3 **Subtitle E—Delaware River Basin**
4 **Conservation**

5 **SEC. 3501. FINDINGS.**

6 Congress finds that—

7 (1) the Delaware River Basin is a national
8 treasure of great cultural, environmental, ecological,
9 and economic importance;

10 (2) the Basin contains over 12,500 square miles
11 of land in the States of Delaware, New Jersey, New
12 York, and Pennsylvania, including nearly 800 square
13 miles of bay and more than 2,000 tributary rivers
14 and streams;

15 (3) the Basin is home to more than 8,000,000
16 people who depend on the Delaware River and the
17 Delaware Bay as an economic engine, a place of
18 recreation, and a vital habitat for fish and wildlife;

19 (4) the Basin provides clean drinking water to
20 more than 15,000,000 people, including New York
21 City, which relies on the Basin for approximately
22 half of the drinking water supply of the city, and
23 Philadelphia, whose most significant threat to the
24 drinking water supply of the city is loss of forests
25 and other natural cover in the Upper Basin, accord-

1 ing to a study conducted by the Philadelphia Water
2 Department;

3 (5) the Basin contributes \$25,000,000,000 an-
4 nually in economic activity, provides
5 \$21,000,000,000 in ecosystem goods and services
6 per year, and is directly or indirectly responsible for
7 600,000 jobs with \$10,000,000,000 in annual
8 wages;

9 (6) almost 180 species of fish and wildlife are
10 considered special status species in the Basin due to
11 habitat loss and degradation, particularly sturgeon,
12 eastern oyster, horseshoe crabs, and red knots,
13 which have been identified as unique species in need
14 of habitat improvement;

15 (7) the Basin provides habitat for over 200
16 resident and migrant fish species, includes signifi-
17 cant recreational fisheries, and is an important
18 source of eastern oyster, blue crab, and the largest
19 population of the American horseshoe crab;

20 (8) the annual dockside value of commercial
21 eastern oyster fishery landings for the Delaware Es-
22 tuary is nearly \$4,000,000, making it the fourth
23 most lucrative fishery in the Delaware River Basin
24 watershed, and proven management strategies are

1 available to increase oyster habitat, abundance, and
2 harvest;

3 (9) the Delaware Bay has the second largest
4 concentration of shorebirds in North America and is
5 designated as one of the 4 most important shorebird
6 migration sites in the world;

7 (10) the Basin, 50 percent of which is forested,
8 also has over 700,000 acres of wetland, more than
9 126,000 acres of which are recognized as inter-
10 nationally important, resulting in a landscape that
11 provides essential ecosystem services, including
12 recreation, commercial, and water quality benefits;

13 (11) much of the remaining exemplary natural
14 landscape in the Basin is vulnerable to further deg-
15 radation, as the Basin gains approximately 10
16 square miles of developed land annually, and with
17 new development, urban watersheds are increasingly
18 covered by impervious surfaces, amplifying the quan-
19 tity of polluted runoff into rivers and streams;

20 (12) the Delaware River is the longest
21 undammed river east of the Mississippi; a critical
22 component of the National Wild and Scenic Rivers
23 System in the Northeast, with more than 400 miles
24 designated; home to one of the most heavily visited
25 National Park units in the United States, the Dela-

1 ware Water Gap National Recreation Area; and the
2 location of 6 National Wildlife Refuges;

3 (13) the Delaware River supports an inter-
4 nationally renowned cold water fishery in more than
5 80 miles of its northern headwaters that attracts
6 tens of thousands of visitors each year and generates
7 over \$21,000,000 in annual revenue through tourism
8 and recreational activities;

9 (14) management of water volume in the Basin
10 is critical to flood mitigation and habitat for fish
11 and wildlife, and following 3 major floods along the
12 Delaware River since 2004, the Governors of the
13 States of Delaware, New Jersey, New York, and
14 Pennsylvania have called for natural flood damage
15 reduction measures to combat the problem, including
16 restoring the function of riparian corridors;

17 (15) the Delaware River Port Complex (includ-
18 ing docking facilities in the States of Delaware, New
19 Jersey, and Pennsylvania) is one of the largest
20 freshwater ports in the world, the Port of Philadel-
21 phia handles the largest volume of international ton-
22 nage and 70 percent of the oil shipped to the East
23 Coast, and the Port of Wilmington, a full-service
24 deepwater port and marine terminal supporting
25 more than 12,000 jobs, is the busiest terminal on

1 the Delaware River, handling more than 400 vessels
2 per year with an annual import/export cargo tonnage
3 of more than 4,000,000 tons;

4 (16) the Delaware Estuary, where freshwater
5 from the Delaware River mixes with saltwater from
6 the Atlantic Ocean, is one of the largest and most
7 complex of the 28 estuaries in the National Estuary
8 Program, and the Partnership for the Delaware Es-
9 tuary works to improve the environmental health of
10 the Delaware Estuary;

11 (17) the Delaware River Basin Commission is a
12 Federal-interstate compact government agency
13 charged with overseeing a unified approach to man-
14 aging the river system and implementing important
15 water resources management projects and activities
16 throughout the Basin that are in the national inter-
17 est;

18 (18) restoration activities in the Basin are sup-
19 ported through several Federal and State agency
20 programs, and funding for those important pro-
21 grams should continue and complement the estab-
22 lishment of the Delaware River Basin Restoration
23 Program, which is intended to build on and help co-
24 ordinate restoration and protection funding mecha-

1 nisms at the Federal, State, regional, and local lev-
2 els; and

3 (19) the existing and ongoing voluntary con-
4 servation efforts in the Delaware River Basin neces-
5 sitate improved efficiency and cost effectiveness, as
6 well as increased private-sector investments and co-
7 ordination of Federal and non-Federal resources.

