NOTE FROM THE DIRECTOR, LEGISLATIVE OPERATIONS

This committee print consists of the enrolled text and explanatory material for the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 (H.R. 3979; Public Law 113–291).

This Act and the material found in this committee print are the product of an agreement between the Chairman and Ranking Member of the House Committee on Armed Services and the Chairman and Ranking Member of the Senate Committee on Armed Services on H.R. 4435, as passed by the House of Representatives on May 22, 2014, and S. 2410, as reported out of committee on May 22, 2014. The Senate did not bring S. 2410 to the Senate Floor for further consideration, and therefore was unable to initiate a formal conference with the House.

In order to ensure the enactment of an annual National Defense Authorization Act by the end of the calendar year, the Chairman and Ranking Member of the House Committee on Armed Services and the Chairman and Ranking Member of the Senate Committee on Armed Services agreed to reconcile the provisions of H.R. 4435 and S. 2410, including a number of proposed amendments submitted for consideration had the Senate gone to the Floor with its bill and were cleared by both sides. The negotiated agreement was brought to the House Floor in the form of an amendment to the Senate amendment to H.R. 3979. On December 4, 2014, pursuant to H. Res. 770, the House considered a motion to concur in the Senate amendment to H.R. 3979 with an amendment, which contained the agreed upon legislative text between the House and the Senate. On December 4, 2014, the House agreed to the amendment to the Senate amendment by a vote of 300–119 (Roll no. 551). On December 12, 2014, the Senate agreed to the House amendment to the Senate amendment to H.R. 3979 by a vote of 89–11 (Record Vote Number: 325). The President signed the legislation on December 19, 2014, and it became Public Law 113–291.

Because the House and Senate negotiators were unable to convene a formal conference committee to resolve the differences in the respective versions of the bill, there is no conference report and no formal “joint explanatory statement of the conference committee” for H.R. 3979. Instead, Chairman Howard P. “Buck” McKeon and Chairman Carl Levin submitted a “Joint Explanatory Statement to Accompany the National Defense Authorization Act for Fiscal Year 2015” in the *Congressional Record* on December 4, 2014 (pages H8671–H8819). The text of the joint explanatory statement is included in this committee print. Section 5 of H.R. 3979 specifies that this explanatory material shall have the same effect with respect to the implementation of this legislation as if it were a joint explanatory statement of a committee of conference.

In this committee print, the provisions of H.R. 4435, the House-passed version of the National Defense Authorization Act for Fiscal Year 2015, are generally referred to as “the House bill.” The provisions of S. 2410, the Senate Committee on Armed Services committee-reported version of the National Defense Authorization Act for Fiscal Year 2015, are generally referred to as “the Senate committee-reported bill.” Senate amendments included in the agreements are identified by Senate amendment numbers. The final form of the agreements reached during negotiations between the House and the Senate are referred to as “the agreement.”

The following pages are organized in the manner of a traditional conference report.

CARL LEVIN AND HOWARD P. “BUCK” McKEON NATIONAL
DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2015

LEGISLATIVE TEXT

[Note from the Director, Legislative Operations: The following is the enrolled legislative text of H.R. 3979, the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015, as passed by the House of Representatives and the Senate]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

(a) **SHORT TITLE.**—*This Act may be cited as the “Carl Levin and Howard P. ‘Buck’ McKeon National Defense Authorization Act for Fiscal Year 2015”.*

(b) **FINDINGS.**—*Congress makes the following findings:*

(1)(A) *Senator Carl Levin of Michigan was elected a member of the United States Senate on November 7, 1978, for a full term beginning January 3, 1979. He has served continuously in the Senate since that date, and was appointed as a member of the Committee on Armed Services in January 1979. He has served on the Committee on Armed Services since that date, a period of nearly 36 years.*

(B) *A graduate of Detroit Central High School, Senator Levin went on to Swarthmore College, and graduated from Harvard Law School in 1959, gaining admittance to the Michigan bar. He served his State as assistant attorney general and general counsel of the Michigan Civil Rights Commission from 1964–1967, and later served his hometown of Detroit as a member of the Detroit City Council from 1969–1973, and as the council’s president from 1974–1977.*

(C) *Senator Levin first served as chairman of the Committee on Armed Services of the United States Senate for a period of the 107th Congress, and has remained chairman since the 110th Congress began in 2007. He has exercised extraordinary leadership as either the chairman or ranking minority member of the committee since the start of the 105th Congress in 1997.*

(D) *Each year, for the past 52 years, the Committee on Armed Services has reliably passed an annual defense authorization act, and this will be the 36th that Senator Levin has had a role in. In his capacity as member, ranking member, and chairman, he has been an advocate for a strong national defense, and has made lasting contributions to the security of our Nation.*

(E) *It is altogether fitting and proper that this Act, the last annual authorization act for the national defense that Senator Levin manages in and for the United States Senate as chair-*

man of the Committee on Armed Services, be named in his honor, as provided in subsection (a).

(2)(A) Representative Howard P. “Buck” McKeon was elected to the House of Representatives in 1992 to represent California’s 25th Congressional District.

(B) Chairman McKeon was born in Los Angeles and grew up in Tujunga CA. He served a two and a half year mission for the Church of Jesus Christ of Latter-Day Saints and attended Brigham Young University. Prior to his election to Congress, he was a small business owner, and served both on the William S. Hart Union High School District Board of Trustees and as the first mayor of the City of Santa Clarita.

(C) In the 111th Congress, Chairman McKeon was selected by his peers as the Ranking Member of the House Armed Services Committee and has served as Chairman since in the 112th and 113th Congresses. Previously Chairman McKeon had served as the Chairman of the House Committee on Education and the Workforce.

(D) Chairman McKeon is a champion of a strong national defense, the men and women of America’s Armed Forces and their families, and returning fiscal discipline to the Department of Defense. His priority has been to ensure our troops deployed around the world have the equipment, resources, authorities, training and time they need to successfully complete their missions and return home.

(E) For 52 consecutive years, the House Armed Services Committee, in a bipartisan, bicameral tradition, has passed and enacted an annual defense authorization act. Chairman McKeon had said it has been the privilege of his life to shepherd that tradition under his tenure.

(F) It is therefore fitting this Act, the last national defense authorization act of his tenure, be named in Chairman McKeon’s honor, as provided in subsection (a).

(c) REFERENCES.—Any reference in this or any other Act to the “National Defense Authorization Act for Fiscal Year 2015” shall be deemed to refer to the “Carl Levin and Howard P. ‘Buck’ McKeon National Defense Authorization Act for Fiscal Year 2015”.

SEC. 143. REPORT ON STATUS OF AIR-LAUNCHED CRUISE MISSILE CAPABILITIES.

(a) **FINDINGS.**—Congress finds the following:

- (1) The capability provided by the nuclear-capable, air-launched cruise missile is critical to maintaining a credible and effective air-delivery leg of the nuclear triad, preserving the ability to respond to geopolitical and technical surprise, and reassuring allies of the United States through credible extended deterrence.
- (2) In the fiscal year 2015 budget request of the Air Force, the Secretary of the Air Force delayed development of the long-range standoff weapon, the follow-on for the air-launched cruise missile, by three years.
- (3) The Secretary plans to sustain the current air-launched cruise missile, known as the AGM-86, until approximately 2030, with multiple service life-extension programs required to preserve but not enhance the existing capabilities of the air-launched cruise missile.
- (4) The AGM-86 was initially developed in the 1970s and deployed in the 1980s.
- (5) The average age of the inventory of air-launched cruise missiles is more than 30 years old.
- (6) The operating environment, particularly the sophistication of integrated air defenses, has evolved substantially since the inception of the air-launched cruise missile.
- (7) The AGM-86 is no longer in production and the inventory of spare bodies for required annual testing continues to diminish, posing serious challenges for long-term sustainment.

launched cruise missile or the burdens placed on other legs of the nuclear triad.

(B) A description of age-related failure trends, an assessment of potential age-related fleet-wide reliability and supportability problems, and the estimated costs for sustaining the air-launched cruise missile.

(C) A detailed plan, including initial cost estimates, for the development and deployment of the follow-on system that will achieve initial operational capability before 2030.

(D) An assessment of the feasibility and advisability of alternative development strategies, including initial cost estimates, that would achieve full operational capability before 2030.

(E) An assessment of current testing requirements and the availability of test bodies to sustain the air-launched cruise missile over the long term.

(F) A description of the extent to which the airframe and other related components can be completed independent of the payload, as determined by the Nuclear Weapons Council established by section 179 of title 10, United States Code.

Any such request by the President shall include details about the request for a multiyear contract, including details about the negotiated contract terms and conditions.

“(6) The Secretary may make the certification under paragraph (3) notwithstanding the fact that one or more of the conditions of such certification are not met, if the Secretary determines that, due to exceptional circumstances, proceeding with a multiyear contract under this section is in the best interest of the Department of Defense and the Secretary provides the basis for such determination with the certification.

SEC. 1015. SENSE OF CONGRESS REGARDING SECURITY IN THE WESTERN HEMISPHERE.

(a) FINDINGS.—Congress makes the following findings:

(1) The stability and security of the Western Hemisphere has a direct impact on the security interests of the United States.

(2) Over the past decade, there has been a marked increase in violence and instability in the region as a result of weak governance and increasingly capable transnational criminal organizations. These criminal organizations operate global, multi-billion dollar networks that traffic narcotics, humans, weapons, and bulk cash.

(3) Conflict between the various transnational criminal organizations for smuggling routes and territory has resulted in skyrocketing violence. According to the United Nations Office on Drugs and Crime, Honduras has the highest murder rate in the world with 90 murders per 100,000 people.

(4) United States Northern Command and United States Southern Command are the lead combatant commands for Department of Defense efforts to combat illicit trafficking in the Western Hemisphere.

(5) To combat these destabilizing threats, through a variety of authorities, the Department of Defense advises, trains, educates, and equips vetted troops in the region to enhance their military and police forces, with an emphasis on human rights and the rule of law.

(6) As a result of decades of instability and violence, tens of thousands of unaccompanied alien children and their families have fled to the border between the United States and Mexico. In fiscal year 2014, approximately 66,000 such children were apprehended crossing into the United States from Mexico.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Department of Defense should continue its efforts to combat transnational criminal organizations in the Western Hemisphere;

(2) the Department of Defense should increase its maritime, aerial and intelligence, surveillance, and reconnaissance capabilities in the region to more effectively support efforts to reduce illicit trafficking into the United States; and

(3) enhancing the capacity of partner nations in the region to combat the threat posed by transnational criminal organizations should be a cornerstone of the Department of Defense’s strategy in the region.

SEC. 1024. SENSE OF CONGRESS RECOGNIZING THE ANNIVERSARY OF THE SINKING OF U.S.S. THRESHER.

(a) *FINDINGS.*—*Congress makes the following findings:*

(1) *U.S.S. Thresher was first launched at Portsmouth Naval Shipyard on July 9, 1960.*

(2) *U.S.S. Thresher departed Portsmouth Naval Shipyard for her final voyage on April 9, 1963, with a crew of 16 officers, 96 sailors, and 17 civilians.*

(3) *The mix of that crew reflects the unity of the naval submarine service, military and civilian, in the protection of the United States.*

(4) *At approximately 7:47 a.m. on April 10, 1963, while in communication with the surface ship U.S.S. Skylark, and approximately 220 miles off the coast of New England, U.S.S. Thresher began her final descent.*

(5) *U.S.S. Thresher was declared lost with all hands on April 10, 1963.*

(6) *In response to the loss of U.S.S. Thresher, the United States Navy instituted new regulations to ensure the health of the submariners and the safety of the submarines of the United States.*

(7) *Those regulations led to the establishment of the Submarine Safety and Quality Assurance program (SUBSAFE), now one of the most comprehensive military safety programs in the world.*

(8) *SUBSAFE* has kept the submariners of the United States safe at sea ever since as the strongest, safest submarine force in history.

(9) Since the establishment of *SUBSAFE*, no *SUBSAFE*-certified submarine has been lost at sea, which is a legacy owed to the brave individuals who perished aboard U.S.S. *Thresher*.

(10) From the loss of U.S.S. *Thresher*, there arose in the institutions of higher education in the United States the ocean engineering curricula that enables the preeminence of the United States in submarine warfare.

(11) The crew of U.S.S. *Thresher* demonstrated the "last full measure of devotion" in service to the United States, and this devotion characterizes the sacrifices of all submariners, past and present.

(b) *SENSE OF CONGRESS*.—Congress—

(1) recognizes the 51st anniversary of the sinking of U.S.S. *Thresher*;

(2) remembers with profound sorrow the loss of U.S.S. *Thresher* and her gallant crew of sailors and civilians on April 10, 1963; and

(3) expresses its deepest gratitude to all submariners on "eternal patrol", who are forever bound together by dedicated and honorable service to the United States of America.

SEC. 1652. STATEMENT OF POLICY ON THE NUCLEAR TRIAD.

It is the policy of the United States—

(1) *to operate, sustain, and modernize or replace the triad of strategic nuclear delivery systems consisting of—*

(A) *heavy bombers equipped with nuclear gravity bombs and air-launched nuclear cruise missiles;*

(B) *land-based intercontinental ballistic missiles equipped with nuclear warheads that are capable of carrying multiple independently targetable reentry vehicles; and*

(C) *ballistic missile submarines equipped with submarine launched ballistic missiles and multiple nuclear warheads;*

(2) *to operate, sustain, and modernize or replace a capability to forward-deploy nuclear weapons and dual-capable fighter-bomber aircraft;*

(3) *to deter potential adversaries and assure allies and partners of the United States through strong and long-term commitment to the nuclear deterrent of the United States and the personnel, systems, and infrastructure that comprise such deterrent; and*

(4) *to ensure that the members of the Armed Forces who operate the nuclear deterrent of the United States have the training, resources, and national support required to execute the critical national security mission of the members.*

SEC. 1653. SENSE OF CONGRESS ON DETERRENCE AND DEFENSE POSTURE OF THE NORTH ATLANTIC TREATY ORGANIZATION.

It is the sense of Congress that the United States reaffirms and remains committed to the policies enumerated by the North Atlantic Treaty Organization in the Deterrence and Defense Posture Review, dated May 20, 2012, and the Wales Summit Declaration of September 2014, including the following statements:

(1) As stated in the Deterrence and Defense Posture Review:

(A) "The greatest responsibility of the Alliance is to protect and defend our territory and our populations against attack, as set out in Article 5 of the Washington Treaty. The Alliance does not consider any country to be its adversary. However, no one should doubt NATO's resolve if the security of any of its members were to be threatened. NATO will ensure that it maintains the full range of capabilities necessary to deter and defend against any threat to the safety and security of our populations, wherever it should arise. Allies' goal is to bolster deterrence as a core element of our collective defense and contribute to the indivisible security of the Alliance."

(B) "Nuclear weapons are a core component of NATO's overall capabilities for deterrence and defense alongside conventional and missile defense forces. The review has shown that the Alliance's nuclear force posture currently meets the criteria for an effective deterrence and defense posture."

(C) "The circumstances in which any use of nuclear weapons might have to be contemplated are extremely remote. As long as nuclear weapons exist, NATO will remain a nuclear alliance. The supreme guarantee of the security of the Allies is provided by the strategic nuclear forces of the Alliance, particularly those of the United States; the independent strategic forces of the United Kingdom and France, which have a deterrent role of their own, contribute to the overall deterrence and security of the Allies."

(D) "NATO must have the full range of capabilities necessary to deter and defend against threats to the safety of its populations and the security of its territory, which is the Alliance's greatest responsibility."

(E) "NATO is committed to maintaining an appropriate mix of nuclear, conventional, and missile defense capabilities for deterrence and defense to fulfill its commitments as set out in the Strategic Concept. These capabilities, underpinned by NATO's Integrated Command Structure, offer the strongest guarantee of the Alliance's security and will ensure that it is able to respond to a variety of challenges and unpredictable contingencies in a highly complex and evolving international security environment."

(2) As stated in the Wales Summit Declaration:

(A) "Deterrence, based on an appropriate mix of nuclear, conventional, and missile defence capabilities, remains a core element of our overall strategy."

(B) "Arms control, disarmament, and non-proliferation continue to play an important role in the achievement of

the Alliance's security objectives. Both the success and failure of these efforts can have a direct impact on the threat environment of NATO. In this context, it is of paramount importance that disarmament and non-proliferation commitments under existing treaties are honoured, including the Intermediate-Range Nuclear Forces (INF) Treaty, which is a crucial element of Euro-Atlantic security. In that regard, Allies call on Russia to preserve the viability of the INF Treaty through ensuring full and verifiable compliance."

Subtitle E—Missile Defense Programs

SEC. 1661. AVAILABILITY OF FUNDS FOR IRON DOME SHORT-RANGE ROCKET DEFENSE SYSTEM.

(a) *AVAILABILITY OF FUNDS.*—Of the funds authorized to be appropriated by section 1502 for procurement, Defense-wide, and available for the Missile Defense Agency, not more than \$350,972,000 may be provided to the Government of Israel to procure the Iron Dome short-range rocket defense system as specified in the funding table in section 4102, including for co-production of Iron Dome parts and components in the United States by industry of the United States.

(b) *CONDITIONS.*—

(1) *AGREEMENT.*—Funds described in subsection (a) to produce the Iron Dome short-range rocket defense program shall be available subject to the terms, conditions, and co-production targets specified for fiscal year 2015 in the "Agreement Between the Department of Defense of the United States of America and the Ministry of Defense of the State of Israel Concerning Iron Dome Defense System Procurement," signed on March 5, 2014.

(2) *CERTIFICATION.*—Not later than 30 days prior to the initial obligation of funds described in subsection (a), the Director of the Missile Defense Agency and the Under Secretary of Defense for Acquisition, Technology, and Logistics shall jointly submit to the congressional defense committees—

(A) a certification that the agreement specified in paragraph (1) is being implemented as provided in such agreement; and

(B) an assessment detailing any risks relating to the implementation of such agreement.

SEC. 1662. TESTING AND ASSESSMENT OF MISSILE DEFENSE SYSTEMS PRIOR TO PRODUCTION AND DEPLOYMENT.

(a) *SENSE OF CONGRESS.*—It is the sense of Congress that—

(1) it is a high priority of the United States that the ballistic missile defense system should work in an operationally effective and cost-effective manner;

(2) prior to making final production decisions for such systems, and prior to the operational deployment of such systems, the United States should conduct operationally realistic intercept flight testing that should create sufficiently challenging operational conditions to establish confidence that such systems

will work in an operationally effective and cost-effective manner when needed; and

(3) in order to achieve these objectives, and to avoid post-production and post-deployment problems, it is essential for the Department of Defense to follow a “fly before you buy” approach to adequately test and assess the elements of the ballistic missile defense system before final production decisions or operational deployment.

(b) SUCCESSFUL TESTING REQUIRED PRIOR TO FINAL PRODUCTION OR OPERATIONAL DEPLOYMENT.—The Secretary of Defense may not make a final production decision for, or operationally deploy, a covered system unless—

(1) the Secretary ensures that—

(A) sufficient and operationally realistic testing of the covered system is conducted to assess the performance of the covered system in order to inform a final production decision or an operational deployment decision; and

(B) the results of such testing have demonstrated a high probability that the covered system—

(i) will work in an operationally effective manner; and

(ii) has the ability to accomplish the intended mission of the covered system;

(2) the Director of Operational Test and Evaluation has carried out subsection (c) with respect to such covered system; and

(3) the Commander of the United States Strategic Command has carried out subsection (d) with respect to such covered system.

(c) ASSESSMENT BY DIRECTOR OF OPERATIONAL TEST AND EVALUATION.—The Director of Operational Test and Evaluation shall—

(1) provide to the Secretary the assessment of the Director, based on the available test data, of the sufficiency, adequacy, and results of the testing of each covered system, including an assessment of whether the covered system will be sufficiently effective, suitable, and survivable when needed; and

(2) submit to the congressional defense committees a written summary of such assessment.

(d) ASSESSMENT BY COMMANDER OF UNITED STATES STRATEGIC COMMAND.—The Commander of the United States Strategic Command shall—

(1) provide to the Secretary a military utility assessment of the operational utility of each covered system; and

(2) not later than 30 days after providing such assessment to the Secretary, submit to the congressional defense committees a written summary of such assessment.

(e) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to alter, modify, or otherwise affect a determination of the Secretary with respect to the participation of the Missile Defense Agency in the Joint Capabilities Integration Development System or the acquisition reporting process under the Department of Defense Directive 5000 series.

(f) COVERED SYSTEM.—In this section, the term “covered system” means a new or substantially upgraded interceptor or weapon system of the ballistic missile defense system, other than the re-de-

signed exo-atmospheric kill vehicle covered by the acquisition plan developed under section 1663.

SEC. 1663. ACQUISITION PLAN FOR RE-DESIGNED EXO-ATMOSPHERIC KILL VEHICLE.

(a) *SENSE OF CONGRESS.*—It is the sense of Congress that—

(1) the existing models of the exo-atmospheric kill vehicle of the ground-based midcourse defense system are prototype designs that were developed and deployed without using traditional acquisition practices in order to provide an initial defensive capability for an emerging ballistic missile threat;

(2) consequently, while the deployed models of the exo-atmospheric kill vehicle have demonstrated an initial level of capability against a limited threat, such models do not have the degree of reliability, robustness, cost effectiveness, and performance that are desirable;

(3) the exo-atmospheric kill vehicle for the ground-based midcourse defense system needs to be re-designed to substantially improve the performance and reliability of such kill vehicles; and

(4) the Secretary of Defense should follow a robust and rigorous acquisition plan for the design, development, and testing of the re-designed exo-atmospheric kill vehicle.

(b) *ACQUISITION PLAN REQUIRED.*—The Secretary of Defense shall develop an acquisition plan for the re-design of the exo-atmospheric kill vehicle of the ground-based midcourse defense system that includes rigorous elements for system engineering, design, integration, development, testing, and evaluation.

(c) *OBJECTIVES.*—The objectives of the acquisition plan under subsection (b) shall be to ensure that the re-designed exo-atmospheric kill vehicle is operationally effective, reliable, producible, cost effective, maintainable, and testable.

(d) *APPROVAL OF ACQUISITION PLAN REQUIRED.*—The acquisition plan under subsection (b) shall be subject to approval by the Under Secretary of Defense for Acquisition, Technology, and Logistics.

(e) *TESTING REQUIRED.*—Prior to operational deployment of the re-designed exo-atmospheric kill vehicle, the Secretary shall ensure that the re-designed kill vehicle has demonstrated, through successful, operationally realistic flight testing—

(1) a high probability of working in an operationally effective manner; and

(2) the ability to accomplish the intended mission of the re-designed kill vehicle, including against more complex emerging ballistic missile threats.

(f) *REPORT REQUIRED.*—Not later than 60 days after the date on which the Under Secretary of Defense for Acquisition, Technology, and Logistics approves the acquisition plan under subsection (d), the Director of the Missile Defense Agency shall submit to the congressional defense committees a report describing the acquisition plan and the manner in which the plan will meet the objectives described in subsection (c).

SEC. 1664. STUDY ON TESTING PROGRAM OF GROUND-BASED MID-COURSE MISSILE DEFENSE SYSTEM.

(a) *STUDY.*— Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall enter into a contract

with a federally funded research and development center to conduct a study on the testing program of the ground-based midcourse missile defense system.

(b) *ELEMENTS.*—The study under subsection (a) shall include the following:

(1) An assessment of whether the testing program described in subsection (a) has established, as of the date of the study, that the ground-based midcourse missile defense system has a high probability of performing reliably and effectively against limited missile threats from North Korea and Iran under realistic operational conditions, including an explanation of the degree of confidence supporting such assessment.

(2) An assessment of whether the currently planned testing program, if implemented, is sufficient to establish reasonable confidence that the ground-based midcourse missile defense system has a high probability of performing reliably and effectively under realistic operational conditions against current and plausible near- and medium-term limited ballistic missile threats from North Korea and Iran.

(3) Any recommendations for improvements that could be made to the testing program to—

(A) achieve reasonable confidence that the system would be reliable and effective under realistic operational conditions; or

(B) improve test and cost efficiencies.

(c) *REPORT.*—Not later than one year after entering into the contract under subsection (a), the Secretary shall submit to the congressional defense committees a report containing the study. The report shall be submitted in unclassified form, but may include a classified annex.

SEC. 1665. SENSE OF CONGRESS AND REPORT ON HOMELAND BALLISTIC MISSILE DEFENSE.

(a) *SENSE OF CONGRESS.*—It is the sense of Congress that—

(1) it is a national priority to defend the United States homeland against the threat of limited ballistic missile attack (whether accidental, unauthorized, or deliberate);

(2) although the currently deployed ground-based midcourse defense system provides a level of protection of the entire United States homeland, including the East Coast, against the threat of limited ballistic missile attack from North Korea and Iran, this capability needs to be improved to meet evolving ballistic missile threats;

(3) the initial step in this process of improvement is to correct the problems that caused the flight test failures with the current kill vehicles, and to improve the reliability of the deployed ground-based interceptor fleet;

(4) as indicated by senior officials of the Department of Defense, continued investments to enhance homeland defense sensor and discrimination capabilities are essential to improve the operational effectiveness and shot doctrine of the ground-based midcourse defense system;

(5) given limitations with the currently deployed exo-atmospheric kill vehicles, it is important to re-design the exo-atmospheric kill vehicle using a rigorous acquisition approach, in-

cluding realistic testing, that can achieve a demonstrated capability as soon as practicable using sound acquisition principles and practices; and

(6) in order to stay ahead of evolving ballistic missile threats, the Department should design the next generation exo-atmospheric kill vehicle to take full advantage of improvements in sensors, discrimination, kill assessment, battle management, and command and control, including the potential to engage multiple objects.

(b) REPORT REQUIRED.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Director of the Missile Defense Agency, in coordination with the Commander of the United States Northern Command, shall submit to the congressional defense committees a report setting forth the status of current and planned efforts to improve the homeland ballistic missile defense capability of the United States.

(2) ELEMENTS.—The report under paragraph (1) shall include the following:

(A) A detailed description of the current assessment of the threat to the United States from limited ballistic missile attack (whether accidental, unauthorized, or deliberate), particularly from countries such as North Korea and Iran, and an assessment of the projected future threat through 2023, including a discussion of confidence levels and uncertainties in such threat assessment.

(B) A detailed description of the status of efforts to correct the problems that caused the flight test failures of the capability enhancement-I and capability enhancement-II exo-atmospheric kill vehicles.

(C) A detailed description of the status of efforts to field the additional 14 ground-based interceptors planned for deployment at Fort Greely, Alaska, including the status of the refurbishment of Missile Field 1 at Fort Greely, and the operational impact of the additional interceptors.

(D) A detailed description of the plans and progress toward improving the capability, reliability, and availability of fielded ground-based interceptors, including progress toward improving the capabilities of ground-based interceptors deployed with upgraded capability enhancement-I and capability enhancement-II exo-atmospheric kill vehicles.

(E) A detailed description of the planned improvements to homeland ballistic missile defense sensor and discrimination capabilities, including through the use of additional sensor systems of the United States, and an assessment of the expected operational benefits of such improvements to homeland ballistic missile defense.

(F) A detailed description of the plans and efforts to redesign, develop, test, and field the exo-atmospheric kill vehicle for the ground-based midcourse defense system, and an explanation of the expected improvements of such kill vehicle with respect to capability, cost effectiveness, reliability, maintainability, and producibility.

(G) A detailed description of the plans for developing, testing, and fielding the next generation exo-atmospheric kill vehicle, and an explanation of how the anticipated capabilities are intended to remain ahead of evolving ballistic missile threats.

(H) A status of efforts on, and goals for, a common kill vehicle with multiple object kill capability, and an explanation of how such capability could keep the missile defense capability of the United States paced ahead of evolving ballistic missile threats.

(I) A detailed description of the options to improve the homeland ballistic missile defense capability that would respond to the emergence of a long-range ballistic missile threat from Iran, including an evaluation of the potential benefits and drawbacks of—

(i) the deployment of a missile defense interceptor site on the East Coast;

(ii) the deployment of a missile defense interceptor site in another location in the United States other than on the East Coast;

(iii) the deployment of a missile defense interceptor site in a location other than in the United States; and

(iv) the deployment of additional ground-based interceptors for the ground-based midcourse defense system at Fort Greely, Alaska, or Vandenberg Air Force Base, California, or both.

(J) Any other matters the Director considers appropriate.

(3) **FORM.**—The report under paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

SEC. 1666. SENSE OF CONGRESS AND REPORT ON REGIONAL BALLISTIC MISSILE DEFENSE.

(a) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the regional ballistic missile capabilities of countries such as Iran and North Korea pose a serious and growing threat to forward deployed forces of the United States, allies, and partner countries;

(2) given this growing threat, it is a high priority for the United States to develop, test, and deploy effective regional missile defense capabilities to provide the commanders of the geographic combatant commands with capabilities to meet the operational requirements of the commanders, and for allies and partners of the United States to improve their regional missile defense capabilities;

(3) the United States and its North Atlantic Treaty Organization partners should continue the development, testing, and implementation of phases 2 and 3 of the European Phased Adaptive Approach to defend forward deployed forces of the United States, allies, and partners in the North Atlantic Treaty Organization in Europe against the growing regional missile capability of Iran;

(4) the United States should continue efforts to improve regional missile defense capabilities in the Middle East, including its close cooperation with Israel and its efforts with countries of the Gulf Cooperation Council, in order to improve regional se-

(c) **ELEMENTS.**—The report under subsection (b) shall include the following:

(1) A detailed description of the status of implementation (including on the basis of technical development and acquisition of systems and capabilities) of the European Phased Adaptive Approach, including—

(A) the status of efforts to develop, test, and deploy the capabilities planned for phases 2 and 3 of the European Phased Adaptive Approach;

(B) a detailed description of the current and projected defended area of each phase of the European Phased Adaptive Approach and the missile defense requirement for the capability provided under each such phase;

that sector is particularly important as Federal budget cuts may reduce the number of new constructed military vessels; and

JOINT EXPLANATORY STATEMENT TO ACCOMPANY THE
CARL LEVIN AND HOWARD P. “BUCK” McKEON NATIONAL
DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2015

[Note from the Director, Legislative Operations: The following is the text of the Joint Explanatory Statement to Accompany the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015, as printed in the Congressional Record on December 4, 2014]

The following consists of the explanatory material to accompany the National Defense Authorization Act for Fiscal Year 2015.

Section 5 of the Act specifies that this explanatory statement shall have the same effect with respect to the implementation of this legislation as if it were a joint explanatory statement of a committee of conference.

In this joint explanatory statement, the provisions of H.R. 4435, the House-passed version of the National Defense Authorization Act for Fiscal Year 2015, are generally referred to as the “House bill.” The provisions of S. 2410, the Senate Committee on Armed Services committee-reported version of the National Defense Authorization Act for Fiscal Year 2015, are generally referred to as “the Senate committee-reported bill.” Senate amendments included in the agreements are identified by Senate amendment numbers. The final form of the agreements reached during negotiations between the House and the Senate are referred to as “the agreement.”

Compliance with rules of the House of Representatives and Senate regarding earmarks and congressionally directed spending items

Consistent with the intent of clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, neither the bill text reflected in the agreement nor the accompanying joint explanatory statement contains any congressional earmarks, congressionally-directed spending items, limited tax benefits, or limited tariff benefits, as defined in such rules.

Summary of discretionary authorizations and budget implication

The administration’s budget request for national defense discretionary programs within the jurisdiction of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2015 was \$577.1 billion. Of this amount, \$495.5 billion was requested for base Department of Defense (DOD) programs, \$63.7 billion was requested for overseas contingency operations (OCO), and \$17.9 billion was requested for national security programs in the Department of Energy (DOE) and the Defense Nuclear Facilities Safety Board (DNFSB). The budget request incor-

porates the amendments submitted to Congress on June 26, 2014 and November 10, 2014.

The bill authorizes \$577.1 billion in fiscal year 2015, including \$495.9 billion for base DOD programs, \$63.7 billion for OCO, and \$17.5 billion for national security programs in the DOE and the DNFSB.

The two tables preceding the detailed program adjustments in Division D of this joint explanatory statement summarize the direct discretionary authorizations in the agreement and the equivalent budget authority levels for fiscal year 2015 defense programs. The first table summarizes the agreement on authorizations within the jurisdiction of the Armed Services Committees. The second table details the budget authority implication of the discretionary authorizations in the agreement when accounting for national defense items that are not in the jurisdiction of the Armed Services Committees.

Budgetary effects of this Act (sec. 4)

The Senate committee-reported bill contained a provision (sec. 4) that would require the budgetary effects of this Act be determined in accordance with the procedures established in title I of the Statutory Pay-As-You-Go Act of 2010 (Public Law 111-139).

The House bill contained no similar provision.

The agreement includes the Senate provision.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

BUDGET ITEMS

Navy enterprise information technology

The budget request included \$87.2 million in Other Procurement, Navy Line 161 for enterprise information technology (IT).

The House bill would approve the budget request.

The Senate committee-reported bill would decrease that line item by \$15.0 million to reflect concerns about the continued investment of funds into legacy IT infrastructure.

The agreement authorizes the budget request for this item.

We note that much of this funding is supporting procurements related to the sustainment of legacy Navy IT systems located outside the continental United States (OCONUS). We understand that these procurements are necessary to provide technical upgrades to sustain these networks as the Navy determines how to converge all of its networks as part of a future Naval Networking Environment. The investment required by this funding would bring the OCONUS networks up to a standard that could support a transition to the Next Generation Enterprise Network contract in the future, which would also align Navy networks in a way that would support the enterprise-wide push to standardize capabilities in the Joint Information Environment framework. We note that this set of hardware and network systems transitions entail additional cost, technical risk, and potentially operational risk to deployed forces, which could have been avoided with better planning for and more strategic funding of the systems. We expect the Navy, as well as the

Department of Defense Chief Information Officer, to ensure that all Department of Navy and Department of Defense enterprise IT system efforts have robust planning related to and funding dedicated for the maintenance and sustainment of legacy systems, and to ensure that systems meet requirements and reflect modern state-of-the-art IT systems, to the maximum extent practicable and that this is documented in the programs' acquisition strategy documentation. This should apply to both Major Automated Information Systems (MAIS) and non-MAIS efforts.

Ejection seat safety and reliability improvement program

The amended budget request included no funds for the procurement of modernized and upgraded ejection seats for Department of the Air Force fighter and bomber aircraft.

The House bill would increase the budget request by a total of \$10.5 million, of which \$3.5 million is for initial qualification of upgraded ejection seats in the Research, Development, Test, and Evaluation, Air Force (RDT&E, AF) account, and \$7.0 million is for initial installation of upgraded ejection seats in the Aircraft Procurement, Air Force (APAF) account.

The Senate committee-reported bill approved the budget request.

We recommend an additional increase of \$6.0 million ejection seat programs, including \$3.5 million in RDT&E, AF, and \$2.5 million in APAF.

Section 146(b) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) required a report by the Secretary of the Air Force on various aspects of the health and safety risks associated with ejection seats. The report confirmed that, with increased use of helmet-mounted devices, the risks of death or serious injury increases, and increases even more for lighter aircrew.

In response to a requirement to analyze initiatives to decrease the risk of death or serious injury during an ejection sequence, the report indicated that, although the Air Force had spent \$25.8 million for investments in safety improvements for existing seats, the Air Force had stopped short of final qualification testing.

The report also referred to an Air Force analysis of alternatives (AoA) that the Air Force had conducted in 2010 that supported: “(a) an improved ejection seat solution with an expanded anthropometric envelope that would match the current pilot population to increase safety; and (b) a design that reduces aircraft life cycle costs.”

We believe that the Air Force should review and update, as necessary, the 2010 AoA, and establish a program for increasing the ejection safety and reliability of the Air Force's fighter and bomber aircraft.

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 101)

The House bill contained a provision (sec. 101) authorizing appropriations for fiscal year 2015 for procurement for the Army, the Navy and Marine Corps, the Air Force, and defense-wide activities, as specified in the funding table in section 4101.

The Senate committee-reported bill contained an identical provision (sec. 101).

The agreement includes this provision.

Subtitle B—Army Programs

Plan on modernization of UH-60A aircraft of Army National Guard (sec. 111)

The House bill contained a provision (sec. 112) that would require the Secretary of the Army to submit a report on plans for the modernization of UH-60A helicopters in the Army National Guard.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Subtitle C—Navy Programs

Construction of San Antonio class amphibious ship (sec. 121)

The House bill contained a provision (sec. 122) that would authorize the Secretary of the Navy to enter into a contract during fiscal year 2015 for the procurement of one San Antonio-class amphibious ship using incremental funding.

The Senate committee-reported bill contained a provision (sec. 123) that would authorize the Secretary of the Navy to transfer funds available in the Shipbuilding and Conversion, Navy (SCN), or other Navy procurement account for either or both of the following purposes:

(1) Up to \$650.0 million to conduct a refueling and complex overhaul of the USS George Washington (CVN-73).

(2) Up to \$650.0 million to build a San Antonio-class amphibious ship.

The Senate provision would also authorize the Secretary of the Navy to use incremental funding for a San Antonio-class ship if additional funds are made available in fiscal year 2015.

The agreement includes the House provision. The agreement also provides full funding for the fiscal year 2015 requirements for conducting a refueling and complex overhaul of the USS George Washington (CVN-73), and provides authorization for \$800.0 million for the San Antonio-class amphibious ship program elsewhere in this Act.

