements about the Federal role.

The Report of the President's Commission stated:

> "To ensure accountability, a clear line of responsibility for security must be established.
>
> Since the federal government is ultimately responsible for the safety and security of the traveling public, it must provide the leadership and take the responsibility for security at the airports." [46]

This passage from the report was in the context of security at both U.S. and overseas airports. The report continued, stating that the "Commission agrees with the premise" expressed by an airline chairman that "Governments of all nations must accept and implement their direct responsibility for security, as distinguished from a passive, regulatory role." [47]

To achieve this greater responsibility and enhance accountability, the President's Commission recommended the creation at each category X airport of a "federal security manager" who:

> "should have the ultimate responsibility for security. These officials would work with the air carriers and airport operators in designing one security plan for each airport, based upon the known and potential threat. This plan will identify the role and responsibilities of the air carriers, the airport operator, and the local law enforcement participation in terms of what each will do, how they will do it, and what resources will be committed to security, including the qualifications of the security personnel. The federal manager must approve this plan. Furthermore, the federal security manager will oversee air car-

[46] President's Commission on Aviation Security and Terrorism, *supra* note 22, p. 59.
[47] Id., p.60.

rier and airport operators in the implementation of this plan. This will include requiring the redirection of air carrier or airport security resources should the federal manager decide. . . ."[48]

The President's Commission report did not recommend the transfer of air carrier screening responsibilities to the Federal Government. It did recommend a more direct, more active role for the Federal Government in directing the deployment of air carrier and airport operator resources as they perform their identified functions. It endorsed the concept of a shift for the Federal Government from "a passive, regulatory role" to "direct responsibility for security" because it was "ultimately responsible for the safety and security of the traveling public" and should therefore "take the responsibility for security at the airports."

The 1990 Commission did not, however, recommend relieving the air carriers or the airport operators of their responsibilities and instead endorsed enhanced Federal oversight of their performance.

B. ASAC BASELINE WORKING GROUP RECOMMENDATION ON RESPONSIBILITIES (1996)

The following is a statement from the BWG report:

"The BWG considered a transfer of primary responsibility for aviation security, and in particular the screening of passengers and baggage, to the airport operator or the Federal government. However, the current structure is well understood and accepted by the parties involved. The various advantages and disadvantages of a transfer of responsibility do not offer a compelling benefit from a shift of responsibility, particularly when major changes in the domestic security baseline are anticipated. Transferring responsibility for screening passengers and baggage to an airport or Federal agency would also transfer liability, disrupt the continuity of air carrier processing, and could raise Fourth Amendment issues regarding the legality of a security search by a government entity. Government hiring and personnel practices are also less flexible than those used by industry. The fundamental consideration is that aviation security itself must be improved. Merely shifting responsibility will not remedy deficiencies in personnel, procedures, or equipment."[49]

C. WHITE HOUSE COMMISSION ON AVIATION SAFETY AND SECURITY: COMMENTS ON RESPONSIBILITIES (1996–97)

In the conclusions of its final report, the White House Commission made several comments that seem to support the concept of shared responsibilities.

"The Commission believes that each of its recommendations is achievable. But, the Commission has no authority to implement its recommendations. That responsibility lies with government and industry. Many of the proposals will require additional funding. Some of them will require legislation. Each of

[48] Id.
[49] BWG, *supra* note 3, pp. 78–79.

them requires sustained attention. We now urge the President to make these recommendations his own. We urge Congress to provide the necessary legislation and funding. We urge the incoming leadership of the DOT and the FAA to make fulfillment of these recommendations a cornerstone of their work. We urge the commercial aviation industry to take up the technical and organizational challenges. . . .''

''There are few areas in which the public so uniformly believes that government should play a strong role as in aviation safety and security. Aviation is an area over which the average person can exert little control; therefore, it becomes government's responsibility to work with industry to make sure that Americans enjoy the highest levels of safety and security when flying. Problems in these areas contribute to an erosion of public faith in aviation, and in government itself. The Commission has laid out an aggressive agenda to help address those concerns, and believes that the implementation of this course of action must be the top priority for all those involved in aviation.'' [50]

Like its 1990 predecessor, the White House Commission of 1996–97 did not explicitly recommend the transfer of responsibilities from air carriers to the Federal Government or to airport operators. It did, however, like its predecessor, endorse a stronger role for the Federal Government in aviation security:

''In the area of security, the Commission believes that the threat against civil aviation is changing and growing, and that the federal government must lead the fight against it. The Commission recommends that the federal government commit greater resources to improving aviation security, and work more cooperatively with the private sector and local authorities in carrying out security responsibilities.'' [51]

One element of that stronger role will be the continuing purchase of security equipment for use by air carriers and airport authorities to assist them in the performance of their aviation security responsibilities.

D. AVIATION INDUSTRY COMMENTS ON RESPONSIBILITIES

The airline industry seems to agree that there is no need to depart from the shared responsibilities system in place for so many years. In testimony before the White House Commission on September 5, 1996, Carol Hallett, president of the Air Transport Association of America (ATA), stated:

''It has been suggested by some that we must radically alter our nation's air transportation system in order to make it secure from terrorism. Based upon our understanding of the threat presented, this is not the case - the measured and deliberate steps to enhanced security which we have put forward are responsive to the need.'' [52]

---

[50] White House Commission, *supra* note 4, p.53.
[51] Id., p.4.
[52] Statement of Carol B. Hallett before the White House Commission, Washington, DC, September 5, 1996.

In the "Statement of Aviation Security Principles," attachment 2 to her prepared testimony, Ms. Hallett added:

> "Only with regard to countermeasures, which are deployed by airlines and airports at the direction of the USG in the aviation environment, is there a sharing of this governmental responsibility." [53]

Walter Coleman, president of the Regional Airline Association (RAA), on the same day said:

> "The regional airline industry recognizes that we must participate and contribute to the safety and security of the traveling public in establishing practical security procedures which will achieve the national objectives and also permit the airlines to continue to provide service to the communities they presently serve." [54]

The airport authorities also seem to support the continuation of the current division of responsibilities among airlines, airport operators, and the Federal Government. In his testimony at the same meeting, Mr. Marchi spoke for his organization and also for the American Association of Airport Executives (AAAE) when he stated:

> "The current system can be seen as a natural and logical split of responsibilities based on the evolution of airport and air carrier duties and obligations, which includes the airport acting as property managers and the airlines acting as transporters of people and property. Simply changing the assignment of responsibilities for passenger and baggage security screening will not improve a flawed system; rather the system, itself, and the employees who operate it should be changed.
>
> Incentives to improve performance should also be offered to the pre-board screeners themselves. That is not to say that other parties have no role to play in improving today's operations. Currently, wages are low, positions are often part-time with no benefits, advancement opportunities are limited, and there are no consequences related to making mistakes other than the possible loss of an already-less-than-desirable position. The overall quality of the applicant pool reflects the drawback of the positions offered.
>
> We recommend that all pre-board screeners be subjected to criminal background checks, and employment history verifications. That the FAA develop a standard training curriculum to certify screeners. FAA certified screeners would then be invested with a valuable and transferable skill and would be compensated accordingly. FAA should also develop hiring and training criteria for commercial entities that provide screening personnel. It may also be appropriate to require certification of the companies, themselves, who, in any event, should be responsible for conducting background investigations

[53] Id.

[54] Statement of Walter S. Coleman before the White House Commission, Washington, DC, September 5, 1996.

and should be subject to civil penalties for violation of FAA procedures." [55]

E. PARTNERSHIP

The White House Commission on Aviation Safety and Security recommended greater use of partnerships between government and the aviation industry in meeting safety and security goals. The Commission stated in its final report:

> "The premise behind these partnerships is that government can set goals, and then work with industry in the most effective way to achieve them. Partnership does not mean that government gives up its authorities or responsibilities. Not all industry members are willing to be partners. In those cases, government must use its full authority to enforce the law. But, through partnerships, government works with industry to find better ways to achieve its goals, seeking to replace confrontation with cooperation. Such partnerships hold tremendous promise for improving aviation safety and security. A shift away from prescriptive regulations will allow companies to take advantage of incentives and reach goals more quickly." [56]

In 1996, Congress eliminated the FAA's dual mandate of promoting air commerce and ensuring safety, making it clear that safety and security are FAA's highest priority. [57] Since then, FAA and industry have worked together to identify potential improvements in aviation safety and regulation.

In response to the White House Commission's call for partnership in the areas of security and safety, the FAA convened consortia at 41 major U.S. airports during September 1996. By mid-December 1996, 39 of these consortia had completed vulnerability assessments and developed action plans with recommended procedural changes and requirements for advanced security technology. FAA found that airport consortia have the potential to resolve local issues effectively because they involve more local players in a collective effort. The FAA is now attempting to secure voluntary agreements to make the consortia permanent and extend them to smaller airports, with one of their primary functions being the continuing assessment of vulnerabilities and the identification of corrective action.

While the BWG report did not recommend a major change in the responsibilities for aviation security, it did recommend a change in the partnership between the FAA and the aviation industry:

> "Greater demands on the civil aviation system require an enhanced partnership between the agency and the aviation industry. In its initial recommendations the White House Commission on Aviation Safety and Security stressed the need for a fundamental change in the way government and the private sector carry out their responsibilities. The BWG supports this conclusion and recommendation. In its 1990 report, the President's Commission on Aviation Security and Terrorism rec-

---

[55] "Statement of Richard F. Marchi, *supra* note 33.
[56] White House Commission, *supra* note 4.
[57] Section 223 of the Federal Aviation Reauthorization Act of 1996, Public Law 104–264, October 9, 1996, amending 49 U.S.C. § 106.

ommended that Federal Security Managers be put in place at major domestic airports to become the accountable entity for security at that location. Federal Security Managers work with the air carriers and airport operators to design and approve security systems, and oversee the carrier's and airport operators' implementation of the security system to ensure compliance. The BWG is recommending that the FSM's program be extended to selected Category I airports." [58]

F. RESPONSIBILITY FOR SECURITY RESEARCH, ENGINEERING, AND DEVELOPMENT (R,E&D)

For many years, the Federal Government and the FAA have been fulfilling a major responsibility by fostering and funding security research, engineering and development, which was accelerated by the Aviation Security Improvement Act of 1990. From 1991 to 1996, the FAA spent over $209 million on R,E&D on explosives and weapons detection technology development, airport security technology, security systems integration, aircraft and container hardening, and human factors. This effort will continue.

Following the recommendations of the White House Commission, the Federal Government returned to an area not visited since the height of the hijacking threat in the mid–1970's: the capital purchase of security equipment for use by private sector air carriers to enhance their ability to screen passengers and baggage effectively and efficiently prior to boarding.

On October 30, 1996, the FAA established an integrated product team (IPT) to acquire and deploy advanced security equipment through "non-competitive contracts or cooperative agreements with air carriers and airport authorities, which provide for the FAA to purchase and assist in installation of advanced security equipment for the use of such entities." [59] The equipment acquisition has been funded in the FAA Facilities and Equipment account derived from the Airport and Airway Trust Fund. The team includes working representatives of air carriers and airport authorities.

The following table depicts planned expenditures for various types of equipment selected by the integrated product team for purchase and deployment during FY's 1997–99:

TABLE II

FAA Expenditures in FY 1997–98 for Acquisition of Security Technologies

Explosives Detection Systems	$ 68,313,400
Other Automated Technologies	$ 15,550,000
Explosives Trace Detectors	$ 45,036,600
Computer-Assisted Passenger Screening (CAPS)	$ 10,000,000
Screener Proficiency Evaluation & Reporting System (SPEARS)	$ 5,300,000
Total	$144,200,000

[58] BWG, *supra* note 3 , p. 77. (14 CFR § 191 applies.)

[59] This was authorized and funded by title V of the Omnibus Consolidated Appropriations Act, 1997, Public Law 104–208.

G. AVIATION SECURITY TRAINING

Changes in the current system, which have been debated for years, have occurred only incrementally, often in response to a crisis or loss of an aircraft. One of the common threads weaving throughout all reports, books, hearings, articles, and recommendations over the years has been the need for better and more standardized aviation security training and an increased role for the Federal Government in both.

This is particularly important now, since many new, more complicated but effective types of equipment are being deployed at U.S. airports. The operators of advanced security equipment need far more detailed training, management attention, and motivation to ensure that devices are properly and effectively operated. Much more in the way of following operational procedures and making decisions needs to be done by the screeners. This places additional burdens on the selection, training, and maintenance of at least this part of the screener work force.

As long ago as the September 1989 hearings of the House Government Activities and Transportation Subcommittee on the bombing of Pan Am Flight 103, Mr. Noel Koch, formerly Principal Deputy Assistant Secretary of Defense for International Security Affairs, in his prepared statement said:

> ". . . we have to pay much closer attention to the personnel side of the security equation. At the present time, the economics of security appear to militate in favor of hiring entry-level minimum wage people. They often get little or no training, they have frequently the most limited "people skills," and the turnover rates among them are wholly inconsistent with the requirements of an effective security system. Put minimum wage people on a million dollar machine, give them little or no training, manage them like entry level people, and you will get minimum wage performance out of your million dollar machine. . . . Coupled to a more imaginative hiring philosophy, we will benefit from a systematic approach to training security personnel. This is an area in which the FAA may need additional authority, to standardize training requirements for security personnel, and to assist in bringing training regimes up to those standards."[60]

Mr. Koch's comments are still pertinent today. The "Certification of Screening Companies" rulemaking[61] offers an opportunity for FAA to present to the public for comment both selection criteria and training standards and seek ideas for improving aviation security training.

In his 1993 book *Combatting Air Terrorism*, Rodney Wallis, former director of security for the International Air Transport Association, also suggested an increased role for the FAA in the area of training:

> "Training is a truly vital part of air transportation's fight against terrorism, yet too many governments, airport administrations, and airline managements fail to ensure their staff are

[60] The Bombing of Pan Am Flight 103 (statement of Mr. Noel Koch), *supra* note 14.
[61] See note 9, *supra*.

> adequately prepared for their roles . . . A role the FAA might well enlarge is the physical monitoring of U.S. based airlines' training and security implementation at home and abroad."[62]

There is broad, although not universal, agreement that the regime of shared responsibilities should stay the same. However, it could be argued that the Federal Government should increase its involvement by setting training standards, thereby adding to its other responsibilities for capital equipment purchases, R,E&D, intelligence assessments, testing countermeasures, standard setting, and compliance and enforcement of regulations. Air carriers would still be responsible for screening, but their employees, the screeners and their supervisors, would be trained to standards set by the FAA in accordance with White House Commission recommendations 3.2 and 3.10.

Commissioner Victoria Cummock introduced and supported recommendation 3.2 at the final meeting of the White House Commission on February 12, 1997. Later, she went further in her discussion of training under recommendation 3.10 in her dissent, contained in appendix I of the final report:

> "This recommendation contains a number of admirable objectives but it, like its predecessor recommendation in President Bush's Commission on Aviation Security and Terrorism lacks teeth. Following President Bush's Commission of Aviation Security and Terrorism and the follow-on Aviation Security Improvement Act in 1990, the FAA established standards for the selection and training of aviation security personnel. Those standards were, and still are, totally inadequate. There is nothing to prevent the same inadequate actions by the FAA to this recommendation. The Commission should specifically recommend that the FAA mandate 80 hours of intensive classroom/laboratory and 40 hours of on-the-job training before performance certification for all airline security screening personnel."[63]

An identical recommendation for 80 hours of classroom and 40 hours of on-the-job training had been made by Patricia Friend, international president of the Association of Flight Attendants, AFL-CIO, at the White House Commission meeting on September 5, 1996. These discussions, contained in the final report and its dissent, and in testimony, all support the need for improved, more comprehensive training. Again, the certification of screening companies rulemaking offers an opportunity to improve training and thereby improve screener performance. Investment in training and requirements for improved performance will offer an economic incentive for airlines to retain the most productive, efficient, and effective screeners which will, in turn, lead to higher wages and better benefits.

[63] White House Commission, *supra* note 4, Appendix I, dated February 19, 1997, unnumbered p.8.

The FAA takes human factors into account (as required by the provisions of Aviation Security Improvement Act of 1990)[64] by providing appropriate training and developing utilization standards, clear guidance, and operational procedures in partnership with the airlines to ensure the effective use of security equipment by trained and properly motivated air carrier and contractor personnel. FAA is already taking steps to improve initial and recurrent training curricula for checkpoint screeners and their supervisors. Such FAA involvement will increase.

All of us must be concerned with how to help people do the difficult job of screening baggage for explosive devices better by improving the human factors engineering of their work environment. Lessons learned from the operational deployment of explosives detection systems (EDS) substantiate the need for screeners who use the machines to be properly trained and highly motivated. Personnel selection criteria and training standards are important considerations receiving particular attention by all concerned.

The FAA developed and is currently deploying the Screener Proficiency Evaluation and Reporting System (SPEARS), which can help train air carrier screeners and maintain their proficiency. One SPEARS component, a computer-based training (CBT) system for screeners, was successfully tested in 1996 in Chicago. CBT modules for training security screening checkpoint x-ray machine operators are now operational at 36 major airports, including Seattle, Miami, Los Angeles, St. Louis, Baltimore, Detroit, Houston, Dallas, New York, Denver, Orlando, San Juan, Atlanta, and San Francisco, with additional airport installations continuing throughout 1998 in about 77 of the busiest U.S. airports. Specialized modules will soon be available for training operators of explosives detection systems and will be installed on all deployed systems.

Another component of SPEARS is the Threat Image Projection (TIP) system, which displays artificial images of improvised explosive devices and dangerous articles in baggage, as though they were part of an actual item being screened by an x-ray device or EDS. The screeners' decisions are tabulated and recorded to provide feedback for effectiveness monitoring and use as a training tool. After final evaluations and adjustments are completed, several hundred TIP modules will be installed in checkpoint x-ray machines and explosives detection systems at the busiest airports in the United States.

The FAA provides formal training through airport security seminars for law enforcement officers and airport personnel with aviation security responsibilities. Aviation security special agents are also asked by individual airlines to provide 1- or 2-hour blocks of instruction in airline training courses. Similar participation occurs in industry association-sponsored schools and conferences as part of FAA's partnership efforts. Specialized courses of instruction on specific topics have been prepared by the FAA and are presented on request.

The White House Commission called for an additional 114 canine explosives detection teams to be trained and deployed at the Na-

[64] Sections 105 and 107 of Public Law 101–604, November 16, 1990, adding sections 316(d) and (g) to the former Federal Aviation Act of 1958, now U.S.C. 44912(a) and 44935(b), respectively.

tion's busiest airports, and Congress appropriated $8.9 million for that purpose. During 1997, the FAA trained 54 handlers and 60 dogs. The first "FAA exclusive" class of K–9 handlers graduated from the Military Working Dog School at Lackland Air Force Base, Texas, on March 25, 1997. The FAA will continue to cover canine procurement costs and training, evaluation, and certification for explosives detection team dogs and handlers as the program is expanded.

At the time the White House Commission's initial report was published in September 1996, there were 87 teams deployed at 31 locations. In June 1997, there were 116 canine teams at 33 major airports, then 130 teams at 38 airports across the country by early 1998. As program expansion continues, by the end of 1998, there will be about 154 teams at about 40 airports.

In one of many interagency partnerships, the FAA and the Treasury Department's Bureau of Alcohol, Tobacco and Firearms (BATF) signed an agreement in 1997 outlining the principles governing a joint research pilot project, then began the project, using one FAA trained and certified team working in parallel with a BATF trained and certified team.

It is important to note that the teams will be doing more and operating longer. In addition to clearing terminals and airplanes after bomb threats, they will search suspect bags and cargo, and perform visible patrols and training to increase deterrence. The FAA has worked closely with industry to establish a reimbursement process to cover allowable operational expenses, such as handler salaries, kenneling, dog food, vehicles and associated maintenance, and routine veterinary care. The program remains voluntary on the part of airports. Those not in the current program are unlikely to join without adequate cost sharing by the Federal Government. Future growth is therefore a function of available funding.

IX. FUNDING FOR AVIATION SECURITY

One purpose of this study is to "examine potential sources of Federal and non-Federal revenue that may be used to fund security activities," a matter of continuing controversy for the last 30 years. Section 301 of the Federal Aviation Reauthorization Act of 1996 states that one potential source of revenue to be considered is "providing grants from funds received as fees collected under a fee system established under subtitle C of title II of this Act and the amendments made by that subtitle." Both the White House Commission and the Aviation Security Advisory Committee Baseline Working Group discussed funding issues and identified potential sources of revenue.

In introducing the discussion of chapter 3 on aviation security during the final public hearing of the White House Commission on February 12, 1997, Commissioner Brian Jenkins said:

> "Most importantly, we now recommend that the federal government should consider aviation security as a national security issue and provide substantial funding for capital improvements. Specifically, we recommend $100 million annually. We recognize that this is not enough and therefore we also recommend that the National Civil Aviation Review Commission

established by Congress consider a variety of options to pay for further implementation and operation of these vital security measures."[65]

The wording of Recommendation 3.1 of the White House Commission's final report is even more direct:

"The federal government should consider aviation security as a national security issue, and provide substantial funding for capital improvements. The Commission believes that terrorist attacks on civil aviation are directed at the United States, and that there should be an ongoing federal commitment to reducing the threats that they pose."[66]

The FAA Aviation Security Advisory Committee's Baseline Working Group (BWG) in its final report went further:

"A majority of the BWG concluded that the full cost of implementing and maintaining an improved domestic security baseline should be funded by a Congressional appropriation from the General Fund. Such costs include, but are not limited to, the acquisition, installation, training, and implementation of equipment, facilities, personnel, and procedures. A dedicated funding stream should be identified to fund the operating costs associated with continuing to maintain the elevated domestic security baseline prescribed by the BWG recommendations. Operating costs associated with the domestic security baseline include, but are not limited to, costs associated with the continuing operation, maintenance, and staffing of programs identified by the BWG recommendations and as may be required by Federal mandate."[67]

The BWG's majority opinion on funding sources discussed the issue in greater depth than indicated in the recommendations above. The Group also said:

"Federal resources certainly exist to fund any program if the national will is to do so. The money could be made available rapidly as no new collection mechanism would be needed. However, such an outlay may also be subject to shifting agendas and priorities from year to year which could be disruptive to the coherence and continuity of a major plan to increase security. The Federal government could, in principle, fund all aviation security costs out of general revenues. If the threat of terrorism is viewed as a national security issue requiring a concerted national response, then there is no fundamental distinction between expenditures for aviation security and other counter-terrorism programs funded directly through appropriations.

The mechanism of collecting and disbursing funds for aviation security can assume many forms but the source of those funds must inevitably be the public. The basic difference is whether to assess the necessary expenses selectively to the air traveling public or generally to all taxpayers. The current

[65] Transcript of the Final Public Hearing of the White House Commission, Washington, DC, February 12, 1997.
[66] White House Commission, *supra* note 4.
[67] BWG, *supra* note 3, p.90.

mechanisms of collection that could be used are: Congressional Appropriation (General Fund); PFC Capital/Operating Fund; AIP Capital/Operating Fund; Security Surcharge; and Ticket Tax.

Whichever collection mechanism is considered, it must be federally mandated to avoid competitive pressures and require stringent accounting procedures to assure that the funds will be disbursed only for aviation security purposes. Such funds must be subject to federal audit procedures. The total, 10-year cost of the new security baseline is estimated at $9.9 billion. Costs associated with interim security measures are not included in this figure but are detailed in the full BWG report."[68]

In May 1997, the FAA estimated that the total 10-year cost to the Federal Government, airport authorities, and airlines for security programs at Category X airports alone would be close to $3 billion. The total includes capital costs for new equipment as well as added personnel and their training. This averages out to $154 million per Category X airport, or slightly over $15 million annually for the next 10 years.

The Office of Management and Budget (OMB) representative on the BWG strongly disagreed with the views expressed by the majority of the Group on funding from sources other than prospective users (i.e., passengers). The following dissenting view was received from the OMB:

"OMB staff strongly disagree with these recommendations. They are inconsistent with the current practice of FAA programs, contradicting long standing government-wide budget policy, and reflect an unrealistic outlook regarding the availability of discretionary funds. First, aviation system users currently pay for on-going aviation security costs. These are considered to be costs incurred by the private aviation industry for doing business in modern society. There is no fundamental difference between these programs and those being considered by the BWG.

Second, OMB Circular A–25, which establishes Federal policy regarding user charges, states that such charges should be assessed for Federal activities that convey special benefits to recipients beyond those accruing to the general public. The BWG's recommendation that start-up aviation security costs be funded from the General Fund is inconsistent with this policy.

Third, continuing efforts to balance the budget will significantly limit the amount of General Fund monies available to support this, or other, potentially worthy expenditures. Given the demands on those funds and the number of actors involved in allocating them, it is unrealistic to think that a protected pot of money could be set aside for this purpose. Finally, a dedicated funding stream for operating costs, if not paid by the users, provides little incentive for cost discipline in the provi-

[68] Id., pp. 90–91.

sions of these services and will result in waste and increased cost to the public."[69]

On March 27, 1997, the Acting FAA Administrator responded to the BWG recommendations approved and forwarded by the ASAC in a memo stating: "I have received the recommendations developed by the ASAC for the Domestic Security Baseline. I am pleased that the ASAC continues to provide FAA with balanced and insightful recommendations. However, I do not concur with the following three specific recommendations . . . Full Federal funding of the baseline recommendations (page 11) was objected to by OMB in a dissenting opinion. The White House Commission has referred further funding issues to the National Civil Aviation Review Commission."

In addition to creating the National Civil Aviation Review Commission (NCARC) and requiring this study, section 274 of the Federal Aviation Reauthorization Act of 1996 directed the FAA to "contract with an entity independent of the Administration and the Department of Transportation to conduct a complete independent assessment of the financial requirements of the Administration through the year 2002."[70] Coopers & Lybrand L.L.P., a professional services firm, was selected to conduct the independent study.

Safety and security programs have the highest priority in FAA budgets. The 1998 budget requested significant increases for safety, including funding for an increase of 500 air traffic controllers, 326 flight standards and certification personnel, and 173 security staff. The 1998 budget also included a request for an advance appropriation of $100 million in 1999 as a follow-on to the $144.2 million appropriated in 1997 to fund White House Commission recommended security equipment deployments.

Coopers & Lybrand also concluded, on the basis of interviews conducted with FAA staff, user groups, and White House Commission members, that the impact on the FAA's budget of Commission and BWG recommendations "could be substantial" though the White House Commission's final report had not been completed.[71] The OMB's FY 1998 passback on the FAA Facilities and Equipment budget, which is also noted in the Coopers & Lybrand report, stated: "The Gore Commission staff are interested in additional 1998 security equipment purchases. Any such purchases are to be user fee financed or financed by airports or airlines in response to FAA regulation." This is, of course, not what the Commission finally recommended.

NCARC and its aviation funding task force were tasked to "submit a report setting forth a comprehensive analysis of the Administration's budgetary requirements through fiscal year 2002, based upon the independent assessment . . . that analyzes alternative financing and funding means for meeting the needs of the aviation system through the year 2002."[72] Congressional deliberations in response to the NCARC and Administration proposals concerning the structure and content of any system for funding FAA through

[69] Id., Appendix A, p.1.

[72] Section 274 of the Federal Aviation Reauthorization Act of 1996.

user fees, now possibly including capital expenditures for security equipment that would be used by air carriers, have not yet been completed. The setting of user fees is one of the options that was examined. A goal of user fee financing would be to balance collections and expenditures so that all needed improvements in safety and security systems could be financed and implemented promptly.

The NCARC's December 1997 report recommended that the air traffic services portion of the FAA be financed by user fees but that security and safety oversight be funded by general fund appropriations. The Administration's subsequent budget and reauthorization proposals for the FAA, while consistent with the NCARC recommendations in many ways, differed in that they proposed no general fund appropriations after 1999.

Others have suggested sources and methods of funding. Notably, Senator Lautenberg introduced the Aviation Security Act of 1996 (S.2037) on August 2, 1996, many aspects of which were incorporated into the Reauthorization Act. Speaking about this bill during the hearing held on August 1, the Senator said:

> "ASA [S.2037] proposes that a security assessment fee, or small surcharge of no more than $4, be added to each round trip ticket to pay for needed improvements . . . An alternative financing mechanism would be to authorize the Department of Defense to transfer such funds as may be necessary to implement provisions of the act. In drawing on defense funds, we would recognize that terrorism is a national security threat." [73]

X. Legislative Proposals

There is no need at this time for the FAA to initiate legislation to transfer responsibilities for aviation security among the major parties. Both Presidential commissions, however, saw a need to clarify authority and responsibility in certain areas. Some clarification may be accomplished through the proposed revision of title 14, Code of Federal Regulations, Part 107, Airport Security, and Part 108, Airplane Operator Security. [74] These are the two basic regulations governing civil aviation security provisions required to be implemented by U.S. airports and air carriers. Individuals are also affected by portions of both regulations.

The rulemakings propose a number of changes, which are intended to update the regulations to reflect the current approach to security better. For example, some proposed changes seek to clarify air carrier and airport security personnel training requirements, more clearly define the most critical security areas in an airport, and clarify the role of the airport security coordinator.

---

[73] "Aviation Security": Hearings before the Senate Committee on Commerce, Science, and Transportation, 104th Cong. 14 (1996) (statement of Senator Lautenberg).

[74] Notices of Proposed Rulemaking on the revision of Federal Aviation Regulations parts 107 and 108 were published in the *Federal Register* on August 1, 1997, 62 Fed. Reg. 41730, 41760 (1997). Because both rulemakings had been in development for several years, predating 1996–97 legislative initiatives, preambular language notes that the proposals do not reflect changes based upon the most recent legislation, or the recommendations of the White House Commission. Changes resulting from these recent initiatives will be made after the final rules have been published.

XI. STUDY CONCLUSIONS

A. RESPONSIBILITIES

There appears to be a consensus in the civil aviation community to retain the current system of shared responsibilities for security. In contrast, there appears to be no consensus "to transfer certain responsibilities of air carriers under Federal law for security activities conducted onsite at commercial service airports to airport operators or to the Federal Government." [75] Some argue that airport operators should assume screening responsibilities [76], but most seem content with recommending that airport authorities become more involved in some manner, citing specific examples or areas in which more assistance may be usefully offered. There is little support for the Federal Government's assuming all air carrier responsibilities. There is significant support for more Federal Government involvement and funding.

Incremental increases in Federal Government involvement in aviation security are inevitable given the recognition that the primary justification for security measures is antiterrorist in nature, with aviation security now seen more clearly as a component of national security. Increased involvement means increased investment of personnel and other resources. Most representatives of the airport and airline industry believe that the General Fund should be the financial source for future aviation security Federal expenditures rather than the Airport and Airway Trust Fund. The Administration disagrees with this position and has proposed instead that funding for FAA activities, including security activities, be derived from charges paid by users of the National Airspace System.

The Federal Government intends to continue capital purchases of aviation security equipment to be used by the airlines. Given that commitment and the strong support for better training that was so apparent during the study, it seems logical for the next incremental Federal involvement to be in developing more comprehensive training standards for the people who use the equipment that has been purchased, rather than in making equipment operations and maintenance subsidy payments to the airlines. Better training is a better investment. Air carriers should not have to bear all the costs of security, but they should bear a substantial portion of the personnel costs to provide security screening and the operational costs of using the advanced security equipment that the Federal Government provides.

Air carriers should be inclined to protect their investments in hiring and training their personnel by providing better compensation and benefits to keep them on the job and lower turnover rates. This applies particularly to screeners. In the absence of consensus to change the existing system, the airlines retain the responsibility for screening, and retain control of passenger movement and the quality of customer service. The U.S. Government continues to control the quality of aviation security and security screening by set-

[75] Section 301 of the Federal Aviation Reauthorization Act of 1996.

[76] For example, on June 20, 1996, the Deputy Commissioner, Department of Aviation, City of Chicago, proposed assuming pre-board passenger screening responsibilities after receiving a report of a study by the Conley Group Inc., on such screening at O'Hare International Airport. The FAA responded that the proposal was "not feasible under applicable law" at that time.

ting higher, but realistically achievable, standards for screener selection, training, and performance.

B. FUNDING

There are several options for funding aviation security activities such as those recommended by the BWG and the White House Commission. One possibility is for the Federal Government simply to pay for all expenses out of the general revenue fund. The principal rationale would be that aviation security is a national security issue and that therefore the National Government should be responsible for the costs. This position has been advocated by many in the aviation industry but is likely to be politically impossible, given fiscal constraints.

A second option would be to use AIP or PFC funds. This would have the advantage of requiring the users of aviation security to pay for it, resulting in higher ticket prices. Increased prices would impact negatively on the financial health of air carriers and airport operators, and those who do not fly but receive economic and other benefits from a safe, secure, and efficient air transportation system would not be paying their fair share. Further, AIP funding levels have been significantly lower in recent years than they were previously, and there are many other demands placed upon it to fund safety improvements.

A third avenue would be to apply a security user fee or surcharge to the cost of a ticket, similar to a passenger facility charge but dedicated to funding security. Care would have to be taken to ensure that the collected funds were used only for security purposes. This option would also have the advantage of collecting costs from those who use a service, but it could also reduce passenger volume.

The same arguments also apply to the last option, a dedicated security ticket tax, whose proceeds would be reserved for security costs. Note that a $2-per-enplanement surcharge would have brought in about $1.2 billion in revenues in 1997, which would be sufficient for the additional expenses envisioned in the BWG recommendations.

The NCARC studied recommendations for funding FAA requirements, including security needs. The Administration disagrees with the conclusions of the NCARC report in this regard, specifically "that the security functions of the FAA be paid for through a general fund contribution[77]." The Administration has proposed instead that funding for all FAA activities, including security activities, be derived from charges paid by users of the National Airspace System. The NCARC report included no broad discussion of funding for the entire aviation security system, including private sector air carriers and public sector airport operators.

There is no apparent consensus for changing the overall system of funding for aviation security, particularly funding for that portion provided by private sector air carriers and public sector airport operators. There is also no definitive answer to the longstanding question of "who should pay" for security; the current system as described in the foregoing pages remains in place. Therefore, the FAA

[77] NCARC, "Avoiding Aviation Gridlock & Reducing the Accident Rate: A Consensus for Change," Washington, DC, December 1997, p. II–31.

will not at this time make additional recommendations regarding funding sources to Congress.

XII. APPENDIX: FAA STUDY ON SECURITY RESPONSIBILITIES: 1991

An internal, unpublished FAA study conducted in 1991 evaluated three alternatives for a shift in security responsibilities with respect to passengers, baggage, and cargo from the air carriers to airport operators to determine whether or not any alternative was likely to improve security system performance. The basic framework and content of the study, including the conclusions reached at that time, are presented below without substantive modification. The alternatives examined in 1991 were in addition to the system then in place and are presented here as they were then written. The essential elements of these options remain valid today.

Alternative 1. Airports assume the responsibility for the sterile areas [78] and screen all persons and their personal property (sterile area screening); air carriers retain their other security responsibilities.

Alternative 2. Airports conduct sterile area screening, screen checked baggage; air carriers retain their other security responsibilities.

Alternative 3. Airports conduct sterile area screening, screen checked baggage, and screen cargo and mail; air carriers retain their other security responsibilities.

The following criteria were used to evaluate the alternatives:

- Effectiveness in improving security;
- General acceptance of an alternative by airport operators, air carriers, and system users as well as the level of political support;
- Economic efficiency;
- Need for statutory and/or regulatory changes;
- Impact on overall quality of air transportation service; and
- Ease of enforcement and oversight.

The following factors are important for understanding the implications of the alternatives as discussed in 1991:

Threat management. Coordinating overlapping responsibilities for the implementation of certain security measures, in particular the response to anonymous telephoned "bomb threats" to aircraft, was complicated by conflicting views and actions of air carriers, airports, and local law enforcement officials. These conflicts should be lessened by a restatement of responsibilities in the rewrite of FAR parts 107 and 108, both published in the *Federal Register* as a notice of proposed rulemaking on August 1, 1997. [79] The 1991 report did not analyze transferring or adding threat management responsibilities to the airport operator that were not explicitly defined in the then-current regulations.

---

[78] The sterile area is an area to which access is controlled by the inspection of persons and property in accordance with an approved security program or a security program used in accordance with FAR § 129.25 (49 CFR § 129.25). Normally, this is the area one enters after passing through the security screening checkpoint and its metal detectors, x-ray devices, and hopefully, advanced security equipment such as trace explosives detection devices.

[79] Note 72, *supra*.

Passenger/baggage positive identification and reconciliation. In 1991, positive passenger/baggage match was required for all international flights, but not for domestic flights. A positive passenger/baggage match would be greatly affected by a transfer of this responsibility to airport operators. The air carriers would still need to provide the information to perform the match and hold or pull bags from aircraft. With the added delay of processing by the airport operators, on-time departures would be more difficult, and hubs could be disrupted by the delays.

Air carrier security responsibilities. No conceivable alternative can vest total security responsibility with the airport because air carriers will still be responsible for securing aircraft, challenging persons without appropriate identification who approach an aircraft, providing security training for crewmembers, and dealing with in-flight security issues. Shifting these functions was not considered an alternative. Because some FAA requirements go beyond those administered by the International Civil Aviation Organization (ICAO), and are typically not performed by foreign airport/government authorities, shifting certain security functions within the United States would not relieve air carriers of their duty to perform those same functions overseas.

Airport profiling of passengers. In 1991, air carrier ticket agents profiled passengers when they checked in and checked their baggage. Based on specific profiling criteria, actions were taken with respect to selected passengers including a more careful screening of their checked baggage. Use of the ticket agent as the focal point was the most efficient and effective way to profile passengers. Having airport operators profile passengers would still require information that can only be obtained from air carriers. This information would then have to be communicated to airport personnel. Establishing airport proficiency in this area would likely add personnel costs without improving effectiveness.

Carriers continue to screen passengers and carry-on baggage. Establishment of a separate program by airport operators to perform this function was considered problematic because of a need to collocate screening gates, resulting in added expenses and additional oversight requirements. Such a program would have all the disadvantages of Alternative 1 without most of its advantages. Thus, this proposition as an alternative was rejected from further analysis.

The baseline case to which all the alternatives were compared is the system as it existed in 1991. The pros and cons of this option follow, and are followed in turn by the pros and cons of the three alternatives.

Keeping the 1991 Security System

pro:

- The 1991 system was proven to be effective in maintaining a secure air transportation system (as the study authors believed at the time).
- The system of allocating responsibilities was well understood, was accepted by all major participants, and had supporters.

- The system was a natural and logical division of responsibilities based on the evolution of airport and air carrier duties and obligations, which included airports acting as property owners and air carriers acting as transporters of persons and property.
- The system had developed as an integration of responsibilities that have been logically assigned.
- Maintaining the 1991 system would not have required statutory changes or a major restructuring of regulations and security programs. Updating Parts 107 and 108 will make the system more efficient.
- Maintaining the status quo would have the advantage of avoiding a series of potentially confusing reorganizations with the possibility of temporary security lapses.
- Most of the aviation threats in 6 of the last 7 years (through the late 1980's) were received by air carriers and directed at aircraft. Thus, it would be inefficient to shift the responsibility of evaluating the response to those threats away from the air carriers and to the airports.
- There would be no disruptive financial changes to the air carriers or the airport authorities and no adverse changes in the overall quality of transportation service.

con:

- In the 1991 system, there was no single focal point for all sterile area screening at each airport. Making the airport operator accountable for all such screening functions would integrate this responsibility and might improve managerial oversight and accountability.
- It is more difficult to organize and then implement coordinated contingency plans to meet threat conditions when major security responsibilities are fragmented among several entities.
- Originally, passenger and carry-on baggage screening were performed only at the air carrier gate. Over time, these tasks have evolved so that in many airports the sterile area encompasses much or all of the entire terminal. If much or all of the terminal is to remain a sterile area, it might be better for the airport operator to manage sterile area screening.
- Requirements for specialized equipment (explosives detection systems and other devices) might impose future expenses on air carriers.

1991 Evaluation of Options

Alternative 1. Airports assume the responsibility for the sterile areas and screen all persons and their personal property (sterile area screening); air carriers retain their other security responsibilities.

pro:

- Security efficiency may improve at some airports with multiple sterile area screening checkpoints. There may be a consolidation of security screening personnel and their training.

- Flight schedules suggested in 1991 that airport operators sometimes may have been able to move security personnel under their control from one section of the airport to another section and screen passengers for less cost than the air carriers. At some airports, air carriers were structuring screening to obtain these efficiencies.
- At many airports in 1991, there were many air carriers responsible for maintaining one screening checkpoint. In such cases, the air carriers rotated, on a periodic basis, the responsibility for screening. This led to a lack of air carrier involvement in managing these checkpoints. Having the airport operators in charge of these checkpoints could potentially improve the effectiveness of oversight.
- Some airports believed they could improve the effectiveness of the passenger and carry-on baggage screening process by hiring, training, and adequately compensating professional screeners. Nearly all air carriers contracted out this function, while a few used their own staff.
- The public often incorrectly assumed that airport operators were responsible for screening efforts, which were sometimes perceived as less effective than they should have been. Airports could therefore improve their public image in some cases by assuming screening responsibilities and then improving screening effectiveness and procedures.

con:

- Based on conversations with airport personnel in 1991, their previous experiences had shown that increasing salaries alone would not increase screener effectiveness. Further, any air carrier had then and has today a direct interest in protecting its expensive aircraft and company image as a safe carrier.
- Sterile area screening costs were judged likely to increase: airports may want remuneration for screening over their fixed and variable costs. While screening is purely an overhead cost to the air carriers, who struggle to keep airfares low and competitive, it may be viewed as a profit-making "service" not subject to the cost discipline of economic competition, if conducted by the airports. At the very least, each airport may be expected to differ on the cost of screening.
- Air carriers would still have a vested interest in the efficiency of the screening conducted by the airports. Given their large investments in aircraft and public relations, air carriers were seen as likely to insist on maintaining a screening oversight function to ensure safety and minimize inconvenience to passengers; this would duplicate the oversight program established by the airports.
- Increases in screening costs might result in higher ticket prices. This would be viewed negatively by the air carriers and passengers unless there were a corresponding and noticeable improvement in screening effectiveness.
- Airports are government entities that may have less financial flexibility to pay fines for noncompliance; the assessing of violations and fines by the FAA would also have political ramifications.

- This alternative would require statutory changes to 49 U.S.C. 44901, formerly section 315(a) of the Federal Aviation Act of 1958, unless an airport operator were designated as an agent for the air carriers. At present, air carriers have the legal responsibility for ensuring the security of passengers and carry-on baggage and, when necessary, to perform various levels of searches.
- This alternative would require major restructuring of Federal Aviation Regulations parts 107 and 108 as well as the Air Carrier Standard Security Program (ACSSP) and the Airport Security Program (ASP).
- Airport operators generally do not wish to take on the security responsibilities of the air carriers and the associated liability.
- FAA security staff have indicated that it would be easier to monitor the actual security operational responsibilities of a relatively small number of air carriers, each with a standardized security program, than to review many airports, each with a unique security management system.
- Air carriers will likely resist any shift of control over the sterile area screening process because of residual security responsibility and liability.

Alternative 2. Airports conduct sterile area screening, screen checked baggage; air carriers retain their other security responsibilities.

pro:

- If an airport responsibility, security-related equipment could be purchased with Airport Improvement Program (AIP)/Passenger Facility Charge (PFC) funds. Air carriers, however, are not eligible for these funds.
- There may be some potential cost savings due to economies of scale at some large airports, where the physical layout would support a centralized checked baggage screening system. For example, if the FAA were to require the use of explosives detection systems (EDS), fewer machines would be needed to serve air carriers, especially those with few flights. (Note: this could be arranged among air carriers as well.)
- There could be some improvement in efficiency (reduction in cost) at an airport if the airport took over responsibility for both sterile area screening and checked baggage screening, because some air carrier security management responsibilities could be consolidated with the airport security responsibilities.
- Consolidation could streamline the channels of communication between airport personnel conducting checked baggage screening and airport police, thus resulting in a potentially shorter response time to security threats.

con:

- Airports would assume increased liability for losses resulting from security-related events. Joint responsibility could lead to confusion. The net result is that airport operator liability

would expand as airports take on more security responsibilities while air carrier liability may not decrease.
- Under this alternative, airports would share partial liability for lost, stolen, or mishandled baggage since both the airport and air carriers would handle baggage.
- Airports may decide to consolidate checked baggage handling at one or more centralized areas to reduce airport costs. This could cause several problems. One is that it would be more likely for checked baggage to be lost or sent to the wrong air carrier. Another is that such a centralized system would slow down the checked baggage sorting and screening process. Baggage may be conveyed to this centralized area by baggage carts, which would increase the opportunity for security problems. Any improvements in efficiency and effectiveness would be site specific and would not occur on a larger nationwide scale.
- Airports would want remuneration for handling checked baggage, thus raising overall carrier operating costs.
- Passengers are profiled when they check in at the ticket counter and check their baggage. The most efficient party to profile passengers would be the air carrier ticket agent, rather than an airport employee.
- This alternative would encounter strong resistance from air carriers and most airports.

Alternative 3. Airports conduct sterile area screening, screen checked baggage, and screen cargo and mail; air carriers retain their other security responsibilities.

pro:

- Airports could use AIP/PFC funds to purchase specialized equipment, such as x-ray machines, to assist in screening cargo and mail.

con:

- Involving the airport in screening cargo is redundant and extremely inefficient. In 1991, freight forwarders and indirect air carriers took cargo directly to the air carrier that handled the cargo. Either the airport would have to have representatives at multiple cargo facilities at each airport or all air cargo would have to be funneled through a centrally established cargo entry point. For the airports to handle and screen the cargo and then provide it to the air carriers would introduce an inefficient additional layer of bureaucracy.
- A major cargo security measure is the documentation that cargo shippers provide. Air carriers have information about known shippers; new or unknown shippers get scrutinized more carefully. If airports took over screening cargo, each airport would have to establish and maintain a record of each of the air shippers; currently, an air carrier can share this information with its security personnel at each airport it services.
- The United States Postal Service and the air carriers have an established relationship. If air mail security procedures were to

change, adding airports to this process would likely make the situation more complex.

CONCLUSIONS AS PRESENTED IN THE 1991 STUDY

The 1991 system was well understood and accepted by most major participants. Although the system had both pros and cons, it was fundamentally an effective and efficient security system. While there were advantages to each of the three alternatives, there also were some major disadvantages to shifting any of the major security functions from the air carriers to airport operators. On balance, there did not appear to be a net benefit in adopting any of the alternatives over the 1991 system. Consequently, it was recommended that that system be continued. However, in recognition of the need for further analysis to study ways that security might be improved, the FAA should consider running a trial at a selected domestic airport to test the viability of transferring certain security functions, particularly screening at checkpoints, from air carriers to the airport authority.

(3) Report to Congress—Aviation Security: Aircraft Hardening Program

Report of the Federal Aviation Administration to the House and Senate Committee on Appropriations pursuant to Senate Report 102–351 on the Department of Transportation FY 1993 Appropriations Act

* * * * * * *

I. Executive Summary

This report is submitted in response to language in Senate Report 102–351 accompanying the Department of Transportation Appropriations Act for Fiscal Year 1993. The Federal Aviation Administration (FAA) was asked to study different types of technology designed to protect aircraft against certain explosives and to report to the Appropriations Committees on its findings. The FAA was also asked to consider investment and operating costs, acceptable safety margins, passenger convenience, and any other relevant factors. Interim reports were submitted to the Appropriations Committees in September 1994 and March 1996.

This report provides a current assessment and review of the research work completed to date regarding one such technology, hardened containers.

II. Program Background

The aircraft hardening program was initiated in 1991 in response to recommendations of the President's Commission on Aviation Security and Terrorism and in compliance with direction set forth in the Aviation Security Improvement Act of 1990. The goal of the program is to protect commercial aircraft from catastrophic structural damage or critical system failure due to in-flight explosions.

Aircraft hardening analysis generally consists of two distinct elements: susceptibility and vulnerability. Susceptibility is the probability that explosives of a particular nature and amount can be successfully placed on board an aircraft. Vulnerability is the conditional probability that an aircraft will be destroyed or suffer some specific level of damage if an explosion takes place on board. This latter probability is a function of the characteristics of the explosive charge (e.g., weight, type, and placement) and the design capacity of the aircraft to withstand the explosive forces and resulting consequences. The aircraft hardening program addresses the vulnerability aspects of aircraft security by determining the vulnerability of aircraft and their occupants to onboard explosions and the methods of reducing this vulnerability through modifications to aircraft structures and/or components, such as luggage containers.

To accomplish the program objectives, tasks were designed to determine and identify: (1) the minimum amount of explosives that

will result in aircraft loss; and (2) the methods and techniques that can be applied to the current and future fleets of commercial aircraft to decrease their vulnerability to explosive effects. The program is divided into two separate projects to address the objectives and requirements: explosive vulnerability and mitigation techniques.

The program draws on experts in the fields of engineering and explosives research from Government agencies within the Departments of Defense and Energy; from private industry such as aircraft manufacturers, luggage container manufacturers, and advanced materials experts; and from other governments/international organizations, such as the United Kingdom's Civil Aviation Authority, the French Direction Generale De L' Aviation Civile in France, and the Government of Israel.

The focus of potential mitigation techniques has been the development of blast-resistant airline luggage containers. The hardening of aircraft luggage containers offers an attractive option as a blast-mitigating technique because a performance-based specification already exists for aircraft luggage containers. A draft appendix to the specification that specifies the FAA's requirements for blast-mitigating containers has been developed. The development of the hardened container specification also allows for the transition of hardened container technology to private industry. However, even with the development of a viable hardened luggage container, research into other mitigation techniques still will be required, because only wide-body aircraft currently use containers. In addition, the possibility exists that other hardening and explosives detection techniques can be developed that could make container hardening unnecessary. Finally, it is critical to determine the effects of blast and possible solutions across the spectrum of aircraft designs as a means of maintaining a technological advantage over future advances in criminal/terrorist explosives technology. The hardened container, however, provides the best opportunity for a near-term solution.

III. Container Hardening

The objectives of this project are to assess the structural and functional readiness of selected hardened luggage container designs and to investigate the operational effectiveness and cost effectiveness of such designs. Ideally, the hardened container would need to have a life-cycle cost that approaches the life-cycle costs of containers currently used by airlines. For example, increases in acquisition and maintenance costs should be balanced by the extended container lifetime of the hardened container.

Hardened containers could be introduced into the airline industry through rulemaking or other regulatory means. Since current luggage containers are replaced on an average of every 2 to 5 years, the introduction of hardened containers into the market might be accomplished through attrition over some agreed-upon period of time.

A. BLAST RESISTANCE OF EXISTING BAGGAGE CONTAINERS

In order to determine the blast resistance of containers currently in use, tests were conducted on containers of the LD–3 classification, beginning with low charge weights and then increasing charge weights until failure took place. Pressure and strain measurements were taken for each test, along with high-speed film for post-test analysis of the explosive event. The test results indicated that the blast loading on the LD–3 structure was dependent on the density of the luggage that contained the explosive, the location of the explosive in the container, and the arrangement of the luggage surrounding the test article. Final analysis revealed that the current generation of LD–3 containers had very little inherent blast resistance capability.

B. POTENTIAL CONTAINER-HARDENING TECHNIQUES

Eight different techniques to harden luggage containers were studied initially. These techniques consisted of both blast containment and blast management concepts. A blast containment design completely suppresses the effects of an explosion within a container. The blast containment concept offers the best alternative for suppressing the potentially catastrophic effects of post-blast fires. In addition, the blast containment container is considered an independent element within the cargo bay environment and requires no special handling procedures for placement and positioning on aircraft on the part of an airline. Conversely, a blast management design considers the container as part of a system within the aircraft cargo bay. In general, the blast management container is designed to allow a controlled failure of the container during the blast, while venting the detonation products (overpressure, fragmentation) into an adjacent container. The disadvantage of the blast management technique is that it requires special handling on the part of an airline. In addition, the blast management concept does not fully address the potentially catastrophic effects of a post-blast fire within a container and container/aircraft structural interaction. Based on the hardening techniques investigated in this study, the results indicated that an explosion could be mitigated best within a blast containment container constructed of high-strength composite materials.

C. HARDENED CONTAINER DEVELOPMENT PROGRAM

Proof of Concept: Under an FAA research project conducted from 1991–1994, several prototype blast-hardened containers were manufactured using a lightweight, high-strength composite material. This material also was chosen for its fragment-penetration resistance and fire-retardant characteristics. The prototypes were of the LD–3 classification, which is the most common type of container used by wide-bodied passenger airlines.

Initial, full-scale tests were performed in January 1992 on two prototype containers to demonstrate the feasibility of the hardened container. In each test, the prototype containers were packed with representative luggage and a plastic explosive charge was placed in a piece of baggage in a controlled location. The containers were instrumented with pressure and strain gages and the blast events

were recorded with both normal and high-speed movie cameras. Although the preliminary results were good in terms of the blast containment properties of the hardened containers, the container door on the first test article failed before the maximum resistive capacity of the new design could be determined. Consequently, the door of the container was redesigned. A second test series was performed in April 1992. In the first two tests of the container with the new composite door, the blast was successfully contained. In the third test at a considerably higher charge level, partial venting occurred as the capacity of the container-door connection was exceeded. All charge weights used were considerably higher than those withstood by current containers.

Using the data obtained from the earlier tests, another prototype container was designed incorporating design refinements from the previous tests. The container weighed 392 pounds, which is within the bounds of current container tare weights. Tested in November 1992 in the same manner as were the previous two designs, the container withstood an explosive charge size that closely approximates the current explosives detection system standard.

Two additional LD–3 prototypes were designed to exhibit an improved strength-to-weight ratio based on insight gained in the testing performed to date. The containers were constructed at a decreased tare weight over previous designs, making them more attractive to the airline industry while they maintained their blast-resistant properties. From 1993–1994, each of the prototypes was tested. The final prototype was successfully tested at an explosive charge size that was equivalent to the existing detection standard with a tare weight of 284 pounds.

Development of Hardened Container Technical Specifications: The Society of Automotive Engineers, developer of the current baggage container specifications, has assisted the FAA in the development of a performance-based appendix to its specification for cargo unit load devices (ULD) that applies to LD–3 class blast-resistant airline baggage containers. This draft specification is dated January 1996. In addition to delineating the required design criteria for a blast-resistant container, the specification also covers the airworthiness and operational requirements with which hardened container designers would need to comply to have their containers certified for use. The explosive size that is required to be contained by the specification exceeds the charge size specified in the Criteria for Certification of Explosives Detection Systems (published in September 1993) to provide a margin of safety.

Development of Hardened Containers Meeting Specifications: The FAA solicited potential developers for hardened container design proposals to meet the FAA-established requirements for blast resistance. The designs were also evaluated for their ability to meet existing FAA airworthiness requirements and conform to airline operational requirements. The solicitation was conducted in two phases. During the first phase (1995–1996), four potential container designs were chosen from a field of 12 respondents. Of the four vendors selected, none of the container concepts tested was able to meet the FAA's requirements for blast resistance.

As a result of the respondents' failure to meet the requirements of the first solicitation, a phase II solicitation was conducted in

1997. As with phase I, vendor's designs submitted under phase II were evaluated based on the blast resistance capability of their designs in addition to airworthiness and airline operational requirements. Two vendors were selected from a field of eight respondents. The two designs selected were tested for compliance to FAA blast-resistance requirements and conformance to FAA airworthiness certification requirements. In March 1998, blast validation testing was conducted on both designs. Of the two designs tested, one container fully met the FAA's blast requirements. The tare weight for the successful container was 340 pounds. The successful container design was submitted to the FAA certification office for airworthiness approval. In July 1998, the design was granted an FAA design letter of approval. Based on available funding, current plans call for the construction of 11 units of the certified container design. The 11 units are scheduled to be delivered by January 1999. Concurrent with this effort, in January 1999, the FAA plans to blast test two more hardened container designs for potential in-service evaluation. Pending airline participation for the operational evaluation phase, it is estimated that enough operational data can be collected to assess the operational viability of blast-mitigating airline baggage containers as outlined in the following section.

In addition, a study of container composite materials manufacturing and repair considerations is underway to obtain an assessment of factors, such as practical and acceptable weight, manufacturing processes, operability, repair and maintenance capability, and associated costs. Work began in the last quarter of fiscal year 1998 and will continue through fiscal year 2000. Those designs that are deemed the most viable will be candidates for study under this activity.

D. AIR CARRIER OPERATIONAL DEMONSTRATION

The purpose of this task is to determine the economic and operational impacts of hardened luggage containers. It will address the explosive resistance and viability of each container, the container tare weight, the manufacturing cost and repair capability of the container, and issues relating to operability. These issues must be addressed before recommendations for rulemaking can be made to ensure that the specifications for hardened containers can be met at a reasonable cost.

As previously mentioned, 11 units of the hardened container meeting the FAA's requirements for blast resistance are scheduled to be delivered by January 1999. These units have been offered by the FAA to Air Transport Association (ATA) member U.S. air carriers for operation on regularly scheduled flights for the purpose of collecting operational, cost, and repair data on hardened containers. With the exception of Northwest Airlines, the ATA member air carriers will not accept these units based on anticipated operational problems because of the container door location and operation. The container currently is being redesigned to address air carrier operational concerns. However, it is anticipated that several design iterations will be necessary, because blast validation is required for each significant design change. ATA member carriers have agreed to have handling personnel evaluate units for oper-

ation of the door mechanisms in winter conditions. This will occur in February 1999.

Tower Air (which operates out of John F. Kennedy International Airport), Northwest Airlines, and the Government of Israel have agreed to employ operationally the units. Tower Air will receive four units, and Northwest Airlines and the Government of Israel will each receive one unit in February 1999. During this deployment, data regarding the functionality, durability of both the panel material and the closure mechanisms, and repair and maintenance will be evaluated. Additionally, units will be destructively tested at established intervals to ensure that degradation of the containers' blast resistance capability has not occurred. The remaining five units will be held in reserve to replace those that are destructively tested.

The cost of the 11 units that currently are being constructed is $38,000 each. If the units are purchased in quantities of more than 1,000 units, the price per unit is estimated to be between $16,000 and $24,000. The price of each aluminum unit used by the airline industry ranges from $1,000 to $2,000, depending on the design and manufacturer.

IV. SUMMARY

The feasibility of blast-resistant baggage containers has been demonstrated under the prototype effort and subsequent FAA solicitation resulting in the successful testing and certification of a unit developed by private industry. This unit is capable of mitigating an explosive threat in excess of the current explosives detection system certification criteria. The development of hardened container design criteria has been completed, resulting in a draft specification for LD–3-type hardened baggage containers. This draft specification provides a vehicle by which the FAA could mandate the use of hardened containers if they are proven to be operationally viable and ensure that these containers will meet or exceed required blast resistance and airworthiness requirements.

Prototype containers will continue to be developed and tested in order to refine existing design requirements and address airline operational issues. Analysis of the operational considerations is being initiated. This includes assessing those factors with which the airlines are most concerned; i.e., container cost, tare weight, repair, operability, and maintainability. This analysis will ensure that specifications for a hardened container can meet a reasonable life-cycle cost. Further work with industry will help ensure that the existing specification is appropriate.

(4) Annual Report to Congress on Civil Aviation Security, January 1, 1997–December 31, 1997

Report of the Federal Aviation Administration to the United States Congress pursuant to section 44938, Title 49, U.S.C.

* * * * * * *

EXECUTIVE SUMMARY

This report presents a summary of events, programs, and accomplishments in civil aviation security in 1997. The year continued the significant changes in direction and emphasis in civil aviation security in the United States that began in 1996 in the aftermath of the ValuJet Flight 592 and TWA Flight 800 tragedies. The White House Commission on Aviation Safety and Security recommended several measures to improve aviation safety and security and ensure that the U.S. aviation system remains the safest and most secure aviation system in the world. The Federal Aviation Administration (FAA) made significant progress this year in implementing many of the White House Commission's recommendations and related legislation.

SIGNIFICANT EVENTS AND ACTIVITIES OF 1997

January

The FAA Security Equipment Integrated Product Team (SEIPT) began installations of explosives detection systems for screening checked baggage in Chicago and New York.

February

February 12, the White House Commission issued its final report, which included 31 recommendations related specifically to aviation security. The FAA has primary responsibility for 21 of these recommendations.

The FAA joined with the Department of Transportation Office of Inspector General to conduct special emphasis testing of air carrier and indirect air carrier unknown shipper packages.

The FAA completed technology training for airport consortia members.

March

March 19, the FAA published a notice of proposed rulemaking (NPRM) to extend background investigations to include screeners.

March 25, the first FAA-exclusive class of K–9 handlers graduated from the Military Working Dog School at Lackland Air Force Base, Texas.

The FAA published an advance notice of proposed rulemaking (ANPRM) on certifying screening companies and improving screener training, which subsequently was delayed until more data become available.

The FAA published the final rule "Sensitive Security Information," to require airports, air carriers, foreign air carriers, and indirect air carriers to restrict the distribution, disclosure, and availability of sensitive security information to persons with a need to know.

April

The FAA and Northwest Airlines completed final programming changes to, and Northwest conducted tests of, the computer-assisted passenger screening (CAPS) system.

May

May 12, the Department of Defense convened and the FAA participated in the Civil Aviation Anti-Missile Defense Task Force in response to a recommendation of the White House Commission on Aviation Safety and Security.

May 14, the FAA issued for comment proposed amendments to the standard security programs for U.S. air carriers, couriers, freight forwarders, and cargo consolidators as well as the model security program for foreign air carriers to enhance aviation cargo security.

May 19, the FAA and the National Academy of Sciences Panel on Assessment of Technologies for Aviation Security signed an agreement to study advanced security equipment deployments and hardened cargo container tests and planned deployments.

May 26, the FAA submitted a report to Congress on its use of additional funding provided for the Dangerous Goods and Cargo Security Program.

June

June 3, the FAA completed a pilot program to examine the feasibility of matching bags with passengers to ensure that the bags of individuals who do not board aircraft are removed from the aircraft in response to the White House Commission's recommendation that passenger-bag matching be implemented for domestic flights.

August

August 1, the FAA publisheed[1] NPRM's to revise parts 107 and 108 of title 14, Code of Federal Regulations.

August 5, the FAA issued a proposal to incorporate security procedures for passengers into the Air Carrier Standard Security Program. This implemented a White House Commission recommendation to ensure that all passengers are positively identified and subjected to security procedures before they board aircraft.

August 19, the FAA Administrator presented the third annual Screener of the Year award to Ms. Betty Jean Davis from Chicago O'Hare International Airport.

October

October 1, the Department of Justice's Civil Rights Division issued its report on its review of automated and manual passenger

[1] Typo in original document.

screening systems, which concluded that the systems did not violate individuals' civil liberties.

October 10, the Vulnerability Assessment of the National Airspace System Architecture of the Final Report for the President's Commission on Critical Infrastructure Protection was issued.

December

December 11, the National Civil Aviation Review Commission (NCARC), which was created by the 1996 FAA Reauthorization Act to examine FAA requirements and financing, issued its final report and funding and safety recommendations to the Secretary of Transportation.

December 23, the FAA Administrator and leading U.S. airlines announced that passenger-bag matching would be expanded using passenger screening to apply explosives detection systems or bag matching to domestic passengers' luggage.

The FAA issued a proposal to amend the ACSSP to strengthen passenger screening and clearance procedures for selectee [1] bags.

The FAA and the FBI conducted their first joint airport vulnerability assessments at Baltimore-Washington International Airport as required by the Reauthorization Act of 1996.

INTRODUCTION

The Federal Aviation Administration (FAA) submits this report pursuant to title 49 of the United States Code, sections 44938 and 44907 (formerly sections 315(a), 316(b), and 1115(a) of the Federal Aviation Act of 1958, as amended). The report presents a summary of events, programs, and accomplishments in civil aviation security in 1997, including passenger, baggage, and cargo screening and domestic and foreign air carrier and airport security.

FAA CIVIL AVIATION SECURITY MISSION

The FAA's aviation security mission is to protect the users of commercial air transportation against terrorist and other criminal acts. Because terrorists seek to destroy public confidence in the safety of air travel and disrupt this vital segment of the U.S. and world economies, the continued growth of commercial air transportation hinges on the effectiveness of aviation security measures. Protecting the infrastructure—FAA facilities and equipment and the employees who operate them—is a critical part of the FAA's aviation security mission.

The FAA mission includes preventing passengers and cargo shippers from transporting hazardous materials or other dangerous goods in a manner that could jeopardize flight safety. The FAA also assists other Federal Government agencies in the interdiction of drugs coming into the United States by air.

The FAA in 1997 continued to improve its baseline civil aviation security system by progressing toward implementation of the recommendations of the White House Commission on Aviation Safety and Security (final report issued February 12), the 1996 Baseline Working Group of the Aviation Security Advisory Committee, the National Civil Aviation Review Commission (NCARC) (final report issued December 11), the President's Commission on Critical Infra-

structure Protection (final report October 10), and the Federal Aviation Reauthorization Act of 1996 and other legislation. The FAA hired 299 special agents and 67 support personnel; entered into partnerships with other Federal Government agencies, airports, and air carriers; conducted research, engineering, and development of advanced explosives detection technology and other advanced security technologies; and procured and deployed new aviation security equipment.

SUMMARY OF PROGRAMS AND ACCOMPLISHMENTS

This section summarizes key aviation security program areas and highlights the new and expanded program activities driven by the recommendations of the White House Commission on Aviation Safety and Security and the Baseline Working Group of the Aviation Security Advisory Committee, legislative mandates, and the aviation security environment of 1997.

PARTNERSHIPS

The responsibility for aviation security is a shared one. The FAA assesses threats and develops, communicates, and enforces appropriate security measures. Air carriers are responsible for applying security measures to passengers, service and flight crewmembers, baggage, and cargo—in short, everyone and everything that enters aircraft. Airports are responsible for maintaining a secure ground environment and for providing local law enforcement support. Other Federal agencies, including the Federal Bureau of Investigation and the U.S. Customs Service, have jurisdiction at airports and the responsibility to contribute to aviation security. Also important is the cooperation of passengers and shippers.

Airport Consortia

The FAA formed consortia involving airport and air carrier officials and law enforcement agencies with responsibility for aviation security at 41 major U.S. airports in 1996 in response to a recommendation by the White House Commission on Aviation Safety and Security. The FAA delayed forming additional consortia during much of 1997 to resolve some compliance and enforcement policy issues. Plans are underway to convene voluntary consortia at over 100 airports.

Technology training was provided to over 500 airport consortia members in four locations across the country in 1997. The training gave the consortia members an overview of explosives detection systems and capabilities to help prepare the members for FAA deployments of security equipment. The training was videotaped to allow further distribution of the information.

Aviation Security Advisory Committee

The Aviation Security Advisory Committee (ASAC) is an important partnership of the DOT and FAA, other Federal Government agencies, the aviation industry, and the flying public. The Secretary of Transportation established the ASAC in 1989 in the aftermath of the bombing of Pan Am flight 103 as a forum for improving civil aviation security. In 1997, the ASAC chartered working

groups to address issues like cargo security, public education, consultation, employee utilization and recognition, critical infrastructure protection, and airport categorizations. The full ASAC met in March and July 1997.

AIR CARRIER AND AIRPORT SECURITY

The Code of Federal Regulations (CFR) requires the implementation of security programs by airports and air carriers. These security programs contain procedures to prevent or deter aircraft hijackings, sabotage, and other criminal acts. The FAA and the aviation industry constantly review the procedures to ensure their effectiveness in countering threats to civil aviation.

Air Carrier Security

In 1997, 152 U.S. scheduled or charter air carriers were required to follow FAA-approved security programs. Each of these carriers has adopted the Air Carrier Standard Security Program (ACSSP), developed by the FAA in consultation with the industry. The program requires each air carrier to implement standard security procedures. The FAA has the authority to amend the ACSSP when safety and the public interest require it, after providing air carriers time to review and comment on proposed amendments. If immediate action is necessary, the FAA may issue emergency amendments to the ACSSP that are effective upon receipt. Under CFR 108.18, the FAA also may issue temporary requirements for immediate action through security directives.

In July 1997, the FAA revised and reissued for comment a proposal to incorporate security procedures for passengers into the ACSSP. The final revision was issued August 5. In December, the FAA proposed a further change that also implemented a White House Commission recommendation to strengthen passenger screening and clearance procedures for selectee bags. The change would require airlines to perform identification and passenger questioning and to apply computer-assisted passenger screening or domestic selection criteria, an additional random selection percentage, and clearance procedures for selectee bags.

Principal Security Inspector (PSI)

Principal security inspectors (PSI) are assigned to certificated U.S. air carriers that are required to adopt security programs under part 108 of title 14 of the CFR (14 CFR) and to each foreign air carrier subject to 14 CFR part 129. The PSI's serve as liaisons between the FAA and the air carriers' corporate security offices, representing the Associate Administrator for Civil Aviation Security and all FAA security field elements. The PSI's work closely with the carriers' corporate security representatives to address areas of concern and to ensure the carriers' compliance with FAA requirements. The PSI's also are responsible for approving and issuing amendments to the air carriers' individual security programs as well as providing FAA policy guidance to the air carriers when regulations are developed or revised. The PSI's also approve and monitor the air carriers' security training curricula.

Model Vulnerability Assessments

The FAA contracted with private sector firms to conduct vulnerability assessments in 1997 using various models to determine which model is really the best and most appropriate for use at airports.

Eight contractors have been assigned 14 major airports to assess. The planning stage has been completed, and teams at 6 airports have completed onsite data collection activities. Fourteen out of 28 volunteer candidate airports will be engaged in helping to test and evaluate the models used in these assessments. The FAA expects the assessments to be completed in 1998.

Airport Security

U.S. and foreign scheduled and charter air carriers serve 459 airports within the United States that are regulated under 14 CFR part 107. Each airport is required to adopt and use a security program to provide a secure operating environment for air carriers. Of the regulated airports, 19 are designated as category X based on passenger traffic, complexity, and other special considerations.

The Federal Aviation Reauthorization Act of 1996 mandated that the FAA and the FBI regularly conduct joint threat and vulnerability assessments of high-risk airports. The FBI also must designate aviation security liaisons in or near cities served by these airports. An FAA/FBI working group was formed in November 1996 to identify airports where the vulnerability assessments should be conducted on a priority basis.

An initial group of such airports has been identified and is being assessed as part of this program. The FAA and the FBI conducted their first joint airport vulnerability assessment at Baltimore-Washington International Airport in December 1997. Efforts to finalize a draft FAA/FBI security liaison agreement continue.

Federal Security Manager (FSM)

Federal security managers (FSM) represent the Associate Administrator for Civil Aviation Security at the 19 category X airports. FSM positions were created by law and have been maintained by the FAA since October 1, 1991. As the FAA's designated security representatives, the FSM's maintain direct communication with key airport officials, airline managers, and law enforcement authorities. Their principal responsibilities are coordination and oversight of all operational security activities at their respective airports.

COMPLIANCE AND ENFORCEMENT

The FAA has an ongoing and aggressive compliance and enforcement program that is carried out by regional offices under national direction. While striving to achieve compliance through cooperation, the FAA must ensure that regulated parties such as air carriers, airports, and shippers of dangerous goods are in compliance with applicable regulations and security programs.

Assessments and Testing

The compliance and enforcement program includes regularly scheduled comprehensive assessments. During the assessments, special agents identify security violations and weaknesses and work with industry personnel to correct deficiencies. Special agents also conduct supplemental assessments, including special emphasis assessments that target specific areas or procedures in the aviation security system. All assessments include any one method or a combination of methods: surveillance, interviews, documentation reviews, and testing.

The White House Commission on Aviation Safety and Security recommended that the FAA require industry to conduct security audits and that the FAA then perform unannounced and aggressive testing (realistic operational testing). The FAA conducted seven nationally directed systemwide rounds of this testing to determine compliance with specific security requirements. The rounds tested passenger screening, positive passenger-bag matching procedures, and questioning and resolution procedures. The rounds were unannounced (with the exception of one test) and were covert. The results indicated that the air carriers needed to improve in the areas tested.

Voluntary Disclosure Encourages Problem Fixing

To achieve maximum participation and encourage complete disclosures of vulnerabilities, the FAA revised its voluntary disclosure policy to apply to disclosures made by airports, air carriers, indirect air carriers, and foreign air carriers (under their FAA-approved security programs), including disclosures that are made during airport consortia activities. This policy will become effective in 1998. When a disclosure that satisfies the requirements of the voluntary disclosure policy is made during a consortium activity, all parties to the consortium can participate in the development of a comprehensive fix plan—with participation by the FAA—without the threat of legal enforcement action against the disclosing entity unless the comprehensive fix plan is not satisfactorily implemented. In every case, immediate but temporary corrective action is required until the comprehensive fix is in place.

Enforcement

The FAA strives to gain industry compliance with aviation security requirements through performance-based partnerships, which encompass cooperation and communication before violations occur. When there are violations, the FAA seeks to ensure immediate corrective action by: encouraging voluntary disclosure of problems; working with industry in a counseling mode to help resolve problems and identify ways to prevent future violations; and, in instances where warranted, pursuing enforcement actions, including issuing warning notices, letters of correction, civil penalties, or other orders of the Administrator that might be appropriate.

A 1-year pilot of the Streamlined Enforcement Test and Evaluation Program (STEP), prompted by a recommendation of the 1993 National Performance Review, concluded in 1996. The pilot program tested an alternative method of processing civil penalties for certain violations by individuals attempting to pass weapons

through screening checkpoints. Positive results were so immediate that the FAA adopted the program nationwide before the test period ended. Under STEP, the average time to process a case decreased over 90 percent, 31 percent more people paid their sanctions, and the payments were over 60 percent higher than expected.

In 1997, the Office of Civil Aviation Security, in conjunction with other FAA lines of business, began working on ways to streamline the enforcement investigative reports to make the reports less redundant and easier to write and to provide better information to the legal offices in case proposed actions are appealed.

Violations at the Checkpoint

Individuals who attempt to bring weapons, explosive devices, or other dangerous articles through screening checkpoints are subject to enforcement actions. They may also be subject to arrest by local law enforcement officials. The following table summarizes the estimated number of people screened through checkpoints, the number of weapons detected, and the number of people arrested between 1993 and 1997.

Civil Aviation Security Airline Passenger Screening Results, 1993–1997

Year	CY 1993	CY 1994	CY 1995	CY 1996	CY 1997
Persons Screened (Millions)	1,150.0	1,261.3	1,263.0	1,496.9	1,659.7
Weapons Detected:					
Firearms	2,798	2,994	2,390	2,155	2,067
Handguns	2,707	2,860	2,230	1,999	1,905
Long guns	91	134	160	156	162
Persons Arrested:					
Carriage of firearms/explosives	1,354	1,433	1,194	999	924
Giving false information	31	35	68	131	72

AVIATION SECURITY: PEOPLE

The effectiveness of the aviation security system depends on the capabilities and integrity of the people who screen passengers and their possessions.

In 1987, the FAA amended the ACSSP to require air carriers to detect FAA weapons and simulated explosive devices. The agency began taking enforcement actions against air carriers failing to detect FAA test objects.

Screeners should not be trained merely to detect FAA test objects; the FAA requires that they be trained to detect actual weapons, firearms, and explosive devices. But because they were tested with a small number of approved test objects, an unintended consequence was that screeners specifically looked for those test objects. New and more challenging test objects and methods were necessary to portray more realistically the explosives and techniques used by terrorist groups.

To drive up screener performance further, the FAA is preparing a rulemaking on certifying screening companies and improving

screener training. The FAA is gathering data from automated testing with threat image projection to develop performance standards for screeners.

The FAA expects to publish a notice of proposed rulemaking that includes certification standards in 1999.

In August 1997, the FAA initiated a nationally focused special emphasis assessment of screener evaluation testing. The main aspect of the assessment was to implement realistic testing and to ensure that bags were packed consistently by special agents using common items carried by passengers.

The assessment included approximately 950 tests (including weekend testing) conducted by agents who were not known to the screeners.

Screener of the Year

Individuals working on the front lines of aviation security were recognized by the FAA during the third annual Screener of the Year award ceremony on August 19. Betty Jean Davis, a checkpoint security supervisor at Chicago O'Hare International Airport, received this year's award. She was selected from among nine regional winners. Nominees for the award displayed specific and sustained superior performance in aviation security.

The FAA, the Air Transport Association, the Regional Airline Association, the Air Line Pilots Association, and the National Air Transportation Association cosponsored the awards.

Improving Performance

The FAA Human Factors Program began an extensive research effort to enhance screener capabilities. The FAA developed the Screener Proficiency Evaluation and Reporting System (SPEARS), which contains several components, including computer-based training (CBT) and threat image projection (TIP). CBT automates screener training and tests screeners on the material learned, including the ability to detect images of bombs in baggage. TIP electronically projects fictitious images of bags containing bombs or other threat objects on x-ray screens. This training device keeps screeners alert, provides real-world conditions, and measures screener performance.

Screener performance will be assessed in the field for both carry-on bags and checked bags. CBT was introduced in 1997 to category X airports. In 1998, SPEARS will be deployed to select category 1 airports.

Information and Access Control

Aviation security is as dependent on the integrity of people who have access to secure areas and information as it is on the capabilities of those people who are associated with the passenger screening process. Rulemaking activities in 1997 included efforts to control unescorted access to restricted areas of airports and restrict the release of sensitive security information.

The FAA published a notice of proposed rulemaking on March 19 to extend employment background checks to include screeners and their supervisors. The rule would require employment history investigations of these individuals and fingerprint-based criminal

records checks of some of them. The comment period closed on May 19. The final rule will be published in 1998.

Also in March, the FAA published a final rule, "Sensitive Security Information," to require airports, air carriers, foreign air carriers, and indirect air carriers to restrict the distribution, disclosure, and availability of sensitive security information to persons with a need to know.

Universal Access System

In May 1993, Congress appropriated $2 million for the FAA to develop and initiate the implementation of a universal access system (UAS) to eliminate problems associated with multiple airport security systems, without unnecessary duplication or costly reconfiguration.

While a portion of allocated funds was used to develop functional specifications, technical standards, and a test plan, the majority of the funds were used to conduct operational tests and evaluations of the most promising configurations.

Operational testing began in January 1996 at Miami International Airport with Delta Air Lines transient employees. In March 1996, the UAS Test Program began at Detroit Wayne County Airport with Northwest Airlines transient employees. There were approximately 50,000 active air carrier employees in the UAS centralized data base.

While testing was completed in 1997, the UAS doors at Miami and Detroit and the centralized data base at Atlanta remained operational. Throughout the year, several other airports and airlines decided to participate in the UAS based on the body of work that was generated.

Domestic Aviation Security Training

The FAA develops and manages an extensive training program for FAA personnel and others with responsibility for civil aviation security. Aviation security training for FAA specialists is conducted as resident training at the FAA Academy in Oklahoma City, in regional locations, and via interactive video training. The Department of Defense, the Federal Law Enforcement Training Center, and other vendors provide specialized training in physical security, criminal investigations, and other topics at various locations throughout the country. The FAA trained 944 FAA students in basic and advanced aviation security and internal security programs in 1997.

The FAA also conducts seminars and training for State and local law enforcement officers and for airport and air carrier managers and security personnel to encourage successful implementation of policy and regulations and to counter the terrorist threat to air transportation. In 1997, the FAA trained 131 non-FAA students in 5 locations in the continental United States.

Appendix I lists the FAA training courses and student distributions.

AVIATION SECURITY: TECHNOLOGY

The skills and integrity of the people involved with aviation security are only part of what makes the aviation system secure. The

people must have effective equipment to do their jobs. The FAA and its partners in aviation and other industries work together to pursue advancements in technology and integrate them into the civil aviation security system to enhance the security of the flying public.

Safe Skies

Under an agreement between the FAA and an alliance of industry, academia, and Government organizations, the agency will gain an airport operational testing site for newly developed security technologies.

A 1997 memorandum of understanding (MOU) provided about $1 million to the National Safe Skies Alliance, a nonprofit group that includes the McGhee Tyson Knoxville Airport, Oak Ridge National Laboratories, Honeywell Corporation, American Engineering, Inc., and the University of Tennessee. The centerpiece of the cooperative agreement is the creation of a site for testing new checkpoint screening technologies at McGhee Tyson Knoxville Airport. The program is designed to gauge reactions from the flying public while monitoring the performance of security equipment under actual operating conditions.

The MOU also includes several research and development projects, including studies of airport vulnerability assessments; system integration for security equipment and procedures; explosives detection systems development and testing; and airport and air carrier security operations simulation and modeling.

FAA Integrated Product Team

In October 1996, FAA formed a Security Equipment Integrated Product Team (SEIPT) of acquisition and security experts representing the FAA, airport authorities, and air carriers. The team's objective is to plan, purchase, and install explosives detection devices and other advanced security equipment at U.S. airports.

In 1997, the team began deploying equipment purchased with $144 million provided by the Omnibus Consolidated Appropriations Act of 1997 to implement the recommendations of the White House Commission on Aviation Safety and Security.

Bulk Explosives Detection

Technology today offers different kinds of equipment designed to detect bulk explosives that may be concealed in checked baggage. The equipment varies in the types and amounts of explosives it may detect. Section 108.20 of 14 CFR requires air carriers to use explosives detection systems approved by the FAA to screen checked baggage on international flights when the Administrator so requires. The InVision CTX 5000, which uses computed tomography, was approved in 1994 and remained the only FAA-certified EDS in 1997.

The White House Commission on Aviation Safety and Security recommended checked baggage screening for domestic flights and funding for checked baggage screening equipment. In December 1996, the FAA purchased 54 certified EDS for screening checked baggage. The SEIPT began installation of the equipment in Chicago and New York in January 1997. By December, EDS's were

operational in six U.S. cities, with deployments to several more cities planned for 1998. In line with the Commission recommendations, FAA is supplementing the deployment of certified EDS with deployment of other advanced technology for checked baggage screening. These 22 units include enhanced x-rays and other commercially available devices.

Explosives Trace Detection

Explosives trace detection devices have been used to screen carry-on bags and electronic items at airport screening checkpoints since November 1996. Using various technologies, explosives trace detectors can detect explosive vapors and particles. By the end of 1997, the FAA had purchased 220 trace detectors and deployed 128 of these to 30 airports. The FAA plans to purchase 260 more trace detectors by the end of 1998 to use at screening checkpoints and to assist in resolving checked baggage screening alarms from EDS's.

Computer-Assisted Passenger Screening (CAPS)

The large numbers of passengers and bags moving through the aviation system require the use of existing technology to apply time-consuming but necessary security measures. Passenger screening makes the most of limited security resources to keep the aviation system functioning close to current capacity. The computer-assisted passenger screening (CAPS) system was developed by the FAA through a grant to Northwest Airlines in September 1996, which included exporting CAPS to other airlines' reservation systems. CAPS was tested operationally on selected flights in Northwest's system in March and April 1997. All other major airlines covering all major reservations systems were given CAPS profiling factors and weights on May 7. A 1997 Department of Justice report on CAPS found that it does not violate individuals' civil liberties.

Passenger Bag Matching Using CAPS

On December 23, the Administrator of the FAA and leading U.S. airlines announced that passenger-baggage matching will be expanded using CAPS to apply either examination by explosives detection systems or bag matching to domestic passengers' luggage. This is in response to a recommendation by the White House Commission on Aviation Safety and Security that full passenger-baggage matching with automated or manual passenger screening be implemented by December 1997. This process includes matching passengers to baggage to ensure that no unaccompanied bags enter the system. Implementing rulemaking is underway.

Aircraft and Container Hardening

The Aircraft Hardening Program was initiated in 1990 in response to the directives of the President's Commission on Aviation Safety and Security and the mandates set forth in the Aviation Security Improvement Act of 1990.

The goal of the FAA Aircraft Hardening Program is to protect commercial aircraft from catastrophic structural damage or critical system failure resulting from in-flight explosions. Secondary objec-

tives are to investigate vulnerabilities from the interference of electromagnetic or high-energy signals with aircraft electronic systems and to assess the threat presented by manually operated, highly mobile surface-to-air missiles.

The Hardening Program has included implementing vulnerability studies, explosives testing of current and hardened luggage/cargo containers, and researching manufacturing and maintenance issues associated with hardened structures.

Major program accomplishments for 1997 include: (1) completed operational assessment of LD–3 hardened containers; (2) identified and validated new aircraft vulnerability techniques; (3) identified possible mitigation techniques to counter projected energy and other threats; and (4) developed procedures and rules for man-portable air defense systems (MANPADS).

Aircraft Vulnerability Testing

The FAA, along with the United Kingdom's Civil Aviation Authority, blew up a Boeing 747 on May 17 as part of a joint effort to study the effects of bomb blasts on commercial wide body aircraft and how to protect against them. Specifically studied were baggage containers and liners developed for cargo areas that would allow aircraft to survive bombings without ruptured fuselage. Four simultaneous explosions were set off in the front and rear cargo holds of the retired 747, which had been pressurized to simulate flight at approximately 35,000 feet.

The results were expected, but startling all the same, as the section behind the wing sheared off near the unprotected rear cargo area. The test results provided important information on methods to protect aircraft from blast events.

National Academy of Sciences Panel

In response to a requirement of the Federal Aviation Reauthorization Act of 1996, the National Academy of Sciences Panel on Assessment of Technologies for Aviation Security was established in 1997. The panel will assess the results of the current advanced security equipment deployments, hardened cargo container tests, and planned future deployments and will recommend how to deploy explosives detection systems and hardened containers more effectively to improve security.

OTHER SAFEGUARDS

Programs and measures other than screening also offer safeguards to protect the flying public and the personnel and facilities that keep the aviation system running smoothly.

Interference with Flightcrews Pilot Project

A pilot program designed to deal more effectively with unruly passengers made favorable progress in 1997. The pilot program was begun in November 1996. It is a comprehensive effort led by selected FAA civil aviation security field offices in the Western-Pacific and Eastern Regions and involving air carriers, crewmembers, airport law enforcement agencies, the FBI, and U.S. attorneys to ensure proper and adequate handling of serious in-flight interference with crewmembers (including criminal prosecution if war-

ranted). Approximately 56 incidents on approximately 16 domestic and 10 foreign flag air carriers in specific locations were reported under the program in 1997.

K–9 Explosives Detection

The FAA instituted a program to reimburse partially airports that volunteer to participate in the FAA's Explosives Detection K–9 Team Program. This is in response to the White House Commission's recommendation that the FAA significantly expand the use of bomb-sniffing dogs through the deployment of 114 additional K–9 teams. Approximately $8.9 million from the Omnibus Consolidated Appropriations Act provided partial reimbursements to the original 87 K–9 teams and the additional teams. The FAA is continuing to work with airports in an effort to expand the K–9 program at each of the 76 largest U.S. airports. By the end of fiscal year 1998, 40 airports are expected to be participating in this voluntary program. The first FAA-exclusive class of K–9 handlers graduated from the Military Working Dog School at Lackland Air Force Base, Texas, on March 25.

In May 1997, the FAA instituted the requirement that all FAA K–9 coordinators participate in FAA K–9 Trained-on-System (KATS) training. KATS is an automated system that provides up-to-date information concerning K–9 proficiency training conducted onboard domestic aircraft. The FAA's goal is to expand this program to encompass all explosives detection training conducted on U.S. aircraft.

Federal Air Marshal

The Federal Air Marshal (FAM) Program provides an armed security force whose mission is to protect the traveling public and flightcrews on U.S. air carriers by deterring criminal and terrorist acts that target aircraft in flight. FAM's undergo specialized law enforcement training and maintain very stringent physical fitness and firearms proficiency standards. The FAM operational training facility is located at the FAA William J. Hughes Technical Center, Atlantic City, New Jersey. The FAM force is capable of rapid deployment worldwide. During 1997, FAM's provided in-flight security on flights of all major U.S. air carriers to and from 82 cities in more than 50 countries. Just knowing that FAM's could be on board aircraft may deter individuals planning to interfere with flights.

Dangerous Goods and Cargo Security Program

The Dangerous Goods and Cargo Security (DG/CS) Program is responsible for ensuring that shipments of dangerous goods (hazardous materials) and other cargo by air are made safely and in accordance with established regulations.

The DG/CS Program has approached the problem of compliance through a combination of enforcement, trend analysis, and outreach. Dangerous goods and cargo security inspections are being conducted at air freight forwarder facilities, aircraft repair stations, and air shipper facilities as well as at air carrier facilities.

Inspections and other program activities are underway at foreign locations for air carriers and others involved in the air transport

of dangerous goods and cargo. Data systems have been developed to target shippers or carriers who are repeat offenders or who handle materials that present a higher degree of danger. In addition, outreach efforts are focusing on particular groups demonstrating lax attitudes or ignorance or misunderstanding of dangerous goods regulations.

Focused inspections were conducted in four major cities in 1997, targeting air carrier repair stations, indirect air carriers, air carriers, and shippers. A cargo security special emphasis assessment on air carrier small package acceptance was performed as well as three cargo security special emphasis assessments conducted jointly with the DOT Office of the Inspector General. Depending on the violations uncovered, responses ranged from consultation and information to proposals of civil penalties or even criminal charges.

A major emphasis in 1997 was the use of conferences, safety advisories, brochures, and a new video to educate the public and the regulated industry on shipping dangerous goods. The FAA has become increasingly involved in ongoing meetings and discussions with all major air transport trade associations. The FAA distributed a safety advisory that outlined requirements for transporting air carrier company materials and oxygen generators to approximately 5,000 air carrier repair stations. Also, the FAA produced jointly with the DOT Research and Special Programs Administration a new video entitled "Ensuring Safety: Transporting Hazardous Materials by Air." The video offers a comprehensive overview of dangerous goods regulations to help educate the regulated public.

Courier Shipments Reviewed

Security controls over accompanied commercial air courier shipments underwent closer scrutiny in 1997. The FAA and the DOT Office of the Inspector General have been performing intensive oversight inspections of such shipments presented for flight aboard passenger-carrying aircraft to ensure that: (1) air carriers and indirect air carriers are following FAA-approved security programs; (2) indirect air carriers are declaring and documenting all shipments, including hazardous materials; and (3) shippers are properly packaging, marking, labeling, and documenting all hazardous materials. The FAA Office of Civil Aviation Security has been reviewing FAA requirements and procedures for accompanied commercial air courier shipments.

Cargo Baseline Working Group

The Cargo Baseline Working Group (CBWG) of the Aviation Security Advisory Committee (ASAC), formerly the Cargo Working Group (CWG), was formed in September 1996 to develop an effective and efficient security baseline for air cargo. Its membership includes representatives from all elements of the cargo industry. The group provided recommendations to the ASAC that were included in the "ASAC Domestic Security Baseline Final Report," submitted in September 1996.

After the White House Commission on Aviation Safety and Security recommended that the FAA implement a comprehensive plan to address the threat of explosives and other threat objects in cargo

and that it work with industry to develop new cargo security initiatives, the group was reconvened. The CBWG compared the White House Commission recommendations with those of the ASAC and provided amplified recommendations to the ASAC.

In May 1997, the FAA issued proposed amendments to the standard security programs for U.S. air carriers, couriers, freight forwarders, and cargo consolidators as well as the model security program for foreign carriers to enhance aviation cargo security. Several major changes are being proposed as a result of recommendations made by cargo industry representatives, including "known" versus "unknown" shipper criteria and specific cargo screening procedures. The revised proposed amendments are expected to be published for comment in 1998.

Drug Interdiction

Investigations conducted by special agents in the Drug Investigations Support Program (DSIP) resulted in 248 airmen certificate revocations in 1997. The 248 revocations are due to the success of the FAA/Federal Bureau of Prisons and Federal Probation and Parole match programs in which inmate, probation, and parole records are matched against the Airmen Registry. Airmen convicted for drug smuggling are subject to certificate action.

There were also 45 airmen certificate suspensions and 4 aircraft registration certificate revocations in 1997.

Protecting the Infrastructure

The FAA continued in 1997 the steady development of its Security Risk Management (SRM) Program to implement the standards called for in the Department of Justice (DOJ) report of June 28, 1995, the recommendations of the President's Commission on Critical Infrastructure Protection, and other national policy guidance to reduce the vulnerability of the agency's employees and critical infrastructure to criminal and terrorist attacks.

In its full scope, the SRM Program is designed to be a joint effort on the part of all lines of business within the agency to address on a continuing basis the security risk management needs of the FAA's more than 47,000 employees and contractor personnel. It also ensures the integrity of the FAA's critical infrastructure and National Airspace System support capability by establishing and maintaining through security risk management an acceptable level of risk of criminal and terrorist attacks at the agency's more than 1,000 staffed facilities and 8,500 unstaffed facilities.

The Administrator created the Facility Security Risk Management Committee (FSRMC) in 1995, with representation from all FAA lines of business, to oversee and monitor the SRM Program and to report to and advise the Administrator on the status and conduct of SRM agencywide.

Joint SRM assessments of the FAA's assets are continuing, with priority emphasis on identifying the vulnerabilities and risks to FAA personnel and to the agency's other most critical assets.

President's Commission on Critical Infrastructure Protection (PCCIP)

The PCCIP was established in July 1996 to conduct a comprehensive review of and recommend a national policy and implementation strategy for protecting critical infrastructures against physical and cyber threats and ensuring their continued operation.

The PCCIP submitted its report, "Critical Foundations Protecting America's Infrastructures," in October 1997. The report contains the recommendations of the Vulnerability Assessment of the National Airspace System (NAS) to protect the modernized NAS from information-based and other attacks.

INTERNATIONAL AVIATION SECURITY

Aviation security is a worldwide concern. The FAA's security efforts are focused primarily on U.S. airports, U.S. air carriers, wherever they fly, and foreign air carriers that service the United States. But the FAA and other governments work together to raise the levels of security provided by all air carriers and airports. Global aviation requires global cooperation to ensure aviation security.

International Civil Aviation Organization (ICAO)

ICAO is a specialized agency of the United Nations that was established by the Chicago Convention in December 1944. ICAO establishes international aviation security Standards and Recommended Practices (SARP) for its 183 Member States. The Associate Administrator for Civil Aviation Security works closely with ICAO to strengthen these standards and to ensure compliance with them throughout the international aviation system. Amendment 9 to Annex 17 of the Chicago Convention, which raises cargo security, was approved by the ICAO council to become effective on April 1, 1997, with an implementation date of August 1, 1997. The Aviation Security Panel, comprising representatives from 15 Member States and a number of industry observers, met in September 1997.

Recognizing the importance of aviation security in ICAO and the needs of its expanded aviation security office, the United States continues to provide two FAA security specialists for ICAO at no expense to the organization. ICAO uses these specialists to conduct security surveys and training for countries in need throughout the world.

European Civil Aviation Conference (ECAC)

The ECAC is an intergovernmental consultative organization that was established in 1955 by the Council of Europe with the active support of ICAO. ECAC's objectives are to encourage the safe and orderly development of civil aviation to, from, and within Europe. The Conference in 1997 comprised 37 Member States.

In the field of security, ECAC's objective is to ensure the maximum level of security possible within ECAC and with its partners serving its airports. ECAC Member States apply ICAO Annex 17 standards and recommended practices. In addition, supplementary measures appropriate to the conditions pertaining to Europe are promulgated by ECAC through its frequently revised security manual. While the aviation security measures contained in the manual

are not mandatory, the expectation within ECAC is that all Member States will comply. The United States (FAA), Canada, and Israel have been granted permanent observer status on the ECAC Security Committee.

Civil Aviation Security Liaison Officers (CASLO)

Civil aviation security liaison officers, in all but four instances, are located overseas. There currently are 20 CASLO's who report directly to the Associate Administrator for Civil Aviation Security. They are the primary FAA contacts with U.S. embassies and host governments on civil aviation security matters. Primary responsibilities include helping U.S. and foreign air carriers implement FAA security requirements, the exchange of threat information, and onsite FAA coordination during aviation security incidents. Appendix II lists CASLO locations and the geographic areas covered.

Foreign Air Carrier (FAC) Security

CFR part 129 requires foreign air carriers operating to the United States to submit security programs to the FAA for acceptance for their operations to, from, and within the United States. The foreign air carriers may adopt the model security program (MSP) prepared by the FAA, submit their own security programs for review, or refer the FAA to foreign governments that perform security procedures at last points of departure to the United States.

At the end of 1997, there were 173 foreign air carriers operating to and from the United States that were required to have security programs acceptable to the FAA Administrator. All foreign air carriers have been required since September 1992 to adopt a security program acceptable to the FAA Administrator for operations to and from the United States. Foreign air carriers have adopted either the FAA's MSP or have submitted acceptable programs that meet the performance standards contained in the MSP.

The FAA continuously assesses threats against all foreign air carriers and will not hesitate to discuss and, if necessary, impose additional security measures to meet any threat.

Identical Measures

The Antiterrorism and Effective Death Penalty Act, passed by Congress in April 1996, changed 49 U.S.C. section 44906. Formerly, the FAA was required to ensure that passengers were provided a level of protection when flying to or from the United States on foreign air carriers similar to that provided when flying on U.S. air carriers from those same airports. The Act changed section 44906 to require foreign air carriers traveling to and from U.S. airports to have security measures identical to those for U.S. air carriers flying from those same airports. A notice of proposed rulemaking on identical security measures for foreign air carriers was forwarded in April 1997 to the Office of the Secretary of Transportation for final review.

Foreign Airport Assessments

Chapter 449 of title 49 of the United States Code requires the Secretary of Transportation to assess the effectiveness of the security measures maintained at foreign airports: 1) served by U.S. air-

lines; 2) from which foreign airlines provide service to the United States; 3) that pose a high risk of introducing danger to international travel; 4) and at other airports considered appropriate by the Secretary of Transportation.

In 1997, approximately 225 foreign airports qualified for assessment under the law; this number fluctuates as changes in air carrier service occur. The number of FAA assessments conducted at each foreign airport is determined by criteria like current resources and threat conditions.

The FAA focuses resources on those airports that may have difficulty sustaining effective security measures. These focused efforts include interagency actions to alert aviation officials to potential vulnerabilities. This enables the respective host governments to take action to resolve security concerns before serious deficiencies develop. When the determination has been made that a foreign airport does not administer and maintain effective security measures, the Secretary of Transportation may initiate action such as public notification or suspension of service.

The FAA conducted 80 foreign airport assessments in 1997. As a result of these assessments, the FAA sought to strengthen the international civil aviation security system by offering security enhancement recommendations to airport and government officials from multiple countries. Most of the recommendations fell into the categories of access control, airport administration, passenger screening, airport emergency planning, national administration, baggage and cargo security controls, and law enforcement support. Onsite training and technical assistance were offered on numerous occasions.

In 1997, a secretarial action for Lagos, Nigeria, was in effect. On October 8, 1992, an assessment of Murtala Muhammed International Airport in Lagos resulted in the issuance of immediate public notification without the usual 90-day action notice. As a result of public notification, the FAA provided technical assistance and security training to the Nigerian Government for 9 months.

In July 1993, a second assessment was conducted in Lagos. On August 11, 1993, the Secretary of Transportation suspended air service between the United States and Lagos, citing the failure of cognizant authorities to correct deficiencies satisfactorily. Another assessment was conducted in April 1994, and the Secretary determined that the suspension should remain in effect. An interagency team returned to Lagos in November 1995 to evaluate the impact of corruption on aviation security. As of the end of 1997, the Secretary's suspension order remained in place.

International Aviation Security Training

The FAA provides aviation security training to international airport managers from developing countries. In 1997, 187 students from 5 countries attended training at the FAA Academy in Oklahoma City and in Saudi Arabia. Courses and student distribution are listed in Appendix I.

The FAA also participates in the Department of State (DOS) Anti-Terrorism Assistance Program (ATAP). This program provides technical assistance to foreign countries by conducting training needs surveys of foreign airports. The results may lead to ATAP's

providing either the aviation security training or technical support, or both, necessary to bring the airport into compliance with ICAO standards.

Senior foreign government officials responsible for aviation security participate in intensive training programs that enhance their ability to administer comprehensive programs designed to prevent or deter violent criminal acts against aviation. This cooperative effort with DOS ensures that the security concepts and techniques are integrated and applied worldwide to enhance aviation safety and security.

In 1997, ATAP provided technical assistance to Ethiopia, and training needs surveys were conducted in Saudi Arabia, Ethiopia, Eritrea, Uganda, Yemen, United Arab Emirates, Qatar, and Kuwait. Also, ATAP provided training for students from El Salvador, Senegal, Malaysia, Honduras, and Saudi Arabia in airport security management at the FAA Academy in Oklahoma City and in Saudi Arabia.

CONCLUSION: CRIMINAL ACTS AGAINST CIVIL AVIATION

During 1997, the FAA continued its efforts to implement the recommendations of the White House Commission on Aviation Safety and Security, demonstrating its commitment to strengthening the security of the U.S. civil aviation system. Aviation security partnerships, legislation, funding, and the application of additional and enhanced security measures have made the U.S. aviation system less vulnerable to criminal and terrorist acts. Continuing to apply additional Federal, State, local, and aviation industry resources to combating criminal and terrorist acts against U.S. civil aviation should help ensure that the U.S. civil aviation will remain the safest and most secure aviation system in the world.

When TWA flight 800 exploded in midair off Long Island in July 1996, a bomb explosion or a missile attack was suspected. Although the National Transportation Safety Board has not determined the exact cause of the crash, it has ruled out the possibility of a bomb or a missile and believes that catastrophic mechanical failure was to blame.

Nearly 10 years have passed since the last bombing of a U.S. civil aviation aircraft—Pan Am flight 103 in 1988. The threat of such an attack against U.S. civil aviation has not disappeared, however, as proven by events of several years ago.

In January 1995, Philippine police uncovered a plot to blow up as many as 12 U.S. airliners operating from the Pacific region. This plot involved the placing of explosive devices on U.S. air carriers operating from overseas locations. The mastermind of the plot, Ramzi Ahmed Yousef, was convicted in a U.S. court in September 1996 for his role in this conspiracy and for placing a device on a Philippine Airlines plane in December 1994. The device exploded while the plane was in midair, killing one passenger.

Yousef was convicted in November 1997 on conspiracy and bombing-related charges stemming from the 1993 World Trade Center bombing. This attack, as well as a separate and unrelated 1993 plot to bomb a number of targets in New York City, demonstrated that foreign terrorists have the capability and intention to target the United States.

In 1997, there was one incident worldwide involving the detonation of a bomb aboard an aircraft. The incident occurred in September in Brazil on a domestic airliner during an internal flight. A passenger who apparently was suicidal brought the bomb on the plane. He reportedly was injured in the midair explosion, but another passenger fell through a hole in the fuselage created by the blast and was killed.

There were no hijackings recorded either in the United States or aboard U.S.-registered aircraft in 1997. The last hijacking in the United States, and the most recent incident involving a U.S. air carrier, occurred in 1991. Only one hijacking incident has occurred aboard a U.S.-bound, foreign-registered aircraft in the past 5 years. In December 1993, an Air China flight from Beijing, China, to New York's John F. Kennedy International Airport was diverted to Shanghai after a passenger claimed to have a bomb and demanded to be taken to Taiwan.