18 tory of environmental stewardship at Lake Tahoe,
19 including—

20 “(A) congressional consent to the estab-

14 (5) ACTIVATION; WAIVER.—

15 (A) FINDINGS.—Congress finds that—

16 (i) the earliest possible activation of

20 (ii) the obligation to make annual
21 payments for the Sardis future use storage
22 operation, maintenance and replacement
23 costs, capital costs, or interest attributable
24 to Sardis future use storage only arises if,
25 and only to the extent, that an increment

1 of Sardis future use storage is activated by
2 withdrawal or release of water from the fu-
3 ture use storage that is authorized by the
4 user for a consumptive use of water.

5 (B) WAIVER OF OBLIGATIONS FOR STOR-
6 AGE THAT IS NOT ACTIVATED.—Notwith-

11 or any other provision of law, effective as of
12 January 1, 2050—

13 (i) the entirety of any repayment obli-
14 gations (including interest), relating to
15 that portion of conservation storage capac-

20 (ii) any obligation of the State and,
21 on execution and approval of the amended
22 storage contract, of the City and the
23 Trust, under the 1974 storage contract re-
24 garding capital costs and any operation,
25 maintenance, and replacement costs and

1 interest otherwise attributable to future
2 use storage in Sardis Lake is waived and
3 shall be nonreimbursable, if by January 1,
4 2050, the right to future use storage is not
5 activated by the withdrawal or release of
6 water from future use storage for an au-
7 thorized consumptive use of water.

8 (6) CONSISTENT WITH AUTHORIZED PURPOSES;
9 NO MAJOR OPERATIONAL CHANGE.—

10 (A) CONSISTENT WITH AUTHORIZED PUR-
11 POSE.—The amended storage contract, the ap-

13 contract, and the waiver of future use storage
14 under paragraph (5)—

15 (i) are deemed consistent with the au-
16 thorized purposes for Sardis Lake as de-
17 scribed in section 203 of the Flood Control
18 Act of 1962 (Public Law 87–874; 76 Stat.
19 1187) and do not affect the authorized
20 purposes for which the project was author-

22 and

23 (ii) shall not constitute a reallocation
24 of storage.

1 (B) NO MAJOR OPERATIONAL CHANGE.—

2 The amended storage contract, the approval of
3 the Secretary of the amended storage contract,
4 and the waiver of future use storage under
5 paragraph (5) shall not constitute a major oper-
6 ational change under section 301(e) of the
7 Water Supply Act of 1958 (43 U.S.C. 390b(e)).

8 (7) NO FURTHER AUTHORIZATION RE-
9 QUIRED.—This section shall be considered sufficient
10 and complete authorization, without further study or
11 analysis, for—

12 (A) the Secretary to approve the amended
13 storage contract; and

14 (B) after approval under subparagraph
15 (A), the Corps of Engineers to manage storage

3 thereby conveyed to individual Choctaws and
4 Chickasaws, all right, title, and interest in and
5 to land that was possessed by the Nations,
6 other than certain mineral rights; and

7 (B) when title passed from the Nations to

12 water.

13 (2) PERMITTING, ALLOCATION, AND ADMINIS-

7 determine in writing that a 1:1 inflow to export ratio
8 for that increment of increased flow will cause addi-
9 tional adverse effects on listed salmonid species be-
10 yond the range of the effects anticipated to occur to
11 the listed salmonid species for the duration of the
12 salmonid biological opinion using the best scientific
13 and commercial data available; and subject to the
14 condition that any individual sale, transfer, or ex-
15 change using a 1:1 inflow to export ratio adopted
16 under the authority of this section may only proceed
17 if—

18 (A) the Secretary of the Interior deter-
19 mines that the environmental effects of the pro-
20 posed sale, transfer, or exchange are consistent
21 with effects permitted under applicable law (in-
22 cluding the Endangered Species Act of 1973
23 (16 U.S.C. 1531 et seq.), the Federal Water
24 Pollution Control Act (33 U.S.C. 1381 et seq.),

1 and the Porter-Cologne Water Quality Control
2 Act (California Water Code 13000 et seq.);

3 (B) Delta conditions are suitable to allow
4 movement of the acquired, transferred, or ex-
5 changed water through the Delta consistent
6 with existing Central Valley Project and State
7 Water Project permitted water rights and the
8 requirements of subsection (a)(1)(H) of the
9 Central Valley Project Improvement Act; and