Limitation on availability of funds for mission modules for Littoral Combat Ship (sec. 122)

The House bill contained a provision (sec. 125) that would prohibit the Secretary of the Navy from obligating any funds for the procurement of mission modules for the Littoral Combat Ship until the Secretary submits to the congressional defense committees each of the following:

(1) The Milestone B program goals for cost, schedule, and performance for each increment.

(2) Certification by the Director of Operational Test and Evaluation (DOT&E) with respect to the total number for each module type that is required to perform all necessary operational testing.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would clarify that the Milestone B goals and DOT&E certification would be with regard to each mission module, rather than with each increment of capability for each mission module.

Extension of limitation on availability of funds for Littoral Combat Ship (sec. 123)

The House bill contained a provision (sec. 126) that would amend section 124(a) of the National Defense Authorization Act for Fiscal Year 2014 to extend the prohibition on spending in section 124 to include fiscal year 2015. Section 124 prevents using funds available in fiscal year 2014 for construction or advanced procurement of materials for the Littoral Combat Ships designated as LCS-25 or LCS-26 until the Secretary of the Navy submits certain reports and information to the congressional defense committees.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Report on test evaluation master plan for Littoral Combat Ship seaframes and mission modules (sec. 124)

The Senate committee-reported bill contained a provision (sec. 122) that would require the Director of Operational Test and Evaluation to submit a report on the test and evaluation master plan for the seaframes and mission modules for the Littoral Combat Ship program.

The House bill contained no similar provision.

The agreement includes this provision.

Airborne electronic attack capabilities (sec. 125)

The Senate committee-reported bill contained a provision (sec. 121) would direct the Secretary of the Navy to take whatever steps the Secretary deems appropriate and are available to the Navy to ensure that the Navy retains the option of buying more EA-18G aircraft, if further analysis of whether to expand the airborne electronic attack (AEA) force structure indicates the Navy should include more EA-18G aircraft in carrier air wings. The provision would also authorize the Navy, subject to appropriation, to use \$75.0 million in funds authorized and appropriated in fiscal year 2014 for advance procurement funds of F/A-18 E/F aircraft for the purpose of retaining such an option. The Senate committee-reported bill also recommended an increase of \$25.0 million in section 4101 for those purposes.

The House bill contained no similar provision. The House bill recommended an increase of \$450.0 million in section 4101 to purchase additional EA-18G aircraft.

The agreement includes the Senate provision with an amendment that would exclude language regarding the use of prior year funds. We also include a recommendation for additional funding for EA-18G aircraft elsewhere in this Act.

Subtitle D—Air Force Programs

Prohibition on availability of funds for retirement of MQ-1 Predator aircraft (sec. 131)

The Senate committee-reported bill contained a provision (sec. 131) that would prohibit the Department of Defense from using fiscal year 2015 funds to retire MQ-1 Predator aircraft.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would prevent the Secretary of the Air Force from retiring any MQ-1 aircraft, unless an MQ-1 aircraft has been damaged and it is not economically viable to repair the aircraft, as determined by the Secretary.

Prohibition on availability of funds for retirement of U-2 aircraft (sec. 132)

The House bill contained a provision (sec. 133) that would prohibit the Department of Defense from obligating or expending funds to make significant changes to retire, prepare to retire, or place in storage U-2 aircraft.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Prohibition on availability of funds for retirement of A-10 aircraft (sec. 133)

The House bill contained a provision (sec. 132) that would prohibit obligation or expenditure of fiscal year 2015 funds to retire A-10 aircraft. The provision would also require the Comptroller General of the United States to conduct a study evaluating Air Force aircraft used, as of the date of the study, to conduct close-air support missions.

The Senate committee-reported bill contained a similar provision (sec. 134) that would prohibit obligation or expenditure of fiscal year 2015 funds to make significant changes to manning levels with respect to any A-10 aircraft squadrons, or to retire, prepare to retire, or place in storage any A-10 aircraft.

The agreement includes the Senate provision with an amendment that would allow the Secretary of Defense to authorize the Secretary of the Air Force to move up to 36 A-10 in the active component primary aircraft inventory (PAI) status to back up flying status, or back up aircraft inventory (BAI) status, for the duration of fiscal year 2015, 30 days after certifying to the congressional defense committees that he has:

- (1) Received the results of an independent assessment by the Director of the Office of Cost Assessment and Program Evaluation of alternative ways to provide manpower to maintain the Air Force fighter fleet and field Joint Strike Fighter aircraft in fiscal year 2015; and
- (2) Determined, after giving consideration to such analysis, that moving active component aircraft in PAI status to BAI status is needed to avoid:
 - (a) Significantly degrading the readiness of the Air Force fighter fleet; or

(b) Significantly delaying the planned fielding of F-35 aircraft.

The agreement also includes the requirement that the Comptroller General conduct the study of close-air support missions as was included in the House provision.

If the Secretary of Defense makes the certification and allows the Secretary of the Air Force to transfer A-10 aircraft from PAI to BAI status, we direct the Secretary of Defense to reprogram any money freed up as a result of reduced flying hours or reduced numbers of maintenance personnel for the A-10 aircraft to other higher priority Department of Defense programs.

Prohibition on cancellation or modification of avionics modernization program for C-130 aircraft (sec. 134)

The House bill contained a provision (sec. 131) that would prevent the Department of Defense from using Air Force funds in fiscal year 2015 to:

- (1) Take any action to cancel or modify the avionics modernization program (AMP) of record for C-130 aircraft; or
- (2) Initiate an alternative communication, navigation, surveillance, and air traffic management program for C-130 aircraft that is designed or intended to replace the avionics modernization program described in paragraph (1).

The provision would prevent the Air Force from obligating more than 75 percent of the funds for operation and maintenance of the Office of the Secretary of the Air Force until 15 days after the Secretary of the Air Force has certified that she has obligated funds authorized to be appropriated or otherwise made available for fiscal years prior to fiscal year 2015 for the AMP program of record for C-130 aircraft.

The Senate committee-reported bill contained no similar provision.

A proposed amendment to the Senate committee-reported bill (amendment number 3588) contained a provision that would allow the Air Force to use programs in addition to the AMP for C-130 aircraft to modernize such aircraft.

The agreement includes the House provision with an amendment that would permit the Air Force to make modifications to C-130 aircraft, such as Automatic Dependent Surveillance Broadcast-Out (ADS-B-Out) or the communication, navigation, surveillance and air traffic management (CNS/ATM) program, that would be required to operate without restriction in airspace controlled by the Federal Aviation Administration or other national aviation authority in foreign countries, upon a certification by the Secretary of Defense that such modification is required to operate without restriction in such airspace. The provision would also prevent the Air Force from obligating more than 85 percent of the funds for operation and maintenance of the Office of the Secretary of the Air Force until 15 days after the Secretary of the Air Force has certified that she has obligated funds authorized to be appropriated or otherwise made available for fiscal years prior to fiscal year 2015 for the AMP program of record for C-130 aircraft.

We are specifically directing the Secretary of the Air Force not to transfer or repurpose funds authorized and appropriated for the

AMP program to execute such additional modernizations unless the modifications are included as part of the AMP program of record.

Limitation on availability of funds for retirement of Air Force aircraft (sec. 135)

The Senate committee-reported bill contained a provision (sec. 132) that would require the Secretary of the Air Force to analyze the recommendations of the National Commission on the Structure of the Air Force, and submit a report on implementation of the Commission's recommendations, covering not less than 80 percent of the Air Force missions and aircraft. The provision would also prevent the Secretary from retiring any aircraft until 60 days after submitting the report.

The House bill contained no similar provision.

The agreement includes this provision.

Limitation on availability of funds for retirement of E-3 Airborne Warning and Control System aircraft (sec. 136)

The House bill contained a provision (sec. 135) that would prohibit the Department of Defense (DOD) from retiring more than four E-3 Airborne Warning and Control System (AWACS) aircraft, or disestablishing any AWACS units of the active or reserve components, until a period of 15 days has elapsed following the date on which the Secretary of the Air Force submits to the congressional defense committees a report consisting of:

(1) A certification that the Secretary is able to meet all priority requirements of the commanders of the combatant commands relating to such aircraft with a planned force of 24 such aircraft; and

(2) A detailed explanation how the Secretary will meet such requirements with such planned force.

The Senate committee-reported bill contained a similar provision (sec. 136) that would prohibit DOD from obligating or expending funds to make significant changes to manning levels with respect to any AWACS aircraft, or to retire, prepare to retire, or place in storage any AWACS aircraft.

The agreement includes the Senate provision.

Limitation on availability of funds for divestment or transfer of KC-10 aircraft (sec. 137)

The House bill contained a provision (sec. 134) that would prohibit the Department of Defense from obligating or expending funds to divest or transfer, or prepare to divest or transfer, KC-10 aircraft.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would prevent retirement until a period of 60 days has elapsed following the date on which the Secretary of Defense submits to the congressional defense committees an assessment of the costs and benefits of the proposed divestment or transfer.

Limitation on availability of funds for transfer of Air Force C-130H and C-130J aircraft (sec. 138)

The House bill contained a provision (sec. 1049) that would prevent the Secretary of the Air Force from removing C-130 aircraft from a unit of the regular or reserve components of the Air Force that is tasked with the modular airborne firefighting system (MAFFS) mission, or from a unit that is formally associated with a unit that has the MAFFS mission, until the Secretary of the Air Force certified that MAFFS mission would not be negatively affected by the removal of such aircraft. The House bill also contained a provision (sec. 1067) that would require the Secretary of the Air Force to submit a report on the 5-year plan for the force structure laydown of tactical airlift aircraft within 60 days of enactment of this Act and would prevent the Air Force from implementing any movements of such aircraft until the Secretary had briefed the congressional defense committee.

The Senate committee-reported bill contained a similar provision (sec. 133) that would prevent the Secretary of the Air Force from implementing any transfers of C-130H or C-130J aircraft until 60 days after the Secretary submits a report on the costs and benefits of such a transfer, and would require the Comptroller General to submit to the congressional defense committees a sufficiency review of the Secretary's report, including any findings and recommendations relating to such review, within 45 days after the Secretary submits a report on such transfers.

The agreement includes the Senate provision with an amendment that would require the Secretary to submit a 5-year plan for basing C-130H and C-130J aircraft, and would require that, for units with special capabilities such as the MAFFS mission, a certification that those special missions would not be negatively affected by the proposed transfers before making the transfers.

We do not intend that the prohibition on transfer of C-130 aircraft apply to movements of aircraft associated with normal Air Force management of the C-130 fleet, such as transferring aircraft between units and depots in conjunction with conducting regular maintenance or upgrades of the aircraft.

Limitation on availability of funds for transfer of Air Force KC-135 tankers (sec. 139)

The Senate committee-reported bill contained a provision (sec. 135) that would delay the Air Force's plan to transfer KC-135 aircraft from Joint Base Pearl Harbor-Hickam, pending a report on the costs and benefits of that transfer.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment.

Report on C-130 aircraft (sec. 140)

The House bill contained a provision (sec. 1067) that would require the Secretary of the Air Force to submit a report on the 5-year plan for the force structure laydown of tactical airlift aircraft within 60 days of enactment of this Act and would prevent the Air Force from implementing any movements of such aircraft until the Secretary briefs the congressional defense committee.

The Senate committee-reported bill contained a similar provision (sec. 138) that would require the Secretary of the Air Force to submit a fielding plan for C-130 aircraft within 180 days of enactment of this Act.

The agreement includes the Senate provision.

Elsewhere in this Act, the agreement also includes a temporary prohibition on moving C-130 aircraft to another location until the Department meets certain reporting requirements.

Report on status of F-16 aircraft (sec. 141)

The Senate committee-reported bill contained a provision (sec. 139) that would require the Secretary of the Air Force to report on the status and location, and any plans to change during the period of the future years defense program the status or locations, of all F-16 aircraft in the Air Force inventory.

The House bill contained no similar provision.

The agreement includes this provision.

Report on options to modernize or replace T-1A aircraft (sec. 142)

The House bill contained a provision (sec. 1090C) that would express the sense of Congress that the Secretary of the Air Force should formally assess the operational feasibility, costs, potential savings, and readiness implications of utilizing contractor-owned, contractor-operated, very light jet aircraft for interim flight instruction until a permanent replacement for the T-1A enters service.

The Senate committee-reported bill contained a similar provision (sec. 140) that would require the Secretary of the Air Force to submit to the congressional defense committees a report on the options for replacing or upgrading the T-1A aircraft's capability, to include options of leased aircraft or services, not later than 90 days after the date of the enactment of this Act.

The agreement includes the Senate provision.

Report on status of air-launched cruise missile capabilities (sec. 143)

The Senate committee-reported bill contained a provision (sec. 137) that required a report on the existing air-launched cruise missile system (AGM-86) and the plan for the replacement of the system referred to as the long-range standoff missile.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would change the report due date from 180 days after date of enactment to 120 days after the date of enactment of this act.

Subtitle E—Defense-Wide, Joint, and Multiservice Matters

Additional oversight requirements for the undersea mobility acquisition program of the United States Special Operations Command (sec. 151)

The House bill contained a provision (sec. 123) that would modify the current oversight requirements for the undersea mobility acquisition program of U.S. Special Operations Command (SOCOM), and require the Secretary of the Navy to review a transition plan for

the undersea mobility capabilities developed by the Commander, SOCOM. This section would also repeal section 144 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the requirements of section 144 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) and require the Commander, SOCOM, to provide the congressional defense committees with a technology roadmap for undersea mobility capabilities.

Plan for modernization or replacement of digital avionics equipment
(sec. 152)

A proposed amendment to the Senate committee-reported bill (amendment number 3568) contained a provision that would require the Secretary of Defense to submit a plan to the congressional defense committees for the modernization or replacement of digital avionics equipment, including use of commercial-off-the-shelf digital avionics equipment, to meet the Federal Aviation Administration’s NextGen Equipage Program requirements.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would clarify that the Secretary’s report should address potential modernization or replacement of equipment

Comptroller General report on F–35 aircraft acquisition program
(sec. 153)

The House bill contained a provision (sec. 141) that would require the Comptroller General of the United States to provide an annual report on the cost, schedule, and performance of the F–35 aircraft acquisition program. The reporting requirement would end at the point when the F–35 enters into full-rate production.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

Limitation on availability of funds for Airborne Reconnaissance Low aircraft

The House bill contained a provision (sec. 111) that would prohibit the Army from obligating or expended any fiscal year 2015 funds on the modernization of the communications intelligence subsystem of the Airborne Reconnaissance Low program until the Secretary of the Army submitted a report on that subsystem.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We remain concerned in regards to the Army’s overall signals intelligence modernization plan. Therefore, we direct the Secretary of the Army to submit a report to the congressional defense commit-

tees not later than March 15, 2015. The report, at a minimum, should:

- (1) Specify which subsystem will be used to modernize such aircraft;
- (2) Explain how such subsystem was selected;
- (3) Identify the alternatives to such subsystem that the Secretary considered during such selection; and
- (4) Detail how such subsystem will be integrated into the signals intelligence modernization plan for the Army.

Limitation on availability of funds for moored training ship program

The House bill contained a provision (sec. 124) that would prohibit the Secretary of the Navy from obligating more than 80 percent of the funds for the moored training ship program until 30 days after the Secretary of Defense certified that:

- (1) The Chairman of the Joint Requirements Oversight Council has reviewed and approved the need for two additional moored training ships;
- (2) The Director of Cost Assessment and Program Evaluation has reviewed and certified the cost estimates of the moored training ship program; and
- (3) The Under Secretary of Defense for Acquisition, Technology, and Logistics has reviewed and approved the budget, schedule, and construction plans for such two additional moored training ships.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Multiyear procurement authority for Tomahawk block IV missiles

The House bill contained a provision (sec. 121) that would authorize the Secretary of the Navy to enter into one or more multiyear contracts for the procurement of Tomahawk block IV missiles.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We believe that the Department should review its overall missile portfolio and propose more economical procurement strategies in the fiscal year 2016 budget request, including the use of multiyear procurements, block buys, and contracts with one or more years of priced options.

Procurement of advanced threat emitters

A proposed amendment to the Senate committee-reported bill (amendment number 3575) contained a provision that would express the sense of Congress on the procurement of advanced threat emitters, their importance in providing vital electronic warfare training, and need for the Air Force to prioritize its acquisition.

The House bill contained no similar provision.

The agreement does not include this provision.

We recognize the Joint Threat Emitter system provides vital electronic warfare training for combat aircrews by simulating the

multiple threat scenarios of a hostile integrated air defense system. We also note that the system of threat emitters currently in use on U.S. military ranges has deficiencies. These deficiencies place our forces at risk and could jeopardize mission success. We believe the Department of Defense and the services should consider prioritizing and accelerating the acquisition and fielding of a modernized system of threat emitters beyond the level requested in the President's fiscal year 2015 budget.

Sense of Congress regarding the OCONUS basing of the F-35A

The House bill contained a provision (sec. 142) that would express the sense of Congress, regarding the Outside the Continental United States (OCONUS) basing of the F-35A, that the Secretary of the Air Force should place emphasis on the benefits derived from sites that:

- (1) Are capable of hosting fighter-based bilateral and multilateral training opportunities with international partners;
- (2) Have sufficient airspace and range capabilities and capacity to meet the training requirements;
- (3) Have existing facilities to support personnel, operations, and logistics associated with the flying mission;
- (4) Have limited encroachment that would adversely impact training or operations; and
- (5) Minimize the overall construction and operational costs.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We are aware that the Air Force uses a deliberate strategic basing process to make its basing decisions. In October 2013, the Air Force announced the list of bases in the Pacific Air Force command being considered to beddown the first F-35A squadrons OCONUS. In August 2014, the Air Force announced that the Secretary of the Air Force had chosen Eielson Air Force Base, Alaska as the preferred alternative to host the first F-35A squadrons in the Pacific Air Forces area of responsibility.

We support the Air Force's strategic basing process and believe that it provides a thorough, consistent, and transparent process for basing decisions. When the Air Force is evaluating candidate bases for new units and missions, we believe that the Air Force should use criteria-based analysis and military judgment at each location, to include enterprise, mission, capacity, costs and environment. For different circumstances, such as OCONUS basing, the Air Force may also need to include additional criteria, such as notification of a host nation partner.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

BUDGET ITEMS

Strategic Capabilities Office

The budget request included \$250.0 million in research, development, test and evaluation, defense-wide for the activities of the Strategic Capabilities Office (SCO).

The House bill would decrease funding for SCO by \$30.0 million.

The Senate committee-reported bill would decrease funding for SCO by \$15.0 million.

The agreement reduces the budget request for SCO by \$10.0 million in PE 63289D8Z and \$20.0 million in PE 64250D8Z.

We are aware of and supportive of the valuable work that the SCO has been conducting. Though the efforts of SCO are still in early stages and have only recently begun to produce some tangible capabilities, we see promising concepts being supported by investment. We do have concerns that SCO projects are being scaled at a rate that is not commensurate with the results that have been shown so far. We believe that the SCO could benefit from senior level guidance and oversight to ensure that promising ideas are more closely tied to the needs, requirements and priorities of the combatant commands. Additionally, for those programs in Advanced Capability and Prototyping (6.4) budget activity, we also believe the programs need to have an estimated cost to field the capability, if the demonstration proves successful, to support transition planning activities.

We also believe that senior level involvement is necessary to help coordinate SCO efforts with other research and development activities of the Department of Defense (DOD), especially within the office of the Under Secretary of Defense for Acquisition, Technology and Logistics and the Defense Advanced Research Projects Agency (DARPA). In a budget constrained environment, better coordination of SCO efforts with the entire research and development enterprise, including the various communities of interest established by the Assistant Secretary of Defense for Research and Engineering, will enhance SCO's effectiveness by leveraging the funding and expertise of the entire of the research enterprise.

Additionally, we understand that leadership within DOD is looking at establishing a charter for, and changing the organizational reporting structure of, the SCO. We believe that DOD should examine a range of options to determine where to position and how to resource the office. We fully expect DOD to inform the congressional defense committees on any significant changes to SCO before any changes are formalized.

High Energy Liquid Laser Area Defense System

The budget request included \$386.9 million in PE 63766E for network-centric warfare technology.

The House bill would approve the budget request.

The Senate committee-reported bill would decrease funding for the High Energy Liquid Laser Area Defense System (HELLADS) within that line item by \$20.0 million.

The agreement authorizes the budget request for this item.

We note that the HELLADS has been funded by the Defense Advanced Research Projects Agency (DARPA) for over 10 years, with over \$200 million expended to date. We note that a planned fiscal year 2015 technology demonstration will mark the end of DARPA's investment in technical development. We are concerned that the program still has no identified commitments for a transition pathway to a service program for further development or demonstration. At this point, we believe that even a successful demonstration of HELLADS capabilities in fiscal year 2015 is not likely to result

in any meaningful transition of the capability to a service program. Therefore, we direct the Assistant Secretary of Defense for Research and Engineering, acting through the congressionally-mandated Joint Technology Office for High Energy Lasers, to review current DARPA-service plans for transition of the HELLADS capabilities and provide a report on the plans, schedules, and identified resources to support integration and transition into any service-led directed energy efforts, no later than March 1, 2015.

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) authorizing appropriations for fiscal year 2015 for the use of the Department of Defense for research, development, test, and evaluation, as specified in the funding table in section 4201.

The Senate committee-reported bill contained an identical provision (sec. 201).

The agreement includes this provision.

Subtitle B—Program Requirements, Restrictions, and Limitations

Modification of authority for prizes for advanced technology achievements (sec. 211)

The Senate committee-reported bill contained a provision (sec. 211) that would modify the authority of the Secretary of Defense to hold prize and challenge competitions to spur advanced technology achievements.

The House bill contained no similar provision.

The agreement includes this provision.

In the recently announced “Better Buying Power (BBP) 3.0” initiative, Undersecretary of Defense for Acquisition, Technology and Logistics Frank Kendall called for improved communication between industry and the government in order to increase the productivity of both government and industry research efforts, including Independent Research and Development performed by industry. We recognize the merits of such a suggestion, as well as the challenges in developing an effective communications process that is able to be adaptive enough to protect intellectual property and data rights, and protect both industry and government partners from bid protests when informed interest shifts to informed acquisition.

We note that prize authority has historically been used to good effect at aligning the government’s technology and research goals with the resources, ambition, and innovation of the private sector. From the Longitude Prize in 1714 that resulted in improved ship navigation capabilities, to the Defense Advanced Research Projects Agency Grand Challenge in 2005 which resulted in demonstrating autonomous ground vehicle navigation, government prize authority has demonstrated the ability to bring together government and industry funding, technology and expertise to produce revolutionary new technological capabilities. While we do not believe that such prizes can replace the kind of coordination and dialogue sought in BBP 3.0, it is an important tool in the toolbox for demonstrating

the benefits of such a process for both the government and industry.

Modification of Manufacturing Technology Program (sec. 212)

The Senate committee-reported bill contained a provision (sec. 212) that would clarify that the Under Secretary of Defense for Acquisition, Technology, and Logistics or his designees should conduct oversight of the Joint Defense Manufacturing Technology Panel, which coordinates manufacturing technology and research programs for the Department of Defense. Further, the provision reduces the frequency of mandated updates to the Manufacturing Technology program's strategic plan, to better synchronize this effort with the Quadrennial Defense Review process.

The House bill contained no similar provision.

The agreement includes this provision.

We intend that the next strategic plan be developed in coordination with the Quadrennial Defense Review currently scheduled for 2018.

Revision of requirement for acquisition programs to maintain defense research facility records (sec. 213)

The House bill contained a provision (sec. 222) that would modify the requirements to subsection (b) of section 2364 of title 10, United States Code, to eliminate the need for acquisition programs to maintain a record of all issue papers from a defense research facility related to said acquisition programs.

The Senate committee-reported bill contained a similar provision (sec. 806).

The agreement includes the House provision with a technical amendment.

Treatment by Department of Defense Test Resource Management Center of significant modifications to test and evaluation facilities and resources (sec. 214)

The Senate committee-reported bill contained a provision (sec. 214) that would direct the Secretary of the Army and the Director of the Test Resource Management Center (TRMC) to report on significant reductions or consolidations of major test facilities.

The House bill contained no similar provision.

The agreement includes a provision which would modify the authorities and duties of the Director, TRMC, to review and report on significant expansion, divestment, consolidation or curtailment of activities within the test and evaluation facilities and resources of the Major Range and Test Facility Base.

Revision to the service requirement under the Science, Mathematics, and Research for Transformation defense education program (sec. 215)

The House bill contained a provision (sec. 221) that would modify the options for the service obligation requirement within the Science, Mathematics, and Research for Transformation (SMART) program to also include employment with a public or private sector entity or organization outside the Department of Defense (DOD), if

the Secretary of Defense determines that the employment would provide a benefit to the Department of Defense (DOD).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment to clarify that the Secretary should make significant efforts to place SMART scholars into DOD positions, prior to placement in non-DOD positions.

Limitation on availability of funds for armored multi-purpose vehicle program (sec. 216)

The House bill contained a provision (sec. 212) that would limit the availability of funds for the armored multi-purpose vehicle until the Secretary of the Army submits a report on plans for the replacement of M113 armored personnel carriers in formations outside of its combat brigades.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Limitation on availability of funds for Unmanned Carrier-Launched Airborne Surveillance and Strike system (sec. 217)

The House bill contained a provision (sec. 213) that would prevent obligation of any Navy research and development funds for the Unmanned Carrier-Launched Airborne Surveillance and Strike (UCLASS) to award a contract for the air vehicle segment until the Secretary of Defense submits to the congressional defense committees a report that: (1) certifies that a review of the requirements for air vehicle segments of the unmanned carrier-launched surveillance and strike system is complete; and (2) includes the results of such review.

The House report accompanying H.R. 4435 (H. Rept. 113-446) of the National Defense Authorization Act for Fiscal Year 2015 indicated that the current UCLASS air vehicle segment requirements would not address the emerging anti-access/area denial (A2/AD) challenges to U.S. power projection that originally motivated creation of what became the Navy UCLASS program. In particular, the House report indicated that a disproportionate emphasis in the requirements on unrefueled endurance to enable continuous intelligence, surveillance, and reconnaissance (ISR) support to the carrier strike group (CSG), would result in an aircraft with too little survivability and too small an internal weapons payload capability.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would require the Navy to submit a report with the budget for fiscal year 2017 that would:

- (1) Identify the cost and performance trade-offs the Navy made in arriving at the set of requirements for the UCLASS air vehicle segment to include strike capability in an A2/AD environment;
- (2) Address the derivation of requirements for the overall composition of the future carrier air wing, including any con-

tribution to CSG ISR capability from non-carrier air wing forces, such as the MQ-4C Triton;

(3) Specify how the Navy derived the plan for achieving the best mix of capabilities for the CSG air wing to conduct representative joint ISR-strike campaigns in the 2030 timeframe, including how the UCLASS, F-35C, EA-18G, and the aircraft that is proposed to replace the F/A-18E/F (FA-XX) would contribute to overall capability, including in an A2/AD threat environment;

(4) Define the UCLASS program's acquisition strategy, and provide the justification for any tailoring of that strategy that deviates from that of a traditional program, consistent with DoDI 5000.02 policy; and

(5) Establish a formal acquisition program cost and schedule baseline, to allow the Navy to track unit costs, and provide regular reports to Congress on cost, schedule and performance progress.

We believe that the Secretary of Defense may submit a report that certifies the current set of requirements and can proceed with the current program, or could decide to revisit the current UCLASS requirements and conduct another review of costs and capabilities. The Navy may have made an appropriate set of trade-offs between costs and capabilities in deriving a set of requirements for UCLASS, but those trade-offs should be evaluated in the context of the overall CSG capability, not on the basis of individual capabilities of weapons systems or an unconstrained budget.

Limitation on Availability of Funds for airborne reconnaissance systems (sec. 218)

The House bill contained a provision (sec. 214) that would limit the obligation or expenditure of funds authorized by this Act to not more than 25 percent for the imaging and targeting support of airborne reconnaissance systems, until the Secretary of the Air Force delivers a report to the appropriate congressional committees. The elements of the report would include a detailed plan regarding the use of such funds for fiscal year 2015, and a strategic plan for the funding of advanced airborne reconnaissance technologies supporting manned and unmanned systems.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the reporting requirement for the use of funds for fiscal year 2015.

We believe the plan should identify the activities and projects that the Air Force is investing in. We note the restriction on funds only applies to the funds for the imaging and targeting support project within Program Element 35206F. We believe the strategic plan should identify the broad objectives that the project should be focused on accomplishing over the course of the future year defense program, and may be provided to the appropriate Congressional committees in the form of a briefing.

Limitation on availability of funds for retirement of Joint Surveillance and Target Attack Radar Systems aircraft (sec. 219)

The Senate committee-reported bill contained a provision (sec. 213) that would prohibit the Air Force from retiring or preparing to retire operational Joint Surveillance and Target Attack Radar System (JSTARS) aircraft until the Secretary of the Air Force submits a report detailing various aspects of the Air Force's plan to replace the current JSTARS aircraft, including an assessment of the cost and schedule of developing and fielding a new aircraft and radar system employing mature technology to replace the current JSTARS aircraft.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would clarify that the assessment of cost and schedule of developing and fielding a new aircraft and radar system would be for a program that would deliver two replacement aircraft to the JSTARS aircraft operating base by fiscal year 2019.

Subtitle C—Reports

Reduction in frequency of reporting by Deputy Assistant Secretary of Defense for Systems Engineering (sec. 221)

The Senate committee-reported bill contained a provision (sec. 222) that would reduce the reporting requirement related to the systems engineering activities of the Office of the Secretary of Defense.

The House bill contained no similar provision.

The agreement includes this provision.

Independent assessment of interagency biodefense research and development (sec. 222)

A proposed amendment to the Senate committee-reported bill (amendment number 3435) contained a provision that would require a study of bureaucratic and policy barriers to the efficient execution of interagency research and development activities related to biodefense.

The House bill contained no similar provision.

The agreement includes this provision.

Briefing on modeling and simulation technological and industrial base in support of requirements of Department of Defense (sec. 223)

A proposed amendment to the Senate committee-reported bill (amendment number 3848) contained a provision that would direct an independent study of the United States modeling and simulation industrial base.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require a briefing to the Committees on Armed Services of the Senate and House of Representatives that updates the report on the Department of Defense Modeling and Simulation (M&S) Technological and Industrial Base that was submitted to Congress on March 11, 2011. This report was required by section 1059 of the National Defense Authorization Act for Fiscal Year

2010 (Public Law 111–84) and describes current and planned efforts to support and enhance the defense M&S technological and industrial base.

Subtitle D—Other Matters

Modification to requirement for contractor cost-sharing in pilot program to include technology protection features during research and development of certain defense systems (sec. 231)

The House bill contained a provision (sec. 223) that would amend section 243(b) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383) by striking “at least one half of the cost of such activities” and inserting “an appropriate share of the cost of such activities, as determined by the Secretary.”

The Senate committee-reported bill contained a similar provision (sec. 233).

The agreement includes the Senate provision.

Pilot program on assignment to Defense Advanced Research Projects Agency of private sector personnel with critical research and development expertise (sec. 232)

The Senate committee-reported bill contained a provision (sec. 231) that would authorize the Director of the Defense Advanced Research Projects Agency (DARPA) to carry out a pilot program to employ up to 5 individuals employed by the private sector on rotational assignments to lead research or development projects of the Agency.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that authorizes the pilot program with additional guidance to manage potential conflicts of interest that may arise during execution.

Pilot program on enhancement of preparation of dependents of members of Armed Forces for careers in science, technology, engineering, and mathematics (sec. 233)

The Senate committee-reported bill contained a provision (sec. 222) that would authorize a pilot program to enhance the science, technology, engineering, and mathematics (STEM) educational opportunities for children of servicemembers.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment to clarify the types of students, teachers, and classrooms on which the authorized activities may focus.

We believe there is a national security imperative to support the development of a strong, vibrant STEM workforce that can support Department of Defense (DOD) needs. A Council on Foreign Relations report from March 2012 titled “U.S. Education Reform and National Security”, states the U.S. “shortage of skilled human capital both inflates personnel costs and strains the military’s ability to develop and deploy technologies that can deter sophisticated adversaries.” It further states, “Many U.S. generals caution that too many new enlistees cannot read training manuals for techno-

logically sophisticated equipment. A former head of the Army's Training and Doctrine Command said that the lack of fully qualified young people was "an imminent and menacing threat to our national security."

DOD has a critical requirement to maintain an experienced, high quality, technical workforce. To achieve this, it is necessary to engage at the earliest stages of the STEM pipeline. We note that some research indicates that achieving certain math skills by the eighth grade is a critical determinant for success in STEM fields. For that reason, the committee believes that it is important for DOD to support K-12 STEM education programs, as that supports an increased pipeline of qualified individuals that may pursue university degrees in STEM fields. Excellence in STEM fields is important for the general economic health and competitiveness of the nation, but due to the special security requirements of DOD employees, we believe that DOD's STEM workforce needs are especially acute and will only continue to grow in the future.

Additionally, we note that DOD has a responsibility to ensure proper education is available to military children, and that it is in DOD's interest to promote education programs that benefit both military children and our future national security workforce. We believe that this provision's focus on the communities support for the children of military dependents also increases the likelihood that such STEM-enabled students will go on to national security careers, including military service.

Sense of Congress on helicopter health and usage monitoring system of the Army (sec. 234)

A proposed amendment to the Senate committee-reported bill (amendment number 3567) contained a provision that would express the sense of the Senate on helicopter health and usage monitoring systems.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Preliminary design review of presidential aircraft recapitalization program

The House bill contained a provision (sec. 211) that would require the Secretary of the Air Force to complete a preliminary design review of the presidential aircraft recapitalization (PAR) program prior to receiving a milestone B approval from the Milestone Decision Authority.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We understand that the Air Force plans to develop the PAR acquisition strategy, complete milestone B documentation, continue market research, and develop the Systems Requirements Document through fiscal year 2015. We expect the Air Force to lockdown requirements prior to contract award to ensure the technical integ-

urity of the PAR program prior to Milestone B and to minimize long-term program risks.

Report on thermal injury prevention

The House bill contained a provision (sec. 1068) that would require a report on prevention of thermal injuries to occupants of military vehicles that result from over matching ballistic threats.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We are interested to learn how the Army is aggressively investigating innovative technologies to prevent or mitigate the risks of thermal injury to occupants of combat and tactical vehicles that can result from over matching ballistic threats. Accordingly, we direct the Secretary of the Army to provide, not later than March 31, 2015, a briefing to the Committees on Armed Services of the Senate and House of Representatives on the Army's related technology research and development plans and investment strategies for thermal injury prevention, as well as occupant centric survivability systems in current and future combat and tactical vehicles.

TITLE III—OPERATION AND MAINTENANCE

BUDGET ITEM

Special Operations Forces suicide prevention initiatives

The budget request included \$67.0 million in Operation and Maintenance, defense-wide, to support the United States Special Operations Command (SOCOM) Preservation of the Force and Families (POTFF) program.

The House bill would transfer \$23.3 million to the Defense Health Program's SOCOM Behavioral Health and Warrior Care Management Program.

The Senate committee-reported bill would approve the budget request.

The agreement includes a transfer of \$14.8 million to the SOCOM Behavioral Health and Warrior Care Management Program for additional behavioral health programs and a transfer of \$4.0 million to the Defense Suicide Prevention Office to implement recommendations that result from a review of Department of Defense (DOD) efforts to prevent suicide among members of Special Operations Forces (SOF) and their families, as directed elsewhere in this Act. In addition, the agreement includes the full requested amount of \$7.2 million for the Psychological Performance Program within POTFF.

We recognize the tremendous sacrifices made by the men and women within SOF and their families after more than 12 years of war. We note with concern that suicide rates for SOF have continued to increase since calendar year 2010, and that for the past 2 years, suicide rates within SOF have surpassed those of the military services.

We support the efforts of SOCOM to improve training and awareness related to suicide and plans to expand a pilot peer-to-peer training program. We also support the many service-provided and DOD-wide suicide prevention programs that SOCOM has uti-

lized. While DOD, SOCOM, and the services have taken positive action to address SOF suicide rates, we believe that more must be done to reinforce targeted suicide prevention efforts in addition to holistic SOF resiliency programs.

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 301)

The House bill contained a provision (sec. 301) authorizing appropriations for fiscal year 2015 for the use of the Armed Forces and other activities and agencies of the Department of Defense for expenses, not otherwise provided for, for operation and maintenance, as specified in the funding table in section 4301.

The Senate committee-reported bill contained a similar provision (sec. 301).

The agreement includes the Senate provision.

Subtitle B—Energy and Environment

Elimination of fiscal year limitation on prohibition of payment of fines and penalties from the Environmental Restoration Account, Defense (sec. 311)

The House bill contained a provision (sec. 311) that would eliminate the fiscal year limitations on the prohibition of paying fines and penalties from the Environmental Restoration Account, defense, unless the fine or penalty arose out of an activity funded by that account or was specifically authorized by law.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Nothing in this provision should be construed to change the Department of Defense's obligations to pay penalties or fines, and to do so in a timely fashion.

Method of funding for cooperative agreements under the Sikes Act (sec. 312)

The Senate committee-reported bill contained a provision (sec. 311) that would amend subsection (b) of section 103a of the Sikes Act (section 670c-1 of title 16, United States Code) to allow for lump sum payments for cooperative agreements to cover the future costs of activities provided for under the agreements.

The House bill contained no similar provision.

The agreement includes the provision.

Report on prohibition of disposal of waste in open-air burn pits (sec. 313)

The House bill included a provision (Sec. 312) that would require the combatant commanders to submit a biannual certification to the Committees on Armed Services of the Senate and the House of Representatives that covered waste under the jurisdiction of the commander has not been disposed of in violation of the regulations set forth in section 317 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). This section also prescribes additional details required in instances of noncompliance.