During the past 5 years, 87 hijackings have been recorded worldwide. The majority of these incidents took place on domestic (internal) routes; only 25 aircraft were on international flights. Ten hijackings were recorded in 1997, including eight on domestic flights.

The overall number of incidents can serve as a rough index of the level of criminal activity involving commercial aircraft. Because of the differences in situations specific to individual countries and varying motivations among perpetrators, any generalizations must be very carefully drawn.

b. Office of the Inspector General Audit Report—Security for Passenger Terminals and Vessels, U.S. Coast Guard

Memorandum from the Office of the Inspector General for Maritime and Departmental Programs (MA-1988-204), to the Chief of Staff, U.S. Coast Guard, September 11, 1998

* * * * * * *

This report presents the results of our audit of U.S. Coast Guard oversight of security for passenger terminals and vessels. The objective of our audit was to determine whether the Coast Guard ensures operators of passenger terminals and passenger vessels have security plans intended to safeguard passengers and property.

Security plans are intended to prevent or deter unauthorized access and the introduction of prohibited weapons, incendiaries, and explosives into/onto passenger terminals and vessels. The plans must provide the means to meet requirements for low, medium, and high security threat levels. At low threat levels, an unlawful act against a terminal or vessel is possible but not likely. This is the level for which operators must maintain security indefinitely, i.e., these are normal, everyday security measures. Comparatively, during high threat levels, operators must increase security measures because an unlawful act against a terminal or vessel is considered probable or imminent, and intelligence indicates terrorists have chosen specific targets. At the time of our audit, the Department of Transportation's Office of Intelligence and Security considers the overall threat of maritime terrorism in the United States as low.

RESULTS-IN-BRIEF

The Coast Guard has been effective in ensuring that operators of passenger terminals and vessels have security plans intended to safeguard passengers and property. The Coast Guard identified 66 passenger terminal facilities and 133 passenger vessels, all cruise ships, requiring security plans. We found the Coast Guard had security plans for each of the cruise ships and all but one of the terminal facilities. The Coast Guard was working with the Government of Samoa to obtain a security plan for the remaining terminal facility.

From January 1997-August 1998, the Coast Guard issued 11 Domestic Threat Advisories based on information from the Department of Transportation's Office of Intelligence and Security regarding potential terrorist threats. None of the Threat Advisories resulted in an increased threat level for passenger facilities and vessels.

The Coast Guard also made cursory assessments of compliance with security plans at passenger terminals and onboard passenger vessels while performing other required inspections. We confirmed

that at the time of our visit, security practices for four cruise ships were consistent with security plans.

We also confirmed a previous Coast Guard determination that security practices at the Port of Miami were not consistent with security plans. As a result, the Captain of the Port for the Marine Safety Office directed all operators of passenger terminals within its jurisdiction to update their security surveys and provide any proposed changes to their terminal security plans for review.

BACKGROUND

In 1985, terrorists killed a United States citizen during the seizure of the cruise ship Achille Lauro. The following year, Congress enacted the Omnibus Diplomatic Security and Antiterrorism Act. Title IX, which constitutes the International Maritime and Port Security Act, provides the Coast Guard with the authority to prevent or respond to acts of terrorism on navigable waters, at ports, and on vessels subject to U.S. jurisdiction. Also, in 1986 the United Nation's International Maritime Organization published Circular 443 "Measures to Prevent Unlawful Acts Against Passengers and Crews on Board Ships" to provide member governments with guidance for reviewing and strengthening port and onboard security.

In subsequent years, the Coast Guard encouraged voluntary compliance with International Maritime Organization Circular 443. However, the Coast Guard found that voluntary compliance did not produce the industry-wide level of security necessary to ensure that acts of terrorism are deterred, or responded to, in the best possible manner. Consequently, in 1996, the Coast Guard published Title 33 Code of Federal Regulations Part 120, Security of Passenger Vessels, and Part 128, Security of Passenger Terminals, as an interim rule. These regulations require operators of passenger vessels and passenger terminals to submit security plans, implementing the measures included in International Maritime Organization Circular 443, to the Coast Guard by October 16, 1996, or at least 60 days before embarking or transferring passengers, whichever is later. The final rule will be effective on October 1, 1998 with little change from the interim rule.

As of January 1998, the Coast Guard had identified 66 passenger terminal facilities and 133 passenger vessels, all cruise ships, requiring security plans. Cruise ships can accommodate up to 3,000 passengers. In 1997, the North American cruise ship market served 5 million passengers, according to statistics kept by the Cruise Lines International Association. By the year 2000, this market is expected to serve 7 million passengers annually.

SCOPE AND METHODOLOGY

We conducted our audit during January through June 1998 in the Coast Guard Marine Safety and Environmental Protection Directorate, Office of Compliance in Washington, D.C.; the National Maritime Center in Arlington, Virginia; and marine safety offices in Long Beach, California and Miami, Florida. Also, we conducted our audit in the Department of Transportation's Office of Intelligence and Security; in passenger terminal facilities for the World Cruise Center in Los Angeles, California and the Port of Miami in

Miami, Florida; onboard the cruise ships Jubilee, Viking Serenade, Leeward, and Grandeur of the Seas; and in offices for the Federal Bureau of Investigations in Long Beach, California. Further, we discussed terminal and cruise ship security with the Vice President of International Operations for the International Council of Cruise Lines. The audit covered the period October 1996 through June 1998.

We conducted our audit in accordance with *Government Auditing Standards* prescribed by the Comptroller General of the United States. To address our objectives, we reviewed legislation, regulations, and Coast Guard guidance, procedures, and management controls. Also, we reviewed 17 security plans (2 terminal facilities and 15 cruise ships) to determine whether they met regulatory requirements. Further, we observed security practices for a low threat level at both of the terminal facilities and onboard 4 of the 15 cruise ships to determine whether operators followed security plans. We did not observe security practices that would be required at medium or high threat levels.

Exhibit A identifies the facilities and vessels included in our audit. We reviewed personnel rosters, training records, and security reports at terminal facilities and onboard cruise ships. We also reviewed security surveys, vulnerability assessments, and other records kept by Coast Guard marine safety offices in Long Beach and Miami.

RESULTS

The Coast Guard ensured that operators of passenger terminals and passenger vessels had security plans intended to safeguard passengers and property against unlawful acts. The Coast Guard also made cursory assessments of compliance with security plans at passenger terminals and onboard passenger vessels while performing other required inspections. We confirmed that at the time of our visit, security practices for the four cruise ships visited were consistent with security plans. Further, we confirmed Coast Guard findings that security practices need strengthening at the Port of Miami.

OPERATORS HAD SECURITY PLANS EXAMINED BY THE COAST GUARD

Coast Guard Captains of the Port and the Coast Guard National Maritime Center examine security plans for passenger terminals and vessels, respectively, to determine whether they articulate the security program required by Federal regulations. The Coast Guard does not approve security plans. However, the Coast Guard requires Captains of the Port and the National Maritime Center to return plans not meeting Federal requirements to terminal and vessel operators, with an explanation of why the plans do not meet the requirements. Further, Captains of the Port may terminate operations if a passenger terminal or passenger vessel does not have a plan, or a letter from the Coast Guard stating normal operations may continue until the Coast Guard examines the plan.

Title 33 Code of Federal Regulations, Parts 120 and 128, state that security plans must conform to International Maritime Organization Circular 443. Coast, Guard Navigation and Inspection Cir-

cular 3–96 includes the Security Plan Evaluation Guide, which the Coast Guard developed using the guidelines contained in International Maritime Organization Circular 443. This circular provides the Coast Guard and industry with guidance regarding the examination of plans and security measures that passenger terminals and vessels should take at low, medium, and high threat levels.

In January 1998, we contacted each of the Coast Guard's marine safety offices to identify passenger terminal facilities requiring security plans. We identified 66 terminal facilities. Captains of the Port had examined security plans for 65 of these facilities, finding the plans met the requirements of 33 Code of Federal Regulations 128. As of July 1998, the marine safety office in Honolulu, Hawaii was working with the Government of Samoa to develop a security plan for the remaining facility, which processes about 10,000 passengers annually.

Also in January 1998, the National Maritime Center had identified 133 passenger vessels, all cruise ships, requiring security plans. The National Maritime Center found each of these plans met the requirements of 33 Code of Federal Regulations 120. The Coast Guard relies on Captains of the Port to verify, during annual safety examinations, that passenger vessels have security plans. According to the Chief for the Center's Passenger Vessel Security Division, Captains of the Port have not identified any passenger vessels operating without a security plan examined by the Coast Guard.

The Coast Guard's Security Plan Evaluation Guide identifies the areas - 12 for terminals and 11 for vessels - that operators should cover in their security plans. To confirm whether operators covered these areas, we reviewed security plans for the World Cruise Center in Los Angeles, the Port of Miami, and 15 cruise ships. We found that, with few exceptions, security plans conformed to the Security Plan Evaluation Guide. Specifically, the World Cruise Center did not cover the use of barriers for security, neither the World Cruise Center nor the Port of Miami covered lighting for security during darkness, and one cruise ship did not cover the use of alarms.

However, these omissions did not adversely affect security for the terminals and the cruise ship. During our on-site visits, we observed that the World Cruise Center used barriers to keep people away from restricted areas; the World Cruise Center and the Port of Miami provided security lighting between sunset and sunrise; and the cruise ship used closed circuit television to monitor restricted areas as an alternative to alarms. Exhibit B summarizes the results of our review.

THREAT LEVELS ARE CONSIDERED LOW

In addition to examining security activities for passenger terminals and vessels, Coast Guard Captains of the Port conduct port vulnerability assessments annually for every passenger vessel terminal within their areas of responsibility. For 1997, the vulnerabilities for the World Cruise Center and the Port of Miami were assessed at the midpoint of a five point scale (Very Low-Very High). The vulnerability assessments look at factors such as the location and layout of the terminal, dependence on essential services,

access points, security staff, and existing security measures. The Department of Transportation's Office of Intelligence and Security includes the results of the assessments in its annual report to Congress on the threat from acts of terrorism to the maritime community.

Further, the Department of Transportation Office of Intelligence and Security issues Information Circulars to inform the various transportation modes about potential terrorist threats. Based on the Information Circulars, the Coast Guard issued 11 Domestic Threat Advisories during January 1997- August 1998. None of the Threat Advisories resulted in an increased threat level.

The Navigation and Inspection Circular 3–96, notes that at high threat levels Captains of the Port and other appropriate Federal agencies will be actively involved in assuring the security of affected vessels and terminals. The Federal Bureau of Investigation is the designated lead agency for response to domestic maritime terrorist incidents.

COAST GUARD MADE CURSORY ASSESSMENTS OF COMPLIANCE WITH SECURITY PLANS

Navigation and Inspection Circular 3–96 requires Captains of the Port to annually "examine" security activities for passenger terminals and vessels. The scope of these examinations is intended to be limited. These examinations are in addition to other routine inspections required to be made by the Coast Guard. According to a 1994 Coast Guard assessment, the "examination" for a passenger terminal should take 25 minutes: 5 minutes to verify a security plan, 5 minutes to review reports of unlawful acts, and 15 minutes to observe security practices. The "examination" for a vessel should take 10 minutes: 5 minutes to verify a security plan and 5 minutes to review reports of unlawful acts.

World Cruise Center: The Coast Guard's marine safety office in Long Beach was examining security activities for passenger terminal facilities at the World Cruise Center. To illustrate, in August 1997, inspectors examined the process used by the World Cruise Center to check-in passengers. At the same time, the inspectors examined measures for identifying people using the World Cruise Center, such as baggage handlers and security forces. Further, in January 1998, inspectors examined terminal lighting and night time security, and security when passengers, visitors, and crewmembers transferred to/from three different ships. These examinations did not disclose significant security deficiencies.

During our visit, we confirmed that security practices, employed during our visit, were consistent with security plans at the World Cruise Center. We observed security forces testing screening equipment, placing vehicle and pedestrian traffic flow devices, and testing gates and doors. During the disembarking and boarding of passengers, security guards kept vehicles from accessing restricted terminal facilities such as piers, warehouse areas, and the ship gangways. Also, security guards kept us from entering restricted areas. We observed security guards processing all passengers through a metal detector, and X-raying all hand-carried property as well as randomly selected cabin baggage. Additionally, security guards observed ship stores and provisions being loaded aboard ships.

Port of Miami: The Coast Guard's marine safety office in Miami was examining security activities for passenger terminal facilities at the Port of Miami. To illustrate, in January 1998, inspectors examined terminal facilities and tested shoreside and shipboard security. The examination disclosed security deficiencies such as unlocked doors to restricted areas, inadequate screening of persons seeking access to terminal facilities, and inadequate or damaged fencing and gates. Further, the inspectors gained unauthorized access to a cruise ship, including the ship's bridge. As a result of the Coast Guard's examination, the Port of Miami agreed to take various actions to correct security deficiencies, such as equipping doors with locks to prevent unauthorized opening, reviewing procedures for screening persons, installing higher fencing, and repairing gates.

During our visit in June 1998, we found security practices at the Port of Miami were still not consistent with security plans. We gained entry, unchallenged, through several restricted areas to ship gangways. However, security guards kept us from boarding the ships. Also, terminal personnel such as stevedores, porters, and truck drivers frequently did not display required identification cards. Further, metal detection equipment, operated in terminal facilities for one of the two ships visited, did not work properly for hand-carried property. To illustrate, the equipment did not identify a heavy metal belt buckle worn by a Coast Guard inspector accompanying us during our visit. We also found security personnel did not randomly screen cabin baggage—one cruise line informed us they first began screening cabin baggage the day of our visit and the other has never screened cabin baggage.

As a result of our findings of continuing security deficiencies at the Port of Miami, the Captain of the Port for the Coast Guard Marine Safety Office in Miami directed all operators of passenger terminals within its jurisdiction to update their security surveys. Further, operators were directed to provide the Captain of the Port with proposed changes to their terminal security plans for review.

Passenger Vessels: Coast Guard inspection activity reports show marine safety offices made safety inspections for the cruise ships Jubilee, Viking Serenade, Leeward, and Grandeur of the Seas within the past year. These inspections did not identify any security deficiencies. We found security practices for the four cruise ships, on the day we visited, were consistent with security plans. We observed staff screening passengers through the use of non-picture identification cards that were cross-matched to passenger rosters; visitors through a sign in/out log; and ship's crew through picture identification cards. Also, staff kept daily records of security routines and incidents. While each of the four ships experienced incidents such as quarrels between passengers and/or ship's crew, only one ship experienced an unlawful act that required reporting to the Coast Guard. The operator properly reported this act.

GOVERNMENT PERFORMANCE AND RESULTS ACT

The Government Performance and Results Act requires each agency to develop a strategic plan that includes objective, quantifiable, and measurable performance goals for accomplishing major program activities. The Coast Guard's 1998 Performance Plan for

the Marine Safety and Environmental Protection Program includes a goal to "Reduce risk from terrorism to U.S. passengers at foreign and domestic ports and designated waterfront facilities." The Coast Guard is developing performance measures, strategies, and activities to achieve this goal.

RECOMMENDATION

We recommend that the Chief of Staff direct the Captain of the Port for the Marine Safety Office in Miami to conduct a followup inspection to ensure that operators of passenger terminals at the Port of Miami take necessary actions to correct security practices.

ACTION REQUIRED

Please provide a written response to our recommendation within 30 days. We appreciate the courtesies and cooperation of Coast Guard representatives. Please call me at (202) 493–0331 or Jerome Persh at (202) 366–1504, if you have any questions concerning this report.

c. White House Commission on Aviation Safety and Security—The DOT Status Report

Partial text of the DOT Status Report implementing the recommendations of the White House Commission on Aviation Safety and Security [1]

EXECUTIVE SUMMARY

One year ago, the White House Commission on Aviation Safety issued its final report. The Department of Transportation (DOT), the Departments of Defense, Justice, State, and Treasury, the National Transportation Safety Board, the National Aeronautics and Space Administration and numerous other Federal agencies have made significant progress implementing the Commission's recommendations. Together, with our partners in the aviation community, the federal government has worked to change the way we do business.

The federal government has established the Commission's proposed safety goal as our primary safety goal. We are committed to reduce the aviation fatal accident rate by a factor of five within 10 years (Recommendation 1.1). Both the DOT and the National Aeronautics and Space Administration (NASA) have adopted the goal in their new strategic plans, and incorporated means of measuring the progression of this goal in their performance agreements. The Federal Aviation Administration (FAA) has set out a strategic goal of reducing the aviation fatal accident rate 80 percent by 2007. NASA has also set a longer-range goal of reducing the fatal accident rate by a factor of 10 within 20 years. FAA and NASA are tailoring their research and program plans to achieve these goals.

Aviation security has been established as a national security priority (Recommendation 3.1). The President has publicly recognized aviation as a major element of our strategy against terrorism, and the White House publication *A National Security Strategy for a New Century* includes aviation security as a critical element. The DOT Strategic Plan specifically recognizes aviation security as a key component in advancing the nation's vital security interests. The National Security Council has established a subgroup, headed by the DOT and including all agencies involved in aviation security, to address the White House Commission security recommendations specifically.

Over the past year, the following White House Commission recommendations have been completed.

- The Department has instituted into its rulemaking practices a policy to ensure that costs alone are not dispositive in the rulemaking process (Recommendation 1.5). The new policy recognizes the importance of both tangible and intangible benefits

[1] The full text of this report is available on the DoT Web site at http://www.dot.gov.affairs/whcoasas.htm.

of rules, the need for risk analysis and examination of potential mitigation measures, and the need to identify and act on high-risk potential accident causes before accidents occur.

- The FAA is continuing to explore innovative means to accelerate the installation of advanced avionics in general aviation aircraft (Recommendation 2.3) as part of its Advanced General Aviation Transport Experiments (AGATE). The goal is to improve general aviation safety and improve access to the airspace system. FAA is revising two Advisory Circulars (AC) on certification, and a new RTCA task force is reviewing avionics certification processes. Flight 2000, FAA's program to demonstrate and validate new National Airspace System (NAS) capabilities, also will validate avionics, including low-cost weather data link systems for general aviation aircraft.
- In September 1997, the National Civil Aviation Review Commission (NCARC) released its Recommendations on ways for the users of the National Airspace System (NAS) to fund its development and operation (Recommendation 2.5). A new FAA reauthorization proposal will address those recommendations.
- The FAA identified and justified the frequency spectrum necessary for the transition to a modernized air traffic control system (Recommendation 2.6) and released its study in July 1997. The results will be incorporated into the next Federal Radionavigation Plan. FAA is continuing to address the sufficiency of the radio frequency spectrum to support the communication needs of the NAS.
- The Department of Transportation issued on February 12, 1997, a final rule to improve passenger manifests (Recommendation 3.26) by requiring more information on passenger manifests for flights to or from the United States.
- In June 1997 FAA submitted a proposed resolution, through the U.S. Representative, that the International Civil Aviation Organization (ICAO) begin a program to verify and improve compliance with international security standards (Recommendation 3.8). ICAO has not yet adopted the resolution, which the United States continues to support.
- DOT strengthened its working relationship with the Departments of Defense, Energy, and other Federal agencies and local authorities to assess the possible use of chemical and biological weapons as tools of terrorism (Recommendation 3.9). Interagency activities are ongoing.
- The Department of Defense (DOD) has established an interagency task force to assess the potential use of surface-to-air missiles against commercial aircraft (Recommendation 3.17.) DOD convened the task force and held its first meeting on May 12, 1997.
- FAA has given properly cleared airline and airport security personnel access to needed classified information (Recommendation 3.23). Industry officials, with appropriate security clearances, are now routinely provided classified information regarding threats.
- The FBI significantly increased the number of agents assigned to counter-terrorism investigations to improve intelligence and crisis response (Recommendation 3.27). Congress provided

funding and FBI deployed 644 Special Agents, 620 support positions, and additional funding for investigations, intelligence gathering, forensic analysis, and crisis management.

- The FAA has been a full partner with the Department of State in providing anti-terrorism assistance through airport security training to countries where there are airports served by airlines flying to the United States (Recommendation 3.28). The Department of State and FAA provide airport security training through the Anti-Terrorism Assistance Training Program (ATAP.)
- The National Transportation Safety Board (NTSB) finalized a coordinated federal response plan to aviation disasters (Recommendation 4.1). The plan has been implemented in four aviation disasters, including the Korean Air 801 disaster in August 1997 at Guam.
- The Department of Transportation and the NTSB have implemented key provisions of the Aviation Disaster Family Assistance Act of 1996 (Recommendation 4.3.) The Secretary's Task Force on the Assistance to Families of Aviation Disasters was appointed in March 1997. It issued its report, containing 61 recommendations, to Congress and the Vice President in October 1997. The government and industry are implementing many of the Task Force's recommendations.

Beyond the fully completed recommendations, DOT, FAA, and other agencies have made substantial progress toward implementing virtually all the remaining recommendations. Highlights include:

- The new passenger screening system, Computer Assisted Passenger Screening (CAPS), was prototyped, tested with Northwest Airlines in 1997, and is being phased in by U.S. airlines in 1998. FAA tested passenger bag matching in 1997 and, on January 1, 1998, augmented the bag-matching program in conjunction with both manual screening and CAPS. After a thorough review, the Department of Justice concluded that the screening system did not violate the civil rights of any individuals.
- FAA hired 375 new safety inspectors and created a group to provide analytical support to field offices and target inspector oversight where it is most needed.
- Some 79 certified explosives detection systems and advanced technologies for screening of checked bags were purchased in 1997. Deployment will be completed in 1998. In addition, over 50 trace explosives detection devices were deployed in 1997, bringing the total in place from 78 to 128. About 365 more trace detection devices will be purchased and installed by the end of 1998.
- NASA has reprogrammed $500 million to invest in safety research over the next five years. They have identified a lead research center for safety research and established a program management staff throughout NASA Centers.
- The FAA and NASA are working as partners to develop a research plan to achieve the national aviation safety goal of an 80 percent reduction in aviation fatal accidents in 10 years.

Both agencies will work with industry to create and install new safety technology as quickly as possible. This work will assist FAA in implementing many of the safety recommendations.

- Notices of Proposed Rulemakings (NPRM) have been drafted or issued on *Enhanced Ground Proximity Warning Systems* in aircraft; improved standards for certification of foreign aircraft repair stations worldwide; amended criteria for certification of explosives detection systems to include detonators; computer assisted passenger screening; and expanded applicability of rules concerning criminal background checks and FBI fingerprint checks to all screeners and their supervisors. An Advanced NPRM was published on the certification of security screening companies.
- The FAA and NASA have developed a human factors plan to address the implementation of items included in three key reports: *The National Human Factors Plan*; the *1997 Aviation Safety Plan*; and a report on flight deck human factors. In addition, FAA coordinated an FAA/NASA/DOD Aviation Safety Program, strengthened collaborative safety research efforts, identified new safety research requirements, and are executing a research plan for a flight deck automation study.
- The FAA and the National Academy of Sciences signed an agreement to create a panel for the Assessment of Technologies for Aviation Security.
- Cooperative research agreements and partnerships have been established to develop new security technology.
- The DOT is continuing its efforts to ensure the accuracy, availability, and reliability of the Global Positioning System (GPS) as part of a worldwide Global Navigation Satellite System (GNSS). This includes measures to provide secure uninterrupted civilian access to the GPS carrier; work with the Department of Defense on a plan for a second GPS frequency; and work with international organizations on how to detect and protect GNSS from potential interference. The DOT and the Departments of State and Commerce are encouraging worldwide use of GPS in international forums. FAA has agreements with 14 nations that ensure the use of U.S. GPS standards around the world.
- The Administration is supporting legislation introduced in Congress to ensure equitable treatment for families of passengers involved in international aviation disasters. It is also is supporting legislation to amend the Death on the High Seas Act which would enable the family members of those killed in international aviation disasters to obtain fair compensation.

This report summarizes accomplishments toward achieving the 57 recommendations in the White House Commission report and discusses some of the issues that will affect implementation in the future. The federal government and its partners in the aviation community are fully committed to continuing implementation in the years ahead.

WHITE HOUSE COMMISSION RECOMMENDATIONS:

* * * * * * *

3. IMPROVING SECURITY FOR TRAVELERS

3.1—The federal government should consider aviation security as a national security issue, and provide substantial funding for capital improvements.

- The President recognized aviation security as a major element of our strategy against terrorism, and then sought funding for the deployment of advanced security equipment. The Congress did its part by passing two important laws authorizing and funding the initial recommendations: the Omnibus Consolidated Appropriations Act signed by the President on September 30, and the Federal Aviation Reauthorization Act signed October 9, 1996.
- By the end of October 1996, FAA had formed a team of acquisition and security experts from government, airport authorities and air carriers to plan, purchase and install explosives detection devices and other advanced security equipment at many of the busiest U.S. airports. Continued federal funding at a minimum level of $100 million a year for several years is necessary to efficiently continue capital improvements that are more fully described under recommendations 3.15 and 3.20. To continue this effort the FAA is requesting $100 million in funding in FY 1999.

3.2—The FAA should establish federally mandated standards for security enhancements.

- Standards for the certification and use of equipment, and the training and performance of security personnel are an integral part of improvements required by many other recommendations. The Aviation Security Improvement Act of 1990 (P.L. 101–604) states that prior to a requirement for deployment of explosives detection systems (EDS), the FAA must certify that EDS performance meets standards based upon the amount and types of explosives likely to be used to cause catastrophic damage to commercial aircraft, derived from test results using independently developed test protocols. The Act further requires that certified equipment must be able to detect such amounts under realistic air carrier operating conditions. All of this has been done.
- In November 1992, FAA issued the draft EDS standard and the National Academy of Sciences completed final certification test protocols in May 1993. FAA developed coordinated standards with the scientific and intelligence communities, the aviation industry, and properly cleared manufacturers and vendors, then published final unclassified portions on September 10, 1993. In December 1994, the InVision CTX–5000 was certified as the first, and so far the only, explosives detection system. In addition, a proposal was published in August 1996 to amend existing standards for FAA certification of explosives detection systems to detect detonators as well as bulk explosives. The proposal's comment period closed on January 6, 1997, comments have been analyzed, and a draft final standard is being prepared.

- Operational procedures for trace detection equipment have been developed and are being applied in the field as part of the deployment of the equipment under recommendations 3.1 and 3.15. Trace detection performance criteria standards for the amounts and types of explosives to be detected are under development.
- Training is more fully covered under recommendations 3.10, 3.20 and 3.30.

3.3—The Postal Service should advise customers that all packages weighing over 16 ounces will be subject to examination for explosives and other threat objects in order to move by air.

- The United States Postal Service (USPS) has reviewed recommendations 3.3, 3.4, and 3.5 and is very concerned about the potential impacts of the recommendations. If implemented, they would seriously impede USPS ability to provide timely, reliable, low cost mail service to both domestic and international customers. Also, full implementation will impede USPS capability to compete with other companies who are not subject to the same stringent screening requirements as proposed for the USPS. The slow throughput rates of currently certified explosives detection systems make their application impractical for screening large volumes of mail. Regarding the legal issues, legislation would be required to implement recommendation 3.3.
- Aside from the need for legislative authority to intrude into mail that is sealed against inspection, the USPS remains concerned as to how it would implement the screening of parcels weighing 16 ounces or more. The FAA-certified explosives detection system was designed for screening checked bags with an appropriate system throughput for that purpose. It was not designed or certified to process over 1 million pounds of parcels per day weighing 16 ounces or more that fly in passenger aircraft. The USPS fears that screening mail as provided for in the recommendation may not be feasible without extensive delay of the mail. To minimize delays and ensure effective screening, the USPS would have to acquire a large number of these systems whose total acquisition and operational cost is estimated to exceed one billion dollars, immediately translating into higher postal rates for customers.
- The USPS's Aviation Mail Security Committee continues to examine the current and emerging technologies to determine their potential application in postal operations. Further, the Committee will soon visit European Postal Administrations, who are screening mail, to learn if any of the technologies and procedures used by them can be adapted to USPS operations. Thus far, a system with characteristics that would be required for deployment in the U.S. postal operating environment has not been found.
- The USPS does not believe the public would, in the interest of enhancing aviation security, understand and accept the need to relax the sanctity and privacy of the mail and Fourth Amendment protection against warrantless search. The USPS strongly doubts that the public will accept such routine intrusion into

the mail by government agencies to detect items in which they may be interested. The USPS believes this kind of activity would be strongly contested in any public hearings held by Congress.

3.4—Current law should be amended to clarify the U.S. Customs Service's authority to search outbound international mail.

- U.S. Customs has proposed a legislative change to amend Title 19, clarifying outbound search authority. Key legislative staffs on both the House and Senate Banking Committees have been briefed and have expressed support. Close coordination between U.S. Customs Service and U.S. Postal Service personnel will be essential to avoid duplicative efforts.
- The Postal Service continues to take exception to this recommendation, and has held meetings with the General Accounting Office, Office of Management and Budget, and Customs. It contends this recommendation would adversely affect its ability to provide timely, low cost service and would be a waste of money due to duplication of efforts recommended under 3.3. The Postal Service believes giving Customs the authority to inspect outbound international mail is not legal and in any case would not be operationally practical or efficient.

3.5—The FAA should implement a comprehensive plan to address the threat of explosives and other threat objects in cargo and work with industry to develop new initiatives in this area.

- Perhaps more than in any other aspect of security, the need for new partnerships in exploring innovative improvements in cargo security were obvious to the Commission immediately. Advice from the Aviation Security Advisory Committee Baseline Working Group, which needed to form a cargo subgroup to deal with this complicated problem, made that clear.
- To implement this recommendation, FAA proposed amendments to standard security programs for U.S. carriers, couriers, freight forwarders and cargo consolidators, as well as the model security program for foreign air carriers. These proposals were issued for comment on May 14, 1997. Changes to the voluntary, "domestic security integrated program" for all cargo carriers were also proposed. Since that time, FAA listening sessions have been held, and major substantive recommendations to clarify further the intent of cargo acceptance and handling procedures have been made by several groups.
- The Cargo Baseline Working Group recommended that the proposed amendments be rewritten. Comments made at listening sessions on June 3 and July 28, 1997, in addition to written comments received from the industry prompted reexamination of the proposed amendments, and a completely rewritten version. Several major changes are being proposed, particularly regarding "known" versus "unknown" shipper criteria and specific cargo screening procedures. The proposed amendments will be published for comment this year.

3.6—The FAA should establish a security system that will provide a high level of protection for all aviation information systems.

- Information security is important not only to comply with this recommendation but also with the recommendations of the President's Commission on Critical Infrastructure Protection (PCCIP). As the National Airspace System evolves from a custom-made, highly specialized array of equipment and services, to a more open system comprised of commercial off-the-shelf products and services the planned information security system will more effectively protect air traffic control information and systems from the increasing risk of "information-based attacks," an area of special concern to the PCCIP. GAO is currently circulating a report on FAA's air traffic control computer security. The Department is preparing comments, and will use the final report to help improve information security. GAO is circulating a report on FAA's air traffic control computer security. The Department is preparing comments, and will use the final report to help improve physical and information security.
- FAA is planning on FY98 funding of $3.2 million and FY99 funding of $27.1 million for its information security program. FAA's information security initiative will combine efficient system development and operations with sound security risk management policy and procedures throughout the life cycle of new and existing automated air traffic systems. It will work hand-in-hand with improvements in the physical security of critical FAA facilities, such as air route traffic control centers and airport control towers.

3.7—The FAA should work with airlines and airport consortia to ensure that all passengers are positively identified and subjected to security procedures before they board aircraft.

- FAA continues to work with airlines and airport operators to ensure that all passengers are effectively screened prior to boarding. The initial proposed amendment to the air carrier standard security program addressing Commission concerns was issued for comment to regulated parties on March 28, 1997. The proposal included: revised procedures for applying a computer assisted or manual passenger screening system for all flights originating in the United States; clearance procedures for selectee bags, articles and suspicious items, including a provision for the use of explosives detection systems and devices; air carrier self-auditing of screening checkpoint operations; and, checked baggage acceptance operations.
- Comments were received, analyzed and a revised proposal was issued on August 5, 1997. Airlines requested and were granted an extension of the comment period until October 10, 1997. Running in parallel, a related proposal to amend the air carrier standard security program was issued for comment in December 1997 with a comment period closing January 31, 1998. In general, the proposal modifies the August 1997 clearance procedures for selectee bags; and incorporates an additional random selection percentage for those air carriers applying the "manual" passenger screening. A final amendment to the air carrier standard security program will not be issued until its

contents are carefully reviewed and fully coordinated with initiatives detailed here and under recommendations 3.15, 3.19 and 3.24.

3.8—Submit a proposed resolution, through the U.S. Representative, that the International Civil Aviation Organization begin a program to verify and improve compliance with international security standards.

- The U.S. mission to ICAO made a proposal to ICAO regarding enhancements to the ICAO Security mechanism. The ICAO Council considered the issue at its June 4, 1997 meeting and decided to table it and discuss it at the last session of the Council in the fall of 1997. Currently, the resolution has not been adopted. The U.S. mission will continue to pursue the proposal.

3.9—Assess the possible use of chemical and biological weapons as tools of terrorism.

- The FAA works closely with the Departments of Defense, Energy, and other federal agencies to ensure awareness of the plans and activities of other organizations assessing the use of chemical and biological agents by terrorist groups. For example, FAA knows that local airport authorities have been involved and many of them have scheduled "first responder training" for their fire and police departments to increase the awareness of problems associated with the use of chemical and biological agents.
- In general, aviation security planning and specific security measures are based, among other things, on assessments from law enforcement and intelligence agencies. Threat assessment and coordinated planning for prevention as well as research and development has been continuous since required by the Aviation Security Improvement Act of 1990.

3.10—The FAA should work with industry to develop a national program to increase the professionalism of the aviation security workforce, including screening personnel.

- The FAA continues to take human factors into account by providing appropriate training, and developing utilization tandards, clear guidance and operational procedures in partnership with the airlines to ensure the effective use of security equipment by trained and properly motivated air carrier personnel. FAA is also taking steps to improve initial and recurrent training curricula for both checkpoint supervisors and screeners.
- The Supervisory Effectiveness Training program provides screening supervisors and managers with the basic skills necessary to properly control the day-to-day operations under their charge. The program would establish standards for training to provide such essential skills as interpersonal relations, conflict resolution, leadership, and performance improvement.
- The FAA and airlines are deploying elements of the Screener Proficiency Evaluation and Reporting System (SPEARS), a major FAA effort to improve training and monitor screener ef-

fectiveness. SPEARS has computer-based training modules, which are effective and efficient methods for training screeners. Training systems for screeners using x-ray machines at security checkpoints have been installed at 17 major airports. They will soon be available for explosives detection systems and trace detection devices.

- The other SPEARS component, Threat Image Projection (TIP), is a system whereby artificial images of improvised explosives devices and other threat objects are presented to the screener during the performance of normal duties as if objects actually were in baggage. The screener's decisions are tabulated and recorded to furnish real-time feedback for effectiveness monitoring and as a training tool. Approximately 300 TIP systems are being deployed to the 19 busiest airports. Deployment should be completed this summer. We expect air carriers who helped FAA develop this equipment will embrace its deployment as full partners and ensure its effective use. See also 3.20.

3.11—Access to airport controlled areas must be secured and the physical security of aircraft must be ensured.

- Revision of the basic code of federal regulations for airport and air carrier security, published in the *Federal Register* on August 1, 1997, will include strengthening access controls and aircraft security. Research has begun on more efficient and effective use of existing perimeter and sensitive area surveillance systems. The FAA is conducting research on radio frequency identification tags that could possibly assist in tracking checked baggage movement in secure areas of the airport.

3.12—Establish consortia at all commercial airports to implement enhancements to aviation safety and security.

- In September 1996, immediately after the Commission's initial recommendations were announced, the FAA established consortia at 41 major U.S. airports—our busiest airports. The FAA, the airline industry and other agencies, including the Federal Bureau of Investigation (FBI) and the Bureau of Alcohol, Tobacco and Firearms (BATF) have used consortia to find and fix problems cooperatively. By mid-December 1996, these consortia completed vulnerability assessments and submitted action plans with recommended procedural changes and specific needs for advanced security technology identified. To increase their effectiveness and numbers as recommended by the Commission, FAA will soon issue an advisory circular containing a revised voluntary disclosure policy that encourages people to come forward, reveal problems and fix them. Voluntary security consortia will be expanded to 200 airports by the end of 1998.
- BATF agents are visiting all major airports to offer assistance in conducting explosives threat assessments and other vulnerability assessments relating to explosives.

3.13—Conduct airport vulnerability assessments and develop action plans.

- The FAA has contracted with several private sector firms, including one that participated in the development of the model used by Sandia National Laboratory, to conduct several vulnerability assessments supported by onsite FAA agents, using various models and methodologies. FAA is using several vulnerability assessment models to determine which is really the best and most appropriate for use at airports.
- Eight contractors have been assigned to assess 14 major airports. The planning stage has been completed, and teams at 6 airports have completed onsite data collection activities. Fourteen out of 28 volunteer candidate airports will be engaged in helping to test and evaluate the models used in these assessments. Final analysis will begin in March 1998, and all 14-airport assessments will be completed by August. A panel of experts will be used to evaluate the results of these assessments, and to develop guidelines for future airport vulnerability assessment in terms of best methodologies and tools to be used. Additional funding planned for FY99 and beyond will be used to continue assessments at other major airports. The final award will go to the contractor(s) determined to provide the most cost effective assessment process.
- The Federal Aviation Reauthorization Act of 1996 includes a requirement for FAA and the Federal Bureau of Investigation to conduct joint threat and vulnerability assessments of airports designated as high risk. In order to fulfill this requirement, FAA has been working closely with the FBI to develop a methodology for these assessments. The model relies on a national-level threat assessment of selected U.S. airports, conducted by the FBI at a Headquarters level, and a local, criminal threat assessment conducted by the appropriate Bureau field office. Concurrently, the FAA will conduct a comprehensive vulnerability assessment and a validation of the result. FAA plans to utilize the information gathered in a relational database to identify and relate key vulnerability issues and assign threat factors for all airports throughout the United States.
- The FBI and FAA conducted a joint assessment at Baltimore-Washington International Airport in December 1997. A validation of the assessment questionnaire was performed and the FBI provided an analysis of the trends in criminal activity at the airport. Washington-Dulles International Airport was assessed in January 1998, and beginning in February, two airports per month will be jointly assessed.

3.14—Require criminal background checks and FBI fingerprint checks for all screeners and all airport and airline employees with access to secure areas.

- Perhaps more than any other single security issue, background checks have been discussed and debated in great detail for nearly 15 years, largely because of the need to proceed cautiously to insure the protection of individual rights to privacy so strongly prized by Americans. Each incremental step toward

greater authority to review an individual's background prior to granting access to restricted areas of airports has been taken only after close examination and careful consideration of all viewpoints. The FAA published a Notice of Proposed Rulemaking on March 19, 1997, to extend background check regulations to include screeners. The comment period closed on May 19, 1997. Analysis of comments received and the drafting of the final rule is being conducted in the context of other initiatives on passenger screening, with publication planned for this year. Full implementation of the Commission recommendation, however, would require additional legislation to further extend application of criminal history record checks.

- The FBI's Criminal Justice Information Services Complex in Clarksburg, W. Va., is processing fingerprint examples submitted by the FAA pursuant to Federal Regulation. The FBI has cut turnaround time in half. Approximately 20,000 fingerprint cards have been or are in process. Full implementation of this recommendation is also dependent upon FBI fingerprint turnaround time and deployment of the automated Electronic Fingerprint Image Print Server (EFIPS). The goal is to deploy technology that will be fully operational by mid–1999 and reduce turnaround time to 2–3 days and eventually only 24 hours.

3.15—Deploy existing technology.

- As required by recommendation 3.1 and in the spirit of partnership for enhancing security endorsed by the Commission, the federal government is funding air carrier security improvements by subsidizing the capital expenses of the air carriers, including some training and installation costs, through the purchase of advanced security equipment. The air carriers' role in this partnership is to use the equipment purchased effectively and pay for its operation and maintenance after one year. The President's FY99 budget contains $100 million for continued federal funding and deployment of all types of advanced security technologies.
- In December 1996, FAA purchased 54 certified explosives detection systems for screening checked baggage, using a portion of $144 million for equipment provided by Congress in the Omnibus Consolidated Appropriations Act of 1997. The joint government and industry integrated product team described under 3.1 began installation of the equipment in Chicago and New York in January 1997 and will continue deploying these devices through FY98 with current funds. Certified explosives detection systems are operational in six cities with deployment to several more cities planned for the spring of 1998.
- The use of trace explosives' detection devices at screening checkpoints began in November 1996. Since then, additional trace devices were deployed to 18 airports in FY97. More have been sent to 14 other airports so far this fiscal year. A total of 128 devices are in place and being used to provide better security and deterrence. Over 60 more will be purchased and installed at dozens of additional checkpoints and in many more airports during 1998. As specifically recommended by the Com-

mission, 18 advanced automated x-ray devices and 4 other advanced technology devices have also been purchased for FY98 deployment to achieve the broadest possible mix of effective technologies in airports.

3.16—Establish a joint government-industry research and development program. The FAA is encouraged to use the best available technology to solve security and safety challenges throughout the air transportation system.

- In response to a requirement in the Federal Aviation Reauthorization Act of 1996, an agreement to create a National Academy of Sciences Panel on Assessment of Technologies for Aviation Security was signed by FAA and the Academy on May 19, 1997. The panel's statements of work and membership have been approved. It will assess the results of the advanced security equipment deployments, hardened cargo container tests and planned deployments, and then recommend how to more effectively deploy explosives' detection systems and hardened containers to improve security. The first panel meeting was held on January 29, 1998.

3.17—Establish an interagency task force to assess the potential use of surface-to-air missiles against commercial aircraft.

- In 1992, the FAA convened an Off Site Threat Working Group to examine this threat. The group has conducted tests to develop target acquisition capabilities using simulators and resources provided by the Department of Defense. The FAA is developing exercises to evaluate the effectiveness of existing policies and procedures to counter and manage such a threat to civil aviation.
- The Commission recommended the creation of an interagency effort headed by the Department of Defense to evaluate the risk posed by surface-to-air missiles to civil aviation. The DOT is directly involved in the Civil Aviation Anti-Missile Defense Task Force. Besides DOD and DOT, the Task Force also includes representatives from the State Department and the FBI. The Task Force's objective is to develop a plan to identify security procedures for use in managing, countering, and resolving man-portable surface-to-air missile threat at all major airports in the United States. The Task Force has formed three working groups: aircraft protection; civil aviation protection (including threat reaction planning); and international agreements.

3.18—Significantly expand the use of bomb-sniffing dogs.

- The canine explosives detection team concept has been an important part of aviation security strategy for many years. FAA and operators of nearly 40 of the largest airports have signed a comprehensive, cooperative agreement on canine explosives detection teams. It asks airport authorities to place more teams on-site to screen suspicious bags, packages and cargo, and to search airliners and terminals after bomb threats. The Omnibus Consolidated Appropriations Act of 1997 provided

$8.9 million for reimbursement to airports that signed the agreement to cover specified direct costs up to specific limits.

- In one of many interagency partnerships, the FAA and the Treasury Department's Bureau of Alcohol, Tobacco and Firearms (BATF) signed an agreement last year outlining the principles governing a joint research pilot project. They then began the project, using one FAA certified trained dog and handler team and one BATF certified trained dog and handler team working in parallel with each team combining with a Washington Metropolitan Airport Authority officer. Teams are composed of two dogs per team. Protocols to govern testing and other procedures are being formulated to make sure the teams can reliably detect explosives and to develop information concerning the merits of the different training approaches from the standpoint of the operational use of such teams.
- Separately, BATF is expanding its explosives detection canine program infrastructure at Front Royal, Virginia, to train additional canines for various customers and applications. An Odor Proficiency Standard was published in the Federal Register on January 19, 1998. BATF is working with FAA and a number of other federal agencies to develop and refine this basic odor recognition standard for use by various agencies in evaluating canines throughout the United States. Odor Proficiency Standards were published in the January 19, 1998 Federal Register and are still being refined.
- During 1997, the FAA trained 54 handlers and 60 dogs. The first "FAA exclusive" class of K–9 handlers graduated from the Military Working Dog School at Lackland Air Force Base, Texas on March 25, 1997. The most recent class began on January 8, 1998 with three more classes scheduled this year in a program that can produce up to 52 handlers per year. FAA expanded the program from 87 canine explosives detection teams in 1996 to 130 teams at 38 airports across the country so far this year. As program expansion continues, by the end of 1998, there will be about 154 teams at approximately 40 airports.
- The program remains voluntary on the part of airports. Those not in the current program are unlikely to join without adequate cost sharing by the federal government. Future growth is therefore a function of available funding.

3.19—Complement technology with automated passenger profiling.

- One of the greatest success stories in implementing Commission recommendations is the cooperative effort to produce and deploy an effective automated passenger profiling system without compromising individual civil liberties.
- By mid–1996, FAA, through a grant to Northwest Airlines, had developed a prototype automated passenger profiling system known as Computer-Assisted Passenger Screening or CAPS. In September 1996, a follow-on grant was awarded to Northwest both to refine the program to achieve operational capability and to assist in adapting CAPS to other airlines' reservation systems. Northwest met with other air carriers in the fall, conducted preliminary system tests during the winter, and progressed to operational tests on selected flights in its system in

April 1997. Northwest has completed the process of phasing in CAPS throughout its domestic system with over 150 stations on-line today.

- American, Continental, US Airways, Delta, TWA, and United Airlines, covering all major reservation systems, began work on developing their CAPS systems in May 1997. On February 5, 1998, United Airlines implemented CAPS at all 225 of its domestic stations (including United Express). Some other carriers have begun field-testing CAPS. FAA is helping fund these efforts through cooperative agreements, which will disburse to the carriers funding appropriated by Congress for CAPS.
- It is anticipated that all major carriers will have phased in CAPS voluntarily before new federal regulation mandates its use as the method of determining which passengers' bags must be subjected to additional security measures, such as bag matching or screening with explosives detection systems. As the use of CAPS expands, security improves, since CAPS offers numerous advantages over its manual alternative, including greater sophistication, speed, protection against the compromise of sensitive security information, and objectivity.
- The Departments of Transportation and Justice are sensitive to public concerns about the potential for discriminatory treatment whenever a process is in place that results in more rigorous security measures applied to some passengers than to others. Great care has been taken to ensure that CAPS does not infringe civil liberties. In accordance with a recommendation of the Commission, DOT submitted the profiling elements to the Department of Justice's Civil Rights Division for review. On October 1, 1997, the Department of Justice issued its report, which found that CAPS: (1) "fully complies with the equal protection guarantee incorporated in the Fifth Amendment to the Constitution"; (2) "does not violate the Fourth Amendment prohibition on unreasonable searches and seizures"; and (3) "does not involve any invasion of passengers' personal privacy."

3.20—Certify screening companies and improve screener performance.

- To begin the regulatory process required by law, the FAA issued an Advance Notice of Proposed Rulemaking on March 17, 1997, to solicit comments on certification of screening companies and other particular issues. The comment period closed on May 1, 1997, and FAA received and reviewed 20 substantive comments. After careful coordination with other efforts to improve security through implementation of these recommendations, the next step is publication in the *Federal Register* of a Notice of Proposed Rulemaking, scheduled for April 1998, followed by a final rule.
- The draft rule proposes to certificate all companies conducting aviation screening, carriers that conduct their own screening, and indirect air carriers that choose to conduct their own cargo screening. Other screening improvements being proposed include establishing management and instructor qualification and training standards, implementing screening company qual-

ity assurance and testing programs, and improving the professionalism of screener training programs.

- FAA continues to provide appropriate training, and to develop utilization standards, clear guidance, and operational procedures in partnership with the airlines to ensure the effective use of equipment by trained and properly motivated air carrier personnel. FAA is also taking steps to improve initial and recurrent training curricula for both checkpoint supervisors and screeners in addition to the certification rulemaking.
- The Supervisory Effectiveness Training (SET) program intends to provides screening supervisors and managers with basic skills necessary to properly control day-to-day operations. The program will establish standards for training such essential skills as interpersonal relations, conflict resolution, leadership, and performance improvement.
- The FAA developed the Screener Proficiency Evaluation and Reporting System (SPEARS) that can help train air carrier screeners through computer-based training and maintain their operational proficiency by projecting the images of dangerous articles on the x-ray monitor during the screening process. It can then track how often the screener correctly detects the projected threat.
- Computer based training systems for checkpoint screeners have been deployed and are now operational at 17 major airports with two more coming on-line soon and additional airport installations planned for this year. They are also available for explosives detection systems. The threat image projection component for conventional x-ray devices and explosives detection systems are also being deployed, as noted under recommendation 3.10.

3.21—Aggressively test existing security systems.

- Since 1991, FAA has used increasingly more realistic tests of security measures, such as those designed to control access, prevent unknown shipments from getting on airplanes, and screen passengers and their bags. Comprehensive and specific procedures for inspecting security systems have been developed. Using a combination of these procedures, including unannounced testing, surveillance, interviews and surprise record reviews, security systems will continue to be aggressively evaluated.
- FAA is steadily increasing the number of its field inspectors and their direct support personnel——119 of the 300 security personnel authorized by Congress in 1996 were brought on board in FY97. They will be focusing not only on doing more comprehensive fieldwork, but also on aggressively testing security systems. This testing can be done in two ways. First, field agents unknown to air carrier and airport security personnel simulate attacks based on standard protocols, and brief the results immediately to screeners and others so they can learn on-the-spot. Second, tests can also be classic “red team” tests in which, except in extreme cases, results are withheld and briefed later to the industry so that a more complete picture of total security system performance can be obtained.

- Red Teams, which are also being increased, started in 1991. Aggressive testing by field agents began in 1995 with tests to determine how well the industry was applying the required profile and conducting baggage searches. With the new resources being provided by Congress and the Administration, tests have already been expanded to the screening of small cargo packages, the matching of passengers and bags, and the screening of passengers and their carry-on items. Literally thousands of tests have been done at screening checkpoints, for example. More types of testing will soon take place, including indirect air carriers, and compliance with background check requirements. FAA is also requiring the airlines and the airports to test their own systems and report the results to the FAA.
- All testing is used to improve performance and achieve compliance. Where performance is only marginally deficient, FAA prefers to use the power of information in a working partnership with industry. But where there are significant problems with critical security systems, FAA will take much more immediate action, hopefully in partnership, but if not, then by using the full force of its enforcement authority.

3.22—Use the Customs Service to enhance security.

- The U.S. Customs Service is deploying 140 positions authorized under anti-terrorism legislation: 100 inspectors, 6 intelligence analysts, 33 special agents, and 1 technical support position. All positions were deployed to major international airports to assist aviation security efforts and to perform increased searches of passengers, baggage, and cargo departing the United States. In addition, analysts and investigators will work with the FBI at its airport offices and Headquarters Counter Terrorism Center to provide specific expertise to antiterrorism investigations. The Office of Field Operations has developed a national Anti-terrorism/Aviation Safety and Security training program for the 100 inspectors that will begin at the Federal Law Enforcement Training Center in the spring of 1998. The Customs Service is in the process of evaluating, selecting, and deploying high technology equipment such as mobile baggage and cargo x-ray units. FAA and Customs Service are studying the technical issues associated with converting Customs' Automated Targeting System (ATS), which is designed for contraband analysis in marine cargo. It may be possible to adapt it for antiterrorism purposes in air cargo.
- Customs equipment deployment plans for FY98 and beyond includes:

  24 mobile x-ray vans [with radiation/explosives/drug detection capabilities] are scheduled to be delivered by July 1998. Seven additional vans to be purchased in FY98.

  Delivery in August of 11 portable x-ray systems and explosives/drug detectors [cart mounted] for mail and courier use.
- 675 out of 1700 radiation pagers will be delivered to the field in FY98. Customs and DOE have developed a radiation detection training program. Implementation is being coordinated with FAA and airport authorities.

3.23—Give properly cleared airline and airport security personnel access to the classified information they need to know.

- FAA has worked closely with industry to ensure that security clearances are granted to those in industry who have a need and meet the requirements for a clearance. This long-standing program continues. The FAA has once again reaffirmed its policy to collaborate with airlines and airports in developing responses to threat information, and disseminate vulnerability assessments to appropriately cleared officials.

3.24—Begin implementation of full bag-passenger match.

- On December 23, 1997, FAA Administrator Jane Garvey and leading U.S. airlines announced that passenger bag matching will be expanded, using passenger screening to apply either examination by explosives detection systems or bag matching to domestic passengers' luggage. Bag matching is a security measure in which a passenger's bags will not be transported unless the passenger is on the flight. It already is done for travelers on international flights and has been done on a limited basis for domestic flights.
- Expanded bag matching will be based upon both computer and manual passenger screening systems during the transition to fully computerized passenger screening. The Computer Assisted Passenger Screening (CAPS) system (see Recommendation 3.19) is being used to select passengers whose checked baggage will be subjected to explosives detection examination or expanded bag matching. CAPS uses information from the reservation system to screen out passengers for whom additional security procedures are unnecessary. If not enough is known about a passenger to make a judgment, then additional security measures in the form of explosives detection device screening or bag matching will be applied. CAPS will also select some passengers at random for these additional security measures.
- CAPS is now being instituted. Use of CAPS will increase throughout 1998 while the manual process is phased out for those carriers having access to computerized reservation systems. The new computerized system is more efficient for airlines to use and protects against the release of sensitive security information. As the airlines voluntarily implement CAPS, the FAA will issue regulations requiring its use. The proposed rule for the automated system is being drafted and the final rule is targeted for completion this year.

3.25—Provide more compassionate and effective assistance to families of victims.

- See actions taken in Chapter 4.

3.26—Improve passenger manifests.

- The Department of Transportation issued on February 12, 1998, a final rule to require enhanced passenger manifests for flights to or from the United States. The rule will require U.S. and foreign air carriers to collect a full name from U.S citizens, as well as to solicit a contact name and phone number. Imple-

mentation of the rule will permit the Department of State to carry forth its responsibility to notify families of U.S. citizens killed overseas in a timely manner. In March 1997, DOT issued an ANRM to collect information on an enhanced passenger manifest system for domestic flights. DOT will review the implementation of the international rule during its consideration of the comments to the ANPRM.

3.27—Significantly increase the number of FBI agents assigned to counterterrorism investigations, to improve intelligence, and to crisis response.

- The FBI has expanded its counterterrorism program. Congress has provided funding for 644 Special Agents, 620 Support positions, and additional funding for investigations, intelligence gathering, forensic analysis, and crisis management. These additional personnel will be assigned to field offices throughout the United States to focus added resources in this critical area, improve our intelligence collection, and expand our management capabilities. It is anticipated that these field agents and support employees will be under transfer to the Counterterrorism Program by April 30, 1998.

3.28—Provide anti-terrorism assistance in the form of airport security training to countries where there are airports served by airlines flying to the U.S.

- The FAA has been a full partner with the Department of State in support of its anti-terrorist assistance program for many years. FAA performs training need surveys and conducts training in airport security management. The FAA Academy's international training service center in Oklahoma City provides airport security training on a fee-for-service basis to foreign countries.
- Since 1986, the U.S. Department of State and FAA have been providing anti-terrorism assistance in the form of airport security training through the Anti-Terrorism Assistance Program (ATAP). Additional training is provided to personnel at selected foreign airports where specialized assistance, as determined by the results of the FAA foreign airport assessments, is needed.
- Since the Commission's recommendations were released, over 270 people from 35 countries have been trained.

3.29—Resolve outstanding issues relating to explosive taggants and require their use.

- BATF is preparing to submit to Congress a report regarding the status, progress, findings and recommendations regarding the use of explosive taggants. The draft report has been reviewed by Treasury, OMB and others and has now been revised by BATF. The report was resubmitted to Treasury for final approval.

3.30—Provide regular, comprehensive explosives detection-training programs for foreign, federal, state, and local law enforcement, as well as FAA and airline personnel.

- The FAA has two explosives' specialists and nine regional coordinators who specialize in explosives related threat analysis, countermeasures development and training tailored to the needs of civil aviation security. Training has been conducted for law enforcement officers, consortia, airport managers, and security checkpoint screeners on a broad range of explosives' detection topics for both domestic and international audiences. Civil aviation security training was provided to military joint service Explosive Ordnance Disposal classes and regional conferences of the International Association of Bomb Technicians and Investigators, and at the Annual European Bomb Technician's Symposium. During FY97 the Bureau of Alcohol, Tobacco and Firearms (BATF) conducted 9 explosives related courses for state and local law enforcement and prosecutors as well as 6 international post-blast classes on behalf of Federal Law Enforcement Training Center (FLETC). Eight additional international classes are planned for FY98. BATF also conducted 3 certification and 5 recertification schools for explosive specialists, 1 class for certified fire investigators, and 10 post-blast schools for BATF agents.
- BATF and the FAA jointly produced four explosives security-training videos with instructor and student guides for both aviation industry and law enforcement use in their training programs. These videos cover an introduction to explosives and such topics as improvised explosive devices, airport bomb threat management, and dealing with suspected explosive devices discovered in the cabin of aircraft in-flight. The FAA's 8th annual conference on canine explosives detection was attended by 165 federal, state, and local law enforcement personnel who received 20 hours of training on explosives detection topics ranging from detection technology R&D to safety and other operational issues.

3.31—Create a central clearinghouse within government to provide information on explosives crime.

- The Bureau of Alcohol, Tobacco and Firearms (BATF) is working in partnership with the Federal Bureau of Investigation's (FBI) Bomb Data Center, all Federal, State, and local law enforcement and fire agencies to develop parameters and protocol for the repository information on arson and the criminal use of explosives. A number of coordinating meetings has been held and a system design company, Performance Engineering Contractors, has conducted interviews. FBI and BATF are discussing leadership roles in the central repository. Ultimately, this program will allow different levels of access to a central database of information through the Internet.
- The National Repository concept is based on BATF's Explosives Incidents System (EXIS) and will now be called AEXIS for Arson and Explosives Incidents System. EXIS information is available to state, local, federal, and foreign enforcement agencies and can be used to match targets, motives, and simi-

lar incidents for incendiary and explosive devices. The system developer interviews have been completed and the AEXIS is currently being tested by BATF to resolve pre-operational problems.

* * * * * * *

LOOKING FORWARD

Much was accomplished in the first year of implementing the recommendations of the White House Commission. A total of 15 recommendations have been fully implemented, and substantial progress has been made on the remainder. Much more will be accomplished in the second year. Among the recommendations to be fully implemented in 1998 are:

1. IMPROVING AVIATION SAFETY

1.4—The Federal Aviation Regulations (FARs) should be simplified and, as appropriate, rewritten as plain English, performance-based regulations. FAA has developed and distributed guidance handbooks for writing in plain English. The agency is currently reviewing planned and existing regulations for candidates for change.

1.10—The FAA should develop better quantitative models and analytic techniques to inform management decision-making. FAA developed and will begin implementing a long-term plan for coordinated model development, documentation, and utilization; FAA will also make its new cost accounting system, now baselined, fully operational.

2. MAKING AIR TRAFFIC CONTROL SAFER AND MORE EFFICIENT

2.2—The FAA should develop plans to ensure that operational and airport capacity needs are integrated into the modernization of the NAS. A Concept of Operations has been incorporated; FAA will identify and integrate airport capacity needs.

3. IMPROVING SECURITY FOR TRAVELERS

3.2—The FAA should establish federally mandated standards for security enhancements. Standards have been established for certification of explosives detection systems, the use of trace explosives detection devices, and canine teams; standards are in process for certification of trace explosives detection devices, and the use of manual and automated profiling programs and automated bag match technology.

3.5—The FAA should implement a comprehensive plan to address the threat of explosives and other threat objects in cargo and work with industry to develop new initiatives in this area. A Report submitted, and FAA is incorporating changes into its Air Carrier Standard Security Program.

3.7—The FAA should work with airlines and airport consortia to ensure that all passengers are positively identified and subjected to security procedures before they board aircraft. Comments were received on proposed changes to Air Carrier Standard Security Program and the program will now be finalized.

3.10—The FAA should work with industry to develop a national program to increase the professionalism of the aviation security workforce, including screening personnel. FAA is improving training curricula and working with airlines to deploy the Screener Proficiency Evaluation and Reporting System (SPEARS).

3.12—Establish consortia at all commercial airports to implement enhancements to aviation safety and security. Consortia have been established at 41 major airports and will be expanded to 200 airports by the end of 1998.

3.15—Deploy existing technology. FAA has begun deployment of trace explosives detection devices and SPEARS; deployment of 79 explosives detection systems and advanced automated security devices will continue through 1998.

3.19—Complement technology with automated passenger profiling. Deployment of Computer Assisted Passenger Screening [CAPS] System has begun to all airline reservation systems.

There are several factors that will affect implementation of all the White House Commission recommendations, including those described above.

First, new recommendations have been made and new directions set over the last year. The National Civil Aviation Review Commission (NCARC), established by Congress, evaluated FAA financing and aviation safety. The main financing conclusion was that FAA cannot continue "business as usual", but must pursue innovative financing, including user charges to finance a "Performance-Based Organization" to provide air traffic management services. NCARC's main safety recommendation was for FAA to develop a "Safety Strategic Plan" that prioritizes safety initiatives such as those proposed by the White House Commission.

At the same time, the Department of Transportation and each of its operating administrations have developed new Strategic Plans. For aviation, the key mission areas are the same: safety, security, and an efficient aviation system that serves mobility and economic development. FAA's plan in particular focuses on a core set of priority areas and projects that it will track corporately. Many of the White House Commission's recommendations form the basis for that top priority list.

Another factor that has influenced the speed at which some key White House Commission recommendations are implemented is financing. Congress provided $144 million in supplemental funding in FY 1997 toward the deployment of 54 explosives detection systems, which is proceeding. The White House Commission recommended funding of $100 million per year. A request for $100 million is included in the President's FY 1999 budget request.

Other key recommendations where funding is crucial include accelerated modernization of the National Airspace System (NAS), the related recommendation to ensure the accuracy, availability, and reliability of the Global Positioning System (GPS) for satellite navigation, and conducting research emphasizing human factors and training. No new funding was provided in FY 1997 or 1998. The President's FY 1999 budget proposes a $90 million increase in the Research, Engineering, Development account and a $254.5 million increase in Facilities and Equipment FY 1998 levels. The

President's budget allows us to keep modernization of the air traffic control system on track.

It is here that the financial recommendations of NCARC will come into play, as carried forward in new FAA reauthorization legislation to be introduced in Congress. A key NCARC principle is that, while FAA's safety functions should be paid for by the general public, direct users of air traffic management services should be charged the costs of a separate, performance-based organization to provide those services. The NCARC recommended funding of the safety function should be kept separate, to preserve objectivity and promote safety throughout the aviation system. Those should be goals of Congress, the aviation community, and the Executive Branch in considering the next FAA reauthorization.

Many White House Commission recommendations have been and will be implemented with little or no new external funding. Most are on target to be implemented as planned. In a few cases, issues have been raised that must be considered in implementing recommendations. The Postal Service, for example, has some concerns about screening mailed packages weighing over a pound. These, however, will be addressed. The Federal Government remains committed to timely implementation of the far-reaching recommendations of the White House Commission on Aviation Safety and Security.

d. Security for Passenger Vessels and Passenger Terminals

Navigation and vessel inspection circular no. 3-96, U.S. Department of Transportation, United States Coast Guard, 1996

COMDTPUB P16601
NVIC 3-96

NAVIGATION AND VESSEL INSPECTION CIRCULAR NO. 3-96

Subj: SECURITY FOR PASSENGER VESSELS AND PASSENGER TERMINALS
Ref: (a) Title 33 CFR parts 120 and 128

(b) COMDTINST M16000.12 Marine Safety Manual Vol. VII, Port Security

(c) International Maritime Organization MSC/Circ. 443, "Measures To Prevent Unlawful Acts Against Passengers And Crews On Board Ships"

(d) COMDTINST M5530.1A, Physical Security Program

1. PURPOSE. This Navigation and Vessel Inspection Circular (NVIC) describes the procedures required to implement the new passenger vessel security regulations of Title 33 CFR parts 120 and 128 (reference (a)), that were published on July 18, 1996. Guidance is provided for processing Terminal and Vessel Security Plans, assessing the adequacy of those plans, and establishing annual reporting requirements, incident reporting, and threat dissemination procedures.

2. ACTION. Director, National Maritime Center (NMC), Commanding Officers of Marine Safety Offices, and Captains of the Port (COTP) shall comply with the requirements of this circular.

3. DIRECTIVES AFFECTED. The NVIC affects COMDTINST M16000.12, Marine Safety Manual Vol. VII, Port Security, 2-C.1.b "Physical Security Assessments,"and 2-D "Physical Security Standards" (reference (b)). The information contained in this instruction will be incorporated into the next change to the Marine Safety Manual Vol. II, COMDTINST M16000.12.

4. BACKGROUND.

a. In 1985, a U.S. citizen was killed during the seizure of the ACHILLE LAURO. Since then, the vulnerability of passenger vessels and associated passenger terminals to acts of terrorism has been a significant concern for the international community.

b. To address this threat, the President signed into law the Omnibus Diplomatic Security and Antiterrorism Act of 1986 (Pub. L. 99–399; 100 Stat. 889). Title IX of this law constitutes the International Maritime and Port Security Act. This act amended the Ports and Waterways Safety Act, which then provided the Coast Guard authority to "carry out or require measures, including inspections, port and harbor patrols, the establishment of security

and safety zones, and the development of contingency plans and procedures, to prevent or respond to acts of terrorism." This law also required a proposed plan of action for implementation of security measures at U.S. ports and passenger vessels operating from those ports.

c. Also in 1986, the International Maritime Organization published MSC/Circ. 443 "Measures To Prevent Unlawful Acts Against Passengers And Crews On Board Ships" (reference (c)). This document was the basis for much of the U.S. legislation and rulemaking that followed. In April 1987, the Coast Guard published a notice in the *Federal Register* which listed voluntary security measures based upon reference (c). Since then, the Coast Guard has observed varying degrees of implementation of these measures aboard passenger ships and at passenger terminals. This inconsistency, coupled with the rising spectre of domestic terrorism, indicated that establishment of minimum mandatory security requirements was necessary. As a result, reference (a) was published on July 18, 1996.

5. APPLICABILITY.

a. Passenger Vessels. Reference (a) applies to all passenger vessels over 100 gross tons, carrying more than 12 passengers for hire; making voyages lasting more than 24 hours, any part of which is on the high seas; and for which passengers are embarked or disembarked in the United States or its territories; except, ferries that hold Coast Guard Certificates of Inspection endorsed for "Lakes, Bays, and Sounds", and that transit international waters for only short periods of time on frequent schedules.

b. Passenger Terminals. All passenger terminals used for the assembling, processing, embarking, or disembarking of passengers or baggage for passenger vessels to which reference (a) applies must also comply.

6. DEFINITIONS. For the purpose of interpreting the requirements of reference (a), the following terms are defined:

a. High Seas. "High seas" means all waters that are neither territorial nor internal waters of the United States or of any foreign country.

b. Operator. "Operator" means the person, company, or governmental agency or the representative of a company or governmental agency, that maintains operational control over a passenger vessel or passenger terminal.

c. Passenger Terminal. "Passenger terminal" means any structure used for the assembling, processing, embarking, or disembarking of passengers or baggage for passenger vessels. The passenger terminal includes piers, wharves, and similar structures to which a vessel may be secured; land and water under or in immediate proximity to these structures; buildings on or contiguous to these structures; and equipment and materials on or in these structures.

d. Unlawful Act. "Unlawful Act" means an act that is a felony under U.S. Federal law, under the laws of the State where the vessel is located, or under the laws of the country in which the vessel is registered.

e. Voyage. "Voyage" means the passenger vessels entire course of travel, from the first port at which the vessel embarks passengers

until its return to that port or another port where the majority of the passengers are disembarked and terminate their voyage.

f. Low threat. "Low threat" means the threat of an unlawful act against a passenger vessel or terminal is, though possible, not likely.

g. Medium threat. "Medium threat" means the threat of an unlawful act against a passenger vessel or terminal is possible and that intelligence indicates that terrorists are likely to be active within a specific area, or against a type of vessel or terminal.

h. High threat. "High threat" means the threat of an unlawful act against a passenger vessel or terminal is probable or imminent and that intelligence indicates that terrorists have chosen specific targets.

7. PROCEDURES. Security plans for passenger vessels and terminals must be examined by the Coast Guard. These plans are law enforcement documents and as such are not releasable through the Freedom of Information Act. Passenger Vessel Security Plans are reviewed by the NMC and Passenger Terminal Security Plans are reviewed by the cognizant COTP. No vessel shall embark from or disembark to a terminal which does not hold an examined Terminal Security Plan or a letter from the COTP stating that normal operations may continue until plan review is completed. Likewise, no terminal shall transfer passengers to or from a passenger vessel unless it holds either an examined Vessel Security Plan or a letter from the NMC stating that normal operations may continue until plan review is completed.

a. Vessel Plans.

(1) Vessel operators are responsible for preparing and holding a security plan which meets the requirements of reference (a). Operators must submit two copies of the plan to the NMC at least 60 days before embarking passengers on any voyages which cause the vessel to fall under this regulation, or before October 16, 1996, whichever is later.

(2) If, within 30 days of receipt of a Vessel Security Plan, the NMC is unable to complete the review, a letter will be issued to the vessel operator stating that the Vessel Security Plan is currently under review and granting permission for vessel operations to continue until the examination is completed. The NMC then has an additional 150 days (a total of 180 days from receipt of the plan) to complete an examination and provide a response.

(3) If the NMC finds that the plan meets the requirements of reference (a), the NMC shall mark both copies "Examined by the Coast Guard", return one copy to the vessel operator, and retain the second copy.

(4) If the NMC finds the Vessel Security Plan does not meet the requirements of reference (a), the NMC shall return the plan with an explanation of why it does not meet the requirements to the vessel operator. The second copy of the plan, along with a copy of the response, will be retained by the NMC. Except in emergencies, the NMC will allow the vessel operator 60 days to comply with the requirements.

(5) Each proposed amendment to the plan initiated by the operator of apassenger vessel, including changes to enclosures, must be submitted to the NMC for review at least 30 days before the

amendment is to take effect. The NMC has the discretion to allow a shorter period of time. Copies of accepted amendments shall be retained by the NMC.

(6) If the COTP determines that implementation of the plan is not providing effective security, the COTP shall advise the NMC. The NMC will evaluate the plan based on the COTPs report, and, except in an emergency, will issue to the vessel operator a written notice of matters to address and will allow the vessel operator at least 60 days to submit proposed amendments.

(7) The COTP may give the vessel operator an order to implement increased security measures immediately. The order will incorporate an explanation of the reasons for which the additional measures are necessary.

(8) The COTP shall annually make a brief examination of the vessel's security activities during visits for other purposes, such as control verification examinations. The purpose of the review is to ensure the vessel's security operations are consistent with the plan and will include verifying the presence of an examined security plan on board the vessel, reviewing reports of unlawful acts, and observing the security practices actually in place.

b. Terminal Plans.

(1) Terminal operators are responsible for preparing and holding a security plan which meets the requirements of reference (a). Operators must submit two copies of the plan to the COTP at least 60 days before passengers embark or disembark to or from a vessel, or by October 16, 1996, whichever is later.

(2) If, within 30 days of receipt of a Terminal Security Plan, the COTP is unable to complete the review, a letter will be issued to the terminal operator stating that the Terminal Security Plan is currently under review and granting permission for terminal operations to continue until the examination is completed. The COTP then has an additional 150 days (a total of 180 days from receipt of the plan) to complete an examination and provide a response.

(3) If the COTP finds that the Terminal Security Plan meets the requirements of reference (a), the COTP shall mark both copies "Examined by the Coast Guard", return one copy to the terminal operator, and retain the second copy.

(4) If the COTP finds the Terminal Security Plan does not meet the requirements of reference (a), the COTP shall return the plan with an explanation of why it does not meet the requirements to the terminal operator. The second copy of the plan, along with a copy of the response, will be retained by the COTP. Except in emergencies, the COTP will allow the terminal operator 60 days to comply with the requirements.

(5) The COTP may direct passenger terminal operators to initiate amendmentsto the Terminal Security Plan if the COTP determines that implementation of the plan is not providing effective security. Except in an emergency, the COTP will issue to the operator a written notice of matters to address and will allow the operator at least 60 days to submit proposed amendments.

(6) Each proposed amendment to the plan initiated by the operator of a passenger terminal, including changes to enclosures, must be submitted to the COTP for review at least 30 days before the amendment is to take effect. The COTP has the discretion to allow

a shorter period of time. Copies of accepted amendments shall be retained by the COTP.

(7) The COTP may give the terminal operator an order to implement increased security measures immediately. The order will incorporate an explanation of the reasons for the COTP order.

(8) The COTP shall ensure that the plan reflects the procedures actually in place by conducting annual onsite assessments. The assessment shall consist of verifying the presence of an approved security plan at the terminal, reviewing reports of unlawful acts, and observing the security practices actually in place. The port physical security checklist (enclosure 2–3 to reference (b)) is not required. This process supersedes the annual reporting requirement established by 2-C.1.b "Physical Security Assessments" in reference (b).

c. Enforcement. The COTPs and Commanding Officers of Marine Safety Offices are authorized use of enforcement tools such as Letters of Warning, Notices of Violation, and COTP Orders to gain compliance with this regulation. Civil and criminal penalties are authorized under the provisions of 33 U.S.C. 1221.

d. Right of Appeal. Any person directly affected by a decision or action taken by the NMC may appeal that action or decision to the Chief, Marine Safety and Environmental Protection (Commandant (G-M)) according to the procedures in 46 CFR 1.03–15. Any person directly affected by a decision or action taken by the COTP may appeal that action or decision to the cognizant District Commander according to the procedures in 46 CFR 1.03–15; the District Commander's decision may be further appealed to the Commandant according to the procedures in 46 CFR 1.03–25.

8. INCIDENT REPORTING. Passenger vessels and terminal operators are required to report each breach of security, unlawful act, or the threat of an unlawful act against a vessel, terminal, or the persons aboard them. For incidents that occur within the jurisdiction of the United States, the operator or the operator's representative shall make the report to the cognizant COTP and to the local office of the Federal Bureau of Investigation as soon as possible. Incidents that occur outside of the jurisdiction of the United States shall be reported as soon as practicable to Commandant (G-MOR), 2100 Second Street, SW., room 2100, Washington, DC 20593. Each report must include, to the extent known, the following information:

(1) The vessel's name;

(2) The vessel's flag;

(3) The name of the vessel's master;

(4) If the vessel is moored to a passenger terminal, the name of the terminal security officer;

(5) An account of the incident;

(6) The date, time, and place of the incident;

(7) The number of alleged offenders;

(8) The method used to introduce any prohibited weapon, incendiary, or explosive into or onto the vessel;

(9) A description of any weapon, incendiary, or explosive involved;

(10) A description of how any weapon, incendiary, or explosive involved was concealed and used;

(11) A description of how security was breached;

(12) A statement of what measures have been taken or will be taken to prevent another such incident; and

(13) Each report must stay on file with the security plan for a period of two years. All reports shall be used by the person preparing the ship security survey.

9. THREAT LEVELS.

a. In conjunction with the U.S. Department of Transportation's Office of Intelligence and Security, the Commandant shall direct the implementation of nationwide and local threat levels. The primary means of communicating threat information will be through Domestic Threat Advisories. These advisories will summarize the nature of the threat and will specify changes, if any, to nationwide or local threat levels. The COTPs are expected to share the contents of these advisories with local industry either directly or through appropriate forums such as the port readiness committee.

b. Area Commanders, District Commanders, and COTPs may declare a higher threat level within their respective areas of responsibility, but may not lower a threat level imposed by a higher authority. A change in the local threat level shall be reported to Commandant (G-MOR) via message. The message shall specify the new threat level and reasons for the change.

c. Terrorist Threat Conditions (THREATCONS) (see reference (d)) are used to describe Coast Guard and inter-service support of U.S. military anti-terrorism activities. In other words, THREATCONS describe military security conditions. These THREATCONS are not, in any way, related to thethreat levels described in reference (a), which describe security conditions that affect passenger terminals and vessels.

d. A Security Plan Evaluation Guide (enclosure (1)) was developed using the guidelines in IMO Circular 443. It provides guidance to the industry, COTPs, and the NMC regarding the examination of plans and the security measures that passenger vessels and terminals should take at low, medium, and high threat levels. The COTPs and District Commanders are encouraged to review local contingency plans to ensure that they are complementary to the measures that will be taking place within industry. An underlying assumption in the development of the regulation and this circular is that at high threat levels (or earlier, if warranted) the COTP and other appropriate Federal agencies will be actively involved in assuring the security of affected vessels and terminals. Coordination between the terminals, vessels, COTPs and other local, state, and Federal agencies is imperative for effective security.

J. C. CARD
Rear Admiral, U.S. Coast Guard
Chief, Marine Safety and Environmental Protection
Encl: (1) Security Plan Evaluation Guide

SECURITY PLAN EVALUATION GUIDE

The National Maritime Center (NMC) and Captains of the Port (COTP) should consider the guidelines contained herein when reviewing security plans.

A. TERMINAL SECURITY PLAN.

1. Objectives. The plan should cover procedures for periods of low, medium, and high threats that—

a. Deter unauthorized access to the terminal and its restricted areas and to any passenger vessel moored at the terminal;

b. Deter the introduction of prohibited weapons, incendiaries, and explosives into the terminal and its restricted areas and onto any passenger vessels moored at the terminal;

c. Encourage vigilance, as well as general awareness of security, at the terminal;

d. Provide adequate training to employees of the terminal for security at the terminal;

e. Coordinates responsibilities for security between the operator of each vessel that embarks or disembarks passengers and the terminal operator;

f. Provide information to employees of the terminal and to law-enforcement personnel, in case of an incident affecting security;

g. Provide for amendment of the plan to address any known deficiencies; and

h. Restrict the distribution, disclosure, and availability of information contained in the plan to those persons with an operational need to know.

2. Contents. The COTPs should ensure that security plans contain at least the following information and actions:

a. Terminal Security Officer. The terminal security officer should be identified in the security plan. A list of responsibilities for the terminal security officer and all other security functions should be clearly outlined.

b. Security Survey. Security surveys should be updated at least yearly, or more frequently as needed. The survey should include the date of the survey; names of the owner and operator of the terminal; the name, business address, and telephone number of the terminal security officer; a description of the terminal that includes general layout and access points; intensity of security lighting; restricted areas; emergency equipment; location of firearms and ammunition at the terminal; list of persons authorized to carry firearms and type of firearms carried; number of security personnel employed; and number of other employees normally at the terminal when a vessel embarks and disembarks passengers.

c. Standard Operating Procedures. Any standard operating procedures related to security should be included in the plan. These may include reporting procedures, watchstanding instructions, basic relief schedules, and etc.

d. Barriers. Barriers and their boundaries, when used between restricted and unrestricted areas in the terminal area, should be clearly defined by walls, fences, environmental design, or other security barriers that are either permanent or temporary in nature. They should be designed, located, and constructed to—

(1) Delineate the area protected;

(2) Create a physical and psychological deterrent to persons attempting unauthorized entry;

(3) Delay intruders and enable security personnel to detect intruders;

(4) Have a minimum number of openings that provide readily identifiable places for the controlled entry of persons and vehicles into the restricted area;

(5) Be secured when not watched by security personnel;

(6) When near roadways, must be reinforced to deter penetration by motor vehicles; and

(7) Be kept clear of trees, bushes, and other obstructions.

e. Alarms. Alarms, when used, should activate an audible or visual alarm when an intrusion is detected. The alarm should sound in a place which is continuously staffed by personnel with security responsibilities.

f. Lighting. Passenger terminal operators should provide security lighting between sunset and sunrise. All external lighting should be located or shielded so that it will not be confused with an aid to navigation and will not interfere with safe navigation. Illumination should light each exterior door, gate, fence, pier, wharf, or other point of access to the boarding area for passenger vessels.

g. Communications. Communications should specify the kind of communications to use for a breach of security, an unlawful act or other emergency.

(1) Security personnel of the terminal should be provided a means of continuous communications, such as radio, telephone, or intercom, that enables them to communicate with the terminal security officer, the communications center, or security personnel of the passenger vessel from their duty stations.

(2) Communications should be established immediately with each passenger vessel that docks at the terminal.

(3) A distress signal peculiar to security, indicating a security alert, should be established.

h. Screening. When screening is conducted, it may be done manually, electronically, or by an equivalent means acceptable to the COTP. One or more guards should watch each screening point, whenever passengers or baggage are being assembled, processed, embarked, or disembarked at the terminal. Screening systems should be capable of detecting prohibited weapons, incendiaries, and explosives in accordance with the Terminal Security Plan.

(1) No person refusing to submit to a security screening at a point of access should enter the boarding area.

(2) Each person denied entry for refusing to submit to a security screening should be identified and reported to appropriate authorities.

(3) Security equipment should be kept in good working condition and checked monthly. Records of checks should be maintained for at least 30 days after the date of the check.

(4) Procedures should be in place to ensure any defective or missing security equipment is reported immediately to the terminal security officer.

i. Baggage. Each piece of baggage should be marked, labeled or tagged, or otherwise identified as belonging to a particular passenger. During mediumand high threat periods, it should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel. No unidentified baggage should enter the boarding area.

j. Identification. Each passenger terminal operator should establish a system of identification and control of personnel for the terminal. The plan should cover the following procedures for:

(1) Identifying each person authorized access to a restricted area in the terminal;

(2) Issuing an identification card to each employee of the terminal (permanent identification cards shall contain the cardholder's name, age, height, weight, eye color, expiration date, name of the company that employs the cardholder and an unique number);

(3) Providing a temporary identification card to each contractor, vendor, and other visitor authorized access to a restricted area; and

(4) Identifying each passenger, each time a passenger enters the boarding area.

k. Designated restricted areas. Designated restricted areas should be outlined in the security plan. Restricted areas should be appropriately secured with access limited to authorized personnel. Each restricted area should be secured and conspicuously marked stating that the area has restricted access. Passenger terminals should designate the following areas as restricted areas:

(1) Points of access to the boarding area;

(2) Boarding area for passengers adjacent to where such vessels moor, inside the security barriers and screening points;

(3) Areas for the handling and storage of baggage and cargo;

(4) Areas used to store weapons;

(5) Control rooms for security alarms and monitoring devices; and

(6) Any other areas, as determined by the operator, to which access must be restricted to maintain the security of the terminal and passenger vessels moored at the terminal.

l. Coordination. The Terminal Security Plan should outline all coordination plans and procedures established with the operator of each passenger vessel. The terminal need not duplicate any security provisions fulfilled by the vessel. All responsibilities should be clearly outlined in the plan stating who is responsible for which actions. Copies of agreements should be contained in the security plan.

m. Threat levels. There are three required levels, low, medium, and high.The Terminal Security Plan shall include required actions for each threat level. As a minimum, the following measures should be included:

(1) Low threat level.

—Restricted areas should be included as part of the normal watch routine.

—Baggage, cargo, and stores should be randomly screened.

—Temporary or permanent barriers to maintain segregation between cleared and uncleared passengers and baggage should be utilized.

—Each passenger should show a valid ticket issued by the cruise line to enter the boarding area.

—Each piece of baggage should be marked, labeled or tagged, or otherwise identified as belonging to a particular passenger.

(2) Medium threat level.

—The frequency of security rounds should be double that of the normal watch routine.

—Fifty percent of all baggage, cargo and stores should be screened.

—All passengers and carry-on items should be screened.

—Temporary or permanent barriers to maintain segregation between cleared and uncleared passengers and baggage should be utilized.

—Passengers 18 years of age or older should have a valid ticket and a valid photo identification document, such as a driver's license, passport, or armed forces identification card to enter the boarding area.

—Baggage should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel.

(3) High threat level.

—Restricted areas should have detection systems that activate an audible visual alarm or guards must be posted outside.

—All baggage, cargo and stores should be screened.

—All passengers and carry-on items should screened.

—Buildings and natural barriers such as water, or ravines should be augmented by additional safeguards such as fences, walls, patrols or surveillance.

—Each entering passenger should be compared to official passenger list prior to being allowed in the boarding area.

—Baggage should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel.

o. Amendments. Amendments to the security plan must be included in the security plan. All amendments must bear the notation "Examined by the Coast Guard COTP (port name)" and the date of examination.

B. VESSEL SECURITY PLAN.

1. Objectives. The plan should cover procedures for periods of low, medium, and high threats that—

a. Deter unauthorized access to the vessel and its restricted areas;

b. Deter the introduction of prohibited weapons, incendiaries, and explosives aboard the vessel;

c. Encourage vigilance, as well as general awareness of security, aboard the vessel;

d. Provide adequate training to members of the crew for security aboard the vessel;

e. Coordinate responsibilities for security between the vessel operator and the operator of each terminal at which the vessel embarks or disembarks passengers;

f. Provide information to members of the crew and to law-enforcement personnel, in case of an incident affecting security;

g. Provide for amendment of the plan to address any known deficiencies; and

h. Restrict the distribution, disclosure, and availability of information contained in the plan to those persons with an operational need to know.

2. Contents. The NMC should ensure that security plans contain at least the following information and actions:

a. Vessel Security Officer. The terminal security officer should be identified in the security plan. A list of responsibilities for the terminal security officer and all other security functions should be clearly outlined.

b. Security Survey. Security surveys should be updated at least yearly, or more frequently as needed. The survey should include the date of the survey; names of the owner and operator of the vessel; the name, business address, and telephone number of the vessel security officer; a description of the vessel that includes general layout of the ship; location of areas which have restricted areas; the open deck arrangement including the height of the deck above the ship; emergency and standby equipment available to maintain essential services; number of ships crew.

c. Standard Operating Procedures. Any standard operating procedures related to security should be included in the plan. These may include reporting procedures, watchstanding instructions, basic relief schedules, etc.

d. Alarms. Alarms, when used, should activate an audible or visual alarm when an intrusion is detected. The alarm should sound in a place which is continuously staffed by personnel with security responsibilities.

e. Lighting. While in port, at anchor, or underway the ship's deck and overside should be illuminated in periods of darkness and restricted visibility, but not so as to interfere with required navigation lights and safe navigation.

f. Communications. Communications should specify the kind of communications to use for a breach of security, an unlawful act or other emergency.

(1) Security personnel of the vessel should be provided a means of continuous communications, such as radio, telephone, or intercom, that enables them to communicate with the vessel security officer, the navigational bridge, communications center, or security personnel shoreside from their duty stations.

(2) Communications should be established with each terminal at which the vessel docks immediately after mooring.

(3) A distress signal peculiar to security, indicating a security alert, should be established.

g. Screening. When screening is conducted, it may be done manually, electronically, or by an equivalent means acceptable to the NMC. Screening systems should be capable of detecting prohibited weapons, incendiaries, and explosives in accordance with the Vessel Security Plan.

(1) No person refusing to submit to a security screening at a point of access should board the vessel.

(2) Each person denied entry for refusing to submit to a security screening should be identified and reported to appropriate authorities.

(3) Security equipment should be kept in good working condition and checked monthly. Records of checks should be maintained for at least 30 days after the date of the check.

(4) Procedures should be in place to ensure any defective or missing security equipment is reported immediately to the terminal security officer.

h. Baggage. Each piece of baggage should be marked, labeled or tagged, or otherwise identified as belonging to a particular passenger. During medium and high threat periods, it should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel. No unidentified baggage should be permitted aboard the vessel.

i. Identification. Each passenger vessel operator should establish a system of identification and control of personnel for the vessel. The plan should cover the following procedures for:

(1) Identifying each category of persons authorized to be aboard the vessel and each person authorized access to a restricted area aboard the vessel;

(2) Issuing an identification card to each member of the crew or other employee of the vessel (permanent identification cards should contain the cardholder's name, age, height, weight, eye color, expiration date, name of the company that employs the cardholder and an unique number);

(3) Providing a temporary identification card to each contractor, vendor, and other visitor authorized access to a restricted area; and

(4) Identifying each passenger authorized to board the vessel by comparison against the official passenger list.

j. Designated Restricted Areas. Designated restricted areas should be outlined in the security plan. Restricted areas should be appropriately secured with access limited to authorized personnel. Each restricted area should be secured and conspicuously marked stating that the area has restricted access. Passenger vessels should designate the following areas as restricted areas:

(1) The navigational bridge;

(2) The communications center or radio room

(3) The engine room; and

(4) Any other areas as determined by the operator, to which access must be restricted to maintain the security of the vessel.

k. Coordination. The Vessel Security Plan should outline all coordination plans and procedures established with the operator of each passenger terminal. The vessel need not duplicate any security provisions fulfilled by the terminal. All responsibilities should be clearly outlined in the plan stating who is responsible for which actions on a port by port basis. Copies of agreements should be contained in the security plan.

l. Threat levels. There are three required levels, low, medium, and high. The Terminal Security Plan shall include what is required and what actions must be taken at each threat level. As a minimum, the following measures should be included:

(1) Low threat level.

—Restricted areas should be included as part of the normal watch routine.

—Baggage, cargo and stores should be randomly screened.

—Temporary or permanent barriers to maintain segregation between cleared and passengers and baggage should be utilized.

—Each piece of baggage should be marked, or tagged, or otherwise identified as belonging to a particular passenger.

(2) Medium threat level.

—The frequency of security rounds should be double that of the normal watch routine.

—Fifty percent of all baggage, cargo and stores should be screened.

—All passengers and carry-on items should be screened.

—Temporary or permanent barriers to maintain segregation between cleared and uncleared passengers and baggage should be utilized.

—Passengers 18 years of age or older should have a valid ticket and a valid photo identification document, such as a driver's license, passport, or armed forces identification card to board the vessel.

—Baggage should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel.

(3) High threat level.

—Restricted areas should have intrusion detection systems that activate an audible or visual alarm or guards should be posted outside.

—All baggage, cargo and stores should be screened.

—All passengers and carry-on items should be screened.

—Each entering passenger should be compared to official passenger list prior to being allowed to board the vessel.

—Baggage should be compared against the official passenger list of the vessel prior to being loaded aboard the vessel.

n. Amendments. Amendments to the security plan must be included in the security plan. All amendments must bear the notation "Examined by the Coast Guard COTP (port name)" and the date of examination.

K. BILATERAL AGREEMENTS

CONTENTS

1. Counterterrorism

a. U.S.-South Africa Declaration on Mutual Anti-Crime Prevention, July 23, 1996 [1]

The Government of the United States of America and the Government of the Republic of South Africa,

Recognizing the impact of crime on democracy, stability, and human rights;

Aware that organized criminal elements are attracted to open, free societies with highly developed infrastructures;

Convinced that the illicit use and trafficking in drugs constitute a problem which affects the communities of both countries;

Realizing that money laundering, corruption, and related international criminal activities undermine democratic societies;

Believing that the international nature of most organized criminal activity necessitates that governments coordinate their law enforcement efforts;

Alert to the need for worldwide cooperation in combating international terrorism;

Mindful of the South African Government's National Crime Prevention Strategy of May 1996; and

Observing the recommendations of the March 1996 document of the South African Department of Safety and Security, entitled "Requests for International Assistance;"

Agree on the desirability, and indeed the necessity of mutual cooperation in combating international crime, including international terrorism.

Such cooperation may include but need not be limited to the following:

—assignment of representatives of the U.S. Drug Enforcement Administration to the U.S. Embassy in Pretoria to coordinate intelligence, training, and possible joint operations in combating transnational drug trafficking;

—provision for training and support for drug demand reduction and preventive education outreach;

—establishment of an FBI Legal Attache office in Pretoria to liaise with host country law enforcement organizations in support of law enforcement activities including, but not limited to, the exchange of intelligence information and investigation of international terrorism, financial/computer crimes, kidnappings and other transnational crimes, as well as to facilitate the location, arrest, and extradition of international fugitives within the FBI's jurisdiction;

—development by South Africa of a police training program to enhance professional capabilities in fighting organized crime,

[1] Source: USIA, 1996.

financial crimes, and alien smuggling, which may include specialized courses offered by U.S. law enforcement training programs such as ICITAP (International Criminal Investigative Training Assistance Program);

—inclusion of South African participants in U.S.-administered courses for professionals assigned to the fields of Customs and Immigration, narcotics interdiction, VIP protection, and financial crimes;

—promotion of exchange visits by teams of law enforcement officials ranging from working-level police to public defenders, prosecutors, and judges, up to officials at the ministerial level; and

—pursuit of other exchanges of information, training programs, and international cooperation as may be mutually desirable.

The United States and South Africa are convinced that their mutual cooperation in fighting the scourges of organized crime, drug trafficking, and international terrorism can result in a tangible benefit to their mutual societies, the surrounding regions, and the world.

FOR THE GOVERNMENT OF
THE UNITED STATES OF AMERICA:

FOR THE GOVERNMENT OF
THE REPUBLIC OF SOUTH AFRICA:

Washington, July 23, 1996

b. Counterterrorism Cooperation Accord between the Government of the United States of America and the Government of Israel [1]

The Government of the United States of America and the Government of the State of Israel ("the Parties"):

Unequivocally condemning all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomever committed and whatever the motivation, in particular the recent heinous acts perpetrated against civilians in Israel;

Recalling the declaration of the participants in the historic Middle East Summit of the Peacemakers on March 13, 1996 that acts of terror are "alien to the moral and spiritual values shared by the peoples of the region" and urging all governments to join in condemning and opposing such acts;

Convinced that the suppression of acts of international terrorism, including those in which States are directly or indirectly involved, is an essential element for the maintenance of international peace and security;

Calling upon all states to renounce terrorism and to deny financial support, the use of their territory, the provision of arms and equipment, or any other means of support to terrorist organizations;

Convinced that those responsible for acts of international terrorism must be brought to justice through prosecution, extradition, or other legal mechanisms;

Sharing the view that international cooperation is an essential factor in halting the scourge of international terrorism and that states that support terrorism should be subject to sanctions;

Recalling their long-standing and fruitful cooperation on this and other topics of mutual security concern;

Resolved to strengthen their own cooperation in combatting international terrorism and in encouraging and assisting other states to join in this effort;

Have agreed as follows:

ARTICLE 1

SPHERES OF COOPERATION

1. With a view to enhancing their capabilities to deter, prevent, respond to and investigate international terrorist acts or threats of international terrorist acts against the United States or Israel, and to enlist the cooperation of others in combatting international terrorism, the Parties agree to share expertise and otherwise assist each other in the following spheres, among others:

[1] Source: U.S. Department of State, April 30, 1996

1) sharing of information and analyses regarding terrorists and terrorist organizations;
2) training;
3) exchange of experts;
4) exchange of experience in dealing with terrorist incidents, including crisis management;
5) exchange of information regarding terrorism-related investigations;
6) exchange of information on transfers of funds to organizations involved in international terrorism;
7) extradition, prosecution and other legal mechanisms;
8) research and development;
9) consulting closely on counterterrorism policy, including regional and global counterterrorism initiatives; and
10) enhancing the counterterrorism capabilities of others.

2. This agreement is intended to supplement existing agreements and arrangements between the Parties to address international terrorism. Nothing in this agreement shall be construed as derogating from the provisions of such agreements or arrangements.

ARTICLE 2

ESTABLISHMENT OF JOINT COUNTERTERRORISM GROUP

1. In order to strengthen further their cooperation on counterterrorism the Parties hereby establish the United States-Israel Joint Counterterrorism Group (JCG). The JCG will serve as a forum for regular consultations and development and facilitation of programs of counterterrorism cooperation in the spheres listed in Article 1 as well as on other mutually agreed counterterrorism topics.

2. The JCG will be composed of representatives from each Party, including as appropriate representatives from the various relevant agencies and departments of each Party that work on counterterrorism issues. The JCG will be co-chaired by senior counterterrorism officials of each Party.

3. The JCG will normally meet annually, alternately in the United States and Israel. In addition, special meetings of the JCG may be held to deal with particular issues or at the request of either Party. At the request of the JCG, experts of the Parties may meet and be in direct communication at any other time to assist in fulfilling the purposes of this agreement.

4. The JCG may from time to time enter into written understandings or implementing arrangements setting forth specific activities to be conducted under this agreement.

5. Between meetings of the JCG, participants will maintain contacts with their counterparts as required to carry out the purposes of this agreement.

ARTICLE 3

SECURITY OF INFORMATION

To the extent that any items, plans, specifications or information furnished in connection with the implementation of this agreement are classified by either Party for security purposes, the General Se-

curity of Information Agreement dated 10 December 1982 between the Parties and that Agreement's Industrial Security Annex, dated 3 March 1983, shall apply, unless the Parties agree upon alternative arrangements for protecting the material from unauthorized disclosures.

ARTICLE 4

GENERAL PROVISION

All undertakings of the Parties under this agreement are to be carried out in accordance with their national laws, obligations and policies, and are subject to the availability of appropriated funds, resources and personnel.

ARTICLE 5

INTERPRETATION AND AMENDMENT

1. All questions or disputes related to the interpretation or implementation of this agreement shall be settled exclusively through the diplomatic channel to the mutual satisfaction of the Parties.

2. Either Party may, at any time, request revision of this agreement by giving the other Party written notice. Each Party should be prepared to discuss the proposal within 90 days thereafter.

ARTICLE 6

ENTRY INTO FORCE AND DURATION

This agreement will enter into force on the date of the second of the diplomatic notes by which the two Parties notify each other of the completion of any necessary internal procedures for entry into force of the agreement. It will remain in force until 6 months after either Party provides written notice to the other through the diplomatic channel of its intention to terminate the agreement.

DONE at Washington, D.C., in duplicate, in English and Hebrew, both texts being equally authentic, this 30th day of April, 1996, corresponding to the 11th day of Iyar, 5756.

FOR THE GOVERNMENT OF
THE UNITED STATES OF AMERICA:

FOR THE GOVERNMENT OF
THE STATE OF ISRAEL:

2. Aviation Security

a. Sample Open Skies Agreement

The Government of the United States of America and the Government of the Republic of Korea (hereinafter, "the Parties") ;

Desiring to promote an international aviation system based on competition among airlines in the marketplace with minimum government interference and regulation;

Desiring to facilitate the expansion of international air transport opportunities;

Desiring to make it possible for airlines to offer the traveling and shipping public a variety of service options at the lowest prices that are not discriminatory and do not represent abuse of a dominant position, and wishing to encourage individual airlines to develop and implement innovative and competitive prices;

Desiring to ensure the highest degree of safety and security in international air transport and reaffirming their grave concern about acts or threats against the security of aircraft, which jeopardize the safety of persons or property, adversely affect the operation of air transportation, and undermine public confidence in the safety of civil aviation; and

Being Parties to the Convention on International Civil Aviation, opened for signature at Chicago on December 7, 1944;

Have agreed as follows:

Article 1

Definitions

For the purposes of this Agreement, unless otherwise stated, the term:

1. "Aeronautical authorities means, in the case of the United States, the Department of Transportation, or its successor, and in the case of the Republic of Korea, the Ministry of Construction and Transportation and any person or agency authorized to perform the functions exercised by the said Ministry of Construction and Transportation;

2. "Agreement" means this Agreement, its Annexes, and any amendments thereto;

3. "Air transportation" means the public carriage by aircraft of passengers, baggage, cargo, and mail, separately or in combination, for remuneration or hire;

4. "Convention" means the Convention on International Civil Aviation, opened for signature at Chicago on December 7, 1944, and includes:

   a. any amendment that has entered into force under Article 94 (a) of the Convention and has been ratified by both Parties, and

   b. any Annex or any amendment thereto adopted under Article 90 of the Convention, insofar as such Annex or amendment is at any given time effective for both Parties;

5. "Designated airline" means an airline designated and authorized in accordance with Article 3 of this Agreement;

6. "Full cost" means the cost of providing service plus a reasonable charge for administrative overhead;

7. "International air transportation" means air transportation that passes through the airspace over the territory of more than one State;

8. "Price" means any fare, rate or charge for the carriage of passengers (and their baggage) and/or cargo (excluding mail) in air transportation charged by airlines, including their agents, and the conditions governing the availability of such fare, rate or charge;

9. "Stop for non-traffic purposes" means a landing for any purpose other than taking on or discharging passengers, baggage, cargo and/or mail in air transportation;

10. "Territory" means the land areas under the sovereignty, jurisdiction, protection, or trusteeship of a Party, and the territorial waters adjacent thereto; and

11. "User charge" means a charge imposed on airlines for the provision of airport, air navigation, or aviation security facilities or services including related services and facilities.

Article 2

Grant of Rights

1. Each Party grants to the other Party the following rights for the conduct of international air transportation by the airlines of the other Party:

   a. the right to fly across its territory without landing;

   b. the right to make stops in its territory for non-traffic purposes; and

   c. the rights otherwise specified in this Agreement.

2. Nothing in this Article shall be deemed to confer on the airline or airlines of one Party the rights to take on board, in the territory of the other Party, passengers, their baggage, cargo, or mail carried for compensation and destined for another point in the territory of that other Party.

Article 3

Designation and Authorization

1. Each Party shall have the right to designate as many airlines as it wishes to conduct international air transportation in accordance with this Agreement and to withdraw or alter such designations. Such designations shall be transmitted to the other Party in writing through diplomatic channels, and shall identify whether the airline is authorized to conduct the type of air transportation specified in Annex I or in Annex II or both.

2. On receipt of such a designation, and of applications from the designated airline, in the form and manner prescribed for operating authorizations and technical permissions, the other Party shall grant appropriate authorizations and permissions without any undue delay, provided:

   a. substantial ownership and effective control of that airline are vested in the Party designating the airline, nationals of that Party, or both;

   b. the designated airline is qualified to meet the conditions prescribed under the laws and regulations normally applied to the operation of international air transportation by the Party considering the application or applications; and

   c. the Party designating the airline is maintaining and administering the standards set forth in Article 6 (Safety) and Article 7 (Aviation Security).

Article 4

Revocation of Authorization

1. Either Party may revoke, suspend or limit the operating authorizations or technical permissions of an airline designated by the other Party where:

   a. substantial ownership and effective control of that airline are not vested in the other Party, the Party's nationals, or both;

b. that airline has failed to comply with the laws and regulations referred to in Article 5 (Application of Laws) of this Agreement; or

c. the other Party is not maintaining and administering the standards as set forth in Article 6 (Safety).

2. Unless immediate action is essential to prevent further noncompliance with subparagraphs 1b or 1c of this Article, the rights established by this Article shall be exercised only after consultation with the other Party.

3. This Article does not limit the rights of either Party to withhold, revoke, limit or impose conditions on the operating authorization or technical permission of an airline or airlines of the other Party in accordance with the provisions of Article 7 (Aviation Security).

Article 5

Application of Laws

1. While entering, within, or leaving the territory of one Party, its laws and regulations relating to the operation and navigation of aircraft shall be complied with by the other Party's airlines.

2. While entering, within, or leaving the territory of one Party, its laws and regulations relating to the admission to or departure from its territory of passengers, crew or cargo on aircraft (including regulations relating to entry, clearance, aviation security, immigration, passports, customs and quarantine or, in the case of mail, postal regulations) shall be complied with by, or on behalf of, such passengers, crew or cargo of the other Party's airlines.