10 (C) such voluntary sale, transfer, or ex-
11 change of water results in flow that is in addi-
12 tion to flow that otherwise would occur in the
13 absence of the voluntary sale, transfer, or ex-
14 change;

15 (8)(A) issue all necessary permit decisions dur-
16 ing emergency consultation under the authority of
17 the Secretary of the Interior and Secretary of Com-
18 merce not later than 60 days after receiving a com-
19 pleted application by the State to place and use tem-
20 porary barriers or operable gates in Delta channels
21 to improve water quantity and quality for State
22 Water Project and Central Valley Project south-of-
23 Delta water contractors and other water users,
24 which barriers or gates shall provide benefits for
25 species protection and in-Delta water user water

1 quality, provided that they are designed so that, if
2 practicable, formal consultations under section 7 of
3 the Endangered Species Act of 1973 (16 U.S.C.
4 1536) are not necessary; and

5 (B) take longer to issue the permit decisions in
6 subparagraph (A) only if the Secretary determines
7 in writing that an Environmental Impact Statement
8 is needed for the proposal to comply with the Na-
9 tional Environmental Policy Act of 1969 (42 U.S.C.
10 4321 et seq.);

11 (9) allow and facilitate, consistent with existing
12 priorities, water transfers through the C.W. “Bill”
13 Jones Pumping Plant or the Harvey O. Banks
14 Pumping Plant from April 1 to November 30;

15 (10) require the Director of the United States
16 Fish and Wildlife Service and the Commissioner of
17 Reclamation to—

18 (A) determine if a written transfer pro-
19 posal is complete within 30 days after the date
20 of submission of the proposal. If the contracting
21 district or agency or the Secretary determines
22 that the proposal is incomplete, the district or
23 agency or the Secretary shall state with speci-
24 ficity what must be added to or revised for the
25 proposal to be complete;

1 (B) complete all requirements under the
2 National Environmental Policy Act of 1969 (42
3 U.S.C. 4321 et seq.) and the Endangered Spe-
4 cies Act of 1973 (16 U.S.C. et seq.) necessary
5 to make final permit decisions on water transfer
6 requests in the State, not later than 45 days
7 after receiving a completed request;

8 (C) take longer to issue the permit deci-
9 sions in subparagraph (B) only if the Secretary
10 determines in writing that an Environmental
11 Impact Statement is needed for the proposal to
12 comply with the National Environmental Policy
13 Act of 1969 (42 U.S.C. et seq.), or that the ap-
14 plication is incomplete pursuant to subpara-
15 graph (A); and

16 (D) approve any water transfer request de-
17 scribed in subparagraph (A) to maximize the
18 quantity of water supplies on the condition that
19 actions associated with the water transfer are
20 consistent with—

21 (i) existing Central Valley Project and
22 State Water Project permitted water rights
23 and the requirements of section
24 3405(a)(1)(H) of the Central Valley
25 Project Improvement Act; and

1 (ii) all other applicable laws and regu-
2 lations;

3 (11) in coordination with the Secretary of Agri-
4 culture, enter into an agreement with the National
5 Academy of Sciences to conduct a comprehensive
6 study, to be completed not later than 1 year after
7 the date of enactment of this subtitle, on the effec-
8 tiveness and environmental impacts of salt cedar bio-
9 logical control efforts on increasing water supplies
10 and improving riparian habitats of the Colorado
11 River and its principal tributaries, in the State of
12 California and elsewhere;

13 (12) pursuant to the research and adaptive
14 management procedures of the smelt biological opin-
15 ion and the salmonid biological opinion use all avail-
16 able scientific tools to identify any changes to the
17 real-time operations of Bureau of Reclamation,
18 State, and local water projects that could result in
19 the availability of additional water supplies; and

20 (13) determine whether alternative operational
21 or other management measures would meet applica-
22 ble regulatory requirements for listed species while
23 maximizing water supplies and water supply reli-
24 ability; and

1 (14) continue to vary the averaging period of
2 the Delta Export/Inflow ratio, to the extent con-
3 sistent with any applicable State Water Resources
4 Control Board orders under decision D-1641, to op-
5 erate to a

6 (A) ratio using a 3-day averaging period
7 on the rising limb of a Delta inflow hydrograph;
8 and

9 (B) 14-day averaging period on the falling
10 limb of the Delta inflow hydrograph.

11 (c) OTHER AGENCIES.—To the extent that a Federal
12 agency other than the Department of the Interior and the
13 Department of Commerce has a role in approving projects
14 described in subsections (a) and (b), this section shall
15 apply to the Federal agency.

16 (d) ACCELERATED PROJECT DECISION AND ELE-
17 VATION.—

18 (1) IN GENERAL.—On request of the Governor
19 of California, the Secretary of the Interior and Sec-
20 retary of Commerce shall use the expedited proce-
21 dures under this subsection to make final decisions
22 relating to Federal or federally approved projects or
23 operational changes proposed pursuant to sub-
24 sections (a) and (b) to provide additional water sup-

1 plies or otherwise address emergency drought condi-
2 tions.