The Senate committee-reported bill did not contain a similar provision.

The agreement includes the House provision with an amendment to direct the Secretary of Defense to provide a report to the congressional defense committees regarding the Department of Defense's (DOD) compliance with applicable Public Law and DOD instructions regarding the disposal of covered waste in burn pits. The provision also requires the Comptroller General of the United States to provide an assessment of the report submitted by the Secretary.

We note with concern that there are a number of instances where compliance with the DOD instructions and public law, with respect to the disposal of covered waste in burn pits, has been called into question. It is our expectation that the Secretary will use this report as an opportunity to address any gaps and take required action, as necessary and appropriate, to ensure education of and strict compliance with the prohibitions on the disposal of covered waste in burn pits.

Business case analysis of any plan to design, refurbish, or construct a biofuel refinery (sec. 314)

The House bill contained a provision (sec. 317) that would require the Department of Defense to obtain a congressional authorization before entering into a contract for the planning, design, refurbishing, or construction of a biofuels refinery.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that no later than 30 days before entering into a contract for the planning, design, refurbishment, or construction of a biofuels refinery, the Secretary of Defense or service secretary concerned, shall submit to the congressional defense committees a business case analysis regarding their intended plan.

Environmental restoration at former Naval Air Station Chincoteague, Virginia (sec. 315)

The House bill contained a provision (sec. 320) that would permit the Secretary of Defense to undertake an environmental restoration project at Wallops Flight Facility, Virginia.

The Senate committee-reported bill contained a similar provision (sec. 312).

The agreement includes the Senate provision with a clarifying amendment.

We note that the Wallops Flight Facility, Virginia includes the Naval Aviation Ordnance Test Station, Virginia. We also note that the Secretary of Defense may undertake this environmental restoration project at Wallops Flight Facility, Virginia, with regard to pollutants or contaminants that are solely attributable to Department of Defense activities while the property was under the administrative jurisdiction of the Secretary of the Navy.

Limitation on availability of funds for procurement of drop-in fuels (sec. 316)

The Senate committee-reported bill contained a provision (sec. 313) that would prohibit Department of Defense (DOD) funds to be used for bulk purchases of drop-in fuel for operational purposes, unless the cost of that drop-in fuel is cost competitive with traditional fuel, subject to a national security waiver.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment that would factor in the fully-burdened cost of fuel.

We note that this provision adds a 30 day notice to the congressional defense committees prior to the purchase of bulk drop-in fuels for operational purposes, if the fully-burdened delivered cost is 10 percent over the fully-burdened market price of traditional fuels available for the same purpose. We also note that large-scale demonstrations count as operational purposes and are covered under this limitation. We expect DOD to not use a unique federal subsidy to buy or purchase down the cost of fuel so it falls below the 10 percent threshold.

Decontamination of a portion of former bombardment area on island of Culebra, Puerto Rico (sec. 317)

The House bill contained a provision (sec. 2818) that would express the sense of Congress that the statutory prohibition on environmental remediation on the island of Culebra, Puerto Rico is a unique anomaly and would lift the statutory restriction for environmental remediation for areas having regular public access by amending section 204(c) of the Military Construction Authorization Act of 1974 (Public Law 93–166).

The Senate committee-reported bill contained a similar provision (sec. 316) that would express the sense of Congress that certain portions of the island of Culebra, Puerto Rico should be available for safe public recreational use and would lift the statutory restriction for environmental remediation for certain identified areas by amending section 204(c) of the Military Construction Authorization Act of 1974 (Public Law 93–166), as well as modifying the restrictions contained within the quitclaim deed.

The agreement includes the Senate provision.

Alternative fuel automobiles (sec. 318)

A proposed amendment to the Senate committee-reported bill (3911) contained a provision that would create incentives for the development of alternative dual-fuel vehicles.

The House bill contained no similar provision.

The agreement includes the Senate provision with modifying amendments.

Subtitle C—Logistics and Sustainment

Modification of quarterly readiness reporting requirement (sec. 321)

The Senate committee-reported bill contained a provision (sec. 322) that would amend section 482 of title 10, United States Code, to update and streamline the Quarterly Readiness Report to Congress (QRRRC).

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We expect the timeliness and delivery of the QRRC to Congress to improve significantly given the efficiencies included in the bill. We note that the executive summaries and narratives—which are derived from the massive data inputs submitted by the military services, defense agencies, and combatant commands—currently captured in the QRRC are very helpful in the exercise of congressional oversight responsibilities.

We strongly urge the Department of Defense (DOD) to move the information captured in Supplement Two of the QRRC to Annex B in order to avoid duplication and maximize efficiency. We also strongly urge DOD to remove Supplement One from future QRRCs as the information therein is readily available in the public domain.

Additional requirement for strategic policy on prepositioning of materiel and equipment (sec. 322)

The House bill contained a provision (sec. 321) that would amend the strategic policy on prepositioned materiel and equipment required by section 2229(a) of title 10, United States Code, to ensure newly established crisis response elements are considered when developing goals, assessing challenges, and synchronizing requirements.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Elimination of authority of Secretary of the Army to abolish arsenals (sec. 323)

The Senate committee-reported bill contained a provision (sec. 323) that would amend section 4532 of title 10, United States Code, the Arsenal Act, and eliminate the ability of the Secretary of the Army to abolish any U.S. arsenal considered to be unnecessary.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would eliminate the ability of the Secretary of the Army to abolish any U.S. arsenal considered to be unnecessary.

We note that it shall be the goal of the Secretary of the Army, in managing the workload of the arsenals, to maintain critical capabilities and ensure cost efficiency and technical competence in peacetime, while preserving the ability to provide an effective and timely response to mobilizations, national defense contingency situations, and other emergent requirements.

We also note that the critical capabilities needed by the Army are currently reflected in the Report to Congress on Critical Manufacturing Capabilities and Capacities dated August 2013. We recognize that they may change over time.

Modification of annual reporting requirement related to prepositioning of materiel and equipment (sec. 324)

The House bill contained a provision (sec. 322) that would modify the yearly reporting requirement in section 321 of the National De-

fense Authorization Act for Fiscal Year 2014 (Public Law 113–66) to continue through 2017, for a total of four reports over 4 years.

The Senate committee-reported bill contained a similar provision (sec. 321) that would amend section 2229(cc) of title 10, United States Code to sunset after 3 years the Comptroller General of the United States’ annual review of the Department of Defense’s progress in implementing its strategic policy and plan for its prepositioned stocks.

The agreement includes the Senate provision.

Subtitle D—Reports

Repeal of annual report on Department of Defense operation and financial support for military museums (sec. 331)

The House bill contained a provision (sec. 331) that would repeal section 489 of title 10, United States Code, which requires the Secretary of Defense to submit annually to Congress a report on Department of Defense operation and financial support for military museums.

The Senate committee-reported bill contained an identical provision (sec. 331).

The agreement includes this provision.

Army assessment of regionally aligned forces (sec. 332)

The House bill contained a provision (sec. 333) that would require the Secretary of the Army to submit a report on the activities, lessons learned, and future plans for regionally aligned forces.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would clarify the required elements of the report.

Subtitle E—Limitations and Extensions of Authority

Limitation on authority to enter into a contract for the sustainment, maintenance, repair, or overhaul of the F117 engine (sec. 341)

The House bill contained a provision (sec. 341) that would prevent the Secretary of the Air Force from entering into a subsequent contract for the sustainment, maintenance, repair, and overhaul of the F117 engine until the Under Secretary of Defense for Acquisition, Technology and Logistics certifies to the congressional defense committees that the Secretary of the Air Force has structured the contract in such a way that provides the Secretary required insight into all aspects of F117 component and subcomponent historical usage, cost, service-life, and supply chain management data sufficient to determine that the Secretary is paying a fair and reasonable price for F117 sustainment as compared to the PW2000 commercial-derivative sustainment price in the private sector. This provision would also allow the Secretary to waive this limitation if the Secretary determines such waiver is in the interests of national security.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would modify the basis upon which the Under Secretary would certify that the Secretary of the Air Force has obtained data sufficient to determine that the Secretary of the Air Force is paying a fair and reasonable price for F117 sustainment, maintenance, repair, or overhaul as compared to the PW2000 commercial-derivative engine sustainment price for sustainment, maintenance, repair, or overhaul in the private sector.

Limitation on establishment of regional Special Operations Forces Coordination Centers (sec. 342)

The Senate committee-reported bill contained a provision (sec. 342) that would prohibit the obligation or expenditure of funds authorized for fiscal year 2015 to establish Regional Special Operations Forces Coordination Centers (RSCC) by U.S. Special Operations Command (SOCOM).

The House bill contained no similar provision.

The agreement includes this provision.

We note that the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) included a similar prohibition and required the Secretary of Defense, in coordination with the Secretary of State, to submit a report on the purpose, cost, and the authorities necessary for the establishment of RSCCs. While the required report was submitted on April 16, 2014, it left a number of questions unanswered related to the long-term funding required to support RSCCs in each geographic combatant command (GCC); the relative funding that would be provided by SOCOM, the GCCs, and the host nation or other participating nations; and coordination with other engagement activities conducted by the GCCs and the Department of State. Additionally, the report states that “[p]roviding confirmed and sustained out-year support is critical to realizing the full potential of an RSCC.” However, the report also identifies additional legislative authorities that would need to be addressed for such “confirmed and sustained” support to occur while indicating “there are currently no plans to seek these additional authorities.”

We believe issues related to funding and authorities need to be resolved before RSCCs are established. We also believe that SOCOM should focus its efforts and resources on supporting regional special operations engagement activities that are hosted in and led by partner nations. For example, we understand that Colombia is working to establish the Centro Regional de Estudios Avanzados de Seguridad (CREAS), that will, among other things, bring together regional special operations forces for educational, training, and other events. We note that the provision described above would not prohibit support to host-nation established regional special operations coordination activities, like CREAS, provided they are consistent with broader military-to-military objectives and coordinated with the Department of State and relevant country teams.

Limitation on transfer of MC-12 aircraft to United States Special Operations Command (sec. 343)

The Senate committee-reported bill contained a provision (sec. 341) that would prohibit the transfer of MC-12 aircraft from the Air Force to U.S. Special Operations Command (SOCOM) for manned intelligence, surveillance, and reconnaissance until the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict, in coordination with the Commander, SOCOM, provides the congressional defense committees with an analysis and justification for such a transfer.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We note that elsewhere in this Act the Department of Defense is provided the authority to use the Counterterrorism Partnership Fund (CTPF) to enhance counterterrorism activities undertaken by the U.S. Armed Forces, including government-owned, contractor-operated (GOCO) capabilities. We believe that the CTPF would be an appropriate source of funding to support additional GOCO operation of MC-12 aircraft in direct support of the intelligence, surveillance, and reconnaissance requirements of U.S. Special Operations Forces.

Further, we note that the budget request included funding in Operation and Maintenance, defense-wide and Procurement, defense-wide to support up to 13 aircraft to be flown by the Air National Guard in support of SOCOM aviation foreign internal defense and intelligence, surveillance, and reconnaissance missions. We note that the limitation included in this provision and the reduction in funding for MC-12 modifications contained elsewhere in the bill do not apply to up to 13 aircraft to be flown by the Air National Guard in support of SOCOM.

Subtitle F—Other Matters

Clarification of authority relating to provision of installation-support services through intergovernmental support agreements (sec. 351)

The House bill contained a provision (sec. 351) that would transfer and redesignate section 2336 of title 10, United States Code, to chapter 159 of such title. This section would also define an intergovernmental support agreement and provide other technical changes.

A proposed amendment to the Senate committee-reported bill (amendment number 3831) contained a similar provision.

The agreement includes the House provision with an amendment that would make clear that the secretary concerned may enter into an intergovernmental support agreement notwithstanding any other provision of law governing the award of federal government contracts for goods and services and that any contract awarded by the Federal Government or a state or local government for installation-support services under an intergovernmental support agreement must be awarded on a competitive basis.

Management of conventional ammunition inventory (sec. 352)

The House bill contained a provision (sec. 353) that would designate an authoritative database on conventional ammunition and broaden the existing military service annual reporting requirements on conventional ammunition.

The Senate committee-reported bill contained a similar provision (sec. 1066) that would require the Comptroller General of the United States to provide a briefing to the congressional defense committees on the management of the conventional ammunition demilitarization stockpile of the Department of Defense (DOD) no later than April 30, 2015.

The agreement includes the House provision with an amendment that would combine the two provisions.

We note that the preferred authoritative source of data for tracking conventional ammunition inventories across DOD is the National Level Ammunition Capability (NLAC). We also expect DOD to issue guidance that ensures NLAC collects and is responsible for disseminating accurate data in cooperation with other service ammunition systems.

LEGISLATIVE PROVISIONS NOT ADOPTED

Increase in funding for civil military programs

The House bill contained a provision (sec. 302) that would increase funding for civil military programs by \$55.0 million over the budget request.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Exclusions from definition of ‘chemical substance’ under Toxic Substances Control Act and report on lead ammunition

The House bill contained a provision (sec. 313) that would amend section 3(2)(B)(v) of the Toxic Substances Control Act (15 U.S. C. 2602(2)(B)(v)) and require a report on costs related to non-lead alternatives for small arms.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The Senate committee-reported bill contained a provision (sec. 314) that would require the Secretary of Defense to submit a report to the congressional defense committees no later than 180 days after the enactment of this Act, on the implementation of section 332 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (P.L. 110–417).

The House bill contained no similar provision.

The agreement does not include the Senate provision.

We direct the Secretary of Defense to submit a report to the congressional defense committees, no later than 180 days after the enactment of this Act, regarding how the Department of Defense (DOD) is considering the operational impact of energy logistics through energy supportability analysis, including but not limited to those factors in section 332 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (P.L. 110–417).

We note that the report shall describe actions to date to consider energy logistics support in the planning, requirements development, and acquisition processes, including the following elements: (1) A description of the process DOD is using to ensure energy supportability has been analyzed and considered during the requirements development and acquisition process; (2) An assessment of how well the Services are implementing the energy supportability analysis; (3) An assessment of how well the Services have incorporated energy into their planning processes; (4) An assessment of the extent to which the energy security requirements of DOD are enhanced by incorporation of section 332 in the requirements and acquisition processes; and (5) recommendations for improvements to section 332 that would enhance energy security and capability.

Comptroller General study of Department of Defense research and development projects and investments to increase energy security and meet energy goals requirements

The Senate committee-reported bill contained a provision (sec. 315) that would direct the Comptroller General of the United States to conduct a review of Department of Defense (DOD) research and development projects and investments to increase energy security and meet renewable energy goals.

The House bill contained no similar provision.

The agreement does not include the provision.

We direct the Comptroller General to conduct a review of the current DOD Annual Energy Management Report. At a minimum, the review shall identify key gaps and shortfalls, if any, in the report. The review shall also include a determination of how the DOD has determined the costs and benefits of a sample of five renewable energy projects per Service where the (1) generating capacity of the projects is over one megawatt; (2) projected life cycle costs of the projects as compared to power generation from conventional sources; and (3) ensured energy security at energy-remote installations in the 50 states and the District of Columbia. The term “energy-remote military installations” means military installations

not connected to an extensive electrical grid. The Comptroller General shall report to the congressional defense committees no later than one year after enactment of this Act.

Congressional notice of bulk purchase of alternative fuels for operational use

The House bill contained a provision (sec. 315) that would require the Secretary of Defense to notify the congressional defense committees 60 days before the bulk purchase of alternative fuels intended for operational use.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the House provision.

Limitation on procurement of biofuels

The House bill contained a provision (sec. 316) that would limit the Department of Defense's ability to purchase or produce biofuels until the earlier of either the date on which the Budget Control Act of 2011 (P.L. 112-25) is no longer in effect, or the date on which the cost of biofuel is equal to the cost of conventional fuels. This section would provide an exception for biofuel test and certification and research and development.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the House provision.

Off-installation Department of Defense natural resources projects compliance with integrated natural resource management plans

The House bill contained a provision (sec. 318) that would amend the Sikes Act (section 670c-1 of title 16, United States Code) to require that funds for the maintenance and improvement of natural resources located off of a military installation or State-owned National Guard installation only be used pursuant to an approved integrated natural resources management plan.

The agreement does not include this provision.

Recommendation on Air Force energy conservation measures

The House bill contained a provision (sec. 319) that would recommend the Secretary of the Air Force take action on energy conservation measures.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the Air Force has undertaken a number of initiatives aimed at improving installation energy efficiency. For example, the Air Force has used the Energy Conservation Investment Program, Energy Savings Performance Contracts, and technologies developed through Installation Energy Test Bed to help meet their facility energy goals and mandates. We encourage the Air Force to continue to make cost-effective investments that enhance combat capability and demonstrate a return on investment.

Prohibition on use of funds to implement certain climate change assessments and reports

The House bill contained a provision (sec. 320A) that would prohibit funds authorized by the fiscal year 2015 National Defense Authorization Act to be used to implement the United States Global Change Research Program National Climate Assessment, the Intergovernmental Panel on Climate Change's Fifth Assessment Report, the United Nation's Agenda 21 sustainable development plan, or the May 2013 Technical Update of the Social Cost of Carbon for Regulatory Impact Analysis Under Executive Order No. 12866.

Limitation on furlough of certain working-capital fund employees

The House bill contained a provision (sec. 342) that would: limit the non-disciplinary furlough of working-capital fund (WCF) employees as long as funds are available to pay for the work performed; require 45 days advance congressional notification of furloughs; and require Secretarial certification that workload will not be transferred to any other sector of the workforce.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We remain concerned about the negative effect furloughs of WCF employees have on military readiness. The furlough of WCF employees when monies and workload are available only delays delivery times and raises rates, costing the taxpayer and reducing military readiness. We understand that the Department of Defense (DOD) faced budget cuts of \$37.0 billion in 2013 due to sequestration, and that as part of its response, it furloughed all civilian employees. These furloughs may have increased costs over the longer-term and caused schedule delays, which negatively affected readiness. Therefore, we urge the Secretary of Defense to consider both the short- and long-term readiness impacts of these furloughs in making management decisions concerning the DOD workforce. Finally, we expect the Secretary to manage future budgets carefully, and to weigh all competing variables when making workforce decisions.

Revised policy on ground combat and camouflage utility uniforms

The Senate committee-reported bill contained a provision (sec. 352) that would amend section 352 of the National Defense Authorization Act for Fiscal Year 2014 (P.L. 113–66) that established a policy that the Secretary of Defense shall eliminate the development and fielding of Armed Forces-specific combat and camouflage utility uniforms and families of uniforms for specific combat environments to be used by all members of the Armed Forces.

The House bill contained no similar provision.

The agreement does not include the Senate provision.

We note that the guidance for the military services and combatant commands required by section 351 of the National Defense Authorization Act for Fiscal Year 2014 (P.L. 113–66) to implement this policy is late and has not yet been delivered. We also note that the implementation plan is also late and necessary to ensure proper implementation of the Department of Defense's guidance to establish and publish joint combat uniform standards and performance criteria.

Sense of Congress on access to training ranges within United States Pacific Command area of responsibility

The House bill contained a provision (sec. 352) that would express the sense of Congress regarding access to training ranges within U.S. Pacific Command's (PACOM) area of responsibility (AOR).

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that access to military training ranges is an essential component of military readiness and that such access is critical to maintaining the technical and operational superiority of the Armed Forces. The 2014 Quadrennial Defense Review states that United States forces in the Asia-Pacific region "will resume regular bilateral and multilateral training exercises, pursue increased training opportunities to improve capabilities and capacity of partner nations, as well as support humanitarian, disaster relief, counterterrorism, and other operations that contribute to the stability of the

region.” While training ranges exist within PACOM’s AOR, we note that the tyranny of distance in the Asia-Pacific region presents a number of challenges, including the transportation of equipment and personnel to the various training ranges. We believe the Department of Defense should take appropriate action to ensure that members of the Armed Forces continue to have reliable access to military training ranges and take appropriate steps to improve accessibility to military training areas within PACOM’s AOR.

The Senate committee-reported bill contained a provision (sec. 353) that would have created southern sea otter military readiness areas and repealed Public Law 99–625 (16 U.S.C. 1536 note).

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

Subtitle A—Pay and Allowances

No fiscal year 2015 increase in basic pay for general and flag officers (sec. 601)

The House bill contained a provision (sec. 602) that would freeze the monthly basic pay for all general and flag officers, including for those whose monthly basic pay is limited to the rate of pay for level II of the Executive Schedule.

The Senate committee-reported bill contained an identical provision (sec. 604).

The provision would also provide pay parity for the senior enlisted advisor to the Chief of the National Guard Bureau with the senior enlisted advisors of the Armed Forces. The changes made by this provision would be prospective to the date of enactment of this Act.

The House bill contained no similar provision.

The agreement includes this provision.

Modification of computation of basic allowance for housing inside the United States (sec. 604)

The Senate committee-reported bill contained a provision (sec. 603) that would amend section 403(b) of title 37, United States Code, to revise the method by which the monthly amount of the basic allowance for housing (BAH) is determined by authorizing the Secretary of Defense to reduce the monthly amount by up to 5 percent of the national average for housing for a given pay grade and dependency status.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would authorize the Secretary to reduce the monthly amount of BAH by up to 1 percent of the national average for housing for a given pay grade and dependency status. Servicemembers would not see any reduction in their BAH until they undergo a permanent change of duty station. This provision would not apply to veterans benefits paid under title 38, United States Code. This provision would require the Secretary of Veterans Affairs to pay the appropriate veterans benefits under title 38, United States Code, as the Secretary would otherwise have issued those benefits without regard to changes made to the BAH under this section.

We note that while the Department of Defense (DOD) legislative proposal included proposed changes to BAH that would have been implemented over the next 3 years, this agreement includes those changes to BAH that the committees understand would have been implemented by DOD in 2015. By adopting changes to BAH beginning in the first year of the proposal, the agreement preserves the option for Congress to achieve the full savings requested by DOD.

This approach does not constitute a rejection of the administration proposal, which was endorsed by the Joint Chiefs of Staff. Rather, consideration of further changes to BAH in fiscal years 2016, 2017, and beyond is deferred until after the committees receive the report of the Military Compensation and Retirement Modernization Commission, which is due in February 2015. The two committees commit to consider proposed changes to BAH that are included in the fiscal year 2016 budget request as part of the consideration of the National Defense Authorization Act for Fiscal Year 2016.

We note that if sequestration-level budgets remain in effect for fiscal year 2016 and beyond, DOD will need to make painful cuts

and achieve substantial savings across its entire budget in order to avoid an unacceptable reduction in readiness of the Armed Forces of the United States. The Chiefs have urged us to take all action necessary, including compensation adjustments, to avoid such readiness impacts.

The Committees on Armed Services of the Senate and the House of Representatives intend to work with the Committees on Veterans' Affairs of the Senate and the House of Representatives next year in an effort to harmonize BAH rates paid by the Department of Defense and by the Department of Veterans' Affairs.

This aligns the dependent status determination with the date on which transitional compensation payments begin under that section in these cases.

The Senate committee-reported bill contained a similar provision (sec. 624).

The agreement includes the Senate provision.

Modification of determination of retired pay base for officers retired in general and flag officer grades (sec. 622)

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

This change to section 2942 of title 10 and the implementation of the food transformation program should not result in the loss of employment pursuant to the Javits-Wagner-O'Day Act (41 U.S.C. 8501 et seq.).

However, we are concerned with the lack of regulatory guidance on the application of the Javits-Wagner-O'Day Act (41 U.S.C. 8501 et seq.) and Randolph-Sheppard Act (20 U.S.C. 107 et seq.) to military dining facilities. We previously sought to resolve this longstanding issue by requiring a Joint Policy Statement in section 848 of Public Law 109–163 and enacting a permanent “no-poaching” provision in section 856 of Public Law 109–364. However, without complementary regulations to implement the Joint Policy Statement, confusion remains on when to apply the two acts, particu-

larly with regard to new contracts that are not covered by section 856 of Public Law 109–364.

Pursuant to the Joint Policy Statement, the Randolph-Sheppard Act applies to contracts for the operation of a military dining facility, or full food services, and the Javits-Wagner-O'Day Act applies to contracts and subcontracts for dining support services, or dining facility attendant services, for the operation of a military dining facility.

Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall prescribe implementing regulations for the application of the two acts to military dining facilities. Such regulations shall implement the Joint Policy Statement and specifically address DOD contracts that are not covered by section 856 of Public Law 109–364.

Competitive pricing of legal consumer tobacco products sold in Department of Defense retail stores (sec. 633)

The House bill contained a provision (sec. 633) that would prohibit the Secretary of Defense and the service secretaries from taking any action to implement any new policy that would limit, restrict, or ban the sale of any legal consumer product category sold as of January 1, 2014, in the defense commissary system or exchange stores system on any military installation, domestically or overseas, or on any Department of Defense vessel at sea.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to issue regulations regarding the pricing of tobacco and tobacco-related products sold in an outlet of the defense retail systems inside the United States, including territories and possessions of the United States, to prohibit the sale of a product at a price below the most competitive price for that product in the local community. The provision would also require the regulations to direct that the price of these products sold in an outlet of the defense retail systems outside of the United States shall be within the range of prices established for the product in outlets of the defense retail systems inside the United States.

Review of management, food, and pricing options for defense commissary system (sec. 634)

We note that the President has exercised his authority under section 1009(e) of title 37, United States Code, to implement an alternative across-the-board pay raise for members of the uniformed services for calendar year 2015 of 1 percent rather than the 1.8 percent that would otherwise be required under subsection (a) of section 1009.

TITLE VII—HEALTH CARE PROVISIONS

Subtitle A—Tricare and Other Health Care Benefits

Mental health assessments for members of the Armed Forces (sec. 701)

The House bill contained a provision (sec. 701) that would amend section 1074m of title 10, United States Code, to require the Secretary of Defense to provide person-to-person mental health screenings once during each 180-day period in which a servicemember is deployed.

The Senate committee-reported bill contained a provision (sec. 701) that would require the Secretary to provide a person-to-person mental health assessment for Active Duty and Selected Reserve members each year. The Secretary may provide such assessments in conjunction with annual periodic health assessments or pre- or post-deployment health assessments. In addition, the provision would require the Secretary to submit an annual report on the tools and processes used to provide the assessments.

The agreement includes the Senate provision with an amendment that would require the Secretary to provide a person-to-person mental health assessment for Active Duty and Selected Reserve members each year (such assessments may be provided in conjunction with annual periodic health assessments or pre- or post-deployment health assessments) and to submit a report to the Committees on Armed Services of the Senate and the House of Representatives on the tools and processes used to provide the assessments. The amendment would also require the Secretary, through 2018, to provide person-to-person mental health screenings once during each 180-day period in which a member is deployed.

Modifications of cost-sharing and other requirements for the TRICARE Pharmacy Benefits Program (sec. 702)

The Senate committee-reported bill contained a provision (sec. 702) that would amend section 1074g of title 10, United States Code, to modify the TRICARE pharmacy benefits program by specifying that non-formulary prescriptions would be available through the national mail-order pharmacy program, establishing prescription copayments from 2015 through 2024, and requiring that non-generic prescription maintenance medications be refilled through military treatment facility pharmacies or the national mail-order pharmacy program.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would make the provision specifying that non-formulary prescriptions would be available through the national mail-order pharmacy program and the provision requiring that non-generic prescription maintenance medications be refilled through military treatment facility pharmacies or the national mail-order pharmacy program beginning on October 1, 2015. The agreement also modifies prescription copayments beginning in 2015.

We note that while the Department of Defense (DOD) legislative proposal included proposed changes to the TRICARE pharmaceutical co-pays for fiscal years 2015 through 2024, this agreement includes changes beginning in fiscal year 2015. By adopting co-payment changes beginning the first year of the proposal, the agreement preserves the option for Congress to achieve most of the savings requested by DOD.

This approach does not constitute a rejection of the DOD proposal, which was endorsed by the Joint Chiefs of Staff. Rather, consideration of further changes to co-pays is deferred until after the committees receive the report of the Military Compensation and Retirement Modernization Commission, which is due in February 2015. The two committees commit to consider proposed changes to co-pays that are included in the FY 2016 budget request as part of the consideration of the National Defense Authorization Act for Fiscal Year 2016.

We note that if sequestration-level budgets remain in effect for Fiscal Year 2016 and beyond, DOD will need to make painful cuts and achieve substantial savings across its entire budget in order to avoid an unacceptable reduction in readiness of the Armed Forces of the United States.

Elimination of inpatient day limits and other limits in provision of mental health services (sec. 703)

The Senate committee-reported bill contained a provision (sec. 703) that would amend section 1079 of title 10, United States Code, to remove limits on inpatient mental health services, removing a potential barrier to receipt of mental health care that does not exist for other medical and surgical care.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would amend chapter 55 of Title 10, United States Code, to authorize the Secretary of Defense, acting through the Assistant Secretary of Defense for Health Affairs, to provide provisional coverage for the provision of a service or supply if the Secretary determines that such service or supply is widely recognized in the United States as being safe and effective.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to provide TRICARE beneficiaries with notice if any significant changes are made in the

structure of or benefits provided under the TRICARE program or in beneficiary cost-share rates of more than 20 percent.

Surveys on continued viability of TRICARE Standard and TRICARE Extra (sec. 712)

The House bill contained a provision (sec. 712) that would change the frequency of the reports of the reviews submitted to Congress by the Comptroller General of the United States regarding the processes, procedures, and analysis used by the Department of Defense (DOD) to determine the adequacy of the number of health care providers who accept TRICARE Standard and TRICARE Extra. The Comptroller General would report on reviews during 2017, 2020, and at such other times as requested by the Comptroller General or the Committees on Armed Services of the Senate and the House of Representatives.

The Senate committee-reported bill contained a provision (sec. 707) that would repeal the requirement for ongoing Comptroller General review of the processes, procedures, and analysis used by DOD to determine health care and mental health care provider acceptance of the TRICARE Standard and TRICARE Extra benefit.

The agreement includes the House provision with an amendment that would change the frequency of the reports of the reviews submitted to Congress by the Comptroller General regarding the processes, procedures, and analysis used by DOD to determine the adequacy of the number of health care providers who accept TRICARE Standard and TRICARE Extra. The report would include the study data, for a 12-year period, used by the Secretary and the results of the study with regard to recommendations to restructure or realign military medical treatment facilities. Further, the provision would require the Comptroller General of the United States, not later than 180 days after the Secretary submits the report required, to submit a report to the congressional defense committees on the report submitted by the Secretary of Defense, to include an assessment of the study methodology and data used by the Secretary. The Secretary would be prohibited from realigning or restructuring a military medical treatment facility until 120 days following the date the Comptroller General is required to submit the report.

The Senate committee-reported bill contained a provision (sec. 736) that would require the Comptroller General of the United States to submit a report assessing the Military Health System Modernization Study of DOD to the Committees on Armed Services of the Senate and the House of Representatives not later than 180 days after the date of enactment of this Act.

A proposed amendment to the Senate committee-reported bill (amendment number SA3901) contained a provision that would in-

clude in the Senate provision Comptroller General report elements requiring the Comptroller General, with respect to each military medical treatment facility covered by the modernization study, to assess whether the Secretary of Defense consulted with the appropriate training directorate, training and doctrine command, and forces command of the military department concerned with respect to the frequency of high-tempo, live-fire military operations at such training centers; and assess the capacity of each medical facility in the surrounding area of a major military training center to treat battlefield related injuries, including whether such facility has a helipad capable of receiving medical evacuation airlift patients arriving from the primary evacuation aircraft platform used by such training center.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to submit a report to the congressional defense committees on the Military Medical Treatment Facility Modernization Study directed by the Resource Management Decision of DOD MP-D-01. The report would include the study data, for a 6-year period, used by the Secretary and the results of the study with regard to recommendations to restructure or realign military medical treatment facilities, as well as assessments of whether the military medical treatment facilities included in the modernization study have a helipad capable of receiving medical evacuation airlift patients arriving on the primary evacuation aircraft platform for the military installation served; and whether the Secretary consulted with the appropriate training directorate, training and doctrine command, and forces command of the military department concerned with respect to the frequency of high-tempo, live-fire military operations, and treating battlefield-like injuries, at locations that serve as military training centers. Further, the provision would require the Comptroller General of the United States, not later than 180 days after the Secretary submits the report required, to submit a report to the congressional defense committees on the report submitted by the Secretary of Defense, to include an assessment of the study methodology and data used by the Secretary. The Secretary would be prohibited from realigning or restructuring a military medical treatment facility based on the modernization study until 90 days following the date the Comptroller General is required to submit the report.

LEGISLATIVE PROVISIONS NOT ADOPTED

Behavioral health treatment of developmental disabilities under the TRICARE program

The House bill contained a provision (sec. 704) that would amend section 1077 of title 10, United States Code, to authorize behavioral health treatment, including applied behavior analysis (ABA) therapy, for all developmental disabilities as defined by section 15002(8) of title 42, United States Code, including autism spectrum disorders, when prescribed by a physician or psychologist to be covered under the basic TRICARE program for certain beneficiaries.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that in July of this year the Department of Defense consolidated its three preexisting programs that provided ABA therapy for beneficiaries with autism spectrum disorder into its TRICARE Comprehensive Autism Care Demonstration program. This consolidation included a pilot program mandated by Congress in section 705 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), which provided an ABA therapy reinforcement benefit for family members of retirees. The Department of Defense is required to provide the Committees on Armed Services of the Senate and the House of Representatives with a report on the results of that pilot program, to include recommendations with regard to beneficiary cost-shares for the benefit. This report is expected in early 2015.

Cooperative health care agreements between the military departments and non-military health care entities

Limitation on transfer or elimination of graduate medical education billets

The House bill contained a provision (sec. 713) that would prohibit the Secretary of Defense from transferring or eliminating a graduate medical education billet from a military medical treatment facility unless the Secretary conducts a review of at least 2 years of the implementation of the reform of the administration of the Military Health System, examines recruiting and retention of

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Department of Defense Medicare-Eligible Retiree Health Care Fund matters

The Senate committee-reported bill contained a provision (sec. 721) that would amend sections 1111, 1113, 1115, and 1116 of title 10, United States Code, to modify the method by which the Federal Government makes accrual payments into the Department of Defense Medicare-Eligible Retiree Health Care Fund (Fund), by changing from a lump sum Treasury payment at the beginning of a fiscal year to monthly payments by the military services out of military personnel accounts, and would authorize the Secretary of Defense to change the actuarial determination required by section 1115 of title 10, United States Code, in the event Congress enacts significant benefit changes after such determination was made.

The House bill contained no similar provision.

The agreement does not include this provision.

For the last several years, the Department of Defense (DOD) has proposed legislation that, if enacted, would reduce its annual contribution to the Fund. These proposals have come as part of the administration's budget submission, and DOD continues to assume discretionary savings in its budget that are tied to enactment of these proposals, despite the fact that (1) there is no guarantee that Congress will support the proposals, and (2) even if Congress were to support such proposals, the timing of the annual contribution to the Fund precludes DOD from realizing discretionary savings in the year of execution, unless the annual defense bill is passed and signed by the President prior to October 1st. We find this practice of assuming savings disingenuous at worst, and short-sighted and impractical at best.

Until a method is devised for DOD to realize year-of-execution savings with respect to its contributions to the Fund, we strongly urge DOD to cease its practice of assuming year-of-execution discretionary savings from legislative proposals that effect outlays from the Fund. Such practice leaves DOD with military personnel funding shortfalls even if Congress supports legislative proposals that yield short-term discretionary savings.

Research regarding Alzheimer's disease

The House bill contained a provision (sec. 723) that would authorize the Secretary of Defense to carry out research, development, test, and evaluation activities with respect to Alzheimer's disease.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We direct the Secretary of Defense to provide, not later than 60 days after the date of the enactment of this Act, a briefing to the Committees on Armed Services of the Senate and the House of Representatives on the process used by DHA to collect payments from non-DOD hospitals, to include a list of each hospital that is more than 90 days in arrears in payments to the Secretary, including the amount of arrears by 30-day increments for each such hospital.

Research regarding breast cancer

The House bill contained a provision (sec. 729) that would require the Secretary of Defense to implement the recommendations of the Interagency Breast Cancer and Environmental Research Coordinating Committee (IBCERCC) to prioritize prevention and increase the study of chemical and physical factors in breast cancer.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the Department of Defense Breast Cancer Research Program (BCRP) has implemented recommendations of the IBCERCC and has prioritized primary prevention as one of the BCRP's ten overarching challenges. In addition, the study of chemical and physical factors in primary prevention is one of several recommendations made by the IBCERCC to address the primary prevention of breast cancer. The intent of the program is to enable researchers to submit proposals that address any of the overarching challenges.

Sense of Congress regarding access to mental health services by members of the armed forces

The House bill contained a provision (sec. 730) that would express the sense of Congress that servicemembers should have adequate access to the mental health care and support that they need, that public-private mental health partnerships can provide the Department of Defense (DOD) with enhanced capability to treat servicemembers, and that DOD should fully implement the pilot program authorized under section 706 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239).

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Evaluation of wounded warrior care and transition program

The House bill contained a provision (sec. 731) that would require the Secretary of Defense to enter into a contract with a private organization to evaluate the wounded warrior care and transition program of the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Report on military family planning programs of the Department of Defense

The Senate committee-reported bill contained a provision (sec. 731) that would require the Secretary of Defense to conduct a comprehensive study of the access of servicemembers and certain military dependents to methods of contraception approved by the Food and Drug Administration, contraception counseling, and related education, and to submit to the Committees on Armed Services of the Senate and the House of Representatives a report of the findings of this study no later than 180 days after the date of enactment of this Act.