Article 6

Safety

1. Each Party shall recognize as valid, for the purpose of operating the air transportation provided for in this Agreement, certificates of airworthiness, certificates of competency, and licenses issued or validated by the other Party and still in force, provided that the requirements for such certificates or licenses at least equal the minimum standards that may be established pursuant to the Convention. Each Party may, however, refuse to recognize as valid for the purpose of flight above its own territory, certificates of competency and licenses granted to or validated for its own nationals by the other Party.

2. Either Party may request consultations concerning the safety standards maintained by the other Party relating to aeronautical facilities, aircrews, aircraft, and operation of the designated airlines. If, following such consultations, one Party finds that the other Party does not effectively maintain and administer safety standards and requirements in these areas that at least equal the minimum standards that may be established pursuant to the Convention, the other Party shall be notified of such findings and the steps considered necessary to conform with these minimum standards, and the other Party shall take appropriate corrective action. Each Party reserves the right to withhold, revoke, or limit the operating authorization or technical permission of an airline or airlines designated by the other Party in the event the other Party does not take such appropriate corrective action within a reasonable time.

Article 7

Aviation Security

1. In accordance with their rights and obligations under international law, the Parties reaffirm that their obligation to each other to protect the security of civil aviation against acts of unlawful interference forms an integral part of this Agreement. Without limiting the generality of their rights and obligations under international law, the Parties shall in particular act in conformity with the provisions of the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on September 14, 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on December 16, 1970, and the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on September 23, 1971, and the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, done at Montreal on February 24, 1988.

2. The Parties shall provide upon request all necessary assistance to each other to prevent acts of unlawful seizure of civil aircraft and other unlawful acts against the safety of such aircraft, of their passengers and crew, and of airports and air navigation facilities, and to address any other threat to the security of civil air navigation.

3. The Parties shall, in their mutual relations, act in conformity with the aviation security provisions established by the International Civil Aviation Organization and designated as Annexes to the Convention; they shall require that operators of aircraft of their registry, operators of aircraft who have their principal place of business or permanent residence in their territory, and the operators of airports in their territory act in conformity with such aviation security provisions.

4. Each Party agrees to observe the security provisions required by the other Party for entry into, for departure from, and while within the territory of that other Party and to take adequate measures to protect aircraft and to inspect passengers, crew, and their baggage and carry-on items, as well as cargo and aircraft stores, prior to and during boarding or loading. Each Party shall also give positive consideration to any request from the other Party for special security measures to meet a particular threat.

5. When an incident or threat of an incident of unlawful seizure of aircraft or other unlawful acts against the safety of passengers, crew, aircraft, airports or air navigation facilities occurs, the Parties shall assist each other by facilitating communications and other appropriate measures intended to terminate rapidly and safely such incident or threat.

6. When a Party has reasonable grounds to believe that the other Party has departed from the aviation security provisions of this Article, the aeronautical authorities of that Party may request immediate consultations with the aeronautical authorities of the other Party. Failure to reach a satisfactory agreement within 15 days from the date of such request shall constitute grounds to withhold, revoke, limit, or impose conditions on the operating authorization and technical permissions of an airline or airlines of that Party. When required by an emergency, a Party may take interim action prior to the expiry of 15 days.

Article 8

Commercial Opportunities

1. The airlines of each Party shall have the right to establish offices in the territory of the other Party for the promotion and sale of air transportation.

2. The designated airlines of each Party shall be entitled, in accordance with the laws and regulations of the other Party relating to entry, residence, and employment, to bring in and maintain in the territory of the other Party managerial, sales, technical, operational; and other specialist staff required for the provision of air transportation.

3. Each designated airline shall have the right to perform its own ground-handling in the territory of the other Party ("self-handling") and shall have the right to perform such services on behalf of other airlines of the Parties or of third countries[1], or at its option, select among competing agents for such services in whole or in part. The rights shall be subject only to physical constraints resulting from considerations of airport safety. Where such considerations preclude self-handling, ground services shall be available on an equal basis to all airlines; charges shall be based on the costs of services provided; and such services shall be comparable to the kind and quality of services as if self-handling were possible.

4. Any airline of each Party may engage in the sale of air transportation in the territory of the other Party directly and, at the airline's discretion, through its agents, except as may be specifically provided by the charter regulations of the country in which the charter originates that relate to the protection of passenger funds, and passenger cancellation and refund rights. Each airline shall have the right to sell such transportation, and any person shall be free to purchase such transportation, in the currency of that territory or in freely convertible currencies.

5. Each airline shall have the right to convert and remit to its country, on demand, local revenues in excess of sums locally disbursed. Conversion and remittance shall be permitted promptly without restrictions or taxation in respect thereof at the rate of exchange applicable to current transactions and remittance on the date the carrier makes the initial application for remittance.

6. The airlines of each Party shall be permitted to pay for local expenses, including purchases of fuel, in the territory of the other Party in local currency. At their discretion, the airlines of each Party may pay for such expenses in the territory of the other Party in freely convertible currencies according to local currency regulation.

---

1) The Governments of both Parties recognize that there may be limitations imposed by local authorities that restrict the rights of designated airline(s) to perform some third-party ground-handling services.

7. In operating or holding out the authorized services on the agreed routes, any designated airline of one Party may enter into cooperative marketing arrangements such as blocked-space, code-sharing or leasing arrangements, with

   a) an airline or airlines of either Party; and

   b) an airline or airlines of a third country, provided that such third country authorizes or allows comparable arrangements between the airlines of the other Party and other airlines on services to, from and via such third country.

provided that all airlines in such arrangements 1) hold the appropriate authority and 2) meet the requirements normally applied to such arrangements.

8. Notwithstanding any other provision of this Agreement, airlines and indirect providers of cargo transportation of both Parties shall be permitted, without restriction, to employ in connection with international air transportation any surface transportation for cargo to or from any points in the territories of the Parties or in third countries, including transport to and from all airports with customs facilities, and including, where applicable, the right to transport cargo in bond under applicable laws and regulations. Such cargo, whether moving by surface or by air, shall have access to airport customs processing and facilities. Airlines may elect to perform their own surface transportation or to provide it through arrangements with other surface carriers, including surface transportation operated by other airlines and indirect providers of cargo air transportation. Such intermodal cargo services may be offered at a single, through price for the air and surface transportation combined, provided that shippers are not misled as to the facts concerning such transportation.

Article 9

Customs Duties and Charges

1. On arriving in the territory of one Party, aircraft operated in international air transportation by the designated airlines of the other Party, their regular equipment, ground equipment, fuel, lubricants, consumable technical supplies, spare parts (including engines), aircraft stores (including but not limited to such items of food, beverages and liquor, tobacco and other products destined for sale to or use by passengers in limited quantities during flight), and other items intended for or used solely in connection with the operation or servicing of aircraft engaged in international air transportation shall be exempt, on the basis of reciprocity, from all import restrictions, property taxes and capital levies, customs duties, excise taxes, and similar fees and charges that are (1) imposed by the national authorities, and (2) not based on the cost of services, provided that such equipment and supplies remain on board the aircraft.

2. There shall also be exempt, on the basis of reciprocity, from the taxes, levies, duties, fees and charges referred to in paragraph 1 of this Article, with the exception of charges based on the cost of the service provided:

   a. aircraft stores introduced into or supplied in the territory of a Party and taken on board, within reasonable limits, for use on outbound aircraft of an airline of the other Party engaged in international air transportation, even when these stores are to be used on a part of the journey performed over the territory of the Party in which they are taken on board;

   b. ground equipment and spare parts (including engines) introduced into the territory of a Party for the servicing, maintenance, or repair of aircraft of an airline of the other Party used in international air transportation;

   c. fuel, lubricants and consumable technical supplies introduced into or supplied in the territory of a Party for use in an aircraft of an airline of the other Party engaged in international air transportation, even when these supplies are to be used on a part of the journey performed over the territory of the Party in which they are taken on board; and

d. promotional and advertising materials introduced into or supplied in the territory of one Party and taken on board, within reasonable limits, for use on outbound aircraft of an airline of the other Party engaged in international air transportation, even when these stores are to be used on a part of the journey performed over the territory of the Party in which they are taken on board.

3. Equipment and supplies referred to in paragraphs 1 and 2 of this Article may be required to be kept under the supervision or control of the appropriate authorities.

4. The exemptions provided by this Article shall also be available where the designated airlines of one Party have contracted with another airline, which similarly enjoys such exemptions from the other Party, for the loan or transfer in the territory of the other Party of the items specified in paragraphs 1 and 2 of this Article.

Article 10

User Charges

1. User charges that may be imposed by the competent charging authorities or bodies of each Party on the airlines of the other Party shall be just, reasonable, not unjustly discriminatory, and equitably apportioned among categories of users. In any event, any such user charges shall be assessed on the airlines of the other Party on terms not less favorable than the most favorable terms available to any other airline at the time the charges are assessed.

2. User charges imposed on the airlines of the other Party may reflect, but shall not exceed, the full cost to the competent charging authorities or bodies of providing the appropriate airport, airport environmental, air navigation, and aviation security facilities and services at the airport or within the airport system. Such full cost may include a reasonable return on assets, after depreciation. Facilities and services for which charges are made shall be provided on an efficient and economic basis.

3. Each Party shall encourage consultations between the competent charging authorities or bodies in its territory and the airlines using the services and facilities, and shall encourage the competent charging authorities or bodies and the airlines to exchange such information as may be necessary to permit an accurate review of the reasonableness of the charges in accordance with the principles of paragraphs (1) and (2) of this Article. Each Party shall encourage the competent charging authorities to provide users with reasonable notice of any proposal for changes in user charges to enable users to express their views before changes are made.

4. Neither Party shall be held, in dispute resolution procedures pursuant to Article 14, to be in breach of a provision of this Article, unless (i) it fails to undertake a review of the charge or practice that is the subject of complaint by the other Party within a reasonable amount of time; or (ii) following such a review it fails to take all steps within its power to remedy any charge or practice that is inconsistent with this Article.

Article 11

Fair Competition

1. Each Party shall allow a fair and equal opportunity for the designated airlines of both Parties to compete in providing the international air transportation governed by this Agreement.

2. Each Party shall allow each designated airline to determine the frequency and capacity of the international air transportation it offers based upon commercial considerations in the marketplace. Consistent with this right, neither Party shall unilaterally limit the volume of traffic, frequency or regularity of service, or the aircraft type or types operated by the designated airlines of the other Party, except as may be required for customs, technical, operational, or environmental reasons under uniform conditions consistent with Article 15 of the Convention.

3. Neither Party shall impose on the other Party's designated airlines a first-refusal requirement, uplift ratio, no-objection fee, or any other requirement with respect to capacity, frequency or traffic that would be inconsistent with the purposes of this Agreement.

4. Neither Party shall require the filing of schedules, programs for charter flights, or operational plans by airlines of the other Party for approval, except as may be required on a non-discriminatory basis to enforce the uniform conditions foreseen by paragraph 2 of this Article or as may be specifically authorized in an Annex to this Agreement. If a Party requires filings for information purposes, it shall minimize the administrative burdens of filing requirements and procedures on air transportation intermediaries and on designated airlines of the other Party.

Article 12

Pricing

1. Each Party shall allow prices for air transportation to be established by each designated airline based upon commercial considerations in the marketplace. Intervention by the Parties shall be limited to:

   a. prevention of unreasonably discriminatory prices or practices;

   b. protection of consumers from prices that are unreasonably high or restrictive due to the abuse of a dominant position; and

   c. protection of airlines from prices that are artificially low due to direct or indirect governmental subsidy or support.

2. Each Party may require notification to or filing with its aeronautical authorities of prices to be charged to or from its territory by airlines of the other Party. Notification or filing by the airlines of both Parties may be required no more than 30 days before the proposed date of effectiveness. In individual cases, notification or filing may be permitted on shorter notice than normally required. Neither Party shall require the notification or filing by airlines of the other Party of prices charged by charterers to the public, except as may be required on a non-discriminatory basis for information purposes.

3. Neither Party shall take unilateral action to prevent the inauguration or continuation of a price proposed to be charged or charged by (a) an airline of either Party for international air transportation between the territories of the Parties, or (b) an airline of one Party for international air transportation between the territory of the other Party and any other country, including in both cases transportation on an interline or intraline basis. If either Party believes that any such price is inconsistent with the considerations set forth in paragraph (1) of this Article, it shall request consultations and notify the other Party of the reasons for its dissatisfaction as soon as possible. These consultations shall be held not later than 30 days after receipt of the request and the Parties shall cooperate in securing information necessary for reasoned resolution of the issue. If the Parties reach agreement with respect to a price for which a notice of dissatisfaction has been given, each Party shall use its best efforts to put that agreement into effect. Without such mutual agreement, the price shall go into effect or continue in effect.

Article 13

Consultations

Either Party may, at any time, request consultations relating to this Agreement. Such consultations shall begin at the earliest possible date, but not later than 60 days from the date the other Party receives the request unless otherwise agreed.

Article 14

Settlement of Disputes

1. Any dispute arising under this Agreement, except those that may arise under paragraph 3 of Article 12 (Pricing), that is not resolved by a first round of formal consultations may be referred by agreement of the Parties for decision to some person or body. If the Parties do not so agree, the dispute shall, at the request of either Party, be submitted to arbitration in accordance with the procedures set forth below.

2. Arbitration shall be by a tribunal of three arbitrators to be constituted as follows:

   a. Within 30 days after the receipt of a request for arbitration, each Party shall name one arbitrator. Within 60 days after these two arbitrators have been named, they shall by agreement appoint a third arbitrator, who shall act as President of the arbitral tribunal;

   b. If either Party fails to name an arbitrator, or if the third arbitrator is not appointed in accordance with subparagraph a of this paragraph, either Party may request the President of the Council of the International Civil Aviation Organization to appoint the necessary arbitrator or arbitrators within 30 days. If the President of the Council is of the same nationality as one of the Parties, the most senior Vice President who is not disqualified on that ground shall make the appointment.

3. Except as otherwise agreed, the arbitral tribunal shall determine the limits of its jurisdiction in accordance with this Agreement and shall establish its own procedural rules. The tribunal, once formed, may recommend interim relief measures pending its final determination. At the direction of the tribunal or at the request of either of the Parties, a conference to determine the precise issues to be arbitrated and the specific procedures to be followed shall be held not later than 15 days after the tribunal is fully constituted.

4. Except as otherwise agreed or as directed by the tribunal, each Party shall submit a memorandum within 45 days of the time the tribunal is fully constituted. Replies shall be due 60 days later. The tribunal shall hold a hearing at the request of either Party or on its own initiative within 15 days after replies are due.

5. The tribunal shall attempt to render a written decision within 30 days after completion of the hearing or, if no hearing is held, after the date both replies are submitted. The decision of the majority of the tribunal shall prevail.

6. The Parties may submit requests for clarification of the decision within 15 days after it is rendered and any clarification given shall be issued within 15 days of such request.

7. Each Party shall, to the degree consistent with its national law, give full effect to any decision or award of the arbitral tribunal.

8. The expenses of the arbitral tribunal, including the fees and expenses of the arbitrators, shall be shared equally by the Parties. Any expenses incurred by the President of the Council of the International Civil Aviation Organization in connection with the procedures of paragraph 2.b. of this Article shall be considered to be part of the expenses of the arbitral tribunal.

Article 15

Termination

Either Party may, at any time, give notice in writing to the other Party of its decision to terminate this Agreement. Such notice shall be sent simultaneously to the International Civil Aviation Organization. This Agreement shall terminate at midnight (at the place of receipt of the notice to the other Party) immediately before the first anniversary of the date of receipt of the notice by the other Party, unless the notice is withdrawn by agreement of the Parties before the end of this period.

Article 16

Registration with ICAO

This Agreement and all amendments thereto shall be registered with the International Civil Aviation Organization.

Article 17

Entry into Force

1. This Agreement and its Annexes shall enter into force on the date of signature.
2. Upon entry into force, this Agreement shall supersede the following treaties:
   a. Air Transport Agreement between the Government of the Republic of Korea and the Government of the United States of America, signed at Washington on April 24, 1957(hereinafter referred to as "the 1957 Agreement");
   b. Amendment of the 1957 Agreement, concluded by Exchange of Notes at Washington on March 26, 1971;
   c. Exemption Agreement for the Introduction of Ground Equipment of Aircraft between the Government of the Republic of Korea and the Government of the United States of America, concluded by Exchange of Notes at Washington on March 26, 1971;
   d Memorandum of Understanding to Amend the 1957 Agreement, as amended on March 26, 1971, concluded by Exchange of Notes at Seoul on March 22, 1979:
   e. Agreement for the Inclusion of Civil Aviation Security Provisions in the 1957 Agreement, concluded by exchange of Notes at Seoul on September 15, 1988;
   f . Memorandum of Understanding to Supplement and Amend the 1957 Agreement, as amended, concluded by Exchange of Notes at Seoul on November 22, 1991."

IN WITNESS WHEREOF the undersigned, being duly authorized by their respective Governments, have signed this Agreement.

DONE AT [place], this [day] day of [month], [year] in duplicate, in the English and the Korean languages, each text being equally authentic.

FOR THE GOVERNMENT OF THE UNITED STATES OF AMERICA

FOR THE GOVERNMENT OF THE REPUBLIC OF KOREA

ANNEX I

Scheduled Air Transportation

Section 1

Routes

Airlines of each Party designated under this Annex shall, in accordance with the terms of their designation, be entitled to perform scheduled international air transportation between points on the following routes[2]:

A.

Routes for the airline or airlines designated by the Government of the United States:

From points behind the United States via the United States and intermediate points to a point or points in the Republic of Korea and beyond.

B.

Routes for the airline or airlines designated by the Government of the Republic of Korea :

From points behind the Republic of Korea via the Republic of Korea and intermediate points to a point or points in the United States and beyond.

---

2). The provisions of Annex I shall not be construed to give U.S. designated airlines the right to operate air services to/from any point in the Republic of Korea from/to any point in the northern part of the Korean peninsula which is not under the administrative control of the Republic of Korea.

Section 2

Operational Flexibility

Each designated airline may, on any or all flights and at its option:

1. Operate flights in either or both directions;
2. Combine different flight numbers within one aircraft operation;
3. Serve behind, intermediate, and beyond points and points in the territories of the Parties on the routes in any combination and in any order;
4. Omit stops at any point or points;
5. Transfer traffic from any of its aircraft to any of its other aircraft at any point on the routes; and
6. Serve points behind any point in its territory with or without change of aircraft or flight number and may hold out and advertise such services to the public as through services;

without directional or geographic limitation and without loss of any right to carry traffic otherwise permissible under this Agreement; provided that the service serves a point in the territory of the Party designating the airline.

Section 3

Change of Gauge

On any segment or segments of the routes above, any designated airline may perform international air transportation without any limitation as to change, at any point on the route, in type or number of aircraft operated; provided that, in the outbound direction, the transportation beyond such point is a continuation of the transportation from the territory of the Party that has designated the airline and, in the inbound direction, the transportation to the territory of the Party that has designated the airline is a continuation of the transportation from beyond such point.

ANNEX II

Charter Air Transportation

Section 1

Airlines of each Party designated under this Annex shall, in accordance with the terms of their designation, have the right to carry international charter traffic of passengers (and their accompanying baggage) and/or cargo (including, but not limited to, freight forwarder, split, and combination (passenger/cargo) charters)[3)]

Between any point or points in the territory of the Party that has designated the airline and any point or points in the territory of the other Party; and

Between any point or points in the territory of the other Party and any point or points in a third country or countries; provided that such service constitutes part of a continuous operation, with or without a change of aircraft, that includes service to the homeland for the purpose of carrying local traffic between the homeland and the territory of the other Party.

In the performance of services covered by this Annex, airlines of each Party designated under this Annex shall also have the right: (1) to make stopovers at any points whether within or outside of the territory of either Party; (2) to carry transit traffic through the other Party's territory; (3) to combine on the same aircraft traffic originating in one Party's territory, traffic originating in the other Party's territory, and traffic originating in third countries; and (4) to perform international air transportation without any limitation as to change, at any point on the route, in type or number of aircraft operated; provided that, in the outbound direction, the transportation beyond such point is a

---

3). The provisions of Annex II shall not be construed to give U.S. designated airlines the right to operate air services to/from any point in the Republic of Korea from/to any point in the northern part of the Korean peninsula which is not under the administrative control of the Republic of Korea.

continuation of the transportation from the territory of the Party that has designated the airline and in the inbound direction, the transportation to the territory of the Party that has designated the airline is a continuation of the transportation from beyond such point.

Each Party shall extend favorable consideration to applications by airlines of the other Party to carry traffic not covered by this Annex on the basis of comity and reciprocity.

Section 2

Any airline designated by either Party performing international charter air transportation originating in the territory of either Party, whether on a one-way or round-trip basis, shall have the option of complying with the charter laws, regulations, and rules either of its homeland or of the other Party. If a Party applies different rules, regulations, terms, conditions, or limitations to one or more of its airlines, or to airlines of different countries, each designated airline shall be subject to the least restrictive of such criteria.

However, nothing contained in the above paragraph shall limit the rights of either Party to require airlines designated under this Annex by either Party to adhere to requirements relating to the protection of passenger funds and passenger cancellation and refund rights.

Section 3

Except with respect to the consumer protection rules referred to in the preceding paragraph above, neither Party shall require an airline designated under this Annex by the other Party, in respect of the carriage of traffic from the territory of that other Party or of a third country on a one-way or round-trip basis, to submit more than a declaration of conformity with the applicable laws, regulations and rules referred to under section 2 of this Annex or of a waiver of these laws, regulations, or rules granted by the applicable aeronautical authorities.

ANNEX III

Principles of Non-Discrimination Within
and Competition among Computer Reservations Systems

Recognizing that Article 11 (Fair Competition) of this Agreement guarantees the airlines of both Parties "a fair and equal opportunity to compete,"

Considering that one of the most important aspects of the ability of an airline to compete is its ability to inform the public of its services in a fair and impartial manner, and that, therefore, the quality of information about airline services available to travel agents who directly distribute such information to the traveling public and the ability of an airline to offer those agents competitive computer reservations systems (CRSs) represent the foundation for an airline's competitive opportunities, and

Considering that it is equally necessary to ensure that the interests of the consumers of air transport products are protected from any misuse of such information and its misleading presentation and that airlines and travel agents have access to effectively competitive computer reservations systems:

1. The Parties agree that CRSs will have integrated primary displays for which:

   a. Information regarding international air services, including the construction of connections on those services, shall be edited and displayed based on non-discriminatory and objective criteria that are not influenced, directly or indirectly, by airline or market identity. Such criteria shall apply uniformly to all participating airlines.

   b. CRS data bases shall be as comprehensive as possible.

   c. CRS vendors shall not delete information submitted by participating airlines; such information shall be accurate and transparent; for example, code-shared and change-of-gauge flights and flights with stops should be clearly identified as having those characteristics.

d. All CRSs that are available to travel agents who directly distribute information about airline services to the traveling public in either Party's territory shall not only be obligated to, but shall also be entitled to, operate in conformance with the CRS rules that apply in the territory where the CRS is being operated.

e. Travel agents shall be allowed to use any of the secondary displays available through the CRS so long as the travel agent makes a specific request for that display.

2. A Party shall require that each CRS vendor operating in its territory allow all airlines willing to pay any applicable non-discriminatory fee to participate in its CRS. A Party shall require that all distribution facilities that a system vendor provides shall be offered on a non-discriminatory basis to participating airlines. A Party shall require that CRS vendors display, on a non-discriminatory, objective, carrier-neutral and market-neutral basis the international air services of participating airlines in all markets in which they wish to sell those services. Upon request, a CRS vendor shall disclose details of its data base update and storage procedures, its criteria for editing and ranking information, the weight given to such criteria, and the criteria used for selection of connect points and inclusion of connecting flights.

3. CRS vendors operating in the territory of one shall be entitled to bring in, maintain, and make freely available their CRSs to travel agencies or travel companies whose principal business is the distribution of travel-related products in the territory of the other Party if the CRS complies with these principles.

4. Neither Party shall, in its territory, impose or permit to be imposed on the CRS vendors of the other Party more stringent requirements with respect to access to and use of communication facilities, selection and use of technical CRS hardware and software, and the technical installation of CRS hardware, than those imposed on its own CRS vendors.

5. Neither Party shall, in its territory, impose or permit to be imposed on the CRS vendors of the other Party more restrictive requirements with respect to CRS displays (including edit and display parameters) operation, or sale than those imposed on its own CRS vendors.

6. CRSs in use in the territory of one Party that comply with these principles and other relevant nondiscriminatory regulatory, technical, and security standards shall be entitled to effective and unimpaired access in the territory of the other Party. One aspect of this is that a designated airline shall participate in such a system as fully in its homeland territory as it does in any system offered to travel agents in the territory of the other Party. Owners/operators of CRSs of one Party shall have the same opportunity to own/operate CRSs that conform to these principles within the territory of the other Party as do owners/operators of that Party. Each Party shall ensure that its airlines and its CRS vendors do not discriminate against travel agents in their homeland territory because of their use or possession of a CRS also operated in the territory of the other Party.

Aviation: Security

Agreement signed at Manama November 15, 1992;
Entered into force November 15, 1992.

CIVIL AVIATION SECURITY AGREEMENT BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE STATE OF BAHRAIN

The Government of the United States of America and the Government of the State of Bahrain, hereinafter (the Parties):

Having regard to our civil air transport relations, which are conducted on the basis of comity and reciprocity;

Reaffirming, that our obligation to protect, in our mutual relationship, the security of civil aviation against acts of unlawful interference is an integral part of our civil air obligations under international law;

Noting, that each Party has the right to withhold, revoke, limit or impose conditions on the operating authorization or technical permission of an airline or airlines designated by the other party as it deems appropriate to ensure the security of civil aviation;

Have agreed as follows:

ARTICLE 1

The Parties shall provide upon request all necessary assistance to each other to prevent acts of unlawful seizure of aircraft and other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities and any other threat to aviation security.

ARTICLE II

The Parties shall act in conformity with the provisions of the Convention on Offenses and Certain other acts Committed On Board Aircraft, signed at Tokyo on September 14, 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on December 16, 1970 and the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, signed at Montreal on September 23, 1971.[1]

[1] TIAS 6768, 7192, 7570; 20 UST 2941; 22 UST 1641; 24 UST 564.

ARTICLE III

The Parties shall, in their mutual relations, act in conformity with the aviation security provisions established by the International Civil Aviation Organization and designated as Annexes to the Convention on International Civil Aviation;[1] they shall require that operators of aircraft of their registry or operators who have their principal place of business or permanent residence in their territory and that operators of airports in their territory act in conformity with such aviation security provisions.

ARTICLE IV

Each Party agrees to observe the security provisions required by the other Party for entry into the territory of that other Party and to take adequate measures to protect aircraft and to inspect passengers, crew, their carry-on items as well as cargo and aircraft stores prior to and during boarding or loading. Each Party shall also give positive consideration to any request from the other party for special security measures to meet a particular threat.

ARTICLE V

When an incident or threat of an incident of unlawful seizure of aircraft or other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities occurs, the Parties shall assist each other by facilitating communications and other appropriate measures intended to terminate rapidly and safely such incident or threat thereof.

ARTICLE VI

When a Party has reasonable grounds to believe that the other Party has departed from the provision of the agreement, that Party may request immediate consultations with the other Party.

[1] TIAS 1591, 6605, 6681; 61 Stat. 1180; 19 UST 7693; 20 UST 718.

ARTICLE VII

This agreement shall enter into force upon signature.

IN WITNESS WHEREOF, The undersigned being duly authorized by their respective Governments, have signed this Agreement.

DONE IN BAHRAIN, IN DUPLICATE, THIS FIFTEENTH DAY OF NOVEMBER 1992.

Air Transport Services: Security Provisions

Agreement amending the agreement of April 24, 1957, as amended.
Effected by exchange of notes
Signed at Seoul September 15, 1988;
Entered into force September 15, 1988.

The American Ambassador to the Korean Minister of Foreign Affairs

EMBASSY OF THE
UNITED STATES OF AMERICA

Seoul, September 15, 1988

No. 303

Excellency:

I have the honor to refer to the consultations which took place in Washington, D.C. from June 2 to June 3, 1988 between the representatives of the two governments to discuss the issue of inclusion of Civil Aviation Security Provisions in the Air Transport Agreement between the Government of the United States of America and the Government of the Republic of Korea which was signed and entered into force on April 24, 1957.[1]

The Government of the United States of America proposes that the following "Article 11 BIS" shall be added after the existing "Article 11" of the above mentioned Agreement:

"Article 11 BIS

Aviation Security

(A) In accordance with their rights and obligations under international law, the contracting parties reaffirm that their obligation to protect, in their mutual relationship, the security of civil aviation against acts of unlawful interference forms an integral part of this Agreement.

His Excellency
Kwang Soo Choi,
Minister of Foreign Affairs,
Republic of Korea

[1] TIAS 3807; 8 UST 549.

(B) The contracting parties shall provide upon request all necessary assistance to each other to prevent acts of unlawful seizure of aircraft and other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities and any other threat to aviation security.

(C) The contracting parties shall act in conformity with the provisions of the Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on 14 September 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at the Hague on 16 December 1970 and the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation signed at Montreal on 23 September 1971.[1]

(D) The contracting parties shall, in their mutual relations, act in conformity with the aviation security standards and, so far as they are applied by them, the recommended practices established by the International Civil Aviation Organization, and designated as Annexes to the Convention on International Civil Aviation[2] and shall require that operators of aircraft of their registry, operators who have their principal place of business or permanent residence in their territory, and the operators of international airports in their territory act in conformity with such aviation security provisions. Each contracting party shall give advance information to the other contracting party of its intention to notify ICAO of any differences to the ICAO standards.

(E) Each contracting party agrees to observe the security provisions required by the other contracting party for entry into the territory of that other contracting party and to take adequate measures to protect aircraft and to inspect passengers, crew, their carry-on items as well as cargo and aircraft stores prior to and during boarding or loading. Each contracting party shall also give positive consideration to any request from the other contracting party for special security measures to meet a particular threat.

(F) When an incident or threat of an incident of unlawful seizure of aircraft or other unlawful acts against the safety of passengers, crew, aircraft, airports and air navigation facilities occurs, the contracting parties shall assist each other by facilitating communications and other appropriate measures intended to terminate rapidly and safely such incident or threat thereof.

(G) When a contracting party has reasonable grounds to believe that the other contracting party has departed from the aviation security provisions of this Article, the aeronautical authorities of that contracting party may request immediate consultations with the aeronautical authorities of the other contracting party. Fail-

[1] TIAS 6768, 7192, 7570; 20 UST 2941; 22 UST 1641; 24 UST 564.

ure to reach a satisfactory agreement within 30 days from the date of such request will constitute grounds to withhold, revoke, limit or impose conditions on the operating authorization or technical permission of an airline or airlines of the other contracting party. Such action may be taken beforehand only if required to meet an immediate and extraordinary threat to the safety of passengers, crew or aircraft. Any action taken in accordance with this paragraph shall be discontinued upon compliance by the other contracting party with the provisions of this Article.''

If this proposal is acceptable to the Government of the Republic of Korea, I have further the honor to suggest that this Note and Your Excellency's Note in reply to that effect shall constitute an agreement between the two governments in this matter, which shall enter into force on the date of Your Excellency's reply and be considered as an integral part of the above mentioned Air Transport Agreement between the Government of the United States of America and the Government of the Republic of Korea.

Accept, Excellency, the renewed assurances of my highest consideration.

James R. Lilley

The Korean Minister of Foreign Affairs to the American Ambassador

MINISTRY OF FOREIGN AFFAIRS
REPUBLIC OF KOREA

Seoul, September 15, 1988

Excellency,

I have the honor to acknowledge the receipt of Your Excellency's Note of today's date which reads as follows:

[For text of the U.S. note, see pp. 2-4.]

I have further the honour to confirm on behalf of the government of the Republic of Korea that the above proposal is acceptable to the Government of the Republic of Korea and Your Excellency's Note and this Note in reply thereto shall constitute an agreement between the two governments, which shall enter into force from the date of this reply and be considered an integral part of the Air Transport Agreement between the Government of the Republic of Korea and the Government of the United States of America which was signed and entered into force on April 24, 1957.

Accept, Excellency, the renewed assurances of my highest consideration.

Kwang Soo Choi
Minister of Foreign Affairs

His Excellency
James R. Lilley
Ambassador of
the United States of America

[1] "On January 1, 1979, the United States recognized the Government of the People's Republic of China as the sole legal Government of China. The United States acknowledges the Chinese position that there is but one China and Taiwan is part of China. The United States does not recognized the "Republic of China" as a state or government . . . . [This] agreement relationship . . . is administered on a nongovernmental basis by the American Institute in Taiwan, a nonprofit District of Columbia corporation, [and the Coordination Council for North American Affairs,] and constitute neither recognition of the Taiwan authorities nor the continuation of any official relationship with Taiwan." U.S., Department of State, Office of the Legal Advisor, Treaties in Force: A List of Treaties and Other International Agreements of the United States in Force on January 1, 1997, August 1997, p. 315. The Coordination Council for North American Affairs has since been renamed the Taipei Economic and Cultural Representative Office.

h. Model Aviation Security Article [1,2]

(1) In accordance with their rights and obligations under international law, the Parties reaffirm that their obligation to each other to protect the security of civil aviation against acts of unlawful interference forms an integral part of this Agreement. Without limiting the generality of their rights and obligations under international law, the Parties shall in particular act in conformity with the provisions of the Convention on Offenses and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on September 14, 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on December 16, 1970, and the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on September 23, 1971.

(2) The Parties shall provide upon request all necessary assistance to each other to prevent acts of unlawful seizure of civil aircraft and other unlawful acts against the safety of such aircraft, of their passengers and crew, and of airports and air navigation facilities, and to address any other threat to the security of civil air navigation.

(3) The Parties shall, in their mutual relations, act in conformity with the aviation security provisions established by the International Civil Aviation Organization and designated as Annexes to the Convention; they shall require that operators of aircraft of their registry, operators of aircraft who have their principal place of business or permanent residence in their territory, and the operators of airports in their territory act in conformity with such aviation security provisions.

(4) Each Party agrees to observe the security provisions required by the other Party for entry into, for departure from, and while within the territory of that other Party and to take adequate measures to protect aircraft and to inspect passengers, crew, and their baggage and carry-on items, as well as cargo and aircraft stores, prior to and during boarding or loading. Each Party shall also give positive consideration to any request from the other Party for special security measures to meet a particular threat.

(5) When an incident or threat of an incident of unlawful seizure of aircraft or other unlawful acts against the safety of passengers, crew, aircraft, airports or air navigation facilities occurs, the Parties shall assist each other by facilitating communications and other appropriate measures intended to terminate rapidly and safely such incident or threat.

(6) When a Party has reasonable grounds to believe that the other Party has departed from the aviation security provisions of

---

[2] U.S., Department of State, Office of the Assistant Legal Advisor for Economic and Business Affairs.

this Article, the aeronautical authorities of that Party may request immediate consultations with the aeronautical authorities of the other Party. Failure to reach a satisfactory agreement within 15 days from the date of such request shall constitute grounds to withhold, revoke, limit, or impose conditions on the operating authorization and technical permissions of an airline or airlines of that Party. When required by an emergency, a Party may take interim action prior to the expiry of 15 days.

3. Extradition Treaties

a. List of Agreements in Force

U.S. CODE, TITLE 18—CRIMES AND CRIMINAL PROCEDURE

PART II—CRIMINAL PROCEDURE

CHAPTER 209—EXTRADITION

Sec. 3181. Scope and limitation of chapter

The provisions of this chapter relating to the surrender of persons who have committed crimes in foreign countries shall continue in force only during the existence of any treaty of extradition with such foreign government.

(June 25, 1948, ch. 645, 62 Stat. 822.)

SENATE

TREATY DOC.
105–30

EXTRADITION TREATY WITH INDIA

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

EXTRADITION TREATY BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF INDIA, SIGNED AT WASHINGTON ON JUNE 25, 1997

SEPTEMBER 23, 1997.—Treaty was read the first time and, together with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed for the use of the Senate

U.S. GOVERNMENT PRINTING OFFICE
39-118 WASHINGTON : 1997

[3] The following treaties are representative of recent extradition treaties concluded by the United States. As with other recent extradition treaties, they exclude from the political offense exception a broad range of violent crimes. These offenses are also covered by the major international counterterrorism conventions.

LETTER OF TRANSMITTAL

THE WHITE HOUSE, *September 23, 1997.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Extradition Treaty Between the Government of the United States of America and the Government of the Republic of India, signed at Washington on June 25, 1997.

In addition, I transmit, for the information of the Senate, a related exchange of letters signed the same date and the report of the Department of State with respect to the Treaty. As the report states, the Treaty will not require implementing legislation.

The provisions in this Treaty follow generally the form and content of extradition treaties recently concluded by the United States.

Upon entry into force, this Treaty would enhance cooperation between the law enforcement authorities of both countries, and thereby make a significant contribution to international law enforcement efforts. With respect to the United States and India, the Treaty would supersede the Treaty for the Mutual Extradition of Criminals between the United States of America and Great Britain, signed at London, December 22, 1931, which was made applicable to India on March 9, 1942, and is currently applied by the United States and India.

I recommend that the Senate give early and favorable consideration to the Treaty and give its advice and consent to ratification.

WILLIAM J. CLINTON.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
Washington, September 8, 1997.

THE PRESIDENT: I have the honor to submit to you the Extradition Treaty between the Government of the United States of America and the Government of the Republic of India (the "Treaty"), signed at Washington on June 25, 1997. I recommend that the Treaty be transmitted to the Senate for its advice and consent to ratification. Accompanying the Treaty is a related exchange of letters signed the same date. I recommend that these letters be transmitted for the information of the Senate.

The Treaty follows closely the form and content of extradition treaties recently concluded by the United States. The Treaty represents part of a concerted effort by the Department of State and the Department of Justice to develop modern extradition relationships to enhance the ability of the United States to prosecute serious offenders, including, especially, narcotics traffickers and terrorists.

The Treaty marks a significant step in bilateral cooperation between the United States and India. Upon entry into force, it would supersede (with the exception noted below) the Extradition Treaty between the United States and Great Britain signed at London on December 22, 1931, entered into force on June 24, 1935, and made applicable to India from March 9, 1942. The United States and India continued to apply that Treaty following India's independence in 1947. That treaty has become outmoded, and the new treaty will provide significant improvements. The Treaty can be implemented without new legislation.

Article 1 obligates each Party to extradite to the other, pursuant to the provisions of the Treaty, any person charged with or found guilty of an extraditable offense in the Requesting State, whether such offense was committed before or after entry into force of the Treaty.

Article 2(1) defines an extraditable offense as one punishable under the laws of both Contracting States by deprivation of liberty for a period of more than one year, or by a more severe penalty. Use of such a "dual criminality" clause rather than a list of offenses covered by the Treaty obviates the need to renegotiate or supplement the Treaty as additional offenses become punishable under the laws of both Contracting States.

Article 2(2) defines an extraditable offense to include also an attempt or a conspiracy to commit, aiding or abetting, counseling or procuring the commission of or being an accessory before or after the fact to, any extraditable offense as described in Article 2(1).

VI

Additional flexibility is provided by Article 2(3), which provides that an offense shall be considered an extraditable offense: (1) whether or not the laws of the Contracting States place the offense within the same category of offenses or describe the offense by the same terminology; (2) whether or not the offense is one for which United States federal law requires the showing of such matters as interstate transportation or use of the mails or of other facilities affecting interstate or foreign commerce, such matters being merely for the purpose of establishing jurisdiction in a United States federal court; or (3) whether or not it relates to taxation or revenue or is one of a purely fiscal character.

With regard to offenses committed outside the territory of the Requesting State, Article 2(4) provides that an offense described in Article 2 shall be an extraditable offense regardless of where the act or acts constituting the offense were committed. Article 2(5) provides that if extradition has been granted for an extraditable offense, it shall also be granted for any other offense specified in the request, even if the other offenses are punishable by less than one year's deprivation of liberty, provided that all other requirements for extradition have been met.

Article 3 provides that extradition shall not be refused on the ground that the person sought is a national of the Requested State. Neither party, in other words, may invoke nationality as a basis for denying an extradition.

As is customary in extradition treaties, Article 4 incorporates a political offense exception to the obligation to extradite. This exception is substantially identical to that contained in several other modern extradition treaties including the treaty with Jordan, which recently received Senate advice and consent. Article 4(1) states generally that extradition shall not be granted if the offense for which extradition is requested is a political offense. Article 4(2) specifies eight categories of offenses that shall not be considered to be political offenses: (a) a murder or other willful crime against the person of a Head of State or Head of Government of one of the Contracting States, or of a member of the Head of State's family; (b) aircraft hijacking offenses; (c) acts of aviation sabotage; (d) crimes against internationally protected persons, including diplomats; (e) hostage taking; (f) offenses related to illegal drugs; (g) any other offense for which both Parties are obliged pursuant to a multilateral international agreement to extradite the person sought or submit the case to their competent authorities for decision as to prosecution; and (h) a conspiracy or attempt to commit any of the offenses described above, or aiding or abetting a person who commits or attempts to commit such offenses.

Article 5(1) provides that the executive authority of the Requested State may refuse extradition for offenses under military law that are not offenses under ordinary criminal law (e.g. desertion). Article 5(2) provides that extradition shall not be granted if the executive authority of the Requested State determines that the request was politically motivated. Letters exchanged by the Parties at the time of the signing of the Treaty, and included herewith for the information of the Senate, set forth the understanding of the Parties that if either Party is considering prosecution or punishment upon extradition under law laws or rules of criminal proce-

dure other than the Requesting State's ordinary laws or rules of criminal procedure, then the Requesting State must request consultations and make such a request for extradition only upon the agreement of the Requested State. This exchange of letters creates an important and useful limitation on the obligation to extradite fugitives where the prosecution or punishment would be based on extraordinary laws and procedures.

Article 6 bars extradition when the person sought has been convicted or acquitted in the Requested State for the same offense, but does not bar extradition if the competent authorities in the Requested State have declined to prosecute or have decided to discontinue criminal proceedings against the person sought.

Article 7 provides that extradition shall not be granted when the prosecution has become barred by lapse of time according to the laws of the Requesting State.

Under Article 8, when an offense for which extradition is requested is punishable by death under the laws in the Requesting State and is not so punishable under laws in the Requested State, the Requested State may refuse extradition unless the offense constitutes murder under the laws in the Requested State or the Requesting State provides assurances that the Death penalty, if imposed, will not be carried out.

Article 9 establishes the procedures and describes the documents that are required to support a request for extradition. It requires that all requests be submitted through the diplomatic channel. Article 9(3) provides that a request for the extradition of a person sought for prosecution must be supported by such evidence as would justify committal for trial if the offense had been committed in the Requested State. This is a lesser evidentiary standard than that contained in the current extradition treaty and, therefore, should enhance the ability of the United States to obtain extradition of fugitives from India.

Article 10 establishes the procedures under which documents submitted pursuant to the Treaty shall be received and admitted into evidence. Article 11 provides that all documents submitted by the Requesting State shall be in English.

Article 12 sets forth procedures for the provisional arrest of a person sought pending presentation of the formal request for extradition. Article 12(4) provides that if the Requested State's executive authority has not received the request for extradition and supporting documentation within sixty days after the provisional arrest, the person may be discharged from custody. Article 12(5) provides explicitly that discharge from custody pursuant to Article 12(4) does not prejudice subsequent rearrest and extradition upon later delivery of the extradition request and supporting documents.

Article 13 specifies the procedures governing the surrender and return of persons sought. The Requested State is required to notify the Requesting State promptly through the diplomatic channel of its decision on extradition and, if the request is denied in whole or in part, to provide an explanation of the reasons for the denial of the request. If the request is granted, the authorities of the Contracting States shall agree on the time and place for the surrender of the person sought.

VIII

Article 14 concerns temporary and deferred surrender. If a person whose extradition is sought is being proceeded against or is serving a sentence in the Requested State, that State may temporarily surrender the person to the Requesting State solely for the purpose of prosecution. The Requested State may also postpone the extradition proceedings until its prosecution has been concluded and any sentence imposed has been served.

Article 15 sets forth a non-exclusive list of factors to be considered by the Requested State in determining to which State to surrender a person sought by more than one State.

Article 16 provides for the seizure and surrender to the Requesting State of all articles documents and evidence connected with the offense for which extradition is granted, to the extent permitted under the law of the Requested State. Such property may be surrendered even when extradition cannot be effected due to the death, disappearance, or escape of the person sought. Surrender of property may be deferred if it is needed as evidence in the Requested State and may be conditioned upon satisfactory assurances that it will be returned as soon as practicable. Article 16(3) imposes an obligation to respect the rights of third parties in affected property.

Article 17 sets forth the rule of specialty. It provides that a person extradited under the Treaty may not be detained, tried, or punished in the Requesting State for an offense other than that for which extradition has been granted unless the offense is based on the same facts on which extradition was granted (provided such offense is extraditable or is a lesser included offense); the offense was committed after the extradition of the person; or a waiver of the rule of specialty is granted by the executive authority of the Requested State. Similarly, the Requesting State may not extradite the person to a third state for an offense committed prior to the original surrender unless the Requested State consents. These restrictions shall not prevent the detention, trial, or punishment of an extradited person, or that person's extradition to a third State, if the extradited person leaves the Requesting State after extradition and voluntarily returns to it or fails to leave the Requesting State within fifteen days of being free to do so.

Article 18 permits surrender to the Requesting State without further proceedings if the person sought consents to surrender.

Article 19 governs the transit through the territory of one Contracting State of a person being surrendered to the other State by a third State.

Article 20 contains provisions on representation and expenses that are similar to those found in other modern extradition treaties. Specifically, the Requested State is required to represent the interests of the Requesting State in any proceedings arising out of a request for extradition. The Requesting State is required to bear the expenses related to the translation of documents and the transportation of the person surrendered. Article 20(3) clarifies that neither State shall make any pecuniary claim against the other State related to the arrest, detention, examination, custody, or surrender of persons sought under the Treaty.

Article 21 states that the competent authorities of the United States and India may consult with each other directly or through

the facilities of Interpol in connection with the processing of individual cases and in furtherance of maintaining and improving the procedures for the implementation of the Treaty.

Article 22 provides that the Contracting States shall, to the extent permitted by their laws, afford each other the widest measure of mutual assistance in criminal matters in connection with an offense for which extradition has been requested.

Article 23 and 24 contain final clauses dealing with the Treaty's ratification, entry into force and termination. Paragraph 1 of Article 23 states that the Treaty shall be subject to ratification, and the instruments of ratification shall be exchanged as soon as possible. Paragraph 2 states that the treaty shall enter into force upon the exchange of instruments of ratification. Paragraph 3 provides that, upon entry into force of this Treaty, the Treaty for the Mutual Extradition of Criminals between the United States of America and Great Britain, signed at London, December 22, 1931, shall cease to have any effect between the Government of the United States of America and the Government of the Republic of India, except that the prior Treaty shall apply to any extradition proceedings in which the extradition documents have already been submitted to the courts of the Requested States at the time this Treaty enters in force.

Article 24 provides that either Contract State may terminate the Treaty at any time by giving written to the other Contract State, and the termination shall be effective six months after the date of such notice.

A Technical Analysis explaining in detail the provisions of the Treaty is being prepared by the United States negotiating delegation and will be submitted separately to the Senate Committee on Foreign Relations.

The Department of Justice joins the Department of State in favoring approval of this Treaty by the Senate at the earliest possible date.

Respectfully submitted,

STROBE TALBOT.

EXTRADITION TREATY

BETWEEN

THE GOVERNMENT OF THE UNITED STATES OF AMERICA

AND

THE GOVERNMENT OF THE REPUBLIC OF INDIA

TABLE OF CONTENTS

The Government of the United States of America and the Government of the Republic of India;

Recalling the Treaty for the Mutual Extradition of Criminals between the United States of America and Great Britain, signed at London December 22, 1931;

Noting that both the Government of the United States of America and the Government of the Republic of India currently apply the terms of that Treaty; and

Desiring to provide for more effective cooperation between the two States in the suppression of crime, recognizing that concrete steps are necessary to combat terrorism, including narcoterrorism, and drug trafficking, and, for that purpose, to conclude a new treaty for the extradition of fugitive offenders;

Have agreed as follows:

Article I

Obligation to Extradite

The Contracting States agree to extradite to each other, pursuant to the provisions of this Treaty, persons who, by the authorities in the Requesting State are formally accused of, charged with or convicted of an extraditable offense, whether such offense was committed before or after the entry into force of the Treaty.

Article 2

Extraditable Offenses

1. An offense shall be an extraditable offense if it is punishable under the laws in both Contracting States by deprivation of liberty, including imprisonment, for a period of more than one year or by a more severe penalty.

2. An offense shall also be an extraditable offense if it consists of an attempt or a conspiracy to commit, aiding or abetting, counselling or procuring the commission of or being an accessory before or after the fact to, any offense described in paragraph 1.

3. For the purposes of this Article, an offense shall be an extraditable offense:

(a) whether or not the laws in the Contracting States place the offense within the same category of offenses or describe the offense by the same terminology;

(b) whether or not the offense is one for which United States federal law requires the showing of such matters as interstate transportation, or use of the mails or of other facilities affecting interstate or foreign commerce, such matters being merely for the purpose of establishing jurisdiction in a United States federal court; or

(c) whether or not it relates to taxation or revenue or is one of a purely fiscal character.

4. Extradition shall be granted for an extraditable offense regardless of where the act or acts constituting the offense were committed.

5. If extradition has been granted for an extraditable offense, it shall also be granted for any other offense specified in the request, even if the latter offense is punishable by less than one year's deprivation of liberty, provided that all other requirements for extradition are met.

Article 3

Nationality

Extradition shall not be refused on the ground that the person sought is a national of the Requested State.

Article 4

Political Offenses

1. Extradition shall not be granted if the offense for which extradition is requested is a political offense.

2. For the purposes of this Treaty, the following offenses shall not be considered to be political offenses:

(a) a murder or other willful crime against the person of a Head of State or Head of Government of one of the Contracting States, or of a member of the Head of State's or Head of Government's family;

(b) aircraft hijacking offenses, as described in The Hague Convention for the Suppression of Unlawful Seizure of Aircraft, done at the Hague on December 16, 1970;

(c) acts of aviation sabotage, as described in the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, done at Montreal on September 23, 1971;

(d) crimes against internationally protected persons, including diplomats, as described in the Convention on the Prevention and Punishment of Crimes Against Internationally Protected Persons, including Diplomatic Agents, done at New York on December 14, 1973;

(e) hostage taking, as described in the International Convention against the Taking of Hostages, done at New York on December 17, 1979;

(f) offenses related to illegal drugs, as described in the Single Convention on Narcotic Drugs, 1961, done at New York on March 30, 1961, the Protocol Amending the Single Convention on Narcotic Drugs, 1961, done at Geneva on March 25, 1972, and the United Nations Convention against Illicit Traffic in Narcotics Drugs and Psychotropic Substances, done at Vienna on December 20, 1988;

(g) any other offense for which both Contracting States have the obligation pursuant to a multilateral international agreement to extradite the person sought or to submit the case to their competent authorities for decision as to prosecution; and

(h) a conspiracy or attempt to commit any of the foregoing offenses, or aiding or abetting a person who commits or attempts to commit such offenses.

Article 5

Military Offenses and Other Bases for Denial of Extradition

1. The executive authority of the Requested State may refuse extradition for offenses under military law which are not offenses under ordinary criminal law.

2. Extradition shall not be granted if the executive authority of the Requested State determines that the request was politically motivated.

Article 6

Prior Prosecution

1. Extradition shall not be granted when the person sought has been convicted or acquitted in the Requested State for the offense for which extradition is requested.

2. Extradition shall not be precluded by the fact that the authorities in the Requested State have decided not to prosecute the person sought for the acts for which extradition is requested, or to discontinue any criminal proceedings which have been instituted against the person sought for those acts.

Article 7

Lapse of Time

Extradition shall not be granted when the prosecution has become barred by lapse of time according to the laws of the Requesting State.

Article 8

Capital Punishment

1. When the offense for which extradition is sought is punishable by death under the laws in the Requesting State and is not punishable by death under the laws in the Requested State, the Requested State may refuse extradition unless:

(a) the offense constitutes murder under the laws in the Requested State; or

(b) the Requesting State provides assurances that the death penalty, if imposed, will not be carried out.

2. In instances in which a Requesting State provides an assurance in accordance with paragraph (1)(b) of this Article, the death penalty, if imposed by the courts of the Requesting State, shall not be carried out.

Article 9

Extradition Procedures and Required Documents

1. All requests for extradition shall be submitted through the diplomatic channel.

2. All requests for extradition shall be supported by:

(a) documents, statements, or other types of information which describe the identity and probable location of the person sought;

(b) information describing the facts of the offense and the procedural history of the case;

(c) a statement of the provisions of the law describing the essential elements of the offense for which extradition is requested;

(d) a statement of the provisions of the law describing the punishment for the offense; and

(e) the documents, statements, or other types of information specified in paragraph 3 or paragraph 4 of this Article, as applicable.

3. A request for extradition of a person who is sought for prosecution shall also be supported by:

(a) a copy of the warrant or order of arrest, issued by a judge or other competent authority;

(b) a copy of the charging document, if any; and

(c) such information as would justify the committal for trial of the person if the offense had been committed in the Requested State.

4. A request for extradition relating to a person who has been convicted of the offense for which extradition is sought shall also be supported by:

(a) a copy of the judgment of conviction or, if such copy is not available, a statement by a judicial authority that the person has been convicted;

(b) information establishing that the person sought is the person to whom the conviction refers;

(c) a copy of the sentence imposed, if the person sought has been sentenced, and a statement establishing to what extent the sentence has been carried out; and

(d) in the case of a person who has been convicted in absentia, the documents required in paragraph 3.

Article 10

Admissibility of Documents

The documents which accompany an extradition request shall be received and admitted as evidence in extradition proceedings if:

(a) in the case of a request from the United States, they are certified by the principal diplomatic or principal consular officer of the Republic of India resident in the United States;

(b) in the case of a request from the Republic of India, they are certified by the principal diplomatic or principal consular officer of the United States resident in the Republic of India, as provided by the extradition laws of the United States; or

(c) they are certified or authenticated in any other manner accepted by the laws in the Requested State.

Article 11

Translation

All documents submitted by the Requesting State shall be in English.

Article 12

Provisional Arrest

1. In case of urgency, a Contracting State may request the provisional arrest of the person sought pending presentation of the request for extradition. A request for provisional arrest may be transmitted through the diplomatic channel. The facilities of the International Criminal Police Organization (Interpol) may be used to transmit such a request.

2. The application for provisional arrest shall contain:

(a) a description of the person sought;

(b) the location of the person sought, if known;

(c) a brief statement of the facts of the case, including, if possible, the time and location of the offense;

(d) a description of the laws violated;

(e) a statement of the existence of a warrant of arrest or a finding of guilt or judgment of conviction against the person sought; and

(f) a statement that a request for extradition for the person sought will follow.

3. The Requesting State shall be notified without delay of the disposition of its application and the reasons for any denial.

4. A person who is provisionally arrested may be discharged from custody upon the expiration of sixty (60) days from the date of provisional arrest pursuant to this Treaty if the executive authority of the Requested State has not received the formal request for extradition and the supporting documents required in Article 9.

5. The fact that the person sought has been discharged from custody pursuant to paragraph (4) of this Article shall not prejudice the subsequent rearrest and extradition of that person if the extradition request and supporting documents are delivered at a later date.

Article 13

Decision and Surrender

1. The Requested State shall promptly notify the Requesting State through the diplomatic channel of its decision on the request for extradition.

2. If the request is denied in whole or in part, the Requested State shall provide the reasons for the denial. The Requested State shall provide copies of pertinent judicial decisions upon request.

3. If the request for extradition is granted, the authorities of the Contracting States shall agree on the time and place for the surrender of the person sought.

4. If the person sought is not removed from the territory of the Requested State within the time prescribed by the laws in that State, that person may be discharged from custody, and the Requested State may subsequently refuse extradition for the same offense.

Article 14

Temporary and Deferred Surrender

1. If the extradition request is granted in the case of a person who is being prosecuted or is serving a sentence in the Requested State, the Requested State, subject to its laws, may temporarily surrender the person sought to the Requesting State for the purpose of prosecution. The person so surrendered shall be kept in custody in the Requesting State and shall be returned to the Requested State after the conclusion of the proceedings against that person, in accordance with conditions to be determined by agreement of the Contracting States.

2. The Requested State may postpone the extradition proceedings against a person who is being prosecuted or who is serving a sentence in that State. The postponement may continue until the prosecution of the person sought has been concluded or until such person has served any sentence imposed.

Article 15

Requests for Extradition Made by More than One State

If the Requested State receives requests from the other Contracting State and from any other State or States for the extradition of the same person, either for the same offense or for different offenses, the executive authority of the Requested State shall determine to which State it will surrender the person. In making its decision, the Requested State shall consider all relevant factors, including but not limited to:

(a) whether the requests were made pursuant to treaty;

(b) the place where each offense was committed;

(c) the respective interests of the Requesting States;

(d) the gravity of the offenses;

(e) the nationality of the victim;

(f) the possibility of further extradition between the Requesting States; and

(g) the chronological order in which the requests were received from the Requesting States.

Article 16

Seizure and Surrender of Property

1. To the extent permitted under its laws, the Requested State may seize and surrender to the Requesting State all articles, documents, and evidence connected with the offense in respect of which extradition is granted. The items mentioned in this Article may be

surrendered even when the extradition cannot be effected due to the death, disappearance, or escape of the person sought.

2. The Requested State may condition the surrender of the property upon satisfactory assurances from the Requesting State that the property will be returned to the Requested State as soon as practicable. The Requested State may also defer the surrender of such property if it is needed as evidence in the Requested State.

3. The rights of third parties in such property shall be duly respected.

Article 17

Rule of Speciality

1. A person extradited under this Treaty may not be detained, tried, or punished in the Requesting State except for:

(a) the offense for which extradition has been granted or a differently denominated offense based on the same facts on which extradition was granted, provided such offense is extraditable or is a lesser included offense;

(b) an offense committed after the extradition of the person; or

(c) an offense for which the executive authority of the Requested State consents to the person's detention, trial, or punishment. For the purpose of this subparagraph:

(i) the Requested State may require the submission of the documents called for in Article 9; and

(ii) the person extradited may be detained by the Requesting State for 90 days, or for such longer period of time as the Requested State may authorize, while the request is being processed.

2. A person extradited under this Treaty may not be extradited to a third State for an offense committed prior to his surrender unless the surrendering State consents.

3. Paragraphs 1 and 2 of this Article shall not prevent the detention, trial, or punishment of an extradited person, or the extradition of that person to a third State, if:

(a) that person leaves the territory of the Requesting State after extradition and voluntarily returns to it; or

(b) that person does not leave the territory of the Requesting State within 15 days of the day on which that person is free to leave.

Article 18

Waiver of Extradition

If the person sought consents to surrender to the Requesting State, the Requested State may, subject to its laws, surrender the person as expeditiously as possible without further proceedings.

Article 19

Transit

1. Either Contracting State may authorize transportation through its territory of a person surrendered to the other State by a third State. A request for transit shall be made through the diplomatic channel. The facilities of Interpol may be used to transmit such a request. It shall contain a description of the person being transported and a brief statement of the facts of the case. A person in transit may be detained in custody during the period of transit.

2. No authorization is required where air transportation is used and no landing is scheduled on the territory of the Contracting State. If an unscheduled landing occurs on the territory of the other Contracting State, the other Contracting State may require the request for transit as provided in paragraph 1. That Contracting State shall detain the person to be

transported until the request for transit is received and the transit is effected, so long as the request is received within 96 hours of the unscheduled landing.

Article 20

Representation and Expenses

1. The Requested State shall advise, assist, appear in court on behalf of the Requesting State, and represent the interests of the Requesting State, in any proceeding arising out of a request for extradition.

2. The Requesting State shall bear the expenses related to the translation of documents and the transportation of the person surrendered. The Requested State shall pay all other expenses incurred in that State by reason of the extradition proceedings.

3. Neither State shall make any pecuniary claim against the other State arising out of the arrest, detention, examination, or surrender of persons sought under this Treaty.

Article 21

Consultation

The competent authorities of the United States and the Republic of India may consult with each other directly or through the facilities of Interpol in connection with the processing of individual cases and in furtherance of maintaining and improving procedures for the implementation of this Treaty.

Article 22

Mutual Legal Assistance in Extradition

Each Contracting State shall, to the extent permitted by its law, afford the other the widest measure of mutual assistance in criminal matters in connection with an offense for which extradition has been requested.

Article 23

Ratification and Entry into Force

1. This Treaty shall be subject to ratification; the instruments of ratification shall be exchanged as soon as possible.

2. This Treaty shall enter into force upon the exchange of the instruments of ratification.

3. Upon the entry into force of this Treaty, the Treaty for the Mutual Extradition of Criminals between the United States of America and Great Britain, signed at London December 22, 1931, shall cease to have any effect between the Government of the United States of America and the Government of the Republic of India. Nevertheless, the prior Treaty shall apply to any extradition proceedings in which the extradition documents have already been submitted to the courts of the Requested State at the time this Treaty enters into force, except that Article 17 of this Treaty shall be applicable to such proceedings.

Article 24

Termination

Either Contracting State may terminate this Treaty at any time by giving written notice to the other Contracting State, and the termination shall be effective six months after the date of such notice.

IN WITNESS WHEREOF, the undersigned, being duly authorized by their respective Governments have signed this Treaty.

DONE at Washington, in duplicate, this Twenty-fifth day of June, 1997, in the English and Hindi languages, both texts being equally authentic.

FOR THE GOVERNMENT OF THE UNITED STATES OF AMERICA:

FOR THE GOVERNMENT OF THE REPUBLIC OF INDIA:

DEPARTMENT OF STATE
WASHINGTON

June 25, 1997

Dear Mr. Minister:

I refer to the extradition treaty between the Government of the United States of America and the Government of the Republic of India signed today. It is the understanding of the Government of the United States of America that, as a general matter, upon extradition, a person shall be proceeded against or punished under the ordinary criminal laws of the Requesting State, and shall be subject to prosecution or punishment in accordance with the Requesting State's ordinary rules of criminal procedure. If either party is considering prosecution or punishment upon extradition under other laws or other rules of criminal procedure, the Requesting State shall request consultations and shall make such a request only upon the agreement of the Requested State.

I would appreciate receiving confirmation that your Government shares this understanding.

Sincerely,

Strobe Talbott
Acting Secretary

His Excellency
Saleem Iqbal Shervani,
Minister of State for External Affairs of India.

SALEEM I. SHERVANI

EXTRADITION TREATY WITH LUXEMBOURG

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

EXTRADITION TREATY BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE GRAND DUCHY OF LUXEMBOURG, SIGNED AT WASHINGTON ON OCTOBER 1, 1996

JULY 8, 1997.—Treaty was read the first time and, together with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed for the use of the Senate

---

U.S. GOVERNMENT PRINTING OFFICE

39–118 WASHINGTON : 1997

LETTER OF TRANSMITTAL

THE WHITE HOUSE, *July 8, 1997.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Extradition Treaty between the Government of the United States of America and the Government of the Grand Duchy of Luxembourg, signed at Washington on October 1, 1996.

In addition, I transmit, for the information of the Senate, the report of the Department of State with respect to the Treaty. As the report explains, the Treaty will not require implementing legislation.

The provisions in this Treaty follow generally the form and content of extradition treaties recently concluded by the United States.

This Treaty will, upon entry into force, enhance cooperation between the law enforcement communities of both countries, and thereby make a significant contribution to international law enforcement efforts. It will supersede, with certain noted exceptions, the Extradition Treaty between the United States of America and the Grand Duchy of Luxembourg signed at Berlin on October 29, 1883, and the Supplementary Extradition Convention between the United States and Luxembourg signed at Luxembourg on April 24, 1935.

I recommend that the Senate give early and favorable consideration to the Treaty and give its advice and consent to ratification.

WILLIAM J. CLINTON.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
Washington, June 12, 1997.

THE PRESIDENT: I have the honor to submit to you the Extradition Treaty between the Government of the United States of America and the Government of the Grand Duchy of Luxembourg ("the Treaty"), signed at Washington on October 1, 1996. I recommend that the Treaty be transmitted to the Senate for its advice and consent to ratification.

The Treaty follows generally the form and content of extradition treaties recently concluded by the United States. It represents part of a concerted effort by the Department of State and the Department of Justice to develop modern extradition relationships to enhance the United States ability to prosecute serious offenders including, especially, narcotics traffickers.

The Treaty marks a significant step in bilateral cooperation between the United States and Luxembourg. Upon entry into force, it will supersede the Extradition Treaty between the United States of America and the Grand Duchy of Luxembourg signed at Berlin on October 29, 1883, and the Supplementary Extradition Convention between the United States and Luxembourg that was signed at Luxembourg on April 24, 1935. That treaty and the supplementary extradition convention have become outmoded and the new treaty will provide significant improvements. The Treaty can be implemented without legislation.

Article 1 obligates the Contracting States to extradite to each other, pursuant to the provisions of the Treaty, persons whom the authorities in the Requesting State have charged with, found guilty of, or convicted of an extraditable offense.

Article 2 defines an extraditable offense as one punishable under the laws of both Contracting States by deprivation of liberty for a maximum period of more than one year, or by a more severe penalty. Use of such a "dual criminality" clause rather than a list of offenses covered by the Treaty obviates the need to renegotiate or supplement the Treaty as additional offenses become punishable under the laws of both Contracting States. Article 2(1) defines an extraditable offense to include also an attempt or a conspiracy to commit, or participation or complicity in the commission of an offense.

Additional flexibility is provided by Article 2(3), which provides that in determining whether an offense is an extraditable offense, the Contracting States: (1) shall consider only the essential elements of the offense punishable under the laws of both States and disregard that the respective laws do not place the offense within the same category of offenses or describe the offense by the same

(vi) an attempt to commit one of the offenses described above or participation or complicity in the commission of those offenses; and

(vii) an "association of wrongdoers" formed to commit any of the offenses described above under the laws of Luxembourg or a conspiracy to commit any such offense under the laws of the United States.

Article 4(3) provides that extradition shall not be granted if the executive authority of the Requested State determines that the request was politically motivated. Article 4(4) provides that the executive authority of the Requested State shall refuse extradition for an offense under military law which is not an offense under ordinary criminal law.

Article 5(1) provides that extradition may be denied if the offense for which extradition is sought is a fiscal offense. Article 5(2) defines fiscal offenses to include (a) an offense relating to the reporting and payment of taxes or customs duties, or (b) an offense relating to currency exchange laws. Article 5(3) provides that a party may exclude from the Article 5(2) definition of a fiscal offense, offenses related to drug trafficking, crimes or violence or other serious criminal conduct without regard to whether extradition is sought for such criminal activity.

Article 6 bars extradition when the person sought has been found guilty, convicted or acquitted in the Requested State for the offense for which extradition is requested, but does not bar extradition if the competent authorities in the Requested State have declined to prosecute or have decided to discontinue criminal proceedings.

Under Article 7, when an offense for which extradition is sought is punishable by death under the laws in the Requesting State and is not so punishable under the laws in the Requested State, the Requested State must refuse extradition unless the Requesting State provides assurances that the death penalty will not be imposed or, if imposed, will not be carried out. This Article also provides that the executive authority of the Requested State may refuse extradition for humanitarian reasons unless the Requesting State provides such assurances as the Requested State considers sufficient to take into account such humanitarian concerns.

Article 8 establishes the procedures and describes the documents that are required to support an extradition request. The Article requires that all requests be submitted through the diplomatic channel.

Article 9 allows for the provision of supplementary information within an established time-frame if, at any stage of an extradition proceeding, the Requested State determines that the information in support of the extradition request is not sufficient to fulfill the requirements of its law with respect to extradition.

Article 10 establishes the procedures under which documents submitted pursuant to the provisions of this Treaty shall be received and admitted into evidence.

Article 11 provides that all documents submitted by the Requesting State shall be translated into the language of the Requested State.

Article 12 sets forth procedures for the provisional arrest and detention, in case of urgency, of a person sought pending presentation

terminology, and (2) shall not consider as an essential element of the offense punishable in the United States an element such as interstate transportation or use of the mails or of other facilities affecting interstate or foreign commerce, since such an element is for the purpose of establishing jurisdiction in a United States federal court.

With regard to offenses committed outside the territory of the Requesting State, Article 2(4) provides that an offense shall be extraditable regardless of where the act or acts constituting the offense were committed. The United States recognizes the extraterritorial application of many of its criminal statutes and frequently makes requests for fugitives whose criminal activity occurred in foreign countries with the intent, actual or implied, of affecting the United States.

Article 2(5) also permits extradition for offenses which are punishable by less than one year's imprisonment, if extradition has been granted for a more serious extraditable offense specified in the request, and all other requirements of extradition have been met.

Article 2(6) provides that extradition may be denied if the prosecution of the offense or the execution of the penalty has been barred by lapse of time under the laws of the Requested State. Acts constituting an interruption or suspension of the time-bar in the Requesting State shall be taken into consideration to the extent possible.

Article 3(1) provides that neither Contracting State shall be bound to extradite its own nationals, but that the Executive Authority of the United States—the Secretary of State—shall have the power to extradite U.S. nationals, if, in its discretion, it deems extradition appropriate. Article 3(2) provides that in cases in which extradition is refused solely on nationality grounds, the Requesting State may request that the case be submitted to the competent authorities of the Requested State for prosecution.

As is customary in extradition treaties, Article 4 incorporates a political offense exception to the obligation to extradite. Article 4(1) states generally that extradition shall not be granted if the offense for which extradition is requested is a political offense. Article 4(2) expressly excludes from the reach of the political offense exception several categories of offenses, including the following:

(i) a murder or willful crime against the person of a Head of State of one of the Contracting States, or a member of the Head of State's family;

(ii) an offense for which both Contracting States have the obligation pursuant to a multilateral international agreement to extradite the person sought or to submit the case to their competent authorities for decision as to prosecution;

(iii) murder, manslaughter, malicious wounding or inflicting grievous bodily harm;

(iv) an offense involving kidnapping, abduction, or any form of unlawful detention, including the taking of a hostage;

(v) placing or using an explosive, incendiary or destructive device or substance capable of endangering life or causing grievous bodily harm;

of the formal request for extradition. Article 12(4) provides that if the Requested State's executive authority has not received the request for extradition and supporting documentation required in Article 8 within sixty (60) days after the provisional arrest, the person may be discharged from custody. Article 12(5) provides explicitly that discharge from custody pursuant to Article 12(4) does not prejudice subsequent rearrest and extradition upon later delivery of the extradition request and supporting documents.

Article 13 specifies the procedures governing surrender and return of persons sought. It requires the Requested State to provide prompt notice to the Requesting State regarding its extradition decision. If the request is denied in whole or in part, Article 13(2) requires the Requested State to provide information regarding the reasons therefor. If extradition is granted, the authorities of the Contracting States are to agree on time and place of surrender of the person sought.

Article 14 concerns temporary and deferred surrender. If a person is being prosecuted or is serving a sentence in the Requested State for a different offense, that State may (a) temporarily surrender the person to the Requesting State for the purpose of prosecution, or (b) defer surrender until the proceedings are concluded or the sentence served.

Article 15 sets forth a non-exhaustive list of factors to be considered by the Requested State in determining to which State to surrender a person sought by more than one State.

Article 16 provides for the seizure and surrender to the Requesting State all articles, documents, and evidence connected with the offense for which extradition is granted, to the extent permitted under the law of the Requested State. Such property may be surrendered even when extradition cannot be effected due to the death, disappearance, or escape of the person sought. Surrender of property may be deferred if it is needed as evidence in the Requested State and may be conditioned upon satisfactory assurances that it will be returned. Article 16(3) imposes an obligation to respect the rights of third parties in affected property.

Article 17 sets forth the rule of speciality. It provides, subject to specific exceptions, that a person extradited under the Treaty may not be detained, tried, or punished in the Requesting State for an offense other than that for which extradition has been granted, unless the offense was committed after the extradition of the person; the person leaves the territory of the Requesting State after extradition and voluntarily returns to it; the person does not leave the territory of the Requesting State within 15 days of the day on which that person is free to leave; or the executive authority of the Requested State consents. Similarly, the Requesting State may not extradite such person to a third state for an offense committed prior to the original surrender unless the Requested State consents.

Article 18 permits surrender to the Requesting State without further proceedings if the person sought consents to surrender.

Article 19 governs the transit through the territory of one Contracting State of a person being surrendered to the other State by a third State.

IX

Article 20 contains provisions on representation and expenses that are similar to those found in other modern extradition treaties. Specifically, the Requested State shall, to the extent possible under its laws, represent the interests of the Requesting State in extradition proceedings. The Requesting State shall bear the expenses related to the translation of documents and the transportation of the person surrendered. Article 20(3) clarifies that neither State shall make any pecuniary claim against the other State arising out of the arrest, detention, examination, or surrender of persons sought under the Treaty.

Article 21 states that the United States Department of Justice and the Ministry of Justice of Luxembourg may consult with each other directly, or through the facilities of the International Criminal Police Organization (INTERPOL) in connection with the processing of individual cases and in furtherance of maintaining and improving Treaty implementation procedures.

Article 22, like the parallel provision in almost all recent United States extradition treaties, states that the Treaty shall apply to offenses committed before as well as after the date the Treaty enters into force.

Ratification and entry into force are addressed in Article 23. That Article provides that the Treaty shall enter into force on the first day of the second month after the exchange of the instruments of ratification, and the instruments of ratification shall be exchanged at Luxembourg as soon as possible. Article 23(3) provides that upon entry into force, the Extradition Treaty between the United States of America and the Grand Duchy of Luxembourg, signed at Berlin on October 29, 1883, as amended by the Supplementary Extradition Convention signed at Luxembourg on April 24, 1935, shall cease to have effect, with certain noted exceptions. The prior treaties will continue to apply to any extradition proceedings in which the extradition documents have already been submitted to the courts of the Requested State at the time this Treaty enters into force, except that Article 2 of this Treaty (Extraditable Offenses) will apply to such proceedings. Paragraph 3 further provides that Articles 14 (Temporary and Deferred Surrender) and 17 (Rule of Speciality) shall apply to persons extraditable under the prior treaties.

Under Article 24, either Contracting State may terminate the Treaty at any time upon written notice to the other Contracting State, with termination to become effective six months after the date of receipt of such notice.

A Technical Analysis explaining in detail the provisions of the treaty is being prepared by the United States negotiating delegation and will be submitted separately to the Senate Committee on Foreign Relations.

The Department of Justice joins the Department of State in favoring approval of this Treaty by the Senate at an early date.

Respectfully submitted,

MADELEINE ALBRIGHT.

EXTRADITION TREATY

BETWEEN THE

UNITED STATES OF AMERICA

AND

THE GRAND DUCHY OF LUXEMBOURG

TABLE OF CONTENTS

The Government of the United States of America and the Government of the Grand Duchy of Luxembourg,

Recalling the Treaty of Extradition between the Contracting States, signed at Berlin, October 29, 1883, as amended by the Supplementary Extradition Convention between the Contracting States, signed at Luxembourg, April 24, 1935;

Noting that both the Government of the United States of America and the Government of the Grand Duchy of Luxembourg currently apply the terms of that Treaty, as amended, and

Desiring to provide for more effective cooperation between the two States in the suppression of crime, and, for that purpose, to conclude a new treaty for the extradition of offenders;

Have agreed as follows:

Article 1

Obligation to Extradite

The Contracting States agree to extradite to each other, pursuant to the provisions of this Treaty, persons whom the authorities in the Requesting State have charged with, found guilty of, or convicted of an extraditable offense.

Article 2

Extraditable Offenses

1. An offense shall be an extraditable offense if it is punishable under the laws in both Contracting States by deprivation of liberty for a maximum period of more than one year or by a more severe penalty. For the purpose of this paragraph, an offense shall include:

(a) an attempt to commit, or participation or complicity in the commission of, an offense; and

(b) an "association of wrongdoers" as provided by the laws of Luxembourg, or a "conspiracy" as provided by the laws of the United States, to commit an offense.

2. Where the request for extradition is for a person sought for the execution of a sentence, extradition

shall only be granted if a penalty of at least six months imprisonment remains to be served.

3. In determining whether an offense is an extraditable offense, the Contracting States:

(a) shall consider only the essential elements of the offense punishable under the laws of both States and shall disregard that the respective laws do not place the offense within the same category of offenses or describe the offense by the same terminology; and

(b) shall not consider as an essential element of an offense punishable in the United States an element such as interstate transportation or use of the mails or of other facilities affecting interstate or foreign commerce, since such an element is for the purpose of establishing jurisdiction in a United States court.

4. An offense shall be an extraditable offense regardless of where the act or acts constituting the offense were committed.

5. If, in addition to an offense extraditable under paragraph 1, the request for extradition includes an offense which is punishable by deprivation of liberty under the laws of both Contracting States, but which does

not fulfill the condition with regard to the amount of punishment which may be imposed, the Requested State shall grant extradition for this offense, provided that all other requirements for extradition are met.

6. Extradition may be denied if prosecution of the offense or execution of the penalty has been barred by lapse of time under the laws of the Requested State. Acts constituting an interruption or suspension of the time-bar in the Requesting State shall be taken into consideration insofar as possible.

Article 3

Nationality

1. Neither Contracting State shall be bound to extradite its own nationals, but the Executive Authority of the United States shall have the power to extradite such persons if, in its discretion, it be deemed proper to do so.

2. If extradition is refused solely on the basis of the nationality of the persons sought, the Requested State shall, at the request of the Requesting State, submit the case to its authorities for prosecution.

Article 4

Political and Military Offenses

1. Extradition shall not be granted if the offense for which extradition is requested is a political offense.

2. For the purposes of this Treaty, the following offenses shall not be considered to be political offenses:

(a) a murder or other willful crime against the person of a Head of State of one of the Contracting States, or of a member of the Head of State's family;

(b) an offense for which both Contracting States have the obligation pursuant to a multilateral international agreement to extradite the person sought or to submit the case to their competent authorities for decision as to prosecution;

(c) murder, manslaughter, malicious wounding or inflicting grievous bodily harm;

(d) an offense involving kidnapping, abduction, or any form of unlawful detention, including the taking of a hostage;

(e) placing or using an explosive, incendiary or destructive device or substance capable of endangering life or causing grievous bodily harm;

(f) an attempt to commit, or participation or complicity in the commission of, any of the foregoing offenses; and

(g) an "association of wrongdoers" as provided by the laws of Luxembourg, or a "conspiracy" as provided by the laws of the United States, to commit any of the foregoing offenses.

3. Notwithstanding the terms of paragraph 2 of this Article, extradition shall not be granted if the executive authority of the Requested State determines that the request was politically motivated.

4. The executive authority of the Requested State shall refuse extradition for offenses under military law which are not offenses under ordinary criminal law.

Article 5

Fiscal Offenses

1. The executive authority of the Requested State shall have discretion to deny extradition when the offense for which extradition is requested is a fiscal offense.

2. For purposes of this Treaty, a fiscal offense is:

(a) an offense relating to the reporting and payment of taxes or customs duties, or

(b) an offense relating to currency exchange laws.

3. For purposes of this Treaty, an offense described in paragraph 2 may nonetheless be considered not to be a fiscal offense if it relates to drug trafficking, a crime of violence, or other criminal conduct of a particularly serious nature without regard to whether extradition is sought for such other criminal activity.

Article 6

Prior Prosecution

1. Extradition shall not be granted when the person sought has been found guilty, convicted or acquitted in the Requested State for the offense for which extradition is requested.

2. Extradition shall not be precluded by the fact that the authorities in the Requested State have decided not to prosecute the person sought for the acts for which extradition is requested, or to discontinue any criminal proceedings which have been instituted against the person sought for those acts.

Article 7

Capital Punishment and Humanitarian Concerns

1. When the offense for which extradition is sought is punishable by death under the laws in the Requesting State and is not punishable by death under the laws in the Requested State, the Requested State shall refuse extradition unless the Requesting State provides such assurances as the Requested State considers sufficient that the death penalty will not be imposed or, if imposed, will not be carried out.

2. Notwithstanding the provisions of the present Treaty, the executive authority of the Requested State may refuse extradition for humanitarian concerns unless the Requesting State provides such assurances as the Requested State considers sufficient to take into account the humanitarian concerns.

Article 8

Extradition Procedures and Required Documents

1. Every request for extradition shall be submitted through the diplomatic channel.

2. Each request shall be supported by:

(a) documents, statements, or other types of information which describe the identity,

naticnality, and probable location of the person sought;

(b) information describing the facts of the offense and the procedural history of the case;

(c) the text of the law describing the essential elements of the offense for which extradition is requested;

(d) the text of the law describing the punishment for the offense;

(e) the text or a statement of the provisions of law describing any time limit on the prosecution or the service of the sentence and information concerning the interruption or suspension of the time limit; and

(f) the documents, statements, or other types of information specified in paragraph 3 or paragraph 4 of this Article, as applicable.

3. A request for extradition of a person who is sought for prosecution shall also be supported by:

(a) a copy of the warrant or order of arrest issued by a judge or other competent authority;

(b) a copy of the charging document; and

(c) such information as would justify the committal for trial of the person if the offense had been committed in the Requested State.

4. A request for extradition relating to a person who has been found guilty of the offense for which extradition is sought shall also be supported by:

(a) a copy of the judgment of conviction or, if such copy is not available, a statement by a judicial authority that the person has been found guilty;

(b) information establishing that the person sought is the person to whom the finding of guilt refers; and

(c) a copy of the sentence imposed, if the person sought has been sentenced, and a statement establishing to what extent the sentence has been carried out; or

(d) if the person has been found guilty of an offense but no sentence has been imposed, a statement affirming that the Requesting State intends to impose a sentence and a copy of the warrant for the arrest of the person; and

(e) in the case of a person who has been found guilty in absentia, the documents required by paragraph 3.

Article 9

Supplementary Information

1. If, at any stage of the extradition proceedings, the Requested State considers that the information furnished in support of the request for the extradition of a person is not sufficient to fulfill the requirements of its law with respect to extradition, that State may request the necessary supplementary information and may fix a time-limit for the receipt thereof.

2. If the person whose extradition is requested is under arrest and the supplementary information furnished is not sufficient or is not received within the time specified, the person may be released from custody but such release shall not preclude the Requesting State from making a new request for the extradition of the person.

3. Where the person is released from custody in accordance with paragraph 2 of this Article, the Requested State shall notify the Requesting State as soon as practicable.

Article 10

Admissibility of Documents

The documents which accompany an extradition request shall be received and admitted as evidence in extradition proceedings if:

(a) in the case of a request from the United States, they are authenticated by the Department of State of the United States;

(b) in the case of a request from Luxembourg, they are certified by the diplomatic or consular officer of the United States resident in Luxembourg, as provided by the extradition laws of the United States; or

(c) they are certified or authenticated in any other manner accepted by the law of the Requested State.

Article 11

Translation

All documents submitted by Luxembourg shall be translated into English. All documents submitted by the United States shall be translated into French.

Article 12

Provisional Arrest

1. In case of urgency, a Contracting State may request the provisional arrest of the person sought pending presentation of the request for extradition. A request for provisional arrest may be transmitted through the diplomatic channel or directly between the United States Department of Justice and the Ministry of Justice of Luxembourg. The facilities of the International Criminal Police Organization (Interpol) may be used to transmit such a request.

2. The application for provisional arrest shall contain:

(a) a description of the person sought and information concerning the person's nationality;

(b) the location of the person sought, if known;

(c) a brief statement of the facts of the case, including, if possible, the time and location of the offense;

(d) a description of the laws violated;

(e) a statement of the existence of a warrant of arrest or a finding of guilt or

judgment of conviction against the person sought; and

(f) a statement that a request for extradition for the person sought will follow.

3. The Requesting State shall be notified without delay of the disposition of its application and the reasons for any denial.

4. A person who is provisionally arrested may be discharged from custody upon the expiration of sixty (60) days from the date of provisional arrest pursuant to this Treaty if the executive authority of the Requested State has not received the formal request for extradition and the supporting documents required in Article 8.

5. The fact that the person sought has been discharged from custody pursuant to paragraph 4 of this Article shall not prejudice the subsequent rearrest and extradition of that person if the extradition request and supporting documents are delivered at a later date.

Article 13

Decision and Surrender

1. The Requested State shall promptly notify the Requesting State of its decision on the request for extradition.

2. If the request is denied in whole or in part, the Requested State shall provide an explanation of the reasons for the denial. The Requested State shall provide copies of pertinent judicial decisions upon request.

3. If the request for extradition is granted, the authorities of the Contracting States shall agree on the time and place for the surrender of the person sought.

4. If the person sought is not removed from the territory of the Requested State within such time as may be prescribed by the law of that State, he may be discharged from custody, and the Requested State may subsequently refuse extradition for the same offense.

5. The period of time spent in detention in the Requested State pursuant to the extradition request of the Requesting State shall be subtracted from the period of detention to be served in the Requesting State. The Contracting States agree to communicate to one another such information relating to the period of detention.

Article 14

Temporary and Deferred Surrender

1. If the extradition request is granted in the case of a person who is being proceeded against or is serving a sentence in the Requested State, the Requested

State may temporarily surrender the person sought to the Requesting State for the purpose of prosecution. The person so surrendered shall be kept in custody in the Requesting State and shall be returned to the Requested State after the conclusion of the proceedings against that person, in accordance with conditions to be determined by agreement of the Contracting States. The time spent in custody in the territory of the Requesting State will be deducted from the time remaining to be served in the Requested State.

2. The Requested State may postpone the extradition proceedings against a person who is being proceeded against or who is serving a sentence in that State. The postponement may continue until the proceedings against the person sought have been concluded or any sentence has been served.

Article 15

Requests for Extradition Made by Several States

If the Requested State receives requests from the other Contracting State and from any other State or States for the extradition of the same person, either for the same offense or for different offenses, the executive authority of the Requested State shall determine to which

State it will surrender the person. In making its decision, the Requested State shall consider all relevant factors, including but not limited to:

(a) whether the requests were made pursuant to treaty;

(b) the place where each offense was committed;

(c) the respective interests of the Requesting States;

(d) the gravity of the offenses;

(e) the nationality of the victim;

(f) the possibility of further extradition between the Requesting States; and

(g) the chronological order in which the requests were received from the Requesting States.

Article 16

Seizure and Surrender of Property

1. To the extent permitted under its law, the Requested State may seize and surrender to the Requesting State all items, including articles, documents, and evidence, connected with the offense in respect of which extradition is granted. The items mentioned in this Article may be surrendered even when the extradition

cannot be effected due to the death, disappearance, or escape of the person sought.

2. The Requested State may condition the surrender of the items upon satisfactory assurances from the Requesting State that the items will be returned to the Requested State as soon as practicable. The Requested State may also defer the surrender of such items if they are needed as evidence in the Requested State.

3. The rights of third parties in such items shall be duly respected.

Article 17

Rule of Speciality

1. A person extradited under this Treaty may not be detained, tried, or punished in the Requesting State except for:

(a) the offense for which extradition has been granted or a differently denominated offense based on the same facts on which extradition was granted, provided such offense is extraditable or is a lesser included offense;

(b) an offense committed after the extradition of the person; or

(c) an offense for which the executive authority of the Requested State consents to the person's detention, trial, or punishment. For the purpose of this subparagraph, the Requested State may require the submission of the documents called for in Article 8 and a document containing the statements of the person extradited. The person extradited may be detained by the Requesting State for 75 days, or for such longer period of time as the Requested State may authorize, while the request is being processed.

2. A person extradited under this Treaty may not be extradited to a third State for an offense committed prior to his surrender unless the surrendering State consents.

3. Paragraphs 1 and 2 of this Article shall not prevent the detention, trial, or punishment of an extradited person, or the extradition of that person to a third State, if:

(a) that person leaves the territory of the Requesting State after extradition and voluntarily returns to it; or

(b) that person does not leave the territory of the Requesting State within 15 days of

the day on which that person is free to leave.

Article 18

Simplified Extradition

If the person sought consents to surrender to the Requesting State, the Requested State may surrender the person as expeditiously as possible without further proceedings.

Article 19

Transit

1. Either Contracting State may authorize transportation through its territory of a person surrendered to the other State by a third State. A request for transit shall be made through the diplomatic channel or directly between the United States Department of Justice and the Ministry of Justice of Luxembourg. The facilities of the International Criminal Police Organization (Interpol) may be used to transmit such a request. It shall contain a description of the person being transported and a brief statement of the facts of the case. A person in transit may be detained in custody during the period of transit. Transit may be refused for

a national of the Requested State and for a person sought for prosecution or to serve a penalty of deprivation of liberty imposed by the authorities of that State.

2. No authorization for transit is required when air transportation is used and no landing is scheduled on the territory of the State being transited. If an unscheduled landing occurs, that State may require the request for transit as provided in paragraph 1. That State shall detain the person to be transported until the request is received and the transit is effected, so long as the request is received within 96 hours of the unscheduled landing.

Article 20

Representation and Expenses

1. The Requested State shall, by all legal means within its power, advise, assist, appear in court and represent the interests of the Requesting State, in any proceeding arising out of a request for extradition.

2. The Requesting State shall bear the expenses related to the translation of documents and the transportation of the person surrendered. The Requested State shall pay all other expenses incurred in that State by reason of the extradition proceedings.

3. Neither State shall make any pecuniary claim against the other State arising out of the arrest, detention, examination, or surrender of persons sought under this Treaty.

Article 21

Consultation

The United States Department of Justice and the Ministry of Justice of Luxembourg may consult with each other directly or through the facilities of Interpol in connection with the processing of individual cases and in furtherance of maintaining and improving procedures for the implementation of this Treaty.

Article 22

Application

This Treaty shall apply to offenses committed before as well as after it enters into force.

Article 23

Ratification and Entry into Force

1. This Treaty shall be subject to ratification; the instruments of ratification shall be exchanged at Luxembourg as soon as possible.

2. This Treaty shall enter into force on the first day of the second month after the exchange of the instruments of ratification.

3. Upon the entry into force of this Treaty, the Treaty of Extradition between the United States of America and the Grand Duchy of Luxembourg, signed at Berlin on October 29, 1883, as amended by the Supplementary Extradition Convention signed at Luxembourg on April 24, 1935, shall cease to have any effect. Nevertheless, the prior Treaty as amended shall apply to any extradition proceedings in which the extradition documents have already been submitted to the courts of the Requested State at the time this Treaty enters into force, except that Article 2 of this Treaty shall be applicable to such proceedings. Articles 14 and 17 of this Treaty shall apply to persons found extraditable under the prior Treaty.

Article 24

Termination

Either Contracting State may terminate this Treaty at any time by giving written notice to the other Contracting State, and the termination shall be effective six months after the date of such notice.

IN WITNESS WHEREOF, the undersigned, being duly authorized by their respective Governments, have signed this Treaty.

DONE at Washington, in duplicate, this first day of OCTOBER, 1996 in the English and French languages, both texts being equally authentic.

EXTRADITION TREATY WITH THE PHILIPPINES

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

THE EXTRADITION TREATY BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE REPUBLIC OF THE PHILIPPINES, SIGNED AT MANILA ON NOVEMBER 13, 1994.

SEPTEMBER 5, 1995.—Treaty was read the first time and, together with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed for the use of the Senate.

U.S. GOVERNMENT PRINTING OFFICE
99-118 WASHINGTON : 1995

LETTER OF TRANSMITTAL

THE WHITE HOUSE, *September 5, 1995.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Extradition Treaty Between the Government of the United States of America and the Government of the Republic of the Philippines, signed at Manila on November 13, 1994.

In addition, I transmit for the information of the Senate, the report of the Department of State with respect to the Treaty. As the report explains, the Treaty will not require implementing legislation.

Together with the Treaty Between the Government of the United States of America and the Government of the Republic of the Philippines on Mutual Legal Assistance in Criminal Matters, also signed November 13, 1994, this Treaty will, upon entry into force, enhance cooperation between the law enforcement communities of both countries. It will thereby make a significant contribution to international law enforcement efforts.

The provisions in this Treaty follow generally the form and content of extradition treaties recently concluded by the United States.

I recommend that the Senate give early and favorable consideration to the Treaty and give its advice and consent to ratification.

WILLIAM J. CLINTON.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
Washington, August 4, 1995.

The President,
The White House.

THE PRESIDENT: I have the honor to submit to you the Extradition Treaty between the Government of the United States of America and the Government of the Republic of the Philippines (the "Treaty"), signed at Manila on November 13, 1994. I recommend that the Treaty be transmitted to the Senate for its advice and consent to ratification.

The Treaty follows generally the form and content of extradition treaties recently concluded by the United States. It represents part of a concerted effort by the Department of State and the Department of Justice to develop modern extradition relationships to enhance the United States' ability to prosecute serious offenders including, especially, narcotics traffickers and terrorists.

The Treaty marks a significant step in bilateral cooperation between the United States and the Philippines. Upon entry into force, it will become the first bilateral extradition treaty in effect between the United States and the Philippines. (The United States signed an earlier extradition treaty with the Philippines on November 27, 1981. However, that treaty, which now is outmoded, was not forwarded to the Senate for advice and consent to ratification.) The Treaty can be implemented without legislation.

Article 1 obligates each Contracting Party to extradite to the other, pursuant to the provisions of the Treaty, any person charged with or convicted of an extraditable offense.

Article 2(1) defines an extraditable offense as one punishable under the laws of both Contracting Parties by deprivation of liberty for a period of more than one year, or by a more severe penalty. Use of such a "dual criminality" clause rather than a list of offenses covered by the Treaty obviates the need to renegotiate or supplement the Treaty as additional offenses become punishable under the laws of both Contracting Parties.

Article 2(2) defines an extraditable offense to include also an attempt or a conspiracy to commit, aiding or abetting, counselling, causing or procuring the commission of or being an accessory before or after the fact to an extraditable offense. For such crimes, the Treaty accommodates the differences between U.S. and Philippine criminal law (the Philippines, for example, has no general conspiracy statute) by creating an exception to the general dual-criminality requirement and permitting extradition if the crime is punishable under the laws of the Requesting State by deprivation of lib-

VI

erty for a period of more than one year, or by a more severe penalty, and the underlying offense is an extraditable offense.

Additional flexibility is provided by Article 2(3), which provides that an offense shall be considered an extraditable offense: whether or not the laws in the Contracting Parties place the offense within the same category of offenses or describe the offense by the same terminology; and whether or not the offense is one for which United States federal law requires the showing of such matters as interstate transportation or use of the mails or of other facilities affecting interstate or foreign commerce, such matters being merely for the purpose of establishing jurisdiction in a United States federal court.

With regard to offenses committed outside the territory of the Requesting State, Article 2(4) provides a basis for granting extradition if the Requested State's laws provide for punishment of an offense committed outside of its territory in similar circumstances or if the executive authority of the Requested State, in its discretion, decides to submit the case to its courts for the purpose of extradition.

Finally, article 2(5) provides that if extradition is granted for an extraditable offense, it shall also be granted for other offenses specified in the request that do not meet the minimum penalty requirement, provided that all other extradition requirements are met.

As is customary in extradition treaties, Article 3 incorporates a political offense exception to the obligation to extradite. Article 3(1) states generally that extradition shall not be granted for political offenses. Article 3(2) specifies three categories of offenses that shall not be considered to be political offenses:

(a) a murder or other willful crime against the person of a Head of State of one of the Contracting Parties, or of a member of the Head of State's family;

(b) an offense for which both Contracting Parties are obliged pursuant to a multilateral international agreement to extradite the person sought or to submit the case to their competent authorities for a decision as to prosecution; and

(c) a conspiracy or attempt to commit any of the offenses described above, or aiding and abetting a person who commits or attempts to commit such offenses.

The Treaty's political offense exception is substantially identical to that contained in several other modern extradition treaties, including the treaty with Jordan, which recently received Senate advice and consent. Offenses covered by Article 3(2)(b) include:

—aircraft hijacking covered by The Hague Convention for the Suppression of Unlawful Seizure of Aircraft, done at The Hague December 16, 1970, and entered into force October 14, 1971 (22 U.S.T. 1641; T.I.A.S. No. 7192);

—aircraft sabotage covered by the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, done at Montreal September 23, 1971, and entered into force January 26, 1973, (24 U.S.T. 564; T.I.A.S. No. 7570);

—crimes against internationally protected persons, including diplomats, covered by the Convention on the Prevention and Punishment of Crimes Against Internationally Protected Persons, including Diplomatic Agents, done at New York December 14,

1973, and entered into force February 20, 1977 (28 U.S.T. 1975; T.I.A.S. No. 8532);

—hostage-taking covered by the International Convention against the Taking of Hostages, done at New York December 17, 1979; entered into force June 3, 1983, and for the United States January 6, 1985 (T.I.A.S. No. 11081); and

—maritime terrorism covered by the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome March 10, 1988; entered into force March 1, 1992, and for the United States March 6, 1995.

Article 3(3) provides that extradition shall not be granted if the executive authority of the Requested State determines that the request was politically motivated or that the offense is a military offense that is not punishable under non-military penal legislation (for example, desertion).

Article 4 bars extradition when the person sought has been tried and convicted or acquitted in the Requested State for the same offense, but does not bar extradition if the competent authorities in the Requested State have declined to prosecute or have decided to discontinue criminal proceedings against the person sought.

Under Article 5, when an offense for which surrender is sought is punishable by death under the laws of the Requesting State and the laws in the Requested State do not permit such punishment for that offense, the Requested State may refuse extradition unless the Requesting State provides such assurances as the Requested State considers sufficient that if the death is imposed, it will not be carried out. It further provides that if the Requesting State provides such an assurance, the death penalty, if imposed by the courts of the Requesting State, shall not be carried out.

Article 6 provides that extradition shall not be refused on the ground that the person sought is a citizen of the Requested State.

Article 7 establishes the procedures and describes the documents that are required to support an extradition request. The Article requires that all requests be submitted through the diplomatic channel.

Article 7(5) establishes the procedures under which documents submitted pursuant to this Article shall be received and admitted into evidence.

Article 8 provides that all documents submitted by either Contracting Party shall be in English, or shall be translated into English by the Requesting State.

Article 9 sets forth procedures for the provisional arrest and detention of a person sought pending presentation of the formal request for extradition. Article 9(4) provides that if the Requested State's executive authority has not received the request for extradition and supporting documentation within sixty days after the provisional arrest, the person may be discharged from custody. However, Article 9(5) provides explicitly that discharge from custody pursuant to Article 9(4) does not prejudice subsequent rearrest and extradition upon later delivery of the extradition request and supporting documents.

Article 10 specifies the procedures governing surrender and return of persons sought. It requires the Requested State to provide prompt notice to the Requesting State through the diplomatic chan-

nel regarding its extradition decision. If the request is denied in whole or in part, Article 10 also requires the Requesting State to provide information regarding the reasons therefor. If extradition is granted, the person sought must be removed from the territory of the Requested State within the time prescribed by the law of the Requested State.

Article 11 concerns temporary and deferred surrender. If a person whose extradition is sought is being prosecuted or is serving a sentence in the Requested State, that State may temporarily surrender the person to the Requesting State solely for the purpose of prosecution. Alternatively, the Requested State may postpone the extradition proceedings until its prosecution has been concluded and the sentence has been served.

Article 12 sets forth a non-exclusive list of factors to be considered by the Requested State in determining to which State to surrender a person sought by more than one State.

Article 13 sets forth the rule of speciality for this Treaty. It provides, subject to specific exceptions, that a person extradited under the Treaty may not be detained, tried, or punished for an offense other than that for which extradition has been granted, unless a waiver of the rule is granted by the executive authority of the Requested State. Similarly the Requesting State may not extradite such person to a third state for an offense committed prior to the original surrender unless the Requested State consents. These restrictions do not apply if the extradited person leaves the Requesting State after extradition and voluntarily returns to it or fails to leave the Requesting State within ten days of being free to do so.

Article 14 permits surrender to the Requesting State without further proceedings if the person sought provides written consent thereto.

Article 15 provides, to the extent permitted under the law of the Requested State, for the seizure and surrender to the Requesting State of property connected with the offense for which extradition is granted. Such property may be surrender even when extradition cannot be effected due to the death, disappearance, or escape of the person sought. Surrender of property may be deferred if it is needed as evidence in the Requested State and may be conditioned upon satisfactory assurances that it will be returned. Article 15 imposes an obligation to respect the rights of third parties in affected property.

Article 16 governs the transit through the territory of one Contracting Party of a person being surrendered to the other State by a third State.

Article 17 contains provisions on representation and expenses that are similar to those found in other modern extradition treaties. Specifically, the Requested State is required to bear expenses for the legal representation of the Requesting State in any proceedings arising out of a request for extradition. The Requesting State is required to bear the expenses related to the translation of documents and the transportation of the person surrendered. Article 17(3) clarifies that neither State shall make any pecuniary claim against the other State arising out of the arrest, detention, examination, or surrender of persons sought under the Treaty.

IX

Article 18 states that the United States and Philippine Departments of Justice may consult with each other directly in connection with the procession of individual cases and in furtherance of maintaining and improving Treaty implementation procedures.

Article 19, like the parallel provision in almost all recent United States extradition treaties, states that the Treaty shall apply to offenses committed before as well as after the date the Treaty enters into force.

Ratification and entry into force are addressed in Article 20. That Article provides that the Treaty shall be subject to ratification and that the instruments of ratification shall be exchanged as soon as possible, whereupon the Treaty shall enter into force.

Under Article 21, either Contracting Party may terminate the Treaty at any time upon written notice to the other party, with termination effective six months after the date of receipt of such notice.

A Technical Analysis explaining in detail the provisions of the Treaty is being prepared by the United States negotiating delegation, consisting of representatives from the Departments of Justice and State, and will be submitted separately to the Senate Committee on Foreign Relations.

The Department of Justice joins the Department of State in favoring approval of this Treaty by the Senate at an early date.

Respectfully submitted,

PETER TARNOFF.

EXTRADITION TREATY

BETWEEN

THE GOVERNMENT OF THE UNITED STATES OF AMERICA

AND

THE GOVERNMENT OF THE REPUBLIC OF THE PHILIPPINES

TABLE OF CONTENTS

EXTRADITION TREATY
BETWEEN
THE GOVERNMENT OF THE UNITED STATES OF AMERICA
AND
THE GOVERNMENT OF THE REPUBLIC OF THE PHILIPPINES

The Government of the United States of America and the Government of the Republic of the Philippines,

Desiring to provide for more effective cooperation between the Contracting Parties in the repression of crime; and

Desiring to conclude a Treaty for the reciprocal extradition of offenders;

Have agreed as follows:

Article 1

Obligation to Extradite

The Contracting Parties agree to extradite to each other, pursuant to the provisions of this Treaty, persons whom the authorities in the Requesting State have charged with or convicted of an extraditable offense.

Article 2

Extraditable Offenses

1. An offense shall be an extraditable offense if it is punishable under the laws in both Contracting Parties by deprivation of liberty for a period of more than one year, or by a more severe penalty.