3 (2) REQUEST FOR RESOLUTION.—Not later
4 than 7 days after receiving a request of the Gov-
5 ernor of California, the Secretaries referred to in
6 paragraph (1), or the head of another Federal agen-
7 cy responsible for carrying out a review of a project,
8 as applicable, the Secretary of the Interior shall con-
9 vene a final project decision meeting with the heads
10 of all relevant Federal agencies to decide whether to
11 approve a project to provide emergency water sup-
12 plies or otherwise address emergency drought condi-
13 tion.

14 (3) NOTIFICATION.—Upon receipt of a request
15 for a meeting under this subsection, the Secretary of
16 the Interior shall notify the heads of all relevant
17 Federal agencies of the request, including a descrip-
18 tion of the project to be reviewed and the date for
19 the meeting.

20 (4) DECISION.—Not later than 10 days after
21 the date on which a meeting is requested under
22 paragraph (2), the head of the relevant Federal
23 agency shall issue a final decision on the project.

24 (2) MEETING CONVENED BY SECRETARY.—The
25 Secretary of the Interior may convene a final project

1 decision meeting under this subsection at any time,
2 at the discretion of the Secretary, regardless of
3 whether a meeting is requested under paragraph (2).

4 (3) LIMITATION.—The expedited procedures
5 under this subsection apply only to—

6 (A) proposed new Federal projects or oper-
7 ational changes pursuant to subsection (a) or
8 (b); and

9 (B) the extent they are consistent with ap-
10 plicable laws (including regulations).

11 (e) OPERATIONS PLAN.—The Secretaries of Com-
12 merce and the Interior, in consultation with appropriate
13 State officials, shall develop an operations plan that is
14 consistent with the provisions of this subtitle and other
15 applicable Federal and State laws, including provisions
16 that are intended to provide additional water supplies that
17 could be of assistance during the current drought.

18 **SEC. 4002. SCIENTIFICALLY SUPPORTED IMPLEMENTATION**
19 **OF OMR FLOW REQUIREMENTS.**

20 (a) IN GENERAL.—In implementing the provisions of
21 the smelt biological opinion and the salmonid biological
22 opinion, the Secretary of the Interior and the Secretary
23 of Commerce shall manage reverse flow in Old and Middle
24 Rivers at the most negative reverse flow rate allowed
25 under the applicable biological opinion to maximize water

1 supplies for the Central Valley Project and the State
2 Water Project, unless that management of reverse flow in
3 Old and Middle Rivers to maximize water supplies would
4 cause additional adverse effects on the listed fish species
5 beyond the range of effects anticipated to occur to the list-
6 ed fish species for the duration of the applicable biological
7 opinion, or would be inconsistent with applicable State law
8 requirements, including water quality, salinity control, and
9 compliance with State Water Resources Control Board
10 Order D-1641 or a successor order.

11 (b) REQUIREMENTS.—If the Secretary of the Interior
12 or Secretary of Commerce determines to manage rates of
13 pumping at the C.W. “Bill” Jones and the Harvey O.
14 Banks pumping plants in the southern Delta to achieve
15 a reverse OMR flow rate less negative than the most nega-
16 tive reverse flow rate prescribed by the applicable biologi-
17 cal opinion, the Secretary shall—

18 (1) document in writing any significant facts
19 regarding real-time conditions relevant to the deter-
20 minations of OMR reverse flow rates, including—

21 (A) targeted real-time fish monitoring in
22 the Old River pursuant to this section, includ-
23 ing as it pertains to the smelt biological opinion
24 monitoring of Delta smelt in the vicinity of Sta-
25 tion 902;

1 (B) near-term forecasts with available sal-
2 vage models under prevailing conditions of the
3 effects on the listed species of OMR flow at the
4 most negative reverse flow rate prescribed by
5 the biological opinion; and

6 (C) any requirements under applicable
7 State law; and

8 (2) explain in writing why any decision to man-
9 age OMR reverse flow at rates less negative than the
10 most negative reverse flow rate prescribed by the bi-
11 ological opinion is necessary to avoid additional ad-
12 verse effects on the listed fish species beyond the
13 range of effects anticipated to occur to the listed fish
14 species for the duration of the applicable biological
15 opinion, after considering relevant factors such as—

16 (A) the distribution of the listed species
17 throughout the Delta;

18 (B) the potential effects of high entrain-
19 ment risk on subsequent species abundance;

20 (C) the water temperature;

21 (D) other significant factors relevant to
22 the determination, as required by applicable
23 Federal or State laws;

24 (E) turbidity; and

1 (F) whether any alternative measures
2 could have a substantially lesser water supply
3 impact.

4 (c) LEVEL OF DETAIL REQUIRED.—The analyses
5 and documentation required by this section shall be com-
6 parable to the depth and complexity as is appropriate for
7 real time decision-making. This section shall not be inter-
8 preted to require a level of administrative findings and
9 documentation that could impede the execution of effective
10 real time adaptive management.

11 (d) FIRST SEDIMENT FLUSH.—During the first flush
12 of sediment out of the Delta in each water year, and pro-
13 vided that such determination is based upon objective evi-
14 dence, notwithstanding subsection (a), the Secretary of
15 the Interior shall manage OMR flow pursuant to the provi-
16 sions of the smelt biological opinion that protects adult
17 Delta smelt from the first flush if required to do so by
18 the smelt biological opinion.