The House bill contained no similar provision.

The agreement does not include this provision.

Interagency working group on the provision of mental health services to members of the National Guard and the Reserves

The Senate committee-reported bill contained a provision (sec. 732) that would require the Secretary of Defense to convene an interagency working group to review and recommend collaborative approaches to improving the provision of mental health services to members of the National Guard and Reserves and to submit a report on the findings and recommendations of the interagency working group to the appropriate congressional committees not later than 1 year after the date of the enactment of this Act.

The House bill contained no similar provision.

The agreement does not include this provision.

Primary blast injury research

The House bill contained a provision (sec. 733) that would require the Psychological Health and Traumatic Brain Injury Research Program, a congressionally directed medical research program, to conduct a study on blast injury mechanics.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Report on Department of Defense support of members of the armed forces who experience traumatic injury as a result of vaccinations required by the Department

The Senate committee-reported bill contained a provision (sec. 735) that would require the Secretary of Defense, in consultation with the secretaries of the military departments, to report on the adequacy and effectiveness of the policies, procedures, and systems of the Department of Defense (DOD) in providing support to

servicemembers who experience traumatic injury as a result of a vaccination required by DOD.

The House bill contained no similar provision.

The agreement does not include this provision.

Sense of Congress on use of hyperbaric oxygen therapy to treat traumatic brain injury and post-traumatic stress disorder

The House bill contained a provision (sec. 735) that would express the sense of Congress that hyperbaric oxygen therapy can be used to treat servicemembers for traumatic brain injury and post-traumatic stress disorder and that the Secretary of Defense should increase awareness among servicemembers and military doctors of hyperbaric oxygen therapy treatments.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

Subtitle A—Acquisition Policy and Management

Modular open systems approaches in acquisition programs (sec. 801)

The Senate committee-reported bill contained a provision (sec. 801) that would require the Department of Defense (DOD) to adopt an open systems approach to Major Defense Acquisition Programs and Major Automated Information Systems, and to other programs the primary purpose of which is the acquisition of an information technology (IT) system, entering the acquisition process after January 1, 2016. The committee believes that a comprehensive open systems approach is an important component of IT acquisition reform.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

The provision requires the Under Secretary of Defense for Acquisition, Technology and Logistics to develop standards and define architectures necessary to enable open systems approaches in key mission areas of DOD.

The Under Secretary is further required to review and update guidance to ensure that acquisition programs use open system approaches in the product design and acquisition of information technology systems to the maximum extent practicable and to detail in the contract file reasons why any system is not an open system.

Finally, the provision requires the Under Secretary to identify legacy information technology systems that are not utilizing an open systems approach and outline a process for potential conversion to an open systems approach.

Recharacterization of changes to Major Automated Information System programs (sec. 802)

The Senate committee-reported bill contained a provision (sec. 802) that would modify requirements applicable to a Major Auto-

mated Information System program that fails to achieve a full deployment decision within 5 years after the Milestone A decision or selection of the preferred alternative for the program.

In lieu of a critical change report, failure to achieve a full deployment decision within 5 years would be determined to be a significant change with the attendant notification to the congressional defense committees required for all significant changes.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Amendments relating to defense business systems (sec. 803)

The Senate committee-reported bill contained a provision (sec. 803) that would require business process reengineering (BPR) before milestone decisions for the Major Automated Information System program.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We continue to be concerned that BPR is not being conducted rigorously enough, or documented well enough, to drive successful information technology acquisition outcomes.

We believe that the Department of Defense (DOD) is too often lackadaisical in its attempts at BPR or the results are misaligned to the budgeting, requirements and acquisition processes to have any significant effect on the outcome. BPR must happen early and upfront, well before the requirements and acquisition community get involved in order to inform their work.

As we have observed, and as industry has indicated to us as part of our acquisition improvement efforts, it is important to clearly articulate the desired outcomes of information technology (IT) system acquisitions with input from the user community. That should happen after business processes have been analyzed, and if necessary restructured, to ensure the way an organization does business drives the system, not the other way around. Aligning the IT acquisition strategy to the mission goals of the organization is necessary to get the maximum return-on-investment from a system, but that cannot happen without leadership to drive and enforce organizational change.

We believe that the requirement to do formal process mapping as part of the milestone decision approval process will help, but is only one step, in a larger effort to improve the information technology management of DOD.

We believe there are a number of ways that DOD could improve BPR. For example, expanding the investment review process for IT systems and empowering the Deputy Chief Management Officer (DCMO) to conduct BPR for other IT mission areas within DOD warrants consideration in the future.

Additionally, we believe that the process improvement officers of DOD and the military departments should work with their respective Chief Information Officers to create metrics to track progress and BPR, as well as meeting the other strategic management objectives of DOD.

We note that there are many scientific and technical personnel within DOD's research, development, test and evaluation commu-

nity that could be more actively engaged to create a rigorous, scientific process for conducting BPR.

Report on implementation of acquisition process for information technology systems (sec. 804)

The Senate committee-reported bill contained a provision (sec. 805) that would require the Under Secretary of Defense (Acquisition, Technology, & Logistics) to submit a report to the congressional defense committees on the implementation of the acquisition process for information technology detailing the applicable implementing regulations, instructions, or policies.

The report shall also explain any legislative criteria not yet implemented and a schedule for implementing such criteria along with any proposed deviations.

The House bill contained no similar provision.

The agreement includes the Senate provision.

We are concerned with the Department of Defense's (DOD) ability to effectively acquire information technology (IT) resources. We believe that part of the challenge that DOD faces is in its reliance on processes that are too heavily focused on the acquisition of militarily unique hardware systems. We recognize that the paradigm for IT acquisition is rooted more firmly in the commercial marketplace. As a consumer of commercially developed solutions, rather than a generator of unique requirements, DOD follows commercial trends more often than it leads them.

Unfortunately, we believe that DOD has not done enough to come to terms with this trend, choosing instead to act as though it has the same power to influence computing and electronics markets as it did for most of the 20th century. Though numerous studies have indicated a need to change acquisition processes within DOD to adjust to the reality of 21st century commercial IT markets, DOD has made little progress. Ideas such as agile development, the use of clear requirements tied to software development timelines, rethinking the processes for capital planning and investment, and the application of system audits and risk management to enhance outcomes are prevalent within the commercial sector, but often face resistance and hostility from government program managers and contracting officers.

Section 804 of the National Defense Authorization Act of Fiscal Year 2012 (Public Law 111-84) authorized DOD to implement a new acquisition process for IT systems, but to date, we have seen little tangible action to take advantage of those new authorities. We believe that DOD needs to do more to show tangible progress in its efforts at improving IT acquisition, especially as software-intensive IT systems continue to become more prominent components of U.S. military capability.

Subtitle B—Amendments to General Contracting Authorities,
Procedures, and Limitations

Extension and modification of contract authority for advanced component development and prototype units (sec. 811)

The House bill contained a provision (sec. 802) that would extend existing statutory authority under subsection (b)(4) of section 819

of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84) until September 30, 2019.

The Senate committee-reported bill contained a similar provision (sec. 822).

The agreement includes the Senate provision.

Amendments relating to authority of the Defense Advanced Research Projects Agency to carry out certain prototype projects (sec. 812)

The House bill included a provision (section 803) which would amend section 845(a)(1) of The National Defense Authorization Act for Fiscal Year 1994 (Public Law 103–160) to broaden the definition for the types of efforts for which other transactions authority might be used by the Defense Advanced Research Projects Agency.

The Senate committee-reported bill included no similar provision.

The agreement includes the House provision with an amendment that makes technical changes to the use of other transactions authority.

Extension of limitation on aggregate annual amount available for contract services (sec. 813)

The House bill contained a provision (sec. 804) that would extend for 1 year the cap on the aggregate annual amount spent on contracts for services through fiscal year 2015.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

We note that the Government Accountability Office (GAO) has stated that the military departments and defense agencies generally have not developed plans to use the inventory of contracted services, mandated since 2008 in section 2330a of title 10, United States Code, to facilitate the Department of Defense’s (DOD) strategic workforce planning, workforce mix, budget decision-making processes, and contract execution and oversight.

Further, GAO found that components may not have fully identified, as required by section 2330a of title 10, United States Code, all instances in which contractors are providing services that are inherently governmental, closely associated with inherently governmental functions, staff augmentation, or personal services, the latter of which we note are prohibited by law.

According to GAO, a key factor inhibiting the components’ inventory review is a lack of accurate and reliable data, which we note the inventory could provide if the components were to implement DOD-wide a common data system based on the Army’s existing system as directed by existing DOD guidance.

In the absence of a plan of action with milestones and timeframes to establish a common data system to collect contractor manpower data, we are leaving the caps on contractor spending in place for fiscal year 2015.

Improvement in defense design-build construction process (sec. 814)

The House bill contained a provision (sec. 805) that would amend section 3309 of title 41, United States Code, and section 2305a of title 10, United States Code, by limiting the maximum number

specified in the solicitation for a design-build contract. Additionally, this provision would require the head of an agency awarding a contract pursuant to this provision to provide a report to the Director of the Office of Management and Budget.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would limit application of the provision to section 2305a of title 10, United States Code, and, for contracts greater than \$4.0 million, limit the maximum number of offerors specified in the solicitation for a two-phase design-build contract, unless a higher number is approved by the head of a contracting activity.

Permanent authority for use of simplified acquisition procedures for certain commercial items (sec. 815)

The House bill contained a provision (sec. 806) that would make the authority for use of simplified acquisition procedures for certain commercial items permanent.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Restatement and revision of requirements applicable to multiyear defense acquisitions to be specifically authorized by law (sec. 816)

The Senate committee-reported bill contained a provision (sec. 821) that would clarify and reorganize the reporting and certification requirements of the Department of Defense when requesting specific authorization for multiyear contract authority.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment clarifying when certain cost estimates should be performed.

Sourcing requirements related to avoiding counterfeit electronic parts (sec. 817)

The Senate committee-reported bill contained a provision (sec. 824) that would clarify sourcing requirements related to avoiding counterfeit electronic parts.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Amendments to Proof of Concept Commercialization Pilot Program (sec. 818)

The House bill included a provision (section 829) which would modify the Small Business Act (section 638 of title 15, United States Code) to require each agency carrying out a Small Business Technology Transfer program to support innovative approaches to technology transfer at institutions of higher education, based on the pilot program established under section 5127 of the National Defense Authorization Act for fiscal Year 2012 (Public Law 112-81).

The Senate committee-reported bill included no similar provision.

The agreement includes the House provision with an amendment that makes technical amendments to section 1603 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), which provides authority for the DOD to fund commercialization proof of concept centers.

We note that there is commercialization potential in the research activities ongoing in universities, small businesses, and defense labs. Transition of promising research results into fielded defense systems or commercially successful enterprises is a benefit to both DOD and the nation as a whole.

We note that the Senate committee-reported Defense Appropriations Act for Fiscal Year 2015 (H.R. 4870 and Senate report 113–211) encouraged DOD to expand efforts at commercialization of technologies, especially those derived from research at the DOD laboratories. We encourage the Assistant Secretary of Defense for Research and Engineering to work with the Congress to identify appropriate funding to support the commercialization activities envisioned in that bill, as well as those authorized by this provision.

Subtitle C—Industrial Base Matters

Temporary extension of and amendments to test program for negotiation of comprehensive small business subcontracting plans (sec. 821)

The House bill contained a provision (sec. 811) that would modify and extend the test program for negotiation of comprehensive small business subcontracting plans authorized by section 402 of the Small Business Administration Reauthorization and Amendments Act of 1990 (Public Law 101–574).

The Senate committee-reported bill contained a similar provision (sec. 823).

The agreement includes the House provision with a technical amendment.

Plan for improving data on bundled or consolidated contracts (sec. 822)

The House bill contained a provision (sec. 813) that would amend section 644 of title 15, United States Code, by requiring the Small Business Administration to work with other agencies to create and implement a data quality improvement plan to promote greater accuracy, transparency, and accountability in the reporting of contract bundling and consolidation.

The committee recognizes that properly labeling a contract as bundled or consolidated is important to small business competition, as the process of contract labeling triggers a series of reviews and mitigation steps that promote opportunities for small business.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We direct the Comptroller General of the United States to assess whether contracts are being identified properly as bundled or consolidated. The review shall examine a statistically significant sample of contracts awarded by the Departments of Defense (DOD),

Energy, Health and Human Services, Homeland Security, Veterans Affairs, the General Services Administration, National Aeronautics and Space Administration and the Small Business Administration with values above \$10.0 million in sectors 23, 33, 54, and 56 as defined by the North American Industry Classification System.

Not later than October 1, 2015, the Comptroller General shall provide an interim briefing to the House and Senate Committees on Armed Services, the Senate Committee on Small Business and Entrepreneurship, and the House Committee on Small Business with a summary of findings, including an assessment of (1) the quality of data reported pertaining to contract bundling and consolidation, and (2) interim recommendations, if any, to improve current data collection and dissemination on contract bundling and consolidation.

In the final report, the Comptroller General shall evaluate (1) the pros and cons of implementing government-wide the “Federal Procurement Data System (FPDS) Contract Reporting Data Improvement Plan” published by DOD on January 12, 2010; (2) the plan proposed by the Small Business Administration under this section; and (3) whether other alternatives should be considered to improve reporting of bundled and consolidated contracts without requiring modification to FPDS.

Finally, the Comptroller General shall examine whether government-wide strategic sourcing vehicles are reducing the number of companies, including small business concerns, that are actively participating in the federal procurement system as prime contractors, and whether this reduction poses substantial risk to the industrial base.

The final report shall be delivered to the House and Senate Committees on Armed Services, the Senate Committee on Small Business and Entrepreneurship, and the House Committee on Small Business not later than October 1, 2017.

Authority to provide education to small businesses on certain requirements of Arms Export Control Act (sec. 823)

The House bill contained a provision (sec. 814) that would amend section 21(c)(1) of the Small Business Act (section 648(c)(1) of title 15, United States Code) by including a requirement that applicants receiving grants pursuant to that section shall also assist small businesses by providing, where appropriate, education on the requirements applicable to small businesses under the regulations issued pursuant to the Arms Export Control Act (chapter 39 of title 22, United States Code) and on compliance with those requirements. The provision would also amend section 2418 of title 10, United States Code, by expanding the Procurement Technical Assistance Program to assist small business concerns with education related to export controls.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Matters relating to reverse auctions (sec. 824)

The House bill contained a provision (sec. 815) that would amend the Small Business Act (15 U.S.C. 631) to prohibit the use of reverse auctions for procurement of certain goods and services if the contract is awarded using a Small Business Act procurement authority.

It would also limit the use of reverse auctions in cases where only one offer was received or where offerors do not have the ability to submit revised bids throughout the course of the auction.

The section further clarified that the desire to use a reverse auction does not obviate federal agencies from the obligation to use a Small Business Act procurement authority.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We note that in conducting reverse auctions, buyers have the ability to cancel an auction at any time before the auction closes or to make the decision not to make any award after the auction closes with proper justification in accordance with the terms and conditions of the solicitation and all applicable regulations.

The agreement also prohibits the use of reverse auctions for military construction projects that require a specific congressional authorization.

Sole source contracts for small business concerns owned and controlled by women (sec. 825)

The House bill contained a provision (sec. 827) that would allow for sole source contracting to certain women owned small businesses.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

*Subtitle D—Federal Information Technology Acquisition Reform**Chief Information Officer authority enhancements (sec. 831)*

The House bill contained a provision (sec. 5101) that would strengthen various agencies' Chief Information Officer positions.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Enhanced transparency and improved risk management in information technology investments (sec. 832)

The House bill contained a provision (sec. 5505) that would enhance transparency in information technology investments.

The Senate committee-reported bill contained no similar provision.

The agreement contains the House provision with a clarifying amendment.

Portfolio review (sec. 833)

The House bill contained a provision (sec. 5301) that would inventory information technology software assets.

The Senate committee-reported bill contained no similar provision.

The agreement contains the House provision with a clarifying amendment.

Federal data center consolidation initiative (sec. 834)

The House bill contained a provision (sec. 5203) that would provide for the consolidation of federal data centers.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We believe that the Department of Defense (DOD) has made significant strides in consolidating its data center infrastructure, by maturing its process for evaluating data centers as well as finding opportunities to leverage commercial cloud computing capabilities. However, as both savings and efficiencies from data center consolidation reach a point of diminishing returns, we believe that DOD can continue to make further progress by also integrating efforts to assess the applications that run on this infrastructure to determine which require dedicated servers and which can potentially be migrated to virtualized or cloud environments.

We believe that software application rationalization and consolidation is a natural extension of, and next step in, data center consolidation. Reducing the data center footprint eliminates unneeded infrastructure, but software application rationalization is needed to more efficiently utilize the infrastructure that remains, and to better determine if any further data center consolidation may or may not be warranted.

Therefore, we direct the Chief Information Office of DOD, in consultation with the Chief Information Officers of the military departments, to carry out an assessment to identify and prioritize the software applications in use throughout DOD that should be considered for migration to a cloud computing environment and to submit a report on the results of the assessment to the Committees on Armed Services of the Senate and House of Representatives by December 15, 2015. This assessment should include the following:

- (1) Whether each of the software applications used by DOD can be readily transitioned to a cloud computing environment with minimal additional investment of developmental funding;
- (2) If a software application used by DOD cannot be readily transitioned to a cloud computing environment, the cost and time required to enable, either by modification or replacement, the operation of the software application in a cloud computing environment;
- (3) Whether it would be cost-effective to enable, either by modification or replacement, the operation of a software application in a cloud computing environment;
- (4) A list of software applications used by DOD that should be enabled, either by modification or replacement, to operate in a cloud computing environment, listed in the order of priority

by which they should be enabled, and a schedule for such modification or replacement; and

(5) An estimate of the cloud computing workload needs of DOD time-phased across the future years defense plan to inform DOD's cloud computing needs under the Joint Information Environment initiative that might be satisfied by government-owned and -operated or commercial cloud computing solutions.

Expansion of training and use of information technology cadres (sec. 835)

Subtitle E—Never Contract With the Enemy

Prohibition on providing funds to the enemy (sec. 841)

A proposed amendment to the Senate committee-reported bill (amendment number 3743B) contained a provision that would provide the authority to terminate or void a contract, grant, or cooperative agreement when it is found that funds received under that contract, grant, or cooperative agreement are being provided directly or indirectly to a person or entity that is actively opposing United States or coalition forces involved in a contingency operation in which members of the Armed Forces are actively engaged in hostilities.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Additional access to records (sec. 842)

A proposed amendment to the Senate committee-reported bill (amendment number 3743C) contained a provision that would allow the head of an executive agency to examine the records of a contractor, recipient of a grant or cooperative agreement to the extent necessary to ensure that funds, including goods and services, available under the contract, grant, or cooperative agreement are not provided directly or indirectly to a person or entity that is actively opposing United States or coalition forces involved in a contingency operation in which members of the Armed Forces are actively engaged in hostilities.

The House bill contained no similar provision.

The agreement includes this provision.

Definitions (sec. 843)

A proposed amendment to the Senate committee-reported bill (amendment number 3743D) contained a provision that would provide certain definitions.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Subtitle F—Other Matters

Rapid acquisition and deployment procedures for United States Special Operations Command (sec. 851)

The Senate committee-reported bill contained a provision (sec. 807) that would require procedures for the rapid acquisition and deployment of items for the U.S. Special Operations Command (SOCOM) that are currently under development by the Department of Defense (DOD) or available from the commercial sector and are urgently needed to avoid significant risk or loss of life or mission failure, or needed to avoid collateral damage where no collateral damage is necessary for mission success.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would authorize the establishment of procedures for rapid acquisition and deployment of items for SOCOM that are currently under development by DOD or available from the commercial sector and are urgently needed to avoid significant risk or loss of life or mission failure, or needed to avoid collateral damage where no collateral damage is necessary for mission success.

The provision would also require the Commander, SOCOM, in instances where an item has identified deficiencies, to make the determination that deployment of such an item is acceptable for reasons of national security.

The provision would also make clear the SOCOM Commander may not use the authority under this provision at the same time as the Commander uses the authority under section 806 of Public Law 107–314.

The agreement also includes amendments to the provision that would require congressional notifications be made before such rapid acquisition procedures go into effect and after such use of rapid ac-

quisition procedures are used to ensure robust congressional oversight of this authority.

Consideration of corrosion control in preliminary design review (sec. 852)

The Senate committee-reported bill contained a provision (sec. 808) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to ensure that Department of Defense (DOD) Instruction 5000.02 and other applicable guidance require full consideration during preliminary design review of metals, materials, and technologies that effectively prevent or control corrosion over the life cycle of the product.

The House bill contained no similar provision.

The agreement includes the Senate provision.

We expect the relevant instruction and regulations called for in this provision to be tailored to apply only to products likely to corrode and not to every item or system purchased by the DOD.

Program manager development report (sec. 853)

The Senate committee-reported bill contained a provision (sec. 841) that would require the Secretary of Defense to develop a comprehensive strategy for enhancing the role of Department of Defense program managers in developing and carrying out defense acquisition programs.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Operational metrics for Joint Information Environment and supporting activities (sec. 854)

The House bill contained a provision (sec. 821) that would require the Chairman of the Joint Chiefs of Staff to conduct a review of the Air Force Network-Centric Solutions II contract and provide a certification to the Committees on Armed Services of the Senate and the House of Representatives that the contract is effective in delivering information technology capabilities for the joint force.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We remain concerned by the lack of clarity about the activities supporting the Joint Information Environment (JIE), including the programs of records, and other non-materiel aspects, that would contribute to the JIE vision.

In the case of some of the programs that we believe contribute to JIE, like the Air Force's Network Centric Solutions II contract, Navy's Next Generation Enterprise Network, or the Army's Installation Information Infrastructure Modernization program, there are measures of performance driven by the information technology community, but not ones that can be clearly tied to operational outcomes for the warfighting community.

As the JIE evolves into a seamless network to support warfighting functions, as well as business and support processes, we believe that the Department of Defense (DOD) needs metrics

that can be tied to the operational customer in ways that can demonstrate effectiveness, efficiency and satisfaction.

Therefore, we direct the DOD Chief Information Officer, in coordination with the Chairman of the Joint Chiefs of Staff, to brief the Committees on Armed Services of the Senate and the House of Representatives on the guidance and metrics required by this section within 210 days of the enactment of this Act.

Compliance with requirements for senior Department of Defense officials seeking employment with defense contractors (sec. 855)

The House bill contained a provision (sec. 823) that would amend section 847 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) to require the Secretary of Defense to designate an official of the Department of Defense (DOD) to ensure compliance with the requirements of that section and would require that, not later than 180 days after the date of the enactment of this Act, such official shall submit to the congressional defense committees a report on DOD's efforts to ensure compliance with the requirements of section 847.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We note a lack of clarity in the lines of supervision for purposes of monitoring compliance with section 847 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181).

We therefore direct DOD to review those lines of supervision and to submit a report on its findings to the Committees on Armed Services of the Senate and of the House of Representatives, no later than March 31, 2015.

The report shall identify each supervisory component by office and by position and describe the reporting relationships between each of DOD's 17 Designed Agency Ethics Officials and each of the various components in their respective chains of supervision as they relate to section 847 compliance.

Three-year extension of authority for Joint Urgent Operational Needs Fund (sec. 860)

The Senate committee-reported bill contained a provision (sec. 863) that would reauthorize the Joint Urgent Operational Needs Fund for three more years.

The House bill contained no similar provision.

The agreement includes the Senate provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

Extension to United States Transportation Command of authorities relating to prohibition on contracting with the enemy

The House bill contained a provision (sec. 801) that would amend section 831(i)(1) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) to add U.S. Transportation Command to the list of covered combatant commands.

The Senate committee-reported bill contained a similar provision (sec. 861).

The agreement does not include this provision.

We note that the extension to U.S. Transportation Command of authorities relating to prohibition on contracting with the enemy was included in another provision of this agreement.

GOVERNANCE OF JOINT INFORMATION ENVIRONMENT

The Senate committee-reported bill contained a provision (sec. 804) that would require the Secretary of Defense to install a stronger management element and set of controls on the Joint Information Environment (JIE) initiative, including by requiring the assignment of an experienced coordinator under the Chief Information Officer (CIO) to oversee the JIE migration, the establishment of a team of experts to support the coordinator, and modifications to the JIE Executive Committee and its working groups to ensure better representation of those who must use the JIE to execute warfighting missions and those who must defend the JIE from cyber attacks.

The House bill contained no similar provision.

The agreement does not include this provision.

We are encouraged that the newly appointed CIO has the necessary support from the Secretary and Deputy Secretary of Defense, and the intent, to impose greater discipline over the JIE migration, bolster the planning and engineering resources devoted to the initiative, and to ensure that the needs of the operational forces receive all due consideration alongside communications and computing efficiencies and cost savings.

We direct that the CIO be prepared to brief the congressional defense committees at regular intervals on the measures taken to achieve these improvements, including defining what JIE encompasses, and the “as is” condition and the “to be” architecture; developing an integrated master schedule and cost estimates; and tracking compliance with objectives, schedules, and costs.

In addition, we direct the CIO to identify and prioritize the applications in use in the Department of Defense (DOD) that the CIO assesses are candidates for migration to a cloud computing environment, and to determine which applications can and cannot, without modification or replacement, be shifted to a cloud computing environment, along with a time-phased plan to either modify or replace those applications that are not cloud-compatible. We note that a significant percentage of DOD computing applications cannot be virtualized or otherwise are not cloud-compatible, and that the cost and time required to modify such applications are substantial. Without an understanding of what applications can be readily migrated, and a plan to modify or replace those that cannot, neither DOD nor potential commercial cloud providers will be able to plan effectively. The CIO should complete this tasking, and be prepared to share the results with the congressional defense committees, within 270 days of the enactment of this Act.

Improving opportunities for service-disabled veteran-owned small business

The House bill contained a provision (sec. 812) that would amend section 657 of title 15, United States Code, by consolidating the verification and appeals processes for Service-Disabled Veteran-Owned Small Business (SDVOSB) programs at the Department of Veterans Affairs and the Small Business Administration (SBA), and by moving the processes and resources of the SDVOSB verification programs at the Department of Veterans Affairs to the SBA.

The provision would also allow the surviving spouse of a service-disabled veteran who acquires an ownership right in a small business concern to be treated as if the surviving spouse were that veteran for the purpose of maintaining the status of the small business as a small business concern owned and controlled by service-disabled veterans.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that in the case of a transfer of ownership resulting from the death of a service-disabled veteran to a surviving spouse altering the status of the small business as a SDVOSB, we believe

the small business concern can continue to perform existing contracts along with any remaining options to those contracts under existing law.

Improving Federal Surety Bonds

The House bill contained a provision (sec. 816) that would amend section 411(c)(1) of the Small Business Investment Act of 1958 (Public Law 85-699) by raising the guarantee rate on the Small Business Administration's preferred security bond program from 70 percent to 90 percent.

Small business prime and subcontract participation goals raised; accounting of subcontracting

The House bill contained a provision (sec. 818) that would raise the goals for small business subcontracting.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Small business cyber education

The House bill contained a provision (sec. 819) that would allow the Secretary of Defense, in consultation with the Administrator of the Small Business Administration, to promote an outreach and education program to assist small businesses in understanding the cyber threat and in defending their networks and intellectual property.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We recognize the challenges faced by small business, both in protecting their own networks and intellectual property, and also in developing effective capabilities to address cyber security needs. As noted in the Joint Explanatory Statement accompanying H.R. 3304, we recognize the challenges that the defense acquisition system can pose for small businesses, but the purpose of the small and disadvantaged businesses offices established in each of the services is to handle the whole gamut of small business issues.

We are aware of the activities the Department of Defense (DOD) has instituted in order to improve small business access to threat information and best practices pertaining to cyber security. Last year, DOD briefed the Armed Services Committees of the Senate and House of Representatives on plans to support cyber education activities for small business through the existing small business

program. We recognize that this is a work in progress, and that an ongoing assessment of those efforts should be commenced in order to determine the effectiveness of those efforts.

Therefore, we direct the Comptroller General of the United States to submit a report to the Armed Services Committees of the Senate and House of Representatives by November 1, 2015 on the DOD's outreach and education to assist small businesses in understanding cyber threats. This report should address the following:

- (1) An assessment of the planning being done to integrate cyber education and outreach into the programs of the offices of small and disadvantaged businesses of DOD and the military services;
- (2) The capabilities of these offices to support small businesses in preparing plans for the protection of their corporate networks and intellectual property; and
- (3) Development of metrics to determine the performance and effectiveness of those programs and planning activities.

Procurement of personal protective equipment

The House bill contained a provision (sec. 824) that would require the Secretary of Defense to use best value tradeoff source selection methods to the maximum extent practicable when procuring an item of personal protective equipment (PPE) or critical safety items. PPE items include, but are not limited to, body armor components, combat helmets, combat protective eyewear, environmental and fire resistant clothing, footwear, organizational clothing and individual equipment (OCIE), and other items as determined appropriate by the Secretary.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that PPE such as body armor, helmets, specialized clothing and footwear as well as other OCIE items are specifically designed to meet challenging military requirements and specifications.

These PPE items are usually not commercial off-the-shelf products, but are frequently highly engineered, critical life-saving equipment items designed and manufactured to meet rigorous performance standards, first article testing and stringent production quality requirements.

We remain committed to providing the warfighter with the best equipment possible and encourage the Department of Defense to use proper source selection methods to fulfill these requirements. In cases where offerors have widely diverse technical qualifications and are expected to provide products that differ significantly in performance characteristics, source selection criteria should not be solely based on cost in the procurement of OCIE and PPE.

Authority for Defense Contract Audit Agency to interview contractor employees in connection with examination of contractor records

The Senate committee-reported bill contained a provision (sec. 825) that would amend subsection (a)(1) of section 2313 of title 10, United States Code, to grant the Defense Contract Audit Agency specific authority to interview contractor employees similar to the

authority granted to the Comptroller General of the United States in subsection (c)(1) of that same section.

The House bill contained no similar provision.

The agreement does not include this provision.

We believe that under the authorities provided by section 2313 of title 10, United States Code, Defense Contract Audit Agency (DCAA) officials have the authority to interview contractor employees during the course of an audit if such an interview is required to complete the audit.

We therefore encourage contractors to make available for interview the employees associated with matters related to an audit conducted in accordance with section 2313.

We also note that failure to provide reasonable access to interview employees associated with matters under review during an audit could result in a qualified audit opinion.

Prohibition on funds for contracts violating Executive Order No. 11246

The House bill contained a provision (sec. 825) that would prohibit funding authorized to be appropriated by this Act or otherwise made available to the Department of Defense to be used to enter into any contract with any entity if such contract would violate Executive Order No. 11246 (relating to non-retaliation for disclosure of compensation information), as amended by the announcement of the President on April 8, 2014.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Requirement for policies and standard checklist in procurement of services

The House bill contained a provision (sec. 826) that would amend section 2330a of title 10, United States Code, by requiring the Under Secretary of Defense for Personnel and Readiness to implement a standard checklist to be used for new contract approval for services or exercising an option under an existing contract for services. The checklist required would be modeled on the policy and checklist relating to services contract approval form (dated August 2012) established and in use by the Department of the Army. Finally, the provision would require the Comptroller General of the United States to submit to the congressional defense committees a report on the implementation of the standard checklist for each of fiscal years 2015, 2016, and 2017.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We direct the Under Secretary of Defense for Acquisition, Technology, and Logistics, and the senior acquisition executive for the Department of the Navy and the Department of the Air Force, no later than March 30, 2015, to issue to the Defense agencies and the military services, respectively, policies implementing a standard checklist to be completed before the issuance of a solicitation for any new contract for services or exercising an option under an ex-

isting contract for services, including services provided under a contract for goods.

We recommend that the Under Secretary and the senior acquisition executives, to the extent practicable, model their policies and checklists on the policy and checklist relating to services contract approval currently used by the Department of the Army.

We also direct the Comptroller General of the United States to submit to the congressional defense committees a report on the Defense agencies' and military services' implementation of a standard checklist by January 30, 2016.

The House bill contained no similar provision.

The agreement does not include this provision.

We note that we require the Secretary of Defense to provide recommendations on program manager tenure as part of an overarching review of program manager development elsewhere in this Act.

We express our intent to address program manager tenure in next year's National Defense Authorization Act in the context of a larger DOD acquisition reform effort.

Tenure and accountability of program managers for program execution periods

The Senate committee-reported bill contained a provision (sec. 843) that would address the tenure and accountability of program managers for the program execution period.

The provision would require each such program manager to enter into a performance agreement with the milestone decision authority (MDA) that establishes the expected parameters of performance,

including the commitment of the MDA that adequate funding and resources are available and will be provided, and assurance of the program manager that the parameters are achievable.

The provision would also require that program managers be given authority comparable to the authority given to private sector program managers and that they be assigned to a program until the delivery of the first production units, with a narrow waiver authority.

The House bill contained no similar provision.

The agreement does not include this provision.

We note that we require the Secretary of Defense to provide recommendations on program manager tenure as part of an overarching review of program manager development elsewhere in this Act.

We express our intent to address program manager tenure in next year's National Defense Authorization Act in the context of a larger Department of Defense acquisition reform effort.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

Subtitle A—Department of Defense Management

Reorganization of the Office of the Secretary of Defense and related matters (sec. 901)

The House bill contained a provision (sec. 908) that would incorporate a proposal from the Department of Defense to make several amendments to title 10, United States Code, relating to the organization and management of the Office of the Secretary of Defense.

The Senate committee-reported bill contained a similar provision (sec. 901) that would combine the Deputy Chief Management Officer position and the Chief Information Officer position into the Chief Management Officer position, redesignate the Deputy Secretary of Defense as the Chief Operating Officer, eliminate the Deputy Under Secretary of Defense title except for Principal Deputy Under Secretaries of Defense established by law, and redesignate the Assistant Secretary of Defense for Operational Energy Plans and Programs as the Assistant Secretary of Defense for Installations, Energy, and Environment.

Additionally, this proposal seeks to make changes to Chapter 4 of title 10, United States Code, in order to streamline the establish-

ment provisions for certain officials and ensure that policymaking requirements are provided for separately from establishment provisions and to make other clerical and conforming changes.

The agreement includes the House provision with an amendment that would combine the Deputy Chief Management Officer and the Chief Information Officer position into a new Under Secretary of Defense position placed in the order of precedence before the Under Secretary of Defense for Acquisition, Technology and Logistics.

This change would not take place until the next administration, however, to allow for leadership continuity in the Department of Defense through the current administration's term in office.

The provision also combines the operational energy and installations and environment functions under one Assistant Secretary of Defense, and we direct the combined organization to equally prioritize both functions. Additionally, the provision added a new report requirement to accompany the budget certification, or if the budget is not certified, there are separate reporting details. Such report shall include an appendix prepared by the Chairman of the Joint Chiefs of Staff as well as a separate appendix prepared by the Under Secretary of Defense for Acquisition, Technology, and Logistics. We expect that the Under Secretary of Defense for Acquisition, Technology, and Logistics will address operational energy as an element of the acquisition posture statement, when presented to Congress.

Section 902 of Public Law 110-417 created the Operational Energy position in the Office of the Secretary of Defense, which became the Assistant Secretary of Defense for Operational Energy, Plans, and Programs with the intent to inform senior-level decision-makers of the strategic implications of operational energy requirements on the battlefield.

We recognize and commend the Assistant Secretary for the progress and improvements made since enactment of section 902, including streamlining operational energy requirements, establishing policies, and extending combat capability and operational reach by changing the culture and improving acquisition and sustainment processes.

We believe that consideration of operational energy demands and planning for energy consumption on the battlefield are of tactical and strategic significance.

Therefore, we direct the Secretary of Defense to ensure that the full intent of section 902 of Public Law 110-417 is carried forward in any reorganization of personnel or responsibilities related to operational energy, plans and programs.

*Assistant Secretary of Defense for Manpower and Reserve Affairs
(sec. 902)*

The Senate committee-reported bill contained a provision (sec. 902) that would amend section 138 of title 10, United States Code, to redesignate the position of Assistant Secretary of Defense for Reserve Affairs as the Assistant Secretary of Defense for Manpower and Reserve Affairs, whose principal duty would be the overall supervision of manpower and reserve affairs of the Department of Defense.

The agreement includes the Senate provision with a technical amendment.

Requirement for assessment of options to modify the number of combatant commands (sec. 903)

The House bill contained a provision (sec. 906) that would require the Secretary of Defense to develop a non-binding plan to reduce the number of geographic combatant commands to no more than four by the end of fiscal year 2020 and submit a report to Congress within 180 days of enactment of this Act on the plan, the feasibility and risks of the plan, and any recommendations to implement the plan the Secretary considers appropriate.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Office of Net Assessment (sec. 904)

The House bill contained a provision (sec. 907) that would establish an Office of Net Assessment in the Office of the Secretary of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment on the establishment of such an office.

We note that the current Office of Net Assessment has provided the Secretary of Defense with the primary support needed to meet the requirements of section 113(i) of title 10, United States Code, directing the Secretary to conduct a net assessment and submit an annual report to Congress. Support for the Secretary's statutory responsibility for a net assessment remains the primary purpose of such an office.