2. An offense shall also be an extraditable offense notwithstanding paragraph 1 of this Article if it consists of an attempt or a conspiracy to commit, aiding or abetting, counselling, causing or procuring the commission of or being an accessory before or after the fact to, any offense that is an extraditable offense pursuant to paragraph 1 and if it is punishable under the laws of the Requesting State by deprivation of liberty for a period of more than one year, or by a more severe penalty.

3. For the purposes of this Article, an offense shall be an extraditable offense:

(a) whether or not the laws in the Contracting Parties place the offense within the same category of offenses or describe the offense by the same terminology; or

(b) whether or not the offense is one for which United States federal law requires the showing of such matters as interstate transportation, or use of the mails or of other facilities affecting interstate or foreign commerce, such matters being merely for the purpose of establishing jurisdiction in a United States federal court.

4. If the offense was committed outside of the territory of the Requesting State, extradition shall be granted in accordance with the provisions of this Treaty:

(a) if the laws in the Requested State provide for punishment of an offense committed outside of its territory in similar circumstances; or

(b) if the executive authority of the Requested State, in its discretion, decides to submit the case to its courts for the purpose of extradition.

5. If extradition has been granted for an extraditable offense, it shall also be granted for any other offense specified in the request, even if the latter offense is punishable by less than

one year's deprivation of liberty, provided that all other requirements of extradition are met.

Article 3

Political and Military Offenses

1. Extradition shall not be granted if the offense for which extradition is requested is a political offense.

2. For the purposes of this Treaty, the following offenses shall not be considered to be political offenses:

(a) the murder or other willful crime against the person of a Head of State of one of the Contracting Parties, or a member of the Head of State's family;

(b) an offense for which both Contracting Parties have the obligation pursuant to a multilateral international agreement to extradite the person sought or to submit the case to their competent authorities for decision as to prosecution; and

(c) a conspiracy or attempt to commit any of the foregoing offenses, or aiding or abetting a person who commits or attempts to commit such offenses.

3. Extradition shall not be granted if the executive authority of the Requested State determines that the request was

politically motivated, or that the offense is a military offense which is not punishable under non-military penal legislation.

Article 4

Prior Prosecution

1. Extradition shall not be granted when the person sought has been tried and convicted or acquitted in the Requested State for the offense for which extradition is requested.

2. Extradition shall not be precluded by the fact that the competent authorities in the Requested State have decided not to prosecute the person sought for the acts for which extradition is requested, or have decided to discontinue any criminal proceedings which have been initiated against the person sought for those acts.

Article 5

Capital Punishment

1. When the offense for which extradition is requested is punishable by death under the laws in the Requesting State, and the laws in the Requested State do not permit such punishment for that offense, extradition may be refused unless the Requesting State provides such assurances as the Requested State considers

sufficient that if the death penalty is imposed, it will not be carried out.

2. In instances in which a Requesting State provides an assurance in accordance with paragraph 1 of this Article, the death penalty, if imposed by the courts of the Requesting State, shall not be carried out.

Article 6

Extradition of Nationals

Extradition shall not be refused on the ground that the person sought is a citizen of the Requested State.

Article 7

Extradition Procedures and Required Documents

1. All requests for extradition shall be submitted through the diplomatic channel.

2. All requests for extradition shall be supported by:

(a) documents, statements, or other types of information which describe the identity and probable location of the person sought;

(b) a statement of the facts of the offense and the procedural history of the case;

(c) a statement of the provisions of the law describing the essential elements of the offense for which extradition is requested;

(d) a statement of the provisions of law describing the punishment for the offense;

(e) a statement of the provisions of the law describing any time limit on the prosecution or the execution of punishment for the offense; and

(f) the documents, statements, or other types of information specified in paragraph 3 or paragraph 4 of this Article, as applicable.

3. In addition to the documents referred to in paragraph 2, a request for extradition of a person who is sought for prosecution shall be accompanied by such evidence as, according to the law of the Requested State, would provide probable cause for his arrest and committal for trial if the offense had been committed there and:

(a) a copy of the warrant or order of arrest issued by a judge or other competent authority; and

(b) a copy of the charging document.

4. A request for extradition relating to a person who has be convicted of the offense for which extradition is sought shall also be supported by:

(a) a copy of the judgment of conviction, or, if such copy is not available, a statement by a judicial authority that the person has been convicted;

(b) information establishing that the person sought is the person to whom the conviction refers;

(c) a copy of the sentence imposed, if the person sought has been sentenced, and a statement establishing to what extent the sentence has been carried out; and

(d) in the case of a person who has been convicted in absentia, the documents required in paragraph 3.

5. The documents which accompany an extradition request shall be received and admitted as evidence in extradition proceedings if:

(a) they are certified by the principal diplomatic or consular officer of the Requested State resident in the Requesting State; or

(b) they are certified or authenticated in any other manner accepted by the law of the Requested State.

Article 8

Language

All documents submitted by either Contracting Party shall be in the English language, or shall be translated into the English language, by the Requesting State.

Article 9

Provisional Arrest

1. In case of urgency, a Contracting Party may request the provisional arrest of the person sought pending presentation of the request for extradition. A request for provisional arrest may be transmitted through the diplomatic channel or directly between the United States Department of Justice and the Philippine Department of Justice.

2. The application for provisional arrest shall contain:

(a) a description of the person sought;

(b) the location of the person sought, if known;

(c) a brief statement of the facts of the case, including, if possible, the time and location of the offense;

(d) a description of the laws violated;

(e) a statement of the existence of a warrant of arrest or finding of guilt or judgment of conviction against the person sought; and

(f) a statement that a request for extradition for the person sought will follow.

3. The Requesting State shall be notified without delay of the disposition of its application and the reasons for any denial.

4. A person who is provisionally arrested may be discharged from custody upon the expiration of sixty (60) days from the date

of arrest pursuant to this Treaty if the executive authority of the Requested State has not received the formal request for extradition and the supporting documents required in Article 7.

5. The fact that the person sought has been discharged from custody pursuant to paragraph 4 of this Article shall not prejudice the subsequent rearrest and extradition of that person if the extradition request and supporting documents are delivered at a later date.

Article 10

Decision and Surrender

1. The Requested State shall promptly notify the Requesting State through the diplomatic channel of its decision on the request for extradition.

2. If the request is denied in whole or in part, the Requested State shall provide information as to the reasons for the denial. The Requested State shall provide copies of pertinent judicial decisions upon request.

3. If the request for extradition is granted, the authorities of the Contracting Parties shall agree on the time and place for the surrender of the person sought.

4. If the person sought is not removed from the territory of the Requested State within the time prescribed by the law of that State, that person may be discharged from custody, and the Requested State may subsequently refuse extradition for the same offense.

Article 11

Temporary and Deferred Surrender

1. If the extradition request is granted in the case of a person who is being prosecuted or is serving a sentence in the territory of the Requested State, the Requested State may temporarily surrender the person sought to the Requesting State for the purpose of prosecution. The person so surrendered shall be kept in custody in the Requesting State and shall be returned to the Requested State after the conclusion of the proceedings against that person, in accordance with conditions to be determined by agreement between the Contracting Parties.

2. The Requested State may postpone the extradition proceedings against a person who is being prosecuted or who is serving a sentence in that State. The postponement may continue until the prosecution of the person sought has been concluded or until such person has served any sentence imposed.

Article 12

Requests For Extradition Made By More Than One State

If the Requested State receives requests from the other Contracting Party and from any other State or States for the extradition of the same person, either for the same offense or for a different offense, the executive authority of the Requested State shall determine to which State it will surrender the person. In making its decision, the Requested State shall consider all relevant factors, including but not limited to:

(a) whether the requests were made pursuant to treaty;

(b) the place where each offense was committed;

(c) the respective interests of the Requesting States;

(d) the gravity of the offenses;

(e) the nationality of the victim;

(f) the possibility of further extradition between the Requesting States; and

(g) the chronological order in which the requests were received from the Requesting States.

Article 13

Rule of Speciality

1. A person extradited under this Treaty may not be detained, tried, or punished in the Requesting State except for:

(a) the offense for which extradition has been granted or a differently denominated offense based on the same facts on which extradition was granted provided such offense is extraditable or is a lesser included offense;

(b) an offense committed after the extradition of the person; or

(c) an offense for which the executive authority of the Requested State consents to the person's detention, trial, or punishment. For the purposes of this subparagraph:

(i) the Requested State may require the submission of the documents called for in Article 7; and

(ii) the person extradited may be detained by the Requesting State for 90 days, or for such longer period of time as the Requested State may authorize, while the request is being processed.

2. A person extradited under this Treaty may not be extradited to a third state for an offense committed prior to his surrender unless the surrendering State consents.

3. Paragraphs 1 and 2 of this Article shall not prevent the detention, trial, or punishment of an extradited person, or the extradition of that person to a third state, if:

(a) that person leaves the territory of the Requesting State after extradition and voluntarily returns to it; or

as practicable. The Requested State may also defer the surrender of such property if it is needed as evidence in the Requested State.

3. The rights of third parties in such property shall be duly respected.

Article 16

Transit

1. Either Contracting Party may authorize transportation through its territory of a person surrendered to the other State by a third State. A request for transit shall be transmitted through the diplomatic channel or directly between the United States Department of Justice and the Philippine Department of Justice. It shall contain a description of the person being transported and a brief statement of the facts of the case. A person in transit may be detained in custody during the period of transit.

2. No authorization is required where one Contracting Party is transporting a person surrendered to it by a third State using air transportation and no landing is scheduled on the territory of the other Contracting Party. If an unscheduled landing occurs on the territory of one Contracting Party, that State may require that the other Contracting Party request transit as provided in

paragraph 1. The Contracting Party in which the unscheduled landing occurs shall detain the person to be transported until the request for transit is received and the transit is effected, so long as the request is received within 96 hours of the unscheduled landing.

Article 17

Representation and Expenses

1. The Requested State shall advise, assist, appear in court on behalf of the Requesting State, and represent the interests of the Requesting State, in any proceedings arising out of a request for extradition.

2. The Requesting State shall bear the expenses related to the translation of documents and the transportation of the person surrendered. The Requested State shall pay all other expenses incurred in that State by reason of the extradition proceedings.

3. Neither State shall make any pecuniary claim against the other State arising out of the arrest, detention, examination, or surrender of persons sought under this Treaty.

Article 18

Consultation

The Department of Justice of the United States of America and the Department of Justice of the Republic of the Philippines may consult with each other directly in connection with the processing of individual cases and in furtherance of maintaining and improving procedures for the implementation of this Treaty.

Article 19

Application

This Treaty shall apply to offenses encompassed by Article 2 committed before as well as after the date this Treaty enters into force.

Article 20

Ratification and Entry Into Force

1. This Treaty shall be subject to ratification; the instruments of ratification shall be exchanged at Manila as soon as possible.

2. This Treaty shall enter into force upon the exchange of the instruments of ratification.

Article 21

Termination

Either Contracting Party may terminate this Treaty at any time by giving written notice to the other Contracting Party, and the termination shall be effective six months after the date of receipt of such notice.

IN WITNESS WHEREOF, the undersigned, being duly authorized by their respective Governments, have signed this Treaty.

DONE in duplicate at Manila this thirteenth day of November, 1994.

[1] U.S., Department of State, Office of the Assistant Legal Advisor for Treaty Affairs. Mutual legal assistance treaties facilitate cooperation and collaboration between the law enforcement officials of signatory states. These treaties are used in conjunction with extradition treaties to aid in criminal investigations, prosecutions, and judicial proceedings. Legal assistance such as taking testimony or statements, providing documents, transferring persons in custody, executing searches and seizures, and furnishing evidentiary items is included in these treaties.

104TH CONGRESS
1st Session

SENATE

TREATY DOC.
104–2

TREATY WITH THE UNITED KINGDOM ON MUTUAL LEGAL ASSISTANCE ON CRIMINAL MATTERS

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

THE TREATY BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND ON MUTUAL LEGAL ASSISTANCE IN CRIMINAL MATTERS, SIGNED AT WASHINGTON ON JANUARY 6, 1994, TOGETHER WITH A RELATED EXCHANGE OF NOTES SIGNED THE SAME DATE

JANUARY 23, 1995.—Treaty was read the first time and, together with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed for the use of the Senate

---

U.S. GOVERNMENT PRINTING OFFICE

99–118 WASHINGTON : 1995

LETTER OF TRANSMITTAL

THE WHITE HOUSE, *January 23, 1995.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty Between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland on Mutual Legal Assistance in Criminal Matters, signed at Washington on January 6, 1994, with a related exchange of notes signed the same date. Also transmitted for the information of the Senate is the report of the Department of State with respect to this Treaty.

The Treaty is one of a series of modern mutual legal assistance treaties being negotiated by the United States in order to counter criminal activities more effectively. The Treaty should be an effective tool to assist in the prosecution of a wide variety of modern criminals, including members of drug cartels, "white-collar criminals," and terrorists. The Treaty is self-executing.

The Treaty provides for as broad range of cooperation in criminal matters. Mutual assistance available under the Treaty includes: (1) the taking of testimony or statements of witnesses; (2) the provision of documents, records, and evidence; (3) the service of legal documents; (4) the location or identification of persons; (5) the execution of requests for searches and seizures; and (6) the provision of assistance in proceedings relating to the forfeiture of the proceeds of crime and the collection of fines imposed as a sentence in a criminal prosecution.

I recommend that the Senate give early and favorable consideration to the Treaty, and related exchange of notes, and give its advice and consent to ratification.

WILLIAM J. CLINTON.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
Washington, January 6, 1995.

THE PRESIDENT,
The White House.

THE PRESIDENT: I have the honor to submit to you the Treaty between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland on Mutual Legal Assistance in Criminal Matters (the "Treaty"), signed at Washington on January 6, 1994, together with a related exchange of notes signed on the same date. I recommend that the Treaty and the related exchange of notes be transmitted to the Senate for its advice and consent to ratification.

The Treaty covers mutual legal assistance in criminal matters. In recent years, similar bilateral treaties have entered into force with Argentina, the Bahamas, Canada, Italy, Mexico, Morocco, the Netherlands, Spain, Switzerland, Thailand, Turkey, the United Kingdom concerning the Cayman Islands, and Uruguay. Other similar treaties have been signed and ratified by the United States (but have not yet entered into force) with Belgium, Colombia, and Jamaica. In addition, treaties with Nigeria and Panama have been transmitted to the Senate and await Senate consideration. This Treaty contains many provisions similar to those in the other treaties.

This Treaty will enhance our ability to investigate and prosecute drug-related money laundering offenses. It is designed to be self-executing and will not require implementing legislation.

Article 1 provides for mutual assistance in "proceedings", which is defined in Article 19 to include any measure taken in connection with the investigation or prosecution of criminal offenses, including the freezing, seizure, and forfeiture of proceeds and instrumentalities of crime and the imposition of fines related to a criminal prosecution.

The Treaty does not contain a provision limiting assistance to offenses which are proscribed under the law of the Party from which assistance is requested (the "Requested Party"). As clarified in the interpretative notes that accompany the Treaty, however, the Treaty does not apply to anti-trust or competition investigation or proceedings underway at the time the Treaty was signed. This exchange of notes also provides that the Central Authorities of the Parties may, at a later date, provide assistance in such proceedings as may be agreed in writing between the Parties.

VI

Article 1 further provides that assistance under the Treaty shall include: taking the testimony or statements or persons; providing documents, records, and evidence; serving documents; locating or identifying persons; transferring persons in custody for testimony or other purposes; executing requests for searches and seizures; identifying, tracing, freezing, seizing, and forfeiting the proceeds and instrumentalities of crime and assistance in related proceedings; and such other assistance as may be agreed between the Central authorities.

Article 1 explicitly states that the Treaty does not create rights in private parties to obtain, suppress, or exclude evidence, or to impede the execution of a request.

Article 2 provides for the establishment of Central Authorities and defines the Central Authorities for purposes of the Treaty. For the United States, the Central Authority is the Attorney General or a person designated by the Attorney General. For the United Kingdom, the Central Authority is the Secretary of State for the Home Department or the Secretary's designee. The article provides that requests under the Treaty shall be made directly between the Central Authorities.

Article 3 sets forth the circumstances under which a Party may deny assistance under the Treaty, including requests related to certain military offenses, offenses of a political character, and requests relating to an offender who, if proceeded against in the Requested Party, would be entitled to be discharged on grounds of a previous acquittal or conviction. In addition, a Requested Party may also refuse assistance, if, in its view, the request, if granted, would impair its sovereignty, security, or other essential interests or would be contrary to important public policy. As clarified in the interpretative notes accompanying the Treaty, the limitation based on "important public policy" grounds would include a Requested Party's policy of opposing the exercise of jurisdiction which, in its view, is extraterritorial and objectionable.

Before denying assistance, the Central Authority of the Requested State is required to consult with its counterpart in the Requesting State to consider whether assistance can be given subject to such conditions it deems necessary. If the Requesting State accepts assistance subject to conditions, it shall comply with the conditions.

Article 4 prescribes the form and content of written requests under the Treaty, specifying in detail the information required in each case. The article specifies further information to be provided to the extent necessary and possible to assist in locating individuals and effecting particular types of assistance.

Article 5 provides that a Request Party shall take whatever steps it deems necessary to give effect to requests from the other Party. Courts in the Requested State are empowered to issue subpoenas, search warrants, or other order orders necessary to execute such requests.

Article 5 further states that requests be executed in accordance with the laws of the Requested State unless the Treaty provides otherwise. The method of execution specified in the request is to be followed to the extent that it is not incompatible with the laws and practices of the Requested Party. If the Central Authority of the

Requested Party determines that execution of the request would interfere with ongoing proceedings or prejudice the safety of any person in its territory, it may postpone execution or, after consultations with the Requesting Party, impose conditions on such execution. If the Requesting Party accepts assistance subject to such conditions, it shall comply with them.

Under Article 5, the Central Authority of the Requested Party shall promptly inform its counterpart in the Requesting Party of the outcome of the execution of a request. If a request is denied, a Central Authority shall inform its counterpart of the reasons for such denial.

Article 6 apportions between the two States the costs incurred in executing a request. Generally, each State shall bear the expenses incurred within its territory of executing a request.

Article 7 establishes procedures both for ensuring the confidentiality of requests and their contents. Upon request, the Requested Party shall keep confidential any information that might indicate that a request has been made or responded to. However, if a request cannot be executed without breaching confidentiality, the Requested State must inform the Requesting State, so that the Requesting State may determine whether to withdraw the request in order to maintain confidentiality. Article 7 further obliges the Requesting Party not to use or disclose any information or evidence obtained under the treaty for purposes unrelated to the proceedings stated in the request without the prior consent of the Requested Party. In the interpretative notes, the Parties recognize that these prohibitions will not prohibit a Requesting Party from disclosing such information to the extent there is an obligation to do so under that Party's Constitution or law. This last clarification was provided to ensure that the United States and the United Kingdom authorities would be in a position to make available exculpatory information to criminal defendants.

Article 8 provides that the Requested Party may compel, if necessary, the taking of testimony or production of documents in its territory on behalf of the Requesting Party. In the event that a person whose testimony or evidence is being taken asserts a claim of immunity, incapacity, or privilege under the laws of the Requesting Party, the testimony or evidence shall be taken and the claim made known to the Requesting Party for resolution by its authorities.

Article 8 also requires the Requested Party, upon request, to inform the Requesting Party in advance of the date and place of the taking of testimony. The Requested Party must also permit the presence of any persons specified in the request (such as the accused, counsel for the accused, or other interested person) and to permit such persons to question the person whose testimony is being taken, through a legal representative qualified to appear before the courts of the Requested Party. Finally, this article provides a mechanism for authentication of documentary evidence produced pursuant to this article and provides that no further authentication or certification shall be necessary in order for such information to be admissible in evidence in proceedings in the Requesting Party.

Article 9 requires that the Requested Party provide the Requesting Party with copies of publicly available records of government departments and agencies. The Requested Party may further pro-

vide copies of other records or information in the possession of a government department or agency but not publicly available to the same extent and under the same conditions as it would to its own law enforcement or judicial authorities. The article requires official authentication of documents furnished, using forms appended to the Treaty and confirms their admissibility in evidence in the Requesting Party if so authenticated.

Article 10 provides a mechanism for a Requesting Party to invite the voluntary appearance and testimony in its territory of a person located in the Requested Party. In such a case, the Central Authority of the Requested Party is required to invite the person to appear and promptly inform the Central Authority of the Requesting Party of the person's response. The request may state that the Requesting Party will assure the person shall not be subject to service of process or be detained or subjected to restriction of personal liberty, by reason of any acts or convictions which preceded his departure from the territory of the Requested Party. This safe conduct shall cease fifteen days after the Central Authority of the Requesting Party has notified its counterpart that the person's presence is no longer required, or if the person has left the territory of the Requesting Party and voluntarily returns to it.

Article 11 provides for the voluntary transfer to one Party of a person in custody in the other Party, for purposes of assistance under the Treaty, provided that the person in question and both Parties agree. The article establishes the express authority and the obligation for the Requesting Party to maintain the person in custody unless otherwise authorized by the Requested Party. It further specifies the requirements for ensuring the person's safety and return to the Requested Party.

Article 12 provides that the Requested Party shall use its best efforts to ascertain the location or identity of persons specified in a request and shall promptly notify the Requesting Party of the results of its inquiries.

Under Article 13, a Requested Party shall, to the extent possible, effect service of process of any document requested under the Treaty, including subpoenas or other process requiring the appearance of any person before any authority or tribunal in the territory of the Requesting Party. Such service, however, does not impose an obligation under the law of the Requested Party to comply with such process. The article further requires that any request for the service of a document requiring a person to appear in the territory of the Requesting Party be transmitted a reasonable time before the scheduled appearance. The Requested Party is required to return proof of service.

Article 14 obligates each Party to execute requests for search, seizure, and delivery of any article to the Requesting Party if the request includes the information justifying such action under the laws of the Requested Party and it is carried out in accordance with the laws of that Party. The Requested Party may refuse such a request if it relates to conduct for which its own powers of search and seizure would not be exercisable in a similar circumstance. The article further provides for the authentication and certification of evidence delivered under this article and provides that the Central

Authority of the Requested Party may impose conditions on transfer to protect third party interests in the property.

Article 15 obliges the Requesting Party to return any documents or articles furnished to it under this treaty unless the Central Authority waives such return.

Article 16 obligates the Parties to assist each other in asset forfeiture proceedings. Specifically, the Parties agree to assist each other in proceedings involving the identification, tracing, freezing, seizure, or forfeiture of the proceeds and instrumentalities of crime and to assist each other in relation to proceedings involving the imposition of fines related to a criminal prosecution. Under this article, a Requested Party may transfer forfeited assets or the proceeds of their sale to the other Party to the extent permitted by the former's domestic law, upon such terms as may be agreed.

Article 17 provides that assistance and procedures provided in this Treaty shall not prevent the Parties from providing assistance to each other through the provisions of other international agreements, national laws, or any other arrangement, agreement, or practice applicable between their law enforcement agencies.

Article 18 provides that the Parties or their Central Authorities shall consult promptly at the request of either, concerning the implementation of this Treaty. Article 18 also contains novel consultative procedures to enable the Parties to have first recourse to the Treaty, with respect to any matter for which assistance could be granted under the Treaty, prior to the enforcement of a "compulsory measure" requiring an action to be performed by a person located in the territory of the other Party. The term "compulsory measure" is described with greater specificity in the interpretative notes. Under the consultative mechanisms for dealing with the enforcement of compulsory measures, if a Party is aware that its authorities are intending to take such compulsory measures, its Central Authority shall inform the other Central Authority, who may request consultations. Should a Central Authority learn that such measures may be taken in its territory, it may also request consultations. Ultimately, should consultations fail to resolve the matter, cause unreasonable delay, or jeopardize the successful completion of a proceeding, enforcement of the compulsory measure is not foreclosed. In such instance the Central Authority of the Party taking such action may give written notice to the other Central Authority of that circumstance. Article 18 finally provides for a general obligation of the parties to exercise moderation and restraint, even when the Parties' consultation obligations under this article are satisfied.

In addition to the consultative mechanism for compulsory measures described above, the interpretative notes commit the U.S. Department of Justice, on behalf of the United States Government, to take certain specified practical measures to reduce the number of instances in which a conflict of laws, policies, or national interests may arise. Specifically, the notes state that the Department of Justice shall: (1) Instruct all federal prosecutors not to seek compulsory measures, as referred to in Article 18(2) with respect to any matter for which assistance could be granted under the Treaty unless the U.S. Central Authority has concluded that the consultative mechanisms in Article 18 have been satisfied; (2) instruct all fed-

eral prosecutors not to enforce any compulsory measures, as referred to in Article 18(2), with respect to any matter for which assistance could be granted under the Treaty unless the U.S. Central Authority has concluded that the consultative mechanisms in Article 18 have been satisfied; and (3) undertake to discourage the issue of compulsory measures by other U.S. Government agencies for evidence located in the United Kingdom in any matter covered by the Treaty by advising all such agencies not to seek such process without consultation and coordination with the United States Central Authority.

Article 19 defines the term "proceedings", thus setting forth the matters for which the Parties will provide assistance under the Treaty. As noted above, the term "proceedings" means proceedings related to criminal matters and includes any measure or step taken in connection with the investigation or prosecution of criminal offenses, including the freezing, seizure or forfeiture of the proceeds and instrumentalities of crime, and the imposition of fines related to a criminal prosecution. Article 19 further provides that the Central Authorities may at their discretion treat as proceedings such hearings before or investigations by any court, administrative agency or administrative tribunal with respect to the imposition of civil or administrative sanctions as may be agreed in writing between the Parties.

Article 20 sets forth the territorial application of the Treaty. With respect to the United Kingdom, the Treaty shall apply to England, Wales, Scotland, Northern Ireland, the Isle of Man, Channel Islands, and to any other territory for whose international relations the United Kingdom is responsible and to which this Treaty shall have been extended by agreement between the Parties.

Article 21 provides that the treaty shall be ratified and shall enter into force upon an exchange of instruments of ratification.

Article 22 provides for termination to be effective six months after written notice of termination is given by one party to the other Party.

A Technical Analysis explaining in detail the provisions of the Treaty is being prepared by the United States negotiating delegation, consisting of representatives from the Departments of Justice and State, and will be transmitted separately to the Senate Committee on Foreign Relations.

The Department of Justice joins the Department of State in favoring approval of this Treaty and related exchange of notes by the Senate as soon as possible.

Respectfully submitted,

WARREN CHRISTOPHER.

TREATY BETWEEN
THE GOVERNMENT OF THE UNITED STATES OF AMERICA
AND
THE GOVERNMENT OF THE UNITED KINGDOM
OF GREAT BRITAIN AND NORTHERN IRELAND
ON MUTUAL LEGAL ASSISTANCE IN CRIMINAL MATTERS

CONTENTS

TREATY BETWEEN
THE GOVERNMENT OF THE UNITED STATES OF AMERICA
AND
THE GOVERNMENT OF THE UNITED KINGDOM
OF GREAT BRITAIN AND NORTHERN IRELAND
ON MUTUAL LEGAL ASSISTANCE IN CRIMINAL MATTERS

The Government of the United States of America and The Government of the United Kingdom of Great Britain and Northern Ireland,

Desiring to improve the effectiveness of the law enforcement authorities of both countries in the investigation, prosecution, and combatting of crime through cooperation and mutual legal assistance in criminal matters,

Reaffirming their determination to enhance assistance in the fight against crime as set out in the Agreement Concerning the Investigation of Drug Trafficking Offences and the Seizure and Forfeiture of Proceeds and Instrumentalities of Drug Trafficking, done at London February 9, 1988,

Have agreed as follows:

ARTICLE 1

Scope of Assistance

1. The Parties shall provide mutual assistance, in accordance with the provisions of this Treaty, for the purpose of proceedings as defined in Article 19 of this Treaty.

2. Assistance shall include:

(a) taking the testimony or statements of persons;

(b) providing documents, records, and evidence;

(c) serving documents;

(d) locating or identifying persons;

(e) transferring persons in custody for testimony (or other purposes);

(f) executing requests for searches and seizures;

(g) identifying, tracing, freezing, seizing, and forfeiting the proceeds and instrumentalities of crime and assistance in related proceedings; and

(h) such other assistance as may be agreed between Central Authorities.

3. This Treaty is intended solely for mutual legal assistance between the Parties. The provisions of this Treaty shall not give rise to a right on the part of any private person to obtain, suppress, or exclude any evidence, or to impede the execution of a request.

ARTICLE 2

Central Authorities

1. Central Authorities shall be established by both Parties.

2. For the United States of America, the Central Authority shall be the Attorney General or a person or agency designated by him. For the United Kingdom, the Central Authority shall be the Secretary of State for the Home Department or a person or agency designated by him.

3. Requests under this Treaty shall be made by the Central Authority of the Requesting Party to the Central Authority of the Requested Party.

4. The Central Authorities shall communicate directly with one another for the purposes of this Treaty.

ARTICLE 3

Limitations on Assistance

1. The Central Authority of the Requested Party may refuse assistance if:

(a) the Requested Party is of the opinion that the request, if granted, would impair its sovereignty, security, or other essential interests or would be contrary to important public policy;

(b) the request relates to an offender who, if proceeded against in the Requested Party for the offence for which assistance is requested, would be entitled to be discharged on the grounds of a previous acquittal or conviction; or

(c) the request relates to an offence that is regarded by the Requested Party as:

(i) an offence of a political character; or

(ii) an offence under military law of the Requested Party which is not also an offence under the ordinary criminal law of the Requested Party.

2. Before denying assistance pursuant to this Article, the Central Authority of the Requested Party shall consult with the Central Authority of the Requesting Party to consider whether assistance can be given subject to such conditions as it deems necessary. If the Requesting Party accepts assistance subject to these conditions, it shall comply with the conditions.

ARTICLE 4

Form and Contents of Requests

1. Requests shall be submitted in writing. However, in urgent circumstances, the request may be made orally but shall be confirmed in writing within ten days thereafter.

2. The request shall include the following:

(a) the name of the authority conducting the proceedings to which the request relates;

(b) the subject matter and nature of the proceedings for the purposes of which the request is made;

(c) a summary of the information giving rise to the request;

(d) a description of the evidence or information or other assistance sought; and

(e) the purpose for which the evidence or information or other assistance is sought.

3. To the extent necessary and possible, a request shall also include:

(a) the identity, date of birth and location of any person from whom evidence is sought;

(b) the identity, date of birth and location of a person to be served, that person's relationship to the proceedings, and the manner in which the service is to be made;

(c) available information on the identity and whereabouts of a person to be located;

(d) a precise description of the place or person to be searched and of the articles to be seized;

(e) a description of the manner in which any testimony or statement is to be taken and recorded;

(f) a list of questions to be asked of a witness;

(g) a description of any particular procedures to be followed in executing the request;

(h) information as to the allowances and expenses to which a person asked to appear in the territory of the Requesting Party will be entitled;

(i) any other information which may be brought to the attention of the Requested Party to facilitate its execution of the request; and

(j) requirements for confidentiality.

4. The Requested Party may ask the Requesting Party to provide any further information which appears to the Requested Party to be necessary for the purpose of executing the request.

ARTICLE 5

Execution of Requests

1. As empowered by this Treaty or by national law, or in accordance with its national practice, the Requested Party shall take whatever steps it deems necessary to give effect to requests received from the Requesting Party. The courts of the Requested Party shall have authority to issue subpoenas, search warrants, or other orders necessary to execute the request.

2. When execution of the request requires judicial or administrative action, the request shall be presented to the appropriate authority by the persons appointed by the Central Authority of the Requested Party.

3. The method of execution specified in the request shall be followed to the extent that it is not incompatible with the laws and practices of the Requested Party.

4. If the Central Authority of the Requested Party determines that execution of the request would interfere with ongoing proceedings or prejudice the safety of any person in the territory of the Requested Party, the Central Authority of that Party may postpone execution, or make execution subject to conditions determined necessary after consultation with the Requesting Party. If the Requesting Party accepts the assistance subject to the conditions, it shall comply with the conditions.

5. The Central Authority of the Requested Party shall facilitate the participation in the execution of the request of such persons as are specified in the request.

6. The Central Authority of the Requested Party may ask the Central Authority of the Requesting Party to provide information in such form as may be necessary to enable it to execute the request or to undertake any steps which may be necessary under the laws and practices of the Requested Party in order to give effect to the request received from the Requesting Party.

7. The Central Authority of the Requesting Party shall inform the Central Authority of the Requested Party promptly of any circumstances which make it inappropriate to proceed with the execution of the request or which require modification of the action requested.

8. The Central Authority of the Requested Party shall promptly inform the Central Authority of the Requesting Party of the outcome of the execution of the request. If the request is denied, the Central Authority of the Requested Party shall inform the Central Authority of the reasons for the denial.

ARTICLE 6

Costs

1. The Requested Party shall, subject to paragraph (2) of this Article, pay all costs relating to the execution of the request, except for the fees of expert witnesses and the allowances and expenses related to the travel of persons pursuant to Articles 10 and 11 of this Treaty, which fees, allowances, and expenses shall be paid by the Requesting Party.

2. If the Central Authority of the Requested Party notifies the Central Authority of the Requesting Party that execution of the request might require costs or other resources of an extraordinary nature, or if it otherwise requests, the Central Authorities shall consult with a view to reaching agreement on the conditions under which the request shall be executed and the manner in which costs shall be allocated.

ARTICLE 7

Confidentiality and Limitations on Use

1. The Requested Party shall, upon request, keep confidential any information which might indicate that a request has been made or responded to. If the request cannot be executed without breaching confidentiality, the Requested Party shall so inform the Requesting Party, which shall then determine the extent to which it wishes the request to be executed.

2. The Requesting Party shall not use or disclose any information or evidence obtained under this Treaty for any purposes other than for the proceedings stated in the request without the prior consent of the Requested Party.

3. Unless otherwise indicated by the Requested Party when executing the request, information or evidence, the contents of which have been disclosed in a public judicial or administrative hearing related to the request, may thereafter be used for any purpose.

ARTICLE 8

Taking Testimony and Producing Evidence in the Territory of the Requested Party

1. A person in the territory of the Requested Party from whom evidence is requested pursuant to this Treaty may be compelled, if necessary, to appear in order to testify or produce

documents, records, or articles of evidence by subpoena or such other method as may be permitted under the law of the Requested Party.

2. A person requested to testify or to produce documentary information or articles in the territory of the Requested Party may be compelled to do so in accordance with the requirements of the law of the Requested Party. If such a person asserts a claim of immunity, incapacity or privilege under the laws of the Requesting Party, the evidence shall nonetheless be taken and the claim be made known to the Requesting Party for resolution by the authorities of that Party.

3. Upon request, the Central Authority of the Requested Party shall furnish information in advance about the date and place of the taking of the evidence pursuant to this Article.

4. The Requested Party shall allow persons specified in the request to ask questions of the person whose testimony or evidence is being taken, through a legal representative qualified to appear before the courts of the Requested Party.

5. Documentary information produced pursuant to this Article may be authenticated by the attestation of a person competent to do so in the form indicated in Appendix A to this Treaty. No further authentication or certification shall be necessary in order for such documentary information to be admissible in evidence in proceedings in the territory of the Requesting Party. Documentary information produced pursuant to

this Article may also be authenticated pursuant to such other form or manner as may be prescribed from time to time by either Central Authority.

ARTICLE 9

Records of Government Agencies

1. The Requested Party shall provide the Requesting Party with copies of publicly available records of government departments and agencies of the Requested Party.

2. The Requested Party may provide a copy of any record or information in the possession of a government department or agency but not publicly available to the same extent and on the same conditions as to its own law enforcement or judicial authorities. The Requested Party may refuse a request pursuant to this paragraph entirely or in part.

3. Official records provided pursuant to this Article shall be authenticated by the Central Authority of the Requested Party in the manner indicated in Appendix B to this Treaty. No further authentication or certification shall be necessary in order for such records to be admissible in evidence in proceedings in the territory of the Requesting Party. Records provided pursuant to this Article may also be authenticated pursuant to such other form or manner as may be prescribed from time to time by either Central Authority.

ARTICLE 10

Personal Appearance in the Territory of the Requesting Party

1. A request under this Treaty may seek assistance in facilitating the appearance of any person in the territory of the Requesting Party for the purpose of giving evidence before a court or of being identified in, or otherwise by his presence assisting, any proceedings.

2. The Central Authority of the Requested Party shall:

(a) ask a person whose voluntary appearance in the territory of the Requesting Party is desired whether he agrees to appear; and

(b) promptly inform the Central Authority of the Requesting Party of his answer.

3. If the Central Authority of the Requesting Party so indicates, a person agreeing to appear in the territory of the Requesting Party pursuant to this article shall not be subject to service of process, or be detained or subjected to any restriction of personal liberty, by reason of any acts or convictions which preceded his departure from the territory of the Requested Party.

4. The safe conduct provided for by this Article shall cease fifteen days after the Central Authority of the Requesting Party has notified the Central Authority of the Requested Party that the person's presence is no longer required, or if the

person has left the territory of the Requesting Party and voluntarily returned to it.

ARTICLE 11

Transfer of Persons in Custody

1. A person in the custody of one Party whose presence in the territory of the other Party is sought for the purpose of providing assistance under this Treaty shall be transferred for that purpose if the person and both Parties consent.

2. For the purposes of this Article:

(a) the Requesting Party shall be responsible for the safety of the person transferred and shall have the authority and the obligation to keep the person transferred in custody unless otherwise authorised by the Requested Party;

(b) the Requesting Party shall return the person transferred to the custody of the Requested Party as soon as circumstances permit and in any event no later than the date upon which he would have been released from custody in the territory of the Requested Party, unless otherwise agreed by both Central Authorities and the person transferred; and

(c) the Requesting Party shall not require the Requested Party to initiate extradition proceedings for the return of the person transferred.

ARTICLE 12

Location or Identification of Persons

1. The Requested Party shall make best efforts to ascertain the location or identity of persons specified in the request.

2. The Central Authority of the Requested Party shall promptly communicate the results of its inquiries to the Central Authority of the Requesting Party.

ARTICLE 13

Service of Documents

1. The Requested Party shall, as far as possible, effect service of any document relating to or forming part of any request for assistance properly made pursuant to this Treaty by the Requesting Party, including any subpoena or other process requiring the appearance of any person before any authority or tribunal in the territory of the Requesting Party.

2. Service of any subpoena or other process by virtue of paragraph (1) of this Article shall not impose any obligation under the law of the Requested Party to comply with it.

3. The Central Authority of the Requesting Party shall transmit any request for the service of a document requiring the appearance of a person before an authority in the Requesting Party a reasonable time before the scheduled appearance.

4. The Requested Party shall return a proof of service in the manner specified in the request.

ARTICLE 14

Search and Seizure

1. The Requested Party shall execute a request for the search, seizure and delivery of any article to the Requesting Party if the request includes the information justifying such action under the laws of the Requested Party and it is carried out in accordance with the laws of that Party.

2. The Requested Party may refuse a request if it relates to conduct in respect of which powers of search and seizure would not be exercisable in the territory of the Requested Party in similar circumstances.

3. Every official who has custody of a seized article shall certify the continuity of custody, the identity of the article and the integrity of its condition in the form indicated in Appendix C to this Treaty. No further authentication or certification shall be necessary in order to establish these matters in proceedings in the territory of the Requesting Party. Certification under this Article may also be provided in any

other form or manner as may be prescribed from time to time by either Central Authority.

4. The Central Authority of the Requested Party may require that the Requesting Party agree to terms and conditions which the Requested Party may deem necessary to protect third party interests in the item to be transferred.

ARTICLE 15

Return of Documents and Articles

The Central Authority of the Requesting Party shall return any documents or articles furnished to it in the execution of a request under this Treaty as soon as is practicable unless the Central Authority of the Requested Party waives the return of the documents or articles.

ARTICLE 16

Assistance in Forfeiture Proceedings

1. The Parties shall assist each other in proceedings involving the identification, tracing, freezing, seizure or forfeiture of the proceeds and instrumentalities of crime and in relation to proceedings involving the imposition of fines related to a criminal prosecution.

2. If the Central Authority of one Party becomes aware that proceeds or instrumentalities are located in the territory of the

other Party and may be liable to freezing, seizure or forfeiture under the laws of that Party, it may so inform the Central Authority of the other Party. If the Party so notified has jurisdiction, this information may be presented to its authorities for a determination whether any action is appropriate. The said authorities shall issue their decision in accordance with the laws of their country and the Central Authority of that country shall ensure that the other Party is aware of the action taken.

3. A Requested Party in control of forfeited proceeds or instrumentalities shall dispose of them according to its laws. Either Party may transfer forfeited assets or the proceeds of their sale to the other Party to the extent permitted by their respective laws, upon such terms as may be agreed.

ARTICLE 17

Compatibility with Other Arrangements

Assistance and procedures set forth in this Treaty shall not prevent either of the Parties from granting assistance to the other Party through the provisions of other international agreements to which it may be a party, or through the provisions of its national laws. The Parties may also provide assistance pursuant to any arrangement, agreement, or practice which may be applicable between the law enforcement agencies of the Parties.

ARTICLE 18

Consultation

1. The Parties, or Central Authorities, shall consult promptly, at the request of either, concerning the implementation of this Treaty either generally or in relation to a particular case. Such consultation may in particular take place if, in the opinion of either Party or Central Authority, the expenses or other resources required for the implementation of this Treaty are of an extraordinary nature, or if either Party has rights or obligations under another bilateral or multilateral agreement relating to the subject matter of this Treaty.

2. With respect to any matter for which assistance could be granted under this Treaty, neither Party shall enforce any compulsory measure requiring an action to be performed by any person located in the territory of the other Party, unless the Party proposing such enforcement has first exhausted the procedures established in paragraphs (3) and (4) of this Article.

3. If a Party is aware that its authorities are intending to take measures referred to in paragraph (2) of this Article, its Central Authority shall inform the other Central Authority, who may request consultations. If the other Party is aware of or considers that the authorities of the first Party have taken or are about to take any such measures, its Central Authority may request consultations. Thereafter, the Central Authorities shall

consult with a view to determining whether the assistance sought can be provided under this Treaty, or otherwise resolving the matter.

4. Where consultations fail to resolve the matter, or unreasonable delay may be jeopardizing the successful completion of a proceeding, either Central Authority may give the other written notice to that effect.

5. Unless otherwise agreed by the Parties, the obligations under paragraphs (2), (3) and (4) of this Article shall have been fulfilled 21 days after receipt of this written notice, provided that this is not less than 60 days after receipt of the request referred to in paragraph (3) above.

6. Even in those cases in which the Parties' obligations under this Article have been fulfilled, each Party shall continue to exercise moderation and restraint.

ARTICLE 19

Definitions

1. For the purposes of this Treaty, "proceedings" means proceedings related to criminal matters and includes any measure or step taken in connection with the investigation or prosecution of criminal offences, including the freezing, seizure or forfeiture of the proceeds and instrumentalities of crime, and the imposition of fines related to a criminal prosecution.

2. In addition, the Central Authorities may at their discretion treat as proceedings for the purpose of this Treaty such hearings before or investigations by any court, administrative agency or administrative tribunal with respect to the imposition of civil or administrative sanctions as may be agreed in writing between the Parties.

ARTICLE 20

Territorial Application

This Treaty shall apply:

1. in relation to the United Kingdom:
   (a) to England and Wales, Scotland, and Northern Ireland; and
   (b) to the Isle of Man, Channel Islands and to any other territory for whose international relations the United Kingdom is responsible and to which this Treaty shall have been extended by agreement between the Parties, subject to any technical modifications agreed by the Parties and to either Party being able to terminate such extension by giving six months written notice to the other through the diplomatic channel; and
2. to the United States of America.

ARTICLE 21

Ratification and Entry into Force

1. This Treaty shall be ratified, and the instruments of ratification shall be exchanged at London as soon as possible.

2. This Treaty shall enter into force upon the exchange of instruments of ratification.

ARTICLE 22

Termination

Either Party may terminate this Treaty by means of a written notice to the other Party. Termination shall take effect six months following the date of notification.

IN WITNESS WHEREOF, the undersigned, being duly authorized by their respective Governments, have signed this Treaty.

DONE in duplicate at Washington this sixth day of January, 1994.

DEPARTMENT OF STATE
WASHINGTON
January 6, 1994

Excellency:

I have the honor to acknowledge receipt of Your Excellency's Note of today's date, which reads as follows:

"I have the honour to refer to the Treaty between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland on Mutual Legal Assistance in Criminal Matters (the Treaty) signed today. I have the honour to propose that the Treaty be applied in accordance with the provisions set out in this Note.

(a) The term 'important public policy' in Article 3(1)(a) would include a Requested Party's policy of opposing the exercise of jurisdiction which in its view is extraterritorial and objectionable.

(b) Article 3(1)(b) shall not affect the availability of assistance in respect of other participants in the offense for which assistance is requested who would not be entitled to be discharged on the grounds of previous acquittal or conviction.

His Excellency
Sir Robin W. Renwick, K.C.M.G.,
Ambassador of the United Kingdom
of Great Britain and Northern Ireland.

(c) Article 7(2) shall not preclude the use or disclosure of information to the extent that there is an obligation to do so under the Constitution or law of the Requesting Party in a criminal prosecution. Any such proposed disclosure shall be notified by the Requesting Party to the Requested Party in advance.

(d) The Treaty shall not apply to anti-trust or competition law investigations or proceedings at this time. The Central Authorities may at their discretion treat as proceedings for the purpose of this Treaty such anti-trust or competition law matters, or anti-trust or competition law matters generally, as may be agreed in writing between the Parties at a later date.

(e) 'Compulsory measures' in Article 18, including in the case of the United States a grand jury subpoena, are those measures that require an action to be performed by any person located in the territory of the Party not issuing the measure and that fall within the following categories:

(i) any measure for the production of evidence located in the territory of the Party not issuing the measure;

(ii) any measure relating to assets in the territory of the Party not issuing the measure; or

(iii) any measure compelling a natural person who is in the territory of one Party to make a personal appearance in the territory of the other Party unless:

a) the Party compelling the appearance has lawfully obtained jurisdiction over that person; or

b) the person is a national of the Party compelling the appearance,

without prejudice to whether a Party objects to these compulsory measures or the jurisdiction claimed by the other Party. The Central Authorities may add to or amend the categories referred to above as may be agreed in writing between the Parties.

(f) In the spirit of cooperation, mutual respect, and good will, and in the interests of facilitating the cooperative use of the Treaty with respect to proceedings that fall within its scope and of avoiding measures which could result in a conflict of laws, policies, or national interests, the United States Government shall take several practical measures to reduce the number of instances in which conflict may be anticipated. In particular, the United States Department of Justice, on behalf of the United States Government, shall:

(i) instruct all federal prosecutors not to seek compulsory measures, as referred to in Article 18(2), with respect to any matter for which assistance could be granted under the Treaty unless the United States Central Authority has concluded that the provisions of Article 18 of the Treaty have been satisfied;

(ii) instruct all federal prosecutors not to enforce any compulsory measures, as referred to in Article 18(2), with respect to any matter for which assistance could be granted under the Treaty, unless the United States Central Authority has concluded that the provisions of Article 18 have been satisfied; and

(iii) undertake to discourage the issue of compulsory measures by other United States Government agencies for evidence located in the United Kingdom in any matter covered by the Treaty by advising all such agencies not to seek such process without consultation and coordination with the United States Central Authority.

If the above proposal is acceptable to the Government of the United States of America, I have the honour to propose that this Note and Your Excellency's reply to that effect shall constitute an agreement between our two Governments, which shall enter into force on the date of entry into force of the Treaty.

I have the honour to convey to Your Excellency the assurance of my highest consideration."

I have the further honor to inform Your Excellency that the foregoing proposals are acceptable to the Government of the United States of America and that Your Excellency's Note and this Note shall constitute an agreement between our two Governments, which shall enter into force on the date of entry into force of the Treaty.

For The Secretary of State:

Thomas A. Wilson

British Embassy
Washington D.C.

His Excellency
Warren M Christopher
Secretary of State
of the United States of America

6 January 1994

Your Excellency,

I have the honour to refer to the Treaty between the Government of The United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland on Mutual Legal Assistance in Criminal Matters (the Treaty) signed today. I have the honour to propose that the Treaty be applied in accordance with the provisions set out in this Note.

(a) The term "important public policy" in Article 3(1)(a) would include a Requested Party's policy of opposing the exercise of jurisdiction which in its view is extraterritorial and objectionable.

(b) Article 3(1)(b) shall not affect the availability of assistance in respect of other participants in the offence for which assistance is requested who would not be entitled to be discharged on the grounds of previous acquittal or conviction.

(c) Article 7(2) shall not preclude the use or disclosure of information to the extent that there is an obligation to do so under the Constitution or law of the Requesting Party in a criminal prosecution. Any such proposed disclosure shall be notified by the Requesting Party to the Requested Party in advance.

(d) The Treaty shall not apply to anti-trust or competition law investigations or proceedings at this time. The Central Authorities may at their discretion treat as proceedings for the purpose of this Treaty such anti-trust or competition law matters, or anti-trust or competition law matters generally, as may be agreed in writing between the Parties at a later date.

(e) "Compulsory measures" in Article 18, including in the case of the United States a grand jury subpoena, are those measures that require an action to be performed by any person located in the territory of the Party not issuing the measure and that fall within the following categories:

(i) any measure for the production of evidence located in the territory of the Party not issuing the measure;

(ii) any measure relating to assets in the territory of the Party not issuing the measure; or

(iii) any measure compelling a natural person who is in the territory of one Party to make a personal appearance in the territory of the other Party unless:

a) the Party compelling the appearance has lawfully obtained jurisdiction over that person; or

b) the person is a national of the Party compelling the appearance,

without prejudice to whether a Party objects to these compulsory measures or the jurisdiction claimed by the other Party.

The Central Authorities may add to or amend the categories referred to above as may be agreed in writing between the Parties.

(f) In the spirit of cooperation, mutual respect, and good will, and in the interests of facilitating the cooperative use of the Treaty with respect to proceedings that fall within its scope and of avoiding measures which could result in a conflict of laws, policies, or national interests, the United States Government shall take several practical measures to reduce the number of instances in which conflict may be anticipated. In particular, the United States Department of Justice, on behalf of the United States Government, shall:

(i) instruct all federal prosecutors not to seek compulsory measures, as referred to in Article 18(2), with respect to any matter for which assistance could be granted under the Treaty unless the United States Central Authority has concluded that the provisions of Article 18 of the Treaty have been satisfied;

(ii) instruct all federal prosecutors not to enforce any compulsory measures, as referred to in Article 18(2), with respect to any matter for which assistance could be granted under the Treaty, unless the United States Central Authority has concluded that the provisions of Article 18 have been satisfied; and

(iii) undertake to discourage the issue of compulsory measures by other United States Government agencies for evidence located in the United Kingdom in any matter covered by the Treaty by advising all such agencies not to seek such process without consultation and coordination with the United States Central Authority.

If the above proposal is acceptable to the Government of the United States of America, I have the honour to propose that this Note and Your Excellency's reply to that effect shall constitute an agreement between our two Governments, which shall enter into force on the date of entry into force of the Treaty.

I have the honour to convey to
Your Excellency the assurance of
my highest consideration.

ROBIN W RENWICK

L. MULTILATERAL TREATIES

CONTENTS

1. Treaties In Force to Which the United States is a Party

a. Convention on the Marking of Plastic Explosives for the Purpose of Identification, March 1, 1991 *

* Entered into force, including for the United States, June 21, 1998. No TIAS number exists. Status information appears at Document M.5.q., following.

CONVENTION

on the Marking of Plastic Explosives for the Purpose of Detection

THE STATES PARTIES TO THIS CONVENTION,

CONSCIOUS of the implications of acts of terrorism for international security;

EXPRESSING deep concern regarding terrorist acts aimed at destruction of aircraft, other means of transportation and other targets;

CONCERNED that plastic explosives have been used for such terrorist acts;

CONSIDERING that the marking of such explosives for the purpose of detection would contribute significantly to the prevention of such unlawful acts;

RECOGNIZING that for the purpose of deterring such unlawful acts there is an urgent need for an international instrument obliging States to adopt appropriate measures to ensure that plastic explosives are duly marked;

CONSIDERING United Nations Security Council Resolution 635 of 14 June 1989, and United Nations General Assembly Resolution 44/29 of 4 December 1989 urging the International Civil Aviation Organization to intensify its work on devising an international regime for the marking of plastic or sheet explosives for the purpose of detection;

BEARING IN MIND Resolution A27-8 adopted unanimously by the 27th Session of the Assembly of the International Civil Aviation Organization which endorsed with the highest and overriding priority the preparation of a new international instrument regarding the marking of plastic or sheet explosives for detection;

NOTING with satisfaction the role played by the Council of the International Civil Aviation Organization in the preparation of the Convention as well as its willingness to assume functions related to its implementation;

HAVE AGREED AS FOLLOWS:

Article I

For the purposes of this Convention:

1. "Explosives" mean explosive products, commonly known as "plastic explosives", including explosives in flexible or elastic sheet form, as described in the Technical Annex to this Convention.

2. "Detection agent" means a substance as described in the Technical Annex to this Convention which is introduced into an explosive to render it detectable.

3. "Marking" means introducing into an explosive a detection agent in accordance with the Technical Annex to this Convention.

4. "Manufacture" means any process, including reprocessing, that produces explosives.

5. "Duly authorized military devices" include, but are not restricted to, shells, bombs, projectiles, mines, missiles, rockets, shaped charges, grenades and perforators manufactured exclusively for military or police purposes according to the laws and regulations of the State Party concerned.

6. "Producer State" means any State in whose territory explosives are manufactured.

Article II

Each State Party shall take the necessary and effective measures to prohibit and prevent the manufacture in its territory of unmarked explosives.

Article III

1. Each State Party shall take the necessary and effective measures to prohibit and prevent the movement into or out of its territory of unmarked explosives.

2. The preceding paragraph shall not apply in respect of movements for purposes not inconsistent with the objectives of this Convention, by authorities of a State Party performing military or police functions, of unmarked explosives under the control of that State Party in accordance with paragraph 1 of Article IV.

Article IV

1. Each State Party shall take the necessary measures to exercise strict and effective control over the possession and transfer of possession of unmarked explosives which have been manufactured in or brought into its territory prior to the entry into force of this Convention in respect of that State, so as to prevent their diversion or use for purposes inconsistent with the objectives of this Convention.

2. Each State Party shall take the necessary measures to ensure that all stocks of those explosives referred to in paragraph 1 of this Article not held by its authorities performing military or police functions are destroyed or consumed for purposes not inconsistent with the objectives of this Convention, marked or rendered permanently ineffective, within a period of three years from the entry into force of this Convention in respect of that State.

3. Each State Party shall take the necessary measures to ensure that all stocks of those explosives referred to in paragraph 1 of this Article held by its authorities performing military or police functions and that are not incorporated as an integral part of duly authorized military devices are destroyed or consumed for purposes not inconsistent with the objectives of this Convention, marked or rendered permanently ineffective, within a period of fifteen years from the entry into force of this Convention in respect of that State.

4. Each State Party shall take the necessary measures to ensure the destruction, as soon as possible, in its territory of unmarked explosives which may be discovered therein and which are not referred to in the preceding paragraphs of this Article, other than stocks of unmarked

explosives held by its authorities performing military or police functions and incorporated as an integral part of duly authorized military devices at the date of the entry into force of this Convention in respect of that State.

5. Each State Party shall take the necessary measures to exercise strict and effective control over the possession and transfer of possession of the explosives referred to in paragraph II of Part I of the Technical Annex to this Convention so as to prevent their diversion or use for purposes inconsistent with the objectives of this Convention.

6. Each State Party shall take the necessary measures to ensure the destruction, as soon as possible, in its territory of unmarked explosives manufactured since the coming into force of this Convention in respect of that State that are not incorporated as specified in paragraph II d) of Part I of the Technical Annex to this Convention and of unmarked explosives which no longer fall within the scope of any other sub-paragraphs of the said paragraph II.

Article V

1. There is established by this Convention an International Explosives Technical Commission (hereinafter referred to as "the Commission") consisting of not less than fifteen nor more than nineteen members appointed by the Council of the International Civil Aviation Organization (hereinafter referred to as "the Council") from among persons nominated by States Parties to this Convention.

2. The members of the Commission shall be experts having direct and substantial experience in matters relating to the manufacture or detection of, or research in, explosives.

3. Members of the Commission shall serve for a period of three years and shall be eligible for re-appointment.

4. Sessions of the Commission shall be convened, at least once a year at the Headquarters of the International Civil Aviation Organization, or at such places and times as may be directed or approved by the Council.

5. The Commission shall adopt its rules of procedure, subject to the approval of the Council.

Article VI

1. The Commission shall evaluate technical developments relating to the manufacture, marking and detection of explosives.

2. The Commission, through the Council, shall report its findings to the States Parties and international organizations concerned.

3. Whenever necessary, the Commission shall make recommendations to the Council for amendments to the Technical Annex to this Convention. The Commission shall endeavour to take its decisions on such recommendations by consensus. In the absence of consensus the Commission shall take such decisions by a two-thirds majority vote of its members.

4. The Council may, on the recommendation of the Commission, propose to States Parties amendments to the Technical Annex to this Convention.

Article VII

1. Any State Party may, within ninety days from the date of notification of a proposed amendment to the Technical Annex to this Convention, transmit to the Council its comments. The Council shall communicate these comments to the Commission as soon as possible for its consideration. The Council shall invite any State Party which comments on or objects to the proposed amendment to consult the Commission.

2. The Commission shall consider the views of States Parties made pursuant to the preceding paragraph and report to the Council. The Council, after consideration of the Commission's report, and taking into account the nature of the amendment and the comments of States Parties, including producer States, may propose the amendment to all States Parties for adoption.

3. If a proposed amendment has not been objected to by five or more States Parties by means of written notification to the Council within ninety days from the date of notification of the amendment by the Council, it shall be deemed to have been adopted, and shall enter into force one hundred and eighty days thereafter or after such other period as specified in the proposed amendment for States Parties not having expressly objected thereto.

4. States Parties having expressly objected to the proposed amendment may, subsequently, by means of the deposit of an instrument of acceptance or approval, express their consent to be bound by the provisions of the amendment.

5. If five or more States Parties have objected to the proposed amendment, the Council shall refer it to the Commission for further consideration.

6. If the proposed amendment has not been adopted in accordance with paragraph 3 of this Article, the Council may also convene a conference of all States Parties.

Article VIII

1. States Parties shall, if possible, transmit to the Council information that would assist the Commission in the discharge of its functions under paragraph 1 of Article VI.

2. States Parties shall keep the Council informed of measures they have taken to implement the provisions of this Convention. The Council shall communicate such information to all States Parties and international organizations concerned.

Article IX

The Council shall, in co-operation with States Parties and international organizations concerned, take appropriate measures to facilitate the implementation of this Convention, including the provision of technical assistance and measures for the exchange of information relating to technical developments in the marking and detection of explosives.

Article X

The Technical Annex to this Convention shall form an integral part of this Convention.

Article XI

1. Any dispute between two or more States Parties concerning the interpretation or application of this Convention which cannot be settled through negotiation shall, at the request of one of them, be submitted to arbitration. If within six months from the date of the request for arbitration the Parties are unable to agree on the organization of the arbitration, any one of those Parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State Party may, at the time of signature, ratification, acceptance or approval of this Convention or accession thereto, declare that it does not consider itself bound by the preceding paragraph. The other States Parties shall not be bound by the preceding paragraph with respect to any State Party having made such a reservation.

3. Any State Party having made a reservation in accordance with the preceding paragraph may at any time withdraw this reservation by notification to the Depositary.

Article XII

Except as provided in Article XI no reservation may be made to this Convention.

Article XIII

1. This Convention shall be open for signature in Montreal on 1 March 1991 by States participating in the International Conference on Air Law held at Montreal from 12 February to 1 March 1991. After 1 March 1991 the Convention shall be open to all States for signature at the Headquarters of the International Civil Aviation Organization in Montreal until it enters into force in accordance with paragraph 3 of this Article. Any State which does not sign this Convention may accede to it at any time.

2. This Convention shall be subject to ratification, acceptance, approval or accession by States. Instruments of ratification, acceptance, approval or accession shall be deposited with the International Civil Aviation Organization, which is hereby designated the Depositary. When depositing its instrument of ratification, acceptance, approval or accession, each State shall declare whether or not it is a producer State.

3. This Convention shall enter into force on the sixtieth day following the date of deposit of the thirty-fifth instrument of ratification, acceptance, approval or accession with the Depositary, provided that no fewer than five such States have declared pursuant to paragraph 2 of this Article that they are producer States. Should thirty-five such instruments be deposited prior to the deposit of their instruments by five producer States, this Convention shall enter into force on the sixtieth day following the date of deposit of the instrument of ratification, acceptance, approval or accession of the fifth producer State.

4. For other States, this Convention shall enter into force sixty days following the date of deposit of their instruments of ratification, acceptance, approval or accession.

5. As soon as this Convention comes into force, it shall be registered by the Depositary pursuant to Article 102 of the Charter of the United Nations and pursuant to Article 83 of the Convention on International Civil Aviation (Chicago, 1944).

Article XIV

The Depositary shall promptly notify all signatories and States Parties of:

1. each signature of this Convention and date thereof;

2. each deposit of an instrument of ratification, acceptance, approval or accession and date thereof, giving special reference to whether the State has identified itself as a producer State;

3. the date of entry into force of this Convention;

4. the date of entry into force of any amendment to this Convention or its Technical Annex;

5. any denunciation made under Article XV; and

6. any declaration made under paragraph 2 of Article XI.

Article XV

1. Any State Party may denounce this Convention by written notification to the Depositary.

2. Denunciation shall take effect one hundred and eighty days following the date on which notification is received by the Depositary.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, being duly authorized thereto by their Governments, have signed this Convention.

DONE at Montreal, this first day of March, one thousand nine hundred and ninety-one, in one original, drawn up in five authentic texts in the English, French, Russian, Spanish and Arabic languages.

TECHNICAL ANNEX

PART 1: DESCRIPTION OF EXPLOSIVES

I. The explosives referred to in paragraph 1 of Article I of this Convention are those that:

a) are formulated with one or more high explosives which in their pure form have a vapour pressure less than 10^{-4} Pa at a temperature of 25°C;

b) are formulated with a binder material; and

c) are, as a mixture, malleable or flexible at normal room temperature.

II. The following explosives, even though meeting the description of explosives in paragraph 1 of this Part, shall not be considered to be explosives as long as they continue to be held or used for the purposes specified below or remain incorporated as there specified, namely those explosives that:

a) are manufactured, or held, in limited quantities solely for use in duly authorized research, development or testing of new or modified explosives;

b) are manufactured, or held, in limited quantities solely for use in duly authorized training in explosives detection and/or development or testing of explosives detection equipment;

c) are manufactured, or held, in limited quantities solely for duly authorized forensic science purposes; or

d) are destined to be and are incorporated as an integral part of duly authorized military devices in the territory of the producer State within three years after the coming into force of this Convention in respect of that State. Such devices produced in this period of three years shall be deemed to be duly authorized military devices within paragraph 4 of Article IV of this Convention.

III. In this Part:

"duly authorized" in paragraph II a), b) and c) means permitted according to the laws and regulations of the State Party concerned; and

"high explosives" include but are not restricted to cyclotetramethylenetetranitramine (HMX), pentaerythritol tetranitrate (PETN) and cyclotrimethylenetrinitramine (RDX).

PART 2: DETECTION AGENTS

A detection agent is any one of those substances set out in the following Table. Detection agents described in this Table are intended to be used to enhance the detectability of explosives by vapour detection means. In each case, the introduction of a detection agent into an explosive shall be done in such a manner as to achieve homogeneous distribution in the finished product. The minimum concentration of a detection agent in the finished product at the time of manufacture shall be as shown in the said Table.

Table

Name of detection agent	Molecular formula	Molecular weight	Minimum concentration
Ethylene glycol dinitrate (EGDN)	$C_2H_4(NO_3)_2$	152	0.2% by mass
2,3-Dimethyl-2,3-dinitrobutane (DMNB)	$C_6H_{12}(NO_2)_2$	176	0.1% by mass
para-Mononitrotoluene (p-MNT)	$C_7H_7NO_2$	137	0.5% by mass
ortho-Mononitrotoluene (o-MNT)	$C_7H_7NO_2$	137	0.5% by mass

Any explosive which, as a result of its normal formulation, contains any of the designated detection agents at or above the required minimum concentration level shall be deemed to be marked.

NOTE: Status of signatories and ratifiers is found on page 62 of Document J.4.e. below.

b. I.M.O. Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation, with Related Protocol, March 10, 1988 *

MESSAGE

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

THE CONVENTION FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF MARITIME NAVIGATION, AND THE ACCOMPANYING PROTOCOL FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF FIXED PLATFORMS LOCATED ON THE CONTINENTAL SHELF, BOTH SIGNED AT ROME ON MARCH 10, 1988

JANUARY 4, 1989.—Convention was read the first time, and together with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed for the use of the Senate

* Source: Treaty Document 101-1; Entered into force March 1, 1992; for the United States March 6, 1995. No TIAS Number. Status information appears at Document M.5.q., following.

LETTER OF TRANSMITTAL

THE WHITE HOUSE, *January 3, 1989.*

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, and the related Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms Located on the Continental Shelf, signed at Rome on March 10, 1988. I also transmit, for the information of the Senate, the report of the Department of State with respect to the Convention and Protocol.

The seizure of the Italian cruise ship *Achille Lauro* in 1985, and the murder of American passenger Leon Klinghoffer, demonstrated that no country, or form of transportation, is immune from the criminal savagery of those who engage in terrorist acts. This Convention is aimed at ensuring that those who engage in such acts on board or against ships engaged in navigation are brought to justice. The Protocol would do the same with respect to acts on or against fixed platforms on the continental shelf. Modeled on earlier conventions dealing with aircraft hijacking and sabotage (to which the United States is a party), they include provisions requiring States to provide severe punishment for such offenses, and to extradite or prosecute those who commit them.

Work on the Convention and Protocol began in 1986 under the auspices of the International Maritime Organization on the basis of an initial draft cosponsored by the Governments of Italy, Austria and Egypt. That work was completed, and the Convention and Protocol adopted by consensus, at an international conference in Rome in March 1988. The United States and 22 other States signed the Convention at that time, and the United States and 20 other States signed the Protocol. It is clear that the Convention already has broad support in the international community, and it is hoped that all States will join in this major step to deter acts against the safety of maritime navigation.

I recommend, therefore, that the Senate give early and favorable consideration to this Convention and Protocol and give its advice and consent to ratification.

RONALD REAGAN.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
Washington, DC, November 21, 1988.

The PRESIDENT,
The White House.

THE PRESIDENT: I have the honor to submit to you the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, and the accompanying protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms Located on the Continental Shelf, both signed at Rome on March 10, 1988. I recommend that the Treaty and Protocol be transmitted to the Senate for its advice and consent to ratification.

The Convention and Protocol provide an important new basis under international law for combatting acts of terrorist violence on board ships and fixed platforms. Negotiation of the Convention began in mid-1986, after the Assembly of the International Maritime Organization (IMO) called for development of a new international instrument for the suppression of unlawful acts of violence which endanger the safety of maritime navigation. The Assembly's action was taken in the wake of the October 1985 *Achille Lauro* incident, which resulted in the murder of an American citizen, Leon Klinghoffer.

At the IMO's Council's direction, an Ad Hoc Preparatory Committee was convened within the IMO to consider an initial draft of the Convention cosponsored by the Governments of Italy, Austria and Egypt. The Ad Hoc Preparatory Committee met in March and May of 1987 and agreed upon a revised draft of the Convention, as well as upon the adoption of a separate Protocol concerning fixed platforms located on the continental shelf. These texts were further reviewed by the Assembly, as well as the IMO's Legal Committee and the Council. The final texts were adopted by consensus by the 76 nations represented at an International Conference on the Suppression of Unlawful Acts against the Safety of Maritime Navigation, held in Rome from March 1-10, 1988 under the auspices of the IMO. The positions taken by the U.S. delegation to the Conference, which were for the most part adopted, were coordinated with interested agencies and reviewed by interested members of the public.

The principal purpose of the Convention and Protocol is to ensure that individuals who commit acts of terrorist violence which endanger the safe navigation of a ship or the safety of a platform are either prosecuted in the stae in which they are found or extradited to another state for prosecution. Following the essential structure and approach of The Hague and Montreal Conventions in

the aviation field, the Convention and Protocol require states to establish certain offenses under their criminal law, to provide a basis for the exercise of criminal jurisdiction in specified circumstances, and to extradite or prosecute any alleged offender found within their territory. The Convention and Protocol thus fill a gap in the international legal regime governing acts of violence on board or against ships engaged in international maritime navigation as well as fixed platforms located on the continental shelf.

The major provisions of the Convention are as follows:

(1) *Scope of the Convention.*—The Convention applies to any ship (broadly defined to include vessels of any type not permanently attached to the seabed) which is navigating or is scheduled to navigate beyond the territorial waters of a single State. Exceptions are made for warships, State-owned or operated ships used for customs or police purposes or as naval auxiliaries, and ships which have been withdrawn from navigation or laid up. The sovereign immunity of warships and other public vessels is preserved. The Convention makes it an offense for a person unlawfully and intentionally to seize or exercise control over a ship by force, threat or intimidation; to perform an act of violence against a person on board a ship if that act is likely to endanger the safe navigation of the ship; to destroy a ship or damage a ship or its cargo; to place a destructive device or substance on a ship; to damage or destroy maritime navigational facilities; to communicate information known to be false, thereby endangering the safe navigation of a ship; or to kill or injure any person in connection with the commission or attempted commission of any of these offenses. A person also commits an offense by attempting or abetting the commission of any of these offenses, or by threatening to commit certain of them.

(2) *Penalties and Jurisdiction.*—Each State Party is obliged to make the acts covered by the Convention punishable by appropriate penalties which take into account the grave nature of the offenses. Each State is required to establish its jurisdiction over offenses committed against or on board a ship flying its flag, in its territory including its territorial sea, and by its nationals. Each State may, at its option, also establish jurisdiction over offenses: which are committed by stateless persons habitually resident in its territory; during which one of its nationals is seized, threatened, killed or injured; or which are committed in an attempt to compel that State to do or abstain from doing any act.

(3) *Custody.*—Each State is obliged to take into custody an offender or alleged offender found in its territory or to take other measures to ensure that person's presence for such time as is necessary to enable criminal or extradition proceedings to be instituted. States Party are also obliged to take custody from the master of a ship of another State Party of any person reasonably believed to have committed one of the covered offenses; such States may, in turn, request that the flag State accept delivery of the person.

(4) *Extradition or Prosecution.*—The Convention amends existing extradition treaties between Parties to include the covered offenses as extraditable offenses and provides that they shall be extraditable offenses between States which do not make extradition conditional on an extradition treaty. If a State in which an offender is found does not extradite that person or deliver him or her to an-

other State Party for purposes of prosecution, that State is obliged "without exception whatsoever and whether or not the offence was committed in its territory, to submit the case without delay to its competent authorities for the purpose of prosecution".

(5) *Reports.*—When a State has taken a person into custody, it must immediately notify those States which have established the required jurisdiction over the offenses, and any other interested States. States Party having reason to believe that a covered offense will be committed must immediately inform those States it believes would have established jurisdiction over such an offense. States Party must also inform the Secretary-General of any relevant information concerning the circumstances of an offense and measures taken in relation to an offender, including the results of any extradition or other legal proceeding.

(6) *Cooperation.*—The Convention requires States Party to afford each other the greatest measure of assistance in connection with criminal proceedings brought in respect of covered offenses, and to cooperate in the prevention of such offenses by taking practicable measure to prevent preparations in their territories for those offenses, by exchanging information, and by coordinating administrative and other preventative measures.

(7) *Limitations.*—The Convention explicitly provides that its provisions do not affect the immunities of warships and other Government ships operated for non-commercial purposes, or the rules of international law pertaining to the competence of States to exercise investigative or enforcement jurisdiction on board ships not flying their flag. In addition, the Convention does not exclude any criminal jurisdiction that may be exercised in accordance with national law.

Article 16 of the Convention, concerning dispute settlement, permits States Parties to submit disputes to the International Court of Justice in the event that those disputes cannot be settled by arbitration. It is my recommendation that, at the time of ratification, the United States exercise its right under paragraph 2 of that Article to declare, by means of reservation, that it does not consider itself bound to submit to the compulsory jurisdiction of the Court in respect of disputes arising under this Convention.

The Protocol applies the provisions of the Convention to offenses committed on board or against fixed platforms located on the continental shelf. The term "fixed platform" is defined to include an artificial island, installation or structure permanently attached to the sea-bed for the purpose of exploration or exploitation of resources, or for other economic purposes. Thus, oil rigs, floating hotels, and similar platforms will be afforded the same protection by the Protocol as ships are afforded by the Convention.

The Convention will enter into force ninety days after the date on which fifteen States have signed without reservation or have deposited instruments of ratification, acceptance, approvel or accession. The Protocol may enter into force ninety days after the date on which three States have signed without reservation or deposited similar instruments, provided that the Convention must first be in force. A State may only become Party to the Protocol if it has become Party to the Convention.

VIII

Proposed legislation necessary to implement the Convention will be submitted to the Congress in the near future.

Respectfully submitted,

GEORGE P. SHULTZ.

CONVENTION FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF MARITIME NAVIGATION

The States Parties to this Convention:

Having in mind the purposes and principles of the Charter of the United Nations concerning the maintenance of international peace and security and the promoting of friendly relations and co-operation among States,

Recognizing in particular that everyone has the right to life, liberty and security of person, as set out in the University Declaration of Human Rights and the International Covenant on Civil and Political Rights,

Deeply concerned about the world-wide escalation of acts of terrorism in all its forms, which endanger or take innocent human lives, jeopardize fundamental freedoms and seriously impair the dignity of human beings,

Considering that unlawful acts against the safety of maritime navigation jeopardize the safety of persons and property, seriously affect the operation of maritime services, and undermine the confidence of the people of the world in the safety of maritime navigation,

Considering that the occurrence of such acts is a matter of grave concern to the international community as a whole,

Being convinced of the urgent need to develop international co-operation between States in devising and adopting effective and practical measures for the prevention of all unlawful acts against the safety of maritime navigation, and the prosecution and punishment of their perpetrators,

Recalling resolution 40/61 of the General Assembly of the United Nations of 9 December 1985 which, *inter alia,* "urges all States unilaterally and in co-operation with other States, as well as relevant United Nations organs, to contribute to the progressive elimination of causes underlying international terrorism and to pay special attention to all situations, including colonialism, racism and situations involving mass and flagrant violations of human rights and fundamental freedoms and those involving alien occupation, that may give rise to international terrorism and may endanger international peace and security",

Recalling further that resolution 40/61 "unequivocally condemns, as criminal, all acts, methods and practices of terrorism wherever and by whomever committed, including those which jeopardize friendly relations among States and their security",

Recalling also that by resolution 40/61, the International Maritime Organization was invited to "study the problem of terrorism aboard or against ships with a view to making recommendations on appropriate measures",

Having in mind resolution A.584(14) of 20 November 1985, of the Assembly of the International Maritime Organization, which called

for development of measures to prevent unlawful acts which threaten the safety of ships and the security of their passengers and crews,

Noting that acts of the crews which are subject to normal shipboard discipline are outside the purview of this Convention,

Affirming the desirability of monitoring rules and standards relating to the prevention and control of unlawful acts against ships and persons on board ships, with a view to updating them as necessary, and, to this effect, taking note with satisfaction of the Measures to Prevent Unlawful Acts Against Passengers and Crews on Board Ships, recommended by the Maritime Safety Committee of the International Maritime Organization,

Affirming further that matters not regulated by this Convention continue to be governed by the rules and principles of general international law,

Recognizing the need for all States, in combating unlawful acts against the safety of maritime navigation, strictly to comply with rules and principles of general international law.

Have agreed as follows:

ARTICLE 1

For the purposes of this Convention, "ship" means a vessel of any type whatsoever not permanently attached to the sea-bed, including dynamically supported craft, submersibles, or any other floating craft.

ARTICLE 2

1. This Convention does not apply to:

(a) a warship; or

(b) a ship owned or operated by a State when being used as a naval auxiliary or for customs or police purposes; or

(c) a ship which has been withdrawn from navigation or laid up.

2. Nothing in this Convention affects the immunities of warships and other government ships operated for non-commercial purposes.

ARTICLE 3

1. Any person commits an offence if that person unlawfully and intentionally:

(a) seizes or exercises control over a ship by force or threat thereof or any other form of intimidation; or

(b) performs an act of violence against a person on board a ship if that act is likely to endanger the safe navigation of that ship; or

(c) destroys a ship or causes damage to a ship or to its cargo which is likely to endanger the safe navigation of that ship; or

(d) places or causes to be placed on a ship, by any means whatsoever, a device or substance which is likely to destroy that ship, or cause damage to that ship or its cargo which endangers or is likely to endanger the safe navigation of that ship; or

(e) destroys or seriously damages maritime navigational facilities or seriously interferes with their operation, if any such act is likely to endanger the safe navigation of a ship; or

(f) communicates information which he knows to be false, thereby endangering the safe navigation of a ship; or

(g) injures or kills any person, in connection with the commission or the attempted commission of any of the offences set forth in subparagraphs (a) to (f).

2. Any person also commits an offence if that person:

(a) attempts to commit any of the offences set forth in paragraph 1; or

(b) abets the commission of any of the offences set forth in paragraph 1 perpetrated by any person or is otherwise an accomplice of a person who commits such an offence; or

(c) threatens, with or without a condition, as is provided for under national law, aimed at compelling a physical or juridical person to do or refrain from doing any act, to commit any of the offences set forth in paragraph 1, subparagraphs (b), (c) and (e), if that threat is likely to endanger the safe navigation of the ship in question.

ARTICLE 4

1. This Convention applies if the ship is navigating or is scheduled to navigate into, through or from waters beyond the outer limit of the territorial sea of a single State, or the lateral limits of its territorial sea with adjacent States.

2. In cases where the Convention does not apply pursuant to paragraph 1, it nevertheless applies when the offender or the alleged offender is found in the territory of a State Party other than the State referred to in paragraph 1.

ARTICLE 5

Each State Party shall make the offences set forth in article 3 punishable by appropriate penalties which take into account the grave nature of those offences.

ARTICLE 6

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 3 when the offence is committed:

(a) against or on board a ship flying the flag of the State at the time the offence is committed; or

(b) in the territory of that State, including its territorial sea; or

(c) by a national of that State.

2. A State Party may also establish its jurisdiction over any such offence when:

(a) it is committed by a stateless person whose habitual residence is in that State; or

(b) during its commission a national of that State is seized, threatened, injured or killed; or

(c) it is committed in an attempt to compel that State to do or abstain from doing any act.

3. Any State Party which has established jurisdiction mentioned in paragraph 2 shall notify the Secretary-General of the International Maritime Organization (hereinafter referred to as "the Secretary-General"). If such State Party subsequently rescinds that jurisdiction, it shall notify the Secretary-General.

4. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 3 in cases where the alleged offender is present in its territory and it does not extradite him to any of the States Parties which have established their jurisdiction to accordance with paragraphs 1 and 2 of this article.

ARTICLE 7

1. Upon being satisfied that the circumstances so warrant, any State Party in the territory of which the offender or the alleged offender is present shall, in accordance with its law, take him into custody or take other measures to ensure his presence for such time as is necessary to enable any criminal or extradition proceedings to be instituted.

2. Such State shall immediately make a preliminary inquiry into the facts, in accordance with its own legislation.

3. Any person regarding whom the measures referred to in paragraph 1 are being taken shall be entitled to:

(a) communicate without delay with the nearest appropriate representative of the State of which he is a national or which is otherwise entitled to establish such communication or, if he is a stateless person, the State in the territory of which he has his habitual residence;

(b) be visited by a representative of that State.

4. The rights referred to in paragraph 3 shall be exercised in conformity with the laws and regulations of the State in the territory of which the offender or the alleged offender is present, subject to the provision that the said laws and regulations must enable full effect to be given to the purposes for which the rights accorded under paragraph 3 are intended.

5. When a State Party, pursuant to this article, has taken a person into custody, it shall immediately notify the States which have established jurisdiction in accordance with article 6, paragraph 1 and, if it considers it advisable, any other interested States, of the fact that such person is in custody and of the circumstances which warrant his detention. The State which makes the preliminary inquiry contemplated in paragraph 2 of this article shall promptly report its findings to the said States and shall indicate whether it intends to exercise jurisdiction.

ARTICLE 8

1. The master of a ship of a State Party (the "flag State") may deliver to the authorities of any other State Party (the "receiving State") any person who he has reasonable grounds to believe has committed one of the offences set forth article 3.

2. The flag State shall ensure that the master of its ship is obliged, whenever practicable, and if possible before entering the territorial sea of the receiving State carrying on board any person

whom the master intends to deliver in accordance with paragraph 1, to give notification to the authorities of the receiving State of his intention to deliver such person and the reasons therefor.

3. The receiving State shall accept the delivery, except where it has grounds to consider that the Convention is not applicable to the acts giving rise to the delivery, and shall proceed in accordance with the provisions of article 7. Any refusal to accept a delivery shall be accompanied by a statement of the reasons for refusal.

4. The flag State shall ensure that the master of its ship is obliged to furnish the authorities of the receiving State with the evidence in the master's possession which pertains to the alleged offence.

5. A receiving State which has accepted the delivery of a person in accordance with paragraph 3 may, in turn, request the flag State to accept delivery of that person. The flag State shall consider any such request, and if it accedes to the request it shall proceed in accordance with article 7. If the flag State declines a request, it shall furnish the receiving State with a statement of the reasons therefor.

ARTICLE 9

Nothing in this Convention shall affect in any way the rules of international law pertaining to the competence of States to exercise investigative or enforcement jurisdiction on board ships not flying their flag.

ARTICLE 10

1. The State Party in the territory of which the offender or the alleged offender is found shall, in cases to which article 6 applies, if it does not extradite him, be obliged, without exception whatsoever and whether or not the offence was committed in its territory, to submit the case without delay to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State. Those authorities shall take their decision in the same manner as in the case of any other offence of a grave nature under the law of that State.

2. Any person regarding whom proceedings are being carried out in connection with any of the offences set forth in article 3 shall be guaranteed fair treatment at all stages of the proceedings, including enjoyment of all the rights and guarantees provided for such proceedings by the law of the State in the territory of which he is present.

ARTICLE 11

1. The offences set forth in article 3 shall be deemed to be included as extraditable offences in any extradition treaty existing between any of the States Parties. States Parties undertake to include such offences as extraditable offences in every extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, the requested State Party may, at its option, consider this Convention as

a legal basis for extradition in respect of the offences set forth in article 3. Extradition shall be subject to the other conditions provided by the law of the requested State Party.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize the offences set forth in article 3 as extraditable offences between themselves, subject to the conditions provided by the law of the requested State.

4. If necessary, the offences set forth in article 3 shall be treated, for the purposes of extradition between States Parties, as if they had been committed not only in the place in which they occurred but also in a place within the jurisdiction of the State Party requesting extradition.

5. A State Party which receives more than one request for extradition from States which have established jurisdiction in accordance with article 7 and which decides not to prosecute shall, in selecting the State to which the offender or alleged offender is to be extradited, pay due regard to the interests and responsibilities of the State Party whose flag the ship was flying at the time of the commission of the offence.

6. In considering a request for the extradition of an alleged offender pursuant to this Convention, the requested State shall pay due regard to whether his rights as set forth in article 7, paragraph 3, can be effected in the requesting State.

7. With respect to the offences as defined in this Convention, the provisions of all extradition treaties and arrangements applicable between States Parties are modified as between States Parties to the extent that they are incompatible with this Convention.

ARTICLE 12

1. State Parties shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of the offences set forth in article 3 including assistance in obtaining evidence at their disposal necessary for the proceedings.

2. States Parties shall carry out their obligations under paragraph 1 in conformity with any treaties on mutual assistance that may exist between them. In the absence of such treaties, States Parties shall afford each other assistance in accordance with their national law.

ARTICLE 13

1. States Parties shall co-operate in the prevention of the offences set forth in article 3, particularly by:

(a) taking all practicable measures to prevent preparations in their respective territories for the commission of those offences within or outside their territories;

(b) exchanging information in accordance with their national law, and co-ordinating administrative and other measures taken as appropriate to prevent the commission of offences set forth in article 3.

2. When, due to the commission of an offence set forth in article 3, the passage of a ship has been delayed or interrupted, any State Party in whose territory the ship or passengers or crew are present

shall be bound to exercise all possible efforts to avoid a ship, its passengers, crew or cargo being unduly detained or delayed.

ARTICLE 14

Any State Party having reason to believe that an offence set forth in article 3 will be committed shall, in accordance with its national law, furnish as promptly as possible any relevant information in its possession to those States which it believes would be the States having established jurisdiction in accordance with article 6.

ARTICLE 15

1. Each State Party shall, in accordance with its national law, provide to the Secretary-General, as promptly as possible, any relevant information in its possession concerning:

(a) the circumstances of the offence;

(b) the action taken pursuant to article 13, paragraph 2;

(c) the measures taken in relation to the offender or the alleged offender and, in particular, the results of any extradition proceedings or other legal proceedings.

2. The State Party where the alleged offender is prosecuted shall, in accordance with its national law, communicate the final outcome of the prodeedings to the Secretary-General.

3. The information transmitted in accordance with paragraphs 1 and 2 shall be communicated by the Secretary-General to all States Parties, to Members of the International Maritime Organization (hereinafter referred to as "the Organization"), to the other States concerned, and to the appropriate international intergovernmental organizations.

ARTICLE 16

1. Any dispute between two or more States Parties concerning the interpretation or application of this Convention which cannot be settled through negotiation within a reasonable time shall, at the request of one of them, be submitted to arbitration. If, within six months from the date of the request for arbitration, the parties are unable to agree on the organization of the arbitration any one of those parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State may at the time of signature or ratification, acceptance or approval of this Convention or accession thereto, declare that it does not consider itself bound by any or all of the provisions of paragraph 1. The other States Parties shall not be bound by those provisions with respect to any State Party which has made such a reservation.

3. Any State which has made a reservation in accordance with paragraph 2 may, at any time, withdraw that reservation by notification to the Secretary-General.

ARTICLE 17

1. This Convention shall be open for signature at Rome on 10 March 1988 by States participating in the International Conference on the Suppression of Unlawful Acts against the Safety of Maritime Navigation and at the Headquarters of the Organization by

all States from 14 March 1988 to 9 March 1989. It shall thereafter remain open for accession.

2. States may express their consent to be bound by this Convention by:

(a) signature without reservation as to ratification, acceptance or approval; or

(b) signature subject to ratification, acceptance or approval, followed by ratification, acceptance or approval; or

(c) accession.

3. Ratification, acceptance, approval or accession shall be effected by the deposit of an instrument to that effect with the Secretary-General.

ARTICLE 18

1. This Convention shall enter into force ninety days following the date on which fifteen States have either signed it without reservation as to ratification, acceptance or approval, or have deposited an instrument of ratification, acceptance, approval or accession in respect thereof.

2. For a State which deposits an instrument of ratification, acceptance, approval or accession in respect of this Convention after the conditions for entry into force thereof have been met, the ratification, acceptance, approval or accession shall take effect ninety days after the date of such deposit.

ARTICLE 19

1. This Convention may be denounced by any State Party at any time after the expiry of one year from the date on which this Convention enters into force for that State.

2. Denunciation shall be effected by the deposit of an instrument of denunciation with the Secretary-General.

3. A denunciation shall take effect one year, or such longer period as may be specified in the instrument of denunciation, after the receipt of the instrument of denunciation by the Secretary-General.

ARTICLE 20

1. A conference for the purpose of revising or amending this Convention may be convened by the Organization.

2. The Secretary-General shall convene a conference of the States Parties to this Convention for revising or amending the Convention, at the request of one third of the States Parties, or ten States Parties, whichever is the higher figure.

3. Any instrument of ratification, acceptance, approval or accession deposited after the date of entry into force of an amendment to this Convention shall be deemed to apply to the Convention as amended.

ARTICLE 21

1. This Convention shall be deposited with the Secretary-General.

2. The Secretary-General shall:

(a) inform all States which have signed this Convention or acceded thereto, and all Members of the Organization, of:

(i) each new signature or deposit of an instrument of ratification, acceptance, approval or accession together with the date thereof;

(ii) the date of the entry into force of this Convention;

(iii) the deposit of any instrument of denunciation of this Convention together with the date on which it is received and the date on which the denunciation takes effect;

(iv) the receipt of any declaration or notification made under this Convention;

(b) transmit certified true copies of this Convention to all States which have signed this Convention or acceded thereto.

3. As soon as this Convention enters into force, a certified true copy thereof shall be transmitted by the Depositary to the Secretary-General of the United Nations for registration and publication in accordance with Article 102 of the Charter of the United Nations.

ARTICLE 22

This Convention is established in a single original in the Arabic, Chinese, English, French, Russian and Spanish languages, each text being equally authentic.

In witness whereof the undersigned being duly authorized by their respective Governments for that purpose have signed this Convention.

Done at Rome this tenth day of March one thousand nine hundred and eighty-eight.

Certified true copy in the English, French and Spanish languages of the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome on 10 March 1988, the original of which is deposited with the Secretary-General of the International Maritime Organization.

For the Secretary-General of the International Maritime Organization:

PROTOCOL FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF FIXED PLATFORMS LOCATED ON THE CONTINENTAL SHELF

The States Parties to this Protocol,

Being parties to the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation,

Recognizing that the reasons for which the Convention was elaborated also apply to fixed platforms located on the continental shelf,

Taking account of the provisions of that Convention,

Affirming that matters not regulated by this Protocol continue to be governed by the rules and princples of general international law,

Have agreed as follows:

ARTICLE 1

1. The provisions of articles 5 and 7 and of articles 10 to 16 of the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation (hereinafter referred to as "the Convention") shall also apply *mutatis mutandis* to the offences set forth in article 2 of this Protocol where such offences are committed on board or against fixed platforms located on the continental shelf.

2. In cases where this Protocol does not apply pursuant to paragraph 1, it nevertheless applies when the offender or the alleged offender is found in the territory of a State Party other than the State in whose internal waters or territorial sea the fixed platform is located.

3. For the purposes of this Protocol, "fixed platform" means an artificial island, installation or structure permanently attached to the sea-bed for the purpose of exploration or exploitation of resources or for other economic purposes.

ARTICLE 2

1. Any person commits an offence if that person unlawfully and intentionally:

(a) seizes or exercises control over a fixed platform by force or threat thereof or any other form of intimidation; or

(b) performs an act of violence against a person on board a fixed platform if that act is likely to endanger its safety; or

(c) destroys a fixed platform or causes damage to it which is likely to endanger its safety; or

(d) places or causes to be placed on a fixed platform, by any means whatsoever, a device or substance which is likely to destroy that fixed platform or likely to endanger its safety; or

(e) injures or kills any person in connection with the commission or the attempted commission of any of the offences set forth in subparagraphs (a) to (d).

2. Any person also commits an offence if that person:

(a) attempts to commit any of the offences set forth in paragraph 1; or

(b) abets the commission of any such offences perpetrated by any person or is otherwise an accomplice of a person who commits such an offence; or

(c) threatens, with or without a condition, as is provided for under national law, aimed at compelling a physical or juridicial person to do or refrain from doing any act, to commit any of the offences set forth in paragraph 1, subparagraphs (b) and (c), if that threat is likely to endanger the safety of the fixed platform.

ARTICLE 3

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 2 when the offence is committed:

(a) against or on board a fixed platform while it is located on the continental shelf of that State; or

(b) by a national of that State.

2. A State Party may also establish its jurisdiction over any such offence when:

(a) it is committed by a stateless person whose habitual residence is in that State;

(b) during its commission a national of that State is seized, threatened, injured or killed; or

(c) it is committed in an attempt to compel that State to do or abstain from doing any act.

3. Any State Party which has established jurisdiction mentioned in paragraph 2 shall notify the Secretary-General of the International Maritime Organization (hereinafter referred to as "the Secretary-General"). If such State Party subsequently rescinds that jurisdiction, it shall notify the Secretary-General.

4. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 2 in cases where the alleged offender is present in its territory and it does not extradite him to any of the States Parties which have established their jurisdiction in accordance with paragraphs 1 and 2 of this article.

5. This Protocol does not exclude any criminal jurisdiction exercised in accordance with national law.

ARTICLE 4

Nothing in this Protocol shall affect in any way the rules of international law pertaining to fixed platforms located on the continental shelf.

ARTICLE 5

1. This Protocol shall be open for signature at Rome on 10 March 1988 and at the Headquarters of the International Maritime Orga-

nization (hereinafter referred to as "the Organization") from 14 March 1988 to 9 March 1989 by any State which has signed the Convention. It shall thereafter remain open for accession.

2. States may express their consent to be bound by this Protocol by:

(a) signature without reservation as to ratification, acceptance or approval; or

(b) signature subject to ratification, acceptance or approval, followed by ratification, acceptance or approval; or

(c) accession.

3. Ratification, acceptance, approval or accession shall be effected by the deposit of an instrument to that effect with the Secretary-General.

4. Only a State which has signed the Convention without reservation as to ratification, acceptance or approval, or has ratified, accepted, approved or acceded to the Convention may become a Party to this Protocol.

ARTICLE 6

1. This Protocol shall enter into force ninety days following the date on which three States have either signed it without reservation as to ratification, acceptance or approval, or have deposited an instrument of ratification, acceptance, approval or accession in respect thereof. However, this Protocol shall not enter into force before the Convention has entered into force.

2. For a State which deposits an instrument of ratification, acceptance, approval or accession in respect of this Protocol after the conditions for entry into force thereof have been met, the ratification, acceptance, approval or accession shall take effect ninety days after the date of such deposit.

ARTICLE 7

1. This Protocol may be denounced by any State Party at any time after the expiry of one year from the date on which this Protocol enters into force for that State.

2. Denunciation shall be effected by the deposit of an instrument of denunciation with the Secretary-General.

3. A denunciation shall take effect one year, or such longer period as may be specified in the instrument of denunciation, after the receipt of the instrument of denunciation by the Secretary-General.

4. A denunciation of the Convention by a State Party shall be deemed to be a denunciation of this Protocol by that Party.

ARTICLE 8

1. A conference for the purpose of revising or amending this Protocol may be convened by the Organization.

2. The Secretary-General shall convene a conference of the States Parties to this Protocol for revising or amending the Protocol, at the request of one third of the States Parties, or five States Parties, whichever is the higher figure.

3. Any instrument of ratification, acceptance, approval or accession deposited after the date of entry into force of an amendment

to this Protocol shall be deemed to apply to the Protocol as amended.

ARTICLE 9

1. This Protocol shall be deposited with the Secretary-General.
2. The Secretary-General shall:
   (a) inform all States which have signed this Protocol or acceded thereto, and all Members of the Organization, of:
      (i) each new signature or deposit of an instrument of ratification, acceptance, approval or accession, together with the date thereof;
      (ii) the date of entry into force of this Protocol;
      (iii) the deposit of any instrument of denunciation of this Protocol together with the date on which it is received and the date on which the denunciation takes effect;
      (iv) the receipt of any declaration or notification made under this Protocol or under the Convention, concerning this Protocol;
   (b) transmit certified true copies of this Protocol to all States which have signed this Protocol or acceded thereto.
3. As soon as this Protocol enters into force, a certified true copy thereof shall be transmitted by the Depositary to the Secretary-General of the United States for registration and publication in accordance with Article 102 of the Charter of the United Nations.

ARTICLE 10

This Protocol is established in a single original in the Arabic, Chinese, English, French, Russian and Spanish languages, each text being equally authentic.

In witness whereof the undersigned, being duly authorized by their respective Governments for that purpose, have signed this Protocol.

Done at Rome this tenth day of March one thousand nine hundred and eighty-eight.

c. International Convention Against the Taking of Hostages, December 17, 1979*

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

CONSIDERING THAT:

The International Convention Against the Taking of Hostages was adopted by the United Nations General Assembly on December 17, 1979, and was signed on behalf of the United States of America on December 21, 1979, a certified copy of which Convention is hereto annexed;

The Senate of the United States of America by its resolution of July 30, 1981, two-thirds of the Senators present concurring therein, gave its advice and consent to ratification of the Convention;

The President of the United States of America ratified the Convention on September 4, 1981, in pursuance of the advice and consent of the Senate;

The United States of America deposited its instrument of ratification on December 7, 1984, in accordance with the provisions of Article 17 of the Convention;

Pursuant to the provisions of Article 18, the Convention entered into force for the United States of America on January 6, 1985;

*Source: Proclamation is copied from the files of the Assistant Legal Adviser for Treaty Affairs, U.S. Department of State. Treaty text is from 96th Congress, 2d Session, Senate, Executive N

*TIAS 11081; entered into force June 3, 1983; for the United States, January 6, 1985. Status information appears at Document M.5.q., following.

NOW THEREFORE, I, Ronald Reagan, President of the United States of America, proclaim and make public the Convention, to the end that it be observed and fulfilled with good faith on and after January 6, 1985, by the United States of America and by the citizens of the United States of America and all other persons subject to the jurisdiction thereof.

IN TESTIMONY WHEREOF, I have signed this proclamation and caused the Seal of the United States of America to be affixed.

DONE at the city of Washington
this third day of
October in the year of
our Lord one thousand
nine hundred eighty-six
and of the Independence
of the United States of
America the two hundred
eleventh.

Ronald Reagan

By the President:

George P. Shultz

Secretary of State

INTERNATIONAL CONVENTION AGAINST THE TAKING OF HOSTAGES

The States Parties to this Convention,

Having in mind the purposes and principles of the Charter of the United Nations concerning the maintenance of international peace and security and the promotion of friendly relations and co-operating among States,

Recognizing in particular that everyone has right to life, liberty and security of person, as set out in the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights,

Reaffirming the principle of equal rights and self-determination of peoples as enshrined in the Charter of the United Nations and the Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations, as well as in other relevant resolutions of the General Assembly,

Considering that the taking of hostages is an offence of grave concern to the international community and that, in accordance with the provisions of this Convention, any person committing an act of hostage taking shall either be prosecuted or extradited.

Being convinced that it is urgently necessary to develop international co-operation between States in devising and adopting effective measures for the prevention, prosecution and punishment of all acts of taking of hostages as manifestations of international terrorism,

Have agreed as follows:

Article 1

1. Any person who seizes or detains and threatens to kill, to injure or to continue to detain another person (hereinafter referred to as the "hostage") in order to compel a third party, namely, a State, an international intergovernmental organization, a natural or juridical person, or a group of persons, to do or abstain from doing any act as an explicit or implicit condition for the release of the hostage commits the offence of taking hostages ("hostage-taking") within the meaning of this Convention.

2. Any person who:

(a) attempts to commit an act of hostage-taking, or

(b) participates as an accomplice of anyone who commits or attempts to commit an act of hostage-taking likewise commits an offence for the purposes of this Convention.

Article 2

Each State Party shall make the offences set forth in article 1 punishable by appropriate penalties which take into account the grave nature of those offences.

Article 3

1. The State Party in the territory of which the hostage is held by the offender shall take all measures it considers appropriate to ease the situation of the hostage, in particular, to secure his release and, after his release, to facilitate, when relevant, his departure.

2. If any object which the offender has obtained as a result of the taking of hostages comes into the custody of a State Party, that State Party shall return it as soon as possible to the hostage or the third party refererd to in article 1, as the case may be, or to the appropriate authorities thereof.

Article 4

States Parties shall co-operate in the prevention of the offences set forth in article 1, particularly by:

(*a*) taking all practicable measures to prevent preparations in their respective territories for the commission of those offences within or outside their territories, including measures to prohibit in their territories illegal activities of persons, groups and organizations that encourage, instigate, organize or engage in the perpetration of acts of taking of hostages;

(*b*) exchanging information and co-ordinating the taking of administrative and other measures as appropriate to prevent the commission of those offences.

Article 5

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over any of the offences set forth in article 1 which are committed:

(*a*) in its territory or on board a ship or aircraft registered in that State;

(*b*) by any of its nationals or, if the State considers it appropriate, by those stateless persons who have their habitual residence in its territory;

(*c*) in order to compel that State to do or abstain from doing any act; or

(*d*) with respect to a hostage who is a national of that State, if that State considers it appropriate.

2. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 1 in cases where the alleged offender is present in its territory and it does not extradite him to any of the States mentioned in paragraph 1 of this article.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with internal law.

Article 6

1. Upon being satisfied that the circumstances so warrant, any State Party in the territory of which the alleged offender is present shall, in accordance with its laws, take him into custody or take other measures to ensure his presence for such time as is necessary to enable any

criminal or extradition proceedings to be instituted. That State Party shall immediately make a preliminary inquiry into the facts.

2. The custody or other measures referred to in paragraph 1 of this article shall be notified without delay directly or through the Secretary-General of the United Nations to:

(*a*) the State where the offense was committed;

(*b*) the State against which compulsion has been directed or attempted;

(*c*) the State of which the natural or juridical person against whom compulsion has been directed or attempted is a national;

(*d*) the State of which the hostage is a national or in the territory of which he has his habitual residence;

(*e*) the State of which the alleged offender is a national or, if he is a stateless person, in the territory of which he has his habitual residence;

(*f*) the international intergovernmental organization against which compulsion has been directed or attempted;

(*g*) all other States concerned.

3. Any person regarding whom the measures referred to in paragraph 1 of this article are being taken shall be entitled:

(*a*) to communicate without delay with the nearest appropriate representative of the State of which he is a national or which is otherwise entitled to establish such communication or, if he is a stateless person, the State in the territory of which he has his habitual residence;

(*b*) to be visited by a representative of that State.

4. The rights referred to in paragraph 3 of this article shall be exercised in conformity with the laws and regulations of the State in the territory of which the alleged offender is present subject to the proviso, however, that the said laws and regulations must enable full effect to be given to the purposes for which the rights accorded under paragraph 3 of this article are intended.

5. The provisions of paragraphs 3 and 4 of this article shall be without prejudice to the right of any State Party having a claim to jurisdiction in accordance with paragraph 1(b) of article 5 to invite the International Committee of the Red Cross to communicate with and visit the alleged offender.

6. The State which makes the preliminary inquiry contemplated in paragraph 1 of this article shall promptly report its findings to the States or organization referred to in paragraph 2 of this article and indicate whether it intends to exercise jurisdiction.

Article 7

The State Party where the alleged offender is prosecuted shall in accordance with its laws communicate the final outcome of the proceedings to the Secretary-General of the United Nations, who shall transmit the information to the other States concerned and the international intergovernmental organizations concerned.

Article 8

1. The State Party in the territory of which the alleged offender is found shall, if it does not extradite him, be obliged, without exception

whatsoever and whether or not the offence was committed in its territory, to submit the case to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State. Those authorities shall take their decision in the same manner as in the case of any ordinary offence of a grave nature under the law of that State.

2. Any person regarding whom proceedings are being carried out in connexion with any of the offences set forth in article 1 shall be guaranteed fair treatment at all stages of the proceedings, including enjoyment of all the rights and guarantees provided by the law of the State in the territory of which he is present.