19 (e) CONSTRUCTION.—The Secretary of the Interior
20 and the Secretary of Commerce are authorized to imple-
21 ment subsection (a) consistent with the results of moni-
22 toring through Early Warning Surveys to make real time
23 operational decisions consistent with the current applica-
24 ble biological opinion.

1 (f) CALCULATION OF REVERSE FLOW IN OMR.—
2 Within 180 days of the enactment of this subtitle, the Sec-
3 retary of the Interior is directed, in consultation with the
4 California Department of Water Resources, and consistent
5 with the smelt biological opinion and the salmonid biologi-
6 cal opinion, to review, modify, and implement, if appro-
7 priate, the method used to calculate reverse flow in Old
8 and Middle Rivers, for implementation of the reasonable
9 and prudent alternatives in the smelt biological opinion
10 and the salmonid biological opinion, and any succeeding
11 biological opinions.

12 **SEC. 4003. TEMPORARY OPERATIONAL FLEXIBILITY FOR**
13 **STORM EVENTS.**

14 (a) IN GENERAL.—

15 (1) Nothing in this subtitle authorizes addi-
16 tional adverse effects on listed species beyond the
17 range of the effects anticipated to occur to the listed
18 species for the duration of the smelt biological opin-
19 ion or salmonid biological opinion, using the best sci-
20 entific and commercial data available.

21 (2) When consistent with the environmental
22 protection mandate in paragraph (1) while maxi-
23 mizing water supplies for Central Valley Project and
24 State Water Project contractors, the Secretary of
25 the Interior and the Secretary of Commerce,

1 through an operations plan, shall evaluate and may
2 authorize the Central Valley Project and the State
3 Water Project, combined, to operate at levels that
4 result in OMR flows more negative than the most
5 negative reverse flow rate prescribed by the applica-
6 ble biological opinion (based on United States Geo-
7 logical Survey gauges on Old and Middle Rivers)
8 daily average as described in subsections (b) and (c)
9 to capture peak flows during storm-related events.

10 (b) FACTORS TO BE CONSIDERED.—In determining
11 additional adverse effects on any listed fish species beyond
12 the range of effects anticipated to occur to the listed fish
13 species for the duration of the smelt biological opinion or
14 salmonid biological opinion, using the best scientific and
15 commercial data available, the Secretaries of the Interior
16 and Commerce may consider factors including:

17 (1) The degree to which the Delta outflow index
18 indicates a higher level of flow available for diver-
19 sion.

20 (2) Relevant physical parameters including pro-
21 jected inflows, turbidity, salinities, and tidal cycles.

22 (3) The real-time distribution of listed species.

23 (c) OTHER ENVIRONMENTAL PROTECTIONS.—

24 (1) STATE LAW.—The actions of the Secretary
25 of the Interior and the Secretary of Commerce under

1 this section shall be consistent with applicable regu-
2 latory requirements under State law.

3 (2) FIRST SEDIMENT FLUSH.—During the first
4 flush of sediment out of the Delta in each water
5 year, and provided that such determination is based
6 upon objective evidence, the Secretary of the Interior
7 shall manage OMR flow pursuant to the portion of
8 the smelt biological opinion that protects adult Delta
9 smelt from the first flush if required to do so by the
10 smelt biological opinion.

11 (3) APPLICABILITY OF OPINION.—This section
12 shall not affect the application of the salmonid bio-
13 logical opinion from April 1 to May 31, unless the
14 Secretary of Commerce finds that some or all of
15 such applicable requirements may be adjusted dur-
16 ing this time period to provide emergency water sup-
17 ply relief without resulting in additional adverse ef-
18 fects on listed salmonid species beyond the range of
19 the effects anticipated to occur to the listed
20 salmonid species for the duration of the salmonid bi-
21 ological opinion using the best scientific and com-
22 mercial data available. In addition to any other ac-
23 tions to benefit water supply, the Secretary of the
24 Interior and the Secretary of Commerce shall con-
25 sider allowing through-Delta water transfers to

1 occur during this period if they can be accomplished
2 consistent with section 3405(a)(1)(H) of the Central
3 Valley Project Improvement Act and other applicable
4 law. Water transfers solely or exclusively through
5 the State Water Project are not required to be con-
6 sistent with subsection (a)(1)(H) of the Central Val-
7 ley Project Improvement Act.

8 (4) MONITORING.—During operations under
9 this section, the Commissioner of Reclamation, in
10 coordination with the Fish and Wildlife Service, Na-
11 tional Marine Fisheries Service, and California De-
12 partment of Fish and Wildlife, shall undertake ex-
13 panded monitoring programs and other data gath-
14 ering to improve the efficiency of operations for list-
15 ed species protections and Central Valley Project
16 and State Water Project water supply to ensure inci-
17 dental take levels are not exceeded, and to identify
18 potential negative impacts, if any.