Periodic review of Department of Defense management headquarters (sec. 905)

The House bill contained a provision (sec. 909) that would require the Secretary of Defense to develop a plan and submit a report to the congressional defense committees within 120 days after the date of the enactment of this Act to implement a periodic review and analysis of the Department of Defense personnel requirements for management headquarters and submit the required plan to the congressional defense committee.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Subtitle B—Other Matters

Modifications of biennial strategic workforce plan relating to senior management, functional, and technical workforces of the Department of Defense (sec. 911)

The House bill contained a provision (sec. 911) that would amend section 115b of title 10, United States Code, to require the Sec-

retary of Defense to prepare a biennial strategic workforce plan that addresses the shaping and improvement of the senior management workforce of the Department of Defense and includes an assessment of the senior functional and technical workforce of the Department within the appropriate functional community. The Senate committee-reported bill contained a similar provision (sec. 1083) that would also require the Secretary to report to appropriate congressional committees within 18 months on the DOD's implementation of this program and savings achieved.

The agreement includes the House provision with an amendment that would establish a pilot program authorizing the Secretary of Defense to institute a government lodging program to provide government or commercial lodging for DOD employees or members of the uniformed services under the Secretary's jurisdiction performing duty on official travel. The provision would authorize the Secretary to require such travelers to occupy adequate quarters on a rental basis when available. The provision would also require an initial report within 6 months of enactment of this Act outlining facets of the pilot program established by the Secretary, as well as

annual reports to be submitted with annual budget requests, with a final report to be submitted with the budget request for fiscal year 2019. The authority to conduct a pilot program under this provision would expire on December 31, 2019.

Single standard mileage reimbursement rate for privately owned automobiles of Government employees and members of the uniformed services (sec. 915)

The House bill contained a provision (sec. 923) that would establish as the mileage reimbursement rate for federal employees and members of the uniformed services using privately owned automobiles for government travel the single standard mileage reimbursement rate established by the Internal Revenue Service for use by taxpayers in computing the deductible costs of operating their automobiles for business purposes.

The provision would create a new section 1501a of title 10, United States Code, to authorize the Secretary of Defense to enter into public-private partnerships for the purposes of facilitating the accounting of missing persons. The provision would require the Secretary to assign or detail to the defense agency a full-time senior medical examiner to provide medical oversight of the identification process, establish identification and laboratory policy, and advise the director on forensic scientific disciplines. Finally, the provision would require the Secretary to establish and maintain a single centralized database and case management system containing information on all missing persons for whom a file has been established.

LEGISLATIVE PROVISIONS NOT ADOPTED

Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps

The House bill contained a provision (sec. 901) that would redesignate the Department of the Navy as the Department of the Navy and Marine Corps, and redesignate the position of the Secretary of the Navy as the Secretary of the Navy and the Marine Corps.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Additional responsibility for Director of Operational Test and Evaluation

The House bill contained a provision (sec. 902) which would require the Director of Operational Test and Evaluation to consider potential increases in program cost estimates and delays in schedule estimates when implementing the policies, procedures, and activities related to operational test and evaluation. In addition, the provision requires the Director to take appropriate action to ensure operational test and evaluation activities do not unnecessarily impede program schedules or increase program costs.

The report accompanying the House bill also directed the Comptroller General of the United States to conduct a review of the operational test and evaluation processes and activities of the Department of Defense and to report the results of that review to the congressional defense committees not later than March 15, 2015.

The Senate committee-reported bill contained a provision (sec. 845) requiring the Comptroller General to submit a report to the congressional defense committees on disputes between the Office of the Director, Operational Test and Evaluation and the acquisition community over testing requirements for major weapon systems.

The agreement does not include these provisions.

We believe that in order to control the cost of defense acquisitions, each element of the acquisition system is responsible for considering the potential increases in acquisition program cost estimates or delays in schedule estimates when implementing that element's policies, procedures, and activities. This includes the budget, requirements, acquisition, and operational test communities. Each of these organizations should take appropriate action to balance its responsibilities with the need to avoid unnecessarily increasing program costs or impeding program schedules.

Accordingly, the Comptroller General is directed to inform the congressional defense committees, not later than March 15, 2015, on the results of its review of cases in which the program office believes that the Director has required testing above the agreed to plan.

Requirement for congressional briefing before divesting of Defense Finance and Accounting Service functions

The House bill contained a provision (sec. 904) that would prohibit the transfer of financial management functions out of the Defense Finance and Accounting Service (DFAS) until the Secretary of Defense provides a briefing to the congressional defense commit-

tees on a transfer plan and certifies the transfer would reduce costs, increase efficiencies, maintain the timeline for auditability of financial statements, and maintain the roles and missions of DFAS.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

As noted in Senate report accompanying S. 2410 (S. Rept. 113-176), the Assistant Secretary of the Army for Financial Management and Comptroller, as directed by the Secretary of the Army, conducted a doctrine, organization, training, material, leadership, personnel, and facilities review of all Department of the Army financial management processes, policies, organization, and workforce composition.

Known as the Army Financial Management Optimization (AFMO) initiative, the AFMO Task Force made numerous recommendations, including a plan to “consolidate selected financial management activities” into “Command-Aligned Hubs” (CAH).

A pilot program to test this CAH approach began October 1, 2014. While we applaud the Army’s efforts, as the Army works to reduce costs and achieve auditable financial statements, it is important that the evaluation of any financial management-focused program whose aim is optimization, consolidation, or streamlining, initiated by the military departments, services, or defense agencies, be analyzed not just from a service perspective but also from a DOD-wide perspective.

We therefore endorse the Senate committee’s direction to the Deputy Chief Management Officer (DCMO) of the Department of Defense to conduct a review of the CAH pilot program for any DOD-wide impacts and direct that the DCMO’s review be expanded to any similar financial management-focused initiatives by other military departments, services, or defense agencies in fiscal year 2015 for similar impacts. The DCMO shall report findings of the review to the congressional defense committees within 120 days of completion of any pilot program.

Furthermore, the centralized financial management provided by the Defense Finance and Accounting Service (DFAS) is important to the auditability, cost effectiveness, and efficiency of each military department, service, and the defense agencies.

We therefore direct the Under Secretary of Defense (Comptroller) to conduct a review of any proposal initiated in this fiscal year, or resulting from a pilot program initiated in this fiscal year, to permanently transfer functions from DFAS to another DOD entity and to assess, at a minimum, the impacts on cost, auditability, DFAS capabilities, and the ability of DFAS to maintain DOD-wide services. The Comptroller shall report findings to the congressional defense committees prior to any proposed transfer.

Combatant command efficiency plan

The House bill contained a provision (sec.905) that would require the Secretary of Defense to develop a plan to combine the back office functions of two or more combatant commands and to submit a report on the plan to the congressional defense committees within 120 days after the date of the enactment of this Act. This section

would define the term “back office function” as those including, but not limited to, the administrative and support functions of a headquarters of a combatant command. This section would also limit fiscal year 2015 funds for the headquarters of the Joint Chiefs of Staff until the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs of Staff, provides the briefing on combatant command headquarters personnel and resource requirements that was directed in the committee report (H. Rept. 113–102) accompanying the National Defense Authorization Act for Fiscal Year 2014.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the underlying House provision was incorporated into another section of this Act.

Report related to nuclear forces, deterrence, nonproliferation, and terrorism

The House bill contained a provision (sec. 910) that would require that not later than 90 days after the date of enactment the Secretary provide a report to the congressional defense committees discussing how the Department of Defense (DOD) will manage its mission with respect to issues related to nuclear forces, deterrence, nonproliferation, and terrorism.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that this provision was included in the House bill out of concern that the reorganization of the Undersecretary of Defense for Policy which abolished the Assistant Secretary of Defense for Global Strategic Affairs, would result in less senior-level attention to nuclear forces, deterrence, nonproliferation, and terrorism. In this most recent reorganization, these subject areas are now transferred to the Assistant Secretaries of Defense for Strategy, Plans and Capabilities and Homeland Defense.

Section 1305 of the National Defense Authorization Act of 2008 (P.L. 110–417) noted similar concern regarding a lack of focus on strategic and nuclear weapons policy shortly after the 2007 unauthorized transfer of nuclear weapons from Minot Air Force Base, and recommended that the Secretary of Defense should consider establishing a position, at the level of Assistant Secretary of Defense or Deputy Under Secretary of Defense, within the Office of the Under Secretary of Defense for Policy to hold primary responsibility for the strategic and nuclear weapons policy of DOD.

We understand that this recent reorganization was part of a larger effort to obtain efficiencies across the DOD but we remain concerned that appropriate focus should be kept on the topics of nuclear forces, deterrence, nonproliferation, and terrorism to avoid a repeat of past mistakes, such as at Minot Air Force Base in 2007.

We request a report no later than 90 days after the date of enactment to the congressional defense committees on how the Secretary of Defense, through the Undersecretary of Defense for Policy, shall manage an appropriate focus on the missions associated with nuclear forces, deterrence, nonproliferation, and terrorism.

Assignment of certain new requirements based on determinations of cost-efficiency

The House bill contained a provision (sec. 913) that would require that when assigning a new Department of Defense work requirement to military or civilian personnel, or to a contractor, the assignment shall be made based on a determination of which workforce can perform the work in the most cost-efficient manner except in cases where the new requirement is inherently governmental, closely associated with inherently governmental functions, critical, or required by law to be performed by military personnel or civilian personnel.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Prohibition on conversion of functions performed by civilian or contractor personnel to performance by military personnel

The House bill contained a provision (sec. 914) that would clarify when military personnel can be used to perform functions that are currently being performed by civilian or contractor personnel and would codify relevant Department of Defense instructions and policies.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Notification of compliance with section relating to procurement of services

The House bill contained a provision (sec. 915) that would require the Secretary of Defense to ensure compliance with existing law regarding appropriate manpower performance and provide written notification of compliance to the congressional defense committees. This section would also require the Comptroller General of the United States to conduct a review of such a notification and report to the congressional defense committees within 120 days after the date of the provision of such a notification.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Public release by Inspectors General of reports of misconduct

The House bill contained a provision (sec. 924) that would amend sections 141, 3020, 5020, and 8020 of title 10, United States Code, to require Department of Defense and military department Inspectors General to publicly release reports of administrative investigation that confirm misconduct of any member of the Senior Executive Service, political appointee, or commissioned officer in the Armed Forces in pay grades O-6 or above.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

TITLE X—GENERAL PROVISIONS

Subtitle A—Financial Matters

The agreement includes the Senate provision with an amendment to provide DOD with \$4.5 billion in general transfer authority in fiscal year 2015.

Authority to transfer funds to the National Nuclear Security Administration to sustain nuclear weapons modernization and naval reactors (sec. 1002)

The House bill contained a provision (sec. 1003) that would provide the Secretary of Defense the authority to transfer up to \$150.0 million to the nuclear weapons and naval reactor programs of the National Nuclear Security Administration (NNSA) if the amount authorized to be appropriated or otherwise made available for the weapons activities of the NNSA is less than \$8.7 billion (the amount specified for fiscal year 2015 in the report required by section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84)).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Reporting of balances carried forward by the Department of Defense at the end of each fiscal year (sec. 1003)

A proposed amendment to the Senate committee-reported bill (amendment number 3835) contained a provision that would require the Department of Defense (DOD) to submit to Congress, and publish on DOD's website, an annual report on balances carried forward by DOD at the end of each fiscal year.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Subtitle B—Counter-Drug Activities

Extension of authority to support unified counterdrug and counterterrorism campaign in Colombia (sec. 1011)

The House bill contained a provision (sec. 1011) that would extend, by 1 year, support to the unified counterdrug and counterterrorism campaign in the Republic of Colombia originally authorized by section 1021 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), and most recently amended by section 1011 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66).

The Senate committee-reported bill contained a similar provision (sec. 1011).

The agreement includes the Senate provision with an amendment that would extend the underlying authority and associated notification requirement for 2 fiscal years.

Extension and modification of authority of Department of Defense to provide support for counterdrug activities of other governmental agencies (sec. 1012)

The House bill contained a provision (sec. 1012) that would extend, by 3 years, the authority of the Department of Defense (DOD) to provide additional support for counter-drug activities of other governmental agencies originally authorized by section 1004 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510), and most recently amended by section 1005 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81).

The Senate committee-reported bill contained a similar provision (sec. 1014) that would amend section 1004 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510), as most recently amended by section 1005 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), to authorize DOD to provide additional support for activities of other governmental agencies to counter transnational organized crime (TOC) in addition to its counterdrug activities. The provision would also extend the underlying authority through the end of fiscal year 2020 and reduce the dollar threshold for a notification on facilities projects to the congressional defense committees.

The agreement includes the Senate provision with an amendment that would modify the length of the extension of the underlying authority to 3 fiscal years, provide a definition of transnational organized crime, and other conforming modifications.

Availability of funds for additional support for counterdrug activities of certain foreign governments (sec. 1013)

The Senate committee-reported bill contained a provision (sec. 1013) that would amend section 1033 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105-85), as most recently amended by section 1013 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66). Specifically, the provision would extend the Department of Defense's (DOD) authority to provide additional support for counter-drug activities of certain foreign governments through fiscal year 2020, as well as increase the cap on the limitation on obligations from \$100.0 million to \$125.0 million per fiscal year.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would strike the proposed extension of the underlying authority.

Extension and modification of authority for joint task forces supporting law enforcement agencies conducting activities to counter transnational organized crime to support law enforcement agencies conducting counter-terrorism activities (sec. 1014)

The Senate committee-reported bill contained a provision (sec. 1012) that would amend section 1022 of the National Defense Authorization Act of Fiscal Year 2004 (Public Law 108–136), as most recently amended by section 1012 of the National Defense Authorization Act of Fiscal Year 2014 (Public Law 113–66), to: (1) Extend the underlying authority through fiscal year 2020; (2) Expand the scope of the Department of Defense (DOD) authority to provide support to U.S. law enforcement agencies for counterterrorism purposes when a nexus exists between drug trafficking or transnational organized crime (TOC) and a foreign terrorist organization; (3) Make a series of technical modifications; and (4) Expand the authority of DOD to support counter illicit trafficking activities in certain circumstances.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment to include the extension of the underlying authority; expansion of the scope of the authority to provide support to U.S. law enforcement agencies for counterterrorism and TOC when a drug trafficking nexus exists; and a series of technical changes.

Sense of Congress regarding security in the Western Hemisphere (sec. 1015)

The House bill contained a provision (sec. 1015) that would express the sense of Congress that the Department of Defense should continue to support programs that combat illicit networking in the United Mexican States and Central America.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical and clarifying amendment.

Subtitle C—Naval Vessels and Shipyards

Definition of combatant and support vessel for purposes of the annual plan and certification relating to budgeting for construction of naval vessels (sec. 1021)

The House bill contained a provision (sec. 1021) that would define the term “combatant and support vessel” that is used to prepare the Department of the Navy’s 30-year shipbuilding plan.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

National Sea-Based Deterrence Fund (sec. 1022)

The House bill contained a provision (sec. 1022) that would create a National Sea-Based Deterrence Fund to manage the obligation and expenditures for the advanced procurement or construction of nuclear-powered strategic ballistic missile submarines. The provision would also authorize the Secretary of Defense to transfer

up to \$3.5 billion to the Fund from unobligated balances from fiscal years 2014, 2015, and 2016.

The Senate committee-reported bill contained a similar provision (sec. 1002) that would create a fund to manage the construction (including design of vessels), purchase, alteration, and conversion of strategic missile submarines.

The agreement includes a provision that would create a National Sea-Based Deterrence Fund to manage the construction (including design of vessels), purchase, alteration, and conversion of strategic missile submarines. The provision would also authorize the transfer of unobligated balances as proposed in the House bill.

Limitation on use of funds for inactivation of U.S.S. George Washington (sec. 1023)

The House bill contained a provision (sec. 1024) that would prohibit spending more than 50 percent of the funds authorized and appropriated for the Office of the Secretary of Defense until the Secretary of Defense obligates funds for commencing, planning, and buying long lead time materials for the refueling and complex overhaul of the USS George Washington (CVN-73).

The Senate committee-reported bill contained a similar provision (sec. 1021) that would prohibit spending any funds for inactivation of the USS George Washington unless such tasks are identical to tasks that would be necessary to conduct a refueling and complex overhaul of the vessel.

The agreement includes the Senate provision.

We note that the administration did not include a budget request to support the nuclear refueling and complex overhaul of the USS George Washington (CVN-73) in fiscal year 2015. In a report to Congress titled “Estimated Impacts of Sequestration-Level Funding” dated April 2014, the Department of Defense indicated that “if Congress acts to support outyear funding at the PB15 level, the additional \$6.3B necessary to retain CVN 73 would be reflected in next year’s budget.”

Consistent with section 5062 of title 10, United States Code, and multiple testimonies from the combatant commanders, we believe that Congress has been unambiguous about the support of 11 operational aircraft carriers and have provided sufficient authorization of appropriations in this Act to maintain this carrier force structure. We fully anticipate that the administration will support a budget request for fiscal year 2016 that is consistent with title 10, United States Code.

Sense of Congress recognizing the anniversary of the sinking of U.S.S. Thresher (sec. 1024)

The House bill contained a provision (sec. 1025) that would express the sense of Congress in recognition of the anniversary of the sinking of the USS Thresher.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Pilot program for sustainment of Littoral Combat Ships on extended deployments (sec. 1025)

The Senate committee-reported bill contained a provision (sec. 1023) that would provide additional flexibility for the Secretary of the Navy to maintain Littoral Combat Ships (LCS) by allowing government personnel or U.S. contractor personnel to conduct corrective and preventive maintenance on an LCS vessel regardless of the ship's location.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would allow the Secretary of the Navy to establish a pilot program for conducting corrective and preventive maintenance or repair on LCS vessels operating on extended deployment, performed by United States Government personnel or United States contractor personnel. The Secretary would also be required to prepare a report 120 days after completion of this LCS sustainment pilot program and submit that report to the congressional defense committees.

Availability of funds for retirement or inactivation of Ticonderoga class cruisers or dock landing ships (sec. 1026)

The House bill contained a provision (sec. 1026) that would limit the obligation and expenditure of funds authorized to be appropriated or otherwise made available for fiscal year 2015 for the retirement, inactivation, or storage of Ticonderoga-class cruisers and Whidbey Island-class amphibious ships. This section would also require the modernization of two Ticonderoga-class cruisers to begin in fiscal year 2015.

The Senate committee-reported bill contained a similar provision (sec. 1022) that would establish rules under which the Navy could use resources in the Ship, Modernization, Operations, and Sustainment Fund (SMOSF) to implement a plan to: (1) Retain 11 Ticonderoga-class cruisers and nine Whidbey Island-class and Harpers Ferry-class dock landing ships in active service; (2) Temporarily inactivate 11 Ticonderoga-class cruisers and three Whidbey Island-class dock landing ships; (3) Modernize the inactivated ships during the period of their inactivation; and (4) Reactivate those ships to replace cruisers and dock landing ships retiring at the end of their expected service lives.

The agreement contains the House provision with an amendment that would direct Navy to induct two cruisers for modernization with fiscal year 2015 funds. The provision would also establish rules under which the Navy could use resources in the SMOSF account to modernize and retain the cruisers and dock landing ships.

We are specifically not prohibiting the Navy from assigning crews to other duties ashore during the duration of the modernization. The Navy has previously modernized a number of ship classes that resulted in significant time out of service for individual vessels. In those instances, the Navy made substantial but temporary reductions in the crew size. We believe that the temporary reductions should be commensurate with the period of the availability. We direct the Secretary of the Navy to ensure that the Navy does adequate planning and preparation to ensure that the crews for cruisers and dock landing ships emerging from a SMOSF-funded

modernization period are ready when the ship is delivered from modernization activities and returned to the fleet. We also expect the Secretary to ensure that these ships are maintained in the inventory until the end their expected service lives, excluding time spent in a phased modernization status.

Subtitle D—Counterterrorism

Extension of authority to make rewards for combating terrorism (sec. 1031)

The House bill contained a provision (sec. 1031) that would extend the authority through fiscal year 2015 for the Secretary of Defense to offer and make rewards to a person providing information or nonlethal assistance to U.S. Government personnel or government personnel of allied forces participating in a combined operation with U.S. Armed Forces conducted outside the United States against international terrorism or providing such information or assistance that is beneficial to force protection associated with such an operation.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Prohibition on use of funds to construct or modify facilities in the United States to house detainees transferred from United States Naval Station, Guantanamo Bay, Cuba (sec. 1032)

The House bill contained a provision (sec. 1032) that would prohibit the use of funds available to the Department of Defense (DOD) through December 31, 2015, to modify or construct any facility in the United States, its territories, or possessions to house detainees transferred from the U.S. Naval Station, Guantanamo Bay, Cuba, for purposes of detaining or imprisoning such detainees under DOD custody or control unless authorized by Congress.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment to extend an identical prohibition contained in section 1033 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) by 1 year through December 31, 2015.

Prohibition on the use of funds for the transfer or release of individuals detained at United States Naval Station, Guantanamo Bay, Cuba (sec. 1033)

The House bill contained a provision (sec. 1033) that would prohibit the use of funds available to the Department of Defense to transfer or release any detainee at U.S. Naval Station, Guantanamo Bay, Cuba, to or within the United States, its territories, or possessions through December 31, 2015.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment to extend an identical prohibition contained in section 1034 of the National Defense Authorization Act or Fiscal Year 2014 (Public Law 113–66), by 1 year through December 31, 2015.

Subtitle E—Miscellaneous Authorities and Limitations

Modification of Department of Defense authority for humanitarian demining assistance and stockpiled conventional munitions assistance programs (sec. 1041)

The House bill contained a provision (sec. 1041) that would modify the reporting requirements and definitions contained in section 407 of title 10, United States Code, regarding humanitarian demining assistance and stockpiled conventional munitions assistance.

The Senate committee-reported bill contained a similar provision (sec. 1201) that would modify the definitions contained in section 407 of title 10, United States Code, regarding humanitarian demining assistance and stockpiled conventional munitions assistance.

The agreement includes the House provision.

Airlift service (sec. 1042)

The House bill contained a provision (sec. 822) that would amend chapter 157 of title 10, United States Code, by inserting a new section that would require transportation of passengers or property by Civil Reserve Air Fleet (CRAF)-eligible aircraft obtained by the Secretary of Defense or the Secretary of a military department through a contract for airlift service to be provided only by a covered air carrier.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would conform the provision to language on the same matter contained in title 49, United States Code.

As operations in the U.S. Central Command area of responsibility draw down, there will be reduced demand for airlift.

The CRAF program was created to ensure the nation can address airlift requirements despite fluctuations in requirements over time. During this transition back to pre-1990 levels of demand for airlift services, we believe it is imperative to maintain both organic and commercial capacities to meet operational demands and unknown future requirements.

Therefore, we direct the Department of Defense (DOD) to work closely with CRAF program partners to ensure that DOD establishes “appropriate levels for peacetime cargo airlift augmentation in order to promote the effectiveness of the Civil Reserve Air Fleet and provide training within the military aircraft system,” as directed in the National Airlift Policy.

Authority to accept certain voluntary legal support services (sec. 1043)

The House bill contained a provision (sec. 1042) that would amend section 1588 of title 10, United States Code, to authorize service secretaries to accept voluntary legal support services provided by law students or persons studying to be a paralegal, when such services are provided under the direct supervision of an attorney through internship and externship programs approved by the secretary concerned.

The Senate committee-reported bill contained a similar provision (sec. 1043) that would authorize service secretaries to accept voluntary legal support services provided by law students through internship and externship programs approved by the secretary concerned.

The agreement includes the Senate provision.

Expansion of authority for Secretary of Defense to use the Department of Defense reimbursement rates for transportation services provided to certain non-Department of Defense entities (sec. 1044)

The House bill contained a provision (sec. 1043) that would amend section 2642 of title 10, United States Code, to extend the authority to provide transportation services beyond other Federal agencies to include: (1) State, local, and tribal agencies (including any organizations composed of State, local, and tribal agencies); and (2) Defense contractors, when those contractors are transporting supplies for, or destined for, a Department of Defense entity.

The Senate committee-reported bill contained a similar provision (sec. 1084).

The agreement includes the Senate provision.

Repeal of authority relating to use of military installations by Civil Reserve Air Fleet contractors (sec. 1045)

The House bill contained a provision (sec. 1044) that would repeal section 9513 of title 10, United States Code, relating to the use of military installations by commercial air carriers doing business with the Department of Defense.

The Senate committee-reported bill contained an identical provision (sec. 351).

The agreement includes this provision.

Inclusion of Chief of the National Guard Bureau among leadership of the Department of Defense provided physical protection and personal security (sec. 1046)

The Senate committee-reported bill contained a provision (sec. 1044) that would amend section 1074 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) to include the Chief of the National Guard Bureau as one of the specified persons in the Department of Defense who, by nature of their positions, requires continuous security and protection.

The House bill contained no similar provision.

The agreement includes this provision.

Inclusion of regional organizations in authority for assignment of civilian employees of the Department of Defense as advisors to foreign ministries of defense (sec. 1047)

The Senate committee-reported bill contained a provision (sec. 1045) that would amend section 1081 of the National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–84), as most recently amended by section 1094 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), to expand the

authority of the Secretary of Defense to provide Department of Defense (DOD) advisors to regional organizations.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We are concerned about the implementation of the Ministry of Defense Advisors (MODA) program, specifically the process through which nations and activities are proposed and prioritized and how civilian personnel are selected. We also encourage the Secretary to keep the congressional defense committees informed of the MODA program as it is further institutionalized as one of DOD's Defense Institution Building activities.

Report and limitation on availability of funds for aviation foreign internal defense program (sec. 1048)

The House bill contained a provision (sec. 1045) that would prohibit U.S. Special Operations Command from obligating any funds available for fiscal year 2015 for the Aviation Foreign Internal Defense Program until the Secretary of Defense provides a certification to the congressional defense committees that validates program requirements.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would fence 50 percent of the funds made available for Procurement, defense-wide, to support the fixed-wing aviation foreign internal defense program until the Secretary provides the congressional defense committees with the required report and certification.

Modifications to OH-58D Kiowa Warrior aircraft (sec. 1049)

The House bill contained a provision (sec. 1051) that would authorize the Secretary of the Army to obligate funds for the modification of OH-58D Kiowa Warrior helicopters.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with a clarifying amendment.

Protection of top-tier defense-critical infrastructure from electromagnetic pulse (sec. 1051)

The House bill contained a provision (sec. 1061) that would require the Secretary of Defense to submit a certification by June 2015 that all defense mission-critical infrastructure of the Department of Defense that requires protection from the adverse effects of man-made or naturally occurring electro-magnetic pulse (EMP) that receives power from non-military power sources, is protected from such effects.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the Secretary of Defense to report by June 2015 whether such top-tier de-

fense-critical infrastructure that requires EMP protection is protected from EMP. The provision would also require that, if any such infrastructure is not protected against EMP, the report shall describe what actions would be required to achieve such protection.

Response of the Department of Defense to compromises of classified information (sec. 1052)

The House bill contained a provision (sec. 1062) that would require the Secretary of Defense to submit a report to the congressional defense committees within 60 days after the date of the enactment of this Act on actions taken by the Secretary regarding significant compromises of classified information. The report would include a description of any changes to Department of Defense (DOD) policies or guidance relating to significant compromises of classified information, an overview of mitigation efforts, a description of the resources dedicated to efforts relating to such compromises, a description of the Secretary's plan to continue evaluating and mitigating any damages, and a general description and estimate of the cost associated with mitigating such compromises. This section would also require updates to the initial report on a semiannual basis during calendar years 2015–18.

The Senate committee-reported bill contained no similar provision, but the classified annex to the Senate report accompanying S. 2410 (S. Rept. 113–176) of the Carl Levin National Defense Authorization Act for Fiscal Year 2015 also included direction for DOD on this issue.

The agreement includes the House provision with an amendment that would sunset the reporting requirement after 2016 and require quarterly updates rather than semi-annual reporting. However, we understand that the Information Review Task Force, within the Defense Intelligence Agency, and the Mitigation Oversight Task Force, within the Joint Staff, are already producing quarterly reports regarding the disclosure and mitigation measures. Providing the Mitigation Oversight Task Force and Information Review Task Force reports to the appropriate congressional committees, will be considered sufficient to answer the requirements of this provision, assuming that all the elements of the provision are addressed.

Study on joint analytic capability of the Department of Defense (sec. 1053)

The House bill contained a provision (sec. 1064) that would direct the Secretary of Defense to undertake an independent assessment of the joint analytic capabilities of the Department of Defense to support strategy, plans, and force development and their links to resource decisions.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Business case analysis of the creation of an active duty association for the 168th Air Refueling Wing (sec. 1054)

The House bill contained a provision (sec. 1065) that would require the Secretary of the Air Force to conduct a business case analysis of the creation of an active association with the 168th Air Refueling Wing.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Reports on recommendations of the National Commission on the Structure of the Air Force (sec. 1055)

The Senate committee-reported bill contained a provision (sec. 1061) that would require the Secretary of the Air Force to submit annual reports for each fiscal year from 2016 through 2019 on how the Air Force is implementing the recommendations of the National Commission on the Structure of the Air Force.

The House bill contained no similar provision.

The agreement includes this provision.

Report on protection of military installations (sec. 1056)

The Senate committee-reported bill contained a provision (sec. 1042) that would allow the Secretary of Defense to designate personnel to engage in activities to protect the buildings, grounds, persons, and property that are under the jurisdiction, custody or control of the Department of Defense (DOD). The provision would also allow the Secretary of Defense to prescribe regulations, including traffic regulations, for the same purpose.

The House bill contained no similar provision.

The agreement includes a provision that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and House of Representatives, and to the Senate and House of Representatives Committees on Judiciary, and the Senate Committee on Homeland Security and Government Affairs, and the House Committee on Homeland Security and Government Affairs a report, coordinated with the Attorney General of the United States and the Secretary of Homeland Security, that identifies the issues, shortfalls and gaps in authorities for the protection of military installations by the three agencies concerned, and the risks associated with those issues, shortfalls, and gaps. The report would also provide a description of specific examples of incidents that illustrate those concerns. The agreement also seeks a recommendation for legislation that fulfills DOD's requirements and addresses the concerns of the three agencies.

We encourage the Secretary of Defense, the Attorney General, and the Secretary of Homeland Security to work collaboratively in drafting the report and to make it a priority to ensure the security of U.S. military installations.

Comptroller General briefing and report on Army and Army National Guard force structure changes (sec. 1057)

The House bill contained a provision (sec. 1050) that would prohibit, during fiscal year 2015, reductions of Active Duty Army and Army National Guard end strength and transferring AH-64 attack

helicopters from the National Guard to the Active Duty Army. The provision would also require the Comptroller General of the United States to submit a report on its review of Department of Defense and Department of the Army analysis and plans for force structure and mix changes.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would clarify the elements of the required Comptroller General assessment. The agreement would also strike the limitations on end strength reductions and the transfer of National Guard helicopters because these limitations are addressed elsewhere in this Act.

Improving analytic support to systems acquisition and allocation of acquisition, intelligence, surveillance and reconnaissance assets (sec. 1058)

The Senate committee-reported bill contained a provision (sec. 1063) that would require the Vice Chairman of the Joint Chiefs of Staff (VCJCS), in consultation with the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD (AT&L)), and the Director of Cost Assessment and Program Evaluation (CAPE), to conduct an assessment of the operations research tools, processes, and capabilities used to support the analysis of requirements for new systems acquisitions and the analysis, validation, and prioritization of requirements for the allocation of existing intelligence, surveillance, and reconnaissance (ISR) assets to the combatant commands. The provision would require the VCJCS, the USD (AT&L), and the Director of CAPE to brief Congress on the results of this assessment within 180 days of enactment of the Act.

The provision would also require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the feasibility of conducting similar surveys of military dependents and DOD contractors.

The House bill contained no similar provision.

The agreement includes the Senate provision.

We expect DOD to implement this provision through available information technology. Further, we direct the Secretary to inform the Committees on Armed Services of the Senate and the House of Representatives on actions taken to address findings of the biennial surveys.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would provide the Secretary of the Army some flexibility in the establishment of the Human Terrain System pilot program.

Should the pilot program under this authority be carried out, we direct the Secretary of the Army to brief the congressional defense committees on the milestones, metrics, deliverables, and resources needed to execute the program. The brief should include an assessment of the value of the program in comparison to the various other analytic tools and techniques that are at the disposal of the military.

Clarification of policies on management of special use airspace of Department of Defense (sec. 1076)

The House bill contained a provision (sec. 1075) that would allow the Secretary of Defense to enter into a memorandum of understanding with a non-Department of Defense (DOD) entity that is engaged in the test range program authorized under section 332(c) of the Federal Aviation Administration Modernization and Reform Act of 2012 (Public Law 112–95). Such entity would be allowed access to non-regulatory special use airspace if such access is used by the entity as part of such test range program and such access would not interfere with the activities of the Secretary or otherwise interrupt or delay missions or training of the DOD.

The Senate committee-reported bill contained no similar provision. A proposed amendment to the Senate committee-reported bill (amendment number 3578) contained a provision that would allow the Secretary of Defense to authorize use by another department or agency of the Federal government of special use airspace at a DOD installation if such use would support or benefit DOD, or support some national security interest. Access could not be granted if the use of airspace would interfere with the assigned mission of the commander of the installation.

The agreement contains the House provision with an amendment that would direct DOD to issue guidance clarifying policies on the appropriate management of special use airspace within DOD, and

on policies governing access by users from outside the DOD to special use airspace managed by DOD. The provision would require the Secretary of Defense to issue such guidance within 90 days of enactment of this Act, and to provide the congressional defense committees a briefing on such guidance within 120 days of enactment of this Act.

The Joint Explanatory Statement accompanying the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) noted that: (1) developing established procedures to integrate unmanned aircraft systems into the National Airspace System will be very important in allowing both DOD and non-DOD entities to train with and operate unmanned aircraft systems on a routine basis; and (2) developing these procedures could include the use of FAA-designated DOD non-regulatory special use airspace.

Subsequently, DOD released guidance to the Services and DOD components to prescribe guidelines for local commanders to grant access to special use airspace. DOD officials assure us that their guidance was not intended to prevent local commanders from exercising authority to allow access within the DOD guidelines. Nevertheless, we understand that local commanders have interpreted the DOD guidelines as either allowing or preventing the local installation commander from negotiating a memorandum of understanding (MOU) under which access to special use airspace could be granted.

The provision would direct the Secretary of Defense to move expeditiously to correct such misunderstandings of the guidelines on access to special use airspace, including the authority of local commanders to enter into a memorandum of understanding for the use of special use airspace by any department or agency of the Federal Government, or state governments, to include those engaged in the Federal Aviation Administration test range program, participating in the Robotic Aircraft for Public Safety program, or participating in other activities of a similar nature.

Department of Defense policies on community involvement in Department community outreach events (sec. 1077)

The House bill contained a provision (sec. 354) that would authorize service secretaries to enter into a contract or agreement with a non-federal civic organization to conduct or support an air show or open house to feature any unit, aircraft, vessel, equipment, or servicemembers under the jurisdiction of the secretary, and would authorize the secretary to charge or authorize a nominal admission fee to attend a military air show or open house.

The House bill also contained a provision (sec. 355) to amend section 974 of title 10, United States Code, to require the secretary concerned to accept contributions of money, personal property, or services on the condition that such money, property, or services be used for the benefit of a military musical unit under the jurisdiction of the Secretary.

The Senate committee-reported bill contained a provision (sec. 1065) that would require the Secretary of Defense to submit to the congressional defense committees a report on the policies of the Department of Defense (DOD) on the involvement of non-federal entities in DOD community outreach events that feature any unit, aircraft, vessel, equipment, or members of the Armed Forces.

The agreement includes the Senate provision with an amendment that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives, not later than 180 days after enactment of this Act, a report on the policies of DOD on the involvement of non-federal entities in DOD community outreach events (including air shows, parades, open houses, and performances by military musical units) that feature any unit, aircraft, vessel, equipment, or members of the Armed Forces in order to increase the involvement of non-federal entities in such events.

Notification of foreign threats to information technology systems impacting national security (sec. 1078)

The House bill contained a provision (sec. 1083) that would require the Secretary of Defense and the Director of National Intelligence to submit to the appropriate congressional committees a notification of each instance in which the Secretary or the Director determine through analysis or reporting that an information technology or telecommunications component from a company suspected of being influenced by a foreign country, or a suspected affiliate of such a company, is competing for or has been awarded a contract to include the technology of such company or such affiliate into a covered network. Each notification would be required to include:

- (1) A description of each such instance, including an identification of the company of interest and the network affected;
- (2) An analysis of the potential risks and the actions that can be taken to mitigate such risks; and
- (3) A description of any follow up or other response actions to be taken.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would limit the application of the provision to the Secretary of Defense and the reportable instances to threats to information technology or network components by an agent of a foreign power in which compromises would pose a significant risk to the programs and operations of the Department of Defense. In addition, the Secretary of Defense would be required to work with other appropriate government agencies to develop a plan to respond to the reported instance. The provision makes clear that the Secretary shall use existing authorities and open source information to make determinations regarding reportable instances.

Pilot program to rehabilitate and modify homes of disabled and low-income veterans (sec. 1079)

The Senate committee-reported bill contained a provision (sec. 1085) that would require the Secretary of Housing and Urban Development to conduct a pilot program to award grants to qualified non-profit organizations to rehabilitate and modify the primary residence of eligible veterans.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would limit the use of funds under this program to those

veterans who the Secretary determines are residing in, and reasonably intend to continue residing in, a primary residence owned by such veterans or family members. The amendment would also strike language in the underlying Senate provision that would have required the Secretary to adhere to certain preferences in awarding grants under the pilot program, and would have limited qualified organizations to those possessing certain expertise or other criteria.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Elsewhere in this report, we have expressed our concerns over the Department of Defense's (DOD) ability to effectively and efficiently acquire the information technology systems it will need. While part of that challenge is in the acquisition process, we also recognize that a significant problem in DOD's larger management and oversight for IT investments. For example, in our discussions with industry on acquisition improvement, we received suggestions for improving the requirements generation and validation process, as well as aligning IT outcomes with the strategic goals of the organization. These things require a robust management process, and should inform acquisition, not the other way around.