Article 9

1. A request for the extradition of an alleged offender, pursuant to this Convention, shall not be granted if the requested State Party has substantial grounds for believing:

(*a*) that the request for extradition for an offence set forth in article 1 has been made for the purpose of prosecuting or punishing a person on account of his race, religion, nationality, ethnic origin or political opinion; or

(*b*) that the person's position may be prejudiced:

(i) for any of the reasons mentioned in subparagraph (*a*) of this paragraph, or

(ii) for the reason that communication with him by the appropriate authorities of the State entitled to exercise rights of protection cannot be effected.

2. With respect to the offences as defined in this Convention, the provisions of all extradition treaties and arrangements applicable between States Parties are modified as between States Parties to the extent that they are incompatible with this Convention.

Article 10

1. The offences set forth in article 1 shall be deemed to be included as extraditable offences in any extradition treaty existing between States Parties. States Parties undertake to include such offences as extraditable offences in every extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, the requested State may at its option consider this Convention as the legal basis for extradition in respect of the offences set forth in article 1. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize the offences set forth in article 1 as extraditable offences between themselves subject to the conditions provided by the law of the requested State.

4. The offences set forth in article 1 shall be treated, for the purpose of extradition between States Parties, as if they had been committed not only in the place in which they occurred but also in the territories

of the States required to establish their jurisdiction in accordance with paragraph 1 of article 5.

Article 11

1. States Parties shall afford one another the greatest measure of assistance in connexion with criminal proceedings brought in respect of the offences set forth in article 1, including the supply of all evidence at their disposal necessary for the proceedings.

2. The provisions of paragraph 1 of this article shall not affect obligations concerning mutual judicial assistance embodied in any other treaty.

Article 12

In so far as the Geneva Conventions of 1949 for the protection of war victims or the Protocols Additional to those Conventions are applicable to a particular act of hostage-taking, and in so far as States Parties to this Convention are bound under those conventions to prosecute or hand over the hostage-taker, the present Convention shall not apply to an act of hostage-taking committed in the course of armed conflicts as defined in the Geneva Conventions of 1949 and the Protocols thereto, including armed conflicts mentioned in article 1, paragraph 4, Additional Protocol I of 1977, in which peoples are fighting against colonial domination and alien occupation and against racist régimes in the exercise of their right of self-determination, as enshrined in the Charter of the United Nations and the Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations.

Article 13

This Convention shall not apply where the offence is committed within a single State, the hostage and the alleged offender are nationals of that State and the alleged offender is found in the territory of that State.

Article 14

Nothing in this Convention shall be construed as justifying the violation of the territorial integrity or political independence of a State in contravention of the Charter of the United Nations.

Article 15

The provisions of this Convention shall not affect the application of the Treaties on Asylum, in force at the date of the adoption of this Convention, as between the States which are parties to those Treaties; but a State Party to this Convention may not invoke those Treaties with respect to another State Party to this Convention which is not a party to those treaties.

Article 16

1. Any dispute between two or more States Parties concerning the interpretation or application of this Convention which is not settled by negotiation shall, at the request of one them, be submitted to arbitration. If within six months from the date of the request for

arbitration the parties are unable to agree on the organization of the arbitration, any one of those parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State may at the time of signature or ratification of this Convention or accession thereto declare that it does not consider itself bound by paragraph 1 of this article. The other States Parties shall not be bound by paragraph 1 of this article with respect to any State Party which has made such a reservation.

3. Any State Party which has made a reservation in accordance with paragraph 2 of this article may at any time withdraw that reservation by notification to the Secretary-General of the United Nations.

Article 17

1. This Convention is open for signature by all States until 31 December 1980 at United Nations Headquarters in New York.

2. This Convention is subject to ratification. The instruments of ratification shall be deposited with the Secretary-General of the the United Nations.

3. This Convention is open for accession by any State. The instruments of accession shall be deposited with the Secretary-General of the United Nations.

Article 18

1. This Convention shall enter into force on the thirtieth day following the date of deposit of the twenty-second instrument of ratification or accession with the Secretary-General of the United Nations.

2. For each State ratifying or acceding to the Convention after the deposit of the twenty-second instrument of ratification or accession, the Convention shall enter into force on the thirtieth day after deposit by such State of its instrument of ratification or accession.

Article 19

1. Any State Party may denounce this Convention by written notification to the Secretary-General of the United Nations.

2. Denunciation shall take effect one year following the date on which notification is received by the Secretary-General of the United Nations.

Article 20

The original of this Convention, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Secretary-General of the United Nations, who shall send certified copies thereof to all States.

IN WITNESS WHEREOF, the undersigned, being duly authorized thereto by their respective Governments, have signed this Convention, opened for signature at New York on 18 December 1979.

I hereby certify that the foregoing text is a true copy of the International Convention against the taking of hostages, adopted by the

7

General Assembly of the United Nations on 17 December 1979, the original of which is deposited with the Secretary-General of the United Nations.

For the Secretary-General:

d. Vienna Convention on the Physical Protection of Nuclear Material, October 26, 1979 *

CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL

THE CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL, ADOPTED AT A VIENNA MEETING OF GOVERNMENT REPRESENTATIVES ON OCTOBER 26, 1979, AND WAS SIGNED BY THE UNITED STATES ON MARCH 3, 1980

* Source: 96th Congress, 2d Session, Senate, Executive H. Entered into force, including for the United States, February 8, 1987. TIAS 11080. Information on status appears at Document M.5.q., following.

CONVENTION ON THE PHYSICAL PROTECTION OF NUCLEAR MATERIAL

The States Parties to This Convention,

Recognizing the right of all States to develop and apply nuclear energy for peaceful purposes and their legitimate interests in the potential benefits to be derived from the peaceful application of nuclear energy,

Convinced of the need for facilitating international co-operation in the peaceful application of nuclear energy,

Desiring to avert the potential dangers posed by the unlawful taking and use of nuclear material,

Convinced that offences relating to nuclear material are a matter of grave concern and that there is an urgent need to adopt appropriate and effective measures to ensure the prevention, detection and punishment of such offences,

Aware of the Need for international co-operation to establish, in conformity with the national law of each State Party and with this Convention, effective measures for the physical protection of nuclear material,

Convinced that this Convention should facilitate the safe transfer of nuclear material,

Stressing also the importance of the physical protection of nuclear material in domestic use, storage and transport,

Recognizing the importance of effective physical protection of nuclear material used for military purposes, and understanding that such material is and will continue to be accorded stringent physical protection,

HAVE AGREED as follows:

Article 1

For the purposes of this Convention:

(*a*) "nuclear material" means plutonium except that with isotopic concentration exceeding 80% in plutonium-238; uranium-233; uranium enriched in the isotopes 235 or 233; uranium containing the mixture of isotopes as occurring in nature other than in the form of ore or ore-residue; any material containing one or more of the foregoing;

(*b*) "uranium enriched in the 235 or 233" means uranium containing the isotopes 235 or 233 or both in an amount such that the abundance ratio of the sum of these isotopes to the isotope 238 is greater than the ratio of the isotope 235 to the isotope 238 occurring in nature;

(*c*) "international nuclear transport" means the carriage of a consignment of nuclear material by any means of transportation intended to go beyond the territory of the State where the shipment originates beginning with the departure from a facility of the shipper in that State and ending with the arrival at a facility of the receiver within the State of ultimate destination.

Article 2

1. The Convention shall apply to nuclear material used for peaceful purposes while in international nuclear transport.

2. With the exception of articles 3 and 4 and paragraph 3 of article 5, this Convention shall also apply to nuclear material used for peaceful purposes while in domestic use, storage and transport.

3. Apart from the commitments expressly undertaken by States Parties in the articles covered by paragraph 2 with respect to nuclear material used for peaceful purposes while in domestic use, storage and transport, nothing in this Convention shall be interpreted as affecting the sovereign rights of a State regarding the domestic use, storage and transport of such nuclear material.

Article 3

Each State Party shall take appropriate steps within the framework of its national law and consistent with international law to ensure as far as practicable that, during international nuclear transport, nuclear material within its territory, or on board a ship or aircraft under its jurisdiction insofar as such ship or aircraft is engaged in the transport to or from that State, is protected at the levels described in Annex I.

Article 4

1. Each State Party shall not export or authorize the export of nuclear material unless the State Party has received assurances that such material will be protected during the international nuclear transport at the levels described in Annex I.

2. Each State Party shall not import or authorize the import of nuclear material from a State not party to this Convention unless the State Party has received assurances that such material will during the international nuclear transport be protected at the levels described in Annex I.

3. A State Party shall not allow the transit of its territory by land or internal waterways or through its airports or seaports of nuclear material between States that are not parties to this Convention unless the State Party has received assurances as far as practicable that this nuclear material will be protected during international nuclear transport at the levels described in Annex I.

4. Each State Party shall apply within the framework of its national law the levels of physical protection described in Annex I to nuclear material being transported from a part of that State to another part of the same State through international waters or airspace.

5. The State Party responsible for receiving assurances that the nuclear material will be protected at the levels described in Annex I according to paragraphs 1 to 3 shall identify and inform in advance States which the nuclear material is expected to transit by land or internal waterways, or whose airports or seaports it is expected to enter.

6. The responsibility for obtaining assurances referred to in paragraph 1 may be transferred, by mutual agreement, to the State Party involved in the transport as the importing State.

7. Nothing in this article shall be interpreted as in any way affecting the territorial sovereignty and jurisdiction of a State, including that over its airspace and territorial sea.

Article 5

1. States Parties shall identify and make known to each other directly or through the International Atomic Energy Agency their central authority and point of contact having responsibility for physical protection of nuclear material and for co-ordinating recovery and response operations in the event of any unauthorized removal, use or alteration of nuclear material or in the event of credible threat thereof.

2. In the case of theft, robbery or any other unlawful taking of nuclear material or of credible threat thereof, States Parties shall, in accordance with their national law, provide co-operation and assistance to the maximum feasible extent in the recovery and protection of such material to any State that so requests. In particular:

(*a*) a State Party shall take appropriate steps to inform as soon as possible other States, which appear to it to be concerned, of any theft, robbery or other unlawful taking of nuclear material or credible threat thereof and to inform, where appropriate, international organizations;

(*b*) as appropriate, the States Parties concerned shall exchange information with each other or international organizations with a view to protecting threatened nuclear material, verifying the integrity of the shipping container, or recovering unlawfully taken nuclear material and shall:

(i) co-ordinate their efforts through diplomatic and other agreed channels;

(ii) render assistance, if requested;

(iii) ensure the return of nuclear material stolen or missing as a consequence of the above-mentioned events.

The means of implementation of this co-operation shall be determined by the States Parties concerned.

3. States Parties shall co-operate and consult as appropriate, with each other directly or through international organizations, with a view to obtaining guidance on the design, maintenance and improvement of systems of physical protection of nuclear material in international transport.

Article 6

1. States Parties shall take appropriate measures consistent with their national law to protect the confidentiality of any information which they receive in confidence by virtue of the provisions of this Convention from another State Party or through participation in an activity carried out for the implementation of this Convention. If States Parties provide information to international organizations in confidence, steps shall be taken to ensure that the confidentiality of such information is protected.

2. States Parties shall not be required by this Convention to provide any information which they are not permitted to communicate pursuant to national law or which would jeopardize the security of the State concerned or the physical protection of nuclear material.

Article 7

1. The intentional commission of:

(*a*) an act without lawful authority which constitutes the receipt, possession, use, transfer, alteration, disposal or dispersal of nuclear material and which causes or is likely to cause death or serious injury to any person or substantial damage to property;

(*b*) a theft or robbery of nuclear material;

(*c*) an embezzlement or fraudulent obtaining of nuclear material;

(*d*) an act constituting a demand for nuclear material by threat or use of force or by any other form of intimidation;

(*e*) a threat:

(i) to use nuclear material to cause death or serious injury to any person or substantial property damage, or

(ii) to commit an offense described in subparagraph (b) in order to compel a natural or legal person, international organization or State to do or to refrain from doing any act;

(*f*) an attempt to commit any offense described in paragraphs (a), (b) or (c); and

(*g*) an act which constitutes participation in any offense described in paragraphs (a) to (f)

shall be made a punishable offense by each State Party under its national law.

2. Each State Party shall make the offenses described in this article punishable by appropriate penalties which take into account their grave nature.

Article 8

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offenses set forth in article 7 in the following cases:

(*a*) when the offense is committed in the territory of that State or on board a ship or aircraft registered in that State;

(*b*) when the alleged offender is a national of that State.

2. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over these offenses in cases where the alleged offender is present in its territory and it does not extradite him pursuant to article 11 to any of the States mentioned in paragraph 1.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

4. In addition to the State Parties mentioned in paragraphs 1 and 2, each State Party may, consistent with international law, establish its jurisdiction over the offenses set forth in article 7 when it is involved in international nuclear transport as the exporting or importing State.

Article 9

Upon being satisfied that the circumstances so warrant, the State Party in whose territory the alleged offender is present shall take appropriate measures, including detention, under its national law to ensure his presence for the purpose of prosecution or extradition. Measures taken according to this article shall be notified without delay to the

States required to establish jurisdiction pursuant to article 8 and, where appropriate, all other States concerned.

Article 10

The State Party in whose territory the alleged offender is present shall, if it does not extradite him, submit, without exception whatsoever and without undue delay, the case to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State.

Article 11

1. The offences in article 7 shall be deemed to be included as extraditable offences in any extradition treaty existing between States Parties. States Parties undertake to include those offences as extraditable offenses in every future extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, it may at its option consider this Convention as the legal basis for extradition in respect of those offences. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize those offences as extraditable offences between themselves subject to the conditions provided by the law of the requested State.

4. Each of the offences shall be treated, for the purpose of extradition between States Parties, as if it had been committed not only in the place in which it occurred but also in the territories of the States Parties required to establish their jurisdiction in accordance with paragraph 1 of article 8.

Article 12

Any person regarding whom proceedings are being carried out in connection with any of the offenses set forth in article 7 shall be guaranteed fair treatment at all stages of the proceedings.

Article 13

1. States Parties shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of the offenses set forth in article 7, including the supply of evidence at their disposal necessary for the proceedings. The law of the State requested shall apply in all cases.

2. The provisions of paragraph 1 shall not affect obligations under any other treaty, bilateral or multilateral, which governs or will govern, in whole or in part, mutual assistance in criminal matters.

Article 14

1. Each State Party shall inform the depositary of its laws and regulations which give effect to this Convention. The depositary shall communicate such information periodically to all States Parties.

2. The State Party where an alleged offender is prosecuted shall, wherever practicable, first communicate the final outcome of the proceedings to the States directly concerned. The State Party shall also communicate the final outcome to the depositary who shall inform all States.

3. Where an offence involves nuclear material used for peaceful purposes in domestic use, storage or transport, and both the alleged offender and the nuclear material remain in the territory of the State Party in which the offence was committed, nothing in this Convention shall be interpreted as requiring that State Party to provide information concerning criminal proceedings arising out of such an offense.

Article 15

The Annexes constitute an integral part of this Convention.

Article 16

1. A conference of States Parties shall be convened by the depositary five years after the entry into force of this Convention to review the implementation of the Convention and its adequacy as concerns the preamble, the whole of the operative part and the annexes in the light of the then prevailing situation.

2. At intervals of not less than five years thereafter, the majority of States Parties may obtain, by submitting a proposal to this effect to the depositary, the convening of further conferences with the same objective.

Article 17

1. In the event of a dispute between two or more States Parties concerning the interpretation or application of this Convention, such States Parties shall consult with a view to the settlement of the dispute by negotiation, or by any other peaceful means of settling disputes acceptable to all parties to the dispute.

2. Any dispute of this character which cannot be settled in the manner prescribed in paragraph 1 shall, at the request of any party to such dispute, be submitted to arbitration or referred to the International Court of Justice for decision. Where a dispute is submitted to arbitration, if, within six months from the date of the request, the parties to the dispute are unable to agree on the organization of the arbitration, a party may request the President of the International Court of Justice or the Secretary-General of the United Nations to appoint one or more arbitrators. In case of conflicting requests by the parties to the dispute, the request to the Secretary-General of the United Nations shall have priority.

3. Each State Party may at the time of signature, ratification, acceptance or approval of this Convention or accession thereto declare that it does not consider itself bound by either or both of the dispute settlement procedures provided for in paragraph 2. The other States Parties shall not be bound by a dispute settlement procedure provided for in paragraph 2, with respect to a State Party which has made a reservation to that procedure.

4. Any State Party which has made a reservation in accordance with paragraph 3 may at any time withdraw that reservation by notification to the depositary.

Article 18

1. This Convention shall be open for signature by all States at the Headquarters of the International Atomic Energy Agency in Vienna and at the Headquarters of the United Nations in New York from 3 March 1980 until its entry into force.

2. This Convention is subject to ratification, acceptance or approval by the signatory States.

3. After its entry into force, this Convention will be open for accession by all States.

4. (*a*) This Convention shall be open for signature or accession by international organizations and regional organizations of an integration or other nature, provided that any such organization is constituted by sovereign States and has competence in respect of the negotiation, conclusion and application of international agreements in matters covered by this Convention.

(*b*) In matters within their competence, such organizations shall, on their own behalf, exercise the rights and fulfill the responsibilities which this Convention attributes to States Parties.

(*c*) When becoming party to this Convention such an organization shall communicate to the depositary a declaration indicating which States are members thereof and which articles of this Convention do not apply to it.

(*d*) Such an organization shall not hold any vote additional to those of its Member States.

5. Instruments of ratification, acceptance, approval or accession shall be deposited with the depositary.

Article 19

1. This Convention shall enter into force on the thirtieth day following the date of deposit of the twenty first instrument of ratification, acceptance or approval with the depositary.

2. For each State ratifying, accepting, approving or acceding to the Convention after the date of deposit of the twenty first instrument of ratification, acceptance or approval, the Convention shall enter into force on the thirtieth day after the deposit by such State of its instrument of ratification, acceptance, approval or accession.

Article 20

1. Without prejudice to article 16 a State Party may propose amendments to this Convention. The proposed amendment shall be submitted to the depositary who shall circulate it immediately to all States Parties. If a majority of States Parties request the depositary to convene a conference to consider the proposed amendments, the depositary shall invite all States Parties to attend such a conference to begin not sooner than thirty days after the invitations are issued. Any amendment adopted at the conference by a two-thirds majority of all States Parties shall be promptly circulated by the depositary to all States Parties.

2. The amendment shall enter into force for each State Party that deposits its instrument of ratification, acceptance or approval of the

amendment on the thirtieth day after the date on which two thirds of the States Parties have deposited their instruments of ratification, acceptance or approval with the depositary. Thereafter, the amendment shall enter into force for any other State Party on the day on which that State Party deposits its instrument of ratification, acceptance or approval of the amendment.

Article 21

1. Any State Party may denounce this Convention by written notification to the depositary.

2. Denunciation shall take effect one hundred and eighty days following the date on which notification is received by the depositary.

Article 22

The depositary shall promptly notify all States of:

(a) each signature of this Convention;

(b) each deposit of an instrument of ratification, acceptance, approval or accession;

(c) any reservation or withdrawal in accordance with article 17;

(d) any communication made by an organization in accordance with paragraph 4(c) of article 18;

(e) the entry into force of this Convention;

(f) the entry into force of any amendment to this Convention; and

(g) any denunciation made under article 21.

Article 23

The original of this Convention, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Director General of the International Atomic Energy Agency who shall send certified copies thereof to all States.

ANNEX I

LEVELS OF PHYSICAL PROTECTION TO BE APPLIED IN INTERNATIONAL TRANSPORT OF NUCLEAR MATERIAL AS CATEGORIZED IN ANNEX II

1. Levels of physical protection for nuclear material during storage incidental to international nuclear transport include:

(*a*) For Category III materials, storage within an area to which access is controlled;

(*b*) For Category II materials, storage within an area under constant surveillance by guards or electronic devices, surrounded by a physical barrier with a limited number of points of entry under appropriate control or any area with an equivalent level of physical protection;

(*c*) For Category I material, storage within a protected area as defined for Category II above, to which, in addition, access is restricted to persons whose trustworthiness has been determined, and which is under surveillance by guards who are in close communication with appropriate response forces. Specific measures taken in this context should have as their object the detection and prevention of any assault, unauthorized access or unauthorized removal of material.

2. Levels of physical protection for nuclear material during international transport include:

(*a*) For Category II and III materials, transportation shall take place under special precautions including prior arrangements among sender, receiver, and carrier, and prior agreement between natural or legal persons subject to the jurisdiction and regulation of exporting and importing States, specifying time, place and procedures for transferring transport responsibility;

(*b*) For Category I materials, transportation shall take place under special precautions identified above for transportation of Category II and III materials, and in addition, under constant surveillance by escorts and under conditions which assure close communication with appropriate response forces;

(*c*) For natural uranium other than in the form of ore or ore-residue, transportation protection for quantities exceeding 500 kilograms U shall include advance notification of shipment specifying mode of transport, expected time of arrival and confirmation of receipt of shipment.

IN WITNESS WHEREOF, the undersigned, being duly authorized, have signed this Convention, opened for signature at Vienna and at New York on 3 March 1980.

ANNEX II

TABLE: CATEGORIZATION OF NUCLEAR MATERIAL

Material	Form	Category I	Category II	Category III [3]
1. Plutonium [1]	Unirradiated [2]	2 kg or more	Less than 2 kg but more than 500 g.	500 g or less but more than 15 g.
2. Uranium-235	Unirradiated [2]:			
	—uranium enriched to 20% U^{235} or more	5 kg or more	Less than 5 kg but more than 1 kg.	1 kg or less but more than 15 g.
	—uranium enriched to 10% U^{235} but less than 20%		10 kg or more	Less than 10 kg but more than 1 kg.
	—uranium enriched above natural, but less than 10% U^{235}.			10 kg or more.
3. Uranium-233	Unirradiated [2]	2 kg or more	Less than 2 kg but more than 500 g.	500 g or less but more than 15 g.
4. Irradiated fuel			Depleted or natural uranium, thorium or low-enriched fuel (less than 10% fissile content). [4] [5]	

[1] All plutonium except that with isotopic concentration exceeding 80% in plutonium-238.
[2] Material not irradiated in a reactor or material irradiated in a reactor but with a radiation level equal to or less than 100 rads/hour at one metre unshielded.
[3] Quantities not falling in Category III and natural uranium should be protected in accordance with prudent management practice.
[4] Although this level of protection is recommended, it would be open to States, upon evaluation of the specific circumstances, to assign a different category of physical protection.
[5] Other fuel which by virtue of its original fissile material content is classified as Category I and II before irradiation may be reduced one category level while the radiation level from the fuel exceeds 100 rads/hour at one metre unshielded

NOTE: Status of signatories and ratifiers appears on page 47 of Document J.4.e. below.

e. U.N. Convention on the Prevention and Punishment of Crimes Against Internationally Protected Persons, Including Diplomatic Agents*

Adopted by the United Nations General Assembly December 14, 1973; Signed on behalf of the United States of America December 28, 1973; Ratification advised by the Senate of the United States of America October 28, 1975; Instrument of ratification deposited with the Secretary-General of the United Nations October 27, 1976; Entered into force February 20, 1977

THE STATES PARTIES TO THIS CONVENTION,

HAVING IN MIND the purposes and principles of the Charter of the United Nations concerning the maintenance of international peace and the promotion of friendly relations and co-operation among States,

CONSIDERING that crimes against diplomatic agents and other internationally protected persons jeopardizing the safety of these persons create a serious threat to the maintenance of normal international relations which are necessary for co-operation among States,

BELIEVING that the commission of such crimes is a matter of grave concern to the international community,

CONVINCED that there is an urgent need to adopt appropriate and effective measures for the prevention and punishment of such crimes,

HAVE AGREED as follows:

ARTICLE 1

For the purposes of this Convention:

1. "internationally protected person" means:

(a) a Head of State, including any member of a collegial body performing the functions of a Head of State under the constitution of the State concerned, a Head of Government or a Minister for Foreign Affairs, whenever any such person is in a foreign State, as well as members of his family who accompany him;

(b) any representative or official of a State or any official or other agent of an international organization of an intergovernmental character who, at the time when and in the place where a crime against him, his official premises, his private accommodation or his means of transport is committed, is entitled pursuant to international law to special protection from any attack on his person, freedom or dignity, as well as members of his family forming part of his household.

*28 UST 1975; TIAS 8532; 1035 UNTS 167. For states which are parties to the Convention, see Department of State publication, *Treaties in Force* and at Document M.5.q., following.

2. "alleged offender" means a person as to whom there is sufficient evidence to determine *prima facie* that he has committed or participated in one or more of the crimes set forth in article 2.

ARTICLE 2

1. The international commission of:

(a) a murder, kidnapping or other attack upon the person or liberty of an internationally protected person;

(b) a violent attack upon the official premises, the private accommodation or the means of transport of an internationally protected person likely to endanger his person or liberty;

(c) a threat to commit any such attack;

(d) an attempt to commit any such attack; and

(e) an act constituting participation as an accomplice in any such attack shall be made by each State Party a crime under its internal law.

2. Each State Party shall make these crimes punishable by appropriate penalties which take into account their grave nature.

3. Paragraphs 1 and 2 of this article in no way derogate from the obligations of States Parties under international law to take all appropriate measures to prevent other attacks on the person, freedom or dignity of an internationally protected person.

ARTICLE 3

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the crimes set forth in article 2 in the following cases:

(a) when the crime is committed in the territory of that State or on board a ship or aircraft registered in that State;

(b) when the alleged offender is a national of that State;

(c) when the crime is committed against an internationally protected person as defined in article 1 who enjoys his status as such by virtue of functions which he exercise on behalf of that State.

2. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over these crimes in cases where the alleged offender is present in its territory and it does not extradite him pursuant to article 8 to any of the States mentioned in paragraph 1 of this article.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with internal law.

ARTICLE 4

States Parties shall co-operate in the prevention of the crimes set forth in article 2, particularly by:

(a) taking all practicable measures to prevent preparations in their respective territories for the commission of those crimes within or outside their territories;

(b) exchanging information and co-ordinating the taking of administrative and other measures as appropriate to prevent the commission of those crimes.

ARTICLE 5

1. The State Party in which any of the crimes set forth in article 2 has been committed shall, if it has reason to believe that an alleged offender has fled from its territory, communicate to all other States concerned, directly or through the Secretary-General of the United Nations, all the pertinent facts regarding the crime committed and all available information regarding the identity of the alleged offender.

Whenever any of the crimes set forth in article 2 has been committed against an internationally protected person, any State Party which has information concerning the victim and the circumstances of the crime shall endeavor to transmit it, under the conditions provided for in its internal law, fully and promptly to the State Party on whose behalf he was exercising his functions.

ARTICLE 6

1. Upon being satisfied that the circumstances so warrant, the State Party in whose territory the alleged offender is present shall take the appropriate measures under its internal law so as to ensure his presence for the purpose of prosecution or extradition. Such measures shall be notified without delay directly or through the Secretary-General of the United Nations to:

(a) the State where the crime was committed;

(b) the State or States of which the alleged offender is a national or, if he is a stateless person, in whose territory he permanently resides;

(c) the State or States of which the internationally protected person concerned is a national or on whose behalf he was exercising his functions;

(d) all other States concerned; and

(e) the international organization of which the internationally protected person concerned is an official or an agent.

2. Any person regarding whom the measures referred to in paragraph 1 of this article are being taken shall be entitled:

(a) to communicate without delay with the nearest appropriate representative of the State of which he is a national or which is otherwise entitled to protect his rights or, if he is a stateless person, which he requests and which is willing to protect his rights; and

(b) to be visited by a representative of that State.

ARTICLE 7

The State Party in whose territory the alleged offender is present shall, if it does not extradite him, submit, without exception whatsoever and without undue delay, the case to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State.

ARTICLE 8

1. To the extent that the crimes set forth in article 2 are not listed as extraditable offences in any extradition treaty existing between States Parties, they shall be deemed to be included as such

therein. States Parties undertake to include those crimes as extraditable offenses in every future extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, it may, if it decides to extradite, consider this Convention as the legal basis for extradition in respect of those crimes. Extradition shall be subject to the procedural provisions and the other conditions of the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize those crimes as extraditable offenses between themselves subject to the procedural provisions and the other conditions of the law of the requested State.

4. Each of the crimes shall be treated, for the purpose of extradition between States Parties, as if it had been committed not only in the place in which it occurred but also in the territories of the States required to establish their jurisdiction in accordance with paragraph 1 of article 3.

ARTICLE 9

Any person regarding whom proceedings are being carried out in connexion with any of the crimes set forth in article 2 shall be guaranteed fair treatment at all stages of the proceedings.

ARTICLE 10

1. States Parties shall afford one another the greatest measure of assistance in connexion with criminal proceedings brought in respect of the crimes set forth in article 2, including the supply of all evidence at their disposal necessary for the proceedings.

2. The provisions of paragraph 1 of this article shall not affect obligations concerning mutual judicial assistance embodied in any other treaty.

ARTICLE 11

The State Party where an alleged offender is prosecuted shall communicate the final outcome of the proceedings of the Secretary-General of the United Nations, who shall transmit the information to the other States Parties.

ARTICLE 12

The provisions of this Convention shall not affect the application of the Treaties on Asylum, in force at the date of the adoption of this Convention, as between the States which are parties to those Treaties; but a State Party to this Convention may not invoke those Treaties with respect to another State Party to this Convention which is not a party to those Treaties.

ARTICLE 13

1. Any dispute between two or more States Parties concerning the interpretation or application of this Convention which is not settled by negotiation shall, at the request of one of them, be sub-

mitted to arbitration. If within six months from the date of the request for arbitration the parties are unable to agree on the organization of the arbitration, any one of those parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State Party may at the time of signature or ratification of this Convention or accession thereto declare that it does not consider itself bound by paragraph 1 of this article. The other States Parties shall not be bound by paragraph 1 of this article with respect to any State Party which has made such a reservation.

3. Any State Party which has made a reservation in accordance with paragraph 2 of this article may at any time withdraw that reservation by notification to the Secretary-General of the United Nations.

ARTICLE 14

This Convention shall be open for signature by all States, until 31 December 1974 at United Nations Headquarters in New York.

ARTICLE 15

This Convention is subject to ratification. The instruments of ratification shall be deposited with the Secretary-General of the United Nations.

ARTICLE 16

This Convention shall remain open for accession by any State. The instruments of accession shall be deposited with the Secretary-General of the United Nations.

ARTICLE 17

1. This Convention shall enter into force on the thirtieth day following the date of deposit of the twenty-second instrument of ratification or accession with the Secretary-General of the United Nations.

2. For each State ratifying or acceding to the Convention after the deposit of the twenty-second instrument of ratification or accession, the Convention shall enter into force on the thirtieth day after deposit by such State of its instrument of ratification or accession.

ARTICLE 18

1. Any State Party may denounce this Convention by written notification to the Secretary-General of the United Nations.

2. Denunciation shall take effect six months following the date on which notification is received by the Secretary-General of the United Nations.

ARTICLE 19

The Secretary-General of the United Nations shall inform all States, *inter alia:*

(a) of signatures to this Convention, of the deposit of instruments of ratification or accession in accordance with articles 14, 15 and 16 and of notifications made under article 18.

(b) of the date on which this Convention will enter into force in accordance with article 17.

ARTICLE 20

The original of this Convention, of which the Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Secretary-General of the United Nations, who shall send certified copies thereof to all States.

IN WITNESS WHEREOF the undersigned, being duly authorized thereto by their respective Governments, have signed this Convention, opened for signature at New York on 14 December 1973.

f. Moscow Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction.

Signed at Washington, London, and Moscow April 10,1972; Ratification advised by U.S. Senate December 16, 1974; Ratified by U.S. President January 22, 1975; U.S. ratification deposited at Washington, London, and Moscow, March 26, 1975; Proclaimed by U.S. President March 26, 1975; Entered into force March 26, 1975;

The States Parties to this Convention,

Determined to act with a view to achieving effective progress towards general and complete disarmament, including the prohibition and elimination of all types of weapons of mass destruction, and convinced that the prohibition of the development, production and stockpiling of chemical and bacteriological (biological) weapons and their elimination, through effective measures, will facilitate the achievement of general and complete disarmament under strict and effective international control,

Recognizing the important significance of the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare, signed at Geneva on June 17, 1925, and conscious also of the contribution which the said Protocol has already made, and continues to make, to mitigating the horrors of war,

Reaffirming their adherence to the principles and objectives of that Protocol and calling upon all States to comply strictly with them,

Recalling that the General Assembly of the United Nations has repeatedly condemned all actions contrary to the principles and objectives of the Geneva Protocol of June 17, 1925,

Desiring to contribute to the strengthening of confidence between peoples and the general improvement of the international atmosphere,

Desiring also to contribute to the realization of the purposes and principles of the Charter of the United Nations,

Convinced of the importance and urgency of eliminating from the arsenals of States, through effective measures, such dangerous weapons of mass destruction as those using chemical or bacteriological (biological) agents,

Recognizing that an agreement on the prohibition of bacteriological (biological) and toxin weapons represents a first possible step towards the achievement of agreement on effective measures also for the prohibition of the development, production and stockpiling of chemical weapons, and determined to continue negotiations to that end,

Determined, for the sake of all mankind, to exclude completely the possibility of bacteriological (biological) agents and toxins being used as weapons,

Convinced that such use would be repugnant to the conscience of mankind and that no effort should be spared to minimize this risk,

Have agreed as follows:

ARTICLE I

Each State Party to this Convention undertakes never in any circumstances to develop, produce, stockpile or otherwise acquire or retain:

(1) Microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes;

(2) Weapons, equipment or means of delivery designed to use such agents or toxins for hostile purposes or in armed conflict.

ARTICLE II

Each State Party to this Convention undertakes to destroy, or to divert to peaceful purposes, as soon as possible but not later than nine months after the entry into force of the Convention, all agents, toxins, weapons, equipment and means of delivery specified in article I of the Convention, which are in its possession or under its jurisdiction or control. In implementing the provisions of this article all necessary safety precautions shall be observed to protect populations and the environment.

ARTICLE III

Each State Party to this Convention undertakes not to transfer to any recipient whatsoever, directly or indirectly, and not in any way to assist, encourage, or induce any State, group of States or international organizations to manufacture or otherwise acquire any of the agents, toxins, weapons, equipment or means of delivery specified in article I of the Convention.

ARTICLE IV

Each State Party to this Convention shall, in accordance with its constitutional processes, take any necessary measures to prohibit and prevent the development, production, stockpiling, acquisition, or retention of the agents, toxins, weapons, equipment and means of delivery specified in article I of the Convention, within the territory of such State, under its jurisdiction or under its control anywhere.

ARTICLE V

The States Parties to this Convention undertake to consult one another and to cooperate in solving any problems which may arise in relation to the objective of, or in the application of the provisions of, the Convention. Consultation and cooperation pursuant to this article may also be undertaken through appropriate international procedures within the framework of the United Nations and in accordance with its Charter.

ARTICLE VI

(1) Any State Party to this Convention which finds that any other State Party is acting in breach of obligations deriving from the provisions of the Convention may lodge a complaint with the Security Council of the United Nations. Such a complaint should include all possible evidence confirming its validity, as well as a request for its consideration by the Security Council.

(2) Each State Party to this Convention undertakes to cooperate in carrying out any investigation which the Security Council may initiate, in accordance with the provisions of the Charter of the United Nations, on the basis of the complaint received by the Council. The Security Council shall inform the States Parties to the Convention of the results of the investigation.

ARTICLE VII

Each State Party to this Convention undertakes to provide or support assistance, in accordance with the United Nations Charter, to any Party to the Convention which so requests, if the Security Council decides that such Party has been exposed to danger as a result of violation of the Convention.

ARTICLE VIII

Nothing in this Convention shall be interpreted as in any way limiting or detracting from the obligations assumed by any State under the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare, signed at Geneva on June 17, 1925.

ARTICLE IX

Each State Party to this Convention affirms the recognized objective of effective prohibition of chemical weapons and, to this end, undertakes to continue negotiations in good faith with a view to reaching early agreement on effective measures for the prohibition of their development, production and stockpiling and for their destruction, and on appropriate measures concerning equipment and means of delivery specifically designed for the production or use of chemical agents for weapons purposes.

ARTICLE X

(1) The States Parties to this Convention undertake to facilitate, and have the right to participate in, the fullest possible exchange of equipment, materials and scientific and technological information for the use of bacteriological (biological) agents and toxins for peaceful purposes. Parties to the Convention in a position to do so shall also cooperate in contributing individually or together with other States or international organizations to the further development and application of scientific discoveries in the field of bacteriology (biology) for prevention of disease, or for other peaceful purposes.

(2) This Convention shall be implemented in a manner designed to avoid hampering the economic or technological development of States Parties to the Convention or international cooperation in the

field of peaceful bacteriological (biological) activities, including the international exchange of bacteriological (biological) agents and toxins and equipment for the processing, use or production of bacteriological (biological) agents and toxins for peaceful purposes in accordance with the provisions of the Convention.

ARTICLE XI

Any State Party may propose amendments to this Convention. Amendments shall enter into force for each State Party accepting the amendments upon their acceptance by a majority of the States Parties to the Convention and thereafter for each remaining State Party on the date of acceptance by it.

ARTICLE XII

Five years after the entry into force of this Convention, or earlier if it is requested by a majority of Parties to the Convention by submitting a proposal to this effect to the Depositary Governments, a conference of States Parties to the Convention shall be held at Geneva, Switzerland, to review the operation of the Convention, with a view to assuring that the purposes of the preamble and the provisions of the Convention, including the provisions concerning negotiations on chemical weapons, are being realized. Such review shall take into account any new scientific and technological developments relevant to the Convention.

ARTICLE XIII

(1) This Convention shall be of unlimited duration.

(2) Each State Party to this Convention shall in exercising its national sovereignty have the right to withdraw from the Convention if it decides that extraordinary events, related to the subject matter of the Convention, have jeopardized the supreme interests of its country. It shall give notice of such withdrawal to all other States Parties to the Convention and to the United Nations Security Council three months in advance. Such notice shall include a statement of the extraordinary events it regards as having jeopardized its supreme interests.

ARTICLE XIV

(1) This Convention shall be open to all States for signature. Any State which does not sign the Convention before its entry into force in accordance with paragraph (3) of this Article may accede to it at any time.

(2) This Convention shall be subject to ratification by signatory States. Instruments of ratification and instruments of accession shall be deposited with the Governments of the United States of America, the United Kingdom of Great Britain and Northern Ireland and the Union of Soviet Socialist Republics, which are hereby designated the Depositary Governments.

(3) This Convention shall enter into force after the deposit of instruments of ratification by twenty-two Governments, including the Governments designated as Depositories of the Convention.

(4) For States whose instruments of ratification or accession are deposited subsequent to the entry into force of this Convention, it shall enter into force on the date of the deposit of their instruments of ratification or accession.

(5) The Depositary Governments shall promptly inform all signatory and acceding States of the date of each signature, the date of deposit of each instrument of ratification or of accession and the date of the entry into force of this Convention, and of the receipt of other notices.

(6) This Convention shall be registered by the Depositary Governments pursuant to Article 102 of the Charter of the United Nations.

ARTICLE XV

This Convention, the English, Russian, French, Spanish and Chinese texts of which are equally authentic, shall be deposited in the archives of the Depositary Governments. Duly certified copies of the Convention shall be transmitted by the Depositary Governments to the Governments of the signatory and acceding states.

IN WITNESS WHEREOF the undersigned, duly authorized, have signed this Convention.

DONE in triplicate, at the cities of Washington, London and Moscow, this tenth day of April, one thousand nine hundred and seventy-two.

g. Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation *

Done at Montreal September 23, 1971; Entered into Force January 26, 1973

The States Parties to the Convention

Considering that unlawful acts against the safety of civil aviation jeopardize the safety of persons and property, seriously affect the operation of air services, and undermine the confidence of the peoples of the world in the safety of civil aviation;

Considering that the occurrence of such acts is a matter of grave concern;

Considering that, for the purpose of deterring such acts, there is an urgent need to provide appropriate measures for punishment of offenders;

Have agreed as follows:

ARTICLE 1

1. Any person commits an offence if he unlawfully and intentionally:

(a) performs an act of violence against a person on board an aircraft in flight if that act is likely to endanger the safety of that aircraft; or

(b) destroys an aircraft in service or causes damage to such an aircraft which renders it incapable of flight or which is likely to endanger its safety in flight; or

(c) places or causes to be placed on an aircraft in service, by any means whatsoever, a device or substance which is likely to destroy that aircraft, or to cause damage to it which renders it incapable of flight, or to cause damage to it which is likely to endanger its safety in flight; or

(d) destroys or damages air navigation facilities or interferes with their operation, if any such act is likely to endanger the safety of aircraft in flight; or

(e) communicates information which he knows to be false, thereby endangering the safety of an aircraft in flight.

2. Any person also commits an offence if he:

(a) attempts to commit any of the offences mentioned in paragraph 1 of this Article; or

(b) is an accomplice of a person who commits or attempts to commit any such offence.

ARTICLE 2

For the purposes of this Convention:

* 24 UST 567; TIAS 7570. For states which are parties to the Convention, see Department of State publication, *Treaties in Force* and at Document M.5.q, following.

(a) an aircraft is considered to be in flight at any time from the moment when all its external doors are closed following embarkation until the moment when any such door is opened for disembarkation; in the case of a forced landing, the flight shall be deemed to continue until the competent authorities take over the responsibility for the aircraft and for persons and property on board;

(b) an aircraft is considered to be in service from the beginning of the preflight preparation of the aircraft by ground personnel or by the crew for a specific flight until twenty-four hours after any landing; the period of service shall, in any event, extend for the entire period during which the aircraft is in flight as defined in paragraph (a) of this Article.

ARTICLE 3

Each Contracting State undertakes to make the offences mentioned in Article 1 punishable by severe penalties.

ARTICLE 4

1. This Convention shall not apply to aircraft used in military, customs or police services.

2. In the cases contemplated in subparagraphs (a), (b), (c) and (e) of paragraph 1 of Article 1, this Convention shall apply, irrespective of whether the aircraft is engaged in an international or domestic flight, only if:

(a) the place of take-off or landing, actual or intended, of the aircraft is situated outside the territory of the State of registration of that aircraft; or

(b) the offence is committed in the territory of a State other than the State of registration of the aircraft.

3. Notwithstanding paragraph 2 of this Article, in the cases contemplated in subparagraphs (a), (b), (c) and (e) of paragraph 1 of Article 1, this Convention shall also apply if the offender or the alleged offender is found in the territory of a State other than the State of registration of the aircraft.

4. With respect to the States mentioned in Article 9 and in the cases mentioned in subparagraphs (a), (b), (c) and (e) of paragraph 1 of Article 1, this Convention shall not apply if the places referred to in subparagraph (a) of paragraph 2 of this Article are situated within the territory of the same State where that State is one of those referred to in Article 9, unless the offence is committed or the offender or alleged offender is found in the territory of a State other than that State.

5. In the cases contemplated in subparagraph (d) of paragraph 1 of Article 1, this Convention shall apply only if the air navigation facilities are used in international air navigation.

6. The provisions of paragraphs 2, 3, 4 and 5 of this Article shall also apply in the cases contemplated in paragraph 2 of Article 1.

ARTICLE 5

1. Each Contracting State shall take such measures as may be necessary to establish its jurisdiction over the offences in the following cases:

(a) when the offence is committed in the territory of that State;
(b) when the offence is committed against or on board an aircraft registered in that State;
(c) when the aircraft on board which the offence is committed lands in its territory with the alleged offender still on board;
(d) when the offence is committed against or on board an aircraft leased without crew to a lessee who has his principal place of business or, if the lessee has no such place of business, his permanent residence, in that State.

2. Each Contracting State shall likewise take such measures as may be necessary to establish its jurisdiction over the offences mentioned in Article 1, paragraph 1 (a), (b) and (c), and in Article 1, paragraph 2, in so far as that paragraph relates to those offences, in the case where the alleged offender is present in its territory and it does not extradite him pursuant to Article 8 to any of the States mentioned in paragraph 1 of this Article.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

ARTICLE 6

1. Upon being satisfied that the circumstances so warrant, any Contracting State in the territory of which the offender or the alleged offender is present, shall take him into custody or take other measures to ensure his presence. The custody and other measures shall be as provided in the law of that State but may only be continued for such time as is necessary to enable any criminal or extradition proceedings to be instituted.

2. Such State shall immediately make a preliminary enquiry into the facts.

3. Any person in custody pursuant to paragraph 1 of this Article shall be assisted in communicating immediately with the nearest appropriate representative of the State of which he is a national.

4. When a State, pursuant to this Article, has taken a person into custody, it shall immediately notify the States mentioned in Article 5, paragraph 1, the State of nationality of the detained person and, if it considers it advisable, any other interested State of the fact that such person is in custody and of the circumstances which warrant his detention. The State which makes the preliminary enquiry contemplated in paragraph 2 of this Article shall promptly report its findings to the said States and shall indicate whether it intends to exercise jurisdiction.

ARTICLE 7

The Contracting State in the territory of which the alleged offender is found shall, if it does not extradite him, be obliged, without exception whatsoever and whether or not the offence was committed in its territory, to submit the case to its competent authorities for the purpose of prosecution. Those authorities shall take their decision in the same manner as in the case of any ordinary offence of a serious nature under the law of that State.

ARTICLE 8

1. The offences shall be deemed to be included as extraditable offences in any extradition treaty existing between Contracting States. Contracting States undertake to include the offences as extraditable offences in every extradition treaty to be concluded between them.

2. If a Contracting State which makes extradition conditional on the existence of a treaty receives a request for extradition from another Contracting State with which it has no extradition treaty, it may at its option consider this Convention as the legal basis for extradition in respect of the offences. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. Contracting States which do not make extradition conditional on the existence of a treaty shall recognize the offences as extraditable offences between themselves subject to the conditions provided by the law of the requested State.

4. Each of the offences shall be treated, for the purpose of extradition between Contracting States, as if it had been committed not only in the place in which it occurred but also in the territories of the States required to establish their jurisdiction in accordance with Article 5, paragraph 1 (b), (c) and (d).

ARTICLE 9

The Contracting States which establish joint air transport operating organizations or international operating agencies, which operate aircraft which are subject to joint or international registration shall, by appropriate means, designate for each aircraft the State among them which shall exercise the jurisdiction and have the attributes of the State of registration for the purpose of this Convention and shall give notice thereof to the International Civil Aviation Organization which shall communicate the notice to all States Parties to this Convention.

ARTICLE 10

1. Contracting States shall, in accordance with international and national law, endeavour to take all practicable measure for the purpose of preventing the offences mentioned in Article 1.

2. When, due to the commission of one of the offences mentioned in Article 1, a flight has been delayed or interrupted, any Contracting State in whose territory the aircraft or passengers or crew are present shall facilitate the continuation of the journey of the passengers and crew as soon as practicable, and shall without delay return the aircraft and its cargo to the persons lawfully entitled to possession.

ARTICLE 11

1. Contracting States shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of the offences. The law of the State requested shall apply in all cases.

2. The provisions of paragraph 1 of this Article shall not affect obligations under any other treaty, bilateral or multilateral, which

governs or will govern, in whole or in part, mutual assistance in criminal matters.

ARTICLE 12

Any Contracting State having reason to believe that one of the offences mentioned in Article 1 will be committed shall, in accordance with its national law, furnish any relevant information in its possession to those States which it believes would be the States mentioned in Article 5, paragraph 1.

ARTICLE 13

Each Contracting State shall in accordance with its national law report to the Council of the International Civil Aviation Organization as promptly as possible any relevant information in its possession concerning:

(a) the circumstances of the offence;

(b) the action taken pursuant to Article 10, paragraph 2;

(c) the measures taken in relation to the offender or the alleged offender and, in particular, the results of any extradition proceedings or other legal proceedings.

ARTICLE 14

1. Any dispute between two or more Contracting States concerning the interpretation or application of this Convention which cannot be settled through negotiation, shall, at the request of one of them, be submitted to arbitration. If within six months from the date of the request for arbitration the Parties are unable to agree on the organization of the arbitration, any one of those Parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State may at the time of signature or ratification of this Convention or accession thereto, declare that it does not consider itself bound by the preceding paragraph. The other Contracting States shall not be bound by the preceding paragraph with respect to any Contracting State having made such a reservation.

3. Any Contracting State having made a reservation in accordance with the preceding paragraph may at any time withdraw this reservation by notification to the Depositary Governments.

ARTICLE 15

1. This Convention shall be open for signature at Montreal on 23 September 1971, by States participating in the International Conference on Air Law held at Montreal from 8 to 23 September 1971 (hereinafter referred to as the Montreal Conference). After 10 October 1971, the Convention shall be open to all States for signature in Moscow, London and Washington. Any State which does not sign this Convention before its entry into force in accordance with paragraph 3 of this Article may accede to it at any time.

2. This Convention shall be subject to ratification by the signatory States. Instruments of ratification and instruments of accession shall be deposited with the Governments of the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and

Northern Ireland, and the United States of America, which are hereby designated the Depositary Governments.

3. This Convention shall enter into force thirty days following the date of the deposit of instruments of ratification by ten States signatory to this Convention which participated in the Montreal Conference.

4. For other States, this Convention shall enter into force on the date of entry into force of this Convention in accordance with paragraph 3 of this Article, or thirty days following the date of deposit of their instruments of ratification or accession, whichever is later.

5. The Depositary Governments shall promptly inform all signatory and acceding States of the date of each signature, the date of deposit of each instrument of ratification or accession, the date of entry into force of this Convention, and other notices.

6. As soon as this Convention comes into force, it shall be registered by the Depositary Governments pursuant to Article 102 of the Convention on International Civil Aviation (Chicago, 1944).

ARTICLE 16

1. Any Contracting State may denounce this Convention by written notification to the Depositary Governments.

2. Denunciation shall take effect six months following the date on which notification is received by the Depositary Governments.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, being duly authorized thereto by their Governments, have signed this Convention.

Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation—February 4, 1988 *

PROTOCOL FOR THE SUPPRESSION OF UNLAWFUL ACTS OF VIOLENCE AT AIRPORTS SERVING INTERNATIONAL CIVIL AVIATION, SUPPLEMENTARY TO THE CONVENTION FOR THE SUPPRESSION OF UNLAWFUL ACTS AGAINST THE SAFETY OF CIVIL AVIATION, DONE AT MONTREAL ON 23 SEPTEMBER 1971

The States Parties to this Protocol:

Considering that unlawful acts of violence which endanger or are likely to endanger the safety of persons at airports serving international civil aviation or which jeopardize the safe operation of such airports undermine the confidence of the peoples of the world in safety at such airports and disturb the safe and orderly conduct of civil aviation for all States;

Considering that the occurrence of such acts is a matter of grave concern to the international community and that, for the purpose of deterring such acts, there is an urgent need to provide appropriate measures for punishment of offenders;

Considering that it is necessary to adopt provisions supplementary to those of the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, done at Montreal on 23 September 1971, to deal with such unlawful acts of violence at airports serving international civil aviation;

Have agreed as follows:

ARTICLE I

This Protocol supplements the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, done at Montreal on 23 September 1971 (hereinafter referred to as "the Convention"), and, as between the Parties to this Protocol, the Convention and the Protocol shall be read and interpreted together as one single instrument.

ARTICLE II

In Article 1 of the Convention, the following shall be added as new paragraph 1 *bis*:

"1 *bis*. Any person commits an offense if he unlawfully and intentionally using any device, substance or weapon:

(a) performs an act of violence against a person at an airport serving international civil aviation which causes or is likely to cause serious injury or death; or

(b) destroys or seriously damages the facilities of an airport serving international civil aviation or aircraft not in service located thereon or disrupts the services of the airport.

if such an act endangers or is likely to endanger safety at that airport."

2. In paragraph 2(a) of Article 1 of the Convention, the following words shall be inserted after the words "paragraph 1":

---

* Source: Treaty Document 100-19; Entered into force August 6, 1989; for the United States November 18, 1994. No TIAS number. Status information appears at Document M.5.q., following.

"or paragraph 1 *bis*".

ARTICLE III

In Article 5 of the Convention, the following shall be added as paragraph 2 *bis*:

"2 *bis*. Each Contracting State shall likewise take such measures as may be necessary to establish its jurisdiction over the offences mentioned in Article 1, paragraph 1 *bis*, and in Article 1, paragraph 2, in so far as that paragraph relates to those offences, in the case where the alleged offender is present in its territory and it does not extradite him pursuant to Article 8 to the State mentioned in paragraph 1(a) of this Article."

ARTICLE IV

This Protocol shall be open for signature at Montreal on 24 February 1988 by States participating in the International Conference on Air Law held at Montreal from 9 to 24 February 1988. After 1 March 1988, the Protocol shall be open for signature to all States in London, Moscow, Washington and Montreal, until it enters into force in accordance with Article VI.

ARTICLE V

1. This Protocol shall be subject to ratification by the signatory States.

2. Any State which is not a Contracting State to the Convention may ratify this Protocol if at the same time it ratifies or accedes to the Convention in accordance with Article 15 thereof.

3. Instruments of ratification shall be deposited with the Governments of the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland and the United States of America or with the International Civil Aviation Organization, which are hereby designated the Depositaries.

ARTICLE VI

1. As soon as ten of the signatory States have deposited their instruments of ratification of this Protocol, it shall enter into force between them on the thirtieth day after the date of the deposit of the tenth instrument of ratification. It shall enter into force for each State which deposits its instrument of ratification after that date on the thirtieth day after deposit of its instrument of ratification.

2. As soon as this Protocol enters into force, it shall be registered by the Depositaries pursuant to Article 102 of the Charter of the United Nations and pursuant to Article 83 of the Convention on International Civil Aviation (Chicago, 1944).

ARTICLE VII

1. This Protocol shall, after it has entered into force, be open for accession by any non-signatory State.

2. Any State which is not a Contracting State to the Convention may accede to this Protocol if at the same time it ratifies or accedes to the Convention in accordance with Article 15 thereof.

3. Instruments of accession shall be deposited with the Depositaries and accession shall take effect on the thirtieth day after the deposit.

ARTICLE VIII

1. Any Party to this Protocol may denounce it by written notification addressed to the Depositaries.

2. Denunciation shall take effect six months following the date on which notification is received by the Depositaries.

3. Denunciation of this Protocol shall not of itself have the effect of denunciation of the Convention.

4. Denunciation of the Convention by a Contracting State to the Convention as supplemented by this Protocol shall also have the effect of denunciation of this Protocol.

ARTICLE IX

The Depositaries shall promptly inform all signatory and acceding States to this Protocol and all signatory and acceding States to the Convention:

(a) of the date of each signature and the date of deposit of each instrument of ratification of, or accession to, this Protocol, and

(b) of the receipt of any notification of denunciation of this Protocol and the date thereof.

2. The Depositaries shall also notify the States referred to in paragraph 1 of the date on which this Protocol enters into force in accordance with Article VI.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, being duly authorized thereto by their Governments, have signed this protocol.

DONE at Montreal on the twenty-fourth day of February of the year One Thousand Nine Hundred and Eighty-eight, in four originals, each being drawn up in four authentic texts in the English, French, Russian and Spanish languages.

h. OAS Convention to Prevent and Punish the Acts of Terrorism Taking the Form of Crimes Against Persons and Related Extortion That Are of International Significance*

Adopted at the 3d Special Session of the OAS General Assembly, Washington, D.C., January 25–February 2, 1971; Ratification advised by the Senate of the United States of America June 12, 1972; Instrument of ratification deposited in the General Secretariat of the Organization of American States October 20, 1976; Entered into force with respect to the United States of America October 20, 1976

WHEREAS, The defense of freedom and justice and respect for the fundamental rights of the individual that are recognized by the American Declaration of the Rights and Duties of Man and the Universal Declaration of Human Rights are primary duties of states;

The General Assembly of the Organization, in Resolution 4, of June 30, 1970, strongly condemned acts of terrorism, especially the kidnapping of persons and extortion in connection with that crime, which it declared to be serious common crimes;

Criminal acts against persons entitled to special protection under international law are occurring frequently, and those acts are of international significance because of the consequences that may flow from them for relations among states;

It is advisable to adopt general standards that will progressively develop international law as regards cooperation in the prevention and punishment of such acts; and

In the application of those standards the institution of asylum should be maintained and, likewise the principle of nonintervention should not be impaired,

THE MEMBER STATES OF THE ORGANIZATION OF AMERICAN STATES HAVE AGREED UPON THE FOLLOWING ARTICLES:

ARTICLE 1

The contracting states undertake to cooperate among themselves by taking all the measures that they may consider effective, under their own laws, and especially those established in this convention, to prevent and punish acts of terrorism, especially kidnapping, murder, and other assaults against the life or physical integrity of those persons to whom the state has the duty according to international law to give special protection, as well as extortion in connection with those crimes.

*27 UST 3949; TIAS 8413. For states which are parties in the Convention, see Department of State publication, *Treaties in Force* and at Document M.5.1., following.

ARTICLE 2

For the purposes of this convention, kidnapping, murder, and other assaults against the life or personal integrity of those persons to whom the state has the duty to give special protection according to international law, as well as extortion in connection with those crimes, shall be considered common crimes of international significance, regardless of motive.

ARTICLE 3

Persons who have been charged or convicted for any of the crimes referred to in Article 2 of this convention shall be subject to extradition under the provisions of the extradition treaties in force between the parties or, in the case of states that do not make extradition dependent on the existence of a treaty, in accordance with their own laws.

In any case, it is the exclusive responsibility of the state under whose jurisdiction or protection such persons are located to determine the nature of the acts and decide whether the standards of this convention are applicable.

ARTICLE 4

Any person deprived of his freedom through the application of this convention shall enjoy the legal guarantees of due process.

ARTICLE 5

When extradition requested for one of the crimes specified in Article 2 is not in order because the person sought is a national of the requested state, or because of some other legal or constitutional impediment, that state is obliged to submit the case to its competent authorities for prosecution, as if the act had been committed in its territory. The decision of these authorities shall be communicated to the state that requested extradition. In such proceedings, the obligation established in Article 4 shall be respected.

ARTICLE 6

None of the provisions of this convention shall be interpreted so as to impair the right of asylum.

ARTICLE 7

The contracting states undertake to include the crimes referred to in Article 2 of this convention among the punishable acts giving rise to extradition in any treaty on the subject to which they agree among themselves in the future. The contracting states that do not subject extradition to the existence of a treaty with the requesting state shall consider the crimes referred to in Article 2 of this convention as crimes giving rise to extradition, according to the conditions established by the laws of the requested state.

ARTICLE 8

To cooperate in preventing and punishing the crimes contemplated in Article 2 of this convention, the contracting states accept the following obligations:

a. To take all measures within their power, and in conformity with their own laws, to prevent and impede the preparation in their respective territories of the crimes mentioned in Article 2 that are to be carried out in the territory of another contracting state.

b. To exchange information and consider effective administrative measures for the purpose of protecting the persons to whom Article 2 of this convention refers.

c. To guarantee to every person deprived of his freedom through the application of this convention every right to defend himself.

d. To endeavor to have the criminal acts contemplated in this convention included in their penal laws, if not already so included.

e. To comply most expeditiously with the requests for extradition concerning the criminal acts contemplated in this convention.

ARTICLE 9

This convention shall remain open for signature by the member states of the Organization of American States, as well as by any other state that is a member of the United Nations or any of its specialized agencies, or any state that is a party to the Statute of the International Court of Justice, or any other state that may be invited by the General Assembly of the Organization of American States to sign it.

ARTICLE 10

This convention shall be ratified by the signatory states in accordance with their respective constitutional procedures.

ARTICLE 11

The original instrument of this convention, the English, French, Portuguese, and Spanish texts of which are equally authentic, shall be deposited in the General Secretariat of the Organization of American States, which shall send certified copies of the signatory governments for purposes of ratification. The instruments of ratification shall be deposited in the General Secretariat of the Organization of American States, which shall notify the signatory governments of such deposit.

ARTICLE 12

This convention shall enter into force among the states that ratify it when they deposit their respective instruments of ratification.

ARTICLE 13

This convention shall remain in force indefinitely, but any of the contracting states may denounce it. The denunciation shall be transmitted to the General Secretariat of the Organization of American States, which shall notify the other contracting states thereof. One year following the denunciation, the convention shall cease to be in force for the denouncing state, but shall continue to be in force for the other contracting states.

STATEMENT OF PANAMA

The Delegation of Panama states for the record that nothing in this convention shall be interpreted to the effect that the right of asylum implies the right to request asylum from the United States authorities in the Panama Canal Zone, or that there is recognition of the right of the United States to grant asylum or political refuge in that part of the territory of the Republic of Panama that constitutes the Canal Zone.

IN WITNESS WHEREOF, the undersigned plenipotentiaries, having presented their full powers, which have been found to be in due and proper form, sign this convention on behalf of their respective governments, at the city of Washington this second day of February of the year one thousand nine hundred seventy-one.

i. Hague Convention for the Suppression of Unlawful Seizure of Aircraft *

Done at The Hague December 16, 1970; Ratification advised by the Senate September 8, 1971; Ratification by the President of the United States of America September 14, 1971; Ratification of the United States of America deposited at Washington September 14, 1971; Proclaimed by the President of the United States of America October 18, 1971; Entered into force October 14, 1971

CONVENTION FOR THE SUPPRESSION OF UNLAWFUL SEIZURE OF AIRCRAFT

PREAMBLE

THE STATES PARTIES TO THIS CONVENTION

CONSIDERING that unlawful acts of seizure or exercise of control of aircraft in flight jeopardize the safety of persons and property, seriously affect the operation of air services, and undermine the confidence of the peoples of the world in the safety of civil aviation;

CONSIDERING that the occurrence of such acts is a matter of grave concern;

CONSIDERING that, for the purpose of deterring such acts, there is an urgent need to provide appropriate measures for punishment of offenders;

HAVE agreed as follows:

ARTICLE 1

Any person who on board an aircraft in flight:

(a) unlawfully, by force or threat thereof, or by any other form of intimidation, seizes, or exercises control of, that aircraft, or attempts to perform any such act, or

(b) is an accomplice of a person who performs or attempts to perform any such act

commits an offence (hereinafter referred to as "the offence").

ARTICLE 2

Each Contracting State undertakes to make the offence punishable by severe penalties.

ARTICLE 3

1. For the purposes of this Convention, an aircraft is considered to be in flight at any time from the moment when all its external doors are closed following embarkation until the moment when any such door is opened for disembarkation. In the case of a forced

* 22 UST 1641; TIAS 7192. For a list of states which are parties to the Convention, see Department of State publication, *Treaties in Force* and at Document M.5.q. following.

landing, the flight shall be deemed to continue until the competent authorities take over the responsibility for the aircraft and for persons and property on board.

2. This Convention shall not apply to aircraft used in military, customs or police services.

3. This Convention shall apply only if the place of take-off or the place of actual landing of the aircraft on board which the offence is committed is situated outside the territory of the State of registration of that aircraft; it shall be immaterial whether the aircraft is engaged in an international or domestic flight.

4. In the cases mentioned in Article 5, this Convention shall not apply if the place of take-off and the place of actual landing of the aircraft on board which the offence is committed are situated within the territory of the same State where that State is one of those referred to in that Article.

5. Notwithstanding paragraphs 3 and 4 of this Article, Articles 6, 7, 8 and 10 shall apply whatever the place of take-off or the place of actual landing of the aircraft, if the offender or the alleged offender is found in the territory of a State other than the State of registration of that aircraft.

ARTICLE 4

1. Each Contracting State shall take such measures as may be necessary to establish its jurisdiction over the offence and any other act of violence against passengers or crew committed by the alleged offender in connection with the offence, in the following cases:

(a) when the offence is committed on board an aircraft registered in that State;

(b) when the aircraft on board which the offence is committed lands in its territory with the alleged offender still on board;

(c) when the offence is committed on board an aircraft leased without crew to a lessee who has his principal place of business or, if the lessee has no such place of business, his permanent residence, in that State.

2. Each Contracting State shall likewise take such measures as may be necessary to establish its jurisdiction over the offence in the case where the alleged offender is present in its territory and it does not extradite him pursuant to Article 8 to any of the States mentioned in paragraph 1 of this Article.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

ARTICLE 5

The Contracting States which establish joint air transport operating organizations or international operating agencies, which operate aircraft which are subject to joint or international registration shall, by appropriate means, designate for each aircraft the State among them which shall exercise the jurisdiction and have the attributes of the State of registration for the purpose of this Convention and shall give notice thereof to the International Civil Aviation Organization which shall communicate the notice to all States Parties to this Convention.

ARTICLE 6

1. Upon being satisfied that the circumstances so warrant, any Contracting State in the territory of which the offender or the alleged offender is present, shall take him into custody or take other measures to ensure his presence. The custody and other measures shall be as provided in the law of that State but may only be continued for such time as is necessary to enable any criminal or extradition proceedings to be instituted.

2. Such State shall immediately make a preliminary enquiry into the facts.

3. Any person in custody pursuant to paragraph 1 of this Article shall be assisted in communicating immediately with the nearest appropriate representative of the State of which he is a national.

4. When a State, pursuant to this Article, has taken a person into custody, it shall immediately notify the State of registration of the aircraft, the State mentioned in Article 4, paragraph 1(c), the State of nationality of the detained person and, if it considers it advisable, any other interested States of the fact that such person is in custody and of the circumstances which warrant his detention. The State which makes the preliminary enquiry contemplated in paragraph 2 of this Article shall promptly report its findings to the said States and shall indicate whether it intends to exercise jurisdiction.

ARTICLE 7

The Contracting State in the territory of which the alleged offender is found shall, if it does not extradite him, be obliged, without exception whatsoever and whether or not the offence was committed in its territory, to submit the case to its competent authorities for the purpose of prosecution. Those authorities shall take their decision in the same manner as in the case of any ordinary offence of a serious nature under the law of that State.

ARTICLE 8

1. The offence shall be deemed to be included as an extraditable offence in any extradition treaty existing between Contracting States. Contracting States undertake to include the offence as an extraditable offence in every extradition treaty to be concluded between them.

2. If a Contracting State which makes extradition conditional on the existence of a treaty receives a request for extradition from another Contracting State with which it has no extradition treaty, it may at its option consider this Convention as the legal basis for extradition in respect of the offence. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. Contracting States which do not make extradition conditional on the existence of a treaty shall recognize the offence as an extraditable offence between themselves subject to the conditions provided by the law of the requested State.

4. The offence shall be treated, for the purpose of extradition between Contracting States, as if it had been committed not only in the place in which it occurred but also in the territories of the

States required to establish their jurisdiction in accordance with Article 4, paragraph 1.

ARTICLE 9

1. When any of the acts mentioned in Article 1(a) has occurred or is about to occur, Contracting States shall take appropriate measures to restore control of the aircraft to its lawful commander or to preserve his control of the aircraft.

2. In the cases contemplated by the preceding paragraph, any Contracting State in which the aircraft or its passengers or crew are present shall facilitate the continuation of the journey of the passengers and crew as soon as practicable, and shall without delay return the aircraft and its cargo to the persons lawfully entitled to possession.

ARTICLE 10

1. Contracting States shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of the offence and other acts mentioned in Article 4. The law of the State requested shall apply in all cases.

2. The provisions of paragraph 1 of this Article shall not affect obligations under any other treaty, bilateral or multilateral, which governs or will govern, in whole or in part, mutual assistance in criminal matters.

ARTICLE 11

Each Contracting State shall in accordance with its national law report to the Council of the International Civil Aviation Organization as promptly as possible any relevant information in its possession concerning:

(a) the circumstances of the offence;

(b) the action taken pursuant to Article 9;

(c) the measures taken in relation to the offender or the alleged offender, and, in particular, the results of any extradition proceedings or other legal proceedings.

ARTICLE 12

1. Any dispute between two or more Contracting States concerning the interpretation or application of this Convention which cannot be settled through negotiation shall, at the request of one of them, be submitted to arbitration. If within six months from the date of the request for arbitration the Parties are unable to agree on the organization of the arbitration, any one of those Parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.

2. Each State may at the time of signature or ratification of this Convention or accession thereto, declare that it does not consider itself bound by the preceding paragraph. The other Contracting States shall not be bound by the preceding paragraph with respect to any Contracting State having made such a reservation.

3. Any Contracting State having made a reservation in accordance with the preceding paragraph may at any time withdraw this reservation by notification to the Depositary Governments.

ARTICLE 13

1. This Convention shall be open for signature at The Hague on 16 December 1970, by States participating in the International Conference on Air Law held at The Hague from 1 to 16 December 1970 (hereinafter referred to as The Hague Conference). After 31 December 1970, the Convention shall be open to all States for signature in Moscow, London and Washington. Any State which does not sign this Convention before its entry into force in accordance with paragraph 3 of this Article may accede to it at any time.

2. This Convention shall be subject to ratification by the signatory States. Instruments of ratification and instruments of accession shall be deposited with the Governments of the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland, and the United States of America, which are hereby designated the Depositary Governments.

3. This Convention shall enter into force thirty days following the date of the deposit of instruments of ratification by ten States signatory to this Convention which participated in The Hague Conference.

4. For other States, this Convention shall enter into force on the date of entry into force of this Convention in accordance with paragraph 3 of this Article, or thirty days following the date of deposit of their instruments of ratification or accession, whichever is later.

5. The Depositary Governments shall promptly inform all signatory and acceding States of the date of each signature, the date of deposit of each instrument of ratification or accession, the date of entry into force of this Convention, and other notices.

6. As soon as this Convention comes into force, it shall be registered by the Depositary Governments pursuant to Article 102 of the Charter of the United Nations [1] and pursuant to Article 83 of the Convention on International Civil Aviation (Chicago, 1944).[2]

ARTICLE 14

1. Any Contracting State may denounce this Convention by written notification to the Depositary Governments.

2. Denunciation shall take effect six months following the date on which notification is received by the Depositary Governments.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, being duly authorised thereto by their Governments, have signed this Convention.

DONE at The Hague, this sixteenth day of December, one thousand nine hundred and seventy, in three originals, each being drawn up in four authentic texts in the English, French, Russian and Spanish languages.

j. Tokyo Convention on Offenses and Certain Acts Committed on Board Aircraft, September 14, 1963 *

Convention on Offences and Certain Other Acts Committed on Board Aircraft, Tokyo, September 14, 1963*

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the Convention on Offences and Certain Other Acts Committed on Board Aircraft was signed at Tokyo on September 14, 1963;

WHEREAS the text of the Convention, in the English, French and Spanish languages as certified by the Legal Bureau of the International Civil Aviation Organization, is word for word as follows:

CONVENTION ON OFFENCES AND CERTAIN OTHER ACTS COMMITTED ON BOARD AIRCRAFT

CONVENTION ON OFFENCES AND CERTAIN OTHER ACTS COMMITTED ON BOARD AIRCRAFT

THE STATES Parties to this Convention have agreed as follows:

Chapter I—Scope of the Convention

Article 1

1. This Convention shall apply in respect of:

a) offences against penal law;

*Source: 20 UST 2941; TIAS 6768; Ratification advised by the Senate May 13, 1969; Ratified by the President June 30, 1969; Ratificiation deposited September 5, 1969; Proclaimed by President October 1, 1969; Entered into force December 4, 1969.

Note: Status information appears at Document M.5.1., following.

b) acts which, whether or not they are offences, may or do jeopardize the safety of the aircraft or of persons or property therein or which jeopardize good order and discipline on board.

2. Except as provided in Chapter III, this Convention shall apply in respect of offences committed or acts done by a person on board any aircraft registered in a Contracting State, while that aircraft is in flight or on the surface of the high seas or of any other area outside the territory of any State.

3. For the purposes of this Convention, an aircraft is considered to be in flight from the moment when power is applied for the purpose of take-off until the moment when the landing run ends.

4. This Convention shall not apply to aircraft used in military, customs or police services.

Article 2

Without prejudice to the provisions of Article 4 and except when the safety of the aircraft or of persons or property on board so requires, no provision of this Convention shall be interpreted as authorizing or requiring any action in respect of offences against penal laws of a political nature or those based on racial or religious discrimination.

Chapter II—Jurisdiction

Article 3

1. The State of registration of the aircraft is competent to exercise jurisdiction over offences and acts committed on board.

2. Each Contracting State shall take such measures as may be necessary to establish its jurisdiction as the State of registration over offences committed on board aircraft registered in such State.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

Article 4

A Contracting State which is not the State of registration may not interfere with an aircraft in flight in order to exercise its criminal jurisdiction over an offence committed on board except in the following cases:

a) the offence has effect on the territory of such State;

b) the offence has been committed by or against a national or permanent resident of such State;

c) the offence is against the security of such State;

d) the offence consists of a breach of any rules or regulations relating to the flight or manoeuvre of aircraft in force in such State;

e) the exercise of jurisdiction is necessary to ensure the observance of any obligation of such State under a multilateral international agreement.

Chapter III—Powers of the aircraft commander

Article 5

1. The provisions of this Chapter shall not apply to offences and acts committed or about to be committed by a person on board an aircraft in flight in the airspace of the State of registration or over the high seas or any other area outside the territory of any State unless the last point of take-off or the next point of intended landing is situated in a State other than that of registration, or the aircraft subsequently flies in the airspace of a State other than that of registration with such person still on board.

2. Notwithstanding the provisions of Article 1, paragraph 3, an aircraft shall for the purposes of this Chapter, be considered to be in flight at any time from the moment when all its external doors are closed following embarkation until the moment when any such door is opened for disembarkation. In the case of a forced landing, the provisions of this Chapter shall continue to apply with respect to offences and acts committed on board until competent authorities of a State take over the responsibility for the aircraft and for the persons and property on board.

Article 6

1. The aircraft commander may, when he has reasonable grounds to believe that a person has committed, or is about to commit, on board the aircraft, an offence or act contemplated in Article 1, paragraph 1, impose upon such person reasonable measures including restraint which are necessary:

a) to protect the safety of the aircraft or of persons or property therein; or

b) to maintain good order and discipline on board; or

c) to enable him to deliver such person to competent authorities or to disembark him in accordance with the provisions of this Chapter.

2. The aircraft commander may require or authorize the assistance of other crew members and may request or authorize, but not require, the assistance of passengers to restrain any person whom he is entitled to restrain. Any crew member or passenger may also take reasonable preventive measures without such authorization when he has reasonable grounds to believe that such action is immediately necessary to protect the safety of the aircraft, or of persons or property therein.

Article 7

1. Measures of restraint imposed upon a person in accordance with Article 6 shall not be continued beyond any point at which the aircraft lands unless:

a) such point is in the territory of a non-Contracting State and its authorities refuse to permit disembarkation of that person or those measures have been imposed in accordance with Article 6, paragraph 1 c) in order to enable his delivery to competent authorities;

b) the aircraft makes a forced landing and the aircraft commander is unable to deliver that person to competent authorities; or

c) that person agrees to onward carriage under restraint.

2. The aircraft commander shall as soon as practicable, and if possible before landing in the territory of a State with a person on board who has been placed under restraint in accordance with the provisions of Article 6, notify the authorities of such State of the fact that a person on board is under restraint and of the reasons for such restraint.

Article 8

1. The aircraft commander may, in so far as it is necessary for the purpose of subparagraph a) or b) or paragraph 1 of Article 6, disembark in the territory of any State in which the aircraft lands any person who he has reasonable grounds to believe has committed, or is about to commit, on board the aircraft an act contemplated in Article 1, paragraph 1 b).

2. The aircraft commander shall report to the authorities of the State in which he disembarks any person pursuant to this Article, the fact of, and the reasons for, such disembarkation.

Article 9

1. The aircraft commander may deliver to the competent authorities of any Contracting State in the territory of which the aircraft lands any person who he has reasonable grounds to believe has committed on board the aircraft an act which, in his opinion, is a serious offence according to the penal law of the State of registration of the aircraft.

2. The aircraft commander shall as soon as practicable and if possible before landing in the territory of a Contracting State with a person on board whom the aircraft commander intends to deliver in accordance with the preceding paragraph, notify the authorities of such State of his intention to deliver such person and the reasons therefor.

3. The aircraft commander shall furnish the authorities to whom any suspected offender is delivered in accordance with the provisions of this Article with evidence and information which, under the law of the State of registration of the aircraft, are lawfully in his possession.

Article 10

For actions taken in accordance with this Convention, neither the aircraft commander, any other member of the crew, any passenger, the owner or operator

of the aircraft, nor the person on whose behalf the flight was performed shall be held responsible in any proceeding on account of the treatment undergone by the person against whom the actions were taken.

Chapter IV—Unlawful Seizure of Aircraft

Article 11

1. When a person on board has unlawfully committed by force or threat thereof an act of interferencee, seizure or other wrongful exercise of control of an aircraft in flight or when such an act is about to be committed, Contracting States shall take all appropriate measures to restore control of the aircraft to its lawful commander or to preserve his control of the aircraft.

2. In the cases contemplated in the preceding paragraph, the Contracting State in which the aircraft lands shall permit its passengers and crew to continue their journey as soon as practicable, and shall return the aircraft and its cargo to the other persons lawfully entitled to possession.

Chapter V—Powers and Duties of States

Article 12

Any Contracting State shall allow the commander of an aircraft registered in another Contracting State to disembark any person pursuant to Article 8, paragraph 1.

Article 13

1. Any Contracting State shall take delivery of any person whom the aircraft commander delivers pursuant to Article 9, paragraph 1.

2. Upon being satisfied that the circumstances so warrant, any Contracting State shall take custody or other measures to ensure the presence of any person suspected of an act contemplated in Article 11, paragraph 1 and of any person of whom it has taken delivery. The custody and other measures shall be as provided in the law of the State but may only be continued for such time as is reasonably necessary to enable any criminal or extradition proceedings to be instituted.

3. Any person in custody pursuant to the previous paragraph shall be assisted in communication immediately with the nearest appropriate representative of the State of which he is a national.

4. Any Contracting State, to which a person is delivered pursuant to Article 9, paragraph 1, or in whose territory an aircraft lands following the commission of an act contemplated in Article 11, paragraph 1, shall immediately make a preliminary enquiry into the facts.

5. When a State, pursuant to this Article, has taken a person into custody, it shall immediately notify the State of registration of the aircraft and the State of

nationality of the detained person and, if it considers it advisable, any other interested State of the fact that such person is in custody and of the circumstances which warrant his detention. The State which makes the preliminary enquiry contemplated in paragraph 4 of this Article shall promptly report its findings to the said States and shall indicate whether it intends to exercise jurisdiction.

Article 14

1. When any person has been disembarked in accordance with Article 8, paragraph 1, or delivered in accordance with Article 9, paragraph 1, or has disembarked after committing an act contemplated in Article 11, paragraph 1, and when such person cannot or does not desire to continue his journey and the State of landing refuses to admit him, that State may, if the person in question is not a national or permanent resident of that State, return him to the State of which he is a national or permanent resident or to the territory of the State in which he began his journey by air.

2. Neither disembarkation, nor delivery, nor the taking of custody or other measures contemplated in Article 13, paragraph 2, nor return of the person concerned, shall be considered as admission to the territory of the Contracting State concerned for the purpose of its law relating to entry or admission of persons and nothing in this Convention shall affect the law of a Contracting State relating to the expulsion of persons from its territory.

Article 15

1. Without prejudice to Article 14, any person who has been disembarked in accordance with Article 8, paragraph 1, or delivered in accordance with Article 9, paragraph 1, or has disembarked after committing an act contemplated in Article 11, paragraph 1, and who desires to continue his journey shall be at liberty as soon as practicable to proceed to any destination of his choice unless his presence is required by the law of the State of landing for the purpose of extradition or criminal proceedings.

2. Without prejudice to its law as to entry and admission to, and extradition and expulsion from its territory, a Contracting State in whose territory a person has been disembarked in accordance with Article 8, paragraph 1, or delivered in accordance with Article 9, paragraph 1, or has disembarked and is suspected of having committed an act contemplated in Article 11, paragraph 1, shall accord to such person treatment which is no less favourable for his protection and security than that accorded to nationals of such Contracting State in like circumstances.

Chapter VI—Other Provisions

Article 16

1. Offences committed on aircraft registered in a Contracting State shall be treated, for the purpose of extradition, as if they had been committed not only in

the place in which they have occurred but also in the territory of the State of registration of the aircraft.

2. Without prejudice to the provisions of the preceding paragraph, nothing in this Convention shall be deemed to create an obligation to grant extradition.

Article 17

In taking any measures for investigation or arrest or otherwise exercising jurisdiction in connection with any offence committed on board an aircraft the Contracting States shall pay due regard to the safety and other interests of air navigation and shall so act as to avoid unnecessary delay of the aircraft, passengers, crew or cargo.

Article 18

If Contracting States establish joint air transport operating organizations or international operating agencies, which operate aircraft not registered in any one State those States shall, according to the circumstances of the case, designate the State among them which, for the purposes of this Convention, shall be considered as the State of registration and shall give notice thereof to the International Civil Aviation Organization which shall communicate the notice to all States Parties to this Convention.

Chapter VII—Final Clauses

Article 19

Until the date on which this Convention comes into force in accordance with the provisions of Article 21, it shall remain open for signature on behalf of any State which at that date is a Member of the United Nations or of any of the Specialized Agencies.

Article 20

1. This Convention shall be subject to ratification by the signatory States in accordance with their constitutional procedures.

2. The instruments of ratification shall be deposited with the International Civil Aviation Organization.

Article 21

1. As soon as twelve of the signatory States have deposited their instruments of ratification of this Convention, it shall come into force between them on the ninetieth day after the date of the deposit of the twelfth instrument of ratification. It shall come into force for each State ratifying thereafter on the ninetieth day after the deposit of its instrument of ratification.

2. As soon as this Convention comes into force, it shall be registered with the

Secretary-General of the United Nations by the International Civil Aviation Organization.

Article 22

1. This Convention shall, after it has come into force, be open for accession by any State Member of the United Nations or of any of the Specialized Agencies.

2. The accession of a State shall be effected by the deposit of an instrument of accession with the International Civil Aviation Organization and shall take effect on the ninetieth day after the date of such deposit.

Article 23

1. Any Contracting State may denounce this Convention by notification addressed to the International Civil Aviation Organization.

2. Denunciation shall take effect six months after the date of receipt by the International Civil Aviation Organization of the notification of denunciation.

Article 24

1. Any dispute between two or more Contracting States concerning the interpretation or application of this Convention which cannot be settled through negotiation, shall, at the request of one of them, be submitted to arbitration. If within six months from the date of the request for arbitration the Parties are unable to agree on the organization of the arbitration, any one of those Parties may refer the dispute to the International Court of Justice by request in conformity with the Statute of the Court.[1]

2. Each State may at the time of signature or ratification of this Convention or accession thereto, declare that it does not consider itself bound by the preceding paragraph. The other Contracting States shall not be bound by the preceding paragraph with respect to any Contracting State having made such a reservation.

3. Any Contracting State having made a reservation in accordance with the preceding paragraph may at any time withdraw this reservation by notification to the International Civil Aviation Organization.

Article 25

Except as provided in Article 24 no reservation may be made to this Convention.

Article 26

The International Civil Aviation Organization shall give notice to all States Members of the United Nations or of any of the Specialized Agencies:

a) of any signature of this Convention and the date thereof;

---

[1]TS 993; 59 Stat. 1055.

b) of the deposit of any instrument of ratification or accession and the date thereof;

c) of the date on which this Convention comes into force in accordance with Article 21, paragraph 1;

d) of the receipt of any notification of denunciation and the date thereof; and

e) of the receipt of any declaration or notification made under Article 24 and the date thereof.

IN WITNESS WHEREOF the undersigned Plenipotentiaries, having been duly authorized, have signed this Convention.

DONE at Tokyo on the fourteenth day of September One Thousand Nine Hundred and Sixty-three in three authentic texts drawn up in the English, French and Spanish languages.

This Convention shall be deposited with the International Civil Aviation Organization with which, in accordance with Article 19, it shall remain open for signature and the said Organization shall send certified copies thereof to all States Members of the United Nations or of any Specialized Agency.

WHEREAS the Senate of the United States of America by its resolution of May 13, 1969, two-thirds of the Senators present concurring therein, did advise and consent to the ratification of the Convention;

WHEREAS the Convention was duly ratified by the President of the United States of America on June 30, 1969, in pursuance of the advice and consent of the Senate;

WHEREAS it is provided in Article 21, paragraph 1, of the Convention that it shall come into force on the ninetieth day after the deposit of the twelfth instrument of ratification;

WHEREAS instruments of ratification were deposited with the International Civil Aviation Organization as follows: Portugal on November 25, 1964; the Philippines on November 26, 1965; the Republic of China on February 28, 1966; Denmark, Norway, and Sweden on January 17, 1967; Italy on October 18, 1968; the United Kingdom of Great Britain and Northern Ireland on November 29, 1968; Mexico on March 18, 1969; Upper Volta on June 6, 1969; Niger on June 27, 1969; and the United States of America on September 5, 1969;

AND WHEREAS, pursuant to the provisions of Article 21, paragraph 1, the Convention will come into force between the aforementioned States on December 4, 1969;

NOW, THEREFORE, be it known that I, Richard Nixon, President of the United States of America, do hereby proclaim and make public the Convention on Offences and Certain Other Acts Committed on Board Aircraft to the end that the same and every article and clause thereof shall be observed and fulfilled with good faith, on and after December 4, 1969, by the United States of America and by the citizens of the United States of America and all other persons subject to the jurisdiction thereof.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the city of Washington this first day of October in the year of our Lord [SEAL] one thousand nine hundred sixty-nine and of the Independence of the United States of America the one hundred ninety-fourth.

RICHARD NIXON

By the President:
ELLIOT L. RICHARDSON
Acting Secretary of State

2. Treaties Signed by the United States, But Not Yet in Force

International Convention for the Suppression of Terrorist Bombings, December 15, 1997 [1]

The States Parties to this Convention,

Having in mind the purposes and principles of the Charter of the United Nations concerning the maintenance of international peace and security and the promotion of good-neighbourliness and friendly relations and cooperation among States,

Deeply concerned about the worldwide escalation of acts of terrorism in all its forms and manifestations,

Recalling the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations of 24 October 1995, [2]

Recalling also the Declaration on Measures to Eliminate International Terrorism, annexed to General Assembly resolution 49/60 of 9 December 1994, in which, *inter alia*, "the States Members of the United Nations solemnly reaffirm their unequivocal condemnation of all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomever committed, including those which jeopardize the friendly relations among States and peoples and threaten the territorial integrity and security of States",

Noting that the Declaration also encouraged States "to review urgently the scope of the existing international legal provisions on the prevention, repression and elimination of terrorism in all its forms and manifestations, with the aim of ensuring that there is a comprehensive legal framework covering all aspects of the matter",

Recalling further General Assembly resolution 51/210 of 17 December 1996 and the Declaration to Supplement the 1994 Declaration on Measures to Eliminate International Terrorism annexed thereto,

Noting that terrorist attacks by means of explosives or other lethal devices have become increasingly widespread,

Noting also that existing multilateral legal provisions do not adequately address these attacks,

Being convinced of the urgent need to enhance international cooperation between States in devising and adopting effective and practical measures for the prevention of such acts of terrorism and for the prosecution and punishment of their perpetrators,

Considering that the occurrence of such acts is a matter of grave concern to the international community as a whole,

Noting that the activities of military forces of States are governed by rules of international law outside the framework of this

[2] See resolution 50/6. Status information appears at Document M.5.a.2, following.

Convention and that the exclusion of certain actions from the coverage of this Convention does not condone or make lawful otherwise unlawful acts, or preclude prosecution under other laws,

Have agreed as follows:

ARTICLE 1

For the purposes of this Convention:

1. "State or government facility" includes any permanent or temporary facility or conveyance that is used or occupied by representatives of a State, members of Government, the legislature or the judiciary or by officials or employees of a State or any other public authority or entity or by employees or officials of an intergovernmental organization in connection with their official duties.

2. "Infrastructure facility" means any publicly or privately owned facility providing or distributing services for the benefit of the public, such as water, sewage, energy, fuel or communications.

3. "Explosive or other lethal device" means:

(a) An explosive or incendiary weapon or device that is designed, or has the capability, to cause death, serious bodily injury or substantial material damage; or

(b) A weapon or device that is designed, or has the capability, to cause death, serious bodily injury or substantial material damage through the release, dissemination or impact of toxic chemicals, biological agents or toxins or similar substances or radiation or radioactive material.

4. "Military forces of a State" means the armed forces of a State which are organized, trained and equipped under its internal law for the primary purpose of national defence or security and persons acting in support of those armed forces who are under their formal command, control and responsibility.

5. "Place of public use" means those parts of any building, land, street, waterway or other location that are accessible or open to members of the public, whether continuously, periodically or occasionally, and encompasses any commercial, business, cultural, historical, educational, religious, governmental, entertainment, recreational or similar place that is so accessible or open to the public.

6. "Public transportation system" means all facilities, conveyances and instrumentalities, whether publicly or privately owned, that are used in or for publicly available services for the transportation of persons or cargo.

ARTICLE 2

1. Any person commits an offence within the meaning of this Convention if that person unlawfully and intentionally delivers, places, discharges or detonates an explosive or other lethal device in, into or against a place of public use, a State or government facility, a public transportation system or an infrastructure facility:

(a) With the intent to cause death or serious bodily injury; or

(b) With the intent to cause extensive destruction of such a place, facility or system, where such destruction results in or is likely to result in major economic loss.

2. Any person also commits an offence if that person attempts to commit an offence as set forth in paragraph 1 of the present article.

3. Any person also commits an offence if that person:

(a) Participates as an accomplice in an offence as set forth in paragraph 1 or 2 of the present article; or

(b) Organizes or directs others to commit an offence as set forth in paragraph 1 or 2 of the present article; or

(c) In any other way contributes to the commission of one or more offences as set forth in paragraph 1 or 2 of the present article by a group of persons acting with a common purpose; such contribution shall be intentional and either be made with the aim of furthering the general criminal activity or purpose of the group or be made in the knowledge of the intention of the group to commit the offence or offences concerned.

ARTICLE 3

This Convention shall not apply where the offence is committed within a single State, the alleged offender and the victims are nationals of that State, the alleged offender is found in the territory of that State and no other State has a basis under article 6, paragraph 1 or paragraph 2, of this Convention to exercise jurisdiction, except that the provisions of articles 10 to 15 shall, as appropriate, apply in those cases.

ARTICLE 4

Each State Party shall adopt such measures as may be necessary:

(a) To establish as criminal offences under its domestic law the offences set forth in article 2 of this Convention;

(b) To make those offences punishable by appropriate penalties which take into account the grave nature of those offences.

ARTICLE 5

Each State Party shall adopt such measures as may be necessary, including, where appropriate, domestic legislation, to ensure that criminal acts within the scope of this Convention, in particular where they are intended or calculated to provoke a state of terror in the general public or in a group of persons or particular persons, are under no circumstances justifiable by considerations of a political, philosophical, ideological, racial, ethnic, religious or other similar nature and are punished by penalties consistent with their grave nature.

ARTICLE 6

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 2 when:

(a) The offence is committed in the territory of that State; or

(b) The offence is committed on board a vessel flying the flag of that State or an aircraft which is registered under the laws of that State at the time the offence is committed; or

(c) The offence is committed by a national of that State.

2. A State Party may also establish its jurisdiction over any such offence when:

(a) The offence is committed against a national of that State; or

(b) The offence is committed against a State or government facility of that State abroad, including an embassy or other diplomatic or consular premises of that State; or

(c) The offence is committed by a stateless person who has his or her habitual residence in the territory of that State; or

(d) The offence is committed in an attempt to compel that State to do or abstain from doing any act; or

(e) The offence is committed on board an aircraft which is operated by the Government of that State.

3. Upon ratifying, accepting, approving or acceding to this Convention, each State Party shall notify the Secretary-General of the United Nations of the jurisdiction it has established under its domestic law in accordance with paragraph 2 of the present article. Should any change take place, the State Party concerned shall immediately notify the Secretary-General.

4. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 2 in cases where the alleged offender is present in its territory and it does not extradite that person to any of the States Parties which have established their jurisdiction in accordance with paragraph 1 or 2 of the present article.

5. This Convention does not exclude the exercise of any criminal jurisdiction established by a State Party in accordance with its domestic law.

ARTICLE 7

1. Upon receiving information that a person who has committed or who is alleged to have committed an offence as set forth in article 2 may be present in its territory, the State Party concerned shall take such measures as may be necessary under its domestic law to investigate the facts contained in the information.

2. Upon being satisfied that the circumstances so warrant, the State Party in whose territory the offender or alleged offender is present shall take the appropriate measures under its domestic law so as to ensure that person's presence for the purpose of prosecution or extradition.

3. Any person regarding whom the measures referred to in paragraph 2 of the present article are being taken shall be entitled to:

(a) Communicate without delay with the nearest appropriate representative of the State of which that person is a national or which is otherwise entitled to protect that person's rights or, if that person is a stateless person, the State in the territory of which that person habitually resides;

(b) Be visited by a representative of that State;

(c) Be informed of that person's rights under subparagraphs (a) and (b).

4. The rights referred to in paragraph 3 of the present article shall be exercised in conformity with the laws and regulations of the State in the territory of which the offender or alleged offender is present, subject to the provision that the said laws and regulations must enable full effect to be given to the purposes for which the rights accorded under paragraph 3 are intended.

5. The provisions of paragraphs 3 and 4 of the present article shall be without prejudice to the right of any State Party having a claim to jurisdiction in accordance with article 6, subparagraph 1 (c) or 2 (c), to invite the International Committee of the Red Cross to communicate with and visit the alleged offender.

6. When a State Party, pursuant to the present article, has taken a person into custody, it shall immediately notify, directly or through the Secretary-General of the United Nations, the States Parties which have established jurisdiction in accordance with article 6, paragraphs 1 and 2, and, if it considers it advisable, any other interested States Parties, of the fact that that person is in custody and of the circumstances which warrant that person's detention. The State which makes the investigation contemplated in paragraph 1 of the present article shall promptly inform the said States Parties of its findings and shall indicate whether it intends to exercise jurisdiction.

ARTICLE 8

1. The State Party in the territory of which the alleged offender is present shall, in cases to which article 6 applies, if it does not extradite that person, be obliged, without exception whatsoever and whether or not the offence was committed in its territory, to submit the case without undue delay to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State. Those authorities shall take their decision in the same manner as in the case of any other offence of a grave nature under the law of that State.

2. Whenever a State Party is permitted under its domestic law to extradite or otherwise surrender one of its nationals only upon the condition that the person will be returned to that State to serve the sentence imposed as a result of the trial or proceeding for which the extradition or surrender of the person was sought, and this State and the State seeking the extradition of the person agree with this option and other terms they may deem appropriate, such a conditional extradition or surrender shall be sufficient to discharge the obligation set forth in paragraph 1 of the present article.

ARTICLE 9

1. The offences set forth in article 2 shall be deemed to be included as extraditable offences in any extradition treaty existing between any of the States Parties before the entry into force of this Convention. States Parties undertake to include such offences as extraditable offences in every extradition treaty to be subsequently concluded between them.

2. When a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, the requested State Party may, at its option, consider this Convention as a legal basis for extradition in respect of the offences set forth in article 2. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize the offences set forth in article 2 as extraditable offences between themselves, subject to the conditions provided by the law of the requested State.

4. If necessary, the offences set forth in article 2 shall be treated, for the purposes of extradition between States Parties, as if they had been committed not only in the place in which they occurred but also in the territory of the States that have established jurisdiction in accordance with article 6, paragraphs 1 and 2.

5. The provisions of all extradition treaties and arrangements between States Parties with regard to offences set forth in article 2 shall be deemed to be modified as between State Parties to the extent that they are incompatible with this Convention.

ARTICLE 10

1. States Parties shall afford one another the greatest measure of assistance in connection with investigations or criminal or extradition proceedings brought in respect of the offences set forth in article 2, including assistance in obtaining evidence at their disposal necessary for the proceedings.

2. States Parties shall carry out their obligations under paragraph 1 of the present article in conformity with any treaties or other arrangements on mutual legal assistance that may exist between them. In the absence of such treaties or arrangements, States Parties shall afford one another assistance in accordance with their domestic law.

ARTICLE 11

None of the offences set forth in article 2 shall be regarded, for the purposes of extradition or mutual legal assistance, as a political offence or as an offence connected with a political offence or as an offence inspired by political motives. Accordingly, a request for extradition or for mutual legal assistance based on such an offence may not be refused on the sole ground that it concerns a political offence or an offence connected with a political offence or an offence inspired by political motives.

ARTICLE 12

Nothing in this Convention shall be interpreted as imposing an obligation to extradite or to afford mutual legal assistance, if the requested State Party has substantial grounds for believing that the request for extradition for offences set forth in article 2 or for mutual legal assistance with respect to such offences has been made for the purpose of prosecuting or punishing a person on account of that person's race, religion, nationality, ethnic origin or political opinion or that compliance with the request would cause prejudice to that person's position for any of these reasons.

ARTICLE 13

1. A person who is being detained or is serving a sentence in the territory of one State Party whose presence in another State Party is requested for purposes of testimony, identification or otherwise

providing assistance in obtaining evidence for the investigation or prosecution of offences under this Convention may be transferred if the following conditions are met:

(a) The person freely gives his or her informed consent; and

(b) The competent authorities of both States agree, subject to such conditions as those States may deem appropriate.

2. For the purposes of the present article:

(a) The State to which the person is transferred shall have the authority and obligation to keep the person transferred in custody, unless otherwise requested or authorized by the State from which the person was transferred;

(b) The State to which the person is transferred shall without delay implement its obligation to return the person to the custody of the State from which the person was transferred as agreed beforehand, or as otherwise agreed, by the competent authorities of both States;

(c) The State to which the person is transferred shall not require the State from which the person was transferred to initiate extradition proceedings for the return of the person;

(d) The person transferred shall receive credit for service of the sentence being served in the State from which he was transferred for time spent in the custody of the State to which he was transferred.

3. Unless the State Party from which a person is to be transferred in accordance with the present article so agrees, that person, whatever his or her nationality, shall not be prosecuted or detained or subjected to any other restriction of his or her personal liberty in the territory of the State to which that person is transferred in respect of acts or convictions anterior to his or her departure from the territory of the State from which such person was transferred.

ARTICLE 14

Any person who is taken into custody or regarding whom any other measures are taken or proceedings are carried out pursuant to this Convention shall be guaranteed fair treatment, including enjoyment of all rights and guarantees in conformity with the law of the State in the territory of which that person is present and applicable provisions of international law, including international law of human rights.

ARTICLE 15

States Parties shall cooperate in the prevention of the offences set forth in article 2, particularly:

(a) By taking all practicable measures, including, if necessary, adapting their domestic legislation, to prevent and counter preparations in their respective territories for the commission of those offences within or outside their territories, including measures to prohibit in their territories illegal activities of persons, groups and organizations that encourage, instigate, organize, knowingly finance or engage in the perpetration of offences as set forth in article 2;

(b) By exchanging accurate and verified information in accordance with their national law, and coordinating administrative and

other measures taken as appropriate to prevent the commission of offences as set forth in article 2;

(c) Where appropriate, through research and development regarding methods of detection of explosives and other harmful substances that can cause death or bodily injury, consultations on the development of standards for marking explosives in order to identify their origin in post-blast investigations, exchange of information on preventive measures, cooperation and transfer of technology, equipment and related materials.

ARTICLE 16

The State Party where the alleged offender is prosecuted shall, in accordance with its domestic law or applicable procedures, communicate the final outcome of the proceedings to the Secretary-General of the United Nations, who shall transmit the information to the other States Parties.

ARTICLE 17

The States Parties shall carry out their obligations under this Convention in a manner consistent with the principles of sovereign equality and territorial integrity of States and that of non-intervention in the domestic affairs of other States.

ARTICLE 18

Nothing in this Convention entitles a State Party to undertake in the territory of another State Party the exercise of jurisdiction and performance of functions which are exclusively reserved for the authorities of that other State Party by its domestic law.

ARTICLE 19

1. Nothing in this Convention shall affect other rights, obligations and responsibilities of States and individuals under international law, in particular the purposes and principles of the Charter of the United Nations and international humanitarian law.

2. The activities of armed forces during an armed conflict, as those terms are understood under international humanitarian law, which are governed by that law, are not governed by this Convention, and the activities undertaken by military forces of a State in the exercise of their official duties, inasmuch as they are governed by other rules of international law, are not governed by this Convention.

ARTICLE 20

1. Any dispute between two or more States Parties concerning the interpretation or application of this Convention which cannot be settled through negotiation within a reasonable time shall, at the request of one of them, be submitted to arbitration. If, within six months from the date of the request for arbitration, the parties are unable to agree on the organization of the arbitration, any one of those parties may refer the dispute to the International Court of Justice, by application, in conformity with the Statute of the Court.

2. Each State may at the time of signature, ratification, acceptance or approval of this Convention or accession thereto declare that it does not consider itself bound by paragraph 1 of the present article. The other States Parties shall not be bound by paragraph 1 with respect to any State Party which has made such a reservation.

3. Any State which has made a reservation in accordance with paragraph 2 of the present article may at any time withdraw that reservation by notification to the Secretary-General of the United Nations.

ARTICLE 21

1. This Convention shall be open for signature by all States from 12 January 1998 until 31 December 1999 at United Nations Headquarters in New York.

2. This Convention is subject to ratification, acceptance or approval. The instruments of ratification, acceptance or approval shall be deposited with the Secretary-General of the United Nations.

3. This Convention shall be open to accession by any State. The instruments of accession shall be deposited with the Secretary-General of the United Nations.

ARTICLE 22

1. This Convention shall enter into force on the thirtieth day following the date of the deposit of the twenty-second instrument of ratification, acceptance, approval or accession with the Secretary-General of the United Nations.

2. For each State ratifying, accepting, approving or acceding to the Convention after the deposit of the twenty-second instrument of ratification, acceptance, approval or accession, the Convention shall enter into force on the thirtieth day after deposit by such State of its instrument of ratification, acceptance, approval or accession.

ARTICLE 23

1. Any State Party may denounce this Convention by written notification to the Secretary-General of the United Nations.

2. Denunciation shall take effect one year following the date on which notification is received by the Secretary-General of the United Nations.

ARTICLE 24

The original of this Convention, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Secretary-General of the United Nations, who shall send certified copies thereof to all States.

IN WITNESS WHEREOF, the undersigned, being duly authorized thereto by their respective Governments, have signed this Convention, opened for signature at United Nations Headquarters in New York on 12 January 1998.

3. Treaties to Which the United States is not a Party

a. Convention on the Suppression of Terrorism of the South Asian Association for Regional Cooperation (SAARC) (Signed November 4, 1987) *

DOCUMENT NO. 16

CONVENTION ON THE SUPPRESSION OF TERRORISM OF THE SOUTH ASIAN ASSOCIATION FOR REGIONAL COOPERATION (SAARC)

(4 NOVEMBER 1987)

THE MEMBER STATES OF THE SOUTH ASIAN ASSOCIATION FOR REGIONAL COOPERATION (SAARC)

MINDFUL of the principles of cooperation enshrined in the SAARC Charter.