19 (d) EFFECT OF HIGH OUTFLOWS.—When exercising
20 their authorities to capture peak flows pursuant to sub-
21 section (c), the Secretary of the Interior and the Secretary
22 of Commerce shall not count such days toward the 5-day
23 and 14-day running averages of tidally filtered daily Old
24 and Middle River flow requirements under the smelt bio-
25 logical opinion and salmonid biological opinion, unless

1 doing so is required to avoid additional adverse effects on
2 listed fish species beyond those anticipated to occur
3 through implementation of the smelt biological opinion
4 and salmonid biological opinion using the best scientific
5 and commercial data available.

6 (e) LEVEL OF DETAIL REQUIRED FOR ANALYSIS.—
7 In articulating the determinations required under this sec-
8 tion, the Secretary of the Interior and the Secretary of
9 Commerce shall fully satisfy the requirements herein but
10 shall not be expected to provide a greater level of sup-
11 porting detail for the analysis than feasible to provide
12 within the short timeframe permitted for timely real-time
13 decisionmaking in response to changing conditions in the
14 Delta.

15 **SEC. 4004. CONSULTATION ON COORDINATED OPERATIONS.**

16 (a) RESOLUTION OF WATER RESOURCE ISSUES.—In
17 furtherance of the policy established by section 2(c)(2) of
18 the Endangered Species Act of 1973, that Federal agen-
19 cies shall cooperate with State and local agencies to re-
20 solve water resource issues in concert with conservation
21 of endangered species, in any consultation or reconsulta-
22 tion on the coordinated operations of the Central Valley
23 Project and the State Water Project, the Secretaries of
24 the Interior and Commerce shall ensure that any public
25 water agency that contracts for the delivery of water from

1 the Central Valley Project or the State Water Project that
2 so requests shall—

3 (1) have routine and continuing opportunities
4 to discuss and submit information to the action
5 agency for consideration during the development of
6 any biological assessment;

7 (2) be informed by the action agency of the
8 schedule for preparation of a biological assessment;

9 (3) be informed by the consulting agency, the
10 U.S. Fish and Wildlife Service or the National Ma-
11 rine Fisheries Service, of the schedule for prepara-
12 tion of the biological opinion at such time as the bio-
13 logical assessment is submitted to the consulting
14 agency by the action agency;

15 (4) receive a copy of any draft biological opin-
16 ion and have the opportunity to review that docu-
17 ment and provide comment to the consulting agency
18 through the action agency, which comments will be
19 afforded due consideration during the consultation;

20 (5) have the opportunity to confer with the ac-
21 tion agency and applicant, if any, about reasonable
22 and prudent alternatives prior to the action agency
23 or applicant identifying one or more reasonable and
24 prudent alternatives for consideration by the con-
25 sulting agency; and

1 (6) where the consulting agency suggests a rea-
2 sonable and prudent alternative be informed—

3 (A) how each component of the alternative
4 will contribute to avoiding jeopardy or adverse
5 modification of critical habitat and the scientific
6 data or information that supports each compo-
7 nent of the alternative; and

8 (B) why other proposed alternative actions
9 that would have fewer adverse water supply and
10 economic impacts are inadequate to avoid jeop-
11 ardy or adverse modification of critical habitat.

12 (b) INPUT.—When consultation is ongoing, the Secre-
13 taries of the Interior and Commerce shall regularly solicit
14 input from and report their progress to the Collaborative
15 Adaptive Management Team and the Collaborative
16 Science and Adaptive Management Program policy group.
17 The Collaborative Adaptive Management Team and the
18 Collaborative Science and Adaptive Management Program
19 policy group may provide the Secretaries with rec-
20 ommendations to improve the effects analysis and Federal
21 agency determinations. The Secretaries shall give due con-
22 sideration to the recommendations when developing the
23 Biological Assessment and Biological Opinion.

24 (c) MEETINGS.—The Secretaries shall establish a
25 quarterly stakeholder meeting during any consultation or

1 reconultation for the purpose of providing updates on the
2 development of the Biological Assessment and Biological
3 Opinion. The quarterly stakeholder meeting shall be open
4 to stakeholders identified by the Secretaries representing
5 a broad range of interests including environmental, rec-
6 reational and commercial fishing, agricultural, municipal,
7 Delta, and other regional interests, and including stake-
8 holders that are not state or local agencies.

9 (d) CLARIFICATION.—Neither subsection (b) or (c) of
10 this section may be used to meet the requirements of sub-
11 section (a).

12 (e) NON-APPLICABILITY OF FACCA.—For the pur-
13 poses of subsection (b), the Collaborative Adaptive Man-
14 agement Team, the Collaborative Science and Adaptive
15 Management Program policy group, and any recommenda-
16 tions made to the Secretaries, are exempt from the Fed-
17 eral Advisory Committee Act.

18 **SEC. 4005. PROTECTIONS.**

19 (a) APPLICABILITY.—This section shall apply only to
20 sections 4001 through 4006.

21 (b) OFFSET FOR STATE WATER PROJECT.—

22 (1) IMPLEMENTATION IMPACTS.—The Sec-
23 retary of the Interior shall confer with the California
24 Department of Fish and Wildlife in connection with
25 the implementation of the applicable provisions of

1 this subtitle on potential impacts to any consistency
2 determination for operations of the State Water
3 Project issued pursuant to California Fish and
4 Game Code section 2080.1.