We believe that DOD has a valuable process established in section 2222 of title 10, United States Code for dealing with defense business systems. We see value in having that process expanded to each of the various IT mission areas, especially the processes that conduct business process reengineering (BPR) prior to making acquisition decisions. Currently, the Deputy Chief Management Officer is focused on business systems, but we think their role could be extended to apply process improvement and BPR techniques to DOD's other IT mission areas as well.

We recognize it may be premature at this point, though, to make such significant changes. We understand DOD is reviewing its internal processes, and new leadership is looking to mold the organization in a way to achieve its strategic goals. We look forward to seeing how these efforts progress, and will consider if similar actions that were proposed by the House bill may be warranted in the future.

Report on auditable financial statements

Report on implementing audit reporting requirements

The House bill contained a provision (sec. 1006) that would require a report on implementing certain audit reporting requirements.

We expect that DOD will explain why this objective was not achieved, describe any factors which may have impeded achievement of the objective, and detail a remedial plan through which DOD will address any such impediments and proceed to validate its statement of budgetary resources as ready for audit.

We expect that DOD will include this information in its next semi-annual report on the Financial Improvement and Audit Readiness (FIAR) plan, required by section 1003(b) of the National Defense Authorization Act for Fiscal Year 2010 (P.L. 111–84).

We also note that DOD posts its semi-annual reports on the FIAR plan electronically on a web site for public review.

The agreement would also authorize the loaning of such equipment in connection with the training of coalition forces to be deployed to those operations.

We note that a similar authority to loan personnel protection and personnel survivability equipment under ACSAs to allies and other partners has made an important contribution to coalition operations in Afghanistan. would limit the Secretary from waiving the certification requirements with regard to \$300.0 million of the \$900.0 million authorized for Pakistan unless the Secretary can make certain additional certifications regarding Pakistan's military operations in North Waziristan.

The agreement includes the Senate provision with an amendment that would expand the authority under section 1233 of Public Law 110–181 to allow the Secretary of Defense to reimburse coalition nations for support provided to U.S. military operations in Iraq or in Operation Enduring Freedom in Afghanistan. This section would also extend the period in which the principal alien must be employed by or on behalf of the U.S. Government in the Islamic Republic of Afghanistan to December 31, 2015. A proposed amendment to the Senate committee-reported bill (amendment number 3715) contained a provision that would express the sense of Congress that the United States should continue to support the meaningful inclusion of women in the political, economic, and security transition process in Afghanistan. The Senate provision would also require a report on the security of Afghan women and girls, including information on the recruitment and retention of women in the ANSF.

We note that elsewhere in this Act, the Secretary of Defense is required to report to the appropriate committees of Congress on efforts by the Afghan Ministry of Defense and the Afghan Ministry of Interior to increase the recruitment and retention of women in the ANSF.

The House bill contained a provision (sec. 1220B) that would prohibit the obligation or expenditure of fiscal year 2015 Department of Defense (DOD) funds for construction projects in Afghanistan in excess of \$500,000 that cannot be audited and physically inspected. The provision included authority to waive the prohibition if, prior to the obligation of funds for the project, a plan is submitted to the relevant congressional committees for the monitoring of the use of such funds to ensure they are used for their intended purpose and to mitigate waste, fraud and abuse.

The Senate committee-reported bill contained a similar provision (sec. 1226).

The agreement includes the House provision with an amendment that would prohibit the obligation or expenditure of fiscal year 2015 DOD funds for construction projects in Afghanistan in excess of \$1 million that cannot be authorized and physically inspected by U.S. Government personnel or their designated representatives. The provision would allow for this prohibition to be waived if the Secretary of Defense or the Commander of U.S. Forces in Afghanistan submits to the relevant congressional committee a report containing (1) a detailed plan for the monitoring of the funds for the project, and (2) certain specific determinations regarding the project's contribution to U.S. national security, its coordination with the Government of Afghanistan and other implementing partners, and its sustainability.

The provision would allow the use of up to \$15.0 million in fiscal year 2015 for reintegration purposes.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would allow the use of up to \$5.0 million in Department of Defense (DOD) funds for reintegration purposes. We note that the United States continues to support a political reconciliation process that is Afghan-owned and Afghan-led. We encourage the transition of reintegration efforts from the Department of Defense to the appropriate institutions of the Government of Afghanistan, and accordingly expect that there will not be a need for this DOD reintegration authority after fiscal year 2015.

Clearance of unexploded ordnance on former United States training ranges in Afghanistan (sec. 1233)

The Senate committee-reported bill contained a provision (sec. 1229) that would authorize the Secretary of Defense to use up to \$125.0 million of Department of Defense (DOD) funds in each of fiscal years 2015 and 2016 to conduct surface clearance of unexploded ordnance at closed training ranges used by the U.S. Armed Forces in Afghanistan.

Authority to provide assistance to counter the Islamic State in Iraq and the Levant (sec. 1236)

Following passage of the House bill and the Senate committee-reported bill, the administration submitted to the congressional defense committees a legislative proposal that would authorize to be appropriated to the Iraq Train and Equip Fund up to \$1.6 billion to provide assistance to military and other security forces of or associated with the Government of Iraq, including Kurdish and tribal security forces, with a national mission, to counter the Islamic State in Iraq and the Levant (ISIL).

The agreement includes the proposal for the Iraq Train and Equip Fund with certain technical and clarifying amendments. Assistance under this section would be restricted to no more than 25 percent of the amounts authorized until the Secretary of Defense, in coordination with the Secretary of State, submits a report on the plan for providing such assistance and re-training and re-equipping the Iraqi Security Forces, and the President submits a report on how such assistance fits within a broader regional strategy.

We note the significant contribution that Kurdish security forces have made to countering ISIL's advance. We understand that the administration's plan includes assistance to train and equip 3 brigades of Kurdish peshmerga. Accordingly, we expect that a significant portion of the assistance under this authority will be provided to meet the requirements of the Kurdish security forces and urge the Secretary of Defense to ensure that such assistance is delivered in a timely manner to such forces. We further expect the Secretary of Defense to keep the congressional defense committees fully informed as this plan is developed and implemented, including any arrangements to ensure that such assistance for Kurdish security forces is promptly delivered to those forces.

The provision is also amended to add local security forces with a national security mission to the list of forces authorized to receive assistance under this section. We believe that, for purposes of this section, local security forces should include local forces that are committed to protecting highly vulnerable ethnic and religious mi-

nority communities in the Nineveh Plain and elsewhere from the ISIL threat.

We note that among the lessons learned from the execution of previous large-scale train-and-equip funds in Iraq and Afghanistan has been the need for high-level oversight and requirements coordination, such as through the Afghanistan Requirements Oversight Council (AROC), to ensure that significant expenditures from the fund are aligned with validated requirements and subject to adequate oversight. We expect that the Department of Defense (DOD) will utilize a mechanism and procedures similar to the AROC in carrying out the program under the ITEF. Therefore, we direct the Secretary of Defense to report to the congressional defense committees, not later than 60 days after the date of enactment of this Act, on the procedures and mechanism DOD will use to ensure that major expenditures from the fund are made only pursuant to an appropriately validated need and subject to adequate monitoring and evaluation.

Subtitle C—Matters Relating to the Russian Federation

Limitation on military cooperation between the United States and the Russian Federation (sec. 1241)

The House bill contained a provision (sec. 1221) that would prohibit the use of Department of Defense (DOD) funds for fiscal year 2015 for bilateral military-to-military contact or cooperation between the Governments of the United States and the Russian Federation until the Secretary of Defense makes certain specified certifications to the appropriate congressional committees regarding Russia's actions in Ukraine, its compliance with its arms control obligations, and its foreign military sales or transfers.

The Senate committee-reported bill contained a similar provision (sec. 1242(e)).

The agreement includes the House provision with an amendment that would prohibit the use of DOD funds for fiscal year 2015 for bilateral military-to-military cooperation between the United States and the Russian Federation until the Secretary of Defense, in co-

ordination with the Secretary of State, certifies that Russia has ceased its occupation of Ukrainian territory and its aggressive activities that threaten Ukraine and North Atlantic Treaty Organization members. The amendment authorizes the Secretary of Defense to waive the prohibition if the Secretary determines that doing so is in the U.S. national security interest and the Secretary provides prior notification to the appropriate committees of Congress, including certain specified information.

Notification and assessment of proposal to modify or introduce new aircraft or sensors for flight by the Russian Federation under Open Skies Treaty (sec. 1242)

The House bill contained a provision (sec. 1222) that would limit the use of funds to authorize or permit a certification by the United States of a proposal by the Russian Federation to change any sensor package on a Russian Open Skies aircraft, unless certain specified conditions are met.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the President, not later than 30 days after the Russian Federation provides notification to all States Parties to the Open Skies Treaty (Treaty) of its intention to seek certification to change, modify, or introduce a new aircraft or sensor under the Treaty, to notify the appropriate committees of Congress and provide the relevant details of the Russian proposal. The provision would also require, not later than 30 days prior to the date of intended approval of certification of such aircraft or sensor by the United States, the Director of National Intelligence, jointly with the Secretary of Defense and the Chairman of the Joint Chiefs of Staff, and in consultation with the Secretary of State, to submit to the appropriate committees of Congress an assessment of the national security implications for the United States of any new aircraft or sensor proposed to be deployed by the Russian Federation under the Treaty. Further, the provision would require that any such assessment include a description of any plans by the United States to mitigate any negative effect of the proposed new Russian sensor or aircraft on the national security of the United States, including an analysis of the costs and effectiveness of any such plans.

In any case where an assessment of national security implications is prepared in response to this provision, we expect the Chairman of the Joint Chiefs of Staff to take into account the views of the relevant regional and functional combatant commander on the security implications of a proposed Russian change in aircraft or sensor for Open Skies overflights in their assigned area of responsibility. We note that the Department of Defense committed to provide information concerning the views of relevant regional and functional combatant commanders relating to proposals under the Treaty to the committees in November 2014.

Limitations on providing certain missile defense information to the Russian Federation (sec. 1243)

The House bill contained a provision (sec. 1223) that would extend by 1 year the limitations in section 1246(c) of the National De-

fense Authorization Act for Fiscal Year 2014 (Public Law 113–66) on providing certain missile defense information to the Russian Federation. The provision would also place limitations on providing information to the Russian Federation concerning the velocity at burnout of United States missile defense interceptors or targets.

The Senate committee-reported bill included a similar provision (sec. 1266).

The agreement includes the House provision with a clarifying amendment.

Report on non-compliance by the Russian Federation with its obligations under the INF Treaty (sec. 1244)

The House bill contained a provision (sec. 1225) that would require the President to submit a report to Congress on the status of efforts to hold the Russian Federation accountable for its violation of the Intermediate-Range Nuclear Forces (INF) Treaty, and on the President's assessment as to whether it remains in the national security interests of the United States to remain a party to the INF Treaty and related treaties while the Russian Federation is in non-compliance with the INF Treaty.

The Senate committee-passed bill contained no similar provision.

The agreement includes a provision that would require the President to submit, not later than 90 days after the enactment of this Act, a report to the appropriate congressional committees on Russian non-compliance with the INF Treaty, including elements set forth in section 1061 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66). It would also require the Department of State, jointly with the Department of Defense and other appropriate agencies, to brief the appropriate congressional committees at the time of submission of the report, and every 6 months thereafter until the Russian Federation returns to compliance with its obligations under the INF Treaty, on the status of efforts to resolve U.S. concerns about Russian INF noncompliance. Finally, in the event the President determines that Russia has deployed, or intends to deploy, systems that violate the INF Treaty, it would require the President to notify Congress promptly of such a determination, and any plans to respond to such deployments.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to submit a detailed report to the appropriate congressional committees annually through 2018 on the security and military strategies, priorities, and capabilities of the Russian Federation.

We expect the Secretary of Defense to consult closely with the Director of National Intelligence and the Secretary of State

throughout the preparation of the report required under this section, including to avoid duplicative reporting.

Prohibition on use of funds to enter into contracts or other agreements with Rosoboronexport (sec. 1246)

The House bill contained a provision (sec. 1229) that would prohibit the use of Department of Defense (DOD) funds to enter into a contract, memorandum of understanding, or cooperative agreement with, to make a grant to, or to provide a loan or loan guarantee to the Russian state corporation Rosoboronexport. The provision included a national security waiver of this prohibition if the Secretary of Defense submits to the congressional defense committees certain detailed certifications.

The Senate committee-reported bill contained a similar provision (sec. 1267).

The agreement includes the House provision with technical and clarifying amendments. The amendment would include a limited waiver of the prohibition with respect to contracting for spare parts or other activities related to the maintenance of helicopters operated by the Afghan National Security Forces or otherwise operated by DOD only if the Secretary submits to the congressional defense committees a detailed certification that the waiver is in the U.S. national security interest, based on certain determinations by the Commander of U.S. forces in Afghanistan and the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Report on the New START Treaty (sec. 1247)

The House bill contained a provision (sec. 1230A) that would limit the availability of fiscal year 2015 funds for implementation of the New START Treaty unless the Secretary of Defense certifies that the Russian Federation has met a number of specified conditions.

The House bill contained a provision (sec. 1231) that would require the Secretary of Defense, in coordination with the Secretary of State and other heads of federal departments and agencies, to develop a strategy to prioritize U.S. interests in the U.S. Pacific Command area of responsibility, as well as an implementation plan to support the strategy.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would narrow the scope of the strategy to defense issues and remove the implementation plan requirement.

The Defense Intelligence Agency should conduct the appropriate defense intelligence assessments focused on the matters included in subsection (a)(2)(B) to inform the strategy.

Modifications to annual report on military and security developments involving the People's Republic of China (sec. 1252)

The House bill contained a provision (sec. 1232) that would amend subsection (b) of section 1202 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65) to modify the annual report on military and security developments involving the People's Republic of China.

The Senate committee-reported bill contained no similar provision.

The Senate committee-reported bill contained a provision (sec. 1210) that would require a certification of certain steps by the Government of Burma to improve conditions before security assistance would be authorized under this Act. The provision also contained exceptions to that limitation for human rights and disaster relief training, as well as a report requirement on the strategy and plans for military-to-military engagement between the U.S. Armed Forces and the Burma military.

The agreement includes the Senate provision with an amendment that would remove the certification requirement, combine the reporting requirements from both provisions, and authorize the human rights and disaster relief training contained within the Senate provision with clarifying modifications. The agreement also provides that no Department of Defense assistance to the Government of Burma is authorized by this Act except as provided in this section. If a decision is made to engage in one of the authorized activities enumerated in subsection (a), we expect the Secretary of Defense to provide written notification to the Secretary of State.

We note that there remains significant progress to be made on: establishing civilian oversight of the Burma military, implementing human rights reform in the Burma military, and terminating military relations with North Korea. We also note that the Government of Burma must take significant steps toward establishing a transparent and inclusive process to amend the constitution of Burma, including the full participation of the political opposition and all ethnic minority groups in that process.

Report on Department of Defense munitions strategy of the United States Pacific Command (sec. 1254)

The House bill contained a provision (sec. 1234) that would require the Secretary of Defense to provide the congressional defense committees with a report on the munitions strategy of United States Pacific Command.

Independent assessment of the ability of the Department of Defense to counter anti-access and area-denial strategies, capabilities, and other key technologies of potential adversaries (sec. 1257)

The Senate committee-reported bill contained a provision (sec. 221) that would require the Secretary of Defense to task the Defense Science Board or other independent group to examine the potential specific challenges to U.S. military technological superiority within the next 10 years, and the specific planned responses by the Department of Defense (DOD) to meet these challenges.

The House bill contained a similar provision (sec. 1237) that would require the Secretary of Defense to enter into an agreement

with an independent entity to conduct an assessment of anti-access and area-denial (A2AD) strategies and capabilities that pose a threat to security in the Asia-Pacific region and strategies to mitigate such threats.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to task an independent entity to conduct an assessment of the ability of the DOD to counter A2AD strategies, capabilities, and other key technologies that could be implemented by potential adversaries.

In the annual report to Congress on “Military and Security Developments Involving the People’s Republic of China 2014,” the Department of Defense notes that China continues to sustain investments in key anti-access and area denial capabilities to deter or counter third-party intervention in the region. The Under Secretary of Defense for Acquisition, Technology and Logistics has warned that America’s “technological superiority is not assured,” and that “the Department of Defense is being challenged in ways that I have not seen for decades, particularly in the Asia-Pacific region.” We share this concern and believe that an independent assessment could help focus the Department’s investments and strategic thinking on these challenges.

We remain concerned by questions regarding the relative U.S. advantages in technological capabilities, which could be undercut as advanced technologies continue to proliferate. The potential for greater technological parity among adversaries carries the risk of U.S. military forces operating without the traditional level of overmatch needed to succeed swiftly in a contingency, which raises further questions about the impact that the loss of technological superiority would have on the freedom of U.S. action in securing national security objectives. These questions merit examination in the assessment.

Elsewhere in this Act, we require the Secretary of Defense to report on the Department’s munitions strategy for United States Pacific Command, based on a provision in the House bill (sec. 1234). However, we believe that some of the reporting elements contained in the House bill would be better suited to this independent assessment. These include assessing other countries’ munitions programs, capabilities, and technologies that could challenge U.S. deployed forces and military systems, and providing recommendations for how the United States can counter these challenges or restore, maintain, or expand U.S. military technological advantages in munitions.

We expect, as part of the information, data, resources, and analyses provided to the independent entity, the Department also provide a baseline description of the counter-A2AD policies, strategies, force posture, programs, capabilities, systems and technologies that are currently in place or funded.

Sense of Congress reaffirming security cooperation with Japan and the Republic of Korea (sec. 1258)

The House bill contained provisions (sec. 1238 and 1239) that would express the sense of Congress to reaffirm the U.S. security commitment to Japan and the Republic of Korea.

The Senate committee-reported bill contained no similar provision.

The agreement includes a merger of the two House provisions with clarifying amendments.

Report on maritime security strategy in the Asia-Pacific region (sec. 1259)

The provision would also require an annual briefing on the military to military engagement with the People's Republic of China.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We direct that, not later than March 15, 2015, the Secretary of Defense shall provide the congressional defense committees a briefing (in classified form, if appropriate) on the following:

(1) An assessment of the military to military engagements between the United States and the People's Republic of China in the previous 12 months, before March 15, 2015, including an assessment of the success of such engagements in meeting the objectives of the Commander of the United States Pacific Command for such engagements; and

(2) A detailed description of all planned and potential military to military engagements between the United States and the People's Republic of China for the next 12 months, after March 15, 2015, including the objectives of such engagements.

The Secretary would be required to make a determination that: (1) The product or service is to be used only in support of DOD activities in AFRICOM; (2) The limit on competition or preference for Djiboutian products or services is vital to the national security interest of the United States; (3) The Djiboutian product or service is of equivalent quality to that which would have been otherwise acquired; and (4) The limitation or preference will not adversely affect U.S. military or stability operations in AFRICOM or the U.S. industrial base. The authority provided in this section would terminate on September 30, 2018.

The Senate committee-reported bill contained a provision (sec. 828) that would provide DOD missions in Africa with a limited procurement authority giving a preference to products and services produced in Africa.

The agreement includes the House provision.

Should the Secretary secure additional long-term agreements that provide for basing arrangements to support U.S. military operations, particularly counterterrorism operations, support to U.S. Department of State evacuation requirements, or force protection operational requirement of AFRICOM, we will consider a comparable acquisition preference.

Treatment of the Kurdistan Democratic Party and the Patriotic Union of Kurdistan under the Immigration and Nationality Act (sec. 1264)

The House Bill included a provision (sec. 1250) that would limit the availability of fiscal year 2015 funds to integrate missile defense systems of China into missile defense systems of the United States. It would also limit the availability of funds to integrate missile defense systems of Russia into missile defense systems of the United States if such integration would undermine the security of the United States or the North Atlantic Treaty Organization (NATO), unless the Secretary of Defense could certify that Russia had met certain specified conditions.

A proposed amendment to the Senate committee-reported bill (amendment number 3704) contained a provision that would limit the availability of fiscal year 2015 funds to integrate missile defense systems of China into missile defense systems of the United States.

The agreement includes a provision that would limit the availability of fiscal year 2015 funds to integrate missile defense systems of China into missile defense systems of the United States, and would express the sense of Congress that missile defense systems of Russia should not be integrated into missile defense sys-

tems of NATO if such integration undermines the security of the United States or NATO, respectively.

Limitation on availability of funds to implement the Arms Trade Treaty (sec. 1266)

We agree with the NATO Wales Summit Declaration, issued by heads of state on September 5, 2014, that it is important that the NATO member states "reverse the trend in declining defence budgets, to make the most effective use of our funds and to further a more balanced sharing of costs and responsibilities."

We, therefore, support NATO member states like the Republic of Poland that are planning to invest significantly in the modernization of their defense capabilities, including Poland's decision to procure air and missile defense systems for the Polish Army by 2022. We understand Poland's overall investment plan will bring it above the 2 percent of gross domestic product pledge for NATO members' national defense spending, which was reaffirmed by NATO in Wales. We believe these are important investments that could contribute to key alliance security commitments.

We direct the Secretary of Defense to report to the congressional defense committees, and the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House, not later than 60 days after enactment of this Act, on the benefits to the security of the Alliance that would result from the procurement of interoperable American air and missile defense technology by NATO members.

PART II—RESTRICTIONS AND LIMITATIONS

Prohibition on use of funds for specified purposes (sec. 1331)

The Senate committee-reported bill contained a provision (sec. 1331) that would prohibit the use of Cooperative Threat Reduction funds for peacekeeping-related activities, housing, environmental restoration, job retraining, and defense conversion. The provision further prohibits funding for eliminating conventional weapons unless they can be reasonably used or adapted for use to deliver chemical, nuclear or biological weapons.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would make technical and clarifying changes to the provision.

Requirement for on-site managers (sec. 1332)

The Senate committee-reported bill contained a provision (sec. 1332) that would require, before obligating any Cooperative Threat Reduction funds for a project in the former Soviet Union or a project that involves dismantlement, destruction, storage or con-

struction of a facility or for which the total program funding exceeds \$50,000,000, that there shall be appointed an on-site manager from employees of the Federal Government.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would make technical and clarifying changes to the provision.

Limitation on use of funds until certain permits obtained (sec. 1333)

The Senate committee-reported bill contained a provision (sec. 1333) that would direct the Secretary of Defense to seek to obtain all permits required for construction of a project in states of the former Soviet Union before obligating significant amounts of program funding for that phase of the project.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require seeking all permits before obligating 40 percent of the total costs of that phase of the project. The agreement also includes an amendment that would make technical and clarifying changes to the provision.

Limitation on availability of funds for Cooperative Threat Reduction activities with Russian Federation (sec. 1334)

The House bill contained a provision (sec. 1303) that would limit Cooperative Threat Reduction funding in fiscal year 2015 to the Russian Federation until the Secretary of Defense, in coordination with the Secretary of State, certifies to the appropriate congressional committees that Russia is respecting the sovereignty of Ukrainian territory, no longer acting inconsistently with the Intermediate-range Nuclear Forces Treaty, and in compliance with the Treaty on Conventional Armed Forces in Europe. The provisions would also include a waiver for the Secretary of Defense, pending a notification, in coordination with the Secretary of State, to the appropriate congressional committees that such contact or cooperation is in the national security interest of the United States and a period of 30 days has elapsed following the notification.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would prohibit funding for Cooperative Threat Reduction programs in Russia beyond fiscal year 2015 without specific authorization from Congress.

We support threat reduction programs and understand the importance of the Cooperative Threat Reduction (CTR) program, but we also believe that the traditional manner in which the program's activities have been carried out in the Russian Federation is no longer necessary and no longer sustainable. While there still may be areas of technical cooperation that are of mutual benefit, such as the successful cooperative effort to rid Syria of chemical weapons and materials, this work in the future should be focused on specific threats, and not just a continuation of effort. Moreover, the CTR program may not be the most appropriate mechanism under which future cooperative work in Russia is conducted. The United States relationship with Russia has changed fundamentally and

the CTR work in the Russian Federation is concluding. We believe that securing and destroying nuclear weapons and nuclear material is now a Russian responsibility and one that the United States should no longer fund without Russian cooperation. Any work proposed by the Department under CTR in the future with the Russian Federation will be carefully reviewed and subject to specific authorization.

PART III—RECURRING CERTIFICATIONS AND REPORTS

Annual certifications on use of facilities being constructed for Department of Defense Cooperative Threat Reduction projects or activities (sec. 1341)

The Senate committee-reported bill contained a provision (sec. 1341) that would require annual certification to the congressional defense committees for each facility of a project or activity under the program for which construction occurred during the preceding fiscal year, whether the facility will be used for its intended purpose by the state of the former Soviet Union where it is constructed, whether the government of such state remains committed to the use of such facility for its intended purpose, and whether the actions needed to ensure security at the facility have been taken.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would replace “state of the former Soviet Union” with “foreign country.” The agreement also includes the Senate provision with an amendment that would make technical and clarifying changes to the provision.

Requirement to submit summary of amounts requested by project category (sec. 1342)

The Senate committee-reported bill contained a provision (sec. 1342) that would require, in the annual report and budget submission for the Cooperative Threat Reduction program, a descriptive summary of the amounts requested for each project category for the current and following fiscal year and a descriptive summary for each project category of the amounts obligated and expended in the prior fiscal year and the current fiscal year.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would make technical and clarifying changes to the provision.

Given the uncertainty of the current and projected fiscal environment, the availability of equipment needed to sustain and modernize the National Guard and Reserve Components as an operational reserve and for their domestic support missions, to include legacy aircraft as part of the Aerospace Control Alert (ACA) mission, remains a concern. We believe, therefore, additional funds are necessary to reduce high priority operational and dual-use equipment shortfalls. The funds may also be used by the National Guard and Reserve Components for the procurement of: aircraft, including associated replacements or upgrades for avionics, radars, and fuel tanks; tactical missiles; wheeled and tracked combat and tactical vehicles, including associated replacements or upgrades for mobility, survivability, and lethality, such as weapons stations; ammunition; small arms; tactical radios; non-system training devices; command, control, and logistics automation systems; shelters, and other critical dual-use items.

The House bill contained a provision (sec. 1523) that would prohibit the use of fiscal year 2015 Department of Defense (DOD) funds for the Afghanistan Infrastructure Fund (AIF) until all prior-year funds for the AIF have been obligated or expended.

The Senate committee-reported bill contained a similar provision (sec. 1524) that would prohibit the use of fiscal year 2015 DOD funds for the AIF.

The agreement includes the Senate provision.

Afghanistan Security Forces Fund (sec. 1532)

The House bill contained a provision (sec. 1521) that would continue existing limitations under section 1513 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended, on the use of funds in the Afghanistan Security Forces Fund (ASFF).

The Senate committee-reported bill contained a similar provision (sec. 1523).

The agreement includes the House provision with an amendment that would also extend the authority under subsection 1531(d) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66) to accept certain equipment procured using ASFF funds and to treat such equipment as Department of Defense stocks. The agreement would condition the acceptance of equipment procured with ASFF funds authorized under this Act on: (1) the Secretary of Defense submitting to the congressional defense

committees a detailed report on the equipment procurement process in Afghanistan; and (2) the Commander, U.S. Forces Afghanistan making certain determinations regarding the equipment to be accepted under this authority. These determinations would be provided to the congressional defense committees as part of the quarterly reports on the exercise of this authority.

In extending the authority under subsection 1531(d) of Public Law 113–66, we expect that this authority will be utilized only in limited circumstances and should not be broadly available for accepting equipment that has been damaged after it was transferred to the Afghan security forces.

Joint Improvised Explosive Device Defeat Fund (sec. 1533)

The House bill contained a provision (sec. 1522) that would authorize various transfer authorities, reporting requirements, and other associated activities for the Joint Improvised Explosive Device (IED) Defeat Fund, as managed by the Joint IED Defeat organization.

The Senate committee-reported bill contained a similar provision (sec. 1522) that would authorize the Joint Improvised Explosive Device Defeat Fund and would thereby provide the Director of the Joint Improvised Explosive Device Defeat Organization (JIEDDO) with the authority to investigate, develop, and provide equipment, supplies, services, training, facilities, personnel, and funds to assist United States forces in the defeat of improvised explosive devices for Operation Enduring Freedom or any successor operation to that operation. The provision would also extend JIEDDO's authority with respect to homemade explosives, and would sunset this authority on December 31, 2015. The provision would also direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to present to the congressional defense committees a plan to consolidate any enduring functions of the stated organizations, capabilities, and funding into an appropriate organization identified as part of that review.

The agreement includes the Senate provision with a clarifying amendment.

Counterterrorism Partnerships Fund (sec. 1534)

A proposed amendment to the Senate committee-reported bill (amendment number 3875) contained a provision that would authorize the Counterterrorism Partnerships Fund.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

European Reassurance Initiative (sec. 1535)

A proposed amendment to the Senate committee-reported bill (amendment number 3875) contained a provision (sec. 1527) that would specify the purposes for which amounts authorized to be appropriated for the European Reassurance Initiative (ERI) could be used and provide other limitations on the use of such funds.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment clarifying that for fiscal year 2015 \$1.0 billion is authorized

to be appropriated in Overseas Contingency Operations funds for the ERI. The amendment would also provide that of these funds not less than \$75.0 million would be available for programs, activities, and assistance to support Ukraine, and not less than \$30.0 million would be available for programs and activities to build the capacity of European allies and partner nations. Amounts specified for the ERI fund would be available for the purposes of ERI through September 30, 2016.

We are deeply concerned about the ongoing violations of Ukraine's sovereignty and territorial integrity and note that a provision in another section of this title expresses the sense of Congress in support of providing Ukraine military assistance, both non-lethal and lethal assistance, that is defensive and non-provocative.

We are also concerned about the potential spread of the unconventional and hybrid warfare tactics used by Russia in Ukraine to other countries in the region, potentially including the Baltic countries, Moldova, and Georgia. We urge the Secretary of Defense to devote the appropriate level of planning and resources, including resources under the ERI, to countering the threat posed by these unconventional and hybrid warfare tactics.

Plan for transition of funding of United States Special Operations Command from supplemental funding for overseas contingency operations to recurring funding for future-years defense programs (sec. 1536)

The Senate committee-reported bill contained a provision (sec. 1521) that would require the Secretary of Defense to provide the congressional defense committees, as part of the fiscal year 2016 budget request, with a plan to fully transition appropriate U.S. Special Operations Command funding from the Overseas Contingency Operations budget to the base budget over the future years defense program to maintain critical and enduring special operations capabilities.

The House bill contained no similar provision.

The agreement includes the Senate provision.

LEGISLATIVE PROVISION NOT ADOPTED

Codification of Office and Management and Budget criteria

The House bill contained a provision (sec. 1524) that would require the Secretary of Defense to implement specified criteria in requests for Overseas Contingency Operations (OCO).

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the criteria for OCO funding requests developed by the Office of Management and Budget (OMB) for deciding whether funding for programs properly belongs in the base or OCO requests have not been updated in over 4 years. While these criteria have been somewhat successful in delineating between these two sources of funding and have facilitated OCO funding requests for the Department of Defense (DOD), there have been significant fact-of-life world events which dictate a need to re-examine and update those

criteria. It is also unclear how the guidance is applied to DOD reprogramming requests submitted to Congress for emergent requirements. OMB should ensure the criteria remain relevant and adaptable for evaluating DOD budget and reprogramming requests. We encourage DOD to evaluate the OCO criteria on a regular basis to ensure proper delineation of base and OCO budget requests. We would expect OMB to update the OCO criteria in time to support the FY 2016 budget submission.

TITLE XVI—STRATEGIC PROGRAMS, CYBER, AND INTELLIGENCE
MATTERS

Subtitle A—Space Activities

Department of Defense Space Security and Defense Program (sec. 1601)

The House bill contained a provision (sec. 1601) that states a sense of Congress that critical U.S. space systems face a growing foreign threat, that both the People's Republic of China (PRC) and the Russian Federation are developing capabilities to disrupt the use of space by the United States during a conflict, and that a fully developed, multi-faceted approach is needed to deter and defeat any adversary's acts of aggression in outer space. The provision directs the Secretary of Defense to submit a report to the congressional defense committees not later than 180 days after the date of the enactment of this Act that assesses the ability of the Department of Defense to deter and defeat any adversary's act of aggression in outer space. In addition, this section would direct the Secretary, acting through the Office of Net Assessment, to conduct a study and provide a report to the congressional defense committees not later than 1 year after the date of the enactment of this Act of potential alternate defense and deterrent strategies in response to the existing and projected counterspace capabilities of PRC and the Russian Federation.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Evolved expendable launch vehicle notification (sec. 1602)

The House bill contained a provision (sec. 1602) that would direct the Secretary of the Air Force to provide certain congressional committees with notification of each change to the Evolved Expendable Launch Vehicle (EELV) acquisition plan and schedule as compared to the plan and schedule included in the budget submitted by the President for fiscal year 2015. The notification would include an identification of the change, a national security rationale for the change, the impact of the change on the EELV block buy contract, the impact of the change on the opportunities for competition for certified EELV launch providers, and the costs or savings of the change. The notification requirement would apply to fiscal years 2015, 2016, and 2017.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the notification be sent to the appropriate congressional committees at the time of the budget submission for fiscal year 2016 and 2017, and it would not require such notification if no change has occurred relative to the fiscal year 2015 budget submission.

Satellite communications responsibilities of Executive Agent for Space (sec. 1603)

The House bill contained a provision (sec. 1603) that would direct the Secretary of Defense to revise Department of Defense (DOD) directives and guidance for the DOD Executive Agent (EA) for Space, with respect to the development of space strategies, architectures and programs for satellite communications.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would add coordination with the commanders of the combatant commands.

We direct the Secretary of Defense to report to the congressional defense committees, within 90 days of the enactment of this Act, on DOD's satellite communications organization structure. The report shall include a review of the efficiency and effectiveness of the DOD's current satellite communications organizational structure. It shall also include a recommendation to strengthen the DOD's leadership and acquisition structure of satellite communications in a manner which improves strategic planning and lowers costs through more efficient acquisition approaches to meet the DOD's related requirements.

Specifically, the Secretary shall assess the merits and challenges of designating the Commander of the Air Force Space Command's Space and Missile Systems Center as the DOD's single acquisition agent for wideband satellite communications not later than fiscal year 2017. If the Secretary disagrees with this proposition the report must demonstrate and give a plan to implement an organization structure that brings coherency to the satellite communications acquisition process. The acquisition of commercial satellite communications is currently at best ad hoc, expensive, and reliant on Overseas Contingency Operations funding with little long-term planning, and is not strategically and efficiently aligned with the acquisition of military wideband satellite communications.

Rocket propulsion system development program (sec. 1604)

The House bill contained a provision (sec. 1604) that would direct the Secretary of Defense to develop a next-generation liquid rocket engine authorized at \$220.0 million for fiscal year 2015. In carrying out the program, the Secretary would be required to coordinate with the Administrator of the National Aeronautics and Space Administration, to the extent practicable. The provision also contained a sense of Congress that the engine be made in the United States, meet the requirements of the national security space community, developed not later than 2019 using full and open competition, and available for purchase by all space launch providers of the United States.

The Senate committee-reported bill contained a similar provision (sec. 1629) that would require the Secretary of Defense to develop a program plan for the production of a liquid rocket engine to support national security launch missions by no later than 2019.

The agreement includes the House provision with an amendment that would direct the Secretary of Defense to develop a rocket propulsion system that is made in the United States, is developed no later than 2019 using full and open competition, meets the requirements of the national security space community, and is available for purchase by all space launch providers of the United States.

We note that this provision is not an authorization of funds for the development of a new launch vehicle. This provision is for the development of a rocket propulsion system to replace non-allied space launch engines by 2019.

The Secretary should coordinate with the Administrator of the National Aeronautics and Space Administration, to the extent practicable, to ensure that the rocket propulsion system developed under subsection meets objectives that are common to both the national security space community and the civil space program of the United States.

Pilot program for acquisition of commercial satellite communication services (sec. 1605)

The House bill contained a provision (sec. 1605) that would allow the Secretary of Defense to develop and execute a pilot program to examine the feasibility of expanding the use of working capital funds to acquire commercial satellite communications services to meet Department of Defense requirements.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment that would change the report due date from 150 days after enactment to 90 days. It also changes the budgetary authority from commercial satellite communications to satellite communications, and makes other administrative modifications.

Update of National Security Space Strategy to include space control and space superiority strategy (sec. 1606)

The House bill contained a provision (sec. 1606) that would extend the analysis required by section 911(d) of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) through fiscal year 2030.

The Senate committee-reported bill contained a similar provision (sec. 1621) that would direct the Secretary of Defense, in consultation with the Director of National Intelligence, to update the space control and space superiority strategy pursuant to the Space Posture Review conducted under section 913 of the National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417).

The agreement includes the Senate provision with an amendment that would extend the analysis required by section 911(d) of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) through fiscal year 2030, and make other clarifying changes.