RECALLING that at the Dhaka Summit on December 7–8, 1985, the Heads of State or Government of the member States of the SAARC recognized the seriousness of the problem of terrorism as it affects the security and stability of the region.

ALSO RECALLING the Bangalore Summit Declaration of 17 November 1986, in which the Heads of State or Government of SAARC agreed that cooperation among SAARC States was vital if terrorism was to be prevented and eliminated from the region; unequivocally condemned as acts, methods and practices of terrorism as criminal and deplored their impact on life and property, socio-economic development, political stability, regional and international peace and cooperation; and recognized the importance of the principles laid down in UN Resolution 2625 (XXV) which among others required that each state should refrain from organizing, instigating, assisting or participating in acts of civil strife or terrorist acts in another state or acquiescing in organized activities within its territory directed towards the commission of such acts.

AWARE of the danger posed by the spread of terrorism and its harmful effect on peace, cooperation, friendship and good neighborly relations and which could also jeopardize the sovereignty and territorial integrity of states.

HAVE RESOLVED to take effective measures to ensure that perpetrators of terroristic acts do not escape prosecution, and to this end,

HAVE AGREED as follows:—

---

* Source: Levie, Howard S., *Terrorism: Documents of International and Local Control*, Vol. 10. Dobbs Ferry, N.Y., Oceana Publications, 1996. p. 313–318. (Permission granted by Oceana Publications). Entered into force, August 22, 1988. Status information appears at Document M.5.q., following.

ARTICLE I

Subject to the overall requirements of the law of extradition, conduct constituting any of the following offences, according to the law of the Contracting State, shall be regarded as terroristic and for the purpose of an offence connected with a political offence or as an offence inspired by political motives:—

(a) An offence within the scope of the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at the Hague on December 16, 1970;

(b) An offence within the scope of the Convention for the Suppression of Unlawful acts against the Safety of Civil Aviation, signed at Montreal on September 23, 1971;

(c) An offence within the scope of the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, signed at New York on December 14, 1973;

(d) An offence within the scope of any Convention to which the SAARC member States concerned are parties and which obliges the parties to prosecute or grant extradition;

(e) Murder, manslaughter, assault causing bodily harm, kidnapping, hostage-taking and offences relating to firearms, weapons, explosives and dangerous substances when used as a means to perpetrate indiscriminate violence involving death or serious bodily injury to persons or serious damage to property;

(f) An attempt or conspiracy to commit an offence described in sub-paragraphs (a) to (e), aiding, abetting or counselling the commission of such an offence or participating as an accomplice in the offences so described.

ARTICLE II

For the purpose of extradition between SAARC member States, any two or more Contracting States may, by agreement, decide to include any other serious offence involving violence, which shall not be regarded as a political offence or an offence connected with a political offence or an offence inspired by political motives.

ARTICLE III

1. The provisions of all extradition treaties an arrangements applicable between Contracting States are hereby amended as between Contracting States to the extent that they are incompatible with this Convention.

2. For the purpose of this Convention and to the extent that any offence referred to in Article I or agreed to in terms of Article II is not listed as an extraditable offence in any extradition treaty existing between Contracting States, it shall be deemed to be included as such therein.

3. Contracting States undertake to include these offences as extraditable offences in any future extradition treaty to be concluded between them.

4. If a Contracting State which makes extradition conditional on the existence of a treaty receives a request for extradition from another Contracting State with which it option, consider this Convention as the basis for extradition in respect of the offences set forth

in Article I or agreed to in terms of Article II Extradition shall be subject to the law of the requested State.

5. Contracting States which do not make extradition conditional on the existence of a treaty, shall recognize the offences set forth in Article I or agreed to in terms of Article II as extraditable offences between themselves, subject to the law of the requested State.

ARTICLE IV

A Contracting State in whose territory a person suspected of having committed an offence referred to in Article I or agreed to in terms of Article II is found and which Contracting State, shall, if it does not extradite that person, submit the case without exception and without delay, to its competent authorities shall take their decisions in the same manner as in the case of any offence of a serious nature under the law of that State.

ARTICLE V

For the purpose of Article IV, each Contracting State may take such measure as it deems appropriate, consistent with its national laws, subject to reciprocity, to exercise its jurisdiction in the case of an offence under Article I or agreed to in terms of Article II.

ARTICLE VI

A Contracting State in whose territory an alleged offender is found, shall, upon receiving a request for extradition from another Contracting State, take appropriate measures, subject to its national laws, so as to ensure his presence for purposes of extradition or prosecution. Such measure shall immediately be notified to the requesting State.

ARTICLE VII

Contracting States shall not be obliged to extradite, if it appears to the requested State that by reason of the trivial nature of the case or by reason of the request for the surrender or return of a fugitive offender not being made in good faith or in the interests of justice or for any other reason it is unjust or inexpedient to surrender or return the fugitive offender.

ARTICLE VIII

1. Contracting States shall, subject to their national laws, afford one another the greatest measure of mutual assistance in connection with proceedings brought in respect of the offences referred to in Article I or agreed to in terms of Article II, including the supply of all evidence at their disposal necessary for the proceedings.

2. Contracting States shall cooperate among themselves, to the extent permitted by their national laws, through consultations between appropriate agencies, exchange of information, intelligence and expertise and such other cooperative measures as may be appropriate, with a view to prevention terroristic activities through precautionary measures.

ARTICLE IX

1. The Convention shall be open for signature by the member States of SAARC at the SAARC Secretariat in Kathmandu.

2. It shall be subject to ratification. Instruments of Ratification shall be deposited with the Secretary-General of SAARC.

ARTICLE X

The Convention shall enter into force on the fifteenth day following the date of the deposit of the seventh Instrument of Ratification with the Secretary-General of SAARC.

ARTICLE XI

The Secretary-General of SAARC shall be the depository of this Convention and shall notify member States of signatures to this Convention and all deposits of Instruments of Ratification. The Secretary-General shall transmit certified copies of such Instruments to each member State. The Secretary-General shall also inform member States of the date on which this Convention will have entered into force in accordance with Article X.

IN WITNESS WHEREOF the undersigned, being duly authorized thereto by their respective Governments, have signed this Convention.

b. European Communities: Agreement Concerning the Application of The European Convention on The Suppression of Terrorism Among The Member States.

Done at Dublin, December 4, 1979. [1]

Agreement concerning the application of the European Convention on the Suppression of Terrorism among the Member States of the European Communities:

The Member States of the European Communities, Concerned to strengthen judicial cooperation among these States in the fight against acts of violence; While awaiting the ratification without reservations of the European Convention on the Suppression of Terrorism signed at Strasbourg on 27 January 1977, described below as "the European Convention", by all the Member States of the European Communities, described below as "the Member States",

Have agreed as follows:

ARTICLE 1

This Agreement shall apply in relations between two Member States of which one at least is not a party to the European Convention or is a party to that Convention, but with a reservation.

ARTICLE 2

1. In the relations between two Member States which are parties to the European Convention, but of which one at least has made a reservation to that Convention, the application of the said Convention shall be subject to the provisions of this Agreement.

2. In the relations between two Member States of which one at least is not a party to the European Convention, Articles 1 to 8 and 13 of that Convention shall apply subject to the provisions of this Agreement.

ARTICLE 3

1. Each Member State which has made the reservation permitted under Article 13 of the European Convention shall declare whether, for the application of this Agreement, it intends to make use of this reservation.

2. Each Member State which has signed the European Convention but has not ratified, accepted or approved it, shall declare whether, for the application of this Agreement, it intends to make the reservation permitted under Article 13 of that Convention.

---

[1] Reproduced from the text in the Bulletin of the European Communities Vol. 12, No. 12 [1979], at pp. 90–91. The Ministers of Justice of the nine Member States signed the Agreement on Dec. 4, 1979.

3. Each Member State which has not signed the European Convention may declare that it reserves the right to refuse extradition for an offense listed in Article 1 of that convention which it considers to be a political offence, an offence connected with a political offence or an offence inspired by political motives, on condition that it undertakes to submit the case without exception whatsoever and without undue delay, to its competent authorities for the purpose of prosecution. Those authorities shall take their decision in the same manner as in the case of any offence of a serious nature under the law of that State.

4. For the application of this Agreement, only the reservations provided for in paragraph 3 of this Article and in Article 13 of the European Convention are permitted. Any other reservation is without effect as between the Member States.

5. A Member State which has made a reservation may only claim the application of this Agreement by another State to the extent that the Agreement itself applies to the former State.

ARTICLE 4

1. The declarations provided for under Article 3 may be made by a Member State at the time of signature or when depositing its instrument of ratification, acceptance or approval.

2. Each Member State may at any time, wholly or partially, withdraw a reservation which it has made in pursuance of paragraphs 1, 2 or 3 of Article 3 by means of a declaration addressed to the Department of Foreign Affairs of Ireland. The declaration shall have effect on the day it is received.

3. The Department of Foreign Affairs of Ireland shall communicate the declarations to the other Member States.

ARTICLE 5

Any dispute between Member States concerning the interpretation or application of this Agreement which has not been settled by negotiation shall, at the request of any party to the dispute, be referred to arbitration in accordance with the procedure laid down in Article 10 of the European Convention.

ARTICLE 6

1. This Agreement shall be open for signature by the Member States of the European Communities. It shall be subject to ratification, acceptance or approval. Instruments of ratification, acceptance or approval shall be deposited with the Department of Foreign Affairs of Ireland.

2. The Agreement shall enter into force three months after the deposit of the instruments of ratification, acceptance or approval by all States which are members of the European Communities on the day on which this Agreement is opened for signature.

ARTICLE 7

1. Each Member State may, at the time of signature or when depositing its instrument of ratification, acceptance or approval,

specify the territory or territories to which this Agreement shall apply.

2. Each Member State may, when depositing its instrument of ratification, acceptance or approval or at any later date, by declaration addressed to the Department of Foreign Affairs or Ireland extend this Agreement to any other territory specified in the declaration and for whose international relations it is responsible or on whose behalf it is authorized to give undertakings.

3. Any declaration made in pursuance of the preceding paragraph may, as regards any territory specified in that declaration, be denounced by means of a notification addressed to the Department of Foreign Affairs of Ireland. The denunciation shall have effect immediately or at such later date as may be specified in the notification.

4. The Department of Foreign Affairs of Ireland shall communicate these declarations and notifications to the other Member States.

ARTICLE 8

This Agreement shall cease to have effect on the date when all the Member States become parties without reservation to the European Convention.

Done at Dublin, this 4th day of December 1979 in German, English, Danish, French, Irish, Italian and Dutch, all texts being equally authoritative, in a single copy, which shall remain deposited in the archives of the Department of Foreign Affairs of Ireland, which shall transmit certified copies to each of the Member States.

c. Council of Europe: European Convention on the Suppression of Terrorism, January 27, 1977 *

COUNCIL OF EUROPE: EUROPEAN CONVENTION ON THE SUPPRESSION OF TERRORISM*

The member States of the Council of Europe, signatory hereto,

Considering that the aim of the Council of Europe is to achieve a greater unity between its Members :

Aware of the growing concern caused by the increase in acts of terrorism ;

Wishing to take effective measures to ensure that the perpetrators of such acts do not escape prosecution and punishment ;

Convinced that extradition is a particularly effective measure for achieving this result,

Have agreed as follows :

Article 1

For the purposes of extradition between Contracting States, none of the following offences shall be regarded as a political offence or as an offence connected with a political offence or as an offence inspired by political motives :

a. an offence within the scope of the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970 ;

b. an offence within the scope of the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 23 September 1971 ;

c. a serious offence involving an attack against the life, physical integrity or liberty of internationally protected persons, including diplomatic agents ;

d. an offence involving kidnapping, the taking of a hostage or serious unlawful detention ;

e. an offence involving the use of a bomb, grenade, rocket, automatic firearm or letter or parcel bomb if this use endangers persons ;

f. an attempt to commit any of the foregoing offences or participation as an accomplice of a person who commits or attempts to commit such an offence.

Article 2

1. For the purposes of extradition between Contracting States, a Contracting State may decide not to regard as a political offence or as an offence connected with a political offence or as an offence inspired by political motives a serious offence involving an act of violence, other than one covered by Article 1, against the life, physical integrity or liberty of a person.

---

*Status information appears at Document M.5.q., following.

Table

Name of detection agent	Molecular formula	Molecular weight	Minimum concentration
Ethylene glycol dinitrate (EGDN)	$C_2H_4(NO_3)_2$	152	0.2% by mass
2,3-Dimethyl-2,3-dinitrobutane (DMNB)	$C_6H_{12}(NO_2)_2$	176	0.1% by mass
para-Mononitrotoluene (p-MNT)	$C_7H_7NO_2$	137	0.5% by mass
ortho-Mononitrotoluene (o-MNT)	$C_7H_7NO_2$	137	0.5% by mass

Any explosive which, as a result of its normal formulation, contains any of the designated detection agents at or above the required minimum concentration level shall be deemed to be marked.

2. The same shall apply to a serious offence involving an act against property, other than one covered by Article 1, if the act created a collective danger for persons.

3. The same shall apply to an attempt to commit any of the foregoing offences or participation as an accomplice of a person who commits or attempts to commit such an offence.

Article 3

The provisions of all extradition treaties and arrangements applicable between Contracting States, including the European Convention on Extradition, are modified as between Contracting States to the extent that they are incompatible with this Convention.

Article 4

For the purposes of this Convention and to the extent that any offence mentioned in Article 1 or 2 is not listed as an extraditable offence in any extradition convention or treaty existing between Contracting States, it shall be deemed to be included as such therein.

Article 5

Nothing in this Convention shall be interpreted as imposing an obligation to extradite if the requested State has substantial grounds for believing that the request for extradition for an offence mentioned in Article 1 or 2 has been made for the purpose of prosecuting or punishing a person on account of his race, religion, nationality or political opinion, or that that person's position may be prejudiced for any of these reasons.

Article 6

1. Each Contracting State shall take such measures as may be necessary to establish its jurisdiction over an offence mentioned in Article 1 in the case where the suspected offender is present in its territory and it does not extradite him after receiving a request for extradition from a Contracting State whose jurisdiction is based on a rule of jurisdiction existing equally in the law of the requested State.

2. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

Article 7

A Contracting State in whose territory a person suspected to have committed an offence mentioned in Article 1 is found and which has received a request for extradition under the conditions mentioned in Article 6, paragraph 1, shall, if it does not extradite that person, submit the case, without exception whatsoever and without undue delay, to its competent authorities for the purpose of prosecution. Those authorities shall take their decision in the same manner as in the case of any offence of a serious nature under the law of that State.

Article 8

1. Contracting States shall afford one another the widest measure of mutual assistance in criminal matters in connection with proceedings brought in respect of the offences mentioned in Article 1 or 2. The law of the requested State concerning mutual assistance in criminal matters shall apply in all cases. Nevertheless this assistance may not be refused on the sole

ground that it concerns a political offence or an offence connected with a political offence or an offence inspired by political motives.

2. Nothing in this Convention shall be interpreted as imposing an obligation to afford mutual assistance if the requested State has substantial grounds for believing that the request for mutual assistance in respect of an offence mentioned in Article 1 or 2 has been made for the purpose of prosecuting or punishing a person on account of his race, religion, nationality or political opinion or that that person's position may be prejudiced for any of these reasons.

3. The provisions of all treaties and arrangements concerning mutual assistance in criminal matters applicable between Contracting States, including the European Convention on Mutual Assistance in Criminal Matters, are modified as between Contracting States to the extent that they are incompatible with this Convention.

Article 9

1. The European Committee on Crime Problems of the Council of Europe shall be kept informed regarding the application of this Convention.

2. It shall do whatever is needful to facilitate a friendly settlement of any difficulty which may arise out of its execution.

Article 10

1. Any dispute between Contracting States concerning the interpretation or application of this Convention, which has not been settled in the framework of Article 9, paragraph 2, shall, at the request of any Party to the dispute, be referred to arbitration. Each Party shall nominate an arbitrator and the two arbitrators shall nominate a referee. If any Party has not nominated its arbitrator within the three months following the request for arbitration, he shall be nominated at the request of the other Party by the President of the European Court of Human Rights. If the latter should be a national of one of the Parties to the dispute, this duty shall be carried out by the Vice-President of the Court or, if the Vice-President is a national of one of the Parties to the dispute, by the most senior judge of the Court not being a national of one of the Parties to the dispute. The same procedure shall be observed if the arbitrators cannot agree on the choice of referee.

2. The arbitration tribunal shall lay down its own procedure. Its decisions shall be taken by majority vote. Its award shall be final.

Article 11

1. This Convention shall be open to signature by the member States of the Council of Europe. It shall be subject to ratification, acceptance or approval. Instruments of ratification, acceptance or approval shall be deposited with the Secretary General of the Council of Europe.

2. The Convention shall enter into force three months after the date of the deposit of the third instrument of ratification, acceptance or approval.

3. In respect of a signatory State ratifying, accepting or approving subsequently, the Convention shall come into force three months after the date of the deposit of its instrument of ratification, acceptance or approval.

Article 12

1. Any State may, at the time of signature or when depositing its instrument of ratification, acceptance or approval, specify the territory or territories to which this Convention shall apply.

2. Any State may, when depositing its instrument of ratification, acceptance or approval or at any later date, by declaration addressed to the Secretary General of the Council of Europe, extend this Convention to any other territory or territories specified in the declaration and for whose international relations it is responsible or on whose behalf it is authorised to give undertakings.

3. Any declaration made in pursuance of the preceding paragraph may, in respect of any territory mentioned in such declaration, be withdrawn by means of a notification addressed to the Secretary General of the Council of Europe. Such withdrawal shall take effect immediately or at such later date as may be specified in the notification.

Article 13

1. Any State may, at the time of signature or when depositing its instrument of ratification, acceptance or approval, declare that it reserves the right to refuse extradition in respect of any offence mentioned in Article 1 which it considers to be a political offence, an offence connected with a political offence or an offence inspired by political motives, provided that it undertakes to take into due consideration, when evaluating the character of the offence, any particularly serious aspects of the offence, including :

a. that it created a collective danger to the life, physical integrity or liberty of persons; or

b. that it affected persons foreign to the motives behind it ; or

c. that cruel or vicious means have been used in the commission of the offence.

2. Any State may wholly or partly withdraw a reservation it has made in accordance with the foregoing paragraph by means of a declaration addressed to the Secretary General of the Council of Europe which shall become effective as from the date of its receipt.

3. A State which has made a reservation in accordance with paragraph 1 of this article may not claim the application of Article 1 by any other State ; it may, however, if its reservation is partial or conditional, claim the application of that article in so far as it has itself accepted it.

Article 14

Any Contracting State may denounce this Convention by means of a written notification addressed to the Secretary General of the Council of Europe. Any such denunciation shall take effect immediately or at such later date as may be specified in the notification.

Article 15

This Convention ceases to have effect in respect of any Contracting State which withdraws from or ceases to be a Member of the Council of Europe.

Article 16

The Secretary General of the Council of Europe shall notify the member States of the Council of :

a. any signature ;

b. any deposit of an instrument of ratification, acceptance or approval :

c. any date of entry into force of this Convention in accordance with Article 11 thereof ;

d. any declaration or notification received in pursuance of the provisions of Article 12 ;

e. any reservation made in pursuance of the provisions of Article 13, paragraph 1 ;

f. the withdrawal of any reservation effected in pursuance of the provisions of Article 13, paragraph 2 ;

g. any notification received in pursuance of Article 14 and the date on which denunciation takes effect ;

h. any cessation of the effects of the Convention pursuant to Article 15.

In witness whereof, the undersigned, being duly authorised thereto, have signed this Convention.

Done at Strasbourg, this 27 day of JAN. 1977 in English and in French, both texts being equally authoritative, in a single copy which shall remain deposited in the archives of the Council of Europe. The Secretary General of the Council of Europe shall transmit certified copies to each of the signatory and acceding Parties.

Entered into force on August 4, 1978. Belgium, Cyprus, Denmark, France, the Federal Republic of Germany, Iceland, It Luxembourg, the Netherlands, Norway, Portugal, Switzerland, Turkey, and the United Kingdom have signed the Conventi

The following countries have ratified the Convention:

Austria (August 11, 1977), Denmark (June 27, 1978), Federal Republic of Germany (May 3, 1978), Sweden (September 1977), and the United Kingdom (July 24, 1978)

TERRORISM

44. We reaffirm our determination to combat terrorism in all forms, irrespective of motive. We oppose concessions to terrorist demands and are determined to deny hostage-takers any benefits from their acts. We welcome the growing consensus on adopting effective and legitimate means of countering terrorism.

45. Last year, our Ministers adopted 25 recommendations to combat terrorism. We have received a positive response worldwide, in particular in the U.N. General Assembly. Together we have made substantial progress on many of these recommendations, including: drafting and negotiating a U.N. convention on terrorist bombing; promoting improved international standards for airport security, explosives detection, and vehicle identification; promoting stronger laws and export controls on the manufacture, trade and transport of explosives; initiating a directory of counter-terrorism competencies; inviting all States to promote the use of encryption which may allow, consistent with OECD guidelines, lawful government access to combat terrorism.

46. We have asked our Ministers to intensify diplomatic efforts to ensure that by the year 2000 all States join the international counterterrorism conventions specified in the 1996 U.N. resolution on measures to counter terrorism. We have instructed our officials to take additional steps: to strengthen the capability of hostage negotiation experts and counterterrorism response units; to exchange information on technologies to detect and deter the use of materials of mass destruction in terrorist attacks; to develop means to deter terrorist attacks on electronic and computer infrastructure; to strengthen maritime security; to exchange information on security practices for international special events; and to strengthen and expand international cooperation and consultation.

(2) Progress Report

JUNE 21, 1997 [1]

1. We are committed to a strategy of global integration aimed at fostering international peace and prosperity. To that end, we have continued to build on the decisions we have already taken and agreed to broaden our common efforts. Since our last meeting in Lyon, we have strengthened our cooperation on nonproliferation, anti-personnel landmines, transnational crime, counterterrorism, and UN reform. This Progress Report highlights our achievements in these areas and decisions for further joint action. We will continue to discuss these issues over the course of the coming year and review them again in Birmingham. In keeping with our strong commitment to advance international peace and security, we discussed a full range of political situations which both complemented and supplemented discussions by the Heads of the Eight.

* * * * * * *

COUNTERTERRORISM

26. Terrorist bombings in France, Russia, the United Kingdom, the Middle East and South Asia, the seizure of hostages at the Japanese Ambassador's residence in Lima and other vicious terrorist attacks against innocents during the last year demonstrate that terrorism remains a threat to civil society. The increase in hostage taking by terrorists for the purpose of political extortion or ransom was an additional cause for concern. By making substantial progress in implementing the 25 recommendations of the 1996 Ministerial Conference on Terrorism in Paris, our governments have taken important steps to counter the terrorist threat. For example:

—To strengthen cooperation to combat and eliminate terrorism, the United Nations, at the initiative of our governments, has begun negotiations on a draft Convention on Suppression of Terrorist Bombing. To broaden further such cooperation, we have called on all states to join the international conventions on terrorism specified in the 1996 UN resolution on measures to eliminate international terrorism by the year 2000, and will intensify diplomatic efforts to achieve universal accession and adherence to these conventions.

—To strengthen our capability to investigate terrorist attacks on ground transportation, our experts held a series of technical and security consultations. To assist states in investigating terrorist crimes involving motor vehicles, we have, in inter-

[1] Source: gopher://198.80.36.82:70/OR34125059–34149176-range/archives/1997/pdq.97

national conferences, pressed for a strengthened international regime of vehicle identification numbers.

—To improve the safety of air travelers, we have worked with others in the International Civil Aviation Organization (ICAO) Council to gain adoption of higher security standards, including for explosive detection and associated equipment; ICAO members signaled their intention to seek Council approval of agreed airport security standards and of more consistent and uniform implementation of these standards.

—To prevent terrorists from abusing legitimate rights of asylum, enshrined in international law, we initiated a United Nations General Assembly Declaration serving this purpose.

—To counter, inter alia, the use of strong encryption by terrorists, we have endorsed acceleration of consultations and adoption of the OECD guidelines for cryptography policy and invited all states to develop national policies on encryption, including key management, which may allow, consistent with these guidelines, lawful government access to prevent and investigate acts of terrorism and to find a mechanism to cooperate internationally in implementing such policies.

—To improve the exchange of counterterrorism information, the United Kingdom initiated a Directory of Counterterrorism Competencies among the Eight; and the United States offered to share its counterterrorism forensic data bases through bilateral arrangements with members of the Eight.

—To prevent terrorist access to biological and toxin weapons, the participants of the Fourth Review Conference of the Bacteriological (Biological) and Toxin Weapons Convention (BTWC), at the urging of our governments, recognized the need to ensure, through the review and/or adoption of national measures, the effective fulfillment of their obligations under the Convention in order, inter alia, to exclude the use of biological and toxin weapons for terrorist or criminal activity.

—To promote further cooperation, our governments will compare their domestic legislation related to terrorist fund-raising, and ensure strong domestic laws and controls over the manufacture, trading and transport of explosives.

27. We will continue these efforts in the coming year and extend our counterterrorist cooperation to other critical spheres.

28. To protect our electronic and computer systems from disruption by terrorist attacks, we will share information and methodologies to prevent such attacks and to prevent the use of computer networks for terrorist and criminal purposes.

29. To address the continuing danger from acts of terror using high explosives and other sophisticated technologies, and from potential use by terrorists of materials of mass destruction, our experts will intensify the exchange of information in research and development of counterterrorism technologies.

30. Because of terrorist and other threats to the security of major international events, we will share information and experiences in providing security for such events. The U.S. will hold a conference of experts on this subject in Honolulu in September 1997, in order to exchange information on the most effective security practices for major international special events.

31. To heighten vigilance against acts of terror directed at maritime vessels and their passengers, our governments will encourage the International Maritime Organization (IMO) to strengthen maritime security measures and to improve the awareness and implementation of IMO standards.

32. In response to a growing international desire for closer cooperation, we will strengthen and expand international cooperation and consultation and reach out bilaterally and multilaterally, on counterterrorism issues. In this regard we welcomed the initiative by Japan to convene a Seminar on Counterterrorism for the Asia and Pacific Region in December, 1996.

b. Lyon Summit: Meeting of the G-7 Member Countries

(1) Paris Ministerial Conference on Terrorism: Agreement on 25 Measures

Text of agreement released at the Ministerial Conference on Terrorism, Paris, France, July 30, 1996.[1]

The participants at the Lyon Summit voiced their determination to give absolute priority to the fight against terrorism. They decided to examine and implement, in cooperation with all States, all measures likely to strengthen the capacity of the international community to defeat terrorism. To that end, they called for a meeting of their Foreign Ministers and their Ministers responsible for security to be held without delay to recommend further actions.

In line with this decision, we met in Paris on July 30, 1996.

We undertook a thorough review of new trends in terrorism throughout the world. We noted with deep concern the use in 1996 of powerful explosive weapons by terrorists. We reiterate our fundamental view that there can be no excuse for terrorism. Our discussions underscored our agreement on the need to find solutions that take account of all the factors likely to ensure a lasting settlement of unresolved conflicts and on the need for attending to conditions which could nurture the development of terrorism.

We noted that there is a growing commitment within the international community to condemn terrorism in whatever shape or form, regardless of its motives; to make no concessions to terrorists; and to implement means, consistent with fundamental freedoms and the rule of law, to effectively fight terrorism. We are determined to work with all States, in order to achieve the goal of eliminating terrorism, as affirmed in the Declaration adopted by the United Nations General Assembly in December 1994. To this end, we have, with the course laid down in our Ottawa Declaration of December 12, 1995 and the work that followed the Sharm el-Sheikh Summit, framed a body of practical measures which we are resolved to implement among ourselves.

We also invite all States to adopt these measures so as to impart greater efficiency and coherence to the fight against terrorism. In order to harness our own capacities more tightly we decided to establish among our countries a directory of counter-terrorism competences, skills and expertise to facilitate practical cooperation.

I. Adopting Internal Measures To Prevent Terrorism

IMPROVING COUNTER-TERRORISM COOPERATION AND CAPABILITIES

We call on all States to:

[1] Source: http://www.state.gov/www/global/terrorism/measures.html

1. Strengthen internal cooperation among all government agencies and services concerned with different aspects of counter-terrorism.

2. Expand training of personnel connected with counter-terrorism to prevent all forms of terrorist action, including those utilizing radioactive, chemical, biological or toxic substances.

3. In line with the efforts carried out in the fields of air and maritime transportation and in view of widespread terrorist attacks on modes of mass ground transportation, such as railway, underground and bus transport systems, we recommend that transportation security officials of interested States urgently intensify consultations to improve the capability of governments to prevent, investigate, and respond to terrorist attacks on means of public transportation, and to cooperate with other governments in this respect. These consultations should include standardization of passenger and cargo manifests and adoption of standard means of identifying vehicles to aid investigations of terrorist bombings.

4. Accelerate research and development of methods of detection of explosives and other harmful substances that can cause death or injury, and undertake consultations on the development of standards for marking explosives in order to identify their origin in post-blast investigations, and promote cooperation where appropriate.

DETERRENCE, PROSECUTION AND PUNISHMENT OF TERRORISTS

We call on all States to:

5. When sufficient justification exists according to national laws, investigate the use of organizations, groups or associations, including those with charitable, social, or cultural goals, by terrorists using them as cover for their own activities.

6. Note the risk of terrorists using electronic or wire communications systems and networks to carry out criminal acts and the need to find means, consistent with national law, to prevent such criminality.

7. Adopt effective domestic laws and regulations including export controls to govern manufacture, trading, transport, and export of firearms, explosives, or any device designed to cause violent injury, damage, or destruction in order to prevent their use for terrorists' acts.

8. Take steps within their power to immediately review and amend as necessary their domestic anti-terrorist legislation to ensure, inter alia, that terrorists' acts are established as serious criminal offenses and that the seriousness of terrorists' acts is duly reflected in the sentence served.

9. Bring to justice any person accused of participation in the planning, preparation, or perpetration of terrorist acts or participation in supporting terrorist acts.

10. Refrain from providing any form of support, whether active or passive, to organizations or persons involved in terrorist activity.

11. Accelerate consultations, in appropriate bilateral or multilateral fora, on the use of encryption that allows, when necessary, lawful government access to data and communications in order to, inter alia, prevent or investigate acts of terrorism, while protecting the privacy of legitimate communications.

ASYLUM, BORDERS AND TRAVEL DOCUMENTS

We call on all States to:

12. Take strong measures to prevent the movement of terrorist individuals or groups by strengthening border controls and controls on issuance of identity papers and travel documents, and through measures for preventing counterfeiting, forgery, or use of false papers.

13. While recognizing that political asylum and the admission of refugees are legitimate rights enshrined in international law, make sure that such a right should not be taken advantage of for terrorist purposes and seek additional international means to address the subject of refugees and asylum seekers who plan, fund, or commit terrorist acts.

II. Strengthening International Cooperation To Fight Terrorism

EXPANDING INTERNATIONAL TREATIES AND OTHER ARRANGEMENTS

We call on all States to:

14. Join international conventions and protocols designed to combat terrorism by the year 2000; enact domestic legislation necessary to implement them; affirm or extend the competence of their courts to bring to trial the authors of terrorist acts; and if needed, provide support and assistance to other governments for their purposes.

15. Develop, if necessary, especially by entering into bilateral and multilateral agreements and arrangements, mutual legal assistance procedures aimed at facilitating and speeding investigations and collecting evidence, as well as cooperation between law enforcement agencies in order to prevent and detect terrorist acts.

In cases where a terrorist activity occurs in several countries, States with jurisdiction should coordinate their prosecutions and the use of mutual assistance measures in a strategic manner so as to be more effective in the fight against terrorist groups.

16. Develop extradition agreements and arrangements, as necessary, in order to ensure that those responsible for terrorists acts are brought to justice; and consider the possibility of extradition even in the absence of a treaty.

17. Promote the consideration and development of an international convention on terrorist bombings or other terrorist acts creating collective danger for persons, to the extent that the existing multilateral counter-terrorism conventions do not provide for cooperation in these areas. Examine, also, the necessity and feasibility of supplementing existing international instruments and arrangements to address other terrorist threats and adopt new instruments as needed. Accelerate in the International Civil Aviation Organization (ICAO) consultations to establish uniform and strict international standards for bomb detection and the ongoing consultations to elaborate and adopt additional heightened security measures at airports, and urge early implementation of screening procedures and all other ICAO standards already agreed upon.

18. We recommend to States Parties to the Biological Weapons Convention that they confirm at the forthcoming Review Con-

ference their commitment to ensure, through adoption of national measures, the effective fulfillment of their obligations under the convention to take any necessary measures to prohibit and prevent the development, production, stockpiling, acquisition or retention of such weapons within their territory, under their jurisdiction or under their control anywhere, in order, inter alia, to exclude use of those weapons for terrorist purposes.

TERRORIST FUND RAISING

We call on all States to:

19. Prevent and take steps to counteract, through appropriate domestic measures, the financing of terrorists and terrorist organizations, whether such financing is direct or indirect through organizations which also have, or claim to have charitable, social or cultural goals, or which are also engaged in unlawful activities such as illicit arms trafficking, drug dealing, and racketeering. These domestic measures may include, where appropriate, monitoring and control of cash transfers and bank disclosure procedures.

20. Intensify information exchange concerning international movements of funds sent from one country or received in another country and intended for persons, associations, or groups likely to carry out or support terrorist operations.

21. Consider, where appropriate, adopting regulatory measures in order to prevent movements of funds suspected to be intended for terrorist organizations, without impeding in any way the freedom of legitimate capital movements.

IMPROVING INFORMATION EXCHANGE ON TERRORISM

We call on all States to:

22. Facilitate exchange of information and the transmission of legal requests through establishing central authorities so organized as to provide speedy coordination of requests, it being understood that those central authorities would not be the sole channel for mutual assistance among states. Direct exchange of information among competent agencies should be encouraged.

23. Intensify exchange of basic information concerning persons or organizations suspected of terrorist-linked activities, in particular on their structure, their "modus operandi" and their communications systems in order to prevent terrorist actions.

24. Intensify exchange of operation information, especially as regards:

- the actions and movements of persons or groups suspected of belonging to or being connected with terrorist networks.
- travel documents suspected of being forgeries or falsified.
- traffic in arms, explosives, or sensitive materials.
- the use of communications technologies by terrorist groups.
- the threat of new type of terrorist activities including those using chemical, biological, or nuclear materials and toxic substances.

25. Find ways of accelerating these exchanges of information and making them more direct, while at the same time preserving their

confidentiality in conformity with the laws and regulations of the State supplying the information.

* * * * * * *

We commit ourselves to ensure implementation of these measures without delay. To this end, we call upon our appropriate experts to hold the necessary meetings very rapidly.

We ask our experts on terrorism to meet before the end of the year to assess the progress of the work undertaken to implement these measures.

(2) G-7 Declaration on Terrorism

Released at the G-7 Economic Summit, Lyon, France, June 27, 1996 [1]

In the aftermath of the cowardly attack in Dhahran, which took the lives of a large number of American citizens and injured hundreds of innocent people, we, the member countries of the G-7, condemn this barbarous and unjustifiable act and express our wholehearted solidarity with the United States and Saudi Arabia in their terrible ordeal. We pay tribute to the memory of the victims and convey our deepest sympathy to their families, as well as to the American and Saudi peoples. We also condemn other recent terrorist outrages.

These tragedies strengthen us in our conviction that terrorism is a major challenge to all our societies and states today. We reaffirm our absolute condemnation of terrorism in all its forms and manifestations, regardless of its perpetrators or motives. Terrorism is a heinous crime, and there must be no excuse or exception in bringing its perpetrators to justice.

We proclaim our common resolve to unite our efforts and our determination to fight terrorism by all legal means. In keeping with the guidelines for action adopted by the Eight in Ottawa, we strongly urge all states to deny all support to terrorists. We rededicate ourselves and invite others to associate with our efforts in order to thwart the activities of terrorists and their supporters, including fund-raising, the planning of terrorist acts, procurement of weapons, calling for violence, and incitements to commit terrorist acts. Special attention should be paid to the threat of utilization of nuclear, biological, and chemical materials, as well as toxic substances, for terrorist purposes.

We consider the fight against terrorism to be our absolute priority, and reiterate the necessity for all states to adhere to the relevant international conventions. When implemented, many of the recommendations the Eight will be considering tomorrow to deal with crime will better equip our law enforcement authorities to work together to combat terrorism. And we are resolved to do more: to examine and implement, in cooperation with all states, all measures liable to strengthen the capacity of the international community to defeat terrorism. To that end, we have decided that a ministerial meeting to consider and recommend further actions will be held in Paris, as early as the month of July.

[1] Source: Released at the Lyon Summit, 27 June 1996 and provided by the University of Toronto Library. (http://utl.1library.utoronto.ca/disk1/www/documents/g7/96terror.htm)

c. Ottawa Ministerial Declaration on Countering Terrorism December 12, 1995 [1]

PREAMBLE

1. We met in Ottawa on December 12, as agreed upon at the Halifax Summit in June 1995 by the Heads of State and Government of the seven most industrialized nations and Russia, to discuss specific, cooperative measures to deter, prevent and investigate terrorist acts. We fulfilled our mandate and are united in our determination to work together with the entire international community to combat terrorism in all its forms.

G–7/P–8 HISTORY

2. Since 1978, the G–7 partners have worked together to counter terrorism. Their cooperation has been instrumental in obtaining agreements in many fora on issues such as transportation security and the exchange of information. There has also been extensive work by the G–7, over the course of the last two decades on ensuring that loopholes in national legislation are closed, and that countries act in concert in denying arms and free movement to terrorists. These efforts have shown leadership to the international community as a whole. Russia's experience and participation is of great assistance in supporting the efforts of Summit partners in combating terrorism.

REVIEW OF RECENT TRENDS

3. We began by exchanging views on recent major terrorist events including the Tokyo subway attacks, the bombing in Oklahoma City, the hostage taking in Budennovsk, major terrorist attacks against the Middle East peace process (including the assassination of Yitzhak Rabin), the persistent attacks by the ETA, the bombing campaign in France, and the bombings in Riyadh and Islamabad. These and other events point to a number of trends including an upsurge in domestic terrorism, an increase in hostage taking and indiscriminate violence by religious extremists and apocalyptic groups which practice terrorism, as well as continuing examples of attacks on tourists and the export regional conflicts. These developments have been accompanied by a continuing use of conventional weapons, in particular those designed for massive explosions, and by a new and worrying use of non-conventional, for example chemical, weapons. We call for political groups to use dialogue, exercise tolerance and repudiate the use of terrorism. We offer dialogue to those who reject violence and respect the law. Those who attempt to achieve their aims through violence will,

[1] Source: http://www.state.gov/www/global/terrorism/ottawa—declaration.html

however, meet with our strongest resolve and be held accountable for their criminal acts.

IMPROVED INTERNATIONAL COOPERATION

4. We are determined to work together in the international community, with international organizations, institutions and other fora to fight terrorism. We will work in all organizations of the UN family, the General Assembly and all other appropriate fora to identify and adopt practical measures to fight terrorism, including where necessary legal instruments. We will work bilaterally and multilaterally, taking full advantage of such organizations as Interpol, to improve measures against terrorism. We will propose and support information sharing with and among members of other regional organizations. We welcome, for example, the efforts made in the context of the recent sub-regional meeting in Buenos Aires, and the prospects for the OAS Ministerial meetings on terrorism.

INTERNATIONAL AND DOMESTIC LEGAL FRAMEWORK

5. We call on all states to strive to become party to the existing international conventions concerned with countering terrorism and urgently bring their domestic legislation into harmony with those conventions by the year 2000. It is our view that strong laws, effectively enforced, continue to be a convincing deterrent in combating terrorism. We call upon all States that assist terrorists to renounce terrorism and to deny financial support. All perpetrators of terrorist acts must be brought to swift justice. Stronger law enforcement cooperation and mutual legal assistant are among the measures best suited to deter and prevent international terrorist acts and punish terrorists. We have decided to have our experts continue to explore new ways of enhancing the current international legal regime, in particular to address new forms of terrorism. To avoid terrorists escaping punishment we call on all States to strengthen their domestic, bilateral or international extradition arrangements and to consider adoption of additional instruments.

EXCHANGE OF EXPERTISE AND INFORMATION TO PREVENT TERRORIST ACTS

6. One of the more effective tools we have to counter terrorism is sharing information among ourselves and with others. Terrorists operate secretively. Intelligence concerning terrorists, their movements, their support and their weapons are essential for countering their activities and enforcing laws against terrorism. Increasing the sharing of expertise, information, and intelligence between our countries and among the international community, is essential for countering terrorism. With an aim to preventing terrorist acts we propose to:

- share our technical knowledge, intelligence, forecasts of threats and activities and information on different tactics and methods, means, of terrorists through closer bilateral and other forms of co-operation among police and security agencies and other relevant authorities;

- share more widely information, including consular travel advisories, on countries where there is a threat to our citizens abroad;
- share expertise on the protection of public buildings and facilities;
- share information on fanatical and apocalyptic terrorist groups;
- increase counter-terrorism training and assistance;
- improve procedures for the tracing and tracking of suspected terrorists; and
- enhance information sharing on major terrorist incidents in a timely fashion.

TAKING OF HOSTAGES

7. We noted the sinister increase in the taking of hostages by terrorists and other criminals. We call on all states that have not already done so to adhere to the 1979 International Convention Against the Taking of Hostages. We call on all States to condemn the practice of hostage-taking; to refuse to make substantive concessions to hostage-takers; to work for the safety of those taken hostage; to deny to hostage takers any benefits from their criminal acts; to work tirelessly together to resolve ongoing hostage cases, and to bring to justice those responsible.

NEW THREATS RELATED TO WEAPONS OF MASS DESTRUCTION

8. We intend to strengthen measures to prevent the use of weapons designed to induce high casualty rates and encourage others to do likewise. We also noted with deep concern the chemical gas attacks on the Tokyo subway system which caused deaths and widespread injury. We urge all Governments to take the strongest measures to prevent toxic chemicals and biological agents from getting into the hands of terrorists and to adopt appropriate national legislation and controls in line with the Chemical Weapons and Biological and Toxin Weapons Conventions. We invite countries who have already taken such measures to share their expertise with those who wish to take such measures. We have agreed to exchange information among ourselves and with others. We will implement measures to deter and respond to chemical and biological terrorist threats and incidents and to investigate and prevent the illicit production, trafficking, possession and use of such substances. We encourage other governments to join in this effort. We ask our experts in this area to meet and further pursue development of these measures. We have asked the experts concerned with the preparation of the Moscow Summit on Nuclear Safety and Security to be held in spring of 1996 to also consider measures, taking into account the 1980 Convention on the Physical Protection of Nuclear Materiel, to prevent nuclear materiel falling into the hands of terrorists.

PREVENTING THE MOVEMENT OF TERRORISTS

9. Effective entry controls, assisted by new and emerging technologies, will help prevent the spread of terrorism. We, therefore, propose to cooperate further in the development of travel documents which are more difficult to falsify and to increase joint train-

ing and information sharing among ourselves, and with others, on fraudulent travel document detection and immigration control. In this regard we recognized the importance of the ICAO standards being adopted and urge all countries to implement them. We also call on all States to enforce sanctions against the use of false and fraudulent documents. Within the framework of international law and in our own jurisdictions we will deny entry to all those, including diplomats, who, on the basis of available information, are involved in terrorist activities and thereby pose a threat to national security.

TRANSPORTATION SECURITY

10. We have agreed to work together and with others to continue to improve security of all forms of transportation around the world. To date there are seven international conventions and treaties related to transportation security which have had a marked impact on maritime and aviation security. We encourage the current work of the International Civil Aviation Organization (ICAO) and the International Maritime Organization (IMO) to develop common standards for security procedures to boost security in the aviation and maritime fields. Their resolutions must be implemented by the entire international community with an aim of fighting international mechanisms in the fight against terrorism.

PUBLIC FACILITIES

11. Terrorists take advantage of the openness and vulnerability of public facilities, particularly in free societies. As anti-terrorist measures have become more successful, terrorists are looking to new targets of opportunity in their attacks. In order to reduce the risks to our citizens, we pledge to cooperate further and to share information and experiences concerning the protection and securing of possible targets such as transport systems, information systems, public utilities, and public buildings including diplomatic premises.

TERRORISM FUNDING

12. We have agreed to pursue measures aimed at depriving terrorists of their sources of finance. We encourage all States to take action in cooperation with other States, to prevent terrorists from raising funds that in any way support terrorist activities and explore the means of tracking and freezing assets used by terrorist groups.

CONCLUSION AND GUIDELINES FOR ACTION

13. We are determined as a group to continue to provide leadership on this issue to the international community, using bilateral and multilateral measures and agreements to counter terrorism. We will continue to develop specific, cooperative measures to deter, prevent, and investigate terrorist acts and to bring terrorist to justice. We will take action to implement the guidelines set forth in this declaration and summarized as follows:

- calling on all states to strive to join existing international treaties on terrorism by the year 2000;

- promoting mutual legal assistance and extradition;
- strengthening the sharing of intelligence and information on terrorism;
- pursuing measures to prevent terrorist use of nuclear, chemical and biological materials;
- urging all States to refuse to make substantive concessions to hostage takers and to ensure those responsible are brought to justice;
- inhibiting the movement of terrorists and enhancing measures to prevent the falsification of documents;
- strengthening protection of aviation, maritime and other transportation systems against terrorism;
- countering terrorist attacks against public facilities and infrastructures; depriving terrorists of funds; and
- increasing counter-terrorism training and assistance.

d. Halifax: Chairman's Statement, June 17, 1995 [1]

Partial text of statement issued at Halifax, Nova Scotia, June 17, 1995.

1. In this 50th anniversary of the end of the Second World War and the birth of the United Nations, we discussed in a spirit of cooperation political issues of global importance. Noting with satisfaction what has been achieved through reconciliation and cooperation, we confirmed our desire to work together ever more closely in finding solutions.

COMMITMENT TO MULTILATERAL ENGAGEMENT

2. We reaffirm our commitment to the UN, whose Charter lays down the fundamental principles for an international order based on peace and security, sustainable development, and respect for human rights. We support measures to strengthen the UN, which is called upon to play an ever more important role in the post Cold War period, and will work with other Member States to build, through concrete reforms of the institutions, a more effective and efficient organization to meet the challenges of the next half-century. We call upon Member States to meet their financial obligations and urge early agreement on reform of the system of assessment.

3. The United Nations must be able to act more quickly and effectively to address threats to international peace and security. We, for our part, are determined to coordinate more closely our individual efforts to assist in the prevention, management and resolution of conflicts. A high priority should be placed on the early warning of crises, political mediation and, in accordance with realistic mandates, the rapid deployment of UN civilian and military personnel, including peacekeepers, to areas of conflict. We encourage further efforts to improve operational planning and procedures for peacekeeping missions as well as to modernize command and control equipment, logistical arrangements and facilities. We also stress the need for measures to ensure the security of UN personnel, including the early entry into force of the recently-adopted UN Convention for the Safety of United Nations and Associated Personnel. We welcome the growing role of regional organizations and arrangements in building stability and security, in the prevention and management of conflicts, and we attach special importance to reinforcing cooperation between such organizations and the United Nations.

[1] Source: U.S. Department of State: G–7 Economic Summit Page (http://www.state.gov/www/issues/economic/chairman.html).

ARMS CONTROL AND DISARMAMENT

4. We welcome the indefinite extension of the Nuclear Non-Proliferation Treaty and the commitment of States party to the universalisation of the Treaty as well as their decisions to strengthen the review process and adopt a set of principles and objectives for non-proliferation and disarmament. The entry into force of START I is a major landmark in the process of nuclear arms control, which was greatly helped by the decision of Ukraine to accede to the NPT. We now look forward to the early ratification of START II. We support the safe and secure dismantlement of the nuclear weapons eliminated under START I and we welcome the work of the United States and Russia on measures that the fissile material from these weapons is rendered unusable for weapons purposes. The disposal of weapons-grade plutonium deserves particular attention and we encourage its further study.

5. We are encouraged by the growing international recognition of the need to complete without delay universal, comprehensive and verifiable treaties to ban nuclear weapons tests and to cut off the production of fissile material for nuclear weapons and other nuclear explosive devices. Recognizing the continuing dangers posed worldwide by criminal diversion and illicit trafficking of nuclear materials, and drawing on the decisions taken in Naples and the practical work undertaken by our experts since then, we resolve to work together to strengthen systems of control, accounting and physical security for nuclear materials; to expand our cooperation in the area of customs, law enforcement and intelligence and to strengthen through venues such as the IAEA and INTERPOL the international community's ability to combat nuclear theft and smuggling. We emphasize the importance of bringing the Chemical Weapons Convention into force at the earliest possible date, and call for rapid progress in developing verification systems for the Biological and Toxin Weapons Convention.

6. The excessive transfer of conventional arms, in particular to areas of conflict, is one of our main preoccupations. We are appalled by the continuing injuries to civilians caused by anti-personnel landmines. We urge States to become party to the 1980 Conventional Weapons Convention and to participate in its review conference this fall in an effort to strengthen multilateral controls over anti-personnel landmines. We urge all countries to support full implementation of the UN Register of Conventional Arms, and note that Article 26 of the UN Charter calls for "the least diversion for armaments of the world's human and economic resources". Regional organizations can help promote transparency and confidence-building measures that reduce excessive stockpiling of conventional weapons. We shall work with others for effective and responsible export controls on arms and sensitive dual-use goods and technologies.

PROMOTING NEW APPROACHES

* * * * * * *

9. We restate our resolve to defeat all forms of terrorism. Following recent outrages, we agree to share more intensively our experiences of, and lessons learned from, major terrorist incidents,

and to strengthen our cooperation in all areas of counter-terrorism, including research and technology. We call upon all States that assist terrorists to renounce terrorism and to deny financial support, the use of their territory or any other means of support to terrorist organizations. We attach particular importance to measures to impede the ability of terrorist organizations to raise funds, and urge other governments to strenuously enforce laws against terrorist activity and join existing treaties and conventions against terrorism. In pursuit of these shared aims, we charge our terrorism experts group to report to a ministerial level meeting on specific, cooperative measures to deter, prevent, and investigate terrorists acts. These sessions should be held prior to our next meeting.

* * * * * * *

MIDDLE EAST AND AFRICA

* * * * * * *

19. We call upon the Government of Iran to participate constructively in regional and world affairs, and to desist from supporting radical groups that seek to destroy the Middle East Peace Process and destabilize the region. We also call on the Iranian Government to reject terrorism and, in particular, to withdraw its support from the continuing threats to the life of Mr. Salman Rushdie and others associated with his work. We call on all States to avoid any collaboration with Iran which might contribute to the acquisition of a nuclear weapons capability.

20. We reiterate our resolve to enforce full implementation of each and every relevant UN Security Council resolution concerning Iraq and Libya until they are complied with, and recall that such implementation would entail the reassessment of sanctions. We urge Iraq to reconsider its rejection of UN Security Council Resolution 986 which would permit the sale of oil and purchase of humanitarian goods.

* * * * * * *

AMERICAS

29. We encourage implementation by the States of the Americas of the Miami Summit Plan of Action to strengthen democratic institutions, eliminate the threat of terrorism, eradicate poverty and discrimination, conserve their natural environment, and negotiate the Free Trade Area of the Americas. We support the Government of Mexico's bold steps towards political reform and dialogue. We commend the efforts of the Guarantor Group of the Rio Protocol to help Peru and Ecuador achieve a permanent peace between them. We support international cooperation in Haiti's economic and democratic development, and look forward to free and open legislative elections scheduled for June 25.

Thank you.

e. Naples: Chairman's Statement (excerpt), July 10, 1994 [1]

* * * * * * *

4. We have welcomed the Israeli-Palestinian Declaration of Principles and the signing of the Gaza-Jericho agreement as a first step in its implementation. We recognize the need to speed up the delivery of assistance and create the circumstances for a real improvement of living conditions. Progress on the other bilateral tracks and in the multilateral negotiations is now essential in order to achieve a lasting and comprehensive settlement of the Arab-Israeli dispute and a wider process of peace and cooperation in the whole Middle East/ Mediterranean region. We call upon the League of Arab States to end their boycott of Israel. We support the efforts of reconstruction of a prosperous and independent Lebanon.

We reiterate our resolve to enforce full implementation of each and every relevant UN Security Council resolution concerning Iraq and Libya until they are complied with, and recall that such implementation would entail the reassessment of sanctions.

We call upon the government of Iran to participate constructively in international efforts for peace and stability and to modify its behavior contrary to these objectives, inter alia with regard to terrorism.

We support the Algerian government's decision to move forward on economic reforms, which must be pursued with determination, while urging Algerian leaders to continue a political dialogue with all elements of Algerian society rejecting violence and terrorism. We condemn the recent massacre of Italian sailors and other victims, and express our condolences to their families.

We call upon the government of the Republic of Yemen to resolve political differences within the country through dialogue and by peaceful means, and to ensure that the humanitarian situation, particularly in and around Aden, is addressed. International obligations, including sovereignty and territorial integrity, should be respected.

* * * * * * *

10. We condemn terrorism in all its forms, especially when state-sponsored, and reaffirm our resolve to cooperate in combating it with determination. We call upon all countries involved to renounce support for terrorism, including financial support, and to take effective action to deny the use of their territory to terrorist organization.

We stress that all organized crime and narcotics trafficking are a threat to political as well as economic and social life, and we call for increased international cooperation. We have agreed that the proposed world ministerial conference to be held in October in

[1] Source: University of Toronto Library and the G8 Research Group Web site at http://www.library.utoronto.ca/g7/summit/1994naples/chairman.html

Naples at the initiative of the Italian government will be a most important occasion to advance such cooperation.

* * * * * * *

f. Tokyo: Political Declaration (excerpt), July 8, 1993 [1]

* * * * * * *

4. The protection of human rights is the obligation of all nations, as affirmed at the World Conference on Human Rights in Vienna. The increased number of refugees and displaced persons as well as the problems of uncontrolled migration and difficulties confronted by national minorities require urgent attention by the international community, and should be tackled taking account of their root causes. Terrorism, particularly when sponsored by states, poses a grave danger which we will oppose energetically.

g. Munich: Chairman's Statement (excerpt), July 7, 1992 [1]

TERRORISM

We condemn terrorism in all its forms and reaffirm our resolve to cooperate in combatting it. We call upon all countries involved to renounce support for terrorism, including financial support, and to take effective action to deny the use of their territory to terrorist organizations.

We denounce equally strongly the taking of hostages. We welcome the recent release of two hostages in Lebanon. We call again for the immediate and unconditional release of all hostages who may still be held and for an accounting for all persons taken hostage who may have died while being held.

We underline the need for Libya to comply with [UN] Security Council Resolutions 731 and 748 promptly and fully. We call upon all countries to enforce rigorously the sanctions against Libya so that those responsible for the bombings of PA [Pan Am flight] 103 and UTA [flight] 772 may be brought to justice and Libya's support for terrorism is ended.

We support the measures of the International Civil Aviation Organization aimed at increased security in Civil Aviation. We consider the Convention on the Marking of Plastic Explosives for the Purposes of Detection to be a significant step towards this aim.

[1] Source: http://www.g8kyushu-okinawa.go.jp/e/past__summit/18/e18__d.html.

h. Houston: Statement on Terrorism, July 10, 1990 [1]

HOUSTON ECONOMIC SUMMIT STATEMENT ON TRANSNATIONAL ISSUES, JULY 10, 1990

Terrorism

We, the Heads of State or Government, reaffirm our condemnation of terrorism in all its forms, our commitment to make no concessions to terrorists or their sponsors, and our resolve to continue to cooperate in efforts to combat terrorism. We demand that those governments which provide support to terrorists end such support immediately. We are determined not to allow terrorists to remain unpunished, but to see them brought to justice in accordance with international law and national legislation.

We welcome the recent release of several hostages, but remain deeply concerned that hostages are still being held, some for more than five years. Their ordeal and that of their families must end. We call for the immediate, unconditional and safe release of all hostages and for an accounting of all persons taken hostage who may have died while being held. We call on those with influence over hostage-takers to use their influence to this end.

We note with deep concern the continuing threat presented to civil aviation by terrorist groups, as demonstrated by such outrages as the sabotage of civil aircraft over Lockerbie, Scotland on December 21, 1988, above Niger on September 19, 1989, and over Colombia on November 27, 1989. We reiterate our determination to fight terrorists assaults against civil aviation.

Accordingly, we will continue our cooperation to negotiate a convention requiring the introduction of additives into plastic explosives to aid in their detection. We pledge to work to strengthen international civil aviation security standards. Consistent with this objective, we note the importance of making available training and technical assistance to other nations. We support initiatives undertaken through the International Civil Aviation Organization (ICAO) regarding this issue. We will work together with ICAO to expand such assistance.

i. Toronto: Statement on International Terrorism June 20, 1988 [1]

TORONTO ECONOMIC SUMMIT: POLITICAL DECLARATION, JUNE 20, 1988

Terrorism

* * * * * * *

11. We strongly reaffirm our condemnation of terrorism in all its forms, including the taking of hostages. We renew our commitment to policies and measures agreed at previous Summits, in particular those against state-sponsored terrorism.

12. We strongly condemn recent threats to air security, in particular the destruction of a Korean airliner and the hijacking of a Kuwaiti airliner. We recall the principle affirmed in previous declarations that terrorists must not go unpunished. We appeal to all countries who are not party to the international conventions on civil aviation security, in particular the Hague Convention, to accede to those conventions.

13. We express support for work currently under way in the International Civil Aviation Organization aimed at strengthening international protection against hijackings. We welcome the most recent declaration adopted by the ICAO Council which endorses the principle that hijacked aircraft should not be allowed to take off once they have landed, except in circumstances as specified in the ICAO declaration.

14. We welcome the adoption this year in Montreal and Rome of two international agreements on aviation and maritime security to enhance the safety of travellers.

15. We affirm our determination to continue the fight against terrorism through the application of rule of law, the policy of no concessions to terrorists and their sponsors, and international cooperation.

[1] From *Weekly Compilation of Presidential Documents*, Monday, June 27, 1988, Vol. 24, No. 25.

j. Venice: Statement on Terrorism, June 9, 1987 [1]

TERRORISM

We, the heads of state or government of seven major democracies and the representatives of the European Community assembled here in Venice, profoundly aware of our peoples' concern at the threat posed by terrorism:

Reaffirm our commitment to the statements on terrorism made at previous summits, in Bonn, Venice, Ottawa, London and Tokyo:

Resolutely condemn all forms of terrorism, including aircraft hijackings and hostage-taking, and reiterate our belief that whatever its motives, terrorism has no justification;

Confirm the commitment of each of us to the principle of making no concessions to terrorists or their sponsors;

Remain resolved to apply, in respect of any state clearly involved in sponsoring or supporting international terrorism, effective measures within the framework of international law and in our own jurisdictions;

Welcome the progress made in international cooperation against terrorism since we last met in Tokyo in May 1986, and in particular the initiative taken by France and Germany to convene in May in Paris a meeting of ministers of nine countries, who are responsible for counterterrorism;

Reaffirm our determination to combat terrorism both through national measures and through international cooperation among ourselves and with others, when appropriate, and therefore renew our appeal to all like-minded countries to consolidate and extend international cooperation in all appropriate fora;

Will continue our efforts to improve the safety of travelers. We welcome improvements in airport and maritime security, and encourage the work of I.C.A.O. and I.M.O. in this regard. Each of us will continue to monitor closely the activities of airlines which raise security problems. The heads of state or government have decided to measures, annexed to this statement, to make the 1978 Bonn Declaration more effective in dealing with all forms of terrorism affecting civil aviation;

Commit ourselves to support the rule of law in bringing terrorists to justice. Each of us pledges increased cooperation in the relevant fora and within the framework of domestic and international law on the investigation, apprehension and prosecution of terrorists. In particular we reaffirm the principle established by relevant international conventions of trying or extraditing, according to national laws and those international conventions, those who have perpetrated acts of terrorism.

---

[1] From "Venice Statements on East-West Relations, Terrorism and the Persian Gulf", *New York Times*, June 10, 1987.

ANNEX

The heads of state and government recall that in their Tokyo statement on international terrorism they agreed to make the 1978 Bonn Declaration more effective in dealing with all forms of terrorism affecting civil aviation. To this end, in cases where a country refuses extradition or prosecution of those who have committed offenses described in the Montreal Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation and/or does not return the aircraft involved, the heads of state or government are jointly¢resolved that their Governments shall take immediate action to cease flights to that country as stated in the Bonn Declaration.

At the same time, their governments will initiate action to halt incoming flights from that country or from any country the airlines of the country concerned as stated in the Bonn Declaration.

The heads of state or government intend also to extend the Bonn Declaration in due time to cover any future relevant amendment to the above convention or any other aviation conventions relating to the extradition or prosecution of the offenders.

The heads of state or government urge other governments to join them in this commitment.

k. Tokyo: Statement on International Terrorism, May 5, 1986 [1]

TOKYO ECONOMIC SUMMIT

Statement on International Terrorism. May 5, 1986

1. We, the Heads of State or Government of seven major democracies and the representatives of the European Community, assembled here in Tokyo, strongly reaffirm our condemnation of international terrorism in all its forms, of its accomplices and of those, including governments, who sponsor or support it. We abhor the increase in the level of such terrorism since our last meeting, and in particular its blatant and cynical use as an instrument of government policy. Terrorism has no justification. It spreads only by the use of contemptible means, ignoring the values of human life, freedom and dignity. It must be fought relentlessly and without compromise.

2. Recognizing that the continuing fight against terrorism is a task which the international community as a whole has to undertake, we pledge ourselves to make maximum efforts to fight against that scourge. Terrorism must be fought effectively through determined, tenacious, discreet and patient action combining national measures with international cooperation. Therefore, we urge all like-minded nations to collaborate with us, particularly in such international fora as the United Nations, the International Civil Aviation Organization, drawing on their expertise to improve and extend countermeasures against terrorism and those who sponsor or support it.

3. We, the Heads of State or Government, agree to intensify the exchange of information in relevant fora on threats and potential threats emanating from¢terrorist activities and those who sponsor or support them, and on ways to prevent them.

4. We specify the following as measures open to any government concerned to deny to international terrorists the opportunity and the means to carry out their aims, and to identify and deter those who perpetrate such terrorism. We have decided to apply these measures within the framework of international law and in our own jurisdictions in respect of any state which is clearly involved in sponsoring or supporting international terrorism, and in particular of Libya, until such time as the state concerned abandons its complicity in, or support for, such terrorism. These measures are:

—refusal to export arms to states which sponsor or support terrorism;

[1] From *Weekly Compilation of Presidential Documents*, Monday, May 12, 1986, Vol. 22, No. 19.

—strict limits on the size of the diplomatic and consular missions and other official bodies abroad of states which engage in such activities, control of travel of members of such missions and bodies, and, where appropriate, radical reductions in, or even the closure of, such missions and bodies;
—denial of entry to all persons, including diplomatic personnel, who have been expelled or excluded from one of our states on suspicion of involvement in international terrorism or who have been convicted of such a terrorist offence;
—improved extradition procedures within due process of domestic law for bringing to trial those who have perpetrated such acts of terrorism;
—stricter immigration and visa requirements and procedures in respect of nationals of states which sponsor or support terrorism;
—the closest possible bilateral and multilateral cooperation between police and security organizations and other relevant authorities in the fight against terrorism.

Each of us is committed to work in the appropriate international bodies to which we belong to ensure that similar measures are accepted and acted upon by as many other governments as possible.

5. We will maintain close cooperation in furthering the objectives of this statement and in considering further measures. We agree to make the 1978 Bonn Declaration more effective in dealing with all forms of terrorism affecting civil aviation. We are ready to promote bilaterally and multilaterally further action to be taken in international organizations or fora competent to fight against international terrorism in any of its forms.

2. Other Conferences

a. Summit of Peacemakers, Sharm El Sheikh, Egypt, March 13, 1996

(1) Co-Chairmen's Statement [1]

The Summit of Peacemakers has just concluded. This meeting took place at a time when the peace process confronts serious threats. The Summit had three fundamental objectives: to enhance the peace process, to promote security and to combat terror. Accordingly, the participants here today:

—Express their full support for the Middle East peace process and their determination that this process continue in order to accomplish a just, lasting and comprehensive peace in the region;

—Affirm their determination to promote security and stability and to prevent the enemies of peace from achieving their ultimate objective of destroying the real opportunity for peace in the Middle East.

—Reemphasize their strong condemnation of all acts of terror in all its abhorrent forms, whatever its motivation, and whoever its perpetrator, including recent terrorist attacks in Israel, consider them alien to the moral and spiritual values shared by all the peoples of the region and reaffirm their intention to stand staunchly against all such acts, and to urge all governments to join them in this condemnation and opposition.

To that end, we decided:

a) To support the Israeli-Palestinian agreements, the continuation of the negotiating process and to politically and economically reinforce it to enhance the security situation for both, with special attention to the current and pressing economic needs of the Palestinians.

b) To support continuation of the negotiating process in order to achieve a comprehensive settlement.

c) To work together to promote security and stability in the region by developing effective and practical means of cooperation and further assistance.

d) To promote coordination of efforts to stop acts of terror on bilateral, regional and international levels; ensuring instigators of such acts are brought to justice; supporting efforts by all parties to prevent their territories from being used for terrorist purposes; and preventing terrorist organizations from engaging in recruitment, supplying arms, or fund raising.

e) To exert maximum efforts to identify and determine the sources of financing for these groups and to cooperate in cutting

[1] Source: U.S. Department of State.

them off, and by providing training, equipment and other forms of support to those taking steps against groups using violence and terror to undermine peace, security or stability.

f) To form a working group, open to all Summit participants, to prepare recommendations on how best to implement the decisions contained in this statement, through ongoing work and to report to the participants within thirty days.

President Bill Clinton	President Hosni Mubarak
United States of America	Arab Republic of Egypt
Co-Chairman	Co-Chairman

(2) Communiqué [1]

The Co-Chairmen's Statement of the Sharm el-Sheikh Summit of the Peacemakers called upon all participants to form a working group to prepare recommendations on how best to implement the decisions taken at the Summit. Regional and security experts representing all 29 Summit participants met in Washington, D.C. on March 28 and 29 to prepare those recommendations. In plenary sessions and sub-groups focused on counterterrorism cooperation, the experts considered specific and concrete steps they will take to respond to the call of the Sharm el-Sheikh parties. On April 22, the recommendations were delivered to the Sharm el-Sheikh participants at a ministerial-level meeting hosted by the European Union in Luxembourg. In Luxembourg, the Sharm el-Sheikh parties unanimously re-confirmed their strong support for the peace process and against those who would disrupt this process through violence and terrorism. The parties resolved to back this stance with a new level of commitment, cooperation, and effectiveness, as demonstrated by the following plan of action.

At Sharm el-Sheikh, the parties committed themselves to "support the Israeli-Palestinian agreements, the continuation of the negotiation process and to reinforce it politically and economically to enhance the security for both, with special attention to the current and pressing economic needs of the Palestinians." To this end, the Sharm el-Sheikh parties:

- welcomed steps to address the Palestinians' difficult economic situation.
- supported the U.S. emergency economic plan steps to provide for Palestinian economic needs.
- acknowledged the key role played by the April 12 special meeting in Brussels of the Ad Hoc Liaison Committee.
- affirmed their commitment to help the Palestinians, Israel and the donor community explore the economic situation in the West Bank and Gaza, measures to facilitate the movement of Palestinian imports and exports, and the emergency employment program.
- acknowledged the advances made by the Palestinians over the period since the DOP was signed in September 1993, in particular the Palestinian elections.
- recognized the contribution of the Sharm el-Sheikh process to supporting the peace process and restoring productive peace negotiations.
- committed themselves to help restore confidence and establish the basis for practical political re-engagement and continuing respect for the Israeli-Palestinian agreements and their implementation.

[1] Source: U.S. Department of State.

At Sharm el-Sheikh, the parties agreed to "support continuation of the negotiating process in order to achieve a comprehensive settlement." To this end, the Sharm el-Sheikh parties:

- reaffirmed support for the negotiating process to secure a comprehensive peace.
- recognized the importance both of continuing the Israeli-Palestinian negotiating process and of encouraging Syrian-Israeli and Lebanese-Israeli negotiations.
- recognized the desirability of bringing Syria and Lebanon into the Sharm el-Sheikh and multilateral processes.

At Sharm el-Sheikh, the parties agreed to "work together to promote security and stability in the region by developing effective and practical means of cooperation and further assistance." To this end, the Sharm el-Sheikh parties:

- agreed that terrorism is a crime which cannot be condoned or excused for political reasons and that this policy is a strong deterrent to terrorism.
- agreed to increase exchanges of information and analysis on security and terrorism issues, including terrorist groups, threats, and movement of terrorists, arms and explosives.
- committed to intensify consultations on counterterrorism, through diplomatic, law enforcement, and intelligence channels, and to develop procedures for mutual legal assistance to facilitate the collection of evidence.
- agreed on the need to increase assistance to the Palestinian Authority to strengthen its counterterrorism and law enforcement capabilities.
- agreed that concerned Sharm el-Sheikh parties would consult on assistance to the Palestinian Authority, to coordinate contributions, and to ensure that priority needs are met.
- agreed that all possible means should be used to enhance the counterterrorism capabilities of other Sharm el-Sheikh parties, in such areas as investigation, forensics, crisis management, analysis, and information handling.
- agreed that Sharm el-Sheikh parties interested in improving counterterrorism capabilities hold experts consultations on training, assistance, resources and capabilities, and to share information and broaden contacts in this area.
- agreed on the importance of simulated exercises to practice counterterrorism and crisis management.

At Sharm el-Sheikh, the parties agreed "to promote coordination of efforts to stop acts of terror in bilateral, regional and international levels; ensuring instigators of such acts are brought to justice; supporting efforts by all parties to prevent their territories from being used for terrorist purposes; and preventing terrorist organizations from engaging in recruitment, supplying arms, or fundraising." To this end, the Sharm el-Sheikh parties:

- agreed that all states should adhere to and implement international conventions relating to terrorism, incorporate into domestic laws the crimes defined in those conventions, and establish the competence of the courts to judge such crimes.

- agreed to intensify prosecution, extradition, or rendition of terrorists in order to deny them safe haven, and to expand negotiation of bilateral extradition agreements.
- agreed that concerned Sharm el-Sheikh parties and other interested states should study the need for a new international legal instrument to prevent terrorists from abusing the rights of asylum of refugee status.
- agreed that concerned parties would hold consultations to share information, methodologies, and technical data on the control and security of documents.
- emphasized the importance of programs to educate personnel involved in transportation and the control of borders.

At Sharm el-Sheikh, the parties agreed to "exert maximum efforts to identify and determine the sources of financing for those groups and to cooperate in cutting them off, and by providing training, equipment and other forms of support to those taking steps against groups using violence and terror to undermine peace, security or stability." To this end, the Sharm el-Sheikh parties:

- agreed that greater efforts are needed to stop terrorist fundraising, to educate their publics, and to prevent the misuse of charitable fundraising.
- agreed to continue discussions on this important issue, bilaterally and multilaterally.

We support continued holding of international meetings whether in the multilaterals or the economic summit process, or among parties to the Sharm el-Sheikh process, which all provide valuable reinforcement for the peace process and for the community of states and organizations represented here to demonstrate our ongoing support for the core parties and the bilateral negotiation process.

b. Baguio Communique, Baguio City, Philippines, February 21, 1996 [1]

BAGUIO COMMUNIQUE

Representatives of nineteen States from different parts of the world came together on 18–21 February 1996 at Baguio City, Philippines, to enhance international cooperation against all forms of terrorism.

After intensive discussions, the delegates expressed their collective commitment to combat terrorism taking into consideration the following fundamental principles:

—Terrorist acts are crimes and all legally available means should be used to counter them;
—Combating terrorism requires cooperative efforts;
—There must be no sanctuary for terrorists;
—There must be no compromise in the fight against terrorism;
—Counter-terrorism measures must be in accordance with the relevant provisions of international law and international standards of human rights, and
—Countries that have not yet acceded to treaties and conventions on terrorism are urged to do so as a matter of highest priority.

The delegates shared the view that there is an urgent need to promote the following:

—the strengthening of multilateral and bilateral cooperation on coordination of policy and action against terrorism;
—the enhancement of international cooperation and coordination in law enforcement, intelligence sharing, and in preventing the illicit traffic in and use of explosives, weapons, and nuclear, chemical and biological materials;
—the enhancement of mechanisms for effective immigration control and protection of the integrity of travel documents;
—development of international means of intelligence exchange to facilitate the flow of critical information, in particular, on terrorists and terrorist organizations, their movement and funding, and also information needed to protect life, property and security of transportation;
—cooperation in the fields of training and exchange of information on technologies needed to combat terrorism; and
—effective policies and laws to ensure prompt apprehension, investigation, bringing to justice or extradition of terrorists by means of bilateral, regional, or multilateral agreements or other arrangements by concerned States.

[1] Source: U.S. Department of State.

The meeting was characterized by the spirit of utmost cordiality and friendship among the delegates and close international co-operation.

3. Hemispheric Documents

a. Second Inter-American Specialized Conference on Terrorism, Mar de Plata, Argentina, November 23-24, 1998 [1]

(1) Commitment of Mar de Plata

The ministers and heads of delegation of the member states of the Organization of American States (OAS), meeting in Mar del Plata, Argentina, on November 23 and 24, 1998, for the Second Inter-American Specialized Conference on Terrorism, to evaluate the progress made and define future courses of action to prevent, combat, and eliminate terrorism, pursuant to the mandate contained in the Plan of Action of the Second Summit of the Americas, held in Santiago, Chile, in April 1998,

CONSIDERING the intention of the heads of state and government to combat, using all legal means, terrorist acts anywhere in the Hemisphere with unity and vigor, as affirmed in the Declaration of Principles of the First Summit of the Americas, held in Miami, in December 1994, and their decision, reiterated at the Second Summit of the Americas, in Santiago, Chile, to lend new impetus to the struggle against these criminal activities;

BEARING IN MIND the results of the First Inter-American Specialized Conference on Terrorism, held in Lima, Peru, from April 23 to 26, 1996, which adopted the Declaration and the Plan of Action of Lima to Prevent, Combat, and Eliminate Terrorism;

BEARING IN MIND the recommendations of the Meeting of Government Experts to Examine Ways to Improve the Exchange of Information and Other Measures for Cooperation among Member States to Prevent, Combat, and Eliminate Terrorism, held in Washington, D.C., on May 5 and 6, 1997, pursuant to the General Assembly mandate contained in resolution AG/RES. 1399 (XXVI–O/96);

RECALLING resolution AG/RES. 1492 (XXVII–O/97), through which the General Assembly instructed the Permanent Council to study the recommendations and proposals made at the above-mentioned Meeting of Government Experts and, particularly, the proposals on the exchange of information aimed at improving cooperation among the member states in order to prevent, combat, and eliminate terrorism;

BEARING IN MIND, also, that resolution AG/RES. 1553 (XXVIII–O/98) instructed the Permanent Council to continue to consider appropriate ways and mechanisms for follow-up and implementation, as appropriate, of the measures recommended in the Plan of Action on Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism, adopted at the Inter-American Special-

[1] Source: http://www.oas.org/en/prog/juridico/english/Docu1.htm

ized Conference on Terrorism, held in Lima, Peru, in April 1996, including a study of the necessity and advisability of a new inter-American convention on the subject, in the light of the evaluation of existing international instruments;

TAKING INTO ACCOUNT the provisions of resolution 51/210, "Measures to Eliminate International Terrorism," which has as an annex the Declaration to Supplement the 1994 Declaration on Measures to Eliminate International Terrorism, adopted by the United Nations General Assembly on December 17, 1996; and the International Convention for the Suppression of Terrorist Bombings, open for signature as of January 12, 1998, at United Nations headquarters;

TAKING INTO ACCOUNT the progress made in the Hemisphere since the first Inter-American Specialized Conference on Terrorism in obtaining a concerted and effective response to the terrorist threat, as well as the need to strengthen existing regional cooperation to achieve the objectives of the Plan of Action of Lima;

CONVINCED of the urgency of adopting specific measures to obtain a concerted and effective response to the terrorist threat, within the framework of respect for state sovereignty and the principle of nonintervention, in order to ensure peaceful and civilized coexistence in the Hemisphere, the rule of law, and the stability and consolidation of representative democracy itself as the form of government of the member states;

DETERMINED to promote the establishment of an effective institutional framework for concerted action and development of hemispheric cooperation to prevent, combat, and eliminate terrorism;

PURSUANT to the principles and purposes embodied in the Charter of the Organization of American States,

DECIDE TO ADOPT THE FOLLOWING COMMITMENT:

(i) To reiterate their most emphatic condemnation and repudiation of all terrorist acts, which they recognize as serious common crimes that erode peaceful and civilized coexistence, affect the rule of law and the exercise of democracy, and endanger the stability of democratically elected constitutional governments and the socioeconomic development of our countries.

(ii) To strengthen cooperation among the member states to combat terrorism, with full respect for the rule of international law and for human rights and fundamental freedoms, respect for the sovereignty of states and the principle of nonintervention, and strict compliance with the rights and duties of states embodied in the Charter of the Organization of American States.

(iii) To emphasize the effectiveness and significance of the general objectives and actions set forth in the Declaration and the Plan of Action of Lima, and to reiterate their firm intention to achieve them.

(iv) To improve the exchange of information and other measures for cooperation among member states to prevent, combat, and eliminate terrorism, taking into account and welcoming the results of the Meeting of Government Experts.

(v) To note with satisfaction the progress made in the area of bilateral, subregional, and multilateral cooperation, and, taking into consideration especially the subregional coordination efforts to pre-

vent acts of terrorism reflected in the Framework Treaty on Democratic Security in Central America, and the agreement between Argentina, Brazil, and Paraguay, known as the Tripartite Agreement, to express, also, their determination to increase and strengthen initiatives such as those mentioned above.

(vi) To note with satisfaction the entry into force on July 1, 1998, of the Inter-American Convention against the Illicit Manufacturing of and Trafficking in Firearms, Ammunition, Explosives, and Other Related Materials, and to urge states that have not yet done so to sign or ratify this instrument, as appropriate.

(vii) To recommend to the General Assembly at its twenty-ninth regular session that it establish an appropriate institutional framework, in keeping with the Charter of the Organization of American States and bearing in mind respect for state sovereignty and the principle of nonintervention, that shall be called Inter-American Committee on Terrorism (CICTE). It shall be formed by the competent national authorities in the member states of the Organization for the development of cooperation to prevent, combat, and eliminate terrorist acts and activities, and it shall hold at least one session a year.

The Inter-American Committee on Terrorism will be guided by international conventions on the subject, the principles and objectives of the Declaration and Plan of Action of Lima, the recommendations of the May 1997 Meeting of Government Experts to Examine Ways to Improve the Exchange of Information and Other Measures for Cooperation among the Member States in order to Prevent, Combat, and Eliminate Terrorism, the provisions of this Commitment to inter-American action and those that may be adopted in the future to prevent, combat, and eliminate terrorism.

(viii) To propose that, at the time of establishing the terms of reference and functions of the Inter-American Committee against Terrorism, consideration be given to the guidelines contained in Appendix I to this Commitment, aimed at establishing effective mechanisms for cooperation among the member states to prevent, combat, and eliminate terrorism.

(ix) To request the OAS General Assembly to instruct the General Secretariat to designate, within its sphere of competence, an instance to provide technical and administrative support to the Inter-American Committee against Terrorism, in keeping with the resources allotted in the program-budget of the Organization and other resources, taking into account the process of modernization and strengthening of the OAS.

(x) To transmit to CICTE, for implementation, proposals on the ways and means such as the "Directory of Competences for the Prevention, Combating, and Elimination of Terrorism," and the "Inter-American Database on Terrorism," proposed at the Meeting of Government Experts held at OAS headquarters in May 1997, as well as the establishment of a framework for technical cooperation that takes into account the guidelines contained in Appendices I, II, and III to this Commitment.

(xi) To recommend the adoption of specific measures to respond in a concerted and effective manner to the terrorist threat and to agree, for these purposes, on guidelines for coordinated action

among the member states, such as those envisaged in Appendices I, II, and III to this Commitment.

(xii) To examine the possibility of designating, in accordance with the domestic legislation of each state, National Liaison Agencies for purposes of facilitating cooperation among the organs of the member states responsible for preventing, combating, and eliminating terrorism.

(xiii) To encourage member states to continue to develop bilateral, subregional, or multilateral cooperation mechanisms, which does not preclude the competent organs of the OAS from considering the proposals contained in this Commitment.

(xiv) To urge the member states that have not yet done so to promptly sign, ratify, or accede to, in conformity with their respective domestic legislation, the international conventions on terrorism referred to in United Nations resolution 51/210, namely the Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed in Tokyo on September 14, 1963; the Convention for the Suppression of Unlawful Seizure of Aircraft, signed in The Hague on December 16, 1970; the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, concluded in Montreal on September 23, 1971; the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, adopted in New York on December 14, 1973; the International Convention against the Taking of Hostages, adopted in New York on December 17, 1979; the Convention on the Physical Protection of Nuclear Material, signed in Vienna on March 3, 1980; the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed in Montreal on February 24, 1988; the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done in Rome on March 10, 1988; the Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, done in Rome on March 10, 1988; and the Convention on the Marking of Plastic Explosives for the Purpose of Detection, done in Montreal on March 1, 1991, and the International Convention for the Suppression of Terrorist Bombings, available for signature at United Nations headquarters as of January 12, 1998.

(xv) To make the greatest possible effort to make available to the Organization of American States sufficient funds to develop the joint programs and activities adopted by CICTE.

(xvi) To seek the supplementary financial support required to conduct counterterrorism activities successfully within the framework of CICTE from external sources, including the OAS permanent observer states and other states and financial institutions, particularly the Inter-American Development Bank (IDB).

(xvii) To recommend to the General Assembly that, at its twenty-ninth regular session, it consider the adoption of appropriate financing mechanisms, in particular the establishment of a specific fund for implementation of the programs and activities approved within the framework of CICTE.

(xviii) To recommend to the General Assembly that it entrust the Permanent Council with continuing to study the need and advisability of a new inter-American convention on terrorism, in light of existing international instruments.

(xix) To recommend to the General Assembly that it instruct the OAS General Secretariat to:

a. Collaborate with CICTE in preparing the draft Statute and Rules of Procedure. The Statute should be approved by the General Assembly and the Rules of Procedure by CICTE itself.

b. Collaborate in the preparation of the reports that CICTE shall have to present to the General Assembly through the Permanent Council.

(xx) To recommend to the Permanent Council that, when presenting its observation and recommendations to the General Assembly regarding the CICTE report, in accordance with Article 91.f of the Charter, it include references to the need to coordinate the activities of that Committee with the work of the other bodies in the Organization.

(xxi) To recommend to the Inter-American Juridical Committee that it study the strengthening of juridical and judicial cooperation, including extradition, as a form of combating terrorism, and that it collaborate with CICTE in devising norms on this subject.

(2) The Inter-American Committee on Terrorism (CICTE) [1]

NATURE, POWERS, AND FUNCTIONS OF CICTE

1. The Inter-American Committee on Terrorism (CICTE) shall be an entity established by the General Assembly of the Organization of American States (OAS) in conformity with Article 53 of the Charter of the Organization, which shall enjoy technical autonomy. It will be composed of the competent national authorities of all the member states and be governed in the exercise of its functions by the provisions of Article 91.f of the Charter.

2. In the exercise of its functions, CICTE shall promote the development of inter-American cooperation on the basis of international conventions on this matter and the Declaration of Lima to Prevent, Combat, and Eliminate Terrorism. It shall be empowered to encourage, develop, coordinate, and evaluate implementation of the Plan of Action of Lima, the recommendations of the Meeting of Government Experts to Examine Ways to Improve the Exchange of Information and Other Measures for Cooperation among Member States to Prevent, Combat, and Eliminate Terrorism, as well as the recommendations contained in this Commitment.

3. CICTE will provide assistance to member states requesting it , in order to prevent, combat, and eliminate terrorism, while promoting, in accordance with the domestic laws of the member states, the exchange of information and experiences with the activities of persons, groups, organizations, and movements linked to terrorist acts as well as with the methods, sources of finance and entities directly or indirectly protecting or supporting them, and their possible links to other crimes.

4. In order to ensure an adequate exchange of information on the issue of illicit trafficking in arms, munitions, explosives, materials, or technology capable of being used to perpetrate terrorist acts or activities, CICTE will coordinate with the Consultative Committee established by the 1997 Inter-American Convention against the Illicit Production of and Trafficking in Firearms, Ammunition, Explosives, and Other Related Materials.

5. CICTE will hold at least one annual session. During its first session, CICTE will draw up its work schedule designed to implement the following guidelines:

a. To create an inter-American network for gathering and transmitting data via the competent national authorities, designed to exchange the information and experiences referred to in paragraph 3, including the creation of an inter-American database on terrorism issues that will be at the disposal of member states.

b. To compile the legal and regulatory norms on preventing, combating, and eliminating terrorism in force in member states.

---

[1] Source: http://www.oas.org/en/prog/juridico/english/Docu2.htm

c. To compile the bilateral, subregional, regional, or multilateral treaties and agreements signed by member states to prevent, combat, and eliminate terrorism.

d. To study the appropriate mechanisms to ensure more effective application of international legal norms on the subject, especially the norms and provisions contemplated in the conventions against terrorism in force in states parties to those conventions mentioned in paragraph xiv of this Commitment.

e. To formulate proposals designed to provide assistance to states requesting it in drafting national antiterrorist laws.

f. To devise mechanisms for cooperation in detecting forged identity documents.

g. To devise mechanisms for cooperation among competent migration authorities.

h. To design technical cooperation programs and activities for training staff assigned to tasks related to preventing, combating, and eliminating terrorism in each of the member states that request such assistance.

6. The above-mentioned guidelines do not preclude the possibility of CICTE carrying out other activities should the General Assembly so determine.

7. With the acquiescence of the competent authorities, CICTE may establish mechanisms for coordinating with other competent international entities, such as INTERPOL.

(3) Guidelines for Inter-American Cooperation Regarding Terrorist Acts and Activities [1]

PRINCIPLES

1. Inter-American cooperation in dealing with terrorist acts and activities will be guided by full respect for domestic laws and regulations and for international law and will be carried out exclusively at the express request of the affected state.

2. Inter-American cooperation shall respect the sovereignty and territorial integrity of states, as well as the principle of non-intervention in domestic affairs under the jurisdiction of the state, in accordance with the Charter of the Organization of American States.

3. Pursuant to inter-American norms on the subject, each state has the exclusive right to determine the nature of occurrences that could qualify as terrorist acts or activities. The states shall cooperate closely as regards extradition in accordance with their domestic laws and the extradition treaties in force, without prejudice to the right of states to grant asylum under the appropriate circumstances.

4. Each state has the fundamental and principal responsibility of preventing, combating, and eliminating terrorism, a goal that inter-American cooperation pursues according to the following guidelines.

PURPOSES

5. The member states will seek to cooperate in the fight against all forms of terrorism, to the fullest extent permitted by their national laws and regulations, in accordance with their legal obligations arising from existing international conventions on terrorism, and as set out in these guidelines.

6. The member states will seek to cooperate, to the extent that they find mutually beneficial, in the development and implementation of joint programs and activities to facilitate the full realization of the intent of these guidelines.

7. The member states will seek to cooperate, by mutual consent, in the event of a terrorist act. Cooperation under these guidelines may include assistance with: weapons detection and deactivation, hostage negotiations, intelligence gathering, communications systems, search and rescue for victims, and criminal investigations.

PROCEDURES

8. Irrespective of bilateral mechanisms, member states will seek, insofar as possible within the context of domestic legislation,

[1] Source: http://www.oas.org/en/prog/juridico/english/Docu3.htm

through CICTE, to exchange information regarding the laws, regulations, plans, and administrative procedures concerned with preventing, combating, and eliminating terrorist acts and activities.

9. Member states will seek to cooperate in dealing with terrorist acts and activities. To that end, member states may provide assistance, when such assistance is expressly requested, to another state in order to prevent, combat, and eliminate terrorism. That cooperation may include technical, scientific, and logistical assistance, depending on the agreement reached by the states involved. Member states will seek to prepare operational plans and crisis management procedures within their respective governments in response to terrorist activities.

10. Member states will seek to keep other states up to date regarding occurrences that, in their view, could be classified as terrorist acts and activities.

NOTIFICATION

11. Whenever a member state becomes aware of occurrences that it considers could be classified as terrorist acts or activities with a transnational impact, it will seek to notify, as soon as possible, the state or states that could be affected.

12. The member states will seek to notify each other of any request or acceptance of assistance from a third party regarding a terrorist activity or act that has affected or could directly affect another member state.

13. The member states will seek to inform CICTE or any other competent organ in the OAS, whenever possible, of the events referred to in paragraph 4.

RESPONSE

14. In the event of occurrences that could be classified as terrorist acts and activities with a transnational impact, member states will seek in a manner compatible with their domestic laws and regulations and applicable international conventions:

a. To authorize and facilitate the presence of liaison representatives at locations agreed to by the member states, consistent with domestic crisis management procedures, who will be responsible for maintaining channels of communication between the member states and for facilitating accurate exchanges of information on operational and policy decisions;

b. To the extent appropriate, to share information concerning the materials, devices, and/or weapons used in that terrorist act or activity; likely perpetrators; their possible sources of support; and any other relevant information.

c. To afford one another the greatest measure of assistance in judicial cooperation, including assistance in obtaining evidence at their disposal necessary for such investigations or proceedings.

CONFIDENTIALITY

15. The member states will seek to safeguard the confidentiality of information that is not a matter of public record, exchanged pursuant to these guidelines, and to prevent the disclosure of such in-

formation to third parties in accordance with their national laws and regulations.

16. Information and materials exchanged under these guidelines may be disclosed to third states only with the explicit consent of the member state that provided it.

(4) Measures to Eliminate Terrorist Fundraising [1]

CONTEXTUAL FRAMEWORK

1. Countermeasures against terrorism must include effective actions to impede the flow of funds that terrorist organizations depend on to secure and maintain weapons, equipment, and other materials, and to pay for training, travel, false documentation, recruiting, salaries, communications, and/or any other activity intended to finance acts pursuing terrorist goals. A significant portion of the fiscal needs of terrorist organizations are met from the proceeds of traditional criminal activity and from the solicitation of ostensibly charitable, humanitarian, and philanthropic contributions, some of which are diverted to fund terrorist operations.

2. The effectiveness of measures to counter transnational terrorist fundraising will be enhanced through cooperative action among OAS member states.

3. OAS member states recognize that states that seek to disrupt financial flows to terrorist organizations make it possible to move ahead in cooperation with other states to prevent, combat, and eliminate terrorism.

Execution of measures against terrorist fundraising

4. Through CICTE or other competent entities, OAS member states agree to consider adopting the following measures to counter terrorist fundraising, evaluating, where necessary, the desirability of strengthening national laws:

a. Promote the necessary measures to discern and then block the capital flows financing terrorism, within the framework of the laws already in force in each state, or by devising norms that are compatible with them and make it possible to achieve objectives.

b. Ensure that law enforcement officials are trained in the prevention and detection of terrorist fundraising and, in the performance of their duties, encourage them to cooperate in international training efforts designed to address terrorist fundraising;

c. Ensure that records of financial transactions are available to law enforcement officials and that each member state has the legal and logistical means to enable their law enforcement officials to share with their counterparts in other member states documentary, financial and other information useful in criminal investigations and/or civil and administrative matters related to terrorist fundraising;

d. Cooperate, in a manner consistent with national laws and states' international commitments, with other member states in international investigations and prosecutions of terrorist fundraising violations, including assisting with locating and inter-

[1] Source: http://www.oas.org/en/prog/juridico/english/Docu4.htm

viewing witnesses and with obtaining financial and other relevant documents;

e. Apply norms that create the bases and effective mechanisms to reinforce agreements and treaties on extradition for criminal offenses involving terrorist fundraising;

f. Apply norms that require financial institutions to maintain records of financial transactions for at least five years;

g. Apply norms that require financial institutions to obtain, and maintain records of, information that allows them to identify, verify, and know their customers;

h. Apply norms that ensure that financial institutions bring financial activities presumed to be intended to fund terrorist acts or activities to the timely attention of the competent authorities;

i. Apply norms that protect against the misuse of currency in transactions involving financial institutions and in cross-border transportation;

j. Apply norms that compel financial institutions to comply with the requirements to protect a member state's financial system from abuse by terrorist fundraisers.

b. Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism [1]

AG/RES. 1399 (XXVI-O/96)

(Resolution adopted at the eighth plenary session, held on June 7, 1996)

THE GENERAL ASSEMBLY,

HAVING SEEN resolution AG/RES. 1350 (XXV-O/95), which convened an Inter-American Specialized Conference on Terrorism;

BEARING IN MIND that the Specialized Conference was held in Lima from April 23 to 26, 1996, and that it adopted the "Declaration of Lima to Prevent, Combat, and Eliminate Terrorism" and the "Plan of Action on Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism";

TAKING INTO ACCOUNT the Secretary General's proposals on new forms of inter-American cooperation to confront terrorism with all due effectiveness, which have been included in the Declaration of Montrouis: A New Vision of the OAS and presented in the document "The Law in a New Inter-American Order," which is under consideration by the governments; and

CONSIDERING:

That the Plan of Action on Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism recommends, among other measures, that the Organization of American States (OAS) should follow up on the progress made in implementing that Plan of Action, and that the OAS General Assembly should consider convening a meeting of experts to examine ways to improve the exchange of information among the member states, in order to prevent, combat, and eliminate terrorism;

That, in addition, resolution CEITE/RES. 2/96 recommends that the General Assembly of the Organization consider appropriate ways and means to follow up on the measures agreed upon in the Declaration and the Plan of Action adopted at the Specialized Conference; and

The Final Report of the Inter-American Specialized Conference on Terrorism (CEITE/doc.28/96),

RESOLVES:

1. To reiterate its strongest condemnation of all forms of terrorism by whatever agent or means and to repudiate the grave consequences of such acts which, as stated at the Summit of the Americas, "constitute a systematic and deliberate violation of the rights of individuals."

2. To express its satisfaction with the holding of the Inter-American Specialized Conference on Terrorism and the adoption of the

[1] Source: http://www.oas.org/EN/PINFO/OAS/AG97/R/agr1399e.htm

Declaration of Lima to Prevent, Combat, and Eliminate Terrorism and the Plan of Action on Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism.

3. To instruct the Permanent Council to consider appropriate ways and means to follow up on the measures recommended in the Plan of Action and submit a progress report on its work to the General Assembly at its next regular session.

4. To request the Permanent Council to consider convening a meeting of government experts to examine ways to improve the exchange of information and other measures for cooperation among the member states to prevent, combat, and eliminate terrorism.

5. To draw the attention of all the organs of the Organization of American States and, in particular, the Inter-American Commission on Human Rights to the importance of the Declaration of Lima and the Plan of Action.

6. To instruct the Inter-American Juridical Committee to continue its study of the topic "Inter-American Cooperation to Confront Terrorism," in light of the documents approved at the Specialized Conference.

c. First Inter-American Specialized Conference on Terrorism, Lima Peru, April 23–26, 1996

(1) Declaration of Lima to Prevent, Combat, and Eliminate Terrorism [1]

(Revised by the Style Committee)

The ministers and the heads of delegation of the member states of the Organization of American States (OAS), meeting in Lima, Peru, from April 23 to 26, 1996, for the Inter-American Specialized Conference on Terrorism,

TAKING AS A BASIS the principles and purposes enshrined in the Charter of the Organization of American States;

RECALLING that the Convention to Prevent and Punish the Acts of Terrorism Taking the Form of Crimes against Persons and Related Extortion That Are of International Significance, signed in Washington, D.C., in 1971; resolutions AG/RES. 4 (I-E/70), AG/RES. 775 (XV-O/85), AG/RES. 1112 (XXI-O/91), and AG/RES. 1213 (XXIII-O/93); and the Declarations of Asuncion (1990) and Belom do Paris (1994) attest to an evolution in the treatment by the Organization of American States of the serious and disturbing phenomenon of terrorism;

CONSIDERING that, in the Declaration of Principles of the Summit of the Americas (Miami, December 1994), the heads of state and government said: "We condemn terrorism in all its forms, and we will, using all legal means, combat terrorist acts anywhere in the Americas with unity and vigor," and that, in the Plan of Action under the section entitled "Eliminating the Threat of National and International Terrorism" (item 7), they affirmed that this scourge constitutes "a systematic and deliberate violation of the rights of individuals and an assault on democracy itself" and decided that "a special conference of the OAS on the prevention of terrorism" should be held;

BEARING IN MIND that the ministers of foreign affairs of the Hemisphere noted in the Declaration of Montrouis: A New Vision of the OAS, adopted by the OAS General Assembly at its twenty-fifth regular session (June 1995), that "terrorism is a serious criminal phenomenon of deep concern to all member states, and that it has devastating effects on civilized coexistence, democratic institutions, and the lives, safety, and property of human beings," and that at that session the General Assembly convened an Inter-American Specialized Conference on Terrorism [AG/RES. 1350 (XXV-O/95)];

RECALLING the Declaration of Quito, signed at the IX Meeting of the Rio Group (September 1995), in which the heads of state and

[1] Source: http://www.oas.org/EN/PINFO/CONVEN/li00065e.htm

government said: "We reiterate our condemnation of terrorism in all its forms as well as our determination to make vigorous, united efforts to combat this scourge by all available legal means, since it violates basic human rights";

RECALLING also the Framework Treaty on Democratic Security in Central America (December 1995), signed by Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama, in which the parties undertake to prevent and combat, without exception, all types of criminal activity with a regional or international impact, such as terrorism;

TAKING NOTE of the Final Declaration of the States Participating in the Meeting of Consultation on Cooperation to Prevent and Eliminate International Terrorism, adopted in Buenos Aires (August 1995) by Argentina, Brazil, Canada, Chile, Paraguay, the United States, and Uruguay, which, inter alia, reiterated that "the cooperation that exists between our governments must be enhanced," in the context of which an agreement was signed in March 1996 among Argentina, Brazil, and Paraguay to implement effective measures in response to the criminal phenomenon of terrorism;

TAKING INTO ACCOUNT the recent work of the United Nations and noting the documents issued by the Ottawa P–8 Ministerial Conference on Terrorism (December 1995) and the International Conference on Counterterrorism, held in Baguio (February 1996);

MINDFUL that terrorist acts are an assault on the rule of law and democratic institutions and are often intended to destabilize democratically elected constitutional governments;

CONCERNED by the detrimental effects terrorism can have on efforts to attain the common objective of regional integration and to promote economic and social development in the countries of the Hemisphere;

RECOGNIZING that terrorist acts, by whomever and wherever perpetrated and whatever their forms, methods, or motives, are serious common crimes or felonies;

DEEPLY ALARMED at the persistence of this scourge and at its occasional links to the illicit production and use of drugs and trafficking therein, to trafficking in chemical precursors, and to money laundering, as well as its possible ties to other criminal activities;

RECOGNIZING the importance to the fight against terrorism of eliminating the illicit production and use of arms, munitions, and explosive materials and trafficking therein; and

CONVINCED that existing regional cooperation must be intensified and that concerted and effective measures must be adopted urgently in response to the threat of terrorism,

DECLARE:

1. That observance of international law, full respect for human rights and fundamental freedoms, respect for the sovereignty of states, the principle of nonintervention, and strict observance of the rights and duties of states embodied in the Charter of the OAS constitute the global framework for preventing, combating, and eliminating terrorism.

2. That terrorist violence erodes peaceful and civilized coexistence, affects the rule of law and the exercise of democracy, and en-

dangers the stability of national institutions and the socioeconomic development of our countries.

3. That terrorism, as a serious form of organized and systematic violence, which is intended to generate chaos and fear among the population, results in death and destruction and is a reprehensible criminal activity.

4. Their most emphatic condemnation of all terrorist acts, wherever and by whomever perpetrated, and all methods used to commit them, regardless of the motivation invoked to justify the acts.

5. That terrorist acts are serious common crimes or felonies and, as such, should be tried by national courts in accordance with domestic law and the guarantees provided by the rule of law.

6. Their resolve to cooperate fully on matters of extradition, in conformity with their domestic law and treaties in force on the subject, without prejudice to the right of states to grant asylum when appropriate.

7. That terrorism, as noted by the heads of state and government at the Summit of the Americas, is a violation of the fundamental rights and freedoms of individuals and an assault on democracy itself.

8. Their decision to study, on the basis of an evaluation of existing international instruments, the need for and advisability of concluding a new inter-American convention on terrorism.

9. That it is important for OAS member states to ratify or accede to international instruments on terrorism as soon as possible and, when necessary, to implement them through their domestic laws.

10. Their decision to increase cooperation among member states in combating terrorist acts, while fully observing the rule of law and international norms, especially with regard to human rights.

11. That it is essential to adopt all bilateral and regional cooperation measures necessary to prevent, combat, and eliminate, by all legal means, terrorist acts in the Hemisphere, with full respect for the jurisdiction of member states and for international treaties and conventions.

(2) Plan of Action on Hemispheric Cooperation to Prevent, Combat, and Eliminate Terrorism [1]

(Revised by the Style Committee)

The ministers and the heads of delegation of the member states of the Organization of American States (OAS), meeting in Lima, Peru, at the Inter-American Specialized Conference on Terrorism, firmly resolved to achieve the overall objectives set forth in the Declaration of Lima to Prevent, Combat, and Eliminate Terrorism, agree to the following Plan of Action:

The governments

1. Shall endeavor to establish terrorist acts as serious common crimes or felonies under their domestic laws, if they have not yet done so.

2. Shall promote the prompt signing and ratification of and/or accession to international conventions related to terrorism, in accordance with their domestic laws.

3. Shall periodically share updated information on domestic laws and regulations adopted in the area of terrorism and on the signing and ratification of and/or accession to relevant international conventions.

4. Shall provide pertinent legal information and other background data on terrorism to the General Secretariat, which shall keep them organized and up-to-date.

5. Shall promote measures for mutual legal assistance to prevent, combat, and eliminate terrorism.

6. In keeping with relevant domestic and international laws, shall extend their utmost cooperation with respect to criminal proceedings initiated against alleged terrorists, by providing to the state that has exercised jurisdiction any evidence in their possession. If appropriate, they shall facilitate direct communication among the jurisdictional bodies to expedite the presentation of evidence of the crime.

7. As an expression of their firm political will to employ all legal means to prevent, combat, and eliminate terrorism, shall promote strict and timely compliance with applicable extradition treaties or, if appropriate, shall deliver the alleged perpetrators of terrorist acts to their competent authorities for prosecution, in accordance with their domestic laws, if sufficient legal grounds for doing so exist.

8. In keeping with their domestic laws, shall adopt the necessary measures to refuse to make concessions to terrorists who take hostages and to ensure that they are brought to justice.

9. When they deem it appropriate, shall report to each other and take measures to prevent and address any abuses, related to ter-

[1] Source: http://www.oas.org/EN/PINFO/CONVEN/li00064e.htm

rorist acts, of the privileges and immunities recognized in the Vienna conventions on diplomatic and on consular relations and in the applicable agreements concluded between states and international organizations and agencies.