5 (2) ADDITIONAL YIELD.—If, as a result of the
6 application of the applicable provisions of this sub-
7 title, the California Department of Fish and Wild-
8 life—

9 (A) determines that operations of the State
10 Water Project are inconsistent with the consist-
11 ency determinations issued pursuant to Cali-
12 fornia Fish and Game Code section 2080.1 for
13 operations of the State Water Project; or

14 (B) requires take authorization under Cali-
15 fornia Fish and Game Code section 2081 for
16 operation of the State Water Project;

17 in a manner that directly or indirectly results in re-
18 duced water supply to the State Water Project as
19 compared with the water supply available under the
20 smelt biological opinion and the salmonid biological
21 opinion; and as a result, Central Valley Project yield
22 is greater than it otherwise would have been, then
23 that additional yield shall be made available to the
24 State Water Project for delivery to State Water
25 Project contractors to offset that reduced water sup-

1 ply, provided that if it is necessary to reduce water
2 supplies for any Central Valley Project authorized
3 uses or contractors to make available to the State
4 Water Project that additional yield, such reductions
5 shall be applied proportionately to those uses or con-
6 tractors that benefit from that increased yield.

7 (3) NOTIFICATION RELATED TO ENVIRON-
8 MENTAL PROTECTIONS.—The Secretary of the Inte-
9 rior and Secretary of Commerce shall—

10 (A) notify the Director of the California
11 Department of Fish and Wildlife regarding any
12 changes in the manner in which the smelt bio-
13 logical opinion or the salmonid biological opin-
14 ion is implemented; and

15 (B) confirm that those changes are con-
16 sistent with the Endangered Species Act of
17 1973 (16 U.S.C. 1531 et seq.).

18 (4) SAVINGS.—Nothing in the applicable provi-
19 sions of this subtitle shall have any effect on the ap-
20 plication of the California Endangered Species Act
21 (California Fish and Game Code sections 2050
22 through 2116).

23 (c) AREA OF ORIGIN AND WATER RIGHTS PROTEC-
24 TIONS.—

1 (1) IN GENERAL.—The Secretary of the Inte-
2 rior and the Secretary of Commerce, in carrying out
3 the mandates of the applicable provisions of this
4 subtitle, shall take no action that—

5 (A) diminishes, impairs, or otherwise af-
6 fects in any manner any area of origin, water-
7 shed of origin, county of origin, or any other
8 water rights protection, including rights to
9 water appropriated before December 19, 1914,
10 provided under State law;

11 (B) limits, expands or otherwise affects the
12 application of section 10505, 10505.5, 11128,
13 11460, 11461, 11462, 11463 or 12200 through
14 12220 of the California Water Code or any
15 other provision of State water rights law, with-
16 out respect to whether such a provision is spe-
17 cifically referred to in this section; or

18 (C) diminishes, impairs, or otherwise af-
19 fects in any manner any water rights or water
20 rights priorities under applicable law.

21 (2) EFFECT OF ACT.—

22 (A) Nothing in the applicable provisions of
23 this subtitle affects or modifies any obligation
24 of the Secretary of the Interior under section 8

1 of the Act of June 17, 1902 (32 Stat. 390,
2 chapter 1093).

3 (B) Nothing in the applicable provisions of
4 this subtitle diminishes, impairs, or otherwise
5 affects in any manner any Project purposes or
6 priorities for the allocation, delivery or use of
7 water under applicable law, including the
8 Project purposes and priorities established
9 under section 3402 and section 3406 of the
10 Central Valley Project Improvement Act (Public
11 Law 102–575; 106 Stat. 4706).

12 (d) NO REDIRECTED ADVERSE IMPACTS.—

13 (1) IN GENERAL.—The Secretary of the Inte-
14 rior and Secretary of Commerce shall not carry out
15 any specific action authorized under the applicable
16 provisions of this subtitle that would directly or
17 through State agency action indirectly result in the
18 involuntary reduction of water supply to an indi-
19 vidual, district, or agency that has in effect a con-
20 tract for water with the State Water Project or the
21 Central Valley Project, including Settlement and Ex-
22 change contracts, refuge contracts, and Friant Divi-
23 sion contracts, as compared to the water supply that
24 would be provided in the absence of action under
25 this subtitle, and nothing in this section is intended

1 to modify, amend or affect any of the rights and ob-
2 ligations of the parties to such contracts.

3 (2) ACTION ON DETERMINATION.—If, after ex-
4 ploring all options, the Secretary of the Interior or
5 the Secretary of Commerce makes a final determina-
6 tion that a proposed action under the applicable pro-
7 visions of this subtitle cannot be carried out in ac-
8 cordance with paragraph (1), that Secretary—

9 (A) shall document that determination in
10 writing for that action, including a statement of
11 the facts relied on, and an explanation of the
12 basis, for the decision; and

13 (B) is subject to applicable law, including

2 the water management flexibility and reduce
3 impacts on environmental resources from
4 projects operated by Federal and State agen-
5 cies.

6 “(C) Projects that are regional in nature.

7 “(D) Projects with multiple stakeholders.

5 **SEC. 4010. ACTIONS TO BENEFIT THREATENED AND ENDAN-**
6 **GERED SPECIES AND OTHER WILDLIFE.**

7 (a) INCREASED REAL-TIME MONITORING AND UP-
8 DATED SCIENCE.—

9 (1) SMELT BIOLOGICAL OPINION.—The Direc-
10 tor shall use the best scientific and commercial data
11 available to implement, continuously evaluate, and
12 refine or amend, as appropriate, the reasonable and
13 prudent alternative described in the smelt biological
14 opinion.

15 (2) INCREASED MONITORING TO INFORM REAL-
16 TIME OPERATIONS.—

17 (A) IN GENERAL.—The Secretary of the
18 Interior shall conduct additional surveys, on an
19 annual basis at the appropriate time of year
20 based on environmental conditions, in collabora-
21 tion with interested stakeholders regarding the
22 science of the Delta in general, and to enhance
23 real time decisionmaking in particular, working
24 in close coordination with relevant State au-
25 thorities.

1 (B) REQUIREMENTS.—In carrying out this
2 subsection, the Secretary of the Interior shall
3 use—

4 (i) the most appropriate and accurate
5 survey methods available for the detection
6 of Delta smelt to determine the extent to
7 which adult Delta smelt are distributed in
8 relation to certain levels of turbidity or
9 other environmental factors that may influ-
10 ence salvage rate;

11 (ii) results from appropriate surveys
12 for the detection of Delta smelt to deter-
13 mine how the Central Valley Project and
14 State Water Project may be operated more
15 efficiently to maximize fish and water sup-
16 ply benefits; and

17 (iii) science-based recommendations
18 developed by any of the persons or entities
19 described in paragraph (4)(B) to inform
20 the agencies' real-time decisions.

21 (C) WINTER MONITORING.—During the
22 period between December 1 and March 31, if
23 suspended sediment loads enter the Delta from
24 the Sacramento River, and the suspended sedi-
25 ment loads appear likely to raise turbidity levels

1 in the Old River north of the export pumps
2 from values below 12 Nephelometric Turbidity
3 Units (NTUs) to values above 12 NTUs, the
4 Secretary of the Interior shall—

5 (i) conduct daily monitoring using ap-
6 propriate survey methods at locations in-
7 cluding the vicinity of Station 902 to de-
8 termine the extent to which adult Delta
9 smelt are moving with turbidity toward the
10 export pumps; and

11 (ii) use results from the monitoring
12 under subparagraph (A) to determine how
13 increased trawling can inform daily real-
14 time Central Valley Project and State
15 Water Project operations to maximize fish
16 and water supply benefits.

17 (3) PERIODIC REVIEW OF MONITORING.—Not
18 later than 1 year after the date of enactment of this
19 subtitle, the Secretary of the Interior shall—

20 (A) evaluate whether the monitoring pro-
21 gram under paragraph (2), combined with other
22 monitoring programs for the Delta, is providing
23 sufficient data to inform Central Valley Project
24 and State Water Project operations to maxi-

1 mize the water supply for fish and water supply
2 benefits; and

3 (B) determine whether the monitoring ef-
4 forts should be changed in the short or long
5 term to provide more useful data.

7 (A) IN GENERAL.—Not later than March
8 15, 2021, the Secretary of the Interior shall—

9 (i) complete studies, to be initiated by
10 not later than 90 days after the date of en-
11 actment of this subtitle, designed—

12 (I) to understand the location
13 and determine the abundance and dis-
14 tribution of Delta smelt throughout
15 the range of the Delta smelt; and

16 (II) to determine potential meth-
17 ods to minimize the effects of Central
18 Valley Project and State Water
19 Project operations on the Delta smelt;

20 (ii) based on the best available
21 science, if appropriate and practicable, im-
22 plement new targeted sampling and moni-
23 toring of Delta smelt in order to maximize
24 fish and water supply benefits prior to
25 completion of the study under clause (i);

1 (iii) to the maximum extent prac-
2 ticable, use new technologies to allow for
3 better tracking of Delta smelt, such as
4 acoustic tagging, optical recognition during
5 trawls, and fish detection using residual
6 deoxyribonucleic acid (DNA); and

7 (iv) if new sampling and monitoring is
8 not implemented under clause (ii), provide
9 a detailed explanation of the determination
10 of the Secretary of the Interior that no
11 change is warranted.

4 recovery strategy;

5 (B) functioning, diverse, and inter-
6 connected habitats are necessary for a species
7 to be viable; and

8 (C) providing for increased fish habitat
9 may not only allow for a more robust fish recov-
10 ery, but also reduce impacts to water supplies.

20 and beneficial for protecting and recovering a fish
21 population, the Administrator shall commence imple-
22 mentation of the activity by not later than 1 year
23 after the date of enactment of this subtitle.

24 (4) CONSULTATION.—The Administrator shall
25 take such steps as are necessary to partner with,