Allocation of funds for the Space Security and Defense Program; report on space control (sec. 1607)

The Senate committee-reported bill contained a provision (sec. 1622) that would require a preponderance of the funds used within the Space Security and Defense Program be allocated to offensive space control and active defense strategies with a statement on the use of such funds at the time of the President's budget submission to Congress.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would change the word "preponderance" to "majority," require the development of the capabilities in addition to strategies, require a review of the appropriate types of funding for the program, and sunset the provision in 5 years from the date of enactment of this Act.

Prohibition on contracting with Russian suppliers of rocket engines for the evolved expendable launch vehicle program (sec. 1608)

The Senate committee-reported bill contained a provision (sec. 1623) that would prohibit the Secretary of Defense from entering into a new contract or renewing a current contract for space launch activities from any person if that person purchases supplies critical for space launch activities covered by the contract from a Russian entity. The provision contained a waiver from the prohibition for U.S. national security interests and if space launch services and capabilities could not be obtained at a fair and reasonable price without the purchase of supplies critical for space launch activities from a Russian entity.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would prohibit the Secretary of Defense from awarding or renewing a contract for the procurement of property or services for space launch activities under the Evolved Expendable Launch Vehicle program if the contract carries out such activities using rocket engines designed or manufactured in the Russian Federation. The provision includes the waiver from the Senate provision. The provision exempts the placement of orders or the exercise of options under contract FA8811-13-C-0003, awarded on December 18, 2013, or unless the Secretary, upon advice of the General Counsel of the Department of Defense, certifies to the congressional defense committees that the offeror of a contract has provided sufficient documentation to conclusively demonstrate that prior to February 1, 2014, the offeror had either fully paid for or entered into a legally binding commitment for rocket engines designed or manufactured in the Russia Federation.

Assessment of evolved expendable launch vehicle program (sec. 1609)

The Senate committee-reported bill contained a provision (sec. 1624) that would require the Government Accountability Office to assess the advisability of the Secretary of Defense to require that launch providers establish or maintain business systems complying with the data requirements and cost accounting standards of the Department of Defense, including certified cost or price data.

The House bill contained no similar provision.

The agreement includes the Senate provision, with a modification to the date the report is due.

Competitive procedures required to launch payload for mission number five of the Operationally Responsive Space Program (sec. 1610)

The Senate committee-reported bill contained a provision (sec. 1627) that would require competitive procedures be used to launch the payload for the Operationally Responsive Space program mission number five.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Availability of additional rocket cores pursuant to competitive procedures (sec. 1611)

The Senate committee-reported bill contained a provision (sec. 1626) that would, based upon the Fiscal Year 2015 National Security Space Launch Forecast, require the Secretary of Defense to make available during fiscal year 2015 one additional rocket core for open competition. The provision also requires that between fiscal years 2015 and 2017, one additional competitive rocket core shall be made available unless the Secretary determines that there is no practicable way to implement this requirement while remaining in compliance with the terms and conditions of the 36 rocket core block buy under the Evolved Expendable Launch Vehicle (EELV) program. Upon making such a determination, the Secretary shall certify within 45 days that there is no practicable way to add the second additional rocket core for open competition as well as describing the basis for such a determination and providing both to the congressional defense committees. A proposed amendment to the Senate committee-reported bill (amendment number 3824) contained a provision that would make technical and conforming changes.

The House bill contained no similar provision.

The agreement includes the Senate provision with technical and conforming amendments.

Limitations on availability of funds for weather satellite follow-on system and Defense Meteorological Satellite program (sec. 1612)

The House bill contained a provision (sec. 215) that would direct the Secretary of the Air Force to place the last remaining satellite of the Defense Meteorological Satellite Program (DMSP) on the launch manifest for the Evolved Expendable Launch Vehicle (EELV) program. Additionally, this section would direct the Secretary of the Air Force to establish an additional launch, for acquisition in fiscal year 2015, under the EELV program, using full and open competition among certified providers. The House bill would also fence 75 percent of the funds for the weather satellite follow-on system until the Secretary submits to the congressional defense committees the plan to meet the meteorological and oceanographic collection requirements validated by the Joint Requirements Oversight Council.

The Senate committee-reported bill contained a provision (sec. 1628) that would prohibit funding the storage of the last DMSP unless the Secretary of Defense certifies to the congressional defense committees that the Department of Defense (DOD) intends to launch the satellite, will have sufficient funding to do so in the future years defense program, and that storing the satellite until a launch in 2020 is the most cost-effective approach to meeting the requirements of DOD.

The agreement includes the House provision with an amendment that removes both the direction to launch the DMSP satellite and the addition of a competition launch. The agreement would limit 50 percent of the funds for the follow-on weather satellite until the Secretary of Defense submits to the congressional defense committees a plan to meet the meteorological and oceanographic collection requirements of the Joint Requirements Oversight Council, including the requirements of the combatant commands, military departments and agencies of the DOD. The Government Accountability Office (GAO) shall review the plan and the Analysis of Alternatives to determine if it meets best practices and fully addresses the concerns of the acquisition, operational and user communities, including how DOD assessed and dealt with cost, schedule and risks posed by each alternative considered.

The agreement also includes a prohibition on storage of DMSP, unless the Secretary of Defense intends to launch the satellite and that storing the satellite until the anticipated launch is the most cost-effective approach to meeting the requirements of DOD. If the Secretary of Defense decides not to launch the satellite, the Secretary of Defense must certify that the related requirements of the DOD will be met. The agreement also includes a review of the certification report by GAO.

Limitation on availability of funds for space-based infrared systems space data exploitation (sec. 1613)

The House bill contained a provision (sec. 216) that would limit obligation or expenditure of funds authorized by this Act to not more than 50 percent for the data exploitation under the Space-Based Infrared Systems (SBIRS) space modernization initiative, which funds modernization and evolution of technologies to meet the SBIRS mission, until the Secretary of the Air Force delivers a certification to the congressional defense committees that the limited funds available for this effort will be used in support of data exploitation of the current SBIRS program of record, including the scanning and staring sensor; or that the data from the current SBIRS program of record, including the scanning and staring sensor, is being fully exploited and no further efforts are warranted.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of the Air Force make the certification as the Department of Defense Executive Agent for Space.

We direct the Chairman of the Joint Chiefs of Staff to conduct an overhead persistent infrared assessment. Such assessment shall include input from the Joint Staff and each of the combatant commands, including the component commands, detailing how they

currently integrate, and plan to integrate, the use of overhead persistent infrared capabilities to pursue their assigned mission areas. Such assessment shall be delivered to the congressional defense committees in the form of a report by April 1, 2015.

Limitations on availability of funds for hosted payload and wide field of view testbed of the space-based infrared systems (sec. 1614)

The House bill contained a provision (sec. 217) that would limit 50 percent of the funds authorized to be appropriated by this Act for hosted payloads and wide field of view testbed alternative approaches to the Space-Based Infrared Systems (SBIRS) program of record until completion and briefing to the appropriate congressional committees on the analysis of alternatives (AOA).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would release 75 percent of the funds authorized to be appropriated upon completion and submittal of the AOA to the appropriate congressional committees, with the remaining 25 percent to be released 30 days after receiving the briefing as described in the House provision.

We direct the U.S. Comptroller General of the United States to review the AOA for SBIRS to determine the extent that the Department met AOA best practices and fully addressed the concerns of the acquisition, operational, and user communities. Further, the Comptroller General shall review how the Department identified the requirements and assessed and addressed the cost, schedule, and risks posed for each alternative in the AOA. The Comptroller General shall provide the results of the review to the appropriate congressional committees within 180 days from receipt of the AOA, and also provide an interim briefing within 90 days.

Limitations on availability of funds for protected tactical demonstration and protected military satellite communications testbed of the advanced extremely high frequency program (sec. 1615)

The House bill contained a provision (sec. 218) that would limit 50 percent of the funds authorized to be appropriated by this Act for the protected tactical demonstration and protected military satellite communications testbed alternative approaches to the Advanced Extremely High Frequency (AEHF) program of record until completion and briefing to the congressional defense committees on the analysis of alternatives (AOA).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would release 75 percent of the funds authorized to be appropriated upon completion and submittal of the AOA with the remaining 25 percent released 30 days after receiving the briefing as described in the House provision. The agreement also includes other clarifying amendments that make clear the restriction is not intended to limit technology insertions to current satellite communication programs of record.

We direct the Comptroller General of the United States to review the reliability of the MILSTAR system, including terminals and maintenance and its effect on readiness as well as the phasing of the AEHF and Family of Advanced Beyond the line of sight Terminals (FAB-T) system to determine whether there will be a timely replacement of the MILSTAR system so as to not further degrade reliability and readiness of the existing communications architecture. The Comptroller General shall present an initial assessment to the congressional defense committees in the form of a briefing no later than March 31, 2015, with a final briefing no later than September 30, 2015.

We also direct the Comptroller General to review the AOA for AEHF to determine the extent that the Department of Defense (DOD) met AOA best practices and fully addressed the concerns of the acquisition, operational, and user communities. Further, the Comptroller General shall review how DOD identified the requirements and assessed and addressed the cost, schedule, and risks posed for each alternative in the AOA. The Comptroller General shall provide the results of the review to the congressional defense committees within 180 days from receipt of the AOA, and also provide an interim briefing within 90 days.

Study of space situational awareness architecture (sec. 1616)

The Senate committee-reported bill contained a provision (sec. 1630) that would direct the Secretary of Defense to task the Defense Science Board to assess the architecture of the ground and space sensors used for space situational awareness (SSA) for both defensive and offensive space operations over a 5-, 10-, and 20-year budget plan. The assessment shall also include ground systems to task the sensors and process the data.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the report to have an unclassified summary and a classified appendix, as required.

Briefing on range support for launches in support of national security (sec. 1617)

The House bill contained a provision (sec. 1614) that would establish an executive agent for the Tactical Exploitation of National Capabilities (TENCAP) program. The executive agent would report directly to the Under Secretary of Defense for Intelligence, and would be responsible for working with the combatant commands, military services, and intelligence community to develop methods to increase warfighter effectiveness through the exploitation of national capabilities and to promote cross-domain integration of such capabilities into military operations, training, intelligence, surveillance, and reconnaissance activities. The provision also would require the TENCAP executive agent to provide an annual briefing to the congressional defense and intelligence committees for fiscal years 2016–20 on the investments, activities, challenges, and opportunities in carrying out the TENCAP program.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would make technical and conforming changes regarding the designation of a TENCAP executive agent. We agree that the Undersecretary of Defense for Intelligence should designate a TENCAP executive agent through the use of an existing billet. We do not intend to create new standalone positions to support this function.

This section would also limit 50 percent of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 of SOCOM Major Force Program–11 procurement, defense-wide, and research, development, testing, and evaluation, defense-wide, until such assessment is received.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the reporting requirements and the limitation on funds and add a requirement that the Comptroller General of the United States provide review and provide an assessment of the required report.

- (1) the separation of the National Intelligence Program (NIP) budget from the DOD budget;
- (2) the consolidation of the NIP budget within DOD; or
- (3) the establishment of a new appropriations account or appropriations account structure for the NIP budget.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Personnel security and insider threat (sec. 1628)

The Senate committee-reported bill contained a provision (sec. 1654) that would require the Secretary of Defense to establish an interim continuous evaluation (CE) system for personnel security; use this interim system to develop policies and procedures for an objective system; engineer CE systems to interface with an automated insider threat detection and prevention system; acquire CE capabilities competitively based on advanced commercial technology; establish a multi-disciplinary team to support the development of an automated insider threat capability; and create an executive committee of senior officials to ensure that the insider threat program is appropriately coordinated and resourced.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the Secretary to report to Congress on the Department's plans to address the elements contained in the provision.

We also note that the study by the Director of Cost Analysis and Program Evaluation (CAPE) of the Office of Personnel Management's personnel investigation service for the Department of Defense made a number of recommendations for additional phases of CAPE's assessment. We endorse the CAPE recommendations for Phase 2A and 2B actions, specifically: improvements to workflow scheduling, limiting investigations to those requiring access to classified information; establishing a business practice working group to achieve efficiencies (such as cost savings from economies of scale); the efficacy of information technology investments, quality control practices, enhancing competition; and rationalizing the mix of government and contract investigators.

Migration of Distributed Common Ground System of Department of the Army to an open system architecture (sec. 1629)

The Senate committee-reported bill contained a provision (sec. 1655) that would require the Secretary of the Army, within 3 years of the date of enactment of this Act, to migrate the Distributed Common Ground System (DCGS), including the so-called Red Disk or any successor to Red Disk under development at the Army Intelligence and Security Command, to an open systems architecture. The provision would require that the DCGS open systems architecture be compliant with the Defense Intelligence Information Enterprise open architecture.

The House bill contained no similar provision.

The agreement includes this provision.

Subtitle C—Cyberspace-Related Matters

Budgeting and accounting for cyber mission forces (sec. 1631)

The Senate committee-reported bill contained a provision (sec. 1643) that would require that the Secretary of Defense, for fiscal year 2017 and every succeeding year, for the President's annual budget submission and supporting documents, to develop a major force program (MFP) category and program elements for the Department of Defense (DOD) future years defense program for the training, arming, and equipping of the cyber mission forces. The provision would also require the Secretary to assess the feasibility and advisability of establishing a general fund transfer account to execute the funds programmed in the MFP and provide a recommendation to the congressional defense committees by April 1, 2015.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We note that for several years, as the importance of cyber operations investments has grown, the congressional defense committees have been urging DOD to improve how it categorizes and displays its budget justification documentation. In embarking on the process of developing a major force program, we believe it is important for DOD to adopt a taxonomy that remains consistent over several years. We understand that the Department is responding to budget guidance from the Office of Management and Budget, as well as changing priorities from new leadership, but these fluctuations in taxonomy result in an inconsistent and moving baseline that masks real annual changes in budget and execution levels.

Reporting on cyber incidents with respect to networks and information systems of operationally critical contractors (sec. 1632)

The Senate committee-reported bill contained a provision (sec. 1645) that would direct the Secretary of Defense to establish procedures for designating contractors as "operationally critical contractors," notifying such contractors that they have been designated, and requiring designated contractors to report successful penetrations of their computer networks by known or suspected advanced persistent threat actors. The provision narrowly defines an operationally critical contractor as a company designated by the Secretary as a critical source of supply for airlift, sealift, intermodal transportation services, or logistical support that is essential to mobilization, deployment, or sustainment in a contingency operation.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We fully share the concern of industry and the Department of Defense (DOD) about harmonizing reporting on cyber intrusions to eliminate redundant reporting. We direct the Secretary to ensure that contractor reporting to DOD, and the dissemination of such reporting, is coordinated with reporting to the Director of National Intelligence and other government agencies.

Executive agents for cyber test and training ranges (sec. 1633)

The House bill contained a provision (sec. 1621) that would require the Secretary of Defense to establish an executive agent to coordinate and oversee the management of the various cyber and information technology test and training ranges being developed and deployed by the Department of Defense (DOD).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would make technical changes and require the Secretary to designate two cyber range executive agents from among existing DOD personnel, one for test ranges and one for training ranges; and to consult with the Principal Cyber Advisor in designating the executive agents. The amendment also would require the executive agents, in consultation with the DOD Chief Information Officer, to jointly designate a standard language from among existing open source candidates for expressing cyber event and threat data in machine-readable form for use in the Joint Information Environment and the range environment.

We note that for several years, the Armed Services Committees of the Senate and House of Representatives have expressed concerns over how the DOD has managed its cyber range resources. While we recognize that DOD has developed and maintained a core set of capabilities, we have observed first-hand that the lack of coordination of those capabilities has left DOD in a situation where the current ranges do not support the tools and capabilities that cyber operators would use in the real world. Unlike in live training for kinetic operations, in cyberspace, we do not train like we fight. We believe that the integrated plan required by these executive agents is a necessary tool to create standardization between training and operational tools, as well as to ensure that DOD is investing in adequate range resources to meet unit-level training requirements for the force structure being defined by U.S. Cyber Command.

One reason that we have tasked these executive agents to designate a standard language for cyber event and threat data reporting is to better ensure that there is standardization of these capabilities across the range and operational networks. Not only is this a fundamental capabilities needed by cyber forces, it would also set a valuable precedent for ensuring that the capabilities that are used on live, operational networks are the same tools that would be used in a test or training environment. We firmly believe that any standard designated by these executive agents should swiftly be transitioned to use on the operational networks of the Joint Information Environment.

In designating the two required executive agents, we believe that the Secretary should consider two important factors. First, the Test Resource Management Center (TRMC) already fills a similar role for the test range complex, and would make a logical choice to take on the responsibilities for the test range executive agent. Second, we believe that the training range executive agent should be the responsibility of one of the military departments, since they have the operational imperative to maintain training readiness, as well

as the resources to sustain and upgrade training range capabilities over time.

Cyberspace mapping (sec. 1634)

The Senate committee-reported bill contained a provision (sec. 1641) that would require the Secretary of Defense, within 60 days of the date of enactment of this Act, to designate a network or network segment within the Department of Defense (DOD) to support the execution of a pilot program to demonstrate large-scale cyberspace mapping technology, as approved by the Cyber Investment Management Board (CIMB). The provision also would require the Principal Cyber Advisor, within 180 days of enactment of this Act, to recommend policy to the Secretary of Defense regarding the mapping of cyberspace to support the missions of U.S. Cyber Command.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Review of cross domain solution policy and requirement for cross domain solution strategy (sec. 1635)

The Senate committee-reported bill contained a provision (sec. 1642) that would require the Secretary of Defense to review the policies of the Department of Defense, and develop a strategy concerning the procurement, approval, and use of capabilities to transmit information across networks and systems at different security classification levels.

The House bill contained no similar provision.

The agreement includes this provision.

Requirement for strategy to develop and deploy decryption service for the Joint Information Environment (sec. 1636)

The Senate committee-reported bill contained a provision (sec. 1614) that would require the Secretary of Defense to develop a strategy for a decryption service for the Joint Information Environment. The provision would require the strategy for the decryption and re-encryption of communications to enable the inspection of communications content to detect cyber threats and insider threat activity. That strategy would include a requirements definition document, an architecture, a concept of operations, a cost estimate, and an assessment of the security benefit of such a service. The provision would require a briefing on the strategy to be provided to the congressional defense and intelligence committees by October 1, 2015.

The House bill contained no similar provision.

The agreement includes this provision.

Actions to address economic or industrial espionage in cyberspace (sec. 1637)

A proposed amendment to the Senate committee-reported bill (amendment number 3377) contained a provision that would require the President to report annually to appropriate congressional committees on countries that engage in economic or industrial espionage in cyberspace with respect to U.S. trade secrets or propri-

etary information, and on the types of technologies and intellectual property such countries target, what they have succeeded in stealing, and, where known, the incorporation of such stolen property in articles, products, or services. The report also would include the actions the President has taken to diminish such espionage, and the progress made towards that goal.

The provision would authorize the President, pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.), to block and prohibit all transactions in all property and interests in property of each person determined to be knowingly engaged in such espionage, if such property and interests in property are in the United States, come within the United States, or are or come within the possession or control of a U.S. person.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

We urge the President in implementing this provision to harmonize the required reporting on industrial or economic espionage through cyberspace with related reporting, including the biennial report on the threat to U.S. industry from foreign economic collection and industrial espionage required by section 809(b) of Public Law 103–359.

Sense of Congress regarding role of reserve components in defense of United States against cyber attacks (sec. 1638)

The House bill contained a provision (sec. 1622) that would express the sense of Congress that the National Guard has a valuable role to play in defending the United States against cyber attacks.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would recognize the important capabilities and role of all the reserve components.

We are aware that the Army National Guard is pursuing a decision to establish ten Cyber Protection Teams (CPTs), independent of the plans by U.S. Cyber Command to establish 68 CPTs within the active component. While we support a role for the reserve components in Department of Defense planning and organization to deal with cyber threats, we are concerned that such plans are not adequately synchronized with overall planning in this space. In particular, we are concerned about potentially creating parallel structures, personnel and training pathways, and authorities for such forces.

Therefore, we direct the Secretary of the Army to submit a report to the congressional defense committees, within 90 days of the enactment of this Act, on the progress made by the Army National Guard to establish ten CPTs to support preparations to respond to emergencies involving an attack or natural disaster impacting computer networks. The report shall include the following:

- (1) A timeframe for when stationing of the CPTs will be finalized.
- (2) A timeframe for activation of the CPTs and whether the teams will be activated at the same time or staggered over time.
- (3) A description of manning and basing requirements.

(4) The number and location of nominations received for a CPT and the activation date estimate provided in each nomination.

(5) An assessment of the range of stated cost projections included in the nominations.

(6) An assessment of any identified patterns regarding ease or difficulty of staffing individuals with required credentials within particular regions.

(7) Any additional information deemed relevant by the Secretary.

Sense of Congress on the future of the Internet and the .MIL top-level domain (sec. 1639)

The House bill contained a provision (sec. 1090E) that would prohibit the transfer of the responsibilities of the National Telecommunications and Information Administration (NTIA) for Internet domain name system functions until the Comptroller General of the United States submits a report to Congress, within 1 year of the date on which NTIA receives a proposal for the transfer of such responsibilities to the Internet Corporation For Assigned Names and Numbers (ICANN).

The Senate committee-reported bill contained a provision (sec. 1646) that would express the sense of Congress that the Secretary of Defense should:

(1) Advise the President to transfer the remaining role of the United States Government in the functions of the Internet Assigned Numbers Authority (IANA) to a global multi-stakeholder community only if the President is confident that the .mil top level domain and the Internet protocol address numbers used exclusively by the Department of Defense (DOD) for national security will remain exclusively used by DOD; and

(2) Take all necessary steps to sustain the successful stewardship and good standing of the Internet root zone servers managed by DOD components.

The agreement includes the Senate provision with an amendment that would clarify how the Secretary should provide advice in the process, as well as ensure active participation in all transition planning and accountability stress testing.

We understand that the arcane and esoteric process for governing the internet is not conducive to quick or easy understanding by decisionmakers not intimately involved in the process. We fear that the lack of understanding breeds concerns that at face value appear warranted, but upon closer examination may not be valid, or may be easily mitigated. We believe that some improved confidence building measures and transparency over the negotiations process would be helpful in dispelling any misconceptions about the process.

Therefore, we direct the Secretary to submit a report to the Committees on Armed Services of the Senate and House of Representatives on the transition process no later than 180 days after the enactment of this Act. This report should explain DOD's role in the negotiations process, any issues or concerns about the status of negotiations, and any observations related to the accountability stress testing currently underway. Furthermore, we encourage DOD and the National Telecommunications and Information Administration

to provide regular briefings to the Committees on Armed Services of the Senate and House of Representatives, as well as other congressional committees, on the status of transition planning and accountability stress testing.

Subtitle D—Nuclear Forces

Preparation of annual budget request regarding nuclear weapons (sec. 1641)

The House bill contained a provision (sec. 1631) that would amend section 179 of title 10, United States Code, and add a new requirement regarding annual transfers to the Department of Energy (DOE) from the Department of Defense's (DOD) budget authority. Prior to making such transfers, the Secretary of Defense must enter into a memorandum of agreement with the Secretary of Energy as to how the funds will be obligated and expended within the Weapons Activities budget of the National Nuclear Security Administration (NNSA).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that includes a waiver to the certification requirement if the Secretary of Defense determines such waiver is in the national security interest and provides a copy of the agreement between the Secretaries of Defense and Energy describing how the Secretary of Energy will obligate or expend any amounts covered by the transfer of the budget authority to the DOE and an explanation of why the Secretary was not able to certify the previous year's DOD-to-NNSA budget transfers complied with previous DOD-DOE Secretaries' agreements.

Improvement to biennial assessment on delivery platforms for nuclear weapons and the nuclear command and control system (sec. 1642)

The House bill contained a provision (sec. 1637) that would amend section 492(a)(1) of title 10, United States Code, to add “, and the ability to meet operational availability requirements for” after “military effectiveness of”.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Congressional Budget Office review of cost estimates for nuclear weapons (sec. 1643)

The House bill contained a provision (sec. 1640) that would amend 1041(b) of the National Defense Authorization Act for Fiscal year 2013 (Public Law 112–239) to require the Congressional Budget Office (CBO) to submit a report to the congressional defense committees on an annual basis regarding the 10-year cost of nuclear weapons programs.

The Senate committee-reported bill contained a similar provision (sec. 1602) that would amend section 1043 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) to require the CBO to submit such a report 120 days after submission

of the report required by section 1043 for an odd-numbered fiscal year.

The agreement includes the Senate provision with an amendment that would require the CBO report to be submitted by July 1 of each year in which the President submits a report under section 1043 for an odd-numbered fiscal year. The amendment would also require the CBO report to include an estimate of the relative percentage of total defense spending represented by nuclear weapons funding during the 10-year period. Finally, the amendment would require the Director of the CBO to submit a letter to the congressional defense committees if the Director determines a report under section 1043 for an even-numbered fiscal year contains a significant change.

We expect the Director to use their best judgment regarding whether any changes are significant enough to warrant submission of a letter.

Retention of missile silos (sec. 1644)

The House bill contained a provision (sec. 1634) that would require the Secretary of Defense to preserve each intercontinental ballistic missile silo that contains a deployed missile as of the date of the enactment of this Act in, at a minimum, a warm status that enables such silo to remain a fully functioning element of the interconnected and redundant command and control system of the missile field and be made fully operational with a deployed missile.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would make the requirement effective during the period in which the New START Treaty (as defined by section 494(a)(2)(D) of title 10, United States Code) is in effect. The amendment also includes a rule of construction that would enable the Department of Defense to place a silo offline temporarily to perform maintenance activities.

We intend that this provision would require the Secretary to maintain the pertinent silos in a condition that permits them to be returned to operational alert status.

Procurement authority for certain parts of intercontinental ballistic missile fuzes (sec. 1645)

The Senate committee-reported bill contained a provision (sec. 1601) that would give authority to procure commercial parts for intercontinental ballistic missile fuses, notwithstanding 10 United States Code 1502(a), for fiscal year 2015.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Assessment of nuclear weapon secondary requirement (sec. 1646)

The House bill contained a provision (sec. 1634) that would require the Secretary of Defense, in coordination with the Secretary of Energy and the Commander, U.S. Strategic Command, to assess the annual nuclear weapon secondary production requirement needed to sustain a safe, secure, reliable, and effective nuclear deterrent. The Secretary of Defense would be required to submit a re-

port on this assessment to the congressional defense committees within 180 days after the date of the enactment of this Act. This report would be in unclassified form, with a classified annex if necessary, and would be required to include an explanation of the rationale and assumptions that led to the current 50-to-80 per year secondary production requirement, including the factors considered in determining such requirement, and an analysis of whether there are any changes to the 50-to-80 per year secondary production requirement, including the reasons for any such changes.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the report 120 days after the date of enactment.

Certification on nuclear force structure (sec. 1647)

The House bill contained a provision (sec. 1635) that would require that, not later than 90 days after the date of the enactment of this Act, the Chairman of the Joint Chiefs of Staff and the Commander, U.S. Strategic Command, jointly certify that the plan for implementation of the New START Treaty announced on April 8, 2014, will enable the United States to meet its obligations under such treaty in a manner that ensures the nuclear forces of the United States are capable, survivable, and balanced; and maintain strategic stability, deterrence and extended deterrence, and allied assurance.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Advance notice and reports on B61 life extension program (sec. 1648)

The Senate committee-reported bill contained a provision (sec. 1604) that would require the Chairman of the Nuclear Weapons Council and the Commander of U.S. Strategic Command to provide the congressional defense committees with separate reports in advance of any decision to reduce the scope of the B61 Life Extension Program below the level proposed in the fiscal year 2015 Stockpile Stewardship Management Plan.

The provision contained a waiver for national security

including a certification that such consolidation is consistent with the 2012 North Atlantic Treaty Organization (NATO) Deterrence and Defense Posture Review concerning reciprocal non-strategic nuclear weapons reductions by the Russian Federation and an unclassified report explaining why such certification cannot be made with a 30-day wait period. The provision required a report on the cost and burden sharing arrangements of the forward deployed nuclear weapons in place with the NATO and any recommendations for changes to the current arrangement.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require, 90 days before the date on which the Secretary of Defense removes or consolidates United States dual capable aircraft from the EUCOM AOR, the Secretary to congressional defense committees and include a report on how such removal or consolidation is in the national security interests of the United States and NATO and whether the proposed consolidation or removal is affected by the armed forces of the Russian Federation occupying Ukrainian territory, the Russian Federation deploying or preparing to deploy nuclear weapons to Ukrainian territory, the Russian Federation not complying with the Intermediate Nuclear Forces Treaty, and the Russian Federation not complying with the Conventional Forces in Europe Treaty.

Reports on installation of nuclear command, control, and communications systems at headquarters of United States Strategic Command (sec. 1650)

The Senate committee-reported bill contained a provision (sec. 1603) that would require the Commander, U.S. Strategic Command (STRATCOM) to submit an annual report on the installation of nuclear command, control, and communications systems as part of the replacement of the STRATCOM headquarters. The requirement for an annual report would terminate at such time as when the Commander, STRATCOM certifies to the congressional defense committees that all milestones have been completed, and the headquarters building is a fully functioning node in the overall NC3 architecture.

The Government Accountability Office (GAO) shall review the existing milestones and scope of the effort and provide a technical briefing to the congressional defense committees no later than September 30, 2014, as to whether the scope of the current effort is complete, fully integrated, and meets accepted programmatic planning practices.

GAO shall review the report submitted each year and provide a briefing to the congressional defense committees on whether the installation is meeting projected milestones and costs and whether there are outstanding programmatic or technical issues that must be addressed to meet these milestones so that the building can become an operational hub in the overall NC3 network.

The House bill contained no similar provision.

The agreement includes this provision.

Report on plans for response of Department of Defense to INF Treaty violation (sec. 1651)

The House bill contained a provision (sec. 1644) that would require the Missile Defense Agency to develop a plan to test, by 2016, the capability of the Aegis Ashore missile defense system to counter intermediate-range ground-launched cruise missiles. It would also require, if Russia is not in compliance with the Intermediate-range Nuclear Forces (INF) Treaty as of the date of enactment of this Act, the Department of Defense to develop a plan for the research and development of intermediate-range ballistic and cruise missiles.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the Secretary of Defense to submit to the congressional defense committees a report describing any steps being taken or planned to be taken by the Department of Defense in response to Russian actions in violation of its obligations under the INF Treaty. The report would include a description of any plans to conduct research, development, testing or deployment of potential future United States military capabilities, including activities to modify, test, or deploy existing military systems, to deter or defend against the threat of Russian INF-range systems, should such systems be deployed.

Testing and assessment of missile defense systems prior to production and deployment (sec. 1662)

The Senate committee-reported bill contained a provision (sec. 1615) that would require the Secretary of Defense to ensure that, prior to making a final production decision for, and prior to operational deployment of, a new or substantially upgraded interceptor or weapon system of the Ballistic Missile Defense System, sufficient and operationally realistic testing of the system is conducted, and the testing results demonstrate a high probability that the system will work in an operationally effective manner. The provision would also require the Director of Operational Test and Evaluation to provide an assessment to the Secretary of the sufficiency and results of the testing.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Air Force intelligence organization

The House bill contained a provision (sec. 1615) that would express the sense of Congress that the Air Force National Air and Space Intelligence Center provides indispensable intelligence support, and should remain organizationally aligned to the Headquarters Air Staff with reporting through the Vice Chief of Staff. In addition, this section would require the Secretary of the Air Force to submit to the congressional defense committees and the congressional intelligence committees a strategic plan for the intelligence organization of the Air Force, which includes maintaining the National Air and Space Intelligence Center alignment to the Headquarters Air Staff.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the House provision.

We did not recommend including this provision, since the Air Force has provided the plan the House provision would have required and has decided to maintain the National Air and Space Intelligence Center directly aligned to the Headquarters Air Staff. However, we will continue to monitor the Air Force's implementation of its plan.

Authority for Secretary of Defense to engage in commercial activities as security for military operations abroad

The Senate committee-reported bill contained a provision (sec. 1652) that would amend subsections 431 through 437 of title 10, United States Code, to: (1) Allow the Secretary of Defense to employ commercial activities as security for military operations, in addition to existing authority for using such activities for intelligence operations; (2) Direct that reports of audits on commercial activities used as security for intelligence operations as reported to the congressional defense and intelligence committees, and reports on audits of commercial activities used as security for military operations, are reported to the congressional defense committees only; and (3) Make conforming changes throughout these subsections.

The House bill contained no similar provision.

The agreement does not include this provision. We believe that this could be a useful authority, but would have to receive better answers from the Department of Defense (DOD) to questions that were raised after DOD requested this authority. We would reevaluate this request in the future if DOD continues to identify a need for the authority.

Budget increase for Aegis ballistic missile defense

The House bill contained a provision (sec. 1646) that would authorize an increase of \$99.0 million for procurement of Standard

Missile–3 (SM–3) interceptors for the Aegis ballistic missile defense system.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the Secretary’s cyber mission analysis report did not include a certification that the Red Team personnel and capacity in the Air National Guard are no longer required by the Department of Defense, and may not be reduced or reassigned without such a certification.

Independent review of the personnel reliability program of the Department of Defense and the human reliability program of the Department of Energy

The House bill contained a provision (sec. 1632) that would require the Secretary of Defense and the Secretary of Energy to jointly seek to enter into a contract with a federally funded research and development center to conduct an independent review of the Personnel Reliability Program (PRP) of the Department of Defense and the Human Reliability Program of the Department of Energy.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the Department of Defense is currently reviewing its PRP as part of a broader assessment of needs within its nuclear enterprise. We expect this review will offer significant recommendations for modernizing PRP to make it both more effective and more efficient. We further expect that the Department of Energy will apply lessons learned from the Department of Defense’s review to its own, similar program. We will continue close oversight of this matter.

Integrated plan on space launch activities of the Federal Government

A proposed amendment to the Senate committee-reported bill (amendment number 3814) contained a provision that would require the Secretary of Defense and the Administrator of the National Aeronautics and Space Administration to jointly, in coordina-

tion with the National Security Council, the Director of the Office of Science and Technology Policy and the heads of other appropriate agencies of the Federal Government, develop a plan to achieve the effective planning, coordination, and execution for the civil and national security space launch activities of the Federal Government in order to ensure that the mission needs of the United States of reliable, timely, and affordable access to space for all agencies are met in a cost-effective manner.

The House bill contained no similar provision.

The agreement does not include this provision.

We direct the Secretary of Defense, in consultation with the Administrator of the National Aeronautics and Space Administration, and the heads of other appropriate agencies of the Federal Government, to identify and assess opportunities for coordination among Federal agencies in space launch acquisition efforts, and provide a summary of the lessons learned by the Department of Defense and the National Aeronautics and Space Administration regarding their launch service programs. The results of the study shall be provided to the appropriate congressional committees in the form of a briefing no later than December 31, 2015.

Furthermore, we direct the Government Accountability Office (GAO) to assess the results of the study as presented in the briefing to Congress, as well as update the related space launch findings and recommendations reported in the 2012 GAO Annual Report titled "Opportunities to Reduce Duplication, Overlap and Fragmentation, Achieve Savings, and Enhance Revenue." The GAO shall provide the results of the assessment within 90 days of receiving the briefing provided to Congress.

Reports and briefings of Strategic Advisory Group

The House bill contained a provision (sec. 1638) that would require the Commander, U.S. Strategic Command to provide to the congressional defense committees a copy of each briefing and report prepared by his Strategy Advisory Group, including any subgroup thereof and any successor advisory group, provided to him in the previous year.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision. We are aware that the Commander wrote to the Chairman of the House Armed Services Committee on May 19, 2014 and committed to providing the committees with briefings on the materials provided to him by the Strategic Advisory Group. We believe this will be a useful arrangement for the oversight function of the committees. We also believe that, from time to time, it may be necessary to receive copies of these reports, and we look forward to working with the Commander in the event the committees believe that it is necessary. With this understanding, we choose not to adopt section 1638 of the House bill at this time.

We agree that the RAND study “U.S. Space Launch Capability—An Assessment of the Use of Foreign Components”, (December 2013), as required by section 916 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) obviates the need for an additional study at this time.

Sense of Congress on procurement and deployment of capability enhancement II exo-atmospheric kill vehicle

The House bill contained a provision (sec. 1642) that would express the sense of Congress that the Department of Defense (DOD) should not procure an additional Capability Enhancement-II (CE-II) exo-atmospheric kill vehicle for deployment on Ground-Based Interceptors of the Ground-based Midcourse Defense (GMD) system until a successful operationally realistic intercept flight test of the CE-II has occurred.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that, after the House bill was passed, a successful intercept flight test of the GMD system, using an upgraded version of the CE-II kill vehicle, took place on June 22, 2014. This successful flight test result allowed DOD to resume assembly and delivery of GBIs with upgraded CE-II kill vehicles for deployment.

Sense of the Senate on resolution limits on commercial space imagery

The Senate committee-reported bill contained a provision (sec. 1631) that would express the sense of the Senate that the Secretary of Defense should support the relaxation of panchromatic, spectral, and infrared imagery resolution limits on the sale of commercial space imagery. The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that a separate provision, described elsewhere in this report, relates to regional missile defense capabilities of the United States and its allies and partners in several combatant command areas of responsibility.

The agreement also includes amendments that would clarify the duties of such a commission.

We expect the Army and ARNG to immediately proceed with appropriate planning and preparation activities for the transfer of up to 48 AH–64 Apache aircraft prior to March 31, 2016. Such preparations should include all necessary personnel and materiel-related actions required to facilitate such transfers. We also expect the Army and ARNG to continue the planning necessary for the potential implementation of the rest of the Army's Aviation Restructure Initiative so that disruptions to the readiness of the Army and ARNG are minimized in the event that Congress approves additional elements of the Army's plan beyond March 31, 2016.