10. Shall endeavor, in keeping with their domestic laws, to exchange information concerning terrorist individuals, groups, and activities. In this context, when a state finds that there are sufficient grounds for believing that a terrorist act is being planned, that state shall provide as soon as possible any pertinent information to those states potentially affected in order to prevent the commission of that act.

11. Shall endeavor to promote and enhance bilateral, subregional, and multilateral cooperation in police and intelligence matters to prevent, combat, and eliminate terrorism.

12. Shall extend, when possible, their utmost cooperation and technical assistance for the regular and advanced training of personnel entrusted with counterterrorism activities and techniques.

13. Shall coordinate efforts and examine measures to improve cooperation in the areas of border security, transportation, and travel documents in order to prevent terrorist acts. They shall also promote the modernization of border control and information systems to prevent the passage of persons involved in terrorist acts as well as the transport of equipment, arms, and other materials that could be used to commit such acts.

14. Shall make special efforts to adopt, in their territories and in keeping with their domestic laws, measures to prevent the provision of material or financial support for any kind of terrorist activity.

15. Shall adopt measures to prevent the production of, trafficking in, and use of weapons, munitions, and explosive materials for terrorist activities.

16. Shall adopt measures to prevent the terrorist use of nuclear, chemical, and biological materials.

17. When appropriate, shall share information on the findings of and experience afforded by investigations of terrorist activities.

18. Shall endeavor to assist the victims of terrorist acts and shall cooperate among themselves to that end.

19. Where appropriate and in keeping with their domestic laws, shall furnish to the state of which the victims are nationals, in a complete and timely manner, the information in their possession regarding such victims and the circumstances of the crime.

20. Shall endeavor to provide humanitarian and all other forms of assistance to member states upon request following the commission of terrorist acts in their territories.

21. Shall begin to study, within the framework of the OAS and on the basis of an evaluation of existing international instruments, the need for and advisability of a new inter-American convention on terrorism.

22. Shall hold meetings and consultations to afford one another their utmost assistance and cooperation in preventing, combating, and eliminating terrorist activities in the Hemisphere and, within the framework of the OAS, shall follow up on the progress made in implementing this Plan of Action.

23. Shall recommend to the General Assembly of the Organization of American States that it consider convening a meeting of experts to examine ways to improve the exchange of information among the member states in order to prevent, combat, and eliminate terrorism.

d. Summit of the Americas December 9–11, 1994

DECLARATION OF PRINCIPLES

To Preserve and Strengthen the Community of Democracies of the Americas

* * * * * * *

We condemn terrorism in all its forms, and we will, using all legal means, combat terrorist acts anywhere in the Americas with unity and vigor.

* * * * * * *

PLAN OF ACTION

I. PRESERVING AND STRENGTHENING THE COMMUNITY OF DEMOCRACIES OF THE AMERICAS

* * * * * * *

7. ELIMINATING THE TREAT OF NATIONAL AND INTERNATIONAL TERRORISM

National and international terrorism constitute a systematic and deliberate violation of the rights of individuals and an assault on democracy itself. Recent attacks that some of our countries have suffered have demonstrated the serious threat that terrorism poses to security in the Americas. Actions by governments to combat and eliminate this threat are essential elements in guaranteeing law and order and maintaining confidence in government, both nationally and internationally. Within this context, those who sponsor terrorist acts or assist in their planning or execution through the abuse of diplomatic privileges and immunities or other means will be held responsible by the international community.

Governments will—

- Promote bilateral and subregional agreements with the aim of prosecuting terrorists and penalizing terrorist activities within the context of the protection of human rights and fundamental freedoms.
- Convene a special conference of the OAS on the prevention of terrorism.
- Reaffirm the importance of the extradition treaties ratified by the states of the Hemisphere, and note that these treaties will be strictly complied with as an expression of the political will of governments, in accordance with international law and domestic legislation.

4. International Civil Aviation Organization Documents

a. International Standards and Recommended Practices: Security; Safeguarding International Civil Aviation Against Acts of Unlawful Interference, Annex 17 to the Convention on International Civil Aviation, Sixth Edition, March 1997

ANNEX 17

TO THE CONVENTION ON INTERNATIONAL CIVIL AVIATION

SIXTH EDITION — MARCH 1997

This edition incorporates all amendments adopted by the Council prior to 13 November 1996 and supersedes on 1 August 1997 all previous editions of Annex 17.

For information regarding the applicability of the Standards and Recommended Practices, *see* Foreword.

INTERNATIONAL CIVIL AVIATION ORGANIZATION

FOREWORD

Historical background

The material included in this Annex was developed by the Council pursuant to the following two resolutions of the Assembly:

Resolution A17-10: Implementation by States of Security Specifications and Practices adopted by this Assembly and further work by ICAO related to such Specifications and Practices

. . . . . .

THE ASSEMBLY:

. . . . . .

(3) REQUESTS the Council, with the assistance of the other constituent bodies of the Organization, to develop and incorporate, as appropriate, the material in the Appendices to this Resolution as Standards, Recommended Practices and Procedures in existing or new Annexes or other regulatory documents or guidance material of the Organization.

Resolution A18-10: Additional Technical Measures for the Protection of the Security of International Civil Air Transport

. . . . . .

THE ASSEMBLY:

(1) REQUESTS the Council to ensure, with respect to the technical aspects of air transportation security, that:

(a) the subject of air transportation security continues to be given adequate attention by the Secretary General, with a priority commensurate with the current threat to the security of air transportation;

. . . . . .

Following the work of the Air Navigation Commission, the Air Transport Committee and the Committee on Unlawful Interference, and as a result of the comments received from Contracting States and interested International Organizations, to whom draft material had been circulated, Standards and Recommended Practices on Security were adopted by the Council on 22 March 1974, pursuant to the provisions of Article 37 of the Convention on International Civil Aviation, and designated as Annex 17 to the Convention with the title "Standards and Recommended Practices — *Security* — Safeguarding International Civil Aviation against Acts of Unlawful Interference".

Table A shows the origin of subsequent amendments together with a list of the principal subjects involved and the dates on which the Annex and the amendments were adopted by the Council, when they became effective and when they became applicable.

Introduction

In order that a comprehensive document may be available to States for implementation of the security measures prescribed by this Annex, an Attachment hereto reproduces extracts from other Annexes, *Technical Instructions for the Safe Transport of Dangerous Goods by Air* (Doc 9284), PANS-RAC and PANS-OPS bearing on the subject of action to be taken by States to prevent unlawful interference with civil aviation, or when such interference has been committed.

Guidance material

The *Security Manual for Safeguarding Civil Aviation Against Acts of Unlawful Interference* (Doc 8973) provides detailed procedures and guidance on aspects of aviation security and is intended to assist States in the implementation of their respective national civil aviation security programmes required by the specifications in the Annexes to the Convention on International Civil Aviation.

Action by Contracting States

Applicability. The provisions of the Standards and Recommended Practices in this document are to be applied by Contracting States.

Notification of differences. The attention of Contracting States is drawn to the obligation imposed by Article 38 of the Convention, by which Contracting States are required to notify the Organization of any differences between their national regulations and practices and the International Standards contained in this Annex and any amendments thereto. Contracting States are invited to keep the Organization currently informed of any differences which may subsequently occur, or of the withdrawal of any difference previously notified. A specific request for notification of differences will be sent to Contracting States immediately after the adoption of each Amendment to this Annex.

Contracting States are also invited to extend such notification to any differences from the Recommended Practices contained in this Annex, and any amendment thereto, when the notification of such differences is important for the safety of air navigation.

Attention of States is also drawn to the provisions of Annex 15 related to the publication of differences between their national regulations and practices and the related ICAO Standards and Recommended Practices through the Aeronautical Information Service, in addition to the obligation of States under Article 38 of the Convention.

Promulgation of information. Information relating to the establishment and withdrawal of and changes to facilities, services and procedures affecting aircraft operations provided according to the Standards and Recommended Practices specified in this Annex should be notified and take effect in accordance with Annex 15.

Use of the text of the Annex in national regulations. The Council, on 13 April 1948, adopted a resolution inviting the attention of Contracting States to the desirability of using in their own national regulations, as far as practicable, the precise language of those ICAO Standards that are of a regulatory character and also of indicating departures from the Standards, including any additional national regulations that were important for the safety or regularity of air navigation. Wherever possible, the provisions of this Annex have been written in such a way as would facilitate incorporation, without major textual changes, into national legislation.

General information

An Annex is made up of the following component parts, not all of which, however, are necessarily found in every Annex; they have the status indicated:

1.— *Material comprising the Annex proper:*

a) *Standards* and *Recommended Practices* adopted by the Council under the provisions of the Convention. They are defined as follows:

Standard: Any specification for physical characteristics, configuration, matériel, performance, personnel or procedure, the uniform application of which is recognized as necessary for the safety or regularity of international air navigation and to which Contracting States will conform in accordance with the Convention; in the event of impossibility of compliance, notification to the Council is compulsory under Article 38 of the Convention.

Recommended Practice: Any specification for physical characteristics, configuration, matériel, performance, personnel or procedure, the uniform application of which is recognized as desirable in the interests of safety, regularity or efficiency of international air navigation, and to which Contracting States will endeavour to conform in accordance with the Convention.

b) *Appendices* comprising material grouped separately for convenience but forming part of the Standards and Recommended Practices adopted by the Council.

c) *Definitions* of terms used in the Standards and Recommended Practices which are not self-explanatory in that they do not have accepted dictionary meanings. A definition does not have an independent status but is an essential part of each Standard and Recommended Practice in which the term is used, since a change in the meaning of the term would affect the specification.

2.— *Material approved by the Council for publication in association with the Standards and Recommended Practices:*

a) *Forewords* comprising historical and explanatory material based on the action of the Council and including an explanation of the obligations of States with regard to the application of the Standards and Recommended Practices ensuing from the Convention and the Resolution of Adoption.

b) *Introductions* comprising explanatory material introduced at the beginning of parts, chapters or sections of the Annex to assist in the understanding of the application of the text.

c) *Notes* included in the text, where appropriate, to give factual information or references bearing on the Standards or Recommended Practices in question, but not constituting part of the Standards or Recommended Practices.

d) *Attachments* comprising material supplementary to the Standards and Recommended Practices, or included as a guide to their application.

This Annex has been adopted in five languages — English, Arabic, French, Russian and Spanish. Each Contracting State is requested to select one of those texts for the purpose of national implementation and for other effects provided for in the Convention, either through direct use or through translation into its own national language, and to notify the Organization accordingly.

The following practice has been adhered to in order to indicate at a glance the status of each statement: *Standards* have been printed in light face roman; *Recommended Practices* have been printed in light face italics, the status being indicated by the prefix **Recommendation**; *Notes* have been printed in light face italics, the status being indicated by the prefix *Note*.

Any reference to a portion of this document which is identified by a number includes all subdivisions of that portion.

Table A. Amendments to Annex 17

Amendment	*Source(s)*	*Subject(s)*	*Adopted* *Effective* *Applicable*
1st Edition	Council action in pursuance of Assembly Resolutions A17-10 and A18-10	—	22 March 1974 22 August 1974 27 February 1975
1	Council action in pursuance of Assembly Resolution A21-23	Change in status of paragraphs 3.1.2 and 5.1.2 to a Standard; compilation and dissemination of information related to an aircraft being subjected to an act of unlawful interference.	31 March 1976 31 July 1976 30 December 1976
2	Proposals of some States and Council action in pursuance of Assembly Resolution A22-17	Transfer of specifications appearing in Chapter 9 of Annex 9 — Facilitation (Seventh Edition) to Annex 17; new provision in Chapter 5 concerning measures to be taken to control transfer and transit passengers and their cabin baggage; and amplification of the Note to paragraph 5.2.4 (Annex 17, Chapter 5) on measures and procedures to prevent unauthorized access to specified areas on an aerodrome.	15 December 1977 15 April 1978 10 August 1978
3	Proposals of some States and the Secretariat and Council action in pursuance of Assembly Resolution A22-17	Specifications were added on the review of the level of threat by States, the development of training programmes, the isolation of security processed passengers, the inspection of aircraft for concealed weapons or other dangerous devices and the adoption of measures for the safety of passengers and crew of unlawfully diverted aircraft. A number of specifications were amplified and the status of one was changed to a Standard, related to the segregation and special guarding of aircraft liable to attack during stopovers.	13 December 1978 13 April 1979 29 November 1979
4 (2nd Edition)	Proposals of some States and an international organization and Council action in pursuance of Assembly Resolution A22-17	A specification was added on the transportation of persons in custody, and two specifications revised to provide for aircraft which were leased, chartered or interchanged. The status of a specification dealing with the safety of passengers and crew of an aircraft subjected to an act of unlawful interference was changed to a Standard; the provisions of a specification dealing with the prevention of sabotage were amplified and Chapter 1. — Applicability, deleted.	15 June 1981 15 October 1981 26 November 1981
5	Proposals of the Committee on Unlawful Interference and Council action in pursuance of Assembly Resolution A22-17	The Note to Chapter 1 — Definitions was deleted. A specification setting out the action required for the transportation of weapons on board aircraft by law enforcement and other duly authorized persons was modified. A specification on the carriage of weapons in all other cases was added and the note to a specification dealing with the safeguarding of unattended aircraft was clarified.	30 November 1984 14 April 1985 21 November 1985
6 (3rd Edition)	Proposals of the Committee on Unlawful Interference with the assistance of an Ad Hoc Group of Experts — Unlawful Interference and Council action in pursuance of Assembly Resolution A22-17	On the instruction of the Council this amendment was undertaken as a matter of urgency by the Committee on Unlawful Interference with the assistance of an Ad Hoc Group of Experts on aviation security which had been appointed on the instruction of the Council. As a consequence 11 new specifications were introduced into the Annex and 19 specifications were adopted as Standards.	19 December 1985 19 March 1986 19 May 1986
		Special effective and applicable dates for 5.1.4 are shown in the adjacent column.	19 October 1987 19 December 1987
		The Council recommended that those States that are able to implement the substance of 5.1.4 do so as soon as it is feasible and practicable before the applicable date.	

Amendment	*Source(s)*	*Subject(s)*	*Adopted* *Effective* *Applicable*
7 (4th Edition)	Proposals of the Committee on Unlawful Interference with the assistance of the Aviation Security Panel and Council action in pursuance of Assembly Resolution A26-7	This amendment includes: a) a reorganization of the chapters of the Annex directed at a rationalization of the sequence of objectives, obligations and necessary actions relating to organization, preventive security measures and management of response; b) the introduction of important new provisions to reflect developments and assist States in confronting new situations which arose from grave acts of unlawful interference against civil aviation, since the last revision of Annex 17 in 1985; and c) the amendment or fine tuning of existing provisions consequential to a) and b) above, as well as to reflect the experience gained in the implementation of such measures.	22 June 1989 30 October 1989 16 November 1989
8 (5th Edition)	Proposals of the Committee on Unlawful Interference with the assistance of the Aviation Security Panel (AVSECP) and Council action in pursuance of Assembly Resolution A27-7	This amendment includes the introduction of important new provisions in relation to the comprehensive security screening of checked baggage, security control over cargo, courier and express parcels and mail, variations to procedures relating to security programmes, pre-flight checks of international aircraft, and measures relating to the incorporation of security consideration into airport design for the purpose of assisting States in the consistent and uniform implementation of such measures.	11 September 1992 16 December 1992 1 April 1993
9 (6th Edition)	Proposals of the Committee on Unlawful Interference with the assistance of the Aviation Security Panel (AVSECP) and Council action in pursuance of Assembly Resolution A31-4	This amendment includes the introduction of new provisions in relation to the pre-employment checks and capabilities of persons engaged in implementing security controls, baggage accountability and authorization, measures to be applied to catering supplies and operators' stores and supplies, tests for programme effectiveness, and need for notification to the State of known or presumed destination of aircraft under a seized condition.	12 November 1996 31 March 1997 1 August 1997

INTERNATIONAL STANDARDS AND RECOMMENDED PRACTICES

CHAPTER 1. DEFINITIONS

Air side. The movement area of an airport, adjacent terrain and buildings or portions thereof, access to which is controlled.

Regulated Agent. An agent, freight forwarder or any other entity who conducts business with an operator and provides security controls that are accepted or required by the appropriate authority in respect of cargo, courier and express parcels or mail.

Note.— The term "Known shipper" has been amended to "Regulated Agent" to take into account the different security controls applied to originators of cargo and those entities that consolidate and forward cargo shipments via an air carrier.

Screening. The application of technical or other means which are intended to detect weapons, explosives or other dangerous devices which may be used to commit an act of unlawful interference.

Security. A combination of measures and human and material resources intended to safeguard international civil aviation against acts of unlawful interference.

Security Control. A means by which the introduction of weapons, explosives or articles likely to be utilized to commit an act of unlawful interference can be prevented.

Security Programme. Measures adopted to safeguard international civil aviation against acts of unlawful interference.

CHAPTER 2. GENERAL

2.1 Aims and objectives

2.1.1 The aim of aviation security shall be to safeguard international civil aviation operations against acts of unlawful interference.

2.1.2 Safety of passengers, crew, ground personnel and the general public shall be the primary objective of each Contracting State in all matters related to safeguarding against acts of unlawful interference with international civil aviation.

2.1.3 Each Contracting State shall establish an organization, develop plans and implement procedures, which together provide a standardized level of security for the operation of international flights in normal operating conditions and which are capable of rapid expansion to meet any increased security threat.

2.2 Security and facilitation

2.2.1 **Recommendation.**— *Each Contracting State should whenever possible arrange for the security measures and procedures to cause a minimum of interference with, or delay to the activities of, international civil aviation.*

Note.— Guidance material on achieving international civil aviation security objectives through application of the Standards and Recommended Practices in the following chapters is to be found in the Security Manual for Safeguarding Civil Aviation Against Acts of Unlawful Interference *(Doc 8973).*

CHAPTER 3. ORGANIZATION

3.1 National organization

3.1.1 Each Contracting State shall establish a national civil aviation security programme.

3.1.2 Each Contracting State shall ensure that the objective of their national civil aviation security programme shall be to safeguard international civil aviation operations against acts of unlawful interference, through regulations, practices and procedures which take account of the safety, regularity and efficiency of flights.

3.1.3 Each Contracting State shall designate an appropriate authority within its administration to be responsible for the development, implementation and maintenance of the national civil aviation security programme.

3.1.4 Each Contracting State shall specify to ICAO the appropriate authority designated under 3.1.3.

3.1.5 Each Contracting State shall keep under constant review the level of threat within its territory taking into account the international situation and adjust relevant elements of its national civil aviation security programme accordingly.

3.1.6 Each Contracting State shall require the appropriate authority to establish means of co-ordinating activities between the departments, agencies and other organizations of the State concerned with or responsible for various aspects of the national civil aviation security programme.

3.1.7 Each Contracting State shall require the appropriate authority to define and allocate the tasks for implementation of the national civil aviation security programme as between agencies of the State, airport administrations, operators and others concerned.

3.1.8 Each Contracting State shall ensure the establishment of an airport security programme, adequate to the needs of international traffic, for each airport serving international civil aviation.

3.1.9 **Recommendation.**— *Each Contracting State should make available to its airport administrations, airlines operating in its territory and others concerned, a written version of the appropriate parts of its national civil aviation security programme.*

3.1.10 Each Contracting State shall arrange for an authority at each airport serving international civil aviation to be responsible for co-ordinating the implementation of security measures.

3.1.11 Each Contracting State shall arrange for the establishment of airport security committees to advise on the development and co-ordination of security measures and procedures at each airport serving international civil aviation.

3.1.12 **Recommendation.**— *Each Contracting State should ensure that arrangements are made for the investigation of suspected sabotage devices or other potential hazards at airports serving international civil aviation and for their disposal.*

3.1.13 Each Contracting State shall ensure that duly authorized and suitably trained officers are readily available for deployment at their airports serving international civil aviation to assist in dealing with suspected, or actual, cases of unlawful interference with international civil aviation.

3.1.14 Each Contracting State shall ensure that the appropriate authority arranges for the supporting facilities required by the security services at each airport serving international civil aviation.

3.1.15 Each Contracting State shall ensure that contingency plans are developed and resources made available to safeguard airports and ground facilities used in international civil aviation, against acts of unlawful interference.

3.1.16 Each Contracting State shall require the appropriate authority to ensure the development and implementation of training programmes to ensure the effectiveness of its national civil aviation security programme.

3.1.17 **Recommendation.**— *Each Contracting State should ensure that persons engaged to implement security controls are subject to pre-employment checks, are capable of fulfilling their duties and are adequately trained.*

3.1.18 Each Contracting State shall require operators providing service from that State to implement a security programme appropriate to meet the requirements of the national civil aviation security programme of that State.

3.1.19 **Recommendation.**— *Each Contracting State should promote whenever possible research and development of new security equipment which will better satisfy international civil aviation security objectives.*

3.2 International co-operation

3.2.1 Each Contracting State shall co-operate with other States in order to adapt their respective national civil aviation security programmes as necessary.

3.2.1.1 **Recommendation.—** *Each Contracting State should make available to other States on request a written version of the appropriate parts of its national civil aviation security programme.*

3.2.1.2 **Recommendation.—** *Each Contracting State should include in its bilateral agreements on air transport a clause related to aviation security.*

3.2.2 Each Contracting State shall ensure that requests from other States for special security measures in respect of a specific flight or specified flights by operators of such other States, as far as may be practicable, are met.

3.2.3 Contracting States shall, as necessary, co-operate with each other in the development and exchange of information concerning training programmes.

3.2.4 **Recommendation.—** *Each Contracting State should co-operate with other States in the field of research and development of new security equipment which will better satisfy international civil aviation security objectives.*

CHAPTER 4. PREVENTIVE SECURITY MEASURES

4.1 General objectives of the measures

4.1.1 Each Contracting State shall establish measures to prevent weapons, explosives or any other dangerous devices which may be used to commit an act of unlawful interference, the carriage or bearing of which is not authorized, from being introduced, by any means whatsoever, on board an aircraft engaged in international civil aviation.

Note.— In applying this Standard, special attention must be paid to the threat posed by explosive devices concealed in, or using electric, electronic or battery-operated items carried as hand baggage and/or in checked baggage. Guidance on this matter is to be found in the Security Manual for Safeguarding Civil Aviation Against Acts of Unlawful Interference *(Doc 8973).*

4.1.2 **Recommendation.—** *Contracting States should ensure that the carriage of weapons on board aircraft, by law enforcement officers and other authorized persons, acting in the performance of their duties, requires special authorization in accordance with the laws of the States involved.*

4.1.2.1 **Recommendation.—** *Contracting States should ensure that the carriage of weapons in other cases is allowed only when an authorized and duly qualified person has determined that they are not loaded, if applicable, and then only if stowed in a place inaccessible to any person during flight time.*

4.1.2.2 **Recommendation.—** *Contracting States should ensure that the pilot-in-command is notified as to the number of armed persons and their seat location.*

4.1.3 Each Contracting State shall ensure that pre-flight checks of originating aircraft assigned to international flights include measures to discover suspicious objects or anomalies that could conceal weapons, explosives or any other dangerous devices.

4.1.4 Each Contracting State shall establish procedures, which include notification to the operator, for inspecting aircraft, when a well-founded suspicion exists that the aircraft may be the object of an act of unlawful interference, for concealed weapons, explosives or other dangerous devices.

4.1.5 Each Contracting State shall establish measures to safeguard aircraft when a well-founded suspicion exists that the aircraft may be attacked while on the ground and to provide as much prior notification as possible of the arrival of such aircraft to airport authorities.

4.1.6 Each Contracting State shall arrange for surveys to identify security needs, arrange for inspections of the implementation of security controls, and arrange tests of security controls to assess their effectiveness.

4.2 Measures relating to passengers and their cabin baggage

4.2.1 Each Contracting State shall ensure that adequate measures are taken to control transfer and transit passengers and their cabin baggage to prevent unauthorized articles from being taken on board aircraft engaged in international civil aviation operations.

4.2.2 Each Contracting State shall ensure that there is no possibility of mixing or contact between passengers subjected to security control and other persons not subjected to such control after the security screening points at airports serving international civil aviation have been passed; if mixing or contact does take place, the passengers concerned and their cabin baggage shall be re-screened before boarding an aircraft.

4.2.3 Each Contracting State shall establish measures to ensure that the aircraft operator and the pilot-in-command are informed when passengers are obliged to travel because they have been the subject of judicial or administrative proceedings, in order that appropriate security measures can be taken.

4.2.4 **Recommendation.—** *Each Contracting State should require operators providing service from that State, to include in their security programmes, measures and procedures to ensure safety on board their aircraft when passengers are to be carried who are obliged to travel because they have been the subject of judicial or administrative proceedings.*

4.2.5 Each Contracting State shall require measures to be taken in respect of flights under an increased threat to ensure that disembarking passengers do not leave items on board the aircraft at transit stops on its airports.

4.3 Measures relating to checked baggage, cargo and other goods

4.3.1 Each Contracting State shall establish measures to ensure that operators when providing service from that State do not transport the baggage of passengers who are not on board the aircraft unless the baggage separated from passengers is subjected to other security control measures.

4.3.2 **Recommendation.**— *Each Contracting State should establish measures to ensure that operators when providing a service from that State transport only baggage which is authorized for carriage.*

4.3.3 **Recommendation.**— *Each Contracting State should establish measures to ensure that checked baggage is subjected to screening before being placed on board aircraft.*

4.3.4 Each Contracting State shall establish measures to ensure that consignments checked-in as baggage by couriers for carriage on passenger flights are subjected to specific security controls in addition to those provided in 4.3.1.

4.3.5 Each Contracting State shall establish measures to ensure that baggage intended for carriage on passenger flights and originating from places other than airport check-in counters is protected from the point it is checked in until it is placed on board an aircraft.

4.3.6 Each Contracting State shall ensure the implementation of measures at airports serving international civil aviation to protect cargo, baggage, mail, stores and operators' supplies being moved within an airport and intended for carriage on an aircraft to safeguard such aircraft against an act of unlawful interference.

4.3.7 **Recommendation.**— *Each Contracting State should establish measures to ensure that catering supplies and operators' stores and supplies intended for carriage on passenger flights are subjected to security controls.*

4.3.8 Each Contracting State shall establish measures to ensure that cargo, courier and express parcels and mail intended for carriage on passenger flights are subjected to appropriate security controls.

4.3.9 Each Contracting State shall establish measures to ensure that operators do not accept consignments of cargo, courier and express parcels or mail for carriage on passenger flights unless the security of such consignments is accounted for by a regulated agent or such consignments are subjected to other security controls to meet the requirements of 4.3.8.

4.3.10 Each Contracting State shall require the establishment of secure storage areas at airports serving international civil aviation, where mishandled baggage may be held until forwarded, claimed or disposed of in accordance with local laws.

4.3.11 **Recommendation.**— *Each Contracting State should take the necessary measures to ensure that unidentified baggage is placed in a protected and isolated area until such time as it is ascertained that it does not contain any explosives or other dangerous device.*

4.4 Measures relating to access control

4.4.1 Each Contracting State shall establish procedures and identification systems to prevent unauthorized access by persons or vehicles to:

a) the air side of an airport serving international civil aviation; and

b) other areas important to the security of the airport.

4.4.2 Each Contracting State shall establish measures to ensure adequate supervision over the movement of persons to and from the aircraft and to prevent unauthorized access to aircraft.

4.5 Measures relating to airport design

Each Contracting State shall ensure that the architectural and infrastructure-related requirements necessary for the optimum implementation of international civil aviation security measures, are integrated into the design and construction of new facilities and alterations to existing facilities at airports.

CHAPTER 5. MANAGEMENT OF RESPONSE TO ACTS OF UNLAWFUL INTERFERENCE

5.1 Operational aspects of an act of unlawful interference

5.1.1 Each Contracting State shall take adequate measures for the safety of passengers and crew of an aircraft which is subjected to an act of unlawful interference until their journey can be continued.

5.1.2 Each Contracting State responsible for providing air traffic services for an aircraft which is the subject of an act of unlawful interference shall collect all pertinent information on the flight of that aircraft and transmit that information to all other States responsible for the Air Traffic Services units concerned, including those at the airport of known or presumed destination, so that timely and appropriate safeguarding action may be taken en route and at the aircraft's known, likely or possible destination.

5.1.3 **Recommendation.—** *Each Contracting State should ensure that information received as a consequence of action taken in accordance with 5.1.2 is distributed locally to the Air Traffic Services units concerned, the appropriate airport administrations, the operator and others concerned as soon as practicable.*

5.1.4 Each Contracting State shall provide such assistance to an aircraft subjected to an act of unlawful seizure, including the provision of navigation aids, air traffic services and permission to land as may be necessitated by the circumstances.

5.1.5 Each Contracting State shall take measures, as it may find practicable, to ensure that an aircraft subjected to an act of unlawful seizure which has landed in its territory is detained on the ground unless its departure is necessitated by the overriding duty to protect human life, recognizing the importance of consultations, wherever practicable, between the State where that aircraft has landed and the State of the operator of the aircraft, and notification by the State where the aircraft has landed to the States of assumed or stated destination.

5.2 Reports

5.2.1 **Recommendation.—** *Each Contracting State should exchange information with other States as considered appropriate, at the same time supplying such information to ICAO, related to plans, designs, equipment, methods and procedures for safeguarding international civil aviation against acts of unlawful interference.*

5.2.2 A Contracting State in which an aircraft subjected to an act of unlawful interference has landed shall notify by the most expeditious means the State of Registry of the aircraft and the State of the operator of the landing and shall similarly transmit by the most expeditious means all other relevant information to:

a) the two above-mentioned States;

b) each State whose citizens suffered fatalities or injuries;

c) each State whose citizens were detained as hostages;

d) each Contracting State whose citizens are known to be on board the aircraft; and

e) the International Civil Aviation Organization.

5.2.3 Each Contracting State concerned with an act of unlawful interference shall require its appropriate authority to re-evaluate security measures and procedures in respect of international flights which have been the subject of unlawful interference and take action necessary to remedy weaknesses so as to prevent recurrence.

5.2.4 Each Contracting State concerned with an act of unlawful interference shall provide ICAO with all pertinent information concerning the security aspects of the act of unlawful interference as soon as practicable after the act is resolved.

5.2.5 **Recommendation.—** *Each Contracting State should adopt measures to ensure that persons acting in an official capacity do not divulge confidential information concerning an act of unlawful interference if such information is likely to jeopardize the safety of international civil aviation.*

ATTACHMENT TO ANNEX 17

EXTRACTS FROM *ANNEX 2 — RULES OF THE AIR*

CHAPTER 3. GENERAL RULES

. . . . . .

3.7 Unlawful interference

An aircraft which is being subjected to unlawful interference shall endeavour to notify the appropriate ATS unit of this fact, any significant circumstances associated therewith and any deviation from the current flight plan necessitated by the circumstances, in order to enable the ATS unit to give priority to the aircraft and to minimize conflict with other aircraft.

Note 1.— Responsibility of ATS units in situations of unlawful interference is contained in Annex 11.

Note 2.— Guidance material for use when unlawful interference occurs and the aircraft is unable to notify an ATS unit of this fact is contained in Attachment B to this Annex.

Note 3.— Action to be taken by SSR equipped aircraft which are being subjected to unlawful interference is contained in Annex 11, the PANS-RAC (Doc 4444) and the PANS-OPS (Doc 8168).

. . . . . .

ATTACHMENT B. UNLAWFUL INTERFERENCE

1. General

The following procedures are intended as guidance for use by aircraft when unlawful interference occurs and the aircraft is unable to notify an ATS unit of this fact.

2. Procedures

2.1 Unless considerations aboard the aircraft dictate otherwise, the pilot-in-command should attempt to continue flying on the assigned track and at the assigned cruising level at least until able to notify an ATS unit or within radar coverage.

2.2 When an aircraft subjected to an act of unlawful interference must depart from its assigned track or its assigned cruising level without being able to make radiotelephony contact with ATS, the pilot-in-command should, whenever possible:

a) attempt to broadcast warnings on the VHF emergency frequency and other appropriate frequencies, unless considerations aboard the aircraft dictate otherwise. Other equipment such as on-board transponders, data links, etc., should also be used when it is advantageous to do so and circumstances permit; and

b) proceed in accordance with applicable special procedures for in-flight contingencies, where such procedures have been established and promulgated in Doc 7030 — *Regional Supplementary Procedures*; or

c) if no applicable regional procedures have been established, proceed at a level which differs from the cruising levels normally used for IFR flight in the area by 300 m (1 000 ft) if above FL 290 or by 150 m (500 ft) if below FL 290.

Note.— Action to be taken by an aircraft which is intercepted while being subject to an act of unlawful interference is prescribed in 3.8 of this Annex.

EXTRACTS FROM *ANNEX 6 — OPERATION OF AIRCRAFT*
PART I — *INTERNATIONAL COMMERCIAL AIR TRANSPORT — AEROPLANES*

CHAPTER 13. SECURITY*

13.1 Security of the flight crew compartment

In all aeroplanes which are equipped with a flight crew compartment door, this door shall be capable of being locked. It shall be lockable from within the compartment only.

13.2 Aeroplane search procedure checklist

An operator shall ensure that there is on board a checklist of the procedures to be followed in searching for a bomb in case of suspected sabotage. The checklist shall be supported by guidance on the course of action to be taken should a bomb or suspicious object be found and information on the least-risk bomb location specific to the aeroplane.

13.3 Training programmes

13.3.1 An operator shall establish and maintain a training programme which enables crew members to act in the most appropriate manner to minimize the consequences of acts of unlawful interference.

13.3.2 An operator shall also establish and maintain a training programme to acquaint appropriate employees with preventive measures and techniques in relation to passengers, baggage, cargo, mail, equipment, stores and supplies intended for carriage on an aeroplane so that they contribute to the prevention of acts of sabotage or other forms of unlawful interference.

13.4 Reporting acts of unlawful interference

Following an act of unlawful interference the pilot-in-command shall submit, without delay, a report of such an act to the designated local authority.

13.5 Miscellaneous

13.5.1 **Recommendation.—** *Specialized means of attenuating and directing the blast should be provided for use at the least-risk bomb location.*

13.5.2 **Recommendation.—** *Where an operator accepts the carriage of weapons removed from passengers, the aeroplane should have provision for stowing such weapons in a place so that they are inaccessible to any person during flight time.*

---

* In the context of this Chapter, the word "security" is used in the sense of prevention of illicit acts against civil aviation.

EXTRACTS FROM *ANNEX 9 — FACILITATION*

CHAPTER 1. DEFINITIONS AND APPLICABILITY

A. Definitions

. . . . . .

Security equipment. Devices of a specialized nature for use, individually or as part of a system, in the prevention or detection of acts of unlawful interference with civil aviation and its facilities.

. . . . . .

CHAPTER 2. ENTRY AND DEPARTURE OF AIRCRAFT

A. General

. . . . . .

2.2 Contracting States shall make provision whereby procedures for the clearance of aircraft, including those normally applied for aviation security purposes, as well as those appropriate for narcotics control, will be applied and carried out in such a manner as to retain the advantage of speed inherent in air transport.

Note 1.— With respect to application of aviation security measures, attention is drawn to Annex 17 and to the ICAO Security Manual.

. . . . . .

CHAPTER 3. ENTRY AND DEPARTURE OF PERSONS AND THEIR BAGGAGE

A. General

. . . . . .

3.2 Contracting States shall make provision whereby the procedures for clearance of persons travelling by air, including those normally applied for aviation security purposes, as well as those appropriate for narcotics control, will be applied and carried out in such a manner as to retain the advantage of speed inherent in air transport.

Note 1.— With respect to application of aviation security measures, attention is drawn to Annex 17 and to the ICAO Security Manual.

Note 2.— With respect to application of appropriate narcotics control measures, attention is drawn to the relevant ICAO publication (currently in preparation).

. . . . . .

C. Departure Requirements and Procedures

. . . . . .

3.29 **Recommended Practice.—** *Contracting States should, in conformity with their respective regulations, endeavour to reduce the documentation required to be produced by passengers departing from their territories to a valid passport or other acceptable form of identity document.*

Note.— It is not the intent of the above provision to discourage Contracting States, who wish to be more liberal, from accepting official documents of identity such as expired passports, national registration cards, seafarers' identity documents, alien resident permits, crew member certificates, etc. in lieu of a valid passport.

3.30 **Recommended Practice.—** *Contracting States should not require presentation of baggage of passengers departing from their territory except for aviation security measures, or in special circumstances.*

Note.— This provision is not intended to prevent the application of appropriate narcotics control measures.

. . . . . .

CHAPTER 4. ENTRY AND DEPARTURE OF CARGO AND OTHER ARTICLES

A. General

. . . . . .

4.2 Contracting States shall make provisions whereby procedures for the clearance of goods carried by air and for the interchange of air cargo with surface transport, including

those normally applied for aviation security purposes as well as those appropriate for narcotics control, will be applied and carried out in such a manner as to retain the advantage of speed inherent in air transport and to avoid delay.

Note 1.— With respect to application of aviation security measures, attention is drawn to Annex 17 and to the ICAO Security Manual.

Note 2.— With respect to application of appropriate narcotics control measures, attention is drawn to the relevant ICAO publication (currently in preparation).

. . . . . .

C. Clearance of Export Cargo

. . . . . .

4.11 Contracting States shall make arrangements consistent with aviation security, as well as those appropriate for narcotics control, which permit operators to select and load cargo, including unaccompanied baggage, and stores on outbound aircraft up to the time of departure.

. . . . . .

4.13 Except for reasons of aviation security Contracting States shall not normally require physical examination of cargo, including unaccompanied baggage, to be exported by air.

Note.— This provision is not intended to prevent authorities from examining goods exported under certain conditions, e.g. under bond, licence or drawback, nor is it intended to preclude other essential examinations including any appropriate narcotics control measures.

. . . . . .

4.15 Contracting States shall permit cargo, including unaccompanied baggage which is to be exported by air, to be presented for clearance purposes at any approved customs office. Transfer from the first office to the air customs office of the airport where the cargo, including unaccompanied baggage, is to be laden on the aircraft, shall be effected in accordance with the procedure laid down in the laws and regulations of the State concerned. Such procedure shall be as simple as possible, making due allowance for aviation security requirements, and any appropriate narcotics control measures.

. . . . . .

G. Aircraft Equipment, Stores and Parts

. . . . . .

4.44 **Recommended Practice.**— *Ground equipment and security equipment imported into the territory of a Contracting State by an airline of another Contracting State for use within the limits of an international airport in connexion with the establishment or maintenance of an international service operated by that airline should be admitted free of customs duties and, as far as possible, other taxes and charges, subject to compliance with the regulations of the Contracting State concerned. Such regulations should not unreasonably interfere with the necessary use by the airline concerned of such ground equipment and security equipment.*

Note.— It is the intent of this provision that items such as the following should be admissible under the above provision, and it is not desired to discourage a Contracting State from allowing once-admitted items to be used by another foreign airline or at a location other than an international airport:

. . . . . .

e) Security equipment:

— *weapon-detecting devices;*

— *explosives-detecting devices;*

— *intrusion-detecting devices.*

f) Component parts for incorporation into security equipment.

. . . . . .

4.47 Contracting States shall establish procedures for airlines and/or operators of other Contracting States allowing the prompt entry into or departure from their territories of aircraft equipment, spare parts, ground, training and security equipment, whether or not they are free of customs duties and other taxes and charges, under the provisions of this Annex or any other arrangements. Contracting States shall grant prompt clearance for the importation and exportation of such goods upon completion of simplified documentary procedures by the airlines or operators concerned. These arrangements shall not extend to goods intended for general sale, food, beverages and tobacco.

. . . . . .

4.49 Contracting States shall allow the loan of aircraft equipment and spare parts and security equipment and spare parts between airlines, when these are used in connexion with the establishment or maintenance of scheduled international air services, without payment of customs duties or other taxes or charges subject only to control measures which may provide that repayment of the loan is normally to be accomplished by means of the return of articles that are

qualitatively and technically similar and of the same origin, and in any event that no profit-making transaction is involved.

. . . . . .

CHAPTER 6. INTERNATIONAL AIRPORTS — FACILITIES AND SERVICES FOR TRAFFIC

A. General

6.1 Contracting States shall take all necessary steps to secure the co-operation of operators and airport administrations in ensuring that satisfactory facilities and services are provided for rapid handling and clearance of passengers, crew, baggage, cargo and mail at their international airports. Such facilities and services shall be flexible and capable of expansion to meet anticipated growth in traffic volume, or increased security measures during higher threat situations, while permitting appropriate narcotics control measures.

Note 1.— With respect to the application of aviation security measures, attention is drawn to the relevant specification in Annex 17, Chapter 2 [2.2.1].

Note 2.— With respect to the application of appropriate narcotics control measures, attention is drawn to the relevant ICAO publication (currently in preparation).

. . . . . .

B. Airport Traffic Flow Arrangements

. . . . . .

III. Outbound Passengers, Crew and Baggage

. . . . . .

6.21 **Recommended Practice.**— *In order to facilitate aircraft departure, Contracting States, in examining passengers as a security measure, or for purposes of narcotics control as appropriate, should, to the extent feasible, utilize specialized equipment in conducting such examinations so as to reduce materially the number of persons to be searched by other means.*

Note 1.— The use of radiological techniques for screening passengers should be avoided.

Note 2.— Privacy should be assured when a thorough physical search is to be carried out. If special rooms are not available, portable screens may be used for this purpose.

6.22 **Recommended Practice.**— *In order to facilitate aircraft departure, Contracting States, in examining baggage of passengers departing from their territory as a security measure, or for narcotics control purposes as appropriate, should, to the extent feasible, utilize specialized equipment in conducting such examinations so as to reduce materially the amount of baggage to be searched by other means.*

. . . . . .

V. Transit and Transfer of Passengers and Crew

. . . . . .

6.33 **Recommended Practice.**— *Contracting States should ensure that physical facilities at airports are provided, where the volume and nature of the traffic so require, whereby crew and passengers in direct transit on the same aircraft, or transferring to other flights, may remain temporarily without being subject to inspection formalities, except for aviation security measures, or in special circumstances.*

Note.— This provision is not intended to prevent the application of appropriate narcotics control measures.

. . . . . .

VII. Cargo and Mail Handling and Clearance Facilities

. . . . . .

6.44 **Recommended Practice.**— *Adequate space should be available in cargo terminals for storage and handling of air cargo, including building up and breaking down of pallet and container loads, located next to the customs area and easily accessible to authorized persons and vehicles from both the apron and the landside road. Such arrangements should take into account aviation security and appropriate narcotics control measures.*

. . . . . .

6.46 **Recommended Practice.**— *Cargo terminals should be equipped with storage facilities as appropriate for special cargo (e.g. valuable goods, perishable shipments, human remains, radioactive and other dangerous goods, as well as live animals). Those areas of cargo terminals in which cargo and mail are stored overnight or for extended periods prior to shipment by air should be protected against access by unauthorized persons.*

. . . . . .

CHAPTER 8. OTHER FACILITATION PROVISIONS

A. Bonds and Exemption from Requisition or Seizure

. . . . . .

8.2 **Recommended Practice.**— *The aircraft, ground equipment, security equipment, spare parts and technical supplies of an airline located in a Contracting State (other than the Contracting State in which such airline is established) for use in the operation of an international air service serving such Contracting State, should be exempt from the laws of such Contracting State authorizing the requisition or seizure of aircraft, equipment, parts or supplies for public use, without prejudice to the right of seizure for breaches of the laws of the Contracting State concerned.*

EXTRACTS FROM *ANNEX 10 — AERONAUTICAL TELECOMMUNICATIONS*, VOLUME IV *(SURVEILLANCE RADAR AND COLLISION AVOIDANCE SYSTEMS)*

CHAPTER 2. GENERAL

2.1 SECONDARY SURVEILLANCE RADAR (SSR)

. . . . . .

2.1.4 Mode A reply codes (information pulses)

. . . . . .

2.1.4.2.1 Code 7700 to provide recognition of an aircraft in an emergency.

. . . . . .

2.1.4.2.3 Code 7500 to provide recognition of an aircraft which is being subjected to unlawful interference.

2.1.4.3 Appropriate provisions shall be made in ground decoding equipment to ensure immediate recognition of Mode A codes 7500, 7600 and 7700.

EXTRACTS FROM *ANNEX 11 — AIR TRAFFIC SERVICES*

CHAPTER 2. GENERAL

. . . . . .

2.22 Service to aircraft in the event of an emergency

2.22.1 An aircraft known or believed to be in a state of emergency, including being subjected to unlawful interference, shall be given maximum consideration, assistance and priority over other aircraft as may be necessitated by the circumstances.

Note.— To indicate that it is in a state of emergency, an aircraft equipped with an SSR transponder might operate the equipment as follows:

a) on Mode A, Code 7700; or

b) on Mode A, Code 7500, to indicate specifically that it is being subjected to unlawful interference.

2.22.2 When an occurrence of unlawful interference with an aircraft takes place or is suspected, ATS units shall attend promptly to requests by the aircraft. Information pertinent to the safe conduct of the flight shall continue to be transmitted and necessary action shall be taken to expedite the conduct of all phases of the flight, specially the safe landing of the aircraft.

. . . . . .

CHAPTER 5. ALERTING SERVICE

5.1 Application

5.1.1 Alerting service shall be provided:

. . . . . .

c) to any aircraft known or believed to be the subject of unlawful interference.

. . . . . .

5.2 Notification of rescue co-ordination centres

5.2.1 Without prejudice to any other circumstances that may render such notification advisable, air traffic services units shall, except as prescribed in 5.5.1, notify rescue co-ordination centres immediately an aircraft is considered to be in a state of emergency in accordance with the following:

. . . . . .

b) *Alert phase* when:

. . . . . .

except when evidence exists that would allay apprehension as to the safety of the aircraft and its occupants, or when

4) an aircraft is known or believed to be the subject of unlawful interference.

. . . . . .

5.5 Information to the operator

5.5.1 When an area control or a flight information centre decides that an aircraft is in the uncertainty or the alert phase, it shall, when practicable, advise the operator prior to notifying the rescue co-ordination centre.

Note.— If an aircraft is in the distress phase, the rescue co-ordination centre has to be notified immediately in accordance with 5.2.1.

5.5.2 All information notified to the rescue co-ordination centre by an area control or flight information centre shall, whenever practicable, also be communicated, without delay, to the operator.

5.6 Information to aircraft operating in the vicinity of an aircraft in a state of emergency

5.6.1 When it has been established by an air traffic services unit that an aircraft is in a state of emergency, other aircraft known to be in the vicinity of the aircraft involved shall, except as provided in 5.6.2, be informed of the nature of the emergency as soon as practicable.

5.6.2 When an air traffic services unit knows or believes that an aircraft is being subjected to unlawful interference, no reference shall be made in ATS air-ground communications to the nature of the emergency unless it has first been referred to in communications from the aircraft involved and it is certain that such reference will not aggravate the situation.

EXTRACTS FROM *ANNEX 13 — AIRCRAFT ACCIDENT AND INCIDENT INVESTIGATION*

CHAPTER 5. INVESTIGATION

. . . . . .

ORGANIZATION AND CONDUCT OF THE INVESTIGATION

. . . . . .

RESPONSIBILITY OF THE STATE CONDUCTING THE INVESTIGATION

. . . . . .

Informing aviation security authorities

5.11 If, in the course of an investigation it becomes known, or it is suspected, that an act of unlawful interference was involved, the investigator-in-charge shall immediately initiate action to ensure that the aviation security authorities of the State(s) concerned are so informed.

EXTRACTS FROM *ANNEX 14 — AERODROMES*, VOLUME I — *AERODROME DESIGN AND OPERATIONS*

CHAPTER 3. PHYSICAL CHARACTERISTICS

. . . . . .

3.13 Isolated aircraft parking position

3.13.1 An isolated aircraft parking position shall be designated or the aerodrome control tower shall be advised of an area or areas suitable for the parking of an aircraft which is known or believed to be the subject of unlawful interference, or which for other reasons needs isolation from normal aerodrome activities.

3.13.2 **Recommendation.—** *The isolated aircraft parking position should be located at the maximum distance practicable and in any case never less than 100 m from other parking positions, buildings or public areas, etc. Care should be taken to ensure that the position is not located over underground utilities such as gas and aviation fuel and, to the extent feasible, electrical or communication cables.*

. . . . . .

CHAPTER 5. VISUAL AIDS FOR NAVIGATION

. . . . . .

5.3 Lights

. . . . . .

5.3.20 Apron floodlighting
(see also 5.3.15.1 and 5.3.16.1)

Application

5.3.20.1 **Recommendation.—** *Apron floodlighting should be provided on an apron, and on a designated isolated aircraft parking position, intended to be used at night.*

Note 1.— The designation of an isolated aircraft parking position is specified in 3.13.

Note 2.— Guidance on apron floodlighting is given in the Aerodrome Design Manual, *Part 4.*

. . . . . .

CHAPTER 8. EQUIPMENT AND INSTALLATIONS

8.1 Secondary power supply

General

Application

8.1.1 **Recommendation.**— *A secondary power supply should be provided, capable of supplying the power requirements of at least the aerodrome facilities listed below:*

. . . . . .

e) essential security lighting, if provided in accordance with 8.5;

. . . . . .

8.4 Fencing

Application

. . . . . .

8.4.2 **Recommendation.**— *A fence or other suitable barrier should be provided on an aerodrome to deter the inadvertent or premeditated access of an unauthorized person onto a non-public area of the aerodrome.*

Note 1.— This is intended to include the barring of sewers, ducts, tunnels, etc., where necessary to prevent access.

Note 2.— Special measures may be required to prevent the access of an unauthorized person to runways or taxiways which overpass public roads.

8.4.3 **Recommendation.**— *Suitable means of protection should be provided to deter the inadvertent or premeditated access of unauthorized persons into ground installations and facilities essential for the safety of civil aviation located off the aerodrome.*

Location

8.4.4 **Recommendation.**— *The fence or barrier should be located so as to separate the movement area and other facilities or zones on the aerodrome vital to the safe operation of aircraft from areas open to public access.*

8.4.5 **Recommendation.**— *When greater security is thought necessary, a cleared area should be provided on both sides of the fence or barrier to facilitate the work of patrols and to make trespassing more difficult. Consideration should be given to the provision of a perimeter road inside the aerodrome fencing for the use of both maintenance personnel and security patrols.*

8.5 Security lighting

Recommendation.— *At an aerodrome where it is deemed desirable for security reasons, a fence or other barrier provided for the protection of international civil aviation and its facilities should be illuminated at a minimum essential level. Consideration should be given to locating lights so that the ground area on both sides of the fence or barrier, particularly at access points, is illuminated.*

. . . . . .

CHAPTER 9. EMERGENCY AND OTHER SERVICES

9.1 Aerodrome emergency planning

General

Introductory Note.— Aerodrome emergency planning is the process of preparing an aerodrome to cope with an emergency occurring at the aerodrome or in its vicinity. The objective of aerodrome emergency planning is to minimize the effects of an emergency, particularly in respect of saving lives and maintaining aircraft operations. The aerodrome emergency plan sets forth the procedures for co-ordinating the response of different aerodrome agencies (or services) and of those agencies in the surrounding community that could be of assistance in responding to the emergency. Guidance material to assist the appropriate authority in establishing aerodrome emergency planning is given in the Airport Services Manual, *Part 7.*

9.1.1 An aerodrome emergency plan shall be established at an aerodrome, commensurate with the aircraft operations and other activities conducted at the aerodrome.

9.1.2 The aerodrome emergency plan shall provide for the co-ordination of the actions to be taken in an emergency occurring at an aerodrome or in its vicinity.

Note.— Examples of emergencies are: aircraft emergencies, sabotage including bomb threats, unlawfully seized aircraft, dangerous goods occurrences, building fires and natural disasters.

9.1.3 The plan shall co-ordinate the response or participation of all existing agencies which, in the opinion of the appropriate authority, could be of assistance in responding to an emergency.

Note.— Examples of agencies are:

— on the aerodrome: air traffic control unit, rescue and fire fighting services, aerodrome administration, medical and ambulance services, aircraft operators, security services, and police;

— off the aerodrome: fire departments, police, medical and ambulance services, hospitals, military, and harbour patrol or coast guard.

9.1.4 **Recommendation.—** *The plan should provide for co-operation and co-ordination with the rescue co-ordination centre, as necessary.*

9.1.5 **Recommendation.—** *The aerodrome emergency plan document should include at least the following:*

a) types of emergencies planned for;

b) agencies involved in the plan;

c) responsibility and role of each agency, the emergency operations centre and the command post, for each type of emergency;

d) information on names and telephone numbers of offices or people to be contacted in the case of a particular emergency; and

e) a grid map of the aerodrome and its immediate vicinity.

Emergency operations centre and command post

9.1.6 **Recommendation.—** *A fixed emergency operations centre and a mobile command post should be available for use during an emergency.*

9.1.7 **Recommendation.—** *The emergency operations centre should be a part of the aerodrome facilities and should be responsible for the over-all co-ordination and general direction of the response to an emergency.*

9.1.8 **Recommendation.—** *The command post should be a facility capable of being moved rapidly to the site of an emergency, when required, and should undertake the local co-ordination of those agencies responding to the emergency.*

9.1.9 **Recommendation.—** *A person should be assigned to assume control of the emergency operations centre and, when appropriate, another person the command post.*

Communication system

9.1.10 **Recommendation.—** *Adequate communication systems linking the command post and the emergency operations centre with each other and with the participating agencies should be provided in accordance with the plan and consistent with the particular requirements of the aerodrome.*

Aerodrome emergency exercise

9.1.11 The plan shall contain procedures for periodic testing of the adequacy of the plan and for reviewing the results in order to improve its effectiveness.

Note.— The plan includes all participating agencies and associated equipment.

9.1.12 The plan shall be tested by conducting:

a) a full-scale aerodrome emergency exercise at intervals not exceeding two years; and

b) partial emergency exercises in the intervening year to ensure that any deficiencies found during the full-scale aerodrome emergency exercise have been corrected; and

reviewed thereafter, or after an actual emergency, so as to correct any deficiency found during such exercises or actual emergency.

Note.— The purpose of a full-scale exercise is to ensure the adequacy of the plan to cope with different types of emergencies. The purpose of a partial exercise is to ensure the adequacy of the response to individual participating agencies and components of the plan, such as the communications system.

EXTRACTS FROM *ANNEX 18 — THE SAFE TRANSPORT OF DANGEROUS GOODS BY AIR*

CHAPTER 2. APPLICABILITY

. . . . . .

2.2 Dangerous Goods Technical Instructions

2.2.1 Each Contracting State shall take the necessary measures to achieve compliance with the detailed provisions contained in the *Technical Instructions for the Safe Transport of Dangerous Goods by Air* (Doc 9284), approved, issued and amended in accordance with the procedure established by the ICAO Council.

2.2.2 **Recommendation.—** *Each Contracting State should inform ICAO of difficulties encountered in the application of the Technical Instructions and of any amendments which it would be desirable to make to them.*

. . . . . .

CHAPTER 10. ESTABLISHMENT OF TRAINING PROGRAMMES

Dangerous goods training programmes shall be established and updated as provided for in the Technical Instructions.

PART 6 — TRAINING

Chapter 1
TRAINING

. . . . . .

1.1 ESTABLISHMENT OF TRAINING PROGRAMMES

1.1.1 Initial and recurrent dangerous goods training programmes must be established and maintained by or on behalf of:

. . . . . .

g) agencies engaged in the security screening of passengers and their baggage.

EXTRACTS FROM THE PROCEDURES FOR AIR NAVIGATION SERVICES — *RULES OF THE AIR AND AIR TRAFFIC SERVICES* (DOC 4444)

PART III. AREA CONTROL SERVICE

SEPARATION OF AIRCRAFT IN THE PROVISION OF AREA CONTROL SERVICE

1. General provisions for the separation of controlled traffic

. . . . . .

1.3 Larger separations than the specified minima should be applied whenever wake turbulence or exceptional circumstances such as unlawful interference call for extra precautions. This should be done with due regard to all relevant factors so as to avoid impeding the flow of air traffic by the application of excessive separations.

Note 1.— Unlawful interference with an aircraft constitutes a case of exceptional circumstances which might require the application of separations larger than the specified minima, between the aircraft being subjected to unlawful interference and other aircraft.

. . . . . .

EMERGENCY AND COMMUNICATION FAILURE

16. Emergency procedures

16.1 General

16.1.1 The various circumstances surrounding each emergency situation preclude the establishment of exact detailed procedures to be followed. The procedures outlined herein are intended as a general guide to air traffic services personnel. Air traffic control units shall maintain full and complete co-ordination, and personnel shall use their best judgement in handling emergency situations.

Note.— To indicate that it is in a state of emergency, an aircraft equipped with an SSR transponder might operate the equipment as follows:

a) on Mode A, Code 7700; or

b) on Mode A, Code 7500, to indicate specifically that it is being subjected to unlawful interference.

16.2 Priority

16.2.1 An aircraft known or believed to be in a state of emergency, including being subjected to unlawful interference, shall be given priority over other aircraft.

16.3 Unlawful interference

16.3.1 Air traffic services personnel shall be prepared to recognize any indication of the occurrence of unlawful interference with an aircraft.

16.3.2 Whenever unlawful interference with an aircraft is suspected, and where automatic distinct display of SSR Mode A Code 7500 and Code 7700 is not provided, the radar controller shall attempt to verify his suspicion by setting the SSR decoder to Mode A Code 7500 and thereafter to Code 7700.

Note.— An aircraft equipped with an SSR transponder is expected to operate the transponder on Mode A Code 7500 to indicate specifically that it is the subject of unlawful interference. The aircraft may operate the transponder on Mode A Code 7700, to indicate that it is threatened by grave and imminent danger, and requires immediate assistance.

16.3.3 Whenever unlawful interference with an aircraft is known or suspected, ATS units shall promptly attend to requests by or to anticipated needs of the aircraft, including requests for relevant information relating to air navigation facilities, procedures and services along the route of flight and at any aerodrome of intended landing, and shall take such action as is necessary to expedite the conduct of all phases of the flight.

16.3.3.1 ATS units shall also:

a) transmit, and continue to transmit, information pertinent to the safe conduct of the flight, without expecting a reply from the aircraft;

b) monitor and plot the progress of the flight with the means available, and co-ordinate transfer of control with adjacent ATS units without requiring transmissions or other responses from the aircraft, unless communication with the aircraft remains normal;

c) inform and continue to keep informed, appropriate ATS units, including those in adjacent flight information regions, which may be concerned with the progress of the flight;

Note.— In applying this provision, account must be taken of all the factors which may affect the progress of the flight, including fuel endurance and the possibility of sudden changes in route and destination. The objective is to provide, as far in advance as is practicable in the circumstances, each ATS unit with appropriate information as to the expected or possible penetration of the aircraft into its area of responsibility.

d) notify:

i) the operator or his designated representative;

ii) the appropriate rescue co-ordination centre in accordance with appropriate alerting procedures;

iii) the designated security authority;

Note.— It is assumed that the designated security authority and/or the operator will in turn notify other parties concerned in accordance with pre-established procedures.

e) relay appropriate messages, relating to the circumstances associated with the unlawful interference, between the aircraft and designated authorities.

. . . . . .

PART V. AERODROME CONTROL SERVICE

. . . . . .

CONTROL OF AERODROME TRAFFIC

. . . . . .

10. Control of taxiing aircraft

. . . . . .

Note.— See Figures V-4.

10.4 An aircraft known or believed to be the subject of unlawful interference or which for other reasons needs isolation from normal aerodrome activities shall be cleared to the designated isolated parking position. Where such an isolated parking position has not been designated, or if the designated position is not available, the aircraft shall be cleared to a position within the area or areas selected by prior agreement with the aerodrome authority. The taxi clearance shall specify the taxi route to be followed to the parking position. This route shall be selected with a view to minimizing any security risks to the public, other aircraft and installations at the aerodrome.

Note.— See Annex 14, Volume I, Chapter 3.

EXTRACTS FROM THE PROCEDURES FOR AIR NAVIGATION SERVICES — *AIRCRAFT OPERATIONS* (DOC 8168), VOLUME I — *FLIGHT PROCEDURES*

PART VIII. — SECONDARY SURVEILLANCE RADAR (SSR) TRANSPONDER OPERATING PROCEDURES

CHAPTER 1. OPERATION OF TRANSPONDERS

. . . . . .

1.4 EMERGENCY PROCEDURES

1.4.1 The pilot of an aircraft encountering a state of emergency shall set the transponder to Mode A Code 7700 except when previously directed by ATC to operate the transponder on a specified code. In the latter case the pilot shall maintain the specified code unless otherwise advised by ATC.

1.4.2 Notwithstanding the procedures at 1.4.1, a pilot may select Mode A Code 7700 whenever there is a specific reason to believe that this would be the best course of action.

. . . . . .

1.6 UNLAWFUL INTERFERENCE WITH AIRCRAFT IN FLIGHT

1.6.1 Should an aircraft in flight be subjected to unlawful interference, the pilot-in-command shall endeavour to set the transponder to Mode A Code 7500 to give indication of the situation unless circumstances warrant the use of Code 7700.

1.6.2 A pilot, having selected Mode A Code 7500 and subsequently requested to confirm this code by ATC in accordance with 1.1.5 shall, according to circumstances, either confirm this or not reply at all.

Note.— The absence of a reply from the pilot will be taken by ATC as an indication that the use of Code 7500 is not due to an inadvertent false code selection.

— END —

b. A31–A: Consolidated Statement of Continuing ICAO Policies Related to the Safeguarding of International Civil Aviation Against Acts of Unlawful Interference [1]

Whereas the development of international civil aviation can greatly help to create and preserve friendship and understanding among the nations and peoples of the world, yet its abuse can become a threat to general security;

Whereas the threat of terrorist acts, unlawful seizure of aircraft and other acts of unlawful interference against civil aviation, including acts aimed at destruction of aircraft, have a serious adverse effect on the safety, efficiency and regularity of international civil aviation, endanger the lives of aircraft passengers and crews and undermine the confidence of the peoples of the world in the safety of international civil aviation;

Whereas it is considered desirable to consolidate Assembly resolutions on the policies related to the safeguarding of international civil aviation against acts of unlawful interference in order to facilitate their implementation and practical application by making their texts more readily available, understandable and logically organized;

Whereas in Resolution A29–5 the Assembly resolved to adopt at each session a consolidated statement of continuing ICAO policies related to the safeguarding of international civil aviation against acts of unlawful interference; and

Whereas the Assembly has reviewed proposals by the Council for the amendment of the consolidated statement of continuing ICAO policies in Resolution A29–5, Appendices A to H inclusive, and has amended the statement to reflect the decisions taken during the 31st Session;

The Assembly:

1. Resolves that the Appendices attached to this resolution constitute the consolidated statement of continuing ICAO policies related to the safeguarding of international civil aviation against acts of unlawful interference, up to date as these policies exist at the close of the 31st Session of the Assembly;

2. Resolves to request the Council to submit at each ordinary session for review a consolidated statement of continuing ICAO policies related to the safeguarding of international civil aviation against acts of unlawful interference; and

3. Declares that this resolution supersedes Resolution A29–5.

---

[1] Source: International Civil Aviation Organization homepage: http/www.cam.org/icao/

APPENDIX A

GENERAL POLICY

Whereas acts of unlawful interference against international civil aviation have become the main threat to its safe and orderly development;

Recognizing that all acts of unlawful interference against international civil aviation constitute a grave offence in violation of international law; and

Endorsing actions taken so far by the Council, in particular by adopting new preventive measures, strengthening the means available to the Organization and assuming functions related to the implementation of the Convention on the Marking of Plastic Explosives for the Purpose of Detection;

The Assembly:

1. Strongly condemns all acts of unlawful interference against civil aviation wherever and by whomsoever and for whatever reason they are perpetrated;

2. Reaffirms the important role of the International Civil Aviation Organization to facilitate the resolution of questions which may arise between Contracting States in relation to matters affecting the safe and orderly operation of international civil aviation throughout the world;

3. Reaffirms that aviation security must continue to be treated as a matter of highest priority by the International Civil Aviation Organization and its Member States;

4. Notes with abhorrence acts of unlawful interference aimed at the total destruction in flight of civil aircraft in commercial service and the death of all on board;

5. Calls upon all Contracting States to confirm their resolute support for the established policy of ICAO by applying the most effective security measures individually and in co-operation with one another, to suppress acts of unlawful interference and to punish the perpetrators of any such acts; and

6. Directs the Council to continue its work relating to measures for prevention of acts of unlawful interference.

APPENDIX B

INTERNATIONAL LEGAL INSTRUMENTS FOR THE SUPPRESSION OF ACTS OF UNLAWFUL INTERFERENCE WITH CIVIL AVIATION

Whereas the protection of civil aviation from acts of unlawful interference has been enhanced by the Convention on Offences and Certain Other Acts Committed on Board Aircraft (Tokyo, 1963), by the Convention for the Suppression of Unlawful Seizure of Aircraft (The Hague, 1970), by the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation (Montreal, 1971), as well as by the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, Supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, Done at Montreal on 23 September 1971 (Montreal, 1988) and by bilateral agreements for the suppression of such acts;

Whereas terrorist acts aimed at the destruction of aircraft and the use of plastic explosives for such acts led to the need for ICAO to intensify, in accordance with United Nations Security Council Resolution 635 of 14 June 1989, its work on devising an international regime for the marking of plastic explosives for the purpose of detection; and

Whereas for the purpose of preventing such acts, the International Conference on Air Law adopted on 1 March 1991 a Convention on the Marking of Plastic Explosives for the Purpose of Detection;

The Assembly:

1. Calls upon Contracting States which have not yet done so to become parties to the Convention on Offences and Certain Other Acts Committed on Board Aircraft (Tokyo, 1963), to the Convention for the Suppression of Unlawful Seizure of Aircraft (The Hague, 1970), to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation (Montreal, 1971), and to the 1988 Supplementary Protocol to the Montreal Convention;

2. Urges all States to become parties as soon as possible to the Convention on the Marking of Plastic Explosives for the Purpose of Detection which was signed at Montreal on 1 March 1991;

3. Invites States not yet parties to the 1991 Convention on the Marking of Plastic Explosives for the Purpose of Detection to give effect, even before ratification, acceptance, approval or accession, to the principles of that instrument and calls upon States which manufacture plastic explosives to implement the marking of such explosives as soon as possible;

4. Directs the Secretary General to continue to remind States of the importance of becoming parties to the Tokyo, The Hague and Montreal Conventions and to the 1988 Supplementary Protocol to the Montreal Convention and the Convention on the Marking of Plastic Explosives for the Purpose of Detection and to provide assistance requested by States encountering any difficulties in becoming parties to these instruments;

5. Condemns any failure by a Contracting State to fulfil its obligations to return without delay an aircraft which is being illegally detained or to extradite or submit to competent authorities without delay the case of any person accused of an act of unlawful interference with civil aviation;

6. Calls upon Contracting States to intensify their efforts to suppress acts of unlawful seizure of aircraft or other unlawful acts against the security of civil aviation by concluding appropriate agreements for the suppression of such acts which would provide for extradition or submission of the case to competent authorities for the purpose of prosecution of those who commit them; and

7. Calls upon Contracting States to continue to assist in the investigation of such acts and in the apprehension and prosecution of those responsible.

APPENDIX C

ACTION BY STATES

a) Enactment of national legislation and bilateral agreements

Whereas deterrence of acts of unlawful interference with civil aviation can be greatly facilitated through the enactment by Contracting States of national criminal laws providing severe penalties for such acts;

The Assembly:

1. Calls upon Contracting States to give special attention to the adoption of adequate measures against persons committing acts of unlawful seizure of aircraft or other acts of unlawful interference against civil aviation, and in particular to include in their legislation rules for the severe punishment of such persons;

2. Calls upon Contracting States to take adequate measures relating to the extradition or prosecution of persons committing acts of unlawful seizure of aircraft or other acts of unlawful interference against civil aviation by adopting appropriate provisions in law or treaty for that purpose or by strengthening existing arrangements for the extradition of persons making criminal attacks on international civil aviation.

b) Information to be submitted to the Council

The Assembly:

1. Reminds States parties of their obligations under Article 11 of The Hague Convention and Article 13 of the Montreal Convention, following occurrences of unlawful interference, to forward all relevant information required by those Articles to the Council;

2. Directs the Secretary General, within a reasonable time from the date of a specific occurrence of unlawful interference, to ask that States parties concerned forward to the Council in accordance with their national law all relevant information required by those Articles concerning such occurrence, including particularly information relating to extradition or other legal proceedings.

APPENDIX D

TECHNICAL SECURITY MEASURES

Whereas the safety of the peoples of the world who benefit from international civil aviation requires continued vigilance and development and implementation of positive safeguarding action by the Organization and its Contracting States;

Whereas a clear need exists for the strengthening of security to be applied to all phases and processes associated with the international carriage of persons, their cabin and checked baggage, cargo, mail, courier and express parcels;

Whereas the responsibility for ensuring that security measures are applied by government agencies, airport authorities and aircraft operators rests with the Contracting States;

Whereas the safety of persons and property at airports serving international civil aviation requires continued vigilance, development and implementation of positive safeguarding actions by the International Civil Aviation Organization and all States to prevent and suppress unlawful acts of violence at such airports; and

Whereas the implementation of the security measures advocated by ICAO is an effective means of preventing acts of unlawful interference with civil aviation;

The Assembly:

1. Urges the Council to continue to attach high priority to the adoption of effective measures for the prevention of acts of unlawful interference and to keep up to date the provisions of Annex 17 to the Chicago Convention to this end;

2. Urges the Council to study, as a high priority, issues relating to the security control of transit passengers and the detection of explosive devices;

3. Requests the Council to complete, as a matter of high priority, studies into methods of detecting explosives or explosive materials, especially into the marking of those explosives of concern, other than plastic explosives, whose detection would be aided by the use of marking agents, with a view to the evolution, if needed, of an appropriate comprehensive legal regime;

4. Urges all States on an individual basis and in co-operation with other States to take all possible measures for the suppression of acts of violence at airports serving international civil aviation including such preventive measures as are required or recommended under Annex 17 to the Convention on International Civil Aviation;

5. Calls upon Contracting States to intensify their efforts for the implementation of existing Standards, Recommended Practices, and Procedures relating to aviation security, to monitor such implementation, and to take all necessary steps to prevent acts of unlawful interference against international civil aviation;

6. Further calls on Contracting States, while respecting their sovereignty, to substantially enhance co-operation and co-ordination between them in order to improve such implementation;

7. Invites Contracting States to exchange, as they consider appropriate, information through ICAO, or directly where desirable, related to increasing physical security controls in the plans and designs of existing and new airports, the design of aircraft to make the placement of explosives more difficult and research and development on weapons and explosive detection, as well as to undertake joint efforts in the development and refinement of promising concepts in detection of weapons and explosives;

8. Urges member States to expedite research and development on detection of explosives and security equipment, to continue to encourage research and development into improved and economic means of detecting all the marking agents specified in the Convention on the Marking of Plastic Explosives for the Purpose of Detection, and to continue to exchange such information;

9. Requests the Council to ensure, with respect to the technical aspects of aviation security, that:

a) the subject of aviation security continues to be given adequate attention, with priority commensurate with the current threat to the security of international civil aviation, particularly by keeping up to date and developing, as necessary, appropriate Standards, Recommended Practices, Procedures and guidance material;

b) when considered necessary, the agenda of ICAO meetings include items dealing with aviation security which are relevant to the subject of such meetings;

c) regional aviation security seminars are convened by ICAO after consultation with or at the request of States concerned; and

d) the ICAO Training Programme for Aviation Security comprising Standardized Training Packages (STPs) for use by States continues to be developed;

10. Urges Contracting States to ensure that it is possible for facilities to be made available at their airports for the inspection/screening of passengers and their cabin and checked baggage on international air transport services;

11. Urges Contracting States which have not already done so to implement the Standards, Recommended Practices and Procedures on aviation security measures, and to give appropriate attention to the guidance material contained in the ICAO Security Manual; and

12. Directs the Secretary General to continue to update and amend at appropriate intervals the Security Manual designed to assist Contracting States in implementing the specifications and procedures related to civil aviation security.

APPENDIX E

ACTION OF STATES WITH RESPECT TO UNLAWFUL SEIZURE OF AIRCRAFT IN PROGRESS

Whereas acts of unlawful seizure continue seriously to compromise the safety, regularity and efficiency of international civil aviation;

Whereas the Council has adopted Standards and Recommended Practices on aviation security in accordance with ICAO policy;

Whereas the safety of flights of aircraft subjected to an act of unlawful seizure may be further jeopardized by the denial of navigational aids and air traffic services, the blocking of runways and taxiways and the closure of airports; and

Whereas the safety of passengers and crew of an aircraft subjected to an act of unlawful seizure may also be further jeopardized if the aircraft is permitted to take off while still under seizure;

The Assembly:

1. Recalls in this regard the relevant provisions of the Chicago, Tokyo and The Hague Conventions;

2. Recommends that States take into account the above considerations in the development of their policies and contingency plans for dealing with acts of unlawful seizure;

3. Urges each Contracting State to provide, as it may find practicable, such measures of assistance to an aircraft subjected to an act of unlawful seizure, including the provision of navigational aids, air traffic services and permission to land, as may be necessitated by the circumstances;

4. Urges each Contracting State to take measures, as it may find practicable, to ensure that an aircraft subjected to an act of unlawful seizure which has landed in its territory is detained on the ground unless its departure is necessitated by the overriding duty to protect human life; and

5. Recognizes the importance of consultations, wherever practicable, between the State where an aircraft subjected to an act of unlawful seizure has landed and the State of the operator of that aircraft.

APPENDIX F

ASSISTANCE TO STATES IN THE IMPLEMENTATION OF TECHNICAL MEASURES FOR THE PROTECTION OF INTERNATIONAL CIVIL AVIATION

Whereas the implementation of technical measures for prevention of acts of unlawful interference with international civil aviation requires financial investment and training of personnel;

Whereas, notwithstanding assistance given, some countries, in particular developing countries, still face difficulties in fully implementing preventive measures including the means of detecting explosives because of insufficient financial, technical and material resources; and

Whereas aviation security is vital to all Contracting States for the proper operation of their airlines all around the world;

The Assembly:

1. Invites developed countries to give assistance to the countries which are not able to implement programmes of suggested technical measures for the protection of aircraft on the ground and in the processing of passengers, their cabin and checked baggage, cargo, mail, courier and express parcels;

2. Invites Contracting States to bear in mind the possibility offered by the Mechanism for financial, technical and material assistance to States with regard to aviation security, the United Nations Development Programme and the Technical Co-operation among Developing Countries to meet their technical assistance requirements arising from the need to protect international civil aviation;

3. Urges all States that have the means to do so to increase technical, financial and material assistance to countries in need of such assistance to improve aviation security through bilateral and multilateral effort, in particular, through the ICAO Mechanism for financial, technical and material assistance to States with regard to aviation security; and

4. Urges the international community to consider increasing technical, financial and material assistance to States in need of such assistance in order to be able to benefit from the achievement of the aims and objectives of the Convention on the Marking of Plastic Explosives, in particular through the technical co-operation programmes of ICAO.

APPENDIX G

ACTION BY THE COUNCIL WITH RESPECT TO MULTILATERAL AND BILATERAL CO-OPERATION IN DIFFERENT REGIONS OF THE WORLD

Whereas the rights and obligations of States under the international conventions on aviation security and under the Standards and Recommended Practices adopted by the Council of ICAO on aviation security could be complemented and reinforced in bilateral co-operation between States;

Whereas the bilateral agreements on air services represent the main legal basis for international carriage of passengers, baggage, cargo and mail;

Whereas provisions on aviation security should form an integral part of the bilateral agreements on air services; and

Whereas Annex 17 to the Convention of International Civil Aviation contains a recommendation that each Contracting State should include in its bilateral agreements on air transport a clause related to aviation security;

The Assembly:

1. Notes with satisfaction the strong support of States for the model clause on aviation security, elaborated by the Council and attached to the Council Resolution of 25 June 1986;

2. Notes the wide acceptance by States of the model agreement on aviation security for bilateral or regional co-operation adopted by the Council on 30 June 1989;

3. Urges all Contracting States to insert into their bilateral agreements on air services a clause on aviation security, taking into account the model clause adopted by the Council on 25 June 1986;

4. Recommends that Contracting States take into account the model agreement adopted by the Council on 30 June 1989; and

5. Recommends that the Council continue to:

—gather the results of States' experience in co-operation to suppress acts of unlawful interference with international civil aviation;

—analyse the existing situation in the fight against acts of unlawful interference with international civil aviation in different regions of the world; and

—prepare recommendations for strengthening measures to suppress such acts of unlawful interference.

APPENDIX H

CO-OPERATION WITH INTERNATIONAL ORGANIZATIONS IN THE FIELD OF AVIATION SECURITY

The Assembly:

1. Invites the International Criminal Police Organization (ICPO/INTERPOL), the Universal Postal Union (UPU), the International Air Transport Association (IATA), Airports Council International (ACI), and the International Federation of Air Line Pilots' Associations (IFALPA) to continue their co-operation with ICAO, to the maximum extent possible, to safeguard international civil aviation against acts of unlawful interference.

5. United Nations Documents

a. General Assembly: Measures to Eliminate International Terrorism

(1) A/RES/53/108, December 8, 1998

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

Measures To Eliminate International Terrorism

The General Assembly,

Guided by the purposes and principles of the Charter of the United Nations,

Recalling all its relevant resolutions, including resolution 49/60 of 9 December 1994, by which it adopted the Declaration on Measures to Eliminate International Terrorism, and resolutions 50/53 of 11 December 1995, 51/210 of 17 December 1996 and 52/165 of 15 December 1997,

Recalling also the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations, [1]

Deeply disturbed by the persistence of terrorist acts, which have been carried out worldwide,

Stressing the need to strengthen further international cooperation between States and between international organizations and agencies, regional organizations and arrangements and the United Nations in order to prevent, combat and eliminate terrorism in all its forms and manifestations, wherever and by whomsoever committed,

Mindful of the need to enhance the role of the United Nations and the relevant specialized agencies in combating international terrorism, and of the proposals of the Secretary-General to enhance the role of the Organization in this respect,

Recalling that in the Declaration on Measures to Eliminate International Terrorism, contained in the annex to resolution 49/60, the General Assembly encouraged States to review urgently the scope of the existing international legal provisions on the prevention, repression and elimination of terrorism in all its forms and manifestations, with the aim of ensuring that there was a comprehensive legal framework covering all aspects of the matter,

Bearing in mind the possibility of considering in the near future the elaboration of a comprehensive convention on international terrorism,

Bearing in mind also that the Twelfth Conference of Heads of State or Government of Non-Aligned Countries, held at Durban, South Africa, from 29 August to 3 September 1998, reaffirmed its collective position on terrorism and as a recent initiative called for

[1] See resolution 50/6.

an international summit conference under the auspices of the United Nations to formulate a joint organized response of the international community to terrorism in all its forms and manifestations, [2]

Recognizing the urgent need to enhance international cooperation to prevent terrorist financing and to develop an appropriate legal instrument,

Having examined the report of the Secretary-General, [3]

1. *Strongly condemns* all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomsoever committed;

2. *Reiterates* that criminal acts intended or calculated to provoke a state of terror in the general public, a group of persons or particular persons for political purposes are in any circumstances unjustifiable, whatever the considerations of a political, philosophical, ideological, racial, ethnic, religious or other nature that may be invoked to justify them;

3. *Reiterates its call* upon all States to adopt further measures in accordance with the relevant provisions of international law, including international standards of human rights, to prevent terrorism and to strengthen international cooperation in combating terrorism and, to that end, to consider in particular the implementation of the measures set out in paragraphs 3 (a) to (f) of its resolution 51/210;

4. *Also reiterates its call* upon all States, with the aim of enhancing the efficient implementation of relevant legal instruments, to intensify, as and where appropriate, the exchange of information on facts related to terrorism and, in so doing, to avoid the dissemination of inaccurate or unverified information;

5. *Reiterates its call* upon States to refrain from financing, encouraging, providing training for or otherwise supporting terrorist activities;

6. *Reaffirms* that international cooperation as well as actions by States to combat terrorism should be conducted in conformity with the principles of the Charter of the United Nations, international law and relevant international conventions;

7. *Urges* all States that have not yet done so to consider, as a matter of priority, becoming parties to relevant conventions and protocols as referred to in paragraph 6 of resolution 51/210, as well as the International Convention for the Suppression of Terrorist Bombings, [4] and calls upon all States to enact, as appropriate, domestic legislation necessary to implement the provisions of those conventions and protocols, to ensure that the jurisdiction of their courts enables them to bring t o trial the perpetrators of terrorist acts, and to cooperate with and provide support and assistance to other States and relevant international and regional organizations to that end;

8. *Reaffirms* the Declaration on Measures to Eliminate International Terrorism contained in the annex to resolution 49/60 and the Declaration to Supplement the 1994 Declaration on Measures

---

[2] See A/53/667-S/1998/1071.
[3] A/53/314 and Corr.2 and Add.1.
[4] Resolution 52/164, annex.

to Eliminate International Terrorism contained in the annex to resolution 51/210, and calls upon all States to implement them;

9. *Takes note* of the measures aimed at strengthening the capacity of the Centre for International Crime Prevention of the Secretariat to enhance international cooperation and improve the response of Governments to terrorism in all its forms and manifestations;

10. *Decides* to address at its fifty-fourth session the question of convening a high-level conference in 2000 under the auspices of the United Nations to formulate a joint organized response of the international community to terrorism in all its forms and manifestations;

11. *Decides also* that the Ad Hoc Committee established by General Assembly resolution 51/210 of 17 December 1996 shall continue to elaborate a draft international convention for the suppression of acts of nuclear terrorism with a view to completing the instrument, shall elaborate a draft international convention for the suppression of terrorist financing to supplement related existing international instruments, and subsequently shall address means of further developing a comprehensive le gal framework of conventions dealing with international terrorism, including considering, on a priority basis, the elaboration of a comprehensive convention on international terrorism;

12. *Decides further* that the Ad Hoc Committee shall meet from 15 to 26 March 1999, devoting appropriate time to the consideration of the outstanding issues relating to the elaboration of a draft international convention for the suppression of acts of nuclear terrorism, and that it shall initiate the elaboration of a draft international convention for the suppression of terrorist financing, and recommends that the work continue during the fifty-fourth session of the General Assembly from 27 September to 8 October 1999, within the framework of a working group of the Sixth Committee, and that the Ad Hoc Committee be convened in 2000 to continue its work as referred to in paragraph 11 above;

13. *Requests* the Secretary-General to continue to provide the Ad Hoc Committee with the necessary facilities for the performance of its work;

14. *Requests* the Ad Hoc Committee to report to the General Assembly at its fifty-third session in the event of the completion of the draft convention for the suppression of acts of nuclear terrorism;

15. *Also requests* the Ad Hoc Committee to report to the General Assembly at its fifty-fourth session on progress made in the implementation of its mandate;

16. *Decides* to include in the provisional agenda of its fifty-fourth session the item entitled "Measures to eliminate international terrorism".

Report of the Secretary-General

EXCERPTS

III. International legal instruments related to the prevention and suppression of international terrorism

A. Status of international conventions pertaining to international terrorism

38. Currently, there are 14 global or regional treaties pertaining to the subject of international terrorism. Each instrument listed below is represented by the letter shown on the left, which is featured in the tables that follow to reflect the status of that instrument:

A Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on 14 September 1963 (entered into force on 4 December 1969): status as at 21 May 1998;

B Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970 (entered into force on 14 October 1971): status as at 22 May 1998;

C Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 23 September 1971 (entered into force on 26 January 1973): status as at 22 May 1998;

D Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, adopted by the General Assembly of the United Nations on 14 December 1973 (entered into force on 20 February 1977) : status as at 30 June 1998;

E International Convention against the Taking of Hostages, adopted by the General Assembly of the United Nations on 17 December 1979 (entered into force on 3 June 1983): status as at 30 June 1998;

F Convention on the Physical Protection of Nuclear Material, signed at Vienna on 3 March 1980 (entered into force on 8 February 1987): status as at 30 June 1998;

98-25854 (E) 280998
9825854

G Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 24 February 1988 (entered into force on 6 August 1989): status as at 22 May 1998;

H Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome on 10 March 1988 (entered into force on 1 March 1992): status as at 23 February 1998;

I Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, done at Rome on 10 March 1988 (entered into force on 1 March 1992): status as at 23 February 1998;

J Convention on the Marking of Plastic Explosives for the Purpose of Detection, signed at Montreal on 1 March 1991(shall enter into force on 21 June 1998): status as at 5 June 1998;

K International Convention for the Suppression of Terrorist Bombings, adopted by the General Assembly of the United Nations on 15 December 1997 (open for signature on 12 January 1998 until 31 December 1999): status as at 30 June 1998;

L Arab Convention on the Suppression of Terrorism, signed at a meeting held at the General Secretariat of the League of Arab States in Cairo from 22 to 24 April 1998: status as at 24 April 1998;

M European Convention on the Suppression of Terrorism, concluded at Strasbourg on 27 January 1977 (entered into force on 4 August 1978): status as at 30 January 1998;

N OAS Convention to Prevent and Punish the Acts of Terrorism Taking the Form of Crimes Against Persons and Related Extortion that are of International Significance, concluded at Washington, D.C., on 2 February 1971 (entered into force on 16 October 1973): status as at 30 June 1998;

O SAARC Regional Convention on Suppression of Terrorism, signed at Kathmandu on 4 November 1987 (entered into force on 22 August 1988): all seven member States of SAARC (Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka) are parties to the Convention.

(3) A/RES/52/165, December 15, 1997

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

Measures to Eliminate International Terrorism

The General Assembly,

Guided by the purposes and principles of the Charter of the United

Nations,

Recalling all its relevant resolutions, including resolution 49/60 of 9 December 1994, by which it adopted the Declaration on Measures to Eliminate International Terrorism, and resolutions 50/53 of 11 December 1995 and 51/210 of 17 December 1996,

Recalling also the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations, [1]

Deeply disturbed by the persistence of terrorist acts, which have taken place worldwide,

Stressing the need further to strengthen international cooperation between States and between international organizations and agencies, regional organizations and arrangements and the United Nations in order to prevent, combat and eliminate terrorism in all its forms and manifestations, wherever and by whomsoever committed,

Mindful of the need to enhance the role of the United Nations and the relevant specialized agencies in combating international terrorism, and of the proposals of the Secretary-General to enhance the role of the Organization in this respect,

Recalling that in the Declaration on Measures to Eliminate International Terrorism contained in the annex to resolution 49/60 the General Assembly encouraged States to review urgently the scope of the existing international legal provisions on the prevention, repression and elimination of terrorism in all its forms and manifestations, with the aim of ensuring that there was a comprehensive legal framework covering all aspects of the matter,

Bearing in mind the possibility of considering in the near future the elaboration of a comprehensive convention on international terrorism,

Having examined the report of the Secretary-General, [2]

1. Strongly condemns all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomsoever committed;

2. Reiterates that criminal acts intended or calculated to provoke a state of terror in the general public, a group of persons or particular persons for political purposes are in any circumstance unjustifiable, whatever the considerations of a political, philosophical,

[1] See resolution 50/6.

[2] A/52/304 and Corr.1 and Add.1.

ideological, racial, ethnic, religious or other nature that may be invoked to justify them;

3. Reiterates its call upon all States to adopt further measures in accordance with the relevant provisions of international law, including international standards of human rights, to prevent terrorism and to strengthen international cooperation in combating terrorism and, to that end, to consider, in particular, the implementation of the measures set out in paragraphs 3 (a) to (f) of its resolution 51/210;

4. Also reiterates its call upon all States, with the aim of enhancing the efficient implementation of relevant legal instruments, to intensify, as and where appropriate, the exchange of information on facts related to terrorism and, in so doing, to avoid the dissemination of inaccurate or unverified information;

5. Further reiterates its call upon States to refrain from financing, encouraging, providing training for or otherwise supporting terrorist activities;

6. Urges all States that have not yet done so to consider, as a matter of priority, becoming parties to relevant conventions and protocols as referred to in paragraph 6 of resolution 51/210, and calls upon all States to enact, as appropriate, domestic legislation necessary to implement the provisions of those conventions and protocols, to ensure that the jurisdiction of their courts enables them to bring to trial the perpetrators of terrorist acts and to cooperate with and provide support and assistance to other States and relevant international and regional organizations to that end;

7. Reaffirms the Declaration on Measures to Eliminate International Terrorism contained in the annex to resolution 49/60 and the Declaration to Supplement the 1994 Declaration on Measures to Eliminate International Terrorism contained in the annex to resolution 51/210, and calls upon all States to implement them;

8. Reaffirms also the mandate of the Ad Hoc Committee established by General Assembly resolution 51/210 of 17 December 1996;

9. Decides that the Ad Hoc Committee shall meet from 16 to 27 February 1998 to continue its work in accordance with the mandate provided in paragraph 9 of resolution 51/210, and recommends that the work continue during the fifty-third session of the General Assembly from 28 September to 9 October 1998 within the framework of a working group of the Sixth Committee;

10. Requests the Secretary-General to invite the International Atomic Energy Agency to assist the Ad Hoc Committee in its deliberations;

11. Also requests the Secretary-General to continue to provide the Ad Hoc Committee with the necessary facilities for the performance of its work;

12. Requests the Ad Hoc Committee to report to the General Assembly at its fifty-third session on progress made in accomplishing its mandate;

13. Recommends that the Ad Hoc Committee be convened in 1999 to continue its work as referred to in paragraph 9 of resolution 51/210;

14. Decides to include in the provisional agenda of its fifty-third session the item entitled "Measures to eliminate international terrorism".

72nd plenary meeting
15 December 1997

(4) A/RES/51/210, December 17, 1996

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

Measures to Eliminate International Terrorism

The General Assembly,

Recalling its resolution 49/60 of 9 December 1994, by which it adopted the Declaration on Measures to Eliminate International Terrorism, and its resolution 50/53 of 11 December 1995,

Recalling also the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations, [1]

Guided by the purposes and principles of the Charter of the United Nations,

Deeply disturbed by the persistence of terrorist acts, which have taken place worldwide,

Stressing the need further to strengthen international cooperation between States and between international organizations and agencies, regional organizations and arrangements and the United Nations in order to prevent, combat and eliminate terrorism in all its forms and manifestations, wherever and by whomsoever committed,

Mindful of the need to enhance the role of the United Nations and the relevant specialized agencies in combating international terrorism,

Noting, in this context, all regional and international efforts to combat international terrorism, including those of the Organization of African Unity, the Organization of American States, the Organization of the Islamic Conference, the South Asian Association for Regional Cooperation, the European Union, the Council of Europe, the Movement of Non-Aligned Countries and the countries of the group of seven major industrialized countries and the Russian Federation,

Taking note of the report of the Director-General of the United Nations Educational, Scientific and Cultural Organization on educational activities under the project entitled "Towards a culture of peace", [2]

Recalling that in the Declaration on Measures to Eliminate International Terrorism the General Assembly encouraged States to review urgently the scope of the existing international legal provisions on the prevention, repression and elimination of terrorism in all its forms and manifestations, with the aim of ensuring that there was a comprehensive legal framework covering all aspects of the matter,

---

[1] See resolution 50/6.
[2] A/51/395, annex.

Bearing in mind the possibility of considering in the future the elaboration of a comprehensive convention on international terrorism,

Noting that terrorist attacks by means of bombs, explosives or other incendiary or lethal devices have become increasingly widespread, and stressing the need to supplement the existing legal instruments in order to address specifically the problem of terrorist attacks carried out by such means,

Recognizing the need to enhance international cooperation to prevent the use of nuclear materials for terrorist purposes and to develop an appropriate legal instrument,

Recognizing also the need to strengthen international cooperation to prevent the use of chemical and biological materials for terrorist purposes,

Convinced of the need to implement effectively and supplement the provisions of the Declaration on Measures to Eliminate International Terrorism,

Having examined the report of the Secretary-General,[3]

I

1. Strongly condemns all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomsoever committed;

2. Reiterates that criminal acts intended or calculated to provoke a state of terror in the general public, a group of persons or particular persons for political purposes are in any circumstance unjustifiable, whatever the considerations of a political, philosophical, ideological, racial, ethnic, religious or other nature that may be invoked to justify them;

3. Calls upon all States to adopt further measures in accordance with the relevant provisions of international law, including international standards of human rights, to prevent terrorism and to strengthen international cooperation in combating terrorism and, to that end, to consider the adoption of measures such as those contained in the official document adopted by the group of seven major industrialized countries and the Russian Federation at the Ministerial Conference on Terrorism, held in Paris on 30 July 1996,[4] and the plan of action adopted by the Inter-American Specialized Conference on Terrorism, held at Lima from 23 to 26 April 1996 under the auspices of the Organization of American States,[5] and in particular calls upon all States:

(a) To recommend that relevant security officials undertake consultations to improve the capability of Governments to prevent, investigate and respond to terrorist attacks on public facilities, in particular means of public transport, and to cooperate with other Governments in this respect;

(b) To accelerate research and development regarding methods of detection of explosives and other harmful substances that can cause death or injury, undertake consultations on the development of standards for marking explosives in order to identify their origin

[3] A/51/336 and Add.1.
[4] A/51/261, annex.
[5] See A/51/336, para. 57.

in post-blast investigations, and promote cooperation and transfer of technology, equipment and related materials, where appropriate;

(c) To note the risk of terrorists using electronic or wire communications systems and networks to carry out criminal acts and the need to find means, consistent with national law, to prevent such criminality and to promote cooperation where appropriate;

(d) To investigate, when sufficient justification exists according to national laws, and acting within their jurisdiction and through appropriate channels of international cooperation, the abuse of organizations, groups or associations, including those with charitable, social or cultural goals, by terrorists who use them as a cover for their own activities;

(e) To develop, if necessary, especially by entering into bilateral and multilateral agreements and arrangements, mutual legal assistance procedures aimed at facilitating and speeding investigations and collecting evidence, as well as cooperation between law enforcement agencies in order to detect and prevent terrorist acts;

(f) To take steps to prevent and counteract, through appropriate domestic measures, the financing of terrorists and terrorist organizations, whether such financing is direct or indirect through organizations which also have or claim to have charitable, social or cultural goals or which are also engaged in unlawful activities such as illicit arms trafficking, drug dealing and racketeering, including the exploitation of persons for purposes of funding terrorist activities, and in particular to consider, where appropriate, adopting regulatory measures to prevent and counteract movements of funds suspected to be intended for terrorist purposes without impeding in any way the freedom of legitimate capital movements and to intensify the exchange of information concerning international movements of such funds;

4. Also calls upon all States, with the aim of enhancing the efficient implementation of relevant legal instruments, to intensify, as and where appropriate, the exchange of information on facts related to terrorism and, in so doing, to avoid the dissemination of inaccurate or unverified information;

5. Reiterates its call upon States to refrain from financing, encouraging, providing training for or otherwise supporting terrorist activities;

6. Urges all States that have not yet done so to consider, as a matter of priority, becoming parties to the Convention on Offences and Certain Other Acts Committed on Board Aircraft,[6] signed at Tokyo on 14 September 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft,[7] signed at The Hague on 16 December 1970, the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation,[8] concluded at Montreal on 23 September 1971, the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents,[9] adopted in New York on 14 December 1973, the International Convention against the Taking of Hos-

tages, [10] adopted in New York on 17 December 1979, the Convention on the Physical Protection of Nuclear Material, [11] signed at Vienna on 3 March 1980, the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, [12] signed at Montreal on 24 February 1988, the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, [13] done at Rome on 10 March 1988, the Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, [14] done at Rome on 10 March 1988, and the Convention on the Marking of Plastic Explosives for the Purpose of Detection, [15] done at Montreal on 1 March 1991, and calls upon all States to enact, as appropriate, domestic legislation necessary to implement the provisions of those Conventions and Protocols, to ensure that the jurisdiction of their courts enables them to bring to trial the perpetrators of terrorist acts and to provide support and assistance to other Governments for those purposes;

II

7. Reaffirms the Declaration on Measures to Eliminate International Terrorism contained in the annex to resolution 49/60;

8. Approves the Declaration to Supplement the 1994 Declaration on Measures to Eliminate International Terrorism, the text of which is annexed to the present resolution;

III

9. Decides to establish an Ad Hoc Committee, open to all States Members of the United Nations or members of specialized agencies or of the International Atomic Energy Agency, to elaborate an international convention for the suppression of terrorist bombings and, subsequently, an international convention for the suppression of acts of nuclear terrorism, to supplement related existing international instruments, and thereafter to address means of further developing a comprehensive legal framework of conventions dealing with international terrorism;

10. Decides also that the Ad Hoc Committee will meet from 24 February to 7 March 1997 to prepare the text of a draft international convention for the suppression of terrorist bombings, and recommends that work continue during the fifty-second session of the General Assembly from 22 September to 3 October 1997 in the framework of a working group of the Sixth Committee;

11. Requests the Secretary-General to provide the Ad Hoc Committee with the necessary facilities for the performance of its work;

12. Requests the Ad Hoc Committee to report to the General Assembly at its fifty-second session on progress made towards the elaboration of the draft convention;

ANNEX

DECLARATION TO SUPPLEMENT THE 1994 DECLARATION ON MEASURES TO ELIMINATE INTERNATIONAL TERRORISM

The General Assembly,

Guided by the purposes and principles of the Charter of the United Nations,

Recalling the Declaration on Measures to Eliminate International Terrorism adopted by the General Assembly by its resolution 49/60 of 9 December 1994,

Recalling also the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations, [1]

Deeply disturbed by the worldwide persistence of acts of international terrorism in all its forms and manifestations, including those in which States are directly or indirectly involved, which endanger or take innocent lives, have a deleterious effect on international relations and may jeopardize the security of States,

Underlining the importance of States developing extradition agreements or arrangements as necessary in order to ensure that those responsible for terrorist acts are brought to justice,

Noting that the Convention relating to the Status of Refugees, [16] done at Geneva on 28 July 1951, does not provide a basis for the protection of perpetrators of terrorist acts, noting also in this context articles 1, 2, 32 and 33 of the Convention, and emphasizing in this regard the need for States parties to ensure the proper application of the Convention,

Stressing the importance of full compliance by States with their obligations under the provisions of the 1951 Convention [16] and the 1967 Protocol relating to the Status of Refugees, [17] including the principle of non-refoulement of refugees to places where their life or freedom would be threatened on account of their race, religion, nationality, membership in a particular social group or political opinion, and affirming that the present Declaration does not affect the protection afforded under the terms of the Convention and Protocol and other provisions of international law,

Recalling article 4 of the Declaration on Territorial Asylum adopted by the General Assembly by its resolution 2312 (XXII) of 14 December 1967,

---

[16] United Nations, Treaty Series, vol. 189, No. 2545.
[17] Ibid., vol. 606, No. 8791.

Stressing the need further to strengthen international cooperation between States in order to prevent, combat and eliminate terrorism in all its forms and manifestations,

Solemnly declares the following:

1. The States Members of the United Nations solemnly reaffirm their unequivocal condemnation of all acts, methods and practices of terrorism as criminal and unjustifiable, wherever and by whomsoever committed, including those which jeopardize friendly relations among States and peoples and threaten the territorial integrity and security of States;

2. The States Members of the United Nations reaffirm that acts, methods and practices of terrorism are contrary to the purposes and principles of the United Nations; they declare that knowingly financing, planning and inciting terrorist acts are also contrary to the purposes and principles of the United Nations;

3. The States Members of the United Nations reaffirm that States should take appropriate measures in conformity with the relevant provisions of national and international law, including international standards of human rights, before granting refugee status, for the purpose of ensuring that the asylum-seeker has not participated in terrorist acts, considering in this regard relevant information as to whether the asylum-seeker is subject to investigation for or is charged with or has been convicted of offences connected with terrorism and, after granting refugee status, for the purpose of ensuring that that status is not used for the purpose of preparing or organizing terrorist acts intended to be committed against other States or their citizens;

4. The States Members of the United Nations emphasize that asylum-seekers who are awaiting the processing of their asylum applications may not thereby avoid prosecution for terrorist acts;

5. The States Members of the United Nations reaffirm the importance of ensuring effective cooperation between Member States so that those who have participated in terrorist acts, including their financing, planning or incitement, are brought to justice; they stress their commitment, in conformity with the relevant provisions of international law, including international standards of human rights, to work together to prevent, combat and eliminate terrorism and to take all appropriate steps under their domestic laws either to extradite terrorists or to submit the cases to their competent authorities for the purpose of prosecution;

6. In this context, and while recognizing the sovereign rights of States in extradition matters, States are encouraged, when concluding or applying extradition agreements, not to regard as political offences excluded from the scope of those agreements offences connected with terrorism which endanger or represent a physical threat to the safety and security of persons, whatever the motives which may be invoked to justify them;

7. States are also encouraged, even in the absence of a treaty, to consider facilitating the extradition of persons suspected of having committed terrorist acts, insofar as their national laws permit;

8. The States Members of the United Nations emphasize the importance of taking steps to share expertise and information about terrorists, their movements, their support and their weapons and

to share information regarding the investigation and prosecution of terrorist acts.

(5) A/RES/49/60, December 9, 1994

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

Measures to Eliminate International Terrorism

The General Assembly,

Recalling its resolution 46/51 of 9 December 1991 and its decision 48/411 of 9 December 1993,

Taking note of the report of the Secretary-General, [1]

Having considered in depth the question of measures to eliminate international terrorism,

Convinced that the adoption of the declaration on measures to eliminate international terrorism should contribute to the enhancement of the struggle against international terrorism,

1. Approves the Declaration on Measures to Eliminate International Terrorism, the text of which is annexed to the present resolution;

2. Invites the Secretary-General to inform all States, the Security Council, the International Court of Justice and the relevant specialized agencies, organizations and organisms of the adoption of the Declaration;

3. Urges that every effort be made in order that the Declaration becomes generally known and is observed and implemented in full;

4. Urges States, in accordance with the provisions of the Declaration, to take all appropriate measures at the national and international levels to eliminate terrorism;

5. Invites the Secretary-General to follow up closely the implementation of the present resolution and the Declaration, and to submit to the General Assembly at its fiftieth session a report thereon, relating, in particular, to the modalities of implementation of paragraph 10 of the Declaration;

6. Decides to include in the provisional agenda of its fiftieth session the item entitled "Measures to eliminate international terrorism", in order to examine the report of the Secretary-General requested in paragraph 5 above, without prejudice to the annual or biennial consideration of the item.

84th plenary meeting
9 December 1994

ANNEX

Declaration on Measures to Eliminate International Terrorism

The General Assembly,

Guided by the purposes and principles of the Charter of the United Nations,

[1] A/49/257 and Add.1–3.

Recalling the Declaration on Principles of International Law concerning Friendly Relations and Cooperation among States in accordance with the Charter of the United Nations,[2] the Declaration on the Strengthening of International Security,[3] the Definition of Aggression,[4] the Declaration on the Enhancement of the Effectiveness of the Principle of Refraining from the Threat or Use of Force in International Relations,[5] the Vienna Declaration and Programme of Action, Adopted by the World Conference on Human Rights,[6] the International Covenant on Economic, Social and Cultural Rights[7] and the International Covenant on Civil and Political Rights,[7]

Deeply disturbed by the world-wide persistence of acts of international terrorism in all its forms and manifestations, including those in which States are directly or indirectly involved, which endanger or take innocent lives, have a deleterious effect on international relations and may jeopardize the security of States,

Deeply concerned by the increase, in many regions of the world, of acts of terrorism based on intolerance or extremism,

Concerned at the growing and dangerous links between terrorist groups and drug traffickers and their paramilitary gangs, which have resorted to all types of violence, thus endangering the constitutional order of States and violating basic human rights,

Convinced of the desirability for closer coordination and cooperation among States in combating crimes closely connected with terrorism, including drug trafficking, unlawful arms trade, money laundering and smuggling of nuclear and other potentially deadly materials, and bearing in mind the role that could be played by both the United Nations and regional organizations in this respect,

Firmly determined to eliminate international terrorism in all its forms and manifestations,

Convinced also that the suppression of acts of international terrorism, including those in which States are directly or indirectly involved, is an essential element for the maintenance of international peace and security,

Convinced further that those responsible for acts of international terrorism must be brought to justice,

Stressing the imperative need to further strengthen international cooperation between States in order to take and adopt practical and effective measures to prevent, combat and eliminate all forms of terrorism that affect the international community as a whole,

Conscious of the important role that might be played by the United Nations, the relevant specialized agencies and States in fostering widespread cooperation in preventing and combating international terrorism, inter alia, by increasing public awareness of the problem,

Recalling the existing international treaties relating to various aspects of the problem of international terrorism, inter alia, the Convention on Offences and Certain Other Acts Committed on

---

[2] Resolution 2625 (XXV), annex.
[3] Resolution 2734 (XXV).
[4] Resolution 3314 (XXIX), annex.
[5] Resolution 42/22, annex.
[6] Report of the World Conference on Human Rights, Vienna, 14–25 June 1993 (A/CONF.157/24 (Part I)), chap. III.
[7] See resolution 2200 A (XXI), annex.

Board Aircraft, signed at Tokyo on 14 September 1963,[8] the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970,[9] the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, concluded at Montreal on 23 September 1971,[10] the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, adopted in New York on 14 December 1973,[11] the International Convention against the Taking of Hostages, adopted in New York on 17 December 1979,[12] the Convention on the Physical Protection of Nuclear Material, adopted at Vienna on 3 March 1980,[13] the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 24 February 1988,[14] the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome on 10 March 1988,[15] the Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, done at Rome on 10 March 1988,[16] and the Convention on the Marking of Plastic Explosives for the Purpose of Detection, done at Montreal on 1 March 1991,[17]

Welcoming the conclusion of regional agreements and mutually agreed declarations to combat and eliminate terrorism in all its forms and manifestations,

Convinced of the desirability of keeping under review the scope of existing international legal provisions to combat terrorism in all its forms and manifestations, with the aim of ensuring a comprehensive legal framework for the prevention and elimination of terrorism,

Solemnly declares the following:

I

1. The States Members of the United Nations solemnly reaffirm their unequivocal condemnation of all acts, methods and practices of terrorism, as criminal and unjustifiable, wherever and by whomever committed, including those which jeopardize the friendly relations among States and peoples and threaten the territorial integrity and security of States;

2. Acts, methods and practices of terrorism constitute a grave violation of the purposes and principles of the United Nations, which may pose a threat to international peace and security, jeopardize friendly relations among States, hinder international cooperation and aim at the destruction of human rights, fundamental freedoms and the democratic bases of society;

[15] International Maritime Organization, document SUA/CONF/15/Rev.1.
[16] Ibid., document SUA/CONF/16/Rev.2.
[17] See S/22393 and Corr.1.

3. Criminal acts intended or calculated to provoke a state of terror in the general public, a group of persons or particular persons for political purposes are in any circumstance unjustifiable, whatever the considerations of a political, philosophical, ideological, racial, ethnic, religious or any other nature that may be invoked to justify them;

II

4. States, guided by the purposes and principles of the Charter of the United Nations and other relevant rules of international law, must refrain from organizing, instigating, assisting or participating in terrorist acts in territories of other States, or from acquiescing in or encouraging activities within their territories directed towards the commission of such acts;

5. States must also fulfil their obligations under the Charter of the United Nations and other provisions of international law with respect to combating international terrorism and are urged to take effective and resolute measures in accordance with the relevant provisions of international law and international standards of human rights for the speedy and final elimination of international terrorism, in particular:

(a) To refrain from organizing, instigating, facilitating, financing, encouraging or tolerating terrorist activities and to take appropriate practical measures to ensure that their respective territories are not used for terrorist installations or training camps, or for the preparation or organization of terrorist acts intended to be committed against other States or their citizens;

(b) To ensure the apprehension and prosecution or extradition of perpetrators of terrorist acts, in accordance with the relevant provisions of their national law;

(c) To endeavour to conclude special agreements to that effect on a bilateral, regional and multilateral basis, and to prepare, to that effect, model agreements on cooperation;

(d) To cooperate with one another in exchanging relevant information concerning the prevention and combating of terrorism;

(e) To take promptly all steps necessary to implement the existing international conventions on this subject to which they are parties, including the harmonization of their domestic legislation with those conventions;

(f) To take appropriate measures, before granting asylum, for the purpose of ensuring that the asylum seeker has not engaged in terrorist activities and, after granting asylum, for the purpose of ensuring that the refugee status is not used in a manner contrary to the provisions set out in subparagraph (a) above;

6. In order to combat effectively the increase in, and the growing international character and effects of, acts of terrorism, States should enhance their cooperation in this area through, in particular, systematizing the exchange of information concerning the prevention and combating of terrorism, as well as by effective implementation of the relevant international conventions and conclusion of mutual judicial assistance and extradition agreements on a bilateral, regional and multilateral basis;

7. In this context, States are encouraged to review urgently the scope of the existing international legal provisions on the preven-

tion, repression and elimination of terrorism in all its forms and manifestations, with the aim of ensuring that there is a comprehensive legal framework covering all aspects of the matter;

8. Furthermore States that have not yet done so are urged to consider, as a matter of priority, becoming parties to the international conventions and protocols relating to various aspects of international terrorism referred to in the preamble to the present Declaration;

III

9. The United Nations, the relevant specialized agencies and intergovernmental organizations and other relevant bodies must make every effort with a view to promoting measures to combat and eliminate acts of terrorism and to strengthening their role in this field;

10. The Secretary-General should assist in the implementation of the present Declaration by taking, within existing resources, the following practical measures to enhance international cooperation:

(a) A collection of data on the status and implementation of existing multilateral, regional and bilateral agreements relating to international terrorism, including information on incidents caused by international terrorism and criminal prosecutions and sentencing, based on information received from the depositaries of those agreements and from Member States;

(b) A compendium of national laws and regulations regarding the prevention and suppression of international terrorism in all its forms and manifestations, based on information received from Member States;

(c) An analytical review of existing international legal instruments relating to international terrorism, in order to assist States in identifying aspects of this matter that have not been covered by such instruments and could be addressed to develop further a comprehensive legal framework of conventions dealing with international terrorism;

(d) A review of existing possibilities within the United Nations system for assisting States in organizing workshops and training courses on combating crimes connected with international terrorism;

IV

11. All States are urged to promote and implement in good faith and effectively the provisions of the present Declaration in all its aspects;

12. Emphasis is placed on the need to pursue efforts aiming at eliminating definitively all acts of terrorism by the strengthening of international cooperation and progressive development of international law and its codification, as well as by enhancement of coordination between, and increase of the efficiency of, the United Nations and the relevant specialized agencies, organizations and bodies.

(6) A/RES/46/51, December 9, 1991

Measures to Eliminate International Terrorism

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

The General Assembly,

Recalling its resolutions 3034 (XXVII) of 18 December 1972, 31/102 of 15 December 1976, 32/147 of 16 December 1977, 34/145 of 17 December 1979, 36/109 of 10 December 1981, 38/130 of 19 December 1983, 40/61 of 9 December 1985, 42/159 of 7 December 1987 and 44/29 of 4 December 1989,

Recalling also the recommendations of the Ad Hoc Committee on International Terrorism contained in its report to the General Assembly at its thirty-fourth session,

Recalling further the Declaration on Principles of International Law concerning Friendly Relations and Cooperation among States in accordance with the Charter of the United Nations, the Declaration on the Strengthening of International Security, the Definition of Aggression and relevant instruments on international humanitarian law applicable in armed conflict,

Recalling moreover the existing international conventions relating to various aspects of the problem of international terrorism, inter alia, the Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on 14 September 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970, the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, concluded at Montreal on 23 September 1971, the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, adopted in New York on 14 December 1973, the International Convention against the Taking of Hostages, adopted in New York on 17 December 1979, the Convention on the Physical Protection of Nuclear Material, adopted at Vienna on 3 March 1980, the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 24 February 1988, the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome on 10 March 1988, the Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, done at Rome on 10 March 1988 and the Convention on the Marking of Plastic Explosives for the Purpose of Detection, done at Montreal on 1 March 1991,

Convinced that a policy of firmness and effective measures should be taken in accordance with international law in order that

all acts, methods and practices of international terrorism may be brought to an end,

Bearing in mind Security Council resolution 638 (1989) of 31 July 1989 on the taking of hostages,

Deeply disturbed by the world-wide persistence of acts of international terrorism in all its forms, including those in which States are directly or indirectly involved, which endanger or take innocent lives, have a deleterious effect on international relations and may jeopardize the territorial integrity and security of States,

Calling attention to the growing connection between terrorist groups and drug traffickers,

Convinced of the importance of the observance by States of their obligations under the relevant international conventions to ensure that appropriate law enforcement measures are taken in connection with the offences addressed in those conventions,

Convinced also of the importance of expanding and improving international cooperation among States, on a bilateral, regional and multilateral basis, which will contribute to the elimination of acts of international terrorism and their underlying causes and to the prevention and elimination of this criminal scourge,

Convinced further that international cooperation in combating and preventing terrorism will contribute to the strengthening of confidence among States, reduce tensions and create a better climate among them,

Mindful of the need to enhance the role of the United Nations and the relevant specialized agencies in combating international terrorism,

Mindful also of the necessity of maintaining and protecting the basic rights of, and guarantees for, the individual in accordance with the relevant international human rights instruments and generally accepted international standards,

Reaffirming the principle of self-determination of peoples as enshrined in the Charter of the United Nations,

Reaffirming also the inalienable right to self-determination and independence of all peoples under colonial and racist regimes and other forms of alien domination and foreign occupation, and upholding the legitimacy of their struggle, in particular the struggle of national liberation movements, in accordance with the purposes and principles of the Charter and the Declaration on Principles of International Law concerning Friendly Relations and Cooperation among States in accordance with the Charter of the United Nations,

Noting the efforts and important achievements of the International Civil Aviation Organization and the International Maritime Organization in promoting the security of international air and sea transport against acts of terrorism,

Recognizing that the effectiveness of the struggle against terrorism could be enhanced by the establishment of a generally agreed definition of international terrorism,

Taking note of the report of the Secretary-General,

1. Once again unequivocally condemns, as criminal and unjustifiable, all acts, methods and practices of terrorism wherever and by whomever committed, including those which jeopardize the friendly relations among States and their security;

2. Deeply deplores the loss of human lives which results from such acts of terrorism, as well as the pernicious impact of these acts on relations of cooperation among States;

3. Calls upon all States to fulfil their obligations under international law to refrain from organizing, instigating, assisting or participating in terrorist acts in other States, or acquiescing in or encouraging activities within their territory directed towards the commission of such acts;

4. Urges all States to fulfil their obligations under international law and take effective and resolute measures for the speedy and final elimination of international terrorism and to that end, in particular:

(a) To prevent the preparation and organization in their respective territories, for commission within or outside their territories, of terrorist and subversive acts directed against other States and their citizens;

(b) To ensure the apprehension and prosecution or extradition of perpetrators of terrorist acts;

(c) To endeavour to conclude special agreements to that effect on a bilateral, regional and multilateral basis;

(d) To cooperate with one another in exchanging relevant information concerning the prevention and combating of terrorism;

(e) To take promptly all steps necessary to implement the existing international conventions on this subject to which they are parties, including the harmonization of their domestic legislation with those conventions;

5. Appeals to all States that have not yet done so to consider becoming party to the international conventions relating to various aspects of international terrorism referred to in the preamble to the present resolution;

6. Urges all States, unilaterally and in cooperation with other States, as well as relevant United Nations organs, to contribute to the progressive elimination of the causes underlying international terrorism and to pay special attention to all situations, including colonialism, racism and situations involving mass and flagrant violations of human rights and fundamental freedoms and those involving alien domination and foreign occupation, that may give rise to international terrorism and may endanger international peace and security;

7. Firmly calls for the immediate and safe release of all hostages and abducted persons, wherever and by whomever they are being held;

8. Calls upon all States to use their political influence in accordance with the Charter of the United Nations and the principles of international law to secure the safe release of all hostages and abducted persons and to prevent the commission of acts of hostage-taking and abduction;

9. Expresses concern at the growing and dangerous links between terrorist groups, drug traffickers and their paramilitary gangs, which have resorted to all types of violence, thus endangering the constitutional order of States and violating basic human rights;

10. Welcomes the efforts undertaken by the International Civil Aviation Organization aimed at promoting universal acceptance of,

and strict compliance with, international air security conventions, and welcomes also the recent adoption of the Convention on the Marking of Plastic Explosives for the Purpose of Detection;

11. Requests the other relevant specialized agencies and intergovernmental organizations, in particular the International Maritime Organization, the Universal Postal Union, the World Tourism Organization, the International Atomic Energy Agency and the United Nations Educational, Scientific and Cultural Organization, within their respective spheres of competence, to consider what further measures can usefully be taken to combat and eliminate terrorism;

12. Requests the Secretary-General to continue seeking the views of Member States on international terrorism in all its aspects and on ways and means of combating it, including the convening at an appropriate time, under the auspices of the United Nations, of an international conference to deal with international terrorism in the light of the proposal referred to in the penultimate preambular paragraph of resolution 44/29;

13. Also requests the Secretary-General to seek the views of Member States on the proposals contained in his report or made during the debate on this item in the Sixth Committee, and on the ways and means of enhancing the role of the United Nations and the relevant specialized agencies in combating international terrorism;

14. Further requests the Secretary-General to follow up, as appropriate, the implementation of the present resolution and to submit a report in this respect to the General Assembly at its forty-eighth session;

15. Considers that nothing in the present resolution could in any way prejudice the right to self-determination, freedom and independence, as derived from the Charter of the United Nations, of peoples forcibly deprived of that right referred to in the Declaration of Principles of International Law concerning Friendly Relations and Cooperation among States in accordance with the Charter of the United Nations, particularly peoples under colonial and racist regimes or other forms of alien domination, or the right of these peoples to struggle legitimately to this end and to seek and receive support in accordance with the principles of the Charter, the abovementioned Declaration and the relevant General Assembly resolutions, including the present resolution;

16. Decides to include in the provisional agenda of its forty-eighth session an item entitled "Measures to eliminate international terrorism".

(7) A/RES/40/61, December 9, 1985

RESOLUTION ADOPTED BY THE GENERAL ASSEMBLY

Measures to Eliminate International Terrorism

Measures to prevent international terrorism which endangers or takes innocent human lives or jeopardizes fundamental freedoms and study of the underlying causes of those forms of terrorism and acts of violence which lie in misery, frustration, grievance and despair and which cause some people to sacrifice human lives, including their own, in an attempt to effect radical changes

The General Assembly,

Recalling its resolutions 3034 (XXVII) of 18 December 1972, 31/102 of 15 December 1976, 32/147 of 16 December 1977, 34/145 of 17 December 1979, 36/109 of 10 December 1981 and 38/130 of 19 December 1983,

Recalling also the Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations, the Declaration on the Strengthening of International Security, the Definition of Aggression and relevant instruments on international humanitarian law applicable in armed conflict,

Further recalling the existing international conventions relating to various aspects of the problem of international terrorism, inter alia, the Convention on Offences and Certain Other Acts Committed on Board Aircraft, signed at Tokyo on 14 September 1963, the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on 16 December 1970, the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, signed at Montreal on 23 September 1971, the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, signed at New York on 14 December 1973, and the International Convention against the Taking of Hostages, adopted at New York on 17 December 1979,

Deeply concerned about the world-wide escalation of acts of terrorism in all its forms, which endanger or take innocent human lives, jeopardize fundamental freedoms and seriously impair the dignity of human beings,

Taking note of the deep concern and condemnation of all acts of international terrorism expressed by the Security Council and the Secretary-General,

Convinced of the importance of expanding and improving international co-operation among States, on a bilateral and multilateral basis, which will contribute to the elimination of acts of international terrorism and their underlying causes and to the prevention and elimination of this criminal scourge,

Reaffirming the principle of self-determination of peoples enshrined in the Charter of the United Nations,

Reaffirming also the inalienable right to self-determination and independence of all peoples under colonial and racist regimes and other forms of alien domination, and upholding the legitimacy of their struggle, in particular the struggle of national liberation movements, in accordance with the purposes and principles of the Charter and of the Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations,

Mindful of the necessity of maintaining and safeguarding the basic rights of the individual in accordance with the relevant international human rights instruments and generally accepted international standards,

Convinced of the importance of the observance by States of their obligations under the relevant international conventions to ensure that appropriate law enforcement measures are taken in connection with the offences addressed in those Conventions,

Expressing its concern that in recent years terrorism has taken on forms that have an increasingly deleterious effect on international relations, which may jeopardize the very territorial integrity and security of States,

Taking note of the report of the Secretary-General,

1. Unequivocally condemns, as criminal, all acts, methods and practices of terrorism wherever and by whomever committed, including those which jeopardize friendly relations among States and their security;

2. Deeply deplores the loss of innocent human lives which results from such acts of terrorism;

3. Also deplores the pernicious impact of acts of international terrorism on relations of co-operation among States, including co-operation for development;

4. Appeals to all States that have not yet done so to consider becoming party to the existing international conventions relating to various aspects of international terrorism;

5. Invites all States to take all appropriate measures at the national level with a view to the speedy and final elimination of the problem of international terrorism, such as the harmonization of domestic legislation with existing international conventions, the fulfilment of assumed international obligations, and the prevention of the preparation and organization in their respective territories of acts directed against other States;

6. Calls upon all States to fulfil their obligations under international law to refrain from organizing, instigating, assisting or participating in terrorist acts in other States, or acquiescing in activities within their territory directed towards the commission of such acts;

7. Urges all States not to allow any circumstances to obstruct the application of appropriate law enforcement measures provided for in the relevant conventions to which they are party to persons who commit acts of international terrorism covered by those conventions;

8. Also urges all States to co-operate with one another more closely, especially through the exchange of relevant information

concerning the prevention and combating of terrorism, the apprehension and prosecution or extradition of the perpetrators of such acts, the conclusion of special treaties and/or the incorporation into appropriate bilateral treaties of special clauses, in particular regarding the extradition or prosecution of terrorists;

9. Further urges all States, unilaterally and in co-operation with other States, as well as relevant United Nations organs, to contribute to the progressive elimination of the causes underlying international terrorism and to pay special attention to all situations, including colonialism, racism and situations involving mass and flagrant violations of human rights and fundamental freedoms and those involving alien occupation, that may give rise to international terrorism and may endanger international peace and security;

10. Calls upon all States to observe and implement the recommendations of the Ad Hoc Committee on International Terrorism contained in its report to the General Assembly at its thirty-fourth session;

11. Also calls upon all States to take all appropriate measures as recommended by the International Civil Aviation Organization and as set forth in relevant international conventions to prevent terrorist attacks against civil aviation transport and other forms of public transport;

12. Encourages the International Civil Aviation Organization to continue its efforts aimed at promoting universal acceptance of and strict compliance with the international air security conventions;

13. Requests the International Maritime Organization to study the problem of terrorism aboard or against ships with a view to making recommendations on appropriate measures;

14. Requests the Secretary-General to follow up, as appropriate, the implementation of the present resolution and to submit a report to the General Assembly at its forty-second session;

15. Decides to include the item in the provisional agenda of its forty-second session.

MEASURES TO PREVENT INTERNATIONAL TERRORISM WHICH ENDANGERS OR TAKES INNOCENT HUMAN LIVES OR JEOPARDIZES FUNDAMENTAL FREEDOMS AND STUDY OF THE UNDERLYING CAUSES OF THOSE FORMS OF TERRORISM AND ACTS OF VIOLENCE WHICH LIE IN MISERY, FRUSTRATION, GRIEVANCE AND DESPAIR AND WHICH CAUSE SOME PEOPLE TO SACRIFICE HUMAN LIVES, INCLUDING THEIR OWN, IN AN ATTEMPT TO EFFECT RADICAL CHANGES

SECURITY COUNCIL
Forty-sixth year

Letter dated 23 December 1991 from the Acting Permanent Representative of the United States of America to the United Nations addressed to the Secretary-General

I have the honour to enclose a copy of the indictment handed down by the United States District Court for the District of Columbia on 14 November in connection with the bombing of Pan Am flight 103 (see annex).

I would be grateful if you would have this letter and its enclosure circulated as an official document of the General Assembly, under agenda item 125, and of the Security Council.

(Signed) Alexander F. WATSON
Acting Permanent Representative

91-42259 2901j (E)

INDICTMENT

The Grand Jury charges that:

COUNT ONE

INTRODUCTION

At all times material to this Indictment, except as otherwise indicated:

1. The Socialist People's Libyan Arab Jamahiriya (hereinafter referred to as "Libya") was a nation located on the Mediterranean coast of North Africa.

2. The Jamahiriya Security Organization (hereinafter referred to as "JSO") was the Libyan intelligence service through which Libya conducted acts of terrorism against other nations and repressed the activities of Libyan dissidents abroad.

3. The JSO was divided into various administrations and sections, including the Technical Administration.

4. The Technical Administration's responsibilities included assisting other administrations within the JSO in developing technical equipment and to provide technical support to JSO operations in Libya and abroad.

5. In 1984-1985, Said Rashid Kisha (hereinafter referred to as Said Rashid) was the Assistant Manager of the Technical Administration of the JSO, and in 1985 requested Edwin Bollier of the Swiss firm of Meister et Bollier to develop timers for the Libyans.

6. From 1985, to on or about 1 January 1987, Said Rashid was the Director of the Operations Administration of the JSO.

7. The Operations Administration of the JSO was further divided into various sections including the Airline Security Section.

8. The Airline Security Section of the JSO was responsible for the following functions:

(a) Providing physical security for Libyan Arab Airlines (hereinafter referred to as "LAA") aircraft and passengers on domestic and international flights; and

(b) Overseeing the covert placement and intelligence operations of JSO officers as employees of Libyan Arab Airlines in various countries, including the Republic of Malta.

9. During the period while Said Rashid was the Director of the Operations Administration, ABDEL BASSET ALI AL-MEGRAHI was the Chief of the Airline Security Section.

10. Izzel Din Al Hinshiri (hereinafter referred to as Hinshiri) at various times material to this Indictment held the following positions: Libyan Minister of Transportation, Minister of Justice, Secretary General to the People's Committee for Justice in Libya, Director, and Assistant to the Director, of the Central Security Administration of the JSO.

11. At various times material to this Indictment, beginning in 1985 and continuing into 1986, Hinshiri received, and caused to be received on behalf of the JSO, 20 prototype digital electric timers, Model MST-13, capable of initiating an explosive device, which had been manufactured by the Swiss firm of Meister et Bollier.

12. Meister et Bollier, Ltd., Telecommunications, a/k/a MESO AG, was a company located in Zurich, Switzerland, which maintained a close business relationship with elements of the Libyan military and JSO as a manufacturer and supplier of technical equipment.

13. ABH was a Libyan front company which sublet office space in Zurich, Switzerland, from Meister et Bollier.

14. Badri Hasan was a citizen of Libya, who was associated along with ABDEL BASSET in the activities of ABH in Zurich, Switzerland.

15. At various times material in 1988, the Libyan JSO issued Semtex explosives containing the substances RDX and PETN, electric blasting caps or detonators, and MST-13 digital electric timers capable of initiating an explosion at a predetermined future time, to JSO operatives who engaged in covert terrorist operations outside of Libya, including in the Republic of Senegal.

16. Libyan Arab Airlines was the national airline of Libya and was utilized by the JSO to facilitate its acts of terrorism and repression.

17. Air Malta, the national airline of the Republic of Malta, was the handling agent for Libyan Arab Airlines flights to and from Luqa Airport, Malta, and as such utilized Air Malta luggage tags on luggage destined for Libyan Arab Airline flights.

18. Air Malta employees boarding passengers and luggage for Libyan Arab Airline flights were assisted by a representative of Libyan Arab Airlines.

19. The Defendant LAMEN KHALIFA FHIMAH, A/K/A AL AMIN KHALIFA FHIMAH, A/K/A "MR. LAMIN" (hereinafter referred to as "LAMEN FHIMAH"), was a citizen of Libya, and was utilized by the JSO in various cover positions, including at various times as the Station Manager and representative for Libyan Arab Airlines at Luqa Airport, Malta.

20. The Defendant LAMEN FHIMAH had access to Air Malta luggage tags and the Air Malta facilities used to board passengers and baggage for LAA flights from Luqa Airport, Malta.

21. The Defendant ABDEL BASSET ALI AL-MEGRAHI, A/K/A ABDELBASET ALI MOHMED, A/K/A ABDELBASET ALI MOHMED AL MEGRAHI, A/K/A "MR. BASET", A/K/A AHMED KHALIFA ABDUSAMAD (hereinafter referred to as "ABDEL BASSET"), was a citizen of Libya and was utilized by the JSO in various positions including as the Chief of the Airline Security Section, Operations Division, and as such was familiar with international airline security procedures.

22. On 21 December 1988, between 0850 and 0950 hours (CET), Libyan Arab Airlines Flight LN 147 to Tripoli, Libya, on which the Defendant ABDEL BASSET was travelling, was boarding at Luqa Airport, Malta, while Air Malta Flight KM-180 to Frankfurt, Germany, was also open for check-in between 0815 and 0915 hours, CET.

23. On 21 December 1988, Air Malta Flight KM-180 from Luqa Airport, Malta, arrived at approximately 1250 hours, Central Europe Time (CET), at Frankfurt Airport, Germany.

24. On 21 December 1988, at approximately 1600 hours, CET, Pan Am Flight 103A, with connecting service to London's Heathrow Airport and Pan Am Flight 103, departed Frankfurt, with an item of luggage that had been transferred from Air Malta Flight KM-180.

25. On 21 December 1988, between approximately 1740 hours and 1807 hours, GMT, luggage from Pan Am Flight 103A arriving from Frankfurt, Germany, was loaded onto Pan Am Flight 103 (United States aircraft number N739PA) at London's Heathrow Airport.

26. Pan American World Airways was an airline owned by a corporation created under the laws of a State of the United States and registered under Chapter 20, Title 49 of the United States Code, which airline flew its aircraft in commerce between the United States and other countries; and operated aircraft leased from and owned by a corporation created under the laws of the State of New York.

27. Pan American World Airways aircraft bearing number N739PA was a civil aircraft of the United States registered with the Federal Aviation Administration as required by Title 49 U.S.C. App., Section 1401, and operating within the special aircraft jurisdiction of the United States as defined by Title 49 U.S.C. App., Sec. 1301 (38).

28. On 21 December 1988, Pan American World Airways Flight 103 was operating in foreign air commerce between London's Heathrow Airport in the United Kingdom, and John F. Kennedy Airport in the United States of America.

29. On 21 December 1988, Pan American World Airways Flight 103 carried two hundred fifty-nine people (two hundred forty-three passengers and sixteen crew members) who were citizens of the following countries: United States of America, United Kingdom of Great Britain and Northern Ireland, Switzerland, France, Canada, Israel, Argentina, Sweden, Ireland, Italy, Hungary, South Africa, Germany, Spain, Jamaica, Philippines, India, Belgium, Trinidad, Japan and Bolivia.

30. On 21 December 1988, at approximately 7.03 p.m., GMT, Pan American World Airways Flight 103 broke apart in Scottish airspace at an altitude of 31,000 feet as the result of the detonation of an explosive device in its forward cargo hold.

31. As the result of the explosion, Pan American World Airways Flight 103 was destroyed and fell to earth, killing all two hundred fifty-nine passengers and crew, as well as eleven residents of the Scottish town of Lockerbie.

THE CONSPIRACY

32. From on or about the summer of 1985 to and including the date of the return of this Indictment, within the nations of Libya, Switzerland, Malta, Germany, the United Kingdom and elsewhere outside the United States of America, the Defendants ABDEL BASSET and LAMEN FHIMAH, together with others unknown to the Grand Jury, did unlawfully, wilfully and knowingly, conspire, combine and agree together and with others to commit terrorist acts against the United States of America and its citizens.

33. It was a part of the conspiracy that the Defendants and co-conspirators would and did place and cause to be placed a destructive device and substance in and upon Pan American World Airways Flight 103, an aircraft within the special aircraft jurisdiction of the United States and a civil aircraft used, operated, and employed in overseas and foreign air commerce; in violation of Title 18, United States Code, Sections 32(a)(2) and 2.

34. It was a further part of the conspiracy that the Defendants and co-conspirators would and did damage and destroy, by means of an explosive device, Pan American World Airways Flight 103, an aircraft in the special aircraft jurisdiction of the United States and a civil aircraft used, operated, and employed in overseas and foreign air commerce; in violation of Title 18, United States Code, Section 32(a)(1) and 2.

35. It was a further part of the conspiracy that the Defendants and co-conspirators would and did damage and destroy by means of an explosive device Pan American World Airways Flight 103, a vehicle used in foreign commerce and in an activity affecting foreign commerce; in violation of Title 18, United States Code, Section 844(i) and 2.

36. It was a further part of the conspiracy that the Defendants and co-conspirators would and did kill nationals of the United States while such nationals were outside the United States, the killings being murder as defined by Section 1111(a) of Title 18, United States Code; in violation of Title 18, United States Code, Sections 2331(a) and 2.

37. It was further a part of the conspiracy that the Defendants and co-conspirators would and did conceal the involvement of the Libyan JSO in terrorist acts against the United States and its citizens.

THE MANNER AND MEANS USED BY THE CONSPIRATORS TO FURTHER THE OBJECTS OF THE CONSPIRACY

38. Among the means used by the Defendants and co-conspirators to further the objects of the conspiracy were the following:

(a) The Defendants and co-conspirators, as officers and operatives of the JSO, utilized the resources and facilities of the nation of Libya, including the JSO, to carry out their scheme to destroy an American aircraft by means of an explosive device and to kill passengers on board the aircraft.

(b) The Defendants and co-conspirators constructed and caused to be constructed an improvised explosive device consisting of plastic explosives containing the substances RDX and PETN, and an MST-13 prototype digital electronic timer, capable of initiating an explosion at a predetermined future time, which had been manufactured for and delivered to the Libyan JSO by the Swiss firm of Meister et Bollier during the period of 1985 to 1986 at the request of Said Rashid and Hinshiri.

(c) The Defendants and co-conspirators caused the improvised explosive device to be concealed inside a portable radio cassette player.

(d) The Defendants and co-conspirators caused the radio cassette player to be placed inside a brown colored Samsonite Silhouette 4000 range suitcase.

(e) The Defendants and co-conspirators caused that suitcase to be packed with clothing, purchased in Malta, to provide the appearance of a normal travel bag.

(f) The Defendants and co-conspirators caused the suitcase, with the armed device concealed within it, to be placed in the stream of international airline passenger luggage at Luqa Airport in the Republic of Malta.

(g) The Defendants and co-conspirators utilized various false identities to enter Malta and other nations within which the conspiracy was carried out.

(h) The Defendants and co-conspirators utilized their knowledge and access gained as a result of their employment with Libyan Arab Airlines to circumvent and evade Maltese customs and airline security at Luqa Airport and elsewhere; and improperly obtained and utilized the Air Malta baggage tags to cause the interline transfer of the suitcase, containing the explosive device, to other aircraft.

(i) The Defendants and co-conspirators caused the suitcase containing the explosive device to be placed into the baggage compartment of Air Malta Flight KM-180 at Luqa Airport, Malta; caused the same suitcase to be transferred from Air Malta Flight KM-180 to Pan American World Airways Flight 103A in Frankfurt, Germany; caused the same suitcase to be further transferred to Pan American World Airways Flight 103 at Heathrow Airport, London, United Kingdom; caused the detonation of the explosive device during Pan American World Airways Flight 103's journey to the United States; and caused the destruction of Pan American World Airways Flight 103 and the death of two hundred seventy persons in the aircraft and on the ground.

OVERT ACTS

39. In order to further the conspiracy and to achieve its objectives, the following overt acts, among others, were committed in Libya, Switzerland, Malta, Germany, the United Kingdom, and elsewhere:

(a) In or about the summer of 1988, LAMEN FHIMAH stored a quantity of plastic explosive in his office at the Libyan Arab Airlines Station, Luqa Airport, Malta.

(b) In or about the fall of 1988, ABDEL BASSET flew from Tripoli, Libya, to Luqa Airport, Malta, on Libyan Arab Airlines.

(c) On or about 7 December 1988, ABDEL BASSET travelled from Libya to Malta.

(d) On or about 7 December 1988, ABDEL BASSET registered at the Holiday Inn, Sliema, Malta, using the name "ABDEL BASET A. MOHMED", a "FLIGHT DISPACHER" (sic) for Libyan Arab Airlines.

(e) On or about 7 December 1988, in Sliema, Malta, ABDEL BASSET purchased items of clothing from Mary's House, a retail store located approximately 300 yards from the hotel in which ABDEL BASSET was staying.

(f) On or about 9 December 1988, ABDEL BASSET travelled from Malta to Zurich, Switzerland.

(g) On or about 15 December 1988, LAMEN FHIMAH made the following entries in his diary: "Abdel Basset is coming from Zurich with Salvu ..." and "take taggs [sic] from Air Malta."

(h) On or about 15 December 1988, LAMEN FHIMAH made an additional entry in the "Notes" section of his diary: "bring the tags from the Airport (ABDEL BASSET-ABDUL SALAM)."

(i) On or about 15 December 1988, LAMEN FHIMAH made an additional entry in his diary by writing letters "OK" adjacent to the notation: "ABDEL BASSET is coming from Zurich with Salvu ... take taggs [sic] from Air Malta."

(j) On or about 17 December 1988, ABDEL BASSET travelled from Zurich, Switzerland, to Luqa Airport, Malta, and then on to Tripoli, Libya.

(k) On or about 18 December 1988, LAMEN FHIMAH travelled from Malta to Libya for a meeting with ABDEL BASSET.

(l) On or about 20 December 1988, ABDEL BASSET travelled from Libya to Luqa Airport, Malta, utilizing the false identity of "AHMED KHALIFA ABDUSAMAD"

(m) On or about 20 December 1988, LAMEN FHIMAH travelled from Tripoli, Libya, to Luqa Airport, Malta, on the same flight as ABDEL BASSET.

(n) On or about 20 December 1988, the Defendants and co-conspirators brought a large, brown hard-sided Samsonite suitcase into Malta.

(o) On or about 20 December 1988, ABDEL BASSET had a meeting with LAMEN FHIMAH in Malta.

(p) On or about 20 December 1988, ABDEL BASSET registered at the Holiday Inn, Sliema, Malta, under the false name "AHMED KHALIFA ABDUSAMAD".

(q) On 21 December 1988, at approximately 7.11 a.m., CET, ABDEL BASSET placed a telephone call to LAMEN FHIMAH from the Holiday Inn, Sliema, Malta.

(r) On 21 December 1988, ABDEL BASSET, travelling under an assumed name, departed Luqa Airport, Malta, on LAA Flight LN 147 to Tripoli, Libya.

(s) On 21 December 1988, between 0815 and 0915 hours, CET, the Defendants and co-conspirators unknown to the Grand Jury, caused a brown, hard-sided Samsonite suitcase containing an explosive device incorporating an MST-13 timer, previously manufactured for the JSO, to be introduced as part of the interline baggage in Air Malta Flight KM-180 to Frankfurt, Germany.

(t) On 21 December 1988, the Defendants and co-conspirators unknown to the Grand Jury, destroyed aircraft N739PA as charged in Count Three of this Indictment, the allegations of which are hereby re-alleged and incorporated by reference.

(u) On 21 December 1988, the Defendants and co-conspirators unknown to the Grand Jury, by means of fire and explosives destroyed aircraft N739PA, and as a direct result thereof caused the death of two hundred seventy persons as set forth in Counts Two and Three, the allegations of which are hereby re-alleged and incorporated by reference.

(v) On 21 December 1988, the Defendants and co-conspirators unknown to the Grand Jury, by means of fire and explosives destroyed aircraft N739PA, and as a direct result thereof, did murder one hundred eighty-nine nationals of the United States, as set forth in Counts Five through One Hundred Ninety-Three, the allegations of which are hereby re-alleged and incorporated by reference.

(Violation of Title 18, United States Code, Section 371)

COUNT TWO

1. The Grand Jury hereby re-alleges and incorporates by reference paragraphs One through Thirty-one of Count One of this Indictment.

2. On or about 21 December 1988, at Heathrow Airport, London, United Kingdom, and elsewhere, the Defendants ABDEL BASSET and LAMEN FHIMAH, together with others unknown to the Grand Jury, wilfully and unlawfully caused to be placed a destructive device and substance in and upon aircraft number N739PA, a civil aircraft of the United States used, operated, and employed in overseas and foreign air commerce by Pan American World Airways as Pan Am Flight 103, en route to the United States from Heathrow Airport, London, United Kingdom, resulting in the deaths of:

(Violation of Title 18, United States Code, Sections 32(a)(2), 34 and 2)

COUNT THREE

1. The Grand Jury hereby re-alleges and incorporates by reference paragraphs One through Thirty-one of Count One of this Indictment.

2. On or about 21 December 1988, at an altitude of 31,000 feet, approximately in the vicinity of the town of Lockerbie, Scotland, and within the special aircraft jurisdiction of the United States, as defined by Title 49, United States Code Appendix, Section 1301(38), the Defendants ABDEL BASSET and LAMEN FHIMAH, together with others unknown to the Grand Jury, did wilfully and unlawfully damage and destroy, by means of an explosive device, aircraft number N739PA, a civil aircraft of the United States used, operated, and employed in overseas and foreign air commerce by Pan American World Airways as Pan Am Flight 103, en route to the United States from Heathrow Airport, London, United Kingdom, resulting in the deaths of two hundred seventy victims as specified in Count Two of this Indictment.

(Violation of Title 18, United States Code, Sections 32(a)(1), 34 and 2)

COUNT FOUR

1. The Grand Jury hereby re-alleges and incorporates by reference paragraphs One through Thirty-one of Count One of this Indictment.

2. On 21 December 1988, at an altitude of 31,000 feet, approximately in the vicinity of the town of Lockerbie, Scotland, the Defendants ABDEL BASSET and LAMEN FHIMAH, together with others unknown to the Grand Jury, did maliciously damage and destroy by means of an explosive, aircraft number N739PA, employed as Pan Am Flight 103, a vehicle used in foreign commerce, and in an activity affecting foreign commerce, which was en route to the United States from Heathrow Airport, London, United Kingdom.

3. On 21 December 1988, as a direct and proximate result of the damage and destruction of aircraft N739PA, above and within the town of Lockerbie, Scotland, and the surrounding area, the Defendants ABDEL BASSET and LAMEN FHIMAH, together with others unknown to the Grand Jury, did maliciously cause the deaths of the two hundred seventy persons identified in Count Two of this Indictment.

(Violation of Title 18, United States Code, Sections 844(i) and 2)

COUNTS FIVE THROUGH ONE HUNDRED NINETY-THREE

1. The Grand Jury hereby re-alleges and incorporates by reference paragraphs One through Thirty-one of Count One of this Indictment.

2. At all times material to the Indictment the persons identified as victims in Counts Five through One Hundred Ninety-Three were nationals of the United States as that term is defined by Title 8, United States Code, Section 1101(a)(22).

3. On or about 21 December 1988, outside the United States, in the town of Lockerbie, Scotland, and vicinity, within the United Kingdom and elsewhere, the Defendants ABDEL BASSET and LAMEN FHIMAH, and others unknown to the Grand Jury, did willfully, deliberately, maliciously and with premeditation and malice aforethought kill one hundred eighty-nine nationals of the United States who were the passengers and crew of the aircraft, and whose identities are reflected in the table set forth below:

Count	Victim
FIVE	John Michael Gerard Ahern
SIX	Sarah Margaret Aicher
SEVEN	John David Akerstrom
EIGHT	Thomas Joseph Ammerman
NINE	Martin Lewis Apfelbaum
TEN	Rachel Marie Asrelsky
ELEVEN	Judith Ellen Atkinson
TWELVE	William Garretson Atkinson III

Count	Victim
THIRTEEN	Jerry Don Avritt
FOURTEEN	Harry Michael Bainbridge
FIFTEEN	Julian MacBain Benello
SIXTEEN	Lawrence Ray Bennett
SEVENTEEN	Philip Vernon Bergstrom
EIGHTEEN	Michael Stuart Bernstein
NINETEEN	Steven Russell Berrell

c. Security Council: Resolutions on Terrorism

(1) S/RES/1192, August 27, 1998

RESOLUTION 1192 (1998)

Adopted by the Security Council at its 3920th meeting, on 27 August 1998

The Security Council,

Recalling its resolutions 731 (1992) of 21 January 1992, 748 (1992) of 31 March 1992 and 883 (1993) of 11 November 1993,

Noting the report of the independent experts appointed by the Secretary-General (S/1997/991),

Having regard to the contents of the letter dated 24 August 1998 from the Acting Permanent Representatives of the United Kingdom of Great Britain and Northern Ireland and of the United States of America to the Secretary-General (S/1998/795),

Noting also, in light of the above resolutions, the communications of the Organization of African Unity, the League of Arab States, the Non-Aligned Movement and the Islamic Conference (S/1994/373, S/1995/834, S/1997/35, S/1997/273, S/1997/406, S/1997/497, S/1997/529) as referred to in the letter of 24 August 1998,

Acting under Chapter VII of the Charter of the United Nations,

1. Demands once again that the Libyan Government immediately comply with the above-mentioned resolutions;

2. Welcomes the initiative for the trial of the two persons charged with the bombing of Pan Am flight 103 ("the two accused") before a Scottish court sitting in the Netherlands, as contained in the letter dated 24 August 1998 from the Acting Permanent Representatives of the United Kingdom of Great Britain and Northern Ireland and of the United States of America ("the initiative") and its attachments, and the willingness of the Government of the Netherlands to cooperate in the implementation of the initiative;

3. Calls upon the Government of the Netherlands and the Government of the United Kingdom to take such steps as are necessary to implement the initiative, including the conclusion of arrangements with a view to enabling the court described in paragraph 2 to exercise jurisdiction in the terms of the intended Agreement between the two Governments, attached to the said letter of 24 August 1998;

4. Decides that all States shall cooperate to this end, and in particular that the Libyan Government shall ensure the appearance in the Netherlands of the two accused for the purpose of trial by the court described in paragraph 2, and that the Libyan Government shall ensure that any evidence or witnesses in Libya are, upon the request of the court, promptly made available at the court in the Netherlands for the purpose of the trial;

5. Requests the Secretary-General, after consultation with the Government of the Netherlands, to assist the Libyan Government

with the physical arrangements for the safe transfer of the two accused from Libya direct to the Netherlands;

6. Invites the Secretary-General to nominate international observers to attend the trial;

7. Decides further that, on the arrival of the two accused in the Netherlands, the Government of the Netherlands shall detain the two accused pending their transfer for the purpose of trial before the court described in paragraph 2;

8. Reaffirms that the measures set forth in its resolutions 748 (1992) and 883 (1993) remain in effect and binding on all Member States, and in this context reaffirms the provisions of paragraph 16 of resolution 883 (1993), and decides that the aforementioned measures shall be suspended immediately if the Secretary-General reports to the Council that the two accused have arrived in the Netherlands for the purpose of trial before the court described in paragraph 2 or have appeared for trial before an appropriate court in the United Kingdom or the United States, and that the Libyan Government has satisfied the French judicial authorities with regard to the bombing of UTA 772;

9. Expresses its intention to consider additional measures if the two accused have not arrived or appeared for trial promptly in accordance with paragraph 8;

10. Decides to remain seized of the matter.

(2) S/RES/1189 (1998), August 13, 1998

RESOLUTION 1189 (1998)

Adopted by the Security Council at its 3915th meeting, on 13 August 1998

The Security Council,

Deeply disturbed by the indiscriminate and outrageous acts of international terrorism that took place on 7 August 1998 in Nairobi, Kenya and Dar-es-Salaam, Tanzania,

Condemning such acts which have a damaging effect on international relations and jeopardize the security of States,

Convinced that the suppression of acts of international terrorism is essential for the maintenance of international peace and security, and reaffirming the determination of the international community to eliminate international terrorism in all its forms and manifestations,

Also reaffirming the obligations of Member States under the Charter of the United Nations,

Stressing that every Member State has the duty to refrain from organizing, instigating, assisting or participating in terrorist acts in another State or acquiescing in organized activities within its territory directed towards the commission of such acts,

Mindful of General Assembly resolution 52/164 of 15 December 1997 on the International Convention for the Suppression of Terrorist Bombings,

Recalling that, in the statement issued on 31 January 1992 (S/23500) on the occasion of the meeting of the Security Council at the level of Heads of State and Government, the Council expressed its deep concern over acts of international terrorism, and emphasized the need for the international community to deal effectively with all such criminal acts,

Also stressing the need to strengthen international cooperation between States in order to adopt practical and effective measures to prevent, combat and eliminate all forms of terrorism affecting the international community as a whole,

Commending the responses of the Governments of Kenya, Tanzania and the United States of America to the terrorist bomb attacks in Kenya and Tanzania,

Determined to eliminate international terrorism,

1. Strongly condemns the terrorist bomb attacks in Nairobi, Kenya and Dar-es-Salaam, Tanzania on 7 August 1998 which claimed hundreds of innocent lives, injured thousands of people and caused massive destruction to property;

2. Expresses its deep sorrow, sympathy and condolences to the families of the innocent victims of the terrorist bomb attacks during this difficult time;

3. Calls upon all States and international institutions to cooperate with and provide support and assistance to the ongoing inves-

tigations in Kenya, Tanzania and the United States to apprehend the perpetrators of these cowardly criminal acts and to bring them swiftly to justice;

4. Expresses its sincere gratitude to all States, international institutions and voluntary organizations for their encouragement and timely response to the requests for assistance from the Governments of Kenya and Tanzania, and urges them to assist the affected countries, especially in the reconstruction of infrastructure and disaster preparedness;

5. Calls upon all States to adopt, in accordance with international law and as a matter of priority, effective and practical measures for security cooperation, for the prevention of such acts of terrorism, and for the prosecution and punishment of their perpetrators;

6. Decides to remain seized of the matter.

(3) S/RES/1070, August 16, 1996*

RESOLUTION 1070 (1996)*

Adopted by the Security Council at its 3690th meeting, on 16 August 1996

The Security Council,

Recalling its resolutions 1044 (1996) of 31 January 1996 and 1054 (1996) of 26 April 1996,

Having considered the report of the Secretary-General of 10 July 1996 (S/1996/541 and Add.1, 2 and 3),

Taking note of the letters of 31 May 1996 (S/1996/402), 24 June 1996 (S/1996/464) and 2 July 1996 (S/1996/513) from the Permanent Representative of the Sudan,

Taking note also of the letter of 10 July 1996 (S/1996/538) from the Permanent Representative of the Federal Democratic Republic of Ethiopia,

Gravely alarmed at the terrorist assassination attempt on the life of the President of the Arab Republic of Egypt, in Addis Ababa, Ethiopia, on 26 June 1995, and convinced that those responsible for that act must be brought to justice,

Taking note that the statements of the Central Organ of the Organization of African Unity (OAU) Mechanism for Conflict Prevention, Management and Resolution of 11 September 1995, and of 19 December 1995 (S/1996/10, annexes I and II) considered the attempt on the life of President Mubarak as aimed, not only at the President of the Arab Republic of Egypt, and not only at the sovereignty, integrity and stability of Ethiopia, but also at Africa as a whole,

Regretting the fact that the Government of Sudan has not yet complied with the requests of the Central Organ of the OAU set out in those statements,

Taking note of the continued efforts of the OAU to ensure Sudan's compliance with the requests of the Central Organ of the OAU, and regretting that the Government of Sudan has not responded adequately to the efforts of the OAU,

Deeply alarmed that the Government of Sudan has failed to comply with the requests set out in paragraph 4 of resolution 1044 (1996) as reaffirmed in paragraph 1 of resolution 1054 (1996),

Reaffirming that the suppression of acts of international terrorism, including those in which States are involved is essential for the maintenance of international peace and security,

Determining that the non-compliance by the Government of Sudan with the requests set out in paragraph 4 of resolution 1044 (1996) as reaffirmed in paragraph 1 of resolution 1054 (1996) constitutes a threat to international peace and security,

---

* Reissued for technical reasons.

Determined to eliminate international terrorism and to ensure the effective implementation of resolutions 1044 (1996) and 1054 (1996), and to that end acting under Chapter VII of the Charter of the United Nations,

1. Demands once again that the Government of Sudan comply fully and without further delay with the requests set out in paragraph 4 of resolution 1044 (1996) as reaffirmed in paragraph 1 of resolution 1054 (1996);

2. Notes the steps taken by some Member States to give effect to the provisions set out in paragraph 3 of resolution 1054 (1996), and requests those States that have not yet done so to report to the Secretary-General as soon as possible on the steps they have taken to that end;

3. Decides that all States shall deny aircraft permission to take off from, land in, or overfly their territories if the aircraft is registered in Sudan, or owned, leased or operated by or on behalf of Sudan Airways or by any undertaking, wherever located or organized, which is substantially owned or controlled by Sudan Airways, or owned, leased or operated by the Government or public authorities of Sudan, or by an undertaking, wherever located or organized, which is substantially owned or controlled by the Government or public authorities of Sudan;

4. Further decides that it shall, 90 days after the date of adoption of this resolution, determine the date of entry into force of the provisions set out in paragraph 3 above and all aspects of the modalities of its implementation, unless the Council decides before then, on the basis of a report presented by the Secretary-General, on the compliance of Sudan with the demand in paragraph 1 above;

5. Requests the Secretary-General, by 15 November 1996, to submit a report on the compliance of Sudan with the provisions of paragraph 1 above;

6. Decides to remain actively seized of the matter.

(4) S/RES/1054, April 26, 1996

RESOLUTION 1054 (1996)

Adopted by the Security Council at its 3660th meeting, on 26 April 1996

The Security Council,

Reaffirming its resolution 1044 (1996) of 31 January 1996,

Taking note of the report of the Secretary-General of 11 March 1996 (S/1996/179) submitted pursuant to paragraph 7 of resolution 1044 (1996) and the conclusions contained therein,

Gravely alarmed at the terrorist assassination attempt on the life of the President of the Arab Republic of Egypt, in Addis Ababa, Ethiopia, on 26 June 1995, and convinced that those responsible for that act must be brought to justice,

Taking note that the statements of the Organization of African Unity (OAU) Mechanism for Conflict Prevention, Management and Resolution of 11 September 1995, and of 19 December 1995 (S/1996/10, annexes I and II) considered the attempt on the life of President Mubarak as aimed, not only at the President of the Arab Republic of Egypt, and not only at the sovereignty, integrity and stability of Ethiopia, but also at Africa as a whole,

Regretting the fact that the Government of Sudan has not yet complied with the requests of the Central Organ of the OAU set out in those statements,

Taking note of the continued effort of the OAU Secretary-General to ensure Sudan's compliance with the requests of the Central Organ of the OAU,

Taking note also, with regret, that the Government of Sudan has not responded adequately to the efforts of the OAU,

Deeply alarmed that the Government of Sudan has failed to comply with the requests set out in paragraph 4 of resolution 1044 (1996),

Reaffirming that the suppression of acts of international terrorism, including those in which States are involved is essential for the maintenance of international peace and security,

Determining that the non-compliance by the Government of Sudan with the requests set out in paragraph 4 of resolution 1044 (1996) constitutes a threat to international peace and security,

Determined to eliminate international terrorism and to ensure effective implementation of resolution 1044 (1996) and to that end acting under Chapter VII of the Charter of the United Nations,

1. Demands that the Government of Sudan comply without further delay with the requests set out in paragraph 4 of resolution 1044 (1996) by:

(a) Taking immediate action to ensure extradition to Ethiopia for prosecution of the three suspects sheltered in Sudan and wanted in connection with the assassination attempt of 26 June 1995 on

the life of the President of the Arab Republic of Egypt in Addis Ababa, Ethiopia; and

(b) Desisting from engaging in activities of assisting, supporting and facilitating terrorist activities and from giving shelter and sanctuary to terrorist elements; and henceforth acting in its relations with its neighbours and with others in full conformity with the Charter of the United Nations and with the Charter of the OAU;

2. Decides that the provisions set out in paragraph 3 below shall come into force at 00.01 Eastern Standard Time on 10 May 1996, and shall remain in force until the Council determines that the Government of Sudan has complied with paragraph 1 above;

3. Decides that all States shall:

(a) Significantly reduce the number and the level of the staff at Sudanese diplomatic missions and consular posts and restrict or control the movement within their territory of all such staff who remain;

(b) Take steps to restrict the entry into or transit through their territory of members of the Government of Sudan, officials of that Government and members of the Sudanese armed forces;

4. Calls upon all international and regional organizations not to convene any conference in Sudan;

5. Calls upon all States, including States not members of the United Nations and the United Nations specialized agencies to act strictly in conformity with this resolution, notwithstanding the existence of any rights granted or obligations conferred or imposed by any international agreement or of any contract entered into or any licence or permit granted prior to the entry into force of the provisions set out in paragraph 3 above;

6. Requests States to report to the Secretary-General of the United Nations within 60 days from the adoption of this resolution on the steps they have taken to give effect to the provisions set out in paragraph 3 above;

7. Requests the Secretary-General to submit an initial report to the Council within 60 days of the date specified in paragraph 2 above on the implementation of this resolution;

8. Decides to re-examine the matter, 60 days after the date specified in paragraph 2 above and to consider, on the basis of the facts established by the Secretary-General, whether Sudan has complied with the demands in paragraph 1 above and, if not, whether to adopt further measures to ensure its compliance;

9. Decides to remain seized of the matter.

(5) S/RES/1044, January 31, 1996

RESOLUTION 1044 (1996)

Adopted by the Security Council at its 3627th meeting, on 31 January 1996

The Security Council,

Deeply disturbed by the world-wide persistence of acts of international terrorism in all its forms which endanger or take innocent lives, have a deleterious effect on international relations and jeopardize the security of States,

Recalling the statement made by the President of the Security Council on 31 January 1992 (S/23500) when the Council met at the level of Heads of State and Government in which the members of the Council expressed their deep concern over acts of international terrorism and emphasized the need for the international community to deal effectively with all such acts,

Recalling also the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, opened for signature at New York on 14 December 1973,

Stressing the imperative need to strengthen international cooperation between States in order to make and adopt practical and effective measures to prevent, combat and eliminate all forms of terrorism that affect the international community as a whole,

Convinced that the suppression of acts of international terrorism, including those in which States are involved, is an essential element for the maintenance of international peace and security,

Gravely alarmed at the terrorist assassination attempt on the life of the President of the Arab Republic of Egypt, in Addis Ababa, Ethiopia, on 26 June 1995, and convinced that those responsible for that act must be brought to justice,

Taking note that the Third Extraordinary Session of the Organization of African Unity (OAU) Mechanism for Conflict Prevention, Management and Resolution of 11 September 1995, considered that attack as aimed, not only at the President of the Arab Republic of Egypt, and not only at the sovereignty, integrity and stability of Ethiopia, but also at Africa as a whole,

Taking note also of the statements of the Central Organ of the OAU Mechanism of 11 September 1995 and of 19 December 1995 and supporting the implementation of the requests contained therein,

Regretting the fact that the Government of the Sudan has not yet complied with the requests of the Central Organ of the OAU set out in those statements,

Noting the letter from the Permanent Representative of Ethiopia of 9 January 1996 (S/1996/10) to the President of the Security Council,

Noting also the letters from the Permanent Representative of the Sudan of 11 January 1996 (S/1996/22) and 12 January 1996 (S/1996/25) to the President of the Council,

1. Condemns the terrorist assassination attempt on the life of the President of the Arab Republic of Egypt in Addis Ababa, Ethiopia, on 26 June 1995;

2. Strongly deplores the flagrant violation of the sovereignty and integrity of Ethiopia and the attempt to disturb the peace and security of Ethiopia and the region as a whole;

3. Commends the efforts of the Government of Ethiopia to resolve this issue through bilateral and regional arrangements;

4. Calls upon the Government of the Sudan to comply with the requests of the Organization of African Unity without further delay to:

(a) Undertake immediate action to extradite to Ethiopia for prosecution the three suspects sheltering in the Sudan and wanted in connection with the assassination attempt on the basis of the 1964 Extradition Treaty between Ethiopia and the Sudan;

(b) Desist from engaging in activities of assisting, supporting and facilitating terrorist activities and from giving shelter and sanctuaries to terrorist elements and act in its relations with its neighbours and with others in full conformity with the Charter of the United Nations and with the Charter of the Organization of African Unity;

5. Urges the international community to encourage the Government of the Sudan to respond fully and effectively to the OAU requests;

6. Welcomes the efforts of the Secretary-General of the OAU aimed at the implementation of the relevant provisions of the statements of the Central Organ of the OAU Mechanism of 11 September 1995 and of 19 December 1995, and supports the OAU in its continued efforts to implement its decisions;

7. Requests the Secretary-General in consultation with the OAU to seek the cooperation of the Government of the Sudan in the implementation of this resolution and to report to the Council within 60 days;

8. Decides to remain seized of the matter.

(6) S/RES/883, November 11, 1993

RESOLUTION 883 (1993)

Adopted by the Security Council at its 3312th meeting, on 11 November 1993

The Security Council,

Reaffirming its resolutions 731 (1992) of 21 January 1992 and 748 (1992) of 31 March 1992,

Deeply concerned that after more than twenty months the Libyan Government has not fully complied with these resolutions,

Determined to eliminate international terrorism,

Convinced that those responsible for acts of international terrorism must be brought to justice,

Convinced also that the suppression of acts of international terrorism, including those in which States are directly or indirectly involved, is essential for the maintenance of international peace and security,

Determining, in this context, that the continued failure by the Libyan Government to demonstrate by concrete actions its renunciation of terrorism, and in particular its continued failure to respond fully and effectively to the requests and decisions in resolutions 731 (1992) and 748 (1992), constitute a threat to international peace and security,

Taking note of the letters to the Secretary-General dated 29 September and 1 October 1993 from the Secretary of the General People's Committee for Foreign Liaison and International Cooperation of Libya (S/26523) and his speech in the General Debate at the forty-eighth session of the General Assembly (A/48/PV.20) in which Libya stated its intention to encourage those charged with the bombing of Pan Am 103 to appear for trial in Scotland and its willingness to cooperate with the competent French authorities in the case of the bombing of UTA 772,

Expressing its gratitude to the Secretary-General for the efforts he has made pursuant to paragraph 4 of resolution 731 (1992),

Recalling the right of States, under Article 50 of the Charter, to consult the Security Council where they find themselves confronted with special economic problems arising from the carrying out of preventive or enforcement measures,

Acting under Chapter VII of the Charter,

1. Demands once again that the Libyan Government comply without any further delay with resolutions 731 (1992) and 748 (1992);

2. Decides, in order to secure compliance by the Libyan Government with the decisions of the Council, to take the following measures, which shall come into force at 00.01 EST on 1 December 1993 unless the Secretary-General has reported to the Council in the terms set out in paragraph 16 below;

3. Decides that all States in which there are funds or other financial resources (including funds derived or generated from property) owned or controlled, directly or indirectly, by:

(a) the Government or public authorities of Libya, or

(b) any Libyan undertaking,

shall freeze such funds and financial resources and ensure that neither they nor any other funds and financial resources are made available, by their nationals or by any persons within their territory, directly or indirectly, to or for the benefit of the Government or public authorities of Libya or any Libyan undertaking, which for the purposes of this paragraph, means any commercial, industrial or public utility undertaking which is owned or controlled, directly or indirectly, by

(i) the Government or public authorities of Libya,

(ii) any entity, wherever located or organized, owned or controlled by (i), or

(iii) any person identified by States as acting on behalf of (i) or (ii) for the purposes of this resolution;

4. Further decides that the measures imposed by paragraph 3 above do not apply to funds or other financial resources derived from the sale or supply of any petroleum or petroleum products, including natural gas and natural gas products, or agricultural products or commodities, originating in Libya and exported therefrom after the time specified in paragraph 2 above, provided that any such funds are paid into separate bank accounts exclusively for these funds;

5. Decides that all States shall prohibit any provision to Libya by their nationals or from their territory of the items listed in the annex to this resolution, as well as the provision of any types of equipment, supplies and grants of licensing arrangements for the manufacture or maintenance of such items;

6. Further decides that, in order to make fully effective the provisions of resolution 748 (1992), all States shall:

(a) require the immediate and complete closure of all Libyan Arab Airlines offices within their territories;

(b) prohibit any commercial transactions with Libyan Arab Airlines by their nationals or from their territory, including the honouring or endorsement of any tickets or other documents issued by that airline;

(c) prohibit, by their nationals or from their territory, the entering into or renewal of arrangements for:

(i) the making available, for operation within Libya, of any aircraft or aircraft components, or

(ii) the provision of engineering or maintenance servicing of any aircraft or aircraft components within Libya;

(d) prohibit, by their nationals or from their territory, the supply of any materials destined for the construction, improvement or maintenance of Libyan civilian or military airfields and associated facilities and equipment, or of any engineering or other services or components destined for the maintenance of any Libyan civil or military airfields or associated facilities and equipment, except emergency equipment and equipment and services directly related to civilian air traffic control;

(e) prohibit, by their nationals or from their territory, any provision of advice, assistance, or training to Libyan pilots, flight engineers, or aircraft and ground maintenance personnel associated with the operation of aircraft and airfields within Libya;

(f) prohibit, by their nationals or from their territory, any renewal of any direct insurance for Libyan aircraft;

7. Confirms that the decision taken in resolution 748 (1992) that all States shall significantly reduce the level of the staff at Libyan diplomatic missions and consular posts includes all missions and posts established since that decision or after the coming into force of this resolution;

8. Decides that all States, and the Government of Libya, shall take the necessary measures to ensure that no claim shall lie at the instance of the Government or public authorities of Libya, or of any Libyan national, or of any Libyan undertaking as defined in paragraph 3 of this resolution, or of any person claiming through or for the benefit of any such person or undertaking, in connection with any contract or other transaction or commercial operation where its performance was affected by reason of the measures imposed by or pursuant to this resolution or related resolutions;

9. Instructs the Committee established by resolution 748 (1992) to draw up expeditiously guidelines for the implementation of paragraphs 3 to 7 of this resolution, and to amend and supplement, as appropriate, the guidelines for the implementation of resolution 748 (1992), especially its paragraph 5 (a);

10. Entrusts the Committee established by resolution 748 (1992) with the task of examining possible requests for assistance under the provisions of Article 50 of the Charter of the United Nations and making recommendations to the President of the Security Council for appropriate action;

11. Affirms that nothing in this resolution affects Libya's duty scrupulously to adhere to all of its obligations concerning servicing and repayment of its foreign debt;

12. Calls upon all States, including States not Members of the United Nations, and all international organizations, to act strictly in accordance with the provisions of the present resolution, notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any licence or permit granted prior to the effective time of this resolution;

13. Requests all States to report to the Secretary-General by 15 January 1994 on the measures they have instituted for meeting the obligations set out in paragraphs 3 to 7 above;

14. Invites the Secretary-General to continue his role as set out in paragraph 4 of resolution 731 (1992);

15. Calls again upon all Member States individually and collectively to encourage the Libyan Government to respond fully and effectively to the requests and decisions in resolutions 731 (1992) and 748 (1992);

16. Expresses its readiness to review the measures set forth above and in resolution 748 (1992) with a view to suspending them immediately if the Secretary-General reports to the Council that the Libyan Government has ensured the appearance of those charged with the bombing of Pan Am 103 for trial before the appro-

priate United Kingdom or United States court and has satisfied the French judicial authorities with respect to the bombing of UTA 772, and with a view to lifting them immediately when Libya complies fully with the requests and decisions in resolutions 731 (1992) and 748 (1992); and requests the Secretary-General, within 90 days of such suspension, to report to the Council on Libya's compliance with the remaining provisions of its resolutions 731 (1992) and 748 (1992) and, in the case of non-compliance, expresses its resolve to terminate immediately the suspension of thesemeasures;

17. Decides to remain seized of the matter.

ANNEX

The following are the items referred to in paragraph 5 of this resolution:

I. Pumps of medium or large capacity whose capacity is equal to or larger than 350 cubic metres per hour and drivers (gas turbines and electric motors) designed for use in the transportation of crude oil and natural gas

II. Equipment designed for use in crude oil export terminals:

—Loading buoys or single point moorings (spm)

—Flexible hoses for connection between underwater manifolds (plem) and single point mooring and floating loading hoses of large sizes (from 12″ to 16″)

—Anchor chains

III. Equipment not specially designed for use in crude oil export terminals but which because of their large capacity can be used for this purpose:

—Loading pumps of large capacity (4,000 m3/h) and small head (10 bars)

—Boosting pumps within the same range of flow rates

—Inline pipe line inspection tools and cleaning devices (i.e. pigging tools) (16″ and above)

—Metering equipment of large capacity (1,000 m3/h and above)

IV. Refinery equipment:

—Boilers meeting American Society of Mechanical Engineers 1 standards

—Furnaces meeting American Society of Mechanical Engineers 8 standards

—Fractionation columns meeting American Society of Mechanical Engineers 8 standards

—Pumps meeting American Petroleum Institute 610 standards

—Catalytic reactors meeting American Society of Mechanical Engineers 8 standards

—Prepared catalysts, including the following:

Catalysts containing platinum

Catalysts containing molybdenum

V. Spare parts destined for the items in I to IV above.

(7) S/RES/748, March 31, 1992

RESOLUTION 748 (1992)

Adopted by the Security Council at its 3063rd meeting, on 31 March 1992

The Security Council,

Reaffirming its resolution 731 (1992) of 21 January 1992,

Noting the reports of the Secretary-General (S/23574) and S/23672),

Deeply concerned that the Libyan Government has still not provided a full and effective response to the requests in its resolution 731 of 21 January 1992,

Convinced that the suppression of acts of international terrorism, including those in which States are directly or indirectly involved, is essential for the maintenance of international peace and security,

Recalling that in the statement issued on 31 January 1992 on the occasion of the meeting of the Security Council at the levels of Heads of State and Government the members of the Council expressed their deep concern over acts of international terrorism and emphasized the need for the international community to deal effectively with all such acts,

Reaffirming that, in accordance with the principle in Article 2, paragraph 4, of the Charter of the United Nations, every State has the duty to refrain from organizing, instigating, assisting or participating in terrorist acts in another State or acquiescing in organized activities within its territory directed towards the commission of such acts, when such acts involve a threat or use of force,

Determining in this context that the failure by the Libyan Government to demonstrate, by concrete actions its renunciation of terrorism and in particular its continued failure to respond fully and effectively to the requests in resolution 731 (1992), constitute a threat to international peace and security,

Determined to eliminate international terrorism,

Recalling the right of States, under Article 50 of the Charter, to consult the Security Council where they find themselves confronted with special economic problems arising from the carrying out of preventive or enforcement measures,

Acting under Chapter VII of the Charter of the United Nations,

1. *Decides* that the Libyan Government must now comply without any further delay with paragraph 3 of resolution 731 (1992) regarding the requests contained in documents S/23306, S/23308 and S/23309;

2. *Decides also* that the Libyan Government must commit itself definitively to cease all forms of terrorist action and all assistance to terrorist groups and that it must promptly, by concrete actions, demonstrate its renunciation of terrorism;

3. *Decides that* on 15 April 1992 all States shall adopt the measures set out below, which shall apply until the Security Council decides that the Libyan Government has complied with paragraphs 1 and 2 above:

4. *Decides that all States shall:*

(a) Deny permission to any aircraft to take off from, land in or overfly their territory if it is destined to land in or has taken off from the territory of Libya, unless the particular flight has been approved on grounds of significant humanitarian need by the Committee established by paragraph 9 below;

(b) Prohibit, by their nationals or from their territory, the supply of any aircraft or aircraft components to Libya, the provision of engineering and maintenance servicing of Libyan aircraft or aircraft components, the certification of air-worthiness for Libyan aircraft, the payment of new claims against existing insurance contracts, and the provision of new direct insurance for Libyan aircraft;

5. *Decides further* that all States shall:

(a) Prohibit any provision to Libya by their nationals or from their territory of arms and related material of all types, including the sale or transfer of weapons and ammunition, military vehicles and equipment, paramilitary police equipment and spare parts for the aforementioned, as well as the provision of any types of equipment, supplies and grants of licensing arrangements, for the manufacture or maintenance of the aforementioned;

(b) Prohibit any provision to Libya by their nationals or from their territory of technical advice, assistance or training related to the provision, manufacture, maintenance, or use of the items in (a) above;

(c) Withdraw any of their officials or agents present in Libya to advise the Libyan authorities on military matters;

6. *Decides also* that all States shall:

(a) Significantly reduce the number and the level of the staff at Libyan diplomatic missions and consular posts and restrict or control the movement within their territory of all such staff who remain; in the case of Libyan missions to international organizations, the host State may, as it deems necessary, consult the organization concerned on the measures required to implement this subparagraph;

(b) Prevent the operation of all Libyan Arab Airlines offices;

(c) Take all appropriate steps to deny entry to or expel Libyan nationals who have been denied entry to or expelled from other States because of their involvement in terrorist activities;

7. *Calls upon* all States, including States not Members of the United Nations, and all international organizations, to act strictly in accordance with the provisions of the present resolution, notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any licence or permit granted before 15 April 1992;

8. *Requests* all States to report to the Secretary-General by 15 May 1992 on the measures they have instituted for meeting the obligations set out in paragraphs 3 to 7 above;

9. *Decides* to establish, in accordance with rule 28 of its provisional rules of procedure, a Committee of the Security Council consisting of all the members of the Council, to undertake the fol-

lowing tasks and to report on its work to the Council with its observations and recommendations:

(a) To examine the reports submitted pursuant to paragraph 8 above;

(b) To seek from all States further information regarding the action taken by them concerning the effective implementation of the measures imposed by paragraphs 3 to 7 above;

(c) To consider any information brought to its attention by States concerning violations of the measures imposed by paragraphs 3 to 7 above, and in that context, to make recommendations to the Council on ways to increase their effectiveness;

(d) To recommend appropriate measures in response to violations of the measures imposed by paragraphs 3 to 7 above and provide information on a regular basis to the Secretary-General for general distribution to Member States;

(e) To consider and to decide upon expeditiously any application by States for the approval of flights on grounds of significant humanitarian need in accordance with paragraph 4 above;

(f) To give special attention to any communications in accordance with Article 50 of the Charter of the United Nations from any neighbouring or other States with special economic problems which might arise from the carrying out of the measures imposed by paragraphs 3 to 7 above;

10. *Calls upon* all States to cooperate fully with the Committee in the fulfilment of its task, including supplying such information as may be sought by the Committee in pursuance of the present resolution;

11. *Requests* the Secretary-General to provide all necessary assistance to the Committee and to make the necessary arrangements in the Secretariat for this purpose;

12. *Invites* the Secretary-General to continue his role as set out in paragraph 4 of resolution 731 (1992);

13. *Decides* that the Security Council shall, every 120 days or sooner should the situation so require, review the measures imposed by paragraphs 3 to 7 above in the light of the compliance by the Libyan Government with paragraphs 1 and 2 above taking into account, as appropriate, any reports provided by the Secretary-General on his role as set out in paragraph 4 of resolution 731 (1992);

14. *Decides* to remain seized of the matter.

(8) S/RES/731, January 21, 1992

RESOLUTION 731 (1992)

Adopted by the Security Council at its 3033rd meeting, on 21 January 1992

The Security Council,

Deeply disturbed by the world-wide persistence of acts of international terrorism in all its forms, including those in which States are directly or indirectly involved, which endanger or take innocent lives, have a deleterious effect on international relations and jeopardize the security of States,

Deeply concerned by all activities directed against international civil aviation and affirming the right of all States, in accordance with the Charter of the United Nations and relevant principles of international law, to protect their nationals from acts of international terrorism that constitute threats to international peace and security,

Reaffirming its resolution 286 (1970) in which it called on States to take all possible legal steps to prevent any interference with international civil air travel,

Reaffirming also its resolution 635 (1989) in which it condemned all acts of unlawful interference against the security of civil aviation and called upon all States to cooperate in devising and implementing measures to prevent all acts of terrorism, including those involving explosives,

Recalling the statement made on 30 December 1988 by the President of the Council on behalf of the members of the Council strongly condemning the destruction of Pan Am flight 103 and calling on all States to assist in the apprehension and prosecution of those responsible for this criminal act,

Deeply concerned over results of investigations which implicate officials of the Libyan Government and which are contained in Security Council documents that include the requests addressed to the Libyan authorities by France [1,2] the United Kingdom of Great Britain and Northern Ireland [2,3] and the United States of America [2,4,5] in connection with the legal procedures related to the attacks carried out against Pan Am flight 103 and UTA flight 772,

Determined to eliminate international terrorism,

1. *Condemns* the destruction of Pan Am flight 103 and UTA flight 772 and the resultant loss of hundreds of lives;

2. *Strongly deplores* the fact that the Libyan Government has not yet responded effectively to the above requests to cooperate fully in

[1] S/23306.
[2] S/23309.
[3] S/23307.
[4] S/23308.
[5] S/23317.

establishing responsibility for the terrorist acts referred to above against Pan Am flight 103 and UTA flight 772;

3. *Urges* the Libyan Government immediately to provide a full and effective response to those requests so as to contribute to the elimination of international terrorism;

4. *Requests* the Secretary-General to seek the cooperation of the Libyan Government to provide a full and effective response to those requests;

5. *Urges* all States individually and collectively to encourage the Libyan Government to respond fully and effectively to those requests;

6. *Decides* to remain seized of the matter.

APPENDIX

Legislative Requirements for Reports to Congress Concerning International Terrorism [1]

1) Designation of Foreign Terrorist Organizations

LEGISLATION: Immigration and Nationality Act
PL 82–414, sec. 219(a)(2)(A)(i)

FREQUENCY: Seven days before making determination

FROM WHOM: Secretary of State, in consultation with Secretary of Treasury and Attorney General

REQUIREMENT: Notification, in classified format, of intent to designate an organization as a foreign terrorist organization, together with the factual basis for such findings. (Added by PL 104–132, sec. 302 and amended by PL 104–208, sec. 356).

2) Rewards for Information Relating to International Narcoterrorism

LEGISLATION: State Department Basic Authorities Act
PL 84–885, sec. 36(g)(1)

FREQUENCY: 30 days after paying any reward

FROM WHOM: Secretary of State

REQUIREMENT: Specify amount of terrorism rewards paid, to whom the reward was paid, and the acts with respect to which the reward was paid. (PL 98–533, sec. 102 added sec. 36) Title 18, sec. 3076, authorizes participation in the Justice Department's Witness Security Program to any individual who furnishes information which would justify a reward by the Secretary of State under this section. In classified form if necessary. (Added by PL 99–399, sec. 502(d)).

3) Operation of the Reward Program

LEGISLATION: State Department Basic Authorities Act
PL 84–885, sec. 36(g)(2)

FREQUENCY: Not later than 60 days after the end of each fiscal year

FROM WHOM: Secretary of State, in consultation with Attorney General

REQUIREMENT: Report concerning the operation of the rewards program, providing the total amounts expended during the fiscal year ending that year and including amounts expended to publicize the availability of rewards. (Added by PL 105–277, sec. 2202.)

[1] These are current active reporting requirements selected from Foreign Relations and Related Legislation, arranged by Public Law. All Public Laws are as amended.

4) REGULATIONS ON PROVISION OF TERRORISM-RELATED SERVICES

LEGISLATION: State Department Basic Authorities Act
PL 84–885, sec. 40(g)(1)

FREQUENCY: 30 days prior to issuing

FROM WHOM: Secretary of State

REQUIREMENT: Proposed regulations under authority in sec. 40 to impose controls on services if Secretary determines such services would aid and abet international terrorism. (Added by PL 99–399, sec. 506.)

5) LICENSES GRANTED AND DENIED CONCERNING TERRORISM-RELATED SERVICES

LEGISLATION: State Department Basic Authorities Act
PL 84–885, sec. 40(g)(2)

FREQUENCY: Every six months

FROM WHOM: Secretary of State

REQUIREMENT: Number and character of licenses granted and denied and other information relative to the accomplishment of the objectives of sec. 40 on authority to control certain terrorism-related services. (Added by PL 99–399, sec. 506.)

6) DENIAL OF VISAS

LEGISLATION: State Department Basic Authorities Act
PL 84–885, sec. 51(a)

FREQUENCY: On a timely basis

FROM WHOM: Secretary of State

REQUIREMENT: Report each time a consular post denies a visa on the grounds of terrorist activities or foreign policy, with name and nationality of each person and a statement for basis for denial. Information contained in report may be classified to extent necessary. (Added by PL 102–138, sec. 127(a)).

7) TRANSPORTATION SECURITY

LEGISLATION: Federal Aviation Act, 1958
PL 85–726, sec. 315(b)

FREQUENCY: Annually, not later than March 31

FROM WHOM: Secretary of Transportation

REQUIREMENT: The Secretary of Transportation submit a report on transportation security, in unclassified and classified parts. Such report shall include—(1) an assessment of trends and developments in terrorist activities, methods, and other threats to transportation; (2) an evaluation of deployment of explosive detection devices; (3) recommendations for research, engineering, and development activities related to transportation security; (4) identification and evaluation of cooperative efforts with other departments, agencies, and instrumentalities of the U.S. Government; (5) an evaluation of cooperation with foreign transportation and security authorities; (6) the status of the extent to which the recommendations of the President's Commission on Aviation Security and Terrorism have been carried out and the reasons for any delay in carrying out

those recommendations; (7) a summary of the activities of the Director of Intelligence and Security in the 12-month period ending on the date of this report; (8) financial and staffing requirements of the Director; (9) an assessment of financial and staffing requirements, and attainment of existing goals, for carrying out duties and powers of the Administrator related to security; and (10) appropriate legislative and regulatory recommendations.

8) SCREENING AND FOREIGN AIR CARRIER AND AIRPORT SECURITY

LEGISLATION: Federal Aviation Act, 1958
PL 85–726, sec. 316(a)

FREQUENCY: Annually

FROM WHOM: Administrator, Federal Aviation Administration

REQUIREMENT: The Administrator shall submit a report—(1) on the effectiveness of procedures for screening all passengers and property that will be carried on a cabin of an aircraft to ensure security against criminal violence and aircraft piracy; (2) that includes a summary of the assessments conducted to establish the extent to which a foreign airport effectively maintains and carries out security measures; and (3) that includes an assessment of the steps being taken and the progress being made, to ensure that foreign air carrier security programs for airports outside of the United States are in compliance with this subsection.

9) SANCTIONS IMPOSED ON FOREIGN AIRPORTS FOR NOT MAINTAINING SECURITY

LEGISLATION: Federal Aviation Act of 1958
PL 85–726, sec. 1115(d)(3)

FREQUENCY: Promptly

FROM WHOM: Secretary of Transportation

REQUIREMENT: Report on any action taken to impose sanctions on foreign airports that do not maintain and administer effective security measures. Include information on attempts made to obtain the cooperation of the government of the foreign country in meeting the standards used in assessing the airport under subsection (a). If necessary, may include a classified annex.

10) LIFTING OF SANCTIONS IMPOSED ON AIRPORTS NOT MAINTAINING SECURITY

LEGISLATION: Federal Aviation Act, 1958
PL 85–726, sec. 1115(f)

FREQUENCY: Notify when sanctions are lifted

FROM WHOM: Secretary of Transportation

REQUIREMENT: Notification when any sanction imposed on a foreign airport for not maintaining and carrying out effective security measures is lifted.

11) ASSISTANCE FOR COUNTERTERRORISM EFFORTS

LEGISLATION: Foreign Assistance Act, 1961
PL 87–195, sec. 573(c)

FREQUENCY: 15 days in advance

FROM WHOM: President

REQUIREMENT: Notification that assistance will be provided for counterterrorism efforts to a foreign country for the purpose of protecting U.S. property, the life and property of any U.S. citizen, or for furthering the apprehension of any individual involved in an act of terrorism against such property or persons. (Added by PL 104–132, sec. 328(c)).

12) CERTIFICATION THAT COUNTRY IS NOT SUPPORTING TERRORISM

LEGISLATION: Foreign Assistance Act, 1961
PL 87–195, sec. 620A(c)(1) or (2)

FREQUENCY: Para. (1): Prior to proposed rescission; or Para. (2): At least 45 days before proposed rescission would take effect

FROM WHOM: President

REQUIREMENT: Determination made by State Department that country supports terrorism, thus prohibiting assistance under sec. 620A(a), may be rescinded if (1) certified that there has been a fundamental change in the leadership and policies of the government concerned and assurances are provided that the government is not and will not support acts of terrorism in the future, or (2) report justifying the rescission of the determination with certification that the government concerned has not provided support for terrorism during the preceding 6-month period and has provided assurances that it will not support terrorism in the future. (Amended by PL 101–222, sec. 5).

13) CONSULTATION ON PROPOSED WAIVER ON PROHIBITION OF ASSISTANCE TO COUNTRIES SUPPORTING INTERNATIONAL TERRORISM

LEGISLATION: Foreign Assistance Act, 1961
PL 87–195, sec. 620A(d)(1)and(2)

FREQUENCY: 15 days before waiver takes effect

FROM WHOM: President

REQUIREMENT: Determination and notification that national security interests or humanitarian reasons justify the proposed waiver, with report containing the name of recipient country; description of reasons; type and amount of and justification for assistance, and period of time such waiver will be effective. (Amended by PL 101–222, sec. 5)

14) WAIVER OF PROHIBITION OF EXPORTS TO COUNTRIES SUPPORTING INTERNATIONAL TERRORISM

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40(b)

FREQUENCY: Upon waiver

FROM WHOM: President

REQUIREMENT: Determination that it is important to the national interests of the United States to export item on U.S. Munitions List to country that Secretary of State has determined has repeatedly provided support for acts of international terrorism, with justification and description of proposed export. Waiver expires at

the end of 90 days unless Congress enacts law extending the waiver. (Added by PL 99–399, sec. 509(a)). (Amended by PL 101–222).

15) RESCISSION OF PROHIBITION OF ASSISTANCE TO COUNTRIES THAT SUPPORT ACTS OF TERRORISM

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40(f)(1)

FREQUENCY: (1) Prior to proposed rescission or (2) at least 45 days before proposed rescission would take effect

FROM WHOM: President

REQUIREMENT: (1) Determination made by State Department under subsection (d) may not be rescinded unless certified that there has been a fundamental change in the leadership and policies of the government concerned, is not presently supporting terrorism, and has provided assurances it will not in the future. (2) or certification that government has not provided any support for terrorism during the preceding 6-month period and will not provide support in the future. (Added by PL 102–222, sec. 2).

16) WAIVER OF PROHIBITIONS ON ARMS TRANSACTIONS WITH COUNTRIES SUPPORTING TERRORISM

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40(g)(1)

FREQUENCY: Upon determination

FROM WHOM: President

REQUIREMENT: Determination to waive prohibitions to a specific transaction if that transaction is essential to the national security interests of the United States. (Added by PL 101–222, sec. 2)

17) WAIVER OF SPECIFIC ARMS TRANSACTION WITH COUNTRIES SUPPORTING TERRORISM

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40(g)(2)

FREQUENCY: 15 days prior to the proposed transaction

FROM WHOM: President

REQUIREMENT: Consult with the House Committee on Foreign Affairs and Senate Committee on Foreign Relations on the waiver of prohibition on the proposed transaction involving munitions. (Added by PL 101–222, sec. 2).

18) TRANSACTIONS WITH COUNTRIES NOT FULLY COOPERATING WITH U.S. ANTITERRORISM EFFORTS

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40A(a)

FREQUENCY: By May 15 of calendar year in which that FY begins

FROM WHOM: President

REQUIREMENT: Determination and certification that a foreign country is not fully cooperating with United States antiterrorism efforts. (Added by PL 104–132, sec. 330).

19) WAIVING THE PROHIBITION ON TRANSACTIONS WITH COUNTRIES NOT FULLY COOPERATING WITH U.S. ANTITERRORISM EFFORTS

LEGISLATION: Arms Export Control Act
PL 90–629, sec. 40A(b)

FREQUENCY: Upon determination

FROM WHOM: President

REQUIREMENT: Determination that it is in the national interest of the United States to waive the prohibition under the Arms Export Control Act on assistance to countries not fully cooperating with U.S. antiterrorism efforts. (Added by PL 104–132, sec. 330).

20) U.S. GOVERNMENT EFFORTS TO PREVENT NUCLEAR PROLIFERATION

LEGISLATION: Nuclear Non-Proliferation Act of 1978
PL 95–242, sec. 601(a)

FREQUENCY: Annually

FROM WHOM: President

REQUIREMENT: Review of all activities of U.S. Government departments and agencies relating to preventing nuclear proliferation; report to include: a determination as to which non-nuclear weapon states have detonated a nuclear device, refused to accept the safeguards of the IAEA, or refused to give specific assurances that they will not manufacture or otherwise acquire nuclear explosive devices; an assessment of whether any policies have been counterproductive; a description of progress toward establishing procedures to facilitate the timely processing of requests for subsequent arrangements and export licenses; progress toward combatting international nuclear terrorism; and on adherence to the Convention on the Physical Protection of Nuclear Material, adequacy of IAEA physical security guidelines, minimizing weapons-grade nuclear material in international transit and an agreement in the U.N. Security Council for international sanctions against nuclear terrorism and coordinating recovery of stolen nuclear material. Include the following: a description of the implementation of nuclear and nuclear-related dual-use export controls in the preceding calendar year, including a summary by type of commodity and destinations and the progress of those independent states of the former Soviet Union that are non-nuclear weapons states and of the Baltic States towards achieving the objective of applying full scope safeguards to all their peaceful nuclear activities. Portions may be in classified form. (Added by PL 103–236, sec. 811). Describe steps taken to implement sections 841 and 842 of PL 103–236 and any progress made and any obstacles that have been encountered in seeking to meet the objectives set forth in those sections. (Added by PL 103–236, sec. 843(a)).

21) EXPORT OF GOODS TO COUNTRIES SUPPORTING INTERNATIONAL TERRORISM

LEGISLATION: Export Administration Act, 1979
PL 96–72, sec. 6(j)(2)

FREQUENCY: 30 days prior to approval of license FROM WHOM: Secretary of State and Secretary of Commerce

REQUIREMENT: Notification of approval of licenses for the export of goods or technology to any country for which the Secretary of State has determined (1) such country repeatedly provides support for acts of international terrorism; and (2) such exports would contribute significantly to the country's military potential, including military logistics, or would enhance the ability of the country to support acts of international terrorism. (Amended by PL 101–222, sec. 4). (First added by PL 102–391, sec. 553). Instructs Executive Directors of all International Financial Institutions to vote against any loan or use of funds to or for any country for which the Secretary of State has made a determination under this section. (Added by PL 103–87, sec. 528). The International Fund for Agricultural Development was added to list of international financial institutions. (Added by PL 103–236, sec. 736). Include a detailed description of the goods or services to be offered, the reasons why the foreign country or international organization needs the goods or services,the reasons why the proposed export or transfer is in the national interest, an analysis of the impact on the military capabilities of the recipient, an analysis of how export would affect military strengths of countries in region and analysis of the impact of proposed export on U.S. relations with countries in region.

22) RESCISSION OF DETERMINATION OF COUNTRIES SUPPORTING INTERNATIONAL TERRORISM

LEGISLATION: Export Administration Act, 1979
PL 96–72, sec. 6(j)(4)

FREQUENCY: Before proposed rescission would take effect

FROM WHOM: President

REQUIREMENT: Report rescinding determination that a specified country has repeatedly provided support for acts of international terrorism, including certification that there has been a fundamental change in the leadership and policies of the government of that country, that the government is not supporting terrorism and has provided assurances that it will not support terrorism in the future. Section (B) requires a report at least 45 days before proposed rescission takes effect justifying rescission and certifying that the government concerned has not provided any support for terrorism during the preceding six month period and will not support terrorism in the future. (Amended by PL 101–222, sec. 4). (Added by PL 102–391, sec. 553) Instructs Executive Directors of all International Financial Institutions and the International Fund for Agricultural Development to vote against any loans or use of funds to or for any country for which the Secretary of State has made a determination under this section. (Continued in PL 103–87, sec. 528).

23) COORDINATION OF ALL U.S. TERRORISM-RELATED ASSISTANCE TO FOREIGN COUNTRIES

LEGISLATION: International Security and Development Cooperation Act, 1985

PL99–83, sec. 502(b)

FREQUENCY: Annually, by February 1

FROM WHOM: Secretary of State, in consultation with Other Agencies

REQUIREMENT: An accounting of all assistance related to international terrorism provided to foreign countries by the United States during the preceding year. May be provided on a classified basis.

24) CONSULTATION BEFORE BANNING IMPORTS FROM COUNTRIES SUPPORTING TERRORISM

LEGISLATION: International Security and Development Cooperation Act, 1985

PL 99–83, sec. 505(b)

FREQUENCY: Before and while exercising authority

FROM WHOM: President

REQUIREMENT: Consultation, in every possible instance, before banning imports of goods or services from any country that supports terrorism or terrorist organizations; regular consultation when authority is being used.

25) BAN ON IMPORTS FROM COUNTRIES THAT ARE SUPPORTING TERRORISM

LEGISLATION: International Security and Development Cooperation Act, 1985

PL 99–83, sec. 505(c)

FREQUENCY: Upon occurrence and every succeeding 6 months

FROM WHOM: President

REQUIREMENT: Report specifying the country from which the President is banning imports into the U.S. due to such countries' support of terrorism or terrorist organizations. Report to include imports to be banned, circumstances and reasons for the ban. Subsequent reports stating actions taken pursuant to this authority and any changes in the situation.

26) FINDINGS OF ACCOUNTABILITY REVIEW BOARD ON DIPLOMATIC SECURITY INCIDENT

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986

PL 99–399, sec. 304(d)

FREQUENCY: In any case a Board transmits findings of reasonable cause

FROM WHOM: Head of federal agency appropriate in each case

REQUIREMENT: Summary of nature of case and evidence transmitted to the Accountability Review Board on facts surrounding serious injury or destruction related to U.S. Government mission abroad; together with decision by the federal agency to take disciplinary or other appropriate action or reasons not to take such actions against individual involved.

27) REQUEST FOR APPROPRIATIONS FOR DIPLOMATIC SECURITY PROGRAM

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986 PL 99–399, sec. 401(b)

FREQUENCY: With any request for appropriations for program in sec. 401(a)

FROM WHOM: Secretary of State

REQUIREMENT: Notification of request for appropriation with justification of each item listed. (Amended by PL 103–265, sec. 122(b)).

28) INSUFFICIENT FUNDS FOR DIPLOMATIC SECURITY PROGRAM

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986 PL 99–399, sec. 401(f)

FREQUENCY: In event of insufficient funds

FROM WHOM: Secretary of State

REQUIREMENT: Report on effect that insufficiency of funds will have on Department of State and other foreign affairs agencies, if sufficient funds are not available for all the diplomatic security construction, acquisition, and operations justified to Congress for any fiscal year.

29) TRAVEL ADVISORY FOR U.S. CITIZENS ABROAD

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986 PL 99–399, sec. 505

FREQUENCY: Promptly advise

FROM WHOM: Secretary of State

REQUIREMENT: Notification that Department of State has issued a travel advisory or other public warning notice for U.S. citizens traveling abroad, because of a terrorist threat or other security concern.

30) THREAT OF TERRORISM TO U.S. PORTS AND VESSELS

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986 PL 99–399, sec. 905

FREQUENCY: Feb. 28, 1987, and annually thereafter

FROM WHOM: Secretary of Transportation

REQUIREMENT: Report on threat from acts of terrorism to U.S. ports and vessels operating from those ports. To be consolidated with reports under secs. 903 and 907, with any classified material submitted separately as addendum.

31) CHANGE IN STATUS OF TRAVEL ADVISORY CONCERNING SECURITY AT FOREIGN PORTS

LEGISLATION: Diplomatic Security and Antiterrorism Act, 1986 PL 99–399, sec. 908(c)

FREQUENCY: Immediately upon any change

FROM WHOM: Secretary of State

REQUIREMENT: Notification of any change in the status of a travel advisory imposed after Secretary of Transportation has determined that a condition exists that threatens the safety or security of passengers, passenger vessels, or crew traveling to or from a foreign port that does not maintain and administer effective security measures.

32) ANNUAL COUNTRY REPORTS ON TERRORISM

LEGISLATION: Foreign Relations Authorization Act, FYs 1988–89
PL 100–204, sec. 140

FREQUENCY: April 30 each year to cover preceding calendar year

FROM WHOM: Secretary of State

REQUIREMENT: Full and complete report providing (1) detailed assessments with respect to each foreign country (A) in which acts of international terrorism occur of major significance; and (B) about which Congress was notified during the preceding 5 years pursuant to sec. 6(j) of Export Administration Act, 1979; (2) all relevant information about the advocates of any terrorist groups responsible for the kidnapping or death of an American during the preceding year. Added by PL 104–208, sec. 578: (3) with respect to each foreign country from which the U.S. Government has sought cooperation during the previous five years, information on the investigation or prosecution of an act of international terrorism against U.S. citizens or interests or in the prevention of further acts of terrorism. Report to review major counterterrorism efforts undertaken, response of judicial system and significant support for international terrorism by each country, and efforts by the United States to eliminate international financial support provided to those groups directed or provided in support of their activities. Information received with respect to a foreign country in classified form is preferred if cooperation is more likely.

33) REPORT ON TERRORIST ASSETS IN THE UNITED STATES

LEGISLATION: Foreign Relations Authorization Act, FYs 1992–1993
PL 102–138, sec. 304(a)

FREQUENCY: January 28, 1992; then every 365 days thereafter

FROM WHOM: Treasury, in consultation with Attorney General and Appropriate Investigative Agencies

REQUIREMENT: Report describing the nature and extent of assets held in the United States by terrorist countries and any organization engaged in international terrorism. (Added by PL 103–236, sec. 133(b)(2)). Each such report shall provide a detailed list and description of specific assets.

34) ACTIVITIES IN SUPPORT OF COUNTERPROLIFERATION PROGRAMS

LEGISLATION: National Defense Authorization Act, FY 1994
PL 103–160, sec. 1603(d)

FREQUENCY: Annually, by April 30

FROM WHOM: Secretary of Defense

REQUIREMENT: Report on activities carried out for the preceding twelve-month period with a description of the studies and analysis and amounts spent; list of organizations that conducted studies and analysis; an explanation of the extent to which such studies and analysis contribute to the U.S. counterproliferation policy and military capabilities to deter and respond to terrorism, theft and proliferation involving weapons of mass destruction; and a description of the measures being taken to ensure that management of such studies and analysis are handled effectively and coordinated comprehensively. Frequency changed from semi-annually.

(Amended by PL 104–106 and PL 103–337, sec. 1505(b)).

35) MULTILATERAL SANCTIONS REGIME AGAINST IRAN

LEGISLATION: Iran and Libya Sanctions Act, 1996

PL 104–172, sec. 4(b)(1)(2)

FREQUENCY: By August 5, 1997; and periodically thereafter

FROM WHOM: President

REQUIREMENT: Report on extent to establish, both in international fora such as the United Nations, and bilaterally with our allies, a multilateral sanctions regime against Iran, including provisions limiting the development of petroleum resources, that will inhibit Iran's efforts to carry out terrorist activities. Each report shall list—(1) the countries that have agreed to undertake measures to further the objectives of section 3 with respect to Iran, and a description of those measures, and (2) the countries that have not agreed to measures described in paragraph (1), and, with respect to those countries, other measures (in addition to that provided in subsection (d)) the President recommends that the United States take to further the objectives of section 3 with respect to Iran.

36) NOTIFICATION OF INTENT TO WAIVE THE APPLICATION OF IMPOSITION OF SANCTIONS.

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 4(c)

FREQUENCY: At least 30 days before waiver takes effect

FROM WHOM: President

REQUIREMENT: Notification of intent to waive the application of section (5)(a) with respect to nationals of a country if that country has agreed to undertake substantial measures, including economic sanctions, that will inhibit Iran's efforts to carry out activities described in section 2 and information required by subsection (b)(1) has been included in a report submitted under section (4)(b).

37) TERMINATION OF SANCTIONS WITH RESPECT TO IRAN

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 8(a)

FREQUENCY: Upon determination

FROM WHOM: President

REQUIREMENT: The requirement under section 5(b) to impose sanctions against Libya shall no longer have force or effect with respect to Iran if determined and certified that Iran—(1) has ceased

its efforts to design, develop, manufacture, or acquire—(A) a nuclear explosive device or related materials and technology; (B) chemical and biological weapons; and (C) ballistic missiles and ballistic missile launch technology; and (2) has been removed from the list of countries the government of which have been determined, for purposes of section 6(j) of the Export Administration Act of 1979, to have repeatedly provided support for acts of international terrorism.

38) TERMINATION OF SANCTIONS AGAINST LIBYA

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 8(b) FREQUENCY: Upon determination and certification

FROM WHOM: President

REQUIREMENT: The requirement under section 5(b) to impose sanctions shall no longer have force or effect if the President determines and certifies that Libya has fulfilled the requirements of United Nations Security Council Resolutions 731, 748, and 833.

39) CONSULTATIONS WITH FOREIGN GOVERNMENT TO DELAY SANCTIONS

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 9(a)(1)(2)(3)

FREQUENCY: Immediately

FROM WHOM: President

REQUIREMENT: The President may waive imposition of sanctions under this Act for up to 90 days in order to initiate consultations with affected government. Sanctions may be imposed immediately unless a determination and certification is made that such government has taken specific and effective actions, including, as appropriate, the imposition of appropriate penalties, to terminate the involvement of the foreign person in the activities that resulted in the determination. Paragraph (3) permits an additional 90 day waiver to be granted if determined and certified that the government is in the process of taking actions described in paragraph (2).

40) DETERMINATION AND CERTIFICATION REGARDING DURATION OF SANCTIONS

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 9(b)(1) or (2)

FREQUENCY: (1) for a period of not less than 2 years from date sanction was imposed or (2) upon Presidential certification and determination

FROM WHOM: President

REQUIREMENT: A sanction imposed under section 5 shall remain in effect for at least two years or until such time as it is determined and certified that the person whose activities were the basis for imposing the sanction is no longer engaging in such activities and that the President has received reliable assurances that such person will not knowingly engage in such activities in the future,

except that such sanction shall remain in effect for a period of at least one year.

41) REPORT ON USE OF WAIVER AUTHORITY ON IMPOSED SANCTIONS

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 9(c)

FREQUENCY: Thirty days after determination

FROM WHOM: President

REQUIREMENT: The President may waive the requirement in section 5 to impose sanctions and waive the continued imposition of sanctions under subsection (b) of this section, if he determines that it is important to the United States national interest to exercise such authority. If such waiver is granted on a person described in section 5(c), sanctions need not be imposed under section 5(a) or (b) on that person during the 30-day period referred to in paragraph (1).

42) REPORT ON CERTAIN INTERNATIONAL INITIATIVES

LEGISLATION: Iran and Libya Sanctions Act, 1996
PL 104–172, sec. 10(a)

FREQUENCY: By February 1997, and every six months thereafter

FROM WHOM: President

REQUIREMENT: Report describing—(1) efforts to mount a multilateral campaign to persuade all countries to pressure Iran to cease its nuclear, chemical, biological, and missile weapons programs and its support of acts of international terrorism; (2) efforts to persuade other governments to ask Iran to reduce the presence of Iranian diplomats and representatives of other governments and military or quasi-governmental institutions of Iran and to withdraw any such diplomats or representatives who participated in the takeover of the U.S. embassy in Tehran on November 4, 1979, or the subsequent holding of U.S. hostages for 444 days; (3) extent to which the IAEA has established regular inspections of all nuclear facilities in Iran, including those presently under construction; and (4) Iran's use of Iranian diplomats and representatives of other government and military or quasi-governmental institutions of Iran to promote acts of international terrorism or to develop or sustain Iran's nuclear, chemical, biological, and missile weapons programs. This Act shall cease to be effective after August 5, 2001.

43) THREAT TO THE UNITED STATES BY WEAPONS OF MASS DESTRUCTION

LEGISLATION: National Defense Authorization Act, FY 1998
PL 105–85, sec. 234

FREQUENCY: Annually, by January 30

FROM WHOM: Secretary of Defense

REQUIREMENT: Report on the threats posed to the United States and allies—(1) by weapons of mass destruction, ballistic missiles, and cruise missiles; and (2) by the proliferation of such weapons of mass destruction.

44) BUDGET FOR CARRYING OUT COUNTERTERRORISM AND ANTITERRORISM ACTIVITIES

LEGISLATION: National Defense Authorization Act, FY 1998 PL 105–85, sec. 1051

FREQUENCY: Annually, by March 1

FROM WHOM: President

REQUIREMENT: Report containing information on (A) the budget and expenditures of funds by executive agencies during the current fiscal year for purposes of carrying out counterterrorism and antiterrorism programs and activities; and (B) the specific programs and activities for which such funds were expended.

45) DETERMINATION TO WAIVE PROHIBITION ON BILATERAL ASSISTANCE TO TERRORIST COUNTRIES

LEGISLATION: Foreign Operations Appropriations Act, 2000 PL 106–113, sec. 527(b)

FREQUENCY: Fifteen days prior to waiver

FROM WHOM: President

REQUIREMENT: Determination that national security or humanitarian reasons justify a waiver of the prohibition on bilateral assistance to any country that grants sanctuary from prosecution to any individual or group which has committed an act of international terrorism or otherwise supports terrorism, with justification for waiver.

46) WAIVER ON PROHIBITION ON ASSISTANCE TO FOREIGN COUNTRIES THAT EXPORT LETHAL MILITARY EQUIPMENT TO COUNTRIES SUPPORTING TERRORISM

LEGISLATION: Foreign Operations Appropriations Act, 2000 PL 106–113, sec. 549(b),(c)

FREQUENCY: Upon determination

FROM WHOM: President

REQUIREMENT: Determination that to waive restriction on furnishing assistance to a foreign government that exports lethal military equipment to countries that support terrorism is important to the national interests of the United States. Include a detailed explanation of the assistance provided with dollar amounts, and an explanation of how the assistance furthers United States national interests.