TITLE XXI—ARMY MILITARY CONSTRUCTION

Summary

The Department of Defense requested authorization of appropriations of \$539.4 million for military construction and \$429.6 million for family housing for the Army for fiscal year 2015.

The agreement includes authorization of appropriations of \$543.4 million for military construction and \$429.6 million for family housing for the Army for fiscal year 2015.

The budget request included \$96.0 million for the third of six planned phases of construction of a Command and Control Facility at Fort Shafter, Hawaii. We understand that all six phases are necessary to provide for a complete facility that meets the requirements of U.S. Army Pacific. Furthermore, we understand that combining the remaining four phases into a single authorized project would save the Army significant military construction funding and accelerate facility construction by up to 4 years.

Therefore, the agreement includes authorization of \$311.4 million for the remaining four phases of the Command and Control Facility at Fort Shafter, Hawaii. This authorization assumes at least 10

percent savings will be achieved through construction and contracting efficiencies. Consistent with these efficiencies, the agreement includes an authorization of appropriations for fiscal year 2015 of \$85.0 million for the first increment of this project.

We believe that it is inappropriate to phase, rather than increment, large military construction projects when each distinct phase does not fully meet the requirements of the user and direct the Army to refrain from requesting similarly phased projects in the future.

We recognize that in difficult budget times military construction funding is often deferred in favor of other priorities and note that the Army's military construction request for fiscal year 2015 is 52 percent less than what was requested for fiscal year 2014. Therefore, the agreement includes authorization of \$15.0 million for a Consolidated Shipping Center at Blue Grass Army Depot, Kentucky, \$46.0 million for a Simulations Center at Fort Hood, Texas, and \$86.0 million for Phase 3 of the Individual Training Barracks Complex at Fort Lee, Virginia, the Army's top unfunded military construction priorities.

TITLE XXII—NAVY MILITARY CONSTRUCTION

Summary

The Department of Defense requested authorization of appropriations of \$1.02 billion for military construction and \$370.4 million for family housing for the Department of the Navy for fiscal year 2015.

The agreement includes authorization of appropriations of \$993.2 million for military construction and \$370.4 million for family housing for the Department of the Navy for fiscal year 2015.

The budget request included \$120.1 million for a Center for Cyber Studies Building in Annapolis, Maryland. We understand the Navy would be unable to expend the full amount of the budget request and, therefore, the agreement includes a \$90.1 million reduction.

We recognize that in difficult budget times military construction funding is often deferred in favor of other priorities and note that the Navy's military construction request for fiscal year 2015 is 40 percent less than what was requested for fiscal year 2014. Therefore, the agreement includes authorization of \$13.8 million for a Regional Ship Maintenance Support Facility at Bangor, Washington, and \$50.7 million for a Radio Battalion Complex at Camp Lejeune, North Carolina, the top unfunded military construction priorities of the Navy and Marine Corps, respectively.

The agreement includes authorization of appropriations of \$846.2 million for military construction and \$327.7 million for family housing for the Air Force in fiscal year 2015.

We recognize that in difficult budget times military construction funding is often deferred in favor of other priorities and note that the Air Force's military construction request for fiscal year 2015 is 30 percent less than what was requested for fiscal year 2014. We recognize that in difficult budget times military construction funding is often deferred in favor of other priorities and note that the Department's military construction request for the guard and reserve components for fiscal year 2015 is 38 percent less than what was requested for fiscal year 2014. Therefore, the agreement includes authorization of \$5.0 million for a Readiness Center in Alamogordo, New Mexico; \$19.0 million for Enlisted Barracks at Yakima, Washington; \$10.8 million for a Vehicle Maintenance Shop in Dagsboro, Delaware; \$13.2 million for a Consolidated Sensitive Compartmented Information Facility at Fort Smith Municipal Airport, Arkansas; \$25.0 million for an Army Reserve Center in Riverside, California; \$26.0 million for an Army Reserve Center in Arlington Heights, Illinois; \$9.3 million for an Army Reserve Center in Starkville, Mississippi; \$47.9 million for a Joint Reserve Intelligence Center in Everett, Washington; and \$14.5 million for a Guardian Angel Operations Facility at Davis-Monthan Air Force Base, Arizona. The agreement includes the requested amount.

Subtitle A—Authorization of Appropriations

Authorization of appropriations for base realignment and closure activities funded through Department of Defense base closure account (sec. 2701)

The House bill contained a provision (sec. 2701) that would authorize appropriations for ongoing activities that are required for base realignment and closure activities.

The Senate committee-reported bill contained a similar provision (sec. 2701).

The agreement includes the House provision.

Subtitle B—Prohibition on Additional BRAC Round

Prohibition on conducting additional Base Realignment and Closure (BRAC) round (sec. 2711)

Subtitle C—Other Matters

The House bill contained a provision (sec. 2722) that would authorize the local government, in whose jurisdiction the military installation is wholly located, to be recognized as the local reuse authority for purposes of managing Base Closure and Realignment (BRAC) reuse planning. This section would also require the Secretary of Defense to submit a report to the congressional defense committees as to excess BRAC property that has not been declared surplus by the Federal Government.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

HUBZones

The Senate committee-reported bill included a provision (sec. 2703) that would modify section 632 of title 15, United States Code, to expand the area around former military installations closed under the Base Realignment and Closure process that can be con-

sidered for purposes of satisfying employee residency requirements under the HUBZone program and would extend the period of applicability from 5 to 8 years.

The House bill contained no similar provision.

The agreement does not include this provision.

Force-structure plans and infrastructure inventory and assessment of infrastructure necessary to support the force structure

The House bill contained a provision (sec. 2721) that would require the Secretary of Defense to submit a report as part of the budget justification documents submitted to Congress in support of the President's budget for the Department of Defense for fiscal year 2016 that details multiple 20-year force structure plans and a comprehensive inventory of worldwide infrastructure. The report would also compare these two items to determine categories of excess in the Department of Defense infrastructure. The Secretary of Defense would also certify whether the need exists for the closure or realignment of additional military installations and whether the Secretary anticipates that each base closure and realignment recommendation would result in annual net savings for each of the military departments within 6 years after the initiation of the additional round of closures and realignments.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that a provision elsewhere in this Act makes clear that nothing in this Act shall be construed to authorize an additional Base Realignment and Closure (BRAC) round. We also note that the Department of Defense and Military Departments have provided testimony about the current estimates of excess infrastructure capacity associated with military installations. However, those estimates are based on outdated data from the analysis done in support of the 2005 BRAC round. The Department of Defense and military departments have also stated that overall force structure reductions may generate additional excess infrastructure capacity. However, we are aware that the military departments are implementing installation management methods that may serve to diminish excess infrastructure capacity.

Due to the force structure changes and infrastructure investments and management strategies that have occurred since the 2005 BRAC round, we believe that excess infrastructure capacity assessments should be based on current infrastructure data and informed by current force structure projections. We believe the Department of Defense has the authority to provide such an updated analysis but to date has not provided such an assessment.

Final settlement of claims regarding caretaker agreement for former Defense Depot Ogden, Utah

The House bill contained a provision (sec. 2723) that would limit any further claim adjudication associated with a caretaker agreement between the City of Ogden, Utah, the Ogden Local Redevelopment Authority, and the Department of the Army. This limitation would be conditioned on a release of claims against the United

States by the City of Ogden and the Ogden Local Redevelopment Authority.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

Subtitle A—Military Construction Program and Military Family Housing Changes

Congressional notification of construction projects, land acquisitions, and defense access road projects conducted under authorities other than a Military Construction Authorization Act (sec. 2801)

The House bill contained a provision (sec. 2801) that would amend section 2802 of title 10, United States Code, to clarify that certain military construction projects, land acquisitions, and defense-access roads projects must be specifically authorized in a Military Construction Authorization Act.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would instead modify section 2802 of title 10, United States Code, to require that the Secretary concerned notify the congressional defense committees at least 15 days prior to the initiation of any construction, land acquisition, or defense-access road project by a military department, Defense Agency, or Department of Defense Field Activity on a military installation that will be carried out pursuant to a provision of law other than a Military Construction Authorization Act.

Modification of authority to carry out unspecified minor military construction (sec. 2802)

The House bill contained a provision (sec. 2802) that would modify section 2805 of title 10, United States Code, by increasing the threshold associated with operation and maintenance funding for minor military construction purposes from \$750,000 to \$1.0 million. This section would also unify the threshold for application of unspecified minor construction from \$2.0 million to \$3.0 million. Finally, this section would authorize the Secretary concerned to make adjustments to the general authority to match area cost factors.

The Senate committee-reported bill contained a similar provision (sec. 2803) that would increase the maximum amount of unspecified minor military construction funding that can be used to correct facility deficiencies that threaten the life, safety, or health of personnel from \$3.0 million to \$4.0 million. The committee recommended an increase in this threshold to reflect its view that life, safety, and health deficiencies are at least equal to, if not more important than, laboratory revitalization for which the unspecified minor military construction threshold is \$4.0 million.

The agreement includes the House provision with an amendment that would remove the authorization to make adjustments to the general authority to match area cost factors and add the Senate

provision increasing the threshold for projects designed to correct facility deficiencies that threaten the life, safety, or health of personnel.

Clarification of authorized use of payments-in-kind and in-kind contributions (sec. 2803)

The Senate committee-reported bill included a provision (sec. 2801) that would clarify the requirement of section 2687(a) of title 10, United States Code, as amended by section 2807 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), that military construction projects built with in-kind payments or in-kind contributions required by bilateral agreements be specifically authorized by law.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would make the provision effective beginning on the later of September 30, 2016, or the date of enactment of an Act authorizing funds for military construction for fiscal year 2017. The provision would also exempt military construction projects funded with payments-in-kind or in-kind contributions that were the subject of negotiation between the United States and a host country as of the date of enactment of this Act. Lastly, the provision would require, until the effective date, notification to the congressional defense committees at least 30 days prior to initiating any military construction project built for Department of Defense personnel outside the United States using payments-in-kind or in-kind contributions and make other conforming changes.

Use of one-step turn-key contractor selection procedures for additional facility projects (sec. 2804)

The House bill contained a provision (sec. 2803) that would modify section 2862 of title 10, United States Code, by expanding the existing authority to use turn-key selection procedures for military construction projects to include certain repair projects and facility construction associated with authorized security assistance activities.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Limitations on military construction in European Command area of responsibility and European Reassurance Initiative (sec. 2805)

The House bill contained a provision (sec. 2804) that would extend the prohibition previously included in section 2809 of the Military Construction Authorization Act for Fiscal Year 2014 (division B of Public Law 113–66) on awarding a contract for any new military construction and family housing project, with certain exceptions, in the U.S. European Command area of responsibility until the Secretary of Defense certifies to the congressional defense committees that the installations and specific military construction requirements authorized in the Act have been examined as part of the ongoing European Infrastructure Consolidation Assessment, have been determined to be of an enduring nature, and most effectively meet military requirements at the authorized location.

The Senate committee-reported bill contained a similar provision (sec. 2805).

The agreement includes the House provision with an amendment that, for projects authorized in title XXIX of this Act to support the European Reassurance Initiative, would require the Secretary of Defense to provide a military construction project data sheet and certification that a pre-financing statement for eligible projects has been submitted through the North Atlantic Treaty Organization Security Investment Program to the congressional defense committees prior to awarding a contract in connection with any such project.

Extension of temporary, limited authority to use operation and maintenance funds for construction projects in certain areas outside the United States (sec. 2806)

The Senate committee-reported bill included a provision (sec. 2804) that would extend the contingency construction authority contained in section 2808 of the Military Construction Authorization Act for Fiscal Year 2004 (division B of Public Law 108–136), as amended, for an additional year.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Application of residential building construction standards (sec. 2807)

The Senate committee-reported bill included a provision (sec. 2802) that would allow for residential buildings designed and constructed using funds authorized by this Act to meet an above code green building standard or rating system to use the ICC 700 National Green Building Standard, the LEED Green Building Standard System, or an equivalent protocol.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would further modify the list of above code green building standard or rating systems that may be used by the Department of Defense (DOD).

We are concerned that the DOD may not be considering all appropriate voluntary consensus green building systems or standards, as defined in the Office of Management and Budget Circular Number A–119, and their associated certification systems, when performing the renovation or construction of residential buildings. We believe that DOD should consider all appropriate voluntary consensus green building systems or standards and, in doing so, should focus on energy savings and cost-efficiency, using a comprehensive approach that factors in all facets of a green building including costs for certification and overall compliance when determining which green building standard or rating system to use. DOD should also consider using third party verification to ensure design and construction meet the requirements for certification, and include user training and education to ensure the building is operated efficiently.

Limitation on construction of new facilities at Guantanamo Bay, Cuba (sec. 2808)

The Senate committee-reported bill contained a provision (sec. 2806) that would limit funding authorized by the bill for new facilities at Guantanamo Bay, Cuba, until the Secretary of Defense certifies to the congressional defense committees that any new construction of facilities at Guantanamo Bay, Cuba, have enduring military value independent of a high-value detention mission.

The House bill contained no similar provision.

The agreement includes the Senate provision.

We note that the Department of Defense has previously determined that all new facilities at Guantanamo Bay, Cuba, authorized by this Act have enduring military value independent of a high-value detention mission.

Subtitle B—Real Property and Facilities Administration

Renewals, extensions, and succeeding leases for financial institutions operating on military installations (sec. 2811)

The House bill contained a provision (sec. 2812) that would authorize the Secretary concerned to enter into a sole source renewal, extension, or succeeding lease for a financial institution operating on a military installation.

This section would provide for the merger of the reimbursed funds with those in the current appropriation, fund, or account used by the military departments for payment of administrative transaction-related expenses. Finally, this section would authorize the military departments to use operation and maintenance appropriations to pay for administrative expenses needed to complete other real property transactions.

The Senate committee-reported bill included a similar provision (sec. 2811).

The agreement includes the House provision.

The Senate bill contained a related provision (sec. 2821) that would extend the prohibition on funds for construction activities to implement the realignment of Marine Corps forces from Okinawa, Japan, to Guam until certain conditions are met.

The agreement includes the Senate provision with an amendment that would remove the prohibition on construction activities to implement the realignment of Marine Corps forces from Okinawa, Japan, to Guam and replace it with an overall cost cap on such construction, reflecting the July 2014 Master Plan for Guam, subject to inflation and changes in costs to comply with changes in law. The provision would also continue restrictions on the development of public infrastructure on Guam unless a grant, transfer, cooperative agreement, or supplemental funding for the development of public infrastructure is specifically authorized by law and would be used to carry out a project included in the report of the Economic Adjustment Committee required by section 2831(d) of the National Defense Authorization act for Fiscal Year 2014 (Public Law 113–66).

Establishment of surface danger zone, Ritidian Unit, Guam National Wildlife Refuge (sec. 2822)

The agreement contains the House provision with an amendment that would authorize the Secretary of the Army to convey certain Army property at the former Walter Reed Army Medical Center to the Department of State. Furthermore, should the authorized conveyance to the Department of State not occur, the amendment would allow the Secretary of the Army to convey, without consideration, certain property to an authorized recipient for the purpose of permitting the recipient to use the property for the protection of public health, including research.

We note that the Army and Department of State have been pursuing an interagency transfer of property and facilities at the former Walter Reed Army Medical Center since April 2006 and we encourage both agencies to work together to conclude negotiations expeditiously. If the Army pursues the alternative conveyance authority provided by this section, we believe such a conveyance should be conducted in a manner that is consistent with the disposal process of real property for public health, including research, as found in section 550 of title 40, United States Code.

If the Secretary determined that a reversion of the former Camp Gruber is needed for national defense purposes, the Secretary would exercise the reversionary rights and request the Oklahoma Department of Wildlife to reconvey Camp Gruber to the United States. The Secretary would then convey, without consideration, the former Camp Gruber to the Oklahoma Military Department for military maneuver space.

The provision would also provide for the United States, at its election, to exercise reversionary rights to the Memorial if the Secretary of Defense determines that it is ever put to a use other than as a veterans memorial. Exercise of any reversionary rights would be temporary and solely for the purpose of conveying, as expeditiously as practicable, the Memorial to another entity subject to the same conditions in this provision.

The Senate committee-reported bill contained no similar provision.

We note that indoor exposure to mold can cause a variety of negative health impacts, including allergic reactions. We encourage the Department of Defense and the military departments to continue taking cost-effective, timely, and appropriate actions to prevent the formation of, and remediate reported cases of, indoor mold in facilities located on military installations.

Consultation requirement in connection with Department of Defense major land acquisitions

We note that the Department of Defense and the military departments have authorities under sections 2664 and 2684(a) of title 10, United States Code, to enter into agreements with or acquire from willing sellers easements and other interests in real property in the vicinity of military installations and range facilities. In instances where a military installation or range facility is subject to encroachment or other restrictions that may directly or indirectly restrict, impede, or otherwise interfere with current or anticipated military training, testing, or operations, we believe the Department of Defense and military departments should consider the authorities of sections 2664 and 2684(a) of title 10, United States Code, as a possible means to alleviate adverse impacts to military missions.

Sense of Congress on national security and public lands

The House bill contained a provision (sec. 2817) that would express the sense of Congress that national defense should be the top priority for all aspects of the Federal Government, and that national security functions, such as military training and exercises, should be the top priority, particularly with regard to the use of land owned by the United States.

The agreement does not include this provision.

The Department of Defense regularly uses federal land owned by the U.S. Government for military training, including to prepare U.S. forces deploying overseas for the terrain and climate they will encounter, as well as for testing of new military technologies. We note that such access to U.S. federal lands facilitates military preparedness and advances the technological edge of our forces. Therefore, we believe such activities should be given priority consideration with regard to the use of land owned by the United States.

The agreement does not contain this provision.

Additional withdrawal and reservation of public land to support White Sands Missile Range, New Mexico

The House bill contained a provision (sec. 2941) that would amend section 2951 of the Military Construction Authorization Act for Fiscal Year 2014 (division B of Public Law 113–66) and extend the withdrawal and reservation of public land at White Sands Missile Range, New Mexico, to include Federal lands located beneath the boundaries of the Special Use Airspace designated as R–5107C and R–5107H.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that on June 4, 2014, the Secretary of Defense proposed mitigation measures that, if adopted, are intended to address the Department of Defense’s (DOD) concerns with potential impacts to military operations by the SunZia Southwest Transmission project (SunZia). Most notably, the Secretary proposed the burial of a total of approximately five miles, in up to three separate segments, of the SunZia project transmission line along the Bureau of Land Management’s (BLM) preferred alternative route (PAR) north of White Sands Missile Range (WSMR), within an area known as the Northern Extension Area (NEA). We further note that the Secretary’s proposed mitigation plan was accepted by SunZia on July 27, 2014, and is now being reviewed by BLM in the context of an Environmental Assessment that we anticipate will be completed in February 2015.

As we noted in the Joint Explanatory Statement to accompany the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66), we expressed our expectation that DOD concerns would be addressed by the executive branch prior to the conclusion of the environmental review process to preserve the critical testing and training capabilities of WSMR. We continue to have concerns about the impact the SunZia project may have on these capabilities. We are specifically concerned that the mitigation measures proposed by the Secretary of Defense are intended to address existing and expected test profiles, but may not be sufficient to provide for future training and testing requirements at WSMR.

Therefore, we direct the Secretary of Defense to submit a report to the congressional defense committees, concurrent with the com-

pletion of the BLM Environmental Assessment, that assesses the potential impact of the SunZia project on the future training and testing capabilities of WSMR to respond to potential future threats. The report shall include, at a minimum, an explanation of the Secretary's proposed mitigation plan, including:

- (1) How the proposed mitigation plan addresses concerns identified in the "Technical Working Group Report for the SunZia Transmission Line Project" dated August 7, 2013, including the following specific excerpts:

- (a) Line Burial—"The distance required for line burial is 35 miles. This is the minimum distance necessary to prevent impairment of the Nation's unique capabilities to test DOD weapon systems in this location."

- (b) Electromagnetic Interference (EMI)—"Introduction of the 500 kV overhead transmission lines in the NEA would raise the background noise level and create a heat signature that would be detected during infrared (IR) sensor testing. At present, there is very limited EMI interference within the NEA."

- (c) Test mission profiles—"The above-ground construction and introduction of the SunZia transmission line along the FEIS [Final Environmental Impact Statement] PAR places an obstruction in the path of low-level flyers, thus jeopardizing the effective conduct of testing. Targets flying critical low-level profiles would have to "pop up" from those flight levels to avoid transmission lines. The FAA [Federal Aviation Administration] requires a 500 foot buffer above structures for safety considerations. Such a "pop up" would prematurely provide identification and targeting and thus disrupt and invalidate the test mission profile because of the change in the observed background clutter."

- (d) Multiple Simultaneous Engagement (MSE) of Aerial Targets—"The most stressing and complex test missions involve MSE of aerial targets in a single presentation. This requirement alone mandates the 35-mile underground installation of the transmission line to ensure that incoming targets are in the proper alignment to the background clutter for a realistic presentation."

- (2) How the SunZia project and proposed mitigation plan could impact future training and testing events at WSMR;

- (3) An identification of any additional mitigation measures that may be necessary in the future to protect the unique capabilities of WSMR should new training or testing requirements arise; and

- (4) An assessment by the Secretary of the DOD Clearinghouse process as it relates to the SunZia project, including:

- (a) The extent to which the DOD Clearinghouse identified and communicated potential negative impacts of the SunZia project to WSMR in a timely manner; and

- (b) Any legislative or policy changes the Secretary would recommend to improve the ability of DOD Clearinghouse to advocate for and protect DOD equities.

- (5) Any other matters the Secretary deems appropriate.

We note that the report required above is not intended to, in any way, delay the completion of the BLM Environmental Assessment associated with the SunZia Southwest Transmission project.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2015, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; nuclear nonproliferation activities; naval nuclear propulsion; environmental cleanup and other operating expenses. This title authorizes appropriations in five categories: (1) National Nuclear Security Administration; (2) Defense environmental cleanup; (3) Other defense activities; (4) Defense nuclear waste disposal; and (5) Energy security and assurance.

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY
PROGRAMS

Subtitle A—National Security Programs Authorizations

National Nuclear Security Administration (sec. 3101)

The Senate committee-reported bill contained a provision (sec. 3101) that would authorize appropriations for the National Nuclear Security Administration for fiscal year 2015, including funds for weapons activities, defense nuclear nonproliferation programs, naval reactor programs, and Federal Salaries and Expenses (formerly known as the Office of the Administrator), at the levels identified in section 4701 of division D of this Act. This section would also authorize several new plant projects for the National Nuclear Security Administration.

The House reported bill contained a similar provision.

The agreement includes the Senate provision.

Defense environmental cleanup (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize appropriations for defense environmental cleanup activities for fiscal year 2015, at the levels identified in section 4701 of division D of this Act. This section would also authorize several new plant projects for defense environmental cleanup.

The Senate committee-reported bill contained an identical provision (sec. 3102).

The agreement includes this provision.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize appropriations for other defense activities for fiscal year 2015, including funds for Health, Safety, and Security, the Office of Legacy Management, and Nuclear Energy, as identified in section 4701 of division D of this Act.

The Senate committee-reported bill contained an identical provision (sec. 3103).

The agreement includes this provision.

Subtitle B—Program Authorizations, Restrictions, and Limitations

Design and use of prototypes of nuclear weapons for intelligence purposes (sec. 3111)

The House bill contained a provision (sec. 3111) that would update section 3115 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) to provide for the design and use of prototypes of nuclear weapons to further intelligence estimates with respect to foreign nuclear weapons activities.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would permit the Secretary of Energy to submit his views of the programmatic plan for such activities as developed by the National Nuclear Security Administration laboratories.

Plutonium pit production capacity (sec. 3112)

The House bill contained a provision (sec. 3114) that would add a new section to title 42 of the Atomic Energy Defense Act (50 U.S.C. 2521) to require the Secretary of Energy to ensure that the nuclear security enterprise produces at least 30 war reserve pits during 2023, at least 50 war reserve pits during 2026, and, during a pilot period of at least 90 days during 2027, demonstrates the capability to produce war reserve pits at a rate sufficient to produce 80 pits per year. The Secretary of Energy would be required to certify to the congressional defense committees and the Secretary of Defense, by March 1 of each year until 2027, that the programs and budget of the Department of Energy will meet these pit production milestones.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that, in addition to striking the findings, would require initial production of qualification pits in 2021, production of not less than 10 war reserve pits during 2024, production of not less than 20 war reserve pits during 2025, production of not less than 30 war reserve pits during 2026, and a pilot production period during 2027 that demonstrates the capability to produce 80 pits per year. The agreement provides the Secretary of Energy and the Secretary of Defense the authority to delay the requirement for the pilot demonstration in 2027 no more than two years to 2029. If the Secretaries jointly delay the pilot demonstration, they must submit a report to the congressional defense committees describing the justification for the proposed delay, the impacts of the proposed delay on stockpile stewardship, nuclear modernization, life extension programs, future stockpile strategy, and dismantlement efforts, as well as their assessment regarding whether the delay is consistent with national policy regarding creation of a responsive nuclear infrastructure. The Commander, U.S. Strategic Command would also be required to submit a report to the congressional defense committees on the potential risks of the proposed delay in meeting nuclear deterrence requirements and national requirements related to creation of a responsive nuclear infrastructure.

Life-cycle cost estimates of certain atomic energy defense capital assets (sec. 3113)

The Senate committee-reported bill contained a provision (sec. 3111) that would amend the Atomic Energy Defense Act to require that, under Department of Energy Order 413.3, an independent life-cycle cost estimate is conducted prior to certain atomic energy defense capital asset projects that have achieved critical decision 2 in the acquisition process. The provision clarifies that this requirement applies only to atomic energy defense capital assets where the total project cost exceeds \$100.0 million and where the purpose of the capital asset is to perform a limited-life, single-purpose mission.

The House bill contained no similar provision.

The agreement includes Senate provision.

We note that this requirement applies only to single-purpose, limited-life facilities such as the Mixed Oxide Fuel Fabrication Fa-

cility in South Carolina and the Waste Treatment and Immobilization Plant in Washington. It is not intended to be applied to multi-mission, long-life facilities such as the Uranium Capabilities Replacement Project in Tennessee or the replacement facilities for the Chemistry and Metallurgy Research facility in New Mexico. We believe this provision will help reduce the likelihood of large and unexpected increases in life-cycle cost estimates late in the acquisition process for these types of facilities.

Expansion of requirement for independent cost estimates on life extension programs and new nuclear facilities (sec. 3114)

The Senate committee-reported bill contained a provision (sec. 3112) that would require independent cost estimates earlier in the acquisition process for life extension programs and new nuclear facilities.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require an independent cost review at the completion of phase 6.2.

We believe that, in the early stages of concept definition, there are often many options still under consideration and it would not be cost effective to perform a full independent cost estimate for each option. A less formal independent cost review at phase 6.2 has been determined to give sufficient cost guidance to determine which options should proceed further in the acquisition process.

Definition of baseline and threshold for stockpile life extension project (sec. 3115)

The House bill contained a provision (sec. 3114) that would amend section 4713 of the Atomic Energy Defense Act (50 U.S.C. 2753) to clarify that the cost and schedule baseline of a nuclear stockpile life extension project established pursuant to such section shall be the cost and schedule contained in the weapon design and cost report that was required prior to the project entering into the development engineering phase. This section would also lower the threshold for congressional notification on costs per warhead exceeding the baseline from 200 percent to 150 percent.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would clarify that the cost and schedule baseline for a stockpile life extension project would be the cost and schedule described in the first Selected Acquisition Report submitted under section 4217(a) of the Atomic Energy Defense Act (50 U.S.C. 2537(a)).

Authorized personnel levels of National Nuclear Security Administration (sec. 3116)

The House bill contained a provision (sec. 3114) that would amend section 3241A of the National Nuclear Security Administration Act (50 U.S.C. 2441a) to require that, by October 1, 2015, the total number of employees within the Office of the Administrator may not exceed 1,650.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would limit the number of employees to 1,690.

Cost estimation and program evaluation by National Nuclear Security Administration (sec. 3117)

The House bill contained a provision (sec. 3131) that would amend section 3221(h) of the National Nuclear Security Administration Act (50 U.S.C. 2411) to clarify that the term “Administration,” with respect to any authority, duty, or responsibility provided by section 3211, does not include the Office of Naval Reactors.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Cost containment for Uranium Capabilities Replacement Project (sec. 3118)

The House bill contained a provision (sec. 3113) that would amend section 3123 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239), as amended by section 3126 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–966), to clarify that the Secretary of Energy may adjust the statutory cost cap of \$4.2 billion for Phase I of the Uranium Capabilities Replacement Project (UCRP) if, by March 15, 2015, the Secretary of Energy submits to the congressional defense committees a detailed justification for such adjustment.

This provision would also require the Secretary of Energy to certify to the congressional defense committees and the Secretary of Defense by March 1 of each year through 2025, that Phase I of the UCRP will meet the cost cap of \$4.2 billion (as adjusted) and that the UCRP will enable uranium operations in building 9212 of the Y–12 National Security Complex to cease by 2025, while uranium operations begin in a new facility constructed under the UCRP by 2025.

The provision would further require the Secretary of Energy and the Secretary of the Navy to jointly submit a report to the congressional defense committees by March 1, 2015, on implementation of section 3123(e) of National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239), as amended.

The Senate committee-reported bill contained a similar provision (sec. 3113) that would require, before beginning construction of the replacement for building 9212, the technologies (or their substitutes) that are to go into the replacement building have a technology readiness level of at least seven. Technologies (or their substitutes) that were in building 9212 that do not go into the replacement building are also to have a technology readiness level of at least seven.

The agreement includes the House provision with an amendment that combines the two provisions while striking the sense of Congress in the House provision.

Production of nuclear warhead for long-range standoff weapon (sec. 3119)

The House bill contained a provision (sec. 3116) that would require the Secretary of Energy to deliver a first production unit for a nuclear warhead for the long-range standoff weapon not later than September 30, 2025. This provision would also require the Secretary of Energy and the Secretary of Defense to jointly develop a plan to carry out this mandate and require the Secretaries to submit this plan to the congressional defense committees within 180 days after the date of enactment of this Act.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would provide the Commander, U.S. Strategic Command, the ability to defer the first production unit date by up to 1 year if the Commander certifies to the Chairman of the Nuclear Weapons Council and the congressional defense committees that the delay is in the interest of national security and does not negatively affect the ability of the Commander to meet nuclear assurance and deterrence requirements.

Disposition of weapons-usable plutonium (sec. 3120)

The House bill contained a provision (sec. 3117) that would require the Secretary of Energy to specifically carry out construction and program support activities with fiscal year 2015 funds authorized for the Mixed Oxide Fuel Fabrication Facility (MFFF). For construction and program support activities. Program support activities are defined as those activities in support of the design, long-lead equipment, procurement, and site preparation for the MFFF.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would clarify project support activities.

Limitation on availability of funds for Office of the Administrator for Nuclear Security (sec. 3121)

The House bill contained a provision (sec. 3118) that would limit the availability of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 for the National Nuclear Security Administration's (NNSA) Office of the Administrator to not more than 75 percent of the above until several statutorily required reports are submitted to certain congressional committees in 2015. These include:

- (1) The report on stockpile assessments required under section 4205(f)(2) of the Atomic Energy Defense Act (50 U.S.C. 2525(f)(2));
- (2) The Secretary of Energy's portion of the report required by section 1043 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81);
- (3) The annual assessment required under section 3122 of Public Law 112–81; and

(4) The detailed report on the stockpile stewardship, management, and infrastructure plan required by section 4203(b) of the Atomic Energy Defense Act (50 U.S.C. 2523(b)).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Limitation on availability of funds for nonproliferation activities between the United States and the Russian Federation (sec. 3122)

The House bill contained a provision (sec. 3120) that would prohibit the use of fiscal year 2015 funds for the National Nuclear Security Administration (NNSA) for any contact, cooperation, or transfer of technology between the United States and the Russian Federation until the Secretary of Energy, in consultation with the Secretary of State and Secretary of Defense, certifies to the appropriate congressional committees that the Russian Federation is respecting the sovereignty of Ukrainian territory, is no longer acting inconsistently with the Intermediate-range Nuclear Forces Treaty, and is in compliance with the Treaty on Conventional Armed Forces in Europe.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that unless specifically authorized by Congress, International Material Protection, Control and Accounting activities in the Russian Federation, except those associated with the Plutonium Management and Disposition agreement, shall be completed no later than fiscal year 2018. In addition, the amendment prohibits any fiscal year 2015 funding for the transfer of Multiple Integrated Laser Engagement System technology from the United States to the Russian Federation.

We note that the Material Protection, Control and Accounting activities in the Russian Federation has secured nuclear material facilities in Russia since the breakup of the Soviet Union. Assisting Russia in securing nuclear materials has been in the national security interests of the United States. However, given that the majority of work has been completed at facilities over the past 20 years, we believe that physical work on this program should be completed no later than fiscal year 2018. We understand that this is also the target timeframe for completion set by the NNSA. This does not rule out continued exchange of best practices in physical security in such areas as insider threat, developments in security technology, as well as other appropriate compensatory measures or other areas of mutual benefit in securing nuclear material. If areas of concern emerge that require additional physical security work in Russia after fiscal year 2018, and that work is of benefit to the security interests of the United States, it can be part of an annual budget request which can be reviewed by the congressional defense committees. We understand that Rosatom is evaluating the ongoing work with the NNSA and expects to be promptly informed of any change in status of the relationship between Rosatom and the NNSA.

We believe that the NNSA should not be providing Multiple Integrated Laser Engagement System (MILES) technology. We understand MILES technology is a tactical force-on-force trainer employed by the U.S. military and believe it is inappropriate to be providing military-grade technology to the Russian Federation at a time when Russia has exercised aggressive actions towards U.S. partners and allies.

Identification of amounts required for uranium technology sustainment in budget materials for fiscal year 2016 (sec. 3123)

The Senate committee-reported bill contained a provision (sec. 3116) that would require the Administrator for Nuclear Security to include in the fiscal year 2016 budget request a uranium sustainment budget line for technology development past technology readiness level five so that plant-directed research and development (R&D) at facilities such as Y-12 can concentrate on projects involving technology readiness level four and below.

The House bill contained no similar provision.

The agreement includes this provision.

Subtitle C—Plans and Reports

The amendment would also clarify that the advisory board provides advice to the Secretary of Labor instead of the President and that the appointments to the board should reflect a balance of perspectives from the scientific, medical, and claimant communities.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional limitation on availability of funds for Office of the Administrator for Nuclear Security

The House bill contained a provision (sec. 3119) that would limit the availability of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2015 for the National Nuclear Security Administration's (NNSA) Office of the Administrator to not more than 90 percent until the date on which the Administrator for Nuclear Security submits to the congressional defense committees a report on the efficiencies proposed by the 2012 Joint Department of Energy/Department of Defense Study on Potential NNSA Management and Work Force Prioritization Efficiencies.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We believe NNSA and the Department of Energy must undertake robust and continuing efforts to find cost savings and cost avoidances that enable NNSA to work more efficiently and effectively. In the Conference Report accompanying the National Defense Authorization Act for Fiscal Year 2013 (House Report 112-706), we expressed concern that the rise to unprecedented levels of the cost of major stockpile and infrastructure modernization projects leading to slippages in project schedules could undermine the credibility of the nation's nuclear deterrent. We also noted that administrative costs and bureaucracy within the NNSA and the nuclear security enterprise must be reduced and the enterprise must be refocused on accomplishing its mission effectively and efficiently, as well as safely and securely. We remain concerned about these longstanding challenges.

In the context of these concerns, we appreciate the letter of November 4, 2014 from the NNSA Administrator to the House Armed Services Committee, committing to continue efforts to make the nuclear enterprise more efficient. We believe this process to seek efficiencies and productivity gains, proposed by the Administrator in this letter, to be a small but hopeful step in the right direction. We therefore endorse this proposal and direct the Administrator for Nuclear Security, consistent with his commitment, to provide a report to the congressional defense committees by February 28, 2015, on the actions, initiatives, and pilot programs the Administrator will undertake in the remainder of fiscal year 2015 to realize efficiencies within NNSA and the nuclear security enterprise. This report should include specific opportunities identified by the NNSA laboratories and plants and measures to eliminate or streamline burdensome and ineffective transactional oversight.

We further direct the Administrator to submit a report to the congressional defense committees by November 15, 2015, containing the Administrator's assessment of whether the actions, initiatives, and pilot programs previously identified by the Administrator were successful.

Budget increase for defense environmental cleanup

The House bill contained a provision (sec. 3143) that would increase the Department of Energy Environmental Management program by \$20.0 million for defense environmental cleanup offset by an identical amount from the inertial confinement and fusion program.

The House bill contained a provision (sec. 3121) that would prohibit the use of fiscal year 2015 funds for the National Nuclear Security Administration for any defense nuclear nonproliferation activities at sites in the Russian Federation until at least 30 days have elapsed following the date that the Secretary of Energy certifies to the appropriate congressional committees that such sites are not actively engaged in Russian nuclear weapons, intelligence, or defense activities. The prohibition includes a waiver for the President to submit a notification that such a waiver is in the national interests of the United States, that none of the funds will be contributed to Russia's nuclear weapons program, and that a period of 30 days has elapsed following the date of the notification.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The agreement includes the House provision with an amendment that would limit the application of section 55102 of title 46, United States Code, and extend the exemption to cover any floating dry-

dock if the movement occurs within 5 nautical miles of the shipyard or affiliate that owns and operates such floating dry dock, and the floating dry dock:
